Harrisburg, PA 17105-3265

RE: Transfer of SWEPI LP Assets  
SWEPI LP to National Fuel  
Docket Number – M-2012-2282031

Dear Mr. Horensky:

I am writing to inform you that SWEPI LP (Shell) has recently sold all their remaining oil and gas development pipeline assets within Pennsylvania. Ms. Jessalynn Heydenreich (our local contact) has been made aware of the sale. As a result of the sale, the pipeline mileage identified in the March 2020 inventory report will no longer be owned and operated by Shell. The following is a summary of the transferred pipeline mileage.

- Tioga County 140.0 miles of Class 1 Gathering
- Tioga County 11.1 miles of Class 1 Transmission
- Tioga County 2.2 miles of Class 2 Gathering, Transmission and Distribution
- Tioga County 0.5 miles of Class 3 Gathering, Transmission and Distribution

The new owner of these pipelines is National Fuel Gas. The contact person for National Fuel Gas is Rachael Sebesta, her contact information is as follows.

Ms. Rachael Sebesta  
National Fuel Gas  
1100 State Street  
Erie, PA 16501  
Phone: (814) 871-8285  
Fax: (814) 871-8659  
E-mail: [SebestaR@natfuel.com](mailto:SebestaR@natfuel.com)

If you have any questions on this transfer of assets, please feel free to contact me by phone (832-337-0152) or by e-mail ([tim.w.smith@shell.com](mailto:tim.w.smith@shell.com)). National Fuel has taken over the ownership and operation of these lines as of July 31, 2020. National Fuel should be reporting these mileages on their 2020 inventory report due March 2021.

Lastly, Shell would typically expect an assessment fee due in September of this year. Shell is requesting that this assessment be forwarded to the identified contact with National Fuel Gas identified in this letter. If this is not possible and procedures require that the assessment be submitted to Shell please advise via e-mail ([tim.w.smith@shell.com](mailto:tim.w.smith@shell.com)). Because of the asset sale, the address and contact for SWEPI LP has changed.

Sincerely,

Timothy W. Smith, PE  
Sr. Environmental Regulatory Engineer
