AQUA PENNSYLVANIA, INC.
2021 RATE CASE
FILING REQUIREMENTS

G. Rate of Return

RR1. Provide capitalization and capitalization ratios for the last 5-year period and projected through the next 2 years (with short-term debt and without short-term debt) for the company, parent and consolidated system.

a. Provide year-end interest coverages before and after taxes for the last 3 years and at the latest date, including indenture and Securities and Exchange Commission (SEC) bases, for the company, parent and consolidated system.

b. Provide year-end preferred stock dividend coverages for the last 3 years and at latest date, including charter and SEC bases.

A. Please see attached Schedule RR1(a) that shows the capitalization and capitalization ratios for the last five-year period (2016-2020) with short-term debt and without short-term debt for the Company, Parent and consolidated system. The forecasts related to the Company for 2021 and 2022 are included. The forecasts related to the Parent and consolidated system for 2021 and 2022 are not available at the present time.

a. Please see attached Schedule RR1(b) that provides year-end interest coverage before and after taxes for the last three years (2018-2020), including Indenture and SEC Bases, for the Company, Parent and consolidated system.

b. There is no preferred stock outstanding for the Company, Parent and consolidated system for the last three years.

A. There is no Prospectus for the Company. Please see the attached for the latest Prospectus for the Parent, Aqua America, Inc.

PROSPECTUS

ESSENTIAL UTILITIES, INC.

Dividend Reinvestment and Direct Stock Purchase Plan

6,000,000

Shares of Common Stock

- The Plan gives you a convenient, systematic way to purchase or invest in our common stock.
- You can increase your ownership by reinvesting dividends at a discount of between 0% and 5.0%, as designated from time to time in our sole discretion, and by making optional cash investments with brokerage fees and commissions paid by us.
- You do not need to be one of our existing shareholders to participate in the Plan.
- You can own and transfer shares without holding certificates.
- You can purchase shares through an IRA with a portion of the annual maintenance fee paid by us.

IMPORTANT NOTE: Sales of shares through the Plan are subject to fees and commission charges for which you will be responsible. Please see the "Costs" section of this prospectus for further details regarding these fees and commission charges.

Our common stock is listed on the New York Stock Exchange under the symbol "WTRG." Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010-3489 and our telephone number is 610-527-8000.

Investing in our common stock involves risk. See "Risk Factors" on page 2 for certain risks to consider before participating in the Plan or purchasing shares of our common stock.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is July 24, 2020.

Essential Utilities, Inc. (“we”, “us”, “our”, “Registrant” or the “Company”), a Pennsylvania corporation, is the holding company for regulated utilities providing water, wastewater, or natural gas services to what we estimate to be almost five million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, Virginia, West Virginia, and Kentucky under the Aqua and Peoples brands. One of our largest operating subsidiaries, Aqua Pennsylvania, Inc., provides water or wastewater services to approximately one-half of the total number of water or wastewater customers we serve, who are located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated water or wastewater utility subsidiaries provide similar services in seven other states. Additionally, pursuant to the Company’s growth strategy, commencing on March 16, 2020, with the completion of the acquisition of the Peoples Gas companies, the Company began to provide natural gas distribution services to customers in western Pennsylvania, Kentucky, and West Virginia. Approximately 93% of the total number of natural gas utility customers we serve are in western Pennsylvania. Lastly, the Company’s market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources, Inc. and certain other subsidiaries of Peoples Gas. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry.

PLAN OVERVIEW

The Essential Utilities, Inc. Dividend Reinvestment and Direct Stock Purchase Plan (the "Plan") provides you with a convenient and economical way to purchase shares of our common stock and to reinvest your cash dividends in additional shares. The Plan has various features and you can select those features that meet your investment needs.

The Plan is designed for long-term investors who wish to invest and build their share ownership over time. Unlike an individual stock brokerage account, the timing of purchases and sales is subject to the provisions of the Plan.

Please read this prospectus and the documents incorporated by reference herein carefully. If you are a shareholder of record of at least 5 shares of Essential Utilities common stock and wish to participate in the Plan, please sign and execute a Dividend Reinvestment and Direct Stock Purchase Plan Enrollment Form (the "Enrollment Form"). If your shares of Essential Utilities common stock are registered in a nominee name (such as in the name of a bank, broker or other nominee), please see the "Participation and Enrollment" section below for instructions on how to have such shares participate in the Plan. Investors wishing to make an initial investment of not less than $500 should complete the Dividend Reinvestment and Direct Stock Purchase Plan Initial Enrollment Form (the "Initial Enrollment Form"). When completed, the form should be mailed to Computershare Trust Company, N.A. (the "Administrator"). Employees of Essential Utilities who wish to pay for their investment by having a portion of their compensation withheld and applied to the investment should complete the Employee Enrollment Form provided by the Company.

You can also enroll in the Plan and access your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, at any time. In addition, you can authorize one-time initial and subsequent optional cash investments or establish recurring automatic withdrawals from your U.S. bank account.

RISK FACTORS

Investing in our common stock involves risks. Please see the risk factors described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2019, filed with the Securities and Exchange Commission (the "SEC"), and are Quarterly Report on Form 10-Q for the quarter ended March 31, 2020, filed with the SEC, which are all incorporated by reference in this prospectus. Before making an investment decision, you should carefully consider these risks as well as other information contained or incorporated by reference in this prospectus.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus, or incorporated by reference into this prospectus, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue" "in the event" or the negative of such terms or similar expressions. Forward-looking statements in this prospectus, or incorporated by reference into this prospectus, include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increase requests;
- expectations regarding the impact of the acquisition of Peoples Gas, including statements regarding the impact of the transaction on the Company;
- developments, trends and consolidation in the water, wastewater and natural gas utility and infrastructure industries;
- opportunities for future acquisitions, both within and outside the water, wastewater and natural gas industries, the success of pending acquisitions and the impact of future acquisitions;
- the capacity of our water and natural gas supplies and facilities;
- the availability and cost of capital financing;
- dividend payment projections;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient fixtures and appliances on water usage and gas consumption per customer;
- our authority to carry on our business without unduly burdensome restrictions;

- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates and decisions regarding potential acquisitions;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;
- general economic conditions;
- acquisition-related costs and synergies;
- the sale of water and wastewater divisions;
- the impact of federal and/or state tax policies and the regulatory treatment of the effects of those policies;
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology; and
- the impact of COVID-19 or the measures implemented by the Company as a result of COVID-19.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- the diversion of our management's time and resources caused by integration efforts with respect to the Peoples Gas acquisition;
- our ability to manage the expansion of our business, including integrating the Peoples Gas acquisition;
- our ability to treat and supply water or collect and treat wastewater;
- our ability to source a sufficient supply of natural gas to meet demands of our gas utility customers in a timely manner;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in general economic, business, credit and financial market conditions;

- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions and seasonality effects;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- the phase-out of LIBOR, or the replacement of LIBOR with a different reference rate or modification of the method used to calculate LIBOR which may adversely affect interest rates;
- our ability to integrate businesses, technologies or services which we may acquire;
- our ability to treat and supply water or collect and treat wastewater;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services and commodity prices;
- civil disturbance or terroristic threats or acts;
- changes in accounting pronouncements;
- litigation and claims;
- changes in environmental conditions, including the effects of climate change;
- restrictions on our subsidiaries' ability to make dividends and other distributions; and
- impacts from the global outbreak of COVID-19, including on consumption and collections.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus and the documents that we incorporate by reference into this prospectus completely and with the understanding that our actual future results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans, and beliefs only as of the date of this prospectus. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. As you read this prospectus and the documents that we incorporate by reference into this prospectus, you should pay particular attention to the "Risk Factors" included in our most recent Annual Report on Form 10-K and in any filing we make with the SEC after the date of such Annual Report on Form 10-K that is incorporated by reference into this prospectus. We qualify all of our forward-looking statements by these cautionary statements.

A SUMMARY OF IMPORTANT PLAN FEATURES

- *Participation*. You may participate in the Plan if you own at least 5 shares of Essential Utilities common stock that are registered in your name. You may also participate by making an initial minimum investment of at least $500 through automatic withdrawal from your U.S. bank account, by check or by a one-time online bank debit through the Administrator's web site, *www.computershare.com/investor*. Employees of Essential Utilities who wish to pay for their investment by having a portion of their compensation withheld and applied to the investment should complete the Employee Enrollment Form provided by the Company. All U.S. citizens are eligible to join the Plan, whether or not they are currently shareholders. Foreign citizens are eligible to participate as long as their participation would not violate any laws in their home countries or other non-U.S. laws. If your shares of Essential Utilities common stock are registered in a nominee name (such as in the name of a bank, broker or other nominee), please see the "Participation and Enrollment" section below for instructions on how to have such shares participate in the Plan.

- *Automatic Dividend Reinvestment*. You can reinvest all or a portion of the cash dividends received on your first 100,000 shares toward the purchase of additional shares of our common stock, without paying trading fees or commissions. For purposes of the Plan, the term "full dividend reinvestment" means the reinvestment of dividends on all shares held by you in your name under the Plan up to a maximum of 100,000 shares.

- *Electronic Deposit of Cash Dividends*. You can authorize the Administrator to deposit your cash dividends directly into your U.S. bank account.

- *Optional Cash Investments*. As a shareholder, you can buy additional shares of our common stock at any time for as little as $50. The maximum optional cash investment you may make in any calendar year is $250,000. You can pay by check or by a one-time online bank debit through the Administrator's web site, *www.computershare.com/investor*, or have your payment automatically withdrawn from your U.S. bank account. Employees of Essential Utilities who wish to make optional cash investments should complete the Employee Enrollment Form provided by the Company.

- *IRAs*. You may establish a traditional IRA, a Roth IRA or a Coverdell Education Savings Account, which invests in common stock through the Plan. IRA contributions and rollovers do not count against a participant's $250,000 annual investment limitation. There is an annual maintenance fee of forty-five dollars ($45.00) charged by the IRA and Coverdell Education Saving Account Trustee, which we will pay for the first calendar year in which you participate. In all subsequent years, twenty-five dollars ($25.00) of this annual fee will be charged to you, with the balance paid by us.

- *Full Investment*. Full investment of your funds is possible because any initial investment and optional cash investments will be used to buy whole and fractional shares. In addition, the full dividend earned on your shares (up to the first 100,000 shares you own), including fractional shares, will be reinvested or paid out as you designate.

- *Safekeeping of Certificates*. Shares purchased through the Plan for which you request certificates to be issued will be held by the Administrator for safekeeping. You may also deposit any Essential Utilities, or previously named Aqua America, Inc. or Philadelphia Suburban Corporation, stock certificates that you hold for safekeeping, at no charge.

- *Transaction Reporting*. You will receive a statement following each transaction showing the details of, and your share balance in, your Plan account.

- *Internet Account Access*. You can also enroll in the Plan and access your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, at any time. In addition, you can authorize one-time initial and subsequent optional cash investments or establish recurring automatic withdrawals from your U.S. bank account.

ADMINISTRATION

Computershare Trust Company, N.A., administers the Plan and acts as Agent for the participants. Computershare, Inc. acts as service agent to Computershare Trust Company, N.A. in performing certain services for the Plan. These companies purchase and retain shares of our common stock for Plan participants, keep records, send statements and perform other duties required by the Plan.

For information about the Plan, you can contact the Administrator by calling toll-free:

Computershare Trust Company, N.A.	800-205-8314
Outside the United States call collect:	781-575-3100
web site address:	*www.computershare.com/investor*

All written correspondence and optional cash investments submitted without a proper investment coupon, should be submitted to:

By mail:	Computershare Trust Company, N.A. Attn.: Essential Utilities, Inc. Dividend Reinvestment and Direct Stock Purchase Plan P.O. Box 505000 Louisville, KY 40233-5000
By courier:	Computershare Trust Company, N.A. Attn.: Essential Utilities, Inc. Dividend Reinvestment and Direct Stock Purchase Plan 462 South 4th Street, Suite 1600 Louisville, KY 40202

You can contact the Essential Utilities, Inc. IRA Program Administrator by calling toll free 1-800-597-7736. All written correspondence concerning the IRA Program, should be submitted to:

By mail:	The IRA Program C/O Computershare Trust Company, N.A. P.O. Box 2175 Milwaukee, WI 53201-2175
By courier:	The IRA Program C/O Computershare Trust Company, N.A. Attn.: Essential Utilities, Inc. IRA 235 W. Galena Street Milwaukee, WI 53212-3948

Make checks payable to "Computershare-Essential Utilities" in U.S. dollars and drawn on a U.S. bank. The Administrator will not accept cash, traveler's checks, money orders or third party checks for optional cash investments. Please use the cash investment form at the bottom of your statement.

INTERNET ACCESS

You can also obtain information about your account via the Internet at the Administrator's web site, *www.computershare.com/investor*. At the web site, through Investor Center, you can access your share balance, enroll in the Plan, purchase shares (either as a one-time online bank debit or by recurring automatic monthly withdrawals from your U.S. bank account), sell shares, request a stock certificate, change dividend payment options and obtain online forms. To obtain access, click Create Log In, fill in the required information, accept the Terms & Conditions and select a User ID and password.

PARTICIPATION AND ENROLLMENT

If you already own at least 5 shares of our common stock, you are eligible to participate in the Plan.

- If your shares are registered in your name, you can enroll in the Plan through the Internet at the Administrator's web site, *www.computershare.com/investor*, or you can fill out the Enrollment Form and return it to the Administrator.

- If your shares are registered in a nominee name but you wish to participate in the Plan you should instruct your bank, broker or other nominee to have some or all of your shares registered in your name. Simply instruct your bank, broker or other nominee to transfer at least 5 of your shares of our common stock electronically through the Direct Registration System from your brokerage account to a new book-entry account at the Administrator. Please contact your bank, broker or other nominee for more information. Once at least 5 of your shares of our common stock are moved from your brokerage account to a new book-entry account registered in your name with the Administrator, you may then participate in the Plan by enrolling in the Plan as set forth above. Alternatively, you may instruct your bank, broker or other nominee to arrange to have a paper stock certificate issued to you for at least 5 of your shares of our common stock. Once at least 5 shares are registered in your name, you may participate in the Plan by enrolling in the Plan as set forth above. If the shares that you hold are in certificated form, you can deposit these certificated shares in your Plan account for safekeeping. In each instance, any fees or charges assessed by your bank or broker are your responsibility and will not be paid by us.

- If your shares are held through our retirement plans or any of our other employee benefit plans (each, an "employee benefit plan") that participate in the Plan, your participation in the Plan will be through the administrator or trustee of the applicable employee benefit plan and you will be limited to the automatic dividend reinvestment feature of the Plan only. Please contact the administrator or trustee of the employee benefit plan to determine if the plan participates in the Plan. Your participation in the Plan will be subject to the terms and conditions of the applicable employee benefit plan and the administrator or trustee of such plan.

If you do not own any shares of our common stock, or if you wish to establish a separate account, you can go to the Administrator's website, *www.computershare.com/investor*, and follow the instructions provided. You may enroll in the Plan by authorizing a one-time online bank debit from your U.S. bank account for an initial investment of at least $500 or by establishing recurring automatic withdrawals from your U.S. bank account for a minimum of $50 per transaction for at least ten consecutive months. Automatic withdrawal is further described in the "Optional Cash Investments" section of this prospectus. You can also fill out the Initial Enrollment Form and return it to the Administrator. Enclose a check, in U.S. dollars, for at least $500 or, if you are an employee of Essential Utilities and wish to pay for your purchases through the withholding of compensation, fill out the Employee Enrollment Form provided to you by the Company. You can receive an Initial Enrollment Form by contacting the Administrator through the channels outlined in the "Administration" section of this prospectus. If you wish to make your initial investment through automatic withdrawals, you must agree to continue with the withdrawals until the $500 minimum initial investment is reached. Please note, such automatic withdrawals continue indefinitely beyond the initial investment until you notify the Administrator through the Internet, by telephone or in writing to stop such automatic withdrawals.

If you open an account for another person by transferring stock from your account, you must transfer a minimum of 5 shares into that account.

DIVIDEND REINVESTMENT

You may choose to reinvest all or a portion of the dividends paid on your first 100,000 shares of our common stock held in your Plan account or participating in the Plan through our employee benefit plans. Your dividends will be used to buy additional shares of our common stock at a discount between 0% and 5.0%, as designated from time to time by us prior to the purchase of the shares with the reinvested dividends, from the prevailing market price. You have the following options for your dividends:

- *Full Dividend Reinvestment*. Your cash dividends received on shares you own up to 100,000 shares will be used to buy additional shares for you.

- *Partial Dividends Paid in Cash*. If you do not want full dividend reinvestment, select a lower number of full shares on which you want your dividends to be paid in cash. The balance of your dividends will be reinvested.

- *All Dividends Paid in Cash (no dividend reinvestment)*. Your dividends on all of your shares will be paid in cash.

If you do not indicate which reinvestment option you want on the enrollment form, you will be automatically enrolled in full dividend reinvestment.

You may change your reinvestment option at any time by completing and returning a new Enrollment Form (which can be obtained by contacting the Administrator), by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, by calling the Administrator at 1-800-205-8314 or

by providing written instructions to the Administrator. Dividends will be reinvested or paid on cash in accordance with your most recent instructions received by the Administrator prior to the dividend record date applicable to such dividend.

The 100,000 share reinvestment limitation does not apply to our employee benefit plans.

ELECTRONIC DEPOSIT OF CASH DIVIDENDS

If you are receiving all or a portion of your dividends in cash, you may have them electronically deposited into your U.S. bank account by completing an Authorization for Electronic Direct Deposit Form or by mailing a voided check or deposit slip to the Administrator. Contact the Administrator to receive an Authorization for Electronic Direct Deposit Form. You may also authorize electronic deposit through the Internet at the Administrator's web site, *www.computershare.com/investor*. This feature may be changed or discontinued at any time by notifying the Administrator. If you change your U.S. bank account and fail to notify the Administrator of the change, a check for your dividends will be issued and mailed only after the funds have been returned from the receiving bank.

OPTIONAL CASH INVESTMENTS

Participants in the Plan may buy additional shares of our common stock at any time by investing at least $50. Your total optional cash investment may not exceed $250,000 in a calendar year. Interest will not be paid on amounts held pending investment. Optional cash investments may be made by:

- *One-time online bank debit*. At any time, you may make optional cash investments by going to the Administrator's web site, *www.computershare.com/investor*, and authorizing a one-time online bank debit from your U.S. bank account. Please refer to the online confirmation for your bank account debit date and investment date.

- *Check*. Mail your check with the cash investment form from the bottom of your account statement to the address on the cash investment form. Do not send cash, traveler's checks, money orders or third party checks. All checks should be in U.S. funds and drawn from a U.S. bank. All payments should be made payable to "Computershare-Essential Utilities".

- *Recurring automatic withdrawals from a U.S. bank account*. You can establish recurring automatic withdrawals through the Internet at the Administrator's web site, *www.computershare.com/investor*, or by filling out a Direct Debit Authorization Form for automatic withdrawals. You can receive a Direct Debit Authorization Form by contacting the Administrator through the channels outlined in the "Administration" section of this prospectus. All automatic withdrawal enrollment information must be received at least 30 days prior to the first debit date. Funds will be deducted from your bank account on the first business day of each month. These funds may be commingled with other optional cash investments. Automatic withdrawals will continue at the level you set until you instruct the Administrator otherwise. You can change or stop automatic withdrawals by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, by calling the Administrator at 1-800-205-8314, by completing and returning a new Direct Debit Authorization Form or by giving written instructions to the Administrator. You must contact the Administrator at least 7 business days prior to the debit date to change or terminate automatic withdrawal. Employees of Essential Utilities who wish to pay for their investment by having a portion of their compensation withheld and applied to the investment should complete the Employee Enrollment Form provided by the Company.

- In the event that a one-time bank debit, check or an automatic withdrawal is not honored for any reason, the Administrator will consider the request for investment of that money null and void and shall immediately remove from the participant's account the shares, if any, purchased upon the prior credit of such money. A fee of $35 will also be assessed against the participant's account. The Administrator will then be entitled to sell those shares to satisfy any uncollected balance. If the net proceeds of the sale of those shares are insufficient to satisfy the balance of such uncollected amounts, the Administrator will be entitled to sell additional shares from the participant's account to satisfy the uncollected balance.

PURCHASE AND SOURCE OF SHARES

Shares of our common stock needed to meet the requirements of the Plan will either be purchased in the open market or issued directly by us. We will pay transaction fees and per share fees (which will include any brokerage commissions the Administrator is required to pay) incurred for the purchase of shares. The Administrator will invest your funds for the optional cash investments as promptly as practicable, at least once each week. However, funds automatically withdrawn from your U.S. bank account will be invested as specified above in "Optional Cash Investments – By automatic recurring withdrawals from a U.S. bank account." Funds may not be returned once they have been submitted to the Administrator. In the unlikely event that, due to unusual market conditions, the Administrator is unable to purchase shares of our common stock within 30 days (in the case of reinvested dividends) or within 35 days after receipt (in the case of cash investments), the funds will be returned to you by check. No interest will be paid on funds held by the Administrator pending investment. All dividends will be invested independently from optional cash investments. Please note that you will not be able to direct the Administrator to purchase shares at a specific time or at a specific price or through a specific broker or dealer.

PRICE OF SHARES

Open market purchases for initial, optional and IRA investments will be at a price equal to 100% of the weighted average per share price of shares purchased by the Administrator to satisfy Plan requirements. If the Administrator purchases shares to meet the dividend reinvestment requirement in the open market, your price per share will be 95% to 100% of the weighted average price of shares purchased, as designated from time to time by us prior to the purchase of the shares with the reinvested dividends. We will pay all transaction fees and per share fees in connection with open market purchases.

For original issue or treasury shares purchased from Essential Utilities for initial, optional and IRA investments (including investments made by employees through compensation withholding), the price per share will be 100% of the average of the daily high and low trading prices quoted on The New York Stock Exchange on the day of purchase (the investment date).

For original issue or treasury shares purchased from Essential Utilities to meet the dividend reinvestment requirement under the Plan, the price per share will be 95% to 100% of the average of the daily high and low trading prices quoted on The New York Stock Exchange for the five trading days preceding the dividend payment date, as designated from time to time by us prior to the dividend payment date.

The discount between 0% and 5.0% on the shares purchased or issued to meet the dividend reinvestment requirement will be designated by us in our sole discretion prior to the purchase or issuance of such shares. We reserve the right to change, reduce or discontinue any discount at any time without notice. We will provide the Administrator with notice of the applicable discount and any change in such discount. Please contact the Administrator with any questions about the discount then in effect. We may also provide notice on our website, but have no obligation to do so. As of the date of this prospectus, the discount is 5.0%.

SALE OF SHARES

You can sell some or all of the shares held in your Plan account by contacting the Administrator. You have choices when making a sale, depending on how you submit your sale request, as follows:

- *Market Order*: A market order is a request to sell shares promptly at the current market price. Market order sales are only available at *www.computershare.com/investor* through Investor Centre or by calling the Administrator directly at 1-800-205-8314. Market order sale requests received at *www.computershare.com/investor* through Investor Centre or by telephone will be placed promptly upon receipt during market hours (normally 9:30 a.m. to 4:00 p.m. Eastern time). Any orders received after 4:00 p.m. Eastern time will be placed promptly on the next day the market is open. The price shall be the market price of the sale obtained by the Administrator's broker, less applicable fees. The Administrator will use commercially reasonable efforts to honor requests by participants to cancel market orders placed outside of market hours. Depending on the number of shares being sold and current trading volume in the shares, a market order may only be partially filled or not filled at all on the trading day in which it is placed, in which case the order, or remainder of the order, as applicable, will be cancelled at the end of such day. To determine if your shares were sold, you should check your account online at *www.computershare.com/investor* or call the Administrator directly at 1-800-205-8314. If your market order sale was not filled and you still want the shares to be sold, you will need to re-enter the sale request. For a market order sale, you will be charged a transaction fee of $25, plus $0.12 per share.

- *Batch Order*: A batch order is an accumulation of all sales requests for a security submitted together as a collective request. Batch orders are submitted on each market day, assuming there are sale requests to be processed. Sale instructions for batch orders received by the Administrator will be processed no later than five business days after the date on which the order is received (except where deferral is required under applicable federal or state laws or regulations), assuming the applicable market is open for trading and sufficient market liquidity exists. Batch order sales may only be submitted in writing. All sales requests received in writing will be submitted as batch order sales, including sale requests for IRA Plan accounts and Coverdell Education Savings Accounts, will be submitted as batch order sale. The Administrator will cause your shares to be sold on the open market within five business days of receipt of your request. To maximize cost savings for batch order sale requests, the Administrator will seek to sell shares in round lot transactions. For this purpose the Administrator may combine each selling Plan participant's shares with those of other selling Plan participants. In every case of a batch order sale, the price to each selling Plan, participant shall be the weighted average sale price obtained by the Administrator's broker for each aggregate order placed by the Administrator and executed by the broker, less applicable fees. For a batch order sale, you will be charged a transaction fee of $25, plus $0.12 per share.

- *Day Limit Order*: A day limit order is an order to sell shares of our common stock when and if they reach a specific trading price on a specific day. The order is automatically cancelled if the price is not met by the end of that day (or, for orders placed aftermarket hours, the next day the market is open). Depending on the number of shares of our common stock being sold and the current trading volume in the shares, such an order may only be partially filled, in which case the remainder of the order will be cancelled. The order may be cancelled by the applicable stock exchange, by the Administrator at its sole discretion or, if the Administrator's broker has not filled the order, at your request made online at *www.computershare.com/investor* or by calling the Administrator directly at 1-800-205-8314. For a day limit order sale, you will be charged a transaction fee of $25, plus $0.12 per share.

- *Good-Till-Cancelled ("GTC") Limit Order*: A GTC limit order is an order to sell shares of our common stock when and if the shares reach a specific trading price at any time while the order remains open (generally up to 30 days). Depending on the number of shares being sold and current trading

volume in the shares, sales may be executed in multiple transactions and over more than one day. If shares are traded on more than one day, a separate fee will be charged for each such day. The order (or any unexecuted portion thereof) is automatically cancelled if the trading price is not met by the end of the order period. The order may be cancelled by the applicable stock exchange, by the Administrator at its sole discretion or, if the Administrator's broker has not filled the order, at your request made online at *www.computershare.com/investor* or by calling the Administrator directly at 1-800-205-8314. For a GTC limit order sale, you will be charged a transaction fee of $25, plus $0.12 per share.

General: All sales requests processed over the telephone by a customer service representative entail an additional fee of $15.00. All per share fees include any brokerage commissions the Administrator is required to pay. Any fractional share will be rounded up to a whole share for purposes of calculating the per share fee. Fees are deducted from the proceeds derived from the sale. The Administrator may, under certain circumstances, require a transaction request to be submitted in writing. Please contact the Administrator to determine if there are any limitations applicable to your particular sale request. Proceeds are normally paid by check, which are distributed within 24 hours of after your sale transaction has settled.

The Administrator reserves the right to decline to process a sale if it determines, in its sole discretion, that supporting legal documentation is required. In addition, no one will have any authority or power to direct the time or price at which shares for the Plan are sold, and no one, other than the Administrator, will select the broker(s) or dealer(s) through or from whom sales are to be made.

If you elect to sell shares online at *www.computershare.com/investor*, you may utilize the Administrator's international currency exchange service to convert the sale proceeds to your local currency prior to being sent to you. Receiving sales proceeds in a local currency and having your check drawn on a local bank avoids the timely and costly "collection" process required for cashing U.S. dollar checks. This service is subject to additional terms and conditions and fees, which you must agree to online. We are not responsible for any costs or fees associated with your use of this service.

If your holdings in any account fall below 5 shares, the Administrator may close that account out of the Plan as described in the "Minimum Account" section of this prospectus.

INDIVIDUAL RETIREMENT ACCOUNTS ("IRA")

You may establish a Traditional IRA, Roth IRA or Coverdell Education Savings Account of our common stock by returning completed Enrollment Forms together with your contribution to the IRA and Coverdell Education Savings Account Trustee. If you are already a shareholder of at least 5 shares, you may open an IRA or Coverdell Education Savings Account with as little as $50. If you are not a shareholder, the minimum contribution to open an account is $500.

You may also open an IRA or Coverdell Education Savings Account to receive a cash rollover or a transfer of Essential Utilities shares from another IRA or qualified retirement plan. The IRA and Coverdell Savings Account Trustee will invest the cash rollovers into shares of our common stock.

There is an annual maintenance fee of $45.00 charged by the IRA and Coverdell Education Savings Account Trustee, which we will pay for the first calendar year in which you participate. In all subsequent years, twenty- five dollars ($25.00) of this annual fee will be charged to you, with the balance paid by us.

IRA and Coverdell Education Savings Account contributions and rollovers will not count against the $250,000 maximum investment limit under the Plan.

If you are interested in opening a Traditional IRA, Roth IRA or Coverdell Education Savings Account, you may obtain the enrollment and a disclosure statement from Computershare Trust Company, N.A., which will administer the IRA and Coverdell Education Savings Account. For information, call the Computershare IRA Department at its toll-free number, 1-800-597-7736.

SAFEKEEPING OF CERTIFICATES AND BOOK ENTRY

For your convenience, shares purchased under the Plan will be maintained by the Administrator in your name in book-entry form. You may, however, request a stock certificate by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, by calling the Administrator at 1-800-205-8314 or by providing written instructions to the Administrator. There is a $25 fee for certificate issuance.

If you are holding certificates for Essential Utilities, Inc., or previously named Aqua America, Inc. or Philadelphia Suburban Corporation common stock, you may use the Plan's "safekeeping" service to deposit those stock certificates at no cost. Safekeeping protects your shares against loss, theft or accidental destruction and provides a convenient way for you to keep track of your shares. Only shares held in safekeeping or in book-entry form may be sold through the Plan.

To use the safekeeping service, send your certificates to the Administrator at the address listed on page 6 of this prospectus by registered or certified mail, with a return receipt requested or some other form of traceable mail, and properly insured. **YOU SHOULD NOT ENDORSE THE STOCK CERTIFICATE BEFORE YOU SEND IT IN.**

TRACKING YOUR INVESTMENT

The Administrator will send a statement confirming the details of each transaction you make. For market order transactions, the time of sale will be provided. If you continue to be enrolled in the Plan, but have no transactions, the Administrator will mail you an annual statement reflecting your holdings. For shares acquired in the Plan after January 1, 2011, specific cost basis information will be included in your statement in accordance with applicable law.

You should notify the Administrator promptly of any change in address since all notices, statements and reports will be mailed to your address of record.

Please retain your statements to establish the cost basis of shares purchased under the Plan for income tax and other purposes. A $20 flat fee per year requested will be charged for all prior year duplicate statement requests.

You may also view year-to-date transaction activity in your Plan account for the current year, as well as activity in prior years, by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*.

OBTAINING A STOCK CERTIFICATE

To obtain a stock certificate for all or a portion of your full shares, you can contact the Administrator by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, by calling the Administrator at 1-800-205-8314, by making a written request of the Administrator or by completing the transaction form at the bottom of your statement and submitting it to the Administrator. There is a $25 fee for certificate issuance. No fractional shares of common stock will be issued; instead, the then-current market value of any fractional share sold, less any transaction fees and per share fees, will be paid in cash.

If you want the certificate issued in a name other than your Plan account registration, the Administrator may require you to have your signature guaranteed by a financial institution in the Medallion Guarantee program.

TRANSFERS

You may transfer or give our common stock to anyone you choose by:

- Making an initial $500 cash investment to establish a new account in the recipient's name; or
- Making an optional cash investment on behalf of an existing shareholder in the Plan in an amount not less than $50 nor more than $250,000 in one calendar year; or
- Transferring at least 5 shares from your account to the recipient.

If you would like transfer instructions, please visit the Administrator's Transfer Wizard at *www.computershare.com/transferwizard*. The Transfer Wizard will guide you through the transfer process, assist you in completing the transfer form, and identify other necessary documentation you may need to provide.

DIVIDEND PAYMENT AND RECORD DATES

Normal dividend payment dates are expected to be on the first day of March, June, September and December. The record date usually precedes the dividend payment date by 10 business days.

In order to be the owner of record and eligible to receive the quarterly dividend, your shares must have been purchased and the transaction settled three trading days prior to the record date (the ex-dividend date). We can give no guarantee whatsoever that we will declare dividends in the future.

TERMINATION OF PARTICIPATION

If you wish to stop reinvesting your dividends or to stop automatic monthly investments, please use the transaction form attached to your statement or contact the Administrator by accessing your Plan account through the Internet at the Administrator's web site, *www.computershare.com/investor*, by calling the Administrator at 1-800-205-8314 or by providing written instructions to the Administrator.

In the event you have been reinvesting your dividends and your notice of termination is received by the Administrator near a record date for a dividend payment, the Administrator, in its sole discretion, may either distribute that dividend in cash or reinvest it in shares on your behalf. In the event the dividend is reinvested, the Administrator will process your withdrawal from the Plan as soon as practicable, but in no event later than five business days after the purchase is completed.

MINIMUM ACCOUNT

After you have made your initial contribution of $500 by automatic withdrawals, check or one-time online bank debit, or had at least 5 shares transferred into an account registered in your name under the Plan, you must, at all times you are enrolled in the Plan, keep a minimum number of 5 shares of our common stock in your account. If you keep less than 5 shares in your account, the Administrator may code the account for future dividends to be paid in cash.

COSTS

We pay for all transaction fees and per share fees (which include any brokerage commissions the Administrator is required to pay) associated with the reinvestment of dividends and the making of optional cash investments.

For each batch order sale of whole shares from your Plan account, you will be charged a $25.00 transaction fee and a per share fee of $0.12.

For each market order sale of whole shares from your Plan account, you will be charged a $25.00 transaction fee and a per share fee of $0.12.

For each limit order sale of whole shares from your Plan account, you will be charged a $25.00 transaction fee and a per share fee of $0.12.

For each GTC limit order sale of whole shares from your Plan account, you will be charged a $25.00 transaction fee and a per share fee of $0.12.

All sales requests processed over the telephone by a customer service representative entail an additional fee of $15.00.

There is an annual maintenance fee of $45.00 charged by the IRA and Coverdell Education Savings Account Trustee, which we will pay for the first calendar year in which you participate. In all subsequent years, twenty-five dollars ($25.00) of this annual fee will be charged to you, with the balance of the annual fee paid by us. Fees are collected by the Administrator from your account.

TAXES

All dividends paid to you – whether or not they are reinvested – are considered taxable income to you in the year they are paid. The total amount will be reported to you, and to the Internal Revenue Service, shortly after the close of each year. If you are reinvesting your dividends, the value of the applicable discount from the purchase price of the shares (the calculated fair market value) will also be reported as taxable income.

If you are an employee of Essential Utilities and are paying for shares by having compensation withheld, the amounts withheld will be subject to taxation as ordinary income on the same basis as the portion of your compensation that is not withheld.

All shares of stock that are sold through the Administrator will also be reported to the IRS as required by law. Any profit or loss you incur should be reflected when you file your income tax returns.

In addition, the Internal Revenue Service may require that any per share fees (which include any brokerage commissions the Administrator is required to pay incurred in the purchase of shares and paid by us on your behalf be treated as dividend income to you, in which case such amounts can be included in your cost basis of shares purchased.

Be sure to keep your statements of account for income tax purposes. A fee of $20.00 per year requested may be incurred to furnish historical information. If you have questions about the tax basis of any transactions, please consult your own tax advisor.

VOTING

We will forward to you, either electronically or by mail based on your preference, a proxy for shares of our common stock for which you hold certificates and shares of our common stock credited to your Plan account. The Administrator shall not vote shares of our common stock that it holds for your Plan account except as directed by you.

HANDLING OF STOCK SPLITS AND OTHER DISTRIBUTIONS

In the event we issue a stock dividend or declare a stock split, your Plan account will be adjusted to reflect the receipt of shares paid or distributed. Any stock dividend or stock split shares of our common stock issued with respect to both certificated and book-entry (whole and fractional) shares will be credited automatically to your Plan account in book-entry form.

In the event of a stock subscription or other offering of rights to shareholders, your rights will be based on your total registered holdings (the shares held in the Plan and outside of the Plan). A single set of materials will be distributed that will allow you to exercise your rights.

CHANGES TO THE PLAN

We may add to or modify the Plan at any time. Similarly, we may, at any time, waive, suspend or terminate the Plan, or any provision of the Plan. We will send you written notice of any significant changes, suspensions or termination. The current prospectus is filed with the SEC and available on our website at *www.essential.co* and modifications to the Plan will be reflected in an updated prospectus on our website.

Any modification made to, or waiver, suspension or termination of, the Plan will apply to a participant's holdings in the Plan at the time the modification, waiver, suspension or termination becomes effective and to transactions occurring thereafter, regardless of when or how the shares were acquired. However, any modification, waiver, suspension or termination of the Plan will not affect your rights as a shareholder in any way, and any book-entry shares you own will continue to be credited to your account with the Administrator unless you specifically request otherwise.

We and the Administrator reserve the right to change any administrative procedure of the Plan.

INTERPRETATION OF THE PLAN

We may interpret and regulate the Plan as deemed necessary or desirable in connection with the operation of the Plan and resolve questions or ambiguities concerning the various provisions of the Plan.

RESPONSIBILITIES OF ESSENTIAL UTILITIES AND THE ADMINISTRATOR

Neither we nor the Administrator shall be liable for any act performed in good-faith or for any good-faith omission to act, including, without limitation, any claims or liability: (a) for failure to terminate your account upon your death prior to receiving written notice of such death or (b) with respect to the prices at which shares of our common stock are purchased or sold for your Plan account and the times when such purchases or sales are made or (c) for any fluctuation in the market value after purchases or sale of shares of our common stock. in no event will we, the Administrator or their agents have any liability as to any inability to purchase shares or as to the timing of any purchase.

Neither we nor the Administrator can assure you a profit or protect you against a loss on the shares you purchase under the Plan.

USE OF PROCEEDS

The proceeds from the sale of newly-issued or treasury shares offered by us will be used for general corporate purposes. All other shares of common stock acquired under the Plan will be purchased in the open market, not from us, and we will not receive any proceeds from such purchases.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting), incorporated in this Prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2019 have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

Ballard Spahr LLP, our outside counsel, has given its opinion regarding the validity of the common stock covered by this prospectus.

ANTIDILUTION PROVISION

The aggregate number of shares of common stock registered for issuance and purchase under the Plan, as provided in the Registration Statement, of which this prospectus forms a part, the maximum number of shares that may be purchased by a participant and the calculation of the purchase price per share may be appropriately adjusted by us to reflect any increase or decrease in the number of issued shares of common stock resulting from a subdivision or consolidation of shares or other capital adjustment, or the payment of a stock dividend, or other increase or decrease in such shares, if effected without receipt of consideration by us.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file at the SEC's public reference room at 100 F Street N.E., Washington, D.C. 20549. Copies of such materials can be obtained by mail at prescribed rates from the public reference room. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room. You may also obtain our SEC filings from the SEC's web site at www.sec.gov or from our web site at *https://www.essential.co/investor-relations*.

This prospectus is part of a Registration Statement on Form S-3 that we filed with the SEC to register the stock offered under the Plan. As allowed by SEC rules, this prospectus does not contain all information you can find in the Registration Statement or the exhibits to the Registration Statement. The SEC allows us to "incorporate by reference" information into this prospectus, which means that we can disclose important information to you by referring you to another document filed separately with the SEC. The information incorporated by reference is considered to be part of this prospectus and later information fi led with the SEC will update and supersede this information. Any statement so updated or superseded shall not be deemed, except as so updated or superseded, to constitute a part of this prospectus. We incorporate by reference the documents listed below and any future filings made with the SEC under Section 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934, as amended, until our offering is completed.

- Our Annual Report on Form 10-K for the year ended December 31, 2019, including portions of our definitive Proxy Statement for our 2019 Annual Meeting of Shareholders incorporated therein by reference;

- Our Quarterly Report on Form 10-Q for the quarter ended March 31, 2020;

- Our Current Reports on Form 8-K filed with the SEC on January 16, 2020 (Items 8.01 and 9.01), February 3, 2020 (Items 5.03 and 9.01), February 27, 2020 (Items 8.01 and 9.01), March 16, 2020 (Items 1.01, 2.01, 2.03, 3.02, 5.02, 8.01 and 9.01), April 3, 2020 (Items 1.01, 2.03 and 9.01), April 13, 2020 (Item 8.01), April 13, 2020 (Items 8.01 and 9.01), April 15, 2020 (Items 1.01, 2.03 and 9.01), May 11, 2020 (Item 5.07) and May 18, 2020 (Items 5.03 and 9.01); and

- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

You may request a copy of any documents that we incorporate by reference at no cost by telephoning 1-610-527-8000 or writing us at the following address:

FILING REQUIREMENTS

G. Rate of Return

RR6. Provide AFUDC charged by company at historic test year-end and latest date, explain method by which rate was calculated and provide workpaper showing derivation of the company's current AFUDC rate.

A.

AFUDC is $5,935,981 for the twelve months ended March 31, 2021 and $7,265,303 for the twelve months ended July 31, 2021. The Company utilizes the short-term debt rate for cost of capital used during construction. However, when CWIP exceeds short-term debt, a blended rate reflecting both debt and equity is utilized. The July 31, 2021 current monthly AFUDC debt rate is 0.131984% and the current monthly AFUDC equity rate is 0.310819%.

FIFTY-NINTH SUPPLEMENTAL

INDENTURE

DATED AS OF SEPTEMBER 1, 2020

TO

INDENTURE OF MORTGAGE

DATED AS OF JANUARY 1, 1941

AQUA PENNSYLVANIA, INC.

TO

THE BANK OF NEW YORK MELLON TRUST COMPANY, N. A., as Trustee

Available Permanent Additions pursuant to the provisions of Section 9 of Article I of the Original Indenture;

(xii) The amount set forth in subparagraph (vi) after deducting the amount, if any, set forth in subparagraph (vii); and

(xiii) That all conditions precedent to the taking of the credit or credits so requested by the Company have been complied with.

(B) In the event that the Officers' Certificate delivered to the Trustee pursuant to the provisions of paragraph (A) of this Section shall state, pursuant to the requirements of subparagraph (vi), the Cost or Fair Value of Available Permanent Additions acquired by the Company during the preceding calendar year, the documents specified in paragraphs 2, 3, 5, 6 and 7 of subdivision (B) of Section 3 of Article IV of the Original Indenture.

(C) An amount in cash equal to the sum set forth in subparagraph (viii) of the Officers' Certificate provided for in paragraph (A) hereof.

SECTION 3. All cash deposited with the Trustee as part of any Maintenance or Improvement Deposit provided for in Section 1 of this Article, may, at the option of the Company, be applied to the purchase of bonds under the provisions of Section 2 of Article X of the Original Indenture or to the redemption of bonds under the provisions of Section 3 of Article X of the Original Indenture or may be withdrawn by the Company at any time to reimburse the Company for the cost of a Net Amount of Available Permanent Additions (excluding, however, from any such Available Permanent Additions all Permanent Additions included in any certificate delivered to the Trustee for the purpose of obtaining a credit against any Maintenance or Improvement Deposit provided for in Section 1 of this Article to the extent that such Permanent Additions have been used for any such credit). The Trustee shall pay to or upon the written order of the Company all or any part of such cash upon the receipt by the Trustee of:

(a) A Resolution requesting such payment; and

(b) The documents specified in paragraphs 2, 5, 6 and 7 of subdivision (B) of Section 3 of Article IV of the Original Indenture, with such modifications, additions and omissions as may be appropriate in the light of the purposes for which they are used.

ARTICLE III.

Covenants of the Company

SECTION 1. The Company hereby covenants and agrees with the Trustee, for the benefit of the Trustee and all the present and future holders of the Bonds, that the Company will pay the principal of and premium, if any, of and interest on all bonds issued or to be issued as aforesaid under and secured by the Original Indenture as hereby supplemented, as well as all bonds which may be hereafter issued in exchange or substitution therefor, and will perform and fulfill all of the terms, covenants and conditions of the Original Indenture and of this Fifty-ninth

Supplemental Indenture with respect to the additional bonds to be issued under the Original Indenture as hereby supplemented.

SECTION 2. The Company covenants and agrees that so long as any of the Bonds are outstanding (a) the Company will not make any Stock Payment if, after giving effect thereto, its retained earnings, computed in accordance with generally accepted accounting principles consistently applied, will be less than the sum of (i) Excluded Earnings, if any, since December 31, 2019, and (ii) $20,000,000; (b) Stock Payments made more than forty (40) days after the commencement, and prior to the expiration, of any Restricted Period shall not exceed 65% of the Company's Net Income during such Restricted Period; and (c) the Company will not authorize a Stock Payment if there has occurred and is continuing an event of default under subsections (a) or (b) of Section 1 of Article XI of the Original Indenture.

For the purposes of this Section 2 the following terms shall have the following meanings:

"Capitalization" shall mean the sum of (i) the aggregate principal amount of all Debt at the time outstanding, (ii) the aggregate par or stated value of all capital stock of the Company of all classes at the time outstanding, (iii) premium on capital stock, (iv) capital surplus, and (v) retained earnings.

"Debt" means (i) all indebtedness, whether or not represented by bonds, debentures, notes or other securities, for the repayment of money borrowed, (ii) all deferred indebtedness for the payment of the purchase price of property or assets purchased (but Debt shall not be deemed to include customer advances for construction or any bonds issued under the Indenture which are not Outstanding Bonds), (iii) leases which have been or, in accordance with generally accepted accounting principles, should be recorded as capital leases and (iv) guarantees of the obligations of another of the nature described in clauses (i), (ii) or (iii) which have been or, in accordance with generally accepted accounting principles, should be recorded as debt.

"Determination Date" shall mean the last day of each calendar quarter. Any calculation with respect to any Determination Date shall be based on the Company's balance sheet as of such date.

"Excluded Earnings" shall mean 35% of the Company's Net Income during any Restricted Period.

"Net Income" for any particular Restricted Period shall mean the amount of net income properly attributable to the conduct of the business of the Company for such period, as determined in accordance with generally accepted accounting principles consistently applied, after payment of or provision for taxes on income for such period.

"Outstanding Bonds" shall mean bonds which are outstanding within the meaning indicated in Section 20 of Article I of the Original Indenture except that, in addition to the bonds referred to in clauses (a), (b) and (c) of said Section 20, said term shall not include bonds for the retirement of which sufficient funds have been deposited with the Trustee with irrevocable instructions to apply such funds to the retirement of such bonds at a specified time, which may

be either the maturity thereof or a specified redemption date, whether or not notice of redemption shall have been given.

"Restricted Period" shall mean a period commencing on any Determination Date on which the total Debt of the Company is, or as the result of any Stock Payment then declared or set aside and to be made thereafter will be, more than 70% of Capitalization, and continuing until the third consecutive Determination Date on which the total Debt of the Company does not exceed 70% of Capitalization.

"Stock Payment" shall mean any payment in cash or property (other than stock of the Company) to any holder of shares of any class of capital stock of the Company as such holder, whether by dividend or upon the purchase, redemption, conversion or other acquisition of such shares, or otherwise.

SECTION 3. The Company covenants and agrees that so long as any of the Bonds are outstanding neither the Company nor any subsidiary of the Company will, directly or indirectly, lend or in any manner extend its credit to, or indemnify, or make any donation or capital contribution to, or purchase any security of, any corporation which directly or indirectly controls the Company, or any subsidiary or affiliate (other than an affiliate which is a subsidiary of the Company) of any such corporation.

ARTICLE IV.

The Trustee

SECTION 1. The Trustee hereby accepts the trust hereby declared and provided, and agrees to perform the same upon the terms and conditions in the Original Indenture, as supplemented by this Fifty-ninth Supplemental Indenture.

SECTION 2. Subject to the provisions of Article XIII of the Original Indenture, the Trustee may execute any of the trusts or powers hereof and perform any of its duties by or through and consult with attorneys, agents, officers or employees selected by the Trustee in its sole discretion. The Trustee shall be entitled to advice of counsel concerning all matters of trusts hereof and the duties hereunder and may in all cases pay such reasonable compensation to all such attorneys, agents, officers and employees as may reasonably be employed in connection with the trusts hereof. The Trustee may act or refrain from acting and rely upon and be free from all liability for so relying upon the opinion or advice of any attorney (who may be the attorney or attorneys for the Company) and shall be free from all liability for any action taken or not taken in reliance on such opinion or advice. The Trustee may act and rely on written opinions of experts employed by the Trustee and such advice shall be full and complete authorization and protection in respect of any action taken, suffered or omitted by the Trustee hereunder in good faith and in reliance thereon. The Trustee shall not be responsible for any loss or damage resulting from any action or non-action in good faith taken in reliance upon such opinion or advice. The Trustee shall not be bound to confirm, verify or make any investigation into the facts or matters stated in any financial or other statements, resolution, certificate, statement, instrument, opinion, report, notice, request, direction, consent, order or other paper or document furnished pursuant to the terms hereof.

IV 3 (4

pany to permit the legal and valid issue and authentication and delivery of the bonds which have been applied for has been duly had and taken;

4. An Officers' Certificate, as herein defined, stating the aggregate principal amount of all bonds at the time outstanding under this Indenture, and, unless the Opinion of Counsel provided for in paragraph 3 of this subdivision (*B*) shall state that the amount of indebtedness or bonded indebtedness which may be incurred by the Company is not then limited by law or by corporate action, also stating that the total amount of indebtedness or bonded indebtedness of the Company outstanding, including the aggregate principal amount of bonds issued and outstanding, as herein defined, under this Indenture plus the aggregate principal amount of bonds applied for in the accompanying application, does not exceed an amount which shall be specified in the Certificate;

5. The officially authenticated certificates or other documents, if any, specified in the Opinion of Counsel provided for in paragraph 3 of this subdivision (*B*), including evidence satisfactory to the Trustee of the payment or provision for payment of any taxes therein referred to;

6. If the bonds, the authentication and delivery of which are then applied for, are not a part of any series then existing, a Resolution or Resolutions and an indenture supplemental hereto, creating the series of which such bonds are a part.

SECTION 3. (*A*) Subject to the provisions of Section 2 of this Article bonds in addition to those provided for in any other Section hereof may from time to time be executed by the Company and delivered to the Trustee

and shall be authenticated and delivered by the Trustee upon the basis of Available Permanent Additions, subject to the conditions, provisions and limitations set forth in this Section. The aggegate principal amount of bonds that may be authenticated and delivered from time to time under the provisions of this Section is limited to seventy per cent. (70%) of the Net Amount of Available Permanent Additions, made the basis of the authentication and delivery thereof certified or provided in subdivision (*B*) of this Section.

No bonds shall be authenticated and delivered under this Section unless the Net Earnings of the Company as shown by a Net Earnings Certificate for a period of twelve (12) consecutive calendar months within the fifteen (15) calendar months next preceding the application for authentication and delivery of bonds, shall have been not less than one and three-quarters (1¾) times the interest requirements for a period of one year upon (*a*) the bonds applied for, (*b*) all bonds outstanding, as herein defined, on the date of such application, and (*c*) all indebtedness outstanding on the date of such application which is secured by any lien for the payment of money or its equivalent prior to or on a parity with the lien of this Indenture other than Permitted Liens, as herein defined.

(*B*) No application by the Company to the Trustee for the authentication and delivery of bonds under this Section shall be granted by the Trustee, until the Trustee shall have received:

1. The documents provided for in Section 2 of this Article;

2. An Engineer's Certificate, as herein defined, dated not more than thirty (30) days preceding the

NOTE PURCHASE AGREEMENT

DATED AS OF NOVEMBER 3, 2016

Default or Event of Default would exist under the terms of this Agreement, and *provided, further,* that once a Subsidiary has been designated an Unrestricted Subsidiary, it shall not thereafter be redesignated as a Restricted Subsidiary on more than one occasion. Within ten days following any designation described above, the Company will deliver to each Purchaser a notice of such designation accompanied by a certificate signed by a Senior Financial Officer of the Company certifying compliance with all requirements of this **Section 9.6** and setting forth all information required in order to establish such compliance.

Section 9.7. Subsidiary Guaranty. (a) If at any time any Subsidiary of the Company shall become a co-obligor under, or guarantor of Debt outstanding under, any Material Credit Facility (a *"Subsidiary Guarantor"*), then concurrently with any such event the Subsidiary Guarantor shall execute and deliver to the holders of the Notes an unconditional guarantee of the Notes which shall be in form and substance satisfactory to the Required Holders, and (b) deliver such proof of corporate or other action, incumbency of officers, opinions of counsel and other documents as is consistent with those delivered by the Company pursuant to **Section 4** on the Closing Date or as the Required Holders shall have reasonably requested.

SECTION 10. NEGATIVE COVENANTS.

The Company covenants that so long as any of the Notes are outstanding:

Section 10.1. Limitation on Debt. The Company will not permit Consolidated Debt (determined as of the last day of each fiscal quarter) to exceed 65% of Consolidated Total Capitalization as of such date.

Section 10.2. Limitation on Liens. The Company will not, and will not permit any of its Restricted Subsidiaries to, directly or indirectly create, incur, assume or permit to exist (upon the happening of a contingency or otherwise) any Lien on or with respect to any property or asset (including, without limitation, any document or instrument in respect of goods or accounts receivable) of the Company or any such Restricted Subsidiary, whether now owned or held or hereafter acquired, or any income or profits therefrom, or assign or otherwise convey any right to receive income or profits, except:

(a) Liens for taxes, assessments or other governmental charges that are not yet due and payable or the payment of which is not at the time required by **Section 9.4**; *provided,* any such tax, assessment or other governmental charge shall be paid prior to the commencement of any proceedings to foreclose any Lien related thereto;

(b) any attachment or judgment Lien, unless the judgment it secures shall not, within 60 days after the entry thereof, have been discharged or execution thereof stayed pending appeal, or shall not have been discharged within 60 days after the expiration of any such stay;

(c) Liens incidental to the conduct of business or the ownership of properties and assets (including landlords', carriers', warehousemen's, mechanics', materialmen's and other similar Liens for sums not yet due and payable or which are being contested in

(xi) Investments in addition to the Investments permitted by the preceding clauses (i) through (x); *provided* that the aggregate principal amount of Investments outstanding pursuant to this clause (xi) shall not at any time exceed 25% of Consolidated Net Worth.

In valuing Investments for purposes of applying the limitations set forth in clause (xi) of this **Section 10.6**, such Investments shall be taken at the original cost thereof, without allowance for any subsequent write-offs or appreciation or depreciation therein, but less any amount repaid or recovered on account of capital or principal.

Section 10.7. Nature of Business. Neither the Company nor any Restricted Subsidiary will engage in any business, other than, when taken as a whole, the general nature of the business in which the Company and its Restricted Subsidiaries are engaged on the date of this Agreement and other energy related regulated business activities and non-regulated business activities that are complementary to the foregoing.

Section 10.8. Transactions with Affiliates. The Company will not and will not permit any Restricted Subsidiary to enter into directly or indirectly any Material transaction or group of related transactions (including without limitation the purchase, lease, sale or exchange of properties of any kind or the rendering of any service) with any Affiliate (other than the Company or another Restricted Subsidiary), except upon fair and reasonable terms no less favorable to the Company or such Restricted Subsidiary than would be obtainable in a comparable arm's-length transaction with a Person not an Affiliate. In addition, the Company will not, and will not permit any Restricted Subsidiary to, make any loan or advance to the Company or any Restricted Subsidiary except in the ordinary course of business and in accordance with the reasonable requirements of the business of the Company or any such Restricted Subsidiary.

Section 10.9. Acquisitions. The Company will not, and will not permit any Restricted Subsidiary to, make any acquisition of all or substantially all of the assets or capital stock of any business entity if at the time of such acquisition and after giving effect thereto, a Default or Event of Default shall exist.

Section 10.10. Unrestricted Subsidiaries. The Company will not at any time permit Unrestricted Subsidiaries to (i) own more than 40% of the Consolidated Total Assets of the Company and its Subsidiaries, or (ii) account for more than 40% of the consolidated gross revenues of the Company and its Subsidiaries, determined in each case in accordance with GAAP.

Section 10.11. Interest Coverage Covenant. Section 6.1(b) (the *"Interest Coverage Covenant"*) of the Bank Credit Agreement in effect on the date of this Agreement (as such covenant may be amended or modified from time to time whether pursuant to an amendment to the Bank Credit Agreement in effect on the date of this Agreement or any new, restated or replacement Bank Credit Agreement) is hereby incorporated by reference into this **Section 10.11**. The Interest Coverage Covenant shall continue in effect until such time as the Interest Coverage Covenant shall have been eliminated from the Bank Credit Agreement or all

indebtedness under the Bank Credit Agreement is repaid in full and all commitments related thereto are terminated; *provided*, that if at the time of any such repayment or the termination of any such commitment a Default or Event of Default shall exist under this Agreement, then the Interest Coverage Covenant shall continue in full force and effect so long as such Default or Event of Default continues to exist. If at any time a Default or Event of Default exists under the Interest Coverage Covenant, no modification or waiver of the Interest Coverage Covenant shall be effective unless the Required Holders shall have consented thereto. Promptly, but in no event more than 5 Business Days following the execution of any Bank Credit Agreement (or any amendment thereto) which changes or eliminates the Interest Coverage Covenant, the Company shall furnish each holder of the Notes with a copy of such agreement.

Section 10.12. Economic Sanctions, Etc. The Company will not, and will not permit any Controlled Entity to (a) become (including by virtue of being owned or controlled by a Blocked Person), own or control a Blocked Person or (b) directly or indirectly have any investment in or engage in any dealing or transaction (including any investment, dealing or transaction involving the proceeds of the Notes) with any Person if such investment, dealing or transaction (i) would cause any holder or any affiliate of such holder to be in violation of, or subject to sanctions under, any law or regulation applicable to such holder, or (ii) is prohibited by or subject to sanctions under any U.S. Economic Sanctions Laws.

SECTION 11. EVENTS OF DEFAULT.

An *"Event of Default"* shall exist if any of the following conditions or events shall occur and be continuing:

(a) the Company defaults in the payment of any principal or Make-Whole Amount, if any, on any Note when the same becomes due and payable, whether at maturity or at a date fixed for prepayment or by declaration or otherwise; or

(b) the Company defaults in the payment of any interest on any Note for more than five Business Days after the same becomes due and payable; or

(c) the Company defaults in the performance of or compliance with any term contained in **Section 8.5, 10.1, 10.2, 10.3, 10.4, 10.5** or **10.11**; or

(d) the Company defaults in the performance of or compliance with any Material term contained herein (other than those referred to in paragraphs (a), (b) and (c) of this **Section 11**) and such default is not remedied within 30 days after the earlier of (i) a Responsible Officer obtaining actual knowledge of such default and (ii) the Company receiving written notice of such default from any holder of a Note (any such written notice to be identified as a "notice of default" and to refer specifically to this paragraph (d) of **Section 11**); or

(e) any representation or warranty made in writing by or on behalf of the Company or by any officer of the Company in this Agreement or in any writing required

thereof at the interest rate implicit in such rentals and otherwise in accordance with GAAP) under the lease relating to such Sale-and-Leaseback Transaction.

"Bank Credit Agreement" means the bank credit agreement dated as of March 23, 2012, between the Company and PNC Bank National Association, as agent, and the banks party thereto, as from time to time amended or restated or any replacement facility which constitutes the primary bank credit facility of the Company.

"Blocked Person" means (a) a Person whose name appears on the list of Specially Designated Nationals and Blocked Persons published by OFAC, (b) a Person, entity, organization, country or regime that is blocked or a target of sanctions that have been imposed under U.S. Economic Sanctions Laws or (c) a Person that is an agent, department or instrumentality of, or is otherwise beneficially owned by, controlled by or acting on behalf of, directly or indirectly, any Person, entity, organization, country or regime described in clause (a) or (b).

"Business Day" means (a) for the purposes of **Section 8.6** only, any day other than a Saturday, a Sunday or a day on which commercial banks in New York City are required or authorized to be closed, and (b) for the purposes of any other provision of this Agreement, any day other than a Saturday, a Sunday or a day on which commercial banks in Philadelphia, Pennsylvania or New York, New York are required or authorized to be closed.

"Capital Lease" means, at any time, a lease with respect to which the lessee is required concurrently to recognize the acquisition of an asset and the incurrence of a liability in accordance with GAAP.

"Capital Lease Obligation" means, with respect to any Person and a Capital Lease, the amount of the obligation of such Person as the lessee under such Capital Lease which would, in accordance with GAAP, appear as a liability on a balance sheet of such Person.

"Change in Control" is defined in **Section 8.7**.

"Closing" is defined in **Section 3**.

"Code" means the Internal Revenue Code of 1986, as amended from time to time, and the rules and regulations promulgated thereunder from time to time.

"Company" means Aqua America, Inc., a Pennsylvania corporation.

"Confidential Information" is defined in **Section 20**.

"Consolidated Debt" means, as of any date of determination, the total of all Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

"Consolidated Funded Debt" means, as of any date of determination, the total of all Funded Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

"Consolidated Net Worth" means, as of any date of determination, the sum of (i) the par value (or value stated on the books of the corporation) of the capital stock (but excluding treasury stock and capital stock subscribed and unissued) of the Company and its Subsidiaries plus (ii) the amount of the paid-in capital and retained earnings of the Company and its Subsidiaries, in each case as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

"Consolidated Total Assets" means, as of any date of determination, the total amount of all assets of the Company and its Subsidiaries, as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

"Consolidated Total Capitalization" means, as of any date of determination, the sum of (i) Consolidated Funded Debt and (ii) Consolidated Net Worth.

"Controlled Entity" means (i) any of the Subsidiaries of the Company and any of their or the Company's respective Controlled Affiliates and (ii) if the Company has a parent company, such parent company and its Controlled Affiliates. As used in this definition, *"Control"* means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise.

"Debt" means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

EXECUTION COPY

AQUA PENNSYLVANIA, INC.

$40,000,000 5.95% Senior Notes
due March 31, 2034

NOTE PURCHASE AGREEMENT

DATED AS OF MARCH 31, 2006

1996608.01.14
162584-7

SECTION 10. NEGATIVE COVENANTS.

The Company covenants that so long as any of the Notes are outstanding:

Section 10.1. Limitation on Debt. The Company will not permit Consolidated Debt (determined as of the last day of each fiscal quarter) to exceed 62% of Consolidated Total Capitalization as of such date.

Section 10.2. Limitation on Liens. The Company will not, and will not permit any Subsidiary to, directly or indirectly create, incur, assume or permit to exist (upon the happening of a contingency or otherwise) any Lien on or with respect to any property or asset (including, without limitation, any document or instrument in respect of goods or accounts receivable) of the Company or any Subsidiary, whether now owned or held or hereafter acquired, or any income or profits therefrom, or assign or otherwise convey any right to receive income or profits, except:

(a) Liens for taxes, assessments or other governmental charges that are not yet due and payable or the payment of which is not at the time required by **Section 9.4**; *provided*, any such tax, assessment or other governmental charge shall be paid prior to the commencement of any proceedings to foreclose any Lien related thereto;

(b) any attachment or judgment Lien, unless the judgment it secures shall not, within 60 days after the entry thereof, have been discharged or execution thereof stayed pending appeal, or shall not have been discharged within 60 days after the expiration of any such stay;

(c) Liens incidental to the conduct of business or the ownership of properties and assets (including landlords', carriers', warehousemen's, mechanics', materialmen's and other similar Liens for sums not yet due and payable or which are being contested in good faith by appropriate proceedings diligently conducted) and Liens to secure the performance of bids, tenders, leases, or trade contracts, or to secure statutory obligations (including obligations under workers compensation, unemployment insurance and other social security legislation), surety or appeal bonds or other Liens incurred in the ordinary course of business and not in connection with the borrowing of money;

(d) leases or subleases granted to others, zoning restrictions, easements, rights-of-way, restrictions and other similar charges or encumbrances, in each case incidental to the ownership of property or assets or the ordinary conduct of the business of the Company or any of its Subsidiaries, *provided* that such Liens do not, materially impair the use of such property and which are not violated in any material respect by the existing or proposed use by the Company and its Subsidiaries of the properties subject to such Liens;

(e) Liens securing Debt of a Subsidiary to the Company or to a Subsidiary;

(f) Liens created under indentures, mortgages and deeds of trust securing Debt of the Company or a Subsidiary;

"Capital Lease" means, at any time, a lease with respect to which the lessee is required concurrently to recognize the acquisition of an asset and the incurrence of a liability in accordance with GAAP.

"Capital Lease Obligation" means, with respect to any Person and a Capital Lease, the amount of the obligation of such Person as the lessee under such Capital Lease which would, in accordance with GAAP, appear as a liability on a balance sheet of such Person.

"Change in Control" is defined in **Section 8.7**.

"Closing" is defined in **Section 3**.

"Code" means the Internal Revenue Code of 1986, as amended from time to time, and the rules and regulations promulgated thereunder from time to time.

"Company" means Aqua Pennsylvania, Inc., a Pennsylvania corporation.

"Confidential Information" is defined in **Section 20**.

"Consolidated Debt" means, as of any date of determination, the total of all Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

"Consolidated Funded Debt" means, as of any date of determination, the total of all Funded Debt of the Company and its Subsidiaries outstanding on such date, after eliminating all offsetting debits and credits between the Company and its Subsidiaries and all other items required to be eliminated in the course of the preparation of consolidated financial statements of the Company and its Subsidiaries in accordance with GAAP.

"Consolidated Net Worth" means, as of any date of determination, the sum of (i) the par value (or value stated on the books of the corporation) of the capital stock (but excluding treasury stock and capital stock subscribed and unissued) of the Company and its Subsidiaries plus (ii) the amount of the paid-in capital and retained earnings of the Company and its Subsidiaries, in each case as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

"Consolidated Total Assets" means, as of any date of determination, the total amount of all assets of the Company and its Subsidiaries, as such amounts would be shown on a consolidated balance sheet of the Company and its Subsidiaries as of such time prepared in accordance with GAAP.

"Consolidated Total Capitalization" means, as of any date of determination, the sum of (i) Consolidated Funded Debt and (ii) Consolidated Net Worth.

"Debt" means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

(f) Swaps of such Person; and

(g) Guaranties of such Person with respect to liabilities of a type described in any of clauses (a) through (f) hereof.

Debt of any Person shall include all obligations of such Person of the character described in clauses (a) through (g) to the extent such Person remains legally liable in respect thereof notwithstanding that any such obligation is deemed to be extinguished under GAAP.

"Default" means an event or condition the occurrence or existence of which would, with the lapse of time or the giving of notice or both, become an Event of Default.

"Default Rate" means with respect to the Notes, that rate of interest per annum that is the greater of (i) 7.66% per annum, or (ii) 2% over the rate of interest publicly announced by PNC Bank, N.A. in New York, New York as its "base" or "prime" rate.

"Environmental Laws" means any and all federal, state, local, and foreign statutes, laws, regulations, ordinances, rules, judgments, orders, decrees, permits, concessions, grants, franchises, licenses, agreements or governmental restrictions relating to pollution and the protection of the environment or the release of any materials into the environment, including but not limited to those related to hazardous substances or wastes, air emissions and discharges to waste or public systems.

"ERISA" means the Employee Retirement Income Security Act of 1974, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

"Debt" means, with respect to any Person, without duplication,

(a) its liabilities for borrowed money;

(b) its liabilities for the deferred purchase price of property acquired by such Person (excluding accounts payable and other accrued liabilities arising in the ordinary course of business but including, without limitation, all liabilities created or arising under any conditional sale or other title retention agreement with respect to any such property);

(c) its Capital Lease Obligations;

(d) all liabilities for borrowed money secured by any Lien with respect to any property owned by such Person (whether or not it has assumed or otherwise become liable for such liabilities);

(e) all non-contingent liabilities in respect of reimbursement agreements or similar agreements in respect of letters of credit or instruments serving a similar function issued or accepted for its account by banks and other financial institutions;

(f) Swaps of such Person; and

(g) Guaranties of such Person with respect to liabilities of a type described in any of clauses (a) through (f) hereof.

Debt of any Person shall include all obligations of such Person of the character described in clauses (a) through (g) to the extent such Person remains legally liable in respect thereof notwithstanding that any such obligation is deemed to be extinguished under GAAP.

"Default" means an event or condition the occurrence or existence of which would, with the lapse of time or the giving of notice or both, become an Event of Default.

"Default Rate" means with respect to the Notes, that rate of interest per annum that is the greater of (i) 7.66% per annum, or (ii) 2% over the rate of interest publicly announced by PNC Bank, N.A. in New York, New York as its "base" or "prime" rate.

"Environmental Laws" means any and all federal, state, local, and foreign statutes, laws, regulations, ordinances, rules, judgments, orders, decrees, permits, concessions, grants, franchises, licenses, agreements or governmental restrictions relating to pollution and the protection of the environment or the release of any materials into the environment, including but not limited to those related to hazardous substances or wastes, air emissions and discharges to waste or public systems.

"ERISA" means the Employee Retirement Income Security Act of 1974, as amended from time to time, and the rules and regulations promulgated thereunder from time to time in effect.

AMENDED AND RESTATED CREDIT AGREEMENT

among

AQUA PENNSYLVANIA, INC.

and

THE BANKS PARTY HERETO

and

PNC BANK, NATIONAL ASSOCIATION
as Agent

Dated as of November 17, 2016

5.9 Taxes. Pay when due all taxes, assessments and governmental charges imposed upon it or any of its properties or that it is required to withhold and pay over, except where contested in good faith and where adequate reserves have been set aside to the extent required under GAAP.

5.10 Covenants of the Indenture. Comply at all times with the covenants contained in the Indenture, as last supplemented by the Supplemental Indenture, without regard to any amendment of or supplement to the Indenture occurring after October 15, 2010.

5.11 Guarantees of Obligations. It is the intent of the parties hereto that all of the obligations of the Borrower hereunder shall be unconditionally guaranteed by all of its Material Subsidiaries to the maximum extent permitted under any Requirement of Law applicable to any such Material Subsidiary. Accordingly, in the event that any Material Subsidiary shall be formed, acquired or come into existence after the date hereof then the Borrower will cause such Material Subsidiary to (i) execute and deliver a Guaranty Agreement in form and substance satisfactory to the Agent pursuant to which such Material Subsidiary will become a "Guarantor" hereunder, and guarantee the obligations of the Borrower hereunder and under the Notes and other Loan Documents and (ii) deliver such proof of corporate or other action, incumbency of officers, opinions of counsel and other documents as is consistent with those delivered by the Borrower pursuant to Section 4.1 on the Closing Date or as the Agent shall have reasonably requested.

5.12 Anti-Money Laundering/International Trade Law Compliance. No Covered Entity will become a Sanctioned Person. No Covered Entity, either in its own right or through any third party, will (a) have any of its assets in a Sanctioned Country or in the possession, custody or control of a Sanctioned Person in violation of any Anti-Terrorism Law; (b) do business in or with, or derive any of its income from investments in or transactions with, any Sanctioned Country or Sanctioned Person in violation of any Anti-Terrorism Law; (c) engage in any dealings or transactions prohibited by any Anti-Terrorism Law or (d) use the Loans to fund any operations in, finance any investments or activities in, or make any payments to, a Sanctioned Country or Sanctioned Person in violation of any Anti-Terrorism Law. The funds used to repay the Loans will not be derived from any unlawful activity. Each Covered Entity shall comply with all Anti-Terrorism Laws. The Borrower shall promptly notify the Agent in writing upon the occurrence of a Reportable Compliance Event.

SECTION 6. NEGATIVE COVENANTS

The Borrower hereby agrees that, so long as the Commitments remain in effect, any Note remains outstanding and unpaid or any other amount is owing to any Bank or the Agent hereunder, the Borrower shall not directly or indirectly:

6.1 Financial Covenants.

(a) Equity to Capital Ratio. Permit as of the end of any fiscal quarter the Equity to Capital Ratio to be less than thirty eight percent (38%).

(b) Interest Coverage Ratio. Permit as of the end of any fiscal quarter the Interest Coverage Ratio to be less than 1.8 to 1.

6.2 Limitation on Certain Debt. Except for the Loans and Commitments under the Loan Documents and the Term Loan Facilities, at any time enter into, assume or suffer to exist lines of credit or comparable extensions of credit from one or more commercial banks (or their Affiliates) under which the Borrower has incurred or may incur aggregate Debt in excess of $15,000,000.

6.3 Limitation on Liens. Create, incur, assume or suffer to exist any Lien upon any of its property, assets or revenues, including, without limitation, the stock of its Subsidiaries, whether now owned or hereafter acquired, except for:

(a) The following, (i) if the validity or amount thereof is being contested in good faith by appropriate and lawful proceedings diligently conducted so long as levy and execution thereon have been stayed and continue to be stayed or (ii) if a final judgment is entered and such judgment is discharged within thirty (30) days of entry, and in either case they do not materially impair the ability of the Borrower to perform its obligations hereunder or under the other Loan Documents:

(A) Claims or Liens for taxes, assessments or charges due and payable and subject to interest or penalty, provided that the Borrower maintains such reserves or other appropriate provisions as shall be required by GAAP and pays all such taxes, assessments or charges forthwith upon the commencement of proceedings to foreclose any such Lien;

(B) Claims, Liens or encumbrances upon, and defects of title to, real or personal property including any attachment of personal or real property or other legal process prior to adjudication of a dispute on the merits; and

(C) Claims or Liens of mechanics, materialmen, warehousemen, carriers, or other statutory nonconsensual Liens;

(b) pledges or deposits in connection with workers' compensation, unemployment insurance and other social security legislation;

(c) deposits to secure the performance of bids, trade contracts (other than for borrowed money), leases, statutory obligations, surety and appeal bonds, performance bonds and other obligations of a like nature incurred in the ordinary course of business of the Borrower;

(d) easements, rights-of-way, restrictions and other similar encumbrances incurred in the ordinary course of business which, in the aggregate, are not substantial in amount and which do not interfere with the ordinary conduct of the business of the Borrower;

(e) Liens which were in existence on the date hereof and shown on Schedule 6.3 and replacements, extensions or replacements thereof;

"Covered Entity": (a) the Borrower, each of the Borrower's Subsidiaries and all Guarantors and (b) each Person that, directly or indirectly, is in control of a Person described in clause (a) above. For purposes of this definition, control of a Person shall mean the direct or indirect (x) ownership of, or power to vote, 25% or more of the issued and outstanding equity interests having ordinary voting power for the election of directors of such Person or other Persons performing similar functions for such Person, or (y) power to direct or cause the direction of the management and policies of such Person whether by ownership of equity interests, contract or otherwise.

"Daily LIBOR Rate" shall mean, for any day, the rate per annum determined by the Agent by dividing (the resulting quotient rounded upwards, if necessary, to the nearest 1/100th of 1%) (x) the Published Rate by (y) a number equal to 1.00 minus the Eurocurrency Reserve Requirements. The Published Rate shall be adjusted as of each Business Day based on changes in the Published Rate or the Eurocurrency Reserve Requirements without notice to the Borrower, and shall be applicable from the effective date of any such change. Notwithstanding the foregoing, if the Daily LIBOR Rate as determined above would be less than zero, such rate shall be deemed to be zero for purposes of this Agreement.

"Debt": with respect to any Person, at any time, without duplication, all of (i) its liabilities for borrowed money, (ii) liabilities secured by any Lien existing on property owned by such Person (whether or not such liabilities have been assumed), (iii) its liabilities in respect to Capital Leases; (iv) its liabilities under Contingent Obligations; and (v) all other obligations which are required by GAAP to be shown as liabilities on its balance sheet but excluding (x) deferred taxes and other deferred or long-term liabilities and other amounts not in respect of borrowed money and (y) the aggregate amount of accounts receivable sold, factored or otherwise transferred for value without recourse (other than for breach of representations).

"Default": any of the events specified in Section 7, whether or not any requirement for the giving of notice, the lapse of time, or both, or any other condition precedent therein set forth, has been satisfied.

"Defaulting Bank": any Bank, as determined by the Agent, that has (a) failed to fund any portion of its Revolving Credit Loans or participations in Swing Line Loans within three Business Days of the date required to be funded by it hereunder, (b) notified the Borrower, the Agent, the Swing Line Bank or any Bank in writing that it does not intend to comply with any of its funding obligations under this Agreement or has made a public statement to the effect that it does not intend to comply with its funding obligations under this Agreement or under other agreements in which it commits to extend credit, (c) failed, within three Business Days after request by the Agent, to confirm that it will comply with the terms of this Agreement relating to its obligations to fund prospective Revolving Credit Loans or participations in Swing Line Loans, (d) otherwise failed to pay over to the Agent or any other Bank any other amount required to be paid by it hereunder within three Business Days of the date when due, unless the subject of a good faith dispute, or (e) (i) become or is insolvent or has a parent company that has become or is insolvent, (ii) become the subject of a Bail-In Action, or (iii)

become the subject of a bankruptcy or insolvency proceeding, or has had a receiver, conservator, trustee or custodian appointed for it, or has taken any action in furtherance of, or indicating its consent to, approval of or acquiescence in any such proceeding or appointment or has a parent company that has become the subject of a bankruptcy or insolvency proceeding, or has had a receiver, conservator, trustee or custodian appointed for it, or has taken any action in furtherance of, or indicating its consent to, approval of or acquiescence in any such proceeding or appointment (it being understood that a Defaulting Bank shall cease to be a Defaulting Bank if the Borrower, the Agent and the Swing Line Bank shall each agree that such Defaulting Bank has adequately remedied all matters that caused such Bank to be a Defaulting Bank).

"Distribution": in respect of any corporation, (a) dividends, distributions or other payments on account of any capital stock of the corporation (except distributions in common stock of such corporation); (b) the redemption or acquisition of such stock or of warrants, rights or other options to purchase such stock (except when solely in exchange for common stock of such corporation); and (c) any payment on account of, or the setting apart of any assets for a sinking or other analogous fund for, the purchase, redemption, defeasance, retirement or other acquisition of any share of any class of capital stock of such corporation or any warrants or options to purchase any such stock.

"Dollars" and "$": dollars in lawful currency of the United States of America.

"EEA Financial Institution": (i) any credit institution or investment firm established in any EEA Member Country which is subject to the supervision of an EEA Resolution Authority, (ii) any entity established in an EEA Member Country which is a parent of an institution described in clause (i) of this definition, or (iii) any financial institution established in an EEA Member Country which is a subsidiary of an institution described in clauses (i) or (ii) of this definition and is subject to consolidated supervision with its parent.

"EEA Member Country": any of the member states of the European Union, Iceland, Liechtenstein and Norway.

"EEA Resolution Authority" any public administrative authority or any person entrusted with public administrative authority of any EEA Member Country (including any delegee) having responsibility for the resolution of any EEA Financial Institution.

"Environmental Laws": any and all applicable foreign, Federal, state, local or municipal laws, rules, orders, regulations, statutes, ordinances, codes, decrees or binding requirements of any Governmental Authority, or binding Requirement of Law (including common law) regulating, relating to or imposing liability or standards of conduct concerning protection of the environment or public health, remediation of environmental conditions, or damages arising from such conditions, as now or may at any time hereafter be in effect.

"Equity to Capital Ratio": at the date of determination, the ratio of Consolidated Shareholders' Equity to the sum of (i) Consolidated Funded Debt and (ii) Consolidated Shareholders' Equity.

"ERISA": the Employee Retirement Income Security Act of 1974, as amended from time to time.

"EU Bail-In Legislation Schedule": the EU Bail-In Legislation Schedule published by the Loan Market Association (or any successor person), as in effect from time to time.

"Eurocurrency Reserve Requirements": for any day as applied to a Eurodollar Loan, the aggregate (without duplication) of the rates (expressed as a decimal fraction) of reserve requirements in effect on such day (including, without limitation, basic, supplemental, marginal and emergency reserves under any regulations of the Board of Governors of the Federal Reserve System or other Governmental Authority having jurisdiction with respect thereto) dealing with reserve requirements prescribed for eurocurrency funding (currently referred to as "Eurocurrency Liabilities" in Regulation D of such Board) maintained by a member bank of such System.

"Eurodollar Rate": with respect to the Loans comprising any Eurodollar Borrowing for any Interest Period, the interest rate per annum determined by the Agent by dividing (the resulting quotient rounded upwards, if necessary, to the nearest 1/100th of 1% per annum) (a) the rate which appears on the Bloomberg Page BBAM1 (or on such other substitute Bloomberg page that displays rates at which U.S. dollar deposits are offered by leading banks in the London interbank deposit market), or the rate which is quoted by another source selected by the Agent as an authorized information vendor for the purpose of displaying rates at which U.S. dollar deposits are offered by leading banks in the London interbank deposit market (for purposes of this definition, an "Alternate Source"), at approximately 11:00 a.m., London time, two (2) Business Days prior to the commencement of such Interest Period as the London interbank offered rate for U.S. Dollars for an amount comparable to such Eurodollar Borrowing and having a borrowing date and a maturity comparable to such Interest Period (or if there shall at any time, for any reason, no longer exist a Bloomberg Page BBAM1 (or any substitute page) or any Alternate Source, a comparable replacement rate determined by the Agent at such time (which determination shall be conclusive absent manifest error)), by (b) a number equal to 1.00 minus the Eurocurrency Reserve Requirements; provided, however, that if the Eurodollar Rate determined as provided above would be less than zero, such rate shall be deemed to be zero for purposes of this Agreement.

The Eurodollar Rate shall be adjusted with respect to any Eurodollar Borrowing that is outstanding on the effective date of any change in the Eurocurrency Reserve Requirements as of such effective date. The Agent shall give prompt notice to the Borrower of the Eurodollar Rate as determined or adjusted in accordance herewith, which determination shall be conclusive absent manifest error.

"Eurodollar Borrowing": a Borrowing comprised of Eurodollar Loans.

"Eurodollar Loan": any Revolving Credit Loan bearing interest at a rate determined by reference to the Eurodollar Rate in accordance with the provisions of Section 2.

"Event of Default": any of the events specified in Section 7, provided that any requirement for the giving of notice, the lapse of time, or both, or any other condition, has been satisfied.

"Excluded Taxes": as defined in subsection 2.12(a).

"Existing Credit Agreement": as defined in the Background to this Agreement.

"Exposure": as to any Bank at any date, an amount equal to the sum of (a) the aggregate principal amount of all Loans made by such Bank then outstanding and (b) the principal amount of such Bank's pro rata share of Swing Line Loans then outstanding based on its Commitment Percentage.

"FATCA": Sections 1471 through 1474 of the Code, as of the date of this Agreement (or any amended or successor version that is substantially comparable and not materially more onerous to comply with), any current or future regulations or official interpretations thereof and any agreement entered into pursuant to Section 1471(b)(1) of the Code.

"Federal Funds Effective Rate": for any day, the weighted average of the rates on overnight Federal funds transactions with members of the Federal Reserve System arranged by Federal funds brokers, as published on the next succeeding Business Day by the Federal Reserve Bank of New York, or, if such rate is not so published for any day which is a Business Day, the average of the quotations for the day of such transactions received by the Agent from three Federal funds brokers of recognized standing selected by it.

"Federal Funds Open Rate" for any day shall mean the rate per annum which is the daily federal funds open rate as quoted by ICAP North America, Inc. (or any successor) as set forth on the Bloomberg Screen BTMM for that day opposite the caption "OPEN" (or on such other substitute Bloomberg Screen that displays such rate), or as set forth on such other recognized electronic source used for the purpose of displaying such rate as selected by the Agent (an "Alternate Federal Funds Source") (or if such rate for such day does not appear on the Bloomberg Screen BTMM (or any substitute screen) or on any Alternate Federal Funds Source, or if there shall at any time, for any reason, no longer exist a Bloomberg Screen BTMM (or any substitute screen) or any Alternate Federal Funds Source, a comparable replacement rate determined by the Agent at such time (which determination shall be conclusive absent manifest error)); provided, that if such day is not a Business Day, the Federal Funds Open Rate for such day shall be the Federal Funds Open Rate on the immediately preceding Business Day."

"Fee Letter": the letter from the Agent to the Borrower dated November 14, 2016 regarding certain fees payable by the Borrower.

"Fees": as defined in subsection 2.4(a).

"Foreign Bank": any Bank that is not created or organized under the Laws of the United States, any State thereof or the District of Columbia.

"GAAP": at any time with respect to the determination of the character or amount of any asset or liability or item of income or expense, or any consolidation or other accounting computation, generally accepted accounting principles as applied to the public utility industry, as such principles shall be in effect on the date of, or at the end of the period covered by, the financial statements from which such asset, liability, item of income, or item of expense, is derived, or, in the case of any such computation, as in effect on the date when such computation is required to be determined, subject to Section 1.3(b).

"Governmental Authority": shall mean the government of the United States of America or any other nation, or of any political subdivision thereof, whether state or local, and any agency, authority, instrumentality, regulatory body, court, central bank or other entity exercising executive, legislative, judicial, taxing, regulatory or administrative powers or functions of or pertaining to government (including any supra-national bodies such as the European Union or the European Central Bank) and any group or body charged with setting financial accounting or regulatory capital rules or standards (including, without limitation, the Financial Accounting Standards Board, the Bank for International Settlements or the Basel Committee on Banking Supervision or any successor or similar authority to any of the foregoing).

"Guarantor": any Material Subsidiary which becomes a "Guarantor" after the date hereof pursuant to Section 5.11.

"Guaranty": any Guaranty Agreement entered into by a Guarantor pursuant to Section 5.11.

"Indenture": means the Indenture of Mortgage dated as of January 1, 1941 between the Borrower and Chase Manhattan Trust Company, National Association, as successor Trustee, as amended and supplemented.

"Insolvency": with respect to any Multiemployer Plan, the condition that such Plan is insolvent within the meaning of Section 4245 of ERISA.

"Insolvent": pertaining to a condition of Insolvency.

"Interest Coverage Ratio": at the date of determination, the ratio of Consolidated EBIT to Consolidated Interest Expense, in each case for the prior four (4) consecutive fiscal quarters.

"Interest Payment Date": (a) as to any Base Rate Loan or Swing Line Loan, the last day of each month, (b) as to any Eurodollar Loan having an Interest Period of three months or less, the last day of such Interest Period, and (c) as to any Eurodollar Loan having an Interest Period longer than three months, each day which is three months, or a

whole multiple thereof, after the first day of such Interest Period and the last day of such Interest Period.

"Interest Period": with respect to any Eurodollar Loan:

(i) initially the period commencing on the borrowing or conversion date, as the case may be, with respect to such Eurodollar Loan and ending one, two, three or six months thereafter, as selected by the Borrower in their notice of borrowing or notice of conversion, given with respect thereto; and

(ii) thereafter, each period commencing on the last day of the next preceding Interest Period applicable to such Eurodollar Loan and ending one, two, three or six months thereafter, as selected by the Borrower by irrevocable notice to the Agent not less than three Business Days prior to the last day of the then current Interest Period with respect thereto;

provided that, the foregoing provisions relating to Interest Periods are subject to the following:

(i) if any Interest Period would end on a day other than a Business Day, such Interest Period shall be extended to the next succeeding Business Day unless such next succeeding Business Day would fall in the next calendar month, in which case such Interest Period shall end on the next preceding Business Day;

(ii) any Interest Period that begins on the last Business Day of a calendar month (or on a day for which there is no numerically corresponding day in the calendar month at the end of such Interest Period) shall end on the last Business Day of a calendar month;

(iii) an Interest Period that otherwise would extend beyond the Termination Date shall end on the Termination Date; and

(iv) the Borrower shall select Interest Periods so as not to require a payment or prepayment of any Eurodollar Loan during an Interest Period for such Loan.

"Investments": investments (by loan or extension of credit, purchase, advance, guaranty, capital contribution or otherwise) made in cash or by delivery of Property, by the Borrower (i) in any Person, whether by acquisition of stock or other ownership interest, indebtedness or other obligation or Security, or by loan, advance or capital contribution, or (ii) in any Property or (iii) any agreement to do any of the foregoing.

"Law": any law(s) (including common law), constitution, statute, treaty, regulation, rule, ordinance, opinion, issued guidance, release, ruling, order, executive order, injunction, writ, decree, bond, judgment, authorization or approval, lien or award of or any settlement arrangement, by agreement, consent or otherwise, with any Governmental Body, foreign or domestic.

[CS&M Ref. No. 4025-142]

[1] RBC Capital Markets is a brand name for the capital markets activities of Royal Bank of Canada and its affiliates.

SECTION 6.03 Restrictive Agreements. The Company will not, and will not permit any Restricted Subsidiary to, enter into or permit to exist any contractual obligation (other than this Agreement or any other Loan Document) that limits the ability of any Restricted Subsidiary to make dividends or other distributions with respect to its Equity Interests to the Company or any Restricted Subsidiary, unless the Company determines in good faith that such contractual obligations would not materially impede the Company's ability to meet its payment obligations under this Agreement.

SECTION 6.04 Transactions with Affiliates. The Company will not, and will not permit any Restricted Subsidiary to, enter into or cause, suffer or permit to exist any transaction, arrangement or contract with any Affiliate (other than the Company or any Restricted Subsidiary) that is on terms materially less favorable to the Company or such Restricted Subsidiary than those that would be obtained at such time in a comparable arm's-length transaction with a Person other than an Affiliate, provided that the foregoing shall not apply to (a) any payments made and other transactions entered into in the ordinary course of business with officers and directors of the Company or any Subsidiary, and consulting fees and expenses incurred in the ordinary course of business payable to former officers or directors of the Company or any Subsidiary or (b) any other transaction (if part of a series of related transactions, together with such related transactions) involving consideration or value of less than $10,000,000.

SECTION 6.05 Financial Covenant. The Company will not permit the ratio, on the last day of any fiscal quarter of the Company, of (a) Consolidated Funded Debt as of such day to (b) the sum of (i) Consolidated Funded Debt as of such day and (ii) Consolidated Shareholders' Equity as of such day, to exceed 65%; provided that if the PNG Acquisition is consummated, the maximum ratio permitted by this Section 6.05 shall be (a) with respect to the fiscal quarter of the Company during which the PNG Acquisition Closing Date occurs and any subsequent fiscal quarter of the Company that ends no later than 180 days after the PNG Acquisition Closing Date, 80% and (B) with respect to any fiscal quarter of the Company that ends thereafter, 65%.

ARTICLE VII

Events of Default

SECTION 7.01 Events of Default. If any of the following events ("Events of Default") shall occur and be continuing:

(a) the Company shall fail to pay any principal of any Loan or any LC Disbursement when and as the same shall become due and payable, whether at the due date thereof or at a date fixed for prepayment thereof or otherwise;

(b) the Company shall fail to pay any interest or any fee or any other amount (other than an amount referred to in clause (a) of this Section 7.01) payable under this Agreement or any other Loan Document, when and as the same shall become due and payable, and such failure shall continue unremedied for a period of five days;

(c) any representation, warranty or statement of fact made or deemed made by or on behalf of the Company in any Loan Document or in any certificate, financial statement or

Prospectus Supplement
(To Prospectus dated February 28, 2018)

32,495,667 Shares

AQUA AMERICA, INC.

Common Stock

We are offering 32,495,667 shares of our common stock, par value $0.50 per share (our "common stock"). Our common stock is listed on the New York Stock Exchange under the symbol "WTR." On April 17, 2019, the last reported sale price of our common stock on the New York Stock Exchange was $34.82 per share.

We intend to use the net proceeds from this offering, together with the net proceeds from the other Financing Transactions (as defined herein), to (1) fund the acquisition (the "Acquisition") of all of the issued and outstanding limited liability company membership interests of LDC Funding LLC ("LDC"), the parent of a group of natural gas public utility companies (collectively with LDC, "Peoples"), (2) complete the Company Debt Refinancing (as defined herein) and (3) pay related costs and expenses. This offering is not conditioned upon the consummation of the Acquisition. If the Acquisition is not consummated, we intend to use the net proceeds from this offering for general corporate purposes, which may include the Company Debt Refinancing, the redemption of securities issued in connection with the other Financing Transactions, repurchases of our common stock, debt repayment, capital expenditures and investments. See "Use of Proceeds."

Concurrently with this offering, we have commenced the TEU Offering (as defined herein), which is being made by means of a separate prospectus supplement and not by means of this prospectus supplement. This offering is not conditioned upon the completion of the other Financing Transactions, including the TEU Offering. This prospectus supplement is not an offer to sell or a solicitation of an offer to buy any securities offered in any of the other Financing Transactions.

Investing in our common stock involves risks. See "Risk Factors" on page S-13 of this prospectus supplement, page 8 of the accompanying prospectus and in the documents we incorporate by reference in this prospectus supplement and the accompanying prospectus.

	Per Share	Total[1]
Public Offering Price	$ 34.620	$1,124,999,992
Underwriting Discount	$ 0.779	$ 25,314,125
Proceeds, before expenses, to Aqua America	$ 33.841	$1,099,685,867

(1) Assumes no exercise of the underwriters' option to purchase additional shares, described below.

We have granted the underwriters the option, exercisable in whole or from time to time in part, to purchase up to an additional 4,874,350 shares of our common stock directly from us at the public offering price per share shown above, less the underwriting discount per share shown above, exercisable for 30 days after the date of this prospectus supplement.

Neither the U.S. Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus supplement or the accompanying prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the shares of common stock to purchasers on or about April 23, 2019.

ABOUT THIS PROSPECTUS SUPPLEMENT

Unless otherwise specified or the context requires otherwise, references in this prospectus supplement to (1) "Aqua America," the "Company," "we," "us," "our" and similar references refer to Aqua America, Inc. and its subsidiaries prior to the proposed Acquisition, (2) the "combined company" refers to Aqua America and its subsidiaries after completion of the Acquisition (as defined herein) and (3) "this offering" refers to this offering of the shares pursuant to this prospectus supplement and the accompanying prospectus.

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering of our common stock and also adds to and updates information contained in the accompanying prospectus and the documents incorporated by reference in the accompanying prospectus. The second part is the accompanying prospectus, which gives more general information about us, some of which does not apply to this offering of our common stock. To the extent the information in this prospectus supplement is inconsistent with the information in the accompanying prospectus, you should rely on the information in this prospectus supplement.

We have not, and the underwriters have not, authorized anyone to provide you with any information other than that contained or incorporated by reference in this prospectus supplement, the accompanying prospectus or in any free writing prospectus we may provide to you in connection with this offering. Neither we nor the underwriters take any responsibility for, or provide any assurances as to the reliability of, any additional or different information that others may give you. Neither we nor the underwriters are offering to sell our common stock or seeking offers to buy our common stock in jurisdictions where offers or sales are not permitted. You should assume that the information contained in this prospectus supplement, the accompanying prospectus and any related free writing prospectus is accurate only as of their respective dates or as of the respective dates specified in such information, as applicable, and the information contained in documents incorporated by reference is accurate only as of the respective dates of those documents or as of the respective dates specified in such information, as applicable, in each case regardless of the time of delivery of this prospectus supplement or the accompanying prospectus or any such free writing prospectus or any sale of our common stock. Our business, financial condition, results of operations and prospects may have changed since those dates.

The distribution of this prospectus supplement, the accompanying prospectus and any related free writing prospectus and the offering of our common stock in certain jurisdictions may be restricted by law. Persons into whose possession this prospectus supplement, the accompanying prospectus and any such free writing prospectus come should inform themselves about and observe any such restrictions. This prospectus supplement, the accompanying prospectus and any such free writing prospectus do not constitute, and may not be used in connection with, an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorized or in which the person making such offer or solicitation is not qualified to do so or to any person to whom it is unlawful to make such offer or solicitation. See "Underwriting."

BASIS OF PRESENTATION

Unless otherwise specified or the context requires otherwise, the information in this prospectus supplement and the accompanying prospectus, including the documents incorporated by reference herein or therein, (1) does not give effect to any of the Transactions (as defined below), (2) when giving effect to this offering or the TEU Offering, assumes that the underwriters for this offering and the underwriters for the TEU Offering do not exercise their respective options to purchase additional shares of our common stock or additional TEUs (as defined herein), respectively, from us and (3) when giving effect to the Acquisition, assumes there are no adjustments to the Default Cash Acquisition Consideration (as defined herein) and that the Cash Acquisition Consideration (as defined herein) will therefore be $4.275 billion.

Although (1) the Acquisition has not yet occurred and, if completed, will not occur until after the closing of this offering, (2) this offering and certain of the other Financing Transactions are not contingent upon the completion of the other Financing Transactions, the Acquisition or the Company Debt Refinancing and (3) the indebtedness or other securities to be incurred or issued in certain of the Financing Transactions may not be incurred or issued, or may be redeemed, repaid, or repurchased, if the Acquisition is not consummated or is not consummated by a specified date, the pro forma and certain of the as adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus gives pro forma effect to the Acquisition, the Company Debt Refinancing and the Financing Transactions as if we had completed all such transactions as of December 31, 2018, in the case of balance sheet data, and as of January 1, 2018, in the case of income statement data, unless otherwise specified. The pro forma financial information included or incorporated by reference in this prospectus supplement does not, unless otherwise stated, give effect to our expected issuance of $150 million of the Debt Financing, because we intend to use that portion of the Debt Financing for general corporate purposes, including working capital and capital needs. See “Use of Proceeds.” Moreover, the unaudited pro forma consolidated combined financial information included in our Current Report on Form 8-K/A filed with the U.S. Securities and Exchange Commission (the “SEC”) on April 15, 2019, which is incorporated by reference in this prospectus supplement and the accompanying prospectus and may be obtained as described in this prospectus supplement under the heading “Where You Can Find Additional Information; Incorporation of Certain Documents by Reference,” and certain pro forma and as adjusted information included in this prospectus supplement, have been calculated on the basis of assumptions made by our management at the time such information was prepared. For example, such unaudited pro forma consolidated combined financial information and other adjusted information reflects assumptions regarding (a) the amount of proceeds we will receive from, and certain pricing and other terms of, the Financing Transactions, (b) the number of securities to be issued in connection with the Financing Transactions and (c) the terms on which the Acquisition and the Company Debt Refinancing will be completed. As a result, purchasers in this offering should not place undue reliance on the pro forma and as adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus because this offering is not contingent upon completion of any of the other transactions reflected in that information.

All references to currency amounts included in this prospectus supplement are in U.S. dollars unless specifically noted otherwise.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus supplement, the accompanying prospectus and the documents they incorporate by reference contain, and any free writing prospectus we may provide to you in connection with this offering are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act") that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions. Such forward-looking statements include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increase requests;
- the availability and cost of capital financing;
- developments, trends and consolidation in the water and wastewater utility and infrastructure industries;
- dividend payment projections;
- opportunities for future acquisitions, both within and outside the water and wastewater industry, the success of pending acquisitions and the impact of future acquisitions;
- expectations regarding the proposed Acquisition, including statements regarding regulatory approvals for the Acquisition, potential financing transactions related to the Acquisition (including statements regarding the Financing Transactions and the use of proceeds therefrom, including the Company Debt Refinancing), closing of the Acquisition or the impact of the Acquisition on the Company;
- the capacity of our water supplies, water facilities and wastewater facilities;
- the impact of federal and/or state tax policies, including changes in tax laws and policies as a result of the Tax Cuts and Jobs Act of 2017, and the regulatory treatment of the effects of those policies;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient plumbing fixtures and appliances on water usage per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates and decisions regarding potential acquisitions;
- the development of new services and technologies by us or our competitors;

- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;
- general economic conditions;
- acquisition-related costs and synergies;
- the sale of water and wastewater divisions; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- our ability to integrate and otherwise realize all of the anticipated benefits of businesses, technologies or services which we may acquire;
- our ability to manage the expansion of our business, including our ability to manage our expanded operations following the closing of the Acquisition;
- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- our ability to treat and supply water or collect and treat wastewater;
- Peoples's ability to transport, distribute and store natural gas;
- the profitability of future acquisitions;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- conditions to the completion of the Acquisition may not be satisfied or waived on a timely basis, or at all;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests and decisions regarding potential acquisitions;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions and seasonality effects;
- changes in, or unanticipated, capital requirements;
- changes in our credit ratings or the market price of our common stock;
- changes in valuation of strategic ventures;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- the diversion of our management's time and resources caused by the announcement and pendency of the Acquisition;

- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services and commodity prices;
- civil disturbance or terroristic threats or acts;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in accounting pronouncements;
- litigation and claims;
- changes in environmental conditions, including the effects of climate change;
- restrictions on our subsidiaries' ability to make dividends and other distributions;
- restrictions and limitations that may stem from financing arrangements we enter into or assume in the future, or from the redemptions and repurchases we may undertake if the Acquisition is not consummated;
- dilution to our shareholders related to any financing transactions, including the Financing Transactions; and
- broad discretion of our management to use the net proceeds from this offering if the Acquisition is not consummated.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus supplement, the accompanying prospectus and the documents that we incorporate by reference into this prospectus supplement completely and with the understanding that our actual results, performance and achievements may be materially different from what we expect. These forward- looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus supplement, the date of the document containing the applicable statement or the date specified in such statement, as applicable. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see "Risk Factors." We qualify all of our forward-looking statements by these cautionary statements.

Investing in our common stock involves risks. You should review and consider carefully the risks, uncertainties and other factors that affect our business, financial condition and results of operations and the value of the shares, including those described in the "Business," "Risk Factors," and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections and other sections in our Annual Report on Form 10-K for the fiscal year ended December 31, 2018, and our Current Report on Form 8-K/A filed with the SEC on April 15, 2019, which are incorporated by reference in this prospectus supplement, and those described in the "Risk Factors" sections and other sections of this prospectus supplement and the accompanying prospectus. You may obtain copies of these reports and documents as described under "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference" in this prospectus supplement. These risks, uncertainties and other factors could cause you to suffer a loss of all or part of your investment in the shares. Before making an investment decision, you should carefully consider these risks, uncertainties and other factors, as well as other information contained or incorporated by reference in this prospectus supplement and the accompanying prospectus and any related free writing prospectus we may provide to you in connection with this offering. However, additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business, operations, financial condition and financial results and the value of the shares.

MARKET AND INDUSTRY DATA

This prospectus supplement, the accompanying prospectus and the documents incorporated by reference in this prospectus supplement and the accompanying prospectus include, and any free writing prospectus we may provide to you in connection with this offering may include, market, demographic and industry data and forecasts related to our business and to Peoples's business that are based on or derived from sources such as independent industry publications, publicly available information, government data and other information from third parties or that have been compiled or prepared by our or Peoples's management or employees. We do not guarantee the accuracy or completeness of any of this information, and we have not independently verified any of the information provided by third-party sources.

In addition, market, demographic and industry data and forecasts involve estimates, assumptions and other uncertainties and are subject to change based on various factors, including those discussed under the heading "Risk Factors" in this prospectus supplement and under similar headings in the documents that are incorporated by reference in this prospectus supplement and the accompanying prospectus. Accordingly, you should not place undue reliance on any of this information.

SUMMARY INFORMATION

The following summary highlights, and should be read together with, the information contained elsewhere in this prospectus supplement, the accompanying prospectus and the documents incorporated by reference herein and therein. This summary may not contain all of the information that may be important to you, and you should carefully read this entire prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before making an investment decision. You may obtain a copy of the documents incorporated by reference by following the instructions in the section titled "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," in this prospectus supplement. Unless we state otherwise or the context otherwise requires, references appearing in this prospectus supplement to "Aqua America," the "Company," "we," "us" and "our" should be read to refer to Aqua America, Inc. and its subsidiaries.

Aqua America, Inc.

Aqua America, Inc., a Pennsylvania corporation, is the holding company for regulated utilities providing water or wastewater services to an estimated three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately 53% of our operating revenues and approximately 71% of our regulated segment's income for 2018. As of December 31, 2018, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania's service territory is located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC ("Aqua Infrastructure") and Aqua Resources Inc. ("Aqua Resources"). Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water service through operating and maintenance contracts with a municipal authority and another party close to our utility companies' service territory; and offers, through a third-party, water and sewer line protection solutions and repair services to households. In 2017, we completed the sale of two business units that were reported within Aqua Resources, one which installed and tested devices that prevent the contamination of potable water and another that constructed, maintained, and repaired water and wastewater systems. Additionally, during 2016, we completed the sale of business units within Aqua Resources, which provided liquid waste hauling and disposal services and inspection, and cleaning and repair of storm and sanitary wastewater lines.

Aqua America, which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth through acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of American Water Works Company, Inc.'s regulated water and wastewater operations in Ohio in 2012. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and have extended our regulated operations from southeastern Pennsylvania to include our current regulated utility operations throughout Pennsylvania and in seven other states. During 2010 through 2013, we sold our utility operations in six states, pursuant to a portfolio rationalization strategy to focus our operations in areas where we have critical mass and economic growth potential. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to pursue growth ventures in market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated businesses. On October 22, 2018, we entered into a purchase agreement to acquire a group of natural gas public utility companies that we refer to as "Peoples." Peoples serves approximately 740,000 gas utility

customers in western Pennsylvania, West Virginia, and Kentucky. See "—Recent Developments—Proposed Peoples Gas Acquisition" for additional information regarding Peoples and the Acquisition.

Our growth in revenues over the past five years is primarily a result of increases in water and wastewater rates and customer growth. The increase in our utility customer base, as shown below, has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions):

Year	Utility Customer Growth Rate
2018	2.3%
2017	1.1%
2016	1.6%
2015	1.9%
2014	1.3%

In 2018, our customer count increased by 22,741 customers, primarily due to utility systems that we acquired and organic growth. Overall, for the five-year period of 2014 through 2018, our utility customer base, adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 1.6%. During the five-year period ended December 31, 2018, our utility customer base, including customers associated with utility system acquisitions and dispositions, increased from 941,008 at January 1, 2014 to 1,005,590 at December 31, 2018. This five-year period includes the impact of the condemnation of our Fort Wayne, Indiana system in 2014, which resulted in the loss of approximately 13,000 connections.

Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010- 3489, and our telephone number is 610-527-8000. Our website may be accessed at *www.aquaamerica.com*. The reference to our website is intended to be an inactive textual reference only, and the contents of our website is not incorporated by reference herein and should not be considered part of this prospectus supplement.

Our Business Strategy

Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and have extended our regulated operations from southeastern Pennsylvania to include our current regulated utility operations throughout Pennsylvania and in seven other states. We are focused on operating our businesses in a safe and efficient manner to provide exceptional service to our customers. Our key strategic priorities are as follows:

Pursue High-Quality, Low-Risk Earnings Growth

Growth in our existing water and wastewater utility business comes from both customer growth and increases in water and wastewater rates, driven by utility infrastructure investment. We expect to invest approximately $1.4 billion into our existing water utility infrastructure over the 2019-2021 timeframe including approximately $550 million in 2019. These estimates exclude planned capital expenditures by Peoples and the costs of new mains financed by advances and contributions in aid of construction. Our investment plans are supported by constructive regulatory environments in the jurisdictions in which we operate, and are expected to result in annual rate base growth over the same time period. Our regulators have a track record of setting rates and establishing terms of service that allow our regulated subsidiaries to obtain a fair and reasonable return on capital invested. Further, several of our regulators have put in place programs that incentivize prudent investments in our utility system by providing for reduced regulatory lag. For example, New Jersey allows for an infrastructure rehabilitation surcharge for water utilities, while Pennsylvania, Illinois, Ohio, Indiana and North Carolina allow for the use of an infrastructure rehabilitation surcharge for both water and wastewater utility

systems. Aqua Virginia is also piloting an infrastructure rehabilitation surcharge for its water and wastewater utilities to be implemented in 2019, pursuant to the final order issued in Aqua Virginia's 2018 rate case.

In addition to our organic infrastructure investment, we expect to continue to actively explore opportunities to expand our operations through acquisitions of government-owned and regulated water and wastewater systems that provide services in areas near our existing service territories or in new service areas. With approximately 50,000 community water systems in the United States, 81% of which serve less than 3,300 customers, the water industry is the most fragmented of the major utility industries (telephone, natural gas, electric, water and wastewater). In the states where we operate regulated utilities, we believe there are approximately 14,000 community water systems of widely-varying size, with the majority of the population being served by government-owned water systems. Because of the fragmented nature of the water and wastewater utility industries, we believe that there are many potential water and wastewater system acquisition candidates throughout the United States. We believe numerous factors will drive continued consolidation of these systems, including the benefits of economies of scale, the increasing cost and complexity of environmental regulations, the need for substantial capital investment and the need for technological and managerial expertise.

Six of the states in which we operate currently have some form of fair market value legislation. This legislation allows the relevant public utility commission to utilize fair market value to set ratemaking rate base instead of the depreciated original cost of water or wastewater assets for certain qualifying municipal acquisitions. We believe that this legislation is another factor that will encourage consolidation in the water and wastewater industry, providing municipalities with an option for exiting the business if they are dealing with challenges associated with their aging, deteriorating water and wastewater assets, do not have the expertise or technical capabilities to continue to comply with ever increasing environmental regulations or simply want to focus on other community priorities. In 2018, we closed six municipal acquisitions with over 13,700 customers and over $100 million of rate base.

Maintain a Low-Risk Regulated Utility Profile

Our core skill set is operating, maintaining and growing a regulated utility platform. The vast majority of our earnings are derived from regulated utilities, and we intend to maintain our focus on regulated utility platforms. As further discussed in "—Recent Developments—Peoples Gas Acquisition—Strategic Rationale for the Acquisition," the Acquisition is consistent with this strategy. Our focus on regulated utilities has contributed to our historically stable earnings and cash flows, which forms the foundation for our dividend policy and has allowed us to raise dividends 28 times in the last 27 years.

Maintain Our Commitment to a Strong Balance Sheet

Our goal is to maintain a strong balance sheet and liquidity position in addition to solid investment grade credit ratings. We believe maintaining these objectives affords us the financial flexibility necessary to take advantage of significant growth opportunities in our regulated utility businesses.

Our Competitive Strengths

We believe that we are well-positioned to meet our obligations to customers, grow our business and create shareholder value because of the following factors:

Extensive Track Record of Operating Stable Utilities

Our earnings are principally derived from the return on investment we earn on our utility assets. We estimate that, as of December 31, 2018, our rate base was approximately $4.5 billion. We estimate that, as of December 31, 2019, assuming consummation of the Acquisition, our rate base will be approximately $7.2 billion. Of the $7.2 billion expected rate base as of December 31, 2019, we estimate that approximately 70%

will be derived from water and wastewater utilities and approximately 30% will be derived from natural gas distribution. We have more than 130 years of service experience and a proven track record of operational efficiency.

Operations in Constructive Regulatory Jurisdictions

We currently have regulated utility operations in eight different states, which have collectively provided constructive regulatory environments for our utility operations, and following the Acquisition will have regulated utility operations in ten different states, which we believe will provide constructive regulatory environments for our expanded utility operations. Two of these ten states have in place rate decoupling mechanisms for water or gas utility businesses, which reduce the dependency of our revenues to the changes in the volume of managed water or natural gas that may result from fluctuations in the weather, gas consumption, water conservation, and other factors. Further, regulators in several of these states have put in place certain programs that incentivize prudent capital investments in our utility system by providing for accelerated recovery of and on capital. The regulatory framework in Pennsylvania, which accounted for approximately 71% of our Regulated segment's income for 2018, is generally considered progressive and is highly rated by Regulatory Research Associates. Pennsylvania's high rating is based on the probable level and quality of the earnings to be realized by the state's utilities as a result of regulatory, legislative and court actions, as well as the utilization of fully forecasted test years, Distribution Systems Improvement Charges and other automatic adjustment clauses that are intended to reduce the gap between the time that a capital project is completed and the recovery of costs in rates. As further discussed in "—Recent Developments —Peoples Gas Acquisition—Strategic Rationale for the Acquisition," the Acquisition would increase our presence in constructive regulatory jurisdictions, particularly in Pennsylvania.

Significant Infrastructure Needs & Core Competency in Infrastructure Investment

According to recent U.S. EPA surveys, there are approximately 50,000 community water systems and approximately 15,000 wastewater systems in the United States, a majority of which are municipally owned, and more than $740 billion will need to be spent to maintain and improve U.S. water and wastewater infrastructure over the next 20 years. We have historically leveraged our expertise in infrastructure improvement and pipeline replacement to improve safety and reliability throughout the states in which we operate. For example, over the last 15 years, our investment in pipe replacement in southeastern Pennsylvania has resulted in a 53% reduction in discolored water-quality-related service orders and a 60% reduction in main breaks. As municipalities face the challenges of replacing deteriorating infrastructure, we provide a viable and valuable solution to communities through our expertise and our economies of scale. In addition, we expect the Acquisition will introduce new infrastructure investment opportunities, as discussed in "—Recent Developments—Peoples Gas Acquisition— Strategic Rationale for the Acquisition."

Consistent History of Dividend Growth. We have paid dividends consecutively for 74 years

In 2018, our Board of Directors raised the quarterly dividend on our common stock by 7%, increasing the effective annual dividend rate to $0.876 per share, beginning with the dividend payment in September 2018. This is the 28th dividend increase in the past 27 years and the 20th consecutive year that we have increased our dividend in excess of 5%.

Experienced Management Team

Our senior management team is highly experienced in the utility industry. The team is supported by a core group of employees in leadership positions with substantial experience in the operation of regulated utility businesses. In addition, as discussed in "—Recent Developments—Peoples Gas Acquisition—Strategic Rationale for the Acquisition," the Peoples's management team has significant experience in the natural gas utility industry. Additionally, the Aqua America CEO serves on the Board of Directors of the National Association of Water Companies.

Recent Developments

Proposed Peoples Gas Acquisition

On October 22, 2018, we entered into a Purchase Agreement (the "Acquisition Agreement") with LDC Parent LLC, a Delaware limited liability company ("Seller"), to acquire all of the issued and outstanding limited liability company membership interests of LDC, the parent of a group of natural gas public utility companies including Peoples Natural Gas Company LLC, a Pennsylvania limited liability company, Peoples Gas Company LLC, a Pennsylvania limited liability company, Peoples Gas WV LLC, a West Virginia limited liability company, Peoples Gas Kentucky LLC, a Kentucky limited liability company, and Delta Natural Gas Co., Inc., a Kentucky corporation, as well as other operating subsidiaries.

The Acquisition, once consummated, will expand our regulated utility business to include natural gas distribution. The cash purchase price for the Acquisition will be an amount equal to $4.275 billion (the "Default Cash Acquisition Consideration"), subject to adjustments for working capital, certain capital expenditures, transaction expenses and closing indebtedness as set forth in the Acquisition Agreement (as so adjusted, the "Cash Acquisition Consideration"). The Company expects to assume, as a result of acquiring Peoples, approximately $1,370 million of Peoples's indebtedness upon the closing of the Acquisition, which would reduce the cash purchase price by approximately $1,370 million pursuant to the foregoing adjustments. See "— Financing Transactions" and "Use of Proceeds" for a discussion of our plans to finance the Cash Acquisition Consideration.

Closing of the Acquisition is subject to customary closing conditions set forth in the Acquisition Agreement, including, among others, (1) the absence of any law or governmental order prohibiting the consummation of the Acquisition, (2) the accuracy of the parties' representations and warranties, subject to customary materiality standards and certain other exceptions, (3) compliance in all material respects of the parties with their applicable covenants under the Acquisition Agreement, subject to certain exceptions, (4) the absence of a "material adverse effect" with respect to LDC and its subsidiaries and (5) receipt of certain regulatory approvals, including from the public utility commission in Pennsylvania and West Virginia. The closing of the Acquisition is not subject to any financing condition. We currently expect the Acquisition will close in mid-2019.

The Acquisition Agreement contains certain termination rights for each of us and Seller. The Acquisition Agreement may be terminated at any time prior to the closing of the Acquisition in the event the Acquisition is not completed by October 22, 2019 (subject to extension, on the terms set forth in the Acquisition Agreement, to April 22, 2020 in order to obtain necessary regulatory approvals) (the "Acquisition Outside Date"). However, neither we nor Seller may terminate the Acquisition Agreement pursuant to the foregoing if our or Seller's respective failure to fulfill any obligation under the Acquisition Agreement was the primary cause of the failure of the closing to occur on or before the Acquisition Outside Date. The Acquisition Agreement may also be terminated at any time prior to the closing of the Acquisition by mutual written consent of us and Seller, and in other customary circumstances. In the event that the Acquisition Agreement is terminated due to certain breaches by us, we would be required to pay a fee of $120 million to the Seller as liquidated damages.

The Acquisition and the Acquisition Agreement are described in more detail in our Current Report on Form 8-K filed with the SEC on October 23, 2018 (the "Acquisition 8-K"), which is incorporated by reference into this prospectus supplement and the accompanying prospectus. The foregoing summary description does not purport to be complete and is qualified in its entirety by reference to the complete text of the Acquisition Agreement, which was filed as Exhibit 2.1 to the Acquisition 8-K.

The Acquisition Agreement has been filed as an exhibit to our public reports filed with the SEC, and has been incorporated by reference into this prospectus supplement and the accompanying prospectus, solely to provide information to current and prospective investors and security holders regarding its terms. The Acquisition

Agreement and the description of certain terms of the Acquisition Agreement appearing in this prospectus supplement and some of the documents incorporated by reference in the accompanying prospectus are not intended to provide any other factual information about Aqua America, Peoples, their respective businesses, or the actual or future conduct of their respective businesses or to modify or supplement any factual disclosures about Aqua America or Peoples included in this prospectus supplement, the accompanying prospectus or the documents incorporated by reference therein or Aqua America's other public reports. The Acquisition Agreement and any descriptions thereof should not be relied upon as representations or warranties about Aqua America or Peoples or, other than with respect to the terms of the Acquisition Agreement, as disclosure about Aqua America or Peoples. No one should rely on the representations, warranties and covenants in the Acquisition Agreement or any descriptions thereof as characterizations of the actual state of facts or conditions of Aqua America or Peoples or any of their respective subsidiaries or affiliates. The representations and warranties contained in the Acquisition Agreement are the product of negotiations among the parties thereto and that the parties made to, and solely for the benefit of, each other as of specified dates. The assertions embodied in those representations and warranties are subject to qualifications and limitations agreed to by the respective parties and are also qualified in important part by confidential disclosure schedules delivered in connection with the Acquisition Agreement. In addition, those representations and warranties were made for the purpose of allocating contractual risk between the parties to the Acquisition Agreement instead of establishing these matters as facts, and may be subject to standards of materiality used by the contracting parties that differ from those applicable to investors and security holders. Moreover, information concerning the subject matter of the representations and warranties may change after the dates contemplated by the Acquisition Agreement, which subsequent information may or may not be reflected in this prospectus supplement or the documents incorporated by reference in this prospectus supplement and the accompanying prospectus or in Aqua America's other public reports. The Acquisition Agreement and any such descriptions thereof should not be read alone, but should instead be read in conjunction with the other information regarding Aqua America or Peoples that is contained in, or incorporated by reference into, this prospectus supplement, the accompanying prospectus and the documents incorporated by reference herein and therein.

The consummation of this offering is not conditioned upon the closing of the Acquisition. There can be no assurance that the Acquisition will be consummated on the terms or by the time currently contemplated, or at all, or, if consummated, that the terms of the Acquisition, including the financing thereof and the closing date, will not differ, perhaps substantially, from those currently contemplated or described in this prospectus supplement or the documents incorporated by reference in this prospectus supplement and the accompanying prospectus. The closing of the Acquisition is subject to, among other conditions, the receipt of regulatory approval by the Pennsylvania Public Utility Commission. We filed an application for approval by the Pennsylvania Public Utility Commission, and several entities have intervened in the proceeding. The procedural schedule requires rebuttal testimony to be filed on April 30, 2019. We have initiated settlement discussions with the intervenors and those negotiations are ongoing. Whether through a settlement agreement or through a litigated proceeding, we may be required to agree to certain actions, undertakings, terms, or other measures, including those that may require increased capital or other expenditures by the Company. See "Risk Factors—Risks Related to the Acquisition and the Financing Transactions" in this prospectus supplement, "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2018 and "Risk Factors" in our Current Report on Form 8-K/A filed with the SEC on April 15, 2019 (as updated by annual, quarterly and other reports and documents we file with the SEC that are incorporated by reference in this prospectus supplement and the accompanying prospectus).

About Peoples

Headquartered in Pittsburgh, Pennsylvania, Peoples primarily engages in regulated distribution and transportation of natural gas to approximately 740,000 residential, commercial and industrial customers in Pennsylvania, West Virginia and Kentucky. For the year ended December 31, 2018, Peoples's operating revenues amounted to $914 million.

