- SO provided a construction update on Vogtle Unit 3. The cold hydro testing (CHT) is done, but hot functional testing (HFT) which involves the pressurization of the nuclear reactor and first-time operations of the steam generator won't start until January 2021. That's later than we had hoped for – we had expected a 1-2 month gap between the end of CHT and the beginning of HFT thus implying a start of HFT by mid-December at the latest. The duration of HFT testing remains unclear though, for now, SO/Georgia Power expect the nuclear fuel load in April 2021. The end of HFT is widely seen as the main de-risking event for the Vogtle nuclear project so the wait continues.
- No changes to our estimates or PT for SO.

Water utilities (AWR/CWT/SJW/WTRG) - Technical trade boosting the group, especially smid caps

- We keep hearing from generalist investors that their equity strategists/internal quant screens predict a rally in stocks of US water utilities. We rarely pay attention to those comments unless they come from a couple unrelated sources and we see the recent consistent outperformance of these names which doesn't seem driven by fundamentals. We like the group based on fundamentals, even with the recent change to water revenue decoupling in CA.
- No changes in estimates or PTs for the water utilities under our coverage.

Utilities Disclosures

I, Angie Storozynski, hereby certify: (1) that all of the views expressed in this report accurately reflect my personal views about any and all of the subject securities or issuers; and (2) that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

As with all employees of Seaport Global Securities LLC, a portion of our analysts' compensation is paid from the total collection of revenues from all areas of the firm including but not limited to Investment Banking and Sales and Trading departments. Utilities

Water Utilities: Updated thoughts following 3Q20 prints/EEI meetings

Summary:
We continue to like water utilities in the US, especially given the recently gained earnings visibility for Buy-rated AWK in NJ and CWT in CA. AWK's large balance sheet makes it best-positioned to benefit from acquisitions of municipally- and privately-owned water and wastewater systems while the company keeps collecting additional water/wastewater service contracts for military bases. Buy-rated AWR has been less lucky in those military contract solicitations though two more of the contracts should be awarded still this year. Worse yet, the work under AWR's existing military contracts has been delayed due to COVID. The re-rating of CWT's stock on the back of its general rate case decision in CA came earlier than we hoped and the stock now looks (almost) fairly valued to us. SJW's 2021 guidance, if any, could disappoint due to the potential impact of La Nina on SJW's surface water production volumes in CA and some uncertainty related to the upcoming rate case in CT. WTRG pushes back against the discounted valuation of its gas LDC given its strong growth prospects, which we don't dispute, though we look toward the proposed DELCORA wastewater system acquisition in PA to change WTRG's earnings mix more toward water.
We continue to chase AWK hence we increased our PT to $175 from $152. We tweaked earnings estimates for AWK/AWR/CWT/SJW.

Highlights

AWK (Buy, PT $175 up from $152): A large balance sheet and a strong ESG profile increasingly matter among regulated water utilities in the US especially as acquisitions of municipally- and privately-owned water and wastewater systems continue to gain momentum. We reiterate our Buy rating on AWK, marginally raise estimates, and (again) increase our PT to $175 from $152 as we continue to chase the stock.

AWR (Buy, PT $83 unchanged): We were surprised by ongoing COVID-related delays of work under AWR's military water/wastewater contracts. Worse yet, AWK rather than AWR has been awarded the latest (and the largest) military contract though we await updates on two more contract awards over the next 45 days. We can live with eventual changes to AWR's full water revenue decoupling in CA as long as the company secures additional military contracts. We stick to our Buy rating and $83 PT.

CWT (Neutral, PT N/A): We delayed any rating changes on CWT until after its 3Q20 earnings print, in anticipation of yet another big earnings miss vs. consensus given the lack of a final decision in CWT's general rate case in CA. Yet, management decided to book an earnings catch up related to the rate case already in 3Q20 based on a Proposed Decision and comments on it from the CPUC consumer advocate. The stock jumped ~14% during a week following its earnings print vs. ~4% for XLU and ~5% for smid cap water names. Now, CWT trades at just a 4% 2022 P/E discount to an average regulated water utility in the US which seems almost fair to us. Therefore, we stick to our Neutral rating.

SJW (Neutral, PT N/A): San Jose Water's Monterey-style WRAM benefited SJW's earnings thanks to favorable weather and a COVID-related uptick in residential sales, though the earnings uplift was a bit lower than we had hoped. We remain concerned about the potential impact of the ongoing La Nina and the uncertainty surrounding the upcoming rate case in CT on SJW's 2021 guidance, if the company even decides to issue one in early 2021. Therefore, we remain on the sidelines on SJW even though the stock trades at a 15% 2022 P/E to an average regulated water utility.

WTRG (Neutral, PT N/A): While we share WTRG's rate base/earnings growth expectations for its gas LDC, we look to the pending acquisition of the DELCORA wastewater system in PA as a way to boost WTRG's earnings mix more towards water. We remain on the sidelines until we get more legal/regulatory clarity on this large wastewater system acquisition.

American Water Works Company, Inc.

(NYSE: AWK)

Size & pure-play profile increasingly matter in US water sector; raising PT

Summary:
A large balance sheet and a strong ESG profile increasingly matter among regulated water utilities in the US especially as acquisitions of municipally- and privately-owned water and wastewater systems continue to gain momentum. We reiterate our Buy rating on AWK, marginally raise estimates, and (again) increase our PT to $175 from $152 as we continue to chase the stock.
We met with AWK's management during the annual EEI conference.

Highlights

NJ rate case: The NJ BPU approved AWK's general rate case settlement in the state and in general, the order seemed constructive. AWK received a $39MM increase in annual revenues (vs. $87.7MM requested) starting Nov 1, 2020, based on a rate base of $3.57B (down $69MM from the requested level), an allowed ROE of 9.6% (vs. 10.5% requested, but flat vs. the previous ROE) and an equity ratio of 54.6% (marginally up from 54% previously). The settlement and thus the final order didn't include acquisition adjustments related to the goodwill paid in Shorelands/Haddonfield/ Roxbury transactions or a revenue stabilization mechanism (aka revenue decoupling). We expect NJ AWK to ask for decoupling in the next rate case, while the acquisition adjustments for avoided capex related to privately-owned water/wastewater systems should be decided by the BPU within the next 2-3 months. The Board previously found that an acquisition adjustment is appropriate only when a utility can demonstrate specific benefits to its incumbent customers (rather than just for the system being acquired) stemming from the proposed acquisition or when the system being acquired is distressed. AWK believes the acquisition premium should be recoverable because the three transactions should result in avoided capital spending over the next 5-10 which should be in excess of that the premium over the book value that AWK paid. For now, the $31MM is not included in AWK's rate base and while it's very small vs. AWK's $14.6B total rate base, the BPU ruling in these acquisition adjustment cases could have very meaningful implications for any future larger acquisitions of investor-owned water utilities in NJ, we believe.

NY asset sale: Management still hopes to close its pending sale of NY operations to Liberty Utilities in early 2021 despite delays from the NY PSC to allow for municipalization plans being filed in Long Island and now proposed legislative initiatives. Gov. Cuomo recently proposed a new bill which, among others, would "expedite and clarify the process of utility franchise revocation for recurring failures" and require the NY PSC to study "whether private water suppliers like American Water on Long Island should come under municipal control". The new legislation would require the NY PSC to issue a report on the potential municipalization of the Long Island water utilities by April 2021, but AWK hopeful the regulatory review of the Liberty Utilities deal could be concurrent with PSC's work on this report.

Military contracts: AWK awaits two more military water/wastewater contracts awards this year – the last three contracts were awarded exclusively to AWK though for now we assume the next two contracts should be split between AWK and AWR. Management reminded us that back in 2000, AWK faced 10 competitors in military water/wastewater contract solicitations, but AWR is now the only credible competitor. AWK won't provide any disclosures on the profitability of this segment of its market-based businesses, partly because that would allow us to back into profit margins for the highly competitive

homeowners' services business, but we see these 50-year inflation-adjusted contracts as even more lucrative than any of AWK's regulated utility franchises.

Changes to estimates and PT: AWK raised its 2020 GAAP EPS guidance to $3.87-3.93 up from $3.79-3.89. The guidance includes a $0.05 EPS net hit related to COVID and a summer weather benefit ($0.10) as well as a $0.06 lower depreciation expense related to the NY system held for sale. The $0.06 benefit was not included in the original adjusted EPS guidance range and is excluded from our estimates. Still, given the strong 3Q20 print, we raised our 2020 adjusted EPS estimate to $3.87 up from $3.85. We marginally increased our 2021/2022 EPS estimates to reflect the recently awarded military contract which was much larger than expected. Our new 2021/2022 EPS estimates are $4.25/4.60 up from $4.23/4.59. We continue to chase the stock even though the P/E multiple is increasingly hard for us to defend. Our new PT of $175 (up from $152) implies a 38x 2022 P/E multiple.

Company Description:
AWK is the largest publicly-traded regulated water and wastewater utility in the US with operations in 16 states, primarily in the Northeast and the Midwest, serving 3.4 million customer accounts. AWK also engages in unregulated contract-based water/wastewater services for military bases (17 bases) and provides water/wastewater line warranty services (homeowner services) to ~1.5 million residential accounts.

COVID continues to impact execution of military contracts; still awaiting new contract awards

Summary:
We were surprised by ongoing COVID-related delays of work under AWR's military water/wastewater contracts. Worse yet, AWK rather than AWR has been awarded the latest (and the largest) military contract though we await updates on two more contract awards over the next 45 days. We can live with eventual changes to AWR's full water revenue decoupling in CA as long as the company secures additional military contracts. We stick to our Buy rating and $83 PT.

Highlights

Military contracts: AWR awaits awards of two military water/wastewater contracts awards over the next 45 days – the last three contracts were awarded exclusively to AWK though for now we assume the next two contracts should be split between AWR and AWK. COVID continues to delay some current work and expansions of scope of some of AWR's current military contracts. As a result, management now expects to earn only $0.46 in 2020 EPS for this segment (ASUS) and for the earnings to stay largely flat YoY in 2021 assuming the COVID pandemic continues.

Modifications to full water decoupling (WRAM) and GSWC's pending rate case: We continue to expect the recent full WRAM changes to affect AWR's/GSWC's earnings only in 2025, if at all. Management insists the company should do just fine even under the new Monterey-style WRAM, and GSWC has a history of earning at least its allowed ROE on the water side. We are still hopeful the Commission could change its mind on the full WRAM, especially that all investor-owned water utilities in CA with the full WRAM have asked for the rehearing of the CPUC decision and, if unsuccessful, seem willing to challenge the decision in courts. The current term of Comm. Guzman-Aceves, the author of the WRAM change, should expire by the end of 2022, i.e. before the filing of GSWC's next general rate case.

Changes to estimates: We lowered our estimates to reflect the weaker earnings for existing military contracts (ASUS) and some uncertainty around new contract awards given that AWK (rather than AWR) has been winning all of the recent awards. Our new 2020/2021/2022 EPS estimates are $2.29/2.39/2.56 down from $2.33/2.45/2.61, respectively.

Company Description:
AWR is the parent of Golden States Water Co. (GSWC), a regulated water (261,000 water connections in 37 systems), Beaver Valley Electric Service (BVESI), an electric utility (24,400 electric connections in one system) in CA, and American States Utility Services (ASUS), which engages in contract-based water and wastewater services primarily for military bases, currently 11 bases.

California Water Services Group

(NYSE: CWT)

Re-rating came faster than we expected

Summary:

We delayed any rating changes on CWT until after its 3Q20 earnings print, in anticipation of yet another big earnings miss vs. consensus given the lack of a final decision in CWT's general rate case in CA. Yet, management decided to book an earnings catch up related to the rate case already in 3Q20 based on a Proposed Decision and comments on its from the CPUC consumer advocate. The stock jumped ~14% during a week following its earnings print vs. ~4% for XLU and ~5% for smid cap water names. Now, CWT trades at just a 4% 2022 P/E discount to an average regulated water utility in the US which seems almost fair to us. Therefore, we stick to our Neutral rating.

Highlights

2020 earnings catch up came earlier and was bigger than we expected: CWT booked YTD adjustments to its CA earnings in 3Q20 based on a Proposed Decision (PD) in its pending general rate case (GRC) and comments from the consumer advocate on the PD. We were clearly surprised by this move as CWT's management tends to be very conservative on any regulatory adjustments. The earnings adjustments were meaningfully higher than we had anticipated, even adjusting for the accelerated true up in YTD earnings, and seemed driven by one-time adjustments for the 2017 TCJA-related tax customer refund. This is why our 2021/2022 estimates, which drive our rating, remained unchanged while our 2020 estimates went up sharply.

Change to CWT's full revenue decoupling (WRAM) only in 2023, if at all: In late August, the CPUC removed the full water revenue decoupling (WRAM) for all four investor-owned water utilities in CA which currently use the mechanism, including CWT. The Commission ruled that the WRAM removal should impact "any future general rate case applications filed after the effective date of this decision". The PD agreed with CWT's stance and as a result, CWT's earnings in CA should be impacted only starting 2023 if at all. CWT along with the remaining three investor-owned water utilities in CA have asked for rehearing of the CPUC decision, and if unsuccessful, the utilities seem ready to challenge the decision in courts.

Estimates and valuation: We raised our 2020 estimates (to $1.87 from $1.49) to reflect YTD results and cost deferrals which meaningfully exceeded our expectations. Our 2021-2022 estimates remain unchanged. Following a recent rally, CWT not trades at just a 4% discount to an average regulated water utility which seems almost fair to us. The company has highly underinvested utility assets in CA, but management's conservatism results in volatility in earnings which in effect reduce the rate base growth appeal of CWT. Therefore, we remain on the sidelines.

Company Description:

CWT operates regulated water and wastewater utilities in CA, WA, HI and NM, with 490,000 connections in CA (90%), 36,000 connections in WA (recently doubled through an acquisition), 5,000 in HI, and 8,300 connections in NM.

Essential Utilities, Inc.

(NYSE: WTRG)

DELCORA deal is increasingly important as it should dilute gas LDC exposure

Summary:
While we share WTRG's rate base/earnings growth expectations for its gas LDC, we look to the pending acquisition of the DELCORA wastewater system in PA as a way to boost WTRG's earnings mix more towards water. We remain on the sidelines until we get more legal/regulatory clarity on this large wastewater system acquisition.

Highlights

Gas LDCs and ESG investing: We continue to project a ~9% annual rate base growth for WTRG's Peoples in PA, but investors increasingly question the longevity of this infrastructure replacement cycle given the growing push to decarbonize house heating in Europe. Ongoing gas pipe replacement should continue to reduce methane leaks and blending of RNG should lower the carbon footprint of gas LDCs without any detriment to their earnings growth over the next decade if not longer, we believe, as electric heat pumps gain on popularity. In other words, we don't expect the rate base growth of gas LDCs especially those in gas-supportive states like PA to slow down any time soon. However, the marginal US water utility investor seems to have a strict ESG mandate and WTRG's 30% of earnings coming from gas LDCs seems to diminish the investment appeal of WTRG's stock. The DELCORA acquisition, if successful, should reduce the gas LDC earnings contributions hence the transaction is increasingly important for the stock.

DELCORA acquisition: WTRG has $363MM in pending muni water/wastewater deals in PA (and TX), the largest backlog we can recall in Aqua's/WTRG's history. The backlog includes the DELCORA wastewater acquisition ($276.5MM) which continues to face legal challenges, but WTRG's management feels comfortable with its ability to close the transaction in late March/April 2021, following a delayed PA PUC review. WTRG/ Aqua PA insists that they have a legally binding asset purchase agreement (APA) for the wastewater system, but courts should rule on the APA validity only within the next 60 days. The DELCORA transaction should be additive to WTRG's water earnings only in 2022 following Aqua PA's rate case to be filed next year.

Estimates and valuation: WTRG's 3Q20 earnings and management's guidance toward the high-end of its 2020 EPS target range came in line with our expectations. Our 2020-2022 EPS estimates remain unchanged. We recognize that WTRG's gas utility is in good regulatory jurisdictions and has strong rate base/earnings growth prospects, similar to those of ATO. WTRG's water utility is an average grower unless the company should be successful with the DELCORA acquisition, we believe. Excluding the DELCORA deal, WTRG's stock now adequately reflects its current earnings mix and growth prospects, we believe. Therefore, we remain on the sidelines until we grow more comfortable with the DELCORA deal actually closing.

Company Description:
WTRG owns and operates water utilities (1 million accounts) and gas utilities (0.74 million accounts) in 10 states though mainly PA.

SJW Group
(NYSE: SJW)

2021 guidance, if any, could disappoint

Summary:
San Jose Water's Monterey-style WRAM benefited SJW's earnings thanks to favorable weather and a COVID-related uptick in residential sales, though the earnings uplift was a bit lower than we had hoped. We remain concerned about the potential impact of the ongoing La Nina and the uncertainty surrounding the upcoming rate case in CT on SJW's 2021 guidance, if the company even decides to issue one in early 2021. Therefore, we remain on the sidelines on SJW even though the stock trades at a 15% 2022 P/E to an average regulated water utility.

Highlights

Tweaking estimates: We trimmed our recently increased 2020 EPS estimate to $2.04 from 2.05 based on SJW's 3Q20 earnings print. Our 2021/2022 EPS estimates remain unchanged. We continue to be concerned about SJW's 2021 EPS guidance range given the likely La Nina impact on its surface water production levels as well as an uncertain outcome of its CT rate case. We wouldn't be surprised if management decided not to provide 2021 EPS guidance in early 2021 which would not be well-received, we believe. Please see our most recent note on SJW for our latest thoughts on the name.

Company Description:
SJW Group is a regulated water and wastewater utility serving ~390,000 accounts across CA, CT, TX and ME. SJW merged with Connecticut Water Service in October 2019.

Utilities Disclosures

I, Angie Storozynski, hereby certify: (1) that all of the views expressed in this report accurately reflect my personal views about any and all of the subject securities or issuers; and (2) that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

As with all employees of Seaport Global Securities LLC, a portion of our analysts' compensation is paid from the total collection of revenues from all areas of the firm including but not limited to Investment Banking and Sales and Trading departments. In no instance are research analysts' compensation directly derived from Investment Banking revenues.

Risks & Considerations for American Water Works Company, Inc. American Water Works Company, Inc. (AWK)

Allowed ROEs for AWK's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings.

Lower sales volumes could weigh on AWK's realized ROEs and thus earnings: A utility can see a meaningful deficiency between its realized and allowed ROE depending on the level of sales volumes and operating expenses. While the latter can be controlled, sharp reductions in sales volumes due to energy efficiency (residential and commercial sales) or closure of industrial facilities. The latter is particularly pronounced during the COVID pandemic. The sharply lower C&I sales volumes could weigh on utility earnings beyond 2020. While rate cases could true up sales volume assumptions, utilities could delay rate filings because their ROE could be reduced during those proceedings on the back of sharply lower interest rates.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. AWK has a particularly busy regulatory calendar in 2020, with rate cases in three of its largest jurisdictions – NJ, PA and MO.

Potentially higher equity needs due to weakening operating cash flows and underfunded pension funds: Lower customer collections (due to lower sales or non-payment) coupled with growing federal cash taxes and underperforming pension funds should be weighing on operating cash flows of regulated utilities especially during/following the COVID-19 pandemic. That in turn could require some deleveraging of balance sheets of regulated utilities thus more equity. AWK already announced ~$500m in new equity as soon as 2022, but the issuances could be enlarged and accelerated to protect AWK's credit ratings.

Risks & Considerations for American States Water Company American States Water Company (AWR)

AWR's water utility (GSWC) could see volatility in earnings due to usage: The CPUC recently modified the full water decoupling mechanism (WRAM). While it should not impact GSWC until the next rate case, covering 2025-2027, CA utility consumer advocates push for an immediate change to the decoupling mechanism. GSWC has always excelled at earning at least its allowed ROE in CA, but it could prove challenging with WRAM.

Allowed ROEs for AWR's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. AWR's allowed ROE for its water utility for 2022-2024 should be set by late 2021 in a cost of capital proceeding.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. AWR should be filing a new water rate case by July 2020 with new rates in effect in January 2021.

Returns in pension accounts impact AWR's earnings in between rate cases in CA: AWR has no balancing account tracking changes in returns in its pension accounts. Those changes can be trued up/reflected in AWR's rates during rate cases, but those take place every three years.

Military contracts are highly competitive: Through its unregulated ASUS subsidiary, AWR provides water and wastewater services to 11 military bases. The company awaits awards of up to three more of these contracts in 2020. We assume that AWR secures at least one new military contract per year in 2020-2022 though AWK, AWR's largest competitor, has been winning most of the contract awards as of late.

Risks & Considerations for California Water Services Group California Water Services Group (CWT)

Allowed ROEs for CWT's regulated water utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. CWT's allowed ROE for its water utility for 2022-2024 should be set by late 2021 in a cost of capital proceeding.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. CWT awaits a proposed decision in its 2018 general rate case in CA with rates retroactive to January 1, 2021. Though the utility reached a partial settlement with the consumer advocate late in 2019, outstanding issues involve the continuation of the revenue decoupling and balancing accounts for pension and medical expenses. Without those, CWT could see a meaningful spike in its earnings volatility.

Risks & Considerations for SJW Group SJW Group (SJW)

Allowed ROEs for SJW's regulated water utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. SJW's allowed ROE for its CA water utility for 2022-2024 should be set by late 2021 in a cost of capital proceeding.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. SJW should file a rate case for its new CT business in 2021. Also, the CA utility of SJW should go through a general rate case in the state in 2021 and state regulators could attempt to claw-back some synergies related to the recent merger with CTWS.

SJW's CA earnings are highly volatile: Now that SJW no longer has even a temporary decoupling mechanism in CA, it's CA earnings change along with changes in volumes and changes in purchased water costs. SJW plans to ask for a purchased water cost balancing account in the next rate case in CA, but that means that 2021 could be another weak earnings year before the regulatory fix arrives for 2022, if at all.

Risks & Considerations for Essential Utilities, Inc. Essential Utilities, Inc. (WTRG)

Allowed ROEs for WTRG's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average

10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. WTRG's only pending rate case (in NC) is very small.

Lower sales volumes could weigh on WTRG's realized ROEs and thus earnings: A utility can see a meaningful deficiency between its realized and allowed ROE depending on the level of sales volumes and operating expenses. While the latter can be controlled, sharp reductions in sales volumes due to energy efficiency (residential and commercial sales) or closure of industrial facilities. The latter is particularly pronounced during the COVID pandemic. The sharply lower C&I sales volumes could weigh on utility earnings beyond 2020. While rate cases could true up sales volume assumptions, utilities could delay rate filings because their ROE could be reduced during those proceedings on the back of sharply lower interest rates.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, it's up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. WTRG's regulatory calendar is quiet in 2020, with a pending small rate case in NC, and a likely filing for a catch-up repair tax adjustment for Peoples in PA.

Gas utilities have a higher operating risk than water utilities: Over-pressurized gas systems seem to happen more frequently among gas utilities in the US. While we recognize that Peoples Gas is a well-managed system, WTRG's risk profile could further deteriorate with any gas-related operational issues. Additionally, investors increasingly scrutinize the carbon footprint of gas LDCs which in turn weighs on their market valuations.

Other Companies Mentioned in This Report

- American Water Works Company, Inc. (AWK: $161.31, Buy)
- California Water Services Group (CWT: $52.38, Neutral)
- Essential Utilities, Inc. (WTRG: $44.71, Neutral)
- American States Water Company (AWR: $77.20, Buy)
- SJW Group (SJW: $66.17, Neutral)

Two Intervenor Holdouts Take the Merger down a Litigated Path

During the hearing yesterday at the PA Public Utilities Commission for the merger between WTR and Peoples, it was disclosed that WTR reached a settlement with most intervenors in the case, with the exception of two parties to the docket: the Bureau of Investigation and Enforcement (BIE) and the Office of Small Business Advocate (OSBA). WTR filed an 8K today with little detail regarding the sticking points for the two intervenors; however, as we understand it, BIE (which is effectively the PUC Staff) disagrees with an aspect of the settlement reached with the other parties related to a small gas system (Goodwin Tombaugh ~1,600 customers) within Peoples. As a result of failing to reach an all-party settlement, the merger case will have to proceed through a litigated process to address the outstanding issues. Although at this stage we don't believe the issues put the transaction in jeopardy, this development is disappointing. We had anticipated that WTR would be successful in reaching settlement with all parties based on the confidence that management portrayed earlier in the process, as well as indications that transaction financing would only be issued when there was "line of sight" to merger close. In April, WTR issued $900MM debt, $650MM convertible equity units, and ~$1.3B in common equity, in addition to another $750MM that will be placed privately upon merger close.

Peoples Rate Case

The Peoples rate case is proceeding on a parallel path at the PA commission. Settlement discussions are expected to begin ~early-July and WTR expects to be more active in Peoples' rate case once settlement discussions begin. Rate case proceedings in PA have a history of settlement. It remains unclear if/how the intervenor issues in the merger docket would weave into the rate case.

Next Steps

Briefs in the merger docket are due July 10 and reply briefs are due July 25. WTR now expects the merger to close fall 2019, as opposed to its original projection for a close in mid-2019.

Valuation: $42 Price Target

We value WTR at a 25.2x P/E on 2021e EPS of $1.68.

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.
Our price target is premised upon a 1% discount to the 2021 average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 6% premium to reflect operations in six Fair Market Value states, and 7% discount to reflect impact of lower P/E associated with gas earnings.

Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 March 2019.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

Copyright aquaamerica.com

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Daniel Ford, CFA; Rose-Lynn Armstrong.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a System, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other

areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

Regulated Utilities: Strong Weather Comparison

We expect favorable weather conditions helped offset the impact of the pandemic on demand. 2Q'20 degree days rose 12% above last year and 9% above normal with the biggest impacts in the Midwest and Northeast. Our forecasts average 5% above consensus and 2% above 2Q'19. Consensus may still be developing but we see few if any shortfalls versus consensus. Names that will likely create the most interest for investors are Buy-rated DTE, DUK, PCG, PEG and SRE and Neutral-rated EVRG, PNW and SO. Our water utility forecasts are in line with consensus with positive quarters for Neutral-rated AWK and AWR. We expect to hold a conference call on Monday, July 20 at 10 AM with a dial in number of 800-950-3502 and a code 21966464.

Power: 2Q Beats on Weather and Retail Acquisitions; Updating UBSe EBITDA

Our 2Q'20 Adjusted EBITDA estimates are above consensus for both NRG and VST at $543mln and $819mln respectively. We expect bad debts and volume dislocations from COVID-19 were not as bad as anticipated in 2Q and weather provided a positive volume offset. VST results will be driven by OPI cost savings offsetting lower capacity payments, the retail acquisitions of Crius and Ambit and better pricing in ERCOT due to the commercial impact noted on the 1Q '20 call. NRG results will be driven by the Stream retail acquisition, better weather, and margin enhancement at retail. VST and NRG were both significantly hedged for the balance of 2020 at the time of the 1Q'20 earnings calls. We are updating our UBSe Adj. EBITDA. NRG to $1,986 /$1,840/$1,737mln and VST to $3,444/$3,087/$3,076mln for '20/21/22 respectively.

Alternative Energy

We expect 2Q20 calls to focus on 2H20 demand given the on-going recovery from COVID-19 troughs in April; the potential for further policy support after the 2020 election; and impacts of corporate actions (RUN/VSLR merger, Maxeon spin from SPWR); as well as GNRC's storage product update (initiation).

Environmental Services

The MSW names operationally weathered the COVID-19 economic downturn (top pick WCN). We continue to see value in the more depressed share prices of CVA and ECOL. As the election approaches we expect increased focus on potential for higher tax rates.

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 39.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Regulated Utilities 2Q20 preview

Focus Stocks this Quarter

DTE Energy. Management will likely provide an update on the electric rate freeze until 2022 and the LEAP expansion which we expect is on track to go into service his quarter.

Duke Energy. In the investor call following Q2 earnings, DUK will have an opportunity to update investors on the financial impact of the ACP abandonment decision; highlighting the potential for higher spending at the Piedmont subsidiary to source replacement capacity. Also, we expect a regulatory update, both on the recent GRC decision in Indiana and the ongoing GRC in North Carolina. With an number of parties signing on to settlements that stipulate an ROE and equity layer in North Carolina, we see most contentious element of this case being the potential to earn a return on the deferred balance of coal ash remediation expenses. Should the PSC ultimately decide not to allow a return on that balance, we estimate ongoing EPS will be impacted by $0.10/share.

Evergy Inc. The Strategic Operations Committee recommendations to the Board are due July 30 and the Board decision August 17 so the timing will be interesting. We expect EVRG to continue delivering cost cuts at the higher end of the 6-9% reduction range.

PG&E Corp. With the company's first quarterly call out of bankruptcy we look for a calendar update and additional financial guidance. We also expect a discussion on preparations for fire season which has so far started without much impact.

Pinnacle West Capital. We expect an update on the general rate case following Staff testimony August 3 and the results of the August 4 primary as 3 seats on the Arizona Corporation Commission are up this year (Chairman Burns who is term-limited, Commissioner Dunn who is not running and Commissioner Marquez-Peterson).

Public Service Enterprise Group. We expect PEG to provide updates on cost cutting efforts embedded in their reiteration of annual guidance on the 1Q 2020 conference call and the COVID-19 impacts on volumes seen in 2Q 2020. We believe investors will be focused on management's updates around the energy efficiency spending program in New Jersey, and any prospects for settlement on the Transmission ROE at FERC.

Sempra Energy. We expect Sempra to report $1.65/share for 2Q 2020, well ahead of consensus estimates of $1.19. We also expect management to reiterate the 2020 eps guidance range of $7.20 - $7.80, which was recently increased from $6.70-$7.50 after closing the sales of the South American businesses. On the call management could also update 2021 guidance. Current 2021 guidance (on a GAAP basis) was provided during the March 2020 Analyst Day at $7.50-$8.10 commensurate with the original Adjusted EPS guidance for 2020 of $6.70-$7.50. Other items of interest will be an update on COVID impacts, particularly at IEnova, and the status of the last remaining permit for ECA LNG Phase 1.

Southern Company. We expect the market to be focused on an update on the Vogtle new nuclear construction project for schedule and budget and any COVID-19 impacts to productivity.

Weather

Weather was positive in 2Q'20 as degree days rose 9% above normal and 12% above Q2'19. Weather was most favorable in the Midwest and Northeast versus Q2'19 and all regions experienced an increase in degree days.

From an electric consumption standpoint electric sales declined 4.1% in April, 5.8% in May and 2.9% in June versus 2019 including weather. We believe this was in line or better than expectations in company guidance.

Figure 5: 2Q Change in Weather versus Electric Consumption

Electric Utilities

AES Corp

We estimate Q2'20 EPS of $0.21 versus $0.26 last year. We assume a -$0.04/share impact from COVID globally of the $0.06-$0.07/share the company identified on the Q1 call. We do not see a material impact from sensitivities. A knowable driver is the absence of the Ohio rider which we estimate is -$0.01/share. We look forward to an update on where AES stands with S&P, renewable PPA origination and the company's progress to reduce coal generation to 30% of total by year-end.

Alliant Energy

We estimate an increase in LNT's EPS to $0.57 versus $0.40 last year. We estimate a strong comparison due to rate relief at IP&L and WP&L (+$0.16/share) and the first half of 2020 tax timing from wind production credits. We estimate this added $0.06/share in Q2'20 versus the $0.08/share in Q1'20. We estimate a small net negative impact from the combination of weather normalized sales and cost cuts. We expect LNT to discuss progress on the Wisconsin rate freeze proposal and solar filing.

Figure 7: LNT Q2'20 EPS Drivers

Q2'19	$0.40
Weather to Normal	$0.02
Weather Below Normal	$0.01
IP&L & WP&L Rates	$0.16
Tax timing - PTCs	$0.06
O&M	$0.03

Depreciation/other	-$0.03
Weather Normalized Demand	-$0.05
Q2'20 Estimate	$0.57

Source: Company reports, FactSet, UBS Equity Research

Ameren Corp

We forecast EPS for AEE of $0.85 versus $0.72 last year. Weather likely helped offset the impact of lower demand. Ameren assumes a -$0.10/share impact from lower Ameren Missouri sales in 2020 (-7%: +2.5% Residential, -15% Commercial and -10% Industrial). The absence of a Callaway outage likely added $0.08/share. We estimate a mark-to-market of the Illinois formula distribution ROE is a -$0.03/share impact versus 2019.

Figure 8: AEE Q2'20 EPS Drivers

Q2'19	$0.72

American Electric Power

We forecast AEP EPS of $1.08 versus $1.00 last year. The absence of a transmission true-up at AEP Transco is a -$0.08/share impact absent a similar development. At the 2019 EEI conference AEP identified $0.19/share of cost cuts at the Vertically Integrated Utilities and $0.14/share at the T&D Utilities which will help offset a demand reduction. Overall we expect T&D utility rates will be slightly higher net of the absence of the legacy rider in Ohio.

Figure 9: AEP Q2'20 Earnings Drivers by Segment

Q2'19	$1.00
Vertically Integrated ($0.50 v. $0.38)	
Weather to Normal	$0.01
Weather vs Normal	$0.02

Tax Carrying Charge	-$0.03
AEP Transmission ($0.25 v. $0.31)	-$0.06
Generation & Marketing ($0.07 v. $0.06)	$0.01
Corp and Other (-$0.05 v. -$0.02)	-$0.03
Q2'20 Estimate	$1.08

Source: Company reports, FactSet, UBS Equity Research

ATCO Ltd

We expect ATCO Ltd to report 2Q 2020 adjusted eps of C$0.55 vs. C$0.55 consensus estimates and C$0.68 last year. The largest negative drivers in the quarter are the asset divestitures of the Alberta Power Line and the Canadian competitive generation assets. Further, we expect lower earnings contributions from Neltume Ports on economically driven lower trade volumes, slightly higher corporate expenses, and lower earnings year on year at the Australian gas distribution utility on lower ROE and flat CPI adjustor. Partially offsetting these negative drivers will be higher earnings at the Structures business driven by LNG Canada completing the manufacturing phase and rate base growth at the electric distribution and Canadian gas utilities.

Figure 10: ATCO Ltd. 2Q 2020 Drivers

2Q 2019 EPS	**$ 0.68**
2Q 2019 Cons. Adj. Earnings	78
Naltume Ports	(2)
Corporate Drag	(2)
Canadian Utilities	(3)
S&L	4
Sale of Power & Alberta Power Line	(8)
Australia lower RB growh/ROE/CPI	(4)
2Q 2020 Cons. Adj. Earnings	**63**
Shares	114.3
2Q 2020 EPS	**$ 0.55**

Source: UBS Equity Research Estimates

Canadian Utilities

We expect Canadian Utilities to report 2Q 2020 adjusted eps of C$0.35 vs. consensus estimates of C$0.35 and C$0.38 last year. Results will be driven by the sale of the Alberta Power Line and the Canadian generation assets, higher corporate expenses year on year, and lower earnings at the Australian gas utility business on lower rate base growth, lower allowed ROE, and a lower CPI adjustor year on year. This will be mostly offset by rate base growth at the electric distribution and Canadian gas utilities.

Caribbean Utilities

We expect Caribbean Utilities to report 2Q 2020 eps of $0.19 vs. consensus estimates of $0.18, and $0.24 last year. The biggest driver of year on year results will be lower electric volumes due to a significant decline in by air and by sea tourism visits to Grand Cayman. This will be partially offset by lower O&M as a result of lower volumes as well as cost discipline.

CMS Energy

We expect an increase for CMS' EPS to $0.48 versus $0.33 last year. Weather and cost cuts likely helped offset the impact of lower demand due to COVID. NOAA data shows a 24% increase in degree days from last year and 11% above normal. Michigan manufacturing returned in May and retail in June at or ahead of the company's plan. MISO load was -15% in April and gradually recovered to flat in July including weather. Cost cuts included the company's CE Way, employee benefits and COVID-related impacts like mileage reimbursement.

Figure 11: CMS Q2 EPS Drivers

Q2'19	$0.33
Weather to Normal	$0.06
Weather	$0.10
O&M reinvestment	$0.06
Gas Rates	$0.06
Pension	$0.02
Enterprises and Enerbank	$0.01
Debt and Dilution	-$0.02
Demand	-$0.07
Depreciation, Interest and Other	-$0.07
Q2'20 Estimate	$0.48

Source: Company reports, FactSet, UBS Equity Research

Consolidated Edison

We forecast ED EPS of $0.52 versus $0.58 last year. We do not expect ED to move off its 2020 EPS guidance reduction of $0.15/share to $4.15-$4.35. We assume lower results at Consolidated Edison Company of New York ($0.41 versus $0.46) which is decoupled but the lower EPS reflects the costs of doing work with social distancing which raised costs. CECONY and other New York investor owned utilities filed comments with the New York Public Service Commission to: 1) Allow for deferral of net costs of COVID-19; 2) Establish mechanisms to mitigate cash flow stress like riders and 3) Declare COVID-19 a pandemic crisis that justifies excusing a utility from meeting a rate plan performance metric.

Dominion Energy

We expect Dominion Energy to report adjusted 2Q EPS of $0.78/share; this is modestly below the mid-point of the original guidance for the quarter of $0.75-$0.85/share and includes earnings from both the company's midstream and ACP assets. We expect that in conjunction with its Q3 earnings release (later in the year), Dominion will restate earnings from the first and second quarter to reflect the discontinued nature of those midstream and pipeline operations, consistent with its restated guidance for 2020 of $3.37-$3.63 and 2021 of $3.85-$3.90.

Year/Year second quarter earnings will benefit from continued investment in Dominions regulated business lines, higher capacity revenues in PJM, lower depreciation expense due to the early retirement of coal plants and life extension of nuclear plants, and very modestly lower interest expenses. These benefits will be offset by lower earnings from Cove Point, lower capacity earnings at the Millstone nuclear plant and equity dilution. Our earnings forecast assumes that any negative impact from the Covid-19 economic slowdown will be offset by lower O&M expenses, and that below normal weather in the quarter will have a negative earnings impact..

We expect Dominion's second quarter investor call will focus on the future goals of the company; its increasing focus on regulated earnings, an improving balance sheet, renewable generation development and zero carbon and methane emissions by 2050. In this context we expect the refreshed EPS and dividend growth target of 6.5% and 6% respectively, to be reiterated.

Figure 12: Dominion Energy Q2'20 EPS Drivers

Q2'19	$0.75
Weather - Weaker vs. normal	-$0.02
Regulated Investment Growth	$0.07
Capacity - New Gen	$0.04
Nuclear & Asset life Extension	$0.02
Interest Expense	$0.00
Cove Point - Lower Ownership	-$0.03
Millstone - Lower capacity revenues	-$0.01
Equity Dilution	-$0.04
Covid-19 - Demand Shift/O&M Savings	$0.00
Q2'20 Estimate	$0.78

Source: UBS Equity Research, Company Reports, FactSet

DTE Energy

We forecast lower EPS of $1.51 versus $0.99. Overall, DTE seems on track for the year. We expect favourable weather versus last year (+$0.05/share) and normal (+$0.16/share) benefitted the second quarter result. The company likely saw a higher mix of residential sales which provides for a greater impact from a rise in degree days. DTE Electric recovered the impacts of 2 rate cases. Share based incentive comp was a -$0.18/share impact in Q1 due to a lower stock price but recovered in Q2. DTE is progressing with the LEAP expansion to the Blue Union expansion which they expect to complete in Q3. Lower demand from DTE Electric from waste coal REF sales could impact the Power & Industrials business.

Figure 13: DTE Q2'20 EPS Drivers

Q2'19	$0.99
DTE Electric weather	$0.18
DTE Electric sales	-$0.17
DTE Electric rate case recovery	$0.20
DTE Electric Share based incentive comp	$0.11
DTE Electric O&M	$0.08
DTE Gas weather	$0.03
DTE Gas rate base	$0.03
GS&P - similar to 1Q'20	$0.12
Power & Industrials - lower utility waste coal to DTE Electric	-$0.01
DTE Energy Trading	$0.02
Corp & Other	$0.01
Dilution (192M versus 182M)	-$0.08
Q2'20 Estimate	$1.51

Source: Company reports, FactSet, UBS Equity Research

Duke Energy

We expect Duke Energy to report adjusted 2Q'20 EPS of $1.00 vs. a weather adjusted Q2'19 result of $1.04. The most significant variable (and source of uncertainty) in Q2'20 earnings will be the impact of the Covid-19 related economic shutdown and the related O&M savings the company can realize as an offset. Our estimate assumes a negative EPS impact of $0.19 (reflects residential demand +5%, commercial demand -15%, industrial demand -20%) offset by O&M savings of $0.12. Beyond the impact of lower demand in the quarter, higher rates, investment in renewables and the gas LDC business will be offset by higher depreciation, interest and equity dilution.

We expect DUK's investor call will focus on the company's regulatory calendar (Indiana & North Carolina), potential need for additional capital spending at its gas LDC (following the cancelation of ACP) and the potential outcome of the Governors upcoming clean energy plan.

Figure 14: Duke Energy Q2'20 EPS Summary

Q2'19	$1.04
Weather impact	$0.01
Demand Impact of Covid-19 Shut down	-$0.19
O&M Savings to Offset Covid-19 Impact	$0.12
FL/NC/SC rates & riders	$0.05
Gas LDC & Pipeline (net)	$0.01
Wholesale Contracts & Renewables	$0.02
Depreciation & Interest Expense	-$0.05
Equity Dilution	-$0.01
Q2'20 Estimate	$1.00

Source: UBS Equity Research, Company Reports, FactSet

Edison International

We forecast EPS of $1.16 versus $1.58 last year. Our EIX jurisdictional revenue impact includes the absence of a $0.20/share benefit from a revenue true-up from the rate case along with an attrition year impact. EIX also likely experienced higher costs related to insurance and its wildfire plan and we do not expect a similar year-on-year impact to O&M (-$0.30/share) as we are looking for in this quarter.

Figure 15: Edison International Q2'20 EPS Summary

Q2'19	$1.58
California Jurisdictional Revenue	$0.06
FERC Transmission Revenue	$0.04
Depreciation	-$0.02
Financing	-$0.03
O&M	-$0.30
Corporate Expenses	-$0.01
Dilution (378M vs. 331M avg shrs)	-$0.16
Q2'20 Estimate	$1.16

Emera Inc

We expect Emera Inc. to report 2Q 2020 adjusted eps of C$0.52 vs. C$0.58 consensus estimates and C$0.54 last year. Normalizing the C$0.54 in 2Q 2019 for the Emera Maine asset sale yields C$0.49. Drivers off of this normalized level last year will by rate base growth in Florida, slightly better results in Nova Scotia, and positive impacts from FX due to a stronger USD/CAD year over year. Mostly offsetting these positive drivers will be lower results at Emera Energy due to lower natural gas price volatility, the $12mln one time regulatory decision impact at New Mexico Gas in 2Q 2019, and slightly higher corporate expenses and share dilution.

Figure 16: Emera Inc. 2Q 2020 Drivers

2Q 2019	**$**	**0.54**

FX	$	0.03
Other/Parent	$	(0.02)
4Q 2019	**$**	**0.52**

Source: UBS Equity Research Estimates

Entergy Corp

We expect Entergy Corp. to report adjusted 2Q'20 EPS of $1.30 vs. a weather adjusted Q2'19 result of $1.29. Second quarter earnings will benefit from a step up in regulated earning related the company's formulaic rate plans and tracking mechanisms, offset by higher depreciation, interest and tax expense and equity

dilution. We estimate that slowdown associated with the Covid-19 pandemic could impact earnings by up to $0.15 in the quarter (retail +4%, commercial -15%, industrial -10%) but that some portion of that will be offset by O&M cost reductions (we assume $0.11).

We expect ETR will affirm its 2020 full year earnings guidance of $5.45-$5.75, its EPS CAGR through '22 of 5-7% and its plans for a fall investor day when it will expand the current three year forward look that includes both EPS and capital spending plans to a five year look forward.

Figure 17: Entergy Q2'20 EPS Summary

ETR - Earnings Walk Q2'19-Q2'20				Q2'19

Eversource Energy

We expect Eversource Energy to report 2Q'20 EPS of $0.75 vs $0.70 in the prior year quarter (adjusted for a $0.04 gain on landfill gas investments). Q2'20 EPS will benefit from continuing investment in the regulated utility business, the transmission system and the gas LDC business (through pipeline replacement). Higher depreciation, property tax and interest will be a modest drag on earnings for the quarter. We expect ES will reiterate its full year earnings guidance $3.60-$3.70, EPS growth rate of 5-7% and capital spending plans.

On the investor call following the earnings release we expect ES to update investors on ongoing regulatory proceedings including its New Hampshire general rate case, the approval of its Columbia Gas acquisition and the RFP process addressing grid modernization in Connecticut.

Evergy Inc.

We forecast EPS of $0.63 versus $0.57 last year excluding the impact of income from corporate owned life insurance. Above normal weather and cost cuts will offset the impact of lower weather normalized sales. EVRG's guidance for O&M cuts is 6-9% from $1.187B and we assume the higher end of the range. On the financing side we see an impact from the issuance of $1.6B of parent debt.

