# **EXHIBIT 1**

**RULES AND REGULATIONS (continued)**

**8.2 PROCUREMENT BY CUSTOMER.** Customers applying for the construction of an extension may be required to secure to, and for, the Company, all necessary and convenient rights-of-way and to pay any associated costs.

**8.3 DELAYS.** Applications for service from an extension to be constructed where a right-of-way is not owned by the Company will only be accepted subject to delays incident to obtaining a satisfactory right-of-way.

**9. INTRODUCTION OF SERVICE**

**9.1 WIRING IN PROGRESS.** Service-supply lines will not be installed before the time that the customer's wiring of the premises is actually in progress.

**9.2 INSPECTION.** The Company reserves the right to refuse the introduction of service unless a written certificate of approval, satisfactory to the Company, has been received from a competent inspection agency authorized to perform this service in the specific locality in which service is to be provided.

**9.3 COMPANY'S RIGHT TO INSPECT.** The Company shall have the right, but shall not be obliged to inspect, any installation before it begins to deliver electricity or at any later time, and reserves the right to reject any wiring or appliances not in accordance with the Company's standard requirements; but such inspection, or failure to inspect, or to reject, shall not render the Company liable or responsible for any loss or damage, resulting from defects in the installation, wiring, or appliances, or from violation of Company rules, or from accidents which may occur upon the premises of the customer.

# **EXHIBIT 2**

**Underwriter's Cert not required.**

**An Underwriter is NOT Required.**

PECO finds that a customer/contractor has cut-through their service and it isn't being metered,

- We want to be able to set a meter, even **without a certificate**, to starting tracking their usage or consumption.
- It would be up to the technician setting the meter at the property to determine if a shut-off notice should be left at the property, since they would be in the best position to determine if a hazardous condition exists.

If the service is off **less than 6 months** and none of the conditions for obtaining a UAW are on the account

If a **72 hour notice** has been left at the property process the connect. You do not need to determine the length of time the service was off or inactive.

If Notes from Revenue Protection state "hazardous condition" but do not state an underwriter's is required OR there is not a critical contact asking for a UAW

**Important Note:**

When an account is off for 6 months or greater, CIMS may auto-generate an Obligation and place the Connect in a "Held" status.

**Refer to New Business**

**The electric service is Cut-Thru and/or physically on or off due to Contractor Work:** Separation of wiring, service upgrade (i.e. added an additional apartment to the property, remodeling, increase/decrease of customer load, etc.)

**Transfer the call to New Business**

**The electric service is Cut-Thru and/or physically on or off due to Reintroduction of Service:**

Service was removed from the property at the aerial or underground connection and needs to be re-run (i.e. demolition, etc.)

Premise was removed from company records ("off tape") (do not attempt to issue an obligation or document the account. The account is not on the system.

**The electric service is off and there is no meter at the property**

- Explain an underwriter's is required (see above for when a UAW is required)
- Document the customer was advised of the UAW and transferred or referred to New Business