For a discussion of Peoples's business, operations, financial condition and financial results and the specific risks related to Peoples's business, operations, financial condition and financial results, please see the "Peoples's Business," "Risk Factors related to Peoples" and "Management's Discussion and Analysis of Financial Condition and Results of Operations of Peoples" in our Current Report on Form 8-K/A filed with the SEC on April 15, 2019 and incorporated by reference in this prospectus supplement and the accompanying prospectus.

Strategic Rationale for the Acquisition

We believe the Acquisition is a strategically compelling transaction that brings together two high- quality regulated utility companies in regions with constructive regulatory environments and attractive demographics. Consistent with our strategy of growing our regulated utility platform, we expect that the Acquisition will introduce a new platform for regulated growth, creating a leading water and natural gas utility in the United States with scale across the water, wastewater and natural gas distribution sectors. We believe this enhanced growth platform will present opportunities for the Company to grow our rate base through a wider range of infrastructure investment opportunities. In addition, as a larger publicly traded utility, we expect to have better access to capital to fund our infrastructure and capital expenditure needs. We also believe our enhanced scale and better access to the capital markets will support our commitment to strong investment grade credit ratings.

Both Aqua America and Peoples have demonstrated the ability to earn a return on and recover invested capital, with a history of sustained growth in earnings and cash flow. We believe the Acquisition will diversify the Company's cash flow while preserving our low-risk regulated utility profile, resulting in a multi-platform utility with operations spanning ten states.

We expect that the Acquisition will increase our presence in constructive regulatory jurisdictions, particularly Pennsylvania, where the regulatory framework is generally considered progressive and is highly rated by Regulatory Research Associates. Pennsylvania's high rating is based on the probable level and quality of the earnings to be realized by the state's utilities as a result of regulatory, legislative, and court actions, as well as the utilization of fully forecasted test years, Distribution Systems Improvement Charges and other automatic adjustment clauses that are intended to reduce the gap between the time that a capital project is completed and the recovery of costs in rates. The Peoples's management team will bring significant experience investing in and operating critical energy and safety infrastructure; their experience and knowledge is expected to be highly complementary to our core focus of operating our businesses in a safe and efficient manner to provide exceptional service to our customers.

We expect the Acquisition to increase our scale, cash flow diversity and rate base and strengthen our financial foundation, creating an enhanced platform for long-term growth. However, there can be no assurance that the Acquisition will be consummated on the terms or by the time currently contemplated, or at all, or, if consummated, that we will realize the anticipated benefits of the Acquisition. See "Risk Factors—Risks Related to the Acquisition and the Financing Transactions" in this prospectus supplement and "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2018 (as updated by annual, quarterly and other reports and documents we file with the SEC that are incorporated by reference in this prospectus supplement and the accompanying prospectus).

Financing Transactions

In addition to the sale of our common stock in connection with this offering, we expect to obtain additional financing to (1) fund the Acquisition, (2) complete the redemption of approximately $314 million aggregate principal amount of our privately placed notes (such notes, the "PPNs," and such redemption, the "Company Debt Refinancing") and (3) pay related costs and expenses as described below. In addition, we intend to use $150 million of proceeds of the Debt Financings for general corporate purposes, including working capital and capital

needs. For information regarding sources and uses of funds in connection with the Acquisition and the Financing Transactions, see "Use of Proceeds.

TEU Offering

Concurrently with this offering, we are offering, by means of a separate prospectus supplement, 12,000,000 of our 6.00% tangible equity units ("TEUs"), plus up to 1,800,000 additional TEUs that the underwriters of the TEU Offering have the option to purchase directly from us, at the public offering price of $50.00 per TEU (the "TEU Offering"). Each TEU is comprised of two parts: (1) a prepaid stock purchase contract issued by us (a "TEU purchase contract") and (2) a senior amortizing note issued by us (a "TEU amortizing note"). If the TEU Offering is consummated but the closing of the Acquisition has not occurred on or prior to April 22, 2020, or if, prior to such date, the Acquisition Agreement is terminated, we may elect to redeem all, but not less than all, of the outstanding TEU purchase contracts in accordance with the terms thereof (an "acquisition termination redemption"). Upon any such acquisition termination redemption, holders of TEUs would have the right to require us to repurchase their TEU amortizing notes at the relevant repurchase price. Unless earlier redeemed by us in connection with an acquisition termination redemption or settled earlier at the holder's option or at our option, each TEU purchase contract will, subject to postponement in certain limited circumstances, automatically settle on April 30, 2022, and we will deliver a specified number of shares of our common stock per TEU purchase contract based upon applicable settlement rates and the market value of our common stock. The TEU amortizing notes have a specified initial principal amount and a specified interest rate and we will make specified payments of interest and partial repayments of principal on quarterly installment payment dates. The net proceeds from the sale of TEUs in the TEU Offering will be approximately $585.8 million (or approximately $673.7 million if the underwriters of such offering exercise their option to purchase additional TEUs in full).

Private Placement

On March 29, 2019, we entered into a Stock Purchase Agreement (the "CPPIB Agreement") with Canada Pension Plan Investment Board ("CPPIB") pursuant to which CPPIB agreed to purchase an aggregate of 21,661,095 newly issued shares of our common stock at the lower of (1) $34.62 per share and (2) the volume weighted average price per share in our public offerings of Common Stock to fund the Acquisition, the Company Debt Refinancing and pay related costs and expenses related thereto (the "Private Placement").

We expect the Private Placement to close concurrently with the consummation of the Acquisition, subject to certain closing conditions, including the closing of the Acquisition, the completion of additional equity offerings (including this offering and the TEU Offering) which raise gross proceeds in an aggregate amount of at least $1,600 million and the execution and delivery of a shareholder's agreement between CPPIB and the Company. The completion of the Private Placement is not conditioned upon the consummation of the Company Debt Refinancing or the Debt Financings.

Pursuant to the CPPIB Agreement, the shares purchased by CPPIB in the Private Placement will be subject to certain transfer restrictions until the earlier of 15 months following the completion of the Private Placement or specified change of control events with respect to the Company, subject to certain exceptions. In addition, subject to ownership thresholds and other customary requirements, CPPIB will have, pursuant to the shareholder's agreement to be entered into in connection with the closing of the Private Placement, (1) the right to appoint a member of our board of directors, (2) certain pre-emptive rights, (3) certain registration rights in respect of the shares purchased by CPPIB in the Private Placement and (4) certain "standstill" obligations with respect to the Company, subject to certain exceptions. Upon closing of the Private Placement, the Company has agreed to reimburse CPPIB for reasonable out-of-pocket diligence expenses of up to $4 million, subject to certain exceptions.

The foregoing description of the Private Placement does not purport to be complete and is qualified in its entirety by reference to the full text of the CPPIB Agreement, which was filed as Exhibit 10.1 to our Current Report on Form 8-K filed with the SEC on March 29, 2019 and incorporated by reference herein.

Debt Financings

We intend to obtain or otherwise incur up to approximately $1,009 million of senior indebtedness in connection with the Acquisition and the Company Debt Refinancing and approximately $150 million of senior indebtedness to be used for general corporate purposes, including working capital and capital needs. We refer to this $1,159 million of senior indebtedness financing as the "Debt Financings." The Debt Financings may include some combination of the following:

- *Notes Offering.* Subsequent to this offering we expect to offer, pursuant to one or more separate prospectus supplements, one or more series of senior unsecured notes (such notes, the "New Notes" and, such offerings, the "Notes Offering").

- *Bridge Facility.* On October 22, 2018, we obtained a commitment (the "Bridge Commitment") from Goldman Sachs Bank USA and Royal Bank of Canada to provide 364-day senior unsecured bridge loans (the "Bridge Facility"), in an aggregate amount of up to $5,100 million, subject to customary conditions set forth in the Bridge Commitment. As of the date of this prospectus supplement, we have terminated approximately $1,633 million of commitments under the Bridge Commitment in connection with, among other things, the replacement of our prior unsecured revolving credit facility, the expected refinancing of Peoples's revolving credit facility using our senior unsecured revolving credit facility (our "Revolving Credit Facility") and the expected assumption of Peoples's private placement notes. The Bridge Commitment may only be drawn upon to fund the Acquisition, the Company Debt Refinancing and related fees and expenses, and will expire upon the earliest to occur of (1) the termination of the Acquisition Agreement prior to the consummation of the Acquisition, (2) the closing of the Acquisition or (3) the Acquisition Outside Date.

In addition, if and to the extent the TEU Offering and/or the Private Placement is not completed, or such offerings are completed for less aggregate net proceeds than anticipated, we currently intend to fund any shortfall through the issuance of additional shares of common stock or equity-linked securities prior to the consummation of the Acquisition. However, if we are unable to issue such shares or equity-linked securities, we would fund any shortfall with additional debt financings, which may include borrowings under the Bridge Facility and/or the Revolving Credit Facility.

In this prospectus supplement, references to the "Financing Transactions" refer to this offering, the TEU Offering, the Private Placement and the Debt Financings, and references to the "Transactions" refer to the Financing Transactions, the Acquisition and the Company Debt Refinancing, including the application of the net proceeds from the Financing Transactions to complete such transactions, as described herein. In addition, unless otherwise specified or the context requires otherwise, references in this prospectus supplement to the "consummation of the Acquisition" or similar expressions shall be deemed to include the application of the net proceeds from the Financing Transactions to complete such transactions, as described herein, including the consummation of the Company Debt Refinancing.

This offering and certain of the other Financing Transactions are not conditioned upon the consummation of any other Financing Transactions, the Acquisition or the Company Debt Refinancing. In addition, the indebtedness or other securities to be incurred or issued in certain of the Financing Transactions may not be incurred or issued, or may be redeemed, repaid, or repurchased, if the Acquisition is not consummated or is not consummated by a specified date. Accordingly, even if the Acquisition, the Company Debt Refinancing or other Financing Transactions do not occur, the common stock issued in this offering will remain outstanding. Purchasers of our common stock in this offering should not place undue reliance on the pro forma and as adjusted information included and incorporated by reference in this prospectus supplement and the accompanying prospectus because this offering is not contingent upon the completion of any of the other Financing Transactions, the Acquisition or the Company Debt Refinancing, some or all of which are reflected in the adjustments included in that information, and because the actual amount of proceeds from the sale of shares and from any other Financing Transaction, and the actual terms of each of the Transactions, may differ, perhaps substantially, from those reflected in the prospectus supplement. We cannot assure you that we will complete the Acquisition or any of the other Financing Transactions on the terms contemplated by this prospectus supplement, or at all.

THE OFFERING

The following summary contains basic information about this offering and may not contain all of the information that may be important to you. You should read this entire prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before making an investment decision.

As used in this section, unless the context otherwise requires, references to "Aqua America," the "Company," "we," "us," "our" and similar references refer only to Aqua America, Inc. and not to its consolidated subsidiaries.

Issuer	Aqua America, Inc., a Pennsylvania corporation
Common Stock Offered	32,495,667 shares of our common stock.
Underwriters' Option	We have granted the underwriters the option, exercisable in whole or from time to time in part, to purchase up to an additional 4,874,350 shares of our common stock directly from us, exercisable for 30 days after the date of this prospectus supplement.
Common Stock to be Outstanding Immediately After this Offering	210,587,288 shares (or 215,461,638 shares if the underwriters exercise their option to purchase additional shares of our common stock in full).
Use of Proceeds	We estimate that the net proceeds from this offering, after deducting underwriting discounts and estimated offering expenses, will be approximately $1,098.3 million (or approximately $1,263.2 million if the underwriters exercise their option to purchase additional shares of our common stock directly from us in full). We intend to use the net proceeds from this offering, together with the net proceeds from the other Financing Transactions, to (1) fund the Acquisition, (2) complete the Company Debt Refinancing and (3) pay related costs and expenses as described below. See "—Recent Developments—Proposed Peoples Gas Acquisition." In addition, we intend to use $150 million of proceeds of the Debt Financings for general corporate purposes, including working capital and capital needs. If for any reason the Acquisition is not consummated, we expect we would use the net proceeds from this offering for general corporate purposes, which may include the Company Debt Refinancing, the redemption of securities issued in connection with the other Financing Transactions, repurchases of our common stock, debt repayment, capital expenditures and investments. See "Use of Proceeds."
Concurrent TEU Offering	Concurrently with this offering of our common stock, we are offering, by means of a separate prospectus supplement, 12,000,000 TEUs, plus up to 1,800,000 additional TEUs that the underwriters of the TEU Offering have the option to purchase directly from us. The net proceeds from the sale of TEUs in the TEU Offering will be approximately $585.8 million (or approximately $673.7 million if the underwriters of such offering exercise their option to purchase additional TEUs in full). Each TEU is comprised of two parts: (1) a

	TEU purchase contract and (2) a TEU amortizing note. If the closing of the Acquisition has not occurred on or prior to April 22, 2020, or if, prior to such date, the Acquisition Agreement is terminated, we may elect to redeem all, but not less than all, of the outstanding TEU purchase contracts in an acquisition termination redemption. This prospectus supplement is not an offer to sell or a solicitation of an offer to buy any securities being offered in the TEU Offering. There can be no assurance that the TEU Offering will be completed. Neither this offering nor the TEU Offering is conditioned upon the consummation of the Acquisition or completion of any other Financing Transactions. See "—Recent Developments—Financing Transactions—TEU Offering."
Private Placement	On March 29, 2019, we entered into the CPPIB Agreement pursuant to which CPPIB agreed to purchase an aggregate of 21,661,095 shares of our common stock at the lower of (1) $34.62 per share and (2) the volume weighted average price per share in our public offerings of Common Stock to fund the Acquisition, the Company Debt Refinancing and pay related costs and expenses related thereto. This prospectus supplement is not an offer to sell or a solicitation of an offer to buy any securities being offered in the Private Placement. This offering is not conditioned upon completion of the Private Placement. The completion of the Private Placement is subject to certain closing conditions, including the closing of the Acquisition, the completion of additional equity offerings (including this offering and the TEU Offering) which raise gross proceeds in an aggregate amount of at least $1,600 million and the execution and delivery of a shareholders agreement between CPPIB and the Company. See "—Recent Developments—Financing Transactions—Private Placement."
Certain United States Federal Income and Estate Tax Considerations	Certain United States federal income and estate tax considerations to non-U.S. holders of purchasing, owning and disposing of our common stock are described in "Certain United States Federal Income and Estate Tax Considerations to Non-U.S. Holders" included in this prospectus supplement.
Listing	Our common stock is listed on the New York Stock Exchange (the "NYSE") under the symbol "WTR."
Dividend Policy	We have historically paid quarterly dividends on our common stock; however, the declaration, amount, timing and payment of any future dividends are subject to the determination and approval of our board of directors based on then-current or anticipated future conditions including our results of operations, capital requirements, financial condition, legal requirements or other factors deemed relevant by our board of directors. See "Listing of Our Common Stock and Dividends."
Transfer Agent and Registrar	The registrar and transfer agent for our common stock is Computershare Trust Company, N.A.
Risk Factors	Investing in our common stock involves risks. See "Risk Factors" in this prospectus supplement, the accompanying prospectus and in the documents we incorporate by reference in this prospectus supplement and the accompanying prospectus for a discussion of some of the risks and other factors you should carefully consider before deciding to invest in shares of our common stock.

In this prospectus supplement, unless otherwise indicated, the number of shares of our common stock outstanding and the other information based thereon is based on 178,091,621 shares of our common stock outstanding as of December 31, 2018, and does not reflect:

- 21,661,095 shares of our common stock issuable upon completion of the Private Placement;
- 17,330,400 shares of our common stock (or 19,929,960 shares of our common stock if the underwriters exercise their option with respect to such offering in full) issuable upon settlement of the TEU purchase contracts, assuming the maximum number of shares issuable upon automatic settlement of such TEU purchase contracts that are components of the TEUs; and
- 18,738,059 shares of our common stock reserved for issuance upon exercise of stock options outstanding, upon vesting of our time based restricted stock units, upon vesting of our performance based restricted stock units or performance share units, as well as additional shares we may issue under our dividend reinvestment program, employee stock purchase plan or 401(k) savings plans.

RISK FACTORS

Investing in our common stock involves risks. You should review and carefully consider the risks, uncertainties and other factors described below and all of the information included elsewhere in this prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before deciding to invest in the shares. We also urge you to consider carefully the risks, uncertainties and other factors set forth under the headings "Forward-Looking Statements" and "Market and Industry Data." However, additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business, operations, financial condition and financial results and the value of the shares.

Risks Related to Our Business

For a discussion of specific risks related to our business, operations, financial condition and financial results, including certain risks related to the Acquisition, please see the "Business," Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections in our Annual Report on Form 10-K for our fiscal year ended December 31, 2018, as updated by our annual, quarterly and other reports and documents we file with the SEC that are incorporated by reference in this prospectus supplement and the accompanying prospectus. See "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," in this prospectus supplement. In addition, we provide the following risk factor.

Changes in our earnings may differ from changes in our rate base.

Our business is capital intensive and requires significant capital investments for additions to or replacement of property, plant and equipment. These capital investments create assets that are used and useful in providing regulated utility service, and as a result, increase our rate base, on which we generate earnings through the regulatory process. Changes in our reported earnings, however, may differ from changes in our rate base in a given period due to several factors, including rate case timing and the terms of such rate cases; over- or under-earnings in a given period due to changes in operating costs; the effects of tax rates or tax treatment of capital investments, including the effect of repair tax; capital expenditures that are not eligible for DSIC between rate cases; and acquisitions which have not yet been included in rate base. We anticipate that we may experience periods in which growth in earnings is less than growth in rate base; such differences may be significant and may persist over multiple reporting periods.

Risks Related to Peoples's Business

For a discussion of specific risks related to Peoples's business, please see "Risk Factors related to Peoples" in our Current Report on Form 8-K/A filed on April 15, 2019 and incorporated by reference in this prospectus supplement and the accompanying prospectus. These risks, uncertainties and other factors are not the only ones that Peoples faces. Additional risks, uncertainties and other factors not presently known to us or that we currently deem immaterial may also impair Peoples's business, operations, financial condition and financial results. Any of these risks could, if the Acquisition is consummated, impair the combined company's business, operations, financial condition and financial results or could otherwise adversely impact our investment in Peoples, in which case you may lose all or part of your investment in the shares.

Risks Related to the Acquisition and the Financing Transactions

Aqua America expects to incur significant additional indebtedness in connection with the Acquisition. As a result, it may be more difficult for Aqua America to pay or refinance its debts or take other actions, and Aqua America may need to divert cash to fund debt service payments.

As discussed herein, Aqua America expects to incur significant additional indebtedness to finance the Cash Acquisition Consideration and the Company Debt Refinancing and pay related transaction costs. Additionally,

in connection with the Acquisition, Aqua America currently intends to assume approximately $1,370 million of Peoples's indebtedness. Moreover, although Aqua America currently plans to fund a significant portion of the Cash Acquisition Consideration and the Company Debt Refinancing through the sales of its equity securities, if and to the extent that such sales are not completed or are completed for less aggregate net proceeds than anticipated, the amount of indebtedness it will incur to finance the Acquisition, the Company Debt Refinancing and associated transactions costs would increase, perhaps substantially. The increase in Aqua America's debt service obligations resulting from additional indebtedness could have a material adverse effect on the results of operations, financial condition and prospects of the combined company.

Aqua America's increased indebtedness could also:

- make it more difficult and/or costly for Aqua America to pay or refinance its debts as they become due, particularly during adverse economic and industry conditions, because a decrease in revenues or increase in costs could cause cash flow from operations to be insufficient to make scheduled debt service payments;
- limit Aqua America's flexibility to pursue other strategic opportunities or react to changes in its business and the industry sectors in which it operates and, consequently, put Aqua America at a competitive disadvantage to its competitors that have less debt;
- require a substantial portion of Aqua America's available cash to be used for debt service payments, thereby reducing the availability of its cash to fund working capital, capital expenditures, development projects, acquisitions, dividend payments and other general corporate purposes, which could harm Aqua America's prospects for growth and the market price of our common stock, TEUs and debt securities, among other things;
- result in a downgrade in the credit ratings on Aqua America's indebtedness, which could limit Aqua America's ability to borrow additional funds on favorable terms or at all (including in order to refinance the Bridge Facility (if drawn) and/or its other debt), increase the interest rates under its credit facilities and under any new indebtedness it may incur, and reduce the trading prices of its outstanding debt securities, common stock and TEUs (see "Summary Information—Recent Developments—Financing Transactions");
- make it more difficult for Aqua America to raise capital to fund working capital, make capital expenditures, pay dividends, pursue strategic initiatives or for other purposes;
- result in higher interest expense, which could be further increased in the event of increases in interest rates on Aqua America's current or future borrowings subject to variable rates of interest; and
- require that additional materially adverse terms, conditions or covenants be placed on Aqua America under its debt instruments, which covenants might include, for example, limitations on additional borrowings and specific restrictions on uses of its assets, as well as prohibitions or limitations on its ability to create liens, pay dividends, receive distributions from its subsidiaries, redeem or repurchase its stock or make investments, any of which could hinder its access to capital markets and limit or delay its ability to carry out its capital expenditure program or otherwise limit its flexibility in the conduct of its business and make it more vulnerable to economic downturns and adverse competitive and industry conditions.

It is possible that the Notes Offering will not be completed or, if completed, will generate less aggregate net proceeds than anticipated, which is a scenario in which we may incur borrowings under the Bridge Facility and/or incur borrowings under the Revolving Credit Facility. It is also possible that this offering, the TEU Offering and the Private Placement will not be completed or, if completed, will generate less aggregate net proceeds than anticipated,

in which case we intend to fund any shortfall through the issuance of additional shares of common stock or equity- linked securities prior to the consummation of the Acquisition, but may ultimately fund any shortfall with additional debt financings (which could include borrowings under the Bridge Facility) and/or borrowings under the Revolving Credit Facility. Any such borrowings under the Bridge Facility or the Revolving Credit Facility may cause us to incur significantly higher borrowing costs than the contemplated long-term financing, which would increase the overall cost of the Acquisition and could harm our business, financial condition, results of operations, and cash flows. Any borrowings under the Bridge Facility will mature 364 days after they are incurred. We may not be able to refinance borrowings under the Bridge Facility on favorable terms or at all before their maturity. In addition, the interest rate applicable to borrowings under the Bridge Facility will increase at the end of each three-month period after the borrowing date. Accordingly, we may incur additional interest expense if we are unable to refinance borrowings under the Bridge Facility before the interest rate increases take effect.

The increased indebtedness in connection with the Acquisition could cause us to place more reliance on cash flow from operations to pay principal and interest on debt and to satisfy our other obligations. Based on the current and expected results of operations and financial condition of Aqua America and its subsidiaries and the currently anticipated financing structure for the Acquisition, Aqua America believes that its cash flow from operations, together with the proceeds from borrowings, issuances of equity and debt securities in the capital markets, and equity sales will generate sufficient cash on a consolidated basis to make all of the principal and interest payments when such payments are due under Aqua America's and its current subsidiaries' existing credit facilities, indentures and other instruments governing their outstanding indebtedness, under the indebtedness anticipated to be incurred to fund the Cash Acquisition Consideration and the Company Debt Refinancing and under the indebtedness of Peoples anticipated to be assumed as a result of the Acquisition. However, Aqua America's expectation is based upon numerous estimates and assumptions and is subject to numerous uncertainties. LDC and its subsidiaries will not guarantee any indebtedness of Aqua America or any of its other subsidiaries, nor will any of them have any obligation to provide funds (nor will we have any ability to require them to provide funds), whether in the form of dividends, loans or otherwise, to enable Aqua America to pay dividends on its common stock or to enable Aqua America and its other subsidiaries to make required debt service payments or meet its other cash needs (including those described above under "Summary Information—Recent Developments"). In addition, as described above in "—Aqua America's ability to pay dividends and to meet its debt obligations largely depends on the performance of its subsidiaries and the ability to utilize the cash flows from those subsidiaries," certain of LDC and its subsidiaries may face limitations on their ability to provide funds to Aqua America. As a result, Aqua America may substantially increase its debt services obligations in anticipation of the Acquisition without any assurance that Aqua America will receive any cash from LDC or any of its subsidiaries to assist Aqua America in servicing its indebtedness, paying dividends on its common stock or meetings its other cash needs. Even if the Acquisition is consummated, Aqua America may not have access to the cash or other assets of certain of LDC and its subsidiaries.

In order to maintain its credit ratings, Aqua America may consider it appropriate to reduce the amount of its indebtedness outstanding following the Acquisition. Aqua America may seek to reduce this indebtedness with the proceeds from the issuance of additional shares of common stock and, possibly, other equity-linked securities, cash on hand and proceeds from asset sales, which may dilute the voting rights and economic interests of holders of Aqua America's common stock. However, the ability of Aqua America to raise additional equity financing after completion of the Acquisition will be subject to market conditions and a number of other risks and uncertainties, including whether the results of operations of the combined company meet the expectations of investors and securities analysts. Aqua America may not be able to issue additional shares of its common stock or other equity securities after the Acquisition on terms that it considers acceptable or at all, and Aqua America may not be able to reduce the amount of its outstanding indebtedness after the Acquisition, should it elect to do so, to a level that permits it to maintain its investment grade credit ratings.

The unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus are presented for illustrative purposes only and do not purport to represent what the financial position or results

of operations of the combined company would have been had the Transactions been completed on the dates assumed for purposes of that information, nor do they represent the actual financial position or results of operations of the combined company following the Transactions, if consummated.

The unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus are presented for illustrative purposes only, are based on numerous adjustments, assumptions and estimates, are subject to numerous other uncertainties and do not purport to reflect what the combined company's financial position or results of operations would have been had the Transactions been completed as of the dates assumed for purposes of that information, nor do they reflect the financial position or results of operations of the combined company following the Transactions, if consummated. Such unaudited pro forma consolidated combined financial information and certain other adjusted information reflects the assumptions of our management at the time that such information was initially prepared, and therefore does not reflect the amount of proceeds we will receive from, and certain pricing and other terms of, each of the Debt Financings, the TEU Offering, the Private Placement and this offering, the number of shares of our common stock sold in this offering and in the Private Placement and the number of TEUs sold in the TEU offering, and the actual amount of costs and expenses and underwriting discounts we will pay in connection with the Transactions. Therefore, actual amounts, including the actual amount of net proceeds from the respective Financing Transactions, may differ, perhaps substantially, from the assumed amounts set forth in the unaudited pro forma consolidated combined financial information and the other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

The unaudited pro forma consolidated combined financial information and other adjusted information has also been prepared on the assumption that the Transactions will be completed on the terms and in accordance with the assumptions set forth in such unaudited pro forma consolidated combined financial information or such adjusted information, as applicable. Any changes relative to these assumptions, including, without limitation, any changes in the assumed types or sizes of the Financing Transactions, the assumed interest on debt we will issue or otherwise incur, the assumed number of shares of common stock or TEUs we issue, the assumed amount of our Transactions costs, the assumed amounts of net proceeds we receive from the respective Financing Transactions would result in a change relative to such unaudited pro forma consolidated combined financial information or such other adjusted information, which could be material. In addition, none of the Financing Transactions (other than the Private Placement) will be contingent upon completion of any of the other Financing Transactions, and it is possible that one or more of the Financing Transactions will not be completed. Likewise, because certain of the Financing Transactions are not contingent upon completion of the Acquisition, it is possible that this offering and certain of the other Financing Transactions may be completed even if the Acquisition is not consummated, in which case we may be required to redeem or otherwise repay certain indebtedness or debt securities we may issue in the Debt Financings, and we may elect to redeem all of the TEU purchase contracts (if issued), in which case holders of TEUs would have the right to require us to repurchase their outstanding TEU amortizing notes. It is also possible that this offering, the TEU Offering, the Private Placement and the Notes Offering, if completed, will not generate the anticipated amount of net proceeds, in which case we may draw upon the Bridge Commitment and/or incur borrowings under our Revolving Credit Facility and/or issue additional shares of common stock or equity-linked securities. In any event, our and Peoples's actual financial positions and results of operations prior to the Acquisition and those of the combined company following the Acquisition, if consummated, may not be consistent with, or evident from, the unaudited pro forma consolidated combined financial information or other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

For purposes of the unaudited pro forma consolidated combined financial information, the Cash Acquisition Consideration has been preliminarily allocated to the identifiable assets acquired and liabilities assumed based on limited information presently available to estimate fair values. The Cash Acquisition Consideration will be allocated among the relative fair values of the identifiable assets acquired and liabilities assumed based on their estimated fair values as of the date of the Acquisition. The relative fair values of the assets acquired and liabilities

assumed are estimates, which are subject to change pending further review. The actual amounts recorded at the completion of the Acquisition, if completed, may differ materially from the information presented in the unaudited pro forma consolidated combined financial information.

Although the unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus include sensitivity analyses that are intended to assist you in quantifying the impact of changes in certain of the assumptions used in preparing such information, those sensitivity analyses reflect the pro forma impact of only a limited number of those assumptions and therefore do not allow you to quantify the impact of changes in certain other assumptions made in calculating this information. Changes in such other assumptions may have a material impact on such information. Likewise, the sensitivity analyses we have provided do not necessarily address the impact of all possible changes in the assumptions contemplated by such analyses. We do not intend to provide you with updated unaudited pro forma consolidated combined financial information or other adjusted information that reflects the actual size and terms of the Financing Transactions (other than to disclose the actual size and pricing terms of this offering and the TEU Offering in one or more free writing prospectuses) prior to the time you will be required to make a decision whether or not to invest in this offering.

As a result of the foregoing, investors should not place undue reliance on unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

We may not complete the Acquisition. If we incur indebtedness or issue debt securities to finance a portion of the Acquisition, and we do not complete the Acquisition on or before a specified date or if other specified events occur, we may be required to redeem or repay any such indebtedness or debt securities. We may not have the financial resources necessary to effect such redemption or repayment. It is possible that our failure to complete Acquisition may have a material adverse effect on our financial condition and the market price of our common stock.

The Acquisition is subject to a number of customary closing conditions. See "Summary Information— Recent Developments—Proposed Peoples Gas Acquisition." Satisfaction of many of these conditions is beyond our control. If these conditions are not satisfied or waived, the Acquisition will not be completed. As a result, the Acquisition may not close as scheduled or at all. Among other conditions, the closing of the Acquisition is subject to the receipt of regulatory approval by the Pennsylvania Public Utility Commission. Whether through a settlement agreement or through a litigated proceeding, we may be required to agree to certain actions, undertakings, terms, or other measures, including those that may require increased capital or other expenditures by the Company. Any additional items we agree to in order to resolve this matter may have an adverse effect on our business, financial condition or results of operations. The closing of this offering is not conditioned on, and is expected to be consummated before, the closing of the Acquisition. Accordingly, if you decide to purchase shares in this offering, you should be willing to do so whether or not we complete the Acquisition.

We expect to incur a substantial amount of additional indebtedness as part of the Financing Transactions. See "Summary Information—Recent Developments —Financing Transactions" and "Use of Proceeds." To the extent we incur indebtedness or issue debt securities as part of the Financing Transactions and we do not complete the Acquisition by a specified date or if certain other specified events, such as termination of the Acquisition Agreement, occur, we expect that we will be required to redeem or repay some or all of such indebtedness and debt securities and that the redemption or repayment price will include a premium.

We will not be required to deposit the proceeds from the Financing Transactions into an escrow account pending completion of the Acquisition or to grant any security interest or other lien on those proceeds to secure any required repayment or redemption of any Financing Transactions. If we are required to redeem or repay any indebtedness or debt securities issued in the Financing Transactions under the circumstances described above, our ability to pay the redemption or repayment price may be limited by our financial resources at the time and the terms of our debt instruments or other instruments and agreements and it is possible that we will

not have sufficient financial resources available to satisfy our obligation to effect such redemption or repayment. Any failure to pay the mandatory redemption or repayment price of any Financing Transactions as and when required could have a material adverse effect on our business, results of operations and financial condition and the market price of our securities, including our common stock, the TEUs being offered in the TEU Offering, or any indebtedness incurred or other securities issued as part of the Financing Transactions. If the Acquisition is not completed, we will not have any obligation to offer to repurchase the common stock sold in this offering. It is possible that our failure to complete the Acquisition, or the expenditure of our funds to redeem or repay any securities issued or borrowings incurred in the other Financing Transactions, may have a material adverse effect on the market price of our common stock and the TEUs issued in the TEU Offering.

Risks Related to Our Common Stock

The price of our common stock may be volatile. This volatility may affect the price at which you could sell our common stock, and the sale or resale of substantial amounts of our common stock could adversely affect the market price of our common stock.

The market price for our common stock has historically experienced, and may continue to experience, volatility. This volatility may affect the price at which you could sell our common stock, and the sale or issuance of substantial amounts of our common stock, or the perception that such sales or issuances could occur, could adversely affect the market price of our common stock. In addition, the availability for sale of substantial amounts of our common stock could adversely impact its market price. In that regard, if we issue TEUs in the TEU Offering, shares of our common stock will be issuable upon settlement or redemption of the TEU purchase contracts and the number of shares may be substantial. The settlement rates for the TEU purchase contracts will be subject to certain anti-dilution adjustments that could increase, potentially significantly, the number of shares of our common stock issuable upon such settlement. Similarly, although CPPIB is currently subject to restrictions on resale, if the Private Placement is completed a significant portion of our common stock will be available for resale into the market by a small number of investors following the expiration of such restrictions. The issuance or sale of shares, or the perception that such issuances or sales could occur, could adversely affect the market price of our common stock, even if our business is doing well. Any of the foregoing may also impair our ability to raise additional capital through the sale of our equity securities.

The market price of our common stock may be influenced by many factors, some of which are beyond our control, including the factors discussed above under “Forward-Looking Statements” and “Market and Industry Data” or elsewhere in this Risk Factors section and the following:

- actual or anticipated fluctuations in our operating results or our competitors’ or peers’ operating results;
- actions by applicable regulatory authorities, including the Pennsylvania Public Utility Commission;
- announcements by us, our competitors or our partners of significant contracts, acquisitions, divestitures or strategic investments;
- our growth rate and our competitors’ or peers’ growth rates;
- the financial markets and general economic conditions;
- changes in stock market analyst recommendations regarding us, our competitors, our peers or the energy infrastructure, gas and electricity services industries generally, or lack of analyst coverage of our common stock;

- sales of our common stock by our executive officers, directors and significant shareholders or sales of substantial amounts of our common stock or securities convertible into or exchangeable for our common stock;
- changes in the amount of our common stock dividends per share, the common stock dividends per share paid by our competitors and interest rates; and
- changes in tax laws and regulations.

The market for our common stock likely will influence, and be influenced by, any market that develops for the TEUs or the TEU purchase contracts. For example, investors' anticipation of the distribution into the market of the additional shares of common stock issuable upon settlement of the TEU purchase contracts could depress the price of our common stock and increase the volatility of the common stock price. The price of our common stock also could be affected by possible sales of such common stock by investors who view the TEUs as a more attractive means of equity participation in us and by hedging or arbitrage trading activity that is likely to develop involving the TEUs, TEU purchase contracts and the common stock. Such hedging or arbitrage activity could, in turn, affect the trading prices of the common stock.

We expect that we will need to raise additional capital, and raising additional funds by issuing additional equity securities or with additional debt financing may cause dilution to shareholders or restrict our operations.

Upon the issuance of the shares of common stock in the Private Placement and the issuance of the TEUs in the TEU Offering, holders of our common stock will incur immediate and substantial net tangible book value dilution on a per share basis. If we are unable to consummate the TEU Offering, the Private Placement or any portion of the Debt Financings, we may issue additional shares of common stock to finance the Acquisition. In addition, we expect that we will need to raise additional capital in the future in order to, among other things, repay indebtedness and fund our operations and future acquisitions, which we may do through equity and equity-linked securities offerings or additional debt financings, as well as borrowings under our credit facilities. Additional issuances of equity securities, including shares of our common stock, or debt or other securities that are convertible into or exchangeable for, or that represent the right to receive, common stock, including the TEUs, could dilute the economic and other rights and interests of holders of shares of our common stock and cause the market price of our common stock to decline. Subject to certain exceptions, such issuances may be made without any action or approval by our shareholders.

Any new debt financing we enter into may involve covenants that restrict our operations more than our current outstanding debt and credit facilities. These restrictive covenants could include limitations on additional borrowings, and specific restrictions on the use of our assets, as well as prohibitions or limitations on our ability to create liens, pay dividends, receive distributions from our subsidiaries, redeem or repurchase our stock or make investments. These covenants could hinder our access to capital markets and limit or delay our ability to carry out our capital expenditure program.

If the closing of the Acquisition has not occurred on or prior to April 22, 2020, or if, prior to such date, the Acquisition Agreement is terminated, we may redeem the TEU purchase contracts, in which case holders of TEUs would have the right to require us to repurchase TEU amortizing notes.

The Acquisition may not be consummated. If the closing of the Acquisition has not occurred on or prior to April 22, 2020, or if, prior to such date, the Acquisition Agreement is terminated, we may elect to redeem all, but not less than all, of the outstanding TEU purchase contracts (if issued). We will pay or deliver, as the case may be, a redemption amount to be determined based on the price of our common stock at that time in cash or in

shares of our common stock in accordance with the terms of the TEU purchase contracts. If we elect to redeem the TEU purchase contracts, holders of TEUs would have the right to require us to repurchase TEU amortizing notes at the relevant repurchase price.

Upon redemption of the TEU purchase contracts, our common stock may incur immediate net tangible book value dilution on a per share basis. In addition, if the TEU purchase contracts are redeemed for cash and holders of TEUs require us to repurchase TEU amortizing notes, we would experience reduced liquidity, which could limit our flexibility in the conduct of our business and make us more vulnerable to economic downturns and adverse competitive and industry conditions.

Anti-takeover provisions in our organizational documents and under Pennsylvania law might discourage, delay or prevent changes in control of our company and may result in an entrenchment of management and diminish the value of our common stock.

Certain provisions of our articles of incorporation and bylaws could have the effect of delaying, deterring or preventing another party from acquiring or seeking to acquire control of us. These provisions are intended to discourage certain types of coercive takeover practices and inadequate takeover bids and to encourage anyone seeking to acquire control of us to negotiate first with our board of directors. However, these provisions could also delay, deter or prevent a change of control or other takeover of our company that our shareholders might consider to be in their best interests, including transactions that might result in a premium being paid over the market prices of our common stock and TEUs, and may also limit the prices that investors are willing to pay in the future for our common stock and TEUs. These provisions may also have the effect of preventing changes in our management.

For example, our articles of incorporation and bylaws include anti-takeover provisions that:

- authorize our board of directors, without a vote or other action by our shareholders, to cause the issuance of preferred stock in one or more series and, with respect to each series, to fix the number of shares constituting that series and to establish the rights, preferences, privileges and restrictions of that series, which may include, among other things, dividend and liquidation rights and preferences, rights to convert such shares into common stock, voting rights and other rights which may adversely affect the voting or other rights and the economic interests of holders of our common stock and TEUs, if issued;

- require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law;

- establish advance notice requirements and procedures for shareholders to submit nominations of candidates for election to our board of directors and to propose other business to be brought before a shareholders meeting;

- provide that vacancies in our board of directors, including vacancies created by the removal of any director, or any increase in the number of directors may be filled by a majority of the directors then in office or by the sole remaining director;

- provide that no shareholder may cumulate votes in the election of directors, which means that the holders of a majority of our outstanding shares of common stock can elect all directors standing for election by our common shareholders;

- require that any action to be taken by our shareholders must be taken either (1) at a duly called annual or special meeting of shareholders or (2) by the unanimous written consent of all of our shareholders

- require action by shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting in order for our shareholders to call a special meeting of shareholders; and

- provide that a state court located within Montgomery County, Pennsylvania (or, in the event such court lacks jurisdiction over such action or proceeding, the United States District Court for the Eastern District of Pennsylvania) will be the exclusive forum for the adjudication of certain disputes, including derivative actions.

In addition, anti-takeover provisions in Pennsylvania law could make it more difficult for a third party to acquire control of us including, but not limited to, provisions relating to (1) control share acquisitions, (2) disgorgement of profits by certain controlling persons, (3) business combination transactions with interested shareholders, and (4) the rights of shareholders to demand fair value for their stock following a control transaction. Pennsylvania law permits corporations to opt-out of these anti-takeover provisions, but we have not done so. Such provisions could have the effect of deterring takeovers or delaying changes in control or management of us. Additionally, such provisions could limit the price that some investors might be willing to pay in the future for shares of our common stock.

In addition, the TEUs, if issued, will, and the Debt Financings and other debt financings may, include certain terms that may have anti-takeover effects. For example, each holder of a TEU purchase contract will have the right, upon certain "fundamental changes" (including a cash acquisition of us), to require early settlement of such holder's TEU purchase contract at a rate designed to compensate for the lost option value of such TEU purchase contract.

This offering is not conditioned upon the completion of the Acquisition. If the Acquisition is not consummated, we will have broad discretion on the use of the net proceeds of this offering.

This offering is not conditioned upon the completion of the Acquisition. Accordingly, your purchase of our common stock in this offering may be an investment in Aqua America on a stand-alone basis without any of the assets of Peoples or anticipated benefits of the Acquisition. We will have broad discretion to use the net proceeds of this offering if the Acquisition does not occur. If the Acquisition does not occur, we expect to use the net proceeds from this offering for general corporate purposes, which may include the Company Debt Refinancing, the redemption of securities issued in connection with the other Financing Transactions, repurchases of our common stock debt repayment, capital expenditures and investments. See "Use of Proceeds."

We may be unable to, or may choose not to, continue to pay dividends on our common stock at current or planned rates or at all.

Any future payments of cash dividends, and the amount of any cash dividends we pay, on our common stock will depend on, among other things, our financial condition, capital requirements and results of operations, and the ability of our subsidiaries to distribute cash to us, as well as other factors that our board of directors may consider relevant. If we were to reduce the amount of cash dividends per share payable on our common stock, fail to increase the amount of those cash dividends per share in the future or cease paying those cash dividends altogether, it would likely have an adverse impact on the market price of our common stock and any TEUs we may issue. In addition, under Pennsylvania law, our board of directors (or an authorized committee thereof) may not declare and pay dividends on shares of our common stock if, after giving effect to the dividend (1) we would be unable to pay our debts as they become due in the ordinary course of business, or (2) our total assets would be less than the sum of our total liabilities plus the amount that would be needed, if we were to be dissolved as of the date for measuring the dividend, to satisfy the preferential rights upon dissolution of shareholders whose preferential rights are superior to those receiving the dividend.

Aqua America's ability to pay dividends and to meet its debt obligations largely depends on the performance of its subsidiaries and the ability to utilize the cash flows from those subsidiaries.

Aqua America is a holding company substantially all of whose assets are owned by its subsidiaries and substantially all of whose operations are conducted through its subsidiaries. Aqua America's ability to pay dividends and meet its debt and other obligations depends almost entirely on cash flows from its subsidiaries and, in the short term, its ability to raise capital from external sources. In the long term, cash flows from its subsidiaries depend on their ability to generate operating cash flows in excess of their own expenditures, common and preferred stock dividends (if any), and debt or other obligations. Its subsidiaries are separate and distinct legal entities that are not obligated to pay dividends or make loans or distributions to Aqua America (whether to enable Aqua America to pay dividends on its common stock, to pay principal and interest on its debt, to settle, repurchase or redeem its debt (including the TEU amortizing notes) or other securities (including the TEU purchase contracts), or to satisfy its other obligations). In addition, notwithstanding its controlling interest in such subsidiaries, many of them are limited in their ability to pay dividends or make loans or distributions to Aqua America, including, without limitation, as a result of legislation, regulation, court order, contractual restrictions and other restrictions or in times of financial distress. Likewise, certain of LDC and its subsidiaries face similar restrictions that, if the Acquisition is consummated, will limit their ability to pay dividends or make loans or distributions to Aqua America. As a result, the Company may not be able to cause its subsidiaries (including, following the Acquisition, LDC and its subsidiaries) and other entities to distribute funds or provide loans sufficient to enable it to pay dividends and meet its debt and other obligations.

USE OF PROCEEDS

We estimate that the net proceeds to us from this offering, after deducting underwriting discounts and estimated offering expenses, will be approximately $1,098.3 million (or approximately $1,263.2 million if the underwriters exercise their option to purchase additional shares of our common stock in full).

We intend to use the net proceeds from this offering, together with net proceeds from the TEU Offering, the Private Placement and the Debt Financings, to (1) fund the Acquisition, (2) complete the redemption of approximately $314 million aggregate principal amount of the PPNs and (3) pay related costs and expenses as described below. In addition to the $1,009 million aggregate principal amount of Debt Financings we intend to incur to fund the Acquisition, complete the Company Debt Refinancing and pay related costs and expenses, we expect to incur $150 million aggregate principal amount of Debt Financings, the net proceeds of which we intend to use for general corporate purposes, including working capital and capital needs.

This offering and certain of the other Financing Transactions are not conditioned upon the consummation of any other Financing Transactions, the Acquisition or the Company Debt Refinancing. In addition, the indebtedness or other securities to be incurred or issued in certain of the Financing Transactions may not be incurred or issued, or may be redeemed, repaid, or repurchased, if the Acquisition is not consummated or is not consummated by a specified date. Even if the Acquisition, the Company Debt Refinancing and/or other Financing Transactions do not occur, the common stock issued in this offering will remain outstanding. If for any reason the Acquisition is not consummated, we expect we would use the net proceeds for this offering for general corporate purposes, which may include the Company Debt Refinancing, the redemption of securities issued in connection with the other Financing Transactions, repurchases of our common stock, debt repayment, capital expenditures and investments. Pending application of the net proceeds of this offering for the foregoing purposes, the net proceeds may be invested temporarily in investment-grade securities or similar instruments, or be used to temporarily reduce borrowings under the Revolving Credit Facility.

The following table outlines the estimated sources and uses of funds for the Acquisition, the Company Debt Refinancing and the related costs and expenses. The actual net proceeds from the Financing Transactions and the costs and expenses related to the Transactions will likely vary from the estimates reflected in the following table. See "Summary Information—Recent Developments—Financing Transactions."

The following table does not reflect the sale of any shares or TEUs that may be sold to the underwriters of this offering and of the TEU Offering upon exercise of their respective options to purchase additional shares and TEUs. To the extent the underwriters exercise such options, we expect that the net proceeds from such sales will be used to fund a portion of the purchase price of the Acquisition, which would reduce, by a corresponding amount, the amount of the debt we expect to incur to fund a portion of the purchase price of the Acquisition.

Sources of Funds[1]		**Uses of Funds**	
	(in millions)		
Shares offered hereby	$ 1,125	Cash Acquisition Consideration[2]	$ 2,905
TEU Offering	600	Company Debt Refinancing[3]	314
Private Placement	750	Transactions costs and expenses, including	
Debt Financings[4]	1,009	discounts and financing fees	265
Assumption of Peoples's existing debt	1,370	Assumption of Peoples's existing debt	1,370
Total sources of funds	$ 4,854	**Total uses of funds**	$ 4,854

(1) All amounts are estimated proceeds before underwriting discounts and offering expenses. If and to the extent that any of this offering, the TEU Offering or the Private Placement is not completed, or if the aggregate net proceeds from this offering, the TEU Offering and the Private Placement are less than the aggregate amount set forth in this table, we intend to fund any shortfall by issuing additional shares of common stock or equity-linked securities prior to the consummation of the Acquisition. However, if we are unable to issue such shares or equity-linked securities, we would fund any shortfall with additional debt financings, which may include borrowings under the Bridge Facility and/or the Revolving Credit Facility.

(2) Assumes the only adjustment to the Default Cash Acquisition Consideration is a reduction of $1,370 million based upon the assumption by the Company of $1,370 million aggregate principal amount of Peoples's indebtedness upon closing of the Acquisition. To the extent we assume less than $1,370 million aggregate principal amount of Peoples's existing indebtedness, we may issue additional shares of common stock, equity-linked securities and/or New Notes and/or incur borrowings under the Bridge Facility and/or the Revolving Credit Facility.

(3) In connection with the Acquisition and the Financing Transactions, we expect to redeem approximately $314 million in aggregate principal amount of our PPNs prior to the closing of the Acquisition. Estimated premiums payable in connection with the Company Debt Refinancing are included in "Transaction costs and expenses, including discounts and financing fees" above. The PPNs we intend to redeem in the Company Debt Refinancing have maturities ranging from 2019-2037 and interest rates ranging from 3.57-5.83%.

(4) In addition to the $1,009 million aggregate principal amount of Debt Financings we intend to incur to fund the Acquisition, complete the Company Debt Refinancing and pay related costs and expenses, we expect to incur $150 million aggregate principal amount of Debt Financings, the net proceeds of which we intend to use for general corporate purposes, including working capital and capital needs.

CAPITALIZATION

The following table sets forth our consolidated cash and cash equivalents and capitalization as of December 31, 2018:

- on an actual basis;
- on an as adjusted basis to give effect to this offering;
- on an as further adjusted basis to give effect to this offering and the TEU Offering; and
- on a pro forma basis to give effect to the Transactions, including this offering, the TEU offering, the Acquisition, the Company Debt Refinancing, the Private Placement and the Debt Financings.

The following table does not reflect the sale of any shares or TEUs that may be sold to the respective underwriters of this offering and of the TEU offering upon exercise of their respective options to purchase additional shares and TEUs. If the underwriters exercise such options, we expect that the proceeds from such sales will be used to fund a portion of the purchase price of the Acquisition, which would reduce, by a corresponding amount, the amount of the Debt Financings we expect to incur to fund a portion of the purchase price of the Acquisition.

The completion of this offering is not conditioned upon the consummation of any of the other Transactions, including the Acquisition. Accordingly, investors should not place undue reliance on the as further adjusted and pro forma information included in this prospectus supplement because this offering is not conditioned upon the consummation of any of the other transactions reflected in such information. In addition, even if the Transactions are completed, actual amounts may vary from such information depending on several factors, including potential changes in our financing plans as a result of market conditions or the timing of the consummation of the Acquisition.

The following data are qualified in their entirety by our financial statements and related notes and other information incorporated by reference in this prospectus supplement and the accompanying prospectus. This table should be read in conjunction with "Summary Information–Recent Developments—Proposed Peoples Gas Acquisition," "Risk Factors," "Use of Proceeds," and our pro forma and consolidated financial statements and related notes incorporated by reference in this prospectus supplement and the accompanying prospectus, and the other information contained in the documents incorporated by reference in this prospectus supplement and the accompanying prospectus.

(dollars in thousands)	Actual	As Adjusted for this Offering	As Further Adjusted for this Offering and the TEU Offering	Pro Forma for the Transactions
Cash and cash equivalents[1]	$ 3,627	$ 1,101,967	$ 1,687,741	$ 209,100
Debt:				
Long-term debt of subsidiaries[2]	$ 1,604,233	$ 1,604,233	$ 1,604,233	$ 1,604,233

Privately placed notes[4]	589,427	589,427	589,427	275,927
Debt Financings[5]	—	—	—	1,159,000
Assumed Peoples's indebtedness[6]	—	—	—	1,329,227
TEU amortizing notes that are components of the TEUs[7]	—	—	103,549	103,549
Total debt	$ 2,563,660	$ 2,563,660	$ 2,667,209	$ 4,841,936
Equity:				
Preferred stock, $1.00 par value (1,770,819 shares authorized, none issued)	—	—	—	—
Common stock, $0.50 par value (300,000,000 shares authorized; 181,151,827 issued, actual; 213,647,494 issued, as adjusted and as further adjusted and 235,308,589 issued, pro forma)[8]	90,576	106,824	106,824	117,654
Capital in excess of par value[8][9]	820,378	1,902,470	2,387,198	3,104,807
Retained earnings[10]	1,174,245	1,174,245	1,174,245	1,130,168
Treasury stock, at cost (3,060,206 shares)	(75,835)	(75,835)	(75,835)	(75,835)
Total stockholders' equity	$ 2,009,364	$ 3,107,704	$ 3,592,432	$ 4,276,794
Total capitalization	$ 4,573,024	$ 5,671,364	$ 6,259,641	$ 9,118,730

(1) As adjusted amount reflects the impact of the net proceeds of $1,098.3 million from this offering. As further adjusted amount additionally reflects the impact of the net proceeds of $585.8 million from the TEU Offering. The pro forma amount additionally reflects Peoples's cash balance of $13.7 million as of December 31, 2018, the estimated net proceeds from the Private Placement of $728.4 million and the estimated net proceeds of the Debt Financings of $1,149.4 million, less the estimated cash purchase price of Peoples of $2,945.8 million (see Note 6), the estimated amount of the Company Debt Refinancing of approximately $314 million (see Note 4) and additional estimated acquisition-related payments for expenses of $110.3 million. Cash and cash equivalents may increase or decrease depending on, among other things, actual costs and expenses incurred in connection with the Transactions.

(2) Such amounts do not include subsidiary debt that is reflected in "Privately placed notes" or in "Assumed Peoples's indebtedness".

(3) In December 2018, we entered into a five-year $550 million unsecured Revolving Credit Facility, which replaced our prior unsecured revolving credit facility. Subject to customary conditions, we may request that the lenders under the Revolving Credit Facility provide an incremental unsecured revolving credit facility of up to $450 million upon the closing of the Acquisition. As described below in note 6, at the closing of the Acquisition, we expect to borrow $270 million under the Revolving Credit Facility in order to repay $270 million under the Peoples's revolving credit facility that is expected to be assumed at the closing of the Acquisition and terminated .

(4) In connection with the Acquisition and the Financing Transactions, we expect to redeem approximately $314 million in aggregate principal amount of our PPNs, of which $150.9 million in aggregate principal amount is indebtedness of our subsidiaries, prior to the closing of the Acquisition.

(5) The pro forma amount of $1,159 million represents the assumed aggregate principal amount of the Debt Financings, including the $150 million aggregate principal amount we intend to use for general corporate purposes. If we do not consummate the TEU Offering or the Private Placement, or if such offerings are completed for less aggregate net proceeds than anticipated, we may issue additional shares of common stock or equity-linked securities prior to the consummation of the Acquisition. However, if we are unable to issue such shares or equity-linked securities, we would fund any shortfall with additional debt financings, which may include borrowings under the Bridge Facility and/or the Revolving Credit Facility.
We expect the terms of one or more series of New Notes issued in the Debt Financings will include a special mandatory redemption provision requiring us to redeem such New Notes if the Acquisition is not consummated by a specified date. If the Acquisition is not consummated, we do not expect to incur any borrowings under the Bridge Facility.

(6) The pro forma amount reflects approximately $1,329 million aggregate principal amount of Peoples's existing indebtedness expected to be assumed in connection with the Acquisition as of December 31, 2018. We expect the amount of such assumed debt will be $1,370 million as of the closing of the Acquisition. Of the $1,370 million of expected assumed Peoples's indebtedness at closing, $270 million is expected to be borrowings under the Peoples's revolving credit facility which is expected to be repaid at the closing of the Acquisition with borrowings under the Revolving Credit Facility and terminated.

(7) Each TEU will include a TEU amortizing note, as described in "Summary Information—Recent Developments—Financing Transactions—TEU Offering." Approximately 17.3% of the stated amount of the TEUs, $103.5 million, will be represented by the TEU amortizing notes.

Under certain conditions, if the TEU Offering is consummated but the Acquisition does not occur, we may elect to redeem all, but not less than all, of the outstanding TEU purchase contracts in accordance with the terms thereof, in which case holders of TEUs would have the right to require us to repurchase their outstanding TEU amortizing notes at the relevant repurchase price. See "Summary Information—Recent Developments—Financing Transactions—TEU Offering." We would not have the option to redeem the TEU amortizing notes.

(8) As adjusted, as further adjusted and pro forma share numbers and amounts ($16.2 million with respect to "Common stock" and $1,082.1 million with respect to "Capital in excess of par value") with respect to this offering reflect related underwriting discounts and estimated offering expenses.

The pro forma share number and amount also reflects the expected issuance of 21,661,095 shares in the Private Placement at an offering price of $34.62 per share (an incremental $10.8 million with respect to "Common stock" and an incremental $717.6 million with respect to "Capital in excess of par value") and reflects placement agent fees and other estimated issuance costs. In addition to other closing conditions, the completion of the Private Placement is conditioned upon the completion of at least $1.6 billion in common stock and equity-linked securities offerings and the consummation of the Acquisition.

If and to the extent that any of the TEU Offering or the Private Placement is not completed, or if the aggregate net proceeds from such offerings is less than anticipated, we currently intend to issue additional shares of common stock or equity-linked securities prior to the consummation of the Acquisition. However, if we are unable to issue such shares or equity-linked securities, we would fund any shortfall with additional debt financings, which may include borrowings under the Bridge Facility and/or the Revolving Credit Facility.

Share numbers and amounts do not reflect shares of our common stock issuable upon settlement of the TEU purchase contracts, shares of our common stock reserved for issuance upon exercise of stock options outstanding, shares of our common stock reserved for issuance upon vesting of our time based restricted stock units (including reinvested dividends), shares of our common stock reserved for issuance upon the vesting of our performance based restricted stock units or performance share units or additional shares we may issue under our dividend reinvestment program, employee stock purchase plan or 401(k) savings plans. See "Summary Information–The Offering"

(9) Each TEU will include a TEU purchase contract. We will account for the TEU purchase contracts as equity and will record the initial fair value of the TEU purchase contracts, net of the related underwriting discounts and estimated offering expenses allocated to the TEU purchase contracts, as capital in excess of par value, $484.7 million. The exact amount we record as capital in excess of par value will not be determined until our determination of the final offering expenses related thereto. See note (7) above.

Under certain conditions, if the TEU Offering is consummated but the Acquisition does not occur, we may elect to redeem all, but not less than all, of the outstanding TEU purchase contracts in accordance with the terms thereof. We will pay a redemption amount to be determined based on our common stock price at the time in cash and/or shares of our common stock in accordance with the terms of the TEU purchase contract. If we elect to redeem the TEU purchase contracts, holders of TEUs would have the right to require us to repurchase their outstanding TEU amortizing notes at the relevant repurchase price. See "Summary Information—Recent Developments—Financing Transactions—TEU Offering."

(10) The pro forma amount, a reduction of $44.1 million, reflects the payment of additional Acquisition-related expenses and the write-off of unamortized debt issuance costs.

LISTING OF OUR COMMON STOCK AND DIVIDENDS

Our common stock is listed on the NYSE under the symbol "WTR." As of March 31, 2019, there were (i) 178,369,078 shares of our common stock outstanding and (ii) options to acquire 1,112,210 shares of our common stock outstanding.

On April 17, 2019, the last reported sale price of our common stock on the NYSE was $34.82. As of December 31, 2018, there were approximately 23,476 holders of record of our common stock.

We have historically paid quarterly dividends on our common stock; however, the declaration, amount, timing and payment of any future dividends are subject to the determination and approval of our board of directors based on then-current or anticipated future conditions including our results of operations, capital requirements, financial condition, legal requirements or other factors deemed relevant by our board of directors. See "Risk Factors—Risks Related to Our Common Stock—We may be unable to, or may choose not to, continue to pay dividends on our common stock at current or planned rates or at all."

CERTAIN UNITED STATES FEDERAL INCOME AND ESTATE TAX CONSIDERATIONS TO NON-U.S. HOLDERS

The following is a summary of certain United States federal income and estate tax consequences of the purchase, ownership and disposition of our common stock as of the date hereof. Except where noted, this summary deals only with common stock that is held as a capital asset by a non-U.S. holder (as defined below).

A "non-U.S. holder" means a beneficial owner of our common stock (other than an entity treated as a partnership for United States federal income tax purposes) that is not, for United States federal income tax purposes, any of the following:

- an individual citizen or resident of the United States;
- a corporation (or any other entity treated as a corporation for United States federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to United States federal income taxation regardless of its source; or
- a trust if it (1) is subject to the primary supervision of a court within the United States and one or more United States persons have the authority to control all substantial decisions of the trust or (2) has a valid election in effect under applicable United States Treasury regulations to be treated as a United States person.

This summary is based upon provisions of the Internal Revenue Code of 1986, as amended (the "Code"), and regulations, rulings and judicial decisions as of the date hereof. Those authorities may be changed, perhaps retroactively, so as to result in United States federal income and estate tax consequences different from those summarized below. This summary does not address all aspects of United States federal income and estate taxes and does not deal with foreign, state, local or other tax considerations that may be relevant to non-U.S. holders in light of their particular circumstances. In addition, it does not represent a detailed description of the United States federal income and estate tax consequences applicable to you if you are subject to special treatment under the United States federal income tax laws (including if you are a United States expatriate, foreign pension fund, "controlled foreign corporation," "passive foreign investment company" or a partnership or other pass-through entity for United States federal income tax purposes). We cannot assure you that a change in law will not alter significantly the tax considerations that we describe in this summary.

If a partnership (or other entity treated as a partnership for United States federal income tax purposes) holds our common stock, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding our common stock, you should consult your tax advisors.

If you are considering the purchase of our common stock, you should consult your own tax advisors concerning the particular United States federal income and estate tax consequences to you of the purchase, ownership and disposition of our common stock, as well as the consequences to you arising under other United States federal tax laws and the laws of any other taxing jurisdiction.

Dividends

In the event that we make a distribution of cash or other property (other than certain pro rata distributions of our stock) in respect of our common stock, the distribution generally will be treated as a dividend for United States federal income tax purposes to the extent it is paid from our current or accumulated earnings and profits, as determined under United States federal income tax principles. Any portion of a distribution that exceeds our current and accumulated

earnings and profits generally will be treated first as a tax-free return of capital, causing a reduction in the adjusted tax basis of a non-U.S. holder's common stock, and to the extent the amount of the distribution exceeds a non-U.S. holder's adjusted tax basis in our common stock, the excess will be treated as gain from the disposition of our common stock (the tax treatment of which is discussed below under "—Gain on Disposition of Common Stock").

Dividends paid to a non-U.S. holder generally will be subject to withholding of United States federal income tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. However, dividends that are effectively connected with the conduct of a trade or business by the non-U.S. holder within the United States (and, if required by an applicable income tax treaty, are attributable to a United States permanent establishment) are not subject to the withholding tax, provided certain certification and disclosure requirements are satisfied. Instead, such dividends are subject to United States federal income tax on a net income basis in the same manner as if the non-U.S. holder were a United States person as defined under the Code. Any such effectively connected dividends received by a foreign corporation may be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty.

A non-U.S. holder who wishes to claim the benefit of an applicable treaty rate and avoid backup withholding, as discussed below, for dividends will be required (a) to provide the applicable withholding agent with a properly executed Internal Revenue Service ("IRS") Form W-8BEN or Form W-8BEN-E (or other applicable form) certifying under penalty of perjury that such holder is not a United States person as defined under the Code and is eligible for treaty benefits or (b) if our common stock is held through certain foreign intermediaries, to satisfy the relevant certification requirements of applicable United States Treasury regulations. Special certification and other requirements apply to certain non-U.S. holders that are pass-through entities rather than corporations or individuals.

A non-U.S. holder eligible for a reduced rate of United States federal withholding tax pursuant to an income tax treaty may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for refund with the IRS.

Gain on Disposition of Common Stock

Subject to the discussion of backup withholding below, any gain realized by a non-U.S. holder on the sale or other disposition of our common stock generally will not be subject to United States federal income tax unless:

- the gain is effectively connected with a trade or business of the non-U.S. holder in the United States (and, if required by an applicable income tax treaty, is attributable to a United States permanent establishment of the non-U.S. holder);
- the non-U.S. holder is an individual who is present in the United States for 183 days or more in the taxable year of that disposition, and certain other conditions are met; or
- we are or have been a "United States real property holding corporation" for United States federal income tax purposes and certain other conditions are met.

A non-U.S. holder described in the first bullet point immediately above will be subject to tax on the gain derived from the sale or other disposition in the same manner as if the non-U.S. holder were a United States person as defined under the Code. In addition, if any non-U.S. holder described in the first bullet point immediately above is a foreign corporation, the gain realized by such non-U.S. holder may be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. An individual non-U.S. holder described in the second bullet point immediately above will be subject to a 30% (or such lower rate as may be specified by an applicable income tax treaty) tax on the gain derived from the sale or other disposition, which gain may be offset by United States source capital losses even though the individual is not considered a resident of the United States.

Generally, a corporation is a "United States real property holding corporation" if the fair market value of its United States real property interests equals or exceeds 50% of the sum of the fair market value of its worldwide real property interests and its other assets used or held for use in a trade or business (all as determined for United States federal income tax purposes). We believe we are not and do not anticipate becoming a "United States real property holding corporation" for United States federal income tax purposes. If, however, we are or become a "United States real property holding corporation," so long as our common stock is regularly traded on an established securities market during the calendar year in which the sale or other disposition occurs, only a non-U.S. holder who holds or held (at any time during the shorter of the five year period preceding the date of disposition or the holder's holding period) more than 5% of our common stock will be subject to United States federal income tax on the sale or other disposition of our common stock.

Federal Estate Tax

Common stock held by an individual non-U.S. holder at the time of death will be included in such holder's gross estate for United States federal estate tax purposes, unless an applicable estate tax treaty provides otherwise.

Information Reporting and Backup Withholding

Distributions paid to a non-U.S. holder and the amount of any tax withheld with respect to such distributions generally will be reported to the IRS. Copies of the information returns reporting such distributions and any withholding may also be made available to the tax authorities in the country in which the non-U.S. holder resides under the provisions of an applicable income tax treaty.

A non-U.S. holder will not be subject to backup withholding on dividends received if such holder certifies under penalty of perjury that it is a non-U.S. holder (and the payor does not have actual knowledge or reason to know that such holder is a United States person as defined under the Code), or such holder otherwise establishes an exemption.

Information reporting and, depending on the circumstances, backup withholding will apply to the proceeds of a sale or other disposition of our common stock made within the United States or conducted through certain United States-related financial intermediaries, unless the beneficial owner certifies under penalty of perjury that it is a non-U.S. holder (and the payor does not have actual knowledge or reason to know that the beneficial owner is a United States person as defined under the Code), or such owner otherwise establishes an exemption.

Backup withholding is not an additional tax and any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against a non-U.S. holder's United States federal income tax liability provided the required information is timely furnished to the IRS.

Additional Withholding Requirements

Under Sections 1471 through 1474 of the Code (such Sections commonly referred to as "FATCA"), a 30% United States federal withholding tax may apply to any dividends paid on our common stock to (1) a "foreign financial institution" (as specifically defined in the Code) which does not provide sufficient documentation, typically on IRS Form W-8BEN-E, evidencing either (a) an exemption from FATCA, or (b) its compliance (or deemed compliance) with FATCA (which may alternatively be in the form of compliance with an intergovernmental agreement with the United States) in a manner which avoids withholding, or (2) a "non- financial foreign entity" (as specifically defined in the Code) which does not provide sufficient documentation, typically on IRS Form W-8BEN-E, evidencing either (a) an exemption from FATCA, or (b) adequate information regarding certain substantial United States beneficial owners of such entity (if any). If a dividend payment is both subject to withholding under FATCA and subject to the withholding tax discussed above under "—Dividends," the withholding under FATCA may be credited against, and therefore reduce, such other withholding tax. You should consult your own tax advisors regarding these requirements and whether they may be relevant to your ownership and disposition of our common stock.

CERTAIN ERISA CONSIDERATIONS

The following is a summary of certain considerations associated with the purchase of our common stock by (i) employee benefit plans that are subject to Title I of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), (ii) plans, individual retirement accounts and other arrangements that are subject to Section 4975 of the Code or provisions under any other federal, state, local, non-U.S. or other laws or regulations that are similar to such provisions of ERISA or the Code (collectively, "Similar Laws"), and (iii) entities which are deemed to hold the assets of any of the foregoing types of plans, accounts or arrangements (each of the foregoing described in clauses (i), (ii), and (iii) being referred to herein as a "Plan").

General fiduciary matters and prohibited transaction issues

ERISA and the Code impose certain duties on persons who are fiduciaries of a Plan subject to Title I of ERISA or Section 4975 of the Code (a "Covered Plan") and prohibit certain transactions involving the assets of a Covered Plan and its fiduciaries or other interested parties. Under ERISA and the Code, any person who exercises any discretionary authority or control over the administration of such a Covered Plan or the management or disposition of the assets of such a Covered Plan, or who renders investment advice for a fee or other compensation to such a Covered Plan, is generally considered to be a fiduciary of the Covered Plan.

Section 406 of ERISA and Section 4975 of the Code prohibit Covered Plans from engaging in specified transactions involving plan assets with persons or entities who are "parties in interest," within the meaning of ERISA, or "disqualified persons," within the meaning of Section 4975 of the Code, unless an exemption is available. A party in interest or disqualified person who engaged in a non-exempt prohibited transaction may be subject to excise taxes and other penalties and liabilities under ERISA and the Code. In addition, the fiduciary of the Covered Plan that engaged in such a non-exempt prohibited transaction may be subject to penalties and liabilities under ERISA and the Code.

In considering an investment in our common stock with a portion of the assets of any Plan, a fiduciary should determine whether the investment is in accordance with the documents and instruments governing the Plan and the applicable provisions of ERISA, the Code or any Similar Law relating to a fiduciary's duty to the Plan, including without limitation, the prudence, diversification, delegation of control and prohibited transaction provisions of ERISA, the Code and any other applicable Similar Laws.

Government plans, foreign plans and certain church plans, while not subject to the fiduciary responsibility provisions of Title I of ERISA or the prohibited transaction provisions of Section 406 of ERISA or Section 4975 of the Code, may nevertheless be subject to Similar Laws. Fiduciaries of such Plans should consult with their counsel before acquiring shares of our common stock.

Representation

Accordingly, by its acceptance of our common stock, each purchaser and subsequent transferee will be deemed to have represented and warranted that either (i) no portion of the assets used by such purchaser or transferee to acquire our common stock constitutes assets of any Plan or (ii) the acquisition of our common stock by such purchaser or transferee will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or a similar violation under any applicable Similar Laws.

The foregoing discussion is general in nature and is not intended to be all-inclusive. Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing our common stock on behalf of, or with the assets of, any Plan, consult with their counsel regarding the potential applicability of ERISA, Section 4975 of the Code or any Similar Law and whether an exemption would be required. Neither

this discussion nor anything provided in this prospectus is, or is intended to be, investment advice directed at any potential Plan purchasers, or at Plan purchasers generally, and such purchasers of our common stock should consult and rely on their own counsel and advisers as to whether an investment in our common stock is suitable for the Plan. The sale of our common stock to any Plan is in no respect a representation by us, an underwriter or any of our or their affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by Plans generally or any particular Plan, or that such investment is prudent or appropriate for plans generally or any particular Plan.

UNDERWRITING

Under the terms and subject to the conditions in an underwriting agreement dated the date of this prospectus supplement, the underwriters named below, for whom Goldman Sachs & Co. LLC and RBC Capital Markets, LLC are acting as representatives, have severally agreed to purchase, and we have agreed to sell to them, severally, the number of shares of our common stock indicated below:

Underwriters	Number of Shares
Goldman Sachs & Co. LLC	9,829,939
RBC Capital Markets, LLC	9,829,939
Merrill Lynch, Pierce, Fenner & Smith Incorporated	2,296,103
Morgan Stanley & Co. LLC	2,296,103
Wells Fargo Securities, LLC	1,607,272
PNC Capital Markets LLC	1,974,648
Barclays Capital Inc.	1,607,272
Citizens Capital Markets, Inc.	551,065
The Huntington Investment Company	551,065
MUFG Securities Americas Inc.	551,065
J.P. Morgan Securities LLC	375,642
TD Securities (USA) LLC	375,642
Robert W. Baird & Co. Incorporated	162,478
Boenning & Scattergood, Inc.	162,478
HSBC Securities (USA) Inc.	162,478
Janney Montgomery Scott LLC	162,478
Total	32,495,667

The underwriters and the representatives are collectively referred to as the “underwriters” and the “representatives,” respectively. The underwriters are offering the shares subject to their acceptance of the shares from us and subject to prior sale. The underwriting agreement provides that the obligations of the several underwriters to pay for and accept delivery of the shares offered by this prospectus supplement are subject to the approval of certain legal matters by their counsel and to certain other conditions. The underwriters are obligated to take and pay for all of the shares offered by this prospectus supplement if any such shares are taken. However, the underwriters are not required to take or pay for the shares covered by the underwriters’ option to purchase additional shares described below.

The underwriters initially propose to offer part of the shares directly to the public at the offering price listed on the cover page of this prospectus supplement and part to certain dealers. After the initial offering of the shares, the offering price and other selling terms may from time to time be varied by the representatives.

We have granted to the underwriters an option, exercisable for 30 days from the date of this prospectus supplement, to purchase up to 4,874,350 additional shares of our common stock at the public offering price listed on the cover page of this prospectus supplement, less underwriting discounts. To the extent the option is exercised, each underwriter will become obligated, subject to certain conditions, to purchase about the same percentage of the additional shares as the number listed next to the underwriter’s name in the preceding table bears to the total number of shares listed next to the names of all underwriters in the preceding table.

The following table shows the per share and total public offering price, underwriting discount we will pay to the underwriters in this offering, and proceeds before expenses to us. These amounts are shown assuming both no exercise and full exercise of the underwriters’ option to purchase up to an additional 4,874,350 shares.

	Per Share	Total No Exercise	Total Full Exercise
Public offering price	$ 34.620	$1,124,999,992	$1,293,749,989
Underwriting discount	$ 0.779	$ 25,314,125	$ 29,111,243
Proceeds, before expenses, to us	$ 33.841	$1,099,685,867	$1,264,638,746

The estimated offering expenses payable by us, exclusive of the underwriting discount, are approximately $1.4 million. We have agreed to reimburse the underwriters for expense relating to any required review of this offering by the Financial Industry Regulatory Authority, Inc.

Our common stock is listed on the NYSE under the symbol "WTR."

We and all of our continuing directors (as described in our Definitive Proxy Statement on Schedule 14A filed with the SEC on March 22, 2019), director nominees and officers, through entering into lock-up agreements, have agreed that, without the prior written consent of the representatives on behalf of the underwriters, we and they will not, during the period ending 90 days after the date of this prospectus supplement (the "restricted period"): (i) offer, sell, contract to sell, pledge, grant any option to purchase, make any short sale or otherwise transfer or dispose of, directly or indirectly, our common stock, any options, rights or warrants to purchase our common stock or any securities convertible into or exchangeable for, or substantially similar to, our common stock (collectively, "restricted securities"); (ii) enter into any swap or other agreement that transfers to another, in whole or in part, any of the economic consequences of ownership of the common stock or any such other securities, whether any such transaction described in (i) or (ii) is to be settled by delivery of common stock or such other securities, in cash or otherwise or (iii) publicly disclose the intention to take any of the foregoing actions. In addition, we agreed not to file with the SEC any registration statement relating to any restricted securities, and our continuing directors, director nominees and officers each agreed not to make any demand for, or exercise any right with respect to, the registration of any restricted securities, in each case during the restricted period and without the prior written consent of the representatives on behalf of the underwriters.

The restrictions described in the immediately preceding paragraph do not apply to:

- the sale of the shares to the underwriters in this offering, the sale of the TEUs to the underwriters of the TEU Offering or the sale of the shares of our common stock in the Private Placement;
- the issuance by us of, or the receipt by our continuing directors, director nominees and officers of, restricted securities pursuant to our existing employee equity or equity-based incentive plans, employee stock purchase plans or dividend reinvestment plans, or upon the conversion or exchange of convertible or exchangeable securities outstanding as of the date of this prospectus supplement;
- the filing by us of registration statements relating to securities issuable under our existing employee equity or equity-based plans or employee stock purchase plans;
- the issuance of shares of common stock in connection with certain investments, acquisitions, with joint ventures, commercial relationships or other strategic transactions, provided that the aggregate number of shares issued or issuable pursuant to this clause does not exceed 10% of the number of shares of common stock outstanding immediately after this offering and prior to such issuance;
- in the case of our continuing directors, director nominees and officers, (i) the establishment of a trading plan pursuant to Rule 10b5-1 under the Exchange Act for the transfer of our common stock following expiration of the restricted period, (ii) transfers in accordance with the terms of existing trading plans pursuant to Rule 10b5-1 under the Exchange Act, (iii) certain transfers of shares held as of the date of this prospectus supplement through our existing 401(k) plan pursuant to portfolio balancing

opportunities provided by the terms of such plan, (iv) transfers to us to satisfy certain tax obligations in connection with vesting of restricted stock units, restricted shares, performance share units or phantom shares and (v) certain other transfers to us;

- in the case of our continuing directors, director nominees and officers, transfers to us upon death, disability or termination or employment, in each case, of such person;

- the receipt by us or our subsidiaries of shares (a) in the exercise of outstanding options, warrants, restricted stock units or other equity interests, including transfers deemed to occur upon the "net" or "cashless" exercise of options or (b) for the sole purpose of paying the exercise price of such options, warrants, restricted stock units or other equity interests or for paying taxes (including estimated taxes) due as a result of the exercise of such options, warrants, restricted stock units or other equity interests or as a result of the vesting of shares under restricted stock awards or restricted stock units pursuant to our existing employee benefit plans disclosed herein relating to this public offering, in each case on a "cashless" or "net exercise" basis, provided that any such shares received upon such exercise shall be subject to the terms of the lock-up agreement;

- tenders, sales or other transfers pursuant to a bona fide third-party tender offer, merger, consolidation or other similar transaction made to all holders of restricted securities involving a "change of control" of us (provided that if such transaction is not consummated, our continuing directors', director nominees' and officers' shares shall remain subject to the restrictions set forth in the lock-up agreements);

- the exercise for cash of options to purchase shares disclosed as outstanding herein, provided that any such shares received upon such exercise shall be subject to the terms of the lock-up agreements;

- in the case of our continuing directors, director nominees and officers, the disposition of shares acquired in this offering or in open market transactions after completion of this offering; and

- transfers of shares or other of our securities pursuant to an order of a court or regulatory agency or to comply with any regulations related to ownership by our continuing directors, director nominees and officers of their shares.

The representatives, in their sole discretion, may release the common stock and other securities subject to the lock-up agreements described above in whole or in part at any time.

In order to facilitate the offering of the shares, the underwriters may engage in transactions that stabilize, maintain or otherwise affect the price of the shares. Specifically, the underwriters may sell more shares than they are obligated to purchase under the underwriting agreement, creating a short position. A short sale is covered if the short position is no greater than the number of shares available for purchase by the underwriters under the option to purchase additional shares. The underwriters can close out a covered short sale by exercising the option or purchasing shares of our common stock in the open market. In determining the source of shares to close out a covered short sale, the underwriters will consider, among other things, the open market price of shares of our common stock compared to the price available under the option. The underwriters may also sell shares of our common stock in excess of the option, creating a naked short position. The underwriters must close out any naked short position by purchasing shares of our common stock in the open market. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the shares in the open market after pricing that could adversely affect investors who purchase in this offering. As an additional means of facilitating this offering, the underwriters may bid for, and purchase, shares of our common stock in the open market to stabilize the price of the shares. These activities may raise or maintain the market price of the shares above independent market levels or prevent or retard a decline in the market price of the shares. The underwriters are not required to engage in these activities and may end any of these activities at any time.

We have agreed to indemnify the underwriters against certain liabilities in connection with this offering,including liabilities under the Securities Act, or to contribute to payments that the underwriters may be required to make in respect of those liabilities.

The underwriters and their respective affiliates are full-service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financing and brokerage activities. Certain of the underwriters and their respective affiliates have, from time to time, performed, and may in the future perform, various financial advisory and investment banking services for us, for which they received or will receive customary fees and expenses. For example, Goldman Sachs & Co. LLC and RBC Capital Markets, LLC acted as our financial advisers in connection with the Acquisition, for which they are receiving customary fees and expenses. Also in connection with the Acquisition, certain of the underwriters and/or their affiliates have provided committed financing under the Bridge Commitment, pursuant to which they receive customary commitment fees in connection with their respective commitments and, in the event we borrow under the Bridge Facility, would receive certain additional funding and other fees. Certain of the underwriters and/or their affiliates are also lenders and/or agents under the Revolving Credit Facility, which we expect to draw upon to refinance Peoples's revolving credit facility in connection with the Acquisition, and receive customary fees and expenses in connection therewith and would receive proceeds from this offering if we were to temporarily reduce our borrowings under the Revolving Credit Facility as described in "Use of Proceeds." Certain of the underwriters in this offering are also acting as underwriters in our concurrent TEU Offering, and may act as underwriters in the Notes Offering, for which they will receive customary fees and expenses. Certain of the underwriters may also receive fees and expenses in connection with the Private Placement. In addition, in an effort to manage our exposure to interest rate risk associated with the Notes Offering, we have entered into, and in the future, may enter into, financial derivative instruments such as interest rate swap agreements with certain of the underwriters or their respective affiliates.

In addition, in the ordinary course of their various business activities, the underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities may involve our securities and instruments. Certain of the underwriters and/or their affiliates have lending relationships with us and may hedge their credit exposure to us consistent with their customary risk management policies. Typically, the underwriters and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities or the securities of our affiliates. Any such credit default swaps or short positions could adversely affect future trading prices of the shares offered hereby. The underwriters and their respective affiliates may also make investment recommendations or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long or short positions in such securities and instruments, for which they received or will receive customary fees and expenses.

Selling Restrictions

Canada

The shares may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the shares must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remediesfor rescission or damages if this prospectus supplement (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non- Canadian jurisdiction, section 3A.4) of National Instrument 33-105 Underwriting Conflicts (NI 33-105), the underwriters are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

European Economic Area

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive (each, a "Relevant Member State") an offer to the public of our common shares may not be made in that Relevant Member State, except that an offer to the public in that Relevant Member State of our common shares may be made at any time under the following exemptions under the Prospectus Directive:

(a) to any legal entity which is a qualified investor as defined in the Prospectus Directive;

(b) to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Directive), subject to obtaining the prior consent of the underwriters for any such offer; or

(c) in any other circumstances falling within Article 3(2) of the Prospectus Directive, provided that no such offer of shares of our common stock shall result in a requirement for the publication by us or any underwriter of a prospectus pursuant to Article 3 of the Prospectus Directive.

For the purposes of this provision, the expression an "offer to the public" in relation to our common shares in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and our common shares to be offered so as to enable an investor to decide to purchase our common shares, as the same may be varied in that Member State by any measure implementing the Prospectus Directive in that Member State, the expression "Prospectus Directive" means Directive 2003/71/ EC (as amended), including by Directive 2010/73/EU, and includes any relevant implementing measure in the Relevant Member State.

This European Economic Area selling restriction is in addition to any other selling restrictions set out below.

United Kingdom

In addition, this document is being distributed only to, and is directed only at, and any offer subsequently made may only be directed at: (i) in the United Kingdom, persons having professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the "Order"), and/or persons falling within Article 49(2)(a) to (d) of the Order; (ii) persons who are outside the United Kingdom; and (iii) any other persons to whom it may otherwise lawfully be distributed (all such persons together being referred to as "relevant persons"). This document must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to, and will be engaged in only with, relevant persons.

Australia

No placement document, prospectus, product disclosure statement or other disclosure document has been lodged with the Australian Securities and Investments Commission ("ASIC") in relation to the offering. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or this offering do not constitute a prospectus, product disclosure statement or other disclosure document under the prospectus, product disclosure statement or other disclosure document under the Corporations Act 2001 (Cth) (the "Corporations Act"), and do not purport to include the information required for a prospectus, product disclosure statement or other disclosure document under the Corporations Act.

Any offer in Australia of the shares may only be made to persons (the "Exempt Investors") who are "sophisticated investors" (within the meaning of section 708(8) of the Corporations Act), "professional investors" (within the meaning of section 708(11) of the Corporations Act) or otherwise pursuant to one or more exemptions contained in section 708 of the Corporations Act so that it is lawful to offer the shares without disclosure to investors under Chapter 6D of the Corporations Act.

The shares applied for by Exempt Investors in Australia must not be offered for sale in Australia for a period of 12 months after the date of allotment under the offering, except in circumstances where disclosure to investors under Chapter 6D of the Corporations Act would not be required pursuant to an exemption under section 708 of the Corporations Act or otherwise or where the offer is pursuant to a disclosure document which complies with Chapter 6D of the Corporations Act. Any person acquiring shares must observe such Australian on-sale restrictions.

This prospectus supplement and the accompanying prospectus contain general information only and do not take account of the investment objectives, financial situation or particular needs of any particular person. They do not contain any securities recommendations or financial product advice. Before making an investment decision, investors need to consider whether the information in this prospectus supplement and the accompanying prospectus is appropriate to their needs, objectives and circumstances, and, if necessary, seek expert advice on those matters.

Hong Kong

The shares may not be offered or sold in Hong Kong by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies Ordinance (Cap. 32, Laws of Hong Kong), or (ii) to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder, or (iii) in other circumstances which do not result in the document being a "prospectus" within the meaning of the Companies Ordinance (Cap. 32, Laws of Hong Kong) and no advertisement, invitation or document relating to the shares may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the laws of Hong Kong) other than with respect to shares which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder.

Japan

The shares have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended) (the "FIEA"). The shares may not be offered or sold, directly or indirectly, in Japan or to or for the benefit of any resident of Japan (including any person resident in Japan or any corporation or other entity organized under the laws of Japan) or to others for reoffering or resale, directly or indirectly, in Japan or to or for the benefit of any resident of Japan, except pursuant to an exemption from the registration requirements of the FIEA and otherwise in compliance with any relevant laws, regulations and ministerial guidelines of Japan.

Korea

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering should be construed in any way as our (or any of our affiliates or agents) soliciting investment or offering to sell the shares in the Republic of Korea ("Korea"). We are not making any representation with respect to the eligibility of any recipients of this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering to acquire the shares under the laws of Korea, including, without limitation, the Financial Investment Services and Capital Markets Act (the "FSCMA"), the Foreign Exchange Transaction Act (the "FETA"), and any regulations thereunder. The shares have not been registered with the Financial Services Commission of Korea (the "FSC") in any way pursuant to the FSCMA, and the shares may not be offered, sold or delivered, or offered or sold to any person for reoffering or resale, directly or indirectly, in Korea or to any resident of Korea except pursuant to applicable laws and regulations of Korea. Furthermore, the shares may not be resold to any Korean resident unless such Korean resident as the purchaser of the resold shares complies with all applicable regulatory requirements (including, without limitation, reporting or approval requirements under the FETA and regulations thereunder) relating to the purchase of the resold shares.

Singapore

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering has been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering may be circulated or distributed, nor may the shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore, other than (a) to an institutional investor under Section 274 of the Securities and Futures Act, Chapter 289 of Singapore (the "SFA"), (b) to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions specified in Section 275 of the SFA or (c) pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the shares are subscribed or purchased under Section 275 by a relevant person which is: (i) a corporation (which is not an accredited investor) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (ii) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an accredited investor, shares, debentures and units of shares and debentures of that corporation or the beneficiaries' rights and interest in that trust shall not be transferable for six months after that corporation or that trust has acquired the shares under Section 275 except: (1) to an institutional investor under Section 274 of the SFA or to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions, specified in Section 275 of the SFA; (2) where no consideration is given for the transfer; or (3) by operation of law.

Solely for the purposes of its obligations pursuant to sections 309B(1)(a) and 309B(1)(c) of the Securities and Futures Act (Chapter 289 of Singapore) (the "SFA"), we have determined, and hereby notify all relevant persons (as defined in Section 309A of the SFA) that the shares are "prescribed capital markets products" (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Switzerland

The shares may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange ("*SIX*") or on any other exchange or regulated trading facility in Switzerland. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or this offering do not

constitute a prospectus within the meaning of and have been prepared without regard to the disclosure standards for issuance prospectuses under art. 652a or art. 1156 of the Swiss Code of Obligations or the disclosure standards for listing prospectuses under art. 27 ff. of the SIX Listing Rules or the listing rules of any other exchange or regulated trading facility in Switzerland.

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering may be publicly distributed or otherwise made publicly available in Switzerland. Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the offering, the Company or the shares has been or will be filed with or approved by any Swiss regulatory authority. In particular, this prospectus supplement and the accompanying prospectus will not be filed with, and the offer of shares will not be supervised by, the Swiss Financial Market Supervisory Authority, and the offer of shares has not been and will not be authorized under the Swiss Federal Act on Collective Investment Schemes (the "*CISA*"). The investor protection afforded to acquirers of interests in collective investment schemes under the CISA does not extend to acquirers of the shares.

Taiwan

The shares have not been and will not be registered or filed with, or approved by, the Financial Supervisory Commission of Taiwan and/or any other regulatory authority of Taiwan pursuant to relevant securities laws and regulations and may not be sold, issued or offered within Taiwan through a public offering or in circumstances which could constitute an offer within the meaning of the Securities and Exchange Act of Taiwan or relevant laws and regulations that require a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the shares in Taiwan.

United Arab Emirates

The shares have not been, and are not being, publicly offered, sold, promoted or advertised in the United Arab Emirates (including the Abu Dhabi Global Market and the Dubai International Financial Centre) other than in compliance with the laws, regulations and rules of the United Arab Emirates, the Abu Dhabi Global Market and the Dubai International Financial Centre governing the issue, offering and sale of securities. Further, this prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or the offering do not constitute a public offer of securities in the United Arab Emirates (including the Abu Dhabi Global Market and the Dubai International Financial Centre) and are not intended to be a public offer. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or the offering have not been approved by or filed with the Central Bank of the United Arab Emirates, the Securities and Commodities Authority, the Financial Services Regulatory Authority or the Dubai Financial Services Authority.

LEGAL MATTERS

Certain legal matters will be passed upon for us by Simpson Thacher & Bartlett LLP, New York, New York. Ballard Spahr LLP, Philadelphia, Pennsylvania will issue an opinion regarding certain matters of Pennsylvania law, including the validity of the securities offered by the prospectus supplement. Certain legal matters will be passed upon for the underwriters by Cravath, Swaine & Moore LLP, New York, New York.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this prospectus supplement by reference to the Company's Annual Report on Form 10-K for the year ended December 31, 2018 have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

The consolidated financial statements of LDC Funding LLC as of December 31, 2018 and 2017 and for each of the three years in the period ended December 31, 2018, incorporated by reference in this prospectus supplement and in the accompanying prospectus from Aqua America's Current Report on Form 8-K/A filed on April 15, 2019, have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated by reference herein, and are incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND ADDITIONAL INFORMATION; INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE

We file annual, quarterly and current reports, proxy statements and other information with the SEC. The SEC maintains a website at *www.sec.gov* that contains periodic and current reports, proxy and information statements, and other information regarding registrants that are filed electronically with the SEC.

These documents are also available, free of charge, through the Investors section of our website, which is located at *http://ir.aquaamerica.com/*. Information contained on our website is not incorporated by reference into this prospectus supplement or the accompanying prospectus and you should not consider information on our website to be part of this prospectus supplement or the accompanying prospectus.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act of 1933 relating to the securities that may be offered by this prospectus supplement. This prospectus supplement is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus supplement as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus supplement is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus supplement, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" into this prospectus supplement and the accompanying prospectus the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus supplement. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of

1934 until we sell all of the securities covered by this prospectus supplement or this offering is terminated; provided, however, that we are not incorporating, in each case, any portions of documents or information furnished or deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2018 filed with the SEC on February 26, 2019;
- The portions of our Definitive Proxy Statement on Schedule 14A filed with the SEC on March 22, 2019, that are incorporated by reference into our Annual Report on Form 10-K for the fiscal year ended December 31, 2018;
- Our Current Reports on Form 8-K filed with the SEC on October 23, 2018, February 19, 2019 (Item 8.01 only) and March 29, 2019, and our Current Report on Form 8-K/A filed with the SEC on April 15, 2019; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus supplement. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Aqua America, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000
Attention: Corporate Secretary

We have not, and the underwriters have not, authorized anyone to provide you with any information other than that contained or incorporated by reference in this prospectus supplement, the accompanying prospectus or in any free writing prospectus we may provide to you in connection with this offering. Neither we nor the underwriters take any responsibility for, or provide any assurances as to the reliability of, any additional or different information that others may give you. You should assume that the information contained in this prospectus supplement, the accompanying prospectus and any free writing prospectus we may provide to you in connection with this offering is accurate only as of their respective dates or as of the respective dates specified in such information, as applicable, and the information contained in documents incorporated by reference is accurate only as of the respective dates of those documents or as of the respective dates specified in such information, as applicable, in each case regardless of the time of delivery of this prospectus supplement or the accompanying prospectus or any such free writing prospectus or any sale of our common stock. Our business, financial condition, results of operations and prospects may have changed since those dates.

Any statement contained herein or in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for purposes of this prospectus supplement to the extent that a statement contained herein, in any other subsequently filed document which also is or is deemed to be incorporated by reference herein or in the accompanying prospectus, modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified and superseded, to constitute a part of this prospectus supplement.

PROSPECTUS

AQUA AMERICA, INC.

Common Stock
Preferred Stock
Common Stock Purchase Contracts
Warrants
Units
Depositary Shares
Debt Securities

Aqua America, Inc. may, from time to time, in one or more offerings, offer and sell common stock, preferred stock, common stock purchase contracts, warrants, units, depositary shares and debt securities. The debt securities and preferred stock may be convertible into or exchangeable or exercisable for other securities. We will provide specific terms of any offering and the offered securities in supplements to this prospectus. The prospectus supplements may also add, update or change information contained in this prospectus.

We may offer and sell these securities to or through underwriters, dealers or agents, directly to purchasers or through a combination of these methods. If an offering of securities involves any underwriters, dealers or agents, then the names of the underwriters, dealers or agents and the terms of the arrangements with such entities will be stated in an accompanying prospectus supplement.

Our common stock is listed on the New York Stock Exchange under the symbol "WTR." We have not yet determined whether any of the other securities that may be offered by this prospectus will be listed on any exchange, inter-dealer quotation system or over-the-counter market. If we decide to seek listing of any such securities upon issuance, an accompanying prospectus supplement will disclose the exchange, quotation system or market on which the securities will be listed.

The prospectus may not be used to sell our securities unless it is accompanied by a prospectus supplement.

Investing in our securities involves risk. Before you invest, you should carefully read and evaluate the risk factors and other information included in this prospectus and any applicable prospectus supplement, including the documents incorporated by reference. See "Risk Factors" beginning on page 8 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is February 28, 2018.

ABOUT THIS PROSPECTUS

This document is called a prospectus and is part of a registration statement that we filed with the Securities and Exchange Commission (SEC) using a "shelf" registration process. Under this shelf process, we may, from time to time, in one or more offering, offer and sell common stock, preferred stock, common stock purchase contracts, warrants, units, depositary shares and debt securities. This prospectus provides you with a general description of the securities we may offer. Each time we sell any securities under this prospectus, we will provide a prospectus supplement that will contain specific information about the terms of that offering and the offered securities. That prospectus supplement may include a discussion of any risk factors or other special considerations applicable to those securities. The prospectus supplement also may add, update or change information contained in this prospectus. You should read both this prospectus and the applicable prospectus supplement and the exhibits filed with our registration statement together with the additional information described below under the heading "Where You Can Find More Information" before you decide whether to invest in the securities.

The registration statement (including the exhibits) of which this prospectus is a part contains additional information about us and the securities we may offer by this prospectus. Specifically, we have filed certain legal documents that control the terms of the securities offered by this prospectus as exhibits to the registration statement. We will file certain other legal documents that will control the terms of the securities we may offer by this prospectus as exhibits to the registration statement or to reports we file with the SEC. The registration statement and the reports can be read at the SEC website or at the SEC offices mentioned under the heading "Where You Can Find More Information."

You should rely only upon the information contained in, or incorporated by reference into, this prospectus and the applicable prospectus supplement that contains specific information about the securities we are offering. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this document is accurate only as of the date on the front cover of this document. Our business, financial condition, results of operations and prospects may have changed since that date.

Except as otherwise provided in this prospectus, unless the context otherwise requires, references in this prospectus to "Aqua America," "we," "us" or "our" refer to Aqua America, Inc. and its direct and indirect subsidiaries. In addition, references to "Aqua Pennsylvania" refer to our wholly-owned subsidiary, Aqua Pennsylvania, Inc., and its subsidiaries.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus, or incorporated by reference into this prospectus, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control, that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward- looking statements where statements are preceded by, followed by, or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue" or the negative of such terms or similar expressions. Forward-looking statements in this prospectus, or incorporated by reference into this prospectus, include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increase requests;
- the availability and cost of capital financing;
- developments, trends and consolidation in the water and wastewater utility and infrastructure industries;
- dividend payment projections;
- opportunities for future acquisitions, both within and outside the water and wastewater industry, the success of pending acquisitions and the impact of future acquisitions;
- the capacity of our water supplies, water facilities and wastewater facilities;
- the impact of federal and/or state tax laws or policies and the regulatory treatment of the effects of those laws or policies, including the Tax Cuts and Jobs Act;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient plumbing fixtures and appliances on water usage per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;
- general economic conditions;
- acquisition-related costs and synergies;

- the sale of water and wastewater divisions; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the profitability of future acquisitions;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- our ability to integrate businesses, technologies or services which we may acquire;
- our ability to manage the expansion of our business;
- our ability to treat and supply water or collect and treat wastewater;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services;

- civil disturbance or terroristic threats or acts;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in accounting pronouncements;
- litigation and claims; and
- changes in environmental conditions, including the effects of climate change.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus and the documents that we incorporate by reference into this prospectus completely and with the understanding that our actual future results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see “Risk Factors.” We qualify all of our forward-looking statements by these cautionary statements.

AQUA AMERICA, INC.

Aqua America, Inc. is the holding company for regulated utilities providing water or wastewater services to an estimated three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately 52% of our operating revenues and approximately 74% of our net income for 2017. As of December 31, 2017, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania's service territory is located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources Inc. Aqua Infrastructure provides non- utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through two operating and maintenance contracts with municipal authorities close to our utility companies' service territory; and offers, through a third party, water and wastewater line repair service and protection solutions to households. In 2017, we completed the sale of business units that are reported within Aqua Resources, which installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, and repaired and performed maintenance on water and wastewater systems. Additionally, during 2016, we completed the sale of business units within Aqua Resources, which provided liquid waste hauling and disposal services and inspection, and cleaning and repair of storm and sanitary wastewater lines.

Aqua America, which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth through acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of American Water Works Company, Inc.'s regulated water and wastewater operations in Ohio in 2012. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and have extended our regulated operations from southeastern Pennsylvania to include our current regulated utility operations throughout Pennsylvania and in seven other states. During 2010 through 2013, we sold our utility operations in six states, pursuant to a portfolio rationalization strategy to focus our operations in areas where we have critical mass and economic growth potential. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to pursue growth ventures in market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated businesses.

Our growth in revenues over the past five years is primarily a result of increases in water and wastewater rates and customer growth. The increase in our utility customer base has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions) as shown below:

Year	Utility Customer Growth Rate
2017	1.1%
2016	1.6%
2015	1.9%
2014	1.3%
2013	1.3%

In 2017, our customer count increased by 10,584 customers, primarily due to utility systems that we acquired and organic growth. Overall, for the five-year period of 2013 through 2017, our utility customer base, adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 1.4%. During the five-year period ended December 31, 2017, our utility customer base including customers associated with utility system acquisitions and dispositions increased from 968,357 at January 1, 2013 to 982,849 at December 31, 2017. This five-year period includes the impact of the condemnation of our Fort Wayne, IN system in 2014, which resulted in the loss of approximately 13,000 connections.

Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010- 3489, and our telephone number is 610-527-8000. Our website may be accessed at www.aquaamerica.com. The references to our website and the SEC's website are intended to be inactive textual references only, and the contents of those websites are not incorporated by reference herein and should not be considered part of this prospectus.

RISK FACTORS

Investing in our securities involves risks. Please see the risk factors described under the section captioned "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2017, as such risk factors may be updated from time to time in filings we make with the SEC subsequent to the date hereof. Before making an investment decision, you should carefully consider these risk factors, together with all other information contained in or incorporated by reference into this prospectus or any applicable prospectus supplement (which includes information contained in certain filings we make with the SEC subsequent to the date hereof as set forth in the section below captioned "Where You Can Find More Information"). Please also refer to the section above captioned "Forward-Looking Statements."

USE OF PROCEEDS

Unless we otherwise specify in the applicable prospectus supplement, we intend to use the net proceeds from the sale of the securities we may offer by this prospectus to fund our capital expenditures, to provide capital for our growth strategy, which includes potential future acquisitions of municipally owned and investor- owned water and wastewater systems, regulated utilities and infrastructure projects, and market-based activities complementary to our regulated business, to fund the integration of any businesses that we acquire into our existing business, and to purchase and maintain plant equipment, as well as for working capital and other general corporate purposes. Our management will have broad discretion in the allocation of net proceeds from the sale of any securities sold by us.

CERTAIN RATIOS

Our ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends for the periods indicated below were as follows:

	Year Ended December 31,				
	2017	**2016**	**2015**	**2014**	**2013**
Ratio of earnings to fixed charges	3.90	4.17	4.15	4.05	3.79
Ratio of earnings to combined fixed charges and preferred stock dividends	3.90	4.17	4.15	4.05	3.79

The ratios of earnings to fixed charges and the ratios of earnings to combined fixed charges and preferred stock dividends were computed by dividing our earnings by fixed charges and by combined fixed charges and preferred stock dividends, respectively. For the purpose of these computations, earnings include the sum of income from continuing operations before income taxes and non-controlling interest, and fixed charges, less

capitalized interest. Fixed charges consist of interest on all indebtedness, whether expensed or capitalized, amortization of debt expense, and the estimated interest attributable to rental and lease expense calculated using an assumed interest factor of 33% of rental and lease expense.

DESCRIPTION OF CAPITAL STOCK

As of February 13, 2018 our authorized capital stock was 301,770,819 shares, consisting of:

- 300,000,000 shares of common stock, par value $0.50 per share, of which 177,750,505 shares were outstanding; and
- 1,770,819 shares of preferred stock, par value $1.00 per share, of which no shares were outstanding.

The following summary of certain terms of our common stock and preferred stock is qualified in its entirety by the provisions of our articles of incorporation and bylaws each of which is incorporated by reference as an exhibit to the registration statement of which this prospectus constitutes a part.

Common Stock

This section describes the general terms of our common stock. For more detailed information, you should refer to our articles of incorporation and bylaws, including any amendments thereto, copies of which have been filed with the SEC. These documents are incorporated by reference into this prospectus.

Voting Rights

Holders of our common stock are entitled to one vote for each share held by them at all meetings of the shareholders and are not entitled to cumulate their votes for the election of directors.

Dividend Rights and Limitations

Holders of our common stock may receive dividends when declared by our board of directors. Because we are a holding company, the funds we use to pay any dividends on our common stock are derived predominantly from the dividends that we receive from our subsidiaries and the dividends they receive from their subsidiaries. Therefore, our ability to pay dividends to holders of our common stock depends upon our subsidiaries' earnings, financial condition and ability to pay dividends. Most of our subsidiaries are subject to regulation by state utility commissions and the amounts of their earnings and dividends are affected by the manner in which they are regulated. In addition, they are subject to restrictions on the payment of dividends contained in their various debt agreements. Under our most restrictive debt agreements, the amount available for payment of dividends to us as of December 31, 2017 was approximately $1.4 billion of Aqua Pennsylvania's retained earnings and $143 million of the retained earnings of certain other subsidiaries. Payment of dividends on our common stock is also subject to the preferential rights of the holders of any outstanding preferred stock.

Liquidation Rights

In the event that we liquidate, dissolve or wind-up, the holders of our common stock are entitled to share ratably in all of the assets that remain after we pay our liabilities. This right is subject, however, to the prior distribution rights of any outstanding preferred stock.

Preferred Stock

Our board of directors has the authority, from time to time and without further action by our shareholders, to divide our unissued capital stock into one or more classes and one or more series within any class and to

make determinations of the designation and number of shares of any class or series and determinations of the voting rights, preferences, limitations and special rights, if any, of the shares of any class or series. The rights, preferences, limitations and special rights of different classes of capital stock may differ with respect to dividend rates, amounts payable on liquidation, voting rights, conversion rights, redemption provisions, sinking fund provisions and other matters. The rights, preferences, privileges and restrictions of each series may be fixed by the designations of that series set forth in either a restated version of our articles of incorporation or a certificate of designations relating to that series, which will be filed with the SEC as an exhibit to or incorporated by reference in the registration statement of which this prospectus constitutes a part.

The issuance of preferred stock may be perceived by some as possibly having the effect of delaying, deferring or preventing a change of control of us without further action by our shareholders. The issuance of preferred stock with voting and conversion rights may also adversely affect the voting power of the holders of our common stock. In certain circumstances, an issuance of preferred stock could possibly have the effect of decreasing the market price of our common stock.

Whenever preferred stock is to be sold pursuant to this prospectus, we will file a prospectus supplement relating to that sale which will specify:

- the number of shares in the series of preferred stock;
- the designation for the series of preferred stock by number, letter or title that will distinguish the series from any other series of preferred stock;
- the dividend rate, if any, and whether dividends on that series of preferred stock will be cumulative, noncumulative or partially cumulative;
- the voting rights of that series of preferred stock, if any;
- any conversion provisions applicable to that series of preferred stock;
- any redemption or sinking fund provisions applicable to that series of preferred stock;
- any preemptive rights provisions applicable to that series of preferred stock;
- the liquidation preference per share of that series of preferred stock; and
- the terms of any other preferences or rights, if any, applicable to that series of preferred stock.

Anti-Takeover Provisions

Pennsylvania State Law Provisions

Under Section 1712 of the Pennsylvania Business Corporation Law of 1988, as amended (PBCL), which is applicable to us, directors stand in a fiduciary relation to their corporation and, as such, are required to perform their duties in good faith, in a manner they reasonably believe to be in the best interests of the corporation and with such care, including reasonable inquiry, skill and diligence, as a person of ordinary prudence would use under similar circumstances. Under Section 1715 of the PBCL, in discharging their duties, directors may, in considering the best interests of their corporation, consider various constituencies, including, shareholders, employees, suppliers, customers and creditors of the corporation, and upon communities in which offices or other establishments of the corporation are located. Directors are not required to give prominent consideration to the interests of any particular constituency. Absent a breach of fiduciary duty, a lack of good faith or self-dealing, any act of the board of directors,

a committee thereof or an individual director is presumed to be in the best interests of the corporation. Actions by directors relating to an acquisition or potential acquisition of control of the corporation are not subject to any greater obligation to justify, or higher burden of proof, than is applied to any other acts of directors. The PBCL expressly provides that the fiduciary duty of directors does not require them to (i) redeem or otherwise render inapplicable outstanding rights issued under any shareholder rights plan; (ii) render inapplicable the anti-takeover statutes set forth in Chapter 25 of the PBCL (described below); or (iii) take any action solely because of the effect it may have on a proposed acquisition or the consideration to be received by shareholders in such a transaction. In addition, Section 2513 of the PBCL specifically validates shareholder rights plans, or "poison pills," and the discriminatory dilution provisions contained in such plans.

Chapter 25 of the PBCL contains several anti-takeover statutes applicable to publicly-traded corporations. Corporations may opt-out of such anti-takeover statutes under certain circumstances. We have not opted-out of any of such statutes.

Section 2538 of Subchapter 25D of the PBCL requires certain transactions with an "interested shareholder" to be approved by a majority of disinterested shareholders. "Interested shareholder" is defined broadly to include any shareholder who is a party to the transaction or who is treated differently than other shareholders and affiliates of the interested shareholder.

Subchapter 25E of the PBCL requires a person or group of persons acting in concert which acquires 20% or more of the voting shares of the corporation to offer to purchase the shares of any other shareholder at "fair value." "Fair value" means the value not less than the highest price paid per share by the controlling person or group during the 90-day period prior to the control transaction, plus a control premium. Among other exceptions, Subchapter 25E does not apply to shares acquired directly from the corporation in a transaction exempt from the registration requirements of the Securities Act of 1933, or to a one-step merger.

Subchapter 25F of the PBCL generally establishes a 5-year moratorium on a "business combination" with an "interested shareholder." "Interested shareholder" is defined generally to be any beneficial owner of 20% or more of the corporation's voting stock or an affiliate or associate of the corporation that at any time within the prior five-year period was a beneficial owner of 20% or more of the corporation's voting stock. "Business combination" is defined broadly to include mergers, consolidations, asset sales and certain self-dealing transactions. Certain restrictions apply to business combination following the 5-year period. Among other exceptions, Subchapter 25F will be rendered inapplicable if the board of directors approves the proposed business combination, or approves the interested shareholder's acquisition of 20% of the voting shares, in either case prior to the date on which the shareholder first becomes an interested shareholder.

Subchapter 25G of the PBCL provides that "control shares" lose voting rights unless such rights are restored by the affirmative vote of a majority of (i) the disinterested shares (generally, shares held by persons other than the acquiror, executive officers of the corporation and certain employee stock plans) and (ii) the outstanding voting shares of the corporation. "Control shares" are defined as shares which, upon acquisition, will result in a person or group acquiring for the first time voting control over (a) 20%, (b) 33 1/3% or (c) 50% or more of the outstanding shares, together with shares acquired within 180 days of attaining the applicable threshold and shares purchased with the intention of attaining such threshold. A corporation may redeem control shares if the acquiring person does not request restoration of voting rights as permitted by Subchapter 25G. Among other exceptions, Subchapter 25G does not apply to a merger, consolidation or a share exchange if the corporation is a party to the transaction agreement.

Subchapter 25H of the PBCL provides in certain circumstances for the recovery by the corporation of profits realized from the sale of its stock by a controlling person or group if the sale occurs within 18 months after the controlling person or group became a controlling person or group, and the stock was acquired during such month period or within 24 months before such period. A controlling person or group is a person or group that

has acquired, offered to acquire, or publicly disclosed an intention to acquire 20% or more of the voting shares of the corporation or a person or group that has otherwise publicly disclosed or caused to be disclosed that it may seek to acquire control of the corporation through any means. Among other exceptions, Subchapter 25H does not apply to transactions approved by both the board of directors and the shareholders prior to the acquisition or distribution, as appropriate.

Subchapter 25I of the PBCL mandates severance compensation for eligible employees who are terminated within 24 months after the approval of a control-share acquisition. Eligible employees generally are all employees employed in Pennsylvania for at least two years prior to the control-share approval. Severance equals the weekly compensation of the employee multiplied by the employee's years of service (up to 26 years), less payments made due to the termination.

Subchapter 25J of the PBCL requires the continuation of certain labor contracts relating to business operations owned at the time of a control-share approval.

Articles of Incorporation and Bylaw Provisions

Certain provisions of our articles of incorporation and bylaws may have the effect of discouraging unilateral tender offers or other attempts to take over and acquire our business. These provisions might discourage some potentially interested purchaser from attempting a unilateral takeover bid for us on terms which some shareholders might favor. Our articles of incorporation require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law. The fundamental transactions that are subject to this provision are those transactions that require approval by shareholders under applicable law or the articles of incorporation. These transactions include certain amendments of our articles of incorporation or bylaws, certain sales or other dispositions of our assets, certain issuances of our capital stock, or certain transactions involving our merger, consolidation, division, reorganization, dissolution, liquidation or winding up. Our articles of incorporation and bylaws provide that:

- a special meeting of shareholders may only be called by the chairman, the president, the board of directors or shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting;

- nominations for election of directors may be made by any shareholder entitled to vote for election of directors if the name of the nominee and certain information relating to the nominee is filed with our corporate secretary not less than 14 days nor more than 50 days before any meeting of shareholders to elect directors; and

- certain advance notice procedures must be met for shareholder proposals to be made at annual meetings of shareholders. These advance notice procedures generally require a notice to be delivered not less than 90 days nor more than 120 days before the anniversary date of the immediately preceding annual meeting of shareholders.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is Computershare Trust Company, N.A.

DESCRIPTION OF COMMON STOCK PURCHASE CONTRACTS

We may issue stock purchase contracts, representing contracts entitling or obligating holders to purchase from us, and us to sell to the holders, a specified number of shares or amount of common stock at a future date or dates. The price per share of common stock may be fixed at the time each contract is issued or may be determined by reference to a specific formula set forth in the contract. Each common stock purchase contract may be issued separately or as a part of a unit, each consisting of a common stock purchase contract and, as security for the holder's obligation to purchase the common stock under the contract, the following:

- our senior debt securities or subordinated debt securities described under "Description of Debt Securities;"
- debt obligations of third parties, including U.S. Treasury securities;
- any other asset as security described in the applicable prospectus supplement; or
- any combination of the foregoing.

Each common stock purchase contract may require us to make periodic payments to the holder of the unit or vice versa, and such payments may be unsecured or prefunded on some basis discussed in the applicable prospectus supplement. Each common stock purchase contract may require holders to secure their obligations thereunder in a specified manner and, in certain circumstances, we may deliver a newly issued prepaid common stock purchase contract, which is referred to as a "prepaid security," upon release to a holder of any collateral securing such holder's obligations under the original contract.

The applicable prospectus supplement will describe the terms of any common stock purchase contract and, if applicable, prepaid security. The description in the prospectus supplement will not purport to be complete
and will be qualified in its entirety by reference to the contracts, the collateral arrangements and depositary arrangements, if applicable, relating to such contracts and, if applicable, the prepaid securities and the documents pursuant to which such prepaid securities will be issued. The applicable prospectus supplement will also describe the material United States federal income tax considerations applicable to the common stock purchase contracts.

DESCRIPTION OF WARRANTS

General

The following summary of certain provisions of the warrants does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the warrant agreement that will be filed with the SEC in connection with the offering of such warrants.

We may issue warrants for the purchase of debt securities, preferred stock or common stock. Warrants may be issued independently or together with debt securities, preferred stock or common stock offered by any prospectus supplement and may be attached to or separate from any such offered securities. Each series of warrants will be issued under a separate warrant agreement to be entered into between the Company and a bank or trust company, as warrant agent. The warrant agent will act solely as the Company's agent in connection with the warrants and will not assume any obligation or relationship of agency or trust for or with any holders or beneficial owners of warrants.

Debt Warrants

The prospectus supplement relating to a particular issue of debt warrants will describe the terms of such debt warrants, including the following: (a) the title of such debt warrants; (b) the offering price for such debt warrants, if any; (c) the aggregate number of such debt warrants; (d) the designation and terms of the debt securities purchasable upon exercise of such debt warrants; (e) if applicable, the designation and terms of the debt securities with which such debt warrants are issued and the number of such debt warrants issued with each such debt security; (f) if applicable, the date from and after which such debt warrants and any debt securities issued therewith will be separately transferable; (g) the principal amount of debt securities purchasable upon exercise of a debt warrant and the price at which such principal amount of debt securities may be purchased upon exercise (which price may be payable in cash, securities, or other property); (h) the date on which the right to exercise such debt warrants shall commence and the date on which such right shall expire; (i) if applicable, the minimum or maximum amount of such debt warrants that may be exercised at any one time; (j) whether the debt warrants represented by the debt warrant certificates or debt securities that may be issued upon exercise of the debt warrants will be issued in registered or bearer form; (k) information with respect to book-entry procedures, if any; (1) the currency or currency units in which the offering price, if any, and the exercise price are payable; (m) if applicable, a discussion of material United States federal income tax considerations; (n) the anti-dilution provisions of such debt warrants, if any; (o) the redemption or call provisions, if any, applicable to such debt warrants; (p) any provisions for changes to or adjustments in the exercise price for the debt warrants and (q) any additional terms of such debt warrants, including terms, procedures, and limitations relating to the exchange and exercise of such debt warrants.

Stock Warrants

The prospectus supplement relating to any particular issue of preferred stock warrants or common stock warrants will describe the terms of such warrants, including the following: (a) the title of such warrants; (b) the offering price for such warrants, if any; (c) the aggregate number of such warrants; (d) the designation and terms of the common stock or preferred stock purchasable upon exercise of such warrants; (e) if applicable, the designation and terms of the offered securities with which such warrants are issued and the number of such warrants issued with each such offered security; (f) if applicable, the date from and after which such warrants and any offered securities issued therewith will be separately transferable; (g) the number of shares of common stock or preferred stock purchasable upon exercise of a warrant and the price at which such shares may be purchased upon exercise; (h) the date on which the right to exercise such warrants shall commence and the date on which such right shall expire; (i) if applicable, the minimum or maximum amount of such warrants that may be exercised at any one time; (j) the currency or currency units in which the offering price, if any, and the exercise price are payable, (k) if applicable, a discussion of material United States federal income tax considerations; (l) the anti-dilution provisions of such warrants, if any; (m) the redemption or call provisions, if any, applicable to such warrants; (m) any provisions for changes to or adjustments in the exercise price for the stock warrants and any additional terms of such warrants, including terms, procedures and limitations relating to the exchange and exercise of such warrants.

DESCRIPTION OF UNITS

We may, from time to time, issue units comprised of one or more of the other securities that may be offered under this prospectus, in any combination. Each unit will be issued so that the holder of the unit is also the holder of each security included in the unit. Thus, the holder of a unit will have the rights and obligations of a holder of each included security. The unit agreement under which a unit is issued may provide that the securities included in the unit may not be held or transferred separately at any time, or at any time before a specified date.

The applicable prospectus supplement will describe the terms of any unit. The description in the prospectus supplement will not purport to be complete and will be qualified in its entirety by reference to units, the collateral arrangements and depositary arrangements, if applicable, relating to such units and, if applicable, the prepaid securities and the documents pursuant to which such prepaid securities will be issued. The applicable prospectus supplement will also describe the material United States federal income tax considerations applicable to the units.

DESCRIPTION OF DEPOSITORY SHARES

We may, at our option, offer fractional shares of our preferred stock, rather than whole shares of our preferred stock. In the event we do so, we will issue receipts for depositary shares, each of which will represent a fraction (to be set forth in the prospectus supplement relating to offering of the depositary shares) of a share of the related series of preferred stock.

The shares of our preferred stock represented by depositary shares will be deposited under a deposit agreement between us and a bank or trust company selected by us having its principal office in the United States and that meets certain other requirements. Subject to the terms of the deposit agreement, each owner of a depositary share will be entitled, in proportion to the applicable fraction of a share of preferred stock, represented by the depositary share to all of the rights and preferences of the preferred stock represented by the depositary shares (including dividend, voting, redemption, conversion and liquidation rights).

The above description of depositary shares is only a summary, is not complete and is subject to, and is qualified in its entirety by the description in the applicable prospectus supplement and the provisions of the deposit agreement, which will contain the form of depository receipt. A copy of the deposit agreement will be filed with the SEC as an exhibit to or incorporated by reference in the registration statement of which this prospectus is a part.

DESCRIPTION OF DEBT SECURITIES

Please note that in this section entitled “Description of Debt Securities,” references to “we,” “us,” “ours” or “our” refer only to Aqua America, Inc. and not to its consolidated subsidiaries. Also, in this section, references to “holders” mean those who own debt securities registered in their own names, on the books that we maintain or the trustee maintains for this purpose, and not those who own beneficial interests in debt securities registered in street name or in debt securities issued in book-entry form through one or more depositaries. Owners of beneficial interests in the debt securities should read the section below entitled “Book-Entry Procedures and Settlement.”

General

The debt securities offered by this prospectus will be our unsecured obligations, except as otherwise set forth in an accompanying prospectus supplement, and will be either senior or subordinated debt. We will issue senior debt under a senior debt indenture, and we will issue subordinated debt under a subordinated debt indenture. We sometimes refer to the senior debt indenture and the subordinated debt indenture, individually, as an indenture and, collectively, as the indentures. We have filed forms of the indentures with the SEC as exhibits to the registration statement of which this prospectus forms a part.You can obtain copies of the indentures by following the directions outlined in “Where You Can Find More Information,” or by contacting the applicable indenture trustee.

A form of each debt security, reflecting the particular terms and provisions of a series of offered debt securities, will be filed with the SEC at the time of the offering and incorporated by reference as exhibits to the registration statement of which this prospectus forms a part.