Figure 19: EVRG Q2'20 EPS Drivers

Exelon Corp

We expect Exelon to report 2Q 2020 adjusted EPS of $0.45 vs. $0.45 consensus and $0.60 last year. Drivers at ExGen are expected to be poorer market and portfolio conditions, volume degradation from COVID-19 dislocations particularly at the Constellation C&I retail segment, higher nuclear refueling outages year on year, and lower capacity prices for two of the three months of the quarter. These negative drivers will be partially offset by incrementally higher ZEC revenues and lower O&M. At the utilities we expect a drag from the distribution ROE formula in Illinois and volumes at PECO, which will be more than offset collectively by weather at PECO, distribution investment at ComEd, the distribution rate increase at BGE and rate increases at PHI.

Figure 20: Exelon 2Q 2020 Drivers

FirstEnergy Corp.

We forecast $0.53 of EPS versus $0.61 last year. FE previously provided a guidance range of $0.48-$0.58/share. We do not expect weather had a significant impact across FE's service territory and the final quarter of the expiration of the Ohio distribution modernization rider is -$0.06/share. We estimate that other riders contributed from Ohio and Pennsylvania $0.02/share. The company incurred interest expense for the Energy Harbor payment but is now a fully regulated utility.

Q2'20 Estimate	$0.53

Source: Company reports, FactSet, UBS Equity Research

Fortis Inc.

We expect Fortis Inc. to report 2Q 2020 adjusted eps of C$0.57 vs. C$0.58 consensus estimates and C$0.54 last year. Drivers year on year will be rate base growth at the western Canadian utilities, rate base growth at ITC, rate design timing and rate base growth at Central Hudson and slightly better results at energy infrastructure with better rainfall in Belize and slightly better margins at Aitken Creek storage. Offsetting these positive drivers are higher weighted average shares from the C$1.2Bln equity issuance completed in late 2019, and slightly lower results at UNS. Results at UNS will be driven by higher costs year on year on yet in rate base given the ongoing rate case in Arizona, and lower volumes related to coronavirus dislocations. These negative drivers are mostly offset by warmer weather and the partial reversal of the pension loss recorded in 1Q 2020.

Hawaiian Electric

We expect HE to report adjusted 2Q'20 EPS of $0.40 vs. $0.39 in the prior year quarter. Earnings in the quarter will be driven by the regulated utility, with growth through the tracking and recovery mechanisms and O&M efficiency, offset only

modestly by higher depreciation expense. We expect HE's American Savings Bank subsidiary will report lower earnings than in the prior quarter ($0.10 vs. 0.14) due to the challenged economic environment in the state of Hawaii (closed to tourists till September). American Savings bank will report earnings on the evening of July 30.

We expect HE will reiterate its full year utility earning guidance of $1.46-$1.54, but will not reinstate earnings guidance for American Savings Bank given the continued economic uncertainty in the state. Further, we expect an update on the ongoing regulatory proceedings (PBR), cost saving initiatives and capital spending plans.

Hydro One

We expect Hydro One to report 2Q 2020 adjusted eps of C$0.32 vs. C$0.27 consensus and C$0.26 last year. Results will be mainly driven by strong weather in May and June driving peak demand load higher which impacts transmission segment earnings. OM&A expenses are also likely to be lower given higher vegetation management and storm cost expenses in 2Q 2019 as well as stand down of work crews in part of April 2020. Some of those lower cost drivers will be partially offset by higher COVID-19 related mitigation costs. Revenues will also be up year on year related to the transmission rate order from the Ontario Energy Board, and the one-time regulatory dispositions and catch up items to be booked this quarter as a result.

Figure 24: Hydro One Estimates and Actual Results 2Q 2020 vs. 2Q 2019

Source: UBS Equity Research Estimates

NextEra Energy

We expect NextEra Energy to report 2Q 2020 adjusted eps of $2.49 vs. $2.49 consensus and $2.35 last year. Given the move of transmission from the corporate segment to the Energy Resource segment the comparable segment break-out for 2Q 2020 is $0.97 at Energy Resources and $0.01 at Corporate & Other. Drivers in the quarter will be rate base investments at FPL and at Gulf Power. From a retail sales perspective vs. the prior two year average was +5.4% in April and (2.4%) in May as coronavirus dislocations on volumes were not as large as expected and significantly warmer weather (particularly in April) offset some of the negative volume impacts. At the end of last quarter FPL had a reserve balance of $744mln. At Energy Resources the drivers will be new investment and better results at existing resources given the 92/93% wind resource in 2Q 2019. Offsetting these positive impacts will be a drag from customer supply and trading and an outage at Seabrook. At Gulf we expect largely flat year on year results and at Corporate & Other we expect increased interest expense given debt issuance at the parent of $1.25Bln in April at 2.75%, and $2Bln in May at 2.25%. There will also be some share dilution year on year given equity unit share issuances in September 2019 and February 2020.

OGE Energy

We forecast EPS of $0.50 versus $0.50 last year. From a GAAP basis OGE's remaining 2020 results will include an offsetting $0.26/share consolidating tax adjustment benefit for the remainder of the year related to the Enable write-down. We do not include that in our EPS estimates. Below normal weather and lower demand likely kept results similar to Q2'19. Rate case recovery and cost cuts likely helped OGE.

Figure 25: OGE Q2'20 EPS Summary

Q2'19	$0.50
Weather to Normal	$0.07
Weather	-$0.03

ENBL	-$0.01
Q2'20 Estimate	$0.50

Source: Company reports, FactSet, UBS Equity Research

PG&E Corp.

We estimate Q2'20 EPS forecast of $0.84 versus $1.10 last year. The company will report earnings and should provide 1 or more years of annual EPS and potentially net income guidance. We estimate 695M shares outstanding using an average method and reflecting 2 trading days post close of the block equity (97% at 647M and the remaining 3% at the 2153M maximum) versus 529M last year. Other drivers are rate base (+$0.02/share and energy efficiency (+$0.01/share) as positives. We estimate negative drivers of unrecoverable interest and legacy O&M.

Figure 26: PCG Q2'20 EPS Summary

Q2'19	$1.10
Rate base Growth	$0.02
Energy Efficiency	$0.01
Timing of Taxes	-$0.01

Q2'20 Estimate	$0.84

Source: Company reports, FactSet, UBS Equity Research

Pinnacle West Capital

We forecast $1.55 of EPS versus $1.28 last year. Weather which impacted residential demand and cost cuts led the quarter. The impact of May weather (194 versus 107 degree days) is an important driver. PNW disclosed that the impact from March 13 to May 26 was -$0.14/share versus the company's initial expectation and that a 1% change in sales is $0.16-$0.20/share on an annual basis. PNW disclosed that residential sales rose 4% and commercial and industrial sales fell 4% versus 2019 from May 13 to June 16. There was 1 fewer planned outage and we expect PNW worked to offset the impact of lower demand through cost cuts.

Figure 27: PNW Q2'20 EPS Summary

Q2'19	$1.28
Weather to Normal	$0.22
Weather versus Normal	$0.05
O&M	$0.13

PNM Resources

We expect PNM Resources to report Q2'20 EPS of $0.50 vs. $0.44 in the prior year quarter. Better weather in 2Q'20 is expected to offset the negative impact of the Covid-19 related shift in demand (-$0.02 in both April & May), along with rate base growth and the absence of a San Juan maintenance outage. Interest expense, depreciation and property have a modestly negative impact on the quarter. In conjunction with the disclosure of its earnings release date (July 31), PNM affirmed its annual EPS guidance of $2.16-$2.26 (targeting the mid-point).

On its investor call we expect PNM will update investors on its ongoing proceeding in New Mexico to replace the power provided by the San Juan coal plant (decision deadline is October 1), the potential to retire the Four Corners generation station and any possible updates to the capital spending plan.

Figure 28: PNM Resources Q2'20 EPS Sumary

Transmission/Renewables/AFUDC	$0.02
Q2'20 Estimate	$0.50

Source: UBS Equity Research, Company Reports, FactSet

Portland General Electric

We forecast $0.34 of EPS versus $0.28 last year. Weather conditions were slightly below normal in POR's region with heating degree days down 13% and cooling degree days up 11%. POR's 1-2% sales baseline would imply a $0.15/share reduction for the balance of the year. The company's guidance on non-fuel O&M

would imply a $0.10-$0.15/share reduction per quarter. Depreciation could fall in the $104-$106M range per quarter using the $410-$430M guidance and $108M in Q1'20. We also expect an impact related to the non-qualified benefit program. POR had no portfolio changes but the recovery in the markets should help reverse some of the -$0.06/share impact in 1Q'20. We expect an update on regulation in Oregon on the investor call although no resolution on the COVID-19 docket until 2022.

Figure 29: POR Q2'20 EPS Summary

Q2'19	$0.28
Weather to Normal	$0.04
Weather Normalized Demand	-$0.07
Non-Fuel Operations and Maintenance	$0.13

PPL Corporation

We expect lower EPS of $0.57 versus $0.58 last year. In general F/X hedges (86% hedged at 1.55x) and small benefits from weather in Kentucky and the U.K. helped to offset the pandemic impacts and dilution. PPL continues to benefit from returns on transmission investment Pennsylvania.

Figure 30: PPL Q2'20 EPS Summary

Public Service Enterprise Group

We expect Public Service Enterprise Group to report adjusted eps of $0.59 vs. $0.62 consensus and $0.58 last year. At PSE&G we expect positive drivers of continued rate base growth, better weather year on year, lower distribution O&M, and better pension and OPEB. Partially offsetting these positive drivers are lower volumes as a result of coronavirus dislocations, and higher D&A, interest expense, and taxes. At PEG Power we expect positive drivers related to NJ ZECs for a full quarter in 2020 vs. 2019, lower O&M on cost controls, and lower D&A as a result of the extension of the Peach Bottom operating license to 80 years and the sale of

the Hudson and Mercer retired coal generation stations in January to Hilco Redevelopment Partners. Bridgeport Harbor 5 also went into service year on year increasing volumes at PEG Power all else equal. More than offsetting these positive drivers will be volume declines related to coronavirus dislocations and lower capacity prices in April and May, while price for the new capacity year took effect in June. At corporate and other we expect slightly higher taxes and slightly higher interest expense relate the $800mln in term loans in March and April.

Figure 31: PEG 2Q 2020 Drivers

Source: UBS Equity Research Estimates

Sempra Energy

We expect Sempra Energy to beat the quarter and report ongoing adjusted eps of $1.65 vs. $1.19 consensus and $1.10 last year. The big beat will be driven by a shift in seasonality of the utility earnings given the delayed CPUC rate order last year which will impact both SDG&E, and SoCalGas. Further SDG&E will also have rate base growth at transmission and one-time benefits of ~$60mln from the

CPUC tax memo account decision (as disclosed on page 48 in 1Q'20 10-Q). One slight offset at SDG&E will be wildfire related amortization. At SoCalGas, in addition to the impacts of the CPUC rate order we expect a one- time benefit of ~$60mln similar to SDG&E also related to the CPUC tax memo account decision. In Texas we expect year on year rate base growth driving results higher by ~$40mln, with minimal coronavirus disruption in the 2Q in Texas. For South America, the assets were divested in the quarter, however, Peru will have a one-month contribution to results and Chile will have a 3 month contribution to results, leaving overall results down ~$30mln year over year. In Mexico results will be lower given Peso appreciation vs. the USD and a drag to capex deployment and volumes related to COVID-19. We see higher results at Sempra LNG & Midstream by ~$30mln related to an additional 2 months of Cameron Train 2 in service offset by higher liquefaction project development costs. At Parent & Other we expect a reversal of the year over year pension and OPEB loss recorded in 1Q 2020 and slightly lower interest expense as Peru sale proceeds began to pay down debt in the quarter.

Southern Company

We expect Southern Company to report adjusted eps of $0.64 vs. $0.69 consensus, their $0.65 guidance and $0.80 last year. Drivers in the quarter will be coronavirus volume impacts only partially offset by O&M cost controls as those programs got started in the quarter and will have more impact in the second half of the year. The southeast also did not have the positive weather of most of the rest of the country so we expect a negative weather drag vs. the warmer than normal weather in 2Q 2019. There will also be a slight drag at Southern Power related to the divestiture of the Nacogdoches and Mankato power plants. At corporate & other we expect higher interest expense and share dilution. These negative drivers will be offset by some cost control impact on non-fuel O&M and the year on year retail revenue impacts from the Georgia rate case decisions in December 2019.

Figure 32: Southern Company 2Q 2020 Drivers

2Q 2020	$	0.64

Source: UBS Equity Research Estimates

WEC Energy Group

We expect WEC to report adjusted eps of $0.67 vs. $0.67 consensus estimates and $0.74 last year. We see drivers year on year of lower volumes due to coronavirus economic disruptions and higher interest expense, D&A and lack of fuel band earnings in 2Q 2020 vs. 2Q 2019. These negative drivers will be mostly offset by efficiencies in O&M year on year, slightly better results at energy infrastructure from Coyote Ridge and the incremental 10% ownership stake in Upstream Wind, and slightly better results at ATC transmission due to the FERC ROE decision and rate base growth. Weather was also better year over year.

Xcel Energy

We expect Xcel Energy to report adjusted 2Q'20 earnings of $0.49 vs. $0.47 in the prior year quarter. Our estimate assumes load loss associated with the Covid-19 related economic shut down reduce earnings by $0.11 in the quarter, offset by $0.05 of lower O&M. This assumption is consistent the with company's 'base case' scenario which assumes a total annual EPS impact of $0.17, and we spread the offsetting projected O&M savings assumption (4-5% of prior year) over the three remaining three quarters of the year as an offset. Q2 EPS benefit from higher regulated rates and AFUDC earnings which offset higher depreciation, property tax and interest expense. We expect XEL will maintain its 5-7% EPS growth target, and 2020 EPS guidance of $2.73-$2.83.

On the investor call following the earnings release we expect XEL to provide some additional colour around its Minnesota filing to both pull forward capital spending plans and extend its current rate case stay out agreement. Hearings in this process are scheduled for July 29 to discuss the process and procedure. To date, none of the company's other jurisdictions have followed Minnesota in exploring a potential acceleration of capital spending in order to drive additional economic growth and employment.

Figure 33: Xcel Energy Q2'20 EPS Summary

Q2'19			$0.47
	Base Case Annual	Quarterly Impact	
Load Loss - 6%	($0.17)	($0.11)	
O&M Savings - 4.5% (After Tax)	$0.15	$0.05	
Est. Qtrly Impact of Covid-19 Shutdown			($0.06)
MN/ND/SD/NM revenue step-up			$0.04
Property tax up/AfUDC down			$0.04
Q2'20 Estimate			$0.49

Source: UBS Equity Research, Company Reports, FactSet

Water Utilities

American Water Works.

We expect American Water Works to report adjusted 2Q'20 EPS of $0.99 vs. $0.94 in the prior year quarter (which included both a negative $0.05 weather impact and $0.03 benefit from the sale of a legacy investment). Quarterly earnings should benefit from higher rates (achieved through regulatory proceedings and formulaic step increases), infrastructure charges and favorable spring weather.

These benefits will likely be offset by higher depreciation and interest expenses. On its investor call, we expect AWK will reiterate it 7-10% EPS CAGR guidance, capital spending plans ($8.8-$9.4 billion through '24), full year earnings guidance (GAAP $3.85-$3.95/operating $3.79-$3.89) and developments in both its regulated and market based businesses.

American States Water

We expect AWR to report adjusted 2Q'20 EPS of $0.70 vs. $0.64 in the prior year quarter (after adjusting for the retroactive impact of a CPUC decision: $0.08). Year over year earnings growth is attributable to rate base investment (second step increase in CA rates effective 1/1/20), demand growth and modestly lower depreciation expense (offset by higher administrative & general expense). In conjunction with its quarterly earnings release, we expect AWR will update investors on the impact of the Covid-19 pandemic (memorandum account), its contracted services business and regulatory schedule in California (a GRC may be filed by the time of the earnings release).

California Water

We expect CWT to report adjusted 2Q'20 EPS of $0.51 vs the prior year quarter of $0.35. Without a final general rate case decision (PD may come by the end of July), we expect there will be no year over year revenue increase. Our projected step up in earnings is derived from a reversal of the Q1 charges associated with the loss on benefits adjustment and the pension expense that we attribute to the recovery of the broader market. These benefits may be offset by higher depreciation and operating expense. Absent a decision in the pending general rate case around the contested revenue adjustment mechanisms, we believe this quarter results will be similar in character to those of the first quarter, that is somewhat distorted vs. normal. That said it is possible that we will see a proposed decision in the general rate case prior to the earnings release.

SJW Group

We expect SJW to report adjusted ongoing 2Q'20 EPS of $0.70 vs $0.58 from the prior year quarter. Q2'20 earnings will benefit from the rate base growth and investment, and the close of the Connecticut Water acquisition (October '19). In conjunction with its earnings release we expect SJW will update investors on its water production costs, ongoing regulatory calendar and the memorandum account it has established to manage costs associated with the ongoing Covid-19 pandemic. SJW updated in annual guidance on its first quarter call to a range of $1.95-$2.05, we do not expect any change or adjustment to this guidance after what is largely considered a shoulder quarter for California water utilities.

Essential Utilities

We expect Essential Utilities to report adjusted 2Q'20 EPS of $0.26 vs. the prior year quarter (pre Peoples Gas acquisition and excluding acquisition related costs) of $0.37. This estimate is consistent with the company's annual guidance of $1.53-$1.58 and its expectations for earnings dispersion across the year (35-45% in Q1/10-20% in Q2/10-20% in Q3/25-35% in Q4). While annual guidance is largely theoretical given the timing of the Peoples Gas deal close and its inclusion in earnings at a assumed level, Q2 will be the first full quarter for the whole entity and should provide investors will useful insight (albeit in a slow quarter for a gas LDC) of the company's earnings power. Earnings drivers for the quarter include positive weather (warm & dry spring season), rate increases across the company's

operating jurisdictions, somewhat lower expenses associated with 'work from home' environment.

In conjunction with its earnings release, we expect WTRG will update investors on the integration of its Peoples Gas acquisition, its pending acquisition of DELCORA (and the timing of the associated equity) and other potential M&A activity (Chester Water Authority, Norristown etc.). We also expect an update on the company's 'catch-up' repairs tax adjustment filing in Pennsylvania and pending federal infrastructure legislation.

Independent Power Producers

NRG Energy

We expect NRG Energy to report ongoing Adjusted EBITDA of $533mln vs. $528mln consensus estimates and $469mln last year. We expect drivers you over year to be incremental EBITDA from the Stream retail acquisition, continued margin enhancement at the retail business and warmer weather year on year. This warmer weather is likely to offset any coronavirus bad debt or volume related impacts in the quarter, which we expect to be less impactful overall than originally estimated in March.

On the 1Q 2020 earnings call update, NRG indicated that they were 98% hedged in the East/West segment for the balance of 2020 and had the integrated hedge in ERCOT through retail. For 2022, hedging levels were 22% in the East/West segment at the time of the 1Q 2020 earnings call.

We are also updating our annual Adjusted EBITDA estimates on a mark to market basis to $1,986/$1,840/$1,737mln from $1,914/$1,813/$1,773mln for '20/21/22 respectively.

Vistra Energy

We expect Vistra Energy to report ongoing Adjusted EBITDA of $819mln vs. $749mln consensus estimates, and $707mln last year. We expect operational performance improvement cost cutting initiatives (OPIs) to begin to show impact in the quarter and to largely if not completely offset the impact of lower capacity revenues for the non-ERCOT generation businesses. We expect ERCOT results will be higher by ~$50mln year-year as that segment also captures OPIs and we do not expect bad debts to be a high as anticipated by management on the 1Q call, at least in 2Q 2020 given that Texas did not significantly lock down. Further the capture of ~$60mln in the guidance walk on the 1Q conference call discussed by management was largely in 1Q but there will be some residual impact carried into the 2Q period. At retail we expect that results will be higher year over year related to the acquisitions of both the Crius and Ambit retail businesses. This will not be damped by mild weather as in 1Q and will somewhat shift the seasonality of results for Vistra more toward 1Q, 2Q, and 4Q and away from 3Q.

On the 1Q 2020 earnings call update, VST indicated that they were 100% hedged across the non-natural gas generation fleet and 97% hedged at the gas fleet for the balance of 2020. In 2020 hedging levels were 72% at the non-natural gas fleet an 36% at the natural gas fleet for 2021, with the largest open position at the natural gas fleet in ERCOT and PJM.

We are also updating our annual Adjusted EBITDA estimates on a mark to market basis to $3,444/$3,087 /$3,076mln from $3,287/$3,195/$3,074mln for '20/21/22 respectively.

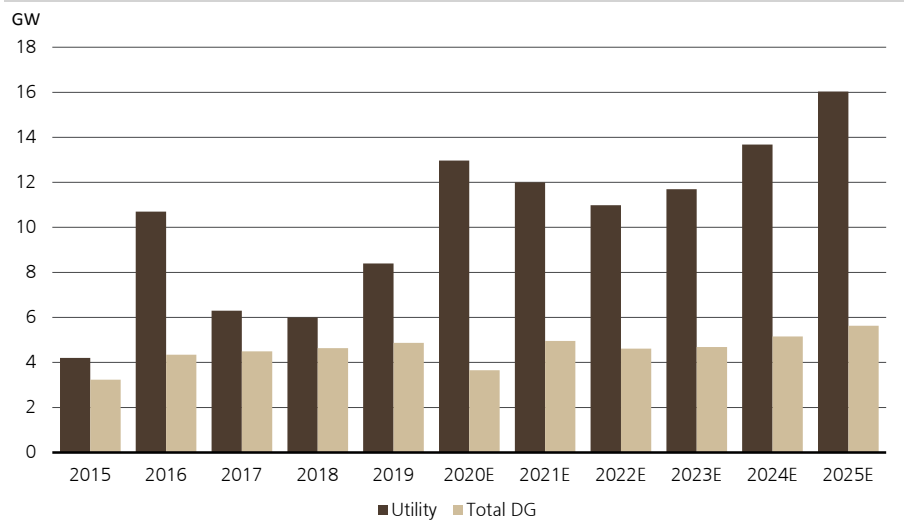
Alternative Energy 2Q20 preview

Key issues for the quarter

We expect 2Q20 results calls to focus on 1) Strength of the post-COVID recovery in distributed solar demand 2) potential policy support following the election and 3) RUN/VSLR deal impact on supply chains and potential to drive adoption of residential storage. We expect the market to look past trough 2Q actuals which are likely to be noisy; FSLR consensus revenue estimate dispersion is at the widest since 3Q17.

Our top pick in our Alternative Energy coverage is Generac (GNRC, Buy, PT $145) with exposure to accelerating residential solar + storage demand. See our GNRC initiation here.

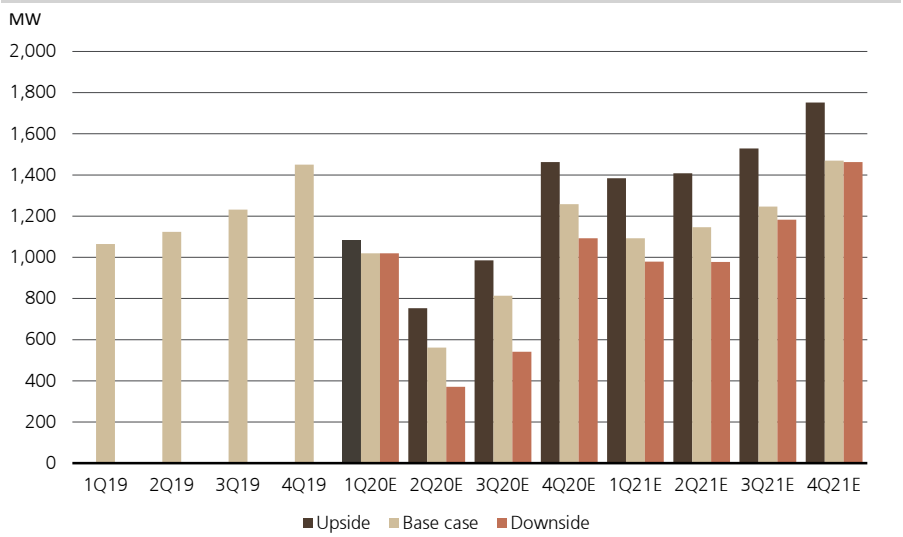
Figure 37: U.S. new solar installations (GW)



Source: EIA, IRENA, SEIA, Wood Mackenzie, UBS estimates

Recent comments from RUN indicate demand potentially tracking closer to our upside case for a 33% y/y 2Q decline in distributed solar demand.

Figure 38: U.S. distributed solar demand – quarterly forecast



Source: EIA, SEIA, Wood Mackenzie, UBS estimates

Company specific focus areas

- **FSLR**: We expect a 2Q20 loss per share of $0.04 driven by lower systems segment contribution from project sale timing delays. Consensus 2Q20 adj. EPS is currently $0.30. FSLR previously pulled 2020 financial guidance but maintained module production guidance of 5.9GW indicating confidence in manufacturing execution. Uncertainty of systems sales remains driven by timing rather than quantity. Management flagged a sequential quarterly decline in module ASP with 1Q20 having benefitted from safe harbor demand. UBSe 2Q20 module ASP is $0.36/watt.

- **SPWR**: 2Q20 revenue guide of $290-330mn implies down 27-36% q/q & down 32-40% y/y. Adj. EBITDA guidance is negative $40-20mn. We expect a sequential recovery in earnings after 2Q but note SPWR has over 50% market share in the new home solar market which could be a drag in 2H20. On the 16 July Maxeon analyst day management highlighted the Maxeon spin remains on track to close in 3Q20. Preliminary Maxeon results were provided for 2Q20 revenue of $160-170mn, down 40% y/y at the midpoint driven by 8 week production shut downs. We expect Maxeon to continue to focus on deploying a base of premium-quality modules while driving faster growth through expanding sales of lower-cost modules produced by the TZS JV in China. Maxeon currently arranged financings provide enough liquidity to cover the expected $385mn investment in capacity expansion through 2022.

- **CSIQ**: 2Q20 guidance is 2.5-2.7GW module shipments, $630-680mn revenue, and gross margin 18.5-20.5%. 2020 shipment guidance 10-12GW. We see risk of industry overcapacity potentially dragging on profit margins into 2H20. Key uncertainty for utility scale solar exposure remains project sale timing and price. Project revenue has comprised 24% of total net sales over the last 5 years. We look for an updated on CSIQ's prior suspension of its share repurchase program.

- **JKS**: 2Q20 guidance is 4.2-4.5GW shipments, $1.1-1.18bn revenue, and 16-18% gross margin. 2020 shipment guidance is 18-20GW. We forecast module ASP declining ~10% 2Q20 q/q with margin pressure persisting through 2020.

JKS management is targeting cost reductions to offset ASP pressure and maintain ~flat margin to 2Q20.

- **RUN**: RUN's latest commentary implies 2Q20 deployments better than the previous 30% y/y decline expectation. Our 2Q20 deployment estimate is 77MW, -25% y/y. We expect focus on the conference call around potential impacts on the inverter supply chain following RUN's acquisition of VSLR. Based on our analysis of California distributed solar data, RUN installs have historically use a ~50/50 mix of SEDG and ENPH inverters with VSLR primarily using ENPH equipment.

- **SEDG**: 2Q20 revenue guidance of $305-335mn implies a decline of 22-29% q/q. The 2Q guidance is well ahead of ENPH's 2Q revenue guide for a 37-44% q/q decline. SEDG noted a 33% y/y decline in U.S. installations in April and we see likely sequential improvement in May-June. 2Q20 gross margin guidance of 30-32% reflects margin pressure driven by higher European sales mix, with a U.S./Europe margin differential of 450bps, partially offset by 200bps margin improvement on reduced air shipments.

- **GNRC**: We forecast 2Q20 adj. EPS of $0.68, reflecting -43% y/y growth driven by a 40% y/y 2Q decline in C&I segment sales. GNRC provided only directional 2Q guidance for a modest sequential decline in net sales (UBSe $449mn) and adj. EBITDA margin (UBSe 15.7%). Our focus will be on customer adoption of Clean Energy products and GNRC's progress in shifting its manufacturing to Vietnam (which we expect to have largely been completed in June). See our recent initiation here.

- **HASI**: Long-term core EPS growth guidance of 2-6% off a 2017 baseline remains intact implying core EPS of $1.43 in 2020 at the midpoint. We model 2Q20 core EPS of $0.33.

- **ORA**: We forecast 2Q20 adj. EPS of $0.39 and adj. EBITDA of $98mn reflecting typical seasonality of electricity generation. ORA 2020 guidance is revenue $710-740mn and adj. EBITDA $400-415mn. The Puna plant re-start previously pushed to 4Q20 and we look for an update on progress toward completing permitting & necessary transmission upgrades. The emerging market assets continue to be a source of concern. Trade receivables reached $169mn, and DSO is at 93 days, up from 73 days in 1Q19. See our read-throughs from California Public Utility Commission's latest Integrated Resource Plan here.

- **TPIC**: We expect 2Q20 line utilization of 70% driven by Juarez & Matamoros COVID-19 related shutdowns. 2Q20 UBSe adj. EBITDA is $22mn. We expect cumulative 2020-2021 wind demand to remain intact with the impact to TPIC earnings being one of timing. In addition, customer pushout of blade transitions could help mitigate the COVID related earnings impact to 2020 by reducing TPIC's blade transition costs.

Environmental Services 2Q20 preview

Progress on recovery in waste volumes

We expect relatively upbeat 2Q20 conference call as the recovery in municipal solid waste appears to be firmly underway. At the UBS Industrial and Transportation conference in early June, Management's noted continued w/w improvements in commercial waste volumes & landfill tons following the bottom in April. In addition, WCN pre-announced high-level results on 9 July driving a 4% increase in our 2Q20 revenue estimate.

As we approach the election we expect increased focus on potential for higher corporate tax rates. Broadly, every 1% increase in the corporate tax rates (from 21% to 22%) drives a 0.6% decrease in MSW FCF.

Re-issuing 2020 guidance

We expect most of the waste names will re-issue 2020 guidance with 2Q20 results. In our view, names best positioned to exceed expectations are nationally diversified players (WM, RSG, WCN) that were likely able to mitigate the impact of the relatively more restrictive COVID-19 shutdowns in the U.S. Northeast. For CVA, CLH, and ECOL waste volumes expected to recover sequentially after 2Q20 but likely to ramp more slowly than for the MSW haulers.

Source: FactSet, company reports, UBS research estimates. Note: UBSe for WM reflects partial year contribution from ADSW acquisition. All companies have withdrawn original 2020 guidance in light of COVID-19 pandemic.

Company specific focus areas

- **WM**: WM's well-diversified national exposure should help mitigate the most severe of the shutdown impacts on the U.S. Northeast (22% of revenue) and Canada (7% of revenue). WM's acquisition of ADSW is now expected to close 3Q20. WM expects to redeem ~$3bn of outstanding senior notes issued in May 2019 under the redemption provision that the deal be closed by 14 July 2020. Assuming refinancing at current rates we see a potential ~$27mn annual interest savings and $1.20/sh share price accretion at a 5% FCF yield.

- **RSG**: We forecast 2Q20 volumes down 14% y/y and adj. EBITDA of $596mn. RSG had previously disclosed 40% decremental EBITDA margin on the entire company driven by declines in high margin small container and landfill volumes. At our UBS Industrials & Transportation conference in early June, management highlighted continued improvement in volumes through May and expectations for a good June result. In addition, the company has seen no material change in DSO to-date.

- **WCN**: WCN pre-announced high level 2Q results. See our note here. 2Q revenue declined 4.7% y/y ($1.3bn; +1.5% to consensus) with adj. EBITDA margin down 90-100bps y/y ($392-394mn; +6.8% to consensus at mid-point). WCN highlighted same store solid waste revenue down 5.3% y/y and down 1.3% y/y excluding Canada and the U.S. Northeast. In addition WCN closed $50mn in new annualized revenue of new tuck-ins. We had previously expected a pause on acquisition spending in 2Q-3Q20. We expect WCN to re-issue formal 2020 guidance with the 2Q20 results and see FY2020 revenue tracking above the $5.25bn baseline provided previously.

- **ADSW**: ADSW will not be hosting an earnings conference call given the announced acquisition by WM. We do not expect the stock to trade on results given expected near-term acquisition closure.

- **CWST**: CWST's Northeast footprint suggests a more muted recovery than that experienced by WCN (and likely other nationally diversified players). We forecast 2Q20 volumes to decline 15% y/y. Our 2Q20 adj. EBITDA is $35mn, down 13% y/y. As of the 1Q results call, CWST expected a 150-200bps negative headwind to adj. EBITDA margin from COVID-19. Excluding M&A, the April y/y revenue impacts by product line were: Residential: 0%, Commercial -9.3%, Roll-off -26%, Disposal -14.4%, Resource Solution +1%. CWST noted a sequential up-tick from trough demand in late-April and May.

- **CVA**: Given CVA's Northeast concentration we expect a relatively slower recovery ramp than for the large national solid waste names, however we expect waste volumes for CVA have continued to improve off of April lows. Our 2Q20 adj. EBITDA is $68mn, down 28% y/y. Management previously highlighted April tip fee pricing down $4-6 per blended tip fee ton, or approximately 7-10% vs. 2Q19 averages and ~$5mn per month impact. See our recent upgrade of CVA to Buy here.

- **CLH**: We forecast 2Q20 adj. EBITDA of $92mn, -39% y/y. We see CLH's Safety Kleen segment taking the brunt of COVID related impacts, with segment revenue down 30% y/y in April but improving sequentially through June. CLH has completed ~$50mn of decontamination work related to COVID-19. As of 1Q20 CLH had closed half of its refinery capacity to reduce fixed costs and we

look for an update on potentially restarting these assets. Expect management to issue revised guidance with the 2Q results.

- **ECOL:** We forecast 2Q20 adj. EBITDA $39mn, ~flat y/y despite contribution from the NRCG acquisition. April & May likely reflecting trough months with the recovery in earnings underway in June. For the ES segment, management had previously flagged base business declines (~30% of revenue) of 10-15% y/y in April and likely similar May impact. Rig count has yet to find a bottom indicating pressure on ECOL's E&P waste revenues continuing to worsen in 3Q. ECOL has energy waste landfill exposures in the Permain (avg. 2Q rig count down 55% y/y) and Eagle Ford (avg. 2Q rig count down 63%) basins.

Valuation Method and Risk Statement

Our valuation methodology for North American utilities is price to earnings based. The adjustments applied fall into 6 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 5% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 5% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 5%, second quartile 2%, third quartile -2% and fourth quartile -5%; 4) Earnings Consistency Adjustment: For companies that fall in the top quartile of % Time Beat/Meet, we include +5%; 5) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% diversified or foreign earnings), we perform a sum-of-parts analysis applying business/region appropriate valuations to those diversified businesses; 6) One-off Adjustments: In special situations, we value risk on an issue specific basis. Common areas where we apply such an adjustment include: ESG advantage, large project construction risk, legal risk, and announced M&A completion risk. We identify the following risk factors for the sector overall: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

Our valuation methodology for the IPPs is based on mid-cycle EV/EBITDA multiples of 7.2x on UBSe 2020 EBITDA, UBSe 2020 Net Debt, the NPV of hedges and any NOLs discounted to the current year at 8%, and UBSe 2020 share count.

Our valuation methodology for the Alternative Energy space is based on a variety of metrics including P/BV, EV/EBITDA, P/E, and retained equity value per share. Our target multiples are derived from historical group averages with adjustments for expected growth rates, leverage, and earnings growth confidence. We identify the following risks for the sector: Demand for new renewable installations has historically been volatile around changes in state and federal policy, and we expect this volatility to continue. In addition, margins for product manufacturers can be impacted by swings in raw materials pricing and the overall level of energy prices.

Our valuation methodology for the Environmental Services space is based on EV/EBITDA with adjustments made to the target EV/EBITDA multiple based on relative growth rates, Free Cash Flow (FCF) conversion, expected earnings stability, and the general level of risk and our confidence in future earnings estimates. We identify the following risks for the sector: Housing remains a key driver of incremental municipal solid waste volume growth, and a slowdown in new housing starts could put downward pressure on sales growth. In addition, pricing tends to follow GDP growth, and a slowdown in economic growth could drive lower ability to raise pricing driving potential contraction in margins. For more industrial-exposed names, swings in commodity prices can impact the overall level of waste-generating activity, contributing to earnings volatility.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 17 July 2020 03:53 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	49%	32%
Neutral	FSR is between -6% and 6% of the MRA.	39%	30%
Sell	FSR is > 6% below the MRA.	13%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Daniel Ford, CFA; Jon Windham, CFA; Ross Fowler, CFA; Gregg Orrill; Paul Cole; William Grippin, CFA.

Source: UBS. All prices as of local market close.
Ratings in this table are the most current published ratings prior to this report. They may be more recent than the stock pricing date

2. UBS AG, its affiliates or subsidiaries has acted as manager/co-manager in the underwriting or placement of securities of this company/entity or one of its affiliates within the past 12 months.
3. UBS Securities LLC is acting as exclusive financial advisor to Advanced Disposal in the acquisition of all outstanding shares of Advanced Disposal by Waste Management.
4. Within the past 12 months, UBS AG, its affiliates or subsidiaries has received compensation for investment banking services from this company/entity or one of its affiliates.
5. UBS AG, its affiliates or subsidiaries expect to receive or intend to seek compensation for investment banking services from this company/entity within the next three months.
6a. This company/entity is, or within the past 12 months has been, a client of UBS Securities LLC, and investment banking services are being, or have been, provided.
6b. This company/entity is, or within the past 12 months has been, a client of UBS Securities LLC, and non-investment banking securities-related services are being, or have been, provided.
6c. This company/entity is, or within the past 12 months has been, a client of UBS Securities LLC, and non-securities services are being, or have been, provided.
7. Within the past 12 months, UBS Securities LLC and/or its affiliates have received compensation for products and services other than investment banking services from this company/entity.
13. UBS AG, its affiliates or subsidiaries beneficially owned 1% or more of a class of this company`s common equity securities as of last month`s end (or the prior month`s end if this report is dated less than 10 days after the most recent month`s end).
16. UBS Securities LLC makes a market in the securities and/or ADRs of this company.
19. Because this company is an announced takeout candidate, UBS believes the security presents lower-than-normal risk. We have widened its rating band to +6%/-10% compared with +6%/-6%, respectively, under the normal rating system.
20a. Because this security exhibits higher-than-average volatility, the FSR has been set at 15% above the MRA for a Buy rating, and at -15% below the MRA for a Sell rating (compared with 6/-6% under the normal rating system).
20b. Because this security exhibits higher-than-average volatility, the FSR has been set at 25% above the MRA for a Buy rating, and at -25% below the MRA for a Sell rating (compared with 6/-6% under the normal rating system).

Unless otherwise indicated, please refer to the Valuation and Risk sections within the body of this report. For a complete set of disclosure statements associated with the companies discussed in this report, including information on valuation and risk, please contact UBS Securities LLC, 1285 Avenue of Americas, New York, NY 10019, USA, Attention: Investment Research.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the [European Central Bank (ECB)] and regulated by the BaFin and the ECB. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Securities France S.A. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS") with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliarios Ltda, UBS Asesores Mexico, S.A. de C.V., UBS Securities Japan Co., Ltd, UBS Wealth Management Israel Ltd and UBS Menkul Degerler AS are affiliates of UBS AG. UBS Financial Services Incorporated of Puerto Rico is a subsidiary of UBS Financial Services Inc. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain and does not undertake banking or investment business activities in Bahrain. Therefore, clients have no protection under local banking and investment services laws and regulations. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This research report is neither intended to be distributed to PRC investors nor to provide securities investment consultancy services within the territory of PRC. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Supervisory Authority. **France**: This publication is distributed by UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, 69, boulevard Haussmann F-75008 Paris, R.C.S. Paris B 421 255 670, to its clients and prospects. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code Monétaire et Financier", regulated by French banking and financial authorities as the "Autorité de Contrôle Prudentiel et de Résolution." **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a

credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Greece**: UBS Switzerland AG and its affiliates (UBS) are not licensed as a bank or financial institution under Greek legislation and do not provide banking and financial services in Greece. Consequently, UBS provides such services from branches outside of Greece, only. This document may not be considered as a public offering made or to be made to residents of Greece. **Hong Kong**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **Indonesia, Malaysia, Phillipines, Thailand**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **India**: UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch, with place of business at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE, Luxembourg Branch is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Luxembourg supervisory authority (Commission de Surveillance du Secteur Financier), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Securities Market Law due to the relation with a Foreign Bank. UBS Asesores is a regulated entity and it is subject to the supervision of the Mexican Banking and Securities Commission ("CNBV"), which exclusively regulates UBS Asesores regarding the rendering of portfolio management, as well as on securities investment advisory services, analysis and issuance of individual investment recommendations, so that the CNBV has no surveillance faculties nor may have over any other service provided by UBS Asesores. UBS Asesores is registered before CNBV under Registry number 30060. You are being provided with this UBS publication or material because you have indicated to UBS Asesores that you are a Sophisticated Qualified Investor located in Mexico. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: UBS Switzerland AG and its affiliates (UBS) are not licensed, supervised or regulated in Nigeria by the Central Bank of Nigeria or the Nigerian Securities and Exchange Commission (SEC) and do not undertake banking or investment business activities in Nigeria. The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Nigerian SEC. If you are interested in products of this nature, please let us know and we will direct you to someone who can advise you. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). **Poland**: UBS is a premier global financial services firm offering wealth management services to individual, corporate and institutional investors. UBS is established in Switzerland and operates under Swiss law and in over 50 countries and from all major financial centres. UBS Switzerland AG is not licensed as a bank or as an investment firm under Polish legislation and is not permitted to provide banking and financial services in Poland. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the Portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Russia**: This document or information contained therein is for information purposes only and constitute neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. **Singapore**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. **Spain**: This publication is is not intended to constitute a public offer under Spanish law. It is distributed only for information purposes to clients of UBS Europe SE, Sucursal en España, with place of business at Calle María de Molina 4, C.P. 28006, Madrid. UBS Europe SE, Sucursal en España is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Spanish supervisory authority (Banco de España), to which this publication has not been submitted for approval. Additionally it is authorized to provide investment services on securities and financial instruments, regarding which it is supervised by the Comisión Nacional del Mercado de Valores as well. UBS Europe SE, Sucursal en España is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Turkey**: No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be

considered as an offer made or to be made to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 there is no restriction on the purchase or sale of the instruments by residents of the Republic of Turkey. **UAE**: UBS is not licensed in the UAE by the Central Bank of UAE or by the Securities & Commodities Authority. The UBS AG Dubai Branch is licensed in the DIFC by the Dubai Financial Services Authority as an authorised firm. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made and will not make any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer or invitation to offer, or solicitation of securities in the territory of Ukraine. Electronic communication must not be considered as an offer to enter into an electronic agreement or electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015.

This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed.

Regulated Utilities:
Our Q2'19 EPS estimates are 3% below consensus and 3% below Q2'18. Weather conditions were below normal in every region of the country with the upper Midwest and West most impacted (CMS, EVRG, PNM, PNW) although conditions in the Southern U.S. improved YoY which we expect helped ETR exceed consensus, and should also be helpful to NEE and SO. Due to the timing of rate case revenue EIX likely also beat consensus and the company could discuss their contribution to the wildfire insurance fund and the legislation on their call. Canadian utilities likely miss consensus with mild weather for CU, FTS and H, and EMA capped on ROE in NS despite better weather.

Power:
Our expectations for Adj. EBITDA are similar to 1Q where we see NRG results of $486mln below current consensus due to annual estimates not being seasonally weighted enough to 3Q, whereas we see VST results of $718mln above consensus due to estimates not being seasonally weighted enough away from 3Q. Overall results should not be significantly impacted by the lower power prices year on year as NRG was 93%/82% hedged in ERCOT/PJM as of the 1Q call and VST was 100% hedged to natural gas and 94% hedged to heat rate in ERCOT and 94%-95% hedged in the northeast as of the 1Q call. Despite forward curves being lower management should discuss on the call the offsetting effects of expanding retail margins. In addition to discussion of these sensitivities, investors are likely to focus on integration of the Crius acquisition for VST, implementation of the retail lite strategy for NRG, and any updates on target leverage and use of FCF, as well as the upcoming PJM capacity auction.

Alternative Energy: Waiting for 2H19
We expect muted 2Q19 results given most companies in the space point towards a 2H19 ramp in demand and earnings. 2Q19 should be a small loss for FSLR (Buy) before the ramp in Series 6 volume and transition cost declines. 2H19E adj. EPS of $3.18/sh compares to 1H19E adj. loss per share of $0.67/sh. Similarly, we expect TPIC (Buy) y/y EBITDA ramp to begin in 3Q19 as 1H19 was impacted by one-off labor and production issues. We see potential upward guidance revisions for 2019 module shipments, particularly for the Chinese exposed names CSIQ and JKS.

Environmental Services: Headwinds make 2019 guidance increases unlikely
We expect the focus to be on two headwinds: 1) a 64% YTD decline in recycled fiber pricing and 2) a 10% YTD decline in Permian Basin E&P rig count. However, 2019 guidance is likely to be maintained across the group, in our view, driven by strong core MSW price and volume and incremental M&A offsetting the commodity headwinds. WCN (Buy) remains our top pick.

