

Your Honorable Judge DeVoe,

I am writing in reply to the letter received on June 11, 2021 sent by Mr. Christopher Lewis.

On Page 10, session B, Mr. Lewis is asking to strike certain evidence from the record. I respectfully ask that Your Honor take my evidences into consideration for the following reasons:

- 1- Exhibit MM-S-2- The Zoning Hearing Board meeting was posted on social media by the residents of Marple and was the first time I ever heard about the project - Not from PECO, but from a resident. That is when I developed a greater understand of the project and became much more involved in this matter. I understand the parts I put into my evidence were from the Board Hearing transcript also submitted. However, my intent was to highlight/summarize the scope of this project presented by PECO representatives - PECO trying to build an industrial plant in a residential area without taking into consideration the wellbeing of Broomall residents. In my opinion it shows that they did not investigate other locations that may be more suitable for this plant. In addition, my evidence shows the (6) 18ft Smoking stacks and the design of the "fence" which PECO is proposing to install in that location which is not shown on the full Hearing transcript. This is very concerning to me and for this is the reason I respectfully ask that Your Honor to take this evidence into consideration.
- 2- Exhibit MM-S-3 -I personally participated in this meeting. PECO argues that they sent the information in a Prehearing Order. However:
  - a. There could be participants in that meeting that are not an active party, and they would not have received any information at all.
  - b. I am not familiar with any court process and when/how I can access this information. This whole process is very confusing, and PECO cannot expect that I would understand how to access the documents. In my opinion, if they were being honest and open about this plant, we, the residents of Marple, would have received a communication from PECO themselves. I did not receive the direct testimony.For this is the reason I respectfully ask that Your Honor to take this evidence into consideration.
- 3- Exhibit MM-S-4 – The intent of this evidence is to show that using this information, it is my opinion that there is "no rapid growth" in Broomall, thus, we do not need to prepare ourselves for potential gas supply constraints for years to come. There are also other sources of energy supply such as solar. For this is the reason I respectfully ask that Your Honor take this evidence into consideration.
- 4- Exhibit MM-S-7 – My intent with this picture is to show how close Russel Elementary school is from the proposed plant. In my opinion, any reasonable person, especially a mom that has children attending/playing in that school, like myself, would agree that regardless my choice of words, this plant is too close to the school. PECO may want to take that chance of placing a plant at that location, but I do not. In case of an accident, for them it would be a monetary loss. However, for me would mean the life of mine and many other children. Their loss would be easily recoverable, mine would never be. For this is the reason I respectfully ask that Your Honor take this evidence into consideration.

Thank you again so much for taking the time in reviewing my considerations.

Sincerely,

Marilia Mancini-Strong