The following briefly summarizes certain material provisions that may be included in the indentures. Other terms, including pricing and related terms, will be disclosed for a particular issuance in an accompanying prospectus supplement. You should read the more detailed provisions of the applicable indenture, including the defined terms, for provisions that may be important to you. You should also read the particular terms of a series of debt securities, which will be described in more detail in an accompanying prospectus supplement. So that you may easily locate the more detailed provisions, the numbers in parentheses below refer to sections in the applicable indenture or, if no indenture is specified, to sections in each of the indentures. Wherever particular sections or defined terms of the applicable indenture are referred to, such sections or defined terms are incorporated into this prospectus by reference, and the statement in this prospectus is qualified by that reference.

The trustee under each indenture will be determined at the time of issuance of debt securities, and the name of the trustee will be provided in an accompanying prospectus supplement.

The indentures provide that our senior or subordinated debt securities may be issued in one or more series, with different terms, in each case as we authorize from time to time. We also have the right to "reopen" a previous issue of a series of debt securities by issuing additional debt securities of such series without the consent of the holders of debt securities of the series being reopened or any other series. Any additional debt securities of the series being reopened will have the same ranking, interest rate, maturity and other terms as the previously issued debt securities of that series. These additional debt securities, together with the previously issued debt securities of that series, will constitute a single series of debt securities under the terms of the applicable indenture.

Types of Debt Securities

We may issue fixed or floating rate debt securities. Fixed rate debt securities will bear interest at a fixed rate described in the prospectus supplement. This type includes zero coupon debt securities, which bear no interest and are often issued at a price lower than the principal amount. United States federal income tax consequences and other special considerations applicable to any debt securities issued at a discount will be described in the applicable prospectus supplement.

Upon the request of the holder of any floating rate debt security, the calculation agent will provide the interest rate then in effect for that debt security, and, if determined, the interest rate that will become effective on the next interest reset date. The calculation agent's determination of any interest rate, and its calculation of the amount of interest for any interest period, will be final and binding in the absence of manifest error.

All percentages resulting from any interest rate calculation relating to a debt security will be rounded upward or downward, as appropriate, to the next higher or lower one hundred-thousandth of a percentage point.

All amounts used in or resulting from any calculation relating to a debt security will be rounded upward or downward, as appropriate, to the nearest cent, in the case of U.S. dollars, or to the nearest corresponding hundredth of a unit, in the case of a currency other than U.S. dollars, with one-half cent or one-half of a corresponding hundredth of a unit or more being rounded upward.

In determining the base rate that applies to a floating rate debt security during a particular interest period, the calculation agent may obtain rate quotes from various banks or dealers active in the relevant market, as described in the prospectus supplement. Those reference banks and dealers may include the calculation agent itself and its affiliates, as well as any underwriter, dealer or agent participating in the distribution of the relevant floating rate debt securities and its affiliates.

Information in the Prospectus Supplement

The prospectus supplement for any offered series of debt securities will describe the following terms, as applicable:

- the title;
- whether the debt is senior or subordinated;
- whether the debt securities are secured or unsecured and, if secured, the collateral securing the debt;
- the total principal amount offered;
- the percentage of the principal amount at which the debt securities will be sold and, if applicable, the method of determining the price;
- the maturity date or dates;
- whether the debt securities are fixed rate debt securities or floating rate debt securities;
- if the debt securities are fixed rate debt securities, the yearly rate at which the debt security will bear interest, if any, and the interest payment dates;
- if the debt security is an original issue discount debtsecurity, the yield to maturity;
- if the debt securities are floating rate debt securities, the interest rate basis; any applicable index currency or maturity, spread or spread multiplier or initial, maximum or minimum rate; the interest reset, determination, calculation and payment dates, and the day count used to calculate interest payments for any period;
- the date or dates from which any interest will accrue, or how such date or dates will be determined, and the interest payment dates and any related record dates;
- if other than in U.S. dollars, the currency or currency unit in which payment will be made;
- the denominations in which the currency or currency unit of the securities will be issuable if other than denominations of $1,000 and integral multiples thereof;
- the terms and conditions on which the debt securities may be redeemed at our option;
- any obligation we may have to redeem, purchase or repay the debt securities at the option of a holder upon the happening of any event and the terms and conditions of redemption, purchase or repayment;
- the names and duties of the trustee and any co-trustees, depositaries, authenticating agents, calculation agents, paying agents, transfer agents or registrars for the debt securities;
- any material provisions of the applicable indenture described in this prospectus that do not apply tothe debt securities;
- a discussion of United States federal income tax, accounting and special considerations, procedures and limitations with respect to the debt securities;

- whether and under what circumstances we will pay additional amounts to holders in respect of any tax assessment or government charge, and, if so, whether we will have the option to redeem the debt securities rather than pay such additional amounts; and

- any other specific terms of the debt securities that are consistent with the provisions of the indenture.

The terms on which a series of debt securities may be convertible into or exchangeable for other of our securities or any other entity will be set forth in the prospectus supplement relating to such series. Such terms will include provisions as to whether conversion or exchange is mandatory, at the option of the holder or at our option. The terms may include provisions pursuant to which the number of other securities to be received by the holders of such series of debt securities may be adjusted.

We will issue the debt securities only in registered form. As currently anticipated, debt securities of a series will trade in book-entry form, and global notes will be issued in physical (paper) form, as described below under "Book-Entry Procedures and Settlement." Unless otherwise provided in the accompanying prospectus supplement, we will issue debt securities denominated in U.S. dollars and only in denominations of $1,000 and integral multiples thereof.

The prospectus supplement relating to offered debt securities denominated in a foreign or composite currency will specify the denomination of the offered debt securities.

The debt securities may be presented for exchange, and debt securities other than a global security may be presented for registration of transfer, at the principal corporate trust office of the trustee named in the applicable prospectus supplement. Holders will not have to pay any service charge for any registration of transfer or exchange of debt securities, but we may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection with such registration of transfer (Section 3.05).

Payment and Paying Agents

Distributions on the debt securities other than those represented by global notes will be made in the designated currency against surrender of the debt securities at the principal corporate trust office of the trustee named in the applicable prospectus supplement. Payment will be made to the registered holder at the close of business on the record date for such payment. Interest payments will be made at the principal corporate trust office of the trustee named in the applicable prospectus supplement, or by a check mailed to the holder at his registered address. Payments in any other manner will be specified in the applicable prospectus supplement.

Calculation Agents

Calculations relating to floating rate debt securities and indexed debt securities will be made by the calculation agent, an institution that we appoint as our agent for this purpose. We may appoint one of our affiliates as calculation agent.We may appoint a different institution to serve as calculation agent from time to time after the original issue date of the debt security without your consent and without notifying you of the change. The initial calculation agent will be identified in the applicable prospectus supplement.

Senior Debt

We may issue senior debt securities under the senior debt indenture. Senior debt will constitute our unsecured and unsubordinated obligations and will rank on a basis equal in priority with all our other unsecured and unsubordinated debt.

Subordinated Debt

We may issue subordinated debt securities under the subordinated debt indenture. Subordinated debt will constitute our unsecured and subordinated obligations and will be junior in right of payment to our senior debt (including senior debt securities), which is defined as "senior indebtedness" in the subordinated debt indenture (Section 16.01).

If we default in the payment of any principal of, or premium, ifany, or interest on any senior debt when it becomes due and payable after any applicable grace period, then, unless and until the default is cured or waived or ceases to exist, we cannot make a payment on account of or redeem or otherwise acquire the subordinated debt securities (Section 16.04).

If there is any insolvency, bankruptcy, liquidation or other similar proceeding relating to us or our property, then all senior debt must be paid in full before any payment may be made to any holders of subordinated debt securities (Section 16.02).

Furthermore, if we default in the payment of the principal of and accrued interest on any subordinated debt securities that is declared due and payable upon an event of default under the subordinated debt indenture, holders of all our senior debt will first be entitled to receive payment in full in cash before holders of such subordinated debt can receive any payments (Section 16.03).

Except as may be otherwise set forth in an accompanying prospectus supplement, senior debt means:

- the principal, premium, if any, and interest in respect of indebtedness for money borrowed and indebtedness evidenced by securities, notes, debentures, bonds or other similar instruments issued, including, as to us, the senior debt securities;
- all capitalized lease obligations;
- all obligations representing the deferred purchase price of property; and
- all deferrals, renewals, extensions and refundings of obligations of the type referred to above (Section 1.01 of Subordinated Indenture).

However, senior debt does not include:

- the subordinated debt securities (Section 16.01 of Subordinated Indenture);
- any indebtedness that by its terms is subordinated to, or ranks in priority on an equal basis with, subordinated debt securities (Section 1.01 of Subordinated Indenture); and
- items of indebtedness (other than capitalized lease obligations) that would not appear as liabilities on a balance sheet prepared in accordance with accounting principles generally accepted in the United States of America.

Covenants

The accompanying prospectus supplement will contain any covenants applicable to the debt securities.

Modification of the Indentures

The indentures will provide that we and the relevant trustee may enter into supplemental indentures to establish the form and terms of any new series of debt securities without obtaining the consent of any holder of debt securities (Section 9.01).

We and the trustee may, with the consent of the holders of at least a majority in aggregate outstanding principal amount of the debt securities of a series, modify the applicable indenture or the rights of the holders of the securities of such series (Section 9.02).

No such modification may, without the consent of each holder of an affected security:

- extend the fixed maturity of any such security;
- reduce the rate or change the time of payment of interest on such security;
- reduce the principal amount of such securities or the premium, if any, on such security;
- change any obligation of ours to pay additional amounts with respect to such security;
- reduce the amount of the principal payable on acceleration of such security if issued originally at a discount;
- adversely affect the right of repayment or repurchase of such security at the option of the holder;
- reduce or postpone any sinking fund or similar provision with respect to such security;
- change the currency or currency unit in which such security is payable or the right of selection thereof;
- impair the right to sue for the enforcement of any payment with respect to such security on or after the maturity of such security;
- reduce the percentage of the aggregate outstanding principal amount of debt securities of the series referred to above whose holders need to consent to the modification or a waiver without the consent of such holders; or
- change any obligation of ours with respect to such security to maintain an office or agency.

Defaults

Except as may be otherwise set forth in an accompanying prospectus supplement, each indenture will provide that events of default regarding any series of debt securities will be:

- our failure to pay for 30 days required interest on any debt security of such series;
- our failure to pay principal or premium, if any, on any debt security of such series when due;
- our failure to make any required scheduled installment payment for 30 days on debt securities of such series;

- our failure to perform for 90 days after notice any other covenant in the relevant indenture otherthan a covenant included in the relevant indenture solely for the benefit of a series of debt securities other than such series; and

- certain events of bankruptcy or insolvency, whether voluntary or not (Section 5.01).

Except as may be otherwise set forth in an accompanying prospectus supplement, if an event of default regarding debt securities of any series issued under the indentures should occur and be continuing, either the trustee or the holders of 25% in the principal amount of outstanding debt securities of such series may declare each debt security of that series due and payable (Section 5.02). We may be required to file annually with the trustee a statement of an officer as to the fulfillment by us of our obligations under the indenture during the preceding year.

No event of default regarding one series of debt securities issued under an indenture is necessarily an event of default regarding any other series of debt securities.

Holders of a majority in aggregate principal amount of the outstanding debt securities of any series will be entitled to control certain actions of the trustee under the indentures and to waive past defaults regarding such series (Sections 5.12 and 5.13). The holders of debt securities generally will not be able to require the trustee to take any action, unless one or more of such holders provides to the trustee reasonable security or indemnity (Section 6.02).

If an event of default occurs and is continuing regarding a series of debt securities, the trustee may use any sums that it holds under the relevant indenture for its own reasonable compensation and expenses incurred prior to paying the holders of debt securities of such series (Section 5.06).

Before any holder of any series of debt securities may institute action for any remedy, except payment on such holder's debt security when due, the holders of not less than 25% in principal amount of the debt securities of that series outstanding must request the trustee to take action. Holders must also offer and give the satisfactory security and indemnity against liabilities incurred by the trustee for taking such action (Section 5.07).

Defeasance

Except as may otherwise be set forth in an accompanying prospectus supplement, after we have deposited with the trustee, cash or government securities, in trust for the benefit of the holders sufficient to pay the principal of, premium, if any, and interest on the debt securities of such series when due, and satisfied certain other conditions, including receipt of an opinion of counsel that holders will not recognize taxable gain or loss for United States federal income tax purposes, then:

- we will be deemed to have paid and satisfied our obligations on all outstanding debt securities of such series, which is known as defeasance and discharge (Section 14.02); or

- we will cease to be under any obligation, other than to pay when due the principal of, premium, if any, and interest on such debt securities, relating to the debt securities of such series, which is known as covenant defeasance (Section 14.03).

When there is a defeasance and discharge, the applicable indenture will no longer govern the debt securities of such series, we will no longer be liable for payments required by the terms of the debt securities of such series and the holders of such debt securities will be entitled only to the deposited funds. When there is a covenant defeasance, however, we will continue to be obligated to make payments when due if the deposited funds are not sufficient.

Governing Law

Unless otherwise stated in the prospectus supplement, the debt securities and the indentures will be governed by Pennsylvania law (Section 1.12).

Concerning the Trustee Under the Indentures

We may have banking and other business relationships with the trustee named in the prospectus supplement, or any subsequent trustee, in the ordinary course of business.

Form, Exchange and Transfer

We will issue debt securities only in registered form; no debt securities will be issued in bearer form (Section 2.03). We will issue each debt security in book-entry form only, unless otherwise specified in the applicable prospectus supplement. We will issue any common stock issuable upon conversion of any debt security being offered in both certificated and book-entry form, unless otherwise specified in the applicable prospectus supplement. Debt securities in book-entry form will be represented by a global security registered in the name of a depositary, which will be the holder of all the debt securities represented by the global security (Section 2.04). Those who own beneficial interests in a global security will do so through participants in the depositary's system, and the rights of these indirect owners will be governed solely by the applicable procedures of the depositary and its participants. Only the depositary will be entitled to transfer or exchange a debt security in global form, since it will be the sole holder of the debt security (Section 3.05). These book-entry securities are described below under "Book-Entry Procedures and Settlement."

If any debt securities are issued in non-global form or cease to be book-entry securities (in the circumstances described in the next section), the following will apply to them:

- The debt securities will be issued in fully registered form in denominations stated in the prospectus supplement. You may exchange debt securities for debt securities of the same series in smaller denominations or combined into fewer debt securities of the same series of larger denominations, as long as the total amount is not changed (Section 3.05).

- You may exchange, transfer, present for payment or exercise debt securities at the office of the relevant trustee or agent indicated in the prospectus supplement (Section 3.05). You may also replace lost, stolen, destroyed or mutilated debt securities at that office. We may appoint another entity to perform these functions or may perform them (Section 3.06).

- You will not be required to pay a service charge to transfer or exchange the debt securities, but you may be required to pay any tax or other governmental charge associated with the transfer or exchange (Sections 3.05 and 3.06). The transfer or exchange, and any replacement, will be made only if our transfer agent is satisfied with your proof of legal ownership. The transfer agent may also require an indemnity before replacing any debt securities (Section 3.06).

- If we have the right to redeem, accelerate or settle any debt securities before their maturity or expiration, and we exercise that right as to less than all those debt securities, we may block the transfer or exchange of those debt securities during the period beginning 15 days before the day we mail the notice of exercise and ending on the day of that mailing, in order to freeze the list of holders to prepare the mailing. We may also refuse to register transfers of or exchange any debt security selected for early settlement, except that we will continue to permit transfers and exchanges of the unsettled portion of any debt security being partially settled (Section 3.05).

- If fewer than all of the debt securities represented by a certificate that are payable or exercisable in part are presented for payment or exercise, a new certificate will be issued for the remaining amount of securities (Section 15.02).

Book-Entry Procedures and Settlement

Most offered debt securities will be book-entry (global) securities. Upon issuance, all book-entry securities will be represented by one or more fully registered global securities, without coupons (Section 3.02). Each global security will be deposited with, or on behalf of, The Depository Trust Company, or DTC, a securities depository, and will be registered in the name of DTC or a nominee of DTC (Section 3.01). DTC will thus be the only registered holder of these debt securities.

Purchasers of debt securities may only hold interests in the global notes through DTC if they are participants in the DTC system. Purchasers may also hold interests through a securities intermediary—banks, brokerage houses and other institutions that maintain securities accounts for customers—that has an account with DTC or its nominee. DTC will maintain accounts showing the security holdings of its participants, and these participants will in turn maintain accounts showing the security holdings of their customers. Some of these customers may themselves be securities intermediaries holding securities for their customers. Thus, each beneficial owner of a book-entry security will hold that debt security indirectly through a hierarchy of intermediaries, with DTC at the top and the beneficial owner's own securities intermediary at the bottom.

The debt securities of each beneficial owner of a book-entry security will be evidenced solely by entries on the books of the beneficial owner's securities intermediary. The actual purchaser of the debt securities will generally not be entitled to have the debt securities represented by the global securities registered in its name and will not be considered the owner under the declaration. In most cases, a beneficial owner will also not be able to obtain a paper certificate evidencing the holder's ownership of debt securities. The book-entry system for holding securities eliminates the need for physical movement of certificates and is the system through which most publicly traded common stock is held in the United States. However, the laws of some jurisdictions require some purchasers of securities to take physical delivery of their securities in definitive form. These laws may impair the ability to transfer book-entry securities.

A beneficial owner of book-entry securities represented by a global security may exchange the securities for definitive (paper) securities only if:

- DTC is unwilling or unable to continue as depositary for such global security and we do not appoint a qualified replacement for DTC within 90 days; or

- We in our sole discretion decide to allow some or all book-entry securities to be exchangeable for definitive securities in registered form (Section 3.05).

Unless we indicate otherwise, any global security that is exchangeable will be exchangeable in whole for definitive securities in registered form, with the same terms and of an equal aggregate principal amount. Definitive securities will be registered in the name or names of the person or persons specified by DTC in a written instruction to the registrar of the securities (Section 3.05). DTC may base its written instruction upon directions that it receives from its participants.

In this prospectus, for book-entry securities, references to actions taken by security holders will mean actions taken by DTC upon instructions from its participants, and references to payments and notices of redemption to security holders will mean payments and notices of redemption to DTC as the registered holder of the securities for distribution to participants in accordance with DTC's procedures.

DTC is a limited purpose trust company organized under the laws of the State of New York, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code and a clearing agency registered under section 17A of the Securities Exchange Act of 1934. The rules applicable to DTC and its participants are on file with the SEC.

We will not have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial ownership interest in the book-entry securities or for maintaining, supervising or reviewing any records relating to the beneficial ownership interests.

PLAN OF DISTRIBUTION

We may sell any of the securities being offered by this prospectus separately or together:

- through agents;
- to or through underwriters who may act directly or through a syndicate represented by one or more managing underwriters;
- through dealers;
- through a block trade in which the broker or dealer engaged to handle the block trade will attempt to sell the securities as agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- through "at the market" offerings, within the meaning of Rule 415(a)(4) of the Securities Act of 1933, to or through a market maker or into an existing trading market on an exchange or otherwise;
- in exchange for our outstanding indebtedness;
- directly to purchasers, through a specific bidding, auction or other process; or
- through a combination of any of these methods of sale.

If the securities offered under this prospectus are issued in exchange for our outstanding securities, the applicable prospectus supplement will describe the terms of the exchange, and the identity and the terms of sale of the securities offered under this prospectus by the selling security holders.

The distribution of securities may be effected from time to time in one or more transactions at a fixed price or prices that may be changed, at market prices prevailing at the time of sale or prices related to prevailing market prices or at negotiated prices.

Agents designated by us from time to time may solicit offers to purchase the securities. We will name any agent involved in the offer or sale of the securities and set forth any commissions payable by us to an agent in the prospectus supplement for that transaction. Unless otherwise indicated in the prospectus supplement, any agent will be acting on a best efforts basis for the period of its appointment. Any agent may be deemed to be an "underwriter" of the securities as that term is defined in the Securities Act of 1933.

If we utilize an underwriter or underwriters in the sale of securities, we will execute an underwriting agreement with the underwriter or underwriters at the time we reach an agreement for sale. We will set forth in the prospectus supplement the names of the specific managing underwriter or underwriters, as well as any other underwriters, and the terms of the transactions, including compensation of the underwriters and dealers. This compensation may be in the form of discounts, concessions or commissions. Underwriters and others participating in any offering of securities may engage in transactions that stabilize, maintain or otherwise affect the price of securities. We will describe any of these activities in the prospectus supplement.

If a dealer is utilized in the sale of the securities, we or an underwriter will sell securities to the dealer, as principal. The dealer may then resell the securities to the public at varying prices to be determined by the dealer at the time of resale. The prospectus supplement will set forth the name of the dealer and the terms of the transactions.

We may directly solicit offers to purchase the securities, and we may sell directly to institutional investors or others. These persons may be deemed to be underwriters within the meaning of the Securities Act of 1933 with respect to any resale of the securities. The prospectus supplement will describe the terms of any direct sales, including the terms of any bidding or auction process, if utilized.

Agreements we enter into with agents, underwriters and dealers may entitle them to indemnification by us against specified liabilities, including liabilities under the Securities Act of 1933, or to contribution by us to payments they may be required to make in respect of these liabilities. The prospectus supplement will describe the terms and conditions of indemnification or contribution.

Certain of the agents, underwriters and dealers that we sell the securities offered under this prospectus to or through, and certain of their affiliates, engage in transactions with and perform services for us in the ordinary course of business. We may enter into hedging transactions in connection with any particular issue of the securities offered under this prospectus, including forwards, futures, options, interest rate or exchange rate swaps and repurchase or reverse repurchase transactions with, or arranged by, the applicable agent, underwriter or dealer, an affiliate of that agent, underwriter or dealer or an unrelated entity. We, the applicable agent, underwriter or dealer or other parties may receive compensation, trading gain or other benefits in connection with these transactions. We are not required to engage in any of these transactions. If we commence these transactions, we may discontinue them at any time. Counterparties to these hedging activities also may engage in market transactions involving the securities offered under this prospectus.

No securities may be sold under this prospectus without delivery (in paper format, in electronic format, in electronic format on the Internet, or by other means) of the applicable prospectus supplement describing the method and terms of the offering.

LEGAL MATTERS

Unless otherwise indicated in the applicable prospectus supplement, the validity of the securities that may be offered hereby will be passed upon for us by Ballard Spahr LLP, Philadelphia, Pennsylvania. If legal matters in connection with the offering made by this prospectus are passed on by counsel for the underwriters, dealers or agents, if any, that counsel will be named in the applicable prospectus supplement.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this Prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2017, have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file at the SEC's Public Reference Room at 100 F Street N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the Public Reference Room. You may also obtain our SEC filings from the SEC's website at www.sec.gov or from our website at http:// ir.aquaamerica.com/.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act of 1933 relating to the securities that may be offered by this prospectus. This prospectus is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 until we sell all of the securities covered by this prospectus; provided, however, that we are not incorporating, in each case, any documents or information deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2017 filed with the SEC on February 28, 2018; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Aqua America, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000
Attention: Corporate Secretary

You should rely only on the information contained in or incorporated by reference in this prospectus and any supplements to this prospectus.We have not authorized anyone to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. You should not assume that the information provided in this prospectus or incorporated by reference in this prospectus is accurate as of any date other than the date on the front of this prospectus or the date of those documents. Our business, financial condition, results of operations and prospects may have changed since those dates.

If you find inconsistencies between the documents, or between the documents and this prospectus or the applicable prospectus supplement, you should rely on the most recent document, prospectus or prospectus supplement.

April 17, 2019

Filed Pursuant to Rule 424(b)(5)
Registration No. 333-223306

Title of Each Class of Securities to be Registered	Amount to be Registered[(1)]	Maximum Offering Price per Unit	Maximum Aggregate Offering Price[(1)]	Amount of Registration Fee[(2)]
6.00% Tangible Equity Units	13,800,000	$50.00	$690,000,000	$83,628

(1) Assumes full exercise of the underwriters' option to purchase up to an additional 1,800,000 6.00% Tangible Equity Units, solely to cover over-allotments, if any.

(2) Calculated in accordance with Rule 457(r) of the Securities Act of 1933, as amended.

Prospectus Supplement
(To Prospectus dated February 28, 2018)

AQUA AMERICA, INC.

12,000,000 6.00% TANGIBLE EQUITY UNITS

We are offering 12,000,000 6.00% tangible equity units, or "Units." Each Unit has a stated amount of $50.00. Each Unit is comprised of (i) a prepaid stock purchase contract issued by us and (ii) a senior amortizing note due April 30, 2022 issued by us. Each amortizing note will have an initial principal amount of $8.62909 and a final installment payment date of April 30, 2022.

Unless earlier redeemed by us or settled earlier at your option or at our option as described herein, on April 30, 2022 (subject to postponement in certain limited circumstances), each purchase contract will automatically settle, and we will deliver a number of shares of our common stock, par value $0.50 per share, per purchase contract based on the applicable market value (as defined herein) of our common stock as set forth below:

- if the applicable market value is greater than the threshold appreciation price, which is approximately $42.41, you will receive 1.1790 shares per purchase contract;
- if the applicable market value is less than or equal to the threshold appreciation price but greater than or equal to the reference price, which is approximately $34.62, you will receive a number of shares per purchase contract having a value, based on the applicable market value, equal to $50.00, divided by the applicable market value; and
- if the applicable market value is less than the reference price, you will receive 1.4442 shares per purchase contract.

At any time prior to the second scheduled trading day immediately preceding April 30, 2022, you may settle your purchase contracts early, and we will deliver 1.1790 shares of our common stock per purchase contract (subject to adjustment). In addition, if a "fundamental change" (as defined herein) occurs and you elect to settle your purchase contracts early in connection with such fundamental change, you will receive a number of shares of our common stock per purchase contract equal to the fundamental change early settlement rate, as described herein. We may elect to settle all, but not less than all, outstanding purchase contracts on or after January 30, 2020 and prior to April 30, 2022 at the "early mandatory settlement rate" (as defined herein). If the closing of the Acquisition (as defined below) has not occurred on or prior to April 22, 2020, or if, prior to such date, the Acquisition Agreement (as defined herein) is terminated, we may elect to redeem all, but not less than all, outstanding purchase contracts at the "redemption amount" (as defined herein), by delivering notice to all holders during the five business day period immediately following the earlier of (x) April 22, 2020 if the closing of the Acquisition has not occurred on or prior to such date and (y) the date on which the Acquisition Agreement is terminated.

The amortizing notes will pay you equal quarterly cash installments of $0.75000 per amortizing note (except for the July 30, 2019 installment payment, which will be $0.80833 per amortizing note), which cash payment in the aggregate will be equivalent to 6.00% per year with respect to each $50.00 stated amount of Units. The amortizing notes will be our general unsecured senior obligations and will rank equally with all of our other existing and future unsecured senior indebtedness from time to time outstanding. If we elect to redeem the purchase contracts or to settle the purchase contracts early, you will have the right to require us to repurchase your amortizing notes. Other than cash payments in lieu of fractional shares or, under certain circumstances, in the event of an acquisition termination redemption, holders of purchase contracts will not receive any cash distributions.

Our common stock is listed on the New York Stock Exchange ("NYSE") under the symbol "WTR." On April 17, 2019, the last reported sale price of our common stock on the NYSE was $34.82 per share. We have applied to list the Units on the NYSE under the symbol "WTRU," subject to satisfaction of its minimum listing standards with respect to the Units. If the Units are approved for listing, we expect trading on the NYSE to begin within 30 calendar days after the Units are first issued. We will not initially apply to list the separate purchase contracts or the separate amortizing notes on any securities exchange or automated inter-dealer quotation system, but we may apply to list such separate purchase contracts and separate amortizing notes in the future as described herein. Prior to this offering, there has been no public market for the Units.

We intend to use the net proceeds from this offering, together with the net proceeds from the other Financing Transactions (as defined herein), to (1) fund the acquisition (the "Acquisition") of all of the issued and outstanding limited liability company membership interests of LDC Funding LLC ("LDC"), the parent of a group of natural gas public utility companies (collectively with LDC, "Peoples"), (2) complete the Company Debt Refinancing (as defined herein) and (3) pay related costs and expenses. This offering is not conditioned upon the consummation of the Acquisition. If the Acquisition is not consummated, we intend to use the net proceeds from this offering, after payment of any cash redemption amount and/or repurchase price (if applicable), for general corporate purposes, which may include the Company Debt Refinancing, the redemption of securities issued in connection with the other Financing Transactions, repurchases of our common stock, debt repayment, capital expenditures and investments. See "Use of Proceeds."

Concurrently with this offering of Units, we have commenced the Common Stock Offering (as defined herein), which is being made by means of a separate prospectus supplement and not by means of this prospectus supplement. This offering is not conditioned upon the completion of the other Financing Transactions, including the Common Stock Offering. This prospectus supplement is not an offer to sell or a solicitation of an offer to buy any securities offered in any of the other Financing Transactions.

Investing in the Units involves risks. See "Risk Factors" on page S-18 of this prospectus supplement, page 6 of the accompanying prospectus and in

the documents we incorporate by reference in this prospectus supplement and the accompanying prospectus.

	Per Unit	Total[(1)]
Public Offering Price	$ 50.00	$600,000,000
Underwriting Discount	$ 1.125	$ 13,500,000
Proceeds, before expenses, to Aqua America	$ 48.875	$586,500,000

(1) Assumes no exercise of the underwriters' option to purchase additional Units, described below.

We have granted the underwriters an option to purchase, within 13 days beginning on, and including, the date of the initial issuance of the Units, up to an additional 1,800,000 Units at the price to public less the underwriting discount solely to cover over-allotments.

Neither the U.S. Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus supplement or the accompanying prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the Units to purchasers on or about April 23, 2019.

ABOUT THIS PROSPECTUS SUPPLEMENT

Unless otherwise specified or the context requires otherwise, references in this prospectus supplement to (1) "Aqua America," the "Company," "we," "us," "our" and similar references refer to Aqua America, Inc. and its subsidiaries prior to the proposed Acquisition, (2) the "combined company" refers to Aqua America and its subsidiaries after completion of the Acquisition (as defined herein) and (3) "this offering" refers to this offering of the Units pursuant to this prospectus supplement and the accompanying prospectus.

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering of Units and also adds to and updates information contained in the accompanying prospectus and the documents incorporated by reference in the accompanying prospectus. The second part is the accompanying prospectus, which gives more general information about us, some of which does not apply to this offering of Units. To the extent the information in this prospectus supplement is inconsistent with the information in the accompanying prospectus, you should rely on the information in this prospectus supplement.

We have not, and the underwriters have not, authorized anyone to provide you with any information other than that contained or incorporated by reference in this prospectus supplement, the accompanying prospectus or in any free writing prospectus we may provide to you in connection with this offering. Neither we nor the underwriters take any responsibility for, or provide any assurances as to the reliability of, any additional or different information that others may give you. Neither we nor the underwriters are offering to sell the Units or seeking offers to buy the Units in jurisdictions where offers or sales are not permitted. You should assume that the information contained in this prospectus supplement, the accompanying prospectus and any related free writing prospectus is accurate only as of their respective dates or as of the respective dates specified in such information, as applicable, and the information contained in documents incorporated by reference is accurate only as of the respective dates of those documents or as of the respective dates specified in such information, as applicable, in each case regardless of the time of delivery of this prospectus supplement or the accompanying prospectus or any such free writing prospectus or any sale of the Units. Our business, financial condition, results of operations and prospects may have changed since those dates.

The distribution of this prospectus supplement, the accompanying prospectus and any related free writing prospectus and the offering of the Units in certain jurisdictions may be restricted by law. Persons into whose possession this prospectus supplement, the accompanying prospectus and any such free writing prospectus come should inform themselves about and observe any such restrictions. This prospectus supplement, the accompanying prospectus and any such free writing prospectus do not constitute, and may not be used in connection with, an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorized or in which the person making such offer or solicitation is not qualified to do so or to any person to whom it is unlawful to make such offer or solicitation. See "Underwriting."

BASIS OF PRESENTATION

Unless otherwise specified or the context requires otherwise, the information in this prospectus supplement and the accompanying prospectus, including the documents incorporated by reference herein or therein, (1) does not give effect to any of the Transactions (as defined below), (2) when giving effect to this offering or the Common Stock Offering, assumes that the underwriters for this offering and the underwriters for the Common Stock Offering do not exercise their respective options to purchase additional Units or additional shares of our common stock, respectively, from us and (3) when giving effect to the Acquisition, assumes there are no adjustments to the Default Cash Acquisition Consideration (as defined herein) and that the Cash Acquisition Consideration (as defined herein) will therefore be $4.275 billion.

Although (1) the Acquisition has not yet occurred and, if completed, will not occur until after the closing of this offering, (2) this offering and certain of the other Financing Transactions are not contingent upon the completion of the other Financing Transactions, the Acquisition or the Company Debt Refinancing and (3) the indebtedness or other securities to be incurred or issued in certain of the Financing Transactions may not be incurred or issued, or may be redeemed, repaid, or repurchased, if the Acquisition is not consummated or is not consummated by a specified date, the pro forma and certain of the as adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus gives pro forma effect to the Acquisition, the Company Debt Refinancing and the Financing Transactions as if we had completed all such transactions as of December 31, 2018, in the case of balance sheet data, and as of January 1, 2018, in the case of income statement data, unless otherwise specified. The pro forma financial information included or incorporated by reference in this prospectus supplement does not, unless otherwise stated, give effect to our expected issuance of $150 million of the Debt Financing, because we intend to use that portion of the Debt Financing for general corporate purposes, including working capital and capital needs. See "Use of Proceeds." Moreover, the unaudited pro forma consolidated combined financial information included in our Current Report on Form 8-K/A filed with the U.S. Securities and Exchange Commission (the "SEC") on April 15, 2019, which is incorporated by reference in this prospectus supplement and the accompanying prospectus and may be obtained as described in this prospectus supplement under the heading "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," and certain pro forma and as adjusted information included in this prospectus supplement, have been calculated on the basis of assumptions made by our management at the time such information was prepared. For example, such unaudited pro forma consolidated combined financial information and other adjusted information reflects assumptions regarding (a) the amount of proceeds we will receive from, and certain pricing and other terms of, the Financing Transactions, (b) the number of securities to be issued in connection with the Financing Transactions and (c) the terms on which the Acquisition and the Company Debt Refinancing will be completed. As a result, purchasers in this offering should not place undue reliance on the pro forma and as adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus because this offering is not contingent upon completion of any of the other transactions reflected in that information.

All references to currency amounts included in this prospectus supplement are in U.S. dollars unless specifically noted otherwise.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus supplement, the accompanying prospectus and the documents they incorporate by reference contain, and any free writing prospectus we may provide to you in connection with this offering are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions. Such forward-looking statements include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increase requests;
- the availability and cost of capital financing;
- developments, trends and consolidation in the water and wastewater utility and infrastructure industries;
- dividend payment projections;
- opportunities for future acquisitions, both within and outside the water and wastewater industry, the success of pending acquisitions and the impact of future acquisitions;
- expectations regarding the proposed Acquisition, including statements regarding regulatory approvals for the Acquisition, potential financing transactions related to the Acquisition (including statements regarding the Financing Transactions and the use of proceeds therefrom, including the Company Debt Refinancing), closing of the Acquisition or the impact of the Acquisition on the Company;
- the capacity of our water supplies, water facilities and wastewater facilities;
- the impact of federal and/or state tax policies, including changes in tax laws and policies as a result of the Tax Cuts and Jobs Act of 2017, and the regulatory treatment of the effects of those policies;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient plumbing fixtures and appliances on water usage per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;

- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates and decisions regarding potential acquisitions;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;
- general economic conditions;
- acquisition-related costs and synergies;
- the sale of water and wastewater divisions; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- our ability to integrate and otherwise realize all of the anticipated benefits of businesses, technologies or services which we may acquire;
- our ability to manage the expansion of our business, including our ability to manage our expanded operations following the closing of the Acquisition;
- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- our ability to treat and supply water or collect and treat wastewater;
- Peoples's ability to transport, distribute and store natural gas;
- the profitability of future acquisitions;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- conditions to the completion of the Acquisition may not be satisfied or waived on a timely basis, or at all;

- the decisions of governmental and regulatory bodies, including decisions on rate increase requests and decisions regarding potential acquisitions;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions and seasonality effects;
- changes in, or unanticipated, capital requirements;
- changes in our credit ratings or the market price of our common stock;
- changes in valuation of strategic ventures;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- the diversion of our management's time and resources caused by the announcement and pendency of the Acquisition;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services and commodity prices;
- civil disturbance or terroristic threats or acts;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in accounting pronouncements;
- litigation and claims;
- changes in environmental conditions, including the effects of climate change;
- restrictions on our subsidiaries' ability to make dividends and other distributions;
- restrictions and limitations that may stem from financing arrangements we enter into or assume in the future, or from the redemptions and repurchases we may undertake if the Acquisition is not consummated;
- dilution to our shareholders related to any financing transactions, including the Financing Transactions; and
- broad discretion of our management to use the net proceeds from this offering if the Acquisition is not consummated.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus supplement, the accompanying prospectus and the documents that we incorporate by reference into this prospectus supplement completely and with the understanding that our actual results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus supplement, the date of the document containing the applicable statement or the date specified in such statement, as applicable. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see "Risk Factors." We qualify all of our forward-looking statements by these cautionary statements.

Investing in the Units involves risks. You should review and consider carefully the risks, uncertainties and other factors that affect our business, financial condition and results of operations and the value of the Units and shares of our common stock, including those described in the "Business," "Risk Factors," and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections and other sections in our Annual Report on Form 10-K for the fiscal year ended December 31, 2018, and our Current Report on Form 8-K/A filed with the SEC on April 15, 2019, which are incorporated by reference in this prospectus supplement, and those described in the "Risk Factors" sections and other sections of this prospectus supplement and the accompanying prospectus. You may obtain copies of these reports and documents as described under "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference" in this prospectus supplement. These risks, uncertainties and other factors could cause you to suffer a loss of all or part of your investment in the Units. Before making an investment decision, you should carefully consider these risks, uncertainties and other factors, as well as other information contained or incorporated by reference in this prospectus supplement and the accompanying prospectus and any related free writing prospectus we may provide to you in connection with this offering. However, additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business, operations, financial condition and financial results and the value of the Units.

MARKET AND INDUSTRY DATA

This prospectus supplement, the accompanying prospectus and the documents incorporated by reference in this prospectus supplement and the accompanying prospectus include, and any free writing prospectus we may provide to you in connection with this offering may include, market, demographic and industry data and forecasts related to our business and Peoples's business that are based on or derived from sources such as independent industry publications, publicly available information, government data and other information from third parties or that have been compiled or prepared by our or Peoples's management or employees. We do not guarantee the accuracy or completeness of any of this information, and we have not independently verified any of the information provided by third-party sources.

In addition, market, demographic and industry data and forecasts involve estimates, assumptions and other uncertainties and are subject to change based on various factors, including those discussed under the heading "Risk Factors" in this prospectus supplement and under similar headings in the documents that are incorporated by reference in this prospectus supplement and the accompanying prospectus. Accordingly, you should not place undue reliance on any of this information.

SUMMARY INFORMATION

The following summary highlights, and should be read together with, the information contained elsewhere in this prospectus supplement, the accompanying prospectus and the documents incorporated by reference herein and therein. This summary may not contain all of the information that may be important to you, and you should carefully read this entire prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before making an investment decision. You may obtain a copy of the documents incorporated by reference by following the instructions in the section titled "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," in this prospectus supplement. Unless we state otherwise or the context otherwise requires, references appearing in this prospectus supplement to "Aqua America," the "Company," "we," "us" and "our" should be read to refer to Aqua America, Inc. and its subsidiaries.

Aqua America, Inc.

Aqua America, Inc., a Pennsylvania corporation, is the holding company for regulated utilities providing water or wastewater services to an estimated three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately 53% of our operating revenues and approximately 71% of our regulated segment's income for 2018. As of December 31, 2018, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania's service territory is located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC ("Aqua Infrastructure") and Aqua Resources Inc. ("Aqua Resources"). Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water service through operating and maintenance contracts with a municipal authority and another party close to our utility companies' service territory; and offers, through a third-party, water and sewer line protection solutions and repair services to households. In 2017, we completed the sale of two business units that were reported within Aqua Resources, one which installed and tested devices that prevent the contamination of potable water and another that constructed, maintained, and repaired water and wastewater systems. Additionally, during 2016, we completed the sale of business units within Aqua Resources, which provided liquid waste hauling and disposal services and inspection, and cleaning and repair of storm and sanitary wastewater lines.

Aqua America, which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth through acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of American Water Works Company, Inc.'s regulated water and wastewater operations in Ohio in 2012. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and have extended our regulated operations from southeastern Pennsylvania to include our current regulated utility operations throughout Pennsylvania and in seven other states. During 2010 through 2013, we sold our utility operations in six states, pursuant to a portfolio rationalization strategy to focus our operations in areas where we have critical mass and economic growth potential. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to pursue growth ventures in market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated businesses. On October 22, 2018, we entered into a purchase agreement to acquire a group of natural gas public utility companies that we refer to as "Peoples." Peoples serves approximately 740,000 gas utility

customers in western Pennsylvania, West Virginia, and Kentucky. See "—Recent Developments—Proposed Peoples Gas Acquisition" for additional information regarding Peoples and the Acquisition.

Our growth in revenues over the past five years is primarily a result of increases in water and wastewater rates and customer growth. The increase in our utility customer base, as shown below, has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions):

Year	Utility Customer Growth Rate
2018	2.3%
2017	1.1%
2016	1.6%
2015	1.9%
2014	1.3%

In 2018, our customer count increased by 22,741 customers, primarily due to utility systems that we acquired and organic growth. Overall, for the five-year period of 2014 through 2018, our utility customer base, adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 1.6%. During the five-year period ended December 31, 2018, our utility customer base, including customers associated with utility system acquisitions and dispositions, increased from 941,008 at January 1, 2014 to 1,005,590 at December 31, 2018. This five-year period includes the impact of the condemnation of our Fort Wayne, Indiana system in 2014, which resulted in the loss of approximately 13,000 connections.

Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010-3489, and our telephone number is 610-527-8000. Our website may be accessed at *www.aquaamerica.com*. The reference to our website is intended to be an inactive textual reference only, and the contents of our website is not incorporated by reference herein and should not be considered part of this prospectus supplement.

Our Business Strategy

Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and have extended our regulated operations from southeastern Pennsylvania to include our current regulated utility operations throughout Pennsylvania and in seven other states. We are focused on operating our businesses in a safe and efficient manner to provide exceptional service to our customers. Our key strategic priorities are as follows:

Pursue High-Quality, Low-Risk Earnings Growth

Growth in our existing water and wastewater utility business comes from both customer growth and increases in water and wastewater rates, driven by utility infrastructure investment. We expect to invest approximately $1.4 billion into our existing water utility infrastructure over the 2019-2021 timeframe including approximately $550 million in 2019. These estimates exclude planned capital expenditures by Peoples and the costs of new mains financed by advances and contributions in aid of construction. Our investment plans are supported by constructive regulatory environments in the jurisdictions in which we operate, and are expected to result in annual rate base growth over the same time period. Our regulators have a track record of setting rates and establishing terms of service that allow our regulated subsidiaries to obtain a fair and reasonable return on capital invested. Further, several of our regulators have put in place programs that incentivize prudent investments in our utility system by providing for reduced regulatory lag. For example, New Jersey allows for an infrastructure rehabilitation surcharge for water utilities, while Pennsylvania, Illinois, Ohio, Indiana and North Carolina allow for the use of an infrastructure rehabilitation surcharge for both water and wastewater utility systems. Aqua Virginia is also piloting an infrastructure rehabilitation surcharge for its water and wastewater utilities to be implemented in 2019, pursuant to the final order issued in Aqua Virginia's 2018 rate case.

In addition to our organic infrastructure investment, we expect to continue to actively explore opportunities to expand our operations through acquisitions of government-owned and regulated water and wastewater systems that provide services in areas near our existing service territories or in new service areas. With approximately 50,000 community water systems in the United States, 81% of which serve less than 3,300 customers, the water industry is the most fragmented of the major utility industries (telephone, natural gas, electric, water and wastewater). In the states where we operate regulated utilities, we believe there are approximately 14,000 community water systems of widely-varying size, with the majority of the population being served by government-owned water systems. Because of the fragmented nature of the water and wastewater utility industries, we believe that there are many potential water and wastewater system acquisition candidates throughout the United States. We believe numerous factors will drive continued consolidation of these systems, including the benefits of economies of scale, the increasing cost and complexity of environmental regulations, the need for substantial capital investment and the need for technological and managerial expertise.

Six of the states in which we operate currently have some form of fair market value legislation. This legislation allows the relevant public utility commission to utilize fair market value to set ratemaking rate base instead of the depreciated original cost of water or wastewater assets for certain qualifying municipal acquisitions. We believe that this legislation is another factor that will encourage consolidation in the water and wastewater industry, providing municipalities with an option for exiting the business if they are dealing with challenges associated with their aging, deteriorating water and wastewater assets, do not have the expertise or technical capabilities to continue to comply with ever increasing environmental regulations or simply want to focus on other community priorities. In 2018, we closed six municipal acquisitions with over 13,700 customers and over $100 million of rate base.

Maintain a Low-Risk Regulated Utility Profile

Our core skill set is operating, maintaining and growing a regulated utility platform. The vast majority of our earnings are derived from regulated utilities, and we intend to maintain our focus on regulated utility platforms. As further discussed in "—Recent Developments—Peoples Gas Acquisition—Strategic Rationale for the Acquisition," the Acquisition is consistent with this strategy. Our focus on regulated utilities has contributed to our historically stable earnings and cash flows, which forms the foundation for our dividend policy and has allowed us to raise dividends 28 times in the last 27 years.

Maintain Our Commitment to a Strong Balance Sheet

Our goal is to maintain a strong balance sheet and liquidity position in addition to solid investment grade credit ratings. We believe maintaining these objectives affords us the financial flexibility necessary to take advantage of significant growth opportunities in our regulated utility businesses.

Our Competitive Strengths

We believe that we are well-positioned to meet our obligations to customers, grow our business and create shareholder value because of the following factors:

Extensive Track Record of Operating Stable Utilities

Our earnings are principally derived from the return on investment we earn on our utility assets. We estimate that, as of December 31, 2018, our rate base was approximately $4.5 billion. We estimate that, as of December 31, 2019, assuming consummation of the Acquisition, our rate base will be approximately $7.2 billion. Of the $7.2 billion expected rate base as of December 31, 2019, we estimate that approximately 70% will be derived from water and wastewater utilities and approximately 30% will be derived from natural gas distribution. We have more than 130 years of service experience and a proven track record of operational efficiency.

Operations in Constructive Regulatory Jurisdictions

We currently have regulated utility operations in eight different states, which have collectively provided constructive regulatory environments for our utility operations, and following the Acquisition will have regulated utility operations in ten different states, which we believe will provide constructive regulatory environments for our expanded utility operations. Two of these ten states have in place rate decoupling mechanisms for water or gas utility businesses, which reduce the dependency of our revenues to the changes in the volume of managed water or natural gas that may result from fluctuations in the weather, gas consumption, water conservation, and other factors. Further, regulators in several of these states have put in place certain programs that incentivize prudent capital investments in our utility system by providing for accelerated recovery of and on capital. The regulatory framework in Pennsylvania, which accounted for approximately 71% of our Regulated segment's income for 2018, is generally considered progressive and is highly rated by Regulatory Research Associates. Pennsylvania's high rating is based on the probable level and quality of the earnings to be realized by the state's utilities as a result of regulatory, legislative and court actions, as well as the utilization of fully forecasted test years, Distribution Systems Improvement Charges and other automatic adjustment clauses that are intended to reduce the gap between the time that a capital project is completed and the recovery of costs in rates. As further discussed in "—Recent Developments —Peoples Gas Acquisition—Strategic Rationale for the Acquisition," the Acquisition would increase our presence in constructive regulatory jurisdictions, particularly in Pennsylvania.

Significant Infrastructure Needs & Core Competency in Infrastructure Investment

According to recent U.S. EPA surveys, there are approximately 50,000 community water systems and approximately 15,000 wastewater systems in the United States, a majority of which are municipally owned, and more than $740 billion will need to be spent to maintain and improve U.S. water and wastewater infrastructure over the next 20 years. We have historically leveraged our expertise in infrastructure improvement and pipeline replacement to improve safety and reliability throughout the states in which we operate. For example, over the last 15 years, our investment in pipe replacement in southeastern Pennsylvania has resulted in a 53% reduction in discolored water-quality-related service orders and a 60% reduction in main breaks. As municipalities face the challenges of replacing deteriorating infrastructure, we provide a viable and valuable solution to communities through our expertise and our economies of scale. In addition, we expect the Acquisition will introduce new infrastructure investment opportunities, as discussed in "—Recent Developments—Peoples Gas Acquisition—Strategic Rationale for the Acquisition."

Consistent History of Dividend Growth. We have paid dividends consecutively for 74 years

In 2018, our Board of Directors raised the quarterly dividend on our common stock by 7%, increasing the effective annual dividend rate to $0.876 per share, beginning with the dividend payment in September 2018. This is the 28th dividend increase in the past 27 years and the 20th consecutive year that we have increased our dividend in excess of 5%.

Experienced Management Team

Our senior management team is highly experienced in the utility industry. The team is supported by a core group of employees in leadership positions with substantial experience in the operation of regulated utility businesses. In addition, as discussed in "—Recent Developments—Peoples Gas Acquisition—Strategic Rationale for the Acquisition," the Peoples's management team has significant experience in the natural gas utility industry. Additionally, the Aqua America CEO serves on the Board of Directors of the National Association of Water Companies.

Recent Developments

Proposed Peoples Gas Acquisition

On October 22, 2018, we entered into a Purchase Agreement (the "Acquisition Agreement") with LDC Parent LLC, a Delaware limited liability company ("Seller"), to acquire all of the issued and outstanding limited liability company membership interests of LDC, the parent of a group of natural gas public utility companies including Peoples Natural Gas Company LLC, a Pennsylvania limited liability company, Peoples Gas Company LLC, a Pennsylvania limited liability company, Peoples Gas WV LLC, a West Virginia limited liability company, Peoples Gas Kentucky LLC, a Kentucky limited liability company, and Delta Natural Gas Co., Inc., a Kentucky corporation, as well as other operating subsidiaries.

The Acquisition, once consummated, will expand our regulated utility business to include natural gas distribution. The cash purchase price for the Acquisition will be an amount equal to $4.275 billion (the "Default Cash Acquisition Consideration"), subject to adjustments for working capital, certain capital expenditures, transaction expenses and closing indebtedness as set forth in the Acquisition Agreement (as so adjusted, the "Cash Acquisition Consideration"). The Company expects to assume, as a result of acquiring Peoples, approximately $1,370 million of Peoples's indebtedness upon the closing of the Acquisition, which would reduce the cash purchase price by approximately $1,370 million pursuant to the foregoing adjustments. See "—Financing Transactions" and "Use of Proceeds" for a discussion of our plans to finance the Cash Acquisition Consideration.

Closing of the Acquisition is subject to customary closing conditions set forth in the Acquisition Agreement, including, among others, (1) the absence of any law or governmental order prohibiting the consummation of the Acquisition, (2) the accuracy of the parties' representations and warranties, subject to customary materiality standards and certain other exceptions, (3) compliance in all material respects of the parties with their applicable covenants under the Acquisition Agreement, subject to certain exceptions, (4) the absence of a "material adverse effect" with respect to LDC and its subsidiaries and (5) receipt of certain regulatory approvals, including from the public utility commission in Pennsylvania and West Virginia. The closing of the Acquisition is not subject to any financing condition. We currently expect the Acquisition will close in mid-2019.

The Acquisition Agreement contains certain termination rights for each of us and Seller. The Acquisition Agreement may be terminated at any time prior to the closing of the Acquisition in the event the Acquisition is not completed by October 22, 2019 (subject to extension, on the terms set forth in the Acquisition Agreement, to April 22, 2020 in order to obtain necessary regulatory approvals) (the "Acquisition Outside Date"). However, neither we nor Seller may terminate the Acquisition Agreement pursuant to the foregoing if our or Seller's respective failure to fulfill any obligation under the Acquisition Agreement was the primary cause of the failure of the closing to occur on or before the Acquisition Outside Date. The Acquisition Agreement may also be terminated at any time prior to the closing of the Acquisition by mutual written consent of us and Seller, and in other customary circumstances. In the event that the Acquisition Agreement is terminated due to certain breaches by us, we would be required to pay a fee of $120 million to the Seller as liquidated damages.

The Acquisition and the Acquisition Agreement are described in more detail in our Current Report on Form 8-K filed with the SEC on October 23, 2018 (the "Acquisition 8-K"), which is incorporated by reference into this prospectus supplement and the accompanying prospectus. The foregoing summary description does not purport to be complete and is qualified in its entirety by reference to the complete text of the Acquisition Agreement, which was filed as Exhibit 2.1 to the Acquisition 8-K.

The Acquisition Agreement has been filed as an exhibit to our public reports filed with the SEC, and has been incorporated by reference into this prospectus supplement and the accompanying prospectus, solely to provide information to current and prospective investors and security holders regarding its terms. The Acquisition Agreement and the description of certain terms of the Acquisition Agreement appearing in this prospectus supplement and some of the documents incorporated by reference in the accompanying prospectus are not intended to provide any other factual information about Aqua America, Peoples, their respective businesses, or the actual or future conduct of their respective businesses or to modify or supplement any factual disclosures about Aqua America or Peoples included in this prospectus supplement, the accompanying prospectus or the documents incorporated by reference therein or Aqua America's other public reports. The Acquisition Agreement and any descriptions thereof should not be relied upon as representations or warranties about Aqua America or Peoples or, other than with respect to the terms of the Acquisition Agreement, as disclosure about Aqua America or Peoples. No one should rely on the representations, warranties and covenants in the Acquisition Agreement or any descriptions thereof as characterizations of the actual state of facts or conditions of Aqua America or Peoples or any of their respective subsidiaries or affiliates. The representations and warranties contained in the Acquisition Agreement are the product of negotiations among the parties thereto and that the parties made to, and solely for the benefit of, each other as of specified dates. The assertions embodied in those representations and warranties are subject to qualifications and limitations agreed to by the respective parties and are also qualified in important part by confidential disclosure schedules delivered in connection with the Acquisition Agreement. In addition, those representations and warranties were made for the purpose of allocating contractual risk between the parties to the Acquisition Agreement instead of establishing these matters as facts, and may be subject to standards of materiality used by the contracting parties that differ from those applicable to investors and security holders. Moreover, information concerning the subject matter of the representations and warranties may change after the dates contemplated by the Acquisition Agreement, which subsequent information may or may not be reflected in this prospectus supplement or the documents incorporated by reference in this prospectus supplement and the accompanying prospectus or in Aqua America's other public reports. The Acquisition Agreement and any such descriptions thereof should not be read alone, but should instead be read in conjunction with the other information regarding Aqua America or Peoples that is contained in, or incorporated by reference into, this prospectus supplement, the accompanying prospectus and the documents incorporated by reference herein and therein.

The consummation of this offering is not conditioned upon the closing of the Acquisition. There can be no assurance that the Acquisition will be consummated on the terms or by the time currently contemplated, or at all, or, if consummated, that the terms of the Acquisition, including the financing thereof and the closing date, will not differ, perhaps substantially, from those currently contemplated or described in this prospectus supplement or the documents incorporated by reference in this prospectus supplement and the accompanying prospectus. The closing of the Acquisition is subject to, among other conditions, the receipt of regulatory approval by the Pennsylvania Public Utility Commission. We filed an application for approval by the Pennsylvania Public Utility Commission, and several entities have intervened in the proceeding. The procedural schedule requires rebuttal testimony to be filed on April 30, 2019. We have initiated settlement discussions with the intervenors and those negotiations are ongoing. Whether through a settlement agreement or through a litigated proceeding, we may be required to agree to certain actions, undertakings, terms, or other measures, including those that may require increased capital or other expenditures by the Company. See "Risk Factors—Risks Related to the Acquisition and the Financing Transactions" in this prospectus supplement, "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2018 and "Risk Factors" in our Current Report on Form 8-K/A filed with the SEC on April 15, 2019 (as updated by annual, quarterly and other reports and documents we file with the SEC that are incorporated by reference in this prospectus supplement and the accompanying prospectus).

About Peoples

Headquartered in Pittsburgh, Pennsylvania, Peoples primarily engages in regulated distribution and transportation of natural gas to approximately 740,000 residential, commercial and industrial customers in Pennsylvania, West Virginia and Kentucky. For the year ended December 31, 2018, Peoples's operating revenues amounted to $914 million.

For a discussion of Peoples's business, operations, financial condition and financial results and the specific risks related to Peoples's business, operations, financial condition and financial results, please see the "Peoples's Business," "Risk Factors related to Peoples" and "Management's Discussion and Analysis of Financial Condition and Results of Operations of Peoples" in our Current Report on Form 8-K/A filed with the SEC on April 15, 2019 and incorporated by reference in this prospectus supplement and the accompanying prospectus.

Strategic Rationale for the Acquisition

We believe the Acquisition is a strategically compelling transaction that brings together two high-quality regulated utility companies in regions with constructive regulatory environments and attractive demographics. Consistent with our strategy of growing our regulated utility platform, we expect that the Acquisition will introduce a new platform for regulated growth, creating a leading water and natural gas utility in the United States with scale across the water, wastewater and natural gas distribution sectors. We believe this enhanced growth platform will present opportunities for the Company to grow our rate base through a wider range of infrastructure investment opportunities. In addition, as a larger publicly traded utility, we expect to have better access to capital to fund our infrastructure and capital expenditure needs. We also believe our enhanced scale and better access to the capital markets will support our commitment to strong investment grade credit ratings.

Both Aqua America and Peoples have demonstrated the ability to earn a return on and recover invested capital, with a history of sustained growth in earnings and cash flow. We believe the Acquisition will diversify the Company's cash flow while preserving our low-risk regulated utility profile, resulting in a multi-platform utility with operations spanning ten states.

We expect that the Acquisition will increase our presence in constructive regulatory jurisdictions, particularly Pennsylvania, where the regulatory framework is generally considered progressive and is highly rated by Regulatory Research Associates. Pennsylvania's high rating is based on the probable level and quality of the earnings to be realized by the state's utilities as a result of regulatory, legislative, and court actions, as well as the utilization of fully forecasted test years, Distribution Systems Improvement Charges and other automatic adjustment clauses that are intended to reduce the gap between the time that a capital project is completed and the recovery of costs in rates. The Peoples's management team will bring significant experience investing in and operating critical energy and safety infrastructure; their experience and knowledge is expected to be highly complementary to our core focus of operating our businesses in a safe and efficient manner to provide exceptional service to our customers.

We expect the Acquisition to increase our scale, cash flow diversity and rate base and strengthen our financial foundation, creating an enhanced platform for long-term growth. However, there can be no assurance that the Acquisition will be consummated on the terms or by the time currently contemplated, or at all, or, if consummated, that we will realize the anticipated benefits of the Acquisition. See "Risk Factors—Risks Related to the Acquisition and the Financing Transactions" in this prospectus supplement and "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2018 (as updated by annual, quarterly and other reports and documents we file with the SEC that are incorporated by reference in this prospectus supplement and the accompanying prospectus).

Financing Transactions

In addition to the sale of the Units in connection with this offering, we expect to obtain additional financing to (1) fund the Acquisition, (2) complete the redemption of approximately $314 million aggregate principal amount of our privately placed notes (such notes, the "PPNs," and such redemption, the "Company Debt Refinancing") and (3) pay related costs and expenses as described below. In addition, we intend to use $150 million of proceeds of the Debt Financings for general corporate purposes, including working capital and capital needs. For information regarding sources and uses of funds in connection with the Acquisition and the Financing Transactions, see "Use of Proceeds."

Common Stock Offering

Concurrently with this offering, we are offering, by means of a separate prospectus supplement, 32,495,667 shares of our common stock, par value $0.50 per share ("our common stock"), or up to 37,370,017 shares if the underwriters of such offering exercise their option to purchase additional shares of our common stock (the "Common Stock Offering"). The net proceeds from the sale of common stock in the Common Stock Offering will be approximately $1,098.3 million (or approximately $1,263.2 million if the underwriters of such offering exercise their option to purchase additional shares of our common stock in full).

Private Placement

On March 29, 2019, we entered into a Stock Purchase Agreement (the "CPPIB Agreement") with Canada Pension Plan Investment Board ("CPPIB") pursuant to which CPPIB agreed to purchase an aggregate of 21,661,095 newly issued shares of our common stock (the "Private Placement") at the lower of (1) $34.62 per share and (2) the volume weighted average price per share in our public offerings of Common Stock to fund the Acquisition, the Company Debt Refinancing and pay related costs and expenses related thereto.

We expect the Private Placement to close concurrently with the consummation of the Acquisition, subject to certain closing conditions, including the closing of the Acquisition, the completion of additional equity offerings (including this offering and the Common Stock Offering) which raise gross proceeds in an aggregate amount of at least $1,600 million and the execution and delivery of a shareholder's agreement between CPPIB and the Company. The completion of the Private Placement is not conditioned upon the consummation of the Company Debt Refinancing or the Debt Financings.

Pursuant to the CPPIB Agreement, the shares purchased by CPPIB in the Private Placement will be subject to certain transfer restrictions until the earlier of 15 months following the completion of the Private Placement or specified change of control events with respect to the Company, subject to certain exceptions. In addition, subject to ownership thresholds and other customary requirements, CPPIB will have, pursuant to the shareholder's agreement to be entered into in connection with the closing of the Private Placement, (1) the right to appoint a member of our board of directors, (2) certain pre-emptive rights, (3) certain registration rights in respect of the shares purchased by CPPIB in the Private Placement and (4) certain "standstill" obligations with respect to the Company, subject to certain exceptions. Upon closing of the Private Placement, the Company has agreed to reimburse CPPIB for reasonable out-of-pocket diligence expenses of up to $4 million, subject to certain exceptions.

The foregoing description of the Private Placement does not purport to be complete and is qualified in its entirety by reference to the full text of the CPPIB Agreement, which was filed as Exhibit 10.1 to our Current Report on Form 8-K filed with the SEC on March 29, 2019 and incorporated by reference herein.

Debt Financings

We intend to obtain or otherwise incur up to approximately $1,009 million of senior indebtedness in connection with the Acquisition and the Company Debt Refinancing and approximately $150 million of senior indebtedness to be used for general corporate purposes, including working capital and capital needs. We refer to this $1,159 million of senior indebtedness financing as the "Debt Financings". The Debt Financings may include some combination of the following:

- *Notes Offering.* Subsequent to this offering we expect to offer, pursuant to one or more separate prospectus supplements, one or more series of senior unsecured notes (such notes, the "New Notes" and, such offerings, the "Notes Offering").

- *Bridge Facility.* On October 22, 2018, we obtained a commitment (the "Bridge Commitment") from Goldman Sachs Bank USA and Royal Bank of Canada to provide 364-day senior unsecured bridge loans (the "Bridge Facility"), in an aggregate amount of up to $5,100 million, subject to customary conditions set forth in the Bridge Commitment. As of the date of this prospectus supplement, we have terminated approximately $1,633 million of commitments under the Bridge Commitment in connection with, among other things, the replacement of our prior unsecured revolving credit facility, the expected refinancing of Peoples's revolving credit facility using our senior unsecured revolving credit facility (our "Revolving Credit Facility") and the expected assumption of Peoples's private placement notes. The Bridge Commitment may only be drawn upon to fund the Acquisition, the Company Debt Refinancing and related fees and expenses, and will expire upon the earliest to occur of (1) the termination of the Acquisition Agreement prior to the consummation of the Acquisition, (2) the closing of the Acquisition or (3) the Acquisition Outside Date.

In addition, if and to the extent that the Common Stock Offering and/or the Private Placement is not completed, or such offerings are completed for less aggregate net proceeds than anticipated, we currently intend to fund any shortfall through the issuance of additional shares of common stock or equity-linked securities prior to the consummation of the Acquisition. However, if we are unable to issue such shares or equity-linked securities, we would fund any shortfall with additional debt financings, which may include borrowings under the Bridge Facility and/or the Revolving Credit Facility.

In this prospectus supplement, references to the "Financing Transactions" refer to this offering, the Common Stock Offering, the Private Placement and the Debt Financings, and references to the "Transactions" refer to the Financing Transactions, the Acquisition and the Company Debt Refinancing, including the application of the net proceeds from the Financing Transactions to complete such transactions as described herein. In addition, unless otherwise specified or the context requires otherwise, references in this prospectus supplement to the "consummation of the Acquisition" or similar expressions shall be deemed to include the application of the net proceeds from the Financing Transactions to complete such transactions as described herein, including the consummation of the Company Debt Refinancing.

This offering and certain of the other Financing Transactions are not conditioned upon the consummation of any other Financing Transactions, the Acquisition or the Company Debt Refinancing. In addition, the indebtedness or other securities to be incurred or issued in certain of the Financing Transactions may not be incurred or issued, or may be redeemed, repaid, or repurchased, if the Acquisition is not consummated or is not consummated by a specified date. Accordingly, even if the Acquisition, the Company Debt Refinancing or other Financing Transactions do not occur, the Units issued in this offering will remain outstanding, unless, in the event the Acquisition does not occur by April 22, 2020 or is terminated prior to such date, we elect to redeem the outstanding purchase contracts (in which case holders can require us to repurchase their amortizing notes) as described herein. Purchasers of the Units in this offering should not place undue reliance on the pro forma and as adjusted information included and incorporated by reference in this prospectus supplement and the accompanying prospectus because this offering is not contingent upon the completion of any of the other Financing Transactions, the Acquisition or the Company Debt Refinancing, some or all of which are reflected in the adjustments included in that information, and because the actual amount of proceeds from the sale of shares and from any other Financing Transaction, and the actual terms of each of the Transactions, may differ, perhaps substantially, from those reflected in the prospectus supplement.

We cannot assure you that we will complete the Acquisition or any of the other Financing Transactions on the terms contemplated by this prospectus supplement, or at all.

The Offering

The summary below describes the principal terms of the Units, the purchase contracts and the amortizing notes. Certain of the terms and conditions described below are subject to important limitations and exceptions. The "Description of the Units," Description of the Purchase Contracts" and "Description of the Amortizing Notes" sections of this prospectus supplement, together with the "Description of Debt Securities" section of the accompanying prospectus, contain a more detailed description of the terms and conditions of the Units, the purchase contracts and the amortizing notes.

As used in this section, unless the context otherwise requires, references to "Aqua America," the "Company," "we," "us," "our" and similar references refer only to Aqua America, Inc. and not to its consolidated subsidiaries.

The Units

Issuer	Aqua America, Inc., a Pennsylvania corporation
Number of Units Offered	12,000,000 Units
Underwriters' Option	We have granted the underwriters an option to purchase within 13 days beginning on, and including, the date of initial issuance of the Units up to an additional 1,800,000 Units at the public offering price less the underwriting discount. This option may be exercised by the underwriters solely to cover over-allotments, if any.
Stated Amount of Each Unit	$50.00 for each Unit
Components of Each Unit	Each Unit is comprised of two parts: • a prepaid stock purchase contract issued by us (a "purchase contract"); and • a senior amortizing note issued by us (an "amortizing note"). Unless earlier redeemed by us in connection with an acquisition termination redemption or settled earlier at the holder's option or at our option, each purchase contract will, subject to postponement in certain limited circumstances, automatically settle on April 30, 2022 (such date, as so postponed (if applicable), the "mandatory settlement date"). Upon any settlement on the mandatory settlement date, we will deliver not more than 1.4442 shares and not less than 1.1790 shares of our common stock per purchase contract, subject to adjustment, based upon the applicable settlement rate and applicable market value of our common stock, as described below under "Description of the Purchase Contracts—Delivery of Common Stock." Each amortizing note will have an initial principal amount of $8.62909, will bear interest at the rate of 3.00% per annum and will have a final installment payment date of April 30, 2022. On each January 30, April 30, July 30 and October 30, commencing on July 30, 2019, we will pay equal quarterly cash installments of $0.75000 per amortizing note (except for the July 30, 2019 installment payment, which will be $0.80833 per amortizing note), which cash payment in the aggregate per year will be equivalent to 6.00% per year with respect to each $50.00 stated amount of Units.

	Each installment payment will constitute a payment of interest and a partial repayment of principal, allocated as set forth under "Description of the Amortizing Notes—Amortization Schedule." The return to an investor on a Unit will depend upon the return provided by each component. The overall return will consist of the value of the shares of our common stock delivered upon settlement of the purchase contracts and the cash installments paid on the amortizing notes.
Each Unit May Be Separated into Its Components	Each Unit may be separated by a holder into its constituent purchase contract and amortizing note on any business day during the period beginning on, and including, the business day immediately following the date of initial issuance of the Units to, but excluding, the second scheduled trading day immediately preceding April 30, 2022 or, if earlier, the second scheduled trading day immediately preceding any "early mandatory settlement date" or the second scheduled trading day immediately preceding any "acquisition redemption settlement date" and also excluding the business day immediately preceding any installment payment date (*provided*, the right to separate the Units shall resume after such business day). Prior to separation, the purchase contracts and amortizing notes may only be purchased and transferred together as Units. See "Description of the Units—Separating and Recreating Units."
A Unit May Be Recreated from Its Components	If you hold a separate purchase contract and a separate amortizing note, you may combine the two components to recreate a Unit. See "Description of the Units—Separating and Recreating Units."
Listing	We have applied to list the Units on the NYSE under the symbol "WTRU", subject to satisfaction of its minimum listing standards with respect to the Units. However, we cannot assure you that the Units will be approved for listing. If approved for listing, we expect trading on the NYSE to begin within 30 calendar days after the Units are first issued. We will not initially apply to list the separate purchase contracts or the separate amortizing notes on any securities exchange or automated inter-dealer quotation system, but we may apply to list such separate purchase contracts and separate amortizing notes in the future as described under "Description of the Units—Listing of Securities." Prior to this offering, there has been no public market for the Units. Our common stock is listed on the NYSE under the symbol "WTR."
Use of Proceeds	We estimate that the net proceeds from this Units offering, after deducting underwriting discounts and estimated offering expenses, will be approximately $585.8 million (or approximately $673.7 million if the underwriters exercise their option to purchase additional Units in full). We intend to use the net proceeds from this offering, together with the net proceeds from the other Financing Transactions, to (1) fund the Acquisition, (2) complete the Company Debt Refinancing and (3) pay related costs and expenses as described below. See "—Recent Developments—Proposed

	Peoples Gas Acquisition." In addition, we intend to use $150 million of proceeds of the Debt Financings for general corporate purposes, including working capital and capital needs. If for any reason the Acquisition is not consummated, we expect we would use the net proceeds from this offering, after payment of any cash redemption amount and/or repurchase price (if applicable), for general corporate purposes, which may include the Company Debt Refinancing, the redemption of securities issued in connection with the other Financing Transactions, repurchases of our common stock, debt repayment, capital expenditures and investments. See "Use of Proceeds."
Concurrent Common Stock Offering	Concurrently with this offering of Units, we are offering, by means of a separate prospectus supplement, 32,495,667 shares (or up to 37,370,017 shares if the underwriters for that offering exercise their option to purchase additional shares of common stock). The net proceeds from the sale of common stock in the Common Stock Offering will be approximately $1,098.3 million (or approximately $1,263.2 million if the underwriters of such offering exercise their option to purchase additional shares of our common stock in full). This prospectus supplement is not an offer to sell or a solicitation of an offer to buy any securities being offered in the Common Stock Offering. There can be no assurance that the Common Stock Offering will be completed. Neither this offering nor the Common Stock Offering is conditioned upon the consummation of the Acquisition or completion of any other Financing Transactions. See "—Recent Developments—Financing Transactions—Common Stock Offering."
Private Placement	On March 29, 2019, we entered into the CPPIB Agreement pursuant to which CPPIB agreed to purchase an aggregate of 21,661,095 shares of our common stock at the lower of (1) $34.62 per share and (2) the volume weighted average price per share in our public offerings of Common Stock to fund the Acquisition, the Company Debt Refinancing and pay related costs and expenses related thereto. This prospectus supplement is not an offer to sell or a solicitation of an offer to buy any securities being offered in the Private Placement. This offering is not conditioned upon completion of the Private Placement. The completion of the Private Placement is subject to certain closing conditions, including the closing of the Acquisition, the completion of additional equity offerings (including this offering and the Common Stock Offering) which raise gross proceeds in an aggregate amount of at least $1,600 million and the execution and delivery of a shareholders agreement between CPPIB and the Company. See "—Recent Developments —Financing Transactions—Private Placement."
Risk Factors	Investing in our Units involves risks. See "Risk Factors" in this prospectus supplement, the accompanying prospectus and in the documents we incorporate by reference into this prospectus supplement and the accompanying prospectus for a discussion of some of the risks and other factors you should carefully consider before deciding to invest in the Units.
United States Federal Income Tax Consequences	There is no authority directly on point regarding the characterization of the Units or instruments similar to the Units for U.S. federal income tax purposes and therefore the characterization of the Units for these purposes is not entirely free from doubt. We will take the position that each Unit will be treated as an investment unit composed of two separate instruments for U.S.

	federal income tax purposes: (i) a purchase contract to acquire our common stock and (ii) an amortizing note that is our indebtedness. Under this treatment, a holder of Units will be treated as if it held each component of the Units for U.S. federal income tax purposes. By acquiring a Unit, you will agree to treat (i) a Unit as an investment unit composed of two separate instruments in accordance with its form and (ii) the amortizing notes as indebtedness of Aqua America, Inc. for U.S. federal income tax purposes. If, however, the components of a Unit were treated as a single instrument, the U.S. federal income tax consequences could differ from the consequences described herein. Prospective investors should consult their tax advisors regarding the tax treatment of an investment in Units and whether a purchase of a Unit is advisable in light of the investor's particular tax situation and the tax treatment described under "Certain United States Federal Income and Estate Tax Consequences."
Governing Law	The Units, the purchase contract agreement, the purchase contracts, the indenture and the amortizing notes will all be governed by, and construed in accordance with, the laws of the State of New York.
The Purchase Contracts	
Issuer	Aqua America, Inc., a Pennsylvania Corporation
Mandatory Settlement Date	April 30, 2022, subject to postponement in limited circumstances.
Mandatory Settlement	On the mandatory settlement date, unless such purchase contract has been earlier redeemed by us in connection with an acquisition termination redemption or earlier settled at the holder's option or at our option, each purchase contract will automatically settle, and we will deliver a number of shares of our common stock, based on the applicable settlement rate.
Settlement Rate for the Mandatory Settlement Date	The "settlement rate" for each purchase contract will be not more than 1.4442 shares and not less than 1.1790 shares of our common stock (each subject to adjustment as described herein) depending on the applicable market value of our common stock, calculated as follows: • if the applicable market value (as defined below) is greater than the threshold appreciation price (as defined below), you will receive 1.1790 shares of common stock per purchase contract (the "minimum settlement rate"); • if the applicable market value is less than or equal to the threshold appreciation price but greater than or equal to the reference price, you will receive a number of shares of our common stock per purchase contract equal to $50.00, *divided by* the applicable market value; and • if the applicable market value is less than the reference price, you will receive 1.4442 shares of common stock per purchase contract (the "maximum settlement rate").

Each of the maximum settlement rate and the minimum settlement rate is subject to adjustment as described below under "Description of the Purchase Contracts—Adjustments to the Fixed Settlement Rates."

The "applicable market value" means the arithmetic average of the VWAP (as defined below under "Description of the Purchase Contracts—Delivery of Common Stock") per share of our common stock over the settlement period (as defined below)

The "settlement period" means the 20 consecutive trading day period beginning on, and including, the 21st scheduled trading day immediately preceding April 30, 2022.

The "reference price" is calculated by dividing $50.00 by the then applicable maximum settlement rate and is initially approximately equal to $34.62, which is the per share public offering price of our common stock in the Common Stock Offering.

The "threshold appreciation price" is calculated by dividing $50.00 by the then applicable minimum settlement rate. The threshold appreciation price, which is initially approximately $42.41, represents a premium of approximately 22.5% over the reference price.

No fractional shares of our common stock will be issued to holders upon settlement or redemption of purchase contracts. In lieu of fractional shares otherwise issuable, holders will be entitled to receive a cash payment of equivalent value calculated as described herein. Other than cash payments in lieu of fractional shares or, under certain circumstances, in the event of an acquisition termination redemption, holders of purchase contracts will not receive any cash distributions.

The following table illustrates the settlement rate per purchase contract and the value of our common stock issuable upon settlement on the mandatory settlement date, determined using the applicable market value shown, subject to adjustment.

Applicable Market Value of Our Common Stock	Settlement Rate	Value of Common Stock Delivered (Based on the Applicable Market Value Thereof)
Less than the reference price	1.4442 shares of our common stock	Less than $50.00
Less than or equal to the threshold appreciation price but greater than or equal to the reference price	A number of shares of our common stock equal to $50.00 *divided by* the applicable market value	$50.00
Greater than the threshold appreciation price	1.1790 shares of our common stock	Greater than $50.00

Early Settlement at Your Election

At any time prior to 5:00 p.m., New York City time, on the second scheduled trading day immediately preceding April 30, 2022, you may settle any or all of your purchase contracts early, in which case we will deliver a number of shares of our common stock per purchase contract equal to the minimum settlement rate, which is subject to adjustment as described below under "Description of the Purchase Contracts—Adjustments to the Fixed

	Settlement Rates" (unless such early settlement occurs in connection with a fundamental change, in which case the provisions described under "—Early Settlement Upon a Fundamental Change" below will apply). That is, the market value of our common stock on the early settlement date will not affect the early settlement rate. Your right to settle your purchase contracts prior to the second scheduled trading day immediately preceding April 30, 2022 is subject to the delivery of your purchase contracts. Upon early settlement at the holder's election of a purchase contract that is a component of a Unit, the corresponding amortizing note will remain outstanding and beneficially owned by or registered in the name of, as the case may be, the holder who elected to settle the related purchase contract early.
Early Settlement Upon a Fundamental Change	At any time prior to the second scheduled trading day immediately preceding April 30, 2022, if a "fundamental change" (as defined herein) occurs, you may settle any or all of your purchase contracts early. If you elect to settle your purchase contracts early in connection with such fundamental change, you will receive a number of shares of our common stock (and any cash payable for fractional shares) per purchase contract equal to the "fundamental change early settlement rate" as described under "Description of the Purchase Contracts—Early Settlement Upon a Fundamental Change." Upon early settlement at the holder's election in connection with a fundamental change of a purchase contract that is a component of a Unit, the corresponding amortizing note will remain outstanding and beneficially owned by or registered in the name of, as the case may be, the holder who elected to settle the related purchase contract early upon such fundamental change.
Early Mandatory Settlement at Our Election	On or after January 30, 2020, we may elect to settle all, but not less than all, outstanding purchase contracts early at the "early mandatory settlement rate" (as described under "Description of the Purchase Contracts — Early Mandatory Settlement at Our Election") on a date fixed by us upon not less than five business days' notice (the "early mandatory settlement date"). The "early mandatory settlement rate" will be the maximum settlement rate as of the "notice date" (as defined under "Description of the Purchase Contracts—Early Mandatory Settlement at Our Election"), unless the closing price per share of our common stock for at least 20 trading days (whether or not consecutive), including the trading day immediately preceding the notice date in a period of 30 consecutive trading days ending on, and including, the trading day immediately preceding the notice date exceeds 130% of the threshold appreciation price in effect on each such trading day, in which case the "early mandatory settlement rate" will be the minimum settlement rate as of the notice date. If we elect to settle all the purchase contracts early, you will have the right to require us to repurchase your amortizing notes on the repurchase date and at the repurchase price as described under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder."

Acquisition Termination Redemption	If the closing of the Acquisition has not occurred on or prior to April 22, 2020, or if, prior to such date, the Acquisition Agreement is terminated, we may elect to redeem all, but not less than all, of the outstanding purchase contracts (an "acquisition termination redemption"), for the applicable redemption amount, as described below under "Description of the Purchase Contracts—Acquisition Termination Redemption," by delivering notice during the five business day period immediately following the earlier of (x) April 22, 2020 if the closing the Acquisition has not occurred on or prior to such date and (y) the date on which the Acquisition Agreement is terminated. If the "acquisition termination stock price" (as defined under "Description of the Purchase Contracts—Acquisition Termination Redemption") is equal to or less than the reference price, the redemption amount will be an amount of cash as described under "Description of the Purchase Contracts—Acquisition Termination Redemption." Otherwise, the redemption amount will be a number of shares of our common stock equal to the acquisition redemption rate, calculated in the manner described under "Description of the Purchase Contracts—Acquisition Termination Redemption;" *provided, however*, that we may elect to pay cash in lieu of delivering any or all of such shares in an amount equal to such number of shares *multiplied by* the redemption market value thereof. The "redemption market value" means the arithmetic average of the VWAPs of our common stock for the 20 consecutive trading day period beginning on, and including, the 21st scheduled trading day immediately preceding the scheduled acquisition redemption settlement date. In the event of an acquisition termination redemption, you will have the right to require us to repurchase your amortizing notes, as described under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder."
The Amortizing Notes	
Issuer	Aqua America, Inc., a Pennsylvania corporation
Initial Principal Amount of Each Amortizing Note	$8.62909
Installment Payments	Each installment payment of $0.75000 per amortizing note (except for the July 30, 2019 installment payment, which will be $0.80833 per amortizing note) will be paid in cash and will constitute a partial repayment of principal and a payment of interest, computed at an annual rate of 3.00%. Interest will be calculated on the basis of a 360-day year consisting of twelve 30-day months. Payments will be applied first to the interest due and payable and then to the reduction of the unpaid principal amount, allocated as set forth on the amortization schedule set forth under "Description of the Amortizing Notes—Amortization Schedule."

Installment Payment Dates	Each January 30, April 30, July 30 and October 30, commencing on July 30, 2019, with a final installment payment date of April 30, 2022.
Ranking	The amortizing notes will be our general unsecured senior obligations and will rank equally with all of our other existing and future unsecured senior indebtedness from time to time outstanding. See "Description of the Amortizing Notes—Ranking" in this prospectus supplement. At December 31, 2018, on a pro forma basis after giving effect to the Transactions: • Aqua America would have had approximately $2,096 million of indebtedness outstanding, of which none would have been secured indebtedness; and • our subsidiaries (including LDC and its subsidiaries) would have had a total of approximately $5,856 million of outstanding liabilities, including indebtedness, owed to non-affiliated third parties.
Repurchase of Amortizing Notes at the Option of the Holder	If we elect to settle the purchase contracts early or in the event of an acquisition termination redemption, holders will have the right to require us to repurchase their amortizing notes for cash at the repurchase price as described under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder."
Sinking Fund	None.
Trustee	U.S. Bank N.A.

Immediately after the consummation of the Common Stock Offering we will have 210,587,288 shares of common stock (or 215,461,638 shares if the underwriters for the Common Stock Offering exercise their option to purchase additional shares in full) issued and outstanding. The number of shares of common stock to be outstanding immediately after the Common Stock Offering is based on 178,091,621 shares of common stock outstanding as of December 31, 2018, and does not reflect:

- 21,661,095 shares of our common stock issuable upon completion of the Private Placement;
- 17,330,400 shares of our common stock (or 19,929,960 shares of our common stock if the underwriters exercise their option with respect to this offering in full) issuable upon settlement of the purchase contracts, assuming the maximum number of shares issuable upon automatic settlement of such purchase contracts that are components of the Units offered hereby; and
- 18,738,059 shares of our common stock reserved for issuance upon exercise of stock options outstanding, upon vesting of our time based restricted stock units, upon vesting of our performance based restricted stock units or performance share units, as well as additional shares we may issue under our dividend reinvestment program, employee stock purchase plan or 401(k) savings plans.

RISK FACTORS

Investing in the Units involves risks. You should review and carefully consider the risks, uncertainties and other factors described below and all of the information included elsewhere in this prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before deciding to invest in the Units. We also urge you to consider carefully the risks, uncertainties and other factors set forth under the headings "Forward-Looking Statements" and "Market and Industry Data." However, additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business, operations, financial condition and financial results and the value of the Units.

Risks Related to Our Business

For a discussion of specific risks related to our business, operations, financial condition and financial results, including certain risks related to the Acquisition, please see the "Business," Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections in our Annual Report on Form 10-K for our fiscal year ended December 31, 2018, as updated by our annual, quarterly and other reports and documents we file with the SEC that are incorporated by reference in this prospectus supplement and the accompanying prospectus. See "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," in this prospectus supplement. In addition, we provide the following risk factor.

Changes in our earnings may differ from changes in our rate base.

Our business is capital intensive and requires significant capital investments for additions to or replacement of property, plant and equipment. These capital investments create assets that are used and useful in providing regulated utility service, and as a result, increase our rate base, on which we generate earnings through the regulatory process. Changes in our reported earnings, however, may differ from changes in our rate base in a given period due to several factors, including rate case timing and the terms of such rate cases; over-or under-earnings in a given period due to changes in operating costs; the effects of tax rates or tax treatment of capital investments, including the effect of repair tax; capital expenditures that are not eligible for DSIC between rate cases; and acquisitions which have not yet been included in rate base. We anticipate that we may experience periods in which growth in earnings is less than growth in rate base; such differences may be significant and may persist over multiple reporting periods.

Risks Related to Peoples's Business

For a discussion of specific risks related to Peoples's business, please see "Risk Factors related to Peoples" in our Current Report on Form 8-K/A filed on April 15, 2019 and incorporated by reference in this prospectus supplement and the accompanying prospectus. These risks, uncertainties and other factors are not the only ones that Peoples faces. Additional risks, uncertainties and other factors not presently known to us or that we currently deem immaterial may also impair Peoples's business, operations, financial condition and financial results. Any of these risks could, if the Acquisition is consummated, impair the combined company's business, operations, financial condition and financial results or could otherwise adversely impact our investment in Peoples, in which case you may lose all or part of your investment in the Units.

Risks Related to the Acquisition and the Financing Transactions

Aqua America expects to incur significant additional indebtedness in connection with the Acquisition. As a result, it may be more difficult for Aqua America to pay or refinance its debts or take other actions, and Aqua America may need to divert cash to fund debt service payments.

As discussed herein, Aqua America expects to incur significant additional indebtedness to finance the Cash Acquisition Consideration and the Company Debt Refinancing and pay related transaction costs. Additionally, in connection with the Acquisition, Aqua America currently intends to assume approximately $1,370 million of Peoples's indebtedness. Moreover, although Aqua America currently plans to fund a significant portion of the Cash Acquisition Consideration and the Company Debt Refinancing through the sales of its equity securities, if and to the extent that such sales are not completed or are completed for less aggregate net proceeds than anticipated, the amount of indebtedness it will incur to finance the Acquisition, the Company Debt Refinancing and associated transactions costs would increase, perhaps substantially. The increase in Aqua America's debt service obligations resulting from additional indebtedness could have a material adverse effect on the results of operations, financial condition and prospects of the combined company.

Aqua America's increased indebtedness could also:

- make it more difficult and/or costly for Aqua America to pay or refinance its debts as they become due, particularly during adverse economic and industry conditions, because a decrease in revenues or increase in costs could cause cash flow from operations to be insufficient to make scheduled debt service payments;
- limit Aqua America's flexibility to pursue other strategic opportunities or react to changes in its business and the industry sectors in which it operates and, consequently, put Aqua America at a competitive disadvantage to its competitors that have less debt;
- require a substantial portion of Aqua America's available cash to be used for debt service payments, thereby reducing the availability of its cash to fund working capital, capital expenditures, development projects, acquisitions, dividend payments and other general corporate purposes, which could harm Aqua America's prospects for growth and the market price of our common stock, Units and debt securities, among other things;
- result in a downgrade in the credit ratings on Aqua America's indebtedness, which could limit Aqua America's ability to borrow additional funds on favorable terms or at all (including in order to refinance the Bridge Facility (if drawn) and/or its other debt), increase the interest rates under its credit facilities and under any new indebtedness it may incur, and reduce the trading prices of its outstanding debt securities, common stock and Units (see "Summary Information—Recent Developments—Financing Transactions");
- make it more difficult for Aqua America to raise capital to fund working capital, make capital expenditures, pay dividends, pursue strategic initiatives or for other purposes;
- result in higher interest expense, which could be further increased in the event of increases in interest rates on Aqua America's current or future borrowings subject to variable rates of interest; and
- require that additional materially adverse terms, conditions or covenants be placed on Aqua America under its debt instruments, which covenants might include, for example, limitations on additional borrowings and specific restrictions on uses of its assets, as well as prohibitions or limitations on its ability to create liens, pay dividends, receive distributions from its subsidiaries, redeem or repurchase its stock or make investments, any of which could hinder its access to capital markets and limit or delay its ability to carry out its capital expenditure program or otherwise limit its flexibility in the conduct of its business and make it more vulnerable to economic downturns and adverse competitive and industry conditions.

It is possible that the Notes Offering will not be completed or, if completed, will generate less aggregate net proceeds than anticipated, which is a scenario in which we may incur borrowings under the Bridge Facility and/ or incur borrowings under the Revolving Credit Facility. It is also possible that this offering, the Common Stock Offering and the Private Placement will not be completed or, if completed, will generate less aggregate net proceeds than anticipated, in which case we intend to fund any shortfall through the issuance of additional shares of common stock or equity-linked securities prior to the consummation of the Acquisition, but may ultimately fund any shortfall with additional debt financings (which could include borrowings under the Bridge Facility) and/or borrowings under the Revolving Credit Facility. Any such borrowings under the Bridge Facility or the Revolving Credit Facility may cause us to incur significantly higher borrowing costs than the contemplated long-term financing, which would increase the overall cost of the Acquisition and could harm our business, financial condition, results of operations, and cash flows. Any borrowings under the Bridge Facility will mature 364 days after they are incurred. We may not be able to refinance borrowings under the Bridge Facility on favorable terms or at all before their maturity. In addition, the interest rate applicable to borrowings under the Bridge Facility will increase at the end of each three-month period after the borrowing date. Accordingly, we may incur additional interest expense if we are unable to refinance borrowings under the Bridge Facility before the interest rate increases take effect.

The increased indebtedness in connection with the Acquisition could cause us to place more reliance on cash flow from operations to pay principal and interest on debt and to satisfy our other obligations. Based on the current and expected results of operations and financial condition of Aqua America and its subsidiaries and the currently anticipated financing structure for the Acquisition, Aqua America believes that its cash flow from operations, together with the proceeds from borrowings, issuances of equity and debt securities in the capital markets, and equity sales will generate sufficient cash on a consolidated basis to make all of the principal and interest payments when such payments are due under Aqua America's and its current subsidiaries' existing credit facilities, indentures and other instruments governing their outstanding indebtedness, under the indebtedness anticipated to be incurred to fund the Cash Acquisition Consideration and the Company Debt Refinancing and under the indebtedness of Peoples anticipated to be assumed as a result of the Acquisition. However, Aqua America's expectation is based upon numerous estimates and assumptions and is subject to numerous uncertainties. LDC and its subsidiaries will not guarantee any indebtedness of Aqua America or any of its other subsidiaries, nor will any of them have any obligation to provide funds (nor will we have any ability to require them to provide funds), whether in the form of dividends, loans or otherwise, to enable Aqua America to pay dividends on its common stock or to enable Aqua America and its other subsidiaries to make required debt service payments or meet its other cash needs (including those described above under "Summary Information—Recent Developments"). In addition, as described above in "—Aqua America's ability to pay dividends and to meet its debt obligations largely depends on the performance of its subsidiaries and the ability to utilize the cash flows from those subsidiaries," certain of LDC and its subsidiaries may face limitations on their ability to provide funds to Aqua America. As a result, Aqua America may substantially increase its debt services obligations in anticipation of the Acquisition without any assurance that Aqua America will receive any cash from LDC or any of its subsidiaries to assist Aqua America in servicing its indebtedness, paying dividends on its common stock or meetings its other cash needs. Even if the Acquisition is consummated, Aqua America may not have access to the cash or other assets of certain of LDC and its subsidiaries.

In order to maintain its credit ratings, Aqua America may consider it appropriate to reduce the amount of its indebtedness outstanding following the Acquisition. Aqua America may seek to reduce this indebtedness with the proceeds from the issuance of additional shares of common stock and, possibly, other equity-linked securities, cash on hand and proceeds from asset sales, which may dilute the voting rights and economic interests of holders of Aqua America's common stock. However, the ability of Aqua America to raise additional equity financing after completion of the Acquisition will be subject to market conditions and a number of other risks and uncertainties, including whether the results of operations of the combined company meet the expectations of investors and securities analysts. Aqua America may not be able to issue additional shares of its common stock or other equity securities after the Acquisition on terms that it considers acceptable or at all, and Aqua America may not be able to reduce the amount of its outstanding indebtedness after the Acquisition, should it elect to do so, to a level that permits it to maintain its investment grade credit ratings.

The unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus are presented for illustrative purposes only and do not purport to represent what the financial position or results of operations of the combined company would have been had the Transactions been completed on the dates assumed for purposes of that information, nor do they represent the actual financial position or results of operations of the combined company following the Transactions, if consummated.

The unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus are presented for illustrative purposes only, are based on numerous adjustments, assumptions and estimates, are subject to numerous other uncertainties and do not purport to reflect what the combined company's financial position or results of operations would have been had the Transactions been completed as of the dates assumed for purposes of that information, nor do they reflect the financial position or results of operations of the combined company following the Transactions, if consummated. Such unaudited pro forma consolidated combined financial information and certain other adjusted information reflects the assumptions of our management at the time that such information was initially prepared, and therefore does not reflect the amount of proceeds we will receive from, and certain pricing and other terms of, each of the Debt Financings, the Common Stock Offering, the Private Placement and this offering, the number of shares of our common stock sold in the Common Stock Offering and in the Private Placement and the number of Units sold in this offering, and the actual amount of costs and expenses and underwriting discounts we will pay in connection with the Transactions. Therefore, actual amounts, including the actual amount of net proceeds from the respective Financing Transactions, may differ, perhaps substantially, from the assumed amounts set forth in the unaudited pro forma consolidated combined financial information and the other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

The unaudited pro forma consolidated combined financial information and other adjusted information has also been prepared on the assumption that the Transactions will be completed on the terms and in accordance with the assumptions set forth in such unaudited pro forma consolidated combined financial information or such adjusted information, as applicable. Any changes relative to these assumptions, including, without limitation, any changes in the assumed types or sizes of the Financing Transactions, the assumed interest on debt we will issue or otherwise incur, the assumed number of shares of common stock or Units we issue, the assumed amount of our Transactions costs, the assumed amounts of net proceeds we receive from the respective Financing Transactions would result in a change relative to such unaudited pro forma consolidated combined financial information or such other adjusted information, which could be material. In addition, none of the Financing Transactions (other than the Private Placement) will be contingent upon completion of any of the other Financing Transactions, and it is possible that one or more of the Financing Transactions will not be completed. Likewise, because certain of the Financing Transactions are not contingent upon completion of the Acquisition, it is possible that this offering and certain of the other Financing Transactions may be completed even if the Acquisition is not consummated, in which case we may be required to redeem or otherwise repay certain indebtedness or debt securities we may issue in the Debt Financings, and we may elect to redeem all of the purchase contracts (if issued), in which case holders of Units would have the right to require us to repurchase their outstanding amortizing notes. It is also possible that this offering, the Common Stock Offering, the Private Placement and the Notes Offering, if completed, will not generate the anticipated amount of net proceeds, in which case we may draw upon the Bridge Commitment and/ or incur borrowings under our Revolving Credit Facility and/or issue additional shares of common stock or equity-linked securities. In any event, our and Peoples's actual financial positions and results of operations prior to the Acquisition and those of the combined company following the Acquisition, if consummated, may not be consistent with, or evident from, the unaudited pro forma consolidated combined financial information or other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

For purposes of the unaudited pro forma consolidated combined financial information, the Cash Acquisition Consideration has been preliminarily allocated to the identifiable assets acquired and liabilities assumed based on limited information presently available to estimate fair values. The Cash Acquisition Consideration will be

allocated among the relative fair values of the identifiable assets acquired and liabilities assumed based on their estimated fair values as of the date of the Acquisition. The relative fair values of the assets acquired and liabilities assumed are estimates, which are subject to change pending further review. The actual amounts recorded at the completion of the Acquisition, if completed, may differ materially from the information presented in the unaudited pro forma consolidated combined financial information.

Although the unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus include sensitivity analyses that are intended to assist you in quantifying the impact of changes in certain of the assumptions used in preparing such information, those sensitivity analyses reflect the pro forma impact of only a limited number of those assumptions and therefore do not allow you to quantify the impact of changes in certain other assumptions made in calculating this information. Changes in such other assumptions may have a material impact on such information. Likewise, the sensitivity analyses we have provided do not necessarily address the impact of all possible changes in the assumptions contemplated by such analyses. We do not intend to provide you with updated unaudited pro forma consolidated combined financial information or other adjusted information that reflects the actual size and terms of the Financing Transactions (other than to disclose the actual size and pricing terms of this offering and the Common Stock Offering in one or more free writing prospectuses) prior to the time you will be required to make a decision whether or not to invest in this offering.

As a result of the foregoing, investors should not place undue reliance on unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

We may not complete the Acquisition. If we incur indebtedness or issue debt securities to finance a portion of the Acquisition, and we do not complete the Acquisition on or before a specified date or if other specified events occur, we may be required to redeem or repay any such indebtedness or debt securities. We may not have the financial resources necessary to effect such redemption or repayment. It is possible that our failure to complete Acquisition may have a material adverse effect on our financial condition and the market price of the Units and our common stock.

The Acquisition is subject to a number of customary closing conditions. See "Summary Information—Recent Developments—Proposed Peoples Gas Acquisition." Satisfaction of many of these conditions is beyond our control. If these conditions are not satisfied or waived, the Acquisition will not be completed. As a result, the Acquisition may not close as scheduled or at all. Among other conditions, the closing of the Acquisition is subject to the receipt of regulatory approval by the Pennsylvania Public Utility Commission. Whether through a settlement agreement or through a litigated proceeding, we may be required to agree to certain actions, undertakings, terms, or other measures, including those that may require increased capital or other expenditures by the Company. Any additional items we agree to in order to resolve this matter may have an adverse effect on our business, financial condition or results of operations. The closing of this offering is not conditioned on, and is expected to be consummated before, the closing of the Acquisition. Accordingly, if you decide to purchase Units in this offering, you should be willing to do so whether or not we complete the Acquisition.

We expect to incur a substantial amount of additional indebtedness as part of the Financing Transactions. See "Summary Information—Recent Developments—Financing Transactions" and "Use of Proceeds." To the extent we incur indebtedness or issue debt securities as part of the Financing Transactions and we do not complete the Acquisition by a specified date or if certain other specified events, such as termination of the Acquisition Agreement, occur, we expect that we will be required to redeem or repay some or all of such indebtedness and debt securities and that the redemption or repayment price will include a premium.

We will not be required to deposit the proceeds from the Financing Transactions into an escrow account pending completion of the Acquisition or to grant any security interest or other lien on those proceeds to secure

any required repayment or redemption of any Financing Transactions. If we are required to redeem or repay any indebtedness or debt securities issued in the Financing Transactions under the circumstances described above, our ability to pay the redemption or repayment price may be limited by our financial resources at the time and the terms of our debt instruments or other instruments and agreements and it is possible that we will not have sufficient financial resources available to satisfy our obligation to effect such redemption or repayment. Any failure to pay the mandatory redemption or repayment price of any Financing Transactions as and when required could have a material adverse effect on our business, results of operations and financial condition and the market price of our securities, including the Units, our common stock, or any indebtedness incurred or other securities issued as part of the Financing Transactions. If the Acquisition is not completed by April 22, 2020 or the Acquisition Agreement is terminated prior to such date, we will have the option, but not the obligation, to redeem all, but not less than all, of the outstanding purchase contracts. If we elect to redeem the purchase contracts, holders will have the right to require us to repurchase their amortizing notes. It is possible that our failure to complete the Acquisition, or the expenditure of our funds to redeem or repay any securities issued or borrowings incurred in the other Financing Transactions, may have a material adverse effect on the market price of the Units and our common stock.

Risks Related to the Units, the Separate Purchase Contracts, the Separate Amortizing Notes and our Common Stock

If the closing of the Acquisition has not occurred on or prior to April 22, 2020, or if, prior to such date, the Acquisition Agreement is terminated, we may redeem the purchase contracts, in which case holders of Units would have the right to require us to repurchase the amortizing notes, for an amount of cash and/or a number of shares of our common stock (depending on the price of our common stock at the time of redemption) with a value that may not adequately compensate you for any lost option value.

The Acquisition may not be consummated. See "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2018 and "—Risks Related to the Acquisition and the Financing Transactions" herein. If the closing of the Acquisition has not occurred on or prior to April 22, 2020, or if, prior to such date, the Acquisition Agreement is terminated, we may elect to redeem all, but not less than all, of the outstanding purchase contracts by delivering notice during the five business day period immediately following the earlier of (x) the April 22, 2020 if the closing of the Acquisition has not occurred on prior to such date and (y) the date on which the Acquisition Agreement is terminated. We will pay or deliver, as the case may be, a redemption amount to be determined based on the price of our common stock at that time in cash or in shares of our common stock in accordance with the terms of the purchase contracts (as described under "Description of the Purchase Contracts—Acquisition Termination Redemption"). If we elect to redeem the purchase contracts, the holders thereof would have the right to require us to repurchase the amortizing notes at the relevant repurchase price set forth under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder." The redemption amount that you receive upon an acquisition termination redemption may not adequately compensate you for any lost option value of the purchase contracts. In addition, if the Acquisition is not consummated, the net proceeds from this offering and of the Common Stock Offering, if completed, will not be used to consummate the Acquisition. Instead, we intend to use the net proceeds from this offering and the Common Stock Offering, after payment of any cash redemption amount and/or repurchase price (if applicable), for general corporate purposes, which may include the Company Debt Refinancing, the redemption of securities issued in connection with the other Financing Transactions, repurchases of our common stock, debt repayment, capital expenditures and investments.

Upon redemption of the purchase contracts included in Units or separate purchase contracts upon an acquisition termination redemption, our common stock may incur immediate net tangible book value dilution on a per share basis. In addition, if the purchase contracts are redeemed for cash and the holders thereof require us to repurchase the amortizing notes, we would experience reduced liquidity, which could limit our flexibility in the conduct of our business and make us more vulnerable to economic downturns and adverse competitive and industry conditions.

You will bear the risk that the market value of our common stock may decline.

The purchase contracts, pursuant to which we will deliver to you shares of our common stock, are components of the Units. The number of shares of common stock that you will receive upon settlement of a purchase contract on the mandatory settlement date (subject to earlier settlement or redemption), whether as a component of a Unit or a separate purchase contract, will depend upon the applicable market value, which is equal to the arithmetic average of the VWAP per share of our common stock on each of the 20 consecutive trading day period beginning on, and including, the 21st scheduled trading day immediately preceding April 30, 2022. There can be no assurance that the market value of the common stock received by you will be greater than or equal to the reference price of approximately $34.62. If the applicable market value of our common stock is less than the reference price, then the market value of the common stock issued to you on the mandatory settlement date (assuming that the market value is the same as the applicable market value of the common stock) will be less than the effective price per share paid by you for such common stock on the date of issuance of the Units. Furthermore, because we will in no event deliver more than 1.4442 shares (subject to adjustment as described herein) upon settlement of a purchase contract, the market value of the common stock delivered to you upon any early settlement may be less than the effective price per share paid to you for such common stock on the date of the issuance of the Units. Therefore, you assume the entire risk that the market value of our common stock may decline before the mandatory settlement date, early settlement date, fundamental change early settlement date, acquisition redemption settlement date or early mandatory settlement date, as applicable. Any decline in the market value of our common stock may be substantial.

The opportunity for equity appreciation provided by an investment in the Units is less than that provided by a direct investment in our common stock.

The aggregate market value of our common stock delivered to you upon settlement of a purchase contract on the mandatory settlement date generally will exceed the $50.00 stated amount of each Unit only if the applicable market value of our common stock exceeds the threshold appreciation price. Therefore, during the period prior to the mandatory settlement date, an investment in a Unit affords less opportunity for equity appreciation than a direct investment in our common stock. If the applicable market value exceeds the reference price but is less than the threshold appreciation price, you will realize no equity appreciation on our common stock above the reference price. Furthermore, if the applicable market value exceeds the threshold appreciation price, you would receive only a portion of the appreciation in the market value of the shares of our common stock you would have received had you purchased shares of common stock with $50.00 at the public offering price in the Common Stock Offering. See “Description of the Purchase Contracts—Delivery of Common Stock” for a table showing the number of shares of common stock that you would receive at various applicable market values.

We may not be able to settle or redeem your purchase contracts and deliver shares of our common stock, or make payments on the amortizing notes or repurchase the amortizing notes, in the event that we file for bankruptcy.

Pursuant to the terms of the purchase contract agreement, your purchase contracts will automatically accelerate upon the occurrence of specified events of bankruptcy, insolvency or reorganization with respect to us.

A bankruptcy court may prevent us from delivering our common stock to you in settlement or redemption of your purchase contracts. In such circumstances or if for any other reason the accelerated purchase contracts are not settled by the delivery of common stock, your resulting claim for damages against us following such acceleration will rank pari passu with the claims of holders of our common stock in the relevant bankruptcy proceeding. As such, to the extent we fail to deliver common stock to you upon such an acceleration, you will only be able to recover damages to the extent holders of our common stock receive any recovery. See “Description of the Purchase Contracts—Consequences of Bankruptcy.”

In addition, with respect to the amortizing notes, bankruptcy law and bankruptcy-related court orders generally prohibit the payment of pre-bankruptcy debt by a company that has commenced a bankruptcy case while the case is pending. If we become a debtor in a bankruptcy case, so long as the case was pending, you would likely not receive timely installment payments under, or, if you exercised your right to require repurchase following an acquisition termination redemption or early mandatory settlement, receive any repurchase price on, the amortizing notes.

The Units are not protected by restrictive covenants.

Neither the purchase contracts nor the indenture contains any financial or operating covenants or restrictions on the payments of dividends, the incurrence of indebtedness or the issuance or repurchase of securities by us or any of our subsidiaries. Neither the purchase contracts nor the indenture contains any covenants or other provisions to afford protection to holders of the purchase contracts or the amortizing notes in the event of a fundamental change involving Aqua America, Inc. except, with respect to the purchase contracts, to the extent described under "Description of the Units—Early Settlement Upon a Fundamental Change."

The amortizing notes will be subject to the prior claims of any secured creditors, and if a default occurs, we may not have sufficient funds to fulfill our obligations under the amortizing notes.

The amortizing notes are unsecured obligations, ranking equally with our other senior unsecured indebtedness and effectively junior to any existing and future secured indebtedness we may incur. The indenture that will govern the amortizing notes will not restrict our or our subsidiaries' ability to incur additional debt (including secured debt) and, if we do incur additional secured debt, our assets securing any such indebtedness will be subject to prior claims by our secured creditors. In the event of the bankruptcy, insolvency, liquidation, reorganization, dissolution or other winding up of the Company, our assets that secure debt will be available to pay obligations on the amortizing notes only after all debt secured by those assets has been repaid in full. Holders of the amortizing notes will participate in any remaining assets ratably with all of the Company's other unsecured and unsubordinated creditors, including trade creditors If there are not sufficient assets remaining to pay all creditors, then all or a portion of the amortizing notes then outstanding would remain unpaid. Additionally, if any portion of the amount payable on the amortizing notes upon acceleration is considered by a court to be unearned interest, the court could disallow recovery of any such portion. As of December 31, 2018, on a pro forma basis after giving effect to the Transactions, the Company would have had no secured indebtedness.

The amortizing notes are structurally subordinated to the liabilities of our subsidiaries, which will include the liabilities of Peoples and its subsidiaries if the Acquisition is consummated.

The amortizing notes are our obligations exclusively and not of any of our subsidiaries. Therefore, the amortizing notes will be structurally subordinated to all existing and future indebtedness and other liabilities of our subsidiaries (including, upon consummation of the Acquisition, indebtedness and other liabilities of LDC and its subsidiaries that we assume in connection with the Acquisition). Any right of the Company to receive assets of any of its subsidiaries upon the liquidation or reorganization thereof, and the consequent right of the holders of the amortizing notes to receive the proceeds of those assets, will be effectively subordinated to the claims of that subsidiary's creditors, except to the extent that the Company is itself recognized as a creditor of such subsidiary. If the Company is recognized as a creditor of such subsidiary, its claims would still be subordinate in right of payment to any security interest in the assets of that subsidiary and any indebtedness of that subsidiary senior to that held by the Company. At December 31, 2018, on a pro forma basis after giving effect to the Transactions, (i) Aqua America, Inc. would have had approximately $2,096 million of indebtedness outstanding, of which none would have been secured indebtedness and (ii) our subsidiaries (including LDC and its subsidiaries) would have had a total of approximately $5,856 million of outstanding liabilities, including indebtedness, owed to non-affiliated third parties.

Aqua America's ability to pay dividends and to meet its debt obligations largely depends on the performance of its subsidiaries and the ability to utilize the cash flows from those subsidiaries.

Aqua America is a holding company substantially all of whose assets are owned by its subsidiaries and substantially all of whose operations are conducted through its subsidiaries. Aqua America's ability to pay dividends and meet its debt and other obligations depends almost entirely on cash flows from its subsidiaries and, in the short term, its ability to raise capital from external sources. In the long term, cash flows from its subsidiaries depend on their ability to generate operating cash flows in excess of their own expenditures, common and preferred stock dividends (if any), and debt or other obligations. Its subsidiaries are separate and distinct legal entities that are not obligated to pay dividends or make loans or distributions to Aqua America (whether to enable Aqua America to pay dividends on its common stock, to pay principal and interest on its debt, to settle, repurchase or redeem its debt (including the amortizing notes) or other securities (including the purchase contracts), or to satisfy its other obligations). In addition, notwithstanding its controlling interest in such subsidiaries, many of them are limited in their ability to pay dividends or make loans or distributions to Aqua America, including, without limitation, as a result of legislation, regulation, court order, contractual restrictions and other restrictions or in times of financial distress. Likewise, certain of LDC and its subsidiaries face similar restrictions that, if the Acquisition is consummated, will limit their ability to pay dividends or make loans or distributions to Aqua America. As a result, the Company may not be able to cause its subsidiaries (including, following the Acquisition, LDC and its subsidiaries) and other entities to distribute funds or provide loans sufficient to enable it to pay dividends and meet its debt and other obligations.

The trading prices for the Units, the purchase contracts and the amortizing notes will be directly affected by the trading prices for our common stock, the general level of interest rates and our credit quality, each of which is impossible to predict.

It is impossible to predict whether the prices of our common stock, interest rates or our credit quality will rise or fall. The market price for our common stock has historically experienced, and may continue to experience, volatility, which could materially reduce our stock price and cause the market price of the Units to decline. In addition, the sale or issuance of substantial amounts of our common stock, or the perception that such sales or issuances could occur, could adversely affect the market price of our common stock and/or the Units. Shares of our common stock will be issuable upon settlement or redemption of the purchase contracts and the number of shares may be substantial. The settlement rates for the purchase contracts will be subject to certain anti-dilution adjustments that could increase, potentially significantly, the number of shares of our common stock issuable upon such settlement. Similarly, although CPPIB is currently subject to restrictions on resale, if the Private Placement is completed, a significant portion of our common stock will be available for resale into the market by a small number of investors following the expiration of such restrictions. The issuance or sale of shares, or the perception that such issuances or sales could occur, could adversely affect the market price of our common stock, even if our business is doing well. Any of the foregoing may also impair our ability to raise additional capital through the sale of our equity securities.

The market price of our common stock may be influenced by many factors, some of which are beyond our control, including the factors discussed above under "Forward-Looking Statements" and "Market and Industry Data" or elsewhere in this Risk Factors section and the following:

- actual or anticipated fluctuations in our operating results or our competitors' or peers' operating results;
- actions by applicable regulatory authorities, including the Pennsylvania Public Utility Commission;
- announcements by us, our competitors or our partners of significant contracts, acquisitions, divestitures or strategic investments;
- our growth rate and our competitors' or peers' growth rates;

- the financial markets and general economic conditions;
- changes in stock market analyst recommendations regarding us, our competitors, our peers or the energy infrastructure, gas and electricity services industries generally, or lack of analyst coverage of our common stock;
- sales of our common stock by our executive officers, directors and significant shareholders or sales of substantial amounts of our common stock or securities convertible into or exchangeable for our common stock;
- changes in the amount of our common stock dividends per share, the common stock dividends per share paid by our competitors and interest rates; and
- changes in tax laws and regulations.

The market for our common stock likely will influence, and be influenced by, any market that develops for the Units or the separate purchase contracts. For example, investors' anticipation of the distribution into the market of the additional shares of common stock issuable upon settlement of the purchase contracts could depress the price of our common stock and increase the volatility of the common stock price, which could in turn depress the price of the Units or the separate purchase contracts. The price of our common stock also could be affected by possible sales of such common stock by investors who view the Units as a more attractive means of equity participation in us and by hedging or arbitrage trading activity that is likely to develop involving the Units, separate purchase contracts and the common stock. Such hedging or arbitrage activity could, in turn, affect the trading prices of the Units, the separate purchase contracts and the common stock.

In addition, in general, as market interest rates rise, notes (such as the amortizing notes) bearing interest at a fixed rate generally decline in value because the premium, if any, over market interest rates will decline. Consequently, if you purchase Units and market interest rates increase, the market value of the amortizing notes forming a portion of the Units may decline. We cannot predict the future level of market interest rates.

Regulatory actions and other events may adversely affect the trading price and liquidity of the Units.

We expect that many investors in, and potential purchasers of, the Units will employ, or seek to employ, an equity-linked arbitrage strategy with respect to the Units. Investors would typically implement such a strategy by selling short the common stock underlying the Units and dynamically adjusting their short position while continuing to hold the Units. Investors may also implement this type of strategy by entering into swaps on our common stock in lieu of or in addition to short selling the common stock. As a result, any specific rules regulating equity swaps or short selling of securities or other governmental action that interferes with the ability of market participants to effect short sales or equity swaps with respect to our common stock would adversely affect the ability of investors in, or potential purchasers of, the Units to conduct the arbitrage strategy that we believe they will employ, or seek to employ, with respect to the Units. This could, in turn, adversely affect the trading price and liquidity of the Units.

The SEC and other regulatory and self-regulatory authorities have implemented various rules and taken certain actions, and may in the future adopt additional rules and take other actions, that may impact those engaging in short selling activity involving equity securities (including our common stock). Such rules and actions include Rule 201 of SEC Regulation SHO, the adoption by the Financial Industry Regulatory Authority, Inc. and the national securities exchanges of a "Limit Up-Limit Down" program, the imposition of market-wide circuit breakers that halt trading of securities for certain periods following specific market declines, and the implementation of certain regulatory reforms required by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. Any governmental or regulatory action that restricts the ability of investors in, or potential

purchasers of, the Units to effect short sales of our common stock, borrow our common stock or enter into swaps on our common stock could adversely affect the trading price and the liquidity of the Units.

In addition, if investors and potential purchasers seeking to employ an equity-linked arbitrage strategy are unable to borrow or enter into swaps on our common stock, in each case, on commercially reasonable terms, the trading price and liquidity of the Units may be adversely affected.

You may receive shares of common stock upon settlement or redemption of the purchase contracts that are lower in value than the price of the common stock just prior to the mandatory settlement date or acquisition redemption settlement date, as the case may be.

Because the applicable market value of the common stock is determined over (i) the 20 consecutive trading day period beginning on, and including, the 21st scheduled trading day immediately preceding April 30, 2022, in the case of settlement on the mandatory settlement date, or (ii) the five business day period ending on, and including, the trading day immediately preceding April 22, 2020 (or, if prior to such date, the Acquisition Agreement is terminated, the five business day period immediately following such date of termination), in the case of an acquisition termination redemption, the number of shares of common stock delivered for each purchase contract may, on the mandatory settlement date or the acquisition redemption settlement date, as the case may be, be greater than or less than the number of shares that would have been delivered based on the closing price (or VWAP) per share of the common stock on the last trading day in the related 20 or five trading day period. In addition, you will bear the risk of fluctuations in the market price of the shares of common stock deliverable upon settlement of the purchase contracts between the end of such period and the date such shares are delivered.

If you elect to settle your purchase contracts early, you may not receive the same return on your investment as purchasers whose purchase contracts are settled on the mandatory settlement date.

Holders of the Units or separate purchase contracts have the option to settle their purchase contracts early at any time beginning on, and including, the business day immediately following the date of initial issuance of the Units until the second scheduled trading day immediately preceding April 30, 2022. However, if you settle your purchase contracts prior to the second scheduled trading day immediately preceding April 30, 2022, you will receive for each purchase contract a number of shares of common stock equal to the minimum settlement rate, regardless of the current market value of our common stock, unless you elect to settle your purchase contracts early in connection with a fundamental change, in which case you will be entitled to settle your purchase contracts at the fundamental change early settlement rate, which may be greater than the minimum settlement rate. In either case, you may not receive the same return on your investment as purchasers whose purchase contracts are settled on the mandatory settlement date.

Upon issuance of the shares of common stock in the Common Stock Offering and the Private Placement and the issuance of the Units, our common stock will incur immediate dilution.

Upon the issuance of the shares of common stock in the Common Stock Offering and the Private Placement and the issuance of the Units, holders of our common stock will incur immediate and substantial net tangible book value dilution on a per share basis.

We expect that we will need to raise additional capital, and raising additional funds by issuing additional equity securities or with additional debt financing may cause dilution to shareholders or restrict our operations.

If and to the extent that any of the Common Stock Offering or the Private Placement is not completed, or such offerings are completed for less aggregate net proceeds than anticipated, we currently intend to fund any shortfall through the issuance of additional shares of common stock or equity-linked securities prior to the consummation of the Acquisition. However, if we are unable to issue such shares or equity-linked securities,

we would fund any shortfall with additional Debt Financings, which may include borrowings under the Bridge Facility and/or the Revolving Credit Facility. In addition, we expect that we will need to raise additional capital in the future in order to, among other things, repay indebtedness and fund our operations and future acquisitions, which we may do through equity and equity-linked securities offerings or additional debt financings, as well as borrowings under our credit facilities. Additional issuances of equity securities, including shares of our common stock, or debt or other securities that are convertible into or exchangeable for, or that represent the right to receive, common stock, including the Units, could dilute the economic and other rights and interests of holders of shares of our common stock and cause the market price of our common stock and/or the Units to decline. Subject to certain exceptions, such issuances may be made without any action or approval by our shareholders.

Any new debt financing we enter into may involve covenants that restrict our operations more than our current outstanding debt and credit facilities. These restrictive covenants could include limitations on additional borrowings, and specific restrictions on the use of our assets, as well as prohibitions or limitations on our ability to create liens, pay dividends, receive distributions from our subsidiaries, redeem or repurchase our stock or make investments. These covenants could hinder our access to capital markets and limit or delay our ability to carry out our capital expenditure program.

The fundamental change early settlement rate or the amount of cash and/or number of shares of our common stock paid or delivered, as the case may be, upon an acquisition termination redemption, may not adequately compensate you.

If a "fundamental change" occurs and you elect to exercise your fundamental change early settlement right, you will be entitled to settle your purchase contracts at the fundamental change early settlement rate. In addition, in connection with any acquisition termination redemption, upon redemption of the purchase contracts, you will be paid an amount of cash equal to the redemption amount (or, in certain circumstances, a number of shares of our common stock or any combination of cash and shares of our common stock). Although the fundamental change early settlement rate or the redemption amount, as the case may be, is designed to compensate you for the lost option value of your purchase contracts as a result of the early settlement of the purchase contracts, this feature may not adequately compensate you for such loss. In addition, if the stock price in the fundamental change is greater than $100.00 per share (subject to adjustment), this feature of the purchase contracts will not compensate you for any additional loss suffered in connection with a fundamental change. See "Description of the Purchase Contracts—Early Settlement Upon a Fundamental Change" and "Description of the Purchase Contracts—Acquisition Termination Redemption."

Our obligation to settle the purchase contracts at the fundamental change early settlement rate or to redeem the purchase contracts pursuant to an acquisition termination redemption could be considered a penalty, in which case the enforceability thereof would be subject to general principles of reasonableness of economic remedies.