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 32.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Regulated Utilities 2Q19 preview

Key Calls this Quarter

AES Corp. We expect a discussion of development in Vietnam of 450 TBTU of LNG capacity and 2 GW of combined cycle gas or projects totalling $3B. The projects could come on-line in the 2023-2025 timeline. AES would look to use partner equity in the project while still growing net income up to $100M in our estimation.

Alliant Energy. With intervenor testimony in the IP&L rate case 8/1 the company may be in a position to comment. An update on 2020 equity needs will wait until the third quarter call.

Ameren Corp. We expect a discussion on Missouri renewables and financing needs. We raised our assumption for 2019 equity need to $700M from $500M due to the acquisition of an incremental 400 MW if wind.

American Electric Power. Management could discuss the North Central Wind Energy facilities at SWEPCO and PSO which total 1,485 MW and represent $2B in rate base. The company could use up to 50% equity to finance these projects which would provide for $0.07-$0.10/share of accretion. Another topic is the numerous rate cases in which the company is involved including Arkansas, Indiana, Michigan, and Texas.

CMS Energy. Despite a light Q2'19 ($0.32E versus $0.48 last year) we believe there is a reasonable bridge to 2019 guidance of $2.47-$2.51 due to the absence of reinvestment spending in 2018 which could add $0.23/share along with contingency.

DTE Energy. We look for a discussion of how the company thinks about the company's 5 year forecast at the Gas, Pipelines & Storage segment and plans to spend $4-$5B.

Edison International. With wildfire legislation having passed in California the company could raise its forecast of capital needs for its contribution to the wildfire insurance fund from the $1.5B equity need discussed on the first quarter call. EIX stands out as one of the potential beats versus consensus due to $0.22/share of rate relief.

Emera Inc. We expect EMA to spend time on the call on August 12 discussing the Maine intervenor testimony filed in the pending EmeraMaine sale to ENMAX at the Maine Public Service Commission on August 5 and provide an update on the process.

FirstEnergy. We expect FE to maintain 2019 EPS guidance of $2.45-$2.75 but following a Ohio Supreme Court decision they are collecting the Distribution Modernization Rider subject to refund.

OGE Energy. We expect investors to revive the issue of dividend payout although we do not necessarily expect news beyond the previously stated policy of 10% annual growth in the dividend through 2019.

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

Weather

Weather was broadly milder year over year in the second quarter, with weather in all regions below normal and the country 4% below normal on degree days. Regionally the West North Central Region, Middle Atlantic, and East North Central region experienced the fewest degree days versus normal for the quarter, while the Pacific region and the Southeast had the closest to normal weather experience. Year over year, the Middle Atlantic, Mountain, Pacific, and East North Central regions were down the most, while the East & West South Central regions were actually better year on year and the West North Central region was flat.

Figure 5: 2Q19 Regional Degree Days

Q2'19 Degree Days (April , May, June)	2Q19	2Q18	2Q Normal	2Q19 vs. 2Q18	2Q19 vs. Normal
New England	927	966	1,055	-4%	-12%
Middle Atlantic	749	885	945	-15%	-21%
East North Central	858	961	1,072	-11%	-20%
West North Central	947	951	1,232	0%	-23%

East South Central	809	758	960	7%	-16%
West South Central	961	880	1,073	9%	-10%
Mountain	756	886	823	-15%	-8%
Pacific	693	811	741	-15%	-6%
United States	4,882	4,778	5,073	2%	-4%

Source: NOAA, UBS

We also looked at the states that had the biggest shifts in year-on-year weather. We sorted them on the largest percentage change although 2Q degree days are not that significant in some areas.

Electric Utilities

- **AES.** We expect flat EPS in Q2'19 at $0.25 and the company's growth to be more back-end loaded this year with OPGC II in India coming on line in the second quarter and renewable capacity funded by tax equity in the fourth quarter. Otherwise the Changuinola outage in Panama is a negative driver though in guidance as are asset sales. On the positive side we expect similar drivers to Q1'19 like cost cuts, the Dominican Republic and the U.S. utilities. Despite a light first half AES is in position to make the full year due to start-ups of new renewable capacity primarily in the United States and of the OPGC II coal plant in India.

Figure 7: AES 2019 Earnings Drivers

	2019E	Q1'19A	Q2'19E	Q3'19E	Q4'19E	Comments
Prior Year Start		$0.28	$0.25	$0.35	$0.36

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **ACO.** We see ATCO Ltd earnings in line with 2Q'18 at C$0.61. Year over year earnings drivers will be from the S&L business segment where seasonally the largest contributions are in the 2nd and 4th quarters. S&L growth to the full year run rate is expected to be more back-end loaded in 2019 due to the ramp at construction facilities as work force has begun ramping up in the quarter. Year on year, earnings are likely to be higher at S&L vs. 2Q'18 related to the close of the Mexico acquisition in late February. The production factory in Chile was completed in 2Q'18 and could contribute year over year. Sanctioning of new projects related to LNG Canada, Coastal GasLink, and the Silvertip Mine, among others are still ramping up and likely to contribute more in the back half of the year vs. the 2Q. The Naltume Ports acquisition was closed in September 2018 and will be a year on year contributor at the expected run rate of about C$4mln/qtr. Given the ownership stake in Canadian Utilities, earnings will also be impacted by the drivers discussed for that company, which are provided below.

- **LNT.** We see LNT's Q2'19 EPS flat at $0.43 versus $0.43 in Q2'18. The absence of above normal weather in Q2'18 is -6 cents and weather was below normal this year. Rate relief at WP&L should add 5 cents and interim rate relief at IP&L could add 8 cents. IP&L wind going into service at the end of March could add 2 cents. Negative drivers are depreciation and interest expense including $600M at IP&L at rates of 3.0-3.6%.

Figure 8: LNT Q2'19 EPS Drivers

	Q2'19E	Q1'19A	Q2'18A
IP&L	$0.26	$0.23	$0.22
WP&L	$0.19	$0.28	$0.17
Utils & Corp	$0.45	$0.52	$0.41
ATC	$0.03	$0.03	$0.03
Non-utility	-$0.03	-$0.02	-$0.01

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **AEE.** We look for a decline in AEE's EPS in Q2'19 to $0.75 from $0.97. A normalized Q2'18 is $0.74 with normal weather (-$0.19/share), Callaway outage timing (-$0.09/share) and Missouri taxation (+$0.04/share). Otherwise we see $0.02 from Ameren Transmission rate base growth and $0.03 from Ameren Illinois Electric and Gas growth offset by -$0.04 for below normal June weather in Missouri and other expenses of -$0.02/share.

Figure 9: AEE Q2'19 EPS Drivers

Q2'18	$0.97
Weather to normal	-$0.19
(10 year not 30 year average)	
Callaway	-$0.08
Missouri taxation	$0.04
Normalized Prior Year	$0.74
Q2'19 Drivers	
Ameren Transmission rate base	$0.02
Ameren Illinois rate base	$0.03
Ameren Illinois electric ROE impact	-$0.01
Below normal weather, other	-$0.04
Q2'19	$0.75

Source: Company reports, Factset, UBS Equity Research

- **AEP.** We expect a small decline in AEP's EPS in Q2'19 to $0.97 from $1.01. We expect a decline of $0.12 to normal weather. Rate relief likely added $0.09/share or $0.06 to Vertically Integrated and $0.03 to T&D Utilities. O&M and depreciation increases reduced EPS by $0.05 or more.

Figure 10: AEP Q2'19 Earnings Drivers by Segment

	Q2'19E	Q1'19A	Q2'18A	
Adjusted Earnings	$0.97	$1.19	$1.01	Earnings Drivers

AEP Trans Holdco	$0.26	$0.25	$0.21	
Gen & Marketing	$0.04	$0.09	$0.05	
Corp & Other	-$0.06	-$0.10	-$0.04	

Source: Company reports, Factset, UBS Equity Research

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **CMS.** We see a decline in CMS' EPS in Q2'19 to $0.32 from $0.48. Michigan experienced below normal weather versus an $0.11/share positive in Q2'18. Carrying costs that we expect the company can pick-up in electric and gas rate case recovery such as depreciation, interest and taxes was potentially a -$0.05/share impact or more. We also look for a decline at CMS Enterprises from lower sales and revenue. Positives include rate case margins (25% of revenue) which add $0.06/share and other items. We believe the company can meet EPS guidance due to reinvestment in 2018.

Figure 11: CMS Q2'19 EPS Drivers

	2019E	Q1'19A	Q2'19E	Q3'19E	Q4'19E	Comments

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **CU.** We expect investors on the conference call to want to discuss the potential use of proceeds given the company's announced sale of the Alberta Power business and the Alberta Power Line. We anticipate that management will reiterate the focus to potentially target utility or utility like infrastructure or long term contracted assets that would provide not only adequate capital returns but also geographic diversity outside of Alberta. For scale once the asset sales are closed we would expect acquired assets could range in the C$1 – C$3Bln range and that the higher end of that range could require preferred equity financing. A larger scale transaction would be possible but management would likely seek a financial partner in such a scenario. For the quarter we expect earnings of C$0.40 versus C$0.39 last year. We anticipate that management will report the Alberta Power and Alberta Powerline segments as assets held for sale, but include them in both reported and adjusted earnings. The quarterly results will be most impacted by significantly lower Alberta power prices in the C$30/MWh range due to mild June and July weather vs. warm weather in 2Q '18. Regulatory decisions in Alberta for the transmission and pipeline segments will be +C$2mln year on year, and the electric transmission application order will book make up revenue of ~C$13mln for 2018 and ~C$4mln for Q1'19 as well as the Q2'19 impacts in the quarter. Other topics of interest for the call will be the IT common matters decision and how that ties to the sale of IT services in as well as the approval of the Hanna transmission project.

- **CUP.** We expect Caribbean utilities to report an in-line quarter at $0.21. Year over year drivers will be increased usage from economic growth mostly driven by likely increased overnight tourism visits and increased financial sector activity. In 1Q'19 customer growth was 2% year on year with 5% usage growth leading to 4% sales growth overall. Year over year the revised rates for large commercial demand customers that were awarded in June 2018, as well as the 1.8% rate increase under the RCAM mechanism will have an impact. Further we expect slight reductions in financing and operating costs year on year.

- **ED.** We see lower EPS for ED in Q2'19 at $0.56 versus $0.61 last year. 3 considerations are: 1) Steam added 3 cents in Q2'18 which unlikely to occur; 2) Stagecoach earnings sharing steps down to 50% from 60% starting 6/6; and 3) An increase in the stock price has a negative impact on the mark to market which was -4 cents as a reference in Q1'19. In Q2'18 CECONY earned a 9.6% ROE although comp mark-to-market could contribute to reducing that to 9.0% which would be a -3 cent reduction. Other drivers include a reduction in the Clean Energy Businesses ($0.06 versus $0.09) potentially offset by cost control.

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

Figure 12: ED Q2'19 EPS Summary

	Q2'19E	Q1'19A	Q2'18A	Earnings Drivers
CECONY	$0.45	$1.28	$0.48	Q2'18 was 9.6% ROE and 48% equity ratio equity dilution, comp -3
O&R	$0.02	$0.10	$0.02	
CEBs	$0.06	-$0.04	$0.09	
CET	$0.04	$0.04	$0.04	StageCoach 50% of Crestwood not 60% start 6/6

Source: Company reports, Factset, UBS Equity Research

D. We expect D to report adjusted EPS of $0.76 vs. consensus of $0.79, and 2Q'18 results of $0.86. The guidance range for the quarter is $0.70-$0.80. Negative yr/yr drivers include a Millstone refueling outage (historical cost range is $0.07-$0.09), share dilution (approx. $0.16), assets sales and more normal weather. Positive yr/yr drivers include the earnings contribution from the Southeast Energy Group ($0.18 before financing considerations) and rate base earnings growth. Beyond the earnings and regular business report, we expect investors to focus on updates around the Atlantic Coast Pipeline and Supply Header. While an order from the 4th Circuit addressing the biological opinion is expected in early August (90 days after oral arguments), the more important US Supreme Court decision on whether to take up the case won't be issued till late 2019.

- **DTE.** We forecast lower EPS for DTE in Q2'19 at $1.17 versus $1.25 last year. We see 3 adjustments in Q2'18 which are: 1) Weather was $0.17 above normal and this year was unseasonably cold; 2) There will be 1.5 months of the DTE Electric rate increase which we forecast as a 25% margin and 3) Rate base expenses are up to -$10M after-tax per quarter for DTE Electric and DTE Gas combined. We also see some impact from the absence of NEXUS AFUDC and depressed volumes.

Figure 13: DTE Q2'19 EPS and Net Income Summary (Dollars in Millions)

	Q2'19E	Q1'19A	Q2'18A	Earnings Drivers
DTE Electric	$150	$147	$163	Weather -$31M to normal and Q2 was cold Rate relief +$30M; Rate base costs -$10M
DTE Gas	$10	$151	$14	Volume weighted impact $47M rate increase rate-base costs -$3M; tax timing reveral -$10M
GS&P	$50	$48	$60	Lower volumes; absence of AFUDC but on track
P&I	$33	$26	$43	1/3 of result to guidance
Corp & Other	-$35	-$3	-$41	1/3 of result to guidance

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **DUK.** We expect DUK to report adjusted EPS of $0.98 vs. consensus of $0.98 and 2Q'18 results of $0.93. Earnings in the quarter should benefit from better than normal weather, load growth, new rates (SC) and incremental rate base (Citrus County & Rosamont). Midstream will show modest growth (AFUDC) and the commercial renewables segment should show a marked improvement over Q1 as the shape of earnings from that segment adjust. Beyond earnings and guidance, we expect investors to focus on legislative and coal ash updates from North Carolina, the Atlantic Coast Pipeline and the legal appeal of the rate decision in South Carolina.

- **EIX.** We forecast Q2'19 EPS for EIX of $1.21 versus $0.85 last year. The big driver is $0.22 from the general rate case which is the company discussed on the Q1'19 investor call. We also expect for the regulatory lag on non-fuel O&M recovery to dissipate. Other positives include transmission rate base growth and lower financing costs. At Edison Energy and Parent we assume -$0.05 versus -$0.06 last year.

Figure 14: Southern California Edison Q2'19 EPS Summary

Q2'18 SCE	$0.91
Rate case	$0.22
O&M	$0.08
Financing	$0.05
FERC	$0.03
D&A & other	-$0.03
Q2'19 SCE	$1.26

Source: Company reports, Factset, UBS Equity Research

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **EMA.** We expect EMA to report C$0.52 vs. C$0.48 last year. Drivers will be the sale of the New England generation assets year over year and mild weather outside the Southeast will be a drag on results in Maine and on the remaining energy segment. In 2Q'18 the power plants has a pre-interest allocation earnings of C$13.5mln. Interest expense at the plants allocated to corporate was C$6mln. Maine should show better results year on year given non-recurring storm expenses in 2Q'18. Further Maine received a distribution rate increase of US$15.7mln in July of 2018. At Nova Scotia Power, weather has been colder than normal which is a driver of demand for electric heat. However, upside is limited from strong weather as a result of a capped ROE sharing mechanism at 9.25%, which is 25bps above the allowed ROE of 9%. As a result, earnings in 2Q will not be as strong as weather might otherwise indicate. In Florida, unlike most of the United States, weather was favorable vs. last year with the warmest May on record and the tail end of June was also warm. The solar under the SOBRA program now has 405MWs earning returns vs. 145MWs booking AFUDC last year. FX average is also approximately 1.33 vs. 1.29 year on year and each +0.01 in FX is about +C$0.01/share to EMA. On the call we expect investors to be focused on the approval process for the sale of Emera Maine and the management take on the intervenor testimony which will be filed on August 6, vs. the earnings call date of August 12.

- **ETR.** We expect ETR to report adjusted EPS of $1.40 vs. consensus of $1.39 and 2Q'18 results of $1.23. Weather for the quarter should be positive vs. normal, but below last year, while rate increases in Arkansas and Louisiana and rate base growth in Louisiana (St. Charles power station) should all represent yr/yr growth. Our estimate assumes a ratable allocation of targeted O&M savings over the remainder of the year, but we recognize that the actual realization of these savings could be uneven. We expect ETR will update investors on its continued exit from the EWC business, the various proceedings at the regulated entities and any residual impact from the recent hurricane.

- **EVRG.** We forecast Q2'19 Adjusted EPS of $0.58 versus $0.90 pro-forma last year. Weather conditions made a significant swing in the quarter from $0.22/share above normal last year to below normal this year. Deferred taxes was a negative driver as well. Another negative is a reduction in pro-forma merger transaction costs under accounting rules which is a $35-$36M pre-tax change (Q2'18 10-Q p. 66). Positive drivers include plant shutdowns at the end of 2018 (Montrose and Sibley), merger synergies and the share buyback.

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **ES.** We expect ES to report adjusted EPS of $0.78 vs. consensus of $0.77 and 2Q'18 results of $0.76. We look for ES to benefit modestly from the 2018 CL&P rate case implementation, the transmission rate base true up that occurs in the second quarter, ongoing cost control efforts, the investment portfolio mark and the Nstar Electric rate increase. Offsetting these benefits will be the impact of decoupling at Yankee Gas, higher property tax and interest expense, and the loss of generation earnings. We expect the investor call to focus on incremental growth opportunities (GridMod spending in CT/Mass/NH, offshore wind, water M&A), and changes in regulatory personnel.

- **EXC.** We expect EXC to report $0.59 v. $0.71 last year. Overall this expectation is below the mid-point of the company's $0.55-$0.65 2Q'19 guidance range provided on the 1Q'19 conference call. Factors not incorporated into the guidance range at the time were mild weather impacts at the non-decoupled utilities, especially PECO. Further, the planned outage at the Salem nuclear plant lasted approximately 30 days beyond likely initial projections which would have increased costs by ~$30mln on pre-tax basis. NDT will also likely be a drag quarter over quarter as of the $0.07 of NDT gains in 2018, $0.05 were recorded in 2Q'18. Milder weather is unlikely to impact the nuclear fleet all that much as run times were likely around-the-clock regardless although it could have some small impact on the much smaller non-nuclear generation fleet. Power prices and spreads are lower year on year, however, financial and retail hedging as well as the zero emission credits in New York, New Jersey, and Illinois will protect the majority of the nuclear fleet from significant volatility in EBITDA.

- **FE.** We forecast Q2'19 EPS of $0.58 versus $0.62 last year. Weather to normal was -3 cents versus last year and conditions were below normal this year. The absence of a renewable energy credit is a -3 cent item too. Offsetting that is cost cuts and rate base growth. This compares to the company's $0.55-$0.65 guidance for the quarter.

Figure 16: FE Q2'19 EPS (Dollars in Millions)

	Q2'19E	Q1'19A	Q2'18A	Earnings Drivers
Adjusted Earnings	$0.58	$0.67	$0.62	
Regulated Distribution	$0.50	$0.62	$0.55	Weather -3 cents to normal and below normal in 2019; renewable credit reversal -3 cents, D&A -1 to -2 cents, FE Tomorrow +1 cents
Regulated Transmission	$0.21	$0.19	$0.19	+2-3 cents of rate base growth
Corporate/Other	-$0.13	-$0.13	-$0.12	

Source: Company reports, Factset, UBS Equity Research

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **FTS.** We expect that consistent with Q1'19 reporting Fortis will report results excluding mark to market impacts from the Aitken Creek storage facility and adjust prior periods to exclude them as well. As a result 2Q '18 will be restated to C$0.59. For the current quarter we expect lower earnings year on year of C$0.56 mainly driven by significantly milder weather in Arizona. Further 2Q'18 included nonrecurring items related to the positive hydrology impacts in Belize and the Hurricane Irma insurance receipts. Offsetting this will be rate base and sales growth as well as positive timing impacts related to the timing of plant outages in Arizona. Lastly, the sale of the Waneta hydroelectric plant will have a greater than anticipated drag on the quarterly results as the majority of earnings contribution was seasonally in the second quarter. We expect that on the call investors will be focused on execution of any potential incremental capital projects that could increase or extend current growth rates, and any updates on the Federal Energy Regulatory Commission transmission ROE review process and the ongoing rate case for Tucson Electric Power in Arizona.

- **HE.** We expect HE to report adjusted EPS of $0.44 vs. consensus of $0.45 and 2Q'18 results of $0.42. Yr/Yr earnings will benefit from interim rates at Maui Electric ($12.2mm; effective Aug '18) and the interim recovery mechanism (MPIR) for the Schofield project. We expect Bank earnings to benefit from asset sales and lease expirations at some point this year (3-5 cents) but believe these will be one time benefits. We expect the earnings conference call to focus on the regulatory climate and proceedings in Hawaii, and capital spending opportunities.

- **H.** We expect H to report C$0.26 v. C$0.32 last year, mainly driven by milder weather year on year. Peak loads in Ontario in May were down 20% year on year and overall peak loads were down 9% quarter over quarter. Further, there were significant storm costs in Ontario in 2Q'18 which are helpful to earnings as they are capitalized, so lack of storm costs will likely increase O&M year on year given a return to normal work patterns. Further, lack of storms has likely allowed for an acceleration of work related to maintenance and vegetation management which would also increase O&M year on year. Further, interest expense will tick a bit higher given the term out of C$1.5Bln in debt issued in April 2019, composed of C$700mln at 2.54% due 2024, C$550mln at 3.02% due 2029, and C$250mln at 3.64% due 2050. On the call we expect investor focus to be on any improvement in controllable costs, the recently announced changes to the Board of Directors, and any insights into the status of the change out of several senior management positions, and how new CEO Mark Poweska's strategy for the company continues to evolve.

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **NEE.** We expect NEE to report $2.31 v. $2.28 last year. Year over year we anticipate drivers at FPL to be new investment growth (+$0.07). The acquisition of Gulf Power will also be additive year on year (+$0.10). At NEER, results will be driven by growth for existing assets (+$0.08) and increased earnings due to new investments related to execution of the backlog (+$0.05). Offsetting these positive drivers will be share dilution (-$0.05), and lower results at Corp & Other (-$0.12). We expect not much of an update informationally on the conference call versus the recently held Analyst Day in New York. Investors will be focused on any updates on wind backlog at NEER, and any insights into the further integration efforts for recently acquired Gulf Power.

- **OGE.** We forecast a decline in Q2'19 EPS at OGE to $0.52 from $0.55 last year. The absence of above normal weather is -5 cents and we estimate the impact of below normal conditions (particularly June) in Oklahoma was -2 cents. That said July has started off well and OGE is on track for the year.

Figure 17: OGE Q2'19 EPS Summary

OGE EPS Summary			
	Q2'19E	Q1'19A	Q2'18A
OGE	$0.52	$0.24	$0.55
OG&E	$0.41	$0.14	$0.46
OGE Energy Holdings	$0.12	$0.12	$0.11
Hold Co.	-$0.01	-$0.01	-$0.02

Q2'18	$0.46
Weather to normal	-$0.05
Below normal	-$0.02
Rate design	$0.01
AFUDC/D&A	-$0.01
Interest expense	$0.01
O&M	$0.01
Q2'19	$0.41

Source: Company reports, Factset, UBS Equity Research

- **PCG.** PCG will report Q2'19 EPS results on July 26 and we see $1.16 versus $1.16 last year. Tax timing is a regular driver for the company that nets to zero for the year. The company began to record formula rates for the 2020 transmission rate case on May 1. PG&E requested a 12.5% ROE. There was not a nuclear outage in the quarter.

Figure 18: PCG Q2'19 EPS Summary

PCG Q2'18	$1.16
Tax timing	-$0.05
Non-fuel O&M	-$0.02
Shares	-$0.01

Reduction in insurance	$0.04
PCG Q2'19	$1.16

Source: Company reports, Factset, UBS Equity Research

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **PNM.** We expect PNM to report adjusted EPS of $0.37 vs consensus of $0.49 and 2Q'18 results of $0.53. Our estimate is consistent with guidance issued by the company of $0.36-$0.38 on 7/12 which reflects substantially milder temperatures in the service territory during the second quarter. We expect investor attention will focus on the company's earning profile through the remainder of the year, weather trends that have been observed quarter to date and the contributing factors to the revised annual guidance.

- **PNW.** We expect PNW to report Q2'19 EPS of $1.37 versus $1.48 last year. There are some significantly negative drivers including a decline in cooling degree days 28% from 2018 and 30% versus normal (about 130 days). In Q1 PNW had 1.0% weather normalized sales growth which could continue. Other drivers include several timing related items versus last year like pension and transmission income. PNW also provides guidance on quarterly outage spending.

Figure 19: PNW Q2'19 EPS Summary

Q2'18	$1.48
O&M	$0.10
Sales	$0.02
LFCR	$0.01
Interest	$0.01
Depreciation	-$0.02
Outage O&M	-$0.03
Transmission	-$0.04
Pension	-$0.05
Weather	-$0.11
Q2'19	$1.37

Source: Company reports, Factset, UBS Equity Research

- **POR.** We forecast flat EPS in Q2'19 of $0.52 versus $0.51 last year. The absence of plant O&M should add 4-5 cents and normal weather conditions adds 2 cents. We don't see much of a story here for the quarter.

Figure 20: POR Q2'19 EPS Summary

Q2'18	$0.51
Weather	$0.02
Carty	$0.03
Plant O&M maintenance	-$0.04
Rate case	$0.03
Q2'19	$0.52

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **PPL.** We expect flat EPS for PPL in Q2'19 at $0.55 versus $0.55 last year. At a high level we see +3 cents from F/X hedges (1.41x UK sterling to US dollar) for the company's U.K. utility and Kentucky rate relief offset by non-fuel O&M and weather.

Figure 21: PPL Q2'19 EPS Summary

	Q2'19E	Q1'19A	Q2'18A	Earnings Drivers
EPS	$0.55	$0.70	$0.55

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **PEG.** We expect PEG to report $0.58 v. $0.65 last year. One of the key drivers will be timing related to tax reform impacts for excess deferred income taxes. This factor was +$0.05 in 1Q'19 and we expect that to reverse out in 2Q'19. On the PEG Power side both the Keys Energy Center and Sewaren 7 were put into service in late 2Q '18 and will add 1,300MWs of capacity to the generation fleet for the majority of the quarter year over year. Zero Emission Credits were also put into place in New Jersey in April 2018 and will be a positive driver of results as they will have a full quarter of impact in 2Q'19. However this positive impact is likely to be mostly offset by lower capacity prices year over year as prices reset on the June 1 capacity year. Last year capacity prices were $205/MW-day on 9,600MWs of capacity while this year pricing as of June 1 was $115/MW-day on 9,000MWs of capacity. Capacity prices in New England were also lower ($2.31/kW-month vs. $3.14/kW-month) despite capacity being +500MWs for the new capacity year. Re-contracting will also be a headwind to results as PEG management indicated a $3/MWh drag although because of seasonal impacts we expect a lower drag on results in 2Q than the ($0.08) seen in 1Q'19. Off-system sales for gas will be lower year over year due to milder weather, and results will be impacted by outage timing as the planned outage at the Salem nuclear facility extended by a likely 30 days beyond projected timelines. However, the Salem plant is only 50% owned by PEG whereas Hope Creek had an outage in 2Q'18 and that plant is 100% owned by PEG. D&A and interest expense are projected to tick higher due to the new plant in service. At the utility we expect the transmission formula rate to be +$0.03 year on year, and despite the distribution rate increase settled on Nov 1 expect that to not have large impacts in 2Q given seasonality of load. Changes to OPEB will add roughly +$0.01 as in 1Q'19 and there will be some incremental benefit from the operating contract at LIPA booked in parent & other. Interest expense will be up slightly at parent and other for the $750mln at 2.875% in debt issued on June 1 slightly offset by the retirement of $350mln at LIBOR +80bps earlier in the quarter.

- **SRE.** We expect SRE to report $1.17 v. $1.21 last year mainly driven by continued drag related to the GRC decision in California. A final decision would be retroactive to 1/1/19 but cannot be booked until received. Our latest expectation for GRC resolution in year-end 2019. We expect interest expense to be slightly higher given issuances of $400mln at SDE&G and $390mln at SoCalGas at around 4%. Offsetting the drag somewhat are likely to be increased earnings for the pipeline program and energy efficiency awards. At Oncor results should be higher year on year related to the close of the InfraREIT transaction on 5/16, although volumes are likely to be lower on milder weather in ERCOT. At South America there were no one-time items in 2Q'18 although there will likely be an FX drag year on year. In Mexico the Peso averaged 19.9 to the USD at 2Q'19 vs. 18.3 at Q2'18 versus hedged levels of 20.72. The TDN plant is uncontracted into the SoCal market and SP15 pricing is down year over year. Renewables will have negligible to no impact in the quarter as the transaction with AEP is now closed. LNG and midstream will continue to be a little bit of a drag on results as expected until the completion of the Cameron LNG facility. We expect corporate and other to be roughly in-line with 1Q'19. There will likely be slightly higher interest expense related to $700mln in debt issuance at 7.5% year over year and the proceeds from the storage and wind sale of $500mln paid off short term debt at a 2.5% - 3% rate.

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **SO.** Southern reported $0.80 in 2Q'18 and issued guidance for 2Q'19 on their first quarter call of $0.71 versus our estimate of $0.72. The main drivers year over year will be the divestitures of the Florida assets to NextEra Energy. In 1Q'19 this was a ($0.11) year over year impact, and we anticipate about a ($0.09) impact in 2Q'19. Another significant driver will be weather as April was significantly milder than normal, May was a touch warmer than normal, and June was cooler than normal all vs. warmer than normal weather last year. Management may be able to shift O&M timing to mitigate some of the negative impact of cooler weather. PowerSecure in Puerto Rico was a ($0.03) drag in Q1 '19 and we would expect a slightly smaller drag in 2Q'19. Higher share count will also be a year on year negative driver. We expect lower interest expense year on year given the debt retired with the proceeds of the Florida assets sales, and expect sales and rate base growth to also be positive drivers in the quarter. On the call we expect investors will be focused on the ongoing Vogtle new nuclear project (the Georgia PSC staff comments on the project rebasing are due the same day as the earnings call), as well as other regulatory matters in Georgia. While the integrated resource plan will be settled by the time of the call, most of the financial implications of the IRP will be determined within the context of the Georgia Power general rate case which was filed at the beginning of the month. Hearings for the GRC begin on September 30th and we expect the biggest discussion points to be around return on equity and coal ash mitigation spending and recovery. We see the Atlanta Gas Light rate case as less potentially contentious and view the Mississippi Power rate case to be filed in November potentially positive given two of the three commissioners in that state have decided to not stand for reelection.

- **WEC.** We expect WEC to report toward the low end of their 2Q'19 guidance range of $0.70-$0.72 at $0.70 vs. $0.73 last year and consensus estimates of $0.72. Weather will be a driver as both heating degree days and cooling degree days are down year over year, and 2Q'18 results included a +$0.04 impact for above normal weather. Upstream Wind and Bishop Hill have come online year over year and Presque Isle's retirement will save about $40mln in O&M on an annualized basis although that will be weighted away from the 2Q shoulder period. The RICE units came on-line at the end of March and will be $8-$10mln additive to O&M year over year. Management guided to a 3%-4% reduction in O&M in 2019 vs. 2018 but that could be lumpy throughout the year vs. a normalized +$0.02 per quarter. ATC also had a non-recurring charge in 2Q'18 of $3.7mln on a FERC Audit which will be +$0.01 year on year. There were several debt issuances year on year, and at the Hold Co. there was $350mln issued at 3.1% due 2022 while late in '18 $250mln was retired at 1.65%, which will be a slight increase in interest expense year over year.

- **XEL.** We expect XEL to report adjusted EPS of $0.52 vs. consensus of $0.54 and 2Q'18 results of $0.52. Yr/yr earnings should benefit from higher rates in Minnesota/Colorado/New Mexico, and improved O&M management vs. Q1'19. These benefits will be offset by weather which we estimate was either close to, or below normal during the quarter (vs. a $0.04 benefit in Q2'18).

Water Utilities

Following a traditionally slow start to the year, water use and capital investment tends to pick up for the group in the second and third quarter. We expect earnings growth at AWR as a result of new rates and higher Contracted Services. AWK will

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

continue to benefit from the Pivotal acquisition, and rate increases. Both WTR and SJW results will be negatively impacted by share dilution, while CWT and CTWS will report largely in line with consensus.

- **AWR.** We expect AWR to report adjusted EPS of $0.58 vs consensus of $0.55 and 2Q'18 results of $0.44. Growth in the quarter is driven by modest growth at the Water utility (new rates), and higher earnings at Contracted Services.

- **AWK.** We expect AWK to report adjusted EPS of $0.89 vs consensus of $0.93 and 2Q'18 results of $0.83. Rate increases are expected to provide growth in the quarter, offset by slightly higher expenses. The Pivotal acquisition, which closed after 1Q'18 should contribute to be a positive year-over-year variance.

- **WTR.** We expect WTR to report adjusted EPS of $0.32 vs consensus of $0.38 and 2Q'18 results of $0.37. Quarter over quarter earnings growth is driven by rate increases and normal customer growth, which will be more than offset by share dilution. We expect a gain in the quarter associated with the closing of an interest rate hedge ($11mm gain) to be adjusted out of given its one time nature. An ALJ recommendation in the company's pending acquisition is expected by the end of August, with a final PSC decision in late October.

- **CWT.** We expect CWT to report adjusted EPS of $0.41 vs consensus of $0.37 and 2Q'18 results of $0.37. Quarterly earnings benefit from higher rates in CA, WA and HI, that will be somewhat offset by higher expenses. This year is the third year of CQT's rate case cycle in CA, which usually generates the largest gap in cost recovery.

- **CTWS.** We expect CTWS to report adjusted EPS of $0.68 vs consensus of $0.68 and 2Q'18 results of $0.59. Earnings in the quarter will benefit from rate increases in Connecticut and Maine. Our estimates exclude the impact of merger related costs.

- **SJW.** We expect SJW to report adjusted EPS of $0.63 vs consensus of $0.56 and 2Q'18 results of $0.72. Earnings in the quarter benefit from higher rates in California, however, this benefit is more than offset by higher expenses and share dilution.

Independent Power Producers

- **NRG.** We expect NRG to report adjusted EBITDA of $486mln vs. $843mln last year and the main driver of the results to be the asset sales of renewables, NYLD, and the South Central assets year over year. We do believe consensus is too high as estimates continue to not be seasonally weighted enough to the third quarter which is not fully reflected of NRG's more ERCOT heavy business mix post asset dispositions. Further, booking generation to retail transfer pricing on an expected average basis over the course of the year, naturally weights earnings to the third quarter. While actual power prices were significantly lower year over year, we expect NRG's matched generation and retail book to have significantly reduced volatility of EBITDA in the quarter. Forward curves are also lower by $2-$4/MWh which lowers the mark to market of EBITDA forecasts in future years. However, key to the conference call will be discussion of the expansion of retail margins as generation margins decline and the true sensitivity of future year's EBITDA to changes in the forward curves. Disclosed hedging levels for NRG at 1Q'19 were 93%/82% in ERCOT/PJM for

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

the balance of 2019 and 56%/35% in ERCOT/PJM for 2020. Also on the call management could begin to further discuss the "retail-lite" strategy around contracting assets under purchased power agreements which would further lower volatility of EBITDA and cash flows.

- **VST.** We expect VST to report adjusted EBITDA of $718mln vs. $653mln last year. We believe consensus is too low as the Dynegy acquisition has led to a diversity of the portfolio outside of ERCOT, and therefore less seasonality of results toward the third quarter. Further, given the higher generation prices at which management hedged the third quarter earlier in the year, and the booking of actual transfer price experience between retail and generation throughout the year, we expect this year to have greater retail margins in Q1,Q2, and Q4 and thinner retail margins in Q3. This was discussed in detail by management on the 1Q'19 conference call. While VST is more exposed than NRG to the reduction in power prices on the forward curve given their 50% retail to generation match, we also expect management to address the lower volatility of EBITDA and cash flows to forward curve changes than in the past given in place hedging and offsetting expansion of retail margins. Hedging disclosures on the 1Q'19 call showed for ERCOT 100%/100% for natural gas; 94%/52% for heat rates for '19/20 respectively. Outside of ERCOT hedge levels were 74%/94%/95% and 37%/32%/67% on volumes in '19/20 for MISO/CAISO, NENY, and PJM respectively. On the call investors will also likely focus on the recent close of the Crius acquisition and what incremental factors management has learned since owing the business.

Alternative Energy 2Q19 preview

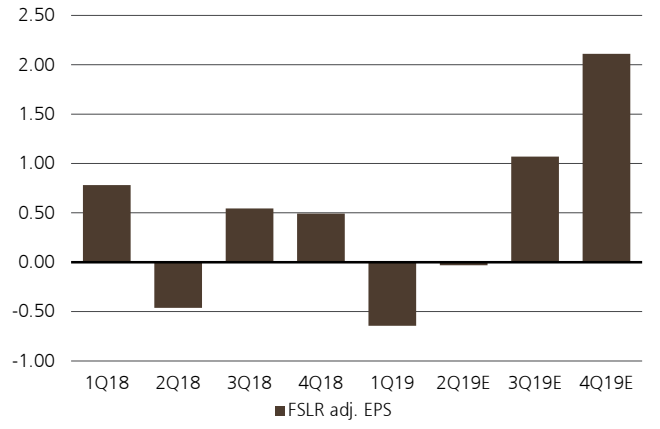
Key issues for the quarter

For Buy rated FSLR and TPIC we expect relatively weak 2Q19 results ahead of an inflection in y/y and sequential earnings growth in 3Q19.

FSLR is nearing the end of its manufacturing transition to Series 6, which is expected to drive increased production capacity and margin expansion. Despite ~breakeven EPS for FSLR being flagged on the 1Q earnings call we expect volatility in the stock on results.

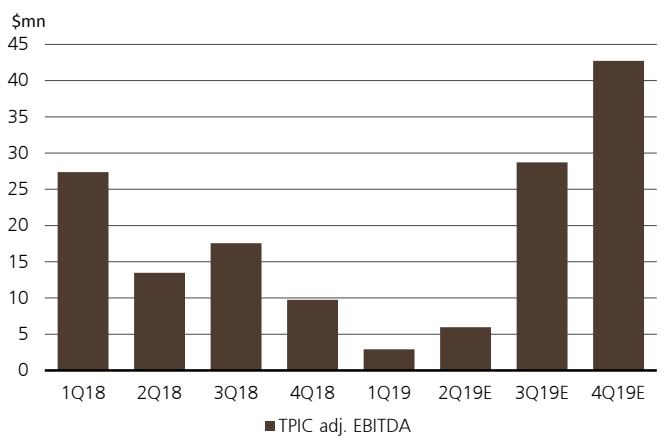
For TPIC, the company was impacted by one-off labor and production issues in 1H19 which offset the positive tailwind from manufacturing line transitions and startups. We model a significant earnings ramp starting in 2H19 through 2020, but expect 2Q19 adj. EBITDA of just $6mn, down 56% y/y. We expect a key focus to be on maintained 2020 financial targets.

Figure 24: FSLR 2018-2019 quarterly adj. EPS



Source: Company reports, UBS estimates

Figure 25: TPIC 2018-2019 quarterly adj. EBITDA



Source: Company reports, UBS estimates

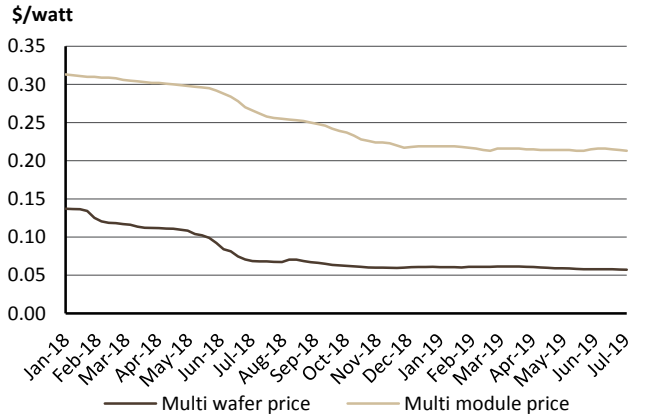
For the module manufacturers we expect stronger than previously expected China solar demand in 2019 to support potential upward guidance revisions for 2019

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

module shipments, particularly for the Chinese exposed names CSIQ and JKS. Please see China Utilities Analyst Alex Liu's recent note: NEA: 50GW solar projects to start construction in 2019.

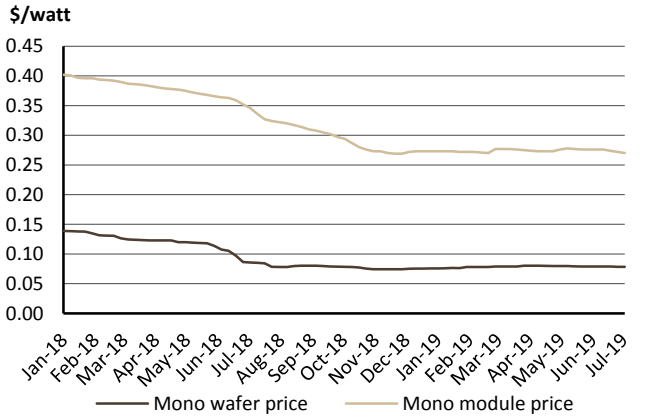
Commodity multi silicon module pricing declined just 1% q/q in 2Q19 while multi silicon wafer pricing declined 3.7% over the same period. Pricing for mono silicon modules increased 0.4% q/q, while mono wafer pricing increased 1.9% q/q suggesting continued strong demand for high efficiency solar products. We expect the increased input costs for mono wafer to result in potential 2Q19 margin pressure for JKS which has a relatively larger proportion of capacity dedicated to mono. Please see: Downgrade to Neutral.

Figure 26: Multi silicon wafer and module ASP, $/watt



Source: PV Insights, UBS research

Figure 27: Mono silicon wafer and module ASP, $/watt



Source: PV Insights, UBS research

Company specific focus areas

- **FSLR**: We expect a 2Q19 loss of $3mn ($0.03/sh) driven by Series 6 ramp and start up charges, while approximately 75% of Series 6 2019 sales will occur in 2H. Consensus 2Q19 adj. EPS is currently $0.00/sh. We currently forecast 2H19 adj. EPS of $3.18/sh compared to 1H19 adj. EPS of ($0.67)/sh. 4Q19 Series 6 cost per watt is expected to be 30% lower than 1Q19 cost. We also look for an update on FSLR's progress restructuring its EPC organization to ease labor constraints and equipment supply issues. As of the 1Q19 earnings call FSLR had sold 50% of 1Q21 capacity with new bookings in the mid-$0.30/watt range. We expect strength in bookings demand for 2021 deliveries could increase the likelihood of FSLR converting its 3rd Malaysia manufacturing facility to Series 6, a development we would view positively.

- **SPWR**: We expect a slowdown in 2Q19 residential solar installations in the CA market driven by abnormally wet weather. SPWR's residential business is relatively more weighted to the CA market compared to other national installers as a result of its leading share in the CA new homes market. SPWR had previously guided to 60-70MW of residential deployments for 2Q19 and 280-310MW deployments for the full year. We expect a key focus will be on any development in potential sources of funding for both NGT manufacturing capacity expansion and safe harboring of modules to capture the full 30% investment tax credit in 2020 and beyond as SPWR had expected to begin executing on financings in 2H19.

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

- **CSIQ**: 2Q19 guidance is for 1.95-2.05GW module shipments, $970-1,010mn revenue, and 13-18% gross margin (16-18% excluding impact of low margin Mustang solar project sale). We see potential upward bias to 2019 guidance which is currently 7.4-7.8GW module shipments, and revenue $3.5-3.8bn due to China National Energy Administration's announcement that it expects 50GW of solar to begin construction in 2019. See: NEA: 50GW solar projects to start construction in 2019. We also look for an update on the status of CSIQ CEO Dr. Shawn Qu's medical leave of absence. Yan Zhuang, SVP, COO, and President of the MSS segment has stepped in as acting CEO.

- **JKS**: JKS has secured 70% of orders for 2H19 providing relatively good demand visibility for the rest of the year. JKS is well positioned to benefit from stronger solar demand from China in 2H19 driven by finalization of 2019 solar subsidy policy. However, we expect gross margin to be lower than the 16.6% 1Q19 margin due to ongoing manufacturing capacity expansion and a higher contribution from lower-margin sales in the China market. We expect 2019 capex of $450mn for mono wafer and PERC cell capacity expansion. 2Q19 guidance is for shipments of 3.2-3.3GW and gross margin between 14-15%, with a high level of confidence given JKS reported 1Q19 earnings on 28 June.

- **RUN**: We expect abnormally wet weather in CA to contribute to a sluggish 2Q for residential solar installations, however RUN is less exposed to the CA market than peer SPWR. RUN previously provided 2Q19 deployment guidance of 102-104MW and FY2019 deployment growth guidance growth of 16-18%. RUN highlighted 100% y/y growth in the Brightbox storage business in 2019. The ramp in storage is likely to continue to drive higher customer acquisition cost given the higher entry price for solar with attached storage. For more on RUN's battery storage strategy in our note: Value stacking residential storage.

- **SEDG**: Focus will be on the status of SEDG's manufacturing ramp in a new Vietnam facility which is expected to provide tariff-free inverter supply to the North America market. 2Q19 guidance was previously provided for revenue $310-320mn, gross margin of 32-34%, and solar product gross margin of 33-35%. We expect revenue from the acquired SMRE, Kokam, and Gamatronic businesses will see gradual sequential q/q revenue growth in 2019 from supply chain and channel sales improvements, and guidance implies 2Q19 non-solar revenue of $20mn. By YE19 we expect acquired revenues to comprise less than 10% of sales.

