RE: Electric Generation Supplier License Application

PA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU

Dear Ms. Christie:

On February 10, 2021, the Public Utility Commission accepted Edison Energy, LLC's application for an Electric Generation Supplier license. The application was incomplete. In order for us to complete our analysis of your application, the Energy Industry Group requires answers to the attached question(s).

Please be advised that you are directed to forward the requested information to the Commission within **30** days from the date of this letter. Failure to respond may result in the application being denied. As well, if Edison Energy, LLC has decided to withdraw its application, please reply notifying the Commission of such a decision.

Please forward the information to the Secretary of the Commission at the address listed below. When submitting documents, all documents requiring notary stamps must have original signatures. Please note that some responses may be e-filed to your case,

A list of document types allowed to be e-filed can be found at

Rosemary Chiavetta, Secretary
Pennsylvania Public Utility Commission
400 North Street
Harrisburg, PA 17120

Your answers should be verified per 52 Pa Code § 1.36. Accordingly, you must provide the following statement with your responses:

I, TIFFANY CHRISTIE hereby state that the facts above set forth are true and correct to the best of my knowledge, information and belief, and that I expect to be able to prove the same at a hearing held in this matter. I understand that the

statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

Rosemary Chilvetta

The blank should be filled in with the name of the appropriate company representative, and the signature of that representative should follow the statement.

In addition, to expedite completion of the application, please also e-mail the information to Jeremy Haring at . Please direct any questions to Jeremy Haring, Bureau of Technical Utility Services, at (preferred) or (717) 783-6175.

Sincerely,

Rosemary Chilvetta

Rosemary Chilvetta
Secretary

EDISON ENERGY, LLC

By: 

Name: Michael A. Henry

Title: Authorized Person

Reference Application, Section 4.a, Present Operations – Applicant stated it is currently doing business in PA. Please explain, in detail, what operations are currently being performed in PA.

Procurement:

Energy commodity procurement is one of Edison Energy's core strengths powered by our seasoned team who are actively monitoring energy markets every day. Our clients value the innovative and thorough approach we take to securing the most reliable and cost-effective energy to meet their needs via either traditional RFP methods, or e-RFP tools.

We believe that market timing is critical to achieving a competitive energy supply price. Edison Energy's proactive approach to monitoring the market for attractive timing opportunities allows us to negotiate the best energy supply contracts and maximize savings for our clients. Certainly, a reactive approach to contracting for supply by sending out RFPs just before contracts mature is simple and safe for an energy management company. This not only ignores market timing opportunities but also reduces negotiating leverage with suppliers, as they realize clients at that point do not have time to properly evaluate alternate supply options. We will deliver the market intelligence and advice to proactively manage your energy portfolio.

Edison Energy has culminated a comprehensive network of well qualified North American energy suppliers through our years of energy advisory. Suppliers know that we are unbiased, fair, and tough. We have earned a reputation for improving the quality of transactions for our clients as well as for the suppliers who serve them. Suppliers understand we know the markets, available options, and contract language, and recognize that we represent a significant client base. We pursue innovative supply options and are extremely detailed throughout the RFP process, which allows us to consistently find the suppliers with the right solution at the best possible price for our clients. We simplify the results for our clients into a concise recommendation.

Our number one goal is to give our clients the best contract for their needs. Each RFP will include a competitive process among the most qualified suppliers available by market area. Each offer is included in a detailed comparative cost analysis which looks at basis/congestion pricing, transportation/transmission, swing/bandwidth, payment terms, and other market and contract components relevant to our clients. This information is presented in a "Offer Results Executive Summary", allowing our clients to make quick and well-informed decisions.

Edison Energy routinely conducts reviews of suppliers' contracts and leads the strategic negotiation process. This diligence helps us spot pricing pitfalls or shifting of risk inserted by the supplier. We navigate the contract negotiation process to avoid unnecessary exposure, financial penalties, and punitive contract terms. Our account managers consistently negotiate the best contract terms, such as;

payment terms, volume tolerances and pricing structures, that are aligned with our client's strategic, financial and operational objectives.