The minimum settlement rate and maximum settlement rate of the purchase contracts may not be adjusted for all dilutive events and any adjustment may not be adequate compensation for lost value.

The minimum settlement rate and maximum settlement rate of the purchase contracts are subject to adjustment for certain events, including, but not limited to, certain dividends on our common stock, the issuance of certain rights, options or warrants to holders of our common stock, subdivisions or combinations of our common stock, certain distributions of assets, debt securities, capital stock or cash to holders of our common stock and certain tender offers or exchange offers, as described under "Description of the Purchase Contracts—Adjustments to the Fixed Settlement Rates" in this prospectus supplement. The minimum settlement rate, maximum settlement rate, reference price and threshold appreciation price will not be adjusted for other events that may adversely affect the trading price of the purchase contracts or the Units and the market price of our common stock, such as employee stock options grants, offerings of our common stock for cash (including pursuant to the Common Stock Offering), certain exchanges of our common stock for our other securities or in

connection with acquisitions and other transactions. The terms of the Units and the separate purchase contracts do not restrict our ability to engage in these activities, and events may occur that are adverse to the interests of the holders of the purchase contracts or the Units and their value, but that do not result in an adjustment to the minimum settlement rate, maximum settlement rate, reference price and threshold appreciation price, or that result in an adjustment that is not adequate compensation for lost value.

Until the purchase contracts are settled with, or redeemed for, common stock, you will not be entitled to any rights with respect to our common stock, but you will be subject to all changes made with respect to our common stock.

Until the date on which you are treated as the record holder of common stock on account of a redemption or settlement of the purchase contracts for or with, as the case may be, common stock, you will not be entitled to any rights with respect to our common stock, including voting rights and rights to receive any dividends or other distributions on our common stock, but you will be subject to all changes affecting the common stock. You will be treated as the record holder of any shares of our common stock issuable upon settlement or redemption of the purchase contracts only as follows:

- in the case of (x) settlement of purchase contracts on the mandatory settlement date or (y) an acquisition termination redemption if the acquisition termination stock price is greater than the reference price and we elect to pay cash in lieu of delivering a portion of any shares of common stock that would otherwise be included in the redemption amount, as of 5:00 p.m., New York City time, on the last trading day of the 20 consecutive trading day period during which the applicable market value or redemption market value, as the case may be, is determined;

- in the case of settlement of purchase contracts in connection with any early settlement at the holder's option, as of 5:00 p.m., New York City time, on the early settlement date;

- in the case of settlement of purchase contracts following exercise of a holder's fundamental change early settlement right, as of 5:00 p.m., New York City time, on the fundamental change early settlement date;

- in the case of settlement of purchase contracts following exercise by us of our early mandatory settlement right, as of 5:00 p.m., New York City time, on the notice date; and

- in the case of an acquisition termination redemption where we elect (or are deemed to have elected) to settle the redemption amount solely by delivering shares of common stock, as of 5:00 p.m., New York City time, on the date of the acquisition redemption notice.

For example, in the event that an amendment is proposed to our amended and restated articles of incorporation or amended and restated bylaws requiring stockholder approval and the record date for determining the stockholders of record entitled to vote on the amendment occurs prior to the date specified above on which you are treated as the record holder of the shares of our common stock, you will not be entitled to vote on the amendment, although you will nevertheless be subject to any changes in the powers, preferences or special rights of our common stock once you become a stockholder.

Some significant restructuring transactions may not constitute fundamental changes, in which case we would not be obligated to early settle the purchase contracts, and you will not have the right to require repurchase of your amortizing notes upon a fundamental change.

Upon the occurrence of specified fundamental changes, you will have the right to require us to settle the purchase contracts. You will not have the right to require repurchase of your amortizing notes upon a fundamental change, however. Additionally, the definition of "fundamental change" herein is limited to specified corporate

events and may not include other events that might adversely affect our financial condition or the value of the purchase contracts. For example, events such as leveraged recapitalizations, refinancings, restructurings or acquisitions initiated by us may not constitute a fundamental change requiring us to settle the purchase contracts at the applicable fundamental change early settlement rate. In the event of any such events, the holders of the purchase contracts would not have the right to require us to settle the purchase contracts at the applicable fundamental change early settlement rate, even though each of these transactions could increase the amount of our indebtedness, or otherwise adversely affect our capital structure or any credit ratings, thereby adversely affecting the trading price of the purchase contracts and/or the amortizing notes.

We may not have the ability to raise the funds necessary to repurchase the amortizing notes following the exercise of our early mandatory settlement right or in connection with an acquisition termination redemption, and our debt outstanding at that time may contain limitations on our ability to repurchase the amortizing notes.

If we elect to exercise our early mandatory settlement right or effect an acquisition termination redemption, holders of the amortizing notes will have the right to require us to repurchase the amortizing notes on the repurchase date at the repurchase price described under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder." However, we may not have enough available cash or be able to obtain financing at the time we are required to make repurchases of amortizing notes surrendered for repurchase. In addition, our ability to pay the relevant repurchase price for the amortizing notes may be limited by agreements governing our current and future indebtedness. Our failure to repurchase amortizing notes at a time when the repurchase is required by the indenture would constitute a default under the indenture. A default under the indenture could also lead to a default under agreements governing our indebtedness outstanding at that time. If the repayment of the related indebtedness were to be accelerated after any applicable notice or grace periods, we may not have sufficient funds to repay the indebtedness and the repurchase price for the amortizing notes.

The secondary market for the Units, the purchase contracts and the amortizing notes may be illiquid.

We have applied to list the Units on the NYSE under the symbol "WTRU", subject to satisfaction of its minimum listing standards with respect to the Units. However, we cannot assure you that the Units will be approved for listing. If the Units are approved for listing, we expect that the Units will begin trading on the NYSE within 30 calendar days after the Units are first issued. In addition, the underwriters have advised us that they intend to make a market in the Units, but the underwriters are not obligated to do so. However, listing on the NYSE does not guarantee that a trading market will develop, and the underwriters may discontinue market making at any time in their sole discretion without prior notice to Unit holders. Accordingly we cannot assure you that a liquid trading market will develop for the Units (or, if developed, that a liquid trading market will be maintained), that you will be able to sell Units at a particular time or that the prices you receive when you sell will be favorable.

Beginning on the business day immediately succeeding the date of initial issuance of the Units, purchasers of Units will be able to separate each Unit into a purchase contract and an amortizing note. We are unable to predict how the separate purchase contracts or the separate amortizing notes will trade in the secondary market, or whether that market will be liquid or illiquid. We will not initially apply to list the separate purchase contracts or the separate amortizing notes on any securities exchange or automated inter-dealer quotation system, but we may apply to list such separate purchase contracts and separate amortizing notes in the future as described herein. If (i) a sufficient number of Units are separated into separate purchase contracts and separate amortizing notes and traded separately such that applicable listing requirements are met and (ii) a sufficient number of holders of such separate purchase contracts and separate amortizing notes request that we list such separate purchase contracts and separate amortizing notes, we may endeavor to list such separate purchase contracts and separate amortizing notes on an exchange of our choosing (which may or may not be the NYSE) subject to applicable listing requirements. However, even if we do so apply to list such separate purchase contracts or separate amortizing notes, we cannot assure you that such securities will be approved for listing.

The purchase contract agreement will not be qualified under the Trust Indenture Act, and the obligations of the purchase contract agent are limited.

The purchase contract agreement between us and the purchase contract agent will not be qualified as an indenture under the Trust Indenture Act of 1939, and the purchase contract agent will not be required to qualify as a trustee under the Trust Indenture Act. Thus, you will not have the benefit of the protection of the Trust Indenture Act with respect to the purchase contract agreement or the purchase contract agent. The amortizing notes constituting a part of the Units will be issued pursuant to an indenture, which has been qualified under the Trust Indenture Act. Accordingly, if you hold Units, you will have the benefit of the protections of the Trust Indenture Act only to the extent applicable to the amortizing notes. The protections generally afforded the holder of a security issued under an indenture that has been qualified under the Trust Indenture Act include:

- disqualification of the indenture trustee for "conflicting interests," as defined under the Trust Indenture Act;
- provisions preventing a trustee that is also a creditor of the issuer from improving its own credit position at the expense of the security holders immediately prior to or after a default under such indenture; and
- the requirement that the indenture trustee deliver reports at least annually with respect to certain matters concerning the indenture trustee and the securities.

The U.S. federal income tax consequences relating to the Units are uncertain.

The Units are complex financial instruments and no statutory, judicial or administrative authority directly addresses all aspects of the treatment of the Units or instruments similar to the Units for U.S. federal income tax purposes, and no assurance can be given that the Internal Revenue Service ("IRS") will agree with the tax consequences described herein. As a result, the U.S. federal income tax consequences of the purchase, ownership and disposition of the Units are unclear. We have not sought any rulings concerning the treatment of the Units, and the tax consequences described herein are not binding on the IRS or the courts, either of which could disagree with the explanations or conclusions contained in this summary. Accordingly, you should consult your tax advisor regarding the consequences to you of the possible recharacterization of the components of a Unit as a single instrument. See "Certain United States Federal Income and Estate Tax Consequences."

You may be subject to tax upon an adjustment to the settlement rate of the purchase contracts even though you do not receive a corresponding cash distribution.

You might be treated as receiving a constructive distribution from us if (i) the fixed settlement rates are adjusted and as a result of such adjustment your proportionate interest in our assets or earnings and profits is increased and (ii) the adjustment is not made pursuant to a bona fide, reasonable anti-dilution formula. An adjustment in the fixed settlement rates would not be considered made pursuant to such a formula if the adjustment were made to compensate you for taxable distributions with respect to our common stock (for example, if we increase the cash dividend on our common stock). Certain of the possible settlement rate adjustments (including, without limitation, adjustments in respect of taxable dividends to holders of our common stock and as discussed in "Description of the Purchase Contracts—Early Settlement Upon a Fundamental Change") may not qualify as being pursuant to a bona fide reasonable adjustment formula. Thus, under certain circumstances, an increase in the fixed settlement rates might give rise to a constructive distribution to you even though you would not receive any cash related thereto. In addition, in certain situations, you might be treated as receiving a constructive distribution if we fail to adjust the fixed settlement rates. Any constructive distribution will be taxable as a dividend, return of capital, or capital gain in accordance with the earnings and profits rules described below in "Certain United States Federal Income and Estate Tax Consequences—U.S. Holders—Common Stock Acquired under a Purchase Contract—Distributions" and "Certain United States Federal Income and Estate Tax Consequences—Non-U.S. Holders—U.S. Federal Income Tax." If you are a "non-U.S. holder"

(as defined in "Certain United States Federal Income and Estate Tax Consequences—Non-U.S. Holders"), a deemed dividend may be subject to U.S. federal withholding tax (currently at a 30% rate, or such lower rate as may be specified by an applicable income tax treaty), which may be withheld from shares of common stock or sales proceeds subsequently paid or credited to you. It is possible that U.S. withholding tax on deemed dividends would be withheld from any interest or other amounts paid to a non-U.S. holder. See "Certain United States Federal Income and Estate Tax Consequences—Non-U.S. Holders—U.S. Federal Withholding Tax."

Any adverse rating action with respect to the Units may cause their trading price to fall.

We do not intend to seek a rating on the Units. However, if a rating service were to rate the Units and if such rating service were to lower its rating on the Units below the rating initially assigned to the Units or otherwise announces its intention to put the Units on credit watch, the trading price of the Units could decline.

Anti-takeover provisions in our organizational documents and under Pennsylvania law might discourage, delay or prevent changes in control of our company and may result in an entrenchment of management and diminish the value of our common stock.

Certain provisions of our articles of incorporation and bylaws could have the effect of delaying, deterring or preventing another party from acquiring or seeking to acquire control of us. These provisions are intended to discourage certain types of coercive takeover practices and inadequate takeover bids and to encourage anyone seeking to acquire control of us to negotiate first with our board of directors. However, these provisions could also delay, deter or prevent a change of control or other takeover of our company that our shareholders might consider to be in their best interests, including transactions that might result in a premium being paid over the market prices of our common stock and Units, and may also limit the prices that investors are willing to pay in the future for our common stock and Units. These provisions may also have the effect of preventing changes in our management.

For example, our articles of incorporation and bylaws include anti-takeover provisions that:

- authorize our board of directors, without a vote or other action by our shareholders, to cause the issuance of preferred stock in one or more series and, with respect to each series, to fix the number of shares constituting that series and to establish the rights, preferences, privileges and restrictions of that series, which may include, among other things, dividend and liquidation rights and preferences, rights to convert such shares into common stock, voting rights and other rights which may adversely affect the voting or other rights and the economic interests of holders of our common stock and Units;

- require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law;

- establish advance notice requirements and procedures for shareholders to submit nominations of candidates for election to our board of directors and to propose other business to be brought before a shareholders meeting;

- provide that vacancies in our board of directors, including vacancies created by the removal of any director, or any increase in the number of directors may be filled by a majority of the directors then in office or by the sole remaining director;

- provide that no shareholder may cumulate votes in the election of directors, which means that the holders of a majority of our outstanding shares of common stock can elect all directors standing for election by our common shareholders;

- require that any action to be taken by our shareholders must be taken either (1) at a duly called annual or special meeting of shareholders or (2) by the unanimous written consent of all of our shareholders;

- require action by shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting in order for our shareholders to call a special meeting of shareholders; and

- provide that a state court located within Montgomery County, Pennsylvania (or, in the event such court lacks jurisdiction over such action or proceeding, the United States District Court for the Eastern District of Pennsylvania) will be the exclusive forum for the adjudication of certain disputes, including derivative actions.

In addition, anti-takeover provisions in Pennsylvania law could make it more difficult for a third party to acquire control of us including, but not limited to, provisions relating to (1) control share acquisitions, (2) disgorgement of profits by certain controlling persons, (3) business combination transactions with interested shareholders, and (4) the rights of shareholders to demand fair value for their stock following a control transaction. Pennsylvania law permits corporations to opt-out of these anti-takeover provisions, but we have not done so. Such provisions could have the effect of deterring takeovers or delaying changes in control or management of us. Additionally, such provisions could limit the price that some investors might be willing to pay in the future for shares of our common stock.

In addition, other debt financings may include certain terms that may have anti-takeover effects.

This offering is not conditioned upon the completion of the Acquisition. If the Acquisition is not consummated, we will have broad discretion on the use of the net proceeds of this offering.

This offering is not conditioned upon the completion of the Acquisition. Accordingly, your purchase of Units in this offering may be an investment in Aqua America on a stand-alone basis without any of the assets of Peoples or anticipated benefits of the Acquisition. We will have broad discretion to use the net proceeds of this offering if the Acquisition does not occur. If the Acquisition does not occur, we expect to use the net proceeds from this offering, after payment of any cash redemption amount and/or repurchase price (if applicable), for general corporate purposes, which may include the Company Debt Refinancing, the redemption of securities issued in connection with the other Financing Transactions, repurchases of our common stock, debt repayment, capital expenditures and investments. See “Use of Proceeds.”

We may be unable to, or may choose not to, continue to pay dividends on our common stock at current or planned rates or at all.

Any future payments of cash dividends, and the amount of any cash dividends we pay, on our common stock will depend on, among other things, our financial condition, capital requirements and results of operations, and the ability of our subsidiaries to distribute cash to us, as well as other factors that our board of directors may consider relevant. If we were to reduce the amount of cash dividends per share payable on our common stock, fail to increase the amount of those cash dividends per share in the future or cease paying those cash dividends altogether, it would likely have an adverse impact on the market price of our common stock and the Units. In addition, under Pennsylvania law, our board of directors (or an authorized committee thereof) may not declare and pay dividends on shares of our common stock if, after giving effect to the dividend (1) we would be unable to pay our debts as they become due in the ordinary course of business, or (2) our total assets would be less than the sum of our total liabilities plus the amount that would be needed, if we were to be dissolved as of the date for measuring the dividend, to satisfy the preferential rights upon dissolution of shareholders whose preferential rights are superior to those receiving the dividend.

USE OF PROCEEDS

We estimate that the net proceeds to us from this offering, after deducting underwriting discounts and estimated offering expenses, will be approximately $585.8 million (or approximately $673.7 million if the underwriters exercise their option to purchase additional Units in full).

We intend to use the net proceeds from this offering, together with net proceeds from the Common Stock Offering, the Private Placement and the Debt Financings, to (1) fund the Acquisition, (2) complete the redemption of approximately $314 million aggregate principal amount of the PPNs and (3) pay related costs and expenses as described below. In addition to the $1,009 million aggregate principal amount of Debt Financings we intend to incur to fund the Acquisition, complete the Company Debt Refinancing and pay related costs and expenses, we expect to incur $150 million aggregate principal amount of Debt Financings, the net proceeds of which we intend to use for general corporate purposes, including working capital and capital needs.

This offering and certain of the other Financing Transactions are not conditioned upon the consummation of any other Financing Transactions, the Acquisition or the Company Debt Refinancing. In addition, the indebtedness or other securities to be incurred or issued in certain of the Financing Transactions may not be incurred or issued, or may be redeemed, repaid, or repurchased, if the Acquisition is not consummated or is not consummated by a specified date. Even if the Acquisition, the Company Debt Refinancing and/or other Financing Transactions do not occur, the Units issued in this offering will remain outstanding (unless we elect to redeem the Units in the event the Acquisition does not occur by April 22, 2020 or the Acquisition Agreement is terminated prior to such date). If for any reason the Acquisition is not consummated, we expect we would use the net proceeds for this offering, after payment of any cash redemption amount and/or repurchase price (if applicable), for general corporate purposes, which may include the Company Debt Refinancing, the redemption of securities issued in connection with the other Financing Transactions, repurchases of our common stock, debt repayment, capital expenditures and investments. Pending application of the net proceeds of this offering for the foregoing purposes, the net proceeds may be invested temporarily in investment-grade securities or similar instruments, or be used to temporarily reduce borrowings under the Revolving Credit Facility.

The following table outlines the estimated sources and uses of funds for the Acquisition, the Company Debt Refinancing and the related costs and expenses. The actual net proceeds from the Financing Transactions and the costs and expenses related to the Transactions will likely vary from the estimates reflected in the following table. See "Summary Information–Recent Developments—Financing Transactions."

The following table does not reflect the sale of any shares or Units that may be sold to the underwriters of this offering or of the Common Stock Offering upon exercise of their respective options to purchase additional shares and Units. To the extent the underwriters exercise such options, we expect that the net proceeds from such sales will be used to fund a portion of the purchase price of the Acquisition, which would reduce, by a corresponding amount, the amount of the debt financings we expect to incur to fund a portion of the purchase price of the Acquisition.

Sources of Funds[1]		**Uses of Funds**	
	(in millions)		
Units offered hereby	$ 600	Cash Acquisition Consideration[2]	$ 2,905
Common Stock Offering	1,125	Company Debt Refinancing[3]	314
Private Placement	750	Transactions costs and expenses, including	
Debt Financings[4]	1,009	discounts and financing fees	265
Assumption of Peoples's existing debt	1,370	Assumption of Peoples's existing debt	1,370
Total sources of funds	$ 4,854	**Total uses of funds**	$ 4,854

(1) All amounts are estimated proceeds before underwriting discounts and offering expenses. If and to the extent that any of this offering, the Common Stock Offering or the Private Placement is not completed, or if the aggregate net proceeds from this offering, the Common Stock Offering and the Private Placement are less than the aggregate amount set forth in this table, we intend to fund any shortfall by issuing additional shares of common stock or equity-linked securities prior to the consummation of the Acquisition. However, if we are unable to issue such shares or equity-linked securities, we would fund any shortfall with additional debt financings, which may include borrowings under the Bridge Facility and/or the Revolving Credit Facility.

(2) Assumes the only adjustment to the Default Cash Acquisition Consideration is a reduction of $1,370 million based upon the assumption by the Company of $1,370 million aggregate principal amount of Peoples's indebtedness upon closing of the Acquisition. To the extent we assume less than $1,370 million aggregate principal amount of Peoples's existing indebtedness, we may issue additional shares of common stock, equity-linked securities and/or New Notes and/or incur borrowings under the Bridge Facility and/or the Revolving Credit Facility.

(3) In connection with the Acquisition and the Financing Transactions, we expect to redeem approximately $314 million in aggregate principal amount of our PPNs prior to the closing of the Acquisition. Estimated premiums payable in connection with the Company Debt Refinancing are included in "Transaction costs and expenses, including discounts and financing fees" above. The PPNs we intend to redeem in the Company Debt Refinancing have maturities ranging from 2019-2037 and interest rates ranging from 3.57-5.83%.

(4) In addition to the $1,009 million aggregate principal amount of Debt Financings we intend to incur to fund the Acquisition, complete the Company Debt Refinancing and pay related costs and expenses, we expect to incur $150 million aggregate principal amount of Debt Financings, the net proceeds of which we intend to use for general corporate purposes, including working capital and capital needs.

CAPITALIZATION

The following table sets forth our consolidated cash and cash equivalents and capitalization as of December 31, 2018:

- on an actual basis;
- on an as adjusted basis to give effect to this offering;
- on an as further adjusted basis to give effect to this offering and the Common Stock Offering; and
- on a pro forma basis to give effect to the Transactions, including this offering, the Common Stock Offering, the Acquisition, the Company Debt Refinancing, the Private Placement and the Debt Financings.

The following table does not reflect the sale of any Units that may be sold to the underwriters of this offering upon exercise of their option to purchase additional Units or the sale of any shares of common stock that may be sold to the underwriters of the Common Stock Offering upon exercise of their option to purchase additional shares in the Common Stock Offering. If such underwriters exercise their respective options to purchase additional Units and/or shares, we expect that the proceeds from such sales will be used to fund a portion of the purchase price of the Acquisition, which would reduce, by a corresponding amount, the amount of the Debt Financings we expect to incur to fund a portion of the purchase price of the Acquisition.

The completion of this offering is not conditioned upon the consummation of any of the other Transactions, including the Acquisition. Accordingly, investors should not place undue reliance on the as further adjusted and pro forma information included in this prospectus supplement because this offering is not conditioned upon the consummation of any of the other transactions reflected in such information. In addition, even if the Transactions are completed, actual amounts may vary from such information depending on several factors, including potential changes in our financing plans as a result of market conditions or the timing of the consummation of the Acquisition.

The following data are qualified in their entirety by our financial statements and related notes and other information incorporated by reference in this prospectus supplement and the accompanying prospectus. This table should be read in conjunction with “Summary Information–Recent Developments—Proposed Peoples Gas Acquisition,” “Risk Factors,” “Use of Proceeds,” and our pro forma and consolidated financial statements and related notes incorporated by reference in this prospectus supplement and the accompanying prospectus, and the other information contained in the documents incorporated by reference in this prospectus supplement and the accompanying prospectus.

(dollars in thousands)	Actual	As Adjusted for this Offering	As Further Adjusted for this Offering and the Common Stock Offering	Pro Forma for the Transactions
Cash and cash equivalents[1]	$ 3,627	$ 589,401	$ 1,687,741	$ 209,100
Debt:				
Long-term debt of subsidiaries[2]	$ 1,604,233	$ 1,604,233	$ 1,604,233	$ 1,604,233

Total stockholders' equity	$ 2,009,364	$ 2,494,092	$ 3,592,432	$ 4,276,794
Total capitalization	$ 4,573,024	$ 5,161,301	$ 6,259,641	$ 9,118,730

(1) As adjusted amount reflects the impact of the net proceeds of $585.8 million from this offering. As further adjusted amount additionally reflects the impact of the net proceeds of $1,098.3 million from the Common Stock Offering. The pro forma amount additionally reflects Peoples's cash balance of $13.7 million as of December 31, 2018, the estimated net proceeds from the Private Placement of $728.4 million and the estimated net proceeds of the Debt Financings of $1,149.4 million, less the estimated cash purchase price of Peoples of $2,945.8 million (see Note 6), the estimated amount of the Company Debt Refinancing of approximately $314 million (see Note 4) and additional estimated acquisition-related payments for expenses of $110.3 million. Cash and cash equivalents may increase or decrease depending on, among other things, actual costs and expenses incurred in connection with the Transactions.

(2) Such amounts do not include subsidiary debt that is reflected in "Privately placed notes" or in "Assumed Peoples's indebtedness".

(3) In December 2018, we entered into a five-year $550 million unsecured Revolving Credit Facility, which replaced our prior unsecured revolving credit facility. Subject to customary conditions, we may request that the lenders under the Revolving Credit Facility provide an incremental unsecured revolving credit facility of up to $450 million upon the closing of the Acquisition. As described below in note 6, at the closing of the Acquisition, we expect to borrow $270 million under the Revolving Credit Facility in order to repay $270 million under the Peoples's revolving credit facility that is expected to be assumed at the closing of the Acquisition and terminated).

(4) In connection with the Acquisition and the Financing Transactions, we expect to redeem approximately $314 million in aggregate principal amount of our PPNs, of which $150.9 million in aggregate principal amount is indebtedness of our subsidiaries, prior to the closing of the Acquisition.

(5) The pro forma amount of $1,159 million represents the assumed aggregate principal amount of the Debt Financings, including the $150 million aggregate principal amount we intend to use for general corporate purposes. If we do not consummate the Common Stock Offering or the Private Placement, or if such offerings are completed for less aggregate net proceeds than anticipated, we may issue additional shares of common stock or equity-linked securities prior to the consummation of the Acquisition. However, if we are unable to issue such shares or equity-linked securities, we would fund any shortfall with additional debt financings, which may include borrowings under the Bridge Facility and/or the Revolving Credit Facility.
We expect the terms of one or more series of New Notes issued in the Debt Financings will include a special mandatory redemption provision requiring us to redeem such New Notes if the Acquisition is not consummated by a specified date. If the Acquisition is not consummated, we do not expect to incur any borrowings under the Bridge Facility.

(6) The pro forma amount reflects approximately $1,329 million aggregate principal amount of Peoples's existing indebtedness expected to be assumed in connection with the Acquisition as of December 31, 2018. We expect the amount of such assumed debt will be $1,370 million as of the closing of the Acquisition. Of the $1,370 million of expected assumed Peoples's indebtedness at closing, $270 million is expected to be borrowings under the Peoples's revolving credit facility which is expected to be repaid at the closing of the Acquisition with borrowings under the Revolving Credit Facility and terminated.

(7) Each Unit will include an amortizing note. Approximately 17.3% of the stated amount of the Units, $103.5 million, is represented by the amortizing notes. If the Acquisition does not occur by April 22, 2020 or if the Acquisition Agreement is terminated prior to such date, we may elect to redeem all, but not less than all, of the outstanding purchase contracts in accordance with the terms thereof, in which case holders of Units would have the right to require us to repurchase their outstanding amortizing notes at the relevant repurchase price. See "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder."

(8) As further adjusted and pro forma share numbers and amounts ($16.2 million with respect to "Common stock" and $1,082.1 million with respect to "Capital in excess of par value") with respect to the Common Stock Offering reflect related underwriting discounts and estimated offering expenses.

The pro forma share number and amount also reflects the expected issuance of 21,661,095 shares of our common stock in the Private Placement at an offering price of $34.62 per share (an incremental $10.8 million with respect to "Common stock" and an incremental $717.6 million with respect to "Capital in excess of par value") and reflects placement agent fees and other estimated issuance costs. In addition to other closing conditions, the completion of the Private Placement is conditioned upon the completion of at least $1.6 billion in common stock and equity-linked securities offerings and the consummation of the Acquisition.

If and to the extent that any of this offering, the Common Stock Offering or the Private Placement is not completed, or if the aggregate net proceeds from such offerings is less than anticipated, we currently intend to issue additional shares of common stock or equity-linked securities prior to the consummation of the Acquisition. However, if we are unable to issue such shares or equity-linked securities, we would fund any shortfall with additional debt financings, which may include borrowings under the Bridge Facility and/or the Revolving Credit Facility.

Share numbers and amounts do not reflect shares of our common stock issuable upon settlement of the purchase contracts, shares of our common stock reserved for issuance upon exercise of stock options outstanding, shares of our common stock reserved for issuance upon vesting of our time based restricted stock units (including reinvested dividends), shares of our common stock reserved for issuance upon the vesting of our performance based restricted stock units or performance share units or additional shares we may issue under our dividend reinvestment program, employee stock purchase plan or 401(k) savings plans.

(9) Each Unit will include a purchase contract. We will account for the purchase contracts that are components of the Units as equity and will record the initial fair value of these purchase contracts, net of the related underwriting discounts and estimated offering expenses allocated to the purchase contracts, as capital in excess of par value, $484.7 million. The exact amount we record as capital in excess of par value will not be determined until our determination of the final offering expenses. See footnote (7) above. If the offering is completed but the Acquisition is not consummated, we may redeem all, but not less than all, of the outstanding purchase contracts by issuing a redemption notice during the five business day period immediately following the earlier of (x) the April 22, 2020 if the closing of the Acquisition has not occurred on or prior to such date and (y) the date on which the Acquisition Agreement is terminated. We will pay a redemption price to be determined based on our common stock price at the time in cash or in shares of our common stock in accordance with the terms of the purchase contracts. If we elect to redeem the purchase contracts, we may be required by the holders thereof to repurchase the amortizing notes at the repurchase price set forth in the amortizing notes as described under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder."

(10) The pro forma amount, a reduction of $44.1 million, reflects the payment of additional Acquisition-related expenses and the write-off of unamortized debt issuance costs.

LISTING OF OUR COMMON STOCK AND THE UNITS AND DIVIDENDS

Our common stock is listed on the NYSE under the symbol "WTR." As of March 31, 2019, there were (i) 178,369,078 shares of our common stock outstanding and (ii) options to acquire 1,112,210 shares of our common stock outstanding.

On April 17, 2019, the last reported sale price of our common stock on the NYSE was $34.82. As of December 31, 2018, there were approximately 23,476 holders of record of our common stock.

We have applied to list the Units on the NYSE under the symbol "WTRU", subject to satisfaction of its minimum listing standards with respect to the Units. We will not initially apply to list the separate purchase contracts or the separate amortizing notes on any securities exchange or automated inter-dealer quotation system, but we may apply to list such separate purchase contracts and separate amortizing notes in the future as described herein. Prior to this offering, there has been no public market for the Units.

We have historically paid quarterly dividends on our common stock; however, the declaration, amount, timing and payment of any future dividends are subject to the determination and approval of our board of directors based on then-current or anticipated future conditions including our results of operations, capital requirements, financial condition, legal requirements or other factors deemed relevant by our board of directors. See "Risk Factors—Risks Related to the Units, the Separate Purchase Contracts, the Separate Amortizing Notes and our Common Stock—We may be unable to, or may choose not to, continue to pay dividends on our common stock at current or planned rates or at all."

DESCRIPTION OF THE UNITS

We are offering 12,000,000 Units (or 13,800,000 Units if the underwriters exercise their option to purchase additional Units in full), each with a stated amount of $50.00. Each Unit is comprised of a prepaid stock purchase contract (a "purchase contract") issued by us and a senior amortizing note issued by us. The following summary of the terms of the Units, the summary of the terms of the purchase contracts set forth under the caption "Description of the Purchase Contracts" and the summary of the terms of the amortizing notes set forth under the caption "Description of the Amortizing Notes" in this prospectus supplement and under the caption "Description of Debt Securities" in the accompanying prospectus contain a description of certain terms of the Units and their components but are not complete and are subject to, and qualified in their entirety by reference to, the related contracts. We refer you to:

- the purchase contract agreement (the "purchase contract agreement"), to be dated the date of first issuance of the Units, to be entered into among us, U.S. Bank N.A., as purchase contract agent (the "purchase contract agent") and attorney-in-fact for the holders of purchase contracts from time to time, and U.S. Bank N.A., as trustee (the "trustee") under the indenture described below, pursuant to which the purchase contracts and Units will be issued; and

- the indenture between us, as issuer, and the trustee, and a related supplemental indenture, between us, as issuer, and U.S. Bank N.A., as trustee, each to be dated the date of first issuance of the Units, under which the amortizing notes will be issued.

The form of indenture has been filed as an exhibit to the registration statement of which this prospectus supplement forms a part, and a supplemental indenture related to a change in governing law to New York law, among other matters, and a supplemental indenture for the amortizing notes and the purchase contract agreement will be filed as exhibits to a current report on Form 8-K and incorporated by reference as exhibits to that registration statement. Whenever particular sections or defined terms are referred to, such sections or defined terms are incorporated herein by reference.

As used in this section, unless the context otherwise requires, references to "Aqua America," "we," "us" or "our" refer to Aqua America, Inc. and do not include any of its existing or future subsidiaries.

Components of the Units

Each Unit offered is comprised of:

- a prepaid stock purchase contract issued by us pursuant to which we will deliver to the holder, not later than 5:00 p.m., New York City time, on April 30, 2022 (subject to postponement in certain limited circumstances, the "mandatory settlement date"), unless earlier redeemed or settled, a number of shares of our common stock, par value $0.50 per share (the "common stock"), per purchase contract equal to the settlement rate described below under "Description of the Purchase Contracts—Delivery of Common Stock;" and

- a senior amortizing note issued by us with an initial principal amount of $8.62909 that pays equal quarterly installments of $0.75000 per amortizing note (except for the July 30, 2019 installment payment, which will be $0.80833 per amortizing note), which cash payment in the aggregate will be equivalent to 6.00% per year with respect to the $50.00 stated amount per Unit.

Unless previously settled at your option as described in "Description of the Purchase Contracts—Early Settlement" or "Description of the Purchase Contracts —Early Settlement Upon a Fundamental Change," settled at our option as described in "Description of the Purchase Contracts—Early Mandatory Settlement at Our Election" or redeemed at our option as described in "Description of the Purchase Contracts—Acquisition

Termination Redemption," we will deliver to you not more than 1.4442 shares and not less than 1.1790 shares of our common stock on the mandatory settlement date, based upon the applicable "settlement rate" (as defined under "Description of the Purchase Contracts—Delivery of Common Stock"), which is subject to adjustment as described herein, and the "applicable market value" (as defined under "Description of the Purchase Contracts—Delivery of Common Stock") of our common stock, as described below under "Description of the Purchase Contracts—Delivery of Common Stock."

Each amortizing note will have an initial principal amount of $8.62909. On each January 30, April 30, July 30 and October 30, commencing on July 30, 2019, we will pay equal cash installments of $0.75000 on each amortizing note (except for the July 30, 2019 installment payment, which will be $0.80833 per amortizing note). Each installment payment will constitute a payment of interest (at a rate of 3.00% per annum) and a partial repayment of principal on the amortizing note, allocated as set forth on the amortization schedule set forth under "Description of the Amortizing Notes—Amortization Schedule."

The stated amount of each Unit must be allocated between the amortizing note and the purchase contract based upon their relative fair market values. We have determined that the fair market value of each amortizing note is $8.62909 and the fair market value of each purchase contract is $41.37091, as set forth in the purchase contract agreement. Each holder agrees to such allocation and this position will be binding upon each holder (but not on the Internal Revenue Service).

Separating and Recreating Units

Upon the conditions and under the circumstances described below, a holder of a Unit will have the right to separate a Unit into its component parts, and a holder of a separate purchase contract and a separate amortizing note will have the right to combine the two components to recreate a Unit.

Separating Units

At initial issuance, the purchase contracts and amortizing notes may be purchased and transferred only as Units and will trade under the CUSIP number for the Units.

On any business day during the period beginning on, and including, the business day immediately following the date of initial issuance of the Units to, but excluding, the second scheduled trading day immediately preceding April 30, 2022 or, if earlier, the second scheduled trading day immediately preceding any "early mandatory settlement date" (as defined under "Description of the Purchase Contracts") or the second scheduled trading day immediately preceding any "acquisition redemption settlement date" (as defined under "Description of the Purchase Contracts") and also excluding the business day immediately preceding any installment payment date (*provided*, the right to separate the Units shall resume after such business day), you will have the right to separate your Unit into its constituent purchase contract and amortizing note (which we refer to as a "separate purchase contract" and a "separate amortizing note," respectively, and which will thereafter trade under their respective CUSIP numbers), in which case that Unit will cease to exist. If you beneficially own a Unit, you may separate it into its component purchase contract and component amortizing note by delivering written instructions to the broker or other direct or indirect participant through which you hold an interest in your Unit (your "participant") to notify The Depository Trust Company ("DTC") through DTC's Deposit/Withdrawal at Custodian ("DWAC") system of your desire to separate the Unit. Holders who elect to separate a Unit into its constituent purchase contract and amortizing note shall be responsible for any fees or expenses payable in connection with such separation.

"Business day" means any day other than a Saturday, Sunday or any day on which banking institutions in New York, New York are authorized or obligated by applicable law or executive order to close or be closed.

Separate purchase contracts and separate amortizing notes will be transferable independently from each other.

Recreating Units

On any business day during the period beginning on, and including, the business day immediately following the date of initial issuance of the Units to, but excluding, the second scheduled trading day immediately preceding April 30, 2022 or, if earlier, the second scheduled trading day immediately preceding any early mandatory settlement date or the second scheduled trading day immediately preceding any acquisition redemption settlement date and also excluding the business day immediately preceding any installment payment date (*provided*, the right to recreate the Units shall resume after such business day), you may recreate a Unit from your separate purchase contract and separate amortizing note. If you beneficially own a separate purchase contract and a separate amortizing note, you may recreate a Unit by delivering written instruction to your participant to notify DTC through DTC's DWAC system of your desire to recreate the Unit. Holders who elect to recreate Units shall be responsible for any fees or expenses payable in connection with such recreation.

Global Securities

Your Unit, purchase contract and amortizing note will be represented by global securities registered in the name of a nominee of DTC. You will not be entitled to receive definitive physical certificates for your Units, purchase contracts or amortizing notes, except under the limited circumstances described under "Book-Entry Procedures and Settlement." Beneficial interests in a Unit and, after separation, the separate purchase contract and separate amortizing note will be represented through book-entry accounts of, and transfers will be effected through, direct or indirect participants in DTC.

Deemed Actions by Holders by Acceptance

Each holder of Units or separate purchase contracts, by acceptance of such securities, will be deemed to have:

- irrevocably authorized and directed the purchase contract agent to execute, deliver and perform on its behalf the purchase contract agreement, and appointed the purchase contract agent as its attorney-in-fact for any and all such purposes;
- in the case of a purchase contract that is a component of a Unit, or that is evidenced by a separate purchase contract, irrevocably authorized and directed the purchase contract agent to execute, deliver and hold on its behalf the separate purchase contract or the component purchase contract evidencing such purchase contract, and appointed the purchase contract agent as its attorney-in-fact for any and all such purposes;
- consented to, and agreed to be bound by, the terms and provisions of the purchase contract agreement; and
- represented that either (i) no portion of the assets used to acquire or hold the Units, common stock issuable on upon settlement of the purchase contracts or amortizing notes constitutes assets of any (a) employee benefit plans that are subject to Title I of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), (b) plan, individual retirement account or other arrangement that is subject to Section 4975 of the Internal Revenue Code of 1986, as amended (the "Code") or provisions under any other U.S. or non-U.S. federal, state, local or other laws or regulations that are similar to such provisions of ERISA or the Code (collectively, "Similar Laws"), or (c) entity which is deemed to hold the assets of any of the foregoing types of plans, accounts or arrangements described in clauses (a) and (b) (each of the foregoing described in clause (a), (b) and (c) referred to as a "Plan") or (ii) (1) the acquisition and holding of the Units, common stock issuable upon settlement of the purchase contracts or amortizing notes and any of its constituent parts will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or a similar violation under any applicable Similar Laws and (2) neither Aqua America, the underwriters or any of their respective affiliates is, or is undertaking to be, a fiduciary with respect to the Plan in connection

with the Plan's acquisition, holding or disposition of the Units, common stock issuable upon settlement of the purchase contracts or amortizing notes, as applicable;

- in the case of a holder of a Unit, agreed, for all purposes, including U.S. federal income tax purposes, to treat:
  - a Unit as an investment unit composed of two separate instruments, in accordance with its form;
  - the amortizing notes as indebtedness of ours; and
  - the allocation of the $50.00 stated amount per Unit between the purchase contract and the amortizing note so that such holder's initial tax basis in each purchase contract will be $41.37091 and such holder's initial tax basis in each amortizing note will be $8.62909.

Listing of Securities

We have applied to list the Units on the NYSE under the symbol "WTRU," subject to satisfaction of its minimum listing standards with respect to the Units. However, we can give no assurance that the Units will be so listed. If the Units are approved for listing, we expect that the Units will begin trading on the NYSE within 30 calendar days after the Units are first issued. In addition, the underwriters have advised us that they intend to make a market in the Units, but the underwriters are not obligated to do so. However, listing on the NYSE does not guarantee that a trading market will develop, and the underwriters may discontinue market making at any time in their sole discretion without notice. Accordingly, we cannot assure you that a liquid trading market will develop for the Units (or, if developed, that a liquid trading market will be maintained), that you will be able to sell Units at a particular time or that the prices you receive when you sell will be favorable.

We will not initially apply to list the separate purchase contracts or the separate amortizing notes on any securities exchange or automated inter-dealer quotation system. If (i) a sufficient number of Units are separated into separate purchase contracts and separate amortizing notes and traded separately such that applicable listing requirements are met and (ii) a sufficient number of holders of such separate purchase contracts and separate amortizing notes request that we list such separate purchase contracts and separate amortizing notes, we may endeavor to list such separate purchase contracts and separate amortizing notes on an exchange of our choosing (which may or may not be the NYSE) subject to applicable listing requirements.

Our common stock is listed on the NYSE under the symbol "WTR." We have applied to have the shares of our common stock deliverable upon settlement of all purchase contracts approved for listing on the NYSE.

Title

We, the purchase contract agent and the trustee will treat the registered owner, which we expect at initial issuance to be a nominee of DTC, of any Unit or separate purchase contract or separate amortizing note as the absolute owner of the Unit or separate purchase contract or separate amortizing note for the purpose of settling the related purchase contract or making payments on the separate amortizing note and for all other purposes.

Accounting for the Units

We expect to record the issuance of the purchase contract portion of the Units as additional paid-in-capital, net of issuance costs of the purchase contracts, in our financial statements. We also expect to record the amortizing notes portion of the Units as long-term debt and to record the issuance costs of the amortizing notes as an adjustment to the carrying amount of the amortizing notes. The amortization of the amortizing notes will be

calculated using the effective interest method over the life of the amortizing notes. We will allocate the proceeds from the issuance of the Units to the purchase contracts and amortizing notes based on the relative fair values of the respective components, determined as of the date of issuance of the Units. We have determined that the allocation of the purchase price of each Unit as between the amortizing note and the purchase contract will be $8.62909 for the amortizing note and $41.37091 for the purchase contract, as set forth in the purchase contract agreement.

Based on the expected structure of the Units, Aqua America expects the purchase contracts to meet equity classification, which has been reflected as such in the unaudited pro forma consolidated combined balance sheet presented in "Unaudited Pro Forma Consolidated Combined Financial Information" included or incorporated by reference in this prospectus supplement. The classification of the Units will be subject to detailed assessment once finalized and a different conclusion may result in a material impact on the information presented in "Unaudited Pro Forma Consolidated Combined Financial Information" included or incorporated by reference in this prospectus supplement.

Based on U.S. GAAP, we do not expect the purchase contract component of the Units to be revalued under fair value accounting principles.

Our earnings per share calculations will reflect the shares issuable upon settlement of the purchase contracts portion of the Units. Our basic earnings per share will include the minimum shares issuable under the purchase contract for each period and our diluted earnings per share will include any incremental shares that would be issuable assuming a settlement of the purchase contract at the end of each accounting period, if dilutive.

Replacement of Unit Certificates

In the event that physical certificates evidencing the Units have been issued, any mutilated Unit certificate will be replaced by us at the expense of the holder upon surrender of the certificate to the purchase contract agent. Unit certificates that become destroyed, lost or stolen will be replaced by us at the expense of the holder upon delivery to us and the purchase contract agent of evidence of their destruction, loss or theft satisfactory to us and the purchase contract agent. In the case of a destroyed, lost or stolen Unit certificate, an indemnity satisfactory to us and the purchase contract agent may be required at the expense of the holder of the Units before a replacement will be issued.

Notwithstanding the foregoing, we will not be obligated to replace any Unit certificates on or after the second scheduled trading day immediately preceding April 30, 2022 or the second scheduled trading day immediately preceding any early mandatory settlement date or the second scheduled trading day immediately preceding any acquisition redemption settlement date. In those circumstances, the purchase contract agreement will provide that, in lieu of the delivery of a replacement Unit certificate, the purchase contract agent, upon delivery of the evidence and indemnity described above, will deliver or arrange for delivery of the shares of common stock issuable (and/or, in the case of an acquisition redemption settlement date, make the required cash payment, if any) pursuant to the purchase contracts included in the Units evidenced by the Unit certificate.

Miscellaneous

The purchase contract agreement will provide that we will pay all fees and expenses related to the offering of the Units and the enforcement by the purchase contract agent of the rights of the holders of the Units or the separate purchase contracts or separate amortizing notes, other than expenses (including legal fees) of the underwriters.

Should you elect to separate or recreate Units, you will be responsible for any fees or expenses payable in connection with that separation or recreation, and we will have no liability therefor.

DESCRIPTION OF THE PURCHASE CONTRACTS

The purchase contracts will be issued pursuant to the terms and provisions of the purchase contract agreement. The following summary of the terms of the purchase contracts contains a description of certain terms of the purchase contracts, but is not complete and is subject to, and is qualified in its entirety by reference to, all of the provisions of the purchase contract agreement, including the definitions of specified terms in the purchase contract agreement. We refer you to the purchase contract agreement which will be filed as an exhibit to a current report on Form 8-K and incorporated by reference as an exhibit to the registration statement of which this prospectus supplement forms a part. See "Where You Can Find More Information."

Each purchase contract will initially form a part of a Unit. Each Unit may be separated by a holder into its constituent purchase contract and amortizing note on any business day during the period beginning on, and including, the business day immediately following the date of initial issuance of the Units to, but excluding, the second scheduled trading day immediately preceding April 30, 2022 or, if earlier, the second scheduled trading day immediately preceding any "early mandatory settlement date" or the second scheduled trading day immediately preceding any "acquisition redemption settlement date," and also excluding the business day immediately preceding any installment payment date (*provided*, the right to separate the Units shall resume after such business day). Following such separation, purchase contracts may be transferred separately from amortizing notes.

As used in this section, unless the context otherwise requires, references to:

- "Aqua America," "we," "us" or "our" refer to Aqua America, Inc. and do not include any of its existing or future subsidiaries;
- "close of business" refer to 5:00 p.m., New York City time; and
- "open of business" refer to 9:00 a.m., New York City time.

Delivery of Common Stock

Unless previously redeemed or settled early at your or our option, for each purchase contract we will deliver to you on April 30, 2022 (subject to postponement in certain limited circumstances described below, the "mandatory settlement date") a number of shares of our common stock. The number of shares of our common stock issuable upon settlement of each purchase contract (the "settlement rate") will be determined as follows:

- if the "applicable market value" (as defined below) of our common stock is greater than the "threshold appreciation price" (as defined below), then you will receive 1.1790 shares of common stock for each purchase contract (the "minimum settlement rate");
- if the applicable market value of our common stock is less than or equal to the threshold appreciation price but greater than or equal to the "reference price" (as defined below), then you will receive a number of shares of common stock for each purchase contract equal to the Unit stated amount of $50.00, *divided by* the applicable market value; and
- if the applicable market value of our common stock is less than the reference price, then you will receive 1.4442 shares of common stock for each purchase contract (the "maximum settlement rate").

The maximum settlement rate and the minimum settlement rate are each subject to adjustment as described under "—Adjustments to the Fixed Settlement Rates" below. Each of the minimum settlement rate and the maximum settlement rate is referred to as a "fixed settlement rate."

The reference price is calculated by dividing $50.00 by the then applicable maximum settlement rate and initially is approximately equal to $34.62, which is the per share public offering price of our common stock in the concurrent common stock offering.

The threshold appreciation price is calculated by dividing $50.00 by the then applicable minimum settlement rate. The threshold appreciation price, which is initially approximately $42.41, represents a premium of approximately 22.5% over the reference price.

"Applicable market value" means the arithmetic average of the VWAP per share of our common stock over the settlement period.

"Settlement period" means the 20 consecutive trading day period beginning on, and including, the 21st scheduled trading day immediately preceding April 30, 2022.

"VWAP" per share of our common stock on any trading day means the per share volume-weighted average price as displayed under the heading "Bloomberg VWAP" on Bloomberg (or any successor service) page "WTR <Equity> AQR" (or its equivalent successor if such page is not available) in respect of the period from the scheduled open until the scheduled close of trading of the primary trading session on such trading day; or, if such price is not available, the market value per share of our common stock on such trading day as determined, using a volume-weighted average method, by a nationally recognized independent investment banking firm retained by us for this purpose. For the avoidance of doubt, "VWAP" will be determined without regard to after hours trading or any other trading outside of the regular trading session trading hours.

"Trading day" means a day on which:

- there is no "market disruption event" (as defined below); and
- trading in our common stock (or other security for which a VWAP must be determined) generally occurs on the relevant stock exchange (as defined below);

provided, that if our common stock (or such other security) is not so listed or traded, "trading day" means a "business day."

"Relevant stock exchange" means the NYSE or, if our common stock (or other security for which a VWAP or closing price must be determined) is not then listed on the NYSE, on the principal other U.S. national or regional securities exchange on which our common stock (or such other security) is then listed or, if our common stock (or such other security) is not then listed on a U.S. national or regional securities exchange, on the principal other market on which our common stock (or such other security) is then listed or admitted for trading.

"Scheduled trading day" means a day that is scheduled to be a trading day on the relevant stock exchange. If our common stock (or other such security) is not listed or admitted for trading on a relevant stock exchange, "scheduled trading day" means a "business day."

"Market disruption event" means:

- a failure by the relevant stock exchange to open for trading during its regular trading session; or
- the occurrence or existence on the relevant stock exchange prior to 1:00 p.m., New York City time, on any scheduled trading day for our common stock (or such other security) for more than one half-hour period in the aggregate during regular trading hours of any suspension or limitation imposed on trading (by reason of movements in price exceeding limits permitted by the relevant stock exchange or otherwise) in our common stock (or such other security) or in any options contracts or futures contracts relating to our common stock (or such other security).

On the mandatory settlement date, our common stock will be issued and delivered to you or your designee, upon:

- surrender of certificates representing the purchase contracts, if such purchase contracts are held in certificated form; and
- payment by you of any transfer or similar taxes payable in connection with the issuance of our common stock to any person other than you.

As long as the purchase contracts are evidenced by one or more global purchase contract certificates deposited with DTC, procedures for settlement will be governed by DTC's applicable procedures.

If one or more of the 20 consecutive scheduled trading days in the settlement period is not a trading day, the mandatory settlement date will be postponed until the second scheduled trading day immediately following the last trading day of the settlement period.

Prior to the close of business on the last trading day of the settlement period, the shares of common stock underlying each purchase contract will not be outstanding, and the holder of such purchase contract will not have any voting rights, rights to dividends or other distributions or other rights of a holder of our common stock by virtue of holding such purchase contract. The person in whose name any shares of our common stock shall be issuable upon settlement of the purchase contract on the mandatory settlement date will be treated as the holder of record of such shares as of the close of business on the last trading day of the settlement period.

We will pay any documentary, stamp or similar issue or transfer tax due on the issue of any shares of our common stock upon settlement or redemption of the purchase contracts, unless the tax is due because the holder requests any shares to be issued in a name other than the holder's name, in which case the holder will be obligated to pay that tax.

Hypothetical Settlement Values

For illustrative purposes only, the following table shows the number of shares of common stock issuable upon settlement of a purchase contract at assumed applicable market values. The table assumes that there will be no adjustments to the fixed settlement rates described under "—Adjustments to the Fixed Settlement Rates" below and that the purchase contracts have not been redeemed as described under "—Acquisition Termination Redemption" below or settled early at the option of holders or at our option as described under "—Early Settlement," "—Early Settlement Upon a Fundamental Change" or "—Early Mandatory Settlement at Our Election" below. The actual applicable market value may differ from those set forth in the table below. Based on a reference price of approximately $34.62 and a threshold appreciation price of approximately $42.41, a holder of a Unit or a separate purchase contract, as applicable, would receive on the mandatory settlement date the number of shares of common stock for each Unit or separate purchase contract set forth below:

Assumed Applicable Market Value	Number of Shares of Common Stock to be Received on the Mandatory Settlement Date	Assumed Settlement Value (Calculated as Applicable Market Value multiplied by the Number of Shares of Common Stock to be received on the Mandatory Settlement Date)
$ 10.00	1.4442	$ 14.44
$ 15.00	1.4442	$ 21.66
$ 20.00	1.4442	$ 28.88
$ 25.00	1.4442	$ 36.11
$ 30.00	1.4442	$ 43.33
$ 32.00	1.4442	$ 46.21
$ 34.62	1.4442	$ 50.00
$ 37.00	1.3514	$ 50.00
$ 39.00	1.2821	$ 50.00
$ 41.00	1.2195	$ 50.00
$ 42.41	1.1790	$ 50.00
$ 45.00	1.1790	$ 53.06
$ 47.00	1.1790	$ 55.41
$ 50.00	1.1790	$ 58.95
$ 60.00	1.1790	$ 70.74
$ 70.00	1.1790	$ 82.53
$ 80.00	1.1790	$ 94.32
$ 90.00	1.1790	$106.11
$100.00	1.1790	$117.90

As the above table illustrates, if, on the mandatory settlement date, the applicable market value is greater than the threshold appreciation price, we would be obligated to deliver 1.1790 shares of common stock for each purchase contract. As a result, if the applicable market value exceeds the threshold appreciation price, you will receive only a portion of the appreciation in the market value of the shares of our common stock you would have received had you purchased $50.00 worth of shares of common stock at the public offering price in the concurrent common stock offering.

If, on the mandatory settlement date, the applicable market value is less than or equal to the threshold appreciation price but greater than or equal to the reference price of approximately $34.62, we would be obligated to deliver a number of shares of our common stock on the mandatory settlement date equal to $50.00, *divided by* the applicable market value. As a result, we would retain all appreciation in the market value of our common stock underlying each purchase contract between the reference price and the threshold appreciation price.

If, on the mandatory settlement date, the applicable market value is less than the reference price of approximately $34.62, we would be obligated to deliver upon settlement of the purchase contract 1.4442 shares of common stock for each purchase contract, regardless of the market price of our common stock. As a result, the holder would realize the entire loss on the decline in market value of the common stock underlying each purchase contract since the date of the pricing of Units.

Because the applicable market value of the common stock is determined over the settlement period, the number of shares of common stock delivered for each purchase contract may be greater than or less than the number that would have been delivered based on the closing price (or VWAP) per share of the common stock on the last trading day in the settlement period. In addition, you will bear the risk of fluctuations in the market price

of the shares of common stock deliverable upon settlement of the purchase contracts between the last trading day in the settlement period and the date such shares are delivered.

Early Settlement

Prior to the close of business on the second scheduled trading day immediately preceding April 30, 2022, you, as a holder of Units or a holder of separate purchase contracts, may elect to settle your purchase contracts early, in whole or in part, and receive a number of shares of common stock per purchase contract equal to the "early settlement rate" (and any cash payable for fractional shares). The early settlement rate is equal to the minimum settlement rate in effect on the early settlement date unless you elect to settle your purchase contracts early in connection with a fundamental change, in which case you will receive upon settlement of your purchase contracts a number of shares of our common stock based on the "fundamental change early settlement rate" as described under "— Early Settlement Upon a Fundamental Change."

Your right to receive common stock (and any cash payable for fractional shares) upon early settlement of a purchase contract is subject to:

- delivery of a written and signed notice of election (an "early settlement notice") to the purchase contract agent electing early settlement of such purchase contract;
- if the Unit that includes such purchase contract or such purchase contract is held in certificated form, surrendering the certificates representing the purchase contract, or if held in global form, surrendering in accordance with DTC's applicable procedures; and
- payment by you of any transfer or similar taxes payable in connection with the issuance of our common stock to any person other than you.

As long as the purchase contracts or the Units are evidenced by one or more global certificates deposited with DTC, procedures for early settlement will be governed by DTC's applicable procedures.

Upon surrender of the Unit or the separate purchase contract and payment of any applicable transfer or similar taxes due because of any issue of such shares in a name of a person other than the holder, you will receive the applicable number of shares of common stock (and any cash payable for fractional shares) due upon early settlement on the second business day following the "early settlement date" (as defined below).

If you comply with the requirements for effecting early settlement of your purchase contracts earlier than the close of business on any business day, then that day will be considered the "early settlement date." If you comply with such requirements at or after the close of business on any business day or at any time on a day that is not a business day, then the next succeeding business day will be considered the "early settlement date." Prior to the close of business on the early settlement date, the shares of common stock underlying each purchase contract will not be outstanding, and the holder of such purchase contract will not have any voting rights, rights to dividends or other distributions or other rights of a holder of our common stock by virtue of holding such purchase contract. The person in whose name any shares of our common stock shall be issuable upon such early settlement of the purchase contract will be treated as the holder of record of such shares as of the close of business on the relevant early settlement date.

Upon early settlement at the holder's election of the purchase contract component of a Unit, the amortizing note underlying such Unit will remain outstanding and be beneficially owned by or registered in the name of, as the case may be, the holder who elected to settle the related purchase contract early and will no longer constitute a part of the Unit.

Early Settlement Upon a Fundamental Change

If a "fundamental change" occurs and you elect to settle your purchase contracts early in connection with such fundamental change, you will receive per purchase contract a number of shares of our common stock (and any cash payable for fractional shares) (or, if a reorganization event has occurred, cash, securities or other property, as applicable) equal to the "fundamental change early settlement rate," as described below. An early settlement will be deemed for these purposes to be "in connection with" such fundamental change if you deliver your early settlement notice to the purchase contract agent, and otherwise satisfy the requirements for effecting early settlement of your purchase contracts, during the period beginning on, and including, the effective date of the fundamental change and ending at the close of business on the 35th business day thereafter (or, if earlier, the second scheduled trading day immediately preceding April 30, 2022) (the "fundamental change early settlement period"). We refer to this right as the "fundamental change early settlement right."

A holder's right to common stock (and any cash payable for fractional shares) (or, if a reorganization event has occurred, cash, securities or other property, as applicable) upon early settlement in connection with a fundamental change is subject to compliance with the conditions described under "—Early Settlement."

Upon surrender of the Unit or the separate purchase contract and payment of any applicable transfer or similar taxes due because of any issue of such shares in a name of a person other than the holder, you will receive the applicable number of shares of common stock (and any cash payable for fractional shares) (or, if a reorganization event has occurred, cash, securities or other property, as applicable) issuable as a result of your exercise of the fundamental change early settlement right on the second business day following the "fundamental change early settlement date" (as defined below).

If you comply with the requirements for effecting early settlement of your purchase contracts in connection with a fundamental change prior to the close of business on any business day during the fundamental change early settlement period, then that day will be considered the "fundamental change early settlement date." If you comply with such requirements at or after the close of business on any business day during the fundamental change early settlement period or at any time on a day during the fundamental change early settlement period that is not a business day, then the next succeeding business day will be considered the "fundamental change early settlement date."

We will provide the purchase contract agent, the trustee and the holders of Units and separate purchase contracts with a notice of a fundamental change within five business days after its effective date and issue a press release announcing such effective date. The notice will also set forth, among other things:

- the applicable fundamental change early settlement rate;
- if not common stock, the kind and amount of cash, securities and other property receivable by the holder upon settlement; and
- the deadline by which each holder's fundamental change early settlement right must be exercised.

A "fundamental change" will be deemed to have occurred upon the occurrence of any of the following:

- any "person" or "group" within the meaning of Section 13(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), other than us, any of our subsidiaries and any of our and their employee benefit plans, files a Schedule TO or any other schedule, form or report under the Exchange Act disclosing that such person or group has become the direct or indirect "beneficial owner" (as defined in Rule 13d-3 under the Exchange Act) of our common stock representing more than 50% of the voting power of our common stock;

- the consummation of (A) any recapitalization, reclassification or change of our common stock (other than changes resulting from a subdivision or combination) as a result of which our common stock would be converted into, or exchanged for, stock, other securities, other property or assets; (B) any share exchange, consolidation or merger of us pursuant to which our common stock will be converted into cash, securities or other property or assets; or (C) any sale, lease or other transfer in one transaction or a series of transactions of all or substantially all of the consolidated assets of us and our subsidiaries, taken as a whole, to any person or persons other than one of our wholly owned subsidiaries;

- our stockholders approve any plan or proposal for the liquidation or dissolution of us; or

- our common stock (or other common stock receivable upon settlement of your purchase contracts, if applicable) ceases to be listed or quoted on any of the NYSE, the NASDAQ Global Select Market or the NASDAQ Global Market (or any of their respective successors).

A transaction or transactions described in clauses (1) or (2) above will not constitute a fundamental change, however, if (a) at least 90% of the consideration received or to be received by our common stockholders (excluding cash payments for fractional shares and cash payments made in respect of dissenters' appraisal rights) in connection with such transaction or transactions consists of shares of common stock that are listed or quoted on any of the NYSE, the NASDAQ Global Select Market or the NASDAQ Global Market (or any of their respective successors), or will be so listed or quoted when issued or exchanged in connection with such transaction or transactions, and (b) as a result of such transaction or transactions such consideration becomes the consideration receivable upon settlement of your purchase contracts, if applicable, excluding cash payments for fractional shares.

If any transaction in which our common stock is replaced by the securities of another entity occurs, following completion of any related fundamental change early settlement period (or, in the case of a transaction that would have been a fundamental change but for the immediately preceding paragraph, following the effective date of such transaction), references to us in the definition of "fundamental change" above shall instead be references to such other entity.

The "fundamental change early settlement rate" will be determined by us by reference to the table below, based on the date on which the fundamental change occurs or becomes effective (the "effective date") and the "stock price" in the fundamental change, which will be:

- in the case of a fundamental change described in clause (2) of the definition of "fundamental change" in which all holders of shares of our common stock receive only cash in the fundamental change, the stock price will be the cash amount paid per share of our common stock; and

- in all other cases, the stock price will be the arithmetic average of the VWAPs of our common stock over the five consecutive trading day period ending on, and including, the trading day immediately preceding the effective date.

The stock prices set forth in the column headings of the table below will be adjusted as of any date on which the fixed settlement rates are adjusted. The adjusted stock prices will equal the stock prices applicable immediately prior to such adjustment, multiplied by a fraction, the numerator of which is the maximum settlement rate immediately prior to the adjustment giving rise to the stock price adjustment and the denominator of which is the maximum settlement rate as so adjusted. The fundamental change early settlement rates per purchase contract in the table below will be adjusted in the same manner and at the same time as the fixed settlement rates as set forth under "—Adjustments to the Fixed Settlement Rates."

The following table sets forth the fundamental change early settlement rate per purchase contract for each stock price and effective date set forth below:

	Stock Price												
Effective Date	**$ 10.00**	**$ 17.50**	**$ 25.00**	**$ 30.00**	**$ 34.62**	**$ 37.50**	**$ 40.00**	**$ 42.41**	**$ 45.00**	**$ 50.00**	**$ 60.00**	**$ 75.00**	**$100.00**
April 23, 2019	1.1093	1.2275	1.2513	1.2383	1.2837	1.1947	1.1785	1.1641	1.1508	1.1340	1.1290	1.1382	1.1483

October 30, 2021	1.3829	1.4079	1.4127	1.3987	1.4014	1.3005	1.2466	1.2013	1.1745	1.1687	1.1704	1.1721	1.1739
January 30, 2022	1.4132	1.4262	1.4297	1.4224	1.4227	1.3178	1.2470	1.1925	1.1736	1.1739	1.1747	1.1756	1.1764
April 30, 2022	1.4442	1.4442	1.4442	1.4442	1.4442	1.3333	1.2500	1.1790	1.1790	1.1790	1.1790	1.1790	1.1790

The exact stock price and effective date may not be set forth in the table above, in which case:

- if the applicable stock price is between two stock prices in the table or the applicable effective date is between two effective dates in the table, the fundamental change early settlement rate will be determined by straight line interpolation between the fundamental change early settlement rates set forth for the higher and lower stock prices and the earlier and later effective dates, as applicable, based on a 365-or 366-day year, as applicable;

- if the applicable stock price is greater than $100.00 per share (subject to adjustment in the same manner and at the same time as the stock prices set forth in the column headings of the table above), then the fundamental change early settlement rate will be the minimum settlement rate; or

- if the applicable stock price is less than $10.00 per share (subject to adjustment in the same manner and at the same time as the stock prices set forth in the column headings of the table above, the "minimum stock price"), the fundamental change early settlement rate will be determined as if the stock price equaled the minimum stock price, and using straight line interpolation, as described in the first bullet of this paragraph, if the effective date is between two effective dates in the table.

The maximum number of shares of our common stock deliverable under a purchase contract is 1.4442, subject to adjustment in the same manner and at the same time as the fixed settlement rates as set forth under "—Adjustments to the Fixed Settlement Rates."

Our obligation to settle the purchase contracts at the fundamental change early settlement rate could be considered a penalty, in which case the enforceability thereof would be subject to general principles of reasonableness of economic remedies.

We will deliver the shares of our common stock (and any cash payable for fractional shares) (or, if a reorganization event has occurred, cash, securities or other property, as applicable) payable as a result of your exercise of the fundamental change early settlement right on the second business day following the fundamental change early settlement date.

Prior to the close of business on the fundamental change early settlement date, the shares of common stock or other securities, if applicable, underlying each purchase contract will not be outstanding, and the holder of such purchase contract will not have any voting rights, rights to dividends or other distributions or other rights of a holder of our common stock or such other securities by virtue of holding such purchase contract. The person in whose name any shares of our common stock or such other securities shall be deliverable following exercise of a holder's fundamental change early settlement right will be treated as the holder of record of such shares or such other securities as of the close of business on the fundamental change early settlement date.

Upon early settlement at the holder's election upon a fundamental change of the purchase contract component of a Unit, the amortizing note underlying such Unit will remain outstanding and will be beneficially owned by or registered in the name of, as the case may be, the holder who elected to settle the related purchase contract early upon the fundamental change and will no longer constitute a part of the Unit.

If you do not elect to exercise your fundamental change early settlement right, your purchase contracts will remain outstanding and will be subject to normal settlement on any subsequent early settlement date, any subsequent fundamental change early settlement date, any subsequent early mandatory settlement date or the mandatory settlement date or redemption on any subsequent acquisition redemption settlement date, as the case may be.

For the avoidance of doubt, each of the calculation methodologies and adjustments described above also shall apply if the fundamental change repurchase rate is being used as the acquisition redemption rate as described below under "—Acquisition Termination Redemption."

Early Mandatory Settlement at Our Election

We have the right to settle the purchase contracts on or after January 30, 2020, in whole but not in part, on a date fixed by us as described below at the "early mandatory settlement rate" described below. We refer to this right as our "early mandatory settlement right."

The "early mandatory settlement rate" will be the maximum settlement rate as of the date (the "notice date") of the early mandatory settlement notice (as defined below) unless the closing price (as defined below) per share of our common stock for at least 20 trading days (whether or not consecutive), including the trading day immediately preceding the notice date in a period of 30 consecutive trading days ending on, and including, the trading day immediately preceding the notice date exceeds 130% of the threshold appreciation price in effect on each such trading day, in which case the "early mandatory settlement rate" will be the minimum settlement rate as of the notice date.

The "closing price" per share of our common stock (or any other security) on any day means:

- the closing sale price per share (or if no closing sale price is reported, the average of the bid and ask prices or, if more than one in either case, the average of the average bid and the average ask prices) on that date as reported in composite transactions for the relevant stock exchange;
- if our common stock (or any other security) is not listed for trading on a relevant stock exchange on the relevant date, the last quoted bid price for our common stock (or such other security) in the over-the-counter market on the relevant date as reported by OTC Markets Group Inc. or a similar organization; and
- if our common stock (or any other security) is not so quoted, the average of the mid-point of the last bid and ask prices for our common stock (or such other security) on the relevant date from each of at least three nationally recognized independent investment banking firms selected by us for this purpose.

In the event we elect to settle the purchase contracts early, holders of the amortizing notes (whether as components of Units or separate amortizing notes) will have the right to require us to repurchase some or all of their amortizing notes on the repurchase date and at the repurchase price, as described under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder." If we exercise our early mandatory settlement right and the holder of any Unit does not require us to repurchase the amortizing note that is a component of such Unit, such amortizing note will remain outstanding and will be beneficially owned by or registered in the name of, as the case may be, such holder. If we exercise our early mandatory settlement right and the holder of any Unit requires us to repurchase the amortizing note that is a component of such Unit

but the related repurchase date falls after the early mandatory settlement date, such amortizing note will remain outstanding (pending such repurchase date) and will be beneficially owned by or registered in the name of, as the case may be, such holder.

If we elect to exercise our early mandatory settlement right, we will provide the purchase contract agent and the holders of Units, separate purchase contracts and separate amortizing notes with a notice of our election (the "early mandatory settlement notice") and issue a press release announcing our election. The early mandatory settlement notice will specify, among other things:

- the early mandatory settlement rate;
- the date on which we will deliver shares of our common stock (and any cash payable for fractional shares) following exercise of our early mandatory settlement right (the "early mandatory settlement date"), which will be on or after January 30, 2020 and at least five but not more than 20 business days following the notice date;
- that holders of Units and separate amortizing notes will have the right to require us to repurchase their amortizing notes that are a component of the Units or their separate amortizing notes, as the case may be (subject to certain exceptions described under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder");
- if applicable, the "repurchase price" and "repurchase date" (each as defined below under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder");
- if applicable, the last date on which holders of amortizing notes may exercise their repurchase right; and
- if applicable, the procedures that holders of amortizing notes must follow to require us to repurchase their amortizing notes.

We will deliver the shares of our common stock (and any cash payable for fractional shares) to you on the early mandatory settlement date.

Prior to the close of business on the notice date, the shares of common stock underlying each purchase contract will not be outstanding, and the holder of such purchase contract will not have any voting rights, rights to dividends or other distributions or other rights of a holder of our common stock by virtue of holding such purchase contract. The person in whose name any shares of our common stock shall be issuable following exercise of our early mandatory settlement right will be treated as the holder of record of such shares as of the close of business on the notice date.

Acquisition Termination Redemption

If the closing of the Acquisition has not occurred on or prior to April 22, 2020, or if, prior to such date, the Purchase Agreement is terminated, we may elect to redeem all, but not less than all, of the outstanding purchase contracts on the terms described below (an "acquisition termination redemption"), by delivering notice during the five business day period immediately following the earlier of (x) April 22, 2020 if the closing of the Acquisition has not occurred on or prior to such date and (y) the date on which the Purchase Agreement is terminated (such notice, the "acquisition redemption notice") to the purchase contract agent, the trustee and all holders of Units, separate purchase contracts or separate amortizing notes and will issue a press release announcing any such election.

In the event of an acquisition termination redemption, you will have the right to require us to repurchase your amortizing notes (whether as components of Units or separate amortizing notes) on the repurchase date and at the repurchase price, as described under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder." If we exercise our right to cause an acquisition termination redemption and the holder of any Unit or separate amortizing note does not require us to repurchase such amortizing note, such amortizing note will remain outstanding and be beneficially owned by or registered in the name of, as the case may be, such holder. If we exercise our right to cause an acquisition termination redemption and the holder of any Unit requires us to repurchase the amortizing note that is a component of such Unit but the related repurchase date falls after the acquisition termination settlement date, such amortizing note will remain outstanding (pending such repurchase date) and will be beneficially owned by or registered in the name of, as the case may be, such holder.

As further described below, redemptions of purchase contracts pursuant to an acquisition termination redemption will be settled in cash if the relevant acquisition termination stock price is equal to or less than the reference price. If the relevant acquisition termination stock price is greater than the reference price, redemptions of purchase contracts pursuant to an acquisition termination redemption will be settled in shares of our common stock, with the amount of such common stock to be determined by reference to the table set forth above in "—Early Settlement Upon a Fundamental Change"; provided that, in such case, we may elect to pay cash in lieu of delivering any or all of such number of shares of our common stock, all as further described below.

The acquisition redemption notice will specify, among other things:

- the "acquisition termination stock price" (as defined below);
- the "scheduled acquisition redemption settlement date" (as defined below);
- if the "redemption amount" (as defined below) is determined pursuant to the first bullet point in the definition thereof, the redemption amount;
- if the redemption amount is determined pursuant to the second bullet point in the definition thereof, the acquisition redemption rate, and, if applicable, the number of shares of our common stock that would otherwise be included in the applicable redemption amount that will be replaced with cash;
- that holders of Units and separate amortizing notes will have the right to require us to repurchase their amortizing notes that are a component of the Units or their separate amortizing notes, as the case may be, as described under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder";
- if applicable, the "repurchase price" and "repurchase date," each as defined below under "Description of the Amortizing Notes—Repurchase of Amortizing Notes at the Option of the Holder";
- if applicable, the last date on which holders of amortizing notes may exercise their repurchase right; and
- if applicable, the procedures that holders of amortizing notes must follow to require us to repurchase their amortizing notes.

If we do not specify a number of shares of common stock that will be replaced with cash in the acquisition redemption notice, we will be deemed to have elected to settle the redemption amount solely in shares of common stock.

In the event of an acquisition termination redemption, we will deliver the applicable redemption amount on the acquisition redemption settlement date. "Redemption amount" per purchase contract means:

- if the acquisition termination stock price is equal to or less than the reference price, an amount of cash equal to (x) $50.00 less (y) the applicable repurchase price for the amortizing notes; or

- if the acquisition termination stock price is greater than the reference price, a number of shares of our common stock (the "acquisition redemption rate") equal to the number of shares of our common stock determined by reference to the table set forth above in "—Early Settlement Upon a Fundamental Change" (with references to "stock price" deemed to refer to the "acquisition termination stock price," references to "fundamental change early settlement rate" deemed to refer to the "acquisition redemption rate," and references to "effective date" deemed to refer to the date of the related acquisition redemption notice); *provided* that we may elect to pay cash in lieu of delivering any or all of the shares of our common stock in an amount equal to such number of shares *multiplied by* the redemption market value; *provided further* that, if we so elect to pay cash, we will specify in the acquisition redemption notice the number of shares of our common stock that will be replaced with cash.

"Acquisition termination stock price" means the arithmetic average of the VWAPs of our common stock over the five consecutive trading day period ending on, and including, the trading day immediately preceding the date we provide the acquisition redemption notice.

"Redemption market value" means the arithmetic average of the VWAPs of our common stock for the 20 consecutive trading day period beginning on, and including, the 21st scheduled trading day immediately preceding the scheduled acquisition redemption settlement date.

"Acquisition redemption settlement date" means:

- if (x) the acquisition termination stock price is greater than the reference price and (y) we elect to pay cash in lieu of delivering any or all of the shares of our common stock that would otherwise be included in the redemption amount, the second business day following the last trading day of the 20 consecutive trading day period used to determine the redemption market value; or

- otherwise, the scheduled acquisition redemption settlement date specified in the acquisition redemption notice.

"Scheduled acquisition redemption settlement date" means:

- if (x) the acquisition termination stock price is greater than the reference price and (y) we elect to pay cash in lieu of delivering any or all of the shares of our common stock that would otherwise be included in the redemption amount, a date that is at least 30 and no more than 60 calendar days after the date of the acquisition redemption notice; or

- otherwise, a date that is at least 5 and no more than 30 calendar days after the date of the acquisition redemption notice.

The person in whose name any shares of our common stock shall be issuable will be treated as the holder of record of such shares as of the close of business on:

- the date of the acquisition redemption notice, if we have elected (or are deemed to have elected) to settle the redemption amount solely in shares of our common stock, or

- the last trading day in the 20 consecutive trading day period used to determine the redemption market value, if the acquisition termination stock price is greater than the reference price and we have elected

to pay cash in lieu of delivering any of the shares of our common stock that would otherwise be included in the redemption amount.

Prior to such time, the shares of common stock underlying each purchase contract will not be outstanding, and the holder of such purchase contract will not have any voting rights, rights to dividends or other distributions or other rights of a holder of our common stock by virtue of holding such purchase contract, but, for the avoidance of doubt, the anti-dilution adjustments provided herein under "—Adjustments to the Fixed Settlement Rates" below will continue to apply to the purchase contracts prior to such time.

Adjustments to the Fixed Settlement Rates

The fixed settlement rates will be adjusted as described below, except that we will not make any adjustments to the fixed settlement rates if holders of the purchase contracts participate (other than in the case of (x) a share split or share combination or (y) a tender or exchange offer), at the same time and upon the same terms as holders of our common stock and solely as a result of holding the purchase contracts, in any of the transactions described below without having to settle their purchase contracts as if they held a number of shares of our common stock equal to the maximum settlement rate, *multiplied by* the number of purchase contracts held by such holders.

(a) If we issue common stock to all or substantially all of the holders of our common stock as a dividend or other distribution, or if we effect a share split or share combination, then each fixed settlement rate will be adjusted based on the following formula:

$$SR_1 = SR_0 \times \frac{OS_1}{OS_0}$$

where,

SR_0 = the fixed settlement rate in effect immediately prior to the close of business on the record date (as defined below) for such dividend or distribution or immediately prior to the open of business on the effective date (as defined below) for such share split or share combination, as the case may be;

SR_1 = the fixed settlement rate in effect immediately after the close of business on such record date or immediately after the open of business on such effective date, as the case may be;

OS_0 = the number of shares of our common stock outstanding immediately prior to the close of business on such record date or immediately prior to the open of business on such effective date, as the case may be (in either case, prior to giving effect to such event); and

OS_1 = the number of shares of our common stock that would be outstanding immediately after, and solely as a result of, such dividend, distribution, share split or share combination.

Any adjustment made pursuant to this clause (a) will become effective immediately after the close of business on the record date for such dividend or distribution, or immediately after the open of business on the effective date for such share subdivision or share combination, as the case may be. If any dividend or distribution described in this clause (a) is declared but not so paid or made, each fixed settlement rate will be readjusted, effective as of the date our board of directors (or a committee thereof) publicly announces its decision not to make such dividend or distribution, to such fixed settlement rate that would be in effect if such dividend or distribution had not been declared. For the purposes of this clause (a), the number of shares of common stock outstanding immediately prior to the close of business on the record date for such dividend or distribution or the open of business on the effective date for such share subdivision or share combination, as applicable, will not include shares held in treasury but will include any shares issuable in respect of any scrip certificates issued in

lieu of fractions of shares of common stock. We will not pay any such dividend or make any such distribution on shares of common stock held in treasury.

"Record date" means, when used with respect to any dividend, distribution or other transaction or event in which the holders of our common stock (or other applicable security) have the right to receive any cash, securities or other property or in which our common stock (or other applicable security) is exchanged for or converted into any combination of cash, securities or other property, the date fixed for determination of holders of our common stock (or other applicable security) entitled to receive such cash, securities or other property (whether such date is fixed by our board of directors or a committee thereof, or by statute, contract or otherwise).

"Effective date" means the first date on which the shares of our common stock trade on the relevant stock exchange, regular way, reflecting the relevant share split or share combination, as applicable.

(b) If we issue to all or substantially all holders of our common stock rights, options or warrants (other than rights issued pursuant to a stockholder rights plan) entitling them, for a period of up to 45 calendar days from the date of issuance of such rights, options or warrants, to subscribe for or purchase our shares of common stock at a price per share less than the average of the closing prices (as defined under "—Early Mandatory Settlement at Our Election) per share of our common stock for the 10 consecutive trading day (as defined below) period ending on, and including, the trading day immediately preceding the date of announcement for such distribution per share of our common stock, then each fixed settlement rate will be adjusted based on the following formula:

$$SR_1 = SR_0 \times \frac{(OS_0 + X)}{(OS_0 + Y)}$$

where,

SR_0 = the fixed settlement rate in effect immediately prior to the close of business on the record date for such issuance;

SR_1 = the fixed settlement rate in effect immediately after the close of business on such record date;

OS_0 = the number of shares of our common stock outstanding immediately prior to the close of business on such record date;

X = the total number of shares of our common stock issuable pursuant to such rights, options or warrants; and

Y = the total number of shares of our common stock equal to the aggregate price payable to exercise such rights, options or warrants, *divided by* the average of the closing prices per share of our common stock for the 10 consecutive trading day period ending on, and including, the trading day immediately preceding the date of announcement for such distribution.

Any adjustment made pursuant to this clause (b) will be made successively whenever any such rights, options or warrants are issued and will become effective immediately after the close of business on the record date for such issuance. In the event that such rights, options or warrants described in this clause (b) are not so issued, each fixed settlement rate will be readjusted, effective as of the date our board of directors (or a committee thereof) publicly announces its decision not to issue such rights, options or warrants, to such fixed settlement rate that would then be in effect if such issuance had not been declared. To the extent that such rights, options or warrants are not exercised prior to their expiration or shares of our common stock are otherwise not delivered pursuant to such rights, options or warrants upon the exercise of such rights, options or warrants, each fixed

settlement rate will be readjusted, effective as of the date of such expiration or the date it is determined such shares will not be delivered, as the case may be, to such fixed settlement rate that would then be in effect had the adjustment made upon the issuance of such rights, options or warrants been made on the basis of the delivery of only the number of shares of our common stock actually delivered.

In determining whether any rights, options or warrants entitle the holders thereof to subscribe for or purchase shares of our common stock at less than the average of the closing prices per share of our common stock for the 10 consecutive trading day period ending on, and including, the trading day immediately preceding the date of announcement for such distribution, and in determining the aggregate price payable to exercise such rights, options or warrants, there will be taken into account any consideration received by us for such rights, options or warrants and any amount payable on exercise or conversion thereof, the value of such consideration, if other than cash, to be determined by our board of directors, or a committee thereof.

For the purposes of this clause (b), the number of shares of common stock at the time outstanding will not include shares held in treasury but will include any shares issuable in respect of any scrip certificates issued in lieu of fractions of shares of common stock. We will not issue any such rights, options or warrants in respect of shares of common stock held in treasury.

(c) (1) If we distribute to all or substantially all holders of our common stock shares of our capital stock (other than our common stock), evidences of our indebtedness, assets or rights, options or warrants to acquire our capital stock, indebtedness or assets, excluding:

- any dividend or distribution (including share splits or share combinations) as to which an adjustment was effected pursuant to clause (a) above;
- any rights, options or warrants as to which an adjustment was effected pursuant to clause (b) above;
- except as otherwise described below, rights issued pursuant to any stockholder rights plan of ours then in effect;
- any dividend or distribution described in clause (d) below;
- distributions of exchange property in a transaction described in "—Recapitalizations, Reclassifications and Changes of Our Common Stock;" and
- any spin-off (as defined below) to which the provisions set forth below in clause (c)(2) shall apply;

then each fixed settlement rate will be adjusted based on the following formula:

$$SR_1 = SR_0 \times \frac{SP_0}{(SP_0 - FMV)}$$

where,

SR_0 = the fixed settlement rate in effect immediately prior to the close of business on the record date for such dividend or distribution;

SR_1 = the fixed settlement rate in effect immediately after the close of business on such record date;

SP_0 = the average of the closing prices per share of our common stock for the 10 consecutive trading day period ending on, and including, the trading day immediately preceding the ex-date for such dividend or distribution; and

FMV = the fair market value (as determined by our board of directors or a committee thereof) on the ex-date for such dividend or distribution, of the shares of our capital stock, evidences of our indebtedness, assets or rights, options or warrants so distributed, expressed as an amount per share of common stock.

Notwithstanding the foregoing, if FMV (as defined above) is equal to or greater than SP_0 (as defined above) or if the difference between SP_0 and FMV is less than $1.00, in lieu of the foregoing adjustment, provision shall be made for each holder of a Unit or separate purchase contract to receive, for each Unit or separate purchase contract, at the same time and upon the same terms as holders of our common stock, the kind and amount of our capital stock, evidences of our indebtedness, assets or rights, options or warrants that such holder would have received if such holder owned a number of shares of our common stock equal to the maximum settlement rate in effect on the record date for the dividend or distribution.

Any adjustment made pursuant to this clause (c)(1) will become effective immediately after the close of business on the record date for such dividend or distribution. In the event that such dividend or distribution is not so made, each fixed settlement rate will be readjusted, effective as of the date our board of directors (or a committee thereof) publicly announces its decision not to make such dividend or distribution, to such fixed settlement rate that would then be in effect if such dividend or distribution had not been declared. We will not make any such distribution on shares of common stock held in treasury.

"Ex-date," when used with respect to any issuance or distribution, means the first date on which shares of our common stock (or other applicable security) trade on the applicable exchange or in the applicable market, regular way, without the right to receive such issuance, dividend or distribution in question from us or, if applicable, from the seller of our common stock (or other applicable security) on such exchange or market (in the form of due bills or otherwise) as determined by such exchange or market.

(c)(2) In the event that we make a dividend or distribution to all or substantially all holders of our common stock consisting of capital stock of, or similar equity interests in, or relating to, a subsidiary or other business unit of ours that, upon issuance, will be traded on a U.S. national securities exchange (herein referred to as a "spin-off"), each fixed settlement rate will be adjusted based on the following formula:

$$SR_1 = SR_0 \quad x \frac{(FMV_0 + MP_0)}{MP_0}$$

where,

SR_0 = the fixed settlement rate in effect immediately prior to the open of business on the ex-date for the spin-off;

SR_1 = the fixed settlement rate in effect immediately after the open of business on the ex-date for the spin-off;

FMV_0 = the average of the closing prices (as defined above, as if references to "common stock" therein were references to such capital stock or similar equity interest distributed to the holders of our common stock) per share of the capital stock or similar equity interests so distributed applicable to one share of our common stock for the 10 consecutive trading day period commencing on, and including, the ex-date date for the spin-off (the "valuation period"); and

MP_0 = the average of the closing prices per share of our common stock for the valuation period.

Any adjustment made pursuant to this clause (c)(2) will become effective immediately after the close of business on the last trading day of the valuation period but will be given effect as of immediately after the open

of business on the ex-date of the spin-off. Because we will make the adjustment to each fixed settlement rate with retroactive effect, we will delay any settlement of a Unit or separate purchase contract where any date for determining the number of shares of our common stock issuable to a holder occurs during the valuation period until the second business day after the last date for determining the number of shares of our common stock issuable to such holder with respect to such settlement occurs. In the event that such dividend or distribution described in this clause (c)(2) is not so made, each fixed settlement rate will be readjusted, effective as of the date our board of directors (or a committee thereof) publicly announces its decision not to pay such dividend or distribution, to such fixed settlement rate that would then be in effect if such distribution had not been declared. We will not make any such dividend or distribution on shares of common stock held in treasury.

(d) If we make a dividend or distribution consisting exclusively of cash to all or substantially all holders of our common stock, excluding:

- any regular quarterly dividend that does not exceed $0.219 per share of common stock (the "dividend threshold amount");
- any cash that is distributed in, and will constitute exchange property as a result of, a reorganization event (as defined below) in exchange for shares of our common stock; and
- any dividend or distribution in connection with our liquidation, dissolution or winding up);

then each fixed settlement rate will be adjusted based on the following formula:

$$SR_1 = SR_0 \times \frac{(SP_0 - T)}{(SP_0 - C)}$$

where,

SR_0 = the fixed settlement rate in effect immediately prior to the close of business on the record date for such dividend or distribution;

SR_1 = the fixed settlement rate in effect immediately after the close of business on the record date for such dividend or distribution;

SP_0 = the average of the closing prices per share of our common stock over the 10 consecutive trading day period ending on, and including, the trading day immediately preceding the ex-date for such dividend or distribution;

T = the dividend threshold amount; *provided* that if the dividend or distribution is not a regular quarterly cash dividend, the dividend threshold amount will be deemed to be zero; and

C = the amount in cash per share we distribute to holders of our common stock.

The dividend threshold amount is subject to adjustment on an inversely proportional basis whenever the fixed settlement rates are adjusted (by multiplying the dividend threshold amount by a fraction, the numerator of which will be the minimum settlement rate in effect immediately prior to the adjustment and the denominator of which will be the minimum settlement rate as adjusted), but no adjustment will be made to the dividend threshold amount for any adjustment made to the fixed settlement rates pursuant to this clause (d).

If C (as defined above) is equal to or greater than SP_0 (as defined above) or if the difference between SP_0 and C is less than $1.00, in lieu of the foregoing adjustment, provision shall be made for each holder of a Unit

or separate purchase contract to receive, for each Unit or separate purchase contract, at the same time and upon the same terms as holders of our common stock, the amount of cash that such holder would have received if such holder owned a number of shares of our common stock equal to the maximum settlement rate on the record date for such cash dividend or distribution.

Any adjustment made pursuant to this clause (d) will become effective immediately after the close of business on the record date for such dividend or distribution. In the event that any dividend or distribution described in this clause (d) is not so made, each fixed settlement rate will be readjusted, effective as of the date our board of directors (or a committee thereof) publicly announces its decision not to pay such dividend or distribution, to such fixed settlement rate which would then be in effect if such dividend or distribution had not been declared. We will not make any such dividend or distribution on shares of common stock held in treasury.

(e) If we or any of our subsidiaries successfully complete a tender or exchange offer for our common stock where the cash and the value of any other consideration included in the payment per share of our common stock validly tendered or exchanged exceeds the average of the closing prices per share of our common stock for the 10 consecutive trading day period (the "averaging period") commencing on, and including, the trading day next succeeding the last date on which tenders or exchanges may be made pursuant to such tender offer or exchange offer (the "expiration date"), then each fixed settlement rate will be adjusted based on the following formula:

$$SR_1 = SR_0 \quad x \frac{(AC + (SP \times OS_1))}{(SP \times OS_0)}$$

where,

SR_0 = the fixed settlement rate in effect immediately prior to the close of business on the expiration date;

SR_1 = the fixed settlement rate in effect immediately after the close of business on the expiration date;

AC = the aggregate value of all cash and the fair market value (as determined by our board of directors, or a committee thereof) on the expiration date of any other consideration paid or payable for shares of common stock acquired pursuant to such tender offer or exchange offer;

OS_1 = the number of shares of our common stock outstanding immediately after the expiration date, after giving effect to the purchase of all shares accepted for purchase or exchange in such tender or exchange offer;

OS_0 = the number of shares of our common stock outstanding immediately prior to the expiration date, prior to giving effect to the purchase of any shares accepted for purchase or exchange in such tender or exchange offer; and

SP = the average of the closing prices per share of our common stock over the averaging period.

Any adjustment made pursuant to this clause (e) will become effective immediately after the close of business on the expiration date. Because we will make the adjustment to each fixed settlement rate with retroactive effect, we will delay any settlement of a Unit or separate purchase contract where any date for determining the number of shares of our common stock issuable to a holder occurs during the averaging period until the second business day after the last date for determining the number of shares of our common stock issuable to such holder with respect to such settlement occurs. In the event that we are, or one of our subsidiaries is, obligated to purchase shares of our common stock pursuant to any such tender or exchange offer, but we are, or such subsidiary is, permanently prevented by applicable law from effecting any such purchases, or all such

purchases are rescinded, then each fixed settlement rate will be readjusted to be such fixed settlement rate that would then be in effect if such tender or exchange offer had not been made.

To the extent that we have a rights plan in effect with respect to our common stock on any date for determining the number of shares of our common stock issuable to a holder, you will receive, in addition to our common stock, the rights under the rights plan, unless, prior to such determination date, the rights have separated from our common stock, in which case each fixed settlement rate will be adjusted at the time of separation as if we made a distribution to all holders of our common stock as described in clause (c)(1) above, subject to readjustment in the event of the expiration, termination or redemption of such rights.

For purposes of this "—Adjustments to the Fixed Settlement Rates" section, "trading day" means a day on which:

- trading in our common stock (or other security for which a closing sale price must be determined) generally occurs on the relevant stock exchange, or, if our common stock (or such other security) is not then listed on a relevant stock exchange, on the principal other market on which our common stock (or such other security) is then listed or admitted for trading; and
- a closing price per share for our common stock (or closing sale price for such other security) is available on such securities exchange or market.

If our common stock (or such other security) is not so listed or traded, "trading day" means a "business day."

In addition, subject to applicable law and the applicable listing standards of the NYSE (or any other securities exchange where our common stock is listed) and in accordance with the provisions of the purchase contract agreement, we may make such increases in each fixed settlement rate as we determine to be in our best interests or we deem advisable. We may also (but are not required to) increase each fixed settlement rate in order to avoid or diminish any income tax to holders of our common stock resulting from any dividend or distribution of shares of our common stock (or issuance of rights, options or warrants to acquire shares of our common stock) or from any event treated as such for income tax purposes or for any other reason. We may only make such a discretionary adjustment if we make the same proportionate adjustment to each fixed settlement rate.

You might be treated as receiving a constructive distribution from us if (i) the fixed settlement rates are adjusted and as a result of such adjustment your proportionate interest in our assets or earnings and profits is increased and (ii) the adjustment is not made pursuant to a bona fide, reasonable anti-dilution formula. An adjustment in the fixed settlement rates would not be considered made pursuant to such a formula if the adjustment were made to compensate you for taxable distributions with respect to our common stock (for example, if we increase the cash dividend on our common stock). Certain of the possible settlement rate adjustments (including, without limitation, adjustments in respect of taxable dividends to holders of our common stock and as discussed in "Description of the Purchase Contracts—Early Settlement Upon a Fundamental Change") may not qualify as being pursuant to a bona fide reasonable adjustment formula. Thus, under certain circumstances, an increase in the fixed settlement rates might give rise to a constructive distribution to you even though you would not receive any cash related thereto. In addition, in certain situations, you might be treated as receiving a constructive distribution if we fail to adjust the fixed settlement rates. Any constructive distribution will be taxable as a dividend, return of capital, or capital gain in accordance with the earnings and profits rules described below in "Certain United States Federal Income and Estate Tax Consequences—U.S. Holders—Common Stock Acquired under a Purchase Contract—Distributions" and "Certain United States Federal Income and Estate Tax Consequences—Non-U.S. Holders—U.S. Federal Income Tax." If you are a "non-U.S. holder" (as defined in "Certain United States Federal Income and Estate Tax Consequences—Non-U.S. Holders"), a deemed dividend may be subject to U.S. federal withholding tax (currently at a 30% rate, or such lower rate as

may be specified by an applicable income tax treaty), which may be withheld from shares of common stock or sales proceeds subsequently paid or credited to you. It is possible that U.S. withholding tax on deemed dividends would be withheld from any interest or other amounts paid to a non-U.S. holder. See "Certain United States Federal Income and Estate Tax Consequences—Non-U.S. Holders—U.S. Federal Withholding Tax."

Adjustments to each fixed settlement rate will be calculated to the nearest 1/10,000th of a share. No adjustment in the fixed settlement rates will be required unless the adjustment would require an increase or decrease of at least one percent. If any adjustment is not required to be made because it would not change the fixed settlement rates by at least one percent, then the adjustment will be carried forward and taken into account in any subsequent adjustment; *provided* that, on any date for determining the number of shares of our common stock issuable to a holder (including any date for determining the amount of cash payable in connection with an acquisition termination redemption), adjustments to the fixed settlement rates will be made with respect to any such adjustment carried forward and which has not been taken into account before such determination date.

The fixed settlement rates will only be adjusted as set forth above and will not be adjusted:

- upon the issuance of any common stock pursuant to any present or future plan providing for the reinvestment of dividends or interest payable on our securities and the investment of additional optional amounts in common stock under any plan;
- upon the issuance of any common stock or rights, options or warrants to purchase those shares pursuant to any present or future employee, director or consultant benefit plan or program of or assumed by us or any of our subsidiaries;
- upon the repurchase of any shares of our common stock pursuant to an open market share repurchase program or other buy-back transaction, including structured or derivative transactions, that is not a tender offer or exchange offer of the nature described in clause (e) above;
- for the sale or issuance of shares of our common stock, or securities convertible into or exercisable for shares of our common stock, for cash, including at a price per share less than the fair market value thereof or otherwise or in an acquisition, except as described in one of clauses (a) through (e) above;
- for a third-party tender offer;
- upon the issuance of any common stock pursuant to any option, warrant, right or exercisable, exchangeable or convertible security outstanding as of the date the Units were first issued;
- solely for a change in, or elimination of, the par value of our common stock; or
- for accrued and unpaid interest, if any.

Whenever the fixed settlement rates are adjusted, we will deliver to the purchase contract agent a certificate setting forth in reasonable detail the method by which the adjustment to each fixed settlement rate was determined and setting forth each adjusted fixed settlement rate. In addition, we will, within five business days of any event requiring such adjustment, provide or cause to be provided written notice of the adjustment to the holders of the Units and separate purchase contracts and describe in reasonable detail the method by which each fixed settlement rate was adjusted.

We will adjust the fundamental change early settlement rates and acquisition redemption rates at the time we adjust the fixed settlement rates. For the avoidance of doubt, if we make an adjustment to the fixed settlement rates, it will result in a corresponding adjustment to the early settlement rate and the early mandatory settlement

rate. For the further avoidance of doubt, if we make an adjustment to the fixed settlement rates, no separate inversely proportionate adjustment will be made either to (i) the threshold appreciation price because it is equal to $50.00 divided by the minimum settlement rate as adjusted in the manner described herein (rounded to the nearest $0.0001) or (ii) the reference price because it is equal to $50.00 divided by the maximum settlement rate as adjusted in the manner described herein (rounded to the nearest $0.0001).

Whenever the terms of the purchase contracts require us to calculate closing prices, VWAPs or any other prices or amounts over a span of multiple days (including, without limitation, the applicable market value, the redemption market value, the "stock price" or the "acquisition termination stock price"), we will make appropriate adjustments, if any, to each to account for any adjustment to the fixed settlement rates if the related record date, ex-date, effective date or expiration date occurs during the period in which the closing prices, the VWAPs or such other prices or amounts are to be calculated.

Recapitalizations, Reclassifications and Changes of our Common Stock

In the event of:

- any consolidation or merger of us with or into another person (other than a merger or consolidation in which we are the continuing or surviving corporation and in which the shares of our common stock outstanding immediately prior to the merger or consolidation are not exchanged for cash, securities or other property of us or another person);
- any direct or indirect sale, lease, assignment, transfer or conveyance of all or substantially all of our consolidated property or assets;
- any reclassification of our common stock into securities, including securities other than our common stock (other than changes in par value or resulting from a subdivision or combination); or
- any statutory exchange of our securities with another person (other than in connection with a merger or acquisition);

in each case, as a result of which our common stock would be converted into, or exchanged for, securities, cash or other property (each, a "reorganization event"), each purchase contract outstanding immediately prior to such reorganization event will, without the consent of the holders of the purchase contracts, become a contract to purchase the kind of securities, cash and/or other property that a holder of common stock would have been entitled to receive in connection with such reorganization event (such securities, cash and other property, the "exchange property" with each unit of exchange property being the kind and amount of exchange property that a holder of one share of our common stock would have received in such reorganization event) and, prior to or at the effective time of such reorganization event, we or the successor or purchasing person, as the case may be, shall execute with the purchase contract agent and the trustee a supplemental agreement pursuant to the purchase contract agreement and the purchase contracts to provide for such change in the right to settle the purchase contracts.

For purposes of the foregoing, the type and amount of exchange property in the case of any reorganization event that causes our common stock to be converted into, or exchanged for, the right to receive more than a single type of consideration (determined based in part upon any form of shareholder election) will be deemed to be the weighted average of the types and amounts of consideration actually received by the holders of our common stock.

The number of units of exchange property we will deliver for each purchase contract settled or redeemed (if we elect not to deliver solely cash in respect of such redemption) following the effective date of such reorganization event will be equal to the number of shares of our common stock we would otherwise be required to deliver as determined by the fixed settlement rates then in effect on the applicable settlement date, or such

other settlement rates or redemption rates as provided herein (without interest thereon and without any right to dividends or distributions thereon which have a record date prior to the close of business such purchase contracts are actually settled). Each fixed settlement rate will be determined using the applicable market value of a unit of exchange property, and such value will be determined, on any date of determination, with respect to:

- in the case of any publicly traded securities that comprise all or part of the exchange property, based on the VWAP of such securities on such date;
- in the case of any cash that comprises all or part of the exchange property, based on the amount of such cash; and
- in the case of any other property that comprises all or part of the exchange property, based on the value of such property on such date, as determined by a nationally recognized independent investment banking firm retained by us for this purpose.

In addition, if the exchange property in respect of any reorganization event includes, in whole or in part, securities of another entity, we shall amend the terms of the purchase contract agreement and the purchase contracts, without the consent of holders thereof, to: (x) provide for anti-dilution and other adjustments that shall be as nearly equivalent as practicable, as determined by the officer executing such amendment, to the adjustments described above under the heading "— Adjustments to the Fixed Settlement Rates"; and (y) otherwise modify the terms of the purchase contract agreement and the purchase contracts to reflect the substitution of the applicable exchange property for our common stock (or other exchange property then underlying the purchase contracts). In establishing such anti-dilution and other adjustments referenced in the immediately preceding sentence, such officer shall act in a commercially reasonable manner and in good faith.

In connection with any adjustment to the fixed settlement rates described above, we will also adjust the dividend threshold amount based on the number of shares of common stock comprising the exchange property and (if applicable) the value of any non-stock consideration comprising the exchange property. If the exchange property is comprised solely of non-stock consideration, the dividend threshold amount will be zero.

Fractional Shares

No fractional shares of our common stock will be issued to holders upon settlement or redemption of the purchase contracts. In lieu of fractional shares otherwise issuable, holders will be entitled to receive an amount in cash equal to the fraction of a share of our common stock, calculated on an aggregate basis in respect of the purchase contracts being settled or redeemed (provided that, so long as the Units are in global form, we may elect to aggregate Units for purposes of these calculations on any basis permitted by the applicable procedures of DTC), *multiplied by* the VWAP of our common stock on the trading day immediately preceding the mandatory settlement date, early settlement date, fundamental change early settlement date, early mandatory settlement date or acquisition redemption settlement date, as the case may be.

Legal Holidays

In any case where the mandatory settlement date, early settlement date, fundamental change early settlement date, early mandatory settlement date or acquisition redemption settlement date, as the case may be, shall not be a business day, notwithstanding any term to the contrary in the purchase contract agreement or purchase contract, the settlement or redemption of the purchase contracts shall not be effected on such date, but instead shall be effected on the next succeeding business day with the same force and effect as if made on such settlement date, and no interest or other amounts shall accrue or be payable by us or to any holder in respect of such delay.

Consequences of Bankruptcy

Pursuant to the terms of the purchase contract agreement, the mandatory settlement date for each purchase contract, whether held separately or as part of a Unit, will automatically accelerate upon the occurrence of specified events of bankruptcy, insolvency or reorganization with respect to us. Pursuant to the terms of the purchase contract agreement, upon acceleration, holders will be entitled under the terms of the purchase contracts to receive a number of shares of our common stock per purchase contract equal to the maximum settlement rate in effect immediately prior to such acceleration (regardless of the market value of our common stock at that time). If for any reason the accelerated purchase contracts are not settled by the delivery of our common stock (for example, a bankruptcy court may prevent us from delivering our common stock in settlement of the accelerated purchase contracts), a holder may have a damage claim against us for the value of the common stock that we would have otherwise been required to deliver upon settlement of the purchase contracts. We expect that any such damage claim that holders have against us following such acceleration would rank equally with the claims of holders of our common stock in the relevant bankruptcy proceeding. As such, to the extent we fail to deliver common stock to you upon such an acceleration, you will only be able to recover damages to the extent holders of our common stock receive any recovery.

Modification

The purchase contract agreement will contain provisions permitting us, the purchase contract agent and the trustee to modify the purchase contract agreement or the purchase contracts without the consent of the holders of purchase contracts (whether held separately or as a component of Units) for any of the following purposes:

- to evidence the succession of another person to us, and the assumption by any such successor of the covenants and obligations of ours in the purchase contract agreement and the units and separate purchase contracts, if any;
- to add to the covenants for the benefit of holders of purchase contracts or to surrender any of our rights or powers under the agreement;
- to evidence and provide for the acceptance of appointment of a successor purchase contract agent;
- upon the occurrence of a reorganization event, solely: (i) to provide that each purchase contract will become a contract to purchase exchange property; and (ii) to effect the related changes to the terms of the purchase contracts, in each case, as required by the applicable provisions of the purchase contract agreement;
- to conform the provisions of the purchase contract agreement to the “Description of the Purchase Contracts” and “Description of the Units” sections in the preliminary prospectus supplement, as supplemented by the related pricing term sheet;
- to cure any ambiguity or manifest error, to correct or supplement any provisions that may be inconsistent; and
- to make any other provisions with respect to such matters or questions, so long as such action does not adversely affect the interest of the holders.

The purchase contract agreement will contain provisions permitting us, the purchase contract agent and the trustee, with the consent of the holders of not less than a majority of the purchase contracts at the time outstanding, to modify the terms of the purchase contracts or the purchase contract agreement. However, no

such modification may, without the consent of the holder of each outstanding purchase contract affected by the modification,

- reduce the number of shares of common stock deliverable upon settlement of the purchase contract (except to the extent expressly provided in the anti-dilution adjustments);
- change the mandatory settlement date, or adversely modify the right to settle purchase contracts early or the fundamental change early settlement right;
- reduce the redemption amount or adversely modify the right of any holder to receive such amount if we elect to redeem the purchase contract in connection with an acquisition termination redemption;
- impair the right to institute suit for the enforcement of the purchase contracts; or
- reduce the above-stated percentage of outstanding purchase contracts the consent of the holders of which is required for the modification or amendment of the provisions of the purchase contracts or the purchase contract agreement.

In executing any supplement, modification or amendment to the purchase contract agreement, the purchase contract agent and trustee shall be provided an officer's certificate and an opinion of counsel stating that the execution of such supplemental agreement is authorized or permitted by the purchase contract agreement, and that any and all conditions precedent to the execution and delivery of such supplemental agreement have been satisfied.

Consolidation, Merger, Conveyance, Transfer or Lease

The purchase contract agreement will provide that Aqua America will not consolidate or merge with or into any other entity, or sell, transfer, lease or otherwise convey its properties and assets as an entirety or substantially as an entirety to any entity, unless:

- (i) it is the continuing entity (in the case of a merger), or (ii) the successor entity formed by such consolidation or into which it is merged or which acquires by sale, transfer, lease or other conveyance of its properties and assets, as an entirety or substantially as an entirety, is a corporation organized and existing under the laws of the United States of America or any State thereof or the District of Columbia, and expressly assumes, by a supplement to the purchase contract agreement, all our obligations under the purchase contract agreement; and
- immediately after giving effect to the transaction, no event of default, and no event which after notice or lapse of time or both would become an event of default under the purchase contract agreement or the purchase contracts, has or will have occurred and be continuing.

Although there is a limited body of case law interpreting the phrase "substantially as an entirety," there is no precise established definition of the phrase under applicable law. Accordingly, in certain circumstances there may be a degree of uncertainty as to whether a particular transaction would involve a disposition of our properties and assets "substantially as an entirety." As a result, it may be unclear as to whether the foregoing restrictions on mergers, consolidations, sales, conveyances, transfers, leases and other dispositions would apply to a particular transaction as described above absent a decision by a court of competent jurisdiction.

Reservation of Common Stock

We will at all times reserve and keep available out of our authorized and unissued common stock, solely for issuance upon settlement or redemption of the purchase contracts, the number of shares of common stock that would be issuable upon the settlement of all purchase contracts then outstanding, assuming settlement at the maximum settlement rate.

Governing Law

The purchase contract agreement, the Units, the purchase contracts and any claim, controversy or dispute arising under or related to the purchase contract agreement, the Units or the purchase contracts will be governed by, and construed in accordance with, the laws of the State of New York.

Waiver of Jury Trial

The purchase contract agreement will provide that we, the purchase contract agent and the trustee will waive its respective rights to trial by jury in any action or proceeding arising out of or related to the purchase contracts, the purchase contract agreement or the transactions contemplated thereby, to the maximum extent permitted by law.

Information Concerning the Purchase Contract Agent

U.S. Bank N.A.will be the purchase contract agent. The purchase contract agent will act as the agent for the holders of Units and separate purchase contracts from time to time but shall have no fiduciary relationship to the holder of the Units or any other party. The purchase contract agreement will not obligate the purchase contract agent to exercise any discretionary actions in connection with a default under the terms of the purchase contracts or the purchase contract agreement.

The purchase contract agreement will contain provisions limiting the liability of the purchase contract agent. The purchase contract agreement will contain provisions under which the purchase contract agent may resign or be replaced. This resignation or replacement would be effective upon the acceptance of appointment by a successor purchase contract agent.

We maintain banking relationships in the ordinary course of business with the purchase contract agent and its affiliates.

Calculations in Respect of Purchase Contracts

We will be responsible for making all calculations called for under the Units and any separate purchase contracts. The purchase contract agent will have no obligation to make, review or verify any such calculations. All such calculations made by us will be made in good faith and, absent manifest error, will be final and binding on the purchase contract agent and the holders of the Units and any separate purchase contracts. We will provide a schedule of such calculations to the purchase contract agent and the purchase contract agent will be entitled to conclusively rely upon the accuracy of such calculations without independent verification.

DESCRIPTION OF THE AMORTIZING NOTES

The amortizing notes will be issued by us pursuant to an indenture, as amended, between us, as issuer, and U.S. Bank N.A., as trustee, and a related supplemental indenture, each to be dated the date of first issuance of the Units, between us and the trustee, under which the amortizing notes will be issued (collectively referred to herein as the "indenture").

The following summary of the terms of the amortizing notes taken together with the description under "Description of Debt Securities" in the accompanying prospectus contains a description of certain terms of the amortizing notes but is not complete and is subject to, and is qualified in its entirety by reference to, all of the provisions of the indenture, including the definitions in the indenture of certain terms. We refer you to the form of indenture, which has been filed as an exhibit to the registration statement of which this prospectus supplement forms a part, and a supplemental indenture related to a change in governing law to New York law, among other matters, and a supplemental indenture related to the amortizing notes, each of which will be filed as an exhibit to a current report on Form 8-K in connection with this offering and incorporated by reference as an exhibit to that registration statement. See "Where You Can Find More Information."

As used in this section, unless the context otherwise requires, references to "Aqua America," "we," "us" or "our" refer to Aqua America, Inc. and do not include any of its existing or future subsidiaries.

General

The amortizing notes will be issued as a separate series of senior debt securities under the indenture. The amortizing notes will be issued by us in an aggregate initial principal amount of $103,549,080 (or $119,081,442 if the underwriters exercise their option to purchase additional Units in full). The final installment payment date will be April 30, 2022. We may not redeem the amortizing notes, and no sinking fund is provided for the amortizing notes.

Each amortizing note will initially form a part of a Unit. Each Unit may be separated by a holder into its constituent purchase contract and amortizing note on any business day during the period beginning on, and including, the business day immediately following the date of initial issuance of the Units to, but excluding, the second scheduled trading day immediately preceding April 30, 2022 or, if earlier, the second scheduled trading day immediately preceding any "early mandatory settlement date" or the second scheduled trading day immediately preceding any "acquisition redemption settlement date" and also excluding the business day immediately preceding any installment payment date (*provided*, the right to separate the Units shall resume after such business day). Following such separation, amortizing notes may be transferred separately from purchasing contracts.

Amortizing notes may only be issued in certificated form in exchange for a global security under the circumstances described under "Book-Entry Procedures and Settlement." In the event that amortizing notes are issued in certificated form, such amortizing notes may be transferred or exchanged at the offices described below.

Payments on amortizing notes issued as a global security will be made to DTC, or a successor depositary. In the event amortizing notes are issued in certificated form, installment payments will be made, at the corporate trust office of the trustee. Installment payments on certificated amortizing notes may be made at our option by check mailed to the address of the persons entitled thereto. See "Book-Entry Procedures and Settlement."

The amortizing notes will not be guaranteed by any of our subsidiaries.

There are no covenants or provisions in the indenture that would afford the holders of the amortizing notes protection in the event of a highly leveraged transaction, reorganization, restructuring, merger or similar

transaction involving us that may adversely affect such holders, except to the extent set forth under "—Consolidation, Merger, Conveyance, Transfer or Lease."

The indenture does not limit the aggregate principal amount of indebtedness that may be issued thereunder and provides that debt securities may be issued thereunder from time to time in one or more series.

Ranking

The amortizing notes will be our general unsecured senior obligations and will rank equally in right of payment with all of our other existing and future unsecured senior indebtedness and guarantees and will be structurally subordinated to the indebtedness and other liabilities of our subsidiaries, including, upon consummation of the Acquisition, indebtedness and other liabilities of LDC and its subsidiaries that we assume in connection with the Acquisition. The amortizing notes will rank senior to all of our existing and future indebtedness, if any, that is subordinated to the amortizing notes. The amortizing notes will be effectively subordinated to any of our secured indebtedness to the extent of the collateral securing that indebtedness.

The amortizing notes are our obligations exclusively, and are not the obligations of any of our subsidiaries. We conduct our operations primarily through our subsidiaries and substantially all of our consolidated assets are held by our subsidiaries and, therefore, we depend on the cash flow of our subsidiaries to meet our obligations, including our obligations under the amortizing notes. Many of our subsidiaries are limited in their ability to pay dividends or make loans or distributions to us, including, without limitation, as a result of legislation, regulation, court order, contractual restrictions and other restrictions or in times of financial distress. Likewise, certain of LDC and its subsidiaries face similar restrictions that, if the Acquisition is consummated, will limit their ability to pay dividends or make loans or distributions to us. As a result, we may not be able to cause such subsidiaries and other entities to distribute funds or provide loans sufficient to enable us to meet our debt and other obligations, including obligations under the amortizing notes. See "Risk Factors—Risks Related to the Units, the Separate Purchase Contracts, the Separate Amortizing Notes and our Common Stock—Aqua America's ability to pay dividends and to meet its debt obligations largely depends on the performance of its subsidiaries and the ability to utilize the cash flows from those subsidiaries."

At December 31, 2018, on a pro forma basis after giving effect to the Transactions, (i) Aqua America, Inc. would have had approximately $2,096 million of indebtedness outstanding, of which none would have been secured indebtedness and (ii) our subsidiaries (including LDC and its subsidiaries) would have had a total of approximately $5,856 million of outstanding liabilities, including indebtedness, owed to non-affiliated third parties.

Installment Payments

Each amortizing note will have an initial principal amount of $8.62909. On each January 30, April 30, July 30 and October 30, commencing on July 30, 2019 (each, an "installment payment date"), we will pay, in cash, equal quarterly installments of $0.75000 on each amortizing note (except for the July 30, 2019 installment payment, which will be $0.80833 per amortizing note). Each installment payment will constitute a payment of interest (at a rate of 3.00% per annum) and a partial repayment of principal on the amortizing note, allocated as set forth on the amortization schedule set forth under "—Amortization Schedule."

Installments will be paid to the person in whose name an amortizing note is registered as of 5:00 p.m., New York City time, on January 15, April 15, July 15 and October 15, as applicable.

Each installment payment for any period will be computed on the basis of a 360-day year of twelve 30-day months. The installment payable for any period shorter or longer than a full installment payment period will be computed on the basis of the actual number of days elapsed per 30-day month. In the event that any date on which

an installment is payable is not a business day, then payment of the installment on such date will be made on the next succeeding day that is a business day, and without any interest or other payment in respect of any such delay.

Amortization Schedule

The total installments of principal of and interest on the amortizing notes for each installment payment date are set forth below:

Installment Payment Date	Amount of Principal	Amount of Interest
July 30, 2019	$ 0.73858	$ 0.06975
October 30, 2019	$ 0.69082	$ 0.05918
January 30, 2020	$ 0.69600	$ 0.05400
April 30, 2020	$ 0.70122	$ 0.04878
July 30, 2020	$ 0.70648	$ 0.04352
October 30, 2020	$ 0.71178	$ 0.03822
January 30, 2021	$ 0.71712	$ 0.03288
April 30, 2021	$ 0.72250	$ 0.02750
July 30, 2021	$ 0.72792	$ 0.02208
October 30, 2021	$ 0.73337	$ 0.01663
January 30, 2022	$ 0.73888	$ 0.01112
April 30, 2022	$ 0.74442	$ 0.00558

Repurchase of Amortizing Notes at the Option of the Holder

If we elect to exercise our early mandatory settlement right with respect to, or cause an acquisition termination redemption of, the purchase contracts, then holders of the amortizing notes (whether as components of Units or separate amortizing notes) will have the right (the "repurchase right") to require us to repurchase some or all of their amortizing notes for cash at the repurchase price per amortizing note to be repurchased on the repurchase date, as described below. Holders may not require us to repurchase a portion of an amortizing note. Holders will not have the right to require us to repurchase any or all of such holder's amortizing notes in connection with any early settlement of such holder's purchase contracts at the holder's option, as described above under "Description of the Purchase Contracts—Early Settlement" and "Description of the Purchase Contracts—Early Settlement Upon a Fundamental Change."

The "repurchase date" will be a date specified by us in the early mandatory settlement notice, or acquisition redemption notice, as the case may be, which will be at least 20 but not more than 35 business days following the date of our early mandatory settlement notice as described under "Description of the Purchase Contracts—Early Mandatory Settlement at Our Election" or the date of the acquisition redemption notice as described under "Description of the Purchase Contracts—Acquisition Termination Redemption," as the case may be (and which may or may not fall on the early mandatory settlement date or acquisition redemption settlement date, as the case may be).

The "repurchase price" per amortizing note to be repurchased will be equal to the principal amount of such amortizing note as of the repurchase date, plus accrued and unpaid interest on such principal amount from, and including, the immediately preceding installment payment date to, but not including, the repurchase date, calculated at an annual rate of 3.00%; *provided* that, if the repurchase date falls after a regular record date for any installment payment and on or prior to the immediately succeeding installment payment date, the installment payment payable on such installment payment date will be paid on such installment payment date to the holder as of such regular record date and will not be included in the repurchase price per amortizing note.

To exercise your repurchase right, you must deliver, on or before 5:00 p.m., New York City time, on the business day immediately preceding the repurchase date, the amortizing notes to be repurchased (or the Units, if the early mandatory settlement date or acquisition redemption settlement date, as the case may be, occurs on or after the repurchase date and you have not separated your Units into their constituent components), together with a duly completed written repurchase notice in the form entitled "Form of Repurchase Notice" on the reverse side of the amortizing notes (a "repurchase notice"), in each case, in accordance with appropriate DTC procedures, unless you hold certificated amortizing notes (or Units), in which case you must deliver the amortizing notes to be repurchased (or Units), duly endorsed for transfer, together with a repurchase notice, to the paying agent. Your repurchase notice must state:

- if certificated amortizing notes (or Units) have been issued, the certificate numbers of the amortizing notes (or Units), or if not certificated, your repurchase notice must comply with appropriate DTC procedures;
- the number of amortizing notes to be repurchased; and
- that the amortizing notes are to be repurchased by us pursuant to the applicable provisions of the amortizing notes and the indenture.

You may withdraw any repurchase notice (in whole or in part) by a written, irrevocable notice of withdrawal delivered (in the case of an amortizing note in global form, in accordance with the appropriate DTC procedures) on or before 5:00 p.m., New York City time, on the business day immediately preceding the repurchase date. The notice of withdrawal must state:

- if certificated amortizing notes (or Units) have been issued, the certificate numbers of the withdrawn amortizing notes (or Units), or if not certificated, your notice must comply with appropriate DTC procedures;
- the number of the withdrawn amortizing notes; and
- the number of amortizing notes, if any, that remain subject to the repurchase notice.

We will be required to repurchase the amortizing notes on the repurchase date. You will receive payment of the repurchase price on the later of (i) the repurchase date and (ii) the time of book-entry transfer or the delivery of the amortizing notes. If the trustee holds money sufficient to pay the repurchase price of the amortizing notes to be purchased on the repurchase date, then:

- such amortizing notes will cease to be outstanding and interest will cease to accrue (whether or not book-entry transfer of the amortizing notes is made or whether or not the amortizing notes are delivered to the trustee); and
- all other rights of the holder will terminate (other than the right to receive the repurchase price and, if the repurchase date falls between a regular record date and the corresponding installment payment date, the related installment payment).