- **HASI**: Long term core EPS growth guidance of 2-6% off a 2017 baseline remains intact implying core EPS of $1.37 in 2019 at the midpoint. We model 2Q19 core EPS of $0.34.

- **ORA**: We forecast 2Q19 adj. EPS of $0.36 and adj. EBITDA of $90mn reflecting typical seasonality of electricity generation. 2Q results are also expected to include $4mn of business interruption insurance proceeds related to the Puna plant. Current 2019 guidance is for revenue of $720-742mn and adj. EBITDA of $370-380mn.

- **TPIC**: Slower than expected replacement hiring and training time in Mexico has led to production delays and triggered significant liquidated damages which are expected to continue through 3Q19 (included in the $25mn Mexico related reduction). We model a significant earnings ramp starting in 2H19 through 2020, but expect 2Q19 adj. EBITDA of just $6mn, down 56% y/y. We expect a key focus to be on maintained 2020 financial targets.

Environmental Services 2Q19 preview

Key issues for the quarter

We expect the majority of investor questions to be focused on the impact of two headwinds to MSW earnings growth: 1) a 64% YTD decline in recycled fiber pricing and 2) a 10% YTD decline in Permian Basin E&P rig count. 2019 guidance, which is typically set in February, largely reflects a "steady state" outlook and we anticipate management commentary to focus on the incremental headwinds from continued commodity price and drilling activity declines. Broadly we see continued above average acquisition activity in 2019 helping to offset these headwinds.

WCN has already flagged a potential $3-5mn EBITDA headwind per quarter due to the decline in E&P activity and $5mn EBITDA headwind per quarter due to commodity price weakness. WCN has the largest E&P exposure of the MSW group at 5% of revenue followed by WM at ~3%.

MSW 2019 guidance is typically updated with 2Q19 results, however given these headwinds we see a bias towards reaffirming existing guidance rather than the historically common beat-and-raise.

We remind investors that MSW was able to overcome a 2018 ~50% y/y decline in recycling prices due to strong underlying macro conditions supporting the ~95% of revenue from the core disposal business. See: UBS Evidence Lab Inside: Housing survey read-throughs for waste volumes, March 2019.

Source: Company reports, UBS research estimates

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

Company specific focus areas

- **RSG**: As of the 1Q19 call RSG flagged a $0.07 EPS headwind from recycled commodity pricing assuming current pricing holds. Pricing has since fallen by an additional $15/ton implying potential $0.12/sh total EPS headwind. RSG had previously reiterated 2019 EPS guide of $3.23-3.28 and FCF of $1.125-1.725bn. However the previously increased 2019 M&A spend target of $300mn should help mitigate commodity pricing pressures. RSG's $142mn current YTD spend is expected to contribute $55mn in annualized revenue.

- **WCN**: We revise our 2Q19 adj. EBITDA to $426mn from $436mn previously and our FY2019 adj. EBITDA to $1,708mn from $1,713mn previously. On 4 June WCN flagged 2 potential headwinds to 2Q19 results; first, a $5mn EBITDA headwind from 30% decline in recycled commodity values, second, a $3-5mn EBITDA headwind driven by 10% YTD reduction in E&P rig count.2Q19 guidance was previously provided for revenue of $1,360mn and adj. EBITDA of $434mn. These headwinds are expected to be offset by contribution from acquisitions in 2H19 with WCN still achieving current 2019 adj. EBITDA guidance of $1,705mn. We expect WCN to potentially provide an updated 2019 outlook on the 2Q19 earnings call.

- **CWST**: Since the 1Q19 earnings call CWST has acquired $11.5mn annualized revenue ($18.5mn YTD) and announced an asset purchase agreement to buy RSG waste assets in NY and MA. The asset purchase will add $30mn of annualized revenue and is expected to close by the end of 3Q19. Based on these acquisitions we estimate CWST tracking well ahead of its FY2019 guidance for $152-156mn adj. EBITDA. We forecast 2Q19 adj. EBITDA of $43.3mn (consensus $41.6mn) which should be relatively unaffected by recent commodity price declines given offsetting fees recouped through CWST's SRA program. Recycling adj. EBITDA was up $2mn y/y in 1Q19 driven by these fees.

- **CVA**: We update our 2Q19 adj. EBITDA estimate to $98mn from $112mn previously to reflect a revision to our expected plant maintenance expense in the quarter. The increase in maintenance expense compared to our prior estimate is to account for the impact of the Palm Beach plant which CVA acquired in 4Q18. Maintenance spend is historically heavier in 1H for CVA. Our EPS estimates are revised in-line with the EBITDA change.

- **CLH**: We forecast 2Q19 adj. EBITDA of $151mn or +8.2% y/y, a slowdown from the 15.2% y/y 1Q19 growth due to more difficult y/y comps. We expect earnings to benefit from a business interruption insurance recovery related to CLH's Deer Park facility outage ($3.5mn EBITDA headwind in 1Q19). CLH has been working to reposition some oil inventory to the southern part of U.S. to try to mitigate future shortfalls/transport limitations driven by weather. Closed loop oil sales are tracking to the 15mn gallon target in 2019. Management noted at the UBS Industrials Conference in June that the Environmental Services pipeline was the strongest it has ever been and expect this to drive solid growth through 2020. See: UBS Global Industrials Conference takeaways.

- **ECOL:** We forecast 2Q19 adj. EBITDA of $35mn or +10% y/y driven by contribution from 2018 acquisition activity. ECOL's planned merger with NRCG received FTC antitrust clearance on 16 July and is still subject to approval from both ECOL and NRCG shareholders. The merger faces pushback from certain holders of NRCG's 7.0% Series A Convertible Preferred Stock who have asked NRCG to reconsider the terms for conversion of the preferred stock. We have

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

incorporated the contribution from NRCG in our model assuming 31 Dec 2019 deal closure (see: Updating model for NRCG merger).

Valuation Method and Risk Statement

Regulated Utilities: Our valuation methodology for the group is price to earnings based. The adjustments applied fall into 5 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 5% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 5% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 5%, second quartile 2%, third quartile -2% and fourth quartile -5%; 4) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% diversified or foreign earnings), we perform a sum-of-parts analysis applying business/region appropriate valuations to those diversified businesses; 5) One-off Adjustments: In special situations, we value risk on an issue specific basis. Common areas where we apply such an adjustment include: ESG advantage, large project construction risk, legal risk, and announced M&A completion risk. We identify the following risk factors for the sector overall: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

Our valuation methodology for the Alternative Energy space is based on a variety of metrics including P/BV, EV/EBITDA, P/E, and retained equity value per share. Our target multiples are derived from historical group averages with adjustments for expected growth rates, leverage, and earnings growth confidence. We identify the following risks for the sector: Demand for new renewable installations has historically been volatile around changes in state and federal policy, and we expect this volatility to continue. In addition, margins for product manufacturers can be impacted by swings in raw materials pricing and the overall level of energy prices.

Our valuation methodology for the Environmental Services space is based on EV/EBITDA with adjustments made to the target EV/EBITDA multiple based on relative growth rates, Free Cash Flow (FCF) conversion, expected earnings stability, and the general level of risk and our confidence in future earnings estimates. We identify the following risks for the sector: Housing remains a key driver of incremental municipal solid waste volume growth, and a slowdown in new housing starts could put downward pressure on sales growth. In addition, pricing tends to follow GDP growth, and a slowdown in economic growth could drive lower ability to raise pricing driving potential contraction in margins. For more industrial-exposed names, swings in commodity prices can impact the overall level of waste-generating activity, contributing to earnings volatility.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 22 July 2019 10:58 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	45%	30%
Neutral	FSR is between -6% and 6% of the MRA.	40%	28%
Sell	FSR is > 6% below the MRA.	15%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2019.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Daniel Ford, CFA; Jon Windham, CFA; Ross Fowler, CFA; Gregg Orrill; Paul Cole; William Grippin, CFA.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a System, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other

bcobrien@aquaamerica.com Ben O'Brien 07/24/19 02:14:58 PM Aqua America Inc

areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

WTR has tightened the valuation gap vs. peers

Since the announcement of the Peoples Gas acquisition (10/18), the completion of the associated equity financing (4/19) and successful progression through its regulatory calendar, WTR has closed the relative valuation gap to its peer group by 25%. While we are raising our valuation target to reflect our confidence in both the business model and management execution, we are lowering our rating to Neutral from Buy to reflect the lower total potential return profile.

Q2 Adjusted EPS in line with market expectations

WTR reported Q2'19 adjusted EPS of $0.37/share vs. UBSe $0.32/sh, consensus $0.38/sh, and 2Q'18 of $0.37/sh. The adjusted EPS excludes merger-related expenses of $11.9mm (net of tax), comprising of a loss on the extinguishment of debt ($18.9mm), transaction related expenses ($12.7mm), a favourable mark-to-market adjustment on the settlement of interest rate swaps ($11mm) and interest income ($7.4mm). Fundamentals of the core business remain strong, with quarter over quarter revenue growth of 3.3%, and relatively flat O&M expenses.

Guidance and growth forecast reiterated; strong acquisition pipeline

In conjunction with its Q2'19 earnings report, WTR reaffirmed its full year earnings guidance of $1.45-$1.50/sh, infrastructure investment target of $550mm for 2019 ($269 invested 1H) and $1.4 billion through 2021, annual rate base growth of 7% and total customer growth of between 2% and 3%. The acquisition pipeline is strong; WTR announced exclusive discussions with the Delaware County Regional Water Control Authority (DELCORA, serves approximately 500,000 people, PA) and the purchase of the Campbell, Ohio water system (3,200 customers). Including DELCORA, the pipeline of potential water and wastewater acquisitions WTR is pursuing has approximately 400,000 customers in four states the company already serves.

Valuation: $45 Price Target

We are raising our PT to $45 from $42. The PT is predicated on a 3% discount to the average water group multiple of 27.4x, applied to our 2021e EPS of $1.68. The modest discount multiple reflects the blended gas/water business model. Our prior PT of $42 was premised on a 3% discount to a group average multiple of 25.2x.

UBS Research THESIS MAP a guide to our thinking and what's where in this report

PIVOTAL QUESTIONS

Q: Has WTR's earnings and growth outlook changed, 2019-2021?

We are not changing our '19-'21 earnings estimates of $1.48/$1.58/$1.68/share. These estimates are consistent with WTR's rate base growth target of 7% through 2021, also reflecting the guidance of modest accretion in the first calendar year for the Peoples acquisition. We believe the Peoples acquisition is likely to receive final approval (PA) in the autumn given the close to unanimous settlement with parties to the proceeding (all but 2 parties either signed on, or agreed not to oppose). WTR's absolute growth profile should improve as Peoples rate base growth (8%-10%) outpaces WTR's by 100-300 basis points on the deployment of capital to improve aging infrastructure.

Q: Can WTR be successful as a combined water and gas utility company?

Yes. We believe WTR can successfully lever its regulatory, operating and cost management experience to combine with Peoples Gas while continuing to execute on its infrastructure improvement commitments and customer growth ambitions. Acquisition and integration are key skill-sets that WTR has developed through its ongoing muni acquisition program.

UBS VIEW

WTR's share price reflects the value of its combined regulated water and gas business model. We impute a modest discount of 3% vs. the water peer group average P/E to reflect the premium regulatory jurisdictional exposure, Fair Value profile and blending of a lower multiple for the gas business. 2019 should be a transition year for WTR as it closes the Peoples acquisition (autumn) and concludes the Peoples rate case (autumn). Beginning in 2020, we expect to see continued focus on municipal water acquisitions and possible realization of merger benefits.

EVIDENCE

PA is currently WTR's largest jurisdiction, with ~69% of rate base; therefore the growth outlook in PA tends to be indicative for the company overall. Additional sources of growth include organic customer growth, which averages ~1%/yr and a steady diet of tuck-in acquisitions. In 2019/2020, WTR estimates adding approximately 20k new customers. We estimate the Peoples acquisition to be ~neutral to EPS in 2020 and accretive over time as Peoples rate base growth outpaces WTR's.

WHAT'S PRICED IN?

WTR has tightened the relative valuation gap vs its peers by 25% since announcing the proposed acquisition of Peoples and completing the associated equity financing. Once the Peoples transaction is closed, we look for WTR to trade at roughly a 3% discount to the average Water P/E on 2021e EPS of $1.68, or $45, representing upside of ~12% including the 2.26% dividend yield.

UPSIDE / DOWNSIDE SPECTRUM

Value drivers	Peer Avg. P/E Multiple	Premium/discount	EPS CAGR '19-'21	2021e EPS

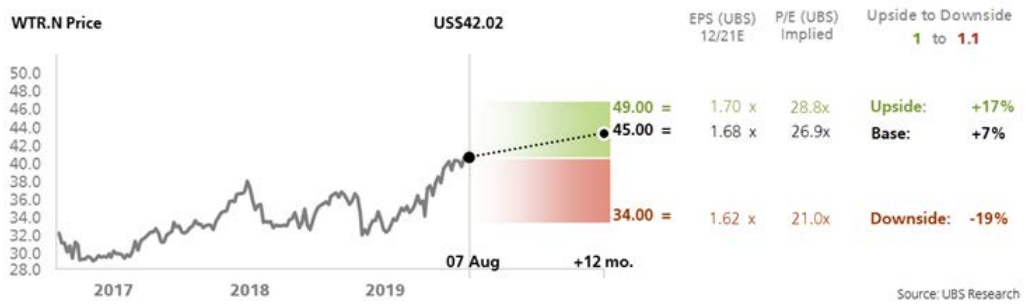
UPSIDE / DOWNSIDE SPECTRUM

return ↑



Value drivers	Peer Avg. P/E Multiple	Premium/discount	EPS CAGR '19-'21	2021e EPS
$49 upside	29.0x	0.0%	7.0%	$1.70
$45 base	26.5x	-3.0%	6.0%	$1.68
$34 downside	21.0x	0.0%	5.0%	$1.62

Source: UBS

Risk to the current share price is heavily skewed (1:1.1) to the upside

Upside (US$49): Our upside scenario is predicated upon a 0% premium applied to a 29.0x P/E multiple, which reflects the average small cap peer group multiple. We also assume the 2019–2021 earnings growth rate is 100 basis points higher than our base case estimates, matching the rate base growth forecast proposed by the company.

Base (US$45): Our base case is predicated upon a 3% discount applied to the average water utility P/E multiple on WTR standalone 2021e EPS. We estimate the Peoples acquisition could be neutral to ~$0.03 accretive to 2021e EPS. The 3% discount reflects the net of: 5% discount to account for the water group average multiple near historical highs relative to the broad market, 5% premium for WTR's regulatory jurisdiction ranking, 6% premium for the seven Fair Market Value states in which WTR operates, and a 9% discount to reflect the impact of 30% of earnings derived from lower multiple gas assets.

Downside (US$34): Our downside scenario is predicated on the trough absolute average water utility P/E experienced since 1/1/18. We also assume the 2019–2021 earnings growth rate is 100 basis points lower than our base case estimates which would reflect a failure to execute on incremental tuck in acquisitions.

bcobrien@aquaamerica.com Ben O'Brien 08/08/19 12:39:05 PM Aqua America Inc

COMPANY DESCRIPTION

return ↑

Aqua America, Inc. provides regulated utility water and wastewater services to approximately 972,000 customers in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Operations in Pennsylvania account for approximately 52% of revenues and 74% of net income. Aqua Resources provides unregulated services such as operating and maintenance contracts with municipal authorities and other parties, as well as water and wastewater line repair service, Aqua Infrastructure provides unregulated raw water supply services for firms in the natural gas drilling industry.

)

Industry outlook

Infrastructure spending and consolidation will continue to be the underlying drivers of industry growth for the next 5-10 years. Capital spending should remain at or near peak levels for the next 12 months, and is forecast to remain elevated through at least 2020. We would expect water utilities to follow the pattern of electric utilities with a bias toward upward revision in the spending forecast. Factors that could increase the pace of consolidation include broader adoption of fair value legislation, enhanced focus on water quality and accountability standards, or macro trends that instigate budgetary pressures or risk-off strategies at the municipal level. We expect conservation and efficiency to continue to reduce the trend of water usage nationally, and drought could be a disruptive event regionally.

bcobrien@aquaamerica.com Ben O'Brien 08/08/19 12:39:05 PM Aqua America Inc

Forecast returns

Forecast price appreciation	+7.0%
Forecast dividend yield	2.3%
Forecast stock return	+9.3%
Market return assumption	6.6%
Forecast excess return	+2.7%

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.
Our price target is premised upon a 3% discount to the 2021 average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 6% premium to reflect operations in six Fair Market Value states, and 9% discount to reflect impact of lower P/E associated with gas earnings.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 07 August 2019 09:11 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	45%	30%
Neutral	FSR is between -6% and 6% of the MRA.	40%	28%
Sell	FSR is > 6% below the MRA.	15%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2019.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

bcobrien@aquaamerica.com Ben O'Brien 08/08/19 12:39:05 PM Aqua America Inc

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Daniel Ford, CFA; Paul Cole.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a System, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other

bcobrien@aquaamerica.com Ben O'Brien 08/08/19 12:39:05 PM Aqua America Inc

areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

Final PUC decision expected late 2019/early 2020

In an opinion issued on 10/28, the Pennsylvania Public Utility Commission (PUC) Administrative Law Judge (ALJ) recommended approval of the Peoples Natural Gas Company acquisition by Aqua America. All parties to the proceeding will now have 30 days to file exceptions and reply exceptions before final PUC action either in December or early 2020. We expect the analyst day that the company had tentatively planned to follow the merger close in early December will now get pushed out in line with the revised consideration schedule.

The Goodwin and Tombaugh gathering system

A point of contention through the consideration process is the treatment of the Goodwin and Tombaugh gathering system. The ALJ approval recommends that the bare steel pipeline system be replaced within 7 years (starting 3 months after merger close) at a cost of $120mm (which will be recovered through base rates). Offsetting this cost, all ratepayers will receive a $13mm bill credit by the end of 2019.

Q3'19 earnings report scheduled for 11/4

We expect WTR to report Q3'19 earnings of $0.47/share vs. prior year earnings of $0.44/share. Quarter-over-quarter earnings growth is driven by rate increases, normal customer growth and acquisitions. We expect the company will address the ongoing Peoples acquisition process, the DELCORA approval process as well as further M&A plans on the conference call following the earnings release.

Valuation:

We believe the ALJ recommendation to approve the Peoples acquisition should be well received by investors as it moves this process closer to completion. We are maintaining our Neutral rating and $45/share price target.

Source: Company accounts, Thomson Reuters, UBS estimates. Metrics marked as (UBS) have had analyst adjustments applied. Valuations: based on an average share price that year, (E): based on a share price of US$44.90 on 28 Oct 2019 19:47 EDT

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 3.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Forecast returns

Forecast price appreciation	+0.2%
Forecast dividend yield	2.2%
Forecast stock return	+2.4%
Market return assumption	6.6%
Forecast excess return	-4.2%

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.
Our price target is premised upon a 3% discount to the 2021E average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 6% premium to reflect operations in six Fair Market Value states, and 9% discount to reflect impact of lower P/E associated with gas earnings.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 29 October 2019 01:16 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	45%	29%
Neutral	FSR is between -6% and 6% of the MRA.	40%	29%
Sell	FSR is > 6% below the MRA.	15%	21%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 September 2019.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a System, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other

areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

First Read

Aqua America Inc

3Q'19 GAAP $0.38; Ex-transaction $0.48

Q: How did the results compare vs expectations?

A: 3Q'19 GAAP EPS of $0.38 vs. 3Q'18 of $0.44; on an ex-transactional basis (excluding Peoples related dilution & costs), operating EPS of $0.48 was ahead of UBS and consensus estimates of $0.47 & $0.38 respectively.

Q: What were the most noteworthy areas in the results?

A: Net income increased in the quarter ($88.5mm vs. 78.2mm in Q3'18) helped by higher rates, customer and volume growth, offsets included growth related costs

Q: Has the company's outlook/guidance changed?

A: Operating EPS guidance (ex: Peoples dilution & expense) for '19 of $1.45-$1.50; Cap-ex for '19 ($550), and through '21 ($1.4 bill.); rate base CAGR (7%); customer growth (between 2-3%); Peoples closing date (late'19/early '20) all reaffirmed.

Q: How would we expect investors to react?

A: Noisy quarterly report; investor focus remains on the pending approval and close of the Peoples & DELCORA acquisitions; potential analyst day with updated guidance.

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 3.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Forecast returns

Forecast price appreciation	+3.3%
Forecast dividend yield	2.3%
Forecast stock return	+5.6%
Market return assumption	6.6%
Forecast excess return	-1.0%

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.
Our price target is premised upon a 3% discount to the 2021 average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 6% premium to reflect operations in six Fair Market Value states, and 9% discount to reflect impact of lower P/E associated with gas earnings.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 05 November 2019 01:12 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	45%	29%
Neutral	FSR is between -6% and 6% of the MRA.	40%	29%
Sell	FSR is > 6% below the MRA.	15%	21%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 September 2019.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Daniel Ford, CFA; Paul Cole.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a System, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other

areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

First Read

Essential Utilities Inc

Q4/2020 Adj. EPS in-line; '21 guidance unchanged

Q: How did the results compare vs expectations?

A: In line. WTRG reported Q4/full year 2020 adjusted EPS of $0.46/$1.58. These results are in line with consensus and UBS estimates of $0.45/$1.57 and $0.45/$1.58, respectively, and are above prior period results of $0.28/$1.47. Full year 2020 EPS guidance was $1.53-$1.58 (top end).

Q: What were the most noteworthy areas in the results?

A: Full year results benefited from the acquisition of Peoples Gas (customer credits are excluded from the adjusted results), higher rates and volume growth (driven by favorable weather and work-from-home orders). Vs. the prior year fourth quarter, results benefited from the Peoples Gas acquisition, higher rates and volume growth.

Q: Has the company´s outlook/guidance changed?

A: Earnings guidance for 2021 is unchanged at $1.64-$1.69. The projected EPS CAGR is 5-7% through 2023, driven by water rate base growth of 6-7% and gas rate base growth of 8-10%. WTRG currently has six signed purchase agreements for additional water and wastewater systems serving approximately 227,000 customers/$438mm of rate base, including the DELCORA system. WTRG has rate proceedings pending in Virginia and Indiana.

Q: How would we expect investors to react?

A: In line. On the investor call, we are looking for an update on the DELCORA (and other) acquisitions, the catch-up repairs tax proceeding, and the performance of both the Peoples Gas and Texas based subsidiaries through the recent polar vortex event.

Company Description

Essential Utilities, Inc. provides regulated water and wastewater services to approximately 3m people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia and distributes natural gas to approximately 2m people in western Pennsylvania, West Virginia and Kentucky. WTRG's water operations represent approximately $5.5bn of rate base value, while its gas distribution operations represent approximately $2.5bn of rate base. Growth is generated by infrastructure investment (pipes, plants, etc.), strategic M&A (water/ wastewater) and management of private water systems.

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events. Our price target is premised upon a 7% discount to the 2021E average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 7% premium to reflect operations in six Fair Market Value states, and 14% discount to reflect impact of lower P/E associated with gas earnings.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 25 February 2021 12:09 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please click https://neo.ubs.com/quantitative, or speak to your UBS sales representative for access to the report.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	51%	31%
Neutral	FSR is between -6% and 6% of the MRA.	37%	29%
Sell	FSR is > 6% below the MRA.	12%	18%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 December 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice. UBS Evidence Lab may provide services to other internal and external clients.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is

carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Essential Utilities Inc

Q4/2019 Adj. EPS & 2020 Guidance

Q: How did the results compare vs expectations?

A: Q4/full year EPS adjusted for transaction costs and equity dilution $0.34/$1.47 vs. consensus/UBSe $0.31/$1.48 - $0.37/$1.48; prior year $$0.31/$1.41.

Q: What were the most noteworthy areas in the results?

A: Yr/yr results improved due to higher rate & surcharge revenues, commentary suggests that O&M (absent transactions costs) increased in line with expectations.

Q: Has the company's outlook/guidance changed?

A: Illustrative guidance for 2020 of $1.53-$1.58 vs consensus $1.58; EPS growth CAGR off '19 adjusted base through '22 of 5-7%; rate base growth for water, 6-7% and gas, 8-10% through '22; and infrastructure investment through '22 of $2.8 bill.

Q: How would we expect investors to react?

A: Subject to incremental detail at the investor day, we expect a muted reaction to earnings and growth guidance that is modestly lower than current consensus.

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 3.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Forecast returns

Forecast price appreciation	-10.6%
Forecast dividend yield	2.0%
Forecast stock return	-8.6%
Market return assumption	6.2%
Forecast excess return	-14.8%

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.
Our price target is premised upon a 3% discount to the 2021 average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 6% premium to reflect operations in six Fair Market Value states, and 9% discount to reflect impact of lower P/E associated with gas earnings.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 27 February 2020 10:04 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	44%	32%
Neutral	FSR is between -6% and 6% of the MRA.	41%	29%
Sell	FSR is > 6% below the MRA.	15%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 December 2019.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a System, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin)Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the [European Central Bank (ECB)] and regulated by the BaFin and the ECB. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Securities France S.A. UBS Securities France S.A. is regulated by the ACPR (Autorité de Contrôle Prudentiel et de Résolution) and the Autorité des Marchés Financiers (AMF). Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS") with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliarios Ltda, UBS Asesores Mexico, S.A. de C.V., UBS Securities Japan Co., Ltd, UBS Wealth Management Israel Ltd and UBS Menkul Degerler AS are affiliates of UBS AG. UBS Financial Services Incorporated of Puerto Rico is a subsidiary of UBS Financial Services Inc. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. First Read

Essential Utilities Inc

Q2'20 EPS $0.29 vs. UBSe $0.26, Consensus $0.22

Q: How did the results compare vs expectations?

A: Better. WTRG reported Q2'20 EPS of $0.29 vs. the prior year quarter of $0.25. UBS and consensus expectations for the quarter were $0.26 and $0.22, respectively.

Q: What were the most noteworthy areas in the results?

A: Vs. the prior year qtr, revenues increased due to the addition of Peoples Gas, higher rates, weather derived volumes and customer growth. Residential water sales were +10% quarter over quarter, while commercial & industrial sales were -16% and -11% respectively. O&M expenses in the quarter rose as a result of the Peoples Gas combination, but were helped by the absence of transaction & integration costs.

Q: Has the company's outlook/guidance changed?

A: Full year '20 guidance of $1.53-$1.58 unchanged, as is the EPS CAGR of 5-7%, rate base growth of 6-7% in water and 8-10% in gas, and projected infrastructure spending of $2.8 billion. Guidance for EPS dispersion across the year is unchanged.

Q: How would we expect investors to react?

A: Better EPS & affirmation of guidance should be well received by investors.

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 3.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Forecast returns

Forecast price appreciation	+0.7%
Forecast dividend yield	2.3%
Forecast stock return	+3.0%
Market return assumption	5.1%
Forecast excess return	-2.1%

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.
Our price target is premised upon a 3% discount to the 2021 average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 6% premium to reflect operations in six Fair Market Value states, and 9% discount to reflect impact of lower P/E associated with gas earnings.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 06 August 2020 10:23 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	49%	32%
Neutral	FSR is between -6% and 6% of the MRA.	39%	30%
Sell	FSR is > 6% below the MRA.	13%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the [European Central Bank (ECB)] and regulated by the BaFin and the ECB. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Securities France S.A. UBS Securities France S.A. is regulated by the ACPR (Autorité de Contrôle Prudentiel et de Résolution) and the Autorité des Marchés Financiers (AMF). Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS") with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Utility & Infrastructure Daily

Neil Kalton, CFA, Senior Analyst (314) 875-2051
Sarah Akers, CFA, Senior Analyst (314) 875-2040
Jonathan Reeder, Senior Analyst (314) 875-2052

Quick thoughts from Wells Fargo Securities, LLC Utility & Infrastructure Team:

Utilities

Aqua America (WTR/Market Perform)(Reeder) – Yesterday afternoon (9/17), WTR announced that an asset purchase agreement was signed with the Delaware Country Regional Water Quality Control Authority (DELCORA) to purchase the municipal authority's wastewater assets for $276.5M. The agreement marks the culmination of a roughly two month exclusivity period between the two parties to explore a combination, which WTR discussed on the Q2 call in early August. The transaction is subject to Pennsylvania Public Utilities Commission (PaPUC) approval and would more than double WTR's existing 128,000 wastewater connections by adding the equivalent of 165,000 retail customers across 42 Southeast PA municipalities. While the purchase price is a bit north of DELCORA's $220-240M net PP&E value, WTR does not expect the transaction to create any goodwill which seems to suggest that the PaPUC will be asked to approve the deal under the state's fair market value (FMV) law. We expect PaPUC approval could take roughly 12 months and then once the deal closes, another 2-3 years before WTR is able to earn a return on the equity portion of the $276.5M rate base commensurate with the remainder of the water/wastewater business. In addition, we believe DELCORA could add as much as $150M of capex to our prior 2019-23 water capex (ex. M&A) forecast of $2.3B. In terms of equity needs, we think WTR could need to raise an additional $150-175M in 2020 & beyond (likely through establishment of an at-the-market program per management's Q2 call comments) with the bulk needed when the deal closes in 2H'20. Net-net, we believe minimal accretion is likely in 2020 with the DELCORA deal eventually adding roughly $0.05, or 2-3%, to EPS power by 2023. As a reminder, our current WTR 2019-23E EPS (pro forma for the pending Peoples deal but excluding any potential uplift from the planned election of repairs tax deduction at Peoples) are $1.32, $1.57, $1.68, $1.78 & $1.90.

Bigger picture, we are extremely encouraged by WTR's ability to find and get the deal signed with DELCORA for three reasons. First, it shows that management has not taken their eye off growing the regulated water/wastewater business despite the pending move into the gas LDC (local distribution company) business nor has the move into gas soured counterparties willingness to transact with WTR. Second, it further demonstrates that municipals are willing to come to the M&A negotiating table as a way to solve impending challenges. For DELCORA it was an estimated $1.2B of capital investment needed through 2041 which included a substantial amount to comply with Environmental Protection Agency (EPA) mandates to resolve combined sewer overflow problems – rather than put the burden on customer bills, DELCORA plans to place the sales proceeds into a trust to create a "rate stabilization plan" that should help offset those capital needs and save the average retail customer $1,400. Third, the addition of a substantial wastewater presence in Southeast PA could open the door to additional wastewater growth opportunities in the region, much the way WTR expanded its water footprint to the greater Philadelphia suburbs in the 1990s and perhaps to those same communities where the company already serves water.

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Aqua America, Inc. (WTR)/Market Perform (2)
Price as of 9/17/2019: $43.90
FY 19 EPS: $1.32
FY 20 EPS: $1.57
Shares Out.: 215.7 MM
Market Cap.: $9,469.23 MM

Rating Basis Information:
WTR Thesis: We are attracted to WTR's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations and a strong balance financial profile. Our Market Perform rating reflects valuation considerations in light of WTR's pending agreement to acquire Peoples (a gas utility) and the associated P/E multiple, regulatory and deal execution/integration related risks.

Important Disclosure for U.S. Clients
This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities and Structured Asset Investors, LLC ("SAI"), a subsidiary of Wells Fargo & Co. and an investment adviser registered with the SEC. If research payments are made separately from commission payments, this report is being provided by SAI. For all other recipients in the U.S. this report is being provided by Wells Fargo Securities.

Important Disclosure for International Clients
EEA - The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a U.K. incorporated investment firm authorized and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 ("the Act"), the content of this report has been approved by WFSIL, an authorized person under the Act. WFSIL does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients.

Australia - Wells Fargo Securities, LLC is exempt from the requirements to hold an Australian financial services license in respect of the financial services it provides to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under U.S. laws which differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC in the course of providing the financial services will be prepared in accordance with the laws of the United States and not Australian laws.

Canada - This report is distributed in Canada by Wells Fargo Securities Canada, Ltd., a registered investment dealer in Canada and member of the Investment Industry Regulatory Organization of Canada (IIROC) and Canadian Investor Protection Fund (CIPF). Wells Fargo Securities, LLC's research analysts may participate in company events such as site visits but are generally prohibited from accepting payment or reimbursement by the subject companies for associated expenses unless pre-authorized by members of Research Management.

Hong Kong - This report is issued and distributed in Hong Kong by Wells Fargo Securities Asia Limited ("WFSAL"), a Hong Kong incorporated investment firm licensed and regulated by the Securities and Futures Commission to carry on types 1, 4, 6 and 9 regulated activities (as defined in the Securities and Futures Ordinance (Cap. 571 The Laws of Hong Kong), "the SFO"). This report is not intended for, and should not be relied on by, any person other than professional investors (as defined in the SFO). Any securities and related financial instruments described herein are not intended for sale, nor will be sold, to any person other than professional investors (as defined in the SFO). The author or authors of this report is or are not licensed by the Securities and Futures Commission. Professional investors who receive this report should direct any queries regarding its contents to Kelly Chiang and Mandy Wan at WFSAL (email: wfsalresearch@wellsfargo.com).

Japan - This report is distributed in Japan by Wells Fargo Securities (Japan) Co., Ltd, registered with the Kanto Local Finance Bureau to conduct broking and dealing of type 1 and type 2 financial instruments and agency or intermediary service for entry into investment advisory or discretionary investment contracts. This report is intended for distribution only to professional investors (Tokutei Toushika) and is not intended for, and should not be relied upon by, ordinary customers (Ippan Toushika).

The ratings stated on the document are not provided by rating agencies registered with the Financial Services Agency of Japan (JFSA) but by group companies of JFSA-registered rating agencies. These group companies may include Moody's Investors Services Inc., Standard & Poor's Rating Services and/or Fitch Ratings. Any decisions to invest in securities or transactions should be made after reviewing policies and methodologies used for assigning credit ratings and assumptions, significance and limitations of the credit ratings stated on the respective rating agencies' websites.

About Wells Fargo Securities

Wells Fargo Securities is the trade name for the capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including but not limited to Wells Fargo Securities, LLC, a U.S. broker-dealer registered with the U.S. Securities and Exchange Commission and a member of NYSE, FINRA, NFA and SIPC, Wells Fargo Prime Services, LLC, a member of FINRA, NFA and SIPC, Wells Fargo Securities Canada, Ltd., a member of IIROC and CIPF, Wells Fargo Bank, N.A. and Wells Fargo Securities International Limited, authorized and regulated by the Financial Conduct Authority.

This report is for your information only and is not an offer to sell, or a solicitation of an offer to buy, the securities or instruments named or described in this report. Quick thoughts from Wells Fargo Securities, LLC Utility & Infrastructure Team:

Utilities

Essential Utilities (WTRG/Overweight) (Reeder) - We admittedly missed the ruling by Judge Dozor in the Court of Common Pleas of Delaware County last Monday (12/28). In what we consider to be a very positive development, the judge ruled in favor of DELCORA and WTRG on both matters disputed by Delaware County - the validity of the asset purchase agreement as well as the ability to put the proceeds of the $277M sale into a trust to be used to stabilize ratepayers' bills in the years ahead (keep increases to 3% annually so long as the fund is solvent while ensuring WTRG earns its authorized ROE). While Delaware County has indicated an intention to continue to argue its case as part of the pending PaPUC regulatory approval process (has yet to decide whether to appeal Judge Dozor's ruling), we believe the 12/28 ruling clears the way for WTRG to close the DELCORA deal by Q2'21.

We find it unlikely that the PaPUC will be overly sympathetic to Delaware County's contention that the $277M agreed to sales price that was blessed by the prior County Council undervalues the fair market value (FMV) of the system. It is our understanding that DELCORA struck that price during exclusive negotiations with WTRG in '19 perhaps knowing that it might be less than a closer to $400M price tag defensible by PA's FMV legislation. Rather the lower sales price would serve as a balancing act to help keep the subsequent rate increases to DELCORA customers manageable as WTRG recovers the FMV of the initial investment as well as the roughly $700M of capital investments required by 2028 to keep the system viable. Further, we believe the PaPUC's FMV approval process if anything is geared to protect against the opposite – a utility overpaying FMV and then trying to socialize those higher costs across its entire customer base.

We look towards WTRG's 1/11 investor event for additional insights into getting the deal across the finish line as well as the expected longer-term benefits. As we have previously opined, we believe the DELCORA deal represents material long-term value (that is not currently reflected in the share price!) given meaningful capex needs that fall beyond the current 5-year forecast as well as the likely substantial wastewater tuck-in deals that could transpire in the area. In other words, we believe the DELCORA deal should, at a minimum, allow WTRG to continue to target a 5-7% EPS CAGR through the end of the decade.

Infrastructure

Brookfield Infrastructure (BIP/BIPC)(Overweight) & Brookfield Renewable (BEP/BEPC)(Equal Weight) (Reeder) – Brookfield Asset Management (BAM/Not Covered) along with institutional partners made a public offer before the open on 1/4 to acquire the remaining units of one of its publicly traded

Please see page 4 for rating definitions, important disclosures and required analyst certifications.
All estimates/forecasts are as of 01/05/21 unless otherwise stated. 01/05/21 08:12:41 ET

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

vehicles, Brookfield Property Partners L.P. (BPY/Not Covered), that it does not already own for $16.50/unit or a roughly 15% premium to the 12/31 close. We touched base with a Brookfield Infrastructure contact to confirm our suspicions – this situation is very much unique to BPY and should not be viewed as a potential read-through to either BEP/BEPC or BIP/BIPC. BAM has expressed frustration with the public valuation of BPY's underlying assets since prior to the onset of the pandemic and the stock's underperformance over the last 10 months, ostensibly related to longer term concerns regarding the health of the commercial real estate market, has only exacerbated that frustration. This contrasts to BEP/BEPC and BIP/BIPC which have been warmly embraced by investors, particularly (1) in the wake of the pandemic, (2) amidst the secular shifts towards renewables and infrastructure investment strategies and (3) following the creation of c-corp share classes in '20. As such, investors should not be thinking a potential take-private offer could be coming from BAM for either Brookfield Infrastructure or Brookfield Renewable absent a meaningful, and what we would consider an unexpected, re-rating down in the respective unit/share prices.

Acronyms:

DELCORA – Delaware County Regional Water Quality Control Authority

PaPUC – Pennsylvania Public Utility Commission

Essential Utilities, Inc. (WTRG)/Overweight
Price as of 1/4/2021: $46.19

Price as of 1/4/2021: $57.95
FY 20 FFO/sh: $1.35
FY 21 FFO/sh: $1.43
Shares Out.: 464.0 MM
Market Cap.: $26,888.8 MM

Rating Basis Information:

WTRG Thesis: Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

BIP Thesis: We believe attractive roughly 10% FFO/unit and 8% distribution/unit CAGRs are achievable over the next 5-years driven by a robust capital backlog and a savvy management team that has shown a consistent ability to execute and be good stewards of investor capital. In addition, we are drawn to BIP's diversified business mix – both strategically and geographically – as well as the highly regulated/contracted cash flow profile. We believe the near-term pressures from COVID-19 economic fallout, the strong U.S. dollar, etc. will be offset in the long run by value creating M&A opportunities, some of which may result from pandemic related disruptions in global equity and debt markets.

BIPC Thesis: We believe attractive roughly 10% FFO/unit and 8% distribution/unit CAGRs are achievable over the next 5-years driven by a robust capital backlog and a savvy management team that has shown a consistent ability to execute and be good stewards of investor capital. In addition, we are drawn to BIPC's diversified business mix – both strategically and geographically – as well as the highly regulated/contracted cash flow profile. We believe the near-term pressures from COVID-19 economic fallout, the strong U.S. dollar, etc. will be offset in the long run by value creating M&A opportunities, some of which may result from pandemic related disruptions in global equity and debt markets.

BEP Thesis: We consider BEP – as one of the few sizeable, publicly traded, pure play global renewable companies – to be a compelling way for investors to gain exposure to the decades-long global transformation towards carbon-free electric generation and growing ESG investing mantra. BEP is led by a proven management team with a track record of efficiently deploying (and recycling) capital across the portfolio. BEP's conservative philosophy of amassing a well-diversified global portfolio of predominantly contracted, carbon-free generation assets that are backed by an investment grade balance sheet and healthy cash flows results in a relatively low risk profile versus other renewable asset owners/developers. We believe units of BEP offer investors attractive long-term total return potential comprised of at least 7% FFO/unit growth and a roughly 3% yield with mid-to-upper single digit distribution/unit growth. That said, our Equal Weight rating reflects current valuation considerations.

BEPC Thesis: We consider BEPC – as one of the few sizeable, publicly traded, pure play global renewable companies – to be a compelling way for investors to gain exposure to the decades-long global transformation towards carbon-free electric generation and growing ESG investing mantra. BEPC is led by a proven management team with a track record of efficiently deploying (and recycling) capital across the portfolio. BEPC's conservative philosophy of amassing a well-diversified global portfolio of predominantly contracted, carbon-free generation assets that are backed by an investment grade balance sheet and healthy cash flows results in a relatively low risk profile versus other renewable asset owners/developers. We believe shares of BEPC offer investors attractive long-term total return potential comprised of at least 7% FFO/share growth and a 2.0-2.5% yield with mid-to-upper single digit distribution/share growth. That said, our Equal Weight rating reflects current valuation considerations.

Essential Utilities, Inc.

WTRG: ALJ Recommendation a Setback but DELCORA Deal Far from Dead

Reiterate Overweight

Overweight/$52

Water Utilities

Company Note

- **Key Points.** The ALJ recommendation in the pending DELCORA deal was posted to the PaPUC website on 1/12. It recommends denial as (1) ongoing litigation regarding DELCORA's ability to transfer assets under the asset purchase agreement and (2) failure to attach the rate stabilization plan to the application make it too difficult to make an informed recommendation regarding if the deal is in the public interest. WTRG plans to file objections. This is no doubt a setback but in no way does it appear to kill the DELCORA deal. For starters, it does not necessarily convey the PaPUC commissioners' view (the PaPUC order is due by 3/26). We believe there is still a reasonable pathway to approval – perhaps through settlement – however it could push deal closure beyond early Q2'21. Reiterate Overweight.
- **Ongoing Litigation.** These lawsuits are separate from the 12/28 ruling in favor of DELCORA/WTRG regarding the APA's validity and ability to put the $210M of net proceeds into a trust. Rather five of the 49 municipalities served by DELCORA (represent 9% of annual revenues) have not yet consented to the transfer of the assets and/or assignment of contracts to WTRG – though WTRG reached a settlement on 1/8 with one (Trainer) resolving its issues. Three of the munis (SWDCMA, Lower Chichester and Upland) filed lawsuits in early November in the Delaware County Court of Common Pleas.
- **Path Forward.** At this time it is unclear to us what the path forward would be if settlements are not reached with the remaining four munis and/or the section of the APA that contemplated such a scenario is not upheld/enforced. Can they be carved out of the deal? Once those issues are resolved, the reasonableness of the purchase price under PA's FMV law as well as the public interest determination can be made. The ALJ indicates a new application should be filed to reflect those updates along with the rate stabilization plan and tariff provisions outlining the bill credit mechanism to limit customers' rate increases to a 3% compound annual maximum (so long as the trust remains solvent). If a new application is indeed required, we believe it would push the potential closing date to late '21 or early '22.
- **Reiterate Overweight.** First, getting the $277M DELCORA deal closed is more important than the timing. The near-term EPS impact is minimal. The strategic value is longer-term, including the fact that the bulk of DELCORA's $700M capex needs through '28 fall in the 2026-28 period. Second, our Overweight thesis is not solely predicated on DELCORA closing. As previously stated, though the DELCORA deal is highly supportive of WTRG's growth aspirations, we consider the future to be bright without it, driven by elevated pipeline infrastructure investment needs for the foreseeable future supplemented by municipal M&A trends. We believe relatively low risk, regulated EPS growth of at least 6% is achievable and that rate of growth would simply be enhanced if DELCORA closes.

ALJ – Administrative Law Judge
APA – Asset Purchase Agreement
DELCORA – Delaware Country Regional Water Quality Control Authority
FMV – Fair Market Value
PaPUC – Pennsylvania Public Utility Commission
SWDCMA – Southwest Delaware County Municipal Authority

Price Target

Price Target: $52 from NC

Our $52/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.80. For WTRG's water utility multiple, we ascribe a roughly 5% discount to the 21E multiple we use for AWK (34-34.5X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The roughly 5% discount reflects a modestly lower earnings growth rate (we forecast roughly 7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 17.0-17.5X (based on ATO, NWN, OGS & SR) and then apply a roughly 10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework. Key risks relate to regulatory, Peoples gas deal integration and M&A strategy execution.

Investment Thesis

Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio.

In March 2020, WTRG closed on the acquisition of Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, WTRG paid 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to other gas utility transactions at the time. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

Regulated operations account for more than 99% of consolidated revenues. Consolidated EPS is expected to be driven roughly 70% by water utility operations with the gas utility contributing the remaining 30%.