Once an agreement has been reached, Edison Energy initiates the enrollment of the new supplier in accordance with the contract terms. This includes coordination with the supplier and utility contacts to ensure a smooth contract implementation. Careful facilitation of this process is important to avoid costly issues such as delayed or rejected enrollment by the utility, double supply or tariff supply, or billing errors including incorrect billing of exempted taxes.

Natural Gas Asset Management:

Edison Energy stands out in the industry for our functional expertise at strategically and reliably buying, selling, and transporting natural gas for our clients. As a demonstration of our expertise throughout North America, we actively manage gas procurement and delivery to client facilities behind 152 gas utilities and municipalities in 49 states and provinces, and electricity behind 271 electric utilities and municipalities in 47 states and provinces. We maintain a natural gas procurement and operations desk with 24-hour on call coverage.

Risk Management:

The goal of Edison Energy's risk management service is to help clients control energy supply costs and protect them against unwanted exposure and energy price risk. Edison Energy's risk management service consists of the following five steps: Risk Assessment, Strategy Development, Execution, Reporting, and Evaluation/ Modification. Our account managers are actively monitoring the energy markets for our client purchasing and hedging/risk management opportunities.

Edison Energy will work to understand each client's current portfolio condition, define the risk tolerance and refine the goals and objectives of the program. We will also build appropriate protocols for communication and reporting to ensure proper transparency of necessary information and market perspective. As illustrated below, the Risk Assessment phase is broad in scope which helps Edison Energy to establish a customized risk management strategy and identify appropriate execution protocols.

Our team will use our experience, market intelligence, and market analysis tools to establish hedging protocols that are well aligned with a client's goals, objectives, and risk tolerances. We will meet periodically to ensure the risk program is continuously in alignment with current market and usage projections. The strategy serves to provide clear guidelines for hedging activity and aims to eliminate speculative and reactionary decision making.

Once the strategy and policy are established and agreed upon with a client, Edison Energy will actively monitor the market within the context of to the approved policy requirements and protocols. Edison Energy will regularly provide a client market intelligence relative to the key trigger points set as part of the strategy. As hedge positions are executed, Edison Energy will track all transactions in its deal-tracking database and incorporate new hedge transactions into future risk and portfolio reports.

Edison Energy and a client will periodically review the strategy and evaluate performance against targets. Edison may recommend adjustments to the strategy and/or triggers as needed, in response to changing market dynamics. Adjustments to the strategy agreed to by a client will be codified in a revision of the Policy as needed. Other review items will include a review of the market, a client's satisfaction with Edison Energy regarding communications, market intelligence, and execution of the services provided.

Invoice and Settlement Services:

Whether a client manages energy for just a few sites or hundreds—our consolidated invoice payment service handles all of a client's utility invoices, including water, sewer and energy, saving you late fees, penalties and deposits.

Data management services:

We turn invoice information into usable data to help us find ways to save clients money.

Invoice processing services:

We provide a range of payment and processing options; we collect and upload data to the Energy Center Web Portal for viewing, reporting and storage.

Utility Tariff Review:

When warranted, Edison Energy will perform a full tariff review to find additional savings opportunities. We construct a customized rate model specific to the charges applicable to the invoice. We then run the invoice through the account-specific rate model, recalculating each line-item charge and comparing for exact accuracy. Where possible, we flag and recommend opportunities for a client to enhance operations and shift to a different rate regime.

Acting as a client's principal energy provider we will have additional leverage inside of these markets as change can be affected with market knowledge. Edison Energy will pursue identified value propositions with collaboration and help from a client's internal teams.

Promptly after any transactions have been executed, reports are available in the Energy Center, Edison Energy's online client portal, reflecting the impact of these transactions within a client's portfolio. These reports can be customized to a client's requirements and may include tracking hedge positions, budget variances, marked-to-market (MTM) valuations and open position risk. Edison Energy will work with a client to create any specific reports that you may need down to the detail that you require.