Upon repurchase of the amortizing note component of a Unit prior to the related acquisition redemption settlement date, if applicable, the purchase contract component of such Unit will remain outstanding (pending such acquisition redemption settlement date) and beneficially owned by or registered in the name of, as the case may be, the holder who elected repurchase of the related amortizing note and will no longer constitute a part of the Unit.

In connection with any repurchase offer pursuant to an early mandatory settlement notice or acquisition redemption notice, we will, if required, comply with the provisions of the tender offer rules under the Exchange Act that may then be applicable.

No amortizing notes may be repurchased at the option of holders if the principal amount thereof has been accelerated, and such acceleration has not been rescinded, on or prior to the repurchase date (except in the case of an acceleration resulting from a default by us of the payment of the repurchase price with respect to such amortizing notes).

Events of Default

Each of the following will be an "event of default" under the indenture with respect to the amortizing notes:

- default in the payment of any installment payment on any amortizing notes as and when the same shall become due and payable and continuance of such failure for a period of 30 days;
- default in the payment of the repurchase price of any amortizing notes when the same shall become due and payable;
- our failure to give notice of a fundamental change as described under "Description of the Purchase Contracts—Early Settlement Upon a Fundamental Change" when due and continuance of such failure for a period of five business days;
- our failure to perform for 90 days after notice any other covenant in the amortizing notes or the indenture; and
- certain events of bankruptcy or insolvency of Aqua America, whether voluntary or not.

Discharge and Defeasance of Indenture

The defeasance provisions described in the accompanying prospectus under "Description of Debt Securities—Defeasance" will be applicable to the amortizing notes; *provided* that (i) the coin or currency unit to be deposited with the trustee under such provisions shall be U.S. dollars, (ii) references therein to "principal" shall be deemed to refer to "the portion of all future scheduled installment payments constituting the payment of principal in respect of the amortizing notes and the portion of the repurchase price constituting the principal amount of the amortizing notes" and (iii) references therein to "interest" shall be deemed to refer to "the portion of all future scheduled installment payments constituting the payment of interest in respect of the amortizing notes and the portion of the repurchase price constituting the accrued but unpaid interest on the amortizing notes."

Consolidation, Merger, Conveyance, Transfer or Lease

The indenture will provide that Aqua America will not consolidate or merge with or into any other entity, or sell, transfer, lease or otherwise convey its properties and assets as an entirety or substantially as an entirety to any entity, unless:

- (i) it is the continuing entity (in the case of a merger), or (ii) the successor entity formed by such consolidation or into which it is merged or which acquires by sale, transfer, lease or other conveyance of its properties and assets, as an entirety or substantially as an entirety, is a corporation organized and existing under the laws of the United States of America or any State thereof or the District of Columbia,

and expressly assumes, by supplemental indenture, the due and punctual payment of the installment payments on all the debt securities and the performance of all of the covenants under the indenture; and

- immediately after giving effect to the transaction, no event of default, and no event which after notice or lapse of time or both would become an event of default under the indenture, has or will have occurred and be continuing.

Although there is a limited body of case law interpreting the phrase "substantially as an entirety," there is no precise established definition of the phrase under applicable law. Accordingly, in certain circumstances there may be a degree of uncertainty as to whether a particular transaction would involve a disposition of our properties and assets "substantially as an entirety." As a result, it may be unclear as to whether the foregoing restrictions on mergers, consolidations, sales, conveyances, transfers, leases and other dispositions would apply to a particular transaction as described above absent a decision by a court of competent jurisdiction.

Modifications and Amendments

We and the trustee may amend or supplement the indenture or the amortizing notes without consent of the holders to:

- cure any ambiguity, omission, defect or inconsistency in the indenture;
- provide for the assumption by a successor corporation as set forth in "—Consolidation, Merger, Conveyance, Transfer or Lease;
- comply with any requirements of the SEC in connection with the qualification of the indenture under the Trust Indenture Act;
- to evidence and provide for the acceptance of appointment with respect to the amortizing notes by a successor trustee in accordance with the indenture, and add or change any of the provisions of the indenture as shall be necessary to provide for or facilitate the administration of the trusts under the indenture by more than one trustee;
- secure the notes;
- add guarantees with respect to the notes;
- add covenants or events of default for the benefit of the holders or surrender any right or power conferred upon us;
- make any change that does not adversely affect the rights of any holder in any material respect; and
- conform the provisions of the indenture or the amortizing notes to any provision of the "Description of the Amortizing Notes" section in the preliminary prospectus supplement for this Units offering, as supplemented by the related pricing term sheet.

In addition, notwithstanding anything to the contrary in the section of the accompanying prospectus entitled "Description of Debt Securities—Modification of the Indentures," we may not make any modification or amendment to the indenture or the amortizing notes without the consent of each holder affected thereby if that modification or amendment will:

- change any installment payment date or reduce the amount owed on any installment payment date; or
- reduce the repurchase price or amend or modify in any manner adverse to the holders of the amortizing notes our obligation to make such payment.

For purposes of the amortizing notes, the reference in the accompanying prospectus under the section entitled "Description of Debt Securities—Modification of the Indentures" to "the principal of," "premium" or "interest" will be deemed to be replaced by a reference to "the repurchase price, if applicable, of or any installment payment."

Governing Law

The indenture and the amortizing notes shall be governed by and construed in accordance with the laws of the State of New York.

Waiver of Jury Trial

The indenture will provide that we and the trustee will waive our respective rights to trial by jury in any action or proceeding arising out of or related to the amortizing notes, the indenture or the transactions contemplated thereby, to the maximum extent permitted by law.

CERTAIN UNITED STATES FEDERAL INCOME AND ESTATE TAX CONSIDERATIONS

The following summary describes certain U.S. federal income tax and estate consequences for holders as of the date of this prospectus supplement, of the purchase, ownership and disposition of Units, amortizing notes, and the purchase contracts that are or may be the components of a Unit and shares of our common stock acquired under a purchase contract.

This summary deals only with Units, amortizing notes, purchase contracts, and common stock held as capital assets by a holder who purchases the Units upon original issuance at their initial offering price, as indicated on the cover of this prospectus supplement. This summary does not constitute a detailed description of the U.S. federal income tax considerations applicable to you if you are subject to special treatment under the U.S. federal income tax laws, including if you are:

- a dealer in securities or currencies;
- a trader in securities that has elected the mark-to-market method of tax accounting for your securities;
- a regulated investment company;
- a real estate investment trust;
- a tax-exempt organization;
- an insurance company;
- a person holding the Units, amortizing notes, purchase contracts, or common stock as part of a hedging, integrated, conversion or constructive sale transaction or a straddle;
- a financial institution;
- a person liable for alternative minimum tax;
- a partnership or other pass-through entity for United States federal income tax purposes;
- a “U.S. holder” (as defined below) whose “functional currency” is not the U.S. dollar;
- a “controlled foreign corporation”;
- a “passive foreign investment company”;
- a foreign pension fund;
- a person who owns or is deemed to own 10% or more of our stock (by vote or value);
- a person required to accelerate the recognition of any item of gross income with respect to our common shares as a result of such income being recognized on an applicable financial statement; or
- a U.S. expatriate.

If a partnership (or other entity treated as a partnership for United States federal income tax purposes) holds the Units, amortizing notes, purchase contracts, or common stock, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding the Units, amortizing notes, purchase contracts, or common stock, you should consult your tax advisor.

The discussion below is based upon the provisions of the Internal Revenue Code of 1986, as amended (the "Code"), and regulations, rulings and judicial decisions thereunder as of the date hereof. Those authorities may be changed, perhaps retroactively, so as to result in U.S. federal income and estate tax consequences different from those discussed below.

This summary does not address all aspects of U.S. federal income and estate taxes and does not address the Medicare tax on net investment income or the effects of any state, local or non-United States tax laws that may be relevant to holders in light of their personal circumstances. **If you are considering the purchase, ownership or disposition of the Units, amortizing notes, purchase contracts or common stock, you should consult your own tax advisors concerning the U.S. federal income and estate tax consequences to you in light of your particular situation as well as any consequences arising under the laws of any other taxing jurisdiction.**

Characterization of Units and Amortizing Notes

There is no authority directly addressing the characterization of the Units or instruments similar to the Units for U.S. federal income tax purposes and therefore the characterization of the Units for these purposes is not entirely free from doubt. We will take the position that each Unit will be treated as an investment unit composed of two separate instruments for U.S. federal income tax purposes: (i) a prepaid purchase contract to acquire our common stock and (ii) an amortizing note that is our indebtedness. Under this treatment, a holder of Units will be treated as if it held each component of the Units for U.S. federal income tax purposes. By acquiring a Unit, you will agree to treat (i) a Unit as an investment unit composed of two separate instruments in accordance with its form and (ii) the amortizing notes as indebtedness of Aqua America, Inc. for U.S. federal income tax purposes. If, however, the components of a Unit were treated as a single instrument, the U.S. federal income tax consequences could differ from the consequences described below. Specifically, if you are a "U.S. holder" (as defined below under "U.S. Holders") you could be required to recognize the entire amount of each installment payment on the amortizing notes, rather than merely the portion of such payment denominated as interest, as income. In addition, if you are a "non-U.S. holder" (as defined below under "Non-U.S. Holders"), payments of principal and interest made to you on the amortizing notes could be subject to U.S. withholding tax. Even if the components of a Unit are respected as separate instruments for U.S. federal income tax purposes, (i) the amortizing notes could be recharacterized as equity for U.S. federal income tax purposes, in which case payments of interest to non-U.S. holders on the amortizing notes could potentially be subject to U.S. withholding tax and (ii) the purchase contracts could be treated as our stock on the date of issuance, in which case the tax consequences of the purchase, ownership and disposition thereof would be substantially the same as the tax consequences described herein, except that a holder's holding period for the common stock received under a purchase contract would include the period during which the U.S. holder held the purchase contract.

The Units are complex financial instruments and no statutory, judicial or administrative authority directly addresses all aspects of the treatment of the Units or instruments similar to the Units for U.S. federal income tax purposes, and no assurance can be given that the Internal Revenue Service ("IRS") will agree with the tax consequences described herein. As a result, the U.S. federal income tax consequences of the purchase, ownership and disposition of the Units are unclear. We have not sought any rulings concerning the treatment of the Units, and the tax consequences described herein are not binding on the IRS or the courts, either of which could disagree with the explanations or conclusions contained in this summary. Accordingly, you should consult your tax advisor regarding the consequences to you of the possible recharacterization of the components of a Unit as a single instrument. Unless stated otherwise, the remainder of this discussion assumes the characterization of the Units as two separate instruments.

Allocation of Purchase Price

Your acquisition of a Unit will be treated as an acquisition of the amortizing note and the purchase contract constituting the Unit and, by purchasing the Unit, you will be deemed to have agreed to such treatment. In addition, we and you, by your acceptance of a beneficial ownership interest in the amortizing notes, agree to treat the notes as indebtedness of Aqua America, Inc. for all U.S. federal income tax purposes. The remainder of this discussion assumes that a holder of a Unit will be treated as owning the amortizing note and the purchase contract.

The purchase price of each Unit will be allocated between the amortizing note and the purchase contract in proportion to their respective fair market values at the time of purchase. Such allocation will establish your initial tax basis in the amortizing note and the purchase contract. We will report the initial fair market value of each amortizing note as $8.62909 and the initial fair market value of the purchase contract as $41.37091. This allocation is binding on you (but not on the IRS), unless you explicitly disclose a contrary position on a statement attached to your timely filed U.S. Federal income tax return. The remainder of this discussion assumes that this allocation of the purchase price will be respected for U.S. Federal income tax purposes.

U.S. Holders

The following is a summary of certain U.S. federal incomes tax consequences that will apply to you if you are a U.S. holder of Units, amortizing notes, purchase contracts or common stock.

As used herein, the term "U.S. holder" means a beneficial owner of Units, amortizing notes, purchase contracts or common stock that, for U.S. federal income tax purposes, is:

- an individual citizen or resident of the United States;
- a corporation (or other entity treated as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to U.S. federal income taxation regardless of its source; or
- a trust if it (1) is subject to the primary supervision of a court within the United States and one or more United States persons have the authority to control all substantial decisions of the trust or (2) has a valid election in effect under applicable U.S. Treasury regulations to be treated as a United States person.

Units

Separation and Recreation of the Units.

A U.S. holder will not recognize gain or loss by (i) separating a Unit into its components or (ii) recreating a Unit as both procedures are described under "Description of the Units—Separating and Recreating Units."

Sale, Exchange or Other Taxable Disposition of Units

Upon a sale, exchange or other taxable disposition of Units, you will be treated as having sold, exchanged or disposed of both the purchase contracts and the amortizing notes that constitute such Units and you will calculate gain or loss on the purchase contracts separately from the gain or loss on the amortizing notes in proportion to their relative fair market values at the time of the disposition. It is thus possible that you could recognize a capital gain on one component of a Unit but a capital loss on the other component of the Unit. You generally will have gain or loss equal to the difference between (i) the portion of your proceeds allocable to the purchase contract and the amortizing notes and (ii) your respective adjusted tax bases in the purchase contract and the amortizing notes. For purposes of determining gain or loss, your proceeds will not include any amount

attributable to accrued and unpaid interest, which amount will be treated as ordinary interest income to the extent not previously included in income. Such gain or loss generally will be capital gain or loss. Capital gains of individuals derived in respect of assets held for more than one year are subject to tax at preferential rates. The deductibility of capital losses is subject to limitations.

Amortizing Notes

Payments of Interest and Principal on Amortizing Notes

Stated interest on an amortizing note will be includible in your gross income as ordinary interest income at the time it is paid or at the time it accrues in accordance with your method of tax accounting, and payments on the notes other than stated interest will reduce your basis with respect to such amortizing note. It is expected, and this discussion assumes, that the amortizing notes will not be issued with more than a *de minimis* amount of original issue discount ("OID"). In general, however, if the amortizing notes are issued with more than *de minimis* OID, a U.S. holder will be required to include OID in gross income, as ordinary income, under a "constant-yield method" before the receipt of cash attributable to such income, regardless of the U.S. holder's regular method of accounting for U.S. federal income tax purposes. Payments on the amortizing notes other than stated interest (including the portion of each installment payment that is not treated as interest) will reduce a U.S. holder's basis with respect to the amortizing notes.

Sale, Exchange or Other Taxable Disposition of Amortizing Notes

Upon a sale, exchange or other taxable disposition of amortizing notes, you will generally have gain or loss equal to the difference between (i) the amount realized and (ii) your adjusted tax basis in the amortizing note. For purposes of determining gain or loss, your proceeds will not include any amount attributable to accrued and unpaid interest, which amount will be treated as ordinary interest income to the extent not previously included in income. Such gain or loss generally will be capital gain or loss. Capital gains of individuals derived in respect of assets held for more than one year are subject to tax at preferential rates. The deductibility of capital losses is subject to limitations.

Repurchase of Amortizing Notes

If you elect to have us repurchase your notes in connection with an early mandatory settlement or acquisition termination redemption, you will recognize gain or loss in an amount equal to the difference between the amount realized on the repurchase of your amortizing notes and your adjusted tax basis in the amortizing notes. For purposes of determining gain or loss, your amount realized will not include any amount attributable to accrued and unpaid interest, which amount will be treated as ordinary interest income to the extent not previously included in income. Such gain or loss generally will be capital gain or loss. Long-term capital gains of a non-corporate U.S. holder are generally eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations.

Purchase Contracts

Acquisition Termination Redemption

In the event of a acquisition termination redemption, we may elect to pay cash in lieu of delivering any or all of the shares of common stock due in settlement of the purchase contracts (unless the "acquisition termination stock price" is equal to or less than the reference price, in which case the outstanding purchase contracts will be redeemed solely for cash, the treatment of which is discussed above under "—Sale, Exchange or Other Disposition of Units"). If a U.S. holder receives cash and common stock in settlement of a purchase contract, the tax treatment of the settlement is not entirely certain. A U.S. holder should consult its own tax advisor regarding the consequences of a combination settlement.

Although no authority directly addresses a combination settlement, we intend to take the position that (i) the cash received in respect of a purchase contract should be treated as proceeds from the sale of a portion of the purchase contract and taxed in the manner described above under "—Sale, Exchange or Other Disposition of Units" and (ii) the common stock consideration should be treated as received on settlement of the other portion of the purchase contract and therefore generally not be taxable to a U.S. holder.

In that case, the U.S. holder's adjusted tax basis in the purchase contract would generally be allocated pro rata between the common stock received and the portion of the purchase contract that is treated as sold for cash based on the fair market value of our common stock and the cash. The holding period for our common stock received (including any fractional share deemed received) will commence on the day after the date of receipt.

Alternatively, it is possible that an acquisition termination redemption resulting in combination settlement could result in a U.S. holder recognizing gain, but not loss, equal to the excess of the fair market value of the common stock and cash received over the U.S. holder's adjusted tax basis in the purchase contract. In no event would the gain recognized exceed the amount of cash received. Any gain would be long-term capital gain if, at the time of settlement the purchase contract has been held for more than one year. In this case, (i) a U.S. holder's tax basis in the common stock received generally would equal its tax basis in the purchase contract that was settled, reduced by the amount of any cash received, and increased by the amount of gain, if any, recognized; (ii) the U.S. holder's holding period for common stock received would include the period during which it held the purchase contract; and (iii) a U.S. holder that is a "significant holder" would be subject to certain recordkeeping and information reporting requirements with respect to the settlement.

Acquisition of Common Stock under a Purchase Contract

Except as may occur pursuant to an acquisition termination redemption (as discussed above under "Description of the Purchase Contracts—Acquisition Termination Redemption"), the purchase contracts are expected to physically settle. You generally will not recognize gain or loss on the purchase of common stock under a purchase contract, except with respect to any cash paid in lieu of a fractional share of common stock. Your aggregate initial tax basis in the common stock acquired under a purchase contract should equal your tax basis in the purchase contract less any such tax basis allocable to the fractional share. The holding period for common stock received under a purchase contract will commence on the day after the common stock is acquired.

Constructive Distributions and Dividends

You might be treated as receiving a constructive distribution from us if (i) the fixed settlement rates are adjusted and as a result of such adjustment your proportionate interest in our assets or earnings and profits is increased and (ii) the adjustment is not made pursuant to a bona fide, reasonable anti-dilution formula. An adjustment in the fixed settlement rates would not be considered made pursuant to such a formula if the adjustment were made to compensate you for taxable distributions with respect to our common stock (for example, if we increase the cash dividend on our common stock). Certain of the possible settlement rate adjustments (including, without limitation, adjustments in respect of taxable dividends to holders of our common stock and as discussed in "Description of the Purchase Contracts—Early Settlement Upon a Fundamental Change") may not qualify as being pursuant to a bona fide reasonable adjustment formula. Thus, under certain circumstances, an increase in the fixed settlement rates might give rise to a constructive distribution to you even though you would not receive any cash related thereto. In addition, in certain situations, you might be treated as receiving a constructive distribution if we fail to adjust the fixed settlement rates. Any constructive distribution will be taxable as a dividend, return of capital, or capital gain in accordance with the earnings and profits rules described below.

Sale, Exchange or Other Taxable Disposition of Purchase Contracts

Except as described above under "—Acquisition of Common Stock under a Purchase Contract", upon a sale, exchange, or other taxable disposition of a purchase contract, you will recognize capital gain or loss in an

amount equal to the difference between the amount realized and your adjusted tax basis in the purchase contract. Such gain or loss generally will be capital gain or loss. Long-term capital gains of a non-corporate U.S. holder are generally eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations.

Common Stock Acquired under a Purchase Contract

Distributions

Any distribution on our common stock (other than certain pro rata distributions of common shares) paid out of our current or accumulated earnings and profits (as determined for U.S. federal income tax purposes) will constitute a dividend and will be includible in income by you when received. Non-corporate U.S. Holders that received dividends on our common stock are eligible for a reduced rate of taxation of certain requirements are satisfied. Any such dividend will be eligible for the dividends-received deduction if you are an otherwise qualifying corporate holder that meets the holding period and other requirements for the dividends-received deduction. Any distributions on our common stock in excess of our current and accumulated earnings and profits will first be applied to reduce your tax basis in the common stock, and any amount in excess of your tax basis will be treated as gain from the sale or exchange of your common stock, as described immediately below.

Sale, Exchange or Other Taxable Disposition of Common Stock

Upon a sale, exchange, or other taxable disposition of our common stock, you will recognize capital gain or loss in an amount equal to the difference between the amount realized and your adjusted tax basis in the common stock. Such gain or loss generally will be capital gain or loss. Long-term capital gains of a non-corporate U.S. holder are generally eligible for reduced rates of taxation. The deductibility of capital losses is subject to limitations.

Information Reporting and Backup Withholding

In general, information reporting requirements may apply to payments on the amortizing notes, the purchase contracts and common stock made to you and to the proceeds of the sale or other disposition of such instruments, unless you are an exempt recipient. Backup withholding may apply to such payments if you fail to provide a taxpayer identification number, a certification of exempt status, or fail to report in full dividend and interest income.

Backup withholding is not an additional tax and any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against your United States federal income tax liability provided the required information is timely furnished to the Internal Revenue Service.

Non-U.S. Holders

The following discussion applies only to non-U.S. holders. As used herein, a "non-U.S. holder" means a beneficial owner of Units, amortizing notes, purchase contracts or common stock that is neither a U.S. holder nor a partnership. As discussed above under "—Characterization of Units and Amortizing Notes", this discussion assumes that a Unit is treated as two separate instruments and that the amortizing notes are treated as indebtedness of Aqua America, Inc. for U.S. federal income tax purposes. Different tax consequences would apply if the Unit was treated as a single instrument.

U.S. Federal Withholding Tax

A 30% U.S. federal withholding tax will not apply to any payment to you of principal or interest on the amortizing notes, provided that you meet the following requirements of the portfolio interest exemption:

- interest paid on the notes is not effectively connected with your conduct of a trade or business in the United States;

- you do not actually (or constructively) own 10% or more of the total combined voting power of all classes of our voting stock within the meaning of the Code and the Treasury regulations;
- you are not a controlled foreign corporation that is related to us through stock ownership;
- you are not a bank whose receipt of interest on the amortizing notes is described in section 881(c)(3)(A) of the Code; and

(a) you provide your name and address on an IRS Form W-8BEN or W-8BEN-E (or other applicable form), and certify, under penalties of perjury, that you are not a United States person, or (b) if you hold your Units or amortizing notes through certain foreign intermediaries, you satisfy the certification requirements of applicable U.S. Treasury regulations. Special certification requirements apply to certain non-U.S. holders that are pass-through entities rather than individuals.

If you cannot satisfy the requirements described above, payments of interest made to you will be subject to the 30% U.S. federal withholding tax, unless you provide a properly executed:

- IRS Form W-8BEN or W-8BEN-E (or other applicable form) claiming an exemption from, or reduction in the rate of, withholding under the benefit of an applicable tax treaty; or
- IRS Form W-8ECI (or other applicable form) stating that interest paid on the amortizing notes is not subject to withholding tax because it is effectively connected with your conduct of a trade or business in the United States.

Except as described below in "—Foreign Investment in Real Property Tax Act" , the 30% U.S. federal withholding tax will generally not apply to any gain that you realize on the sale, exchange, or other disposition of the Units, amortizing notes, purchase contracts or common stock acquired under the purchase contract.

We will generally withhold tax at a 30% rate on dividends paid on common stock acquired under a purchase contract and any constructive dividends resulting from certain adjustments, or failure to make adjustments, to the settlement rate of the purchase contracts (see "—U.S. Holders—Settlement of the Purchase Contracts—Constructive Distributions and Dividends") or such lower rate as may be specified by an applicable income tax treaty. Any applicable withholding taxes imposed in connection with a constructive distribution may be withheld from payments made on the applicable Units or purchase contract. If any withholding taxes are paid on behalf of a Non-U.S. Holder, those withholding taxes may be set off against subsequent payments on the applicable Units or purchase contracts (including any payments, including Common Stock, received upon the settlement of the purchase contracts). However, dividends that are effectively connected with the conduct of a trade or business by the non-U.S. holder within the United States and, where a tax treaty applies, are attributable to a U.S. permanent establishment of the non-U.S. holder, are not subject to the withholding tax, provided the relevant certification requirements are satisfied, but instead are subject to U.S. federal income tax, as described below.

A non-U.S. holder of a Unit, common stock or a purchase contract who wishes to claim the benefit of an applicable treaty rate for dividends or constructive dividends will be required to provide an IRS Form W-8BEN or W-8BEN-E (or other applicable form) claiming an exemption from, or reduction in the rate of, withholding under the benefit of an applicable tax treaty. A non-U.S. holder eligible for a reduced rate of U.S. withholding tax on payments pursuant to an income tax treaty may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for refund with the IRS.

U.S. Federal Income Tax

If you are engaged in a trade or business in the United States and interest on the amortizing notes or dividends on our common stock (or constructive dividends on the purchase contracts) are effectively connected

with the conduct of that trade or business (and, where a tax treaty applies, are attributable to a U.S. permanent establishment of the non-U.S. holder), you will be subject to U.S. federal income tax on the interest or dividends on a net income basis (although exempt from the 30% withholding tax), in the same manner as if you were a United States person as defined under the Code. Certain certification and disclosure requirements must be complied with in order for effectively connected income to be exempt from withholding. In addition, if you are a foreign corporation, you may be subject to a branch profits tax equal to 30% (or lower applicable treaty rate) of your earnings and profits for the taxable year, subject to adjustments, that are effectively connected with the conduct by you of a trade or business in the United States. For this purpose, interest on the amortizing notes or dividends on our common stock and constructive dividends on the purchase contracts will be included in earnings and profits.

Upon a disposition of Units, you will be treated as having sold, exchanged or disposed of both the purchase contracts and the amortizing notes that constitute such Units. Any gain realized on the disposition of an amortizing note, purchase contract or share of common stock generally will not be subject to U.S. federal income tax unless:

- that gain or income is effectively connected with the conduct of a trade or business by you in the United States (and, if required by an applicable income tax treaty, is attributable to a United States permanent establishment of the non-U.S. holder); or
- you are an individual who is present in the United States for 183 days or more in the taxable year of that disposition, and certain other conditions are met; or
- in the case of a purchase contract or our common stock, we are or have been a "United States real property holding corporation" for U.S. federal income tax purposes (see the discussion below under "—Foreign Investment in Real Property Tax Act").

An individual non-U.S. holder described in the first bullet above will be subject to tax on the net gain derived from the sale under regular graduated U.S. federal income tax rates. If a non-U.S. holder that is a foreign corporation falls under the first bullet above, it will be subject to tax on its gain under regular graduated U.S. federal income tax rates and, in addition, may be subject to the branch profits tax equal to 30% of its effectively connected earnings and profits or at such lower rate as may be specified by an applicable income tax treaty. An individual non-U.S. holder described in the second bullet point immediately above will be subject to a 30% (or such lower rate as may be specified by an applicable income tax treaty) tax on the gain derived from the sale or other disposition, which gain may be offset by United States source capital losses even though the individual is not considered a resident of the United States.

Foreign Investment in Real Property Tax Act

Generally, a corporation is a "United States real property holding corporation" if the fair market value of its United States real property interests equals or exceeds 50% of the sum of the fair market value of its worldwide real property interests and its other assets used or held for use in a trade or business (all as determined for United States federal income tax purposes). We believe we are not and do not anticipate becoming a "United States real property holding corporation" for United States federal income tax purposes. If, however, we are or become a "United States real property holding corporation," so long as our common stock is regularly traded on an established securities market during the calendar year in which the sale or other disposition occurs, only a non-U.S. holder who holds or held (at any time during the shorter of the five year period preceding the date of disposition or the holder's holding period) more than 5% of our common stock will be subject to United States federal income tax on the sale or other disposition of our common stock.

U.S. Federal Estate Tax

Your estate will not be subject to U.S. federal estate tax on the amortizing notes beneficially owned by you at the time of your death, provided that any payments made to you on the amortizing notes would be eligible for exemption from the 30% withholding tax under the portfolio interest exemption described above under "—U.S. Federal Withholding Tax" without regard to the certification requirement described in the fourth bullet point regarding portfolio interest.

Common stock acquired under a purchase contract and owned by you at the time of your death will be subject to U.S. federal estate tax unless an applicable estate tax treaty provides otherwise. The purchase contract owned by you at the time of your death may be subject to U.S. federal estate tax unless an applicable estate tax treaty provides otherwise.

Information Reporting and Backup Withholding

The amount of the interest and dividends (including deemed dividends) paid to you and the tax withheld with respect to such interest and dividends, regardless of whether withholding was required, must be reported annually to the IRS and to you. Copies of the information returns reporting the amount of such interest and dividends and the amount of withholding may also be made available to the tax authority in the country in which you reside under the provisions of an applicable income tax treaty.

In general, no backup withholding will be required regarding payments on amortizing notes or common stock that we make to you, provided that we do not have actual knowledge or reason to know that you are a United States person and you have complied with the certification procedures described above under "—U.S. Federal Withholding Tax."

Information reporting and, depending on the circumstances, backup withholding will apply to the proceeds of a sale or other disposition of our common stock made within the United States or conducted through certain United States-related financial intermediaries, unless the beneficial owner certifies under penalty of perjury that it is a non-U.S. holder, provided that we do not have actual knowledge or reason to know that the beneficial owner is a United States person and the beneficial owner has complied with the certification procedures described above under "—U.S. Federal Withholding Tax" or otherwise establishes an exemption.

Additional Withholding Requirements

Under Sections 1471 through 1474 of the Code (such Sections commonly referred to as "FATCA"), a 30% United States federal withholding tax may apply to any dividends and interest paid on our Units, amortizing notes, purchase contracts or common stock, as applicable, to (i) a "foreign financial institution" (as specifically defined in the Code) which does not provide sufficient documentation, typically on IRS Form W-8BEN or W-8BEN-E, evidencing either (x) an exemption from FATCA, or (y) its compliance (or deemed compliance) with FATCA (which may alternatively be in the form of compliance with an intergovernmental agreement with the United States) in a manner which avoids withholding, or (ii) a "non-financial foreign entity" (as specifically defined in the Code) which does not provide sufficient documentation, typically on IRS Form W-8BEN or W-8BEN-E, evidencing either (x) an exemption from FATCA, or (y) adequate information regarding certain substantial United States beneficial owners of such entity (if any). If a dividend or payment, as applicable, is both subject to withholding under FATCA and subject to the withholding tax discussed above under "—U.S. Federal Withholding Tax," the withholding under FATCA may be credited against, and therefore reduce, such other withholding tax. You should consult your own tax advisors regarding these requirements and whether they may be relevant to your ownership and disposition of our Units, amortizing notes, purchase contracts and common stock.

CERTAIN ERISA CONSIDERATIONS

The following is a summary of certain considerations associated with the purchase and holding of the Units, the common stock issuable upon settlement of the purchase contracts and the amortizing notes by (i) employee benefit plans that are subject to Title I of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), (ii) plans, individual retirement accounts and other arrangements that are subject to Section 4975 of the Code or provisions under any other federal, state, local, non-U.S. or other laws or regulations that are similar to such provisions of ERISA or the Code (collectively, "Similar Laws"), and (iii) entities which are deemed to hold the assets of any of the foregoing types of plans, accounts or arrangements (each of the foregoing described in clauses (i), (ii), and (iii) being referred to herein as a "Plan").

General fiduciary matters

ERISA and the Code impose certain duties on persons who are fiduciaries of a Plan subject to Title I of ERISA or Section 4975 of the Code (a "Covered Plan") and prohibit certain transactions involving the assets of a Covered Plan and its fiduciaries or other interested parties. Under ERISA and the Code, any person who exercises any discretionary authority or control over the administration of such a Covered Plan or the management or disposition of the assets of such a Covered Plan, or who renders investment advice for a fee or other compensation to such a Covered Plan, is generally considered to be a fiduciary of the Covered Plan.

In considering an investment in the Units, the common stock issuable upon settlement of the purchase contracts and/or amortizing notes of a portion of the assets of any Plan, a fiduciary should determine whether the investment is in accordance with the documents and instruments governing the Plan and the applicable provisions of ERISA, the Code or any Similar Law relating to a fiduciary's duties to the Plan including, without limitation, the prudence, diversification, delegation of control and prohibited transaction provisions of ERISA, the Code and any other applicable Similar Laws.

Prohibited transaction issues

Section 406 of ERISA and Section 4975 of the Code prohibit Covered Plans from engaging in specified transactions involving plan assets with persons or entities who are "parties in interest," within the meaning of ERISA, or "disqualified persons," within the meaning of Section 4975 of the Code, unless an exemption is available. A party in interest or disqualified person who engaged in a non-exempt prohibited transaction may be subject to excise taxes and other penalties and liabilities under ERISA and the Code. In addition, the fiduciary of the Covered Plan that engaged in such a non-exempt prohibited transaction may be subject to penalties and liabilities under ERISA and the Code.

The acquisition, holding and/or disposition of the Units, the common stock issuable upon settlement of the purchase contracts or the amortizing notes by a Covered Plan with respect to which we or an underwriter or any of our or their respective affiliates is considered a party in interest or a disqualified person may constitute or result in a direct or indirect prohibited transaction under Section 406 of ERISA and/or Section 4975 of the Code, unless the investment is acquired and is held in accordance with an applicable statutory, class or individual prohibited transaction exemption. In this regard, the U.S. Department of Labor has issued prohibited transaction class exemptions (each, a "PTCE") that may apply to the acquisition and holding of the Units, the common stock issuable upon settlement of the purchase contracts or the amortizing notes. These class exemptions include, without limitation, PTCE 84-14 respecting transactions determined by independent qualified professional asset managers, PTCE 90-1 respecting insurance company pooled separate accounts, PTCE 91-38 respecting bank collective investment funds, PTCE 95-60 respecting life insurance company general accounts and PTCE 96-23 respecting transactions determined by in-house asset managers. In addition, the statutory exemption under Section 408(b)(17) of ERISA and Section 4975(d)(20) of the Code provides relief from certain prohibited transaction provisions of Section 406 of ERISA and Section 4975 of the Code for certain transactions between a Covered Plan and a person who is a party in interest or disqualified person solely as a result of providing services to such Covered Plan or a relationship to such a service provider, provided that neither the person transacting

with the Covered Plan nor any of its affiliates has or exercises any discretionary authority or control or renders any investment advice with respect to the assets of the Covered Plan involved in the transaction and provided, further, that the Covered Plan pays no more than, and receives no less than, adequate consideration in connection with the transaction. Each of the above-noted exemptions contains conditions and limitations on its application. Fiduciaries of Covered Plans considering acquiring holding the Units, the common stock issuable upon settlement of the purchase contracts or the amortizing notes in reliance on these or any other exemption should carefully review the exemption in consultation with counsel to assure it is applicable. There can be no assurance that all of the conditions of any of the foregoing exemptions or any other exemption will be satisfied.

Government plans, foreign plans and certain church plans, while not subject to the fiduciary responsibility provisions of Title I of ERISA or the prohibited transaction provisions of Section 406 of ERISA or Section 4975 of the Code, may nevertheless be subject to Similar Laws. Fiduciaries of such Plans should consult with their counsel before acquiring the Units, common stock issuable upon settlement of the purchase contracts, amortizing notes or any interest therein.

Because of the foregoing, neither the Units or their constituent parts may not be purchased or held by any person investing assets of any Plan, unless such purchase and holding will not constitute or result in a non-exempt prohibited transaction under ERISA or Section 4975 of the Code or a similar violation of any applicable Similar Laws.

Representation

Accordingly, by its acceptance of the Units, common stock issued upon settlement of the purchase contracts or amortizing notes, each purchaser and subsequent transferee will be deemed to have represented and warranted that either (i) no portion of the assets used by such purchaser or transferee to acquire or hold the Units, the common stock upon settlement of the purchase contracts or amortizing notes, or any interest therein constitutes assets of any Plan or (ii) (1) the acquisition, holding and disposition of the Units, common stock issuable upon settlement of the purchase contracts or amortizing notes by such purchaser or transferee will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or a similar violation under any applicable Similar Laws and (2) acknowledge and agree that neither the issuer, underwriters or any of their respective affiliates is, or is undertaking to be, a fiduciary with respect to any Plan in connection with the Plan's acquisition, holding or disposition of the Units, common stock issuable upon settlement of the purchase contracts or amortizing notes, as applicable.

The foregoing discussion is general in nature and is not intended to be all-inclusive. Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing or holding the Units, common stock issuable upon settlement of the purchase contracts or amortizing notes on behalf of, or with the assets of, any Plan, consult with their counsel regarding the potential applicability of ERISA, Section 4975 of the Code or any Similar Law and whether an exemption would be required. Neither this discussion nor anything provided in this prospectus supplement is, or is intended to be, investment advice directed at any potential Plan purchasers, or at Plan purchasers generally, and such purchasers of the Units or any of its constituent parts should consult and rely on their own counsel and advisers as to whether such an investment is suitable for the Plan. The sale of any of the Units, common stock issuable upon settlement of the purchase contracts or amortizing notes to any Plan is in no respect a representation by us, an Underwriter or any of our or their affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by Plans generally or any particular Plan, or that such investment is prudent or appropriate for plans generally or any particular Plan.

BOOK-ENTRY PROCEDURES AND SETTLEMENT

The Units, the separate purchase contracts and the separate amortizing notes will initially be issued under a book-entry system in the form of global securities. We will register the global securities in the name of The Depository Trust Company, New York, New York, or DTC, or its nominee and will deposit the global securities with that depositary.

Following the issuance of a global security in registered form, the depositary will credit the accounts of its participants with the Units, the separate purchase contracts and the separate amortizing notes, as the case may be, upon our instructions. Only persons who hold directly or indirectly through financial institutions that are participants in the depositary can hold beneficial interests in the global securities. Because the laws of some jurisdictions require certain types of purchasers to take physical delivery of such securities in definitive form, you may encounter difficulties in your ability to own, transfer or pledge beneficial interests in a global security.

So long as the depositary or its nominee is the registered owner of a global security, we, the trustee and the purchase contract agent will treat the depositary as the sole owner or holder of the Units, the separate purchase contracts and the separate amortizing notes, as the case may be. Therefore, except as set forth below, you will not be entitled to have Units, separate purchase contracts or separate amortizing notes registered in your name or to receive physical delivery of certificates representing the Units, the separate purchase contracts or the separate amortizing notes. Accordingly, you will have to rely on the procedures of the depositary and the participant in the depositary through whom you hold your beneficial interest in order to exercise any rights of a holder under the indenture or the purchase contract agreement, as the case may be. We understand that under existing practices, the depositary would act upon the instructions of a participant or authorize that participant to take any action that a holder is entitled to take.

As long as the separate amortizing notes are represented by the global securities, we will pay installments on those separate amortizing notes to or as directed by DTC as the registered holder of the global securities. Payments to DTC will be in immediately available funds by wire transfer. DTC will credit the relevant accounts of their participants on the applicable date. Neither we nor the trustee will be responsible for making any payments to participants or customers of participants or for maintaining any records relating to the holdings of participants and their customers, and you will have to rely on the procedures of the depositary and its participants.

Settlement

Secondary market trading between DTC participants will occur in the ordinary way in accordance with DTC rules and will be settled in immediately available funds using DTC's Same-Day Funds Settlement System.

Definitive Securities and Paying Agents

Book-entry securities represented by a global security will be exchanged for definitive (paper) securities only if:

- the depositary is at any time unwilling or unable to continue as depositary for such security or ceases to be a clearing agency registered under the Exchange Act, and a successor depositary registered as a clearing agency under the Exchange Act is not appointed by us within 90 days; or

- an Event of Default with respect to the amortizing notes, or any failure on the part of us to observe or perform any covenant or agreement in the purchase contracts, has occurred and is continuing and a beneficial owner requests that its amortizing notes and/or purchase contracts, as the case may be, be issued in physical, certificated form.

The global security will be exchangeable in whole for definitive securities in registered form, with the same terms and of an equal aggregate principal amount. Definitive Units, separate purchase contracts or separate amortizing notes, as the case may be, will be registered in the name or names of the person or persons specified by the depositary in a written instruction to the registrar of the securities. The depositary may base its written instruction upon directions it receives from its participants.

If any of the events described above occurs, then the beneficial owners will be notified through the chain of intermediaries that definitive securities are available and notice will be published as described below under "—Notices." Beneficial owners of book-entry Units, separate purchase contracts or separate amortizing notes, as the case may be, will then be entitled (1) to receive physical delivery in certificated form of definitive Units, separate purchase contracts or separate amortizing notes, as the case may be, equal in aggregate amount of Units, separate purchase contracts or separate amortizing notes, as the case may be, to their beneficial interest and (2) to have the definitive securities registered in their names. Thereafter, the holders of the definitive Units, separate purchase contracts and separate amortizing notes, as the case may be, will be recognized as the "holders" of the Units, separate amortizing notes and separate purchase contracts for purposes of the purchase contract agreement and indenture, respectively.

Each of the purchase contract agreement and indenture provides for the replacement of a mutilated, lost, stolen or destroyed definitive security, so long as the applicant furnishes to us and the trustee such security or indemnity and such evidence of ownership as we and it may require.

In the event definitive separate amortizing notes are issued, the holders thereof will be able to receive installment payments at the office of our paying agent. The final installment payment of a definitive separate amortizing note may be made only against surrender of the separate amortizing note to one of our paying agents. We also have the option of making installment payments by mailing checks to the registered holders of the separate certificated amortizing notes.

In the event definitive Units, separate purchase contracts or separate amortizing notes are issued, the holders thereof will be able to transfer their securities, in whole or in part, by surrendering such securities for registration of transfer at the office specified in the purchase contract agreement or the indenture, as applicable. A form of such instrument of transfer will be obtainable at the relevant office. Upon surrender, we will execute, and the purchase contract agent and the trustee will authenticate and deliver, new Units, separate purchase contracts or separate amortizing notes, as the case may be, to the designated transferee in the amount being transferred, and a new security for any amount not being transferred will be issued to the transferor. Such new securities will be delivered free of charge at the relevant office, as requested by the owner of such new Units, separate purchase contracts or separate amortizing notes. We will not charge any fee for the registration of transfer or exchange, except that we may require the payment of a sum sufficient to cover any applicable tax or other governmental charge payable in connection with the transfer.

Notices

So long as the global securities are held on behalf of DTC or any other clearing system, notices to holders of securities represented by a beneficial interest in the global securities may be given by delivery of the relevant notice to DTC or the alternative clearing system, as the case may be. So long as the amortizing notes are in the form of global securities, any notice will be deemed to have been given on the date given to DTC or the alternative clearing system, as the case may be.

UNDERWRITING

Under the terms and subject to the conditions in an underwriting agreement dated the date of this prospectus supplement, the underwriters named below, for whom RBC Capital Markets, LLC and Goldman Sachs & Co. LLC are acting as representatives, have severally agreed to purchase, and we have agreed to sell to them, severally, the number of Units indicated below:

Underwriters	Number of Units
RBC Capital Markets, LLC	3,630,000
Goldman Sachs & Co. LLC	3,630,000
Merrill Lynch, Pierce, Fenner & Smith Incorporated	847,905
Morgan Stanley & Co. LLC	847,905
Wells Fargo Securities, LLC	593,533
PNC Capital Markets LLC	729,198
Barclays Capital Inc.	593,533
Citizens Capital Markets, Inc.	203,497
The Huntington Investment Company	203,497
MUFG Securities Americas Inc.	203,497
J.P. Morgan Securities LLC	138,717
TD Securities (USA) LLC	138,717
Robert W. Baird & Co. Incorporated	60,000
Boenning & Scattergood, Inc.	60,000
HSBC Securities (USA) Inc.	60,000
Janney Montgomery Scott LLC	60,001
Total	12,000,000

The underwriters and the representatives are collectively referred to as the "underwriters" and the "representatives," respectively. The underwriters are offering the Units subject to their acceptance of the Units from us and subject to prior sale. The underwriting agreement provides that the obligations of the several underwriters to pay for and accept delivery of the Units offered by this prospectus supplement are subject to the approval of certain legal matters by their counsel and to certain other conditions. The underwriters are obligated to take and pay for all of the Units offered by this prospectus supplement if any such Units are taken. However, the underwriters are not required to take or pay for the Units covered by the underwriters' option to purchase additional Units described below.

The underwriters initially propose to offer part of the Units directly to the public at the offering price listed on the cover page of this prospectus supplement and part to certain dealers. After the initial offering of the Units, the offering price and other selling terms may from time to time be varied by the representatives.

We have granted to the underwriters an option, exercisable for 13 days beginning on, and including, the date of the initial issuance of the Units, to purchase up to 1,800,000 additional Units at the public offering price listed on the cover page of this prospectus supplement, less the underwriting discount solely to cover over-allotments. To the extent the option is exercised, each underwriter will become obligated, subject to certain conditions, to purchase about the same percentage of the additional Units as the number listed next to the underwriter's name in the preceding table bears to the total number of Units listed next to the names of all underwriters in the preceding table.

The following table shows the per Unit and total public offering price, underwriting discount we will pay to the underwriters in this offering and proceeds before expenses to us. These amounts are shown assuming both no exercise and full exercise of the underwriters' option to purchase up to an additional 1,800,000 Units.

	Per Unit	Total	
		No Exercise	Full Exercise
Public offering price	$ 50.00	$ 600,000,000	$ 690,000,000
Underwriting discount	$ 1.125	$ 13,500,000	$ 15,525,000
Proceeds, before expenses, to us	$ 48.875	$ 586,500,000	$ 674,475,000

The estimated offering expenses payable by us, exclusive of the underwriting discount, are approximately $750,000. We have agreed to reimburse the underwriters for expense relating to any required review of this offering by the Financial Industry Regulatory Authority, Inc.

The Units are a new issue of securities with no established trading market. We have applied to list the Units on the NYSE under the symbol "WTRU," subject to satisfaction of its minimum listing standards with respect to the Units. If the Units are approved for listing, we expect trading on the NYSE to begin within 30 calendar days after the Units are first issued.

We and all of our continuing directors (as described in our Definitive Proxy Statement on Schedule 14A filed with the SEC on March 22, 2019), director nominees and officers, through entering into lock-up agreements, have agreed that, without the prior written consent of the representatives on behalf of the underwriters, we and they will not, during the period ending 90 days after the date of this prospectus supplement (the "restricted period"): (i) offer, sell, contract to sell, pledge, grant any option to purchase, make any short sale or otherwise transfer or dispose of, directly or indirectly, our common stock, any options, rights or warrants to purchase our common stock or any securities convertible into or exchangeable for, or substantially similar to, our common stock (collectively, "restricted securities"); (ii) enter into any swap or other agreement that transfers to another, in whole or in part, any of the economic consequences of ownership of the common stock or any such other securities, whether any such transaction described in (i) or (ii) is to be settled by delivery of common stock or such other securities, in cash or otherwise or (iii) publicly disclose the intention to take any of the foregoing actions. In addition, we agreed not to file with the SEC any registration statement relating to any restricted securities, and our continuing directors, director nominees and officers each agreed not to make any demand for, or exercise any right with respect to, the registration of any restricted securities, in each case during the restricted period and without the prior written consent of the representatives on behalf of the underwriters.

The restrictions described in the immediately preceding paragraph do not apply to:

- the Units to be sold in this offering and any shares of common stock issued pursuant to the terms of the purchase contracts;
- the sale of the shares of common stock to the underwriters in the Common Stock Offering or the sale of the shares of our common stock to CPPIB in the Private Placement;
- the issuance by us of, or the receipt by our continuing directors, director nominees and officers of, restricted securities pursuant to our existing employee equity or equity-based incentive plans, employee stock purchase plans or dividend reinvestment plans, or upon the conversion or exchange of convertible or exchangeable securities outstanding as of the date of this prospectus supplement;
- the filing by us of registration statements relating to securities issuable under our existing employee equity or equity-based plans or employee stock purchase plans;
- the issuance of shares of common stock in connection with certain investments, acquisitions, with joint ventures, commercial relationships or other strategic transactions, provided that the aggregate number of shares issued or issuable pursuant to this clause does not exceed 10% of the number of shares of common stock outstanding immediately after this offering and prior to such issuance;

- in the case of our continuing directors, director nominees and officers, (i) the establishment of a trading plan pursuant to Rule 10b5-1 under the Exchange Act for the transfer of our common stock following expiration of the restricted period, (ii) transfers in accordance with the terms of existing trading plans pursuant to Rule 10b5-1 under the Exchange Act, (iii) certain transfers of shares held as of the date of this prospectus supplement through our existing 401(k) plan pursuant to portfolio balancing opportunities provided by the terms of such plan, (iv) transfers to us to satisfy certain tax obligations in connection with vesting of restricted stock units, restricted shares, performance share units or phantom shares and (v) certain other transfers to us;

- in the case of our continuing directors, director nominees and officers, transfers to us upon death, disability or termination or employment, in each case, of such person;

- the receipt by us or our subsidiaries of shares (a) in the exercise of outstanding options, warrants, restricted stock units or other equity interests, including transfers deemed to occur upon the "net" or "cashless" exercise of options or (b) for the sole purpose of paying the exercise price of such options, warrants, restricted stock units or other equity interests or for paying taxes (including estimated taxes) due as a result of the exercise of such options, warrants, restricted stock units or other equity interests or as a result of the vesting of shares under restricted stock awards or restricted stock units pursuant to our existing employee benefit plans disclosed herein relating to this public offering, in each case on a "cashless" or "net exercise" basis, provided that any such shares received upon such exercise shall be subject to the terms of the lock-up agreement;

- tenders, sales or other transfers pursuant to a bona fide third-party tender offer, merger, consolidation or other similar transaction made to all holders of restricted securities involving a "change of control" of us (provided that if such transaction is not consummated, our continuing directors', director nominees' and officers' shares shall remain subject to the restrictions set forth in the lock-up agreements);

- the exercise for cash of options to purchase shares disclosed as outstanding herein, provided that any such shares received upon such exercise shall be subject to the terms of the lock-up agreements;

- in the case of our continuing directors, director nominees and officers, the disposition of shares acquired in this offering or in open market transactions after completion of this offering; and

- transfers of shares or other of our securities pursuant to an order of a court or regulatory agency or to comply with any regulations related to ownership by our continuing directors, director nominees and officers of their shares.

The representatives, in their sole discretion, may release the common stock and other securities subject to the lock-up agreements described above in whole or in part at any time.

In order to facilitate the offering of the Units, the underwriters may engage in transactions that stabilize, maintain or otherwise affect the price of the Units. Specifically, the underwriters may sell more Units than they are obligated to purchase under the underwriting agreement, creating a short position. A short sale is covered if the short position is no greater than the number of Units available for purchase by the underwriters under the option to purchase additional Units. The underwriters can close out a covered short sale by exercising the option or purchasing Units in the open market. In determining the source of Units to close out a covered short sale, the underwriters will consider, among other things, the open market price of Units compared to the price available under the option. The underwriters may also sell Units in excess of the option, creating a naked short position. The underwriters must close out any naked short position by purchasing Units in the open market. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the Units in the open market after pricing that could adversely affect investors who purchase in this offering. As an additional means of facilitating this offering, the underwriters may bid for, and purchase, Units

in the open market to stabilize the price of the Units. These activities may raise or maintain the market price of the Units above independent market levels or prevent or retard a decline in the market price of the Units. The underwriters are not required to engage in these activities and may end any of these activities at any time.

We have agreed to indemnify the underwriters against certain liabilities in connection with this offering, including liabilities under the Securities Act, or to contribute to payments that the underwriters may be required to make in respect of those liabilities.

The underwriters and their respective affiliates are full-service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financing and brokerage activities. Certain of the underwriters and their respective affiliates have, from time to time, performed, and may in the future perform, various financial advisory and investment banking services for us, for which they received or will receive customary fees and expenses. For example, Goldman Sachs & Co. LLC and RBC Capital Markets, LLC acted as our financial advisers in connection with the Acquisition, for which they are receiving customary fees and expenses. Also in connection with the Acquisition, certain of the underwriters and/or their affiliates have provided committed financing under the Bridge Commitment pursuant to which they receive customary commitment fees in connection with their respective commitments and, in the event we borrow under the Bridge Facility, would receive certain additional funding and other fees. Certain of the underwriters and/or their affiliates are also lenders and/or agents under the Revolving Credit Facility, which we expect to draw upon to refinance Peoples's revolving credit facility in connection with the Acquisition, and receive customary fees and expenses in connection therewith and would receive proceeds from this offering if we were to temporarily reduce our borrowings under the Revolving Credit Facility as described in "Use of Proceeds." Certain of the underwriters in this offering are also acting as underwriters in our concurrent Common Stock Offering, and may act as underwriters in the Notes Offering, for which they will receive customary fees and expenses. Certain of the underwriters may also receive fees and expenses in connection with the Private Placement. In addition, in an effort to manage our exposure to interest rate risk associated with the Notes Offering, we have entered into, and in the future, may enter into, financial derivative instruments such as interest rate swap agreements with certain of the underwriters or their respective affiliates.

In addition, in the ordinary course of their various business activities, the underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities may involve our securities and instruments. Certain of the underwriters and/or their affiliates have lending relationships with us and may hedge their credit exposure to us consistent with their customary risk management policies. Typically, the underwriters and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities or the securities of our affiliates. Any such credit default swaps or short positions could adversely affect future trading prices of the Units offered hereby. The underwriters and their respective affiliates may also make investment recommendations or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long or short positions in such securities and instruments, for which they received or will receive customary fees and expenses.

Selling Restrictions

Canada

The Units may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration

Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the Units must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus supplement (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non-Canadian jurisdiction, section 3A.4) of National Instrument 33-105 Underwriting Conflicts (NI 33-105), the underwriters are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

European Economic Area

The Units are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the "EEA"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); or (ii) a customer within the meaning of Directive 2002/92/EC (as amended, the "Insurance Mediation Directive"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Directive 2003/71/EC (and amendments thereto, including by Directive 2010/73/EU, the "Prospectus Directive"). Consequently no key information document required by Regulation (EU) No 1286/2014 (as amended, the "PRIIPs Regulation") for offering or selling the Units or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Units or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation. This prospectus supplement and the accompanying prospectus have been prepared on the basis that any offer of Units in any Member State of the EEA will be made pursuant to an exemption under the Prospectus Directive from the requirement to publish a prospectus for offers of Units. This prospectus supplement and the accompanying prospectus are not a prospectus for the purposes of the Prospectus Directive.

United Kingdom

In addition, this document is being distributed only to, and is directed only at, and any offer subsequently made may only be directed at: (i) in the United Kingdom, persons having professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the "Order"), and/or persons falling within Article 49(2)(a) to (d) of the Order; (ii) persons who are outside the United Kingdom; and (iii) any other persons to whom it may otherwise lawfully be distributed (all such persons together being referred to as "relevant persons"). This document must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to, and will be engaged in only with, relevant persons.

Australia

No placement document, prospectus, product disclosure statement or other disclosure document has been lodged with the Australian Securities and Investments Commission ("ASIC") in relation to the offering. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the Units or this offering do not constitute a prospectus, product disclosure statement or other disclosure document

under the prospectus, product disclosure statement or other disclosure document under the Corporations Act 2001 (Cth) (the "Corporations Act"), and do not purport to include the information required for a prospectus, product disclosure statement or other disclosure document under the Corporations Act.

Any offer in Australia of the Units may only be made to persons (the "Exempt Investors") who are "sophisticated investors" (within the meaning of section 708(8) of the Corporations Act), "professional investors" (within the meaning of section 708(11) of the Corporations Act) or otherwise pursuant to one or more exemptions contained in section 708 of the Corporations Act so that it is lawful to offer the Units without disclosure to investors under Chapter 6D of the Corporations Act.

The Units applied for by Exempt Investors in Australia must not be offered for sale in Australia for a period of 12 months after the date of allotment under the offering, except in circumstances where disclosure to investors under Chapter 6D of the Corporations Act would not be required pursuant to an exemption under section 708 of the Corporations Act or otherwise or where the offer is pursuant to a disclosure document which complies with Chapter 6D of the Corporations Act. Any person acquiring Units must observe such Australian on-sale restrictions.

This prospectus supplement and the accompanying prospectus contain general information only and do not take account of the investment objectives, financial situation or particular needs of any particular person. They do not contain any securities recommendations or financial product advice. Before making an investment decision, investors need to consider whether the information in this prospectus supplement and the accompanying prospectus is appropriate to their needs, objectives and circumstances, and, if necessary, seek expert advice on those matters.

Hong Kong

The Units may not be offered or sold in Hong Kong by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies Ordinance (Cap. 32, Laws of Hong Kong), or (ii) to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder, or (iii) in other circumstances which do not result in the document being a "prospectus" within the meaning of the Companies Ordinance (Cap. 32, Laws of Hong Kong) and no advertisement, invitation or document relating to the Units may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the laws of Hong Kong) other than with respect to Units which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder.

Japan

The Units have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended) (the "FIEA"). The Units may not be offered or sold, directly or indirectly, in Japan or to or for the benefit of any resident of Japan (including any person resident in Japan or any corporation or other entity organized under the laws of Japan) or to others for reoffering or resale, directly or indirectly, in Japan or to or for the benefit of any resident of Japan, except pursuant to an exemption from the registration requirements of the FIEA and otherwise in compliance with any relevant laws, regulations and ministerial guidelines of Japan.

Korea

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the Units or the offering should be construed in any way as our (or any of our affiliates or agents) soliciting investment or offering to sell the Units in the Republic of Korea ("Korea"). We are not

making any representation with respect to the eligibility of any recipients of this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the Units or the offering to acquire the Units under the laws of Korea, including, without limitation, the Financial Investment Services and Capital Markets Act (the "FSCMA"), the Foreign Exchange Transaction Act (the "FETA"), and any regulations thereunder. The Units have not been registered with the Financial Services Commission of Korea (the "FSC") in any way pursuant to the FSCMA, and the Units may not be offered, sold or delivered, or offered or sold to any person for reoffering or resale, directly or indirectly, in Korea or to any resident of Korea except pursuant to applicable laws and regulations of Korea. Furthermore, the Units may not be resold to any Korean resident unless such Korean resident as the purchaser of the resold Units complies with all applicable regulatory requirements (including, without limitation, reporting or approval requirements under the FETA and regulations thereunder) relating to the purchase of the resold Units.

Singapore

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the Units or the offering has been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the Units or the offering may be circulated or distributed, nor may the Units be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore, other than (a) to an institutional investor under Section 274 of the Securities and Futures Act, Chapter 289 of Singapore (the "SFA"), (b) to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions specified in Section 275 of the SFA or (c) pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the Units are subscribed or purchased under Section 275 by a relevant person which is: (i) a corporation (which is not an accredited investor) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (ii) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an accredited investor, shares, debentures and units of shares and debentures of that corporation or the beneficiaries' rights and interest in that trust shall not be transferable for six months after that corporation or that trust has acquired the Units under Section 275 except: (1) to an institutional investor under Section 274 of the SFA or to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions, specified in Section 275 of the SFA; (2) where no consideration is given for the transfer; or (3) by operation of law.

Solely for the purposes of its obligations pursuant to sections 309B(1)(a) and 309B(1)(c) of the Securities and Futures Act (Chapter 289 of Singapore) (the "SFA"), we have determined, and hereby notify all relevant persons (as defined in Section 309A of the SFA) that the Units are "prescribed capital markets products" (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Switzerland

The Units may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange ("*SIX*") or on any other exchange or regulated trading facility in Switzerland. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the Units or this offering do not constitute a prospectus within the meaning of and have been prepared without regard to the disclosure standards for issuance prospectuses under art. 652a or art. 1156 of the Swiss Code of Obligations or the disclosure standards for listing prospectuses under art. 27 ff. of the SIX Listing Rules or the listing rules of any other exchange or regulated trading facility in Switzerland.

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the Units or the offering may be publicly distributed or otherwise made publicly available in Switzerland. Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the offering, the Company or the Units has been or will be filed with or approved by any Swiss regulatory authority. In particular, this prospectus supplement and the accompanying prospectus will not be filed with, and the offer of Units will not be supervised by, the Swiss Financial Market Supervisory Authority, and the offer of Units has not been and will not be authorized under the Swiss Federal Act on Collective Investment Schemes (the "*CISA*"). The investor protection afforded to acquirers of interests in collective investment schemes under the CISA does not extend to acquirers of the Units.

Taiwan

The Units have not been and will not be registered or filed with, or approved by, the Financial Supervisory Commission of Taiwan and/or any other regulatory authority of Taiwan pursuant to relevant securities laws and regulations and may not be sold, issued or offered within Taiwan through a public offering or in circumstances which could constitute an offer within the meaning of the Securities and Exchange Act of Taiwan or relevant laws and regulations that require a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the Units in Taiwan.

United Arab Emirates

The Units have not been, and are not being, publicly offered, sold, promoted or advertised in the United Arab Emirates (including the Abu Dhabi Global Market and the Dubai International Financial Centre) other than in compliance with the laws, regulations and rules of the United Arab Emirates, the Abu Dhabi Global Market and the Dubai International Financial Centre governing the issue, offering and sale of securities. Further, this prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the Units or the offering do not constitute a public offer of securities in the United Arab Emirates (including the Abu Dhabi Global Market and the Dubai International Financial Centre) and are not intended to be a public offer. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the Units or the offering have not been approved by or filed with the Central Bank of the United Arab Emirates, the Securities and Commodities Authority, the Financial Services Regulatory Authority or the Dubai Financial Services Authority.

LEGAL MATTERS

Certain legal matters will be passed upon for us by Simpson Thacher & Bartlett LLP, New York, New York. Ballard Spahr LLP, Philadelphia, Pennsylvania will issue an opinion regarding certain matters of Pennsylvania law, including the validity of the securities offered by the prospectus supplement. Certain legal matters will be passed upon for the underwriters by Cravath, Swaine & Moore LLP, New York, New York.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this prospectus supplement by reference to the Company's Annual Report on Form 10-K for the year ended December 31, 2018 have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

The consolidated financial statements of LDC, Funding LLC as of December 31, 2018 and 2017 and for each of the three years in the period ended December 31, 2018, incorporated by reference in this prospectus supplement and in the accompanying prospectus from Aqua America's Current Report on Form 8-K/A filed on April 15, 2019, have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated by reference herein, and are incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND ADDITIONAL INFORMATION; INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE

We file annual, quarterly and current reports, proxy statements and other information with the SEC. The SEC maintains a website at *www.sec.gov* that contains periodic and current reports, proxy and information statements, and other information regarding registrants that are filed electronically with the SEC.

These documents are also available, free of charge, through the Investors section of our website, which is located at *http://ir.aquaamerica.com/*. Information contained on our website is not incorporated by reference into this prospectus supplement or the accompanying prospectus and you should not consider information on our website to be part of this prospectus supplement or the accompanying prospectus.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act of 1933 relating to the securities that may be offered by this prospectus supplement. This prospectus supplement is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus supplement as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus supplement is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus supplement, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" into this prospectus supplement and the accompanying prospectus the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus supplement. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 until we sell all of the securities covered by this prospectus supplement or this offering is terminated;

provided, however, that we are not incorporating, in each case, any portions of documents or information furnished or deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2018 filed with the SEC on February 26, 2019;
- The portions of our Definitive Proxy Statement on Schedule 14A filed with the SEC on March 22, 2019, that are incorporated by reference into our Annual Report on Form 10-K for the fiscal year ended December 31, 2018;
- Our Current Reports on Form 8-K filed with the SEC on October 23, 2018, February 19, 2019 (Item 8.01 only), and March 29, 2019, and our Current Report on Form 8-K/A filed with the SEC on April 15, 2019; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus supplement. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Aqua America, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000
Attention: Corporate Secretary

We have not, and the underwriters have not, authorized anyone to provide you with any information other than that contained or incorporated by reference in this prospectus supplement, the accompanying prospectus or in any free writing prospectus we may provide to you in connection with this offering. Neither we nor the underwriters take any responsibility for, or provide any assurances as to the reliability of, any additional or different information that others may give you. You should assume that the information contained in this prospectus supplement, the accompanying prospectus and any free writing prospectus we may provide to you in connection with this offering is accurate only as of their respective dates or as of the respective dates specified in such information, as applicable, and the information contained in documents incorporated by reference is accurate only as of the respective dates of those documents or as of the respective dates specified in such information, as applicable, in each case regardless of the time of delivery of this prospectus supplement or the accompanying prospectus or any such free writing prospectus or any sale of our common stock. Our business, financial condition, results of operations and prospects may have changed since those dates.

Any statement contained herein or in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for purposes of this prospectus supplement to the extent that a statement contained herein, in any other subsequently filed document which also is or is deemed to be incorporated by reference herein or in the accompanying prospectus, modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified and superseded, to constitute a part of this prospectus supplement.

PROSPECTUS

AQUA AMERICA, INC.

Common Stock
Preferred Stock
Common Stock Purchase Contracts
Warrants
Units
Depositary Shares
Debt Securities

Aqua America, Inc. may, from time to time, in one or more offerings, offer and sell common stock, preferred stock, common stock purchase contracts, warrants, units, depositary shares and debt securities. The debt securities and preferred stock may be convertible into or exchangeable or exercisable for other securities. We will provide specific terms of any offering and the offered securities in supplements to this prospectus. The prospectus supplements may also add, update or change information contained in this prospectus.

We may offer and sell these securities to or through underwriters, dealers or agents, directly to purchasers or through a combination of these methods. If an offering of securities involves any underwriters, dealers or agents, then the names of the underwriters, dealers or agents and the terms of the arrangements with such entities will be stated in an accompanying prospectus supplement.

Our common stock is listed on the New York Stock Exchange under the symbol "WTR." We have not yet determined whether any of the other securities that may be offered by this prospectus will be listed on any exchange, inter-dealer quotation system or over-the-counter market. If we decide to seek listing of any such securities upon issuance, an accompanying prospectus supplement will disclose the exchange, quotation system or market on which the securities will be listed.

The prospectus may not be used to sell our securities unless it is accompanied by a prospectus supplement.

Investing in our securities involves risk. Before you invest, you should carefully read and evaluate the risk factors and other information included in this prospectus and any applicable prospectus supplement, including the documents incorporated by reference. See "Risk Factors" beginning on page 8 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is February 28, 2018.

ABOUT THIS PROSPECTUS

This document is called a prospectus and is part of a registration statement that we filed with the Securities and Exchange Commission (SEC) using a "shelf" registration process. Under this shelf process, we may, from time to time, in one or more offering, offer and sell common stock, preferred stock, common stock purchase contracts, warrants, units, depositary shares and debt securities. This prospectus provides you with a general description of the securities we may offer. Each time we sell any securities under this prospectus, we will provide a prospectus supplement that will contain specific information about the terms of that offering and the offered securities. That prospectus supplement may include a discussion of any risk factors or other special considerations applicable to those securities. The prospectus supplement also may add, update or change information contained in this prospectus. You should read both this prospectus and the applicable prospectus supplement and the exhibits filed with our registration statement together with the additional information described below under the heading "Where You Can Find More Information" before you decide whether to invest in the securities.

The registration statement (including the exhibits) of which this prospectus is a part contains additional information about us and the securities we may offer by this prospectus. Specifically, we have filed certain legal documents that control the terms of the securities offered by this prospectus as exhibits to the registration statement. We will file certain other legal documents that will control the terms of the securities we may offer by this prospectus as exhibits to the registration statement or to reports we file with the SEC. The registration statement and the reports can be read at the SEC website or at the SEC offices mentioned under the heading "Where You Can Find More Information."

You should rely only upon the information contained in, or incorporated by reference into, this prospectus and the applicable prospectus supplement that contains specific information about the securities we are offering. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this document is accurate only as of the date on the front cover of this document. Our business, financial condition, results of operations and prospects may have changed since that date.

Except as otherwise provided in this prospectus, unless the context otherwise requires, references in this prospectus to "Aqua America," "we," "us" or "our" refer to Aqua America, Inc. and its direct and indirect subsidiaries. In addition, references to "Aqua Pennsylvania" refer to our wholly-owned subsidiary, Aqua Pennsylvania, Inc., and its subsidiaries.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus, or incorporated by reference into this prospectus, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control, that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward- looking statements where statements are preceded by, followed by, or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue" or the negative of such terms or similar expressions. Forward-looking statements in this prospectus, or incorporated by reference into this prospectus, include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increase requests;
- the availability and cost of capital financing;
- developments, trends and consolidation in the water and wastewater utility and infrastructure industries;
- dividend payment projections;
- opportunities for future acquisitions, both within and outside the water and wastewater industry, the success of pending acquisitions and the impact of future acquisitions;
- the capacity of our water supplies, water facilities and wastewater facilities;
- the impact of federal and/or state tax laws or policies and the regulatory treatment of the effects of those laws or policies, including the Tax Cuts and Jobs Act;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient plumbing fixtures and appliances on water usage per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;
- general economic conditions;
- acquisition-related costs and synergies;

- the sale of water and wastewater divisions; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the profitability of future acquisitions;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- our ability to integrate businesses, technologies or services which we may acquire;
- our ability to manage the expansion of our business;
- our ability to treat and supply water or collect and treat wastewater;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services;

- civil disturbance or terroristic threats or acts;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in accounting pronouncements;
- litigation and claims; and
- changes in environmental conditions, including the effects of climate change.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus and the documents that we incorporate by reference into this prospectus completely and with the understanding that our actual future results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see “Risk Factors.” We qualify all of our forward-looking statements by these cautionary statements.

AQUA AMERICA, INC.

Aqua America, Inc. is the holding company for regulated utilities providing water or wastewater services to an estimated three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately 52% of our operating revenues and approximately 74% of our net income for 2017. As of December 31, 2017, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania's service territory is located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources Inc. Aqua Infrastructure provides non- utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through two operating and maintenance contracts with municipal authorities close to our utility companies' service territory; and offers, through a third party, water and wastewater line repair service and protection solutions to households. In 2017, we completed the sale of business units that are reported within Aqua Resources, which installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, and repaired and performed maintenance on water and wastewater systems. Additionally, during 2016, we completed the sale of business units within Aqua Resources, which provided liquid waste hauling and disposal services and inspection, and cleaning and repair of storm and sanitary wastewater lines.

Aqua America, which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth through acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of American Water Works Company, Inc.'s regulated water and wastewater operations in Ohio in 2012. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and have extended our regulated operations from southeastern Pennsylvania to include our current regulated utility operations throughout Pennsylvania and in seven other states. During 2010 through 2013, we sold our utility operations in six states, pursuant to a portfolio rationalization strategy to focus our operations in areas where we have critical mass and economic growth potential. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to pursue growth ventures in market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated businesses.

Our growth in revenues over the past five years is primarily a result of increases in water and wastewater rates and customer growth. The increase in our utility customer base has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions) as shown below:

Year	Utility Customer Growth Rate
2017	1.1%
2016	1.6%
2015	1.9%
2014	1.3%
2013	1.3%

In 2017, our customer count increased by 10,584 customers, primarily due to utility systems that we acquired and organic growth. Overall, for the five-year period of 2013 through 2017, our utility customer base, adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 1.4%. During the five-year period ended December 31, 2017, our utility customer base including customers associated with utility system acquisitions and dispositions increased from 968,357 at January 1, 2013 to 982,849 at December 31, 2017. This five-year period includes the impact of the condemnation of our Fort Wayne, IN system in 2014, which resulted in the loss of approximately 13,000 connections.

Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010- 3489, and our telephone number is 610-527-8000. Our website may be accessed at www.aquaamerica.com. The references to our website and the SEC's website are intended to be inactive textual references only, and the contents of those websites are not incorporated by reference herein and should not be considered part of this prospectus.

RISK FACTORS

Investing in our securities involves risks. Please see the risk factors described under the section captioned "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2017, as such risk factors may be updated from time to time in filings we make with the SEC subsequent to the date hereof. Before making an investment decision, you should carefully consider these risk factors, together with all other information contained in or incorporated by reference into this prospectus or any applicable prospectus supplement (which includes information contained in certain filings we make with the SEC subsequent to the date hereof as set forth in the section below captioned "Where You Can Find More Information"). Please also refer to the section above captioned "Forward-Looking Statements."

USE OF PROCEEDS

Unless we otherwise specify in the applicable prospectus supplement, we intend to use the net proceeds from the sale of the securities we may offer by this prospectus to fund our capital expenditures, to provide capital for our growth strategy, which includes potential future acquisitions of municipally owned and investor- owned water and wastewater systems, regulated utilities and infrastructure projects, and market-based activities complementary to our regulated business, to fund the integration of any businesses that we acquire into our existing business, and to purchase and maintain plant equipment, as well as for working capital and other general corporate purposes. Our management will have broad discretion in the allocation of net proceeds from the sale of any securities sold by us.

CERTAIN RATIOS

Our ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends for the periods indicated below were as follows:

	Year Ended December 31,				
	2017	**2016**	**2015**	**2014**	**2013**
Ratio of earnings to fixed charges	3.90	4.17	4.15	4.05	3.79
Ratio of earnings to combined fixed charges and preferred stock dividends	3.90	4.17	4.15	4.05	3.79

The ratios of earnings to fixed charges and the ratios of earnings to combined fixed charges and preferred stock dividends were computed by dividing our earnings by fixed charges and by combined fixed charges and preferred stock dividends, respectively. For the purpose of these computations, earnings include the sum of income from continuing operations before income taxes and non-controlling interest, and fixed charges, less

capitalized interest. Fixed charges consist of interest on all indebtedness, whether expensed or capitalized, amortization of debt expense, and the estimated interest attributable to rental and lease expense calculated using an assumed interest factor of 33% of rental and lease expense.

DESCRIPTION OF CAPITAL STOCK

As of February 13, 2018 our authorized capital stock was 301,770,819 shares, consisting of:

- 300,000,000 shares of common stock, par value $0.50 per share, of which 177,750,505 shares were outstanding; and
- 1,770,819 shares of preferred stock, par value $1.00 per share, of which no shares were outstanding.

The following summary of certain terms of our common stock and preferred stock is qualified in its entirety by the provisions of our articles of incorporation and bylaws each of which is incorporated by reference as an exhibit to the registration statement of which this prospectus constitutes a part.

Common Stock

This section describes the general terms of our common stock. For more detailed information, you should refer to our articles of incorporation and bylaws, including any amendments thereto, copies of which have been filed with the SEC. These documents are incorporated by reference into this prospectus.

Voting Rights

Holders of our common stock are entitled to one vote for each share held by them at all meetings of the shareholders and are not entitled to cumulate their votes for the election of directors.

Dividend Rights and Limitations

Holders of our common stock may receive dividends when declared by our board of directors. Because we are a holding company, the funds we use to pay any dividends on our common stock are derived predominantly from the dividends that we receive from our subsidiaries and the dividends they receive from their subsidiaries. Therefore, our ability to pay dividends to holders of our common stock depends upon our subsidiaries' earnings, financial condition and ability to pay dividends. Most of our subsidiaries are subject to regulation by state utility commissions and the amounts of their earnings and dividends are affected by the manner in which they are regulated. In addition, they are subject to restrictions on the payment of dividends contained in their various debt agreements. Under our most restrictive debt agreements, the amount available for payment of dividends to us as of December 31, 2017 was approximately $1.4 billion of Aqua Pennsylvania's retained earnings and $143 million of the retained earnings of certain other subsidiaries. Payment of dividends on our common stock is also subject to the preferential rights of the holders of any outstanding preferred stock.

Liquidation Rights

In the event that we liquidate, dissolve or wind-up, the holders of our common stock are entitled to share ratably in all of the assets that remain after we pay our liabilities. This right is subject, however, to the prior distribution rights of any outstanding preferred stock.

Preferred Stock

Our board of directors has the authority, from time to time and without further action by our shareholders, to divide our unissued capital stock into one or more classes and one or more series within any class and to

make determinations of the designation and number of shares of any class or series and determinations of the voting rights, preferences, limitations and special rights, if any, of the shares of any class or series. The rights, preferences, limitations and special rights of different classes of capital stock may differ with respect to dividend rates, amounts payable on liquidation, voting rights, conversion rights, redemption provisions, sinking fund provisions and other matters. The rights, preferences, privileges and restrictions of each series may be fixed by the designations of that series set forth in either a restated version of our articles of incorporation or a certificate of designations relating to that series, which will be filed with the SEC as an exhibit to or incorporated by reference in the registration statement of which this prospectus constitutes a part.

The issuance of preferred stock may be perceived by some as possibly having the effect of delaying, deferring or preventing a change of control of us without further action by our shareholders. The issuance of preferred stock with voting and conversion rights may also adversely affect the voting power of the holders of our common stock. In certain circumstances, an issuance of preferred stock could possibly have the effect of decreasing the market price of our common stock.

Whenever preferred stock is to be sold pursuant to this prospectus, we will file a prospectus supplement relating to that sale which will specify:

- the number of shares in the series of preferred stock;
- the designation for the series of preferred stock by number, letter or title that will distinguish the series from any other series of preferred stock;
- the dividend rate, if any, and whether dividends on that series of preferred stock will be cumulative, noncumulative or partially cumulative;
- the voting rights of that series of preferred stock, if any;
- any conversion provisions applicable to that series of preferred stock;
- any redemption or sinking fund provisions applicable to that series of preferred stock;
- any preemptive rights provisions applicable to that series of preferred stock;
- the liquidation preference per share of that series of preferred stock; and
- the terms of any other preferences or rights, if any, applicable to that series of preferred stock.

Anti-Takeover Provisions

Pennsylvania State Law Provisions

Under Section 1712 of the Pennsylvania Business Corporation Law of 1988, as amended (PBCL), which is applicable to us, directors stand in a fiduciary relation to their corporation and, as such, are required to perform their duties in good faith, in a manner they reasonably believe to be in the best interests of the corporation and with such care, including reasonable inquiry, skill and diligence, as a person of ordinary prudence would use under similar circumstances. Under Section 1715 of the PBCL, in discharging their duties, directors may, in considering the best interests of their corporation, consider various constituencies, including, shareholders, employees, suppliers, customers and creditors of the corporation, and upon communities in which offices or other establishments of the corporation are located. Directors are not required to give prominent consideration to the interests of any particular constituency. Absent a breach of fiduciary duty, a lack of good faith or self-dealing, any act of the board of directors,

a committee thereof or an individual director is presumed to be in the best interests of the corporation. Actions by directors relating to an acquisition or potential acquisition of control of the corporation are not subject to any greater obligation to justify, or higher burden of proof, than is applied to any other acts of directors. The PBCL expressly provides that the fiduciary duty of directors does not require them to (i) redeem or otherwise render inapplicable outstanding rights issued under any shareholder rights plan; (ii) render inapplicable the anti-takeover statutes set forth in Chapter 25 of the PBCL (described below); or (iii) take any action solely because of the effect it may have on a proposed acquisition or the consideration to be received by shareholders in such a transaction. In addition, Section 2513 of the PBCL specifically validates shareholder rights plans, or "poison pills," and the discriminatory dilution provisions contained in such plans.

Chapter 25 of the PBCL contains several anti-takeover statutes applicable to publicly-traded corporations. Corporations may opt-out of such anti-takeover statutes under certain circumstances. We have not opted-out of any of such statutes.

Section 2538 of Subchapter 25D of the PBCL requires certain transactions with an "interested shareholder" to be approved by a majority of disinterested shareholders. "Interested shareholder" is defined broadly to include any shareholder who is a party to the transaction or who is treated differently than other shareholders and affiliates of the interested shareholder.

Subchapter 25E of the PBCL requires a person or group of persons acting in concert which acquires 20% or more of the voting shares of the corporation to offer to purchase the shares of any other shareholder at "fair value." "Fair value" means the value not less than the highest price paid per share by the controlling person or group during the 90-day period prior to the control transaction, plus a control premium. Among other exceptions, Subchapter 25E does not apply to shares acquired directly from the corporation in a transaction exempt from the registration requirements of the Securities Act of 1933, or to a one-step merger.

Subchapter 25F of the PBCL generally establishes a 5-year moratorium on a "business combination" with an "interested shareholder." "Interested shareholder" is defined generally to be any beneficial owner of 20% or more of the corporation's voting stock or an affiliate or associate of the corporation that at any time within the prior five-year period was a beneficial owner of 20% or more of the corporation's voting stock. "Business combination" is defined broadly to include mergers, consolidations, asset sales and certain self-dealing transactions. Certain restrictions apply to business combination following the 5-year period. Among other exceptions, Subchapter 25F will be rendered inapplicable if the board of directors approves the proposed business combination, or approves the interested shareholder's acquisition of 20% of the voting shares, in either case prior to the date on which the shareholder first becomes an interested shareholder.

Subchapter 25G of the PBCL provides that "control shares" lose voting rights unless such rights are restored by the affirmative vote of a majority of (i) the disinterested shares (generally, shares held by persons other than the acquiror, executive officers of the corporation and certain employee stock plans) and (ii) the outstanding voting shares of the corporation. "Control shares" are defined as shares which, upon acquisition, will result in a person or group acquiring for the first time voting control over (a) 20%, (b) 33 1/3% or (c) 50% or more of the outstanding shares, together with shares acquired within 180 days of attaining the applicable threshold and shares purchased with the intention of attaining such threshold. A corporation may redeem control shares if the acquiring person does not request restoration of voting rights as permitted by Subchapter 25G. Among other exceptions, Subchapter 25G does not apply to a merger, consolidation or a share exchange if the corporation is a party to the transaction agreement.

Subchapter 25H of the PBCL provides in certain circumstances for the recovery by the corporation of profits realized from the sale of its stock by a controlling person or group if the sale occurs within 18 months after the controlling person or group became a controlling person or group, and the stock was acquired during such month period or within 24 months before such period. A controlling person or group is a person or group that

has acquired, offered to acquire, or publicly disclosed an intention to acquire 20% or more of the voting shares of the corporation or a person or group that has otherwise publicly disclosed or caused to be disclosed that it may seek to acquire control of the corporation through any means. Among other exceptions, Subchapter 25H does not apply to transactions approved by both the board of directors and the shareholders prior to the acquisition or distribution, as appropriate.

Subchapter 25I of the PBCL mandates severance compensation for eligible employees who are terminated within 24 months after the approval of a control-share acquisition. Eligible employees generally are all employees employed in Pennsylvania for at least two years prior to the control-share approval. Severance equals the weekly compensation of the employee multiplied by the employee's years of service (up to 26 years), less payments made due to the termination.

Subchapter 25J of the PBCL requires the continuation of certain labor contracts relating to business operations owned at the time of a control-share approval.

Articles of Incorporation and Bylaw Provisions

Certain provisions of our articles of incorporation and bylaws may have the effect of discouraging unilateral tender offers or other attempts to take over and acquire our business. These provisions might discourage some potentially interested purchaser from attempting a unilateral takeover bid for us on terms which some shareholders might favor. Our articles of incorporation require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law. The fundamental transactions that are subject to this provision are those transactions that require approval by shareholders under applicable law or the articles of incorporation. These transactions include certain amendments of our articles of incorporation or bylaws, certain sales or other dispositions of our assets, certain issuances of our capital stock, or certain transactions involving our merger, consolidation, division, reorganization, dissolution, liquidation or winding up. Our articles of incorporation and bylaws provide that:

- a special meeting of shareholders may only be called by the chairman, the president, the board of directors or shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting;
- nominations for election of directors may be made by any shareholder entitled to vote for election of directors if the name of the nominee and certain information relating to the nominee is filed with our corporate secretary not less than 14 days nor more than 50 days before any meeting of shareholders to elect directors; and
- certain advance notice procedures must be met for shareholder proposals to be made at annual meetings of shareholders. These advance notice procedures generally require a notice to be delivered not less than 90 days nor more than 120 days before the anniversary date of the immediately preceding annual meeting of shareholders.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is Computershare Trust Company, N.A.

DESCRIPTION OF COMMON STOCK PURCHASE CONTRACTS

We may issue stock purchase contracts, representing contracts entitling or obligating holders to purchase from us, and us to sell to the holders, a specified number of shares or amount of common stock at a future date or dates. The price per share of common stock may be fixed at the time each contract is issued or may be determined by reference to a specific formula set forth in the contract. Each common stock purchase contract may be issued separately or as a part of a unit, each consisting of a common stock purchase contract and, as security for the holder's obligation to purchase the common stock under the contract, the following:

- our senior debt securities or subordinated debt securities described under "Description of Debt Securities;"
- debt obligations of third parties, including U.S. Treasury securities;
- any other asset as security described in the applicable prospectus supplement; or
- any combination of the foregoing.

Each common stock purchase contract may require us to make periodic payments to the holder of the unit or vice versa, and such payments may be unsecured or prefunded on some basis discussed in the applicable prospectus supplement. Each common stock purchase contract may require holders to secure their obligations thereunder in a specified manner and, in certain circumstances, we may deliver a newly issued prepaid common stock purchase contract, which is referred to as a "prepaid security," upon release to a holder of any collateral securing such holder's obligations under the original contract.

The applicable prospectus supplement will describe the terms of any common stock purchase contract and, if applicable, prepaid security. The description in the prospectus supplement will not purport to be complete
and will be qualified in its entirety by reference to the contracts, the collateral arrangements and depositary arrangements, if applicable, relating to such contracts and, if applicable, the prepaid securities and the documents pursuant to which such prepaid securities will be issued. The applicable prospectus supplement will also describe the material United States federal income tax considerations applicable to the common stock purchase contracts.

DESCRIPTION OF WARRANTS

General

The following summary of certain provisions of the warrants does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the warrant agreement that will be filed with the SEC in connection with the offering of such warrants.

We may issue warrants for the purchase of debt securities, preferred stock or common stock. Warrants may be issued independently or together with debt securities, preferred stock or common stock offered by any prospectus supplement and may be attached to or separate from any such offered securities. Each series of warrants will be issued under a separate warrant agreement to be entered into between the Company and a bank or trust company, as warrant agent. The warrant agent will act solely as the Company's agent in connection with the warrants and will not assume any obligation or relationship of agency or trust for or with any holders or beneficial owners of warrants.

Debt Warrants

The prospectus supplement relating to a particular issue of debt warrants will describe the terms of such debt warrants, including the following: (a) the title of such debt warrants; (b) the offering price for such debt warrants, if any; (c) the aggregate number of such debt warrants; (d) the designation and terms of the debt securities purchasable upon exercise of such debt warrants; (e) if applicable, the designation and terms of the debt securities with which such debt warrants are issued and the number of such debt warrants issued with each such debt security; (f) if applicable, the date from and after which such debt warrants and any debt securities issued therewith will be separately transferable; (g) the principal amount of debt securities purchasable upon exercise of a debt warrant and the price at which such principal amount of debt securities may be purchased upon exercise (which price may be payable in cash, securities, or other property); (h) the date on which the right to exercise such debt warrants shall commence and the date on which such right shall expire; (i) if applicable, the minimum or maximum amount of such debt warrants that may be exercised at any one time; (j) whether the debt warrants represented by the debt warrant certificates or debt securities that may be issued upon exercise of the debt warrants will be issued in registered or bearer form; (k) information with respect to book-entry procedures, if any; (1) the currency or currency units in which the offering price, if any, and the exercise price are payable; (m) if applicable, a discussion of material United States federal income tax considerations; (n) the anti-dilution provisions of such debt warrants, if any; (o) the redemption or call provisions, if any, applicable to such debt warrants; (p) any provisions for changes to or adjustments in the exercise price for the debt warrants and (q) any additional terms of such debt warrants, including terms, procedures, and limitations relating to the exchange and exercise of such debt warrants.

Stock Warrants

The prospectus supplement relating to any particular issue of preferred stock warrants or common stock warrants will describe the terms of such warrants, including the following: (a) the title of such warrants; (b) the offering price for such warrants, if any; (c) the aggregate number of such warrants; (d) the designation and terms of the common stock or preferred stock purchasable upon exercise of such warrants; (e) if applicable, the designation and terms of the offered securities with which such warrants are issued and the number of such warrants issued with each such offered security; (f) if applicable, the date from and after which such warrants and any offered securities issued therewith will be separately transferable; (g) the number of shares of common stock or preferred stock purchasable upon exercise of a warrant and the price at which such shares may be purchased upon exercise; (h) the date on which the right to exercise such warrants shall commence and the date on which such right shall expire; (i) if applicable, the minimum or maximum amount of such warrants that may be exercised at any one time; (j) the currency or currency units in which the offering price, if any, and the exercise price are payable, (k) if applicable, a discussion of material United States federal income tax considerations; (l) the anti-dilution provisions of such warrants, if any; (m) the redemption or call provisions, if any, applicable to such warrants; (m) any provisions for changes to or adjustments in the exercise price for the stock warrants and any additional terms of such warrants, including terms, procedures and limitations relating to the exchange and exercise of such warrants.

DESCRIPTION OF UNITS

We may, from time to time, issue units comprised of one or more of the other securities that may be offered under this prospectus, in any combination. Each unit will be issued so that the holder of the unit is also the holder of each security included in the unit. Thus, the holder of a unit will have the rights and obligations of a holder of each included security. The unit agreement under which a unit is issued may provide that the securities included in the unit may not be held or transferred separately at any time, or at any time before a specified date.

The applicable prospectus supplement will describe the terms of any unit. The description in the prospectus supplement will not purport to be complete and will be qualified in its entirety by reference to units, the collateral arrangements and depositary arrangements, if applicable, relating to such units and, if applicable, the prepaid securities and the documents pursuant to which such prepaid securities will be issued. The applicable prospectus supplement will also describe the material United States federal income tax considerations applicable to the units.

DESCRIPTION OF DEPOSITORY SHARES

We may, at our option, offer fractional shares of our preferred stock, rather than whole shares of our preferred stock. In the event we do so, we will issue receipts for depositary shares, each of which will represent a fraction (to be set forth in the prospectus supplement relating to offering of the depositary shares) of a share of the related series of preferred stock.

The shares of our preferred stock represented by depositary shares will be deposited under a deposit agreement between us and a bank or trust company selected by us having its principal office in the United States and that meets certain other requirements. Subject to the terms of the deposit agreement, each owner of a depositary share will be entitled, in proportion to the applicable fraction of a share of preferred stock, represented by the depositary share to all of the rights and preferences of the preferred stock represented by the depositary shares (including dividend, voting, redemption, conversion and liquidation rights).

The above description of depositary shares is only a summary, is not complete and is subject to, and is qualified in its entirety by the description in the applicable prospectus supplement and the provisions of the deposit agreement, which will contain the form of depository receipt. A copy of the deposit agreement will be filed with the SEC as an exhibit to or incorporated by reference in the registration statement of which this prospectus is a part.

DESCRIPTION OF DEBT SECURITIES

Please note that in this section entitled “Description of Debt Securities,” references to “we,” “us,” “ours” or “our” refer only to Aqua America, Inc. and not to its consolidated subsidiaries. Also, in this section, references to “holders” mean those who own debt securities registered in their own names, on the books that we maintain or the trustee maintains for this purpose, and not those who own beneficial interests in debt securities registered in street name or in debt securities issued in book-entry form through one or more depositaries. Owners of beneficial interests in the debt securities should read the section below entitled “Book-Entry Procedures and Settlement.”

General

The debt securities offered by this prospectus will be our unsecured obligations, except as otherwise set forth in an accompanying prospectus supplement, and will be either senior or subordinated debt. We will issue senior debt under a senior debt indenture, and we will issue subordinated debt under a subordinated debt indenture. We sometimes refer to the senior debt indenture and the subordinated debt indenture, individually, as an indenture and, collectively, as the indentures. We have filed forms of the indentures with the SEC as exhibits to the registration statement of which this prospectus forms a part.You can obtain copies of the indentures by following the directions outlined in “Where You Can Find More Information,” or by contacting the applicable indenture trustee.

A form of each debt security, reflecting the particular terms and provisions of a series of offered debt securities, will be filed with the SEC at the time of the offering and incorporated by reference as exhibits to the registration statement of which this prospectus forms a part.

The following briefly summarizes certain material provisions that may be included in the indentures. Other terms, including pricing and related terms, will be disclosed for a particular issuance in an accompanying prospectus supplement. You should read the more detailed provisions of the applicable indenture, including the defined terms, for provisions that may be important to you. You should also read the particular terms of a series of debt securities, which will be described in more detail in an accompanying prospectus supplement. So that you may easily locate the more detailed provisions, the numbers in parentheses below refer to sections in the applicable indenture or, if no indenture is specified, to sections in each of the indentures. Wherever particular sections or defined terms of the applicable indenture are referred to, such sections or defined terms are incorporated into this prospectus by reference, and the statement in this prospectus is qualified by that reference.

The trustee under each indenture will be determined at the time of issuance of debt securities, and the name of the trustee will be provided in an accompanying prospectus supplement.

The indentures provide that our senior or subordinated debt securities may be issued in one or more series, with different terms, in each case as we authorize from time to time. We also have the right to "reopen" a previous issue of a series of debt securities by issuing additional debt securities of such series without the consent of the holders of debt securities of the series being reopened or any other series. Any additional debt securities of the series being reopened will have the same ranking, interest rate, maturity and other terms as the previously issued debt securities of that series. These additional debt securities, together with the previously issued debt securities of that series, will constitute a single series of debt securities under the terms of the applicable indenture.

Types of Debt Securities

We may issue fixed or floating rate debt securities. Fixed rate debt securities will bear interest at a fixed rate described in the prospectus supplement. This type includes zero coupon debt securities, which bear no interest and are often issued at a price lower than the principal amount. United States federal income tax consequences and other special considerations applicable to any debt securities issued at a discount will be described in the applicable prospectus supplement.

Upon the request of the holder of any floating rate debt security, the calculation agent will provide the interest rate then in effect for that debt security, and, if determined, the interest rate that will become effective on the next interest reset date. The calculation agent's determination of any interest rate, and its calculation of the amount of interest for any interest period, will be final and binding in the absence of manifest error.

All percentages resulting from any interest rate calculation relating to a debt security will be rounded upward or downward, as appropriate, to the next higher or lower one hundred-thousandth of a percentage point.

All amounts used in or resulting from any calculation relating to a debt security will be rounded upward or downward, as appropriate, to the nearest cent, in the case of U.S. dollars, or to the nearest corresponding hundredth of a unit, in the case of a currency other than U.S. dollars, with one-half cent or one-half of a corresponding hundredth of a unit or more being rounded upward.

In determining the base rate that applies to a floating rate debt security during a particular interest period, the calculation agent may obtain rate quotes from various banks or dealers active in the relevant market, as described in the prospectus supplement. Those reference banks and dealers may include the calculation agent itself and its affiliates, as well as any underwriter, dealer or agent participating in the distribution of the relevant floating rate debt securities and its affiliates.

Information in the Prospectus Supplement

The prospectus supplement for any offered series of debt securities will describe the following terms, as applicable:

- the title;
- whether the debt is senior or subordinated;
- whether the debt securities are secured or unsecured and, if secured, the collateral securing the debt;
- the total principal amount offered;
- the percentage of the principal amount at which the debt securities will be sold and, if applicable, the method of determining the price;
- the maturity date or dates;
- whether the debt securities are fixed rate debt securities or floating rate debt securities;
- if the debt securities are fixed rate debt securities, the yearly rate at which the debt security will bear interest, if any, and the interest payment dates;
- if the debt security is an original issue discount debtsecurity, the yield to maturity;
- if the debt securities are floating rate debt securities, the interest rate basis; any applicable index currency or maturity, spread or spread multiplier or initial, maximum or minimum rate; the interest reset, determination, calculation and payment dates, and the day count used to calculate interest payments for any period;
- the date or dates from which any interest will accrue, or how such date or dates will be determined, and the interest payment dates and any related record dates;
- if other than in U.S. dollars, the currency or currency unit in which payment will be made;
- the denominations in which the currency or currency unit of the securities will be issuable if other than denominations of $1,000 and integral multiples thereof;
- the terms and conditions on which the debt securities may be redeemed at our option;
- any obligation we may have to redeem, purchase or repay the debt securities at the option of a holder upon the happening of any event and the terms and conditions of redemption, purchase or repayment;
- the names and duties of the trustee and any co-trustees, depositaries, authenticating agents, calculation agents, paying agents, transfer agents or registrars for the debt securities;
- any material provisions of the applicable indenture described in this prospectus that do not apply tothe debt securities;
- a discussion of United States federal income tax, accounting and special considerations, procedures and limitations with respect to the debt securities;

- whether and under what circumstances we will pay additional amounts to holders in respect of any tax assessment or government charge, and, if so, whether we will have the option to redeem the debt securities rather than pay such additional amounts; and

- any other specific terms of the debt securities that are consistent with the provisions of the indenture.

The terms on which a series of debt securities may be convertible into or exchangeable for other of our securities or any other entity will be set forth in the prospectus supplement relating to such series. Such terms will include provisions as to whether conversion or exchange is mandatory, at the option of the holder or at our option. The terms may include provisions pursuant to which the number of other securities to be received by the holders of such series of debt securities may be adjusted.

We will issue the debt securities only in registered form. As currently anticipated, debt securities of a series will trade in book-entry form, and global notes will be issued in physical (paper) form, as described below under "Book-Entry Procedures and Settlement." Unless otherwise provided in the accompanying prospectus supplement, we will issue debt securities denominated in U.S. dollars and only in denominations of $1,000 and integral multiples thereof.

The prospectus supplement relating to offered debt securities denominated in a foreign or composite currency will specify the denomination of the offered debt securities.

The debt securities may be presented for exchange, and debt securities other than a global security may be presented for registration of transfer, at the principal corporate trust office of the trustee named in the applicable prospectus supplement. Holders will not have to pay any service charge for any registration of transfer or exchange of debt securities, but we may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection with such registration of transfer (Section 3.05).

Payment and Paying Agents

Distributions on the debt securities other than those represented by global notes will be made in the designated currency against surrender of the debt securities at the principal corporate trust office of the trustee named in the applicable prospectus supplement. Payment will be made to the registered holder at the close of business on the record date for such payment. Interest payments will be made at the principal corporate trust office of the trustee named in the applicable prospectus supplement, or by a check mailed to the holder at his registered address. Payments in any other manner will be specified in the applicable prospectus supplement.

Calculation Agents

Calculations relating to floating rate debt securities and indexed debt securities will be made by the calculation agent, an institution that we appoint as our agent for this purpose. We may appoint one of our affiliates as calculation agent.We may appoint a different institution to serve as calculation agent from time to time after the original issue date of the debt security without your consent and without notifying you of the change. The initial calculation agent will be identified in the applicable prospectus supplement.

Senior Debt

We may issue senior debt securities under the senior debt indenture. Senior debt will constitute our unsecured and unsubordinated obligations and will rank on a basis equal in priority with all our other unsecured and unsubordinated debt.

Subordinated Debt

We may issue subordinated debt securities under the subordinated debt indenture. Subordinated debt will constitute our unsecured and subordinated obligations and will be junior in right of payment to our senior debt (including senior debt securities), which is defined as "senior indebtedness" in the subordinated debt indenture (Section 16.01).

If we default in the payment of any principal of, or premium, ifany, or interest on any senior debt when it becomes due and payable after any applicable grace period, then, unless and until the default is cured or waived or ceases to exist, we cannot make a payment on account of or redeem or otherwise acquire the subordinated debt securities (Section 16.04).

If there is any insolvency, bankruptcy, liquidation or other similar proceeding relating to us or our property, then all senior debt must be paid in full before any payment may be made to any holders of subordinated debt securities (Section 16.02).

Furthermore, if we default in the payment of the principal of and accrued interest on any subordinated debt securities that is declared due and payable upon an event of default under the subordinated debt indenture, holders of all our senior debt will first be entitled to receive payment in full in cash before holders of such subordinated debt can receive any payments (Section 16.03).

Except as may be otherwise set forth in an accompanying prospectus supplement, senior debt means:

- the principal, premium, if any, and interest in respect of indebtedness for money borrowed and indebtedness evidenced by securities, notes, debentures, bonds or other similar instruments issued, including, as to us, the senior debt securities;
- all capitalized lease obligations;
- all obligations representing the deferred purchase price of property; and
- all deferrals, renewals, extensions and refundings of obligations of the type referred to above (Section 1.01 of Subordinated Indenture).

However, senior debt does not include:

- the subordinated debt securities (Section 16.01 of Subordinated Indenture);
- any indebtedness that by its terms is subordinated to, or ranks in priority on an equal basis with, subordinated debt securities (Section 1.01 of Subordinated Indenture); and
- items of indebtedness (other than capitalized lease obligations) that would not appear as liabilities on a balance sheet prepared in accordance with accounting principles generally accepted in the United States of America.

Covenants

The accompanying prospectus supplement will contain any covenants applicable to the debt securities.

Modification of the Indentures

The indentures will provide that we and the relevant trustee may enter into supplemental indentures to establish the form and terms of any new series of debt securities without obtaining the consent of any holder of debt securities (Section 9.01).

We and the trustee may, with the consent of the holders of at least a majority in aggregate outstanding principal amount of the debt securities of a series, modify the applicable indenture or the rights of the holders of the securities of such series (Section 9.02).

No such modification may, without the consent of each holder of an affected security:

- extend the fixed maturity of any such security;
- reduce the rate or change the time of payment of interest on such security;
- reduce the principal amount of such securities or the premium, if any, on such security;
- change any obligation of ours to pay additional amounts with respect to such security;
- reduce the amount of the principal payable on acceleration of such security if issued originally at a discount;
- adversely affect the right of repayment or repurchase of such security at the option of the holder;
- reduce or postpone any sinking fund or similar provision with respect to such security;
- change the currency or currency unit in which such security is payable or the right of selection thereof;
- impair the right to sue for the enforcement of any payment with respect to such security on or after the maturity of such security;
- reduce the percentage of the aggregate outstanding principal amount of debt securities of the series referred to above whose holders need to consent to the modification or a waiver without the consent of such holders; or
- change any obligation of ours with respect to such security to maintain an office or agency.

Defaults

Except as may be otherwise set forth in an accompanying prospectus supplement, each indenture will provide that events of default regarding any series of debt securities will be:

- our failure to pay for 30 days required interest on any debt security of such series;
- our failure to pay principal or premium, if any, on any debt security of such series when due;
- our failure to make any required scheduled installment payment for 30 days on debt securities of such series;

- our failure to perform for 90 days after notice any other covenant in the relevant indenture otherthan a covenant included in the relevant indenture solely for the benefit of a series of debt securities other than such series; and

- certain events of bankruptcy or insolvency, whether voluntary or not (Section 5.01).

Except as may be otherwise set forth in an accompanying prospectus supplement, if an event of default regarding debt securities of any series issued under the indentures should occur and be continuing, either the trustee or the holders of 25% in the principal amount of outstanding debt securities of such series may declare each debt security of that series due and payable (Section 5.02). We may be required to file annually with the trustee a statement of an officer as to the fulfillment by us of our obligations under the indenture during the preceding year.

No event of default regarding one series of debt securities issued under an indenture is necessarily an event of default regarding any other series of debt securities.

Holders of a majority in aggregate principal amount of the outstanding debt securities of any series will be entitled to control certain actions of the trustee under the indentures and to waive past defaults regarding such series (Sections 5.12 and 5.13). The holders of debt securities generally will not be able to require the trustee to take any action, unless one or more of such holders provides to the trustee reasonable security or indemnity (Section 6.02).

If an event of default occurs and is continuing regarding a series of debt securities, the trustee may use any sums that it holds under the relevant indenture for its own reasonable compensation and expenses incurred prior to paying the holders of debt securities of such series (Section 5.06).

Before any holder of any series of debt securities may institute action for any remedy, except payment on such holder's debt security when due, the holders of not less than 25% in principal amount of the debt securities of that series outstanding must request the trustee to take action. Holders must also offer and give the satisfactory security and indemnity against liabilities incurred by the trustee for taking such action (Section 5.07).

Defeasance

Except as may otherwise be set forth in an accompanying prospectus supplement, after we have deposited with the trustee, cash or government securities, in trust for the benefit of the holders sufficient to pay the principal of, premium, if any, and interest on the debt securities of such series when due, and satisfied certain other conditions, including receipt of an opinion of counsel that holders will not recognize taxable gain or loss for United States federal income tax purposes, then:

- we will be deemed to have paid and satisfied our obligations on all outstanding debt securities of such series, which is known as defeasance and discharge (Section 14.02); or

- we will cease to be under any obligation, other than to pay when due the principal of, premium, if any, and interest on such debt securities, relating to the debt securities of such series, which is known as covenant defeasance (Section 14.03).

When there is a defeasance and discharge, the applicable indenture will no longer govern the debt securities of such series, we will no longer be liable for payments required by the terms of the debt securities of such series and the holders of such debt securities will be entitled only to the deposited funds. When there is a covenant defeasance, however, we will continue to be obligated to make payments when due if the deposited funds are not sufficient.

Governing Law

Unless otherwise stated in the prospectus supplement, the debt securities and the indentures will be governed by Pennsylvania law (Section 1.12).

Concerning the Trustee Under the Indentures

We may have banking and other business relationships with the trustee named in the prospectus supplement, or any subsequent trustee, in the ordinary course of business.

Form, Exchange and Transfer

We will issue debt securities only in registered form; no debt securities will be issued in bearer form (Section 2.03). We will issue each debt security in book-entry form only, unless otherwise specified in the applicable prospectus supplement. We will issue any common stock issuable upon conversion of any debt security being offered in both certificated and book-entry form, unless otherwise specified in the applicable prospectus supplement. Debt securities in book-entry form will be represented by a global security registered in the name of a depositary, which will be the holder of all the debt securities represented by the global security (Section 2.04). Those who own beneficial interests in a global security will do so through participants in the depositary's system, and the rights of these indirect owners will be governed solely by the applicable procedures of the depositary and its participants. Only the depositary will be entitled to transfer or exchange a debt security in global form, since it will be the sole holder of the debt security (Section 3.05). These book-entry securities are described below under "Book-Entry Procedures and Settlement."

If any debt securities are issued in non-global form or cease to be book-entry securities (in the circumstances described in the next section), the following will apply to them:

- The debt securities will be issued in fully registered form in denominations stated in the prospectus supplement. You may exchange debt securities for debt securities of the same series in smaller denominations or combined into fewer debt securities of the same series of larger denominations, as long as the total amount is not changed (Section 3.05).

- You may exchange, transfer, present for payment or exercise debt securities at the office of the relevant trustee or agent indicated in the prospectus supplement (Section 3.05). You may also replace lost, stolen, destroyed or mutilated debt securities at that office. We may appoint another entity to perform these functions or may perform them (Section 3.06).

- You will not be required to pay a service charge to transfer or exchange the debt securities, but you may be required to pay any tax or other governmental charge associated with the transfer or exchange (Sections 3.05 and 3.06). The transfer or exchange, and any replacement, will be made only if our transfer agent is satisfied with your proof of legal ownership. The transfer agent may also require an indemnity before replacing any debt securities (Section 3.06).

- If we have the right to redeem, accelerate or settle any debt securities before their maturity or expiration, and we exercise that right as to less than all those debt securities, we may block the transfer or exchange of those debt securities during the period beginning 15 days before the day we mail the notice of exercise and ending on the day of that mailing, in order to freeze the list of holders to prepare the mailing. We may also refuse to register transfers of or exchange any debt security selected for early settlement, except that we will continue to permit transfers and exchanges of the unsettled portion of any debt security being partially settled (Section 3.05).

- If fewer than all of the debt securities represented by a certificate that are payable or exercisable in part are presented for payment or exercise, a new certificate will be issued for the remaining amount of securities (Section 15.02).

Book-Entry Procedures and Settlement

Most offered debt securities will be book-entry (global) securities. Upon issuance, all book-entry securities will be represented by one or more fully registered global securities, without coupons (Section 3.02). Each global security will be deposited with, or on behalf of, The Depository Trust Company, or DTC, a securities depository, and will be registered in the name of DTC or a nominee of DTC (Section 3.01). DTC will thus be the only registered holder of these debt securities.

Purchasers of debt securities may only hold interests in the global notes through DTC if they are participants in the DTC system. Purchasers may also hold interests through a securities intermediary—banks, brokerage houses and other institutions that maintain securities accounts for customers—that has an account with DTC or its nominee. DTC will maintain accounts showing the security holdings of its participants, and these participants will in turn maintain accounts showing the security holdings of their customers. Some of these customers may themselves be securities intermediaries holding securities for their customers. Thus, each beneficial owner of a book-entry security will hold that debt security indirectly through a hierarchy of intermediaries, with DTC at the top and the beneficial owner's own securities intermediary at the bottom.

The debt securities of each beneficial owner of a book-entry security will be evidenced solely by entries on the books of the beneficial owner's securities intermediary. The actual purchaser of the debt securities will generally not be entitled to have the debt securities represented by the global securities registered in its name and will not be considered the owner under the declaration. In most cases, a beneficial owner will also not be able to obtain a paper certificate evidencing the holder's ownership of debt securities. The book-entry system for holding securities eliminates the need for physical movement of certificates and is the system through which most publicly traded common stock is held in the United States. However, the laws of some jurisdictions require some purchasers of securities to take physical delivery of their securities in definitive form. These laws may impair the ability to transfer book-entry securities.

A beneficial owner of book-entry securities represented by a global security may exchange the securities for definitive (paper) securities only if:

- DTC is unwilling or unable to continue as depositary for such global security and we do not appoint a qualified replacement for DTC within 90 days; or

- We in our sole discretion decide to allow some or all book-entry securities to be exchangeable for definitive securities in registered form (Section 3.05).

Unless we indicate otherwise, any global security that is exchangeable will be exchangeable in whole for definitive securities in registered form, with the same terms and of an equal aggregate principal amount. Definitive securities will be registered in the name or names of the person or persons specified by DTC in a written instruction to the registrar of the securities (Section 3.05). DTC may base its written instruction upon directions that it receives from its participants.

In this prospectus, for book-entry securities, references to actions taken by security holders will mean actions taken by DTC upon instructions from its participants, and references to payments and notices of redemption to security holders will mean payments and notices of redemption to DTC as the registered holder of the securities for distribution to participants in accordance with DTC's procedures.

DTC is a limited purpose trust company organized under the laws of the State of New York, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code and a clearing agency registered under section 17A of the Securities Exchange Act of 1934. The rules applicable to DTC and its participants are on file with the SEC.

We will not have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial ownership interest in the book-entry securities or for maintaining, supervising or reviewing any records relating to the beneficial ownership interests.

PLAN OF DISTRIBUTION

We may sell any of the securities being offered by this prospectus separately or together:

- through agents;
- to or through underwriters who may act directly or through a syndicate represented by one or more managing underwriters;
- through dealers;
- through a block trade in which the broker or dealer engaged to handle the block trade will attempt to sell the securities as agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- through "at the market" offerings, within the meaning of Rule 415(a)(4) of the Securities Act of 1933, to or through a market maker or into an existing trading market on an exchange or otherwise;
- in exchange for our outstanding indebtedness;
- directly to purchasers, through a specific bidding, auction or other process; or
- through a combination of any of these methods of sale.

If the securities offered under this prospectus are issued in exchange for our outstanding securities, the applicable prospectus supplement will describe the terms of the exchange, and the identity and the terms of sale of the securities offered under this prospectus by the selling security holders.

The distribution of securities may be effected from time to time in one or more transactions at a fixed price or prices that may be changed, at market prices prevailing at the time of sale or prices related to prevailing market prices or at negotiated prices.

Agents designated by us from time to time may solicit offers to purchase the securities. We will name any agent involved in the offer or sale of the securities and set forth any commissions payable by us to an agent in the prospectus supplement for that transaction. Unless otherwise indicated in the prospectus supplement, any agent will be acting on a best efforts basis for the period of its appointment. Any agent may be deemed to be an "underwriter" of the securities as that term is defined in the Securities Act of 1933.

If we utilize an underwriter or underwriters in the sale of securities, we will execute an underwriting agreement with the underwriter or underwriters at the time we reach an agreement for sale. We will set forth in the prospectus supplement the names of the specific managing underwriter or underwriters, as well as any other underwriters, and the terms of the transactions, including compensation of the underwriters and dealers. This compensation may be in the form of discounts, concessions or commissions. Underwriters and others participating in any offering of securities may engage in transactions that stabilize, maintain or otherwise affect the price of securities. We will describe any of these activities in the prospectus supplement.

If a dealer is utilized in the sale of the securities, we or an underwriter will sell securities to the dealer, as principal. The dealer may then resell the securities to the public at varying prices to be determined by the dealer at the time of resale. The prospectus supplement will set forth the name of the dealer and the terms of the transactions.

We may directly solicit offers to purchase the securities, and we may sell directly to institutional investors or others. These persons may be deemed to be underwriters within the meaning of the Securities Act of 1933 with respect to any resale of the securities. The prospectus supplement will describe the terms of any direct sales, including the terms of any bidding or auction process, if utilized.

Agreements we enter into with agents, underwriters and dealers may entitle them to indemnification by us against specified liabilities, including liabilities under the Securities Act of 1933, or to contribution by us to payments they may be required to make in respect of these liabilities. The prospectus supplement will describe the terms and conditions of indemnification or contribution.

Certain of the agents, underwriters and dealers that we sell the securities offered under this prospectus to or through, and certain of their affiliates, engage in transactions with and perform services for us in the ordinary course of business. We may enter into hedging transactions in connection with any particular issue of the securities offered under this prospectus, including forwards, futures, options, interest rate or exchange rate swaps and repurchase or reverse repurchase transactions with, or arranged by, the applicable agent, underwriter or dealer, an affiliate of that agent, underwriter or dealer or an unrelated entity. We, the applicable agent, underwriter or dealer or other parties may receive compensation, trading gain or other benefits in connection with these transactions. We are not required to engage in any of these transactions. If we commence these transactions, we may discontinue them at any time. Counterparties to these hedging activities also may engage in market transactions involving the securities offered under this prospectus.

No securities may be sold under this prospectus without delivery (in paper format, in electronic format, in electronic format on the Internet, or by other means) of the applicable prospectus supplement describing the method and terms of the offering.

LEGAL MATTERS

Unless otherwise indicated in the applicable prospectus supplement, the validity of the securities that may be offered hereby will be passed upon for us by Ballard Spahr LLP, Philadelphia, Pennsylvania. If legal matters in connection with the offering made by this prospectus are passed on by counsel for the underwriters, dealers or agents, if any, that counsel will be named in the applicable prospectus supplement.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this Prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2017, have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file at the SEC's Public Reference Room at 100 F Street N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the Public Reference Room. You may also obtain our SEC filings from the SEC's website at www.sec.gov or from our website at http:// ir.aquaamerica.com/.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act of 1933 relating to the securities that may be offered by this prospectus. This prospectus is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 until we sell all of the securities covered by this prospectus; provided, however, that we are not incorporating, in each case, any documents or information deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2017 filed with the SEC on February 28, 2018; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Prospectus Supplement
(To Prospectus dated February 28, 2018)

6,700,000 Shares

ESSENTIAL UTILITIES, INC.

Common Stock

The forward seller referred to below is offering 6,700,000 shares of our common stock, par value $0.50 per share. We have entered into a forward sale agreement with Royal Bank of Canada (through its agent RBC Capital Markets), whom we refer to in such capacity as the "forward purchaser," with respect to 6,700,000 Shares of our common stock. In connection with the forward sale agreement, the forward purchaser or its affiliate and/or agent, whom we refer to in such capacity as the "forward seller," at our request, is borrowing from third parties and selling to the underwriter 6,700,000 shares of our common stock. If in the good faith, commercially reasonable judgment of the forward purchaser, it or its affiliate is unable to borrow and deliver for sale on the anticipated closing date a number of shares of our common stock underlying the forward sale agreement, or it or its affiliate would be unable to borrow, at a stock loan rate not greater than a specified rate, and deliver for sale on the anticipated closing date such number of shares of our common stock, or if certain other conditions to the forward seller's obligations have not been satisfied, then we will issue and sell directly to the underwriter a number of shares of our common stock equal to the number of shares that the forward seller does not borrow and deliver.

We will not initially receive any proceeds from the sale of our common stock sold by the forward seller to the underwriter, except in certain circumstances described in this prospectus supplement, including the last sentence of the previous paragraph. The forward sale agreement provides for settlement on a settlement date or dates to be specified at our discretion on or prior to August 10, 2021. If we elect to cash settle all or a portion of the forward sale agreement, we may not receive any proceeds from such election, and we may owe cash to the forward purchaser. If we elect to net share settle all or a portion of the forward sale agreement, we will not receive any cash proceeds from such election, and we may owe shares of our common stock to the forward purchaser. See "Underwriting (Conflicts of Interest)—Forward Sale Agreement" for a description of the forward sale agreement.

The underwriter proposes to offer shares of our common stock from time to time to purchasers directly or through agents, or through brokers in brokerage transactions on the NYSE, in the over-the-counter market, or to dealers in negotiated transactions, or in a combination of such methods of sale or otherwise, at a fixed price or prices, which may be changed, or at market prices prevailing at the time of sale, at prices related to such prevailing market prices, or at negotiated prices. In connection with the sale of shares of our common stock, the underwriter may be deemed to have received compensation in the form of underwriting discount.

The underwriter has agreed to purchase shares of our common stock from the forward seller at a price of $46.00 per share. We expect to receive estimated net proceeds from the sale of shares of our common stock, before expenses, of approximately $308.2 million upon full physical settlement of the forward sale agreement, which we expect to occur on or prior to August 10, 2021. For the purpose of calculating the estimated net proceeds to us, we have assumed that the forward sale agreement is fully physically settled based on the initial forward sale price of $46.00 per share. The forward sale price is subject to adjustment pursuant to the forward sale agreement, and the actual proceeds, if any, will be calculated as described in this prospectus supplement.

Although we expect to settle the forward sale agreement entirely by the full physical delivery of shares of our common stock to the forward purchaser in exchange for cash proceeds, we may elect cash settlement or net share settlement for all or a portion of our obligations under the forward sale agreement. See "Underwriting (Conflicts of Interest)—Forward Sale Agreement" for a description of the forward sale agreement.

Our common stock is listed on the New York Stock Exchange (the "NYSE") under the symbol "WTRG." The last reported sale price of our common stock on the NYSE on August 10, 2020 was $47.81 per share.

Investing in our common stock involves risks. See "Risk Factors" on page S-7 of this prospectus supplement, page 6 of the accompanying prospectus and in the documents we incorporate by reference in this prospectus supplement and the accompanying prospectus to read important factors you should consider before investing in our common stock.

Neither the Securities and Exchange Commission (the "SEC") nor any other regulatory body has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus supplement or the accompanying prospectus. Any representation to the contrary is a criminal offense.

The underwriter expects that the shares of our common stock will be delivered against payment on or about August 13, 2020.

ABOUT THIS PROSPECTUS SUPPLEMENT

Unless otherwise specified or the context requires otherwise, references in this prospectus supplement to (1) "Essential Utilities," the "Company," "we," "us," "our" and similar references refer to Essential Utilities, Inc. and its subsidiaries and (2) "this offering" refers to this offering of the shares pursuant to this prospectus supplement and the accompanying prospectus. Essential Utilities, Inc. was formerly known as Aqua America, Inc. prior to its name change on February 3, 2020, and accordingly, unless otherwise specified or the context requires otherwise, references in the accompanying prospectus and the documents incorporated by reference in the accompanying prospectus to Aqua America, Inc. refer to Essential Utilities, Inc and its subsidiaries.

This document is in two parts. The first part is this prospectus supplement, which describes the specific terms of this offering of the shares of our common stock and also adds to and updates information contained in the accompanying prospectus and the documents incorporated by reference in the accompanying prospectus. The second part is the accompanying prospectus, which gives more general information about us, some of which does not apply to this offering of the shares of our common stock. To the extent the information in this prospectus supplement is inconsistent with the information in the accompanying prospectus, you should rely on the information in this prospectus supplement.

We have not, and the underwriter and the forward seller have not, authorized anyone to provide you with any information other than that contained or incorporated by reference in this prospectus supplement, the accompanying prospectus or in any free writing prospectus we may provide to you in connection with this offering. Neither we nor the underwriter or the forward seller take any responsibility for, or provide any assurances as to the reliability of, any additional or different information that others may give you. Neither we nor the underwriter or the forward seller are offering to sell the shares or seeking offers to buy the shares in jurisdictions where offers or sales are not permitted. You should assume that the information contained in this prospectus supplement, the accompanying prospectus and any related free writing prospectus is accurate only as of their respective dates or as of the respective dates specified in such information, as applicable, and the information contained in documents incorporated by reference is accurate only as of the respective dates of those documents or as of the respective dates specified in such information, as applicable, in each case regardless of the time of delivery of this prospectus supplement or the accompanying prospectus or any such free writing prospectus or any sale of the shares of our common stock. Our business, financial condition, results of operations and prospects may have changed since those dates.