In February 2020, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Company Update — February 25, 2021

Water Utilities

Essential Utilities, Inc. (WTRG)

WTRG: Recent Weakness Provides Attractive Entry Point – We Remain Bullish on WTRG's LT Growth Prospects

Our Call

We believe the recent weakness provides an attractive entry point as the fundamental narrative has not changed. Since 1/8, shares of WTRG are down 11%. This trails "larger cap" water utility peers (-0% to -8%), gas LDCs (+6%) & S&P Utilities (-5%). We reiterate our Overweight rating and $52/sh price target (29X our 22E). WTRG's YE'20 update was consistent with the mid-January guidance event including '21 diluted EPS guidance of $1.64-1.69 (cold YTD weather has Peoples off to a strong start), a 5-7% EPS CAGR target through '23 and $3B of capex over the 2021-23 period which will drive underlying 6-7% water and 8-10% gas rate base CAGRs. Our 21-25E EPS remain $1.67, $1.80, $1.93, $2.07 & $2.20. Our forecast results in an EPS CAGR near the upper end of WTRG's 5-7% range which we believe is reasonable given strong underlying rate base growth driven by accelerated pipeline replacement needs and a municipal M&A strategy that continues to gain momentum.

A Very Healthy Municipal Deal Pipeline. Following a solid 2020 ($63M of deals), 2021 is shaping up to be even better (signed $90M of new deals in 2020). Besides the $277M DELCORA deal, WTRG has five other signed APA's which will add $161M in rate base – includes four separate chunky wastewater deals (East Whiteland, PA $55M; Lower Makefield, PA $53M; Bourbonnais, IL $32M; Williston Township, PA $17.5M). In addition there is the $12M purchase of Shenandoah, PA's water assets – the borough council approved the deal in late November and the APA is still being finalized. WTRG's deal development pipeline remains robust and management continues to express optimism that activity will start ramping up in the years ahead in the four states that only somewhat recently adopted FMV legislation (NC & OH in '18; TX in '19; VA in '20). Our model reflects primarily announced deal closures over the 2020-22 period plus a $75M/year placeholder in '23 & beyond. This could prove conservative if the recent pace continues.

Big Picture DELCORA Thoughts. We believe the deal will close as discussed in greater detail later in this note. Getting DELCORA across the finish line is more important than the timing of it given the longer-term strategic value it represents. Beyond the $277M rate base pick up at closure (expected early Q2'21), we are attracted to (1) the $700M of capital investments – $25-50M/year for typical repair/replace work plus roughly $300M over the 2026-28 period related to DELCORA's treatment plant – as well as (2) the likely substantial wastewater tuck-in deals that could transpire in the area. But our Overweight thesis is not solely predicated on DELCORA closing. We believe relatively low risk, regulated EPS growth in the 5-7% range is achievable without driven by pipeline replacement needs and municipal M&A momentum. That rate of growth would simply be enhanced if DELCORA closes as it should allow WTRG to extend it through the end of the decade and perhaps even raise it.

Next PA Rate Cases

WTRG does not have any major rate-setting procedures pending. The next PA water & wastewater rate case filing is expected around mid-'21 while the next gas one might be made in late '22. While WTRG's PA rate cases can never be overlooked given the meaningful % of rate base represented (more than 70% on the water/wastewater side), the utility has a long history of reaching constructive outcomes via settlement agreements. In addition, despite the pandemic-related economic challenges faced by many ratepayers that has led to heightened rate sensitivity in some states, the PA regulatory environment has upheld its constructive reputation – includes the recent NI rate case outcome as well as the ALJ recommendation in the pending AWK case which honors the 10/30 settlement agreement.

Peoples Repairs Tax Deduction Settlement

Management noted that a verbal settlement has been reached with intervenors that will give back 100% of the catchup benefits to ratepayers over a 5-year period. This contrasts with WTRG's proposal where 40% of the benefits would have been shared directly with ratepayers through surcredits on bills and the remaining 60% used as an increasing income tax expense offset over the 2023-25 period in order to avoid implementing a gas base rate increase prior to 1/1/2026. We view the move as goodwill gesture on WTRG's part to help provide customers with some additional bill relief as they deal with the economic impacts of the pandemic. As noted above, we expect Peoples next base rate filing could occur in late '22.

A Deeper Dive Into The DELCORA Approval Process

Since the ALJ recommendation for denial of the $277M deal was posted to the PaPUC website on 1/12, a few developments have occurred.

(1) **Delaware County on 1/21 appealed the 12/28 decision** by Judge Barry Dozor in the Court of Common Pleas of Delaware County. Recall, Judge Dozer ruled against Delaware County's two claims and in favor of DELCORA and WTRG regarding the validity of the asset purchase agreement as well as the ability to put the net proceeds of roughly $200M from the sale into a trust to be used to stabilize ratepayers' bills in the years ahead.

(2) **Settlements have been reached with two more of the municipalities** that had not yet consented to the transfer of the assets and/or assignment of contracts to WTRG from DELCORA and each has discontinued its Complaint in the Court of Common Pleas of Delaware County. One was SWDCMA which constitutes ~5% of DELCORA's annual revenues or the bulk of the 9% represented by all of the holdouts. That leaves only two remaining (the Townships of Edgmont and Lower Chichester) out of the 49 total municipalities served. Discussions remain ongoing and the parties do not oppose the PaPUC approving the DELCORA transaction with the condition that these contractual issues be resolved prior to closing.

(3) **WTRG and DELCORA withdrew the proposed customer assistance bill payment that the ALJ recommendation concluded was a "rate stabilization" plan**. Rather than show it as a credit against the amount due on wastewater bills, DELCORA customers will get the $200M of net benefits from the transaction through direct mail, quarterly payments.

We continue to believe the DELCORA deal will eventually be approved by the PaPUC and close. For starters, the ALJ recommendation does not necessarily convey the PaPUC commissioners' views. That point was highlighted just recently in the constructive conclusion of NI's rate case despite an ALJ recommendation to deny the requested increase altogether. Approval just may take some additional time beyond WTRG's early Q2'21 target. We cannot rule out the potential need to re-file the PaPUC application and/or extend the current statutory timeframe beyond the 3/26 deadline. With only four of the five PaPUC commissioner chairs filled right now, it is possible a 2-2 stalemate occurs.

But under the assumption the ALJ recommendation is consistent with where commissioner heads were in mid-January, WTRG has largely addressed the concerns expressed, in our opinion. Recall, ALJ rationale for denial was that (1) ongoing litigation regarding DELCORA's ability to transfer assets under the asset purchase agreement and (2) WTRG's failure to attach the rate stabilization plan to the application make it too difficult to make an informed recommendation regarding if the deal is in the public interest.

We believe the 12/28 Court of Common Pleas order combined with the additional municipal settlements (and likely two future ones) should allow the reasonableness of the purchase price under

This document is for bjdingerdissen@essential.co and should not be distributed further.

PA's FMV law as well as the public interest determination to be made by the PaPUC. Reaching a settlement with Delaware County – an outcome that management continues to strive for, possibly even after the 3/26 PaPUC decision deadline – that results in dismissal of the appeal would seemingly de-risk the conclusion even further. Finally, the withdrawal of the "rate stabilization" plan should make the ALJ's concern on that point moot.

Acronyms Used:

ALJ – Administrative Law Judge

APA – Asset Purchase Agreement

DELCORA – Delaware Country Regional Water Quality Control Authority

FMV – Fair Market Value

PaPUC – Pennsylvania Public Utility Commission

Price Target Basis and Risk

Price Target for WTRG: $52.00 from NC

Our $52/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.80. For WTRG's water utility multiple, we ascribe a roughly 5% discount to the 21E multiple we use for AWK (34X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The roughly 5% discount reflects a modestly lower earnings growth rate (we forecast roughly 7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 18.0-18.5X (based on ATO, NWN, OGS & SR) and then apply a roughly 10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework.

Risk for WTRG

Key downside risks include adverse regulatory decisions, issues with the Peoples gas deal integration and earnings accretion, missteps with regards to the M&A strategy and execution as well as potential anti-gas sentiment and ESG concerns stemming from the ownership of a gas utility.

Investment Thesis

WTRG

Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is relatively low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Quick thoughts from Wells Fargo Securities, LLC Utility & Infrastructure Team:

Utilities

Aqua America (WTR/Market Perform)(Reeder) – We had the chance to catch up with WTR regarding the company's disclosure yesterday (6/12) that a settlement agreement was filed with the PA Public Utilities Commission (PaPUC) in the Peoples merger approval docket (A-2018-3006061). Because there is an outstanding issue between two of the intervenors that prevented a unanimous settlement from being reached – relates to the preferred path forward for a 1,600 customer system – the remainder of the docket must play out as scheduled so that the PaPUC can decide the issue. This is what pushes the expected close of the merger into fall 2019. It is our understanding that the settlement agreement does not address any Peoples revenue requirement issues. Rather the appropriate revenue requirement going forward will be determined as part of the pending Peoples rate case. This could include (1) the potential election and treatment of repairs tax deduction at Peoples (discussed on the Q1'19 earnings call) and (2) the potential to realize (and retain) any merger synergies. We continue to expect a constructive outcome in the Peoples rate case later this year and believe the potential election of repairs tax deduction could be a powerful bargaining chip for the utility as settlement discussions take place. Rate case hearings are scheduled to begin June 18.

In terms of our EPS outlook, as we stated yesterday (6/12), the delayed merger close is likely to negatively impact our current 19E EPS of $1.37 which was predicated on a mid-'19 close. Our preliminary analysis suggests pushing it to the end of Q3'19 could have up to a ($0.10) impact. Importantly, we do not have any reason to believe at this point that our 20-23E of $1.56, $1.66, $1.78 & $1.90 are not still within reason. Given the multiple moving parts in '19 related to the merger and rate relief, we believe investors should focus on '20 & beyond for a better sense of WTR's ongoing EPS power. Our '20 & beyond outlook is predicated on earned ROEs at both the water and gas utilities of 10-10.5%.

Aqua America, Inc. (WTR)/Market Perform (2)
Price as of 6/12/2019: $41.12
FY 19 EPS: $1.37
FY 20 EPS: $1.56
Shares Out.: 178.1 MM
Market Cap.: $7,323.47 MM

Please see page 3 for rating definitions, important disclosures and required analyst certifications.
All estimates/forecasts are as of 06/13/19 unless otherwise stated. 06/13/19 05:27:05 ET

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Rating Basis Information:
WTR Thesis: We are attracted to WTR's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations and a strong balance financial profile. Our Market Perform rating reflects valuation considerations in light of WTR's pending agreement to acquire Peoples (a gas utility) and the associated P/E multiple, regulatory and deal execution/integration related risks.

WTR: EPS Outlook Updated As ALJ Recommends Approval Of Peoples Acquisition

Market Perform/$46

Water Utilities
Market Weight

Earnings Estimate Revised Down

- **EPS Outlook Updated As Peoples Merger Close Timing Comes Into Focus.** The assigned Administrative Law Judge (ALJ) to the Peoples merger docket issued the long awaited recommended decision (RD) on 10/28. ALJ Long's RD not only approves WTR's acquisition of the Peoples Companies but adopts the non-unanimous settlement agreement in its entirety. This includes the proposed $120M investment over a 7-year period to update the deteriorated 1,700 customer, 368 mile Goodwin and Tombaugh (G&T) gathering system and replace the existing bare steel pipe as well as a one-time $13M rate credit offered by WTR to partially offset this cost. WTR and the seven other settling parties, including key intervener Office of Consumer Advocate (OCA), support updating the G&T system as the preferred path forward and socializing those costs across Peoples entire customer base whereas the PaPUC's Bureau of Investigation & Enforcement (I&E) and Office of Small Business Advocate believe those customers that cannot be updated economically should be abandoned and forced to convert to an alternative energy source. In fact, ALJ Long goes as far as to characterize the remediation of the G&T system as the most significant benefit of the transaction.

  As we previously discussed, parties have 30 days from the RD to file exceptions and it is likely that the PaPUC (Pennsylvania Public Utilities Commission) may take at least 30 days after that to render a final decision (absent the parties reaching unanimous settlement in light of the ALJ's RD). As such, WTR now anticipates a December 2019 or early 2020 close. We are encouraged by the ALJ's RD and anticipate the PaPUC is likely to ultimately adopt the RD.

  We lower our 19E EPS to $1.19 from $1.32 to reflect an assumed YE'19 close by removing the roughly two months of Peoples net income benefit from our previously assumed end of October '19 deal close. In addition, we made a few other tweaks to our model, primarily related to external financing assumptions including correcting an error that overstated some cash inflows in 2019. As a result, we adjust our 2020-23E EPS down modestly to/from $1.57/$1.58, $1.70/$1.71, $1.80/$1.82 & $1.92/$1.94. This results in a 6.5-7.0% EPS CAGR. As a reminder, our outlook continues to exclude any potential uplift from the planned election of repairs tax deduction at Peoples in 2020. We reiterate our Market Perform rating but lower our 12-18 month price target to $46/share from $47 to reflect lower peer multiples since our last update.

As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Price Target

Price Target: $46 from $47

Our $46/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 2.5% discount to our 70% water/30% gas utility hybrid multiple to our 2021E of $1.71. The 2.5% discount reflects merger execution/integration risk. For WTR's water utility multiple, we start with AWK's 2020 P/E multiple of 30.3X (AWK represents the closest publicly traded peer) and apply a 5% discount (given AWK's higher growth rate and best-in-class management team). For WTR's gas utility multiple, we utilize the 2020 pure play gas LDC median of 24.6X. Key risks include regulatory and M&A strategy execution related.

Investment Thesis

We are attracted to WTR's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations and a strong balance financial profile. Our Market Perform rating reflects valuation considerations in light of WTR's pending agreement to acquire Peoples (a gas utility) and the associated P/E multiple, regulatory and deal execution/integration related risks.

Company Description

Headquartered in Bryn Mawr, PA, Aqua America (WTR) is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTR's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total customer base and nearly 70% of consolidated rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio. Regulated operations account for more than 99% of consolidated revenues.

On 10/23/18, WTR announced a deal to acquire Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, the deal appears to be 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to what we have seen in recent gas utility transactions. WTR expects to close the deal around YE'19, subject to receiving the final necessary regulatory approval from PA. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

2020 EEI Conference Takeaways

Utilities

- **Key Points.** We hosted virtual meetings with 38 companies at the EEI Financial Conference on November 8-11th. The tone of the conversations were positive with sales recovering nicely and most utilities finding offsets (cost controls and regulatory support) to COVID impacts. Further, the de-carbonization theme was in full force with no shortage of investment opportunities to modernize the electric generation fleet as well as the enabling T&D infrastructure. On the strategic front, conversations centered around the trend toward pure play utility models and interest in M&A, particularly on the LDC side given depressed valuations.
- **Strategic Questions Abound.** This year's conference featured many discussions around strategic options as diversified utilities were asked about transitioning to pure play models and combo electric/gas utilities were asked about their appetite for LDC acquisitions. Among the diversified names, ED and SRE expressed the most openness to strategic moves, in our view. Separately, CNP and OGE were fairly reserved on their comments on ENBL, though we expect to hear more from CNP at the 12/7 analyst day. Companies that are in the midst of divesting or potentially divesting assets (EXC, DTE, PEG, PPL) faced questions about whether they would entertain regulated M&A opportunities post-divestiture (assuming they have greater financial flexibility).

  On the LDC front, reviews were mixed with most mgmt. teams expressing confidence in the long-term business model, but some not willing to add gas to the mix. Companies that expressed the most openness to acquiring LDC systems, in our view, were ALE, BKH, MDU, SO and WEC (not without some cautious language). And for good measure, there was a mid-EEI Reuters report suggesting that NEE made a recent offer for EVRG, which both companies talked down.
- **Optimism on Sales**. Most utilities expressed cautious optimism that C&I sales are coming back and some portion of the uptick in residential could be sustainable given a new working environment. Certain utilities in desirable areas (IDA, NWE and POR, for example) also discussed strong in-migration trends as a result of increased mobility/flexibility in the work place.
- **Guidance Updates.** A few utilities used the EEI conference to update capex/growth forecasts. AEP laid out a robust capex refresh that was heavy on renewables and wires investment (surprise, surprise) and continued to support the 5-7% EPS CAGR. ALE lowered the 2019-2024 EPS CAGR to 4% from 5-7% reflecting COVID impacts and pressure on wind returns. And NWE initiated 2021 EPS guidance and increased the 5-year capex budget, which continues to support the mid-point of the 3-6% EPS CAGR.
- **Company-Specific Takeaways in Body of Note.**

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

ALLETE Inc. (ALE/Equal Weight/$58.30) (Akers)

Growth Rate Buckles Under COVID Pressures. ALE is one of the more COVID-exposed companies within our universe because of Minnesota Power's industrial (especially taconite) heavy customer base. Taking various pressures under consideration (electric demand, down-sized transmission project, lower assumed equity issuance price, pressure on wind returns, etc.), mgmt. revised the EPS CAGR to 4% (through '24 off the '19 adjusted base of $3.35) from 5-7%. The growth rate assumes 3% growth at the utility operations and 30% at ALLETE Clean Energy (ACE). The company acknowledged that the 4% CAGR could be conservative should an economic recovery prove faster/stronger than anticipated. On the positive side, ALE is seeing a pickup in steel demand and, importantly, Keetac recently indicated plans to reopen in December, which provides more certainty into 2021, though Verso's future remains unclear. MP filed a request to defer the lost revenue associate with Keetac and Verso – upside to '20E & '21E if approved – and plans to file a general rate case in November '21.

Tone Change on ACE. Mgmt. indicated that ACE is beginning to see pressure on wind returns stemming from increased competition and lower power prices. As a result, the previous target of adding 2-3 wind projects annually may prove challenging. ALE will continue to evaluate wind opportunities, but is also looking at other services, such as solar, storage and grid resiliency as potentially more attractive growth avenues. On the Q3 call, which was during EEI, mgmt. also mentioned the possibility of optimizing the ACE portfolio, which we expect could include asset sales.

Ameren Corporation (AEE/Overweight/$82.37) (Kalton)

Waiting on the CapEx Refresh. EEI is not a big event for AEE as the company provides prompt year EPS guidance and the 5-yr capex refresh in conjunction with Q4 earnings. That being said, we picked up a few tidbits on pending items. First, the renewables RFP in MO is ongoing and it is doubtful that results will be in on time to include in the '21-25 capex refresh – mgmt. is always hesitant to get too far in front of the regulatory approval process in terms of officially adding capital to the base plan. That being said, we think there are plenty of capital investment needs outside the RFP to support a 6%+ EPS CAGR well into the 2020s. As an aside, mgmt. noted that capex spending on technology is up many multiples in MO since the MoPSC approved the PISA mechanism – the reduced regulatory lag allows for improved returns for short lived assets. If/when new MO renewables comes into the fold it remains an open question as to whether it will be purely incremental to the '21-25 plan or whether there will be some capex shifting (factors will include customer rate considerations and financing needs). No new developments on the IL legislative front – mgmt. continues to work with stakeholders as everyone eyes comprehensive energy legislation in the Spring '21 session (and not the Nov. '20 veto session). At issue for AEE are the existing formula rate structure and the allowed ROE methodology for the electric distribution operations and (maybe) the investment rider for the gas utility.

American Electric Power Company, Inc. (AEP/Overweight/$91.15) (Kalton)

New Robust CapEx Plan. While AEP's 5-yr capex refresh ('21-25) was higher than we anticipated ($37B vs. $35B), the underlying drivers were exactly as we expected (wires + renewables). Renewables represents nearly 15% of the planned capex vs. 7% in the original '20-24 capex guidance. Yes, the $2B North Central Wind project was officially added to the capex schedule but other regulated renewables are coming into the fold at AEP's vertically integrated utilities. Renewable additions (owned & PPA) in these jurisdictions are expected to total over 4,600 MW during '21-25 with another 3,400 MW planned for '26-30. As for wires, there is plenty of spend across the board with seams solutions offering potential significant upside in the mid-20s and beyond as transmission grid spend will likely accelerate to better allow for the flow of renewable power across regions. AEP's large geographic footprint combined with strong transmission expertise positions the company for this coming opportunity. All told, the phrase "long capex runway" gets thrown around a lot in the utility sector, but it's clearly appropriate when framing AEP's investment opportunities.

Thoughts on EPS Guidance / Asset Sales. AEP also rolled out initial '21 EPS guidance of $4.51-$4.71, the mid-point of which represents a 6% increase over the '20 EPS guidance mid-point of $4.35 – consistent with AEP's 5-7% EPS CAGR goal. We view the '21 guide as solid but not exceptional (our 21E EPS is $4.70). Notably, the '21 forecasted ROE of 9.0% is a smidge below our estimate of 9.2%. While 20 bps doesn't sound like much, it equates to ~$0.20, or 4%, of EPS power. Keep in mind, the earned ROE guidance heading into '19 was 9.65% and heading into '20 was 9.1% (however, '20 was characterized as a transition year due to a heavy rate case cycle). We think the overall downward trend in allowed ROEs is playing a role in the ROE guidance but it is not the only factor. Mgmt. noted that 30% of the company's capital spend does not have formula or rider rate type recovery, which results in regulatory lag especially as capital spend goes up. This is an area of focus for mgmt. and could result in longer-term

upside if AEP can improve the regulatory frameworks. Last, in our view, there was no discernible change to mgmt.'s thought process around the potential sale of operating utilities. A number of factors go into the calculus including the ability to efficiently recycle capital and the organic growth prospects of the underlying asset (operating utility) in question.

American Water Works (AWK/Equal Weight/$164.37) (Reeder)

If It Ain't Broke, Don't Fix It. This should not come as a shock but management made it clear that the proven strategy and values that have yielded success over the years will continue to be adhered to going forward and it is up to them to continue to execute. Pursuing timely recovery of much needed water/wastewater infrastructure spend while keeping operating costs in check to maintain customer affordability is the core and can lead to attractive 5-7% risk-adjusted EPS growth on its own. Then layer on top a tuck-in acquisition strategy that has gained momentum in recent years and should remain at these elevated levels (if not further accelerate) as (1) states continue to adopt policies to encourage consolidation, (2) COVID and other financial stresses challenge municipal budgets and (3) regulatory requirements make it increasingly difficult to efficiently and effectively operate small-to-mid sized systems. And finally, management is committed to the non-regulated businesses and believe both are complimentary, capital-light ways of augmenting the regulated growth. As such, the 7-10% growth triangle is likely to persist well into the future.

Other Tidbits. Committed To Water/Wastewater. Management believe investors ascribe a high value to the fact that AWK is a pure play water/wastewater utility – and all of the positive long-term fundamentals of the industry like decades long elevated capex needs, consolidation potential, etc. – and is committed to remain that way. The focus is on continuing to build the tuck-in M&A pipeline which is already very strong. Military Marches On. While AWK has won 5 of the last 6 military base awards, the company is by no means resting on its laurels and continues to try to bring value and solutions to the bases under operation to boost its competitive position. AWK is involved in 4 open solicitations, including a Navy base (the first Navy base to embark down the privatization path), and 2 are expected to be awarded within the next 3-6 months. Management indicated the universe of bases yet to be privatized that AWK would be interested in (i.e. sizeable) stands at about 70. External Equity. The plan remains to close the NY American Water cash sale to AQN in Q1 and look to externally raise about $500M of equity in mid-'22. The timing of equity is driven by the rate of capital deployment and would only be accelerated if there is a near-term uptick in municipal deals.

Alliant Energy Corporation (LNT/Overweight/$57.42) (Kalton)

Plenty of Renewables & Distribution. LNT has a wonderfully straightforward story; but there were a couple of nuggets to note from EEI: (1) LNT's recently announced Clean Energy Blueprint in IA includes 400 MW of solar. Notably the solar qualifies for advanced rate making principles including an enhanced ROE (set for the life of the asset). LNT's IA wind farms receive an 11.0% ROE and recent precedent for IA neighbor MidAmerican suggest the solar spend could qualify for a 10.5-10.7% ROE. (2) Both IPL & WPL have been systematically undergrounding their electric distribution systems at a pace of 1.5-2.0% per year and currently sit at 25% undergrounding of LNT's 45,000 mile distribution system (skewed more toward WPL). Given strengthening storms (the recent derecho is an example) and the increasing focus on resiliency/reliability, policymakers may be open to LNT to accelerate the program (it sounds like early days, but mgmt. is evaluating). While we do not expect anything in the near-term, we think this remains an intriguing long—term investment opportunity. At an estimated cost of $100,000-300,000 per mile, we think the undergrounding opportunity is several billion dollars. Again, the work is currently ongoing – but it could be accelerated and be another lever (along with generation transformation) to extend the targeted 6% rate base CAGR well beyond the mid'20s.

AVANGRID (AGR/Overweight/$51.44) (Kalton)

EPS Outlook. Fresh off the heels of AGR's Investor Day, mgmt. helped fill in the blanks on a few of the assumptions underlying the EPS CAGR of 6-8% (off the adjusted '20 EPS base of $2.10) and the '21 & '22 EPS guidance ranges. Our take: we think mgmt. has prudently erred on the side of conservatism particularly as it relates to the regulated utility operations. While the '21-25 guidance contemplates the NY utilities eventually reaching the allowed ROE levels, our sense is that the near-term EPS guidance reflects continued underearning as NYSEG & RG&E continue to ramp up vegetation management spend in order to improve system resiliency. We also think the outlook reflects a pragmatic approach to the pending PNM acquisition taking into account integration risk. However, we believe there could be potential to best AGR's baseline internal goals via (1) the potential for higher capex vs. PNM's current guidance and (2) modest cost savings (sharing of best practices, etc.). In terms of merchant wind pricing,

AGR's near-term guidance reflects flattish power and REC prices of $20-25/MWh and $10/MWh, respectively. Mgmt. remains highly committed to reducing merchant price exposure over time via recontracting.

Offshore Update. Mgmt. remains very excited about AGR's position in the nascent U.S. offshore wind market. In the near-term, Vineyard Wind is one of the three bidders into NY's pending RFP for up to 2,500 MW (AGR owns 50% of Vineyard Wind). The other two bidders are Equinor/BP and Ørsted/ES. Mgmt. noted that Vineyard's bid was for a large amount of capacity given the distance between the company's lease area (off the coast of MA) and NY – the electricity would land onshore in MA and then be wheeled to NY. The winning bid(s) are expected to be announced by YE'20.

Black Hills Corp. (BKH/Equal Weight/$63.63) (Akers)

Next Stop: Growth Rate. BKH plans to provide an EPS growth target in conjunction with the YE update. The company believes there's good line of sight on the gas side given programmatic pipe investments while the electric side can be lumpy depending on IRP/RFP outcomes (likely continue to be somewhat conservative on that front). We expect the growth rate will be in the 5-7% range and we look to the July 2021 IRP filing in WY for additional insight on generation opportunities (could include discussion of carbon capture as WY remains supportive of the coal plants); there's also potential to expand the Renewable Ready subscription program.

ESG & LDCs (and M&A). BKH rolled out plans to reduce GHG emission intensity 70% by 2040 at the electric operations with 50% GHG reductions targeted at the gas utilities by 2035. On the gas side, CO is in the spotlight as there are ongoing discussions – including a recent Commission Informational Meeting – on what the LDCs can do to comply with environmental initiatives. While there are some parties pushing for electrification, BKH appeared encouraged that the utility stakeholders (including electrics) understand the affordability challenges of electrification along with customer choice considerations. As further evidence of the company's comfort with the gas outlook, mgmt. expressed openness to acquisitions within the company's existing jurisdictions. More specifically, BKH would evaluate CNP's AR LDC if it comes up for sale (though the company noted that the service territory is lower growth than its own AR utility).

CenterPoint Energy, Inc. (CNP/Equal Weight/$24.07) (Akers)

What a Difference a Year Makes. We had a very constructive conversation with new CFO Jason Wells. He reiterated that the plan to deliver at the high end of the 5-7% growth rate (off 2020 Utility guidance basis EPS of $1.12-1.20) already contemplates various headwinds/scenarios – these include the 2021 equity dilution headwind, the roll-off of equity returns on transition/securitization bonds at CEHE, one to two LDC sales, and potential strategic alternatives at ENBL that could require more parent debt to be allocated to the utility. Similarly, Mr. Wells confirmed that the $16B capex plan and 10% rate base CAGR already account for the LDC sales (no negative re-basing ahead). On the O&M front, company has already identified meaningful cost cuts for the 2021/2022 time frame and, longer-term, envisions a culture of continuous improvement.

Strategic Update. We look to the 12/7 analyst day for details on the LDCs sale candidates and for insight into the direction on ENBL. On the latter, mgmt. clearly intends for utility earnings to be a bigger piece of the pie over time, but we still think an exchange of shares into a larger MLP (vs. outright cash sale) is a viable option in the review process. Shifting to the LDCs sales, we think a combination of OK, MS, LA and AR could be sale candidates or, on the bigger side, CNP could elect to sell OH. We do not expect the LDCs in TX or IN would be considered given the company's goal to reduce/simplify regulatory jurisdictions and, separately, we suspect MN may be a bit bigger than what CNP needs. The company indicated that the LDC sales are not driven by any long-term electrification concerns and reiterated that their states remain highly supportive of natural gas. That said, having a more electric-centric mix was mentioned as being consistent with the ESG focus, along with making renewable-enabling investments in TX and modernizing the generation fleet in IN (new plan envisions more utility-ownership of renewables).

CMS Energy (CMS/Overweight/$67.01) (Kalton/Reeder)

On Point, As Expected. One did not have to meet with CMS management to know what they would say. And that is not a bad thing! Just the opposite. As CFO Rejji Hayes put it, CMS will give folks "as much certainty on the E as they can and let investors determine the P." It is that de-risked approach to the business – a utility franchise that sports an extensive capex backlog amidst a constructive regulatory backdrop (that is expected to remain steady going forward) and led by a proven management team with a track record of effective cost management in order to deliver consistent 7% EPS growth (why bother even

saying 6-8%!) – that results in an attractive risk-adjusted total return proposition. Then layer on aggressive decarbonization goals for the ESG-friendly crowd and what is there not to like – other than some (not us!) would argue the "P"?

Food For Thought. More COVID Shutdowns. In the event COVID concerns lead to additional restrictions, CMS does not believe commercial & industrial load will be nearly as hard hit as it was in Q2'20 given evidence that businesses have been largely effective at maintaining operations while protecting employees. That said, should headwinds occur that a residential load uptick would not fully offset, you guessed it – costs can be managed! June 2021 IRP Filing. Planning has begun but it does not sound like, at least on a preliminary basis, the plan will look all that different than the prior iteration, even in the context of a potential Biden administration, given CMS's already aggressive stance towards decarbonizing the fleet (0% net emissions by 2040). Management is monitoring storage in terms of both the cost curve decline and increased efficacy but the urgency is not as great as other utilities in terms of balancing the intermittency of renewables given the Ludington Pumped Storage Facility essentially offers CMS more than 1 GW of battery-like capacity. Committed To Non-Regulated. CMS already has a small non-utility earnings mix (~7% with a guide to no more than 10%) which is where some other companies seem to be trying to get. Plus CMS runs the non-utility portion of the portfolio like a utility in terms of the predictability of earnings.

Consolidated Edison Inc. (ED/Equal Weight/$81.72) (Akers)

COVID Impacts. We gained insight into the COVID impacts and impact on guidance. The $0.05 reduction to the top end of the 2020 range (now $4.15-4.30) reflects the continued inability to collect late charges and disconnection/connection fees. The bad debt expense triggered the materiality threshold, which allowed the utilities to book a $50mm deferral, but that was already contemplated in the guidance range. Looking ahead, the company expects commercial fees could resume in Q1 and the timing on residential remains uncertain. ED is seeking approval to defer the lost revenue in a regulatory proceeding, which could provide upside to near-term EPS if approved.

ESG Focus. Mgmt. highlighted opportunities across the platform to advance de-carbonization efforts. These include the EE, EV-enabling and battery storage initiatives at CECONY (not all captured in rate base but all earn returns and, in some cases, incentives), direct investments in renewables at the Clean Energy Business, renewable-enabling electric transmission projects (including offshore wind) and ongoing efforts to reduce emissions from the gas utility operations. ED is also engaging with stakeholders in an effort to allow the utility to invest in large-scale renewables in NY – those discussions are ongoing. Regarding the Clean Energy Business, ED intends to utilize tax equity (a change from prior practice), but continues to see the annual capex run-rate around $400mm. Shifting to the midstream investments, there was no change in tone from the ESG analyst day when mgmt. expressed an openness to divestitures. Specifically to MVP, we sense the company would wait for the project to go online in order to garner a better valuation. Lastly, when asked about potentially acquiring an LDC, mgmt. indicated that it may not be the most attractive opportunity given policy uncertainty going forward, particularly in the Northeast.

DTE Energy (DTE/Overweight/$130.06) (Kalton)

Full Steam Ahead. Post the separation of GSP, DTE has the ability to be one of the fastest growing utilities within our coverage universe as the company targets 5-yr electric and natural gas utility earnings CAGRs of 7-8% and 9%, respectively. When we asked about upside to the already robust $17B regulated utility '21-25 capex plan, mgmt. suggested there was no shortage of capex opportunities and pointed to the company's recent capex refreshes (generally result in 10-20% increases in cumulative 5-yr capex). Switching gears to GSP, mgmt. plans to get out in front of investors as much as possible in front of the planned spin-off in mid '21. CEO Elect David Slater remains excited about the company's organic growth prospects in both the Marcellus and Haynesville shale basins. We also asked whether Spinco would continue to be acquisitive post-spin. It sounds like this remains an open question as mgmt. continues to evaluate the post-spin strategy. In terms of market comparisons for Spinco, DTE views WMB and EQT as most closely resembling Spinco's asset mix/profile, which suggests a valuation range of 8.5-10.0X EV/EBITDA (higher than the 8X multiple assumed in our price target).

Duke Energy (DUK/Equal Weight/$97.31) (Kalton)

Pivoting to Growth. We thought Chair, President & CEO Lynn Good made a highly compelling case for DUK's long-term EPS growth prospects and why it could trend towards the high end of the targeted 4-6% CAGR (off the preliminary '21 EPS base of $5.15). In our view, DUK's messaging to investors has noticeably improved in '20. We point to a focus and execution on cost management along with better

crystallizing (for investors) the long-term generation transformation rate base growth opportunities. Front and center is the recently filed Carolinas IRP, which contemplates substantial spend aimed at decarbonizing DUK's coal heavy generation fleet (hearings are expected to begin in NC during Q2'21). The initial spend is likely to center on solar/battery storage and natural gas-fired generation. Looking beyond the 2020s, the next leg of investment will depend on a number of factors including carbon policies and technology trends. We believe it is at this point that offshore wind could come into the fold (depending upon legislative support) – or not, if it makes more sense to continue down the solar/natural gas path.

Dominion Energy Inc. (D/Equal Weight/$85.68) (Akers)

Execution, Execution, Execution. The message from CEO Bob Blue and CFO Jim Chapman was one of execution with a focus on regulated operations in premium jurisdictions. The company aims to deliver consistent EPS growth aligned with the 6.5% target and appears to be off to a solid start based on the Q3 update. Mgmt. did not express discomfort with the remaining 10-15% of non-utility exposure, noting that it is largely contracted.

Regulatory/Political Update. As it relates to VA, mgmt. acknowledged that it can (and will) get noisy on the political/regulatory front, but highlighted a history of supportive outcomes. The company expects there will be that same opportunity into the 2021 triennial review, particularly given the various items in the toolkit (write-offs, CCROs, etc). The company also expressed cautious optimism heading into the COP process at BOEM given strong local support and project-specific considerations (don't have the same fishery and shipping lane dynamics as other projects); from a timing perspective, being behind other projects may also be beneficial as D can gain insight from others' experience. Shifting to South Carolina, the immediate focus remains on the rate case. Mgmt. indicated nothing out of the ordinary thus far, but acknowledged some uncertainty with recent turnover in the commission (could make it more difficult to settle). Lastly, on the LDCs, D has not seen any anti-gas undertones in the company's service territories and remains very comfortable with those assets in the mix.

Edison International (EIX/Equal Weight/$62.90) (Kalton/Reeder)

Making The Case That Wildfire Risk Is Actually Pretty Low. Management believes the wildfire mitigation plans, Public Safety Power Shutoff policies and improved containment/suppression strategies have vastly reduced the risk of a major California wildfire caused by investor-owned utility equipment. The '19 & '20 wildfire seasons are evidence of that. And planned future mitigation efforts – installing covered conductors, vegetation management with expanded clearances where possible, increasing situational awareness, etc. – should further the cause. Couple the lower event risk with CPUC-sanctioned wildfire insurance programs that are backstopped by the provisions of AB1054, including the liability cap and $21B wildfire fund, means the risk of triggering substantial shareholder liability is pretty low. We note that PCG conveyed a similar message. While this may very well be the case, management acknowledged that it may still take a few more years of benign wildfire seasons for investors, ratings agencies and even insurers to fully recognize the progress that has been made.

Attractive Core Story That Is (Appropriately?) Overshadowed By Wildfire Risk. Excluding the wildfire risk, the underlying EIX story remains attractive with a long runway of transmission and distribution as well as renewable/storage investments needed to support the state's goal to de-carbonize the broad economy. CA regulators have generally been supportive of utility efforts over the years and the framework offers a plethora of cost recovery mechanisms that enable the state's utilities to earn at or above authorized levels. Even the timeliness of CPUC decisions may be improving under President Batjer. EIX's current plan results in a 6.5-7.5% rate base CAGR. Gating factors include the ability to simply execute on all of the work as well as maintain affordability for ratepayers by trying to keep average annual rate increases at or below inflation. Although the average electric bill in CA is roughly 30% below the national average and EIX's bills are roughly 30% lower than in-state peers, O&M efficiency efforts remain a priority.

Emera Inc. (EMA/Equal Weight/$56.24) (Kalton)

Lots Going in FL. Tampa Electric, along with NEE's & DUK's FL electric utilities, are gearing up for base rate filings in 1H'21 for new rates beginning Jan '22. While we consider the FPSC to be a highly constructive regulatory body, rate cases – particularly in the midst of a weak economy – always create a little bit of uncertainty. With that in mind, we view Peoples Gas recent base rate settlement to be a positive date point. Key elements include allowed ROE of 9.9% with an 8.9-11.0% range. This compares with Tampa Electric's current ROE range of 9.25-11.25% - there is an argument to be made that electric

utilities should be awarded a premium ROE to gas LDCs given greater technology risk. Separately, Tampa Electric's growth runway remains robust driven by renewables and reliability spend under the new Storm Protection Plan. On the solar front, Tampa Electric is well into the first 600 MW of planned solar and has an additional 600 MW plus about 30 MW of battery storage planned by '23. Even with these additions, renewables will only represent 12% of Tampa Electric's power supply (natural gas makes up the high majority of the rest). EMA continues to evaluate the optimal resource mix going forward but the full expectation is that solar will grow meaningfully from the 12% level.

News from the North. In late September, Canada Prime Minister Justin Trudeau's Throne Speech (think State of the Union) addressed power transformation and, in particular, the Atlantic Loop transmission project. The Atlantic Loop would bring excess hydro and thermal power from Quebec and New Brunswick, respectively, to Nova Scotia and Newfoundland. If completed, the project would allow Nova Scotia to accelerate the planned retirement of coal generation from 2040 to 2030 (consistent with Canada's target). As a major transmission project that spans multiple regions, Atlantic Loop faces plenty of challenges (including cost allocation). That being said, it also represents a potential meaningful investment opportunity for EMA. Stay tuned!

Entergy Corp. (ETR/Overweight) ($109.83)

Regulatory Updates. ETR's mgmt. team has been making the rounds quite a bit recently between the late September Investor Day, a number of fireside chats in October and the Q3 earnings call. So, we used our EEI meeting to catch up on a few recent developments in what has become a surprisingly straightforward and, in our view, highly compelling rate base growth story. On the regulatory front, ETR recently reached a partial settlement in E-AR's annual FRP filing – the separate request to extend the FRP has a 12/4/20 settlement deadline. In addition, E-LA recently filed a request to extend the company's FRP by three years (through '23) under largely the same terms as the existing FRP (ROE of 9.2%-10.4%). One difference to E-LA's FRP is a proposed distribution recovery mechanism for annual investment in excess of $100mm. Mgmt. stressed that they have a long track record of achieving settlement agreements and we did not get the sense that there were any meaningful roadblocks to prevent settlements in AR & LA (LA is very early in the process). Switching to the pending SERI case at the FERC. ETR does not expect likely commissioner changes at FERC under a Biden administration to have an impact on the resolution (positive or negative). Mgmt. thinks we could gain clarity on the ROE/equity ratio in 1H'21 (already taken into account in ETR's EPS guidance) but the timing of resolution on the broader policy question around uncertain tax positions remains unclear. While mgmt. remains of the opinion that they have a strong argument, should the FERC adopt the ALJ recommendation it presents a $0.15-0.20, or 2-3%, risk to annual EPS power before potential mitigation efforts.

Essential Utilities (WTRG/Overweight/$46.37) (Reeder)

DELCORA Discussion. We devoted a good deal of time to the pending DELCORA transaction as we believe the current share price does not, perhaps appropriately, reflect the considerable long-term benefits from the deal including the meaningful capex needs that fall beyond the current 5-year forecast as well as the likely substantial wastewater tuck-in deals that could transpire in the area. We had three main takeaways. (1) Investors should not rule out the prospects for a settlement in the legal challenge and perhaps optimism in this regard is in part attributable to the confidence that management has conveyed regarding being able to close the deal around the end of Q1'21. (2) Management is pretty comfortable with the PaPUC approval process based on the concerns expressed by the intervening parties as well as previous experience with FMV deal approval in the state. (3) Assuming 1H'21 closure, DELCORA will start earning its full keep in '22 as it will be incorporated in the next PA water/wastewater rate case filing.

Other Notables. Next PA Water Rate Case. Aqua Pennsylvania is likely to file for new rates during 2H'21 with the new rates effective perhaps late 1H'22. Management continues to think PA water rate cases will occur at a 3-year cadence going forward. M&A Strategy. WTRG continues to be focused on bringing other water/wastewater tuck-in deals to bear, including in states beyond PA and IL. OH perhaps offers the most near-term opportunity out of the "new" states. The deal pipeline is robust and water/wastewater tuck-ins are definitely the focus as the company looks to continue to capitalize on the somewhat accelerated pace of municipal deal activity/interest in the sector. Management also reiterated a low (to no?) likelihood of doing another gas deal in the near-term. Guidance Refresh. Finally, the guidance refresh could come as early as January (before the YE2020 call in late February) and is expected to include not only '21 EPS but also refreshes to the 3-year EPS CAGR and capex outlooks.

Evergy, Inc. (EVRG/Overweight/$57.30) (Akers)

Fake News. EVRG issued a statement mid-EEI confirming that there has been no change in strategic direction since the decision to pursue the Sustainability Transformation Plan (STP) and that there is no outstanding offer or bid for the company. That followed a Reuters report that NEE made an offer in the mid-$60s and a statement from Elliott that EVRG should reengage with NEE. For its part, NEE suggested investors not believe everything that shows up in print. All things considered, there's no reason to think there is merit to the Reuters report at this point.

Path Ahead. Mgmt. is focused on executing the STP with a focus on a modern T&D system and kick-starting the ESG aspect of the story, which includes the de-carbonization of the generation fleet. The plan will require supportive regulation, which is a key consideration in the CEO selection process (someone that understands the importance of having strong regulatory relationships) – CEO decision still expected by YE. The cost cutting initiative is also a key component of the story including its role in mitigating customer rate increases. Shifting to capex, we were encouraged to hear that the ~$700mm of renewable (solar) capex in the plan is not dependent on having securitization in place. We look to the 2021 IRP filings for additional insight into the generation outlook.

Eversource Energy (ES/Overweight/$94.42) (Kalton)

CapEx Drivers. We expect ES's upcoming capex refresh in conjunction with Q4 earnings will be more of the same – higher and supportive of a 5-7% EPS CAGR from the base business (ex-offshore wind). ES has already noted a few things that could impact the plan such as (1) the inclusion of Eversource Gas Company of MA (Columbia Gas), which we think could be additive to ES's rate base CAGR, (2) electric transmission including new reliability projects in southeastern MA totaling $175mm and (3) new MA solar legislation that, if passed (likely), would allow NSTAR Electric to develop an additional 230 MW of solar (~$400mm opportunity). It remains unclear whether ES will have clarity on the CT AMI program in time to include it in the refresh. In addition, mgmt. remains optimistic that the MA Grid Mod Plan (2022-2024) will be supportive of AMI. We think the potential CT & MA AMI programs represent a ~1B investment opportunity over a 5-7 year period.

Other Tidbits. (1) Offshore Wind – despite (not unexpected) permitting delays, ES remains bullish on the company's offshore wind program noting that any negative impact of the delays on returns should be mitigated or offset by the positive impact of being able to use larger turbines along with favorable vessel developments afforded by the extra time. In addition, mgmt. thinks President-elect Biden's administration could help speed the process up at BOEM. ES/Ørsted are one of the three bidders participating in NY's offshore wind solicitation for up to 2,500 MW of capacity (a decision is expected by YE'20). While the companies' award in the 1st auction (the 880 MW Sunrise project) bodes well for pending auction, mgmt. emphasized bidding discipline considering there are plenty of other RFPs upcoming in the region (RI, MA, NY). (2) Connecticut – following the public/political outcry to ES's performance in the immediate aftermath of Isaias, it appears that cooler heads are prevailing. PURA's PBR docket will sequence in mid '21 and ES welcomes the opportunity to work under a PBR scheme. ES is also working to insure better storm response with a focus on outage duration and customer communication.