Below are examples of reports we often generate for our clients:

Portfolio Position Report detailing the cost and volumes of hedged positions and percent of the portfolio remaining open to market for any given forward month.

Benchmark Comparison Report comparing the current MTM portfolio value with budget expectations and current market conditions to show how the portfolio is performing against these two important benchmarks. Budgets can also be reviewed in a historical context using data obtained from software currently in place. Edison Energy will coordinate with a client to provide reporting that will encompass management reporting needs including but not limited to:

Current and historic pricing for natural gas and electricity

Invoice verification statement of errors

Benchmark reports

Invoice audit discrepancy savings reporting

Cost and consumption reports

Key performance indicators

Edison Energy, LLC is currently providing the above services in PA under our traditional monthly management fee model of service. Edison Energy, LLC is seeking this license to provide these services under a broker model where our consulting services are paid for through a transparent fee added on to our clients supply contracts and paid out through the respective supplier.

Reference Application, Section 8.e, Technical Fitness – Applicant failed to provide detailed professional resumes of its chief officers, to include detailed descriptions on all experience and activities including date ranges. Please provide the missing documentation.

Tiffany Christie

2009 to Present

Managing Director, Supply Advisory

Tiffany Christie is Managing Director of Supply Advisory. She is responsible for the day to day operations of the supply team and guides strategy and direction of the team's operations.

Prior to leading the team, Tiffany was a natural gas account manager for large steel and chemicals clients representing annual natural gas spend of \$450 million. She managed natural gas assets within the most complex markets, including areas with daily balancing requirements and frequent constraint challenges.

Prior to joining Edison, Tiffany's career advanced quickly with a multi-billion-dollar value added steel processor. Her responsibilities included steel sales and direct raw materials purchasing representing over \$600 million annually. With direct commodity purchasing experience, Tiffany is well-positioned to appreciate the needs of Edison's industrial clients and focus on their priorities.

Tiffany joined the Edison team in 2009. She has earned two degrees from The Ohio State University with a degree in business administration majoring in international business and another degree in arts and science majoring in Spanish.

John Reid

2005 to Present

Vice President - Power Services

As Vice President - Power Services, John provides leadership to Edison's team of Electricity and Petroleum account managers. He remains active as an account manager to stay in-touch with the client's most complex energy management needs.

John has 21 years of experience in the energy industry and has worked on both the natural gas and electric sides of the energy management business, thus contributing to his experience and knowledge of the inter-connectedness of the industry. Prior to joining Edison, Reid held a variety of positions with increasing responsibility while working for a utility company. During his tenure there, his general focus was on developing economic energy strategies for large commercial and industrial consumers, at which he excelled and as such was appointed Director of Sales, where he focused on high risk accounts. John has a significant amount of experience in

SECRETARY

the area of energy efficiency, having served as the Project Development Engineer on the team which implemented energy conservation projects for Ohio schools, universities, and prisons.

He holds a Bachelor's degree in industrial & systems engineering from Ohio University as well as an MBA from the University of Dayton.

John is a Chartered Industrial Gas Consultant (CIGC) and Certified Energy Manager (CEM).

Jeff Bolyard

2001 to Present

Vice President - Gas Services

As VP, Gas Services, Jeff leads Edison's Natural Gas account management team and provides the expert guidance needed to prepare for emerging opportunities in the natural gas industry for the benefit of our clients. He remains an active account manager, which keeps him current on market opportunities and trends.

In his 25 years in the industry, Jeff has had experience in working with both regulated and deregulated sides of the natural gas business.

Jeff is passionate about opportunities in emerging fuel technologies and is a member of Clean Fuels Ohio, an organization that provides research on the use of cleaner domestic fuels to the transportation industry, government and the general public.

Jeff is a graduate of Mount Vernon Nazarene University.