The distribution of this prospectus supplement, the accompanying prospectus and any related free writing prospectus and the offering of the shares of our common stock in certain jurisdictions may be restricted by law. Persons into whose possession this prospectus supplement, the accompanying prospectus and any such free writing prospectus come should inform themselves about and observe any such restrictions. This prospectus supplement, the accompanying prospectus and any such free writing prospectus do not constitute, and may not be used in connection with, an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorized or in which the person making such offer or solicitation is not qualified to do so or to any person to whom it is unlawful to make such offer or solicitation. See "Underwriting (Conflicts of Interest)."

BASIS OF PRESENTATION

On March 16, 2020, we completed the acquisition of all of the issued and outstanding limited liability company membership interests of LDC Funding LLC (the "Peoples Acquisition"), which is the parent of a group of natural gas public utility companies that we refer to as "Peoples". Unless otherwise specified or the context requires otherwise, the information as of or in respect of periods prior to the closing of the Peoples Acquisition included in this prospectus supplement and the accompanying prospectus, including the documents incorporated by reference herein or therein, does not give effect to the Peoples Acquisition.

The unaudited pro forma consolidated combined statement of net income for the year ended December 31, 2019 and for the six months ended June 30, 2020 included or incorporated by reference in this prospectus supplement and the accompanying prospectus gives pro forma effect to the Peoples Acquisition and certain related transactions as if we had completed such transactions as of January 1, 2019, unless otherwise specified. The unaudited pro forma consolidated combined balance sheet as of June 30, 2020 is not presented in this prospectus supplement or the accompanying prospectus as Peoples is reflected in our historical consolidated balance sheet as of June 30, 2020. The unaudited pro forma consolidated combined statement of net income for the year ended December 31, 2019 and for the six months ended June 30, 2020 included in our Current Report on Form 8-K/A filed with the U.S. Securities and Exchange Commission (the "SEC") on August 10, 2020, which is incorporated by reference in this prospectus supplement and the accompanying prospectus and may be obtained as described in this prospectus supplement under the heading "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," does not give effect to our issuance of common stock in this offering. Moreover, the unaudited pro forma consolidated combined statement of net income for the year ended December 31, 2019 and for the six months ended June 30, 2020 included in our Current Report on Form 8-K/A filed with the SEC on August 10, 2020 has been calculated on the basis of assumptions made by our management at the time such information was prepared.

As a result, purchasers of shares in this offering should not place undue reliance on the pro forma and as adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

All references to currency amounts included in this prospectus supplement are in U.S. dollars unless specifically noted otherwise.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus supplement, the accompanying prospectus and the documents they incorporate by reference contain, and any free writing prospectus we may provide to you in connection with this offering are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Exchange Act that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue," "in the event" or the negative of such terms or similar expressions. Such forward-looking statements include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increases;
- expectations regarding the impact of the Peoples Acquisition, including statements regarding the impact of the transaction on the Company;
- developments, trends and consolidation in the water, wastewater and natural gas utility and infrastructure industries;
- opportunities for future acquisitions, both within and outside the water, wastewater, and natural gas industries, the success of pending acquisitions and the impact of future acquisitions;
- the capacity of our water and natural gas supplies and facilities;
- the availability and cost of capital financing;
- dividend payment projections;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient fixtures and appliances on water usage and gas consumption per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates and decisions regarding potential acquisitions;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;

- general economic conditions;
- acquisition-related costs and synergies;
- the sale of water and wastewater divisions;
- the impact of federal and/or state tax policies and the regulatory treatment of the effects of those policies;
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology; and
- the impact of the novel coronovirus ("COVID-19") or the measures implemented by the Company as a result of COVID-19.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- the diversion of our management's time and resources caused by integration efforts with respect to the Peoples Acquisition;
- our ability to manage the expansion of our business, including our ability to manage our expanded operations following the closing of the Peoples Acquisition;
- our ability to treat and supply water or collect and treat wastewater;
- our ability to source a sufficient supply of natural gas to meet the demands of our gas utility customers in a timely manner;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- our ability to integrate and otherwise realize all of the anticipated benefits of businesses, technologies or services which we may acquire;
- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the profitability of future acquisitions;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests and decisions regarding potential acquisitions;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions and seasonality effects;
- changes in, or unanticipated, capital requirements;
- changes in our credit ratings or the market price of our common stock;
- changes in valuation of strategic ventures;
- the phase-out of LIBOR, or the replacement of LIBOR with a different reference rate or modification of the method used to calculate LIBOR, which may adversely affect interest rates;

- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services and commodity prices;
- civil disturbance or terroristic threats or acts;
- changes in accounting pronouncements;
- litigation and claims;
- changes in environmental conditions, including the effects of climate change;
- restrictions on our subsidiaries' ability to make dividends and other distributions; and
- impacts from the global outbreak of COVID-19, including on consumption and collections.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus supplement, the accompanying prospectus and the documents that we incorporate by reference into this prospectus supplement completely and with the understanding that our actual results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus supplement, the date of the document containing the applicable statement or the date specified in such statement, as applicable. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see "Risk Factors." We qualify all of our forward-looking statements by these cautionary statements.

Investing in our common stock involves risks. You should review and consider carefully the risks, uncertainties and other factors that affect our business, financial condition and results of operations and the value of the shares, including those described in the "Business," "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations" and "Management's Discussion and Analysis of Financial Condition and Results of Operations of Peoples" sections and other sections in our Annual Report on Form 10-K for the fiscal year ended December 31, 2019 and our Quarterly Reports on Form 10-Q for the quarter ended March 31, 2020 filed with the SEC on May 8, 2020 and the quarter ended June 30, 2020 filed with the SEC on August 6, 2020, and those described in the "Risk Factors" sections and other sections of this prospectus supplement and the accompanying prospectus. You may obtain copies of these reports and documents as described under "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference" in this prospectus supplement. These risks, uncertainties and other factors could cause you to suffer a loss of all or part of your investment in the shares. Before making an investment decision, you should carefully consider these risks, uncertainties and other factors, as well as other information contained or incorporated by reference in this prospectus supplement and the accompanying prospectus and any related free writing prospectus we may provide to you in connection with this offering. However, additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business, operations, financial condition and financial results and the value of the shares.

MARKET AND INDUSTRY DATA

This prospectus supplement, the accompanying prospectus and the documents incorporated by reference in this prospectus supplement and the accompanying prospectus include, and any free writing prospectus we may provide to you in connection with this offering may include, market, demographic and industry data and forecasts related to our business that are based on or derived from sources such as independent industry publications, publicly available information, government data and other information from third parties or that have been compiled or prepared by our management or employees. We do not guarantee the accuracy or completeness of any of this information, and we have not independently verified any of the information provided by third-party sources.

In addition, market, demographic and industry data and forecasts involve estimates, assumptions and other uncertainties and are subject to change based on various factors, including those discussed under the heading “Risk Factors” in this prospectus supplement and under similar headings in the documents that are incorporated by reference in this prospectus supplement and the accompanying prospectus. Accordingly, you should not place undue reliance on any of this information.

PROSPECTUS SUPPLEMENT SUMMARY

The following summary highlights, and should be read together with, the information contained elsewhere in this prospectus supplement, the accompanying prospectus and the documents incorporated by reference herein and therein. This summary may not contain all of the information that may be important to you, and you should carefully read this entire prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before making an investment decision. You may obtain a copy of the documents incorporated by reference by following the instructions in the section titled "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," in this prospectus supplement. Unless we state otherwise or the context otherwise requires, references appearing in this prospectus supplement to "Essential Utilities," the "Company," "we," "us" and "our" should be read to refer to Essential Utilities, Inc. and its subsidiaries.

Essential Utilities, Inc.

Essential Utilities, Inc., formerly known as Aqua America, Inc., is a Pennsylvania corporation and the holding company for regulated utilities providing water, wastewater or natural gas distribution services to an estimated five million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, Virginia, West Virginia and Kentucky under the Aqua and Peoples brands. One of our largest operating subsidiaries, Aqua Pennsylvania, Inc. ("Aqua Pennsylvania"), provides water or wastewater services to approximately one-half of the total number of water or wastewater customers we serve, who are located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated water or wastewater utility subsidiaries provide similar services in seven other states.

Pursuant to the Company's growth strategy, commencing on March 16, 2020, with the completion of the Peoples Gas Acquisition, the Company began to provide natural gas distribution services to customers in western Pennsylvania, Kentucky, and West Virginia. Approximately 93% of the total number of natural gas utility customers we serve are in western Pennsylvania. Lastly, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources, Inc. and certain other non-regulated subsidiaries of Peoples. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources manages a water system operating and maintenance contract, and offers, through a third-party, water and sewer service line protection solutions and repair services to households. The non- regulated subsidiaries of Peoples provide utility service line protection solutions and repair services to households and operates gas marketing and production entities.

Our growth in revenues over the past five years is primarily a result of increases in rates and customer growth. The increase in our utility customer base, as shown below, has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions):

Year	Utility Customer Growth Rate
2019	2.1%
2018	2.3%
2017	1.1%
2016	1.6%
2015	1.9%

In 2019, our customer count increased by 21,108 customers, primarily due to utility systems that we acquired and organic growth. Overall, for the five-year period of 2015 through 2019, our utility customer base,

adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 1.8%. During the five-year period ended December 31, 2019, our utility customer base, including customers associated with utility system acquisitions and dispositions, increased from 940,119 at January 1, 2015 to 1,026,704 at December 31, 2019.

The Peoples Acquisition brings Essential Utilities' total water, wastewater and natural gas customer count to approximately 1,773,000 on a pro forma basis as of December 31, 2019.

Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010-3489, and our telephone number is 610-527-8000. Our website may be accessed at *www.essential.co*. The reference to our website is intended to be an inactive textual reference only, and the contents of our website are not incorporated by reference herein and should not be considered part of this prospectus supplement.

Recent Developments

COVID-19

The impact of the global outbreak of the COVID-19 pandemic has created significant volatility in the global economy and led to reduced economic activity. We are monitoring the global outbreak of COVID-19 and taking steps to mitigate the potential risks to our employees and our customers posed by its spread. For information regarding the COVID-19 pandemic and its impact on our business, see our Quarterly Reports on Form 10-Q for the quarter ended March 31, 2020 filed with the SEC on May 8, 2020 and the quarter ended June 30, 2020 filed with the SEC on August 6, 2020.

THE OFFERING

The following summary contains basic information about this offering and may not contain all of the information that may be important to you. You should read this entire prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before making an investment decision.

As used in this section, unless the context otherwise requires, references to "Essential Utilities," the "Company," "we," "us," "our" and similar references refer only to Essential Utilities, Inc. and not to its consolidated subsidiaries.

Issuer	Essential Utilities, Inc., a Pennsylvania corporation
Common Stock Offered by this Prospectus Supplement	6,700,000 shares
Common Stock to be Outstanding Immediately Before this Offering	245,154,699 shares(1)
Common Stock to be Outstanding Immediately After the Offering	245,154,699 shares(1)(2)
Common Stock to be Outstanding After Settlement of the Forward Sale Agreement Assuming Physical Settlement	251,854,699 shares(1)(2)(3)

(1) This amount is based on the total number of shares of our common stock that was outstanding on August 7, 2020. In calculating that number of shares, we did not take into account shares issuable upon settlement of the purchase contracts that are part of the tangible equity units, reserved for issuance upon exercise or vesting of stock options, restricted stock units or performance share units or issuable under the dividend reinvestment plan, employee stock purchase plan or 401(k) savings plan.

(2) Such number of shares of our common stock assumes that we will not be required to issue the shares of our common stock that are the subject of this offering in lieu of the forward seller borrowing and selling such shares to the underwriter as further described elsewhere in this prospectus supplement. For more information, see "Underwriting (Conflicts of Interest)."

(3) The forward seller has advised us that it intends to acquire shares of our common stock to be sold in this offering through borrowings from third-party stock lenders. Subject to the occurrence of certain events, we will not be obligated to deliver shares of our common stock under the forward sale agreement (if at all) until later settlement of the forward sale agreement, which provides for settlement on a settlement date or dates to be specified at our discretion on or prior to August 10, 2021. Except in certain circumstances, we have the right to elect cash settlement or net share settlement under the forward sale agreement. Although we intend to elect full physical settlement under the forward sale agreement, if we elect cash settlement we will not issue any shares and if we elect net share settlement, the number of shares we issue upon settlement of the forward sale agreement may be substantially less than the amount we would have issued upon full physical settlement, or we may not issue any shares upon such net share settlement at all. See "Underwriting (Conflicts of Interest)–Forward Sale Agreement" for a description of the forward sale agreement.

Use of Proceeds	We will not initially receive any proceeds from the sale of the shares of our common stock offered by the forward seller in this offering, unless an event occurs that requires us to issue and sell such shares to the underwriter in lieu of the forward seller selling such shares to the underwriter as further described elsewhere in this prospectus supplement, in which case we intend to use all net proceeds we receive from any such sales for the same purposes described below. We expect to receive net proceeds (after deducting estimated expenses) of approximately $307.5 million, subject to the price adjustment and other provisions of the forward sale agreement, in the event of full physical settlement of the forward sale agreement, which we expect to occur on or prior to August 10, 2021. For purposes of calculating the proceeds to us upon settlement of the forward sale agreement, we have assumed that the forward sale agreement is physically settled based upon the initial forward sale price of $46.00 per share on the effective date of the forward sale agreement, which will be August 11, 2020. We will not receive any proceeds under the forward sale agreement on the closing date of this offering. The actual proceeds from the forward sales are subject to the final settlement of the forward sale agreement. The forward sale price that we expect to receive upon physical settlement of the forward sale agreement is subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread and will be decreased based on amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement, including the dividend declared on August 4, 2020 and having a record date of August 14, 2020. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price for such day.

We currently intend to elect full physical settlement of the forward sale agreement and to use the net proceeds, if any, that we would receive upon settlement of the forward sale agreement for general corporate purposes, including for water and wastewater utility acquisitions, working capital and capital expenditures. If we elect to cash settle all or a portion of the forward sale agreement, we will not receive any proceeds from the sale of shares of our common stock related to such election of cash settlement of the forward sale agreement and we may either receive a cash payment from, or owe a cash payment to, the forward purchaser. If we elect to net share settle all or a portion of the forward sale agreement, we will not receive any proceeds from the sale of shares of our common stock related to such election, and we may either receive shares of our common stock from, or owe shares of our common stock to, the forward purchaser.

Certain United States Federal Income and Estate Tax Considerations	Certain United States federal income and estate tax considerations to non-U.S. holders of purchasing, owning and disposing of our common stock are described in “Certain United States Federal Income and Estate Tax Considerations to Non-U.S. Holders” included in this prospectus supplement.

Listing	Our common stock is listed on the New York Stock Exchange (the "NYSE") under the symbol "WTRG."
Dividend Policy	We have historically paid quarterly dividends on our common stock; however, the declaration, amount, timing and payment of any future dividends are subject to the determination and approval of our board of directors based on then-current or anticipated future conditions including our results of operations, capital requirements, financial condition, legal requirements or other factors deemed relevant by our board of directors. See "Listing of Our Common Stock and Dividends."
Transfer Agent and Registrar	The registrar and transfer agent for our common stock is Computershare Trust Company, N.A.
Accounting Treatment	Before the issuance of shares of our common stock, if any, upon settlement of the forward sale agreement, we expect that the shares issuable upon settlement of the forward sale agreement will be reflected in our diluted earnings per share calculation using the treasury stock method. Under this method, the number of shares of our common stock used in calculating diluted earnings per share is deemed to be increased by the excess, if any, of the number of shares of common stock that would be issued upon full physical settlement of the forward sale agreement over the number of shares of common stock that could be purchased by us in the market (based on the average market price of our common stock during the applicable reporting period) using the proceeds receivable upon full physical settlement (based on the adjusted forward sale price at the end of the reporting period). Consequently, we anticipate there will be no dilutive effect on our earnings per share except during periods when the average market price of shares of our common stock is above the applicable adjusted forward sale price, which is initially $46.00 per share, subject to increase or decrease based on the overnight bank funding rate, less a spread, and subject to decrease by amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement. However, if we decide to physically settle or net share settle the forward sale agreement, delivery of our shares to the forward purchaser on the physical settlement or net share settlement of the forward sale agreement would result in dilution to our earnings per share.
Conflicts of Interest	All of the proceeds of this offering (excluding proceeds to us with respect to any shares of common stock that we may issue and sell directly to the underwriter in lieu of the forward seller selling our common stock to the underwriter) will be paid to the forward purchaser (or its affiliate). Because RBC Capital Markets, or its affiliate, will receive more than 5% of the net proceeds of this offering, not including underwriting compensation, RBC Capital Markets is deemed to have a conflict of interest within the meaning of Rule 5121 (Public Offerings of Securities with Conflicts of Interest)

	of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Accordingly, this offering will be conducted in compliance with the applicable requirements of FINRA Rule 5121. Pursuant to that rule, the appointment of a "qualified independent underwriter" is not required in connection with this offering, as the shares of our common stock have a "bona fide public market" (as such terms are defined in FINRA Rule 5121). In accordance with FINRA Rule 5121, RBC Capital Markets may not confirm any sales to any account over which it exercises discretionary authority without the prior written approval of the transaction from the account holder.
Risk Factors	Investing in our common stock involves risks. See "Risk Factors" in this prospectus supplement, the accompanying prospectus and in the documents we incorporate by reference in this prospectus supplement and the accompanying prospectus for a discussion of some of the risks and other factors you should carefully consider before deciding to invest in shares of our common stock.

In this prospectus supplement, unless otherwise indicated, the number of shares of our common stock outstanding and the other information based thereon is based on 245,154,699 shares of our common stock outstanding as of August 7, 2020, and does not reflect:

- 11.1 million shares of our common stock issuable upon settlement of the tangible equity units ("TEUs") purchase contracts outstanding as of June 30, 2020, assuming the maximum number of shares issuable upon automatic settlement of such TEU purchase contracts that are components of the TEUs; and
- 18.7 million shares of our common stock reserved for issuance upon exercise of stock options outstanding, upon vesting of our time based restricted stock units, upon vesting of our performance based restricted stock units or performance share units, as well as additional shares we may issue under our dividend reinvestment program, employee stock purchase plan or 401(k) savings plans.

RISK FACTORS

Investing in our common stock involves risks. You should review and carefully consider the risks, uncertainties and other factors described below and all of the information included elsewhere in this prospectus supplement, the accompanying prospectus, any free writing prospectus we may provide to you in connection with this offering and the documents incorporated by reference herein and therein before deciding to invest in the shares. We also urge you to consider carefully the risks, uncertainties and other factors set forth under the headings "Forward-Looking Statements" and "Market and Industry Data." However, additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business, operations, financial condition and financial results and the value of the shares.

Risks Related to Our Business

For a discussion of specific risks related to our business, operations, financial condition and financial results, please see the "Business," "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections in our Annual Report on Form 10-K for our fiscal year ended December 31, 2019 and the "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections in our Quarterly Reports on Form 10-Q for the quarter ended March 31, 2020 filed with the SEC on May 8, 2020 and the quarter ended June 30, 2020 filed with the SEC on August 6, 2020, in each case, as updated by our annual, quarterly and other reports and documents we file with the SEC that are incorporated by reference in this prospectus supplement and the accompanying prospectus. See "Where You Can Find Additional Information; Incorporation of Certain Documents by Reference," in this prospectus supplement.

Risks Related to the Forward Sale Agreement

Settlement provisions contained in the forward sale agreement subject us to certain risks.

The forward purchaser will have the right to accelerate the forward sale agreement (or, in certain cases, the portion thereof that it determines is affected by the relevant event) and require us to physically settle the forward sale agreement on a date specified by the forward purchaser if:

- in the commercially reasonable judgment of the forward purchaser, it or its affiliate is unable to hedge its exposure to the transactions contemplated by the forward sale agreement because of the lack of sufficient shares of our common stock being made available for borrowing by stock lenders or it or its affiliate is unable to borrow such number of shares at a rate equal to or less than an agreed maximum stock loan rate;
- we declare any dividend, issue or distribution on shares of our common stock (i) payable in cash in excess of a specified amount or that otherwise constitutes an extraordinary dividend under the forward sale agreement, (ii) payable in securities of another company as a result of a spin-off or similar transaction, (iii) of any other type of securities (other than our common stock), rights, warrants or other assets for payment (cash or other consideration) at less than the prevailing market price, as reasonably determined by the forward purchaser or (iv) any other special dividend or distribution that is outside the normal course of our operations of normal dividend policies or practices;
- certain ownership thresholds applicable to the forward purchaser are exceeded;
- an event is announced that, if consummated, would result in an extraordinary event (as defined in the forward sale agreement) including, among other things, certain mergers and tender offers, as well as certain events such as a delisting of our common stock (each as more fully described in the forward sale agreement); or
- certain other events of default or termination events occur, including, among other things, any material misrepresentation made by us in connection with our entry into the forward sale agreement, our bankruptcy (except as described below) or certain changes in law (each as more fully described in the forward sale agreement).

The forward purchaser's decision to exercise its right to accelerate the forward sale agreement (or, in certain cases, the portion thereof that it determines is affected by the relevant event) and to require us to settle the forward sale agreement will be made irrespective of our interests, including our need for capital. In such cases, we could be required to issue and deliver shares of our common stock under the terms of the physical settlement provisions of the forward sale agreement irrespective of our capital needs, which would result in dilution to our earnings per share and may adversely affect the market price of our common stock. In addition, upon certain events of bankruptcy or insolvency related to us, the forward sale agreement will automatically terminate without further liability of either party to such agreement (other than in the event of a breach by us of certain representations or warranties contained in the forward sale agreement). Following any such termination, we would not issue any shares of common stock or receive any proceeds pursuant to the forward sale agreement.

The forward sale agreement provides for settlement on a settlement date or dates to be specified at our discretion on or prior to August 10, 2021. The forward sale agreement will be physically settled, unless we elect to settle the forward sale agreement in cash or to net share settle the forward sale agreement. If we decide to physically settle or net share settle the forward sale agreement, delivery of shares of our common stock upon any physical settlement or net share settlement of the forward sale agreement will result in dilution to our earnings per share. If we elect cash or net share settlement for all or a portion of the shares of our common stock underlying the forward sale agreement, we would expect the forward purchaser or one of its affiliates to repurchase a number of shares of our common stock equal to the portion for which we elect cash or net share settlement in order to satisfy its obligation to return the shares of our common stock the forward purchaser or its affiliate had borrowed in connection with sales of our common stock under this prospectus supplement and, if applicable in connection with net share settlement, to deliver shares of our common stock to us. If the market value of our common stock at the time of the purchase is above the forward sale price at that time, we will pay or deliver, as the case may be, to the forward purchaser under the forward sale agreement, an amount in cash, or a number of shares of our common stock with a market value, equal to such difference. Any such difference could be significant. Conversely, if the market value of our common stock at the time of such purchase is below the forward sale price at that time, the forward purchaser will pay or deliver, as the case may be, to us under the forward sale agreement, an amount in cash, or a number of shares of our common stock with a market value, equal to such difference. See "Underwriting (Conflicts of Interest)—Forward Sale Agreement" for a description of the forward sale agreement.

The forward sale price that we expect to receive upon physical settlement of the forward sale agreement is subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread and will be decreased based on amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price for such day. As of the date of this prospectus supplement, the overnight bank funding rate is less than the spread, and if the overnight bank funding rate remains constant or decreases prior to the settlement of the forward sale agreement, we may receive less than the initial forward sale price per share upon physical settlement of the forward sale agreement.

In addition, the purchase of shares of our common stock by the forward purchaser or its affiliate to unwind the forward purchaser's hedge position could cause the market price of our common stock to increase over time, thereby increasing the amount of cash we would owe to the forward purchaser upon a cash settlement or increasing the number of shares of our common stock we would owe to the forward purchaser upon a net share settlement, as the case may be, of the forward sale agreement, or decreasing the amount of cash that the forward purchaser would owe us upon a cash settlement or decreasing the number of shares of our common stock that the forward purchaser would owe us upon a net share settlement, as the case may be, of the forward sale agreement. We will not be able to control the manner in which the forward purchaser unwinds its hedge positions.

In certain bankruptcy or insolvency events, the forward sale agreement will automatically terminate, and we would not receive the expected proceeds from the forward sales of our common stock.

If we institute or consent to, or an appropriate regulatory or other authority institutes against us, a proceeding seeking a judgment in bankruptcy or insolvency or any other relief under any bankruptcy or insolvency law or other similar law affecting creditors' rights or if we or such authority presents a petition for our winding up or liquidation or we consent to such a petition, the forward sale agreement will automatically terminate. If the forward sale agreement so terminates, we would not be obligated to deliver to the forward purchaser any shares of our common stock not previously delivered (or for which physical settlement has not been elected), and the forward purchaser would be discharged from its obligation to pay the forward sale price per share in respect of any shares of our common stock not previously settled (or for which physical settlement has not been elected). Therefore, to the extent there are any shares of our common stock with respect to which we have not elected to physically settle under the forward sale agreement at the time of the institution of or consent to any such bankruptcy or insolvency proceedings or any such petition, we would not receive the forward sale price per share in respect of those shares of our common stock.

Risks Related to this Offering and Our Common Stock

The unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus are presented for illustrative purposes only and do not purport to represent what the financial position or results of operations of the combined company would have been had the Peoples Acquisition been completed on the dates assumed for purposes of that information, nor do they represent the actual financial position or results of operations of the combined company following the Peoples Acquisition.

The unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus are presented for illustrative purposes only, are based on numerous adjustments, assumptions and estimates, are subject to numerous other uncertainties and do not purport to reflect what the combined company's financial position or results of operations would have been had the Peoples Acquisition been completed as of the dates assumed for purposes of that information, nor do they reflect the financial position or results of operations of the combined company following the Peoples Acquisition. Such unaudited pro forma consolidated combined financial information and certain other adjusted information reflects the assumptions of our management at the time that such information was initially prepared.

In any event, our actual financial positions and results of operations following the Peoples Acquisition may not be consistent with, or evident from, the unaudited pro forma consolidated combined financial information or other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

For purposes of the unaudited pro forma consolidated combined financial information as of December 31, 2019, the $3.465 billion base cash purchase price payable in connection with the Peoples Acquisition (the "Cash Acquisition Consideration") has been preliminarily allocated to the identifiable assets acquired and liabilities assumed based on limited information presently available to estimate fair values. The Cash Acquisition Consideration will be allocated among the relative fair values of the identifiable assets acquired and liabilities assumed based on their estimated fair values as of the date of the Peoples Acquisition. The relative fair values of the assets acquired and liabilities assumed are estimates, which are subject to change pending further review. The actual amounts recorded with respect to the Peoples Acquisition may differ materially from the information presented in the unaudited pro forma consolidated combined financial information.

As a result of the foregoing, investors should not place undue reliance on unaudited pro forma consolidated combined financial information and other adjusted information included or incorporated by reference in this prospectus supplement and the accompanying prospectus.

The price of our common stock may be volatile. This volatility may affect the price at which you could sell our common stock, and the sale or resale of substantial amounts of our common stock could adversely affect the market price of our common stock.

The sale or issuance of substantial amounts of our common stock, or the perception that additional sales or issuances could occur, could adversely affect the market price of our common stock, even if the business is doing well. In addition, the availability for sale of substantial amounts of our common stock could adversely impact its market price. Shares of our common stock will also be issuable upon settlement or redemption of the TEU purchase contracts and the number of shares may be substantial. The settlement rates for the TEU purchase contracts will be subject to certain anti-dilution adjustments that could increase, potentially significantly, the number of shares of our common stock issuable upon such settlement or redemption. Any of the foregoing may also impair our ability to raise additional capital through the sale of our equity securities.

Raising additional funds by issuing additional equity securities or with additional debt financing in the future may cause dilution to shareholders or restrict our operations.

We expect that we will need to raise additional capital in the future in order to, among other things, repay indebtedness and fund our operations and future acquisitions, which we may do through equity and equity-linked securities offerings or additional debt financings, as well as borrowings under our credit facilities. Additional issuances of equity securities, including shares of our common stock, or debt or other securities that are convertible into or exchangeable for, or that represent the right to receive, common stock could dilute the economic and other rights and interests of holders of shares of our common stock and cause the market price of our common stock to decline. Subject to certain exceptions, such issuances may be made without any action or approval by our shareholders.

Any new debt financing we enter into may involve covenants that restrict our operations more than our current outstanding debt and credit facilities. These restrictive covenants could include limitations on additional borrowings, and specific restrictions on the use of our assets, as well as prohibitions or limitations on our ability to create liens, pay dividends, receive distributions from our subsidiaries, redeem or repurchase our stock or make investments. These covenants could hinder our access to capital markets and limit or delay our ability to carry out our capital expenditure program.

Anti-takeover provisions in our organizational documents and under Pennsylvania law might discourage, delay or prevent changes in control of our company and may result in an entrenchment of management and diminish the value of our common stock.

Certain provisions of our articles of incorporation and bylaws could have the effect of delaying, deterring or preventing another party from acquiring or seeking to acquire control of us. These provisions are intended to discourage certain types of coercive takeover practices and inadequate takeover bids and to encourage anyone seeking to acquire control of us to negotiate first with our board of directors. However, these provisions could also delay, deter or prevent a change of control or other takeover of our company that our shareholders might consider to be in their best interests, including transactions that might result in a premium being paid over the market prices of our common stock, and may also limit the prices that investors are willing to pay in the future for our common stock. These provisions may also have the effect of preventing changes in our management.

For example, our articles of incorporation and bylaws include anti-takeover provisions that:

- authorize our board of directors, without a vote or other action by our shareholders, to cause the issuance of preferred stock in one or more series and, with respect to each series, to fix the number of shares constituting that series and to establish the rights, preferences, privileges and restrictions of that series, which may include, among other things, dividend and liquidation rights and preferences, rights to convert such shares into common stock, voting rights and other rights which may adversely affect the voting or other rights and the economic interests of holders of our common stock;

- require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law;
- establish advance notice requirements and procedures for shareholders to submit nominations of candidates for election to our board of directors and to propose other business to be brought before a shareholders meeting;
- provide that vacancies in our board of directors, including vacancies created by the removal of any director, or any increase in the number of directors may be filled by a majority of the directors then in office or by the sole remaining director;
- provide that no shareholder may cumulate votes in the election of directors, which means that the holders of a majority of our outstanding shares of common stock can elect all directors standing for election by our common shareholders;
- require that any action to be taken by our shareholders must be taken either (1) at a duly called annual or special meeting of shareholders or (2) by the unanimous written consent of all of our shareholders; and
- require action by shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting in order for our shareholders to call a special meeting of shareholders.

In addition, anti-takeover provisions in Pennsylvania law could make it more difficult for a third party to acquire control of us including, but not limited to, provisions relating to (1) control share acquisitions, (2) disgorgement of profits by certain controlling persons, (3) business combination transactions with interested shareholders, and (4) the rights of shareholders to demand fair value for their stock following a control transaction. Pennsylvania law permits corporations to opt-out of these anti-takeover provisions, but we have not done so. Such provisions could have the effect of deterring takeovers or delaying changes in control or management of us. Additionally, such provisions could limit the price that some investors might be willing to pay in the future for shares of our common stock.

We may be unable to, or may choose not to, continue to pay dividends on our common stock at current or planned rates or at all.

Any future payments of cash dividends, and the amount of any cash dividends we pay, on our common stock will depend on, among other things, our financial condition, capital requirements and results of operations, and the ability of our subsidiaries to distribute cash to us, as well as other factors that our board of directors may consider relevant. If we were to reduce the amount of cash dividends per share payable on our common stock, fail to increase the amount of those cash dividends per share in the future or cease paying those cash dividends altogether, it would likely have an adverse impact on the market price of our common stock. In addition, under Pennsylvania law, our board of directors (or an authorized committee thereof) may not declare and pay dividends on shares of our common stock if, after giving effect to the dividend (1) we would be unable to pay our debts as they become due in the ordinary course of business, or (2) our total assets would be less than the sum of our total liabilities plus the amount that would be needed, if we were to be dissolved as of the date for measuring the dividend, to satisfy the preferential rights upon dissolution of shareholders whose preferential rights are superior to those receiving the dividend.

Essential Utilities' ability to pay dividends and to meet its debt obligations largely depends on the performance of its subsidiaries and the ability to utilize the cash flows from those subsidiaries.

Essential Utilities is a holding company substantially all of whose assets are owned by its subsidiaries and substantially all of whose operations are conducted through its subsidiaries. Essential Utilities' ability to pay dividends and meet its debt and other obligations depends almost entirely on cash flows from its subsidiaries and,

in the short term, its ability to raise capital from external sources. In the long term, cash flows from its subsidiaries depend on their ability to generate operating cash flows in excess of their own expenditures, common and preferred stock dividends (if any), and debt or other obligations. Its subsidiaries are separate and distinct legal entities that are not obligated to pay dividends or make loans or distributions to Essential Utilities (whether to enable Essential Utilities to pay dividends on its common stock, to pay principal and interest on its debt, to settle, repurchase or redeem its debt (including the amortizing notes components of its TEUs) or other securities (including the purchase contracts components of its TEUs)), or to satisfy its other obligations). In addition, notwithstanding its controlling interest in such subsidiaries, many of them, including certain entities of Peoples, are limited in their ability to pay dividends or make loans or distributions to Essential Utilities, including, without limitation, as a result of legislation, regulation, court order, contractual restrictions and other restrictions or in times of financial distress. As a result, Essential Utilities may not be able to cause its subsidiaries and other entities to distribute funds or provide loans sufficient to enable it to pay dividends and meet its debt and other obligations.

USE OF PROCEEDS

We will not initially receive any proceeds from the sale of the shares of our common stock offered by the forward seller in this offering, unless an event occurs that requires us to issue and sell such shares to the underwriter in lieu of the forward seller selling such shares to the underwriter as further described elsewhere in this prospectus supplement, in which case we intend to use all net proceeds we receive from any such sales for the same purposes described below.

We expect to receive net proceeds (after deducting estimated expenses) of approximately $307.5 million, subject to the price adjustment and other provisions of the forward sale agreement, in the event of full physical settlement of the forward sale agreement, which we expect to occur on or prior to August 10, 2021. For purposes of calculating the proceeds to us upon settlement of the forward sale agreement, we have assumed that the forward sale agreement is physically settled based upon the initial forward sale price of $46.00 per share on the effective date of the forward sale agreement, which will be August 11, 2020. We will not receive any proceeds under the forward sale agreement on the closing date of this offering. The actual proceeds from the forward sales are subject to the final settlement of the forward sale agreement. The forward sale price that we expect to receive upon physical settlement of the forward sale agreement is subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread and will be decreased based on amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement, including the dividend declared on August 4, 2020 and having a record date of August 14, 2020. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price for such day. See “Underwriting (Conflicts of Interest)—Forward Sale Agreement” for a description of the forward sale agreement.

We currently intend to elect full physical settlement of the forward sale agreement and to use the net proceeds, if any, that we would receive upon settlement of the forward sale agreement for general corporate purposes, including for water and wastewater utility acquisitions, working capital and capital expenditures. If we elect to cash settle all or a portion of the forward sale agreement, we will not receive any proceeds from the sale of shares of our common stock related to such election of cash settlement of the forward sale agreement and we may either receive a cash payment from, or owe a cash payment to, the forward purchaser. If we elect to net share settle all or a portion of the forward sale agreement, we will not receive any proceeds from the sale of shares of our common stock related to such election, and we may either receive shares of our common stock from, or owe shares of our common stock to, the forward purchaser.

LISTING OF OUR COMMON STOCK AND DIVIDENDS

Our common stock is listed on the NYSE under the symbol “WTRG.” As of August 7, 2020, there were 245,154,699 shares of our common stock outstanding.

On August 10, 2020, the last reported sale price of our common stock on the NYSE was $47.81.

We have historically paid quarterly dividends on our common stock; however, the declaration, amount, timing and payment of any future dividends are subject to the determination and approval of our board of directors based on then-current or anticipated future conditions including our results of operations, capital requirements, financial condition, legal requirements or other factors deemed relevant by our board of directors. See “Risk Factors—Risks Related to Our Common Stock—We may be unable to, or may choose not to, continue to pay dividends on our common stock at current or planned rates or at all.”

CERTAIN UNITED STATES FEDERAL INCOME AND ESTATE TAX CONSIDERATIONS TO NON-U.S. HOLDERS

The following is a summary of certain United States federal income and estate tax consequences of the purchase, ownership and disposition of our common stock as of the date hereof. Except where noted, this summary deals only with common stock that is held as a capital asset by a non-U.S. holder (as defined below).

A "non-U.S. holder" means a beneficial owner of our common stock (other than an entity treated as a partnership for United States federal income tax purposes) that is not, for United States federal income tax purposes, any of the following:

- an individual citizen or resident of the United States;
- a corporation (or any other entity treated as a corporation for United States federal income tax purposes) created or organized in or under the laws of the United States, any state thereof or the District of Columbia;
- an estate the income of which is subject to United States federal income taxation regardless of its source; or
- a trust if it (1) is subject to the primary supervision of a court within the United States and one or more United States persons have the authority to control all substantial decisions of the trust or (2) has a valid election in effect under applicable United States Treasury regulations to be treated as a United States person.

This summary is based upon provisions of the Internal Revenue Code of 1986, as amended (the "Code"), and regulations, rulings and judicial decisions as of the date hereof. Those authorities may be changed, perhaps retroactively, so as to result in United States federal income and estate tax consequences different from those summarized below. This summary does not address all aspects of United States federal income and estate taxes and does not deal with foreign, state, local or other tax considerations that may be relevant to non-U.S. holders in light of their particular circumstances. In addition, it does not represent a detailed description of the United States federal income and estate tax consequences applicable to you if you are subject to special treatment under the United States federal income tax laws (including if you are a United States expatriate, foreign pension fund, "controlled foreign corporation," "passive foreign investment company" or a partnership or other pass-through entity for United States federal income tax purposes). We cannot assure you that a change in law will not alter significantly the tax considerations that we describe in this summary.

If a partnership (or other entity treated as a partnership for United States federal income tax purposes) holds our common stock, the tax treatment of a partner will generally depend upon the status of the partner and the activities of the partnership. If you are a partner of a partnership holding our common stock, you should consult your tax advisors.

If you are considering the purchase of our common stock, you should consult your own tax advisors concerning the particular United States federal income and estate tax consequences to you of the purchase, ownership and disposition of our common stock, as well as the consequences to you arising under other United States federal tax laws and the laws of any other taxing jurisdiction.

Dividends

In the event that we make a distribution of cash or other property (other than certain pro rata distributions of our stock) in respect of our common stock, the distribution generally will be treated as a dividend for United States federal income tax purposes to the extent it is paid from our current or accumulated earnings and profits, as determined under United States federal income tax principles. Any portion of a distribution that exceeds our current and accumulated earnings and profits generally will be treated first as a tax-free return of capital, causing

a reduction in the adjusted tax basis of a non-U.S. holder's common stock, and to the extent the amount of the distribution exceeds a non-U.S. holder's adjusted tax basis in our common stock, the excess will be treated as gain from the disposition of our common stock (the tax treatment of which is discussed below under "—Gain on Disposition of Common Stock").

Dividends paid to a non-U.S. holder generally will be subject to withholding of United States federal income tax at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. However, dividends that are effectively connected with the conduct of a trade or business by the non-U.S. holder within the United States (and, if required by an applicable income tax treaty, are attributable to a United States permanent establishment) are not subject to the withholding tax, provided certain certification and disclosure requirements are satisfied. Instead, such dividends are subject to United States federal income tax on a net income basis in the same manner as if the non-U.S. holder were a United States person as defined under the Code. Any such effectively connected dividends received by a foreign corporation may be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty.

A non-U.S. holder who wishes to claim the benefit of an applicable treaty rate and avoid backup withholding, as discussed below, for dividends will be required (a) to provide the applicable withholding agent with a properly executed Internal Revenue Service ("IRS") Form W-8BEN or Form W-8BEN-E (or other applicable form) certifying under penalty of perjury that such holder is not a United States person as defined under the Code and is eligible for treaty benefits or (b) if our common stock is held through certain foreign intermediaries, to satisfy the relevant certification requirements of applicable United States Treasury regulations. Special certification and other requirements apply to certain non-U.S. holders that are pass-through entities rather than corporations or individuals.

A non-U.S. holder eligible for a reduced rate of United States federal withholding tax pursuant to an income tax treaty may obtain a refund of any excess amounts withheld by timely filing an appropriate claim for refund with the IRS.

Gain on Disposition of Common Stock

Subject to the discussion of backup withholding below, any gain realized by a non-U.S. holder on the sale or other disposition of our common stock generally will not be subject to United States federal income tax unless:

- the gain is effectively connected with a trade or business of the non-U.S. holder in the United States (and, if required by an applicable income tax treaty, is attributable to a United States permanent establishment of the non-U.S. holder);
- the non-U.S. holder is an individual who is present in the United States for 183 days or more in the taxable year of that disposition, and certain other conditions are met; or
- we are or have been a "United States real property holding corporation" for United States federal income tax purposes and certain other conditions are met.

A non-U.S. holder described in the first bullet point immediately above will be subject to tax on the gain derived from the sale or other disposition in the same manner as if the non-U.S. holder were a United States person as defined under the Code. In addition, if any non-U.S. holder described in the first bullet point immediately above is a foreign corporation, the gain realized by such non-U.S. holder may be subject to an additional "branch profits tax" at a 30% rate or such lower rate as may be specified by an applicable income tax treaty. An individual non-U.S. holder described in the second bullet point immediately above will be subject to a 30% (or such lower rate as may be specified by an applicable income tax treaty) tax on the gain derived from the sale or other disposition, which gain may be offset by United States source capital losses even though the individual is not considered a resident of the United States.

Generally, a corporation is a "United States real property holding corporation" if the fair market value of its United States real property interests equals or exceeds 50% of the sum of the fair market value of its worldwide

real property interests and its other assets used or held for use in a trade or business (all as determined for United States federal income tax purposes). We believe we are not and do not anticipate becoming a "United States real property holding corporation" for United States federal income tax purposes. If, however, we are or become a "United States real property holding corporation," so long as our common stock is regularly traded on an established securities market during the calendar year in which the sale or other disposition occurs, only a non-U.S. holder who holds or held (at any time during the shorter of the five year period preceding the date of disposition or the holder's holding period) more than 5% of our common stock will be subject to United States federal income tax on the sale or other disposition of our common stock.

Federal Estate Tax

Common stock held by an individual non-U.S. holder at the time of death will be included in such holder's gross estate for United States federal estate tax purposes, unless an applicable estate tax treaty provides otherwise.

Information Reporting and Backup Withholding

Distributions paid to a non-U.S. holder and the amount of any tax withheld with respect to such distributions generally will be reported to the IRS. Copies of the information returns reporting such distributions and any withholding may also be made available to the tax authorities in the country in which the non-U.S. holder resides under the provisions of an applicable income tax treaty.

A non-U.S. holder will not be subject to backup withholding on dividends received if such holder certifies under penalty of perjury that it is a non-U.S. holder (and the payor does not have actual knowledge or reason to know that such holder is a United States person as defined under the Code), or such holder otherwise establishes an exemption.

Information reporting and, depending on the circumstances, backup withholding will apply to the proceeds of a sale or other disposition of our common stock made within the United States or conducted through certain United States-related financial intermediaries, unless the beneficial owner certifies under penalty of perjury that it is a non-U.S. holder (and the payor does not have actual knowledge or reason to know that the beneficial owner is a United States person as defined under the Code), or such owner otherwise establishes an exemption.

Backup withholding is not an additional tax and any amounts withheld under the backup withholding rules will be allowed as a refund or a credit against a non-U.S. holder's United States federal income tax liability provided the required information is timely furnished to the IRS.

Additional Withholding Requirements

Under Sections 1471 through 1474 of the Code (such Sections commonly referred to as "FATCA"), a 30% United States federal withholding tax may apply to any dividends paid on our common stock to (1) a "foreign financial institution" (as specifically defined in the Code) which does not provide sufficient documentation, typically on IRS Form W-8BEN-E, evidencing either (a) an exemption from FATCA, or (b) its compliance (or deemed compliance) with FATCA (which may alternatively be in the form of compliance with an intergovernmental agreement with the United States) in a manner which avoids withholding, or (2) a "non- financial foreign entity" (as specifically defined in the Code) which does not provide sufficient documentation, typically on IRS Form W-8BEN-E, evidencing either (a) an exemption from FATCA, or (b) adequate information regarding certain substantial United States beneficial owners of such entity (if any). If a dividend payment is both subject to withholding under FATCA and subject to the withholding tax discussed above under "—Dividends," the withholding under FATCA may be credited against, and therefore reduce, such other withholding tax. You should consult your own tax advisors regarding these requirements and whether they may be relevant to your ownership and disposition of our common stock.

CERTAIN ERISA CONSIDERATIONS

The following is a summary of certain considerations associated with the purchase of our common stock by (i) "employee benefit plans" within the meaning of Section 3(3) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA") that are subject to Title I of ERISA, (ii) plans, individual retirement accounts and other arrangements that are subject to Section 4975 of the Code or provisions under any other federal, state, local, non-U.S. or other laws or regulations that are similar to such provisions of ERISA or the Code (collectively, "Similar Laws"), and (iii) entities which are deemed to hold the assets of any of the foregoing types of plans, accounts or arrangements (each of the foregoing described in clauses (i), (ii), and (iii) being referred to herein as a "Plan").

General fiduciary matters and prohibited transaction issues

ERISA and the Code impose certain duties on persons who are fiduciaries of a Plan subject to Title I of ERISA or Section 4975 of the Code (a "Covered Plan") and prohibit certain transactions involving the assets of a Covered Plan and its fiduciaries or other interested parties. Under ERISA and the Code, any person who exercises any discretionary authority or control over the administration of such a Covered Plan or the management or disposition of the assets of such a Covered Plan, or who renders investment advice for a fee or other compensation to such a Covered Plan, is generally considered to be a fiduciary of the Covered Plan.

Section 406 of ERISA and Section 4975 of the Code prohibit Covered Plans from engaging in specified transactions involving plan assets with persons or entities who are "parties in interest," within the meaning of ERISA, or "disqualified persons," within the meaning of Section 4975 of the Code, unless an exemption is available. The issuer and/or the underwriter, or any of their respective affiliates, may be a "party in interest" or a "disqualified person" within the meaning of ERISA and the Code. A party in interest or disqualified person who engaged in a non-exempt prohibited transaction may be subject to excise taxes and other penalties and liabilities under ERISA and the Code. In addition, the fiduciary of the Covered Plan that engaged in such a non-exempt prohibited transaction may be subject to penalties and liabilities under ERISA and the Code.

In considering an investment in our common stock with a portion of the assets of any Plan, a fiduciary should determine whether the investment is in accordance with the documents and instruments governing the Plan and the applicable provisions of ERISA, the Code or any Similar Law relating to a fiduciary's duty to the Plan, including without limitation, the prudence, diversification, delegation of control and prohibited transaction provisions of ERISA, the Code and any other applicable Similar Laws.

Government plans, foreign plans and certain church plans, while not subject to the fiduciary responsibility provisions of Title I of ERISA or the prohibited transaction provisions of Section 406 of ERISA or Section 4975 of the Code, may nevertheless be subject to Similar Laws. Fiduciaries of such Plans should consult with their counsel before acquiring shares of our common stock.

Representation

By its acceptance of our common stock, each purchaser and subsequent transferee will be deemed to have represented and warranted that either (i) no portion of the assets used by such purchaser or transferee to acquire our common stock constitutes assets of any Plan or (ii) the acquisition of our common stock by such purchaser or transferee will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or a similar violation under any applicable Similar Laws.

The foregoing discussion is general in nature and is not intended to be all-inclusive. Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing our common stock on behalf of, or with the assets of, any Plan, consult with their counsel regarding the potential applicability of ERISA, Section 4975 of the Code or any Similar Law and whether an exemption would be required.

Neither this discussion nor anything provided in this prospectus is, or is intended to be, investment advice directed at any potential Plan purchasers, or at Plan purchasers generally, and such purchasers of our common stock should consult and rely on their own counsel and advisers as to whether an investment in our common stock is suitable for the Plan. The sale of our common stock to any Plan is in no respect a representation by us, an underwriter or any of our or their affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by Plans generally or any particular Plan, or that such investment is prudent or appropriate for Plans generally or any particular Plan.

UNDERWRITING (CONFLICTS OF INTEREST)

Subject to the terms and conditions stated in the underwriting agreement dated the date of this prospectus supplement, RBC Capital Markets has agreed to purchase, and the forward seller has agreed to sell to the underwriter, 6,700,000 shares of our common stock.

The underwriting agreement provides that the obligation of the underwriter to purchase the shares of our common stock included in this offering are subject to approval of certain legal matters by its counsel and to certain other customary conditions. The underwriter is obligated to purchase all of the shares of our common stock being offered pursuant to this prospectus supplement if it purchases any of such shares of our common stock. The offering of the shares of our common stock by the underwriter is subject to receipt and acceptance and to the underwriter's right to reject any order in whole or in part.

The underwriter may offer the shares from time to time to purchasers directly or through agents, or through brokers in brokerage transactions on the NYSE, in the over-the-counter market, or to dealers in negotiated transactions, or in a combination of such methods of sale or otherwise, at a fixed price or prices, which may be changed, or at market prices prevailing at the time of sale, at prices related to such prevailing market prices, or at negotiated prices. In connection with the sale of shares of our common stock, the underwriter may be deemed to have received compensation in the form of underwriting discounts. The underwriter may effect such transactions by selling shares to or through dealers, and such dealers may receive compensation in the form of discounts, concessions, or commissions from the underwriter and/or purchasers of shares for whom it may act as an agent or to whom it may sell as principal. The difference between the price at which the underwriter purchases shares and the price at which the underwriter resells such shares may be deemed underwriting compensation.

We estimate that the total expenses related to this offering will be approximately $700,000.

We have agreed to indemnify the underwriter, the forward purchaser and the forward seller against certain liabilities, including liabilities under the Securities Act, or to contribute to payments the underwriter, the forward seller or the forward purchaser may be required to make in respect of those liabilities.

Forward Sale Agreement

We have entered into a forward sale agreement on the date of this prospectus supplement with the forward purchaser, relating to 6,700,000 shares of our common stock. In connection with the execution of the forward sale agreement, and at our request, the forward seller is borrowing from third parties and selling in this offering 6,700,000 shares of our common stock.

If in the commercially reasonable judgment of the forward purchaser, it or its affiliate is unable to borrow, or it or its affiliate is unable to borrow at a stock loan rate not greater than a specified rate, and deliver for sale on the anticipated closing date, any shares of our common stock then the forward sale agreement will be terminated in its entirety. If in the commercially reasonable judgment of the forward purchaser, it or its affiliate is unable to borrow and deliver for sale on the anticipated closing date a number of shares of our common stock underlying the forward sale agreement, or it or its affiliate would be unable to borrow, at a stock loan rate not greater than a specified rate, and deliver for sale on the anticipated closing date such number of shares of our common stock, then we will issue and sell directly to the underwriter a number of shares of our common stock equal to the number of shares that the forward seller does not borrow and deliver, and the number of shares of our common stock to which the forward sale agreement relates will be reduced to the number that the forward seller can so borrow and deliver. In the event that the number of shares of our common stock to which the forward sale agreement relates is so reduced, the commitment of the underwriter to purchase shares of our common stock from the forward seller and the forward seller's obligation to borrow such shares for delivery and sale to the underwriter, as described above, will be replaced with the commitment to purchase from us and our

corresponding obligation to issue and sell directly to the underwriter all or such portion of the number of shares of our common stock not borrowed and delivered by the forward seller. In such event, we or the underwriter will have the right to postpone the closing date for up to three business days to effect any necessary changes to the documents or arrangements in connection with such closing.

We expect to receive net proceeds (after deducting estimated expenses) of approximately $307.5 million, subject to the price adjustment and other provisions of the forward sale agreement, in the event of full physical settlement of the forward sale agreement, which we expect to occur on or prior to August 10, 2021. For purposes of calculating the proceeds to us upon settlement of the forward sale agreement, we have assumed that the forward sale agreement is physically settled based upon the initial forward sale price of $46.00 per share on the effective date of the forward sale agreement, which will be August 11, 2020. We will not receive any proceeds under the forward sale agreement on the closing date of this offering. The actual proceeds from the forward sales are subject to the final settlement of the forward sale agreement. The forward sale price that we expect to receive upon physical settlement of the forward sale agreement is subject to adjustment on a daily basis based on a floating interest rate factor equal to the overnight bank funding rate less a spread and will be decreased based on amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement, including the dividend declared on August 4, 2020 and having a record date of August 14, 2020. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price for such day.

The forward sale agreement provides for settlement on a settlement date or dates to be specified at our discretion, but which we expect to occur on or prior to August 10, 2021. On a settlement date or dates, if we decide to physically settle the forward sale agreement, we will issue shares of our common stock to the forward purchaser at the then-applicable forward sale price. The forward sale price will initially be $46.00 per share, which is the price at which the underwriter has agreed to buy the shares of common stock offered hereby. The forward sale agreement provides that the initial forward sale price will be subject to adjustment based on a floating interest rate factor equal to the overnight bank funding rate less a spread, and will be subject to decrease on each of certain dates specified in the forward sale agreement by amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement. If the overnight bank funding rate is less than the spread on any day, the interest rate factor will result in a daily reduction of the forward sale price. As of the date of this prospectus supplement, the overnight bank funding rate is less than the spread, and if the overnight bank funding rate remains constant or decreases prior to the settlement of the forward sale agreement, we may receive less than the initial forward sale price per share upon physical settlement of the forward sale agreement.

Before the issuance of shares of our common stock, if any, upon settlement of the forward sale agreement, we expect that the shares issuable upon settlement of the forward sale agreement will be reflected in our diluted earnings per share calculation using the treasury stock method. Under this method, the number of shares of our common stock used in calculating diluted earnings per share is deemed to be increased by the excess, if any, of the number of shares of our common stock that would be issued upon full physical settlement of the forward sale agreement over the number of shares of common stock that could be purchased by us in the market (based on the average market price of our common stock during the applicable reporting period) using the proceeds receivable upon full physical settlement (based on the adjusted forward sale price at the end of the reporting period). Consequently, we anticipate there will be no dilutive effect on our earnings per share except during periods when the average market price of shares of our common stock is above the applicable adjusted forward sale price, which is initially $46.00 per share, subject to increase or decrease based on the overnight bank funding rate, less a spread, and subject to decrease by amounts related to expected dividends on shares of our common stock during the term of the forward sale agreement.

However, if we decide to physically settle or net share settle the forward sale agreement, delivery of shares of our common stock to the forward purchaser on any such physical settlement or net share settlement of the forward sale agreement would result in dilution to our earnings per share.

The forward purchaser will have the right to accelerate the forward sale agreement (or, in certain cases, the portion thereof that it determines is affected by the relevant event) and require us to physically settle the forward sale agreement on a date specified by the forward purchaser if:

- in the commercially reasonable judgment of the forward purchaser, it or its affiliate is unable to hedge its exposure to the transactions contemplated by the forward sale agreement because of the lack of sufficient shares of our common stock being made available for borrowing by stock lenders or it or its affiliate is unable to borrow such number of shares at a rate equal to or less than an agreed maximum stock loan rate;
- we declare any dividend, issue or distribution on shares of our common stock (i) payable in cash in excess of a specified amount or that otherwise constitutes an extraordinary dividend under the forward sale agreement, (ii) payable in securities of another company as a result of a spin-off or similar transaction, (iii) of any other type of securities (other than our common stock), rights, warrants or other assets for payment (cash or other consideration) at less than the prevailing market price, as reasonably determined by the forward purchaser or (iv) any other special dividend or distribution that is outside the normal course of our operations of normal dividend policies or practices;
- certain ownership thresholds applicable to the forward purchaser are exceeded;
- an event is announced that, if consummated, would result in an extraordinary event (as defined in the forward sale agreement) including, among other things, certain mergers and tender offers, as well as certain events such as a delisting of our common stock (each as more fully described in the forward sale agreement); or
- certain other events of default or termination events occur, including, among other things, any material misrepresentation made by us in connection with our entry into the forward sale agreement, our bankruptcy (except as described below) or certain changes in law (each as more fully described in the forward sale agreement).

The forward purchaser's decision to exercise its right to accelerate the forward sale agreement (or, in certain cases, the portion thereof that it determines is affected by the relevant event) and to require us to settle the forward sale agreement will be made irrespective of our interests, including our need for capital. In such cases, we could be required to issue and deliver shares of our common stock under the terms of the physical settlement provisions of the forward sale agreement irrespective of our capital needs, which would result in dilution to our earnings per share and may adversely affect the market price of our common stock. In addition, upon certain events of bankruptcy or insolvency related to us, the forward sale agreement will automatically terminate without further liability of either party to such agreement (other than in the event of a breach by us of certain representations or warranties contained in the forward sale agreement). Following any such termination, we would not issue any shares of common stock or receive any proceeds pursuant to the forward sale agreement.

The forward sale agreement will be physically settled, unless we elect to settle the forward sale agreement in cash or to net share settle the forward sale agreement (which we have the right to do, subject to certain conditions, other than in the limited circumstances described above). If we decide to physically settle or net share settle the forward sale agreement, delivery of shares of our common stock upon any physical settlement or net share settlement of the forward sale agreement will result in dilution to our earnings per share. If we elect cash or net share settlement for all or a portion of the shares of our common stock underlying the forward sale agreement, we would expect the forward purchaser or one of its affiliates to repurchase a number of shares of our common stock equal to the portion for which we elect cash or net share settlement in order to satisfy its obligation to return the shares of our common stock the forward purchaser or its affiliate had borrowed in connection with sales of our common stock under this prospectus supplement and, if applicable in connection with net share settlement, to deliver shares of our common stock to us. If the market value of our common stock at the time of such purchase is above the forward sale price at that time, we will pay or deliver, as the case may be, to the forward purchaser under the forward sale agreement, an amount in cash, or a number of shares of our common stock with a market value, equal to such difference. Any such difference could be significant.

Conversely, if the market value of our common stock at the time of such purchase is below the forward sale price at that time, the forward purchaser will pay or deliver, as the case may be, to us under the forward sale agreement, an amount in cash, or a number of shares of our common stock with a market value, equal to such difference.

In addition, the purchase of shares of our common stock by the forward purchaser or its affiliate to unwind the forward purchaser's hedge position could cause the market price of our common stock to increase over time, thereby increasing the amount of cash we would owe to the forward purchaser upon a cash settlement or increasing the number of shares of our common stock we would owe to the forward purchaser upon a net share settlement, as the case may be, of the forward sale agreement, or decreasing the amount of cash that the forward purchaser would owe us upon a cash settlement or decreasing the number of shares of our common stock that the forward purchaser would owe us upon a net share settlement, as the case may be, of the forward sale agreement. We will not be able to control the manner in which the forward purchaser unwinds its hedge positions.

The foregoing is a description of certain provisions, and their anticipated effects, of the forward sale agreement we have entered into in connection with this offering, a copy of which is available upon request from us at the address set forth in the section of the accompanying prospectus entitled "Where You Can Find More Information." This description of certain terms of the forward sale agreement is not complete and is subject to, and qualified in its entirety by reference to, the provisions of such agreement.

Our common stock is listed on the NYSE under the symbol "WTRG."

We and all of our continuing directors (as described in our Definitive Proxy Statement on Schedule 14A filed with the SEC on March 27, 2020) and officers, through entering into lock-up agreements, have agreed that, without the prior written consent of the underwriter, we and they will not, during the period ending 60 days after the date of this prospectus supplement (the "restricted period"): (i) offer, sell, contract to sell, pledge, grant any option to purchase, make any short sale or otherwise transfer or dispose of, directly or indirectly, our common stock, any options, rights or warrants to purchase our common stock or any securities convertible into or exchangeable for, or substantially similar to, our common stock (collectively, "restricted securities"); (ii) enter into any swap or other agreement that transfers to another, in whole or in part, any of the economic consequences of ownership of the common stock or any such other securities, whether any such transaction described in (i) or (ii) is to be settled by delivery of common stock or such other securities, in cash or otherwise or (iii) publicly disclose the intention to take any of the foregoing actions. In addition, we agreed not to file with the SEC any registration statement relating to any restricted securities, and our continuing directors and officers each agreed not to make any demand for, or exercise any right with respect to, the registration of any restricted securities, in each case during the restricted period and without the prior written consent of the underwriter.

The restrictions described in the immediately preceding paragraph do not apply to:

- the sale of the shares to the underwriter in this offering (including upon settlement of the forward sale agreement);
- the issuance by us of, or the receipt by our continuing directors and officers of, restricted securities pursuant to our existing employee equity or equity-based incentive plans, employee stock purchase plans or dividend reinvestment plans, or upon the conversion or exchange of convertible or exchangeable securities outstanding as of the date of this prospectus supplement;
- the filing by us of registration statements relating to securities issuable under our existing employee equity or equity-based plans or employee stock purchase plans;
- the issuance of shares of common stock in connection with certain investments, acquisitions, with joint ventures, commercial relationships or other strategic transactions, provided that the aggregate number of shares issued or issuable pursuant to this clause does not exceed 10% of the number of shares of common stock outstanding immediately after this offering and prior to such issuance;

- in the case of our continuing directors and officers, (i) the establishment of a trading plan pursuant to Rule 10b5-1 under the Exchange Act for the transfer of our common stock following expiration of the restricted period, (ii) transfers in accordance with the terms of existing trading plans pursuant to Rule 10b5-1 under the Exchange Act, (iii) certain transfers of shares held as of the date of this prospectus supplement through our existing 401(k) plan pursuant to portfolio balancing opportunities provided by the terms of such plan, (iv) transfers to us to satisfy certain tax obligations in connection with vesting of restricted stock units, restricted shares, performance share units or phantom shares and (v) certain other transfers to us;
- in the case of our continuing directors and officers, transfers to us upon death, disability or termination or employment, in each case, of such person;
- the receipt by us or our subsidiaries of shares (a) in the exercise of outstanding options, warrants, restricted stock units or other equity interests, including transfers deemed to occur upon the "net" or "cashless" exercise of options or (b) for the sole purpose of paying the exercise price of such options, warrants, restricted stock units or other equity interests or for paying taxes (including estimated taxes) due as a result of the exercise of such options, warrants, restricted stock units or other equity interests or as a result of the vesting of shares under restricted stock awards or restricted stock units pursuant to our existing employee benefit plans disclosed herein relating to this public offering, in each case on a "cashless" or "net exercise" basis, provided that any such shares received upon such exercise shall be subject to the terms of the lock-up agreement;
- tenders, sales or other transfers pursuant to a bona fide third-party tender offer, merger, consolidation or other similar transaction made to all holders of restricted securities involving a "change of control" of us (provided that if such transaction is not consummated, our continuing directors' and officers' shares shall remain subject to the restrictions set forth in the lock-up agreements);
- the exercise for cash of options to purchase shares disclosed as outstanding herein, provided that any such shares received upon such exercise shall be subject to the terms of the lock-up agreements;
- in the case of our continuing directors and officers, the disposition of shares acquired in this offering or in open market transactions after completion of this offering; and
- transfers of shares or other of our securities pursuant to an order of a court or regulatory agency or to comply with any regulations related to ownership by our continuing directors and officers of their shares.

The underwriter, in its sole discretion, may release the common stock and other securities subject to the lock-up agreements described above in whole or in part at any time.

In order to facilitate the offering of the shares, the underwriter may engage in transactions that stabilize, maintain or otherwise affect the price of the shares. Specifically, the underwriter may sell more shares than it is obligated to purchase under the underwriting agreement, creating a naked short position. The underwriter must close out any naked short position by purchasing shares of our common stock in the open market. A naked short position is more likely to be created if the underwriter is concerned that there may be downward pressure on the price of the shares in the open market after pricing that could adversely affect investors who purchase in this offering. As an additional means of facilitating this offering, the underwriter may bid for, and purchase, shares of our common stock in the open market to stabilize the price of the shares. These activities may raise or maintain the market price of the shares above independent market levels or prevent or retard a decline in the market price of the shares. The underwriter is not required to engage in these activities and may end any of these activities at any time.

Conflicts of Interest

The underwriter and its affiliates are full-service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, financing and brokerage activities. The underwriter and its affiliates have, from time to time, performed, and may in the future perform, various financial advisory and investment banking services for us, for which they received or will receive customary fees and expenses. For example, RBC Capital Markets, LLC acted as a financial adviser in connection with the Peoples Acquisition, for which they received customary fees and expenses. The underwriter and/or its affiliates are also lenders and/or agents under certain of our credit facilities, including the Revolving Credit Facility, and receive customary fees and expenses in connection therewith.

In addition, in the ordinary course of its various business activities, the underwriter and its affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities may involve our securities and instruments. The underwriter and/or its affiliates have lending relationships with us and may hedge their credit exposure to us consistent with their customary risk management policies. Typically, the underwriter and its affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in our securities or the securities of our affiliates. Any such credit default swaps or short positions could adversely affect future trading prices of the shares offered hereby. The underwriter and its affiliates may also make investment recommendations or publish or express independent research views in respect of such securities or instruments and may at any time hold, or recommend to clients that they acquire, long or short positions in such securities and instruments.

All of the proceeds of this offering (excluding proceeds to us with respect to any shares of common stock that we may issue and sell directly to the underwriter in lieu of the forward seller selling our common stock to the underwriter) will be paid to the forward purchaser (or its affiliate). Because RBC Capital Markets, or its affiliate, will receive more than 5% of the net proceeds of this offering, not including underwriting compensation, RBC Capital Markets is deemed to have a conflict of interest within the meaning of FINRA Rule 5121. Accordingly, this offering will be conducted in compliance with the applicable requirements of FINRA Rule 5121. Pursuant to that rule, the appointment of a “qualified independent underwriter” is not required in connection with this offering, as the shares of our common stock have a “bona fide public market” (as such terms are defined in FINRA Rule 5121). In accordance with FINRA Rule 5121, RBC Capital Markets may not confirm any sales to any account over which it exercises discretionary authority without the prior written approval of the transaction from the account holder.

Selling Restrictions

Canada

The shares may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the shares must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus supplement (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s province or territory. The purchaser should

refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non-Canadian jurisdiction, section 3A.4) of National Instrument 33-105 Underwriting Conflicts (NI 33-105), the underwriter is not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

Prohibition of Sales to European Economic Area and United Kingdom Retail Investors

The shares are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (the "EEA") or in the United Kingdom. For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, "MiFID II"); or (ii) a customer within the meaning of Directive (EU) 2016/97 (as amended or superseded, the "Insurance Distribution Directive"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (as amended or superseded, the "Prospectus Regulation"). Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the "PRIIPs Regulation") for offering or selling the shares or otherwise making them available to retail investors in the EEA or in the United Kingdom has been prepared and therefore offering or selling the shares or otherwise making them available to any retail investor in the EEA or in the United Kingdom may be unlawful under the PRIIPs Regulation. This prospectus supplement and the accompanying prospectus have been prepared on the basis that any offer of the shares in any Member State of the EEA or in the United Kingdom will be made pursuant to an exemption under the Prospectus Regulation from the requirement to publish a prospectus for offers of the shares. This prospectus supplement and the accompanying prospectus are not a prospectus for the purposes of the Prospectus Regulation.

United Kingdom

In addition, this document is being distributed only to, and is directed only at, and any offer subsequently made may only be directed at: (i) in the United Kingdom, persons having professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, as amended (the "Order"), and/or persons falling within Article 49(2)(a) to (d) of the Order; (ii) persons who are outside the United Kingdom; and (iii) any other persons to whom it may otherwise lawfully be distributed (all such persons together being referred to as "relevant persons"). This document must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to, and will be engaged in only with, relevant persons.

Australia

No placement document, prospectus, product disclosure statement or other disclosure document has been lodged with the Australian Securities and Investments Commission ("ASIC") in relation to the offering. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or this offering do not constitute a prospectus, product disclosure statement or other disclosure document under the prospectus, product disclosure statement or other disclosure document under the Corporations Act 2001 (Cth) (the "Corporations Act"), and do not purport to include the information required for a prospectus, product disclosure statement or other disclosure document under the Corporations Act.

Any offer in Australia of the shares may only be made to persons (the "Exempt Investors") who are "sophisticated investors" (within the meaning of section 708(8) of the Corporations Act), "professional investors" (within the meaning of section 708(11) of the Corporations Act) or otherwise pursuant to one or more exemptions contained in section 708 of the Corporations Act so that it is lawful to offer the shares without disclosure to investors under Chapter 6D of the Corporations Act.

The shares applied for by Exempt Investors in Australia must not be offered for sale in Australia for a period of 12 months after the date of allotment under the offering, except in circumstances where disclosure to investors under Chapter 6D of the Corporations Act would not be required pursuant to an exemption under section 708 of the Corporations Act or otherwise or where the offer is pursuant to a disclosure document which complies with Chapter 6D of the Corporations Act. Any person acquiring shares must observe such Australian on-sale restrictions.

This prospectus supplement and the accompanying prospectus contain general information only and do not take account of the investment objectives, financial situation or particular needs of any particular person. They do not contain any securities recommendations or financial product advice. Before making an investment decision, investors need to consider whether the information in this prospectus supplement and the accompanying prospectus is appropriate to their needs, objectives and circumstances, and, if necessary, seek expert advice on those matters.

Hong Kong

The shares may not be offered or sold in Hong Kong by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32, Laws of Hong Kong), or (ii) to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder, or (iii) in other circumstances which do not result in the document being a "prospectus" within the meaning of the Companies Ordinance (Cap. 32, Laws of Hong Kong) and no advertisement, invitation or document relating to the shares may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the laws of Hong Kong) other than with respect to shares which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder.

Japan

The shares have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended) (the "FIEA"). The shares may not be offered or sold, directly or indirectly, in Japan or to or for the benefit of any resident of Japan (including any person resident in Japan or any corporation or other entity organized under the laws of Japan) or to others for reoffering or resale, directly or indirectly, in Japan or to or for the benefit of any resident of Japan, except pursuant to an exemption from the registration requirements of the FIEA and otherwise in compliance with any relevant laws, regulations and ministerial guidelines of Japan.

Korea

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering should be construed in any way as our (or any of our affiliates or agents) soliciting investment or offering to sell the shares in the Republic of Korea ("Korea"). We are not making any representation with respect to the eligibility of any recipients of this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering to acquire the shares under the laws of Korea, including, without limitation, the Financial Investment Services and Capital Markets Act (the "FSCMA"), the Foreign Exchange Transaction Act (the "FETA"), and any regulations thereunder. The shares have not been registered with the Financial Services Commission of Korea (the "FSC") in any way pursuant to the FSCMA, and the shares may not be offered, sold or delivered, or offered or sold to any person for reoffering or resale, directly or indirectly, in Korea or to any resident of Korea except pursuant to applicable laws and regulations of Korea. Furthermore, the shares may not be resold to any Korean resident

unless such Korean resident as the purchaser of the resold shares complies with all applicable regulatory requirements (including, without limitation, reporting or approval requirements under the FETA and regulations thereunder) relating to the purchase of the resold shares.

Singapore

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering has been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering may be circulated or distributed, nor may the shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore, other than (a) to an institutional investor under Section 274 of the Securities and Futures Act, Chapter 289 of Singapore (the "SFA"), (b) to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions specified in Section 275 of the SFA or (c) pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the shares are subscribed or purchased under Section 275 by a relevant person which is: (i) a corporation (which is not an accredited investor) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (ii) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an accredited investor, shares, debentures and units of shares and debentures of that corporation or the beneficiaries' rights and interest in that trust shall not be transferable for six months after that corporation or that trust has acquired the shares under Section 275 except: (1) to an institutional investor under Section 274 of the SFA or to a relevant person, or any person pursuant to Section 275(1A) or Section 276(4)(i)(B), and in accordance with the conditions, specified in Section 275 of the SFA; (2) where no consideration is given for the transfer; (3) by operation of law, (4) as specified in Section 276(7) of the SFA or (5) as specified in Regulation 37A of the Securities and Futures (Offers of Investments) (Securities and Securities-based Derivatives Contracts) Regulations 2018 of Singapore.

Solely for the purposes of its obligations pursuant to sections 309B(1)(a) and 309B(1)(c) of the SFA, we have determined, and hereby notify all relevant persons (as defined in Section 309A of the SFA) that the shares are "prescribed capital markets products" (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Switzerland

The shares may not be publicly offered in Switzerland and will not be listed on the SIX Swiss Exchange ("*SIX*") or on any other exchange or regulated trading facility in Switzerland. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or this offering do not constitute a prospectus within the meaning of and have been prepared without regard to the disclosure standards for issuance prospectuses under art. 652a or art. 1156 of the Swiss Code of Obligations or the disclosure standards for listing prospectuses under art. 27 ff. of the SIX Listing Rules or the listing rules of any other exchange or regulated trading facility in Switzerland.

Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the shares or the offering may be publicly distributed or otherwise made publicly available in Switzerland. Neither this prospectus supplement, the accompanying prospectus nor any other offering or marketing material relating to the offering, the Company or the shares has been or will be filed with or approved by any Swiss regulatory authority. In particular, this prospectus supplement and the accompanying prospectus will not be filed with, and the offer of shares will not be supervised by, the Swiss Financial Market Supervisory Authority, and the offer of shares has not been and will not be authorized under the Swiss Federal Act on

Collective Investment Schemes (the "*CISA*"). The investor protection afforded to acquirers of interests in collective investment schemes under the CISA does not extend to acquirers of the shares.

Taiwan

The shares have not been and will not be registered or filed with, or approved by, the Financial Supervisory Commission of Taiwan and/or any other regulatory authority of Taiwan pursuant to relevant securities laws and regulations and may not be sold, issued or offered within Taiwan through a public offering or in circumstances which could constitute an offer within the meaning of the Securities and Exchange Act of Taiwan or relevant laws and regulations that require a registration, filing or approval of the Financial Supervisory Commission of Taiwan and/or other regulatory authority of Taiwan. No person or entity in Taiwan has been authorized to offer or sell the shares in Taiwan.

United Arab Emirates

The shares have not been, and are not being, publicly offered, sold, promoted or advertised in the United Arab Emirates (including the Abu Dhabi Global Market and the Dubai International Financial Centre) other than in compliance with the laws, regulations and rules of the United Arab Emirates, the Abu Dhabi Global Market and the Dubai International Financial Centre governing the issue, offering and sale of securities. Further, this prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or the offering do not constitute a public offer of securities in the United Arab Emirates (including the Abu Dhabi Global Market and the Dubai International Financial Centre) and are not intended to be a public offer. This prospectus supplement, the accompanying prospectus and any other offering or marketing material relating to the shares or the offering have not been approved by or filed with the Central Bank of the United Arab Emirates, the Securities and Commodities Authority, the Financial Services Regulatory Authority or the Dubai Financial Services Authority.

LEGAL MATTERS

Certain legal matters will be passed upon for us by Simpson Thacher & Bartlett LLP, New York, New York. Ballard Spahr LLP, Philadelphia, Pennsylvania will issue an opinion regarding certain matters of Pennsylvania law, including the validity of the securities offered by the prospectus supplement. Certain legal matters will be passed upon for the underwriter by Cravath, Swaine & Moore LLP, New York, New York.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this prospectus supplement by reference to the Annual Report on Form 10-K for the year ended December 31, 2019 have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

The consolidated financial statements of LDC Funding LLC as of December 31, 2019 and 2018 and for each of the three years in the period ended December 31, 2019, incorporated by reference in this prospectus supplement and in the accompanying prospectus from Essential Utilities' Current Report on Form 8-K/A filed on April 13, 2020, have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated by reference herein, and are incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND ADDITIONAL INFORMATION; INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE

We file annual, quarterly and current reports, proxy statements and other information with the SEC. The SEC maintains a website at *www.sec.gov* that contains periodic and current reports, proxy and information statements, and other information regarding registrants that are filed electronically with the SEC.

These documents are also available, free of charge, through the Investors section of our website, which is located at *www.essential.co*. Information contained on our website is not incorporated by reference into this prospectus supplement or the accompanying prospectus and you should not consider information on our website to be part of this prospectus supplement or the accompanying prospectus.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act of 1933 relating to the securities that may be offered by this prospectus supplement. This prospectus supplement is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus supplement as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus supplement is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus supplement, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" into this prospectus supplement and the accompanying prospectus the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus supplement. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future

filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 until we sell all of the securities covered by this prospectus supplement or this offering is terminated; provided, however, that we are not incorporating, in each case, any portions of documents or information furnished or deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2019 filed with the SEC on February 28, 2020;
- Our Quarterly Reports on Form 10-Q for the quarter ended March 31, 2020 filed with the SEC on May 8, 2020 and the quarter ended June 30, 2020 filed with the SEC on August 6, 2020;
- The portions of our Definitive Proxy Statement on Schedule 14A filed with the SEC on March 27, 2020, that are incorporated by reference into our Annual Report on Form 10-K for the fiscal year ended December 31, 2019;
- Our Current Reports on Form 8-K filed with the SEC on January 16, 2020, February 3, 2020, February 27, 2020 (solely Item 8.01 and related exhibits), March 16, 2020, April 3, 2020, April 13, 2020, April 15, 2020, May 11, 2020 and May 18, 2020 and our Current Reports on Form 8-K/A filed with the SEC on March 18, 2020, April 13, 2020 and August 10, 2020, each of which amended our Current Report on Form 8-K filed with the SEC on March 16, 2020; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus supplement. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Essential Utilities, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000
Attention: Corporate Secretary

We have not, and the underwriter and the forward seller have not, authorized anyone to provide you with any information other than that contained or incorporated by reference in this prospectus supplement, the accompanying prospectus or in any free writing prospectus we may provide to you in connection with this offering. Neither we nor the underwriter or the forward seller take any responsibility for, or provide any assurances as to the reliability of, any additional or different information that others may give you. You should assume that the information contained in this prospectus supplement, the accompanying prospectus and any free writing prospectus we may provide to you in connection with this offering is accurate only as of their respective dates or as of the respective dates specified in such information, as applicable, and the information contained in documents incorporated by reference is accurate only as of the respective dates of those documents or as of the respective dates specified in such information, as applicable, in each case regardless of the time of delivery of this prospectus supplement or the accompanying prospectus or any such free writing prospectus or any sale of the shares of our common stock. Our business, financial condition, results of operations and prospects may have changed since those dates.

Any statement contained herein or in a document incorporated or deemed to be incorporated by reference herein shall be deemed to be modified or superseded for purposes of this prospectus supplement to the extent that a statement contained herein, in any other subsequently filed document which also is or is deemed to be incorporated by reference herein or in the accompanying prospectus, modifies or supersedes such statement. Any such statement so modified or superseded shall not be deemed, except as so modified and superseded, to constitute a part of this prospectus supplement.

Common Stock Purchase Contracts
Warrants
Units
Depositary Shares
Debt Securities

Aqua America, Inc. may, from time to time, in one or more offerings, offer and sell common stock, preferred stock, common stock purchase contracts, warrants, units, depositary shares and debt securities. The debt securities and preferred stock may be convertible into or exchangeable or exercisable for other securities. We will provide specific terms of any offering and the offered securities in supplements to this prospectus. The prospectus supplements may also add, update or change information contained in this prospectus.

We may offer and sell these securities to or through underwriters, dealers or agents, directly to purchasers or through a combination of these methods. If an offering of securities involves any underwriters, dealers or agents, then the names of the underwriters, dealers or agents and the terms of the arrangements with such entities will be stated in an accompanying prospectus supplement.

Our common stock is listed on the New York Stock Exchange under the symbol "WTR." We have not yet determined whether any of the other securities that may be offered by this prospectus will be listed on any exchange, inter-dealer quotation system or over-the-counter market. If we decide to seek listing of any such securities upon issuance, an accompanying prospectus supplement will disclose the exchange, quotation system or market on which the securities will be listed.

The prospectus may not be used to sell our securities unless it is accompanied by a prospectus supplement.

Investing in our securities involves risk. Before you invest, you should carefully read and evaluate the risk factors and other information included in this prospectus and any applicable prospectus supplement, including the documents incorporated by reference. See "Risk Factors" beginning on page 6 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is February 28, 2018.

ABOUT THIS PROSPECTUS

This document is called a prospectus and is part of a registration statement that we filed with the Securities and Exchange Commission (SEC) using a "shelf" registration process. Under this shelf process, we may, from time to time, in one or more offering, offer and sell common stock, preferred stock, common stock purchase contracts, warrants, units, depositary shares and debt securities. This prospectus provides you with a general description of the securities we may offer. Each time we sell any securities under this prospectus, we will provide a prospectus supplement that will contain specific information about the terms of that offering and the offered securities. That prospectus supplement may include a discussion of any risk factors or other special considerations applicable to those securities. The prospectus supplement also may add, update or change information contained in this prospectus. You should read both this prospectus and the applicable prospectus supplement and the exhibits filed with our registration statement together with the additional information described below under the heading "Where You Can Find More Information" before you decide whether to invest in the securities.

The registration statement (including the exhibits) of which this prospectus is a part contains additional information about us and the securities we may offer by this prospectus. Specifically, we have filed certain legal documents that control the terms of the securities offered by this prospectus as exhibits to the registration statement. We will file certain other legal documents that will control the terms of the securities we may offer by this prospectus as exhibits to the registration statement or to reports we file with the SEC. The registration statement and the reports can be read at the SEC website or at the SEC offices mentioned under the heading "Where You Can Find More Information."

You should rely only upon the information contained in, or incorporated by reference into, this prospectus and the applicable prospectus supplement that contains specific information about the securities we are offering. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this document is accurate only as of the date on the front cover of this document. Our business, financial condition, results of operations and prospects may have changed since that date.

Except as otherwise provided in this prospectus, unless the context otherwise requires, references in this prospectus to "Aqua America," "we," "us" or "our" refer to Aqua America, Inc. and its direct and indirect subsidiaries. In addition, references to "Aqua Pennsylvania" refer to our wholly-owned subsidiary, Aqua Pennsylvania, Inc., and its subsidiaries.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus, or incorporated by reference into this prospectus, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control, that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by, or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue" or the negative of such terms or similar expressions. Forward-looking statements in this prospectus, or incorporated by reference into this prospectus, include, but are not limited to, statements regarding:

- recovery of capital expenditures and expenses in rates;

- projected capital expenditures and related funding requirements;
- our capability to pursue timely rate increase requests;
- the availability and cost of capital financing;
- developments, trends and consolidation in the water and wastewater utility and infrastructure industries;
- dividend payment projections;
- opportunities for future acquisitions, both within and outside the water and wastewater industry, the success of pending acquisitions and the impact of future acquisitions;
- the capacity of our water supplies, water facilities and wastewater facilities;
- the impact of federal and/or state tax laws or policies and the regulatory treatment of the effects of those laws or policies, including the Tax Cuts and Jobs Act;
- the impact of geographic diversity on our exposure to unusual weather;
- the impact of conservation awareness of customers and more efficient plumbing fixtures and appliances on water usage per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- the impact of legal proceedings;
- general economic conditions;
- acquisition-related costs and synergies;
- the sale of water and wastewater divisions; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service’s ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- changes in general economic, business, credit and financial market conditions;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the profitability of future acquisitions;

- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- the decisions of governmental and regulatory bodies, including decisions on rate increase requests;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water use restrictions;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- our ability to integrate businesses, technologies or services which we may acquire;
- our ability to manage the expansion of our business;
- our ability to treat and supply water or collect and treat wastewater;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services;
- civil disturbance or terroristic threats or acts;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in accounting pronouncements;
- litigation and claims; and
- changes in environmental conditions, including the effects of climate change.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus and the documents that we incorporate by reference into this prospectus completely and with the understanding that our actual future results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see “Risk Factors.” We qualify all of our forward-looking statements by these cautionary statements.

AQUA AMERICA, INC.

Aqua America, Inc. is the holding company for regulated utilities providing water or wastewater services to an estimated three million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, and Virginia. Our largest operating subsidiary is Aqua Pennsylvania, Inc., which accounted for approximately

52% of our operating revenues and approximately 74% of our net income for 2017. As of December 31, 2017, Aqua Pennsylvania provided water or wastewater services to approximately one-half of the total number of people we serve. Aqua Pennsylvania's service territory is located in the suburban areas in counties north and west of the City of Philadelphia and in 27 other counties in Pennsylvania. Our other regulated utility subsidiaries provide similar services in seven other states. In addition, the Company's market-based activities are conducted through Aqua Infrastructure, LLC and Aqua Resources Inc. Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Aqua Resources provides water and wastewater service through two operating and maintenance contracts with municipal authorities close to our utility companies' service territory; and offers, through a third party, water and wastewater line repair service and protection solutions to households. In 2017, we completed the sale of business units that are reported within Aqua Resources, which installed and tested devices that prevent the contamination of potable water and repaired water and wastewater systems, and repaired and performed maintenance on water and wastewater systems. Additionally, during 2016, we completed the sale of business units within Aqua Resources, which provided liquid waste hauling and disposal services and inspection, and cleaning and repair of storm and sanitary wastewater lines.

Aqua America, which prior to its name change in 2004 was known as Philadelphia Suburban Corporation, was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company. In the early 1990s, we embarked on a growth through acquisition strategy focused on water and wastewater operations. Our most significant transactions to date have been the merger with Consumers Water Company in 1999, the acquisition of the regulated water and wastewater operations of AquaSource, Inc. in 2003, the acquisition of Heater Utilities, Inc. in 2004, and the acquisition of American Water Works Company, Inc.'s regulated water and wastewater operations in Ohio in 2012. Since the early 1990s, our business strategy has been primarily directed toward the regulated water and wastewater utility industry, where we have more than quadrupled the number of regulated customers we serve, and have extended our regulated operations from southeastern Pennsylvania to include our current regulated utility operations throughout Pennsylvania and in seven other states. During 2010 through 2013, we sold our utility operations in six states, pursuant to a portfolio rationalization strategy to focus our operations in areas where we have critical mass and economic growth potential. Currently, the Company seeks to acquire businesses in the U.S. regulated sector, which includes water and wastewater utilities and other regulated utilities, and to pursue growth ventures in market-based activities, such as infrastructure opportunities that are supplementary and complementary to our regulated businesses.

Our growth in revenues over the past five years is primarily a result of increases in water and wastewater rates and customer growth. The increase in our utility customer base has been due to customers added through acquisitions, partnerships with developers, and organic growth (excluding dispositions) as shown below:

Year	Utility Customer Growth Rate
2017	1.1%
2016	1.6%
2015	1.9%
2014	1.3%
2013	1.3%

In 2017, our customer count increased by 10,584 customers, primarily due to utility systems that we acquired and organic growth. Overall, for the five-year period of 2013 through 2017, our utility customer base, adjusted to exclude customers associated with utility system dispositions, increased at an annual compound rate of 1.4%. During the five-year period ended December 31, 2017, our utility customer base including customers associated with utility system acquisitions and dispositions increased from 968,357 at January 1, 2013 to 982,849 at December 31, 2017. This five-year period includes the impact of the condemnation of our Fort Wayne, IN system in 2014, which resulted in the loss of approximately 13,000 connections.

Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010-3489, and our telephone number is 610-527-8000. Our website may be accessed at www.aquaamerica.com. The references to our website and the SEC's website are intended to be inactive textual references only, and the contents of those websites are not incorporated by reference herein and should not be considered part of this prospectus.

RISK FACTORS

Investing in our securities involves risks. Please see the risk factors described under the section captioned “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2017, as such risk factors may be updated from time to time in filings we make with the SEC subsequent to the date hereof. Before making an investment decision, you should carefully consider these risk factors, together with all other information contained in or incorporated by reference into this prospectus or any applicable prospectus supplement (which includes information contained in certain filings we make with the SEC subsequent to the date hereof as set forth in the section below captioned “Where You Can Find More Information”). Please also refer to the section above captioned “Forward-Looking Statements.”

USE OF PROCEEDS

Unless we otherwise specify in the applicable prospectus supplement, we intend to use the net proceeds from the sale of the securities we may offer by this prospectus to fund our capital expenditures, to provide capital for our growth strategy, which includes potential future acquisitions of municipally owned and investor-owned water and wastewater systems, regulated utilities and infrastructure projects, and market-based activities complementary to our regulated business, to fund the integration of any businesses that we acquire into our existing business, and to purchase and maintain plant equipment, as well as for working capital and other general corporate purposes. Our management will have broad discretion in the allocation of net proceeds from the sale of any securities sold by us.

CERTAIN RATIOS

Our ratio of earnings to fixed charges and ratio of earnings to combined fixed charges and preferred stock dividends for the periods indicated below were as follows:

	Year Ended December 31,				
	2017	2016	2015	2014	2013
Ratio of earnings to fixed charges	3.90	4.17	4.15	4.05	3.79
Ratio of earnings to combined fixed charges and preferred stock dividends	3.90	4.17	4.15	4.05	3.79

The ratios of earnings to fixed charges and the ratios of earnings to combined fixed charges and preferred stock dividends were computed by dividing our earnings by fixed charges and by combined fixed charges and preferred stock dividends, respectively. For the purpose of these computations, earnings include the sum of income from continuing operations before income taxes and non-controlling interest, and fixed charges, less capitalized interest. Fixed charges consist of interest on all indebtedness, whether expensed or capitalized, amortization of debt expense, and the estimated interest attributable to rental and lease expense calculated using an assumed interest factor of 33% of rental and lease expense.

DESCRIPTION OF CAPITAL STOCK

As of February 13, 2018 our authorized capital stock was 301,770,819 shares, consisting of:

- 300,000,000 shares of common stock, par value $0.50 per share, of which 177,750,505 shares were outstanding; and
- 1,770,819 shares of preferred stock, par value $1.00 per share, of which no shares were outstanding.

The following summary of certain terms of our common stock and preferred stock is qualified in its entirety by the provisions of our articles of incorporation and bylaws each of which is incorporated by reference as an exhibit to the registration statement of which this prospectus constitutes a part.

Common Stock

This section describes the general terms of our common stock. For more detailed information, you should refer to our articles of incorporation and bylaws, including any amendments thereto, copies of which have been filed with the SEC. These documents are incorporated by reference into this prospectus.

Voting Rights

Holders of our common stock are entitled to one vote for each share held by them at all meetings of the shareholders and are not entitled to cumulate their votes for the election of directors.

Dividend Rights and Limitations

Holders of our common stock may receive dividends when declared by our board of directors. Because we are a holding company, the funds we use to pay any dividends on our common stock are derived predominantly from the dividends that we receive from our subsidiaries and the dividends they receive from their subsidiaries. Therefore, our ability to pay dividends to holders of our common stock depends upon our subsidiaries' earnings, financial condition and ability to pay dividends. Most of our subsidiaries are subject to regulation by state utility commissions and the amounts of their earnings and dividends are affected by the manner in which they are regulated. In addition, they are subject to restrictions on the payment of dividends contained in their various debt agreements. Under our most restrictive debt agreements, the amount available for payment of dividends to us as of December 31, 2017 was approximately $1.4 billion of Aqua Pennsylvania's retained earnings and $143 million of the retained earnings of certain other subsidiaries. Payment of dividends on our common stock is also subject to the preferential rights of the holders of any outstanding preferred stock.

Liquidation Rights

In the event that we liquidate, dissolve or wind-up, the holders of our common stock are entitled to share ratably in all of the assets that remain after we pay our liabilities. This right is subject, however, to the prior distribution rights of any outstanding preferred stock.

Preferred Stock

Our board of directors has the authority, from time to time and without further action by our shareholders, to divide our unissued capital stock into one or more classes and one or more series within any class and to make determinations of the designation and number of shares of any class or series and determinations of the voting rights, preferences, limitations and special rights, if any, of the shares of any class or series. The rights, preferences, limitations and special rights of different classes of capital stock may differ with respect to dividend rates, amounts payable on liquidation, voting rights, conversion rights, redemption provisions, sinking fund provisions and other matters. The rights, preferences, privileges and restrictions of each series may be fixed by the designations of that series set forth in either a restated version of our articles of incorporation or a certificate of designations relating to that series, which will be filed with the SEC as an exhibit to or incorporated by reference in the registration statement of which this prospectus constitutes a part.

The issuance of preferred stock may be perceived by some as possibly having the effect of delaying, deferring or preventing a change of control of us without further action by our shareholders. The issuance of preferred stock with voting and conversion rights may also adversely affect the voting power of the holders of our common stock. In certain circumstances, an issuance of preferred stock could possibly have the effect of decreasing the market price of our common stock.

Whenever preferred stock is to be sold pursuant to this prospectus, we will file a prospectus supplement relating to that sale which will specify:

- the number of shares in the series of preferred stock;

- the designation for the series of preferred stock by number, letter or title that will distinguish the series from any other series of preferred stock;
- the dividend rate, if any, and whether dividends on that series of preferred stock will be cumulative, noncumulative or partially cumulative;
- the voting rights of that series of preferred stock, if any;
- any conversion provisions applicable to that series of preferred stock;
- any redemption or sinking fund provisions applicable to that series of preferred stock;
- any preemptive rights provisions applicable to that series of preferred stock;
- the liquidation preference per share of that series of preferred stock; and
- the terms of any other preferences or rights, if any, applicable to that series of preferred stock.

Anti-Takeover Provisions

Pennsylvania State Law Provisions

Under Section 1712 of the Pennsylvania Business Corporation Law of 1988, as amended (PBCL), which is applicable to us, directors stand in a fiduciary relation to their corporation and, as such, are required to perform their duties in good faith, in a manner they reasonably believe to be in the best interests of the corporation and with such care, including reasonable inquiry, skill and diligence, as a person of ordinary prudence would use under similar circumstances. Under Section 1715 of the PBCL, in discharging their duties, directors may, in considering the best interests of their corporation, consider various constituencies, including, shareholders, employees, suppliers, customers and creditors of the corporation, and upon communities in which offices or other establishments of the corporation are located. Directors are not required to give prominent consideration to the interests of any particular constituency. Absent a breach of fiduciary duty, a lack of good faith or self-dealing, any act of the board of directors, a committee thereof or an individual director is presumed to be in the best interests of the corporation. Actions by directors relating to an acquisition or potential acquisition of control of the corporation are not subject to any greater obligation to justify, or higher burden of proof, than is applied to any other acts of directors. The PBCL expressly provides that the fiduciary duty of directors does not require them to (i) redeem or otherwise render inapplicable outstanding rights issued under any shareholder rights plan; (ii) render inapplicable the anti-takeover statutes set forth in Chapter 25 of the PBCL (described below); or (iii) take any action solely because of the effect it may have on a proposed acquisition or the consideration to be received by shareholders in such a transaction. In addition, Section 2513 of the PBCL specifically validates shareholder rights plans, or “poison pills,” and the discriminatory dilution provisions contained in such plans.

Chapter 25 of the PBCL contains several anti-takeover statutes applicable to publicly-traded corporations. Corporations may opt-out of such anti-takeover statutes under certain circumstances. We have not opted-out of any of such statutes.

Section 2538 of Subchapter 25D of the PBCL requires certain transactions with an “interested shareholder” to be approved by a majority of disinterested shareholders. “Interested shareholder” is defined broadly to include any shareholder who is a party to the transaction or who is treated differently than other shareholders and affiliates of the interested shareholder.

Subchapter 25E of the PBCL requires a person or group of persons acting in concert which acquires 20% or more of the voting shares of the corporation to offer to purchase the shares of any other shareholder at “fair value.” “Fair value” means the value not less than the highest price paid per share by the controlling person or group during the 90-day period prior to the control transaction, plus a control premium. Among other exceptions, Subchapter 25E does not apply to shares acquired directly from the corporation in a transaction exempt from the registration requirements of the Securities Act of 1933, or to a one-step merger.

Subchapter 25F of the PBCL generally establishes a 5-year moratorium on a "business combination" with an "interested shareholder." "Interested shareholder" is defined generally to be any beneficial owner of 20% or more of the corporation's voting stock or an affiliate or associate of the corporation that at any time within the prior five-year period was a beneficial owner of 20% or more of the corporation's voting stock. "Business combination" is defined broadly to include mergers, consolidations, asset sales and certain self-dealing transactions. Certain restrictions apply to business combination following the 5-year period. Among other exceptions, Subchapter 25F will be rendered inapplicable if the board of directors approves the proposed business combination, or approves the interested shareholder's acquisition of 20% of the voting shares, in either case prior to the date on which the shareholder first becomes an interested shareholder.

Subchapter 25G of the PBCL provides that "control shares" lose voting rights unless such rights are restored by the affirmative vote of a majority of (i) the disinterested shares (generally, shares held by persons other than the acquiror, executive officers of the corporation and certain employee stock plans) and (ii) the outstanding voting shares of the corporation. "Control shares" are defined as shares which, upon acquisition, will result in a person or group acquiring for the first time voting control over (a) 20%, (b) 33 1/3% or (c) 50% or more of the outstanding shares, together with shares acquired within 180 days of attaining the applicable threshold and shares purchased with the intention of attaining such threshold. A corporation may redeem control shares if the acquiring person does not request restoration of voting rights as permitted by Subchapter 25G. Among other exceptions, Subchapter 25G does not apply to a merger, consolidation or a share exchange if the corporation is a party to the transaction agreement.

Subchapter 25H of the PBCL provides in certain circumstances for the recovery by the corporation of profits realized from the sale of its stock by a controlling person or group if the sale occurs within 18 months after the controlling person or group became a controlling person or group, and the stock was acquired during such 18-month period or within 24 months before such period. A controlling person or group is a person or group that has acquired, offered to acquire, or publicly disclosed an intention to acquire 20% or more of the voting shares of the corporation or a person or group that has otherwise publicly disclosed or caused to be disclosed that it may seek to acquire control of the corporation through any means. Among other exceptions, Subchapter 25H does not apply to transactions approved by both the board of directors and the shareholders prior to the acquisition or distribution, as appropriate.

Subchapter 25I of the PBCL mandates severance compensation for eligible employees who are terminated within 24 months after the approval of a control-share acquisition. Eligible employees generally are all employees employed in Pennsylvania for at least two years prior to the control-share approval. Severance equals the weekly compensation of the employee multiplied by the employee's years of service (up to 26 years), less payments made due to the termination.

Subchapter 25J of the PBCL requires the continuation of certain labor contracts relating to business operations owned at the time of a control-share approval.

Articles of Incorporation and Bylaw Provisions

Certain provisions of our articles of incorporation and bylaws may have the effect of discouraging unilateral tender offers or other attempts to take over and acquire our business. These provisions might discourage some potentially interested purchaser from attempting a unilateral takeover bid for us on terms which some shareholders might favor. Our articles of incorporation require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law. The fundamental transactions that are subject to this provision are those transactions that require approval by shareholders under applicable law or the articles of incorporation. These transactions include certain amendments of our articles of incorporation or bylaws, certain sales or other dispositions of our assets, certain issuances of our capital stock, or

certain transactions involving our merger, consolidation, division, reorganization, dissolution, liquidation or winding up. Our articles of incorporation and bylaws provide that:

- a special meeting of shareholders may only be called by the chairman, the president, the board of directors or shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting;
- nominations for election of directors may be made by any shareholder entitled to vote for election of directors if the name of the nominee and certain information relating to the nominee is filed with our corporate secretary not less than 14 days nor more than 50 days before any meeting of shareholders to elect directors; and
- certain advance notice procedures must be met for shareholder proposals to be made at annual meetings of shareholders. These advance notice procedures generally require a notice to be delivered not less than 90 days nor more than 120 days before the anniversary date of the immediately preceding annual meeting of shareholders.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is Computershare Trust Company, N.A.

DESCRIPTION OF COMMON STOCK PURCHASE CONTRACTS

We may issue stock purchase contracts, representing contracts entitling or obligating holders to purchase from us, and us to sell to the holders, a specified number of shares or amount of common stock at a future date or dates. The price per share of common stock may be fixed at the time each contract is issued or may be determined by reference to a specific formula set forth in the contract. Each common stock purchase contract may be issued separately or as a part of a unit, each consisting of a common stock purchase contract and, as security for the holder's obligation to purchase the common stock under the contract, the following:

- our senior debt securities or subordinated debt securities described under "Description of Debt Securities;"
- debt obligations of third parties, including U.S. Treasury securities;
- any other asset as security described in the applicable prospectus supplement; or
- any combination of the foregoing.

Each common stock purchase contract may require us to make periodic payments to the holder of the unit or vice versa, and such payments may be unsecured or prefunded on some basis discussed in the applicable prospectus supplement. Each common stock purchase contract may require holders to secure their obligations thereunder in a specified manner and, in certain circumstances, we may deliver a newly issued prepaid common stock purchase contract, which is referred to as a "prepaid security," upon release to a holder of any collateral securing such holder's obligations under the original contract.

The applicable prospectus supplement will describe the terms of any common stock purchase contract and, if applicable, prepaid security. The description in the prospectus supplement will not purport to be complete and will be qualified in its entirety by reference to the contracts, the collateral arrangements and depositary arrangements, if applicable, relating to such contracts and, if applicable, the prepaid securities and the documents pursuant to which such prepaid securities will be issued. The applicable prospectus supplement will also describe the material United States federal income tax considerations applicable to the common stock purchase contracts.

DESCRIPTION OF WARRANTS

General

The following summary of certain provisions of the warrants does not purport to be complete and is subject to, and qualified in its entirety by reference to, the provisions of the warrant agreement that will be filed with the SEC in connection with the offering of such warrants.

We may issue warrants for the purchase of debt securities, preferred stock or common stock. Warrants may be issued independently or together with debt securities, preferred stock or common stock offered by any prospectus supplement and may be attached to or separate from any such offered securities. Each series of warrants will be issued under a separate warrant agreement to be entered into between the Company and a bank or trust company, as warrant agent. The warrant agent will act solely as the Company's agent in connection with the warrants and will not assume any obligation or relationship of agency or trust for or with any holders or beneficial owners of warrants.

Debt Warrants

The prospectus supplement relating to a particular issue of debt warrants will describe the terms of such debt warrants, including the following: (a) the title of such debt warrants; (b) the offering price for such debt warrants, if any; (c) the aggregate number of such debt warrants; (d) the designation and terms of the debt securities purchasable upon exercise of such debt warrants; (e) if applicable, the designation and terms of the debt securities with which such debt warrants are issued and the number of such debt warrants issued with each such debt security; (f) if applicable, the date from and after which such debt warrants and any debt securities issued therewith will be separately transferable; (g) the principal amount of debt securities purchasable upon exercise of a debt warrant and the price at which such principal amount of debt securities may be purchased upon exercise (which price may be payable in cash, securities, or other property); (h) the date on which the right to exercise such debt warrants shall commence and the date on which such right shall expire; (i) if applicable, the minimum or maximum amount of such debt warrants that may be exercised at any one time; (j) whether the debt warrants represented by the debt warrant certificates or debt securities that may be issued upon exercise of the debt warrants will be issued in registered or bearer form; (k) information with respect to book-entry procedures, if any; (1) the currency or currency units in which the offering price, if any, and the exercise price are payable; (m) if applicable, a discussion of material United States federal income tax considerations; (n) the anti-dilution provisions of such debt warrants, if any; (o) the redemption or call provisions, if any, applicable to such debt warrants; (p) any provisions for changes to or adjustments in the exercise price for the debt warrants and (q) any additional terms of such debt warrants, including terms, procedures, and limitations relating to the exchange and exercise of such debt warrants.

Stock Warrants

The prospectus supplement relating to any particular issue of preferred stock warrants or common stock warrants will describe the terms of such warrants, including the following: (a) the title of such warrants; (b) the offering price for such warrants, if any; (c) the aggregate number of such warrants; (d) the designation and terms of the common stock or preferred stock purchasable upon exercise of such warrants; (e) if applicable, the designation and terms of the offered securities with which such warrants are issued and the number of such warrants issued with each such offered security; (f) if applicable, the date from and after which such warrants and any offered securities issued therewith will be separately transferable; (g) the number of shares of common stock or preferred stock purchasable upon exercise of a warrant and the price at which such shares may be purchased upon exercise; (h) the date on which the right to exercise such warrants shall commence and the date on which such right shall expire; (i) if applicable, the minimum or maximum amount of such warrants that may be exercised at any one time; (j) the currency or currency units in which the offering price, if any, and the exercise price are payable, (k) if applicable, a discussion of material United States federal income tax considerations; (l) the anti-dilution provisions of such warrants, if any; (m) the redemption or call provisions, if any, applicable

to such warrants; (m) any provisions for changes to or adjustments in the exercise price for the stock warrants and (n) any additional terms of such warrants, including terms, procedures and limitations relating to the exchange and exercise of such warrants.

DESCRIPTION OF UNITS

We may, from time to time, issue units comprised of one or more of the other securities that may be offered under this prospectus, in any combination. Each unit will be issued so that the holder of the unit is also the holder of each security included in the unit. Thus, the holder of a unit will have the rights and obligations of a holder of each included security. The unit agreement under which a unit is issued may provide that the securities included in the unit may not be held or transferred separately at any time, or at any time before a specified date.

The applicable prospectus supplement will describe the terms of any unit. The description in the prospectus supplement will not purport to be complete and will be qualified in its entirety by reference to units, the collateral arrangements and depositary arrangements, if applicable, relating to such units and, if applicable, the prepaid securities and the documents pursuant to which such prepaid securities will be issued. The applicable prospectus supplement will also describe the material United States federal income tax considerations applicable to the units.

DESCRIPTION OF DEPOSITORY SHARES

We may, at our option, offer fractional shares of our preferred stock, rather than whole shares of our preferred stock. In the event we do so, we will issue receipts for depositary shares, each of which will represent a fraction (to be set forth in the prospectus supplement relating to offering of the depositary shares) of a share of the related series of preferred stock.

The shares of our preferred stock represented by depositary shares will be deposited under a deposit agreement between us and a bank or trust company selected by us having its principal office in the United States and that meets certain other requirements. Subject to the terms of the deposit agreement, each owner of a depositary share will be entitled, in proportion to the applicable fraction of a share of preferred stock, represented by the depositary share to all of the rights and preferences of the preferred stock represented by the depositary shares (including dividend, voting, redemption, conversion and liquidation rights).

The above description of depositary shares is only a summary, is not complete and is subject to, and is qualified in its entirety by the description in the applicable prospectus supplement and the provisions of the deposit agreement, which will contain the form of depository receipt. A copy of the deposit agreement will be filed with the SEC as an exhibit to or incorporated by reference in the registration statement of which this prospectus is a part.

DESCRIPTION OF DEBT SECURITIES

Please note that in this section entitled “Description of Debt Securities,” references to “we,” “us,” “ours” or “our” refer only to Aqua America, Inc. and not to its consolidated subsidiaries. Also, in this section, references to “holders” mean those who own debt securities registered in their own names, on the books that we maintain or the trustee maintains for this purpose, and not those who own beneficial interests in debt securities registered in street name or in debt securities issued in book-entry form through one or more depositaries. Owners of beneficial interests in the debt securities should read the section below entitled “Book-Entry Procedures and Settlement.”

General

The debt securities offered by this prospectus will be our unsecured obligations, except as otherwise set forth in an accompanying prospectus supplement, and will be either senior or subordinated debt. We will issue senior debt under a senior debt indenture, and we will issue subordinated debt under a subordinated debt indenture. We sometimes refer to the senior debt indenture and the subordinated debt indenture, individually, as an indenture and, collectively, as the indentures. We have filed forms of the indentures with the SEC as exhibits to the registration statement of which this prospectus forms a part. You can obtain copies of the indentures by following the directions outlined in "Where You Can Find More Information," or by contacting the applicable indenture trustee.

A form of each debt security, reflecting the particular terms and provisions of a series of offered debt securities, will be filed with the SEC at the time of the offering and incorporated by reference as exhibits to the registration statement of which this prospectus forms a part.

The following briefly summarizes certain material provisions that may be included in the indentures. Other terms, including pricing and related terms, will be disclosed for a particular issuance in an accompanying prospectus supplement. You should read the more detailed provisions of the applicable indenture, including the defined terms, for provisions that may be important to you. You should also read the particular terms of a series of debt securities, which will be described in more detail in an accompanying prospectus supplement. So that you may easily locate the more detailed provisions, the numbers in parentheses below refer to sections in the applicable indenture or, if no indenture is specified, to sections in each of the indentures. Wherever particular sections or defined terms of the applicable indenture are referred to, such sections or defined terms are incorporated into this prospectus by reference, and the statement in this prospectus is qualified by that reference.

The trustee under each indenture will be determined at the time of issuance of debt securities, and the name of the trustee will be provided in an accompanying prospectus supplement.

The indentures provide that our senior or subordinated debt securities may be issued in one or more series, with different terms, in each case as we authorize from time to time. We also have the right to "reopen" a previous issue of a series of debt securities by issuing additional debt securities of such series without the consent of the holders of debt securities of the series being reopened or any other series. Any additional debt securities of the series being reopened will have the same ranking, interest rate, maturity and other terms as the previously issued debt securities of that series. These additional debt securities, together with the previously issued debt securities of that series, will constitute a single series of debt securities under the terms of the applicable indenture.

Types of Debt Securities

We may issue fixed or floating rate debt securities. Fixed rate debt securities will bear interest at a fixed rate described in the prospectus supplement. This type includes zero coupon debt securities, which bear no interest and are often issued at a price lower than the principal amount. United States federal income tax consequences and other special considerations applicable to any debt securities issued at a discount will be described in the applicable prospectus supplement.

Upon the request of the holder of any floating rate debt security, the calculation agent will provide the interest rate then in effect for that debt security, and, if determined, the interest rate that will become effective on the next interest reset date. The calculation agent's determination of any interest rate, and its calculation of the amount of interest for any interest period, will be final and binding in the absence of manifest error.

All percentages resulting from any interest rate calculation relating to a debt security will be rounded upward or downward, as appropriate, to the next higher or lower one hundred-thousandth of a percentage point.

All amounts used in or resulting from any calculation relating to a debt security will be rounded upward or downward, as appropriate, to the nearest cent, in the case of U.S. dollars, or to the nearest corresponding hundredth of a unit, in the case of a currency other than U.S. dollars, with one-half cent or one-half of a corresponding hundredth of a unit or more being rounded upward.

In determining the base rate that applies to a floating rate debt security during a particular interest period, the calculation agent may obtain rate quotes from various banks or dealers active in the relevant market, as described in the prospectus supplement. Those reference banks and dealers may include the calculation agent itself and its affiliates, as well as any underwriter, dealer or agent participating in the distribution of the relevant floating rate debt securities and its affiliates.

Information in the Prospectus Supplement

The prospectus supplement for any offered series of debt securities will describe the following terms, as applicable:

- the title;
- whether the debt is senior or subordinated;
- whether the debt securities are secured or unsecured and, if secured, the collateral securing the debt;
- the total principal amount offered;
- the percentage of the principal amount at which the debt securities will be sold and, if applicable, the method of determining the price;
- the maturity date or dates;
- whether the debt securities are fixed rate debt securities or floating rate debt securities;
- if the debt securities are fixed rate debt securities, the yearly rate at which the debt security will bear interest, if any, and the interest payment dates;
- if the debt security is an original issue discount debt security, the yield to maturity;
- if the debt securities are floating rate debt securities, the interest rate basis; any applicable index currency or maturity, spread or spread multiplier or initial, maximum or minimum rate; the interest reset, determination, calculation and payment dates, and the day count used to calculate interest payments for any period;
- the date or dates from which any interest will accrue, or how such date or dates will be determined, and the interest payment dates and any related record dates;
- if other than in U.S. dollars, the currency or currency unit in which payment will be made;
- the denominations in which the currency or currency unit of the securities will be issuable if other than denominations of $1,000 and integral multiples thereof;
- the terms and conditions on which the debt securities may be redeemed at our option;
- any obligation we may have to redeem, purchase or repay the debt securities at the option of a holder upon the happening of any event and the terms and conditions of redemption, purchase or repayment;
- the names and duties of the trustee and any co-trustees, depositaries, authenticating agents, calculation agents, paying agents, transfer agents or registrars for the debt securities;
- any material provisions of the applicable indenture described in this prospectus that do not apply to the debt securities;
- a discussion of United States federal income tax, accounting and special considerations, procedures and limitations with respect to the debt securities;

- whether and under what circumstances we will pay additional amounts to holders in respect of any tax assessment or government charge, and, if so, whether we will have the option to redeem the debt securities rather than pay such additional amounts; and
- any other specific terms of the debt securities that are consistent with the provisions of the indenture.

The terms on which a series of debt securities may be convertible into or exchangeable for other of our securities or any other entity will be set forth in the prospectus supplement relating to such series. Such terms will include provisions as to whether conversion or exchange is mandatory, at the option of the holder or at our option. The terms may include provisions pursuant to which the number of other securities to be received by the holders of such series of debt securities may be adjusted.

We will issue the debt securities only in registered form. As currently anticipated, debt securities of a series will trade in book-entry form, and global notes will be issued in physical (paper) form, as described below under “Book-Entry Procedures and Settlement.” Unless otherwise provided in the accompanying prospectus supplement, we will issue debt securities denominated in U.S. dollars and only in denominations of $1,000 and integral multiples thereof.

The prospectus supplement relating to offered debt securities denominated in a foreign or composite currency will specify the denomination of the offered debt securities.

The debt securities may be presented for exchange, and debt securities other than a global security may be presented for registration of transfer, at the principal corporate trust office of the trustee named in the applicable prospectus supplement. Holders will not have to pay any service charge for any registration of transfer or exchange of debt securities, but we may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection with such registration of transfer (Section 3.05).

Payment and Paying Agents

Distributions on the debt securities other than those represented by global notes will be made in the designated currency against surrender of the debt securities at the principal corporate trust office of the trustee named in the applicable prospectus supplement. Payment will be made to the registered holder at the close of business on the record date for such payment. Interest payments will be made at the principal corporate trust office of the trustee named in the applicable prospectus supplement, or by a check mailed to the holder at his registered address. Payments in any other manner will be specified in the applicable prospectus supplement.

Calculation Agents

Calculations relating to floating rate debt securities and indexed debt securities will be made by the calculation agent, an institution that we appoint as our agent for this purpose. We may appoint one of our affiliates as calculation agent. We may appoint a different institution to serve as calculation agent from time to time after the original issue date of the debt security without your consent and without notifying you of the change. The initial calculation agent will be identified in the applicable prospectus supplement.

Senior Debt

We may issue senior debt securities under the senior debt indenture. Senior debt will constitute our unsecured and unsubordinated obligations and will rank on a basis equal in priority with all our other unsecured and unsubordinated debt.

Subordinated Debt

We may issue subordinated debt securities under the subordinated debt indenture. Subordinated debt will constitute our unsecured and subordinated obligations and will be junior in right of payment to our senior debt

(including senior debt securities), which is defined as "senior indebtedness" in the subordinated debt indenture (Section 16.01).

If we default in the payment of any principal of, or premium, if any, or interest on any senior debt when it becomes due and payable after any applicable grace period, then, unless and until the default is cured or waived or ceases to exist, we cannot make a payment on account of or redeem or otherwise acquire the subordinated debt securities (Section 16.04).

If there is any insolvency, bankruptcy, liquidation or other similar proceeding relating to us or our property, then all senior debt must be paid in full before any payment may be made to any holders of subordinated debt securities (Section 16.02).

Furthermore, if we default in the payment of the principal of and accrued interest on any subordinated debt securities that is declared due and payable upon an event of default under the subordinated debt indenture, holders of all our senior debt will first be entitled to receive payment in full in cash before holders of such subordinated debt can receive any payments (Section 16.03).

Except as may be otherwise set forth in an accompanying prospectus supplement, senior debt means:

- the principal, premium, if any, and interest in respect of indebtedness for money borrowed and indebtedness evidenced by securities, notes, debentures, bonds or other similar instruments issued, including, as to us, the senior debt securities;
- all capitalized lease obligations;
- all obligations representing the deferred purchase price of property; and
- all deferrals, renewals, extensions and refundings of obligations of the type referred to above (Section 1.01 of Subordinated Indenture).

However, senior debt does not include:

- the subordinated debt securities (Section 16.01 of Subordinated Indenture);
- any indebtedness that by its terms is subordinated to, or ranks in priority on an equal basis with, subordinated debt securities (Section 1.01 of Subordinated Indenture); and
- items of indebtedness (other than capitalized lease obligations) that would not appear as liabilities on a balance sheet prepared in accordance with accounting principles generally accepted in the United States of America.

Covenants

The accompanying prospectus supplement will contain any covenants applicable to the debt securities.

Modification of the Indentures

The indentures will provide that we and the relevant trustee may enter into supplemental indentures to establish the form and terms of any new series of debt securities without obtaining the consent of any holder of debt securities (Section 9.01).

We and the trustee may, with the consent of the holders of at least a majority in aggregate outstanding principal amount of the debt securities of a series, modify the applicable indenture or the rights of the holders of the securities of such series (Section 9.02).

No such modification may, without the consent of each holder of an affected security:

- extend the fixed maturity of any such security;
- reduce the rate or change the time of payment of interest on such security;
- reduce the principal amount of such securities or the premium, if any, on such security;
- change any obligation of ours to pay additional amounts with respect to such security;
- reduce the amount of the principal payable on acceleration of such security if issued originally at a discount;
- adversely affect the right of repayment or repurchase of such security at the option of the holder;
- reduce or postpone any sinking fund or similar provision with respect to such security;
- change the currency or currency unit in which such security is payable or the right of selection thereof;
- impair the right to sue for the enforcement of any payment with respect to such security on or after the maturity of such security;
- reduce the percentage of the aggregate outstanding principal amount of debt securities of the series referred to above whose holders need to consent to the modification or a waiver without the consent of such holders; or
- change any obligation of ours with respect to such security to maintain an office or agency.

Defaults

Except as may be otherwise set forth in an accompanying prospectus supplement, each indenture will provide that events of default regarding any series of debt securities will be:

- our failure to pay for 30 days required interest on any debt security of such series;
- our failure to pay principal or premium, if any, on any debt security of such series when due;
- our failure to make any required scheduled installment payment for 30 days on debt securities of such series;
- our failure to perform for 90 days after notice any other covenant in the relevant indenture other than a covenant included in the relevant indenture solely for the benefit of a series of debt securities other than such series; and
- certain events of bankruptcy or insolvency, whether voluntary or not (Section 5.01).

Except as may be otherwise set forth in an accompanying prospectus supplement, if an event of default regarding debt securities of any series issued under the indentures should occur and be continuing, either the trustee or the holders of 25% in the principal amount of outstanding debt securities of such series may declare each debt security of that series due and payable (Section 5.02). We may be required to file annually with the trustee a statement of an officer as to the fulfillment by us of our obligations under the indenture during the preceding year.

No event of default regarding one series of debt securities issued under an indenture is necessarily an event of default regarding any other series of debt securities.

Holders of a majority in aggregate principal amount of the outstanding debt securities of any series will be entitled to control certain actions of the trustee under the indentures and to waive past defaults regarding such series (Sections 5.12 and 5.13). The holders of debt securities generally will not be able to require the trustee to take any action, unless one or more of such holders provides to the trustee reasonable security or indemnity (Section 6.02).

If an event of default occurs and is continuing regarding a series of debt securities, the trustee may use any sums that it holds under the relevant indenture for its own reasonable compensation and expenses incurred prior to paying the holders of debt securities of such series (Section 5.06).

Before any holder of any series of debt securities may institute action for any remedy, except payment on such holder's debt security when due, the holders of not less than 25% in principal amount of the debt securities of that series outstanding must request the trustee to take action. Holders must also offer and give the satisfactory security and indemnity against liabilities incurred by the trustee for taking such action (Section 5.07).

Defeasance

Except as may otherwise be set forth in an accompanying prospectus supplement, after we have deposited with the trustee, cash or government securities, in trust for the benefit of the holders sufficient to pay the principal of, premium, if any, and interest on the debt securities of such series when due, and satisfied certain other conditions, including receipt of an opinion of counsel that holders will not recognize taxable gain or loss for United States federal income tax purposes, then:

- we will be deemed to have paid and satisfied our obligations on all outstanding debt securities of such series, which is known as defeasance and discharge (Section 14.02); or
- we will cease to be under any obligation, other than to pay when due the principal of, premium, if any, and interest on such debt securities, relating to the debt securities of such series, which is known as covenant defeasance (Section 14.03).