Exelon Corp. (EXC/Overweight/$43.84) (Kalton)

All About the Breakup. EXC's recent proclamation that the company is in fact in the early stages of evaluating separating ExGen from the regulated utility operations took center stage at the company's EEI meetings. We entered the conversation somewhat skeptical that EXC would go down the break-up path nearer-term given our base assumption that IL will pass constructive nuclear-related legislation in the Spring '21 session and that, by doing so, it might prove diplomatically difficult for EXC to immediately turn around and effectuate a spin (or sale). We exited the conversation less skeptical as mgmt. downplayed – to some degree – potential policymaker resistance. In our view, there is a clear industrial logic to separating the businesses (investors prefer pure play regulated utilities, the separated companies will likely have better strategic flexibility, etc.). In addition, once the genie is out of the bottle it is hard to put back. Even though mgmt. was careful to caveat the evaluation process – noting the unique complexities of separating the companies – once the notion is put out into the world the share price embeds an expectation.

IL Clean Energy Update. EXC indicated that there was strong momentum for clean energy legislation heading into the Spring '21 session and noted that, thus far, Gov. Pritzker's carbon price proposal has not seemed to gain much traction. Instead, it sounds like either the Fixed Resource Requirement (FRR) option could still be in play and/or likely changes to the MOPR under a soon-to-be Democrat regime at FERC could provide the Illinois legislature with additional tools to support nuclear. While IL clean energy

legislation conjures up images of Lucy pulling the football away from Charlie Brown, we remain of the strong opinion that the legislature will take the necessary action to keep the state's nuclear fleet operational.

FirstEnergy Corp. (FE/Overweight/$29.79) (Kalton)

A Tough Road Ahead. This was not an easy EEI for FE's mgmt. team coming on the heels of former CEO Chuck Jones' recent termination for code of ethics violations as part of an ongoing internal investigation into FE's potential involvement in the House Bill (HB) 6 bribery scandal. In addition, it sounds like it could be some time before we get clarity on both the pending FBI investigation and FE's internal investigation (mgmt. hoped to have further updates on the internal investigation by the Q4'20 earnings release in early '21). Under this backdrop, we thought Acting CEO Steve Strah did a commendable job in our meeting and came across as very direct and authentic in discussing the serious issues confronting FE. That being said, regaining the trust of FE's constituents (regulators, customers, investors) will not be an easy task and it remains an open question as to whether or not Mr. Strah will be able to pull it off given his lengthy tenure within the company. We also remain mindful that the investigations are ongoing and it is far from clear to what extent FE was involved in the HB 6 scheme – although, Mr. Jones' termination along with several other recent executive terminations and departures from the firm point to some level of wrongdoing.

OH ROEs. FE provided a bit more color on the age-old question of the OH utilities' earned ROE. Per the SEET test (in legislation), FE is allowed to use book equity in the ROE calculation (FE's book equity is higher than equity rate base due to the inclusion of $2.2B of goodwill related to an acquisition in the 1990s). This, along with some other adjustments, helps explain why FE's SEET ROE always results in a lower ROE than what the rate base math suggests. FE plans to provide even more detail in conjunction with the Q4 earnings release. Keep in mind, the OH utilities' current ESP runs through 5/31/24.

Hawaiian Electric Industries (HE/Underweight/$37.05) (Reeder)

Solid Footing Despite COVID. Despite the challenges presented by COVID, particularly in HI where tourism is essentially the lifeblood of the economy, HE is in pretty solid shape and remains focused on helping the state reach the long-term renewables and decarbonization goals. The utility benefits from decoupled rates and COVID expense deferral accounting. The bank's conservative philosophy and strong starting position has allowed it to "bend but not break" under the challenges of COVID. As such, there remains no need for incremental equity at the holding company nor a need for the holding company to invest any capital into the bank, 2021 refinancing needs have been prefunded and HE is committed to maintaining an investment grade structure. As for the dividend, management does not foresee any risk to the current level and reiterated an intent to grow it in-line with earnings over the long-term while maintaining a payout ratio that is commensurate with peers (60-70%).

Here Comes The Sun? The bank's low cost of funds and ability to offset some of the loan loss provision spike with strong mortgage re-financing activities and opportunistic securities sales have kept the bank safely profitable. And management's recent comments regarding the performance of the loan portfolio and the potential for underlying economic conditions to improve as the state recently started re-opening its doors to tourists give reason to believe the worse of the bank could be behind it. While businesses in HI are struggling, customers and the communities served have been resilient, the bank is staying very close to their customers and the high asset quality in the state provide a safeguard. Management reiterated a belief that the bank is well provisioned after Q3 and that the provision is determined based on forward looking information. As such, if tourism gradually returns, another widespread outbreak of COVID is avoided in the coming months (no new shutdowns) and an effective vaccine becomes widely available in '21, it is possible that a good portion of the provision recorded in 2020 could reverse as the economy improves. 76% of deferred loans have already returned to payment and, typically, if there are 6 months of good performance, the loans are eligible to be upgraded and the associated provision reversed.

PBR Me ASAP? The utility continues to believe the transition to a 5-year Performance Based Ratemaking (PBR) framework at some point in '21 will be a net positive in terms of ability to earn close to the allowed ROE. Once implemented, there may be only 30-40 bps of structural regulatory lag remaining. That said, while there seems to be many areas of consensus that have developed amongst parties throughout the PBR proceeding, the devil will be in the details ultimately approved by the commission particularly as they relate to things like how the annual revenue adjustment mechanism works, what the consumer dividend might be and the type and magnitude (collectively up to 100-200 bps of ROE?) of the new performance incentive mechanisms (PIMs). Execution will be critical which also requires cost efficiency improvements, including delivering on the committed $25M of savings by 2022.

IDACORP, Inc. (IDA/Equal Weight/$94.80) (Akers)

Same (Good) Story Near-Term. Mgmt. continues to see strong growth in the Idaho Power Company (IPC) service territory driven by in-migration from surrounding states along with new large load customers. Combined with a strong cost containment efforts, low borrowing costs and creative regulatory solutions, this has allowed IPC to stay out of rate cases while managing to earn reasonable ROEs and deliver on financial targets.

Rate Base Growth Opportunities Brewing Long-Term. Over time, customer growth and coal retirements will drive incremental resource needs. There's also the opportunity for IDA to take over BPA's stake in the Boardman-to-Hemingway (B2H) project and, possibly, to offer a green tariffs that could lead to renewable ownership opportunities over time. Lastly, IDA has been clear that once the new Hells Canyon license is issued (2022 or later), that will result in higher capital and operating expenses. While some of these items could be handled via regulatory solutions (rider-type treatment), the bigger items may require a full vetting in a rate case.

MDU Resources Group, Inc. (MDU/Equal Weight/$24.99) (Akers)

Strategic Update. When asked about the current trend toward pure play models in the utility sector, mgmt. highlighted (1) MDU's general focus on infrastructure, which spans electric/gas utilities, pipelines and construction and (2) a successful track record since divesting the E&P asset. On the M&A front, construction activity has slowed but the company remains active in the pursuit of acquisitions. Mgmt. is also open to adding scale at the regulated utilities including LDCs so long as it makes economic sense (accretive, credit supportive, cost and/or capex levers, etc.). Of note, S&P already raised the FFO/Debt threshold to 22% from 15% due to the non-regulated EBITDA contribution so while utility acquisitions would help the business risk profile, MDU is comfortable with the revised thresholds and, in fact, has a healthy cushion on FFO/Debt.

Construction. Mgmt. disclosed a ~50/50 breakdown between aggregates and vertically integrated activities (hulling, converting to ready-mix, delivering, laying, etc.) within the Materials segment; this is more in-line with peers Summit and Granite vs. pure plays Vulcan and Martin Marietta. Regarding the decline in backlog reported in Q3'20, the company did not appear overly concerned and pointed to the Q1'21 bidding season as the next key data point. Positive drivers include the extension of the FAST Act budget and favorable housing trends. Shifting to Services, mgmt. has been encouraged by the strong performance through the pandemic. While new hospitality projects in Vegas could slowdown, there is line of sight into 2021 from existing projects and, more broadly, MDU is seeing strong growth in the high tech sector, chip manufacturing and data centers along with healthy electric T&D spending trends.

Pipeline. Mgmt. highlighted the largely take-or-pay nature of the pipeline operations and noted that gas volumes are bouncing back in the Bakken (~85% pre-pandemic levels). The company expressed confidence that the revised agreements with shippers on the North Bakken Expansion project are firm and that the project remains on track to secure FERC approval and meet the late '21 in-service target. When asked about threats from de-carbonization, mgmt. expressed skepticism that natural gas can be reasonably replaced on a btu equivalent basis and highlighted gas as a key backstop for renewables.

NextEra Energy (NEE/Overweight/$77.54) (Kalton)

Chasing Our Tails. During EEI, Reuters reported that NEE had made an offer to acquire EVRG for $66/sh. As the story evolved, it became clear that the bid was likely made many months ago while EVRG was in the midst of a strategic evaluation (ultimately, mgmt. and the Board decided not to pursue a sale of the company). For its part, NEE's mgmt. simply indicated that investors should not believe everything they read and intimated that there could be ulterior motives behind the reports. Does NEE remain interested in regulated M&A? Yes, but per our EEI conversation it remains very much a "want" vs. a "need" and the company will only move forward if a transaction checks all the boxes (including EPS accretion factoring in the balance sheet). Looking ahead to '21, the Santee Cooper privatization opportunity in SC remains a possibility as the legislature is expected to take up the issue again in the general session (typically runs through May). Recall, NEE's bid was deemed to be the best option should the legislature decide to sell Santee Cooper. While we tend to think a Santee Cooper privatization is unlikely, it is worth paying attention to heading into '21. We continue to think an acquisition could be immediately 3%+ accretive to EPS and up to 5% within a few years.

NEER is in the Cat Bird Seat. We spent much of our time discussing NEER's competitive advantages along with the overall size of the renewables pie. We always want to remain mindful of the risk of intensifying competition in the renewables arena as energy players increasingly look towards wind & solar

as growth avenues. That being said, we find ourselves agreeing with NEER President John Ketchum in that the company has built such a competitive moat that it will be difficult for newcomers to enter the space and effectively compete. Developing renewables is not as easy as simply buying some equipment and setting up a wind or solar farm. There are all kinds of considerations related to optimal sites, access to transmission, technical expertise, etc. that NEER has spent decades perfecting. Not to mention NEE enjoys enormous scale benefits related to vendor relationships, cost of capital, etc. As for the size of the market – mgmt. continues to believe EIA's projection for 30% wind/solar market share by 2030 as a percent of U.S. power supply (vs. ~10% currently) will prove to be conservative. And green hydrogen has the potential to materially accelerate renewables development looking out beyond '30 – it is clear that NEE sees a lot of potential for hydrogen and we expect (small) announcements on this front will pick up steam in the coming months and years.

NiSource Inc. (NI/Overweight/$24.64) (Akers)

Sensitive to Financing Concerns. No change to the financing plans laid out at the analyst day, but mgmt. was very responsive to concerns on dilution and the equity overhang. We look to the 2021 financing including $600-1,000mm of equity-rich securities (sounds like leaning toward convertibles) as the first major data point informing 2022-2023 block equity needs (currently $500-700mm). Mgmt. also reiterated an openness to portfolio optimization (asset sales) if it is in the best interest of shareholders. We expect the company will take some time to evaluate options and we look to CNP's upcoming LDC sales as a directional data point on gas utility valuations, which could be instructive for NI (and the rest of the combos/LDCs). Separately, we note that NI's financing plans do not include the ongoing $200-300mm of ATM equity needs after 2023 as investments – including the renewable program – are recognized in rates and generate cash.

Perspective on Gas. Mgmt. opined that the valuation de-rating of the LDCs is overdone given both strong demand for the product and readily available low cost supply. The company also sees strong policy support in its remaining service territories and highlighted the high energy content requirements of winter peak energy needs. NI believes it is not a question of whether the distribution pipe system will be used and useful in the future, but rather what will be flowing through the pipes (RNG, hydrogen, etc.).

NorthWestern Corp. (NWE/Overweight/$59.30) (Reeder)

'21 Guidance. Management offered preliminary '21 EPS guidance of $3.40-3.60 but will likely tighten the range to the typical $0.15 variance with the YE'20 report in February. We got the sense the extra $0.05 in the preliminary range was subtracted from what would have otherwise been the bottom end if not for COVID-related uncertainties. The midpoint of the '21 range is 4% above the midpoint of the revised '20 range ($3.30-3.45) but is overall consistent with the original '20 range ($3.45-3.60). It reflects a 0.7-1.0M increase in the diluted average shares out from '20, continued improvement in operating expense levels and decoupling is expected to be implemented at the MT electric utility in mid-'21. Lastly, NWE indicated an expectation that the dividend will be at the upper end of the 60-70% targeted payout ratio – if at 70% while continuing the recent $0.10 annual dividend increase trend, it implies '21 EPS of $3.57.

Capex Budget Increased. NWE rolled out a $2.1B investment plan over the 2021-25 period. The budget represents a $300M increase over the previous 5-year plan and is distributed fairly evenly across the states and utilities (electric vs. gas) relative to each's size. Management characterized the projects as mostly small and relatively low execution risk. The budget is driven by gas and electric transmission and distribution work to accommodate growth across the systems, deal with the shutdown of fossil resources and comply with regulations as well as things like hydro generation facility upgrades and technology (including automated metering infrastructure). The $400M+/year capital plan puts NWE at the midpoint of the 3-6% EPS CAGR target and management noted the growth could be somewhat lumpy based on rate case timing. In addition, it sounds like external equity will be needed fairly regularly to fund the budget and maintain an FFO/Debt ratio in the 14-15% range.

MT Generation Still Upside – And Growing? NWE has bid several projects into the pending 285 MW RFP and reiterated that the $200M capex bogey that they have talked about is based on a level of comfort of what they might win – winning all would be more than $200M. The 3rd party administrator has yet to notify NWE that any of their projects have been eliminated from consideration and management remains confident that their projects are well positioned given the RFP specifications around long duration, flexible capacity. If a NWE project wins, the MT pre-approval process allows AFUDC to be earned as the capital is deployed but then that turns into a cash return with a project-specific ROE once it enters service. The recent termination of the Puget deal (for an increased stake in Colstrip) restores the full 725 MW capacity hole that NWE intends to ultimately fill through multiple RFPs. And the risk of the Colstrip facility shutting down this decade (vs. NWE's 2043 planning assumption) seems elevated, perhaps even more so by

Talen's announcement this week to shut down coal capacity in favor of a more ESG-friendly strategy, which has the potential to add another 222 MW deficit to NWE's MT portfolio.

MT Regulatory Environment. Republicans swept all state offices and the three Montana Public Service Commission (MPSC) elections. While party affiliation has never been a guarantee of constructiveness in MT, we are hopeful that the new MPSC will continue what seemed to be a gradual improvement in the challenging regulatory environment over the last 2 years prior to more recent adverse decisions around COVID expense recovery as well as Colstrip replacement power costs. We also believe it bodes well for the recognition that natural gas needs to play a role in the new generation capacity picture versus some of the Democratic candidates that were more fervent renewables supporters. We were somewhat concerned by the MPSC comments earlier this year around NWE's supply plan perhaps being overly reliant on gas – particularly since we believe NWE's self-build advantages are likely for gas-fired generation.

OGE Energy Corp. (OGE/Overweight/$33.95) (Akers)

Feeling Good. CEO Sean Trauschke struck an optimistic tone on the utility operations, particularly on sales trends. Commercial load flipped to positive in September (vs. year ago period) and mgmt. expects some of the uptick in residential will be sustainable based on work-from-home trends. The company is also bullish on industrial activity and expects Public Authority sales (mostly schools) will pick-up as students return to the classroom. Mgmt. is hopeful that the pre-COVID momentum toward customer growth >1% will return. On the regulatory front, OG&E is focused on executing manageable, straightforward proceedings with a continued focus on customer bills. Lastly, the company plans to file an IRP by October 2021, which could shed light on resource needs. We do not expect any major project revelations, but rather a series of smaller investments (plant conversions to gas and solar additions at the distribution level) along with EE and DR. Overall, things seem to be moving in a positive direction.

Strategic Comments. Mgmt. continues to play its hand close to the vest as it relates to ENBL. The team fully acknowledges the public market dynamics (negative sentiment toward midstream, preference for pure plays) and believes the midstream exposure has overshadowed the utility story. When it comes to potentially selling/swapping into a bigger MLP, OGE considers the aforementioned market/valuation dynamics along with cash flow and credit implications. Separately, when asked about the company's interest in acquiring an LDC (in the context of CNP potentially selling an LDC or two), mgmt. confirmed that gas utilities are not on the company's list.

PG&E Corporation (PCG/Equal Weight/$10.71) (Kalton)

Wildfires Still Top of Mind. First, the lack of a new Safety Certificate from the CPUC remains a little bit disconcerting. That being said, PCG stressed that the prior safety certificate remains in effect until a new one is issued and it is not necessarily uncommon that the issuance has slipped beyond 90 days. In addition, thus far there have been no communications from the CPUC to suggest any major issues with PCG's request. Without a valid Safety Certificate PCG is not afforded the protections of the liability cap under AB1054 (limits wildfire liability to 20% of electric T&D equity rate base, or ~$3B currently). Safety Certificate aside, PCG highlighted substantial progress on wildfire risk mitigation efforts and improvements in the PSPS program vs. '19. Combined with improved containment/suppression strategies, the risk of catastrophic wildfires caused by utility-owned equipment appears to be declining. That being said, we think it may take a few years of benign activity to substantially improve investor confidence. Not surprisingly, mgmt. indicated that the legislature still has little appetite to address the inverse condemnation (IC) doctrine. While AB1054 provides substantial protections, the state's electric utilities still face significant risk relative to utilities in other states as a result of IC. On the capex front, there is no shortage of investment needs as PCG deploys capital to improve grid resiliency, mitigate wildfire risk and support CA's ambitious GHG emission goals. Last, it sounds the like the search for a new CEO is winding down with an announcement expected by YE'20.

Pinnacle West Capital Corp. (PNW/Overweight/$89.59) (Akers)

ACC Profile. The 2020 ACC election resulted in Republican Lea Márquez Peterson retaining her seat with the other two open seats to be filled by Republican Jim O'Connor and Democrat Anna Tovar. It appears that three of the five Commissioners are supportive of a de-carbonization agenda (Peterson, Tovar and sitting Commissioner Kennedy), which aligns with PNW's de-carbonization plan. Favorably, this agenda would appear to conflict with sitting Commissioner (and possible future Chairman) Olson's desire to pursue deregulation. While we reserve judgement until policy discussions are underway and, more so, rate case decisions are issued, our initial view is favorable given both a pro-clean energy and Republican majority. Beyond the ACC make-up, we are encouraged by PNW's focus on improving the company's

position in the state via consensus-building and improved customer service/experience. We think improved regulatory relationships and outcomes would address a key investor concern and allow greater focus on the clean energy growth story, strong balance sheet, effective cost management and strong customer growth.

Rate Case Update. APS filed rebuttal testimony on 11/6 with three key updates: (1) a $15mm reduction to the $184mm rate request reflecting a reduction in the ROE request (to 10.0% from 10.15%), a lower fair value increment (to 0.8% from 1%) and updates to the fuel rates; (2) a proposed Advanced Energy Mechanism (AEM), which would provide rider recovery for clean energy investments and incorporate the DSM and LFCR updates (simplification); and (3) a Coal Community Transition proposal, which is a comprehensive plan to address the Four Corners coal retirement along with various economic development initiatives for the Navajo Nation. It is our understanding that the Navajo Nation is supportive of the coal transition plan along with the AEM. While it is yet to be seen whether other stakeholders support the AEM (key to mitigating regulatory lag and extending the time between rate case filings), we view the updated testimony as an incrementally positive step.

PNM Resources (PNM/Equal Weight/$49.09) (Reeder)

AGR Deal Update. It was not for a lack of effort but we were unable to squeeze out much additional insight regarding how the Avangrid deal (announced 10/21) came about. Management reiterated that a very strategic type of approach was taken to find the right strategic partner for PNM and the communities served. Therefore it was not solely about the price offered. More details will be included in the proxy which is expected to be filed around Christmas. Management believes the prospects of receiving what PNM would deem to be a superior proposal are quite low (again, not just about price) and pretty much shut the door to the prospects of a financial suitor emerging (as was the case in the recent acquisition of PNM's neighbor El Paso Electric) given the need for an acquirer to be strategically aligned. The response to the deal announcement has been positive in NM (governor, legislature, environmental community, etc.) based on AGR's commitment to renewables and the environment and management noted that NM regulators have never turned down a merger application. Both NM and TX are net benefit states and generally those conditions are satisfied by way of rate credits which AGR/PNM stand prepared to offer. Merger approval applications will likely be filed by the end of the month.

Other Business Updates. Constitutional Amendment Passage. The NM regulatory body will be transition to a 3-person appointed commission in 2023 as the amendment passed. Management believes it will not only improve the predictability/stability of the regulatory decisions in the state but also the quality. Therefore, NM has the potential to improve from the commonly held investor notion that the regulatory environment is below average. Four Corners Deal. Management believes NM regulators will be hard pressed to turn down the recently announced deal for PNM to exit Four Corners early given the customer savings associated with it. EPS Power. No real changes in the EPS power of the company looking forward. 2021 EPS power is $2.30-2.40 however PNM will be rolling out guidance in December taking into consideration the latest thoughts around COVID, cost savings and the lack of rate relief or decoupling (both of which were anticipated at one point in '20 to be of help to '21 EPS). Beyond '21, PNM will be deferring to AGR to communicate the growth.

Portland General Electric Company (POR/Equal Weight/$44.57) (Akers)

Mgmt. Bullish on Growth. CFO Jim Lobdell highlighted that growth in POR's service territory has proven resilient with healthy in-migration trends, which may be further helped by COVID as people have more flexibility to work from desirable locations, and continued growth in high tech. This led the company to bring back capex on the Q3 update that was previously removed from the plan. The company still expects 1% sales growth long-term, which could be bolstered by electrification efforts (transportation, but also considering new premise incentives for electric heating, etc.). Separately, Mr. Lobdell spoke of a continued focus on cost controls including greater use of technology and coal unit retirements among a slew of other efforts.

In addition to service territory growth and expense controls, the company's 4-6% EPS growth target is driven by investment in aging infrastructure along with the Wheatridge Renewable Energy Facility. Looking ahead, there could be additional opportunities for generation ownership (upside to the plan) related to one or two RFPs planned for 1H'21 to procure 150 average MW (~450 MW nameplate) of renewables and 700 MW of capacity. Lastly, discussions are ongoing in phase 2 of the Green Future program, which could potentially include utility ownership (TBD).

Regulatory & Other Updates. There was no new information on wildfires (still no evidence that POR's equipment ignited any fires) and the trading loss (investigation ongoing). On the regulatory front, mgmt.

continues to evaluate the timing of the next rate case and highlighted positive data points on the COVID deferral and wildfire deferral, which was approved in ~30 days. While the company still sees 85-90 bps of structural lag related to unrecoverable expenses, there are other areas which could be addressed, such as the PCAM (tightening the deadbands?), storm balancing accounts and the decoupling mechanism, which is set to expire after 2022.

PPL Corporation (PPL/Equal Weight/$29.41) (Kalton)

U.K. Sale & Go-Forward Strategy. The sale of the U.K. utilities continues to progress and mgmt. remains encouraged by the level of interest. An upcoming data point regarding U.K. decarbonization goals will provide parties with guidance into the expected level of long-term investment in the electric distribution systems (arguably a more important driver of value than near-term allowed returns). Timing remains 1H'21 for both the transaction announcement and potential completion given typically quick regulatory approval processes in the U.K. (1-3 months). Post sale, mgmt. is keeping their options open with regard to use of proceeds with share repurchases, regulated M&A (preference towards electric) and additional contracted renewables investment (via Safari Energy) all possibilities.

Kentucky Update. PPL recently filed a notice of intention to file for base rate relief for the KY utilities starting 7/1/21. The filing will include a proposed sur-credit that will be used to mitigate the rate impact on customers via the use of regulatory liabilities. Separately, we spent a good deal of time discussing upside capex opportunities including AMI (a ~$300mm program that PPL intends to revisit with the Kentucky PSC) and generation transformation. The KY utilities own 3,800 MW of coal-fired generation that was developed between 1971-1984 and could be ripe for retirement over the next 10-20 years. PPL characterized the PSC as being most concerned about cost and reliability and is not wedded to fuel type when considering asset replacement proposals. Mgmt. further noted that the economic proposition for solar/battery storage is not quite there (yet).

Public Service Enterprise Group Inc. (PEG/Overweight/$60.88) (Kalton)

Lots to Talk About. (1) Non-nuclear generation sale – mgmt. characterized initial interest in the proposed sale of the fossil fuel generation fleet and solar portfolio as healthy (private equity interest). The solar portfolio is expected to be put up for sale this month with the fossil fuel plants to follow in December. Bids are due in Q1'21 with a sale expected to be announced in mid '21. (2) CEF Filings – mgmt. is optimistic that the New Jersey BPU will bless the $600mm AMI proposal. Conversely, it is unclear to what extent the BPU wants regulated utility involvement in the proposed EV ($300mm) and battery storage ($100mm) programs. Decisions are expected in Q1'21. (3) Stimulus Investment – PSE&G is engaged in early discussions with the BPU Staff around a potential acceleration of Gas System Modernization Program spend and/or electric reliability spend. Should the talks advance, we could see a formal filing within the next 3-6 months. (4) Transmission ROE Discussions – it sounds like the parties (PSE&G, the BPU Staff and the Consumer Advocate) despite being close are currently at a stalemate. From here, either the stalemate breaks or the Staff/Consumer Advocate could launch a formal challenge at FERC (likely a multi-year process). (5) Offshore Wind – PEG expects to make a decision as to whether or not to take up to a 25% interest in Ørsted's 1,100 MW Ocean Wind project by the end of November. We continue to think it is likely that PEG participates. (6) Nuclear – not much new here. PEG has made it clear that the $10/MWh ZEC payment will not be sufficient to keep the company's nuclear units operational longer-term. We expect more clarity on this issue by mid/late '21.

Sempra Energy (SRE/Equal Weight/$133.64) (Akers)

Strategic Capital & LNG. Based on the Q3 call and mgmt. comments at EEI, it appears likely to us that SRE is looking to sell an interest in the LNG portfolio. This would serve two complementary purposes: one, to get an attractive valuation marker for the LNG business; and two, to keep the business mix more heavily weighted toward the regulated utility operations (improves perceived risk profile, which is important to both investors and rating agencies). We do not think a spin of the LNG operations is timely as it provides a competitive advantage to operate under the SRE umbrella. Shifting to Mexico, mgmt. remains bullish long-term while acknowledging challenges presented by the current administration. The company views ECA as a critical asset in Mexico and expressed confidence that the export permit will be received this month with FID by year-end. More broadly, the tone on LNG was constructive as mgmt. indicated that conversations with potential off-takers have picked up and pricing has improved.

Gas in CA. The company expects the friction between SoCalGas and certain environmental interests could continue near-term, but (1) noted that regulatory outcomes have been very supportive of continued investment in the gas infrastructure and (2) expressed confidence that there's a significant long-term role

for the gas LDC infrastructure in a clean energy future (RNG, hydrogen, carbon capture). SoCalGas is making a significant push in RNG and noted that while it appears expensive, costs should be driven down with scale and additional investment (similar to solar and wind in their infancy). We did not get the sense, however, that SRE would look to acquire additional gas utility assets as the company prefers to position the portfolio more directly in alignment with the electrification trend.

Southern Company (SO/Equal Weight/$63.92) (Kalton/Reeder)

The Here and Now. With the finish line nearing on Vogtle Unit 3, it is clear that SO is not taking success for granted. The three risk areas to get to the next major milestone of hot functional testing, in order of increasing importance, are (1) sub-contractor work, (2) bulk electrical work and (3) paperwork – making sure the "as built" condition of the modules conform to the engineering plans so that the requisite ITAACs can be verified by the NRC. If for some reason the inspections, tests, analyses and acceptance criteria (ITAAC) process would uncover the need to submit a license amendment request (LAR), it could potentially take a few weeks to resolve – we believe it is important to note that the NRC is highly supportive of the project as it enters the final stages and has vowed to work expeditiously on their end. That said, management does not believe a LAR is any more likely than some sort of metallurgical condition popping up as the hot functional test ramps up the temperature of the plant components. Overall, management is confident heading into hot functional testing and the overall ability to bring Unit 3 in-service before the end of November '21. And Unit 4 should go better than Unit 3.

Beyond New Nuclear. Assuming the remainder of the new nuclear project goes relatively smoothly, SO is primed to deliver 6%+ EPS growth and this higher growth rate could be fleshed out as part of the YE2020 update. Excluding the "debt only" return penalties imposed by Georgia regulators when the higher price tag and longer schedule had to be recertified, SO has been growing at like 6%. But once both units go online it is projected to add about $200M of net income and generate an additional roughly $800M of cash flow. This should put SO in a position of strength which could include accelerating the dividend growth, upping the capex forecast (assuming rate affordability can be balanced) and/or further improving the credit metrics/rating. In other words, SO could support $8-9B/year of capex without the need to issue equity. A big driver of rate base growth could be early retirement of most of SO's large coal-fired plants and replacing them with renewables and gas as the O&M savings could serve to keep customer bills flat. Embarking on this sort of plan would require the buy-in of AL, GA & MS, including state regulators, and could be propelled forward under a Biden administration with a Republican senate where carbon reduction goals are accelerated.

Growth Outside The Core Regulated Franchises. Three things came up. (1) Renewable deals that meet Southern Power's return hurdles are tough to come by right now. (2) Management did not entirely rule out buying another gas LDC at the right price. (3) SO has clearly been exploring the idea of a synthetic approach to municipal/gov't owned system M&A. SO would lend expertise by operating the system and perhaps even allow access to SO's pool of assets as scale matters in the transition from fossil to zero carbon. This type of approach could overcome the challenge inherent in buying municipal assets including the fact that they are 100% financed with cheap debt and the loss of local ownership.

WEC Energy Group, Inc. (WEC/Equal Weight/$104.43) (Kalton)

Diving Into the '21-25 Capital Plan. Mgmt. provided additional details on the company's '21-25 capital investment plan (called the ESG Progress Plan) – $16.1B plan represents a $1.1B increase from '20-24. The refresh leans more heavily on renewables (25% of the spend) including new regulated solar (800 MW), wind (100 MW) and battery storage (600 MW). The amount of battery storage was a little bit of a surprise to us but mgmt. indicated that the storage integrates nicely into the system. Separately, the contracted renewables bucket (Energy infrastructure) consists of $2.2B of planned investment during the period and incorporates the already announced $400mm Thunderhead project. If WEC executes on the full $2.2B we think Energy Infra's EPS contribution would be ~8% of consolidated EPS in '25, which would still give the company some wiggle room under the 10% threshold (WEC wants to limit non-utility EPS to 10% of total EPS max).

Other Tidbits. (1) Mgmt. indicated that the capital investment plan supports a 5-yr EPS CAGR of just above 6%. Other assumptions underlying this statement include earned ROEs at the allowed levels (little change to allowed ROEs during the period) and equity ratios at the mid-point of the equity ratio ranges of 50-55% for the WI utilities. Optimizing the equity ratio represents a not insignificant EPS opportunity in and of itself. For context, we estimate annual EPS could be $0.10-0.15 higher by '25 if the WI utilities earned the allowed ROEs at a 55% equity layer, which could add 50bps to the 5-yr EPS CAGR. Keep in mind, there is also an opportunity to retain a portion of earnings above the ROE thresholds. Optimizing the WI utilities earnings will depend on a number of factors including future rate case outcomes, sales trends and effective cost management. That being said, the equity ratios provide yet another lever to

help achieve an EPS CAGR toward the upper end of the company's 5-7% goal and/or help offset unforeseen pressures. (2) WEC remains very comfortable with owning gas LDCs and we got the sense they would consider a gas LDC purchase as long as it fit mgmt's famous three criteria: (1) EPS accretive in first full year, (2) credit neutral, and (3) long-term earnings growth prospects consistent with WEC's organic growth. Executive Chairman Gale Klappa suggested that the growth criteria could prove to be an impediment.

Xcel Energy, Inc. (XEL/Equal Weight/$74.69) (Kalton)

CapEx Discussion. Our EEI discussion centered on XEL's recent 5-yr capex refresh for '21-25. As a reminder, the base plan of $22.6B (vs. the '20-24 guidance of $22.0B) results in a rate base CAGR of 6.3% (off the 20E base). In addition, XEL provided a separate analysis including the $1.4B upside related to NSPM's Minnesota Relief & Recovery Proposal consisting of wind repowering ($750mm) and new solar ($650mm). The "incremental" plan would result in a 6.9% rate base CAGR. Mgmt. remains optimistic that the MPUC will approve the spend and noted that the opposition's arguments are consistent with prior arguments in similar proposals (questioning the long-term customer benefits based on NSPM's power price assumptions). Our capex outlook includes the $1.4B of incremental spend. Separately, mgmt. poured cold water on our question as to whether XEL held back other capex from the base plan while NSPM's request is pending – they characterized the base capex plan as fully representing the assessed needs while also pointing out that additional capital tends to come into the plan over time (both traditional capex along with potential PPA buyouts). On the PPA front, mgmt. indicated that while discussions with parties are always ongoing, things tend to heat up around the operating utilities' IRPs.

Hydrogen. We have long viewed XEL as being ahead of the game in terms of long-term system planning and understanding new technology (not to be confused with early adoption as mgmt. carefully considers technology risk and customer rate implications). On that note, mgmt. is evaluating hydrogen as a future fuel source to help bridge the last mile to zero carbon. Our take is that XEL is skeptical that green hydrogen production will be economically attractive and, instead, pointed out that using excess nuclear output from the company's existing nuclear facilities to produce hydrogen could be 1/3 more cost effective. Fun fact: nuclear produced hydrogen is referred to as Purple Hydrogen.

Acronyms

ALJ – Administrative Law Judge
AMI – Advanced Metering Infrastructure
ATM – At the Market
BOEM – Bureau of Ocean Energy Management
BPU – Board of Public Utilities
CCRO – Customer Credit Reinvestment Offset
CEF – Clean Energy Future
CEHE – CenterPoint Energy Houston Electric
COP – Construction and Operations Plan
DR – Demand Response
DSM – Demand-Side Management
ECA – Energía Costa Azul
EE – Energy Efficiency
EIA - Energy Information Administration
ESG – Environmental, Social and Governance
EV – Electric Vehicle
FID – Final Investment Decision
FRP – Formula Rate Plan
FPSC – Florida Public Service Commission
GHG – Greenhouse Gas
IRP – Integrated Resource Plan
LDC – Local Distribution Company
LFCR – Lost Fixed Cost Recovery
LNG – Liquefied Natural Gas
MOPR – Minimum Offer Price Rule
MPUC – Minnesota Public Utilities Commission
MVP – Mountain Valley Pipeline
PBR – Performance Based Ratemaking
PISA – Plant-in-Service Accounting
PPA – Power Purchase Agreement
PURA – Public Utilities Regulatory Authority
REC – Renewable Energy Credit
RFP – Request for Proposals
ZEC – Zero Emission Credit

Required Disclosures

This is a compendium report, to view current important disclosures and other certain content related to the securities recommended in this publication, please go to https://www.wellsfargoresearch.com/Disclosures or send an email to: equityresearch1@wellsfargo.com or a written request to Wells Fargo Securities Research Publications, 7 St. Paul Street, Baltimore, MD 21202.

Additional Information Available Upon Request

I certify that:

2) No part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by me in this research report.

Wells Fargo Securities, LLC does not compensate its research analysts based on specific investment banking transactions. Wells Fargo Securities, LLC's research analysts receive compensation that is based upon and impacted by the overall profitability and revenue of the firm, which includes, but is not limited to investment banking revenue.

STOCK RATING
1=Overweight: Total return on stock expected to be 10%+ over the next 12 months. BUY
2=Equal Weight: Total return on stock expected to be 0-10% over the next 12 months. HOLD
3=Underweight: Total return on stock expected to lag the Overweight- and Equal Weight-rated stocks within the analyst's coverage universe over the next 12 months. SELL

VOLATILITY RATING
V=A stock is defined as volatile if the stock price has fluctuated by +/-20% or greater in at least 8 of the past 24 months or if the analyst expects significant volatility. All IPO stocks are automatically rated volatile within the first 24 months of trading.

As of: November 12, 2020

52% of companies covered by Wells Fargo Securities, LLC Equity Research are rated Overweight.	Wells Fargo Securities, LLC has provided investment banking services for 47% of its Equity Research Overweight-rated companies.

1= Overweight, 2 = Equal Weight, 3 = Underweight, V = Volatile
NA = Not Available, NC = No Change, NE = No Estimate, NM = Not Meaningful

- **Summary.** On 12/8 & 12/9, over 35 electric, gas and water utilities participated in virtual investor meetings at the 2020 Virtual Midstream and Utility Symposium. The tone of conversations was quite positive with companies cautiously optimistic on sales growth into 2021 and poised to advance de-carbonization strategies. In the comments below we expand on general industry takeaways and highlight PEG, WTRG (also increase price target) and ATO as timely investment ideas.

- **No Shortage of Investment Opportunities…** Between aging wires and pipes and the push toward de-carbonization, companies touted significant infrastructure investment opportunities with visibility well beyond the 5-year planning horizons. On the electric generation front, a number of utilities are scheduled to file IRPs in 2021 (BKH, CMS, EVRG, NI, OGE, XEL) with most executives pointing to renewables and peaking gas as the most likely resource solutions. In terms of coal retirements, companies generally are not expecting significant pressure from the Biden EPA only because many have already taken steps to accelerate coal retirements. That said, stricter emission regulations could provide greater justification for local stakeholders to accelerate retirements as several companies are still working out the details on recovery of the un-depreciated plant balances with securitization discussions going on in a number of states.
- **…Gating Factor is Customer Rates.** Utilities are always mindful of customer rate pressure, but we sensed a heightened sensitivity in light of COVID-related considerations. Regulators and politicians have pushed back on requested rate increases during the pandemic with the most recent example being the PA ALJ recommendation to deny NI's rate increase along with less overt actions including downward pressure on allowed ROEs (AZ). In response, many utilities are increasing programs to support low income customers and tightening their belts on the O&M front. Should utilities be able to create rate headroom via cost controls, fuel savings (steel for fuel) and, for certain utilities, customer growth, it could support the acceleration of capex and rate base growth.
- **Comments continue on page 2.**

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

- **New Technology Roundup.** We continue to sense a greater willingness on the part of the historically risk averse utility sector to embrace new technologies. We think this is being driven by a confluence of factors including (1) real and perceived policy pressure (at the state & federal levels), (2) customer demand for clean energy (both C&I and residential) and (3) the growing influence of ESG investing – is it just us or do company executives sound increasingly apologetic if stated generation resource plans still include coal in 2040? Several utilities indicated the potential to either accelerate or scale-up investments in battery storage (CMS) and EV-related infrastructure (DTE, XEL). And, in a mini eyebrow raising move, on 12/8 NEE acquired eIQ Mobility, a provider of software solutions to help assess fleets for a potential transition to electricity or hydrogen fuel. NEE indicated that the acquisition was part of the ongoing "dip your toes" approach into green hydrogen – and that the technology is still several years away from being a "needle mover" from an earnings standpoint – but the momentum continues to build.
- **M&A.** There was a lot of chatter regarding CNP's recent announcement regarding plans to sell LDCs in AR and OK. Nearby utilities BKH and OGS indicated a general openness to giving the assets a look, but not at valuations in the 1.5-2X rate base range – both expressed skepticism that their bids (if they bid) would prevail and appeared content to see a higher valuation from another party, which could lend support for LDC valuations overall. Northern utilities ALE and WEC did not express an interest in the assets and AQN commented that while they haven't ruled LDC acquisitions out, mgmt. prefers electric and water. SR provided broad comments that the company has been out of the M&A space due to frothy takeout multiples and would re-engage at more reasonable valuations along with cultural and regulatory considerations. While not categorically ruling out M&A, NWE noted they like the current electric/gas mix as well as serving areas where gas is not under attack and therefore cannot imagine moving outside of their Midwest region (but did not specify if AR and OK are in their region). Lastly, SWX expressed an openness to acquisitions, which would bolster the utility portion of the earnings mix, but did not comment specific to CNP's assets. More broadly, we think the need to create rate headroom in order to accelerate de-carbonization strategies could drive strategic combinations that offer scale and synergies.
- **Gas LDCs Strike A Positive Tone.** With the LDC utility business model in the spotlight as the electrification theme looms, we sensed greater comfort among gas executives that key stakeholders are acknowledging the role of gas distribution infrastructure in the pursuit of affordable de-carbonization (even in NJ). Companies also highlighted continued strong demand for LDC service including healthy new customer connect trends and opportunities to build-out the gas system into new areas. Consistent with the Q3 calls, most of the companies are actively exploring RNG opportunities and beginning to research the potential of adding hydrogen to the gas mix (early days). When asked whether RNG/hydrogen will detract from natural gas' affordability argument, executives drew a parallel with renewables in their infancy suggesting there's a need and expectation that the cost curves will be driven down over time. The LDCs also touted energy efficiency programs as a much more cost effective avenue toward de-carbonization.

Featured Picks

- **Public Service Enterprise Group (PEG/Overweight)**
  We like the set up for PEG heading into '21 as the company continues to transition to an appealing clean energy, predominantly regulated utility story (85% of earnings). Potential catalysts include (1) completion of the planned sale of the non-regulated fossil fuel and solar generation assets, which will simplify and "clean" up the story, (2) likely additional regulated capex arising out the CEF filings (Cloud & EV) and a new potential accelerated infrastructure investment program and (3) greater clarity on the long-term earnings profile for the nuclear fleet pending the outcome of an ongoing NJ BPU investigation. In the near-term, mgmt. is quite optimistic that the BPU will bless the $721mm CEF-Energy Cloud (AMI) (an all or nothing proposal) but is a little bit more iffy on the $261mm CEF-EV proposal. Evidentiary hearings on both the Energy Cloud and EV filings have been suspended as parties engage in settlement discussions. Separately, we touched on PEG's recent decision to acquire a 25% ownership interest in Ørsted's Ocean Wind project. While not unexpected, the decision frees up mgmt. to discuss the longer-term offshore wind opportunities that will likely sequence after Ocean Wind. Ørsted has 2,400 MW remaining in the Ocean Wind lease area and PEG/Ørsted jointly own the 1,000 MW Garden State Offshore Energy (GSOE) lease area. Now that PEG has opted into Ocean Wind 1, we fully expect Ørsted/PEG to jointly pursue future solicitations in NJ and the Mid-Atlantic (i.e., MD); this could set up for additional growth opportunities post '25 that will supplement PSE&G's strong rate base growth. As for the initial Ocean Wind stake, PEG will generate a substantial amount of cash upfront by taking the ITC & MACRS tax benefits (PEG has a U.S. tax appetite whereas Ørsted does not). We reiterate our Overweight rating and maintain our $69/sh price target.

- **Essential Utilities (WTRG/Overweight)**
  We came away from our WTRG meeting incrementally more bullish on the name and believe there are potential near-term catalysts to build upon the stock's recent strength. First, CEO Chris Franklin expressed confidence in the ability to get the pending DELCORA deal done and believes the judge may rule by Christmas on Delaware County's two legal challenges – the most important of which is the validity of the asset purchase agreement. Mr. Franklin reiterated that the County's concerns seem to be around the price and use of proceeds as opposed to be against actually selling to WTRG. As we have previously opined, a last minute settlement still cannot be ruled out. We believe the DELCORA deal represents material long-term value given meaningful capex needs that fall beyond the current 5-year forecast as well as the likely substantial wastewater tuck-in deals that could transpire in the area. Second, management believes investors will find the 1/11 guidance event constructive both in terms of the updated 3-year EPS and rate base growth outlook as well as environmental commitments at Peoples. Finally, we talked about the water and wastewater M&A pipeline and there continues to be attractive, sizeable opportunities that not too long ago WTRG would have never thought possible. We reiterate our Overweight rating and increase our 12-18 month price target to $52/share (29X our 22E EPS of $1.78) from $47.

- **Atmos Energy Corporation (ATO/Overweight)**
  ATO is our top pick in the Gas LDC space. We see the opportunity for multiple expansion from the current ~10% premium to gas peers. ATO is not a catalyst rich name, but offers consistent 6-8% EPS growth, a relatively low-risk regulated strategy, a strong balance sheet with well above-average credit metrics, supportive regulatory mechanisms and an excellent track record in our view. ATO also operates in gas-friendly states with ~70% of rate base in TX where we expect to see legislation proposed in 2021 that would prohibit the adoption of local bans on new gas hookups. We think continued execution through 2021 along with improving sentiment toward the LDC group will drive outperformance. We reiterate our Overweight rating and maintain our $114/sh price target.

