

April 11, 2021

Dear Secretary Chiavetta:

I am writing this letter to support the Marple Townships zoning board's decision to deny the special exception in regards to the location of the proposed PECO Gas Expansion Plant/Reliability Station at the corner of Sproul and Cedar Grove Roads.

Let me state the reasons in the following letter. This explains why I am in protest. PECO defies people's will.

1. **Lack of information:** In my community WE, the residents, were not properly notified of the plan to build this expansion plant. I was not aware of it until I accidentally found out when reading a neighbor's comment on social media in October 2020. It appears, only a few people living within 150 feet were notified. A few zoom meetings were held, where PECO selected who would attend each meeting. During these meetings PECO refused to answer detailed questions (i.e. what type/model of heaters would be used, what type of contaminants would they spew, what is the noise decibel output for these six heaters combined, etc.) and did not allow enough public input, limiting people to three minutes (which included the question and answer) and often muting people mid-sentence. Their claim to "extensive written communications with numerous local residents" is just not true.
2. **Unknowns:** At one of the meetings, PECO admitted that this is the "first of its kind" facility in the PECO network and they have no experience constructing or operating such a facility. I am extremely concerned that something that may not have been properly tested in such a location could be catastrophic in terms of lives lost and property damaged. My life is in danger, and no one seems to care.
3. **Dangerous:** This lot is in close proximity to numerous residential areas, at the tip of my street, Mary Lane, right across the Russell Elementary School, next to a busy fast-food restaurant (Freddy's), and a strip of small local business including our Wawa. It also sits at a busy intersection which is prone to vehicular accidents. The speed limit is 40 mph, but is often exceeded because Sproul Road is always avoided and traffic flows through Mary Lane and Cedar Grove as a short cut.
4. **ALREADY UNHEALTHY DUE TO DIGGING OF THE ROADS:**
The smell and fume of tar, dust of cement, sound, noise and inhaling chemicals continue long hours, every day, since last fall. We have been inconvenienced enormously. This is UNFAIR: we are faced with environmental injustice.
5. **PECOs spreads Misleading myths: The** argument that "a collision of a truck with the natural gas expansion plant cannot result in an explosion and/or fire" is misleading. PECO said (in a public forum via Zoom) that "if a truck collided with the facility it would only result in a gas leak, not an explosion, because the natural gas is conveyed in an oxygen deficient engineered environment and therefore cannot explode."
That's true if and only if the gas remains in the controlled conditions of the engineered facility. Once the system was breached by a collision, operating accident or other event, the natural gas would mix with the oxygen in the atmosphere and potentially then be explosive.

PECO cannot legitimately argue that explosion or fire at such a facility is not possible.

6. **DEFIANCE of PUBLIC INTEREST:** Another PECO spokesman (their attorneys) conflated the meaning of the word “gas” when he commented that this location was once a “gas station” and will now just be a “gas reliability station” as if gasoline and natural gas were the same thing. This is profoundly misleading. Gasoline and natural gas share the fact that they are both derived from crude oil/fossil fuel deposits, but their physical and chemical properties and handling risks rapidly diverge from there through processing, distribution and end use. Liquid gasoline is not natural gas, and to suggest by the misuse of the word “gas” is disingenuous and misleading to the public.
7. **LIES:** PECO argues that they must locate this facility in close proximity to the existing gas main running along Sproul Road. They claim it must be within a ½ mile radius of Lawrence and Sproul Rds. But this was before they even began replacing pipe all along Sproul Rd for miles many months ago. This appears to be purely a financial consideration lacking any safety consideration. I see on the docket they claim to have looked at ten other locations, however on the recorded video they claim to have only looked at a few which were all too far away.
8. **WE OFFER CHANGE OF LOCATION:** Alternatively, it would be more advantageous from a public safety perspective to locate this proposed natural gas facility in the Lawrence Park Industrial Center rather than the currently proposed location. At least the Industrial Park is already “industrial”.
9. **PECO CARES FOR MONEY ONLY:** PECO argues this is part of a ten-year plan for future gas needs. Why should future potential residents and businesses be more important than currently existing residents and businesses? How do we know that gas usage will actually go up when Pennsylvania’s goal is to develop more clean energy and move away from fossil fuels?
10. **UNSAFE:** It is apparent to me that the proposed PECO Natural Gas Expansion Plant location at Sproul and Cedar Grove Roads was made with disproportionate weight given to PECO’s convenience and project costs considerations, not public safety. The site selection process should have first defined areas that meet defined and accepted public safety criteria and then within that geographic “safe” envelope, project cost, schedule and PECO convenience factors could optimize the final location. PECO seems to have overlooked, or at least undervalued, public safety considerations in selecting the proposed site.
11. **This facility should not be constructed at my neighborhood. We need you to stop it. Thank you for caring!**

Sincerely,

Nilgun A. Okur

VERIFICATION

I swear that the facts I am presenting in this Protest are true and correct to the best of my knowledge, information, and belief. I understand that the statements I am making in this Protest are made subject to the penalties of 18 Pa. § Section 4904 (relating to unsworn falsification to authorities).

Respectfully Submitted,
Nilgun A. Okur