When there is a defeasance and discharge, the applicable indenture will no longer govern the debt securities of such series, we will no longer be liable for payments required by the terms of the debt securities of such series and the holders of such debt securities will be entitled only to the deposited funds. When there is a covenant defeasance, however, we will continue to be obligated to make payments when due if the deposited funds are not sufficient.

Governing Law

Unless otherwise stated in the prospectus supplement, the debt securities and the indentures will be governed by Pennsylvania law (Section 1.12).

Concerning the Trustee Under the Indentures

We may have banking and other business relationships with the trustee named in the prospectus supplement, or any subsequent trustee, in the ordinary course of business.

Form, Exchange and Transfer

We will issue debt securities only in registered form; no debt securities will be issued in bearer form (Section 2.03). We will issue each debt security in book-entry form only, unless otherwise specified in the applicable prospectus supplement. We will issue any common stock issuable upon conversion of any debt security being offered in both certificated and book-entry form, unless otherwise specified in the applicable prospectus supplement. Debt securities in book-entry form will be represented by a global security registered in the name of a depositary, which will be the holder of all the debt securities represented by the global security (Section 2.04). Those who own beneficial interests in a global security will do so through participants in the depositary's system, and the rights of these indirect owners will be governed solely by the applicable procedures of the depositary and its participants. Only the depositary will be entitled to transfer or exchange a debt security in global form, since it will be the sole holder of the debt security (Section 3.05). These book-entry securities are described below under "Book-Entry Procedures and Settlement."

If any debt securities are issued in non-global form or cease to be book-entry securities (in the circumstances described in the next section), the following will apply to them:

- The debt securities will be issued in fully registered form in denominations stated in the prospectus supplement. You may exchange debt securities for debt securities of the same series in smaller denominations or combined into fewer debt securities of the same series of larger denominations, as long as the total amount is not changed (Section 3.05).
- You may exchange, transfer, present for payment or exercise debt securities at the office of the relevant trustee or agent indicated in the prospectus supplement (Section 3.05). You may also replace lost, stolen, destroyed or mutilated debt securities at that office. We may appoint another entity to perform these functions or may perform them (Section 3.06).
- You will not be required to pay a service charge to transfer or exchange the debt securities, but you may be required to pay any tax or other governmental charge associated with the transfer or exchange (Sections 3.05 and 3.06). The transfer or exchange, and any replacement, will be made only if our transfer agent is satisfied with your proof of legal ownership. The transfer agent may also require an indemnity before replacing any debt securities (Section 3.06).
- If we have the right to redeem, accelerate or settle any debt securities before their maturity or expiration, and we exercise that right as to less than all those debt securities, we may block the transfer or exchange of those debt securities during the period beginning 15 days before the day we mail the notice of exercise and ending on the day of that mailing, in order to freeze the list of holders to prepare the mailing. We may also refuse to register transfers of or exchange any debt security selected for early settlement, except that we will continue to permit transfers and exchanges of the unsettled portion of any debt security being partially settled (Section 3.05).
- If fewer than all of the debt securities represented by a certificate that are payable or exercisable in part are presented for payment or exercise, a new certificate will be issued for the remaining amount of securities (Section 15.02).

Book-Entry Procedures and Settlement

Most offered debt securities will be book-entry (global) securities. Upon issuance, all book-entry securities will be represented by one or more fully registered global securities, without coupons (Section 3.02). Each global security will be deposited with, or on behalf of, The Depository Trust Company, or DTC, a securities depository, and will be registered in the name of DTC or a nominee of DTC (Section 3.01). DTC will thus be the only registered holder of these debt securities.

Purchasers of debt securities may only hold interests in the global notes through DTC if they are participants in the DTC system. Purchasers may also hold interests through a securities intermediary—banks, brokerage houses and other institutions that maintain securities accounts for customers—that has an account with DTC or its nominee. DTC will maintain accounts showing the security holdings of its participants, and these participants will in turn maintain accounts showing the security holdings of their customers. Some of these customers may themselves be securities intermediaries holding securities for their customers. Thus, each beneficial owner of a book-entry security will hold that debt security indirectly through a hierarchy of intermediaries, with DTC at the top and the beneficial owner's own securities intermediary at the bottom.

The debt securities of each beneficial owner of a book-entry security will be evidenced solely by entries on the books of the beneficial owner's securities intermediary. The actual purchaser of the debt securities will generally not be entitled to have the debt securities represented by the global securities registered in its name and will not be considered the owner under the declaration. In most cases, a beneficial owner will also not be able to obtain a paper certificate evidencing the holder's ownership of debt securities. The book-entry system for holding securities eliminates the need for physical movement of certificates and is the system through which most

publicly traded common stock is held in the United States. However, the laws of some jurisdictions require some purchasers of securities to take physical delivery of their securities in definitive form. These laws may impair the ability to transfer book-entry securities.

A beneficial owner of book-entry securities represented by a global security may exchange the securities for definitive (paper) securities only if:

- DTC is unwilling or unable to continue as depositary for such global security and we do not appoint a qualified replacement for DTC within 90 days; or
- We in our sole discretion decide to allow some or all book-entry securities to be exchangeable for definitive securities in registered form (Section 3.05).

Unless we indicate otherwise, any global security that is exchangeable will be exchangeable in whole for definitive securities in registered form, with the same terms and of an equal aggregate principal amount. Definitive securities will be registered in the name or names of the person or persons specified by DTC in a written instruction to the registrar of the securities (Section 3.05). DTC may base its written instruction upon directions that it receives from its participants.

In this prospectus, for book-entry securities, references to actions taken by security holders will mean actions taken by DTC upon instructions from its participants, and references to payments and notices of redemption to security holders will mean payments and notices of redemption to DTC as the registered holder of the securities for distribution to participants in accordance with DTC's procedures.

DTC is a limited purpose trust company organized under the laws of the State of New York, a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code and a clearing agency registered under section 17A of the Securities Exchange Act of 1934. The rules applicable to DTC and its participants are on file with the SEC.

We will not have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial ownership interest in the book-entry securities or for maintaining, supervising or reviewing any records relating to the beneficial ownership interests.

PLAN OF DISTRIBUTION

We may sell any of the securities being offered by this prospectus separately or together:

- through agents;
- to or through underwriters who may act directly or through a syndicate represented by one or more managing underwriters;
- through dealers;
- through a block trade in which the broker or dealer engaged to handle the block trade will attempt to sell the securities as agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- through "at the market" offerings, within the meaning of Rule 415(a)(4) of the Securities Act of 1933, to or through a market maker or into an existing trading market on an exchange or otherwise;
- in exchange for our outstanding indebtedness;
- directly to purchasers, through a specific bidding, auction or other process; or
- through a combination of any of these methods of sale.

If the securities offered under this prospectus are issued in exchange for our outstanding securities, the applicable prospectus supplement will describe the terms of the exchange, and the identity and the terms of sale of the securities offered under this prospectus by the selling security holders.

The distribution of securities may be effected from time to time in one or more transactions at a fixed price or prices that may be changed, at market prices prevailing at the time of sale or prices related to prevailing market prices or at negotiated prices.

Agents designated by us from time to time may solicit offers to purchase the securities. We will name any agent involved in the offer or sale of the securities and set forth any commissions payable by us to an agent in the prospectus supplement for that transaction. Unless otherwise indicated in the prospectus supplement, any agent will be acting on a best efforts basis for the period of its appointment. Any agent may be deemed to be an "underwriter" of the securities as that term is defined in the Securities Act of 1933.

If we utilize an underwriter or underwriters in the sale of securities, we will execute an underwriting agreement with the underwriter or underwriters at the time we reach an agreement for sale. We will set forth in the prospectus supplement the names of the specific managing underwriter or underwriters, as well as any other underwriters, and the terms of the transactions, including compensation of the underwriters and dealers. This compensation may be in the form of discounts, concessions or commissions. Underwriters and others participating in any offering of securities may engage in transactions that stabilize, maintain or otherwise affect the price of securities. We will describe any of these activities in the prospectus supplement.

If a dealer is utilized in the sale of the securities, we or an underwriter will sell securities to the dealer, as principal. The dealer may then resell the securities to the public at varying prices to be determined by the dealer at the time of resale. The prospectus supplement will set forth the name of the dealer and the terms of the transactions.

We may directly solicit offers to purchase the securities, and we may sell directly to institutional investors or others. These persons may be deemed to be underwriters within the meaning of the Securities Act of 1933 with respect to any resale of the securities. The prospectus supplement will describe the terms of any direct sales, including the terms of any bidding or auction process, if utilized.

Agreements we enter into with agents, underwriters and dealers may entitle them to indemnification by us against specified liabilities, including liabilities under the Securities Act of 1933, or to contribution by us to payments they may be required to make in respect of these liabilities. The prospectus supplement will describe the terms and conditions of indemnification or contribution.

Certain of the agents, underwriters and dealers that we sell the securities offered under this prospectus to or through, and certain of their affiliates, engage in transactions with and perform services for us in the ordinary course of business. We may enter into hedging transactions in connection with any particular issue of the securities offered under this prospectus, including forwards, futures, options, interest rate or exchange rate swaps and repurchase or reverse repurchase transactions with, or arranged by, the applicable agent, underwriter or dealer, an affiliate of that agent, underwriter or dealer or an unrelated entity. We, the applicable agent, underwriter or dealer or other parties may receive compensation, trading gain or other benefits in connection with these transactions. We are not required to engage in any of these transactions. If we commence these transactions, we may discontinue them at any time. Counterparties to these hedging activities also may engage in market transactions involving the securities offered under this prospectus.

No securities may be sold under this prospectus without delivery (in paper format, in electronic format, in electronic format on the Internet, or by other means) of the applicable prospectus supplement describing the method and terms of the offering.

LEGAL MATTERS

Unless otherwise indicated in the applicable prospectus supplement, the validity of the securities that may be offered hereby will be passed upon for us by Ballard Spahr LLP, Philadelphia, Pennsylvania. If legal matters in connection with the offering made by this prospectus are passed on by counsel for the underwriters, dealers or agents, if any, that counsel will be named in the applicable prospectus supplement.

EXPERTS

The financial statements and management's assessment of the effectiveness of internal control over financial reporting (which is included in Management's Report on Internal Control over Financial Reporting) incorporated in this Prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2017, have been so incorporated in reliance on the report of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file at the SEC's Public Reference Room at 100 F Street N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the Public Reference Room. You may also obtain our SEC filings from the SEC's website at www.sec.gov or from our website at http://ir.aquaamerica.com/.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act of 1933 relating to the securities that may be offered by this prospectus. This prospectus is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 until we sell all of the securities covered by this prospectus; provided, however, that we are not incorporating, in each case, any documents or information deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2017 filed with the SEC on February 28, 2018; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Aqua America, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000
Attention: Corporate Secretary

You should rely only on the information contained in or incorporated by reference in this prospectus and any supplements to this prospectus. We have not authorized anyone to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. You should not assume that the information provided in this prospectus or incorporated by reference in this prospectus is accurate as of any date other than the date on the front of this prospectus or the date of those documents. Our business, financial condition, results of operations and prospects may have changed since those dates.

If you find inconsistencies between the documents, or between the documents and this prospectus or the applicable prospectus supplement, you should rely on the most recent document, prospectus or prospectus supplement.

Approximate date of commencement of proposed sale to the public: From time to time after this Registration Statement becomes effective.

If the only securities being registered on this Form are being offered pursuant to dividend or interest reinvestment plans, please check the following box. o

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, other than securities offered only in connection with dividend or interest reinvestment plans, check the following box. ☒

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. o

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. o

If this Form is a registration statement pursuant to General Instruction I.D. or a post-effective amendment thereto that shall become effective upon filing with the Commission pursuant to Rule 462(e) under the Securities Act, check the following box. ☒

If this Form is a post-effective amendment to a registration statement filed pursuant to General Instruction I.D. filed to register additional securities or additional classes of securities pursuant to Rule 413(b) under the Securities Act, check the following box. o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	x	Accelerated filer	o
Non-accelerated filer	o	Smaller reporting company	o
		Emerging growth company	o

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 7(a)(2)(B) of Securities Act. o

CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities To Be Registered(1)	**Amount To Be Registered**	**Proposed Maximum Offering Price**	**Proposed Maximum Aggregate**	**Amount of Registration Fee**

		Per Unit(2)	Offering Price(2)	
Common Stock, par value $.50 per share(3)	21,661,095	$47.59	$1,030,851,511.05	$112,465.90

(1) Pursuant to Rule 416 under the Securities Act, this Registration Statement also covers such additional number of our shares of common stock as may be issuable from time to time as a result of stock splits, stock dividends, capitalizations or similar events.

(2) Estimated solely for the purposes of calculating the registration fee. Pursuant to Rule 457(c) under the Securities Act, the registration fee has been calculated based upon the average of the high and low prices, as reported by the New York Stock Exchange, for our shares of common stock on June 18, 2021.

(3) All the shares of common stock being registered hereby are offered for the account of the selling shareholder who acquired such shares of common stock in a private transaction.

PROSPECTUS

ESSENTIAL UTILITIES, INC.

Common Stock

This prospectus relates to the proposed resale or other disposition of up to 21,661,095 shares of Essential Utilities, Inc. common stock, par value $.50 per share, by the selling shareholder named in this prospectus. We are not offering any securities under this prospectus and will not receive any proceeds from the sale of shares of common stock offered by the selling shareholder. The selling shareholder acquired the shares of common stock pursuant to a Stock Purchase Agreement dated March 29, 2019 (the "Purchase Agreement") entered into by and between Essential Utilities, Inc. (formerly known as Aqua America, Inc.) and Canada Pension Plan Investment Board, a federal Canadian Crown corporation ("CPP Investments"), and assigned by CPP Investments to CPP Investment Board PMI-2 Inc., a Canadian corporation ("PMI-2"). PMI-2 is a wholly-owned subsidiary of CPP Investments. We are registering the offer and sale of the shares of common stock to satisfy registration rights we have granted to the selling shareholder.

The selling shareholder may offer and sell or otherwise dispose of the shares of common stock described in this prospectus from time to time through public or private transactions at prevailing market prices, at prices related to prevailing market prices or at privately negotiated prices. The selling shareholder will bear all underwriting fees, commissions and discounts, if any, attributable to the sales of shares of common stock and any transfer taxes. We will bear all other costs, expenses and fees in connection with the registration of the shares of common stock. See "Plan of Distribution" for more information about how the selling shareholder may sell or dispose of their shares of common stock.

Our common stock is traded on the New York Stock Exchange under the symbol "WTRG". On June 18, 2021, the last reported sale price for our common stock on the New York Stock Exchange was $46.63 per share.

Investing in our securities involves risk. Before you invest, you should carefully read and evaluate the risk factors and other information included in this prospectus and any applicable prospectus supplement, including the documents incorporated by reference. See "Risk Factors" beginning on page 5 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is June 21, 2021.

ABOUT THIS PROSPECTUS

This document is called a prospectus and is part of a registration statement that we filed with the Securities and Exchange Commission (SEC) using a "shelf" registration process. Under this shelf process, the selling shareholder may, from time to time, offer and/or sell shares of common stock in one or more offerings or resales. This prospectus provides you with a general description of the shares of common stock that the selling shareholder may offer. This prospectus may be supplemented from time to time by one or more prospectus supplements, and we may also provide you with a free writing prospectus. A prospectus supplement and any free writing prospectus will contain more specific information about the offering and the shares of common stock being offered and the prices at which those shares of common stock are sold. A prospectus supplement may also add, update, change or clarify information contained in or incorporated by reference into this prospectus. If there is any inconsistency between the information in this prospectus and the information in the applicable prospectus supplement, you should rely on the information in the applicable prospectus supplement.

The rules of the SEC allow us to incorporate by reference information into this prospectus. This means that important information is contained in other documents that are considered to be a part of this prospectus. Additionally, information that we file later with the SEC will automatically update and supersede this information. You should carefully read both this prospectus and the applicable prospectus supplement together with the additional information that is incorporated or deemed incorporated by reference into this prospectus or the applicable prospectus supplement. See "Where You Can Find Additional Information" before making an investment in our common stock. This prospectus contains summaries of certain provisions contained in some of the documents described herein, but reference is made to the actual documents for complete information. All of the summaries are qualified in their entirety by the actual documents. Copies of the documents referred to herein have been filed or will be filed or incorporated by reference as exhibits to the registration statement of which this prospectus is a part. The registration statement, including the exhibits and documents incorporated or deemed incorporated by reference into this prospectus, can be read on the SEC website or at the SEC offices mentioned under the heading "Where You Can Find Additional Information."

We are responsible only for the information contained in or incorporated by reference in this prospectus or any applicable prospectus supplement. Neither we nor the selling shareholder has authorized anyone to give you different information and we and the selling shareholder take no responsibility for any information that is not contained or incorporated by reference in this prospectus or an applicable prospectus supplement. We and the selling shareholder are not making an offer to sell securities in any jurisdiction where the offer or sale of such securities is not permitted.

Except as otherwise provided in this prospectus, unless the context otherwise requires, references in this prospectus to "Essential Utilities," "we", "us", "our", or the "Company" refer to Essential Utilities, Inc. and its direct and indirect subsidiaries. References in this prospectus to "Registrant" refer to Essential Utilities, Inc. In addition, references to "Aqua Pennsylvania" refer to our wholly-owned subsidiary, Aqua Pennsylvania, Inc., and its subsidiaries. On March 16, 2020, we completed our acquisition of a natural gas distribution company consisting of Peoples Natural Gas Company LLC, Peoples Gas Company LLC, Peoples Gas West Virginia, Inc., Peoples Gas Kentucky, Inc., and Delta Natural Gas Company Inc., expanding the Company's regulated utility business to include natural gas distribution. This acquisition is referred to as the "Peoples Gas Acquisition," and collectively these businesses are referred to as "Peoples Gas." As used in this prospectus, the term "selling shareholder" includes the selling shareholder listed under the heading "Selling Shareholder", together with any additional selling shareholders listed in a prospectus supplement after the date of this prospectus.

FORWARD-LOOKING STATEMENTS

Certain statements in this prospectus, or incorporated by reference into this prospectus, are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act") that are made based upon, among other things, our current assumptions, expectations, plans, and beliefs concerning future events and their potential effect on us. These forward-looking statements involve risks, uncertainties and other factors, many of which are outside our control that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. In some cases you can identify forward-looking statements where statements are preceded by, followed by or include the words "believes," "expects," "anticipates," "plans," "future," "potential," "probably," "predictions," "intends," "will," "continue" "in the event" or the negative of such terms or similar expressions. Forward-looking statements in this prospectus, or incorporated by reference into this prospectus, include, but are not limited to, statements regarding:

- the impact of the novel coronavirus ("COVID-19") pandemic or the measures implemented by the Company as a result of the COVID-19 pandemic.
- expectations regarding the impact of the integration of the Peoples Gas Acquisition;
- opportunities for future acquisitions, both within and outside the water, wastewater, and natural gas industries, the success of pending acquisitions and the impact of future acquisitions;
- acquisition-related costs and synergies;
- the sale of water, wastewater, and/or gas subsidiaries;
- the impact of conservation awareness of customers and more efficient fixtures and appliances on water and natural gas usage per customer;
- our authority to carry on our business without unduly burdensome restrictions;
- our capability to pursue timely rate increase requests;
- the capacity of our water supplies, water facilities, wastewater facilities, and natural gas supplies and storage facilities;
- the impact of decisions of governmental and regulatory bodies, including decisions to raise or lower rates and decisions regarding potential acquisitions;
- developments, trends and consolidation in the water, wastewater, and natural gas utility and infrastructure industries;
- the impact of changes in and compliance with governmental laws, regulations and policies, including those dealing with the environment, health and water quality, taxation, and public utility regulation;
- the development of new services and technologies by us or our competitors;
- the availability of qualified personnel;
- the condition of our assets;
- recovery of capital expenditures and expenses in rates;
- projected capital expenditures and related funding requirements;

- the availability and cost of capital financing;
- dividend payment projections;
- the impact of geographic diversity on our exposure to unusual weather;
- the continuation of investments in strategic ventures;
- our ability to obtain fair market value for condemned assets;
- the impact of fines and penalties;
- the impact of legal proceedings;
- general economic conditions;
- the impact of federal and/or state tax policies and the regulatory treatment of the effects of those policies; and
- the amount of income tax deductions for qualifying utility asset improvements and the Internal Revenue Service's ultimate acceptance of the deduction methodology.

Because forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including but not limited to:

- impacts from the global outbreak of COVID-19, including on consumption, usage and collections
- the diversion of our management's time and resources caused by the integration efforts with respect to the Peoples Gas business and associated system implementations;
- the success in the closing of, and the profitability of future acquisitions;
- changes in general economic, business, credit and financial market conditions;
- our ability to manage the expansion of our business, including our ability to manage our expanded operations resulting from the Peoples Gas Acquisition;
- our ability to integrate and otherwise realize all of the anticipated benefits of businesses, technologies or services which we may acquire;
- changes in environmental conditions, including the effects of climate change;
- the decisions of governmental and regulatory bodies, including decisions on regulatory filings, including rate increase requests and decisions regarding potential acquisitions;
- our ability to file rate cases on a timely basis to minimize regulatory lag;
- abnormal weather conditions, including those that result in water availability, water use restrictions, gas availability or usage, or electricity interruptions;
- the seasonality of our business;
- our ability to treat and supply water or collect and treat wastewater;

- our ability to source sufficient natural gas to meet customer demand in a timely manner;
- the continuous and reliable operation of our information technology systems, including the impact of cyber security attacks or other cyber-related events;
- changes in governmental laws, regulations and policies, including those dealing with taxation, the environment, health and water quality, and public utility regulation;
- the extent to which we are able to develop and market new and improved services;
- the effect of the loss of major customers;
- our ability to retain the services of key personnel and to hire qualified personnel as we expand;
- labor disputes;
- increasing difficulties in obtaining insurance and increased cost of insurance;
- cost overruns relating to improvements to, or the expansion of, our operations;
- increases in the costs of goods and services;
- the effect of natural gas price volatility;
- civil disturbance or terroristic threats or acts;
- changes to the rules or our assumptions underlying our determination of what qualifies for an income tax deduction for qualifying utility asset improvements;
- changes in, or unanticipated, capital requirements;
- changes in our credit rating or the market price of our common stock;
- changes in valuation of strategic ventures;
- the phase-out of the London Interbank Offered Rate (“LIBOR”), or the replacement of LIBOR with a different reference rate or modification of the method used to calculate LIBOR, which may adversely affect interest rates;
- changes in accounting pronouncements;
- litigation and claims; and
- restrictions on our subsidiaries’ ability to make dividends and other distributions.

Given these risks and uncertainties, you should not place undue reliance on any forward-looking statements. You should read this prospectus and the documents that we incorporate by reference into this prospectus completely and with the understanding that our actual results, performance and achievements may be materially different from what we expect. These forward-looking statements represent assumptions, expectations, plans and beliefs only as of the date of this prospectus, the date of the document containing the applicable statement or the date specified in such statement, as applicable. Except for our ongoing obligations to disclose certain information under the federal securities laws, we are not obligated, and assume no obligation, to update these forward-looking statements, even though our situation may change in the future. For further information or other factors which could affect our financial results and such forward-looking statements, see “Risk Factors.” We qualify all of our forward-looking statements by these cautionary statements.

ESSENTIAL UTILITIES, INC.

Essential Utilities, Inc. is a Pennsylvania corporation and the holding company for regulated utilities providing water, wastewater, or natural gas services to an estimated five million people in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana, Virginia, West Virginia, and Kentucky under the Aqua and Peoples brands. Essential Utilities, which prior to its name change on February 3, 2020 was known as Aqua America, Inc., was formed in 1968 as a holding company for its primary subsidiary, Aqua Pennsylvania, formerly known as Philadelphia Suburban Water Company.

Our principal executive office is located at 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania 19010-3489, and our telephone number is 610-527-8000. Our website may be accessed at www.essential.co. The references to our website and the SEC's website are intended to be inactive textual references only, and the contents of those websites are not incorporated by reference herein and should not be considered part of this prospectus.

RISK FACTORS

Investing in our securities involves risks. Please see the risk factors described under the section captioned "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2020, as such risk factors may be updated from time to time in filings we make with the SEC subsequent to the date hereof. Before making an investment decision, you should carefully consider these risk factors, together with all other information contained in or incorporated by reference into this prospectus or any applicable prospectus supplement (which includes information contained in certain filings we make with the SEC subsequent to the date hereof as set forth in the section below captioned "Where You Can Find More Information"). Please also refer to the section above captioned "Forward-Looking Statements."

USE OF PROCEEDS

We will not receive any of the proceeds from the sale of shares of common stock by the selling shareholder.

DESCRIPTION OF CAPITAL STOCK

As of June 1, 2021, our authorized capital stock was 601,770,819 shares, consisting of:

- 600,000,000 shares of common stock, par value $0.50 per share, of which 245,734,735 shares were outstanding; and
- 1,770,819 shares of preferred stock, par value $1.00 per share, of which no shares were outstanding.

The following summary of certain terms of our common stock and preferred stock is qualified in its entirety by the provisions of our Amended and Restated Articles of Incorporation and Amended and Restated Bylaws, each of which is incorporated by reference as an exhibit to the registration statement of which this prospectus constitutes a part.

Common Stock

This section describes the general terms of our common stock. For more detailed information, you should refer to our articles of incorporation and bylaws, including any amendments thereto, copies of which have been filed with the SEC. These documents are incorporated by reference into this prospectus.

Voting Rights

Holders of our common stock are entitled to one vote for each share held by them at all meetings of the shareholders and are not entitled to cumulate their votes for the election of directors.

Dividend Rights and Limitations

Holders of our common stock may receive dividends when declared by our board of directors. Because we are a holding company, the funds we use to pay any dividends on our common stock are derived predominantly from the dividends that we receive from our direct and indirect subsidiaries. Therefore, our ability to pay dividends to holders of our common stock depends upon the subsidiaries' earnings, financial condition and ability to pay dividends. Most of our subsidiaries are subject to regulation by state utility commissions and the amounts of their earnings and dividends are affected by the manner in which they are regulated. In addition, they are subject to restrictions on the payment of dividends contained in their various debt agreements. Under the most restrictive debt agreements, the amount available for payment of dividends to us as of December 31, 2020 was approximately $1,729,269,000 of Aqua Pennsylvania's retained earnings and $276,283,000 of the retained earnings of certain other subsidiaries. Payment of dividends on common stock is also subject to the preferential rights of the holders of any outstanding preferred stock.

Liquidation Rights

In the event that we liquidate, dissolve or wind-up, the holders of our common stock are entitled to share ratably in all of the assets that remain after we pay our liabilities. This right is subject, however, to the prior distribution rights of any outstanding preferred stock.

Listing

Our common stock is listed on the New York Stock Exchange, or NYSE, under the symbol "WTRG."

Preferred Stock

Our board of directors has the authority, from time to time and without further action by our shareholders, to divide our unissued capital stock into one or more classes and one or more series within any class and to make determinations of the designation and number of shares of any class or series and determinations of the voting rights, preferences, limitations and special rights, if any, of the shares of any class or series. The rights, preferences, limitations and special rights of different classes of capital stock may differ with respect to dividend rates, amounts payable on liquidation, voting rights, conversion rights, redemption provisions, sinking fund provisions and other matters. The rights, preferences, privileges and restrictions of each series may be fixed by the designations of that series set forth in either a restated version of our articles of incorporation or a certificate of designations relating to that series.

The issuance of preferred stock may be perceived by some as possibly having the effect of delaying, deferring or preventing a change of control of us without further action by our shareholders. The issuance of preferred stock with voting and conversion rights may also adversely affect the voting power of the holders of our common stock. In certain circumstances, an issuance of preferred stock could possibly have the effect of decreasing the market price of our common stock.

Anti-Takeover Provisions

Pennsylvania State Law Provisions

Under Section 1712 of the Pennsylvania Business Corporation Law of 1988, as amended, or the PBCL, which is applicable to us, directors stand in a fiduciary relation to their corporation and, as such, are required to perform their duties in good faith, in a manner they reasonably believe to be in the best interests of the corporation and with such care, including reasonable inquiry, skill and diligence, as a person of ordinary prudence would use under similar circumstances. Under Section 1715 of the PBCL, in discharging their duties, directors may, in considering the best interests of their corporation, consider various constituencies, including, shareholders, employees, suppliers, customers and creditors of the corporation, and upon communities in which offices or other establishments of the corporation are located. Directors are not required to give prominent consideration to the interests of any particular constituency. Absent a breach of fiduciary duty, a lack of good faith or self-dealing, any act of the board of directors, a committee thereof or an individual director is presumed to be in the best interests of the corporation. Actions by directors relating to an acquisition or potential acquisition of control of the corporation are not subject to any greater obligation to justify, or higher burden of proof, than is applied to any other acts of directors. The PBCL expressly provides that the fiduciary duty of directors does not require them to (i) redeem or otherwise render inapplicable outstanding rights issued under any shareholder rights plan; (ii) render inapplicable the anti-takeover statutes set forth in Chapter 25 of the PBCL (described below); or (iii) take any action solely because of the effect it may have on a proposed acquisition or the consideration to be received by shareholders in such a transaction. In addition, Section 2513 of the PBCL specifically validates shareholder rights plans, or "poison pills," and the discriminatory dilution provisions contained in such plans.

Chapter 25 of the PBCL contains several anti-takeover statutes applicable to publicly-traded corporations. Corporations may opt-out of such anti-takeover statutes under certain circumstances. We have not opted-out of any of such statutes.

Section 2538 of Subchapter 25D of the PBCL requires certain transactions with an "interested shareholder" to be approved by a majority of disinterested shareholders. "Interested shareholder" is defined broadly to include any shareholder who is a party to the transaction or who is treated differently than other shareholders and affiliates of the interested shareholder.

Subchapter 25E of the PBCL requires a person or group of persons acting in concert which acquires 20% or more of the voting shares of the corporation to offer to purchase the shares of any other shareholder at "fair value." "Fair value" means the value not less than the highest price paid per share by the controlling person or group during the 90-day period prior to the control transaction, plus a control premium. Among other exceptions, Subchapter 25E does not apply to shares acquired directly from the corporation in a transaction exempt from the registration requirements of the Securities Act, or to a one-step merger.

Subchapter 25F of the PBCL generally establishes a 5-year moratorium on a "business combination" with an "interested shareholder." "Interested shareholder" is defined generally to be any beneficial owner of 20% or more of the corporation's voting stock or an affiliate or associate of the corporation that at any time within the prior five-year period was a beneficial owner of 20% or more of the corporation's voting stock. "Business combination" is defined broadly to include mergers, consolidations, asset sales and certain self-dealing transactions. Certain restrictions apply to business combination following the 5-year period. Among other exceptions, Subchapter 25F will be rendered inapplicable if the board of directors approves the proposed business combination, or approves the interested shareholder's acquisition of 20% of the voting shares, in either case prior to the date on which the shareholder first becomes an interested shareholder.

Subchapter 25G of the PBCL provides that "control shares" lose voting rights unless such rights are restored by the affirmative vote of a majority of (i) the disinterested shares (generally, shares held by persons other than the acquiror, executive officers of the corporation and certain employee stock plans) and (ii) the outstanding voting shares of the corporation. "Control shares" are defined as shares which, upon acquisition, will result in a person or group acquiring for the first time voting control over (a) 20%, (b) 33 1/3% or (c) 50% or more of the outstanding shares, together with shares acquired within 180 days of attaining the applicable threshold and shares purchased with the intention of attaining such threshold. A corporation may redeem control shares if the acquiring person does not request restoration of voting rights as permitted by Subchapter 25G. Among other exceptions, Subchapter 25G does not apply to a merger, consolidation or a share exchange if the corporation is a party to the transaction agreement.

Subchapter 25H of the PBCL provides in certain circumstances for the recovery by the corporation of profits realized from the sale of its stock by a controlling person or group if the sale occurs within 18 months after the controlling person or group became a controlling person or group, and the stock was acquired during such 18-month period or within 24 months before such period. A controlling person or group is a person or group that has acquired, offered to acquire, or publicly disclosed an intention to acquire 20% or more of the voting shares of the corporation or a person or group that has otherwise publicly disclosed or caused to be disclosed that it may seek to acquire control of the corporation through any means. Among other exceptions, Subchapter 25H does not apply to transactions approved by both the board of directors and the shareholders prior to the acquisition or distribution, as appropriate.

Subchapter 25I of the PBCL mandates severance compensation for eligible employees who are terminated within 24 months after the approval of a control-share acquisition. Eligible employees generally are all employees employed in Pennsylvania for at least two years prior to the control-share approval. Severance equals the weekly compensation of the employee multiplied by the employee's years of service (up to 26 years), less payments made due to the termination.

Subchapter 25J of the PBCL requires the continuation of certain labor contracts relating to business operations owned at the time of a control-share approval.

Articles of Incorporation and Bylaw Provisions

Certain provisions of our articles of incorporation and bylaws may have the effect of discouraging unilateral tender offers or other attempts to take over and acquire our business. These provisions might discourage some potentially interested purchaser from attempting a unilateral takeover bid for us on terms which some shareholders might favor. Our articles of incorporation require that certain fundamental transactions must be approved by the holders of 75% of the outstanding shares of our capital stock entitled to vote on the matter unless at least a majority of the members of the board of directors has approved the transaction, in which case the required shareholder approval will be the minimum approval required by applicable law. The fundamental transactions that are subject to this provision are those transactions that require approval by shareholders under applicable law or the articles of incorporation. These transactions include certain amendments of our articles of incorporation or bylaws, certain sales or other dispositions of our assets, certain issuances of our capital stock, or certain transactions involving our merger, consolidation, division, reorganization, dissolution, liquidation or winding up. Our articles of incorporation and bylaws provide that:

- a special meeting of shareholders may only be called by the chairman, the president, the board of directors or shareholders entitled to cast a majority of the votes which all shareholders are entitled to cast at the particular meeting;

- nominations for election of directors may be made by any shareholder entitled to vote for election of directors if the name of the nominee and certain information relating to the nominee is filed with our corporate secretary not less than 14 days nor more than 50 days before any meeting of shareholders to elect directors; and

- certain advance notice procedures must be met for shareholder proposals to be made at annual meetings of shareholders. These advance notice procedures generally require a notice to be delivered not less than 90 days nor more than 120 days before the anniversary date of the immediately preceding annual meeting of shareholders.

Transfer Agent and Registrar

The transfer agent and registrar for our common stock is Computershare Trust Company, N.A.

SELLING SHAREHOLDER

We have prepared this prospectus to allow the selling shareholder to offer and sell from time to time up to 21,661,095 shares of common stock for its own account. The selling shareholder acquired the shares of common stock pursuant to the Stock Purchase Agreement (the "Stock Purchase Agreement") dated March 29, 2019 entered into by and between the Registrant and CPP Investments, and assigned by CPP Investments to PMI-2. On March 16, 2020, in connection with the Peoples Gas Acquisition, the Registrant issued and sold 21,661,095 shares of common stock to PMI-2 (the "Private Placement") in accordance with the terms of the Stock Purchase Agreement. In connection with the Private Placement, the Company entered into a Shareholders Agreement with PMI-2 (the "Shareholders Agreement") dated March 16, 2020.

We are registering the offer and sale of the shares of common stock to satisfy certain registration obligations that we agreed to pursuant to the Shareholders Agreement. Pursuant to the Shareholders Agreement, we have agreed to use our commercially reasonable efforts to keep the registration statement, of which this prospectus forms a part, effective until the date on which there are no longer any Registrable Securities (as defined in the Shareholders Agreement).

As used in this prospectus, the term "selling shareholder" includes the selling shareholder listed in the table below, together with any additional selling shareholders listed in a prospectus supplement after the date of this prospectus.

The following table sets forth the name of the selling shareholder, the number of shares of common stock owned by the selling shareholder, the number of shares of common stock that may be offered under this prospectus and the number of shares of common stock owned by the selling shareholder, assuming all of the shares of common stock covered hereby are sold. The selling shareholder may sell some, all or none of their shares of common stock. We do not know how long the selling shareholder will hold the shares of common stock before selling them, and we currently have no agreements, arrangements or understandings with the selling shareholder regarding the sale or other disposition of any of the shares of common stock. The selling shareholder named below and its permitted transferees, pledgees, donees or other successors may from time to time offer shares of common stock under this prospectus. The selling shareholder named below may have sold, transferred, otherwise disposed of or purchased, or may sell, transfer, otherwise dispose of or purchase, at any time and from time to time, shares of common stock in transactions exempt from the registration requirements of the Securities Act or in the open market after the date on which it provided the information set forth in the table below.

The information set forth below is based upon information obtained from the selling shareholder and from the Schedule 13D filed by CPP Investments with the SEC on March 24, 2020. Beneficial ownership of the selling shareholder is determined in accordance with Rule 13d-3(d) of the Exchange Act. The percentage of shares of common stock beneficially owned prior to and after the offering is based on 245,734,735 shares of common stock outstanding as of June 1, 2021.

	Beneficial Ownership Prior to this Offering			Beneficial Ownership After Offering	
Name of Selling Shareholder	Number of Shares	% of Outstanding Common Stock	Number of Shares that May be Offered under this Prospectus	Number of Shares	% of Outstanding Common Stock
CPP Investment Board PMI-2 Inc. (1)	21,661,095	8.8%	21,661,095	0	0%

(1) PMI-2 is a wholly-owned subsidiary of CPP Investments, and investment and voting power with regard to shares held by PMI-2 rests with CPP Investments. John Graham is the President and Chief Executive Officer of CPP Investments and, in such capacity, may be deemed to have voting and dispositive power with respect to the shares of common stock beneficially owned by CPP Investments. Mr. Graham disclaims beneficial ownership over any such shares. The address of CPP Investments is One Queen Street East, Suite 2500, Toronto, Ontario, M5C 2W5, Canada.

PLAN OF DISTRIBUTION

We have prepared this prospectus to allow the selling shareholder to offer and sell from time to time after the date of this prospectus up to 21,661,095 shares of common stock for its own account. We are not offering any securities under this prospectus and will not receive any proceeds from the sale of shares of common stock offered by the selling shareholder.

The selling shareholder, its permitted transferees, pledgees, donees and other successors may sell the shares of common stock covered by this prospectus in any of the following ways (or in any combination):

- to or through underwriters, brokers or dealers (acting as agent or principal);
- through a block trade in which the broker or dealer engaged to handle the block trade will attempt to sell the securities as an agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- directly to one or more purchasers, including through a specific bidding or auction process or otherwise;
- directly to or through agents;
- in "at the market offerings," within the meaning of Rule 415(a)(4) of the Securities Act;
- through a distribution by the selling shareholder or its successor in interest to its members, general or limited partners or shareholders (or their respective members, general or limited partners or shareholders);
- settlement of short sales;
- through options, swaps or derivatives;
- through a combination of any of these methods of sale; or
- through any other methods described in a prospectus supplement.

The distribution of securities may be effected from time to time in one or more transactions, including block transactions and transactions on the NYSE or any other organized market where the securities may be traded.

The selling shareholder may enter into sale, forward sale and derivative transactions with third parties, or may sell securities not covered by this prospectus to third parties in privately negotiated transactions

Any offering price and any discounts, commissions, concessions or agency fees allowed or reallowed or paid to dealers may be changed from time to time. The selling shareholder may determine the price or other terms relating to the shares of common stock offered under this prospectus by use of an electronic auction. To the extent required, we will describe how any auction will determine the price or any other terms, how potential investors may participate in the auction and the nature of the obligations of the underwriter, dealer or agent in the applicable prospectus supplement.

If the selling shareholder sells securities to a dealer acting as a principal, the dealer may resell such securities at varying prices to be determined by such dealer in its discretion at the time of resale without consulting with the selling shareholder and such resale prices may not be disclosed in the applicable prospectus supplement.

The selling shareholder may distribute the shares of common stock from time to time in one or more transactions:

- at a fixed price or at prices that may be changed from time to time;
- at market prices prevailing at the time of sale;

- at prices relating to such prevailing market prices; or

- at negotiated prices.

Any of the prices may represent a discount of then-prevailing market prices.

The selling shareholder may enter into hedging transactions from time to time in which a selling shareholder may:

- enter into transactions with a broker-dealer or any other person in connection with which such broker-dealer or other person will engage in short sales of the shares, in which case such broker-dealer or other person may use the shares of common stock received from the selling shareholder to close out its short positions;

- sell shares of common stock short and re-deliver shares of common stock offered by this prospectus to close out its short positions;

- enter into options or other types of transactions that require the selling shareholder to deliver the shares of common stock to a broker-dealer, affiliate or third party, who will then resell or transfer the shares of common stock under this prospectus; or

- loan or pledge the shares to a broker-dealer or any other person, who may sell the loaned shares of common stock or, in an event of default in the case of a pledge, sell the pledged shares of common stock under this prospectus.

Underwriters, dealers or any other third parties described above may offer and sell the offered shares of common stock from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale. If underwriters or dealers are used in the sale of any shares, the shares of common stock will be acquired by the underwriters or dealers for their own account and may be resold from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale. The shares of common stock may be either offered to the public through underwriting syndicates represented by managing underwriters, or directly by underwriters. Generally, the underwriters' obligations to purchase the shares of common stock will be subject to certain conditions precedent. The underwriters will be obligated to purchase all of the shares of common stock if they purchase any of the shares of common stock (other than any shares of common stock purchased upon exercise of any option to purchase additional shares), unless otherwise specified in the applicable prospectus supplement. The selling shareholder may use underwriters with whom we have a material relationship. We will describe the nature of any such relationship, if required, in the applicable prospectus supplement, naming the underwriter or underwriters.

The selling shareholder may sell the shares of common stock through agents from time to time. A prospectus supplement would name any agent involved in the offer or sale of the shares of common stock and any commissions paid to them. Generally, any agent will be acting on a best efforts basis for the period of its appointment. The selling shareholder may engage in at-the-market offerings into an existing trading market in accordance with Rule 415(a)(4) under the Securities Act. The selling shareholder may authorize underwriters, dealers, brokers or agents to solicit offers by certain purchasers to purchase the shares of common stock from the selling shareholder at the public offering price set forth in the applicable prospectus supplement pursuant to delayed delivery contracts providing for payment and delivery on a specified date in the future. These contracts will be subject only to those conditions set forth in the applicable prospectus supplement, and the applicable prospectus supplement would set forth any commissions to be paid for solicitation of these contracts. Any underwriters, dealers, brokers and agents that participate in the distribution of the shares of common stock may be deemed to be "underwriters" as defined in the Securities Act. Any commissions paid or any discounts or concessions allowed to any such persons, and any profits they receive on resale of the shares, may be deemed to be underwriting discounts and commissions under the Securities Act. As applicable, we will identify any underwriters or agents and describe their compensation in a prospectus supplement.

Underwriters or agents may purchase and sell the shares of common stock in the open market. These transactions may include over-allotments or short sales of the securities, stabilizing transactions, syndicate covering transactions and penalty bids.

Over-allotment or short sales involve sales by persons participating in the offering of more securities than were sold to them. In these circumstances, these persons would cover such over-allotments or short positions by making purchases in the open market or by exercising their over-allotment option, if any. Stabilizing transactions consist of bids or purchases for the purpose of preventing or retarding a decline in the market price of the shares of common stock and are permitted so long as the stabilizing bids do not exceed a specified maximum. Syndicate covering transactions involve the placing of any bid on behalf of the underwriting syndicate or the effecting of any purchase to reduce a short position created in connection with the offering. The underwriters or agents also may impose a penalty bid, which permits them to reclaim selling concessions allowed to syndicate members or certain dealers if they repurchase the shares of common stock in stabilizing or covering transactions. These activities may stabilize, maintain or otherwise affect the market price of the shares, which may be higher than the price that might otherwise prevail in the open market. These activities, if begun, may be discontinued at any time. These transactions may be effected on any exchange on which the shares of common stock are traded, in the over-the-counter market or otherwise.

Our common stock is listed on the NYSE under the symbol “WTRG”.

If at the time of any offering made under this prospectus a member of the Financial Industry Regulatory Authority Inc. (“FINRA”) participating in the offering has a “conflict of interest” as defined in FINRA’s Rule 5121 (“Rule 5121”), that offering will be conducted in accordance with the relevant provisions of Rule 5121.

The selling shareholder may also sell shares of common stock under Rule 144 of the Securities Act, if available, rather than under this prospectus.

There can be no assurance that the selling shareholder will sell all or any of the shares of common stock offered by this prospectus.

In order to comply with the securities laws of some states or countries, if applicable, shares of common stock may only be sold in those jurisdictions through registered or licensed brokers or dealers and in compliance with applicable laws and regulations. In addition, in certain states or countries the shares of common stock may not be sold unless they have been registered or qualified for sale in the applicable state or country or an exemption from registration or qualification requirements is available.

We have agreed to indemnify the selling shareholder against certain liabilities, including liabilities under the Securities Act. In addition, agents, dealers and underwriters may be entitled to indemnification by us and the selling shareholder against certain civil liabilities, including liabilities under the Securities Act, or to contribution with respect to payments which the agents, dealers or underwriters may be required to make in respect thereof.

LEGAL MATTERS

Unless otherwise indicated in an applicable prospectus supplement, the validity of the securities in respect of which this prospectus is being delivered will be passed upon for us by Ballard Spahr LLP, Philadelphia, Pennsylvania. If legal matters in connection with the offering made by this prospectus are passed on by counsel for the underwriters, dealers or agents, if any, that counsel will be named in the applicable prospectus supplement.

EXPERTS

The financial statements and management’s assessment of the effectiveness of internal control over financial reporting (which is included in Management’s Report on Internal Control over Financial Reporting) incorporated in this prospectus by reference to the Annual Report on Form 10-K for the year ended December 31, 2020 have been so incorporated in reliance on the report (which contains an explanatory paragraph on the effectiveness of internal control over financial reporting due to the exclusion of Peoples Gas because it was acquired by the Company in a purchase business combination during 2020) of PricewaterhouseCoopers LLP, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting.

The consolidated financial statements of LDC Funding LLC as of December 31, 2019 and 2018 and for each of the three years in the period ended December 31, 2019, incorporated in this prospectus by reference to our Current Report on Form 8-K filed on April 15, 2021, have been audited by Deloitte & Touche LLP, independent auditors, as stated in their report, which is incorporated by reference herein, and are incorporated in reliance upon the report of such firm given upon their authority as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may obtain our SEC filings from the SEC's website at www.sec.gov or from our website at www.essential.co.

We have filed with the SEC a "shelf" registration statement on Form S-3 under the Securities Act relating to the shares of common stock that may be offered by this prospectus. This prospectus is a part of that registration statement, but does not contain all of the information in the registration statement. We have omitted certain parts of the registration statement in accordance with rules and regulations of the SEC. Statements made in this prospectus as to the contents of any contract, agreement or other documents are not necessarily complete, and, in each instance, we refer you to a copy of such document filed as an exhibit to the registration statement, of which this prospectus is a part, or otherwise filed with the SEC. For more detail about us and any securities that may be offered by this prospectus, you may examine the registration statement on Form S-3 and the exhibits filed with it at the locations listed in the previous paragraph.

The SEC allows us to "incorporate by reference" the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus. When we file information with the SEC in the future, that information will automatically update and supersede this information. We incorporate by reference the documents listed below and any future filings we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act until all of the securities covered by this prospectus are sold; provided, however, that we are not incorporating, in each case, any documents or information deemed to have been furnished and not filed in accordance with SEC rules:

- Our Annual Report on Form 10-K for the year ended December 31, 2020, filed with the SEC on March 1, 2021;
- Our Quarterly Report on Form 10-Q filed with the SEC for the quarter ended March 31, 2021, filed with the SEC on May 10, 2021;
- Our Current Reports on Form 8-K filed with the SEC on April 15, 2021, April 19, 2021 and May 10, 2021;
- The portions of our Definitive Proxy Statement on Schedule 14A filed with the SEC on March 22, 2021, that are incorporated by reference into our Annual Report on Form 10-K for the year ended December 31, 2020; and
- The description of our common stock set forth in our Registration Statement on Form 8-A, including any amendments or reports filed for the purpose of updating such description.

These documents contain important business and financial information about us that is not included in or delivered with this prospectus. You may request a copy of any or all documents that we incorporate by reference at no cost, by writing or telephoning us at:

Essential Utilities, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010-3489
Telephone: 610-527-8000
Attention: Corporate Secretary

We and the selling shareholder have not authorized anyone to provide you with information different from that contained or incorporated by reference in this prospectus, any prospectus supplements or any free writing prospectus prepared by or on behalf of us or to which we have referred you. We and the selling shareholder take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. You should not assume that the information provided in this prospectus or incorporated by reference in this prospectus is accurate as of any date other than the date on the front of this prospectus or the date of those documents. Our business, financial condition, results of operations and prospects may have changed since those dates.

If you find inconsistencies between the documents, or between the documents and this prospectus or the applicable prospectus supplement, you should rely on the most recent document, prospectus or prospectus supplement.

PART II

INFORMATION NOT REQUIRED IN PROSPECTUS

ITEM 14. Other Expenses of Issuance and Distribution

The following table sets forth an estimate of the costs and expenses payable by the Registrant in connection with the issuance and distribution of the securities being registered hereby.

SEC registration fee	$112,466
Legal fees and expenses	100,000*
Accounting fees and expenses	50,000*
Transfer Agent and Registrar fees and expenses	7,500*

Miscellaneous	7,500*
Total	$280,466

***** The foregoing estimates the expenses that we will incur in connection with the preparation and filing of this registration statement. Estimated expenses to be incurred in connection with any future offering by the selling shareholder are not presently known.

ITEM 15. Indemnification of Directors and Officers

The Registrant is a Pennsylvania corporation. Sections 1741 and 1742 of the Pennsylvania Business Corporation Law of 1988, as amended, or the PBCL, provide that, unless otherwise restricted in its bylaws, a business corporation may indemnify directors and officers against liabilities they may incur as such, provided that the particular person acted in good faith and in a manner he or she reasonably believed to be in, or not opposed to, the best interests of the corporation, and, with respect to any criminal proceeding, had no reasonable cause to believe his or her conduct was unlawful. In general, the power to indemnify under these sections does not exist in the case of actions against a director or officer by or in the right of the corporation if the person otherwise entitled to indemnification shall have been adjudged to be liable to the corporation unless it is judicially determined that, despite the adjudication of liability but in view of all the circumstances of the case, the person is fairly and reasonably entitled to indemnification for specified expenses. Section 1743 of the PBCL requires a business corporation to indemnify directors and officers against expenses they may incur in defending actions against them in such capacities if they are successful on the merits or otherwise in the defense of such actions.

Section 1713 of the PBCL permits the shareholders to adopt a bylaw provision relieving a director (but not an officer) of personal liability for monetary damages except where (i) the director has breached or failed to perform the duties of directorship in accordance with the applicable standard of care, and (ii) such conduct constitutes self-dealing, willful misconduct or recklessness. Section 1713 also provides that a director may not be relieved of liability for the payment of taxes pursuant to any federal, state or local law or of liability or responsibility under a criminal statute. Section 4.01 of the Registrant's bylaws limits the liability of any director of the Registrant to the fullest extent permitted by Section 1713 of the PBCL.

Section 1746 of the PBCL grants a corporation broad authority to indemnify its directors, officers and other agents for liabilities and expenses incurred in such capacity, except in circumstances where the act or failure to act giving rise to the claim for indemnification is determined by a court to have constituted willful misconduct or recklessness. Article VII of the Registrant's bylaws provides indemnification of directors, officers and other agents of the Registrant, which is broader than the indemnification permitted by Section 1741 of the PBCL and pursuant to the authority of Section 1746 of the PBCL.

Article VII of the Registrant's bylaws provides, except as expressly prohibited by law, an unconditional right to indemnification for expenses and any liability paid or incurred by any director or officer of the Registrant, or any other person designated by the board of directors as an indemnified representative, in connection with any actual or threatened claim, action, suit or proceeding (including derivative suits) in which he or she may be involved by reason of being or having been a director, officer, employee or agent of the Registrant or, at the request of the Registrant, of another corporation, partnership, joint venture, trust, employee benefit plan or other entity. The bylaws specifically authorize indemnification against both judgments and amounts paid in settlement of derivative suits, unlike Section 1742 of the PBCL which authorizes indemnification only of expenses incurred in defending and in settlement of a derivative action. In addition, Article VII of the bylaws also allows indemnification for punitive damages and liabilities incurred under the federal securities laws.

Unlike the provisions of PBCL Sections 1741 and 1742, Article VII does not require the Registrant to determine the availability of indemnification by the procedures or the standard of conduct specified in Sections 1741 or 1742 of the PBCL. A person who has incurred an indemnifiable expense or liability has a right to be indemnified independent of any procedures or determinations that would otherwise be required, and that right is enforceable against the Registrant as long as indemnification is not prohibited by law. To the extent indemnification is permitted only for a portion of a liability, the bylaw provisions require the Registrant to indemnify such portion. If the indemnification provided for in Article VII is unavailable for any reason in respect of any liability or portion thereof, the bylaws require the Registrant to make a contribution toward the liability. Indemnification rights under the bylaws do not depend upon the approval of any future board of directors.

Section 7.04 of the Registrant's bylaws also authorizes the Registrant to further effect or secure its indemnification obligations by entering into indemnification agreements, maintaining insurance, creating a trust fund, granting a security interest in its assets or property, establishing a letter of credit, or using any other means that may be available from time to time. Section 1747 of the PBCL also enables a business corporation to purchase and maintain insurance on behalf of a person who is or was serving as a representative of the corporation or is or was serving at the request of the corporation as a representative of another entity against any liability asserted against that representative in his capacity as such, whether or not the corporation would have the power to indemnify him against that liability under the PBCL. The Registrant maintains, on behalf of its directors and officers, insurance protection against certain liabilities arising out of the discharge of their duties, as well as insurance covering the Registrant for indemnification payments made to its directors and officers for certain liabilities. The premiums for such insurance are paid by the Registrant.

ITEM 16. Exhibits

Exhibit No.	**Description**
1.1**	Form of Underwriting Agreement
4.1	Amended and Restated Articles of Incorporation (filed as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on May 18, 2020 and incorporated herein by reference).
4.2	Amended and Restated Bylaws, effective as of December 23, 2020 (filed as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on December 28, 2020 and incorporated herein by reference).
5.1*	Opinion of Ballard Spahr LLP.
23.1*	Consent of PricewaterhouseCoopers LLP.
23.2*	Consent of Deloitte & Touche LLP.
23.3*	Consent of Ballard Spahr LLP (included in Exhibit 5.1).
24.1*	Power of Attorney (See page II-6 of this Registration Statement).

* Filed herewith.

** To be filed, if necessary, as an exhibit to a post-effective amendment to this registration statement or as an exhibit to a Current Report on Form 8-K and incorporated herein by reference.

ITEM 17. Undertakings

(a) The undersigned Registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

(i) to include any prospectus required by Section 10(a)(3) of the Securities Act;

(ii) to reflect in the prospectus any facts or events arising after the effective date of this registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in this registration statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than 20 percent change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement;

(iii) to include any material information with respect to the plan of distribution not previously disclosed in this registration statement or any material change to such information in this registration statement;

provided, *however*, that: paragraphs (a)(1)(i), (a)(1)(ii) and (a)(1)(iii) of this section do not apply if the registration statement is on Form S-3 and the information required to be included in a post-effective amendment by those paragraphs is contained in reports filed with or furnished to the Commission by the Registrant pursuant to Section 13 or Section 15(d) of the Securities Exchange Act that are incorporated by reference in this registration statement, or is contained in a form of prospectus filed pursuant to Rule 424(b) that is part of the registration statement.

(2) That, for the purpose of determining any liability under the Securities Act, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(4) That, for the purpose of determining liability under the Securities Act to any purchaser:

(A) Each prospectus filed by the Registrant pursuant to Rule 424(b)(3) shall be deemed to be part of this registration statement as of the date the filed prospectus was deemed part of and included in this registration statement; and

(B) Each prospectus required to be filed pursuant to Rule 424(b)(2), (b)(5), or (b)(7) as part of a registration statement in reliance on Rule 430B relating to an offering made pursuant to Rule 415(a)(1)(i), (vii) or (x) for the purpose of providing the information required by Section 10(a) of the Securities Act shall be deemed to be part of and included in this registration statement as of the earlier of the date such form of prospectus is first used after effectiveness or the date of the first contract of sale of securities in the offering described in the prospectus. As provided in Rule 430B, for liability purposes of the issuer and any person that is at that date an underwriter, such date shall be deemed to be a new effective date of this registration statement relating to the securities in this registration statement to which that prospectus relates, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof. Provided, however, that no statement made in a registration statement or a prospectus that is part of this registration statement or made in a document incorporated or deemed incorporated by reference into this registration statement or prospectus that is part of this registration statement will, as to a purchaser with a time of contract of sale prior to such effective date, supersede or modify any statement that was made in this registration statement or prospectus that was part of this registration statement or made in any such document immediately prior to such effective date.

(b) The undersigned Registrant hereby undertakes that, for purposes of determining any liability under the Securities Act, each filing of the Registrant's annual report pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Securities Exchange Act) that is incorporated by reference in this registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(c) Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the Registrant pursuant to the foregoing provisions, or otherwise, the Registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

SIGNATURES

Pursuant to the requirements of the Securities Act, the Registrant certifies that it has reasonable grounds to believe that it meets all of the requirements for filing on Form S-3 and has duly caused this Registration Statement to be signed on its behalf by the undersigned, thereunto duly authorized, in the City of Bryn Mawr, Commonwealth of Pennsylvania, on this 21st day of June, 2021.

Re: Essential Utilities, Inc. - Registration Statement on Form S-3, filed on June 21, 2021

Ladies and Gentlemen:

We have acted as counsel to Essential Utilities, Inc., a Pennsylvania corporation (the "Company"), in connection with the preparation and filing with the Securities and Exchange Commission (the "Commission") of the Company's Registration Statement on Form S-3, dated the date hereof (the "Registration Statement"), under the Securities Act of 1933, as amended (the "Securities Act"), relating to the resale by the selling shareholder named therein (the "Selling Shareholder") from time to time of 21,661,095 shares (the "Shares") of common stock, par value $0.50 per share (the "Common Stock").

The Shares may be sold by the Selling Shareholder from time to time on a delayed or continuous basis pursuant to Rule 415 under the Securities Act.

In so acting, we have examined originals or copies (certified or otherwise identified to our satisfaction) of (i) the Amended and Restated Articles of Incorporation of the Company together with all amendments thereto; (ii) the Amended and Restated Bylaws of the Company; (iii) the Registration Statement and the exhibits thereto; (iv) the prospectus contained within the Registration Statement; (v) such corporate records, agreements, documents and other instruments; and (vi) such certificates or comparable documents of public officials and other sources believed by us to be reliable, and of officers and representatives of the Company, and have made such inquiries of such officers and representatives, as we have deemed relevant and necessary as a basis for the opinions hereinafter set forth.

In such examination, we have assumed the genuineness of all signatures, the legal capacity of all natural persons, the authenticity of all documents submitted to us as originals, the conformity to original documents of all documents submitted to us as certified, conformed or photostatic copies and the authenticity of the originals of such latter documents. As to all questions of fact material to this opinion that have not been independently established, we have relied upon certificates or comparable documents of officers and representatives of the Company.

We have also assumed that (i) the Registration Statement and any amendments or supplements thereto (including any post-effective amendments) will have become effective and comply with all applicable laws and no stop order suspending the Registration Statement's effectiveness will have been issued and remain in effect, in each case, at the time the Securities are offered or issued as contemplated by the Registration Statement, (ii) the Company has timely filed all necessary reports pursuant to the Securities Exchange Act of 1934, as amended, which are incorporated into the Registration Statement by reference, and (iii) the Shares will be issued and sold in compliance with applicable federal and state securities laws and in the manner stated in the Registration Statement.

Based on the foregoing, and subject to the qualifications stated herein, we are of the opinion that the Shares issued to the Selling Shareholder have been duly authorized and are validly issued, fully paid and non-assessable.

The opinion expressed above with respect to validity, binding effect and enforceability are subject to applicable bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and similar laws affecting creditors' rights and remedies generally, and subject, as to enforceability, to general principles of equity, including principles of commercial reasonableness, good faith and fair dealing (regardless of whether enforcement is sought in a proceeding at law or in equity) and except that rights to indemnification and contribution thereunder may be limited by federal or state securities laws or public policy relating thereto.

We express no opinion as to the laws of any jurisdiction other than the federal laws of the United States of America and the laws of the Commonwealth of Pennsylvania.

We hereby consent to the use of this letter as an exhibit to the Registration Statement and to any and all references to our firm in the prospectus which is a part of the Registration Statement. In giving this consent, we do not admit that we are within the category of persons whose consent is required by Section 7 of the Securities Act and the rules and regulations promulgated thereunder.

Very truly yours,

/s/ Ballard Spahr LLP

Exhibit 23.1

CONSENT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We hereby consent to the incorporation by reference in this Registration Statement on Form S-3 of Essential Utilities, Inc. of our report dated March 1, 2021 relating to the financial statements, financial statement schedule and the effectiveness of internal control over financial reporting, which appears in Essential Utilities, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2020. We also consent to the reference to us under the heading "Experts" in such Registration Statement.

We initiate coverage on Essential Utilities Inc. (WTRG) and transfer primary coverage on American Water (AWK) from Michael Lapides to Insoo Kim with the following updated views:

Analyzing the water utility premium valuation: fundamentals + ESG. While we recognize the current 10-11x relative P/E premium versus electric/gas utilities, we view this as justified given two quantifiable advantages: 1) our analysis shows every $1 invested in water assets is worth more given a longer depreciable life vs electric, and 2) long visibility of above-average growth due to significant water pipe investment needs. In addition, we see continued ESG momentum sustaining additional relative premium for water utilities. With this in mind:

- **We upgrade AWK to Buy with a $146 price target (16% total return)** as we see 1) best-in-class 8.3% EPS CAGR, 2) one of the highest beta-adjusted returns among Regulated Utilities (Exhibit 3), and 3) its ESG-favorable position as the only large-cap, pure-play water utility in the U.S. We view this defensive utility offering investors an attractive investment opportunity with double-digit upside potential.
- **We initiate coverage of WTRG at Neutral with a $45 price target (7% total return)** given 1) robust 6.6% EPS CAGR post Peoples Gas acquisition, but 2) current multiples that largely reflect the water/gas sum-of-the-parts valuation.
- **AWK/WTRG both remain relatively defensive in the current COVID-19 environment,** outperforming the XLU by 7%/3% since March 1. Also, we favorably view their heavy residential revenue mix which could help offset potential near-term demand impact from commercial/industrial customers.

As highlighted in our recent note, we remain positive on the Utilities sector, both on an absolute and relative basis, given 10-year treasury yields below 1% and the regulated utilities' more resilient earnings power relative to that for the broader market, especially in the current COVID-19 environment. We see 15%/25% total return for Regulated Utilities and Diversified Utilities, respectively.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. PM Summary: Premium water utility multiples are justified; buy AWK

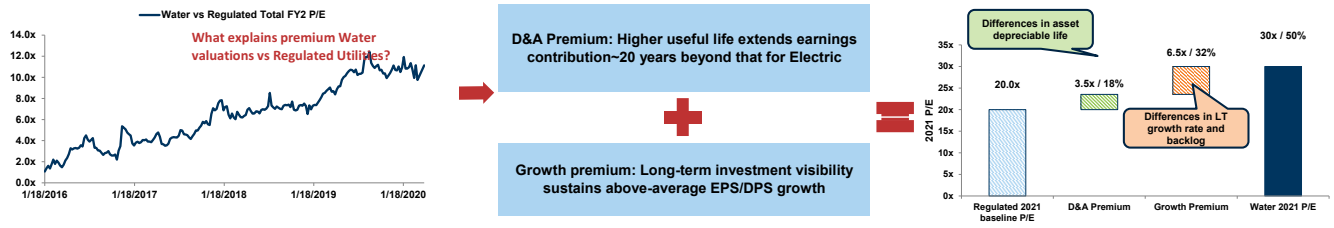
Despite the large relative P/E premiums for water utilities currently, we see two quantifiable advantages versus electric utilities that provide justification: 1) every $1 invested in water assets is worth more given a longer depreciable life, and 2) material organic/inorganic growth visibility that should sustain above-average earnings growth longer-term. Combined with a favorable ESG screen, we believe water utilities could see further relative multiple expansion from current levels.

To this end, we transfer primary coverage of AWK from Michael Lapides to Insoo Kim and upgrade from Neutral to Buy given best-in-class growth, more robust credit metrics, and its ESG-friendly status as a large-cap pure-play water utility, while we initiate on WTRG with a Neutral rating as we believe valuations fairly reflect the water/gas business mix.

Do water utilities deserve the current premium? We believe so. Based on our new and detailed analysis (please refer to the following section), we see certain fundamental advantages that justify the current 11.3x premium versus electric utilities. The primary drivers include:

1. **D&A premium (3.5x):** Every $1 invested to longer useful-life water assets (50 years vs. 30 years for electric) extends their value - translating into roughly 2% higher earnings growth.
2. **Growth premium (6.5x):** We see water utilities sustaining their above-average earnings/dividend growth over electric utilities over at least the next 15 years, given significant water investment needs in the U.S.
3. **Other qualitative factors:** 1) scarcity of water investor-owned utilities (IOUs), 2) ESG-related premium for pure-play water utilities (which we believe may impact WTRG given its new exposure to gas utilities).

Exhibit 1: Longer useful life and long-term investment visibility largely justify premium water valuations vs. electric/gas



Source: Goldman Sachs Global Investment Research

Following our analysis, we revise our regulated baseline water multiple from 25.5x to 30.0x, which incorporates the 10x D&A/growth premium to our 20x base P/E for electric/gas utilities on 2021E EPS.

With this revised base, we make the following recommendations:

- **Upgrade AWK to Buy**: **best-in-class growth and a pure-play large-cap water utility.** We expect AWK to continue to achieve above-average EPS growth, with our

For the exclusive use of INSOO.KIM@GS.COM

estimates (1% above consensus) implying an 8.3% EPS CAGR from 2019-2022 - at the middle of the company's 7-10% guidance - driven by a combination of core regulated investments, continued municipal utility acquisitions, and contributions from its contracted segments. Despite the 16% total return screening as comparable to 15% for Regulated Utilities, we believe AWK's below-average beta and ESG-friendly profile could drive further relative multiple expansion for this secular growth story.

- **Initiate on WTRG at Neutral**: **water/gas mix fully reflected in valuations.** We see WTRG's recent acquisition of Peoples Gas, a private gas utility business boosting consolidated rate base growth to 9.7% from 2019-2022 versus 9% prior as a stand-alone water utility, along with benefits from acquisition synergies. Our estimates - largely in-line with consensus - reflect a 6.6% EPS CAGR from 2019-2022, although we expect long-run growth to trend closer to rate base growth. We see the current 4.3x valuation discount versus water peers as largely appropriate given our view that gas utilities warrant a lower multiple. Our $45 target incorporates a 27.3x blended P/E multiple, resulting in a 7% total return versus the sector average at 15%.

Balance sheet/credit metrics favor AWK. While both AWK and WTRG maintain an A issuer rating by S&P, we see AWK's 15-17% FFO/debt, versus WTRG's 12%, through 2022 more favorably in the current economic environment. Parent debt levels - sub-20% for AWK verus 25-30% for WTRG - also screen better for AWK, as WTRG's recently completed Peoples Gas acquisition contributing to a more levered balance sheet.

How much near-term demand impact do AWK/WTRG face from COVID-19? Could be modest. We note that both AWK and WTRG derive less than 10% of revenues from industrial customers, while more than 60% from residential customers. GIven our view (see recent note) that residential volumes should see an increase in demand, we estimate that a +3%/-5%/-10% change in residential/commercial/industrial demand could actually result in a relatively neutral net income impact, while acknowledging the difficulty in estimating the net outcome.

Water Utilities – abundant growth opportunities in fragmented market

Water utilities are responsible for the operation and maintenance of water treatment plants and distribution networks, crucial for ensuring reliability and quality of supply. Water and wastewater services are primarily the two sources of revenue for a water utility.

- **Water services involve: (1) sourcing, (2) treatment and (3) distribution of water.** We outline the three steps in further detail below:
  - **Pumping Station:** A pumping station abstracts water from aquifers, rivers, reservoirs and lakes, using pumps, pipes and electricity.
  - **Treatment Facility:** After drawing the water, it is sent to a treatment facility, where chemicals and filtration systems minimize impurities and meet federal, state and local quality standards. Chemical and electric costs stand out as the two largest O&M expenses at a treatment facility.
  - **Distribution System:** The US water pipe network stretches across 70,000 miles, distributing water to the ultimate customers. Key periods of water pipe installations include: (1) late 1800s, (2) the 1920s and (3) the 1940s/1950s. Given the age of the current distribution system, pipe replacement spending represents the largest share of investor owned utilities' capital spending budget for the foreseeable future.
- **Wastewater services** involve the collection of wastewater from customers' premises through sewer lines. The wastewater is then transported through a sewer network to a treatment facility, where it is treated to meet required regulatory standards for wastewater before being returned to the environment. The solid waste by-product of the treatment process is disposed of or recycled in accordance with applicable standards and regulations.

Aging infrastructure and increased regulation in the sector are primary drivers for the need to modernize the country's water and wastewater infrastructure related to water quality and the management of water and wastewater residual discharges. Because pipe assets last a long time, water systems that were built in the latter part of the 19th century and throughout much of the 20th century have not, for the most part, experienced the need for pipe replacement on a large scale. To put this aging infrastructure into context, the American Water Works Association (AWWA) estimates that the cost of restoring underground pipes will total at least $1 trillion through 2035, without including the cost of constructing new infrastructure or repairing treatment plants. The estimate assumes pipes are replaced at the end of their useful lives. Over a 40-year period, through 2050, AWWA estimates the needs will exceed $1.7 trillion. Replacement needs account for about 54% of the national total, with the balance attributable to population changes over that period.

The key regulations that govern the distribution of water include the Safe Drinking Water Act and the Clean Water Act:

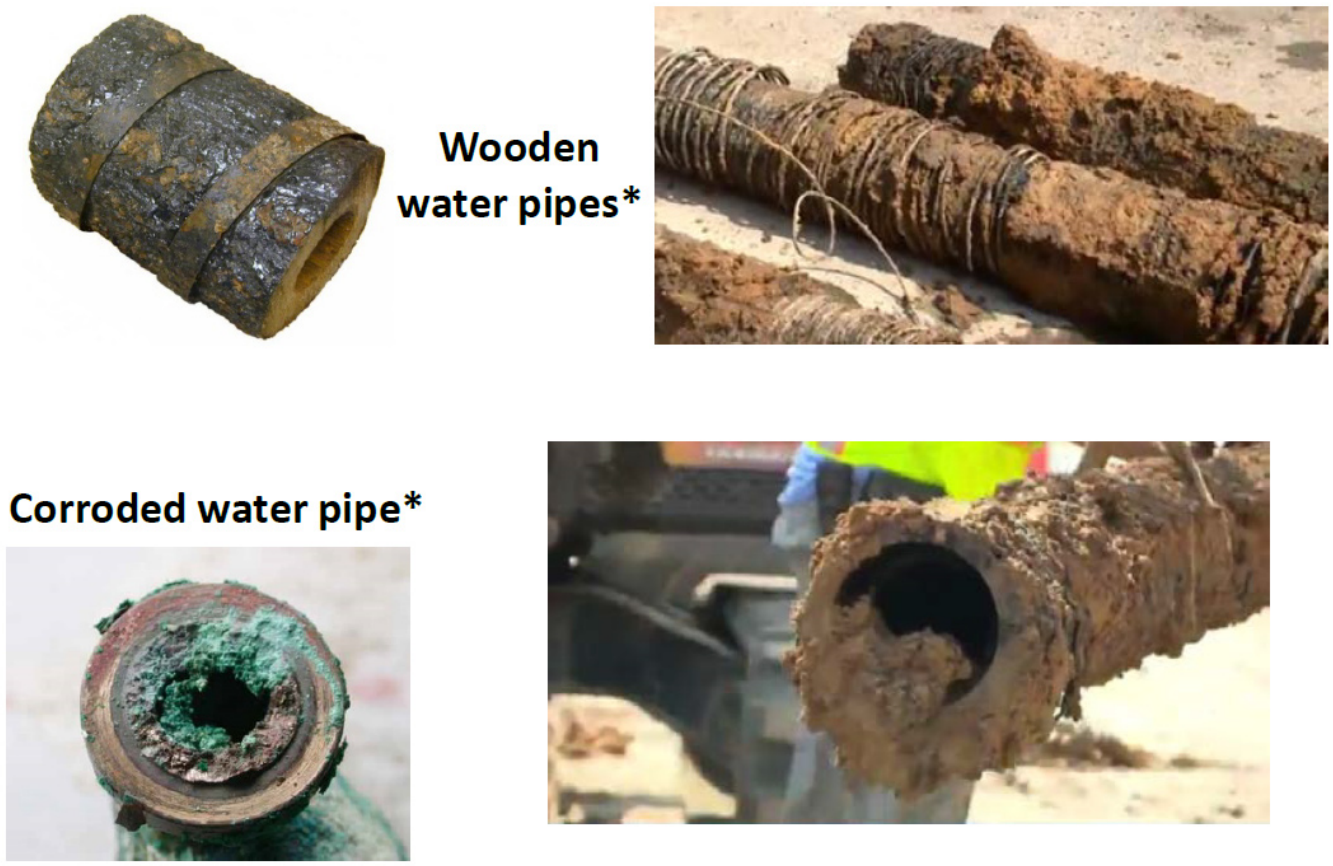
- **Federal Safe Drinking Water Act (1974):** The Federal Safe Drinking Water Act

For the exclusive use of INSOO.KIM@GS.COM

established national quality standards for drinking water. Under the SDWA, the EPA prescribes the legal limits of contaminants and sets water-testing schedules.

- **Clean Water Act (1972):** The Federal Clean Water Act regulates discharges from drinking water and wastewater treatment facilities into lakes, rivers, streams and groundwater.

Exhibit 14: The aging water and wastewater infrastructure in the United States require replacement and modernization, with at least $1 trillion investment potential through 2035
Aging US Pipe Infrastructure



*Not American Water Pipes

Source: AWK Dec 2017 Investor Presentation

The water utility sector is highly fragmented — more than 50,000 water utility systems exist nationwide — with investor-owned and privately held water utilities operating less than 15% of these systems. According to the U.S. Environmental Protection Agency (EPA), based on the 2015 U.S. Census American Housing Survey, approximately 89% of the U.S. population obtains its water from community water systems, and 11% of the U.S. population obtains its water from private wells. Of the approximately 50,000 community water systems in the U.S., 81% serve less than 3,300 customers, making the water industry the most fragmented of the major utility industries (natural gas, electric, water/wastewater). The majority of these community water systems are government-owned, and the balance of the systems are regulated utilities.

For the exclusive use of INSOO.KIM@GS.COM

Although not as fragmented as the water industry, the wastewater industry in the U.S. also presents opportunities for consolidation. According to the EPA's most recent survey of wastewater treatment facilities (which includes both government-owned facilities and regulated utility systems) in 2012, there were approximately 15,000 such facilities in the nation serving approximately 76% of the U.S. population. The remaining population represents individual homeowners with their own treatment facilities; for example, community on-lot disposal systems and septic tank systems. A majority of wastewater facilities are government-owned rather than regulated utilities.

Fair Market Value (FMV) legislation will continue to motivate consolidation of the water and wastewater industry, providing municipalities with an option for exiting the business if they are dealing with challenges associated with their aging, deteriorating water and wastewater assets, do not have the expertise or technical capabilities to continue to comply with ever-increasing environmental regulations or simply want to focus on other community priorities. The sector has been ripe for consolidation for decades and the largest water utilities have recently altered their strategic growth efforts to focus on buying mid-sized municipal water and wastewater systems fueled by fair market value (or FMV); legislation allows the water utilities to include into rate base the fair market value of the acquired municipal water assets instead of the depreciated original cost of water/wastewater assets. The legislation includes a process for engaging two independent utility valuation experts to perform appraisals that are filed with the public utility commission and then averaged and compared to the purchase price. The rate-making rate base is the lower of the average of the appraisals or the purchase price and is subject to regulatory approval. FMV is on the books in 10 states, including several of AWK/WTRG operating jurisdictions, and is pending before state legislatures in three more states.

What factors explain premium water valuations vs other regulated utilities?

Water utilities currently trade at a 30.2x FY2 P/E multiple, at a 11.3x premium to regulated electric/gas utilities trading at a 18.9x blended FY2 P/E multiple. Over the past few years, many investors had difficulty validating the valuation gap, questioning what level is justified. Fundamentally, we believe higher EPS/DPS growth trajectory, both historically and pro-forma, serves as the primary driver, with water utilities having grown EPS at a ~3%/2% CAGR above electric/gas utilities, respectively, over the past 10 years. The next task is determining how long water utilities can sustain this earnings gap, which we quantify in the following section. Below, we note a few factors (both quantitative and qualitative) that account for premium water valuations vs regulated electric detailed below:

Quantitative factors:

- **Longer asset life (D&A premium)** — Our analysis shows that every dollar invested in water assets yields a better return vs that for electric assets, driven by higher useful life (~20 years) extending the earnings potential. This D&A advantage translates into 2% in incremental EPS growth.
- **Continued robust capital program (Growth premium)** — As mentioned in the previous section, water IOUs have significant long-term investment opportunities (pipe replacement, treatment facilities, storage facilities, dams, wells and pumps), supported by favorable regulatory mechanisms to reduce lag in rate recovery. In addition, municipal acquisitions by IOUs continually add additional rate base backlog.

Qualitative factors:

- **Scarcity** — There are only a handful of investable water utilities for public investors. AWK, the largest water utility, has a market capitalization of more than $24 billion, and the remaining 11 investor-owned utilities have a combined market capitalization of just $22 billion. Trading volumes for the smallest water utilities average below 20,000 shares daily, which we believe could be beneficial for larger water IOUs like AWK and WTRG.
- **Take-out potential** — While initially slow, consolidation within the industry has accelerated during the past 30 years. Acquisitions by domestic and international utilities and by private equity has shrunk the group to just 12 investor-owned water utilities, while a handful of other large water utilities are owned by private equity investors. We attribute some of the relative premium of small-cap water utilities to take-out potential.
- **ESG focus** —Investor focus on ESG (environmental, social, governance) factors have increased meaningfully in recent years. While social and governance factors apply to many IOUs, pure-play water utilities satisfy the environmental factor, which could continue to support valuations. We note that AWK is a pure-play water utility, while WTRG now derives ~30% of its earnings from the recently acquired Peoples Gas business.

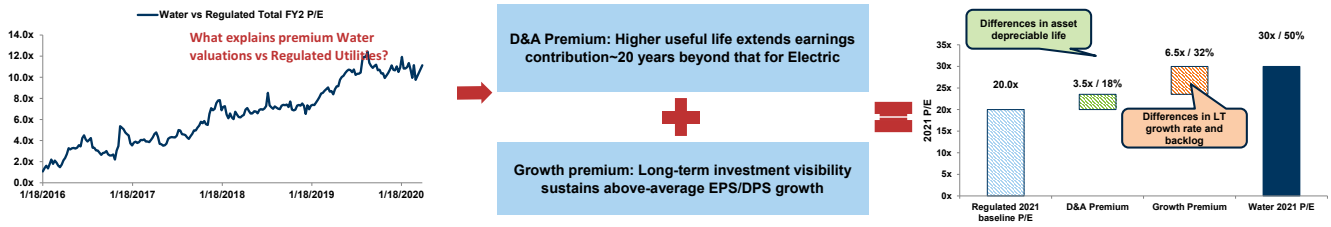
What premium do water utilities warrant?

Our analysis shows that water utilities deserve a meaningful P/E premium above electric utilities, with the current 11.3x premium largely justified.

We believe two quantifiable factors - D&A and investment growth - largely justify the current relative premium. We detail these calculations below.

Exhibit 26: We introduce our analysis on the earnings growth differential between water, electric and gas utilities, which we break into two components to arrive at our 30.0x baseline water multiple vs 20.0x baseline for our regulated coverage



Source: Goldman Sachs Global Investment Research

1. D&A premium:

A higher useful life for water assets (50 years vs 30 years for electric) extends the earnings potential ~20 yrs beyond what that realized for electric assets, with earnings differential increasing steadily over time, warranting for a 17%/3.5x premium for each dollar invested in rate base.

Exhibit 27: We attribute around 18% (3.5x) of water utilities' current 57% (11.3x) premium vs Regulated Utilities to longer depreciable asset life for water assets

GS 2020 Water baseline multiple

Hypothetical average Rate Base/ Net Income ($mn) assuming an initial investment of $100mn and 30/50 yrs of useful life for an Electric/Water Utility

Source: Goldman Sachs Global Investment Research

2. Growth premium:

Even excluding the EPS advantage from D&A, we expect the water utility industry's significant investment backlog supporting continued above-average EPS growth (7% for water vs. 5% for electric) longer-term. We arrive at our 32%/6.5x premium based on a 15-year relative dividend-discount model (DDM), which we believe could prove conservative given AWWA's estimated $1 trillion in water pipe replacement needs through 2035.

Exhibit 31: We justify the remaining 32% (6.5x) premium based on significant water pipe investment needs that should sustain water utilities' higher EPS growth profile versus electric utilities

AWK/WTRG both stand to benefit from robust investment backlog

We see both AWK and WTRG able to sustain their robust water rate base growth outlook for at least the next 15 years. The AWWA's estimated $1 trillion in water pipe replacement needs in the U.S. - through 2035 - could imply around $40bn/$10bn of investment backlog for AWK/WTRG based on their respective market share (by customer connections). Given $13.7bn/$5.0bn YE2019 rate base for AWK/WTRG, respectively, we believe the these investments could support 3x/2x in rate base by 2035, or a 6.5%/4.9% rate base CAGR. While this growth rate alone could signal a slowing of earnings growth power, we note this does not account for additional rate base opportunities from ongoing municipal acquisitions or investments in new

For the exclusive use of INSOO.KIM@GS.COM

infrastructure, which we believe will continue to extend and expand organic investment opportunities. We view this long-term investment visibility as a key justifying factor for water utilities' relative premium valuations.

Exhibit 37: We see meaningful pipe replacement needs for both AWK/WTRG long-term...
Potential Investment Opportunity

Upgrade AWK to Buy - Best-in-class growth, ESG-friendly profile justify premium

We view large-cap AWK's best-in-class 8.3% EPS growth, below-average beta, and its ESG-friendly profile as deserving of the highest premium valuation in our coverage universe and see 16% potential total return based on our $146 price target.

AWK	12m Price Target: $146	Price: $127.24			Upside: 14.7%

	EPS ($)	0.73	0.76	0.97	1.38

Source: Company data, Goldman Sachs Research estimates, FactSet. Price as of 13 Apr 2020 close.

Source: Goldman Sachs Global Investment Research

We upgrade AWK from Neutral to Buy given 1) continued best-in-class earnings and dividend growth in our coverage universe, 2) long-term visibility of above-average growth from organic investments and municipal system acquisitions, 3) its ESG-friendly status as the only large-cap pure-play water utility, and 4) our updated target multiple and premium that imply a 16% total return.

We see a long runway of water infrastructure investment opportunities that should sustain AWK's above-average growth. The aging water and wastewater infrastructure in the United States is in need of replacement and modernization. In addition, increased regulation related to water quality and the management of water and wastewater residual discharges are also primary drivers for the need to modernize the country's water and wastewater infrastructure. We note AWK is well positioned to benefit from ~$40bn in potential investment over the next 15 years, given the company's ~4% market share (based on customers served) and AWWA's estimated $1 trillion in water investment needs. AWK already plans to invest almost $20 billion to the regulated utilities (pipe replacement, system upgrades) over the next 10 years, sustaining its 7-8% rate base CAGR target longer-term.

We expect municipal acquisitions continue to provide an additional growth layer. As mentioned in the previous sections, the water utility space is very fragmented, with the bulk of the customers in the U.S. still served by municipal utilities. With the majority of AWK's utility jurisdictions allowing fair market value (FMV) treatment for municipal acquisitions, we expect the company to continue its consistent acquisition track record

For the exclusive use of INSOO.KIM@GS.COM

that should contribute 1-2% of the 7-10% EPS CAGR guided range. Along with the inherent financial advantages of FMV, we note that acquisitions add incremental infrastructure investment opportunities to bolster AWK's rate base growth longevity.

AWK carries a stable balance sheet, improving through 2022. While we acknowledge AWK's relatively high ~60% debt/cap levels, management at the recent investor day announced plans to issue $500mn of equity at around the mid-point of the 2020-2024 investment plan. Our model continues to embed the $500mn issued by YE2022, resulting in a 58% debt/cap in 2022, and an improvement in FFO/debt from 15% in 2020 to 17% in 2022. Based on the current A/Baa1 credit rating, we do not anticipate any additional equity needs beyond the guided levels.

We keep our EPS estimates unchanged at $3.88/$4.24/$4.58 for 2020-2022 and see EPS growing at 8.3% CAGR from 2019-2022, at the mid-point of the company's 7-10% guidance range, contributed by 7-8% from regulated utilities and 1% from the market based business. Primary drivers of growth continue to include robust capital investments, customer growth (both organic and via municipal acquisitions), O&M management, with some dilution in 2022 from the $500mn equity issuance. We continue to assume 10% annual dividend through 2022, resulting in a 55%-57% payout.

We raise our 12-month price target to $146 (from $134 previously) derived using a 34.5x 2021E P/E multiple (vs 31.5x prior). Our revised P/E multiple incorporates our new water base P/E multiple of 30.0x (calculated in prior sections), as well as a 3x (10%) premium to account for AWK's above-average growth and favorable ESG profile. While the water utility peer group is fairly limited, AWK is currently trading at a 30.0x P/E on 2021E, largely in-line with peers. We believe AWK should trade at the highest multiple among water utilities and relative to our overall coverage universe.

Key downside risks include 1) water quality issues that result in customer health risks, leading to significant financial and regulatory impact, 2) inability to consistently manage operating costs, 3) unfavorable turn in regulatory environment that negatively impacts robust earnings growth potential, 4) lower-than-expected growth at the non-regulated segments, which lowers AWK's best-in-class growth rate, and 5) reduced ESG fund flows that impact further multiple expansion as investors turn to other qualifying investments.

Company Overview

American Water Works (AWK), remains the largest publicly traded US water utility at more than $24bn in market cap, provides more than 14 million people with drinking water, wastewater and water-related services in almost 45 US states and 2 Canadian provinces. The company operates two divisions: (1) the Regulated segment, representing 86% of 2019 revenues and (2) the Market Based Operations segment, which comprises the remaining 14%. The key states served by AWK's regulated utilities are summarized in Exhibit 48.

For the exclusive use of INSOO.KIM@GS.COM

Exhibit 48: AWK's regulated segment exposure is distributed across sixteen states with bulk of earnings from seven states

Infrastructure Replacement surcharges: Allows rates to change periodically, outside a general rate case proceeding, to reflect recovery of capital investments made to replace infrastructure necessary to sustain safe, reliable services for our customers. These mechanisms typically involve periodic filings and reviews to ensure transparency.
Utility plant recovery mechanisms: Allows recovery of the full return on utility plant costs during the construction period, instead of capitalizing an allowance for funds used during construction. In addition, some states allow the utility to seek pre-approval of certain capital projects and associated costs. In this pre-approval process, the PUC may assess the prudency of such projects.
Expense mechanisms: Allows changes in certain operating expenses, which may fluctuate based on conditions beyond the utility's control, to be recovered outside of a general rate case proceeding or deferred until the next general rate case proceeding.
Revenue stability mechanisms: Separates a utility's cost recovery from the amount of water it sells to recover its fixed costs and ongoing infrastructure investment needs. Such a mechanism adjusts rates periodically to ensure that a utility's revenue will be sufficient to cover its costs, regardless of sales volume, including recognition of declining sales resulting from reduced consumption, while providing an incentive for customers to use water more efficiently.
Future test year: A test period used for setting rates, which begins with the date new rates are effective. This allows current or projected revenues, expenses and capital investments to be collected on a timelier basis.
Fair Market Legislation(FMV): Allows regulated water companies to pay a fair market value for the purchase of water and wastewater systems. Before these changes, system values were determined by their depreciated original cost, which generally did not reflect a reasonable market value for those assets and became a barrier to a sale.

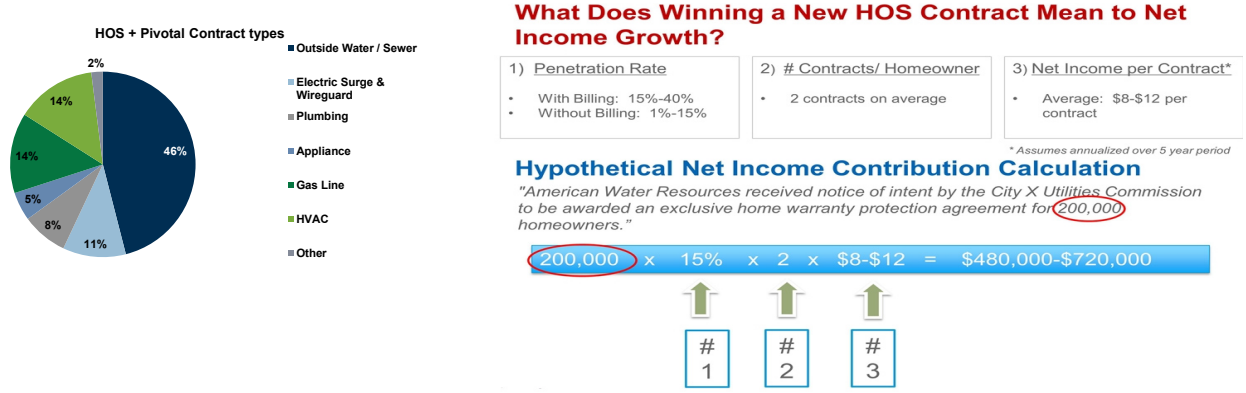
Source: SNL Financial, Company reports, Goldman Sachs Global Investment Research

In addition to American Water's core regulated franchise, AWK owns and operates complementary water-related businesses as part of its Market-based segment which include:

The Homeowner Services Group- which provides warranty protection programs to residential and smaller commercial customers to protect against repair costs for interior and exterior water and sewer lines, interior gas and electric lines, heating and cooling systems, water heaters and other home appliances, as well as power surge protection and other related services. The current porfolio includes the June 2018 acquisition of Pivotal Home Solutions, which increased the segment's customer base from 0.9mn to 1.5mn. The company also partners with municipalities, utilities and other organizations to offer protection programs to customers serviced by, or affiliated with, those municipalities, utilities and organizations. The term of these partnership agreements is typically three to five years, with mutual optional renewals; each customer generates around $20-$40mn of net income for this segment, which reflects around half or more of AWK's 14% market-based earnings. As of YE2019, the Homeowner Services Group had approximately 3 million customer contracts in 43 states.

For the exclusive use of INSOO.KIM@GS.COM

Exhibit 49: The Homeowner Services Group houses ~3 million contracts in 43 states, with a potential market opportunity of 30mn contracts...
Homeowner services business profile



Source: Company data, Goldman Sachs Global Investment Research

Military Services Group - provides water and wastewater services to the U.S. government on military installations; operates on 16 military installations under 50-year contracts with the U.S. government as part of its Utility Privatization Program. The scope of these contracts generally includes the operation and maintenance of the installation's water and wastewater systems and a capital program focused on asset replacement and, in certain instances, systems expansion. The backlog of revenue associated with the current U.S. government contracts is approximately $4.3 billion, with an average remaining contract term of 42 years.

Initiate WTRG at Neutral – Robust water/gas growth already reflected in SOTP

While we see Aqua's recent acquisition of Peoples Gas providing upside to rate base and EPS growth longer-term, we view current valuations fairly crediting this growth in addition appropriately reflecting the company's water/gas utility mix (versus pure-play water prior). Our $45 price target implies an 7% total return versus 15% for Regulated Utilities.

Source: Goldman Sachs Global Investment Research

We initiate coverage on Essential Utilities, Inc. (WTRG) - formed by the merger of Aqua America and Peoples Gas - at Neutral with a 12-month price target of $45. We view the 9+% combined rate base growth (including municipal acquisitions) driving a robust 6.6% EPS CAGR from 2019A-2022E. However, we view current valuation already reflecting these positive qualities, with just 7% total return based on our water/gas SOTP price target, versus 15% for Regulated Utilities.

Peoples Gas acquisition provides additional growth...

Peoples Gas acquisition elevates rate base growth profile. We see 10%+ rate base growth at Peoples Gas from 2019A-2022E primarily driven by long-term visibility of pipeline replacement projects. We note that Peoples has identified more than 2,700 miles of bare steel and cast iron pipe to be replaced under its Long-term Infrastructure Improvement Plan (LTIIP) by 2034 in its PA service territory, which at ~180-200 miles/year of pipe replacement, implies more than 15 years of increased capital spending to support around 9% rate base CAGR during the period. Along with the majority of these investments eligible for distribution system improvement charge (DSIC) that help reduce regulatory lag, we expect Peoples Gas to benefit from favorable tax election, as detailed below.

Tax repairs election should help maintain robust EPS growth while providing incremental funding for investments. WTRG plans to elect tax repairs for Peoples

For the exclusive use of INSOO.KIM@GS.COM

Gas' PA utility, which comprises more than 90% of the gas customer base. **What is tax repair?** It essentially allows the company to expense certain utility asset improvement costs that were previously capitalized and depreciated for book and tax purposes. For PA, which allows flow-through accounting, the utility is able to keep the incremental earnings and cash from the lower tax rate (still collected in customer bills at the higher tax rate), supporting financing needs while reducing rate case cycles. We note WTRG's PA water utility elected tax repairs in 2012 (now expired), which enabled it to record robust earned ROEs while staying out of a rate case for almost 10 years. For the gas utility, we expect WTRG to allocate qualified assets over a longer investment period, reducing the sudden jump in earnings growth recorded when implemented for the water utility. Our model embeds ~10.5% earned ROEs for Peoples Gas through 2022 versus 10.2% allowed, reflecting the tax repairs benefit.

We expect merger synergies to benefit EPS through 2022. With the bulk of the Peoples Gas service jurisdictions - Pennsylvania - sitting on top of Aqua America's PA water utility area, we expect the combined company to benefit from merger synergies related to various operations and system integration. Our model embeds 5% of combined O&M as acquisition synergies, resulting in flat to 1% O&M CAGR from 2019A-2022E for both water and gas utilities.

...to a fundamentally robust water growth story

We expect combined 9.7% water rate base CAGR (including acquisitions) from 2019-2022 driven by a robust organic capital program... The water sector is extremely capital intensive, given its extensive pipe and main infrastructure system as well as treatment facilities, storage facilities, dams, wells and pumps. As shown in Exhibit 37, the American Water works Association's (AWWA), most recent estimates about $1 trillion will be needed in the next 15 years to upgrade the country's water systems, both public and private, to meet environmental standards. At the Water business, we expect ~$400-$500mn in capital spending each year underlying the company's 7% rate base growth CAGR.

...as well as growth via municipal transactions supported by FMV legislation. Given the fragmented nature of the water utility industry, as detailed in the prior sections of this note, we expect WTRG to continue its robust municipal acquisition strategy to support and sustain its growth. The vast majority of WTRG's jurisdictional states currently allow fair market value (FMV) accounting that should provide continued incentive for acquisitions. In 2018, Essential Utilities closed 6 municipal acquisitions, adding more than 13,700 customers and more than $100 million of rate base. In September 2019, the company entered into a purchase agreement to acquire the wastewater utility system assets of the Delaware County Regional Water Quality Control Authority ("DELCORA"), which consists of approximately 16,000 customers in 42 municipalities in Southeast Pennsylvania for $276,500. If approved by the Pennsylvania Public Utilities Commission (PUCO), this acquisition would be the largest water and wastewater deal in state history. We note that every $100 million in rate base from acquisitions that are added through municipals contributes ~$5 million in earnings, or $0.02 in EPS.

For the exclusive use of INSOO.KIM@GS.COM

Relatively stable balance sheet, although somewhat levered given Peoples acquisition

Following the Peoples Gas acquisition, we see WTRG maintaining around 50% debt/cap through 2022, along with FFO/debt at ~12% during the period. We note S&P's "A" issuer credit rating targets FFO/debt to remain at or above 12% longer-term, with sustained lower levels a potential risk for a downgrade. In addition, we note around 25-30% of debt resides at the parent, somewhat elevated in our view. However, we believe a one-notch credit downgrade would still place WTRG's rating around the utilities average; we do not see this as a meaningful risk.

Will ESG momentum continue post gas integration?

In recent years, the water industry has seen increased interest from ESG investors contributing to a significant expansion of water premium vs the average electric/gas multiple. During the period from 2014 to 2017, water utilities traded at an 11% to 28% premium to the regulated group. This premium expanded in 2018 and 2019 with the water premium currently at a 58% premium to the average regulated multiple. WTRG's premium also expanded from 19% in 2017 to 34% in 2019. However, we believe that a change in WTRG's profile from a pure play water utility to a gas/water utility could prove to be a headwind to this premium expansion going forward, in addition to investors' utilization of a more SOTP valuation approach (utilized in deriving our price target).

Robust growth largely priced in - Initiate Neutral

Our $45, 12-month price target is based on an SOTP valuation methodology. Our 2020-2022E EPS estimates of $1.56/$1.65/$1.78 reflects a 6.6% CAGR from 2019-2022E, with potential upside to growth beyond 2022 as WTRG reduces regulatory lag on both organic investments as well as added rate base from municipal acquisitions. To arrive at our SOTP-based price target, we apply our new 30x base water target P/E multiple to 2021E EPS for the water utility segment, along with a 22x P/E multiple to 2021E EPS for the gas utility segment. Our gas multiple reflects a 10% (or 2x) premium to our 20x base gas target P/E, which reflects above-average rate base and EPS growth, as well as our constructive view of PA regulation (which makes up over 90% of the gas utility customer base).

We view WTRG's current valuation as fairly representing the company's water/gas utility mix, with our $45 target reflecting a 27.3x P/E, a discount our 30x base water target P/E for pure-play water utilities like AWK. **Upside risks to our call** include: 1) Peoples Gas acquisition synergies exceed our expectations, elevating EPS growth profile, 2) tax repairs election for the PA gas utility elevates earned ROEs even above our estimate, and 3) WTRG continues to benefit from ESG fund flows, despite its water/gas utility mix profile on a pro-forma basis. **Downside risks to our call** include: 1) PA regulation turns less constructive, 2) growth from municipal acquisitions slows, and 3) WTRG credit rating is downgraded.

Infrastructure Replacement surcharges: Allows rates to change periodically, outside a general rate case proceeding, to reflect recovery of capital investments made to replace infrastructure necessary to sustain safe, reliable services for our customers. These mechanisms typically involve periodic filings and reviews to ensure transparency.
Utility plant recovery mechanisms: Allows recovery of the full return on utility plant costs during the construction period, instead of capitalizing an allowance for funds used during construction. In addition, some states allow the utility to seek pre-approval of certain capital projects and associated costs. In this pre-approval process, the PUC may assess the prudency of such projects.
Expense mechanisms: Allows changes in certain operating expenses, which may fluctuate based on conditions beyond the utility's control, to be recovered outside of a general rate case proceeding or deferred until the next general rate case proceeding.
Revenue stability mechanisms: Separates a utility's cost recovery from the amount of water it sells to recover its fixed costs and ongoing infrastructure investment needs. Such a mechanism adjusts rates periodically to ensure that a utility's revenue will be sufficient to cover its costs, regardless of sales volume, including recognition of declining sales resulting from reduced consumption, while providing an incentive for customers to use water more efficiently.
Future test year: A test period used for setting rates, which begins with the date new rates are effective. This allows current or projected revenues, expenses and capital investments to be collected on a timelier basis.
Distribution System mprovement Charge ("DSIC") mechanism: Utilities are allowed to recover costs related to repair, replacement or improvement of eligible distribution property that has not previously been reflected in rates or rate base. Through a DSIC, subject to an earnings test, a utility may recover the fixed costs of eligible infrastructure incurred during the three months ended one month prior to the effective date of the charge, thereby reducing the historical regulatory lag associated with cost recovery through the traditional rate-making process.
Fair Market Legislation(FMV): Allows regulated water companies to pay a fair market value for the purchase of water and wastewater systems. Before these changes, system values were determined by their depreciated original cost, which generally did not reflect a reasonable market value for those assets and became a barrier to a sale.
**In Kentucky, Delta has a pipe replacement program tariff, which allows adjustment of regulated rates annually to earn a return on capital expenditures incurred subsequent to Delta's last rate case which are associated with the replacement of bare steel and vintage plastic pipe.

Company Overview

Essential Utilities Inc. (WTRG) formed from Aqua America's acquisition of privately owned Peoples Gas, completed on March 16, 2020. Essential's common stock

For the exclusive use of INSOO.KIM@GS.COM

began trading under the NYSE ticker symbol (WTRG) in early February. WTRG, with a market cap of $9.6 bn (as of 13th Apr close) market cap, serves more than 1 million water customers in 8 states and more than 740,000 gas customers in 3 states. WTRG projects 6-7% (ex. acquisitions) and 8-10% rate base growth for its water/gas utilities based on 2019 projected rate base of $5 billion and $2.3 billion, respectively. The key states served by WTRG are summarized in the Exhibit 52. The company operates through the following segments:

- **Regulated Water** (~70% of total operating revenues):
  - 2018 operating revenues were derived principally from the following states: ~53% in Pennsylvania, 9% in Ohio, 9% in Texas, 9% in Illinois, and 6% in North Carolina
  - The company's municipal growth strategy has accelerated significantly, largely due to the passage of Fair Market Value legislation(FMV) in several of its states. Aqua has added more than 33,000 new customers from 10 closed or signed municipal acquisitions in 2018
- **Regulated Gas** (~30% of total operating revenues):
  - The regulated gas business consists of 4 utility companies - Peoples Natural, and Peoples Gas (Formerly Peoples TWP) are regulated by the Pennsylvania Public Utility Commission. Peoples Gas – West Virginia is regulated by the West Virginia Public Service Commission. Peoples Gas – Kentucky is regulated by the Kentucky Public Service Commission
  - ~740,000 customers and 1,500 employees in western Pennsylvania, Kentucky and West Virginia
- **Market based business** (<1% of total operating revenues):
  - **Aqua Infrastructure**- provides non-utility raw water supply services for firms in the natural gas drilling industry
  - **Aqua Resources**- provides water service through O&M contracts with a municipal authority and another party close to utility companies' service territory; and offers, through a third-party, water and sewer line protection solutions and repair services to households

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

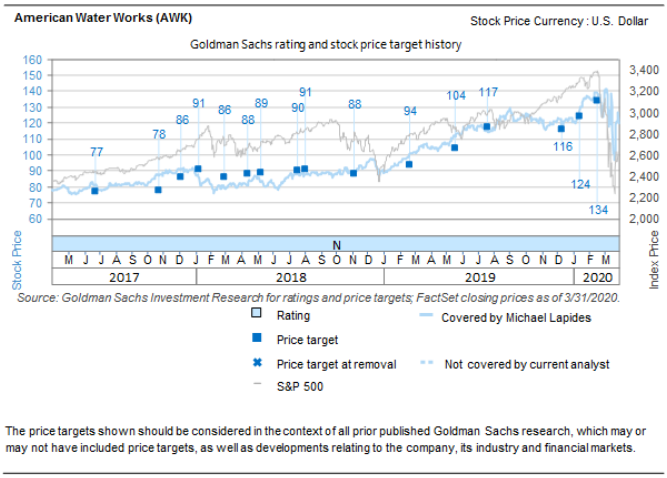
As of April 9, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,023 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage groups and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage groups and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage groups: A list of all stocks in each coverage group is available by primary analyst, stock and coverage group at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage group as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. New opportunities for growth: Despite their ESG credentials, regulated UK and US utilities have performed less well than energy transition-focused stocks because of their status as bond proxies. The water proposals set out by the US government for accelerated investment and the UK's Green Recovery proposals show policy-makers are waking up to the need to improve resilience in water and waste water provision.

Opportunities from Federal Water spending plans: The US administration has proposed a USD111bn budget, of which USD10bn is for monitoring and cleaning up toxic (per and polyfluoroalkyl substances) and investing in rural water systems, household wells, and septic units. USD56bn is proposed for modernising drinking water, wastewater, and storm water conveyance and treatment. The remaining USD45bn will be used to remove lead drinking water pipes. We raise our target prices for both US water companies we cover, which are well placed to benefit from the focus on asset rehabilitation and their expertise in removing water contaminants to address historical municipal underinvestment.

UK has insufficient investment – M&A could be the way to grow: In contrast, Ofwat's PR19 price control focused on reducing customer bills rather than allowing RCV growth for the listed companies, except for Severn Trent. An announcement is due in May on whether it will allow the Green Recovery investment proposed by the companies or if it will be scaled back. We increase our risk-free rate in line with HSBC's new UK bond yield assumption, which reduces our DCF valuation for UU (UU/ LN, 968p, TP 910p vs 960p, downgrade to Reduce from Hold). We assume Pennon and Severn Trent can deliver higher long-term growth from their more ambitious Green Recovery plans. Severn Trent (SVT LN, 2,447p, TP 2,570p vs 2,450p) remains Hold but we downgrade Pennon (PNN LN, 1,030p, TP 1,090p) to Hold from Buy after its strong recent performance.

Executive summary

- New growth opportunities in the US from USD111bn water system improvements
- UK's Green Recovery proposals not sufficient to avoid bond proxy status for stocks; M&A needed to accelerate growth
- US water stocks AWK and WTRG, both rated Buy, offer growth potential; in the UK, we downgrade PNN to Hold from Buy after a strong performance, SVT remains Hold, UU offers limited growth potential and we downgrade to Reduce from Hold

New growth opportunities in UK and US water

The water proposals set out by the US government and the UK's Green Recovery proposals show governments are waking up to the need to improve resilience in water

Regulated UK and US utilities have not performed as strongly as energy transition stocks, because of their perceived status as bond proxies. UK water stocks are down 21.6% over 12 months relative to the FTSE Utilities Europe index compared with Drax (DRX LN, 412p, Buy) up 40.3%. However, they too have strong ESG credentials. The water proposals set out by the US government for accelerated investment and the UK government's Green Recovery proposals show policy-makers are waking up to the need to improve resilience in water and waste water provision.

The UK water companies have bond proxy status unless accelerated growth can be proven. In HSBC's report *The Price is right*, 14 April 2021, our Fixed Income strategists increased their 10- year RfR assumptions. "We move our 10-year gilt year-end forecast to 50bp (from 30bp) because some MPC members are concerned about the risk of inflation proving more persistent than elsewhere, and we fear market expectations could overshoot". We increase our risk-free rate used in our UK water company valuations in line with HSBC's new bond yield assumption. This reduces our DCF valuation for United Utilities and leads us to downgrade our rating to Reduce from Hold. We assume that Pennon and Severn Trent can deliver higher long-term growth from their more ambitious Green Recovery plans, which offset the higher WACCs we calculate for each company. We retain our Hold rating on Severn Trent but downgrade Pennon to Hold from Buy after its strong recent share price performance.

The UK

DEFRA and Ofwat likely to provide preliminary guidance on the Green Recovery Initiative in May

We expect the Department for Environment, Food and Rural Affairs (DEFRA) and the water industry regulator Ofwat to provide preliminary guidance on the projects submitted by the water companies under the Green Recovery Initiative in May. For the three UK water companies under our coverage this will accelerate their regulated asset growth. Severn Trent has the largest Green Recovery proposal of GBP730m as a percentage of its current five-year investment programme among the listed UK water companies, which if approved would lead to a rise of 24% in its existing capex plans of cGBP3bn for the current AMP (alternative

performance measures). Pennon has a capex plan of GBP1bn for the current AMP and has submitted proposals for GBP92m worth of plans under the Green Recovery initiative to the regulator; if approved it would increase capex by c9%. United Utilities has proposed GBP135m of additional capex, marking a c7% increase in its existing plan of GBP2bn for the current AMP.

Downgrade Pennon to Hold after strong recent performance, TP of 1,090p unchanged; better to travel than to arrive

The ability to create value through M&A, as Pennon did with Bournemouth Water, is a much more arduous task

Pennon has had a strong share price performance recently, driven by M&A expectations and strong initial regulatory performance. Its reinvestment decisions will provide an interesting regulatory precedent depending on where it chooses to invest its waste proceeds for growth. It could be bold and buy a large water company and plan ambitious expansion or look at a smaller water-only company and give the proceeds back to shareholders. As the sector resilience needs are significant, we assume management may think big. The case for paying a premium to Regulatory Capital Value (RCV) – the regulated asset base has been strengthened by National Grid's (NG/ LN, 915p, Buy) premium paid in March 2021 for WPD (a fast-tracked sector leader). Many of Pennon's unlisted water potential targets have a combination of complicated (with derivatives) balance sheets with higher leverage, or significant operational challenges. The ability to create value as it did with Bournemouth Water is a much more arduous task.

Severn Trent remains Hold, raise TP to 2,570p from 2,450p on higher longer term growth and higher performance rewards

Severn Trent continues to set itself out as an innovator with underlying growth and ideas for green investment

Severn Trent has applied for a cGBP730m package under the Green Recovery initiative. This investment plan is above its base capex plan of GBP3bn for the period 2021-25 (on top of the 4% RCV growth target for AMP7, the highest of its peers). Severn Trent continues to set itself out as an innovator with underlying growth and ideas for green investment. Management said in 2020 that M&A was not part of its strategy. It still has much work to do on Hafren Dyfrdwy, the small water company it owns. Management said in its pre-close statement at the end of March that Severn Trent remains on or ahead of target for almost 80% of its customer performance measures and has increased its guidance for outperformance on customer performance incentives (ODIs) this year from 'at least GBP25m' to 'at least GBP50m'. Pennon and UU shares have outperformed Severn Trent but in our view both have had a higher profile: Pennon through M&A and United Utilities at its CMD. However, Severn Trent consistently trades at a premium to RCV to the other two listed stocks, currently at c20%, and therefore we do not see sufficient additional value to justify a Buy rating.

Downgrade United Utilities to Reduce from Hold, cut TP to 910p from 960p on higher gilt yield assumptions and brought forward phasing of investment

UU still struggles to avoid its bond proxy status. Of all the water stocks under our coverage it has the highest dividend yield and the lowest Green Recovery list of potential projects compared to its current investment. It continues to bring forward investment to drive ODI performance but management seems to have backtracked on exploring M&A opportunities in UK water despite a significant operational improvement.

Despite UU's significant operational improvements, its asset base is shrinking

Despite UU's significant operational improvements, its asset base is shrinking. Ofwat is looking at the Haweswater Aqueduct Resilience Programme (HARP) project as a blueprint for attracting additional capital for major projects to the sector but it will have to prove convincingly that project finance without government guarantees with the additional cost of finance, lawyers, and cost duplication will deliver better value to shareholders. HARP in particular is a risky project because of the tunnelling required through hills in the Lake District, which is not a core competence for UU. We remain sceptical that it can be delivered at a lower cost to UU's customers bearing in mind that Thames Tideway, another significant project (Thames Water), needed a government guarantee. If HARP could be delivered more cheaply by United Utilities' management team it would form part of its regulatory asset growth post 2025.

The US

Federal proposal for USD111bn for water system improvements, most notably replacing lead pipes in drinking water systems

The US government set out its proposal, the 'American Jobs Plan', on 31 March 2021, which is a wide-ranging job creation and infrastructure rehabilitation plan. Among its many parts, it includes a proposal to allocate USD111bn for water system improvements, most notably replacing lead pipes in drinking water systems.

The larger privately held and investor-owned (IOU) water utilities including American Water Works and Essential Utilities, the two largest under our coverage, have the technological expertise to test and treat drinking water as additional federal and/or state contaminant levels are adopted. They also have the expertise in project management to rehabilitate waste water systems, which arguably have been neglected even more than the clean water network.

Funding aside, regulatory mechanisms such as Fair Market Value and the use of infrastructure charges have been major growth drivers for these listed companies

Funding aside, regulatory mechanisms such as Fair Market Value and the use of infrastructure charges have been a major growth driver for these listed companies. This has enabled them to:

- purchase regulated water systems at a premium to rate base (the appraised value),
- pay a premium for the municipality to redeploy the proceeds for other priorities,
- increase water rates incrementally each year in order to replace pipes.

The costs and risks of expansion within the states in which these two companies operate, has delivered savings through economies of scale and have also spread the cost of asset rehabilitation, especially for poor communities across the entire state rate base. US water assets are significantly underinvested compared to the UK. This underpins the mid-single digit earnings growth expected by the listed utilities.

Latest developments

HSBC's US Economics team on 15 April 2021 published *US Fiscal Policy*, updating on the Biden administration's latest proposals for spending on infrastructure and other areas of over USD2bn. We extract from this report below.

"Republican senators have indicated that they are preparing a smaller, counterproposal that would be focused on a narrower set of infrastructure investments compared to the American Jobs Plan. Republican Senator Shelley Moore Capito said on 14 April that the budgetary cost of such a plan could be in the range of USD600bn to USD800bn.

President Joe Biden is scheduled to address a joint session of Congress on 28 April. At that point, markets will be looking for some clarity about whether bipartisan discussions on infrastructure have yielded any progress or whether Democrats are likely to pursue enactment of American Jobs Plan proposals via budget reconciliation, relying on support strictly from Democratic lawmakers. In either case, it will be important to monitor the momentum of the discussions over the course of the early summer given that Congress typically goes on recess during the month of August".

American Water remains Buy, raise TP to USD183 from USD175 on higher growth

American Water plans to spend USD22-25bn over the next ten years on water quality, essential infrastructure replacement and regulated customer growth. This underpins regulated future revenue growth.

Its medium-term aim is for an EPS CAGR of 7-10% in 2021-2025. 1-2% growth is to come from Market-Based Businesses, 1-2% growth from Regulated Acquisitions and 5-7% growth from Regulated Investment (capex). Dividend growth is targeted at the high end of 7-10% while maintaining a payout ratio of 50-60% of earnings.

American plans to invest USD22-25bn of capital over the next ten years

It plans to maintain a predominantly regulated risk profile with capital-light, cash-generating Market-Based Businesses representing 12% of EPS in 2024.

Essential targets investment of USD3bn from 2021 to 2023 to maintain a 70/30 water to gas mix of business

Essential remains Buy, raise TP to USD57 from USD55 on higher growth

Essential Utilities' management targets investment of USD3bn from 2021 to 2023 to maintain a 70/30 water to gas mix of business measured by size of regulated rate base. To complement its infrastructure rehabilitation, Essential is also investing in municipal acquisitions in the US states in which it operates. We believe its recent performance has been muted because it remains embroiled in the political complexities of its Delcora acquisition, despite the legality of the contract. We think this could continue to depress its share price performance. Ultimately customers in Delaware will have to pay for asset rehabilitation even if Essential is not successful. There are other opportunities for expansion in water. In gas it has clear visibility for enhanced asset rehabilitation, which will also reduce carbon emissions.

Opportunities from Federal Water spending plans

- The challenge of US water provision
- Lead pipe replacement and water contaminants removal are opportunities
- US water companies benefit from a highly fragmented, underinvested market

The challenge of US water provision

Clean water

Renewal and replacement of ageing water and wastewater infrastructure, as well as the financing for capital improvements, the top two issues facing the US water industry

Renewal and replacement of ageing water and wastewater infrastructure, as well as the financing for capital improvements, are the top two issues facing the US water industry according to the 2021 Infrastructure Report Card.

Funding for drinking water infrastructure has not kept pace with the growing need to address ageing infrastructure systems, and current funding sources do not meet the total needs. Since 2017, there have been signs of improvement with the modest expansion of federal financing programmes and water utilities are raising water rates to fund network investment.

The US Environmental Protection Agency's (EPA) drinking Water State Revolving Fund (DWSRF) provides low-interest loans to state and local drinking water infrastructure projects. The DWSRF programme grew from USD2bn in 2013 to nearly USD3bn in 2018. The EPA's Water Infrastructure Finance & Innovation Act (WIFIA) programme offers the sponsors of large projects (over USD20m) a new financing tool to leverage limited federal resources; stimulate additional investment in drinking water, wastewater, and stormwater infrastructure; and encourage greater private sector participation. By 2019, prospective borrowers had submitted letters of interest requesting over USD21bn in WIFIA loans, including USD3.9bn for drinking water projects. The US government increased its lending capacity from USD2.5bn in 2017 to USD6bn in 2019.

According to an American Society of Civil Engineers' (ASCE) 2020 economic study, the annual drinking water and wastewater investment gap will grow to USD434bn by 2029

US water customers have not paid tariffs, in our view, that allow the cost of infrastructure rehabilitation (in addition to water service provision) compared to markets such as France and the UK. The average nationwide monthly drinking water rate has increased 31% from 2012 to 2018 but more is needed. According to an American Society of Civil Engineers' (ASCE) 2020 economic study, the annual drinking water and wastewater investment gap will grow to USD434bn by 2029.

Wastewater

The majority of the nation's Wastewater Treatment Plants (WWTPs) were designed with an average lifespan of 40 to 50 years. Since the systems were constructed in the 1970s, around the passing of the Clean Water Act in 1972, they are reaching the end of their service lives.

Moreover, utilities face the challenge of meeting increasingly stringent surface water quality regulations for rivers and lakes. Significant infrastructure replacement is needed but clean water investment has tended to be prioritised compared to wastewater. Investor-owned utilities are experts in resilience-related planning and using technological and scientific innovations that produce profitable by-products such as sludge. They can also deliver cost savings from wastewater treatment relative to legacy plant. Today's waste water can be tomorrow's clean water in areas of water stress. In 2019, the federal government invited more than a dozen wastewater and water reuse projects to apply for over USD2.3bn in loans.

Federal Water spending plans

The US government set out its proposal, the 'American Jobs Plan', on 31 March 2021, which is a wide-ranging job creation and infrastructure rehabilitation plan. Among its many parts it includes a proposal to allocate USD111bn for water system improvements, most notably replacing lead pipes in drinking water systems.

The plan offers USD10bn for monitoring and cleaning up toxic (per and polyfluoroalkyl substances), a particular competence of the companies under our coverage

The plan offers USD10bn for monitoring and cleaning up toxic (per and polyfluoroalkyl substances or PFAS) and investing in rural water systems, household wells, and septic units. This is a major focus for US investors. A sum of USD56bn is proposed for modernising drinking water, wastewater, and storm water conveyance and treatment. The remaining USD45bn will be used to remove all of the country's estimated 6-10m lead drinking water pipes. Additionally, the plan provides funding for the 'western drought crisis' by investing in water efficiency and recycling programmes.

Where do the investor-owned utilities fit into these plans?
We look at what has happened historically when large Federal financial resources have been available. Federal money is expected to provide some support, but funding may not be available to all the municipalities in need.

Federal money is expected to provide some support, but funding may not be available to all the municipalities in need

Financially, municipal systems have been facing challenges with limited government funding and competing needs for other services. Operationally, due to a lack of expertise, smaller systems will find it difficult to keep up with increasingly stringent water quality standards over the medium term, even if they have money to replace their lead pipes in the short term. Municipal systems in the medium term will continue to weigh up the advantages of divesting assets for ongoing asset replacement needs and when the expense of testing and treating for higher standards of water is overly burdensome. This will continue to drive acquisition opportunities for the listed water stocks under our coverage.

The larger privately held and investor-owned (IOU) water utilities have the technological expertise to test and treat drinking water as additional federal and/or state contaminant levels are adopted. They also have the expertise in project management to rehabilitate waste water systems, which arguably have been neglected even more than the clean water network.