Acronyms:

ALJ – Administrative Law Judge
AMI – Advanced Metering Infrastructure
BPU – Board of Public Utilities
C&I – Commercial & Industrial
DELCORA – Delaware Country Regional Water Quality Control Authority
EPA – Environmental Protection Agency
ESG – Environmental, Social, Governance
EV – Electric Vehicle
IRP – Integrated Resource Plan
ITC – Investment Tax Credit
LDC – Local Distribution Company
MACRS – Modified Accelerated Cost Recovery System
MW - Megawatt
O&M – Operations & Maintenance
RNG – Renewable Natural Gas

Rating Basis Information:

ATO Thesis: We are attracted to ATO's highly visible growth outlook, pure play regulated gas strategy and strong balance sheet. We do not believe these positive features are adequately reflected in the current share price.

PEG Thesis: We believe PEG shares offer investors an attractive risk/reward proposition. Key features include (1) a premier utility with well-above average rate base & EPS growth prospects, (2) a carbon-free nuclear generation fleet that generates significant FCF and (3) a strong balance sheet, which provides the company with financial flexibility.

WTRG Thesis: Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Price Target Information:

PEG Basis and Risks: Our $69/sh price target is based on a sum-of-the-parts analysis consisting of (1) $60.50/sh for PSE&G/Enterprise/Other (~20.5X our 22E EPS of $2.94) and (2) $8.50/sh for PSEG Power based on a DCF analysis. Risks to our valuation include earnings sensitivity to commodity prices, operational risks, unfavorable regulatory/political developments particularly as it relates to PEG's nuclear fleet.

ATO Basis and Risks: Our price target is based on a P/E multiple analysis (apply a 15-20% premium to the Gas LDC peer group multiple of ~18X on our '22E EPS). Key risks include regulatory risk (primarily in TX), potential pushback to rate increases, risk of gas-related incidents, and fluctuations in the Rider Rev mechanism at APT.

WTRG Basis and Risks: Our $52/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.78. For WTRG's water utility multiple, we ascribe a roughly 5% discount to the 21E multiple we use for AWK (34-34.5X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The roughly 5% discount reflects a modestly lower earnings growth rate (we forecast 6-7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 19X (based on ATO, NWN, OGS & SR) and then apply a 5-10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework. Key risks relate to regulatory, Peoples gas deal integration and M&A strategy execution.

Essential Utilities, Inc.

WTRG: Solid Update Provided at 1/11 Guidance Event

WTRG Remains Our Favorite Water Utility Pick

Overweight/$52

Water Utilities

Earnings Estimates Revised Up

- **Key Points.** We viewed WTRG's 1/11 guidance event as supportive of our Overweight thesis. The '21 EPS guidance range of $1.64-1.69 was consistent with investor expectations and management extended the 5-7% EPS CAGR through '23. New items include (1) two new municipal transactions totaling $87M as well as (2) red meat for ESG conscience investors. We nudge up our 2021-24E EPS to/from $1.67/$1.65, $1.80/$1.78, $1.93/$1.91 & $2.07/$2.03. We also introduce our 25E of $2.20. Our forecast results in an EPS CAGR near the upper end of WTRG's targeted 5-7% range which we believe is reasonable given strong underlying rate base growth driven by accelerated pipeline replacement needs supplemented by a municipal M&A strategy that continues to gain momentum.
- **2 New M&A Deals Revealed – Positive Momentum Continues.** WTRG closed four municipal deals in 2020 for total rate base of $63M. In the pending column, the $277M DELCORA deal steals the show however WTRG has four other transactions with a combined value of $144M – includes three separate chunky wastewater deals (East Whiteland, PA $55M; Lower Makefield, PA $53M; Bourbonnais, IL $32M). WTRG has also been announced the winning bidder of two additional systems with a combined value of $30M which will move into the pending column once APA's are finalized. The company's deal development pipeline remains robust and management continues to express optimism that activity will start ramping up in the years ahead in the four states that only somewhat recently adopted FMV legislation (NC & OH in '18; TX in '19; VA in '20). Our model reflects primarily announced deal closures over the 2020-22 period plus a $75M/year placeholder in '23 & beyond.
- **Spotlighting DELCORA (Again!).** As we have previously opined, we believe the DELCORA deal represents material long-term value that is not currently reflected in the share price. Following the favorable court rulings on 12/28, PaPUC approval is the remaining hurdle with next key milestones including a 1/20 anticipated ALJ recommendation and a 3/11 commission approval deadline. Beyond the $277M rate base pick up at closure (expected early Q2'21), we are attracted to (1) the $700M of capital investments – $25-50M/year for typical repair/replace work plus roughly $300M over the 2026-28 period related to DELCORA's treatment plant – as well as (2) the likely substantial wastewater tuck-in deals that could transpire in the area. Simply put, we believe the DELCORA deal should, at a minimum, allow WTRG to continue to target a 5-7% EPS CAGR through the end of the decade if not bump it up to 6-8%.
- We offer some additional highlights from the 1/11 update on p.2 including (1) extension of the rate base growth targets, a brief discussion of the relatively low near-term regulatory risk profile and (3) announcements to hopefully lessen the ESG overhang.

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Together we'll go far

Other highlights from the 1/11 guidance event and update include:

- **Capex & Rate Base Guidance Largely Upheld.** Management indicated plans to invest $550M on the water/wastewater side (ex. M&A) in '21 and $450M for gas (up from $400M in '20). In total, roughly $3B of spend is expected over the 2021-23 period which will drive underlying 6-7% water/wastewater and 8-10% gas rate base CAGRs through '23. More than 50% of the spend is eligible for rider mechanism recovery

- **WTRG offers investors relatively low near-term regulatory risk.** The next PA water & wastewater rate case filing is expected in late '21. While WTRG's PA rate cases can never be overlooked given the meaningful % of rate base represented (more than 70% on the water/wastewater side), the utility has a long history of reaching constructive outcomes via settlement agreements and the ALJ recommendation in the pending AWK case honors a settlement agreement reached on 10/30.

  Otherwise commission approvals for FMV deals as well as regulatory treatment of the catchup portion of Peoples' repairs tax deduction (RTD) are the main items we are keeping an eye on at the state level. Further on the RTD treatment, a PaPUC order is expected in Q2'20 and we are optimistic that something similar to WTRG's proposal will be adopted. We would not rule out the possibility of a settlement with intervenors and note that evidentiary hearings are scheduled for later this month. Recall, WTRG's proposal would share the benefits 40% with ratepayers (through rate surcredits on bills) with the remaining 60% used as an increasing income tax expense offset over 2023-25 – this would avoid the need for Peoples to file to implement a base rate increase prior to 1/1/2026 while supporting the elevated pace of capex deployment and ensuring a fair opportunity to earn the allowed ROE.

- **Addressing The ESG Overhang.** WTRG committed to reducing annual Scope 1 and 2 GHG emissions by 60% by 2035 (using 2019 baseline) across both the gas and water utility platforms utilizing existing and proven methods and will look to get to net zero once technological advances allow. Other ESG-friendly updates include establishing multi-year plans to increase supplier and employee diversity as well as tying incentive comp to those metrics. Successfully addressing the ESG concerns that arose out of the recent acquisition of the Peoples gas utility and gaining wider spread acceptance by the investment mantra that seems to only be growing in popularity could help close some of the valuation gap between AWK.

Acronyms:

ALJ – Administrative Law Judge
APA – Asset Purchase Agreement
DELCORA – Delaware Country Regional Water Quality Control Authority
ESG – Environmental, Social, Governance
FMV – Fair Market Value
GHG – Greenhouse Gas
PaPUC – Pennsylvania Public Utility Commission

Price Target

Price Target: $52 from NC

Our $52/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.80. For WTRG's water utility multiple, we ascribe a roughly 5% discount to the 21E multiple we use for AWK (34-34.5X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The roughly 5% discount reflects a modestly lower earnings growth rate (we forecast 6-7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 17.0-17.5X (based on ATO, NWN, OGS & SR) and then apply a roughly 10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework. Key risks relate to regulatory, Peoples gas deal integration and M&A strategy execution.

Investment Thesis

Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio.

In March 2020, WTRG closed on the acquisition of Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, WTRG paid 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to other gas utility transactions at the time. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

Regulated operations account for more than 99% of consolidated revenues. Consolidated EPS is expected to be driven roughly 70% by water utility operations with the gas utility contributing the remaining 30%.

In February 2020, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Essential Utilities, Inc.

WTRG: Analyst Day Wrap Up -- Adjusting EPS Outlook

Equal Weight/$45

Water Utilities

Price Target Change

- **Key Points.** WTRG's 2/27 analyst day provided clarity around the company's EPS power for the next few years. After reporting adjusted '19 EPS of $1.47 (reflects the base water business without the impacts from external financings completed in 2019 for the Peoples acquisition), '20 EPS are expected to be $1.53-1.58 (pro forma for a 1/1 Peoples close vs. the anticipated 3/16). In addition, management forecasts a 5-7% EPS CAGR through '22 off the $1.47 base. This trails expected consolidated rate base growth of roughly 8% due to earned ROEs at recent/pending muni deals not yet earning the full keep plus some dilution. However, once another PA water rate case goes into effect (we assume a '21 filing; rates effective '22), then it sounds like EPS growth should track more closely to rate base growth. After flowing '19 actuals and analyst day disclosures through our model, we lower our 20-22E EPS to/from $1.56/$1.57, $1.65/$1.70 & $1.77/$1.80. We project a 6.5% EPS CAGR through '24. No change to our overall thesis or Equal Weight rating despite recent underperformance (down 10% since 2/18 relative to the S&P Utilities) as shares trade in-line with a 70% water/30% gas LDC blended multiple. We lower our 12-18 month price target to $45/share from $48 (26X our 22E) due primarily to lower peer group multiples since our last update.
- **EPS Outlook.** Our 2020-24E EPS are $1.56, $1.65, $1.77, $1.90 & $2.02. The addition of Peoples (3/16 close expected), including the $0.08-0.12 of EPS benefits anticipated by electing and flowing through the current portion of RTD at Peoples Gas, is what allows WTRG to guide to 2020 pro forma EPS of $1.53-1.58 (as if the deal closed 1/1). Our prior outlook did not include the RTD benefits – which we thought offered $0.10-0.15 upside – however we, as well as most investors that we have talked to, did not appreciate the headwinds facing the base water business in '20. This led to the guidance being viewed as somewhat disappointing and shares underperforming. After reporting adjusted '19 EPS of $1.47, management indicated 2020 base water EPS would have been relatively flat, all else equal. This is because (1) '19 benefited from the PA water repair tax deduction flowing to shareholders until new PA rates were effective mid-May, (2) there is roughly $200M of recent municipal system acquisition rate base additions that are not yet earning the allowed ROE in '20 (may actually be closer to break-even) and (3) the absence of any PA DSIC revenues until '21.
- **WTRG's Strategy.** The core growth drivers remain twofold. (1) Reinvest aggressively in existing systems and seek timely regulatory recovery. 2020 capex is $550M for water and $400M for gas with a total of $2.8B budgeted over the 2020-22 period. And we do not expect any falloff in those levels for the foreseeable future. (2) Actively pursue municipal M&A. ***Comment continues on p. 2***

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Together we'll go far

- **WTRG's Strategy *(continued…).*** Deal activity in the industry remains elevated, in large part due to states adopting FMV legislation, and WTRG is in various levels of discussions with systems representing a total of 320,000 customers. Besides PA and IL, WTRG seems to believe OH, TX and KY hold the most promise. Management's compensation is tied to a $60M/yr deal value target and the goal is to achieve 2-3% customer growth through organic and M&A. Management believes the capex budget can be financed without new equity whereas deal flow would require roughly 50% new equity, perhaps through the establishment of an ATM program in front of the DELCORA deal close (expected late '20). Speaking of DELCORA, enthusiasm remains high for the deal from the immediate rate base addition, meaningful future capex needs ($700M by 2028) as well as potential bolt-on wastewater deals perspectives. Other management priorities outlined at the analyst day include completing/integrating the Peoples and DECLORA transactions as well as maintaining ESG appeal (highlighted recent diversity and governance enhancements).

Acronyms:

ATM – At-the-market
DSIC – Distribution System Improvement Charge
ESG – Environmental, Social, and Governance
FMV – Fair Market Value
RTD – Repairs Tax Deduction

Price Target

Price Target: $45 from $48

Our $45/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 2.5% discount to our 70% water/30% gas utility hybrid multiple to our 2022E of $1.77. The 2.5% discount reflects merger execution/integration risk. For WTRG's water utility multiple, we start with AWK's 2021 P/E multiple of 29.4X (AWK represents the closest publicly traded peer) and apply a 5% discount (given AWK's higher growth rate and best-in-class management team). For WTRG's gas utility multiple, we utilize the 2021 pure play gas LDC median of 21.2X. Key risks include regulatory and M&A strategy execution related.

Investment Thesis

We are attracted to WTRG's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations and a strong balance financial profile. Our Equal Weight rating reflects valuation considerations in light of WTRG's pending agreement to acquire Peoples (a gas utility) and the associated P/E multiple, regulatory and deal execution/integration related risks.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio. Regulated operations account for more than 99% of consolidated revenues.

On 10/23/18, WTRG announced a deal to acquire Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, the deal appears to be 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to what we have seen in recent gas utility transactions. WTRG received PA regulatory approval on 1/16 and the deal is expected to close imminently. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

On 2/3, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Essential Utilities, Inc.

WTRG: What's In A Name? - Change Ironically A Harbinger Of COVID Resiliency

Equal Weight/$42

Water Utilities

Price Target Change

- **Key Points.** Management affirmed all aspects of guidance provided at the late February analyst day as WTRG's utility businesses are expected to be resilient to the challenges presented by COVID-19. It helps that the bulk of customers and revenues, for both water and gas, are residential and that the gas utility is past the high-demand heating season. In addition, constructive regulatory treatment of any incremental COVID-19 costs is expected. No change to our 2020-24E EPS of $1.56, $1.65, $1.77, $1.90 & $2.02. Our outlook is consistent with management's 2020 pro forma (as if the Peoples deal closed 1/1 and experienced normal weather from 1/1 through the 3/16 close) EPS guidance of $1.53-1.58 and 5-7% CAGR through 2022 off the '19 base. We reiterate our Equal Weight rating but lower our 12-18 month price target to $42/sh (23.5-24.0X our 22E) from $48/sh due to lower peer group multiples since our last update.
- **COVID-19 Impacts – Sales/Expenses.** Although it is early, management mentioned that preliminary April data shows that the increased residential usage is offsetting the decrease in C&I and gov't/public customers on the water side as the month came in right at budget. And with the heavy-use heating season over on the gas side, management does not see a material financial impact from usage but that could depend on how long the stay-at-home orders are in place. WTRG plans to track COVID-19 related expenses with an expectation that regulators will afford constructive recovery, particularly of bad debt expense given the implemented no shutoff policies for non-payment. Bad debt expense rose to 1.1% of revenues in the 2008-09 financial crisis which is about double the 0.5% that has been historically observed and embedded in water rates. That said, there are some costs that are lower which could help defray any increases. Net-net, the overall expense impact is not expected to be material.
- **COVID-19 Impacts – Capex/Liquidity.** In terms of capital deployment, a two week moratorium implemented on water work in PA did set the utility about $30M behind schedule. However, the ground is expected to be made up over the balance of the year and there is no change to WTRG's overall water and gas capex budgets. Access to capital is not an issue. WTRG, like other utilities, have taken precautionary steps to boost near-term liquidity. The capex budget can be financed without equity but M&A deals will require some – we expect about 50% of the purchase price. With that in mind, we think WTRG could be flexible with the exact timing of the $300M of equity needs outlined for later this year to finance DELCORA and other deals in the pipeline.
- Please see p. 2 for discussions of municipal M&A activity (spoiler alert, COVID-19 could increase the deal flow!), regulatory updates and a brief EPS & capex discussion.

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Together we'll go far

- **COVID-19 Impacts – Municipal M&A.** Similar to the thoughts expressed by AWK a few hours earlier, WTRG expects the volume of municipal M&A discussions/deals to be positively impacted by COVID-19. Many municipalities were already challenged financially and some even operationally (complying with increasingly stringent EPA standards) before the pandemic. The economic shutdowns have likely only exacerbated those pressures.

  Management remains upbeat about the pipeline of deals, noted how a number of decent-sized opportunities have been advanced that can hopefully be talked about in the not so distant future and highlighted how fair market value (FMV) legislation continues to open doors. VA adopted FMV earlier this year – all 8 of WTRG's water states now have it – and deal momentum continues to build in other recently adopted states like OH & TX. Having closed on the Campbell, OH water deal earlier this year, WTRG has the New Garden, PA ($30M), East Norriton, PA ($21M) and DELCORA ($277M) wastewater deals pending. The goal remains to achieve 2-3% customer growth through organic and M&A efforts.

- **Regulatory Updates.** WTRG's near-term regulatory calendar is fairly light as the PA water and gas utilities completed major base rate cases last year. The two proceedings of greatest investor interest are the DELCORA acquisition approval (filed in Q1; late '20 close expected) and PA regulatory treatment of the catch-up component of Peoples repairs tax deduction benefit (file this summer; clarity perhaps around YE'20; any retention by WTRG should be incremental to current outlook). Despite the challenges presented by stay-at-home orders, WTRG has not experienced any material regulatory timeline delays.

- **EPS Outlook.** Our 2020-24E EPS are $1.56, $1.65, $1.77, $1.90 & $2.02. The core growth drivers remain (1) capex/rate base growth by aggressively reinvesting in existing systems and seeking timely regulatory recovery and (2) municipal M&A. 2020 capex remains $550M for water and $400M for gas with a total of $2.8B budgeted over the 2020-22 period and we do not expect any falloff in those levels for the foreseeable future.

- In fact, an internally ordered report conducted by Black & Veatch to assess the overall safety of the Peoples gas system, including pressure risk, was completed earlier this month. While the conclusions were that the system is safe, WTRG is evaluating the recommendations made and preparing an action plan. There is an opportunity to invest more to further enhance safety and that will be addressed in future plans with an eye towards rate affordability.

Acronyms:

C&I – Commercial & Industrial
DELCORA – Delaware Country Regional Water Quality Control Authority

Price Target

Price Target: $42 from $48

Our $42/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.77. For WTRG's water utility multiple, we ascribe a 5-10% discount to the 21E multiple we use for AWK (27.0-27.5X). The 5-10% discount reflects both a modestly lower EPS growth rate (we forecast 6.5% for WTRG vs. 8% for AWK) as well as lower ESG appeal (in particular, the recent Peoples deal). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of roughly 21X. Key risks include regulatory and M&A strategy execution related.

Investment Thesis

We are attracted to WTRG's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations and a strong balance financial profile. Our Equal Weight rating reflects valuation considerations in light of WTRG's recently closed acquisition of Peoples (a gas utility) and the associated P/E multiple, regulatory and deal execution/integration related risks.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio. Regulated operations account for more than 99% of consolidated revenues.

On 10/23/18, WTRG announced a deal to acquire Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, the deal appears to be 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to what we have seen in recent gas utility transactions. WTRG received PA regulatory approval on 1/16/20 and the deal closed two months later on 3/16. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

On 2/3, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Essential Utilities, Inc.

WTRG: Recent Pullback Creates Opportunity – Upgrade To Overweight

Overweight/$45

Water Utilities

Rating Change

- **Key Points.** We upgrade our rating on shares of WTRG to Overweight from Equal Weight as we believe the recent underperformance has created an attractive entry point. The cause of the relative pullback is not entirely clear (we offer some potential drivers in this report) but the bottom line is that we do not believe anything that has transpired fundamentally since the Q2'20 report in early August has materially impacted (1) the likelihood of DELCORA closing, (2) our EPS outlook or (3) our investment thesis.

  While the DELCORA deal is highly supportive of WTRG's growth aspirations, we consider the future to be bright without it driven by elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends. We believe relatively low risk, regulated EPS growth of at least 6% is achievable – that rate of growth would simply be enhanced if DELCORA closes given the $700M of required investment needed in the system by 2028 as well as potential further municipal wastewater deals in the region. No change to our 2020-24E EPS of $1.56, $1.65, $1.77, $1.90 & $2.02 (which assumes an end of Q1'21 DELCORA close). Our 12-18 month price target of $45/share (25.4X our 22E) is supported by P/E and DDM analyses.

- **Breaking Down Our P/E Valuation – Water.** Our P/E analysis results in a $45/share value and remains predicated on a 70% water/30% gas utility hybrid P/E multiple applied to our 2022E of $1.77. For WTRG's water utility multiple, we ascribe a 5-10% discount to the 21E multiple we use for AWK (30X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The 5-10% discount reflects a modestly lower earnings growth rate (we forecast 6-7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility).

- **Breaking Down Our P/E Valuation – Gas.** For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 18X (based on ATO, NWN, OGS & SR) and then apply a 5-10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of an accelerated pipeline replacement effort under the PaPUC-approved LTIIP program which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive regulatory framework of the PaPUC which includes fully forecasted test years, infrastructure surcharge mechanism recovery and a history of settled regulatory outcomes. ***(Comments continue on p. 2)***

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

- **Breaking Down Our P/E Valuation – Gas.** For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 18X (based on ATO, NWN, OGS & SR) and then apply a 5-10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort (mainly bare unprotected steel) under the PaPUC-approved LTIIP program which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA (the bulk of Peoples service territory), which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive regulatory framework of the PaPUC which includes fully forecasted test years, infrastructure surcharge mechanism recovery and a history of settled regulatory outcomes. Lastly, with the electrification theme gaining momentum and potentially challenging the long-term outlook for the gas LDC model (existential threat?), we no longer believe the publicly traded LDC multiples really reflect a takeout premium and thus no adjustment is necessary when valuing Peoples.

- **Other P/E Valuation Thoughts.** Shares trade at 23.8X & 22.2X our 21E & 22E EPS or roughly 15% discounts to the "large cap" pure play waters (AWK, AWR, CWT, MSEX & SJW) of 27.9X and 26.1X. That seems a bit steep given a relatively commensurate EPS growth profile, a large concentration of EPS power and growth stemming from the water utility and a similarly large concentration of EPS power stemming from the constructive PA regulatory environment. Perhaps the main differences relate to WTRG's inferior ESG appeal and credit metrics (though S&P assigns WTRG an "A"/Stable credit rating; the same as AWK & MSEX, a notch below AWR & CWT and a notch above SJW). If an in-line water multiple was applied, it would suggest a 12-18 month forward share price of closer to $50/share. It is also interesting to note that shares of WTRG currently trade at P/E multiples similar to high quality electric utilities WEC & XEL despite the water utility group median as a whole trading at roughly 70% premiums to regulated electrics.

- **What If DELCORA Does Not Happen?** At the risk of stating the obvious, we prefer the WTRG story with the DELCORA deal closing than without it. DELCORA is really somewhat of a unique strategic deal in our view given it not only increases WTRG's rate base by $277M out of the gate but offers meaningful future capex needs ($700M by 2028) as well as potential bolt-on wastewater deals in the region, particularly from municipalities that are wholesale wastewater customers of DELCORA's as well as the Tredyffrin Township Municipal Authority's trunk sewer system that WTRG acquired in 2018.

  However, much of the accretion and longer-term benefits of the deal that we love so much do not start impacting WTRG's financials until the back half of our 2020-24 outlook or beyond – in fact, we believe the assumptions embedded in our model could prove conservative if DELCORA closes. On the capex side, we only bump up our '21 & '22 forecast by $25M for DELCORA spend and then modestly grow that in '23 & '24 as it is our understanding that the majority of the $700M of capex actually occurs more in the 2026-28 period as a treatment plant expansion and pipeline is needed to get DELCORA off Philadelphia's wastewater system by 2028. On the M&A side, we do not increase our annual deal value placeholder of $60M for the enhanced opportunity set in the Southeast PA region that DELCORA could provide.

  If we were to completely strip out the DELCORA deal, the aforementioned tick up in capex that we assume in '21-24 and all of the associated external financing (including roughly $150M of equity), it only has a modest $0.03-0.05 impact (less than 3%) on our 2021-24E EPS. Keep in mind that when FMV deals are first consummated, the acquiring utility typically just inherits the existing rates and it therefore takes at least 2-3 years to go through a rate case cycle in order get the acquired system's rate base to earn similar returns as the rest of acquiring utility's water or wastewater operations in the state.

  Put another way, we believe WTRG's future growth would still be attractive even if the DELCORA deal does not come to fruition. There would still be time for management to continue to capitalize on the industry's FMV consolidation momentum – including in OH and TX which recently adopted the legislation and where WTRG is the big fish in the pond – and replace the growth that we believe will transpire in the 2nd half of the decade if the DELCORA deal does close.

- **Dissecting The Underperformance.** Since 8/10, shares of WTRG are -18%. Amongst water peers, SJW is -16% over the same period while the others range from -11% (MSEX) to -5% (AWK). Also worth noting, the gas LDCs are -12% while the S&P Utilities are -5%. So what gives? We have fielded a number of inbound inquiries from investors and have talked to the company but it is honestly hard to pinpoint the reason. We offer three potential contributing factors.

(1) Macro And The Flight To Quality. Utilities as a whole have remained out of favor in the risk-on market and those that investors seemingly want to own have been the highest quality names with generally the strongest credit metrics. This would be AWK & AWR on the water side whereas SJW & WTRG have weaker credit metrics due to recent large scale M&A.

(2) Gas Further Out Of Favor. It also does not help that gas LDCs have fallen further out of favor and again trade essentially in-line with electrics on a P/E basis. Gas LDCs used to trade at a premium to electrics (but below waters) due to higher rate base CAGRs spurred by pipe replacement and relatively lower regulatory risk. However the concern lately seems to be more existential due to natural gas bans being contemplated in cities on both the west and east coasts as well as electrification potential and the rising prospects of renewables plus storage to replace gas-fired generation. Most investors that we talk to use a gas multiple to value the 30% of WTRG's EPS derived from Peoples, which is consistent with our approach.

(3) Management Putting The Cart Before The Horse? Uncertainty exists as to whether the pending $277M DELCORA deal actually closes. We are relatively confident in WTRG's ability to gain PaPUC approval though it remains early days. Recently on 8/31, OCA's request (citing COVID) for a 60-day extension of the statutory deadline to 3/26/21 was granted whereas Delaware County's petition (which was supported by OCA and BI&E) to stay the proceeding in its entirety until the Court of Common Pleas litigation (discussed below) concludes was denied – neither should have caused WTRG shares to underperform in our opinion. Key remaining items under the PaPUC's updated procedural schedule issued 9/4 include standard public input hearings on 9/16, intervenor testimony due on 9/29, evidentiary hearings begin 11/9 and a recommended decision by 1/20. While the PaPUC docket is certainly worth monitoring, we consider the courts to be the critical path to deal closure.

There is a complaint in the Court of Common Pleas of Delaware County filed by Delaware County regarding essentially the County Council's attempt to (1) dissolve DELCORA based on an ordinance the County Council passed on 6/4/20 and/or (2) dispute the legality of the irrevocable trust and therefore gain access to the $210M of net sales proceeds (after DELCORA debt pay down) earmarked for the trust fund. If successful on #1, the County Council may argue that the asset purchase agreement with Aqua Pennsylvania is unenforceable. On #2, the County Council would like to see at least some of the proceeds go for taxpayer benefit (offset forecasted tax increases) versus just ratepayers. DELCORA's plan, as outlined when the deal with WTRG was announced in September 2019, is to create a rate stabilization fund (via the trust) that will keep ratepayers' annual bill increases at 3% or less over the next 8 years despite the massive amount of capital that needs to be invested into the system.

A hearing in the court case was held last Wednesday (9/9). WTRG interpreted the judge's tone as leaning positive based on the strong legal arguments in support of the transaction. However, the timeline for resolution appears like it will (not surprisingly) take longer than management originally thought. It is our understanding that the next scheduled court hearing on 9/23 will predominately focus on the issues around the trust while the final hearings are not slated to conclude until 10/21. As such, the judge's ruling might not come until late October at the earliest unless of course a settlement is reached.

Despite this uncertainty, WTRG pulled the trigger on a roughly $300M forward stock offering in mid-August. WTRG could of course elect cash settlement if all of the equity is not ultimately needed (we estimate roughly half is for non-DELCORA deals). Regardless, it is somewhat reminiscent of the share issuance "jumping of the gun" by WTRG & SJW in the recent Peoples & CTWS mergers where ultimate regulatory approval did not come for another roughly 9 months.

That all being said, it is our understanding that the deal is not necessarily dead if the court rules in Delaware County's favor. According to WTRG management, dialogue from the new all-Democrat County Council members seems to support system privatization efforts. Therefore it could be possible to perhaps re-cut the deal – whether that could be done through exclusive negotiations or if the County Council would put the DELCORA system out for bid is unclear (would open the door for others, like AWK who has previously expressed an interest in acquiring the system, to come in and compete). However, if the court only sides with Delaware County regarding the trust and the County Council is able to get their hands on some/all of the sale proceeds, the deal

could still happen it would just result in higher rates for DELCORA ratepayers as WTRG seeks recovery of the significant capital upgrades needed with lower/no funds set aside to help offset the impact.

- **Quick Repairs Tax Update.** The only other WTRG development since the Q2'20 call worth noting relates to Peoples pending request for treatment of the repairs tax catchup benefit. Initial intervenor statements regarding WTRG's proposal were filed on 8/26. Not surprisingly OCA and BI&E expressed concerns regarding the balance of ratepayer and shareholder interests. That said, WTRG was not surprised by the parties' stated positions.

  Recall, WTRG filed in early August for PaPUC treatment of the catch up portion of the Peoples repairs tax deduction election. The filing outlined a $381M catch up deduction and proposed to share the benefits between customers (40%) and shareholders (60%). For customers it would amount to a $14M/year benefit (in the form of a nearly 2% surcredit on the average monthly bill) over 4 years beginning 1/1/21. The remaining benefit would be deferred and amortized as an offset to income tax expense over the 2023-2025 period – specifically, 5% in 2023, 35% in 2024 and 60% in 2025 – in an effort to offset normal regulatory lag while essentially keeping the earned ROE consistent with allowed levels. This would extend the time between the next base rate case to approximately 6 years (delay the need for a base rate increase effective prior to 1/1/2026 per Peoples' current projections) while supporting the elevated pace of capex deployment needed to replace pipes and drive safety improvements.

  WTRG had communications with regulators and other key parties prior to making this filing which makes us hopeful that the proposal will be positively received and that a constructive outcome will ensue, perhaps via a settlement. Approval of the shareholder benefit aspect of the request would increase our confidence in the gas utilities' ability to achieve our forecast – we assume gas utility earned ROEs of 10-10.3% which we believe is reasonable and consistent with Peoples 2019 rate order. On the flip side, if the PaPUC decides to go a different direction with the catchup benefits, we still believe our 2023 & beyond EPS levels are reasonable within the backdrop of the constructive PA regulatory framework. It could simply necessitate filing for a base rate increase sooner which would bring with it associated regulatory risk.

Acronyms:
BI&E – the PaPUC's Bureau of Investigation and Enforcement
DELCORA – Delaware Country Regional Water Quality Control Authority
ESG – Environmental, Social, Governance
FMV – Fair Market Value
LDC – Local Distribution Company
LTIIP – Long-Term Infrastructure Improvement Plan
OCA – Office of Consumer Advocate
PaPUC – Pennsylvania Public Utility Commission
S&P – Standard & Poor's

Price Target

Price Target: $45 from NC

Our $45/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.77. For WTRG's water utility multiple, we ascribe a 5-10% discount to the 21E multiple we use for AWK (30X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The 5-10% discount reflects a modestly lower earnings growth rate (we forecast 6-7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 18X (based on ATO, NWN, OGS & SR) and then apply a 5-10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework. Key risks relate to regulatory, Peoples gas deal integration and M&A strategy execution.

Investment Thesis

Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio.

In March 2020, WTRG closed on the acquisition of Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, WTRG paid 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to other gas utility transactions. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

Regulated operations account for more than 99% of consolidated revenues. Consolidated EPS is expected to be driven roughly 70% by water utility operations with the gas utility contributing the remaining 30%.

In February 2020, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Rating Basis Information:

AWK Thesis: We believe AWK is well positioned to capitalize on favorable industry dynamics which should lead to above average rate base, EPS and DPS growth. Our Equal Weight rating reflects the fact that shares trade at roughly 10% premiums to water utility peers on our 21E & 22E EPS which we believe is adequate. While we consider AWK's EPS (8.0-8.5%) and dividend (9%) growth prospects as well as management team best in class for the water industry (as well as top tier for our utility coverage in general), takeout and liquidity/scarcity premiums that are arguably embedded in the water median multiple should not apply to AWK. In addition, we are cognization of the fact that water utilities as a whole trade at roughly 55% premiums to regulated electric and gas peers.

AWR Thesis: We regard AWR as a low risk water utility with a growing dividend that operates under generally constructive CA regulatory principles. That said, the overall constructiveness of CA regulation has been called into question recently and bears monitoring. On the non-regulated side, we believe ASUS could contribute 20-25% to consolidated EPS with upside potential if new military contracts are awarded. Our Equal Weight rating reflects valuation considerations as shares trade at roughly 10% P/E premiums to water utility peers on our 21E & 22E EPS. We consider a 5-10% premium warranted as AWR has the industry's strongest balance sheet and credit metrics (no new equity is needed) as well as a good financial track record (management consistently executes/delivers strong results). However, those positives are partially by offset by an EPS CAGR (6-7%) that is largely commensurate with peers and heightened regulatory risk.

SJW Thesis: We regard SJW as a relatively low-risk water utility with a secure and growing dividend. Despite the CTWS merger which added regulatory diversity, roughly 60% of utility earnings are derived from California. As such, SJW remains highly dependent upon California regulation which offers the state's utilities generally constructive regulatory principles. That said, the constructiveness of CA regulation has been called into question recently and SJW's lack of a full decoupling mechanism exposes earnings to a degree of volatility that other CA water utilities do not currently face. Our Equal Weight rating is premised on the fact that, given recent outperformance, shares of SJW now trade at only 7-8% discounts to "pure play" water utility peers on our 21E & 22E EPS. While we think shares could continue to "re-rate" a little more over time, the pathway and timing combined with the magnitude of upside is less compelling from a risk/reward standpoint today.

Goldman Sachs & Co. LLC

We reiterate our Buy rating (on Conviction List) on regulated water/gas utility Essential Utilities (WTRG) following 3Q2020 and a positive guidance revision. As highlighted in our recent upgrade note, we continue to see WTRG as a secular winner to benefit from an estimated $750 billion of water infrastructure investment needs (per the EPA) in a very fragmented market. This represents at least a $7bn opportunity – well above its total current water asset base – excluding any market share gains through municipal and other water utility acquisitions.

We see the market valuing WTRG as a 60% gas utility despite its 70% water earnings composition, given the current 6x (20%) P/E discount for the company's water utility segment versus the only other large-cap water utility American Water (AWK, Buy). With WTRG's normalized EPS growth potential similar to AWK's, one of the highest in our coverage universe, and management's strategy to further increase its water utility exposure over time, we believe WTRG deserves a premium valuation to reflect its high growth, largely ESG-friendly profile.

Below we highlight some key takeaways from the 3Q20 earnings call:

- **WTRG continues to benefit from work-from-home (WFH) demand trends.** The company recorded net positive demand at its utilities in both 2Q20 and 3Q20, given the vast majority of its revenues come from its residential customer base, which more than offset declines in commercial and industrial demand. We see this as a positive indicator of its ability to weather covid-related demand changes, which also allowed WTRG to raise its 2020 guidance to the top end of its range. We raise our 2020 EPS to $1.57 from $1.55 partly to reflect this benefit, while our 2021-2022 estimates remain unchanged.
- **Peoples Gas remains a one-off gas utility acquisition.** Management reiterated that the recent acquisition of PA-based Peoples Gas made sense based on its robust organic growth through decarbonizing gas pipe replacements, as well as its favorable geographic position in the heart of the Marcellus shale that provides low-cost for a region where gas remains a complementary energy source for the long-term. That said, they confirmed that future inorganic growth will only come from municipal water system acquisitions. We see WTRG's 70% water utility earnings exposure that should grow over time as still warranting closer to a water utility premium average.

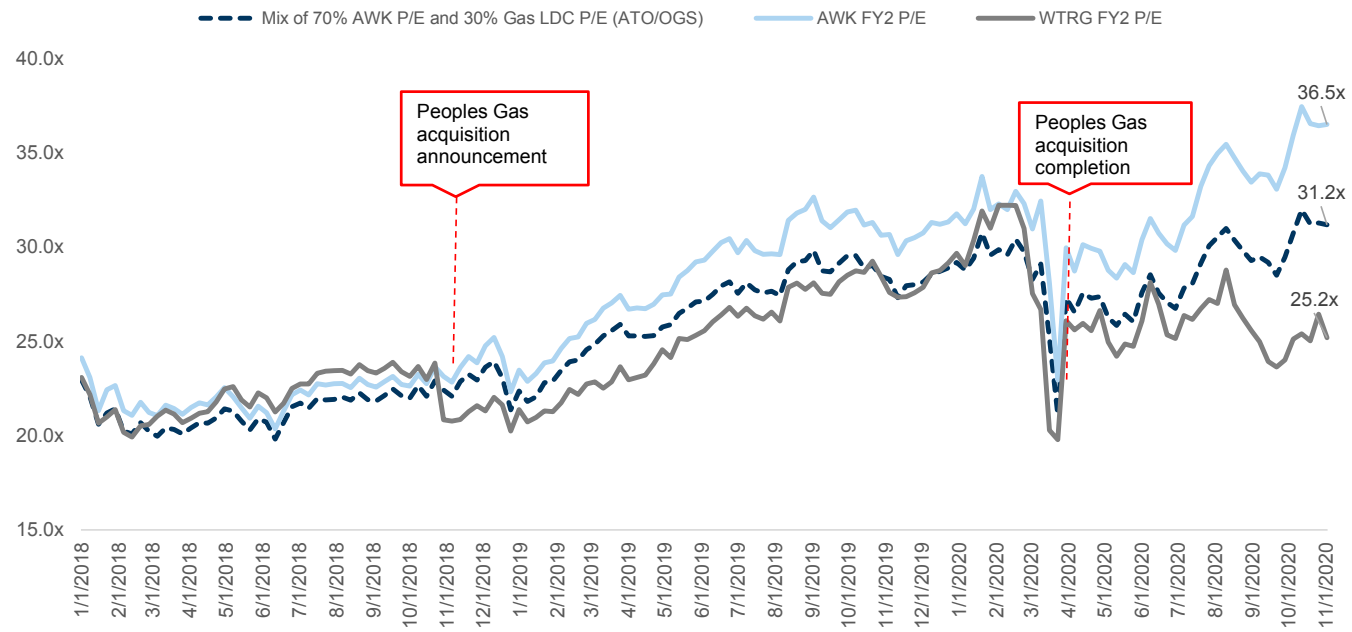
Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

- **Management still expects the DELCORA wastewater acquisition to close in 1H2021.** While awaiting the outcome on the validity of the asset purchase agreement for the proposed acquisition, management remains confident in their ability to close the deal by March or April 2021. We believe WTRG's pipeline of potential acquisitions should still enable the company to sustain its inorganic growth even if the DELCORA deal does not materialize, with ~$300mn in forward equity already priced to help finance the additions. Our model continues to assume 1Q2021 issuance for the equity.

Our $51 12-month price target (unchanged) is based on a SOTP approach, with 35x/22x P/E applied to our 2021 water/gas utility EPS estimates, respectively. **Downside risks to our call include:** 1) PA regulation turns less constructive, which impacts earnings growth potential given the bulk of WTRG's earnings are derived from the state's water/gas operations, 2) the proposed DELCORA municipal water system acquisition fails to receive necessary approvals for completion, which could impact longer-term water rate base growth outlook barring replacement with other municipal acquisitions, and 3) longer-term growth concerns about the gas utility segment further compresses WTRG's valuation, both on an absolute basis and relative to pure-play water utilities.

Exhibit 1: We continue to view WTRG's meaningful relative P/E discount as unwarranted based on its 70%/30% water/gas profile...
FY2 P/E for AWK, WTRG, and an illustrative performance of a 70%/30% water/gas utility



ATO/OGS chosen as illustrative gas utility comps based on company profile, including their status as the two largest gas LDCs by market cap

Reg AC

I, Insoo Kim, CFA, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Rating and pricing information

American Water Works (Buy, $155.41)

The rating(s) for Essential Utilities Inc. is/are relative to the other companies in its/their coverage universe:

Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., WEC Energy Group, Xcel Energy Inc.

Goldman Sachs is a specialist in the relevant securities and will at any given time have an inventory position, "long" or "short," and may be on the opposite side of orders executed on the relevant exchange: Essential Utilities Inc. ($41.19)

Distribution of ratings/investment banking relationships

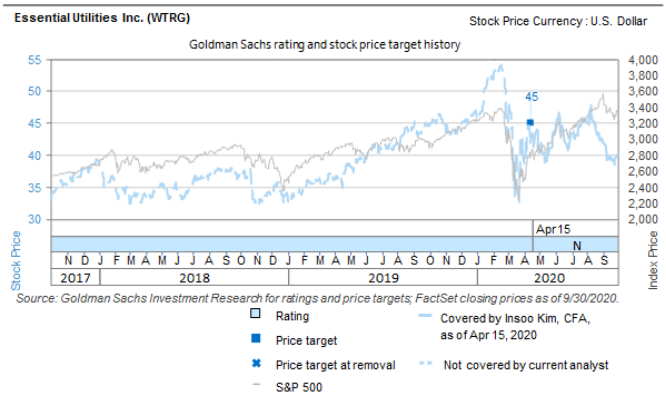
Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	49%	35%	16%	64%	57%	54%

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

As of October 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,122 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

HSBC Global Research

28 May 2020

Essential Utilities (WTRG US)

Buy: Current challenges a catalyst for integration

Equities
Water Utilities

United States

- Challenges in US water – how Essential is responding
- Guidance intact; bond proxy status unaltered
- Maintain Buy rating and USD50 target price

Growth strategy: Essential Utilities has a 3-pronged growth strategy: A growing core water and wastewater business; opportunistic pursuit of large, regulated utility/infrastructure targets – the company delivered on this with the Peoples gas acquisition (recently completed) and the DELCORA waste water transaction, which is expected to complete regulatory approvals by 2022; and MBAs (Market Based Activities), which are probably going to be less of a priority given the current challenges.

COVID-19 challenges: We analyse the risks to Essential from COVID-19 – many of these are mitigated by its large residential customer base. During its Q1 earnings call, management explained that the Peoples acquisition had been completed on the day that the US went into COVID-19 lockdown. This was a catalyst for harmonising business practices across the two separate businesses, so corporate integration might be quicker than otherwise expected. Its 2020 guidance remains: 2020 EPS of USD1.53 to USD1.58, and 2019-22e earnings CAGR of 5% to 7%.

Bond proxy: Essential's share price has outperformed the S&P 500 by 1% since 1 January 2019. It is trading at a discount to its water peer group's 2020e PE, but in line with some of the US electricity utilities, according to Refinitiv Datastream. This reflects, in our view, its multi-utility status. The US Treasury 10-year yield has fallen sharply. WTRG, as a defensive utility, should be inversely correlated to bond yields.

Maintain Buy rating and target price of USD50: We value Essential Utilities via three methodologies: DCF, dividend yield, and the average of PE multiple and rate-based valuations: We now adopt a lower 2.5% risk-free rate (from 3.0%) set by our equity strategists and used for the other US utilities under our coverage. We maintain our equity risk premium and beta assumptions of 3% and 0.60, respectively. Our DCF valuation increases to USD50.0 (from USD41.1). In our PE multiple-based valuation, we maintain our target multiple in line with market peers, at 30.0x. We use an unchanged water peer group P/B of 2.4x as a proxy for a rate-base valuation. This is consistent with the US utilities under our coverage and a proxy for EV. The average of our PE and rate-based valuations adjusts to USD51.6 (from USD51.9). For our Yield-based valuation, we increase our target yield to 2.13% from 1.75%, in line with Water and Related Utilities peers. This results in a lower Yield-based valuation of USD47.5 (from USD57.8). Overall, these valuations lead to an unchanged TP of USD50.00, which implies 21.0% upside. Consequently, we maintain our Buy rating.

Current challenges a catalyst for integration

- Challenges in US water – how Essential is responding
- Guidance intact; bond proxy status unaltered
- Maintain Buy rating and USD50 target price

Investment summary: Three-pronged approach

Essential Utilities has core competencies in infrastructure investment (pipes and water production plant), regulatory affairs, and operations. Using these as pillars, Essential has created a 3- pronged growth strategy:

1. Municipal initiative: A growing core water and wastewater business - Aqua. This remains the primary focus for the company;
2. Strategic M&A: Opportunistic pursuit of large, regulated utility/infrastructure targets – the company delivered on this with the Peoples gas acquisition (recently completed) and the DELCORA waste water transaction, which is expected to complete regulatory approvals by 2022.
3. MBAs (Market Based Activities): Complementary to the regulated businesses. Capitalises on broader infrastructure renewals, but are probably going to be less of a priority given the current challenges.

Customer composition at FY2019

Quick integration

During its Q1 earnings call, management explained that the Peoples acquisition had been completed on the day that the US went into COVID-19 lockdown. This was a catalyst for harmonising business practices across the two separate businesses in order to protect staff, and continue to deliver essential services. This has meant that corporate integration might be quicker than otherwise expected for the two companies.

COVID-19 pandemic related risks for US water and gas utilities

Essential Utilities is a stable company with regulated revenue base. However, it is not completely immune to the impending economic downturn. We highlight some of these risks as follows, how material they are, and discuss how the company is addressing and mitigating them.

- **Customer delinquencies:** Water and gas utilities are expected to experience an increase in customers being delinquent in paying their water bills. However, water utilities will have to continue to provide water to these delinquent customers rather than enact shut-offs. Hence, companies will incur additional costs.
- **Revenue shortfall:** US utilities are likely to experience some revenue shortfall due to declines in commercial, industrial, and institutional water consumption. This revenue shortfall may be offset by an increase in residential user charge revenue due to “stay-at-home” orders. Essential receives only 20% of its revenues from commercial and industrial customers. In April, according to management on the Q1 call, the company saw increased domestic demand from the shutdown offsetting much of the commercial and industrial volume reductions. The same principle applied in the Peoples business.
- **Reduced system development charges:** The COVID-19 crisis may slow the growth in new development and housing starts, which will impact the financial losses of water and gas utilities. A slowing of new customer growth would reduce new system development. Essential however, given its scale, still has growth from infrastructure rehabilitation for its existing customer rate base.
- **Increased personnel expenses:** There may well be some potential for additional costs associated with the pandemic such as for PPE. The company said during the Q1 that these expenses are relatively immaterial.
- **Delayed and reduced capital expenditures:** At Q1, management said only cUSD30m of project work had been delayed compared with its cUSD1bn of capital expenditure run rate.
- **Deferred water and gas rate increases:** Utilities may also experience future revenue losses as a result of deferrals of planned rate increases. These deferrals may exacerbate community economic impacts by further reducing utility capital spending and put the utility sector further behind in addressing its capital infrastructure needs. Essential has pending rate cases in Indiana, New Jersey, North Carolina, and Ohio, with total annualised revenue increase of USD10.1m. Rate cases appear to be proceeding on track and there is no indication of deferrals as yet. Given the rate cases proposed are relatively modest we do not see this as a risk.

Q1 2020 summary

Essential Utilities hosted a conference call for Q1 2020 earnings on 7 May 2020.

- Essential invested USD118.7m in the first three months. This does not include an additional USD53.5m that was invested by Peoples.
- It closed its acquisition of the water system of Campbell, Ohio; a utility with approximately 3,100 customer connections. For the quarter, customer growth for the company's water utilities totalled 0.6%, including organic growth.
- As a preventive measure to address liquidity concerns related to COVID-19 and its potential economic and capital markets impacts, the company secured and borrowed an additional USD500m on a 364-day term loan in early April 2020.

Outlook: FY2020 outlook reiterated

Essential reiterated its FY2020 outlook as follows:

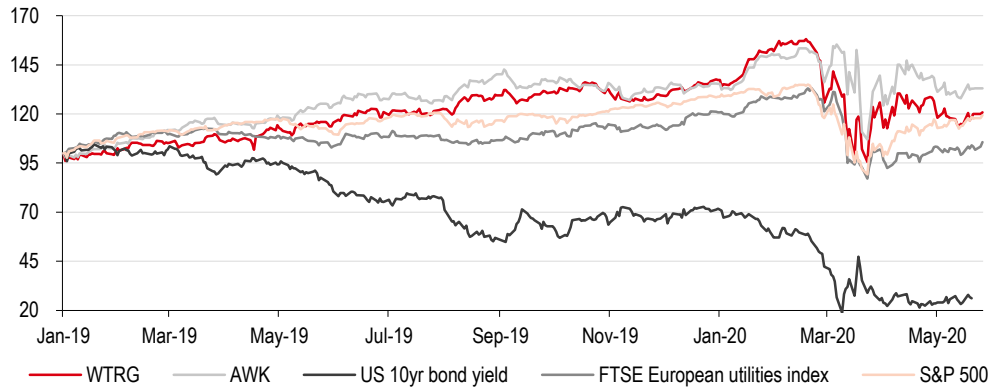
- Essential has signed purchase agreements for other municipal water and wastewater acquisitions that are expected to add the equivalent of over 205,000 water and wastewater retail customers, and approximately USD327m in expected rate base.
- Adjusted income per diluted common share (non-GAAP) of USD1.53 to USD1.58
- 2019-22e earnings CAGR of 5 to 7%
- Regulated water segment infrastructure investments of cUSD550m in 2020
- Regulated natural gas segment infrastructure investments of cUSD400m in 2020 on a full-year basis (adjusted to include capital invested in 2020 prior to Essential's ownership)
- Infrastructure investments of approximately USD2.8bn through 2022 in existing operations to rehabilitate and strengthen water, wastewater, and natural gas systems (including regulated natural gas segment capital invested in 2020 prior to Essential's ownership)
- 2019-22e regulated water segment rate base CAGR of 6% to 7%
- 2019-22e regulated natural gas segment rate base CAGR of 8 to 10%
- Total annual regulated water segment customer growth of between 2% and 3% on average depending upon regulatory approval
- Gas customer count expected to be relatively stable for 2020.

Performance against peers

Essential's share price has outperformed the S&P 500 by 2% since 1 January 2019. It is trading at a discount to its water peer group's 2020e PE, but in line with some of the US electricity utilities according to Refinitiv Datastream. This reflects, in our view, its multi-utility status.

The US Treasury 10-year yield has fallen sharply. WTRG, as a defensive utility, should be inversely correlated to bond yields.

WTRG vs AWK vs UST 10yr bond yield vs FTSE European utilities index vs S&P500



Source: Refinitiv Datastream

Credit metrics analysis

According to Moody's, WTRG needs to maintain its RCF/ net debt ratio in the range of 7%-14% and FFO/ net debt in the range of 11%-18% to maintain its Baa2 credit rating.

During the Q1 2020 conference call, Essential said that as the equity markets recover, the company will look for the appropriate time to issue approximately USD300m of equity in later 2020 or early 2021. That equity, as first mentioned on the Investor Day, is necessary to appropriately capitalise DELCORA and other acquisitions in the pipeline.

We have modelled for this equity issuance as well as completion of this acquisition in 2021. Given the increased equity, the company's credit metrics appear to remain in the target metric range for the current credit rating.

Credit metrics analysis

	2020e	2021e	2022e
RCF/ net debt	8.6%	8.5%	8.3%
FFO/ net debt	14.5%	14.3%	14.0%

Source: HSBC estimates

Change in estimates

We have updated our estimates post the Q1 2020 results posted on 7 May 2020. We have also updated our model for USD300m of equity offering, which has increased our number of shares outstanding and lowered our net debt assumptions for 2021e.

We continue to use pro-forma 2020 assumptions to smooth the effect of the costs and timing of the Peoples deal, excluding transaction costs and assuming the deal was completed to benefit from the gas heating season on a normalised weather basis. This is the basis on which Essential will report its underlying results.

Valuation and risks

We value Essential Utilities via three methodologies: DCF, dividend yield, and the average of PE multiple and rate-based valuations. Taking the average of the three approaches gives us our target price of USD50.00 (unchanged).

- Previously we had used a 3% risk-free rate, in line with the utility methodology set out in our report *European Utilities: The three Rs: Renewables, low rates and low risk* (20 February 2020). We now adopt the lower HSBC 2.5% set by our equity strategists (see *Cost of Equity*, 10 February 2020) and used for other US utilities under our coverage. Our equity risk premium and beta assumptions remain unchanged at 3% and 0.60, respectively. Our DCF valuation increases to USD50.0 (from USD41.1).
- In our PE multiple-based valuation, we maintain our target multiple in line with market peers, at 30.0x. We use a water peer group P/B of 2.4x (unchanged) as a proxy for a rate-based valuation. This is consistent with all US utilities under our coverage and is a proxy for EV. The average of the two declines to USD51.6 (from USD51.9), reflecting our updated estimates.
- For our Yield-based valuation, we increase our target yield to 2.13% from 1.75%, in line with its Water and Related Utilities peers. This results in a decreased Yield valuation of USD47.5 (from USD57.8).

Overall, these changes lead to an unchanged TP of USD50.00, which implies 21.0% upside; we reiterate our Buy rating as we believe the combination of regulated investment and earnings growth is attractive.

Summary of valuation (USD)

Particulars	New	Previous
Current price as on 26-May-20	**41.3**	**NA**
DCF (updated estimates lower risk-free rate	50.0	41.1
Yield 2.13% from 1.75% (sector average)	47.5	57.8

Source: HSBC estimates

Downside risks include:

Essential Utilities failing to achieve the desired rate case revisions and infrastructure surcharges; lacking organic growth from asset replacement; inability to take advantage of the Fair Market Value legislation opportunity; dividend growth at a lower rate than we assume; inability to gain the Fair Market Value premium required in the systems it wants to acquire in Pennsylvania. Its current acquisitions of systems – New Garden and Limerick – are facing challenges to the premium proposed by Aqua.

Important disclosures

Equities: Stock ratings and basis for financial analysis

HSBC and its affiliates, including the issuer of this report ("HSBC") believes an investor's decision to buy or sell a stock should depend on individual circumstances such as the investor's existing holdings, risk tolerance and other considerations and that investors utilise various disciplines and investment horizons when making investment decisions. Ratings should not be used or relied on in isolation as investment advice. Different securities firms use a variety of ratings terms as well as different rating systems to describe their recommendations and therefore investors should carefully read the definitions of the ratings used in each research report. Further, investors should carefully read the entire research report and not infer its contents from the rating because research reports contain more complete information concerning the analysts' views and the basis for the rating.

From 23rd March 2015 HSBC has assigned ratings on the following basis:

The target price is based on the analyst's assessment of the stock's actual current value, although we expect it to take six to 12 months for the market price to reflect this. When the target price is more than 20% above the current share price, the stock will be classified as a Buy; when it is between 5% and 20% above the current share price, the stock may be classified as a Buy or a Hold; when it is between 5% below and 5% above the current share price, the stock will be classified as a Hold; when it is between 5% and 20% below the current share price, the stock may be classified as a Hold or a Reduce; and when it is more than 20% below the current share price, the stock will be classified as a Reduce.

Our ratings are re-calibrated against these bands at the time of any 'material change' (initiation or resumption of coverage, change in target price or estimates).

Upside/Downside is the percentage difference between the target price and the share price.

Prior to this date, HSBC's rating structure was applied on the following basis:

For each stock we set a required rate of return calculated from the cost of equity for that stock's domestic or, as appropriate, regional market established by our strategy team. The target price for a stock represented the value the analyst expected the stock to reach over our performance horizon. The performance horizon was 12 months. For a stock to be classified as Overweight, the potential return, which equals the percentage difference between the current share price and the target price, including the forecast dividend yield when indicated, had to exceed the required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). For a stock to be classified as Underweight, the stock was expected to underperform its required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). Stocks between these bands were classified as Neutral.

*A stock was classified as volatile if its historical volatility had exceeded 40%, if the stock had been listed for less than 12 months (unless it was in an industry or sector where volatility is low) or if the analyst expected significant volatility. However, stocks which we did not consider volatile may in fact also have behaved in such a way. Historical volatility was defined as the past month's average of the daily 365-day moving average volatilities. In order to avoid misleadingly frequent changes in rating, however, volatility had to move 2.5 percentage points past the 40% benchmark in either direction for a stock's status to change.

Rating distribution for long-term investment opportunities

As of 27 May 2020, the distribution of all independent ratings published by HSBC is as follows:

Buy	55%	(31% of these provided with Investment Banking Services)
Hold	37%	(31% of these provided with Investment Banking Services)
Sell	8%	(22% of these provided with Investment Banking Services)

For the purposes of the distribution above the following mapping structure is used during the transition from the previous to current rating models: under our previous model, Overweight = Buy, Neutral = Hold and Underweight = Sell; under our current model Buy = Buy, Hold = Hold and Reduce = Sell. For rating definitions under both models, please see "Stock ratings and basis for financial analysis" above.

For the distribution of non-independent ratings published by HSBC, please see the disclosure page available at http://www.hsbcnet.com/gbm/financial-regulation/investment-recommendations-disclosures.

HSBC Securities (USA) Inc. accepts responsibility for the content of this research report prepared by its non-US foreign affiliate. All U.S. persons receiving and/or accessing this report and wishing to effect transactions in any security discussed herein should do so with HSBC Securities (USA) Inc. in the United States and not with its non-US foreign affiliate, the issuer of this report.

In Singapore, this publication is distributed by The Hongkong and Shanghai Banking Corporation Limited, Singapore Branch for the general information of institutional investors or other persons specified in Sections 274 and 304 of the Securities and Futures Act (Chapter 289) ("SFA") and accredited investors and other persons in accordance with the conditions specified in Sections 275 and 305 of the SFA. Only Economics or Currencies reports are intended for distribution to a person who is not an Accredited Investor, Expert Investor or Institutional Investor as defined in SFA. The Hongkong and Shanghai Banking Corporation Limited, Singapore Branch accepts legal responsibility for the contents of reports pursuant to Regulation 32C(1)(d) of the Financial Advisers Regulations. This publication is not a prospectus as defined in the SFA. This publication is not a prospectus as defined in the SFA. It may not be further distributed in whole or in part for any purpose. The Hongkong and Shanghai Banking Corporation Limited Singapore Branch is regulated by the Monetary Authority of Singapore. Recipients in Singapore should contact a "Hongkong and Shanghai Banking Corporation Limited, Singapore Branch" representative in respect of any matters arising from, or in connection with this report. Please refer to The Hongkong and Shanghai Banking Corporation Limited Singapore Branch's website at www.business.hsbc.com.sg for contact details.

In Australia, this publication has been distributed by The Hongkong and Shanghai Banking Corporation Limited (ABN 65 117 925 970, AFSL 301737) for the general information of its "wholesale" customers (as defined in the Corporations Act 2001). Where distributed to retail customers, this research is distributed by HSBC Bank Australia Limited (ABN 48 006 434 162, AFSL No. 232595). These respective entities make no representations that the products or services mentioned in this document are available to persons in Australia or are necessarily suitable for any particular person or appropriate in accordance with local law. No consideration has been given to the particular investment objectives, financial situation or particular needs of any recipient.

This publication has been distributed in Japan by HSBC Securities (Japan) Limited. It may not be further distributed, in whole or in part, for any purpose. In Hong Kong, this document has been distributed by The Hongkong and Shanghai Banking Corporation Limited in the conduct of its Hong Kong regulated business for the information of its institutional and professional customers; it is not intended for and should not be distributed to retail customers in Hong Kong. The Hongkong and Shanghai Banking Corporation Limited makes no representations that the products or services mentioned in this document are available to persons in Hong Kong or are necessarily suitable for any particular person or appropriate in accordance with local law. All inquiries by such recipients must be directed to The Hongkong and Shanghai Banking Corporation Limited. In Korea, this publication is distributed by The Hongkong and Shanghai Banking Corporation Limited, Seoul Securities Branch ("HBAP SLS") for the general information of professional investors specified in Article 9 of the Financial Investment Services and Capital Markets Act ("FSCMA"). This publication is not a prospectus as defined in the FSCMA. It may not be further distributed in whole or in part for any purpose. HBAP SLS is regulated by the Financial Services Commission and the Financial Supervisory Service of Korea. This publication is distributed in New Zealand by The Hongkong and Shanghai Banking Corporation Limited, New Zealand Branch incorporated in Hong Kong SAR. This document is not and should not be construed as an offer to sell or the solicitation of an offer to purchase or subscribe for any investment. HSBC has based this document on information obtained from sources it believes to be reliable but which it has not independently verified; HSBC makes no guarantee, representation or warranty and accepts no responsibility or liability as to its accuracy or completeness. The opinions contained within the report are based upon publicly available information at the time of publication and are subject to change without notice. From time to time research analysts conduct site visits of covered issuers. HSBC policies prohibit research analysts from accepting payment or reimbursement for travel expenses from the issuer for such visits. Nothing herein excludes or restricts any duty or liability to a customer which HSBC has under the Financial Services and Markets Act 2000 or under the Rules of FCA and PRA. A recipient who chooses to deal with any person who is not a representative of HSBC in the UK will not enjoy the protections afforded by the UK regulatory regime. Past performance is not necessarily a guide to future performance. The value of any investment or income may go down as well as up and you may not get back the full amount invested. Where an investment is denominated in a currency other than the local currency of the recipient of the research report, changes in the exchange rates may have an adverse effect on the value, price or income of that investment. In case of investments for which there is no recognised market it may be difficult for investors to sell their investments or to obtain reliable information about its value or the extent of the risk to which it is exposed.

In Canada, this document has been distributed by HSBC Securities (Canada) Inc. (member IIROC), and/or its affiliates. The information contained herein is under no circumstances to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed judgment upon these materials, the information contained herein or the merits of the securities described herein, and any representation to the contrary is an offense. In Brazil, this document has been distributed by HSBC Brasil S.A. – Banco de Investimento ("HSBC Brazil"), and/or its affiliates. As required by Instruction No. 598/18 of the Securities and Exchange Commission of Brazil (Comissão de Valores Mobiliários), potential conflicts of interest concerning (i) HSBC Brasil and/or its affiliates; and (ii) the analyst(s) responsible for authoring this report are stated on the chart above labelled "HSBC & Analyst Disclosures".

HSBC Bank plc is registered in England No 14259, is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority and is a member of the London Stock Exchange. (070905)

If you are an HSBC Private Banking ("PB") customer with approval for receipt of relevant research publications by an applicable HSBC legal entity, you are eligible to receive this publication. To be eligible to receive such publications, you must have agreed to the applicable HSBC entity's terms and conditions ("KRC Terms") for access to the KRC, and the terms and conditions of any other internet banking service offered by that HSBC entity through which you will access research publications using the KRC. Distribution of this publication is the sole responsibility of the HSBC entity with whom you have agreed the KRC Terms.

If you do not meet the aforementioned eligibility requirements please disregard this publication and, if you are a customer of PB, please notify your Relationship Manager. Receipt of research publications is strictly subject to the KRC Terms, which can be found at https://research.privatebank.hsbc.com/ – we draw your attention also to the provisions contained in the Important Notes section therein.

First Read

Essential Utilities Inc

Q1'20 EPS $0.60 vs. Consensus $0.60

What happened?

Essential Utilities reported adjusted normalized operating earnings for Q1'20 of $0.60/share. This compares reasonably well with both consensus and UBS estimates of $0.60 and $0.62, respectively. The adjusted and normalized nature of the earnings reflect the closure of the Peoples Gas acquisition on March 16, resulting in 15 days of actual earnings from that subsidiary, and 75 days of estimated assumed normalized earnings. GAAP earnings for the quarter were $0.20. Full year 2020 guidance, which is premised on the same estimated adjusted normalized basis, was affirmed at $1.53-$1.58, as was the long term earnings growth target of 5-7%.

Regulatory & Acquisition Update:

In conjunction with its earnings release, WTRG updated investors on both its ongoing regulatory calendar and water segment acquisitions. With regard to regulatory activities, the company has completed rate case and surcharge proceedings in IL/VA/OH/NC (representing $5.2mm of annualized revenue increases) and has pending cases in IN/NJ/NC/OH (representing $10.1mm of potential annualized increases). The repairs tax benefit in the quarter totalled $5.9mm, the company will be filing for treatment of the 'catch-up' portion over the summer, this 'catch-up' component is not included in current guidance. Year-to-date, WTRG has closed one acquisition (Campbell – rate base $7.5mm) and three acquisitions are pending (New Garden – rate base $29mm/East Norriton – rate base $21mm/DELCORA – rate base $276mm). Management indicated that they continue to see additional, larger, acquisition opportunities.

Operational Update:

Despite a slight pause on some construction projects (PA) management believe they are on track to achieve their capital spending plan for the year of $1.1 billion (water $550mm/gas $400mm). WTRG continues to see potential capital spending opportunities totalling $2.8 billion through 2022.

Valuation:

The unique nature of 2020 guidance and reporting format make interpretation difficult, however, investors should take comfort in the operating performance of the company.

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 3.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Forecast returns

Forecast price appreciation	+5.7%
Forecast dividend yield	2.5%
Forecast stock return	+8.2%
Market return assumption	5.2%
Forecast excess return	+3.0%

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.
Our price target is premised upon a 3% discount to the 2021 average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 6% premium to reflect operations in six Fair Market Value states, and 9% discount to reflect impact of lower P/E associated with gas earnings.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 07 May 2020 06:36 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	48%	32%
Neutral	FSR is between -6% and 6% of the MRA.	40%	28%
Sell	FSR is > 6% below the MRA.	13%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 March 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the [European Central Bank (ECB)] and regulated by the BaFin and the ECB. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Securities France S.A. UBS Securities France S.A. is regulated by the ACPR (Autorité de Contrôle Prudentiel et de Résolution) and the Autorité des Marchés Financiers (AMF). Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS") with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliarios Ltda, UBS Asesores Mexico, S.A. de C.V., UBS Securities Japan Co., Ltd, UBS Wealth Management Israel Ltd and UBS Menkul Degerler AS are affiliates of UBS AG. UBS Financial Services Incorporated of Puerto Rico is a subsidiary of UBS Financial Services Inc. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain and does not undertake banking or investment business activities in Bahrain. Therefore, clients have no protection under local banking and investment services laws and regulations. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This research report is neither intended to be distributed to PRC investors nor to provide securities investment consultancy services within the territory of PRC. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Supervisory Authority. **France**: This publication is distributed by UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, 69, boulevard Haussmann F-75008 Paris, R.C.S. Paris B 421 255 670, to its clients and prospects. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code Monétaire et Financier", regulated by French banking and financial authorities as the "Autorité de Contrôle Prudentiel et de Résolution." **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a

credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Greece**: UBS Switzerland AG and its affiliates (UBS) are not licensed as a bank or financial institution under Greek legislation and do not provide banking and financial services in Greece. Consequently, UBS provides such services from branches outside of Greece, only. This document may not be considered as a public offering made or to be made to residents of Greece. **Hong Kong**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **Indonesia, Malaysia, Phillipines, Thailand**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **India**: UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. Essential Utilities, Inc.

WTRG: M&A In Focus – Close Pending Wastewater Deals w/ New Ones Imminent

Overweight/$47

Water Utilities

Price Target Change

- **Key Points.** WTRG reported solid Q3'20 results aided by higher residential water usage due to favorable weather and COVID has FY2020 EPS trending towards top end of the $1.53-1.58 guidance range. In addition, management indicated roughly $70M of additional tuck-in deals were expected to be announced by YE2020. For our part, we increase our 20E EPS accordingly to $1.58 from $1.56 and bump up our '22 & beyond M&A placeholder to $75M/year of deals rather than $60M given the continued positive momentum on that front. Our 2021-24E EPS of $1.65, $1.78, $1.91 & $2.03 reflects a mid-'21 DELCORA close and results in a 6.6% CAGR off the '19 base of $1.47. If we were to strip out the DELCORA deal, it only has a modest $0.03-0.05 impact (less than 3%) on our '22 & beyond EPS. We reiterate our Overweight rating and increase our 12-18 month price target to $47/share (26.4X our 22E EPS) from $45.
- **Water/Wastewater M&A Update.** In addition to getting the $363M of pending deals closed (represents $0.07 of incremental EPS power), management indicated a handful of new deals are expected to be announced by YE'20 representing $70M of rate base and roughly 10,000 customers. Overall, WTRG is actively pursuing (i.e. having dialogue) municipal acquisition opportunities representing 360,000 customers, the majority of which are wastewater. Management expects the level of discussions/deals to be positively impacted by COVID as municipalities face additional financial and operational challenges and we remain optimistic that efforts could start to bear meaningful fruit in WTRG's states that have more recently adopted fair market value legislation (NC, OH, TX & VA) – we note that WTRG is the deepest-pocketed IOU in NC, OH & TX.
- ***DELCORA – The Latest.*** Much investor attention on the Q3 call was understandably on the pending $277M DELCORA wastewater deal that is potentially at risk due to a court challenge by Delaware County's County Council. Hearings were recently completed on the legality of the trust aspect DELCORA's plan and the more important hearings related to the enforceability of the asset purchase agreement (does WTRG have a valid deal?) are expected in the next few weeks. A ruling from the judge in the Court of Common Pleas of Delaware County is expected within 60 days of the hearing. That said, the judge continues to encourage parties to reach a settlement. ***While WTRG management was unable to confirm whether or not settlement discussions are taking place, the company remains confident in the ability to close the deal perhaps by late March or April.*** This is consistent with the PaPUC approval process were evidentiary hearings are scheduled next week and the statutory deadline for a decision is 3/26/21. ***(comments continue on p. 2.)***

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Together we'll go far

- ***DELCORA – The Latest (continued…).*** While the DELCORA deal is highly supportive of WTRG's growth aspirations and management continues to express confidence in the ability to close the transaction, we consider the future to be bright without it driven by elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends. We believe relatively low risk, regulated EPS growth of at least 6% is achievable – that rate of growth would simply be enhanced if DELCORA closes, particularly in the later part of our 5-year forecast and beyond, given the $700M of required investment needed in the system by 2028 as well as potential further municipal wastewater deals in the region.

- ***Lower Makefield Township.*** An agreement to acquire the 11,000 connection wastewater system in Bucks County, PA for $53M was announced on 9/24. The deal is subject to PaPUC approval – which we expect will be received – and therefore closure probably is not likely until Q4'21. We view the deal as highly supportive of our EPS outlook as it essentially fills in our full year '21 M&A placeholder of $60M.

Other Q3 Call Nuggets.

- **No Gas M&A** – Management made it clear that all M&A efforts are focused on the water/wastewater platform. No M&A expansion on the gas utility side is being contemplated. That said and despite gas utilities being largely out of favor with investors given anti-gas sentiment (existential threat?) in some parts of the country, management defended the Peoples deal and outlined the why the future is bright for the Western PA utility (and brighter than most other gas LDCs). We largely agree with management's arguments and our positive investment thesis and price target reflect it.

- **ESG** – Appealing to ESG investors/rating agencies is a priority. Management believes the company has made great strides in recent years with plans to further improve and therefore has a good story to tell. WTRG plans to establish credible, meaningful and attainable emissions reduction goals for Peoples within 6 months.

- **Peoples Repairs Tax** – No real updates on this front since WTRG filed in early August for PaPUC treatment of the catch up portion of the Peoples repairs tax deduction election. The filing outlined a $381M catch up deduction and proposed to share the benefits between customers (40%, via a 2% bill surcredit over 2021-24) and shareholders (60%, via an increasing income tax expense offset over 2023-25). If approved, a base rate increase would not be needed prior to 1/1/2026 while supporting the elevated pace of capex deployment.

  WTRG had communications with regulators and other key parties prior to making this filing which makes us hopeful that the proposal will be positively received and that a constructive outcome will ensue. The timing of a potential settlement could be before the evidentiary hearings in late January take place. Whether WTRG settles or the hearings occur and the proceeding is fully litigated, management believes a final decision is likely an early Q2'21 event.

  Approval of the shareholder benefit aspect of the request would increase our confidence in the gas utilities' ability to achieve our forecast – we assume gas utility earned ROEs of 10-10.3% which we believe is reasonable and consistent with Peoples 2019 rate order. On the flip side, if the PaPUC decides to go a different direction with the catchup benefits, we still believe our 2023 & beyond EPS levels are reasonable within the backdrop of the constructive PA regulatory framework. It could simply necessitate filing for a base rate increase sooner which would bring with it associated regulatory risk.

Acronyms:
DELCORA – Delaware Country Regional Water Quality Control Authority
ESG – Environmental, Social, Governance
FMV – Fair Market Value
IOU – Investor Owned Utility
LDC – Local Distribution Company
PaPUC – Pennsylvania Public Utility Commission

Price Target

Price Target: $47 from $45

Our $47/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.78. For WTRG's water utility multiple, we ascribe a 5-10% discount to the 21E multiple we use for AWK (31.5-32X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The 5-10% discount reflects a modestly lower earnings growth rate (we forecast 6-7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 18X (based on ATO, NWN, OGS & SR) and then apply a 5-10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework. Key risks relate to regulatory, Peoples gas deal integration and M&A strategy execution.

Investment Thesis

Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio.

In March 2020, WTRG closed on the acquisition of Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, WTRG paid 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to other gas utility transactions at the time. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

Regulated operations account for more than 99% of consolidated revenues. Consolidated EPS is expected to be driven roughly 70% by water utility operations with the gas utility contributing the remaining 30%.

In February 2020, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Business Strategy and Outlook 11 Jun 2021

For more than 50 years, Essential Utilities--formerly Aqua America--was one of the few pure-play water utilities in the United States. But its $4.3 billion acquisition of Peoples Gas in March 2020 made the company nearly 50% larger and diversified its earnings mix.

The acquisition hasn't changed Essential's core investment proposition. Essential's gas and water utility earnings remain mostly rate regulated, and we expect management to run it like most other regulated U.S. utilities, prioritizing infrastructure investment growth and a robust dividend. Our outlook for 8% earnings growth during the next five years is a little higher than our growth outlook for most other U.S. utilities.

Although core retail water use has been falling steadily as a result of efficiency savings for several decades, Essential has been able to grow earnings and the dividend for many years. Like many utilities, Essential is replacing and upgrading infrastructure that is decades old across its system, resulting in organic rate base growth. We also expect Essential to grow by acquiring small, typically municipal-owned water systems. In the U.S., 85% of the population is served by a municipal water utility, offering a long runway of acquisition growth opportunities.

Similarly, we expect little natural gas usage growth at Peoples Gas, which had been owned by a private equity group. But the gas business still should produce steady earnings growth as Essential replaces and upgrades the system infrastructure.

Fair market value laws in several states support Essential's water business acquisition strategy. These laws require Essential to pay municipalities at least the assessed value of the system it acquires and allow Essential to add these assets to rate base at the assessed value rather than historical cost. The municipalities benefit by ensuring they get fair prices, and Essential shareholders benefit by ensuring the company doesn't overpay for growth. In many cases, these deals are immediately value-accretive. Recent FMV legislation in Kentucky and West Virginia opens acquisition opportunities near areas Essential already serves.

Profile

Essential Utilities is a Pennsylvania-based holding company for U.S. water, wastewater, and natural gas distribution utilities. The company's water business serves 3 million people in eight states. Nearly three fourths of its water earnings come from Pennsylvania, primarily suburban Philadelphia. It also has a small market-based water business that provides water and water services to third parties, notably natural gas producers. Its $4.3 billion Peoples Gas acquisition that closed in March 2020 adds 750,000 gas distribution customers in Pennsylvania, West Virginia, and Kentucky.

Morningstar Analysis

Initiating Coverage of Essential Utilities With Narrow Moat, $39 Fair Value 11 Jun 2021

We are initiating coverage of Essential Utilities with a $39 per share fair value estimate, narrow moat rating, and stable moat trend.

We consider the stock 23% overvalued based on the $48 stock price as of June 11. The stock trades at 28 times our 2021 earnings estimate, a 30% premium to the current median U.S. utilities P/E. Although we think Essential deserves a premium valuation relative to electric and gas utilities because of its higher returns on capital and growth potential in the water business, we think investors should wait for a pullback. Its closest peer, American Water Works, trades at a 30% premium to our fair value estimate and 38 P/E.

Essential, formerly Aqua America, was one of the few pure-play U.S. water distribution and wastewater utilities before acquiring Pennsylvania-based Peoples Gas in 2020. The company now gets two thirds of its earnings from its water business and one third of earnings from gas distribution.

The $4.3 billion Peoples Gas acquisition doesn't change Essential's core regulated utility business model, but we think it was a setback for investors. Essential paid more than double book value for the business, which has good near-term growth potential but long-term uncertainty as the U.S. moves away from fossil fuels. We think that capital would have been better spent growing its water businesses.

Our five-year, 8% annual earnings growth outlook tops most other U.S. utilities' outlooks. We think the water business has long, attractive runway of growth mostly through acquisitions of municipal utilities. Fair market value laws in some states allow Essential to mark up book value on its water acquisitions, eliminating the risk of overpaying.

We expect Essential to continue its impressive dividend growth track record. The company has paid a dividend every year since 1945 and has raised the dividend by 5% or more every year for the last 25 years. We consider management's 65% payout target more attractive than its peers.

Fair Value & Profit Drivers 11 Jun 2021

We are initiating coverage of Essential Utilities with a $39 per share fair value estimate.

We expect earnings to grow 8% annually during the next four years, which is above management's 5%-7% annual earnings growth target. Our growth rate is based on $1 billion of annual capital investment and $150 million of water utility acquisitions per year, on average. Our growth rate is higher than management's target range primarily due to our assumption that Essential will find more acquisition opportunities than it has in the past. We think the spread of fair market value legislation and increasing need for system investments will lead more municipal utilities to consider selling their systems.

Apart from acquisitions, the combination of surcharges and base rate increases support our earnings growth outlook. This includes favorable outcomes for likely base rate reviews in Pennsylvania, its largest service territory, in 2022-23.

In our discounted cash flow valuation, we use a 6.0% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand of a diversified equity portfolio, reflecting Essential's lesser sensitivity to the economic cycle and lower degree of operating leverage. We incorporate $5 per share of incremental value to better recognize the benefits accruing to shareholders from Essential having issued debt at coupon rates far below our long-term cost of debt assumption.

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
48.86 USD	39.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Scenario Analysis

In our bear case, a 20% annual reduction in our 2021-24 capital expenditure forecast would lower our fair value estimate by $2 per share. A 50-basis-point cut in our long-term allowed regulatory return on equity assumption would reduce our fair value an additional $3 per share.

In our bull case, a 20% increase in our capital spending assumption would raise our fair value estimate by $2 per share, assuming full regulatory support at current allowed returns. A 50 basis-point increase in our long-term allowed regulatory return on equity assumption would add another $3 per share.

A 50-basis-point change in our cost of equity assumption would lead to a $2 per share change in our fair value estimate.

Economic Moat

We have greater than 50% confidence that Essential can generate economic profits on a consolidated basis for at least the next 10 years based on its efficient scale competitive advantage for its water, wastewater, and natural gas distribution businesses. Essential Utilities' consolidated returns are the foundation for our narrow moat rating.

We have strong confidence that Essential's returns on invested capital will remain at a healthy spread over its weighted average cost of capital for the foreseeable future, leading us to assign the company a narrow moat rating. Essential owns a difficult-to-replicate network of water, wastewater, and natural gas distribution infrastructure that provides essential energy sources to customers. In exchange for a service territory monopoly, state and federal regulators set rates for Essential's water distribution, wastewater, and natural gas distribution utilities at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utilities should, in the long run, allow Essential to earn a consistent spread over its cost of capital. Rate-setting mechanisms in the states that Essential serves are mostly constructive, leading to ROICs modestly above its WACC.

In the water distribution and wastewater businesses, Essential enjoys fair market value legislation in seven of the eight states where it has operations. This allows Essential to ensure its growth acquisitions are value-accretive by allowing it to adjust its regulated earning asset base to reflect the deal value based on a third-party valuation. This effectively eliminates the drag on returns created by goodwill and the risk of cost overruns for organic growth investment. Essential made 57 water system acquisitions between 2015 and 2019, and goodwill represented only 1% of Essential's net asset base. Thus, Essential's earned ROICs tend to track very closely its regulatory allowed ROICs, the foundation of an economic moat for regulated utilities.

As with all regulated utilities, we think regulatory caps on revenue and returns preclude Essential from establishing a wide economic moat.

Essential Utilities Inc WTRG (NYSE) | ★★

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
48.86 USD	39.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Essential derives about 1% of earnings from businesses that have few competitive advantages, particularly its water and wastewater services. Essential exited some of these businesses in 2017, and we expect these businesses' share of earnings will continue to shrink as management focuses on growth at the regulated distribution utilities.

Moat Trend

We think Essential's moat trend is stable. We do not expect the regulatory rate structures that support earnings and ROICs for Essential's water or gas utilities to change substantially, given state laws that demonstrate the political and regulatory support for maintaining Essential's financial health, stability, and investments. We believe regulators will rely on state legislation and constructive rate plans to uphold the implicit contract with capital providers that allows Essential to earn above its cost of capital on balance, in the long run. Fair market value legislation ensures Essential's growth-by-acquisition strategy is value-accretive for shareholders.

Bulls Say/Bears Say

Bulls Say

- Constructive regulation allows Essential to raise rates through surcharges or rate cases to reduce regulatory lag and enhance cash flow available to pay the dividend and invest in growth projects.
- Fair market valuation state laws allow Essential to make municipal water utility acquisitions immediately value-accretive for shareholders.
- Essential has raised its dividend 30 times in the last 29 years, including 29 consecutive increases of more than 5%.

Bears Say

- Essential Utilities paid a peak market price for Peoples Gas, which will probably drag on consolidated returns for many years.
- Essential's capital investment plan likely means annual rate increases for most of its customers, which could cause regulatory pushback that would slow earnings growth.
- Rising interest rates could raise financing costs for Essential to fund its investments and make its dividend yield less attractive for income investors.

Financial Strength

Essential maintains a capital structure in line with its regulatory allowed capital structure for ratemaking purposes and leverage metrics in line with high investment-grade credit ratings. We don't expect that to change.We expect Essential to issue new debt to fund growth investments and acquisitions in the coming years. We don't expect any material new equity needs once it completes its $300 million equity forward sale in August. With constructive regulation, we expect Essential will be able to use its cash flow to fund most of its equity investment needs during the next five years.Essential has paid an annual dividend since 1945 and increased it at least 5% for each of the last 25 years. We think Essential will be able to continue growing the dividend at this rate or higher while staying below management's 65% maximum payout ratio threshold, which is in line with Essential's peer utilities.

Risk & Uncertainty

The biggest uncertainty for Essential is rate regulation in the states it serves. Although Essential has a long history of constructive rate regulation, customers and regulators remain sensitive to rate increases that drive Essential's earnings growth. Deterioration of regulatory relations and policies could jeopardize Essential's growth potential.Customer growth and value-accretive water acquisitions have kept earnings growing even while water use has fallen steadily for several decades. Unlike many utilities that have lobbied to decouple rates from usage trends, Essential has maintained usage-based rates to avoid potential pushback from regulators. Customer growth, tax benefits, and constructive rate regulation have more than offset unfavorable usage trends.Essential's ability to make annual rate adjustments in states it serves offsets some of the regulatory ratemaking uncertainty. These surcharges effectively eliminate regulatory lag and improve cash flow to support capital investment and dividends.Essential's large capital investment plan will require good execution to

keep projects on time and on budget. Delays or cost overruns could reduce shareholder returns.Essential also faces environmental, social, and governance risk, given its water and natural gas distribution businesses. At the water business, Essential must meet strict quality measures. It faces the risk of supplying contaminated drinking water for its customers if it has an operational failure, although we think this risk is low. Essential has invested in monitoring technology that allows it to supply water that is far cleaner than government requirements and reduces per- and polyfluoroalkyl substances, or PFAS.At the natural gas business, there is a long-term risk that policymakers will move retail customers away from gas heating, but we think that's unlikely in the near future, given the technical and economic hurdles in the colder climate where Essential operates.

Capital Allocation 11 Jun 2021

We give Essential Utilities a Standard capital allocation rating, balancing the company's long history of shareholder-friendly capital allocation in the water business with what we think was an ill-advised move into the gas business.

Essential has an impressive record of paying a dividend every year since 1945 and raising it 30 times in the last 29 years. While returning this cash to shareholders, Essential still found ways to invest in organic growth and acquisitions.

We think Essential overpaid for Peoples Gas. The equity dilution from the $4.3 billion cash price will be difficult to overcome even if everything goes perfectly. The $2.3 billion of goodwill on its balance sheet following the acquisition will remain a drag on returns. Goodwill was nearly equal to the book value of the assets.

Essential also gave up its premium market valuation with the Peoples acquisition. As one of the few pure-play water utilities, Essential was a staple in portfolios focused on environmental, social, and governance issues, especially water. Adding fossil-fuel exposure with the gas business could turn off some ESG investors. We think this would be an overreaction based on natural gas' low-carbon profile, but that's not likely to persuade strict environmentally focused investors to continue holding Essential.

CEO and chairman Chris Franklin has been in his role since 2015 and with the company for 28 years. CFO Dan Schuller joined the company in 2015.

Analyst Notes

Initiating Coverage of Essential Utilities With Narrow Moat, $39 Fair Value 11 Jun 2021

We are initiating coverage of Essential Utilities with a $39 per share fair value estimate, narrow moat rating, and stable moat trend.

We consider the stock 23% overvalued based on the $48 stock price as of June 11. The stock trades at 28 times our 2021 earnings estimate, a 30% premium to the current median U.S. utilities P/E. Although we think Essential deserves a premium valuation relative to electric and gas utilities because of its higher returns on capital and growth potential in the water business, we think investors should wait for a pullback. Its closest peer, American Water Works, trades at a 30% premium to our fair value estimate and 38 P/E.

Essential, formerly Aqua America, was one of the few pure-play U.S. water distribution and wastewater utilities before acquiring Pennsylvania-based Peoples Gas in 2020. The company now gets two thirds of its earnings from its water business and one third of earnings from gas distribution.

The $4.3 billion Peoples Gas acquisition doesn't change Essential's core regulated utility business model, but we think it was a setback for investors. Essential paid more than double book value for the business, which has good near-term growth potential but long-term uncertainty as the U.S. moves away from fossil fuels. We think that capital would have been better spent growing its water businesses.

Our five-year, 8% annual earnings growth outlook tops most other U.S. utilities' outlooks. We think the water business has long, attractive runway of growth mostly through acquisitions of municipal utilities. Fair market value laws in some states allow Essential to mark up book value on its water acquisitions, eliminating the risk of overpaying.

We expect Essential to continue its impressive dividend growth track record. The company has paid a dividend every year since 1945 and has raised the dividend by 5% or more every year for the last 25 years. We consider management's 65% payout target more attractive than its peers.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

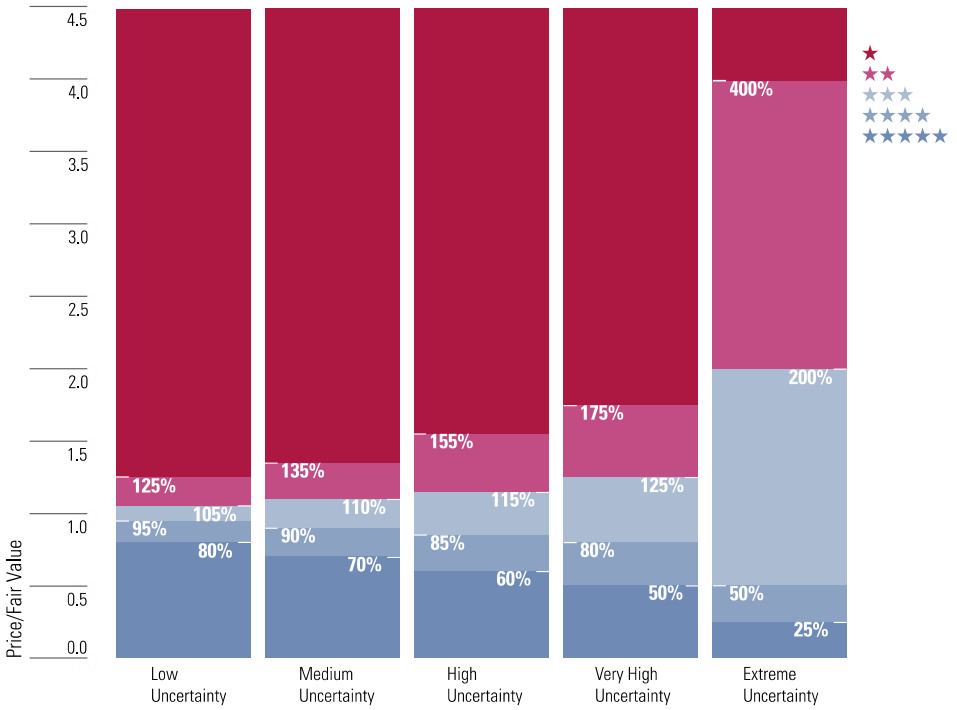
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

The analysis within this report is prepared by the person(s) noted in their capacity as an analyst for Morningstar's equity research group. The equity research group consists of various Morningstar, Inc. subsidiaries ("Equity Research Group)". In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission.

The opinions expressed within the report are given in good faith, are as of the date of the report and are subject to change without notice. Neither the analyst nor Equity Research Group commits themselves in advance to whether and in which intervals updates to the report are expected to be made. The written analysis and Morningstar Star Rating for stocks are statements of opinions; they are not statements of fact.

The Equity Research Group believes its analysts make a reasonable effort to carefully research information contained in the analysis. The information on which the analysis is based has been obtained from sources believed to be reliable such as, for example, the company's financial statements filed with a regulator, company website, Bloomberg and any other the relevant press sources. Only the information obtained from such sources is made available to the issuer who is the subject of the analysis, which is necessary to properly reconcile with the facts. Should this sharing of information result in considerable changes, a statement of that fact will be noted within the report. While the Equity Research Group has obtained data, statistics and information from sources it believes to be reliable, neither the Equity Research Group nor Morningstar, Inc.performs an audit or seeks independent verification of any of the data, statistics, and information it receives.

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

This report is for informational purposes only and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist institutional investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed and recommendations made herein may not be suitable for all investors: recipients must exercise their own independent judgment as to the