UK Water

- Announcement to deliver accelerated environmental growth expected next month
- Pennon – premium precedent by National Grid for regulated assets and CMA green light on increased leverage
- HSBC Fixed Income expects an increase in short-term gilt yields

Accelerated environmental growth through Green Recovery

DEFRA and Ofwat will provide preliminary guidance on the projects submitted by the water companies under the Green Recovery Initiative, we believe in May

DEFRA and Ofwat will provide preliminary guidance on the projects submitted by the water companies under the Green Recovery Initiative we believe in May. For all the companies under our coverage this will accelerate regulated asset growth. The UK water sector has lagged the performance of its UK electricity peers. The prospect of more growth and the strong ESG credentials of the listed water companies may lead to a better performance in calendar Q2.

M&A update – Pennon management could be tempted to pay up

M&A: Two recent events may encourage Pennon to pay up: National Grid's 60% premium payment for WPD; and the CMA's lack of endorsement for capital structure sharing with customers

The market is waiting for Pennon to conclude its strategic review on where to redeploy the GBP2.7bn of net proceeds from its waste sale. The easy option would be to enhance earnings through a share buyback and return the proceeds to shareholders. In our experience, water companies under our coverage have always found something to invest in. This is a once-in-a-lifetime to invest for environmental performance and growth. Two recent events may encourage Pennon to pay up:

- National Grid's 60% premium payment for WPD
- The CMA's lack of endorsement for capital structure sharing with customers.

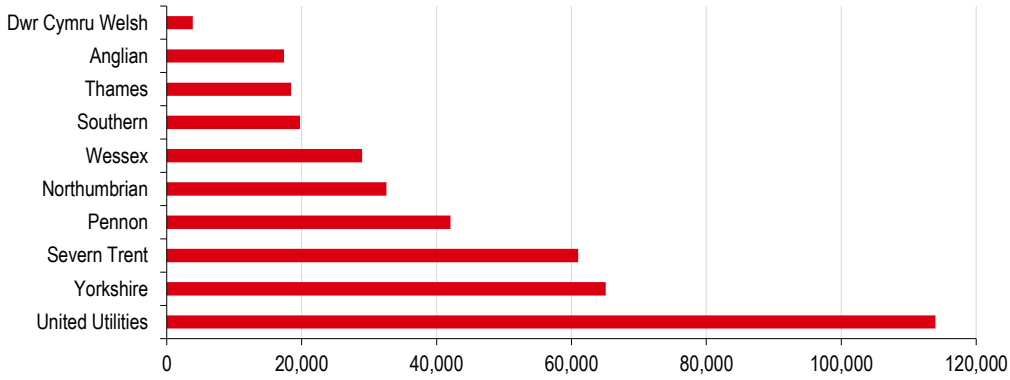
Both suggest that Pennon could pay more for one of the four companies that went to the CMA (Competition and Markets Authority) as it would not have to share the benefits of taking on more debt (to drive down the WACC) with shareholders.

Plenty of assets need accelerated investment – the UK's multiple sewage overflow numbers

According to an investigative report by the BBC's Panorama broadcast on 13 April, UK water companies have been illegally dumping untreated sewage into rivers. Panorama gathered detailed data from ten water companies in England and Wales through environmental information requests. The data suggests seven of the ten companies had treatment works that were breaching their permits by dumping sewage before they were treating the specified volumes. Water companies discharged untreated sewage into rivers more than 400,000 times lasting more than 3m hours last year.

To protect properties from flooding and prevent sewage from backing, treatment works are allowed to release sewage into rivers and streams after extreme weather, such as torrential rain, and when they are operating close to full capacity. This untreated sewage is normally screened and passed through storage tanks before it is dumped. Discharge permits issued by the Environment Agency specify the level of sewage each works has to treat before it can dump untreated sewage. But Panorama's report found some companies are discharging without a permit and/or providing incorrect information to the agency.

Number of storm water overflows, 2020



Source: Environment Agency

This is more an indication that even though the UK's water infrastructure has benefited from significant investment, more is needed

This chart does not imply that UU is exceeding its permitted discharge limits and this absolute chart does not reflect the size or geography of the companies. However, it does reflect that all the overflows were without permit. It merely demonstrates that further resilience investment is needed to reduce these numbers. This is more an indication that even though the UK's water infrastructure has benefited from significant investment, more is needed.

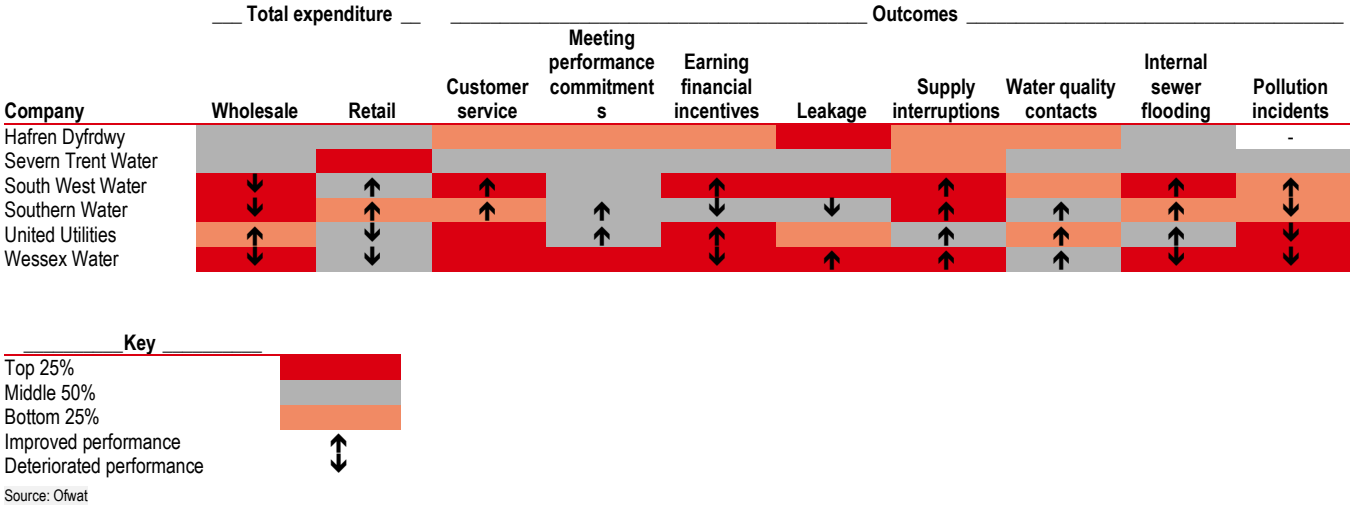
Customers may need to be prepared to accept increases in bills to ensure that less untreated sewage is released into rivers.

Bond proxy status unless accelerated growth can be proven

In HSBC Fixed Income's report *The Price is Right* published on 14 April 2021, the team increased its 10-year RfR assumptions. "We move our 10-year gilt year-end forecast to 50bp (from 30bp) because some MPC members are concerned about the risk of inflation proving more persistent than elsewhere, and we fear market expectations could overshoot".

We increase our RfR in line with HSBC's new UK bond yield assumption (we take an average of short and long-term gilt yields). This leads us to reduce our DCF valuation for United Utilities and we downgrade our rating to Reduce from Hold. We assume that Pennon and Severn Trent can deliver higher long-term growth from their more ambitious Green Recovery plans, which offset the higher WACC we now calculate for each company. We retain our Hold rating on Severn Trent but downgrade Pennon to Hold from Buy after its strong recent share price performance. United Utilities' RCV growth excludes the Haweswater Aqueduct project, which Ofwat is testing to see whether it can be financed more cheaply by project finance. This means its asset base is shrinking and it is hard to see how it will not continue to be seen as a bond proxy and command a yield premium to its peers. We downgrade United Utilities to Reduce from Hold on our higher RfR assumptions, not offset by significant Green Recovery Investment.

Overall Service Performance: Ofwat 2019-2020



Source: Ofwat

We reproduce above Ofwat's overall service performance table for 2019 to assess the task in hand for key companies in the sector. In terms of overall performance:

- Hafren Dyfrdwy, despite being owned by Severn Trent, is still a relatively poor performer on many measures.
- Severn Trent remains in the middle of the pack with an average performance but we know from its H1 presentation that it is working hard to alleviate its long-term weakness in supply interruptions.
- Southern Water is making progress but still has much work to do across many areas.
- South West Water still has to make better progress with water customer contacts, which was meant to be an area where its acquisition of Bournemouth Water was beneficial. It is already making improvements in reduction in pollution incidents.
- Wessex Water remains best in class across more measures than its peers.

Companies

American Water

- Acquisition-led growth accelerating
- Environmental credentials, especially in regard to removal of water contaminants
- Reiterate Buy rating, raise TP to USD183 from USD175

Investment thesis

American Water plans to spend USD22-25bn over the next ten years. This underpins its regulated future revenue growth.

Medium-term aims are for an EPS CAGR of 7-10% 2021-2025

The company's medium-term aims for an EPS CAGR of 7-10% from 2021-2025. adjusted EPS. 1-2% growth is to come from Market-Based Businesses, 1-2% growth from Regulated Acquisitions and 5-7% growth from Regulated Investment (capex). Dividend growth is targeted at the high end of a 7-10% range while maintaining a payout ratio of 50-60% of earnings.

It plans to maintain a predominantly regulated risk profile with capital-light, cash-generating Market-Based Businesses representing 12% of EPS in 2024. The company also plans to invest USD20-22bn of capital over the next ten years for water quality, needed infrastructure replacement and regulated customer growth.

Similarly, rate base growth of CAGR 7-8% is targeted for 2021-2025.

American is seen as one of the few regulated utilities with accelerated growth, which means it has not suffered as much as its peers from a bond proxy negative correlation with rising bond yields

Together this means American Water is regarded as one of the few regulated utilities with accelerated growth, which means it has not suffered as much as its peers from a bond proxy negative correlation with rising bond yields. Recent acquisitions have further underpinned its growth status.

2021 outlook

The outlook for 2021 was set out at the FY 2020 results on 25 February:

- 2021 earnings guidance range of USD4.18 to USD4.28 per diluted share.
- AWK has 44,000 customers in its pipeline through signed acquisitions following regulatory approval, which it expects to complete.
- The company is awaiting final orders for general rate cases in three states and filed for infrastructure surcharges in one state for a total annualised revenue request of USD126m.

Recent M&A activities underpin growth

American Water announced the acquisition of City of York wastewater systems in the state of Pennsylvania, through its subsidiary Pennsylvania American Water, for USD235m on 7 April. This acquisition will add roughly 45,000 connections. The agreement has received approval from York City Council and American Water plans to close the transaction by the end of 2021, assuming it receives the necessary approvals from the regulators. As part of the agreement, it will preserve current wastewater rates for a minimum of three years, offer employment to all of the city's wastewater system employees, establish an in-person customer service centre in

York, provide an upfront deposit of USD20m, and contribute at least USD50,000 in donations to non-profit organisations serving the city and its residents.

In another deal, American Water acquired the wastewater assets of Egg Harbour City in New Jersey for USD21.8m on 30 March. Under the terms of the deal, American Water will invest USD14m in the first ten years for necessary upgrades, including the construction of an emergency interconnection with the subsidiary's regional system. The deal is expected to be completed in the second half of the year, pending approval from the New Jersey Department of Community Affairs and the New Jersey Board of Public Utilities.

Performance against peers

The stock has underperformed the S&P 500 index by 8.5% and underperformed the FTSE USA growth index by 5.7% since 1 January 2021. In the same period, Essential Water's stock underperformed the S&P 500 index by 10.9% and FTSE USA growth index by 8.1%. Both American Water and Essential have performed as bond proxies since the start of the year. American Water appears to have a much greater correlation with the S&P 500 index than an inverse correlation with the US 10-year bond yield. As it accelerates its investment for growth, we expect the shares to continue to move in tandem with the FTSE USA Growth Index peers. This is in marked contrast to its regulated UK water peers, which have performed as bond proxies.

However, a falling UST 10-year yield has helped American Water's share price to move higher recently as it is the largest pure-play water company in the US with a clear growth trajectory and strong pipeline of acquisitive growth planned for the next few years.

Change in estimates

Valuation and risks

We value American Water via three approaches: DCF, target dividend yield, and sum of the parts (using the average of our rate base valuation and peer multiple valuation). Taking the average of the three fair values, which we update, we raise our target price to USD183 from USD175.

- **DCF:** We change our observed Bloomberg five-year beta to 0.79 from 0.5, reflecting volatility relating to interest rate rises in the US. We use a risk-free rate of 2.5%, equity risk premium of 3.0% and a cost of equity of 4.9%, resulting in a higher WACC of 4.2% (previously 3.7%). We update our earnings estimates. Despite the increased beta, recent deals mean we increase our terminal value growth rate by 50bp to 3.5%. This increases our DCF fair value to USD204.4 from USD175.5.
- **Target PE multiple and dividend yield:** We use the weighted average of the US water peer group (70%) and FTSE USA Growth index constituents (30%) to arrive at our PE multiple and target dividend yield. US water peers are now trading at a PE multiple of 36x with a yield of 1.45%, whereas the FTSE growth index is trading at a PE of 36x and yield of 1.25%. Hence, we use a 36x (unchanged) water peer multiple (for our SOTP valuation; see below) and a target dividend yield of 1.4% (unchanged in line with water peers), both in line with the above-mentioned methodology. The fair value from our yield approach is unchanged at USD170.9.
- **Sum of the parts:** In our SOTP approach, we continue to use the 2021e rate base to reflect the company's current growth trajectory (based on 2020e rate base numbers). In this we assume 8% annual growth of the rate base to 2021e. We then use the average of the sum-of-the-parts valuation based on the rate base with a small non-regulated element, and our peer multiple-based valuation of 3.5x price to regulated rate base (proxy for price to book in line with peers). Our new fair value from this method is USD173.3, down from USD179.9.

Our higher target price of USD183 implies upside of 13.4%. We retain our Buy rating as the company has a strong pipeline of accretive acquisitions to be completed in the next few years, which we expect to drive higher rate base growth than previously.

Summary of valuation

Downside risks

If American Water fails to achieve the desired rate case revisions, this could impact its revenue and profit margins. The company may also fail to deliver organic growth. If it fails to keep its momentum in acquiring water systems or gaining O&M efficiency, it may not achieve our forecasts.

Essential Utilities

- The growth proposition with gas decarbonisation investment
- Next catalysts in the regulatory processes, Delcora uncertainty discount should unwind in 2021
- Reiterate Buy rating, raise TP to USD57 from USD55

Investment thesis

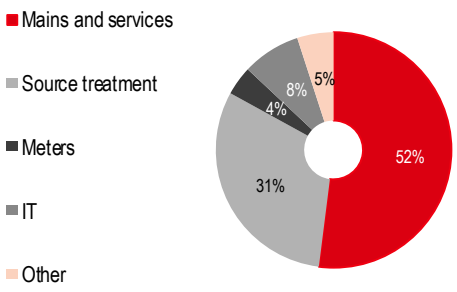
Essential Utilities' management set out its outlook for the period 2021-23 on 11 January, and confirmed it its FY2020 results on 24 February. It targets investment of USD3bn from 2021 to 2023 to maintain a 70/30 water (Aqua) to gas (Peoples) mix of business measured by size of regulated rate base. To complement its infrastructure rehabilitation, Essential is also investing in municipal acquisitions in the US states in which it operates. It has a pipeline of water acquisitions in these states and its accelerated investment programme in gas means it has not suffered as a bond proxy as much as some of its regulated peers. It has underperformed recently because of the well-publicised challenges to its acquisition of Delcora. We believe once either of these is resolved or indeed Essential walks away from the deal, this uncertainty discount should unwind.

2021 outlook

Management targets a range for 2021 EPS of USD1.64-1.69 with growth of 5-7% through to 2023. It will invest USD550m in regulated water and USD450m in its regulated gas segments.

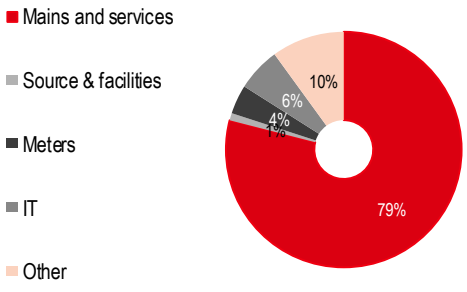
We discussed both its growth and this guidance in our report of 14 January: *Guidance update; ESG acceleration*. Management sees opportunities to add USD500m of rate base growth from a number of acquisition targets but the largest of these, Delcora, has faced a number of headwinds, as we discuss below.

Water segment capex plan through to 2023e



Source: Essential Utilities: Investors presentation – 11 January 2021

Gas segment capex plan through to 2023e



Source: Essential Utilities: Investors presentation – 11 January 2021

Caveat – why growth may not be linear

As with all regulated utilities under our coverage, it is important to note that asset and earnings growth should not be expected to be linear.

For example, Essential Utilities' management pointed out that this year, the company is preparing a water three-year rate case filing in Pennsylvania for its Aqua PA unit. Because the majority of Aqua's rate base is from Pennsylvania, this will result in a short-term earnings lag until it can recover the revenues at the new rates. Indeed, under- or over-recovery of revenues means adjustments are needed in subsequent years. However, M&A does provide some short-term support for earnings growth. Municipal acquisitions generally create a short-term earnings lag as these acquisitions rarely, if ever, earn a full return until they are included in a rate case.

Delcora – getting it done

In the light of uncertainty around the Delcora acquisition, Essential has excluded Delcora contributions from its 2021 guidance

In the light of the uncertainty around the Delcora acquisition, Essential has excluded Delcora contributions from its 2021 guidance. Post the ruling by a judge in favour of Essential's claims of legality of the purchase contract, the county has appealed to the Commonwealth Court. According to management, the ruling may take about six months. In a bid to make a better case for the deal, Essential says it will submit a rate stabilisation plan. Essential further updated that it will not delay the Aqua Pennsylvania rate case due to the pending Delcora deal.

Peoples Gas

According to management guidance, the rate base of gas segment will increase 8-10% pa to 2023

During its investor presentation in February, Essential disclosed an investment plan of USD3bn from 2021 to 2023, with USD1bn being invested in the current year to rehabilitate and strengthen water, wastewater and natural gas systems. According to the management guidance, the rate base of gas segment will increase at 8-10% per year to 2023. For the year 2021, Essential is planning to invest USD450m. Essential management hoped to used tax optimisation (using capital allowances on the balance sheet) to stay out of rates. It seems likely that this option may not be utilised for Peoples Gas. This suggests it will file for rate increases earlier. This will have no effect on earnings from an investor perspective but means customers will pay for the asset rehabilitation earlier than using balance sheet resources.

Performance against peers

Essential's stock has underperformed the S&P 500 index by 10.9% and FTSE USA growth index by 8.1% year-to-date. In our view, this is because of the newsflow on the regulatory and legal challenges to the Delcora acquisition. We believe that some of the issues have been resolved but there are still uncertainties. Essential raised 6,700,000 shares of equity in August 2020 on a forward sale basis which must be exercised by 10 August 2021. The proceeds from this equity raise was primarily for Delcora but also Essential management said, for general corporate purposes, including for water and wastewater utility acquisitions, working capital and capital expenditures.

Feedback from some investors is that the equity raise of USD300m on a deferred basis might still be drawn down even if the acquisition doesn't proceed. Essential management says it is confident there are other acquisition targets that could be funded by equity but a smaller amount of equity might be deployed. Investors need to be reassured that only the appropriate level of equity is raised for the investment needs of the business and Essential is not overcapitalised.

We believe certainty either of the success or failure of the Delcora deal should lead to the unwinding of the current uncertainty discount.

Change in estimates

Valuation and risks

We value Essential Utilities using the average of three approaches: DCF, dividend yield and the average of our PE multiple and rate-base valuations. After updating our earnings estimates and assumptions, we raise our target price to USD57 from USD55.

- In our DCF, we increase our Bloomberg observed five-year beta to 0.89 from 0.6. This reflects, we believe, the market volatility of interest rate rises in the US. This is the primary driver of the reduction in our DCF value to USD45.8 per share from USD56.5.
- For our yield-based valuation, we cut our target average yield to 1.64% from 2.25% in line with the water (70% of water peers' yield) and gas-related utilities peers (30% of gas peers' yield. This reflects Essential's business mix and leads us to increase our yield valuation to USD65.0 from USD47.7. This reflects the movement in peer group multiples as water and gas is seen as having more of a growth status compared to that of bond proxy stocks.
- For our approach using the average of our PE multiple and rate-base valuations, we keep our target multiple unchanged at 33.5x, in line with that of peers. We use a water and gas peer group PB average of 2.6x as a proxy for a rate-base valuation. This is consistent with all US utilities under our coverage and is a proxy for EV. Our new SOP and peer multiple value is USD58.7, down from USD61.4.

We increase our target price to USD57 from USD55, which implies 19.0% upside. We reiterate our Buy rating as we believe the combination of regulated investment growth and earnings growth remains attractive and there is scope for the current uncertainty discount to unwind.

Downside risks

Essential Utilities failing to achieve the desired rate case upwards revisions and infrastructure surcharges; lacking organic growth from asset replacement; inability to take advantage of the Fair Market Value legislation opportunity; dividend growth at a lower rate than we assume; and inability to conclude the Delcora acquisition in 2021.

Financials & valuation: Essential Utilities

Pennon

- Trading update, positive FY21 guidance, possible news on cash deployment by June results
- Green Recovery push potential for cGBP92m of additional investment
- Downgrade to Hold from Buy with unchanged TP of 1,090p after strong performance; better to travel than to arrive

Investment thesis

The case for paying a premium to RCV has been strengthened by NG's premium paid for WPD (a fast-tracked sector leader). Many of Pennon's unlisted water potential targets have a combination of complicated (with derivatives) balance sheets with higher leverage, or significant operational challenges

Pennon shares have had a strong recent performance driven by M&A expectations and strong initial regulatory performance. Its reinvestment decisions will provide an interesting regulatory precedent depending on where it chooses to invest its waste proceeds for growth. It could be bold and buy a large water company and plan ambitious expansion or look for a smaller water-only company and give the proceeds back to shareholders. As the sector resilience needs are significant, we think management may think big. The case for paying a premium to RCV has been strengthened by National Grid's premium paid in March 2020 for WPD (a fast-tracked sector leader). Many of Pennon's unlisted water potential targets have a combination of complicated (with derivatives) balance sheets with higher leverage, or significant operational challenges as can be seen from the table on page 12 above. The ability to create value, as it did with Bournemouth Water, is a much more arduous task.

Trading update: growing regulatory return, M&A clarity in June

Pennon confirmed its FY2020/21 performance is in line with management expectations. It continues to expect a doubling of base RORE of 3.9% from total expenditure and financial outperformance, which remains in line with the H1 (April-September) number of 8%. The company anticipates a net ODI penalty (despite 80% ODIs on or ahead of targets) position for the year due to underperformance associated with pollution incidents. However, a COVID-19 financial impact is as anticipated. Pennon further suggested that cash collections in H2 have been robust and no new debtors provisions are added.

It confirmed that if a major deal is not completed, a substantial return of capital to shareholders will be made

There was no update on capital allocation plans, with clarity now expected at the FY2020/21 results in June. With GBP3bn cash and committed facilities, PNN is in a good financial position to carry out M&A. Pennon's management believes there is significant potential in the UK water sector and it continues to narrow down its review of potential growth opportunities to reinvest the proceeds from the Viridor sale in 2020. Moreover, Pennon has confirmed that if a major M&A opportunity is not available, a substantial return of capital to shareholders will be made.

Green Recovery initiative

Pennon has proposed a GBP92m Green Recovery investment for the period to 2025, which will mark a 10% increase in its existing GBP1bn investment programme for the period. It has proposed six projects focused on improving public health, protecting the environment and addressing climate change. Pennon has suggested that the impact on customer bills be paused until 2025. Ofwat will announce its preliminary views on the proposals in May.

Performance against peers

Pennon shares have underperformed the FTSE All share index by 19.4% year-to-date and underperformed other listed UK water companies. Lack of visibility on the deployment of cash may be driving this. It has announced it is evaluating M&A options in the UK water space and an update is expected during its full-year results in June. The current lack of visibility may hinder its performance in the short term, but management has confirmed a return of value is possible either through M&A or a share buyback in the medium term. It still appears to have some inverse correlation to gilt yields.

Change in estimates

We update our estimates post the trading update to reflect a slightly higher interest charge than we had assumed previously.

Valuation and risks

We value Pennon shares using three valuation approaches: DCF, dividend yield and sum-of the-parts. We assign a 50% weight to yield and 25% each to DCF and SOTP, rounded, to arrive at our target price of 1,090p (unchanged).

- In the DCF valuation, we change our forward estimates for 2021 and onwards to reflect the guidance by management during the trading update for FY2020/21. We also update our tax rate and interest rate as per company guidance. We take the five-year Bloomberg observed beta of 0.70 (unchanged). We revise our RfR to reflect the HSBC Fixed Income team view of 10-year gilt rates to 50bp from 30bp previously. To this we add a 150bp premium. This increases our RfR to 2.0% from 1.83% previously. This increases our WACC to 3.8% from 3.6%. Because of the Green Recovery potential additional growth, we increase our terminal growth value in our DCF to 1.25% from 1.0%. We also update the pension deficit for the H1 results. These changes lead to a net increase in our DCF valuation to 1,439p from 1,249p.
- In the yield valuation, we add an unchanged premium of 0.25% to our revised RfR, increasing our yield to 2.55% from 2.08%. This reduces our yield value to 1,001p from 1,088p.
- In the SOTP valuation, we continue to assume net proceeds of GBP2.7bn from the sale of Viridor. We use South West Water's RCV to March 2022 for the basis of our SOTP. The higher WACC leads to a lower value creation assumption than previously but is offset by the assumption that Pennon is able to earn a 10% return on the Green Recovery investment (the same proportion we calculate for our value creation relative to its RCV) which we add to our value creation assumption. These changes lead us to increase in our SOTP valuation to 928p from 925p.

Our target price of 1,090p is unchanged and implies upside of 5.9%. We downgrade our rating to Hold from Reduce reflecting the strong recent share price performance.

Upside risks

- Pennon acquires a regulated water company that demonstrates a clear value creation proposition to shareholders
- Pennon cannot create shareholder value through acquisition and returns the proceeds to shareholders, enhancing earnings and yield through a share consolidation.

Downside risks

- For SWB, not being able to achieve the efficiency challenges in its business plan for 2020-25 and not being able to achieve the ODI rewards needed to support the dividend policy.
- Bad debts may continue to rise in SWB and Pennon Water Services from the current challenging economic conditions.
- Pennon is unable to expand profitably in UK water from a lack of opportunities that create value.
- It provides no clarity on its reinvestment strategy of return of proceeds by the time of the FY 2021 results in May.

Severn Trent

- Analysing the trading update, Green Recovery capex plans
- Still commands RCV premium relative to peers, despite Hafren Dyfrdwy performance and lack of M&A aspirations
- Retain Hold rating and raise TP to 2,570p from 2,450p on higher growth potential from Green Recovery

Investment thesis

Severn Trent continues to set itself out as an innovator with underlying growth and ideas for green investment. Management said in 2020 that M&A was not part of its strategy. It still has much work to do on Hafren Dyfrdwy, the water company it owns. We understand from the pre-close statement that management is focused on improvement in many areas. Severn Trent consistently trades at a premium to RCV to the other two UK listed stocks, currently at c20%, reflecting its higher RCV growth and recently its significant Green Recovery investment plans. We do not see therefore sufficient additional value to justify a Buy rating and remain at Hold.

Trading update for FY21

Company increased guidance for outperformance on Customer ODIs this year from GBP25m to at least GBP50m

SVT said at its trading update on 4 February 2021 that it remained on or ahead of its target for almost 80% of its customer performance measures. The company has therefore increased its guidance for outperformance on Customer ODIs this year from GBP25m to at least GBP50m.

Green Recovery initiative

SVT has applied for a cGBP730m package under Green Recovery

Severn Trent has applied for a cGBP730m package under Green Recovery. This investment plan is above the base capex plan of GBP3bn for the period 2021-25 (which would have delivered 4% RCV growth target for AMP7, the highest of its peers).

The water company said that only 15% of the cost would go directly onto customers' bills – Severn Trent will provide 85% of the funding needed upfront by raising new finance, which will then be recovered over a longer time period. Severn Trent estimates the extra cost to customers will be GBP6 per year on average.

Performance against peers

Pennon and UU shares have outperformed Severn Trent but in our view both have had a higher profile: Pennon through M&A and United Utilities at its CMD. However, Severn Trent consistently trades at a premium to RCV to the other two listed stocks, currently at c20%, and so we do not see sufficient additional value to justify a Buy rating. Our higher target price of 2,570p implies 5.0% upside and we maintain our Hold rating.

Valuation and risks

We value Severn Trent shares using three valuation approaches: DCF, dividend yield and sum of the parts. We assign a 50% weight to yield and 25% each to DCF and SOTP, rounded to arrive at our new target price of 2,570p from 2,450p, after adjusting our earnings estimates and assumptions.

- In the DCF valuation, we change our forward estimates for 2021 and onwards to reflect the guidance given by management during the trading update for FY2020/21. We also update our tax rate as well as interest rate as per company guidance. We take an observed Bloomberg five-year beta of 0.71 (changed from 0.75 from the previous Bloomberg estimates used in December 2020). We revise our RfR to reflect the HSBC Fixed Income view of 10-year gilt rates to 50bp from 30bp previously. To this we add at 150bp premium. This increases our RfR to 2.0% from 1.83% previously. This increases our WACC to 3.9% from 3.8%. Because of the Green Recovery potential additional growth, we increase the

terminal growth value in our DCF to 1.5% from 1.0%. We also update the pension deficit for the H1 results. This increases our DCF to 3,190p from 2,452p.

- In the yield valuation, a premium of 1.75% is added to our revised RfR (2%) resulting in a yield of 3.75% (previously 3.58%). The higher RfR reduces our yield valuation to 2,730p from 2,860p.
- In our sum of the parts we assume that Severn Trent is able to earn a 6% return on the Green Recovery investment (the same proportion we calculate for our value creation relative to its RCV) which we add to our value creation assumption. This increases the SoP value to 1,637p from 1,625p.

Our new target price of 2,570p implies upside of 5.0%. We maintain our Hold rating as we think the accelerated Green Recovery potential and underlying RCV growth are fully reflected in its price. We also note the relatively weaker financial profile of Severn Trent vs peers.

Upside risks

Severn Trent delivers additional operational total expenditure (totex) and ODI savings, driving higher EPS for FY 2020/21; property disposals above Severn Trent's GBP100m commitment; and growth in its Business Services division above our assumption.

Downside risks

Severn Trent faces higher costs than we assume, driving lower EPS for 2020/21; it may need to take remedial efforts to strengthen its balance sheet towards the end of the five-year period, which would be dilutive to shareholders.

United Utilities

- Trading update: FY21 revenue 3% lower, earnings 10% higher due to lower finance costs, Tallinn sale impact moves to next year
- Technology-driven GBP20m ODI outperformance, still ex-growth – most at risk of bond proxy correlation
- Downgrade to Reduce from Hold and cut TP to 910p from 960p on higher RfR assumption

Investment thesis

It has the highest dividend yield and the lowest Green Recovery list of potential projects compared to its current investment

United Utilities still struggles to avoid its bond proxy status. Of all the water stocks under our coverage it has the highest dividend yield and the lowest Green Recovery list of potential projects compared to its current investment. It continues to bring forward investment to drive ODI performance but management seems to have backtracked on exploring M&A opportunities in UK water despite a significant operational improvement.

Despite UU's significant operational improvements, its asset base is shrinking

Despite UU's significant operational improvements, its asset base is shrinking. Ofwat is looking at the Haweswater Aqueduct Resilience Programme (HARP) project as a blueprint for attracting additional capital for major projects to the sector but it will have to prove convincingly that project finance without government guarantees with the additional cost of finance, lawyers, and cost duplication will deliver better value to shareholders. HARP in particular is a risky project. We remain sceptical that it can be delivered at a lower cost to UU's customers, bearing in mind that Thames Tideway, another significant project (Thames Water), needed a government guarantee.

Trading update for FY21

UU issued a trading update on 25 March 2021. Management expects 3% lower revenue for FY 2020/21. Volumes have recovered in H2, compared to an H1 decline of 5%. Underlying operating profit for FY2020/21 is expected to be lower than in FY2019/20, largely reflecting the lower revenue and an increase in infrastructure renewals expenditure (IRE). The company expects its finance expenses to be cGBP100m lower than last year due to lower inflation applied to the group's index-linked debt. It has now adopted alternative performance measures (APMs) excluding what it says are non-core finance charges such as interest related to pensions. The recovery in H2 has also led to no extra provisions for bad debt, with only GBP17m bad debts aged more than a year. UU updated on its stake sale in Tallinn for EUR100m. The deal is pending regulatory clearance and realisation will move to next year.

Technology-driven GBP20m ODI outperformance

UU reiterated its ODI guidance of GBP20m announced during the capital markets day in early March

United Utilities reiterated its ODI guidance of GBP20m announced during the capital markets day in early March. The rewards are a result of accelerated investments in technology, automation and machine intelligence developed over the last five years. Moreover, UU recorded the lowest ever level of leakage and interruptions to water supply, which more than halved in the last 12 months.

Green Economic Recovery spend

UU has proposed to DEFRA and Ofwat a total of a further GBP135m investment in AMP7 (2020-2025) pending regulatory approval as part of the Green Economic Recovery. Of this GBP135m, GBP119m is enhancement expenditure, which UU is proposing to bring forward from future AMP8 plans into AMP7. The proposal also includes delaying the recovery through customer bills until 2025-2030.

Panorama investigation highlights a continuing weakness in UU's infrastructure

Although the BBC Panorama broadcast on 13 April highlighting UK water companies have been illegally dumping untreated sewage into rivers is arguably investigative journalism of an emotive nature, United Utilities remains a significant outlier. Whether this is from the nature of its Lake District geography or insufficient funding provided in price reviews, it still detracts from its reputation as an environmental company. Unlike Pennon, which has made very public statements about the focus from top management on reducing pollution incidents, UU has said little about this publicly.

Valuation and risks

We value United Utilities shares using three valuation approaches: DCF, dividend yield and sum of the parts. We assign a 50% weight to yield and 25% each to DCF and SOTP, rounded, to arrive at our lower target price of 910p from 960p.

- In our DCF valuation, we revise our RfR to reflect the new HSBC Fixed Income team view of 10-year gilt rates to 50bp from 33bp previously. To this we add a 150bp premium. This increases our RfR to 20% from 1.83% previously. We change our five-year Bloomberg observed beta to 0.73 from 0.75 because of share price movements since our last update in December 2020. We update our DCF estimates to reflect the phasing of capex that UU has brought forward in order to drive more ODI rewards. We increase our terminal value by 10bp to 1.10% because of the additional Green Recovery investment. This together reduces our DCF value to 939p from 1,064p.

- In our yield valuation we have updated our yield assumption to 4.25% from 4.58% based on higher RfR the premium of 2.25% remains unchanged. This reduces our valuation to 971p from 1,098p.
- In our SOP valuation, we assume that UU is able to earn a 4% return on the Green Recovery investment (the same proportion we calculate for our value creation relative to its RCV) which we add to our value creation assumption. This leads to an increase in our SOP valuation to 770p from 751p.

Overall, we reduce our target price to 910p from 960p, implying 6.0% downside from the current share price. We downgrade to Reduce from a Hold rating. We believe as a bond proxy with the most limited scope for Green Recovery of its peers, it is most at risk from rate increases.

Summary of valuation

	New	Previous
Current price on 22-Apr-21	**968**	**NA**
DCF (updated estimates)	939	1,064
Yield 4.25% (vs 4.58%)	971	1,098

Upside risks

(1) UU may reduce its bad debt provision potentially because better debt management at the end of the furlough scheme having not increased it at the H1; (2) UU delivers operational savings, decreasing its total expenditure (totex) over the five-year period relative to its regulatory allowances and increasing its ODI net rewards; and (3) in the medium term the HARP project is considered not to be achievable on a competitively tendered basis at a lower cost and risk to customers and the investment is then added back to UU's RCV, delivering accelerated growth from 2025 onwards.

Important disclosures

Equities: Stock ratings and basis for financial analysis

HSBC and its affiliates, including the issuer of this report ("HSBC") believes an investor's decision to buy or sell a stock should depend on individual circumstances such as the investor's existing holdings, risk tolerance and other considerations and that investors utilise various disciplines and investment horizons when making investment decisions. Ratings should not be used or relied on in isolation as investment advice. Different securities firms use a variety of ratings terms as well as different rating systems to describe their recommendations and therefore investors should carefully read the definitions of the ratings used in each research report. Further, investors should carefully read the entire research report and not infer its contents from the rating because research reports contain more complete information concerning the analysts' views and the basis for the rating.

From 23rd March 2015 HSBC has assigned ratings on the following basis:

The target price is based on the analyst's assessment of the stock's actual current value, although we expect it to take six to 12 months for the market price to reflect this. When the target price is more than 20% above the current share price, the stock will be classified as a Buy; when it is between 5% and 20% above the current share price, the stock may be classified as a Buy or a Hold; when it is between 5% below and 5% above the current share price, the stock will be classified as a Hold; when it is between 5% and 20% below the current share price, the stock may be classified as a Hold or a Reduce; and when it is more than 20% below the current share price, the stock will be classified as a Reduce.

Our ratings are re-calibrated against these bands at the time of any 'material change' (initiation or resumption of coverage, change in target price or estimates).

Upside/Downside is the percentage difference between the target price and the share price.

Prior to this date, HSBC's rating structure was applied on the following basis:

For each stock we set a required rate of return calculated from the cost of equity for that stock's domestic or, as appropriate, regional market established by our strategy team. The target price for a stock represented the value the analyst expected the stock to reach over our performance horizon. The performance horizon was 12 months. For a stock to be classified as Overweight, the potential return, which equals the percentage difference between the current share price and the target price, including the forecast dividend yield when indicated, had to exceed the required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). For a stock to be classified as Underweight, the stock was expected to underperform its required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). Stocks between these bands were classified as Neutral.

*A stock was classified as volatile if its historical volatility had exceeded 40%, if the stock had been listed for less than 12 months (unless it was in an industry or sector where volatility is low) or if the analyst expected significant volatility. However, stocks which we did not consider volatile may in fact also have behaved in such a way. Historical volatility was defined as the past month's average of the daily 365-day moving average volatilities. In order to avoid misleadingly frequent changes in rating, however, volatility had to move 2.5 percentage points past the 40% benchmark in either direction for a stock's status to change.

Rating distribution for long-term investment opportunities

As of 23 April 2021, the distribution of all independent ratings published by HSBC is as follows:

Buy	58%	(29% of these provided with Investment Banking Services)
Hold	34%	(28% of these provided with Investment Banking Services)
Sell	8%	(25% of these provided with Investment Banking Services)

For the purposes of the distribution above the following mapping structure is used during the transition from the previous to current rating models: under our previous model, Overweight = Buy, Neutral = Hold and Underweight = Sell; under our current model Buy = Buy, Hold = Hold and Reduce = Sell. For rating definitions under both models, please see "Stock ratings and basis for financial analysis" above.

For the distribution of non-independent ratings published by HSBC, please see the disclosure page available at http://www.hsbcnet.com/gbm/financial-regulation/investment-recommendations-disclosures.

AQUA AMERICA INC

Aqua America, Inc. is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately three million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia. It has recently purchased Peoples, a natural gas distribution utility, which will diversify Aqua America's income.

Analyst's Notes

Analysis by Jacob Kilstein, CFA, and Justin Giacobbe, June 4, 2019

ARGUS RATING: BUY

- Raising target by $2 to $43 on relative valuation
- WTR shares trade at 27.1-times our 2019 EPS estimate, below the peer average P/E of 29.5. Our revised target values the stock in line with peers, which makes sense given WTR's above-average profitability.
- We think that Aqua America will continue to provide shareholders with solid risk-adjusted returns as it stands to benefit from an expected investment of more than $700 billion in the nation's water and wastewater infrastructure over the next two decades.
- On May 2, Aqua America reported 1Q19 adjusted income of $50 million, a 2% decline from 1Q18, partly due to higher operating and maintenance expenses. EPS of $0.28 missed our estimate of $0.29 and the consensus of $0.30.
- In October, the company announced that it would acquire Peoples, a natural gas distribution utility, for $4.3 billion in cash. The acquisition will diversify the company away from water distribution and is expected to close mid-2019.

INVESTMENT THESIS

BUY-rated Aqua America Inc. (NYSE: WTR) has a solid business model, a history of steady earnings growth, and a growing dividend. We think the company will continue to provide shareholders with solid risk-adjusted returns as it stands to benefit from an expected investment of more than $700 billion in the nation's water and wastewater infrastructure recommended by the EPA over the next two decades. The company expects to grow its customer base not only through acquisitions but also organically, as it is well positioned in states such as North Carolina and Texas, where population growth is above the national average. The company also benefits from an experienced management team and balanced rate regulation. Lastly, we like the company's consistent earnings and rising dividend. We are increasing our 12-month price target to $43 from $41, which values the stock's P/E in line with its less profitable peers.

Argus Recommendations

Twelve Month Rating	SELL	HOLD	**BUY**
Five Year Rating	SELL	HOLD	**BUY**
Sector Rating	**Under Weight**	Market Weight	Over Weight

Argus assigns a 12-month BUY, HOLD, or SELL rating to each stock under coverage.

- BUY-rated stocks are expected to outperform the market (the benchmark S&P 500 Index) on a risk-adjusted basis over the next year.
- HOLD-rated stocks are expected to perform in line with the market.
- SELL-rated stocks are expected to underperform the market on a risk-adjusted basis.

The distribution of ratings across Argus' entire company universe is: 65% Buy, 34% Hold, 1% Sell.

Analyst's Notes...Continued

WTR shares have outperformed the S&P MidCap 400 over the last quarter, rising 9% compared to a 3% loss for the index. The shares have also outperformed over the past year, rising 13%, compared to a gain of less than 1% for the S&P MidCap 400 and a loss of 6% for the index. WTR shares have a beta of 0.62, in line with peers.

On May 2, Aqua America reported 1Q net income of $17 million or $0.09 per share, compared to $51 million or $0.29 per share in the prior-year period. The decrease was driven by losses on interest rate swaps and expenses related to WTR's acquisition of Peoples, a natural gas distribution utility. Adjusted income fell 2% to $50 million, or $0.28 per share, which missed our estimate of $0.29 and the consensus forecast of $0.30. Revenue rose 4% to $201 million, below our estimate of $202 million but in line with the consensus.

Operations and maintenance expenses rose 7% to $79 million. As such, the operating margin narrowed to 33.5% from 35.7% in 1Q18.

Along with the 1Q earnings release, management reiterated its 2019 EPS guidance of $1.45-$1.50, excluding transaction costs for the Peoples acquisition. Management's guidance assumes total customer growth of 2.0%-3.0%, in line with last year, and $550 million in capital spending. Management expects to spend $1.4 billion on capital projects through 2021.

In October, the company announced that it would acquire Peoples, a natural gas distribution utility, for $4.2 billion in cash, including the assumption of $1.3 billion in debt. Peoples serves about 740,000 customers in Pennsylvania, Kentucky, and West Virginia. The combined company's stock will trade under a new name. Management expects earnings accretion in the first full year after the closing and looks for 7% annual rate base growth in its water business and 8%-10% in natural gas through 2021. The Peoples deal is expected to close in mid-2019. Aqua America's revenue will still be 99% regulated following the acquisition.

WTR expects to spend an additional $50 million on system upgrades over the next 10 years. It expects to add 16,750 customers through the end of 2019 through additional acquisitions.

EARNINGS & GROWTH ANALYSIS

To date in 2019, WTR obtained rate increases or imposed surcharges in Ohio, Illinois and Pennsylvania, providing $5 million in revenue. Pending rate cases in New Jersey, Ohio, and North Carolina are seeking an additional $6 million of revenue.

During 1Q19, the company completed three acquisitions of water and wastewater systems, which added 572 customer connections. WTR financed those acquisitions with debt.

We are maintaining our 2019 EPS estimate of $1.46, which implies 4% growth and assumes higher rates in the company's regulated operations. We are also maintaining our 2020 estimate of $1.57.

We think the company will control costs and improve the

Analyst's Notes...Continued

efficiency of acquired assets, invest in infrastructure projects, and grow its customer base both organically and through acquisitions. The company plans to invest $550 million in infrastructure in 2019, following subsequent record investments of $478 million in 2017 and $500 million in 2018. WTR will use the funds to replace pipes, enhance water quality, and strengthen service reliability.

FINANCIAL STRENGTH & DIVIDEND

Our financial strength rating for Aqua America is Medium, the midpoint on our five-point scale. Our three main criteria include debt levels, fixed-cost coverage and profitability.

The company's total debt/total capitalization ratio was 57% at the end of 1Q, above the peer average of 55%. EBITDA covered interest expense by a factor of 5.5 in 1Q, below the peer average of 5.7. The 1Q adjusted net margin of 24.6% was well above the peer average of 12.3%. As of May 2, WTR had $4 million in cash and $2.7 billion in debt.

WTR pays a quarterly dividend of $0.219, or $0.876 annually, for a yield of about 2.3%, above the peer average of 1.8%. WTR has grown its dividend at a 7.6% average annual rate over the last five years. It has paid consecutive quarterly dividends for 74 years, and has raised the dividend 28 times in the past 27 years. Our 2019 dividend estimate is $0.91 per share and our 2020 estimate is $0.99.

MANAGEMENT & RISKS

Christopher Franklin has been CEO since July 2015. Mr. Franklin is a 25-year veteran of the company, and previously served as president and chief operating officer of its regulated operations.

The U.S. water industry is fragmented, with more than 53,000 individual water systems. Many of these systems cannot afford to meet the EPA's increasingly stringent standards, and have put themselves up for sale. In fact, several companies have sought to be acquired by Aqua America. The range of acquisition targets has also grown as cash-strapped municipalities look to monetize their utility assets. We believe that WTR will be able to acquire additional municipal water systems in the coming years at attractive prices.

Key risks for water utilities include the effect of adverse weather on revenues, regulatory issues (especially related to construction cost recovery), and potential environmental and safety-related liabilities. In addition, the utility's heavy capital needs create ongoing liquidity risk.

COMPANY DESCRIPTION

Aqua America, Inc. is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately three million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, and Virginia. It has recently purchased Peoples, a natural gas distribution utility, which will diversify Aqua America's income.

VALUATION

Peer & Industry Analysis

The graphics in this section are designed to allow investors to compare WTR versus its industry peers, the broader sector, and the market as a whole, as defined by the Argus Universe of Coverage.

- **The scatterplot shows how WTR stacks up versus its peers on two key characteristics: long-term growth and value. In general, companies in the lower left-hand corner are more value-oriented, while those in the upper right-hand corner are more growth-oriented.**
- **The table builds on the scatterplot by displaying more financial information.**
- **The bar charts on the right take the analysis two steps further, by broadening the comparison groups into the sector level and the market as a whole. This tool is designed to help investors understand how WTR might fit into or modify a diversified portfolio.**

Analyst's Notes...Continued

WTR shares appear attractively valued at current prices near $39. Over the past 52 weeks, the shares have traded between $32 and $40.

WTR shares are trading at a discount to peers on a P/E basis, but at a premium based on price/book and price/sales, which we feel is justified by the company's solid long-term fundamentals. The shares trade at 27.1-times our 2019 EPS estimate which is below the peer average of 29.5. In our view, the company's financial strength, favorable risk profile, visible forward earnings stream and attractive integrated structure make WTR a compelling investment. We are increasing our 12-month price target to $43, which values the stock's P/E in line with less profitable peers.

On June 4, BUY-rated WTR closed at $39.82, down $0.22.

About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

THE ARGUS RESEARCH RATING SYSTEM

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

ESSENTIAL UTILITIES INC

Essential Utilities Inc., formerly Aqua America, Inc. is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately five million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, Kentucky, West Virginia and Virginia. In addition to its water/wastewater utilities, the company purchased the Peoples natural gas distribution utility in March 2020. The combined company has roughly 2,000 employees.

Analyst's Notes

Analysis by Angus Kelleher-Ferguson, June 18, 2021

ARGUS RATING: BUY

- Reiterating BUY and $55 price target
- Essential Utilities recently reported first-quarter results that exceeded analyst's expectations. On May 6, the company reported GAAP and non-GAAP EPS of $0.72 per share, up from non-GAAP EPS of $0.60 in 1Q20. The stronger results reflected contributions from Peoples, the natural gas utility that was acquired in March 2020.
- We are maintaining our 2021 EPS forecast of $1.68 from $1.66, implying 6% growth this year. We are maintaining our 2021 EPS forecast of $1.68. We look for continued gains in 2022 and are also reiterating our estimate of $1.80 per share, which assumes 7% growth from our 2021 forecast.
- The company has a long record - 75 years - of paying dividends. The current yield is about 2.1%.

INVESTMENT THESIS

BUY-rated Essential Utilities Inc. (NYSE: WTRG) has a solid business model, a history of steady earnings growth, and a growing dividend. We think the company will continue to provide shareholders with solid risk-adjusted returns. Essential stands to benefit from aging water infrastructure that, according to industry observers, will soon require substantial investment to upgrade to safe levels. We also expect increased revenue and earnings following the March 2020 acquisition of Peoples, a gas distribution utility. We note that Essential has operations in states such as North Carolina and Texas, where population growth is above the national average. The company also benefits from an experienced management team and balanced rate regulation. Our 12-month price target is $55.

RECENT DEVELOPMENTS

WTRG shares have outperformed the S&P over the last three months, climbing 12% while the index has climbed 7%. The stock has underperformed over the past year, however, with a gain of 11% compared to a 35% increase for the market. The shares have roughly matched the performance of the Utility industry ETF IDU over the past year, but

Analyst's Notes...Continued

have outperformed over longer time horizons. The beta on WTRG shares is 0.53.

Essential Utilities recently reported first-quarter results that exceeded analyst's expectations. On May 6, the company reported GAAP and non-GAAP EPS of $0.72 per share, up from non-GAAP EPS of $0.60 in 1Q20. The stronger results reflected contributions from Peoples, the natural gas utility that was acquired in March 2020. Higher volume and favorable rates were secondary drivers, with an increase in Other expenses partially offsetting the strength. Revenue rose 128% to $586 million, with Peoples accounting for substantially all of this growth. Water usage per customer increased a modest 2% year-over-year as customers spent more time at home.

In March 2020, the company closed on the acquisition of Peoples Natural Gas for $4.3 billion in cash, including the assumption of $1.1 billion in debt. (The Canada Pension Plan invested $750 million into the company to help it close the deal.) Peoples serves about 740,000 customers in Pennsylvania, Kentucky, and West Virginia. The deal is partly synergistic, given that Essential was already providing water service to Peoples. Additionally, Peoples and Essential Water are the largest players in their respective industries in Pennsylvania, which is the company's biggest market.

Essential stands to benefit from aging water infrastructure that, according to industry observers, will soon require substantial investment. In August 2020, the American Society of Civil Engineers released a report detailing chronic underinvestment in drinking water and wastewater systems. The report highlighted the difficulties plaguing legacy systems, with many treatment facilities nearing the end of their design lives of 75-100 years. More recently, the $2.3 trillion Biden infrastructure bill earmarked roughly $111 billion over the next ten years to modernize water infrastructure. The bill still has a long way to go, and a size reduction looks increasingly more likely, but it remains a positive in any event. Looking ahead, we expect Essential to benefit from both new investment in water infrastructure and upgrades of existing systems.

Along with the 1Q21 earnings release, management reiterated its 2021 guidance calling for EPS of $1.64-$1.69. Management also stated that it expects compound annual earnings growth of 5%-7% through 2023.

EARNINGS & GROWTH ANALYSIS

The company's top-line growth is driven by acquisitions, organic customer count increases, volume increases, and rate increases. In 1Q21, revenue was up substantially due to inorganic growth from the March 2020 acquisition of Peoples. Excluding the impact of Peoples, revenue rose 4.7%. The growth in organic water utility revenue reflected better rates and higher volume.

We note that 2Q21 earnings will offer an appropriate year-over-year comp, as the Peoples acquisition will be fully annualized.

On growth, the company pursues a blended strategy of growth

Analyst's Notes...Continued

through acquisitions and organic growth from its core operations (core ops include its regulated water utility and, more recently, a gas utility.) A key aspect of its acquisition strategy involves purchasing municipal water or wastewater utility assets. As of quarter end, there were seven pending acquisitions underway mixed between water and wastewater. Across the seven pending acquisitions, total purchase price came to $450.5 million and customer count totaled 231,000 dwelling units.

In 2020, Essential posted adjusted EPS of $1.58, up from $1.47 in 2019. Revenue of $1.46 billion rose from $890 million in 2019.

We are maintaining our 2021 EPS forecast of $1.68. We look for continued gains in 2022 and are also reiterating our estimate of $1.80 per share, which assumes 7% growth from our 2021 forecast. Our long-term earnings growth rate forecast is 6%.

FINANCIAL STRENGTH & DIVIDEND

Our financial strength rating for Essential Utilities is Medium, the midpoint on our five-point scale. Our three main criteria are debt levels, fixed-cost coverage, and profitability. Moody's rates the company's debt at Baa2 with a stable outlook and S&P rates it as A.

At the end of the quarter, WTRG had $18 million in cash and cash equivalents, up from $5 million at the end of 2020. The company had $5.8 billion in debt, up from $5.7 billion at the end of 2020. The total debt/total capitalization ratio was 54%, below the peer average of 58%. During the trailing twelve months, the interest coverage ratio was 4.4-times, below the peer average of 6.2. The company has $724 million in borrowing capacity on various credit facilities.

In August 2020, the Essential Utilities board approved a dividend hike. The quarterly cash dividend is now $0.2507, up from $0.2343. The annual distribution of roughly $1.00 yields about 2.1%. WTRG has grown its dividend at a 7% average annual rate over the last five years. It has paid consecutive quarterly dividends for 75 years, and has raised the dividend 30 times in the past 29 years. Our 2021 dividend estimate is $1.04 and our 2022 estimate is $1.12.

MANAGEMENT & RISKS

Christopher Franklin has been the company's CEO since July 2015, and is also chairman of the board. Mr. Franklin is a 25-year company veteran, and previously served as president and COO of its regulated operations. The COO is Richard Fox, who has served in the role since 2015, and the CFO is Daniel J. Schuller, who has been in the position since 2018. In August 2020, management announced that Mike Huwar would succeed Joe Gregorini as president of Peoples. Mr. Huwar has more than 30 years of industry experience and an established reputation with Pennsylvania regulators.

The U.S. water industry is fragmented, with more than 53,000 individual water systems. Many of these systems cannot afford to meet the EPA's increasingly stringent standards, and have put

Peer & Industry Analysis

The graphics in this section are designed to allow investors to compare WTRG versus its industry peers, the broader sector, and the market as a whole, as defined by the Argus Universe of Coverage.

- **The scatterplot shows how WTRG stacks up versus its peers on two key characteristics: long-term growth and value. In general, companies in the lower left-hand corner are more value-oriented, while those in the upper right-hand corner are more growth-oriented.**
- **The table builds on the scatterplot by displaying more financial information.**
- **The bar charts on the right take the analysis two steps further, by broadening the comparison groups into the sector level and the market as a whole. This tool is designed to help investors understand how WTRG might fit into or modify a diversified portfolio.**

Analyst's Notes...Continued

themselves up for sale. Several companies have even sought to be acquired by Essential Utilities. The range of acquisition targets has also grown as cash-strapped municipalities look to monetize their utility assets. We believe that WTRG will be able to acquire additional municipal water systems in the coming years as cities look to raise cash to deal with the impact of the pandemic.

Key risks for water utilities include the effect of adverse weather on revenues, regulatory issues (especially related to construction cost recovery), and potential environmental and safety-related liabilities. In addition, the utility's heavy capital needs create ongoing liquidity risk.

COMPANY DESCRIPTION

Essential Utilities Inc., formerly Aqua America, Inc. is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately five million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, Kentucky, West Virginia and Virginia. In addition to its water/wastewater utilities, the company purchased the Peoples natural gas distribution utility in March 2020. The combined company has roughly 2,000 employees.

VALUATION

WTRG shares appear attractively valued at current prices near $49. Over the past 52 weeks, the shares have traded between $38 and $49. WTRG trades at 29.0-times our 2021 EPS estimate and at 27.1-times our 2022 forecast. The shares are trading at premiums to electric and gas distribution peers on P/E, price/sales, and price/book, but in line on PEG, reflecting the company' stronger-than-average growth outlook. Compared to a basket of water utility peers, the shares trade at a discount versus the peer average of 33.2. We believe that premiums to electric utility peers are justified by the company's solid long-term fundamentals, and that WTRG shares should trade closer to the peer average of water utility peers. In our view, the company's financial strength, favorable risk profile, visible forward earnings stream, and attractive integrated structure make WTRG a compelling investment. Our target price is $55, implying a reasonable 2021 PE multiple of 32.7 - still below the water utility peer average.

On June 18, BUY-rated WTRG closed at $46.63, down $2.14.

About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

THE ARGUS RESEARCH RATING SYSTEM

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

ESSENTIAL UTILITIES INC

Essential Utilities Inc., formerly Aqua America Inc., is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately five million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, Kentucky, West Virginia and Virginia. In addition to its water/wastewater utilities, the company purchased a natural gas utility in March 2020. The combined company has roughly 2,000 employees.

Analyst's Notes

Analysis by Angus Kelleher-Ferguson, October 13, 2020

ARGUS RATING: BUY

- Reiterating BUY with target of $50
- WTRG shares remain 23% below their all-time high and currently offer investors a favorable entry point.
- In a transformative deal, the company recently acquired Peoples, a natural gas utility, for $4.2 billion in cash. It has also received regulatory approval for rate hikes and infrastructure surcharges in a range of states.
- The company has a long record - 75 years - of paying dividends. The current yield is about 2.4%.

INVESTMENT THESIS

BUY-rated Essential Utilities Inc. (NYSE: WTRG) has a solid business model, a history of steady earnings growth, and a growing dividend. We think the company will continue to provide shareholders with solid risk-adjusted returns. Essential stands to benefit from aging water infrastructure that, according to many industry observers, will soon require substantial investment. In 2019, EPA Chief Andrew Wheeler projected that $700 billion would be needed over the next 20 years to upgrade/overhaul U.S. water infrastructure. Similarly, in August 2020, the American Society of Civil Engineers released a report detailing chronic underinvestment in drinking water & wastewater systems. The report highlighted the difficulties plaguing legacy systems, with many treatment facilities nearing the end of their design lives of 75-100 years. Looking ahead, we expect Essential Utilities to benefit from both new investment in water infrastructure and upgrades of existing systems.

In addition, Essential expects to grow its customer base, helped by operations in states such as North Carolina and Texas, where population growth is above the national average. The company also benefits from an experienced management team and balanced rate regulation. Our 12-month price target is $50.

Argus Recommendations

Twelve Month Rating	SELL	HOLD	**BUY**
Five Year Rating	SELL	HOLD	**BUY**
Sector Rating	Under Weight	Market Weight	**Over Weight**

Argus assigns a 12-month BUY, HOLD, or SELL rating to each stock under coverage.

- BUY-rated stocks are expected to outperform the market (the benchmark S&P 500 Index) on a risk-adjusted basis over the next year.
- HOLD-rated stocks are expected to perform in line with the market.
- SELL-rated stocks are expected to underperform the market on a risk-adjusted basis.

The distribution of ratings across Argus' entire company universe is: 63% Buy, 36% Hold, 1% Sell.

Analyst's Notes...Continued

WTRG shares have underperformed the S&P over the last quarter, falling 2% while the S&P 500 has climbed 9%. The stock has also underperformed over the past year, with a decline of 7% compared to a 17% advance for the broad market. The shares have outperformed the Utility industry ETF IDU over the past year. The beta on WTRG shares is 0.47.

On August 5, the company reported 2Q adjusted EPS of $0.29, above the consensus forecast of $0.24 but down from $0.37 in 2Q19. On a GAAP basis, EPS rose to $0.29 from $0.25 in 2Q19. Revenue rose 76% to $384 million, primarily reflecting contributions from Peoples, a natural gas utility acquired in March.

The company acquired Peoples for $4.2 billion in cash, including the assumption of $1.3 billion in debt. Peoples serves about 740,000 customers in Pennsylvania, Kentucky, and West Virginia. During Essential's second-quarter conference call, management announced that Mike Huwar would succeed Joe Gregorini as president of Peoples. Mr. Huwar has over 30 years of industry experience and is well regarded by Pennsylvania regulators.

Along with its 2Q earnings, management reiterated its 2020 guidance calling for adjusted EPS of $1.53-$1.58. The guidance assumes compound annual earnings growth of 5%-7% through 2022, infrastructure investments of $2.8 billion through 2022, and customer growth of 2%-3% per year in the regulated water segment.

EARNINGS & GROWTH ANALYSIS

The company's top-line growth is driven by acquisitions, volume increases and rate increases. In 2Q20, revenue rose significantly due to the Peoples acquisition. Excluding the acquisition, revenue still rose an impressive 9%, reflecting increased residential water usage, partially offset by lower usage from commercial and industrial customers.

On the regulatory front, to date in 2020, Essential's regulated water segment has received approval for higher rates or infrastructure surcharges in Illinois, Indiana, North Carolina, Ohio, Virginia and Pennsylvania. The changes will provide an estimated $10.2 million in additional annualized revenue. The company has additional proceedings pending in Indiana, New Jersey, Virginia and Ohio for its regulated water segment, which could provide another $5.2 million in revenue. Essential's regulated natural gas segment has also received approval for higher rates or infrastructure surcharges in Kentucky and Pennsylvania that will generate approximately $1 million in annualized revenue.

Below the top line, O&M expense rose 49% from 2Q19 due to new Peoples O&M, partially offset by merger-related synergies.

Turning to our estimates, we are maintaining our 2020 non-GAAP EPS estimate of $1.55, near the midpoint of management's guidance range and implying growth of 5% this year. We think the company will control costs and improve the efficiency of acquired assets, invest in infrastructure projects, and grow its customer base both organically and through acquisitions. The company plans to invest $950 million in gas and water

Analyst's Notes...Continued

infrastructure in 2020, following investments of $550 million in water infrastructure in 2019. WTRG will use the funds to replace pipes and strengthen service reliability, among other projects. We look for continued growth in 2021 and are maintaining our EPS forecast of $1.64.

FINANCIAL STRENGTH & DIVIDEND

Our financial strength rating for Essential Utilities is Medium, the midpoint on our five-point scale. Our three main financial strength criteria are debt levels, fixed-cost coverage, and profitability. Moody's rates the company's debt at Baa2 with a stable outlook. S&P's rating is A.

WTRG had $7 million in cash and $5.2 billion in debt at the end of 2Q20. The company's total debt/capitalization ratio was 53%. On April 13, the company completed a $1.1 billion public debt offering, with $500 million of 10-year 2.7% notes and $600 million of 30-year 3.3% notes, for a weighted-average maturity of 20.9 years and a weighted-average coupon of 3.0%. On April 14, the company priced $175 million of first mortgage bonds for Aqua Pennsylvania. The proceeds were used to pay off short-term borrowings and to fund an acquisition. As of May 1, after considering the effects of these financings, the company had $1.1 billion in borrowing capacity on various credit facilities.

On August 4, the Essential Utilities board approved a dividend hike. The quarterly cash dividend is now $0.2507, up from $0.2343. The annual distribution of roughly $1.00 yields about 2.4%. WTRG has grown its dividend at a 7% average annual rate over the last five years. It has paid consecutive quarterly dividends for 75 years, and has raised the dividend 30 times in the past 29 years. Our 2020 dividend estimate is $0.97, down from $0.98, and our 2021 estimate is $1.04, up from $1.02.

MANAGEMENT & RISKS

Christopher Franklin has been CEO since July 2015. Mr. Franklin is a 25-year veteran of the company, and previously served as president and COO of its regulated operations. The current COO is Richard Fox, who has served in the role since 2015, and the CFO is Daniel J. Schuller, who has been in the position since 2018.

The U.S. water industry is fragmented, with more than 53,000 individual water systems. Many of these systems cannot afford to meet the EPA's increasingly stringent standards, and have put themselves up for sale. Several companies have even sought to be acquired by Essential Utilities. The range of acquisition targets has also grown as cash-strapped municipalities look to monetize their utility assets. We believe that WTRG will be able to acquire additional municipal water systems in the coming years as cities look to raise cash amid rising pandemic-related costs.

Key risks for water utilities include the effect of adverse weather on revenues, regulatory issues (especially related to construction cost recovery), and potential environmental and safety-related liabilities. In addition, the utility's heavy capital needs create

ongoing liquidity risk.

COMPANY DESCRIPTION

Essential Utilities Inc., formerly Aqua America Inc., is a publicly traded water and wastewater utility holding company with operating subsidiaries serving approximately five million people in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana, Kentucky, West Virginia and Virginia. In addition to its water/wastewater utilities, the company purchased a natural gas utility in March 2020. The combined company has roughly 2,000 employees.

VALUATION

WTRG shares appear attractively valued at current prices near $42. Over the past 52 weeks, the shares have traded between $30 and $55. They are currently about 23% below their all-time high.

WTRG shares are trading at a discount to peers on P/E and price/book, but at a premium based on price/sales, which we feel is justified by the company's solid long-term fundamentals. The shares trade at 27.3-times our 2020 EPS estimate, below the peer average of 32.2. In our view, the company's financial strength, favorable risk profile, visible forward earnings stream and attractive integrated structure make WTRG a compelling investment. Our target price is $50.

On October 13 at midday, BUY-rated WTRG traded at $41.99, down $0.26.

Analyst Day Highlights: 2020 guidance just OK, but M&A, three-year growth targets affirm thesis.

Essential Utilities hosted an analyst day at the NYSE, the company's first high-profile public appearance since receiving key PA regulatory approval for the impending acquisition of Peoples Gas. Major topics included the Peoples transaction (reaffirmation of strategic rationale and progress update), municipal acquisition pipeline, 4Q19 earnings, and forward guidance and growth targets. Overall, we came away reinforced in our favorable view of the fundamental story.

With the critical Pennsylvania regulatory approval now secured, the acquisition of Peoples is set to close on 16 March. The regulatory approval process took longer than expected due to the Goodwin-Tombaugh situation (see prior research), and as a result the first full quarter with Peoples on the P&L will be 2Q20. Still, we continue to view the addition of Peoples, which buttresses Essential's already robust regulatory presence in PA and enhances consolidated rate base growth, as a major strategic differentiator vs. peers.

Essential continues to shine on the municipal deal front not only in absolute terms, but also in terms of moving the needle relative to its size. Notable deals include the purchase of Cheltenham WW for $50 million and the pending acquisition of DELCORA for $276 million, which together with several smaller deals provide a material tailwind to customer growth. We expect Essential to remain highly active on municipal M&A, with deals outside PA likely to accelerate.

Essential issued 2020 EPS guidance of $1.53-$1.58, although given the later than expected Peoples closing, it is on an "illustrative pro forma adjusted" basis (i.e as if Peoples were in for a full 1Q, which it is not). While this means incoming 2020 consensus of $1.56 could come down, the run-rate pro forma guidance reflects the sustainable go-forward earnings power of the combined enterprise.

Essential initiated three-year growth targets for EPS (5%-7%) and rate base (6%-7% for Aqua, 8%-10% for Peoples). We see these as highly credible targets that Essential can achieve without sowing the seeds of longer-term problems in terms of regulatory/OCA relations, ratepayer affordability in acquired territories, and long-term customer growth. Importantly, Essential's long-term growth targets do NOT include acquisitions, which represent potential upside.

We reiterate our Outperform rating for Essential, which we see as a best-of-breed player in the regulated water utility space with notable catalysts. Our price target of $50 reflects a forward P/E multiple of 30.5 times, in-line with the current peer group average.

Rating and Price Target History:

Risk Factors

The realization of any or all of the following risk factors, among others, may adversely affect the company's stock price and prevent it from reaching our price target: the economic cycle, concentration in energy sector, foreign currency exposure, and client concentration.

Analyst Certification:

The research analysts whose names appears on this research report certify that: (1) all of the views expressed in this research report accurately reflect their personal views about the subject security or issuer, and (2) no part of the research analysts' compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analysts in this research report.

Important Disclosures:

Analyst compensation is based on, in part, Boenning & Scattergood, Inc.'s profitability, which includes revenues from investment banking. Boenning & Scattergood expects to receive or intends to seek compensation for investment banking services from the subject company in the next three months.

Boenning & Scattergood received compensation for investment banking services from the subject company within the past 12 months.

Boenning & Scattergood has managed a public offering and received compensation from the subject company within the past 12 months.

Boenning & Scattergood's Ratings System:

Our three-tier investment ratings are based on a stock's return potential relative to a broad market index:

- ***Outperform (Buy):*** The security's total return over the year or longer is expected to exceed the total return of the S&P 500™ over the identical period.
- ***Neutral (Hold):*** The security's total return over the next year or longer is expected to be roughly equivalent to the total return of the S&P 500™ over the identical period.
- ***Underperform (Sell):*** The security's total return over the next year or longer is expected to be less than the total return of the S&P 500™ over the identical period.

Our four-tier risk ratings are based on a mix of price volatility and fundamental factors relative to the market and peer group.

- ***Low:*** The security has higher-than-average fundamental predictability and/or lower-than-average price volatility.
- ***Moderate:*** The security has average fundamental predictability and/or average price volatility.
- ***High:*** The security has lower-than-average fundamental predictability and/or higher-than-average price volatility.
- ***Speculative:*** The security has very inconsistent fundamental predictability and/or very high relative price volatility.

Target Price:	$43.00

Aqua/Peoples regulatory process enters litigation in PA, but last-minute (non-unanimous) settlement reached; We expect PUC approval despite I&E objection.

Summary: Yesterday, we were in Harrisburg to attend evidentiary hearings for the Aqua/Peoples deal, which entered formal litigation in PA this week due to disagreement among key parties to the case regarding how to deal with certain high-risk gas gathering systems. While the unexpected delay in the regulatory approval process is by no means a positive, yesterday's hearing began with the news that terms of a non-unanimous settlement have been agreed to, with the formal settlement agreement to be filed with the PUC by June 26. We expect the PA PUC to approve the Peoples acquisition, and maintain our Outperform rating for WTR, with our $43 target price based on our proprietary regulation-weighted valuation model (click HERE for rankings and model).

Key Points:

- **PA regulatory approval dragging out, but settlement reached.** The Pennsylvania regulatory approval process for Aqua/Peoples is taking longer than initially expected, with actual litigation beginning with yesterday's hearings in Harrisburg. There appears to be light at the end of the tunnel, however, with parties telling the ALJ yesterday that terms have been reached on a non-unanimous settlement. The proposed timeline calls for a formal settlement agreement filing by June 26, with opposing party briefs due July 11 (the next two PUC Public Meetings are July 11 and August 8). The PUC's Bureau of Investigation and Enforcement (I&E) and the PA Office of the Small Business Advocate (OSBA) are opposing the non-unanimous settlement.
- **Handling of Equitable gas gathering assets the sticking point.** The main issue of contention is how to handle certain gas gathering assets acquired by Peoples as part of the 2013 Equitable deal – specifically the "Goodwin and Tombaugh" system. This gathering system serves roughly 1,600 customers, but has very high leakage rates and is a non-regulated asset that has been the subject of ongoing controversy since the Equitable acquisition (it was noted during yesterday's hearing that Aqua factored this issue into its negotiated purchase price). Fixing the G&T system would cost $122 million (or $75,000 per customer), and the non-unanimous settlement (which includes OCA) would allow Aqua/Peoples single-tariff rate recovery on this investment.
- **I&E opposes settlement, prefers abandonment of G&T system.** As it has since the Peoples/Equitable merger in 2013, I&E continues to strongly oppose allowing the sizable per customer investments to fix G&T into rate base, on the basis that this is not in the public interest and that it would amount to excessive subsidization by existing Peoples customers. Instead, I&E prefers abandoning the G&T system and moving these customers to propane, noting that Peoples CEO Morgan O'Brien has indicated that in some cases abandonment is in the public interest (for his part, O'Brien stressed he said *in some cases*, and this may not be one of those cases). Discussion of rate recovery vs. abandonment of the G&T system dominated yesterday's hearing.
- **PUC approval likely, clearing the way for closing.** We anticipate the PUC approving the non-unanimous settlement despite I&E's opposition. G&T is a problem asset that must be addressed regardless of owner, and the settlement lays out clear plan with a defined timeline (7 years), to be executed by a credible counterparty in Aqua with manageable impact on existing ratepayers (a 1% bill increase). In our view, a PUC rejection of the settlement would represent a de facto endorsement of abandoning the G&T customers, which would be unpopular politically, further tipping the scales toward approval. Of note, I&E lacks the ability to appeal a PUC ruling, so approval by the PUC would likely stand (OSBA can appeal, but rarely does), clearing the way for the Aqua/Peoples deal to close according to the existing "midyear" timetable.

PA-PUC approval of Peoples deal inches closer; Peoples rate case settlement appears imminent.

Last week, Aqua formally filed the non-unanimous settlement agreement with the PA-PUC for its pending acquisition of Peoples Natural Gas, and overall the terms include no major incremental surprises and read favorably from a shareholder perspective.

Notable provisions include:

- A 7-year, $120 million plan to rehabilitate the Goodwin/Tombaugh gas gathering assets, to be recovered via base rates (not DSIC).
- $23 million in rate credits shared across Peoples and Aqua water/WW customers, to be applied by year-end 2019. This is below the $30-$40 million typical in such cases, and keeps the EPS impact within 2019, which is rife with deal-related noise anyway.
- Plans to accelerate replacement of gas distribution pipe within the Peoples system by $30 million a year (which translates into an enhanced rate base growth opportunity).

Based upon statutory timing parameters and precedent, we expect the ALJ to render a proposed decision within 3-4 weeks and for the settlement to come before the PUC for a vote in the September-October timeframe (of note, we believe the potential still exists for a unanimous settlement, which would accelerate this timing).

Separately, evidentiary hearings for the Peoples Gas rate case were abruptly cancelled, suggesting a settlement agreement is imminent. We expect a settlement to be announced in the days/weeks ahead, creating a positive catalyst for WTR shares.

With the Peoples close likely slipping into the fall, visibility on 2020 earnings is likely to remain extremely limited into late 2019. Repair tax treatment is a key variable impacting 2020 expectations, and it remains to be seen how this will affect earnings over the next 12-18 months. Aqua's 2012 adoption of flow-through accounting for repairs on the water side created an immediate and sizable earnings boost, but the company may take a different approach on Peoples.

Overall, WTR remains our top idea in the water utility space due to the combination of discount valuation and fundamental catalysts. We rate WTR shares Outperform, with our $43 target price based on our proprietary regulation-weighted relative valuation model (click HERE for RCI rankings report and valuation model).

Top 10 Ideas: 3Q19

July 24, 2019

A look at our Top Ten picks for 3Q19 and the investment thesis behind each.

- **Aqua America (WTR): Top-flight utility with catalysts, at a discount.** With 85% of revenue coming from the attractive regulatory jurisdictions of Pennsylvania, Ohio, and Illinois, Aqua is well positioned to deliver consistent growth in its core regulated water business. Meanwhile, management is pursuing a compelling strategy of doubling-down on these favorable regulatory areas with the pending acquisition of PA-based gas LDC Peoples. The result is a combination of stable underlying growth and compelling catalysts, with the impending regulatory approval of the Peoples deal likely to drive the stock higher in our view. Like most utilities, Aqua has seen its P/E multiple rise of late, but the stock trades at a ~10% discount to peers (our $43 target price based on our proprietary regulation-weighted relative valuation model (click HERE for RCI rankings report and valuation model). B&S Analyst: Ryan M. Connors.
- **Argo International (ARGO): Strong growth and execution, attractive valuation.** ARGO produced strong operating results in 1Q19, including solid premium growth and improved core loss and expense ratios. Management continues to enhance ARGO's operations via investments in technology and people, and we believe the company's operating performance is poised to further benefit from these investments. We compare ARGO to a peer group of 12 specialty insurers. The peer group is trading at a higher price-to-book multiple than ARGO (1.6x vs. 1.3x), but peers have generated only modestly stronger returns. ARGO's shares have returned 20% since mid-2018 but, relative to expected ROE, the shares still appear undervalued. Our $82 target is 1.4 times our forward BVPS estimate. B&S Analyst: Bob Farnam.
- **Bridge Bancorp (BDGE): A differentiated strategic model in an attractive area.** In a region (Long Island, NY) full of banks with high loan-to-deposit ratios and compressing net interest margins, Bridge Bancorp stands out as a differentiated model with a 91% L/D and expanding NIM. Combined with an attractive footprint, a long runway for above-average organic growth, and the ability to grow tangible book value 10% annually, we believe the risk/reward profile is favorable today, with shares trading at a discount to peers on a P/E basis (10.3x 2019E vs. 11.9x). Our $34 target price incorporates a forward (2020) P/E multiple of approximately 11.3 times. B&S Analyst: Erik Zwick.
- **Ecolab: Margin tailwinds set stage for upward revision cycle.** After battling higher oil-based raw material costs for years, Ecolab is finally seeing the price/cost situation turn in its favor, and we expect margin expansion to drive solid bottom-line growth in 2H19 and into 2020. Ecolab also represents a compelling "offense plus defense" story: top-line growth and margin expansion set the stage for the company to thrive if the economy continues to expand, while the "razor/razor-blade" nature of the company's consumables chemistry business makes the story low-beta to a potential recession scenario over the next 12-18 months. Our $210 target price for ECL reflects an Economic Value Added (EVA) yield of 1.3%, roughly in-line with the water infrastructure peer group average. B&S Analyst: Ryan M. Connors.
- **Employers Holdings (EIG): Compelling pure-play on workers' comp.** Employers booked favorable loss reserve development in each of the last eight quarters and, based on our review of the company's loss reserves at YE18, we believe the company will continue to recognize prior year reserve redundancies near-term. Given ongoing initiatives to improve efficiency and expand distribution capabilities, we also expect the company to gradually grow its top line (despite pricing headwinds) and maintain strong underwriting margins (although initiative-related expenses will be higher in the near-term). Loss trends remain favorable in the workers' compensation market. EIG's shares appear attractively priced trading at 1.1 times adjusted BVPS versus a median of 1.6x for a peer group of other specialty insurers. Our target price of $50 reflects a forward price/adjusted BVPS multiple of 1.25 times. B&S Analyst: Bob Farnam.

- **Flagstar Bancorp (FBC): Credit hiccup creates buying opportunity.** Flagstar disclosed an isolated credit issue that we expect to result in sizeable losses in 2Q, which partially explains the stock's steep discount. The situation involved a commercial loan to a reverse mortgage lender that declared bankruptcy, which we do not believe is indicative of larger problems with the loan portfolio or underwriting standards. Mortgage revenue comprises ~50% of earnings and given our more optimistic outlook for origination activity via lower market interest rates, we believe there is upside potential to current estimates. FBC trades at 10.5x our 2019 estimate and 132% of tangible book value. Our $39 target is based on a takeout-based valuation and peer multiples using a blend of banks and mortgage lenders. B&S Analyst: Scott Beury.
- **Kingstone (KINS): Solid insurer oversold after modest reserve charge.** Kingstone's shares are down 35% since late April when the company preannounced 1Q catastrophe losses ($0.37/share after tax) and a claims department restructuring/reserve charge ($0.37/share after tax). The stock price has declined 50% YTD, with the P/B multiple contracting to 1.1x from 2.1x – the dividend yield is 4.5% at the current price. We believe the shares have been oversold and think the market has overreacted to the company needing to boost reserves after seeing deteriorating trends in a handful of older liability claims, mostly in the company's small commercial lines book rather than in its core personal lines book. In our view, Kingstone remains one of the industry's top underwriters and we believe the company's long-term story remains intact (although results may continue to be pressured in the near-term until the commercial lines book is cleaned up). Our $13 target is 1.6 times our forward BVPS estimate. B&S Analyst: Bob Farnam.
- **Middlefield Banc Corp. (MBCN): Russell sell-off creates opportunity.** Middlefield was removed from the Russell 2000 index last month, which was preceded by a sustained sell-off in the shares, resulting in a discounted valuation. We believe the company is capable of generating consistent mid-single digit loan growth while maintaining stable credit metrics, and modest margin compression. The stock currently trades at 10x 2019e EPS and 114% of tangible book value, both representing a sizeable discount to peer multiples (11.5x, 155%). We believe this is unwarranted given the company's fundamental trends and expect the stock to drift higher through the remainder of the year. Our $51.50 target price is based on a blended valuation of peer multiples and a discounted acquisition analysis. B&S Analyst: Scott Beury.
- **SB One Bancorp (SBBX): Strong management team, winning culture.** SB One is a $1.9 billion community bank lead by a talented management team with big bank pedigrees. They operate the bank with a pervasive entrepreneurial spirit aimed at enhancing franchise value. We continue to see multiple catalysts for the stock to close the valuation gap with peers, including: 1) successful execution of acquisition-related cost saves, 2) improving profitability, and 3) above-peer organic balance sheet growth. We believe the risk/reward profile is favorable today, with shares trading at a discount to peers on both, P/E (8.9x 2019E vs. 11.9x peers) and P/TBV (1.3x vs. 1.4x peers) basis. Our $28 target price reflects a multiple of 10.2 times our current 2020 EPS estimate. B&S Analyst: Erik Zwick.
- **Xylem (XYL): Secular drivers create long-tailed growth story.** A water sector bellwether, Xylem boasts the water sector's most comprehensive solutions portfolio, offering a wide range of water treatment, transport, test, and metering/AMI solutions for customers in the municipal, industrial, and construction channels. The company has an established track record of organic growth and compelling acquisitions, and recently removed a key tactical risk from the equation by pushing its ambitious long-term operating margin target to the right. Our recent checks suggest Xylem's recent product launches are gaining strong pricing traction, setting up a strong second half for the company. Our $90 target reflects a forward P/E of 24.5x times, in-line with the water infrastructure peer group average. B&S Analyst: Ryan M. Connors.

Third quarter report contains no big surprises; Peoples, DELCORA key growth catalysts.

Aqua America posted 3Q EPS of $0.38, a penny below our estimate of $0.39, as stronger than expected revenue growth was offset by higher O&M expenses. Revenue increased 7.7% year/year in the third quarter, above our model at +5%, with new base rates, organic customer growth, and acquisitions all contributing. O&M expenses rose 19.5% year/year, driven by Peoples-related merger costs and a tough comp (management notes core expense growth was in-line with the historic run-rate).Overall, it was a solid operating quarter for Aqua, with the robust top-line growth encouraging.

The ALJ handling the Aqua/Peoples merger application in PA issued a favorable recommended decision last week, paving the way for the PUC to issue a final ruling (potentially on December 5 or 19). We expect the Peoples acquisition to close in January 2020, providing a notable catalyst for Aqua that will set the company apart from peers. As we've written consistently since Aqua sought to acquire electric transmission utility ITC in 2016 (and again when Eversource (ES-$81.42-Not Rated) acquired water utility Aquarion in 2017), we are big believers in the multi-utility concept. We envision Aqua/Peoples evolving into a powerful regulated infrastructure growth platform once the two companies have been successfully integrated.

In addition, Aqua signed an agreement to acquire DELCORA in 3Q, setting the stage for one of the industry's largest municipal deals in years. DELCORA is a regional WW system serving 500,000 people (or roughly 165,000 connections) in the southwestern Philadelphia suburbs, and Aqua will pay $277 million for the system. Aqua also has an additional 22,600 customers in the near-term acquisition pipeline. Headlined by DELCORA, Aqua continues to execute well on its municipal acquisition program, a key growth driver.

Aqua's combination of organic rate base growth, steady pipeline of municipal deals, and addition of a Pennsylvania gas platform provide a strong mix of fundamental catalysts that we believe set the stage for strong shareholder value generation in the years ahead. WTR shares remain our top idea in the utility space due to a mix of valuation and these fundamental catalysts. We rate WTR shares Outperform, with our $50 target price based on our regulation-driven valuation model and the stock's premium dividend yield.

PA PUC approves Peoples rate case settlement, but silence deafening on merger application.

Update: Peoples Rate Case (Docket R-2018-3006818):

Last week, the Pennsylvania Public Utilities Commission approved the settlement agreement in the Peoples rate case by a vote of 4-0. The company receives $59.5 million in new revenue, or 63% of the $94.9 million requested, a solid outcome relative to other recent cases. The new rates represent a 9% increase over Peoples' current PA regulated revenue, and will take effect on October 29.

Of note, the PUC ruled in Peoples' favor on the sole remaining issue of contention in the case (the proposed main line extension policy), overriding objections raised by the Office of the Small Business Advocate. We view the Peoples rate case settlement approval as a positive development for Aqua America, as it improves the returns and earnings power of a potential combined Aqua/Peoples entity.

Update: Aqua/Peoples Merger Application (A-2018-3006061):

While the Peoples rate case settlement approval is a clear positive, the Aqua/Peoples 's merger application continues to drag on longer than initially expected. We had expected an ALJ decision to come before the PUC as early as August, so the delay is significant, but it is difficult to interpret what the holdup means.

The "glass half empty" interpretation is that the delay suggests that the ALJ is leaning toward a negative ruling, with the rationale being that a denial of the merger would be highly controversial and therefore require an extremely high level of diligence and detail given the inevitable scrutiny and pushback it would trigger. Upgrade vs. abandonment of the Goodwin/Tombaugh gas gathering system is the key sticking point (see our June 20 note for details).

The "glass half full" read is that the PUC has finite resources, and the Peoples rate case was seen as the more urgent matter to be dealt with first. With the rate case resolved, the PUC will now move ahead with addressing the merger settlement agreement. In our view, the Peoples acquisition remains likely to close by year-end, creating a notable positive catalyst for WTR shares.

WTR remains our top idea in the water utility space due to a mix of discount valuation and fundamental catalysts. We rate WTR shares Outperform, with our $50 target price based on our regulation-driven valuation model and the stock's premium dividend yield.

Surprise ALJ decision a setback, but DELCORA acquisition remains likely to move forward.

Yesterday, the administrative law judges dealing with Essential/Aqua acquisition of DELCORA issued a proposed decision recommending that the PUC reject the deal. The surprise decision comes just days after the Delaware County of Common Pleas issued a distinctly one-sided ruling in Essential/DELCORA's favor. While the recommended ALJ decision is tactical setback for the transaction, we continue to believe that the deal will ultimately move forward to a 2021 close.

There appear to be three primary points on which the ALJ bases the adverse recommendation, and we believe that all three issues are manageable and will ultimately turn in Essential's favor.

Rate Stabilization Fund. The ALJ decision notes that the novel rate stabilization trust that is part of the DELCORA deal is not included in the PUC application. Since the ultimate ratemaking details stemming from the trust remain to be determined in future rate cases, it is not surprising that this was left out, but this is an easy fix, as there are a number of ways to ensure that ratepayers are made whole.

Local Municipality Protests. The recommended decision also says that protest from some local municipalities is a problem, but sources close to the situation suggest that many are open to settling and on the path to doing so. Based on the players involved, this pushback appears driven in part by local politics/personalities rather than the public interest, a dynamic that will not escape the commission.

Potential DelCo ruling appeal. The ALJ cites "ongoing litigation" as an issue, since Delaware County is believed to be mulling an appeal despite the judge ruling in Aqua's favor. Our read of the DelCo ruling suggests it is very unlikely to be overturned, and there also remains the possibility of a settlement. The bottom-line is that whatever the ALJ says, the DelCo lawsuit has been going Essential's way.

While there have been adverse ALJ recommendations in the past, it is rare for the commission to actually rule against an acquisition between two willing parties. This is particularly the case when the acquirer is a well-known, established, and respected in-state player such as Essential/Aqua. As a result, we believe the DELCORA deal will ultimately move forward despite the ALJ recommendation.

WTRG and its peers have performed respectably on a risk-adjusted basis, but have lagged the broader market (S&P 500 +17% TTM) and the huge gains in the water industrial sector (+33% TTM). We believe that WTRG offers compelling reward/risk, with our $54 target price reflecting a P/E of 32 times, in-line with the peer group.

4Q solid yet anti-climactic after guidance update call; All eyes on PUC as DELCORA ruling looms.

Essential posted 4Q20 EPS of $0.40, up from $0.28 a year ago, with the upside driven by the addition of Peoples and organic growth also contributing. Revenue more than doubled year/year (+109.7%), with Peoples adding $240 million, or 106.4%. Ex-Peoples, revenue rose 3.3% on a combination of higher volumetric sales, rates/surcharges, and acquisitions. Seasonally high purchased gas costs ($93 million, or 20% of sales vs. 7% in 1Q-3Q) pressured margins, with operating margin down 220 bps sequentially to 28%. Of note, one-time credits to gas customers related to the Peoples deal hit EPS by $0.06.

Essential acquired six water/WW systems totaling 12,000 customers for $63 million in 2020, and currently has APAs in place for a further 227,000 in connections. The largest is the $276 million acquisition of DELCORA, which was dealt an adverse ALJ ruling last month. Still, we see the three major issues raised by the ALJ (rate stabilization fund, local municipality protests, and potential appeal of a favorable DelCo Ct. of Common Pleas ruling) ultimately turning in Essential's favor. Essential expects a PA PUC decision by March 2021.

Essential was awarded $21 million in base rates and surcharges in 2020, including in Illinois, Indiana, Kentucky, North Carolina, Ohio, Pennsylvania, and Virginia. Year-to-date, the company has received $8.5 in rates/surcharges across New Jersey, NC, OH, and PA, and has $1.8 million pending in IN and VA. Though not immaterial, this pipeline of rate activity is light by the company's historical standards, which we see as timely. Essential had just completed a number of major rate cases before COVID-19, and therefore does not have to seek major rate hikes during these difficult times for customers.

Essential's fourth quarter report is somewhat of a non-event, as the company stole its own thunder with its January 11 guidance release and conference call. Predictably, management reiterated the 2021 guidance of $1.64-$1.69 issued last month (one wildcard 2021 issue to watch is the EPS impact of the Texas situation). Essential also reiterated its 5%-7% EPS CAGR target through 2023, and we see the company as well positioned to deliver the top growth rate across the regulated water/multi-utility peer group over this timeframe.

WTRG and peers have underperformed notably in recent days due in part to rising inflation concerns, despite the fact that the data show utilities outperform the broader market during inflationary periods (for details, see our industry report today). We believe WTRG shares offer a compelling reward/risk equation, with our $54 target reflecting a P/E of 32 times, in-line with the water utility peer group.

Rating and Price Target History:

Risk Factors

The realization of any or all of the following risk factors, among others, may adversely affect the company's stock price and prevent it from reaching our price target: the economic cycle, concentration in energy sector, foreign currency exposure, and client concentration.

Analyst Certification:

The research analysts whose names appears on this research report certify that: (1) all of the views expressed in this research report accurately reflect their personal views about the subject security or issuer, and (2) no part of the research analysts' compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analysts in this research report.

Important Disclosures:

Analyst compensation is based on, in part, Boenning & Scattergood, Inc.'s profitability, which includes revenues from investment banking. Boenning & Scattergood expects to receive or intends to seek compensation for investment banking services from the subject company in the next three months.

Boenning & Scattergood received compensation for investment banking services from the subject company within the past 12 months.

Boenning & Scattergood has managed a public offering and received compensation from the subject company within the past 12 months.

Boenning & Scattergood's Ratings System:

Our three-tier investment ratings are based on a stock's return potential relative to a broad market index:

- ***Outperform (Buy):*** The security's total return over the year or longer is expected to exceed the total return of the S&P 500™ over the identical period.
- ***Neutral (Hold):*** The security's total return over the next year or longer is expected to be roughly equivalent to the total return of the S&P 500™ over the identical period.
- ***Underperform (Sell):*** The security's total return over the next year or longer is expected to be less than the total return of the S&P 500™ over the identical period.

Our four-tier risk ratings are based on a mix of price volatility and fundamental factors relative to the market and peer group.

- ***Low:*** The security has higher-than-average fundamental predictability and/or lower-than-average price volatility.
- ***Moderate:*** The security has average fundamental predictability and/or average price volatility.
- ***High:*** The security has lower-than-average fundamental predictability and/or higher-than-average price volatility.
- ***Speculative:*** The security has very inconsistent fundamental predictability and/or very high relative price volatility.

*

Keep Calm, Carry On: Guidance, growth targets reaffirmed as regulated model shines amid crisis.

Essential Utilities posted 1Q EPS of $0.20, which include two weeks of the Peoples Gas acquisition which closed on March 16 (assuming a full quarter of Peoples, EPS would have been $0.60). In addition to the Peoples deal, Essential filed paperwork with the PUC in 1Q for the acquisition of the DELCORA regional wastewater system, which will be the largest municipal acquisition in the company's 134-year history as well as the biggest ever in the state of Pennsylvania.

In light of the solid first quarter report, Essential reiterated both its indicative (i.e. adjusted to include a full year of Peoples) 2020 EPS guidance of $1.53-$1.58 and its 5%-7% earnings CAGR through 2022. Given the strong organic growth dynamics and active M&A cadence, we believe Essential has the most compelling, sustainable growth story in the regulated environmental utility peer group.

Importantly for the intermediate-term outlook, Essential continues to move forward with its capital improvement program. Maintaining a robust capital investment level is key to sustaining rate base growth, which in turn is key to driving earnings and shareholder value. While affordability is a near-term concern, there is so far no evidence that COVID-19 is leading PUCs to lean on IOUs to cut capex to forestall future rate impacts. We believe that this is in part because regulated utilities provide timely offsetting infrastructure spending/stimulus at a time when state and local governments will be cutting budgets.

Like peers, Essential has suspended shut-offs during the COVID-19 crisis. This industry issue has been cited as a risk in the financial press, including a Wall Street Journal article this week (link HERE) saying households will "prioritize bills causing immediate disruptions to their lives if left unpaid. Cable TV and internet, which can still be cut off, are likely to rank higher on the payment hierarchy than electricity, gas and water". Such views misunderstand/ overstate the collection risks facing IOUs. Bills are being generated and will come due as the crisis stabilizes, and liabilities for basic utility services are unlikely to be forgiven except in cases of true financial hardship.

Essential's solid 1Q, guidance/growth target affirmation, active M&A pipeline, and continued execution on its capital investment program amid the huge COVID-19 economic shock epitomize the resilience of the regulated utility business model. We reiterate our Outperform rating for Essential, which we see as a best-of-breed player in the regulated utility space with notable near-term growth catalysts.

Our price target of $50 reflects a forward P/E multiple of 30.3 times, ~in-line with the current peer group average of 30.2 times.

County of Delaware vs. DELCORA: Initial hearing suggests acquisition likely to close in 2020 despite shrill rhetoric, legal maneuvering by local officials.

Summary: We attended today's Delaware County Court of Common Pleas hearing in the County of Delaware (aka DelCo) vs. DELCORA, which has major ramifications on whether Essential's acquisition of DELCORA will go forward (and if so under what terms). Contrary to rhetoric from county officials assailing any deal and privatization generally, the county's legal positions focused primarily on the structure of the ratepayer stabilization fund, leaving us with the clear impression that the case is really about who gets the money and not an effort to block the deal altogether. The attorneys agreed on a path forward that includes follow-up hearings in July-August, with hopes to conclude in the fall, and we came away believing the acquisition is likely to close in 2020.

Key Points:

- **County walks back attack on sale, focuses on ratepayer trust.** Told by the judge that he read the initial complaint as an attack on the sale of DELCORA and the ratepayer stabilization fund, DelCo lawyers seemed to backpedal, saying the complaint is meant to attack the trust and that at this time it has no issue with the sale of DELCORA per se. DelCo also seemed to walk back the immediacy of its June 3 ordinance to dissolve DELCORA, saying the authority can only be terminated once key impediments are removed, which could take months. While a lot can still happen, DelCo's legal stance on the Aqua/DELCORA deal appears far less nuclear than recent rhetoric in the local press suggests, substantially increasing the odds of the deal going.
- **DELCORA: County must honor deal even if authority terminated.** DELCORA attorneys made a persuasive argument that while DelCo does have the ability to dissolve the authority, it can only do so after honoring all contracts, which in this case encompasses the sale agreement with Aqua. DelCo's lawyers did not appear to have a ready answer to this, and the issue did not engender much further discussion with the judge, suggesting that public statements from Aqua and DELCORA that the merger agreement and rate stabilization fund are enforceable no matter who owns DELCORA are on solid legal ground. This is key, since it would render draconian press reports on the ramifications of the termination of DELCORA essentially moot.
- **Judge steering parties toward agreeing on modifications to trust.** The judge acknowledged that the structure of the ratepayer stabilization fund, and not DELCORA's sale or termination, is the key issue, noting at one point that "we don't deal with rhetoric in the newspaper, we deal with representations in court". A key point came when, at the judge's prodding, DelCo attorneys said they would be amenable to opening discussions about how to improve upon the structure of the trust. In our view, this was the clearest evidence yet that the county's opposition is really about the money trail rather than the deal itself. We believe Aqua would be open to reasonable modifications of the trust, provided they do not result in a negative financial impact.
- **Deal looks more likely to close, creating positive EPS/stock catalyst.** The key take-away is that the hearing indicated a much less extreme position on the part of DelCo than suggested by recent public meeting comments and quotes in the press. In addition to appearing to back off of attacks on the sale itself and the immediate termination of DELCORA, the county did not raise any concerns regarding the sale process itself. As a result, we now believe the DELCORA deal is likely to close in 2020, giving Essential critical mass to go after additional WW deals in PA and creating a positive earnings tailwind for 2021. We reiterate our Outperform rating for shares of WTRG, with our $50 target price applying a P/E of 30 times, in-line with peers.

Tour of Aqua's state-of-the-art environmental lab affirms thesis as PA's teethier WQAA advances.

We toured Aqua's recently completed 14,700 sq. foot environmental lab, located at Essential's corporate headquarters in Bryn Mawr, PA. Led by Chief Environmental, Safety, and Sustainability Officer Chris Crockett, our tour affirmed several key aspects of the investment thesis for WTRG. In particular, the lab's opening is timely given the likely imminent passage of PA 597, PA's water quality accountability legislation (unlike in NJ, where WQAA is still not being enforced due to DEP foot-dragging, the PA law will be implemented by the PUC, which aims to enforce it vigorously). The Bryn Mawr lab positions Aqua well as a partner for local water systems as they struggle to meet WQAA testing and compliance reporting requirements.

While it's predictable that Essential itself touts the new lab, our in-person tour independently confirms that the lab is in fact impressive. We've toured environmental labs for peer companies and major, big city municipal water/WW utilities, and Aqua's is the largest and most advanced environmental water testing facility we've seen yet.

Below are some of the key attributes of the new facility:

- Certified for environmental compliance reporting in five states (Ohio, Pennsylvania, New Jersey, North Carolina, Virginia).
- Equipped for 300,000 tests annually on 30,000 water samples.
- Comprehensive microbiological, organic, and inorganic analysis.
- Liquid Chromotography tandem Mass Spectrometry (LC-MS-MS) capabilities test for PFAS at demanding parts per trillion levels.
- Dedicated space for piloting cutting-edge analytical technologies.
- 20 employees; room to expand as organization grows.

WTRG trades at a discount to water utility peers, and a trite refrain is that Essential's foray into gas makes the company "less sustainable" and inhibits a full "ESG multiple". We don't buy this, seeing Essential as among the most sustainable companies in the space, and the state-of-the-art Bryn Mawr lab affirms this, highlighting that this is not only still very much a water company, but one at the forefront of addressing difficult issues like PFAS. Meanwhile, environmentally sound natural gas is crucial to Western PA's energy mix, and years of observing the industry from the frontlines (not puffy ESG reports) inform our view of Essential's sound corporate governance and excellent employee/customer/community/regulatory relations.

Our $54 target reflects a P/E of 32 times, in-line with water peers.

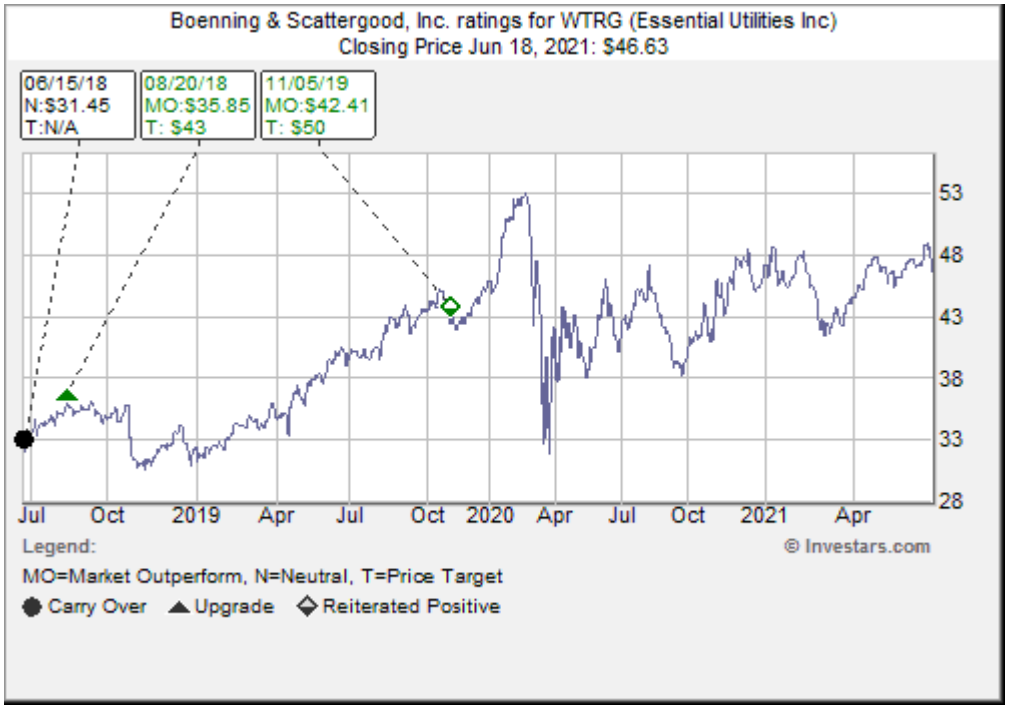
Disclosure Appendix

Rating and Price Target History:



Risk Factors

The realization of any or all of the following risk factors, among others, may adversely affect the company's stock price and prevent it from reaching our price target: the economic cycle, concentration in energy sector, foreign currency exposure, and client concentration.

Analyst Certification:

The research analysts whose names appears on this research report certify that: (1) all of the views expressed in this research report accurately reflect their personal views about the subject security or issuer, and (2) no part of the research analysts' compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analysts in this research report.

Important Disclosures:

Analyst compensation is based on, in part, Boenning & Scattergood, Inc.'s profitability, which includes revenues from investment banking. Boenning & Scattergood expects to receive or intends to seek compensation for investment banking services from the subject company in the next three months.

Boenning & Scattergood received compensation for investment banking services from the subject company within the past 12 months.

Boenning & Scattergood has managed a public offering and received compensation from the subject company within the past 12 months.

Boenning & Scattergood's Ratings System:

Our three-tier investment ratings are based on a stock's return potential relative to a broad market index:

- ***Outperform (Buy):*** The security's total return over the year or longer is expected to exceed the total return of the S&P 500™ over the identical period.
- ***Neutral (Hold):*** The security's total return over the next year or longer is expected to be roughly equivalent to the total return of the S&P 500™ over the identical period.
- ***Underperform (Sell):*** The security's total return over the next year or longer is expected to be less than the total return of the S&P 500™ over the identical period.

Our four-tier risk ratings are based on a mix of price volatility and fundamental factors relative to the market and peer group.

- ***Low:*** The security has higher-than-average fundamental predictability and/or lower-than-average price volatility.
- ***Moderate:*** The security has average fundamental predictability and/or average price volatility.
- ***High:*** The security has lower-than-average fundamental predictability and/or higher-than-average price volatility.
- ***Speculative:*** The security has very inconsistent fundamental predictability and/or very high relative price volatility.

EPS surge 17% as lockdowns drive residential demand; Growth outlook robust, highly visible.

Essential Utilities reported 2Q EPS of $0.29, up 17% year/year, with solid organic growth in the core water business and the addition of Peoples Gas driving a strong quarter, and management affirming its 2020 EPS guidance of $1.53-$1.58 (MOAP-basis). Excluding $150 million from Peoples, revenue rose 7.3% year/year in the core water business. Management says that higher residential demand due to COVID-19 quarantining more than offset the negative impact of the recession on commercial and industrial demand in the quarter.

An active rate pipeline is a usually a good thing for a regulated utility, but in the current environment, where rate increases are even more politically fraught than normal due to the impact of the COVID-19 recession on households, it pays to be off the radar. With just $5.2 million pending vs. annual revenue ~$1.5 billion, Essential's current rate pipeline is light. This is more a matter of being lucky than good (both Peoples and Aqua Pennsylvania recently wrapped up major rate cases), but either way it positions the company well to ride out the recession avoiding what could be meaningful regulatory lag.

Essential's $276 million DELCORA acquisition has seen unexpected delays due to a local legal challenge, but we believe the deal will close in 2020, creating a notable growth catalyst (see our June 18 note for details). Meanwhile, the municipal deal pipeline continues to expand, with Pennsylvania leading the way. In June, the city council in Norristown (pop. 35,000) approved the sale of the WW system to Aqua for $82 million. In addition to its size, Norristown is strategic because, with DELCORA, it would create a large PA WW ratepayer base, enabling future bolt-ons. Also, as the county seat in populous Montgomery County, Norristown is an anchor for peripheral deals.

After a brief lull at the onset of the COVID-19 pandemic, Essential is fully back up and running on its capital investment program, with the current 2020 capex target at $950 million (Aqua + Peoples). Early on in the pandemic, there were fears that rate base growth could slow (sapping future earnings growth), but this has not transpired.

Essential's solid 2Q, guidance/growth target affirmation, active M&A pipeline, and continued execution on its capital investment program amid the huge COVID-19 economic shock epitomize the resilience of the regulated utility business model. We reiterate our Outperform rating for Essential, which we see as a best-of-breed player in the regulated utility space with notable near-term growth catalysts.

Our price target of $50 reflects a forward P/E multiple of 30.1 times, ~in-line with the current peer group average of 29.5 times.

Member FINRA/SIPC

Aqua America, Inc. (WTR)

First Look at Q2 Results

Reiterate Outperform rating after Q2 earnings release. WTR reported results which were in line with consensus estimates, and the company reaffirmed adj. EPS guidance of $1.45 to $1.50 (excluding impacts of Peoples acquisition). Importantly, Peoples appears on track to close this fall (settlement filed in July), which we believe is the most important driver of the stock. Additionally, WTR has received $57.5M in annualized revenue increases YTD ($47M in Pennsylvania). We will look for additional information on the conference call.

- **Q2 results were in line with consensus EPS estimates due to rate increases and new customers from acquisitions and organic growth.** Q2 revenue was ~$218.9M vs. our/consensus estimates of $225M/$220M, as additional revenue from infrastructure surcharges contributed to ~3.3% growth y/y. Non-GAAP net income (excluding impacts of Peoples transaction-related expenses) was $66.8M vs. $70M/$66M, and EPS was $0.37 vs. $0.40/$0.37, respectively, due to rate increases and regulated growth.
- **WTR reaffirmed 2019 guidance.** WTR continues to expect $1.45 to $1.50 in EPS in 2019 (excluding impacts of Peoples transaction), total customer growth of ~2%-3%, and ~$550M in infrastructure investments.
- **Peoples appears on track to close in the fall.** Kentucky and West Virginia approved the Peoples acquisition in March and April, respectively, and WTR filed a settlement agreement in Pennsylvania which all but two intervenors chose not to oppose. The commission is expected to issue an order this fall.
- **Acquisition activity should continue to drive customer growth in the water business.** WTR has signed purchase agreements which are expected to add ~22.6k customer connections over the next two years (~$100M in rate base, on aggregate). Additionally, the company has a pipeline of ~400k water and wastewater customer connections it is actively pursuing across four states, which should help drive growth over time.
- **Rate increases and surcharges continue to contribute to revenue growth.** WTR has received $57.5M in annualized revenue increases thus far in 2019 due to favorable decisions in rate cases and infrastructure charges in five states, including ~$47M in Aqua Pennsylvania. Additionally, a decision on a total of ~$2.3M in annualized revenue increase is pending in Ohio, although the timing of potential regulatory approval remains unclear.
- **WTR's Q2 earnings call will be held today at 10:00 a.m. CT.** The call can be accessed at www.ir.aquaamerica.com.

Investment Thesis

US water infrastructure needs should drive long-term earnings growth. The water infrastructure in the United States is in significant need of upgrade and expansion. We believe a significant long-term earnings growth driver for WTR comes from substantial capital investment opportunities, which contribute to rate base growth, and in turn, drives earnings.

Peoples acquisition, a natural gas utility, should add another platform for organic growth. The combined entity is expected to have ~$10.8B in assets and a rate base of >$7.2B, 70% in water and wastewater and 30% in natural gas. We estimate WTR paid ~14.8x EV/EBITDA (based on an enterprise value of $4.275B and 2019E EBITDA of $289M) for the assets. The transaction is subject to regulatory approvals, including approval by public utility commissions in Pennsylvania, Kentucky, and West Virginia, and is expected to close in mid-2019.

Planned capital investment should expand rate base and generate growth for the company in the long run. We expect Aqua America's long-term EPS growth to be fueled in part by the company's ~$500 million annual capex investment. $1.4B is expected to be invested into system upgrades (main, pipes, hydrants, etc.) over the next three years, which provides direct value to customers. Discretionary system investments are typically targeted for states with enhanced recovery mechanisms which help stabilize margin and earnings consistencies despite accelerated investment.

The majority of WTR's regulatory operations are located in states that maintain enhanced regulatory recovery mechanisms. The majority of WTR's current operating system employs infrastructure mechanisms, which allow a return on investment outside of a full rate case, substantially reducing regulatory lag time and minimizing rate case activity. These regulatory mechanisms include infrastructure investment riders, statewide rates and incentive mechanisms for acquisitions of troubled water systems. We believe such mechanisms provide a constructive regulatory environment in which to make capital investments, enabling improved and more consistent earned returns, which should lead to a premium peer valuation.

Continued municipal water acquisitions should help customer growth. The company targets 2-3% customer growth in 2019 driven by acquisitions of municipal utilities. Aqua has successfully acquired numerous water and waste water systems in the past decade to supplement its internal growth. Acquisitions also provide significant follow-on investment opportunities as WTR improves the quality of an acquired water system. The company is expected to be a key player in consolidating some of the 53,000 private water systems in the U.S., and rehabilitating those systems to improve water quality and drive investment growth.

Raising price target to $44. Our price target is based on a ~28x P/E multiple on our 2020 EPS estimate, which is in line with comps which are currently trading at a ~24x-31x multiple. We believe this is justified as WTR integrates the Peoples acquisition.

Risks & Caveats

Our suitability rating on Aqua America is Lower Risk. Key risks include the following.

Regulation. Regulated operations are subject to local, state and federal regulations. Changes in the regulatory environment can affect WTR's near-term and long-term performance.

Weather. WTR's businesses are sensitive to fluctuations in the weather. Particularly wet or dry weather can impact near-term financial results.

Acquisition risk. WTR may have the opportunity to purchase assets or companies in the near future. Acquisitions carry risks related to personnel, expected-versus-actual growth and a myriad of unforeseen hurdles, all of which can negatively affect earnings.

Product quality. Unique among its sister regulated utility sectors, water utilities provide a product that is ingested. Despite robust mandated service quality standards that lower risk, a quality failure could materially impact the earnings and stock of WTR.

Company Description

Aqua America is a holding company for regulated utilities providing water and waste water services to nearly 3 million people located in the eastern half of the U.S. Over 50% of operating revenues and net income are derived from Pennsylvania.

Investment Ratings: Outperform (O) - Expected to outperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months. Neutral (N) - Expected to perform in line with the broader U.S. equity market over the next 12 months. Underperform (U) - Expected to underperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months.

Risk Ratings: L - Lower Risk – Higher-quality companies for investors seeking capital appreciation or income with an emphasis on safety. Company characteristics may include: stable earnings, conservative balance sheets, and an established history of revenue and earnings. A - Average Risk – Growth situations for investors seeking capital appreciation with an emphasis on safety. Company characteristics may include: moderate volatility, modest balance-sheet leverage, and stable patterns of revenue and earnings. H - Higher Risk – Higher-growth situations appropriate for investors seeking capital appreciation with the acceptance of risk. Company characteristics may include: higher balance-sheet leverage, dynamic business environments, and higher levels of earnings and price volatility. S - Speculative Risk – High growth situations appropriate only for investors willing to accept a high degree of volatility and risk. Company characteristics may include: unpredictable earnings, small capitalization, aggressive growth strategies, rapidly changing market dynamics, high leverage, extreme price volatility and unknown competitive challenges.

Valuation, Ratings and Risks. The recommendation and price target contained within this report are based on a time horizon of 12 months but there is no guarantee the objective will be achieved within the specified time horizon. Price targets are determined by a subjective review of fundamental and/or quantitative factors of the issuer, its industry, and the security type. A variety of methods may be used to determine the value of a security including, but not limited to, discounted cash flow, earnings multiples, peer group comparisons, and sum of the parts. Overall market risk, interest rate risk, and general economic risks impact all securities. Specific information regarding the price target and recommendation is provided in the text of our most recent research report.

Distribution of Investment Ratings. As of July 31, 2019, Baird U.S. Equity Research covered 708 companies, with 60% rated Outperform/Buy, 39% rated Neutral/Hold and 1% rated Underperform/Sell. Within these rating categories, 9% of Outperform/Buy-rated and 2% of Neutral/Hold-rated companies have compensated Baird for investment banking services in the past 12 months and/or Baird managed or co-managed a public offering of securities for these companies in the past 12 months.

Analyst Compensation. Research analyst compensation is based on: (1) the correlation between the research analyst's recommendations and stock price performance; (2) ratings and direct feedback from our investing clients, our institutional and retail sales force (as applicable) and from independent rating services; (3) the research analyst's productivity, including the quality of such analyst's research and such analyst's contribution to the growth and development of our overall research effort; and (4) compliance with all of Baird's internal policies and procedures. This compensation criteria and actual compensation is reviewed and approved on an annual basis by Baird's Research Oversight Committee. Research analyst compensation is derived from all revenue sources of the firm, including revenues from investment banking. Baird does not compensate research analysts based on specific investment banking transactions.

Disclaimers

Baird prohibits analysts from owning stock in companies they cover.

This is not a complete analysis of every material fact regarding any company, industry or security. The opinions expressed here reflect our judgment at this date and are subject to change. The information has been obtained from sources we consider to be reliable, but we cannot guarantee the accuracy.

ADDITIONAL INFORMATION ON COMPANIES MENTIONED HEREIN IS AVAILABLE UPON REQUEST

The Dow Jones Industrial Average, S&P 500, S&P 400 and Russell 2000 are unmanaged common stock indices used to measure and report performance of various sectors of the stock market; direct investment in indices is not available. Baird is exempt from the requirement to hold an Australian financial services license. Baird is regulated by the United States Securities and Exchange Commission, FINRA, and various other self-regulatory organizations and those laws and regulations may differ from Australian laws. This report has been prepared in accordance with the laws and regulations governing United States broker-dealers and not Australian laws.

Other Disclosures

The information and rating included in this report represent the research analyst's views based on a time horizon of 12 months, as described above, unless otherwise stated. In our standard company-specific research reports, the subject company may be designated as a "Fresh Pick", representing that the research analyst believes the company to be a high-conviction investment idea based on a subjective review of one or more fundamental or quantitative factors until an expiration date specified by the analyst but not to exceed nine months. The Fresh Pick designation and specified expiration date will be displayed in standard company-specific research reports on the company until the occurrence of the expiration date or such time as the analyst removes the Fresh Pick designation from the company in a subsequent, standard company-specific research report. The research analyst(s) named in this report may, at times and at the request of clients or their Baird representatives, provide particular investment perspectives or trading strategies based primarily on the analyst's understanding of the individual client's objectives. These perspectives or trading strategies generally are responsive to client inquiries and based on criteria the research analyst considers relevant to the client. As such, these perspectives and strategies may differ from the research analyst's views contained in this report.

Baird and/or its affiliates may provide to certain clients additional or research supplemental products or services, such as outlooks, commentaries and other detailed analyses, which focus on covered stocks, companies, industries or sectors. Not all clients who receive our standard company-specific research reports are eligible to receive these additional or supplemental products or services. Baird determines in its sole discretion the clients who will receive additional or supplemental products or services, in light of various factors including the size and scope of the client relationships. These additional or supplemental products or services may feature different analytical or research techniques and information than are contained in Baird's standard research reports. Any ratings and recommendations contained in such additional or research supplemental products are consistent with the research analyst's ratings and recommendations contained in more broadly disseminated standard research reports. Baird disseminates its research reports to all clients simultaneously by posting such reports to Baird's password-protected client portal, https://bol.rwbaird.com/Login("BairdOnline"). All clients may access BairdOnline and at any time. All clients are advised to check BairdOnline for Baird's most recent research reports. After research reports are posted to BairdOnline, such reports may be emailed to clients, based on, among other things, client interest, coverage, stock ownership and indicated email

preferences, and electronically distributed to certain third-party research aggregators, who may make such reports available to entitled clients on password-protected, third-party websites. Not all research reports posted to BairdOnline will be emailed to clients or electronically distributed to such research aggregators. To request access to Baird Online, please visit https://bol.rwbaird.com/Login/RequestInstLogin or contact your Baird representative.

Dividend Yield. As used in this report, the term “dividend yield” refers, on a percentage basis, to the historical distributions made by the issuer relative to its current market price. Such distributions are not guaranteed, may be modified at the issuer’s discretion, may exceed operating cash flow, subsidized by borrowed funds or include a return of investment principal.

United Kingdom (“UK”) disclosure requirements for the purpose of distributing this research into the UK and other countries for which Robert W. Baird Limited holds a MiFID passport.

The contents of this report may contain an "investment recommendation", as defined by the Market Abuse Regulation EU No 596/2014 ("MAR"). This report does not contain a “personal recommendation” or “investment advice”, as defined by the Market in Financial Instruments Directive 2014/65/EU (“MiFID”). Please therefore be aware of the important disclosures outlined below. Unless otherwise stated, this report was completed and first disseminated at the date and time provided on the timestamp of the report. If you would like further information on dissemination times, please contact us. The views contained in this report: (i) do not necessarily correspond to, and may differ from, the views of Robert W. Baird Limited or any other entity within the Baird Group, in particular Robert W. Baird & Co. Incorporated; and (ii) may differ from the views of another individual of Robert W. Baird Limited.

This material is distributed in the UK and the European Economic Area (“EEA”) by Robert W. Baird Limited, which has an office at Finsbury Circus House, 15 Finsbury Circus, London EC2M 7EB and is authorized and regulated by the Financial Conduct Authority (“FCA”) in the UK.

For the purposes of the FCA requirements, this investment research report is classified as investment research and is objective. This material is only directed at and is only made available to persons in the EEA who would satisfy the criteria of being "Professional" investors under MiFID and to persons in the UK falling within Articles 19, 38, 47, and 49 of the Financial Services and Markets Act of 2000 (Financial Promotion) Order 2005 (all such persons being referred to as “relevant persons”). Accordingly, this document is intended only for persons regarded as investment professionals (or equivalent) and is not to be distributed to or passed onto any other person (such as persons who would be classified as Retail clients under MiFID).

All substantially material sources of the information contained in this report are disclosed. All sources of information in this report are reliable, but where there is any doubt as to reliability of a particular source, this is clearly indicated. There is no intention to update this report in future. Where, for any reason, an update is made, this will be made clear in writing on the research report. Such instances will be occasional only.

Please note that this report may provide views which differ from previous recommendations made by the same individual in respect of the same financial instrument or issuer in the last 12 months. Information and details regarding previous recommendations in relation to the financial instruments or issuer referred to in this report are available at https://baird.bluematrix.com/sellside/MAR.action.

Robert W. Baird Limited or one of its affiliates may at any time have a long or short position in the company or companies mentioned in this report. Where Robert W. Baird Limited or one of its affiliates holds a long or short position exceeding 0.5% of the total issued share capital of the issuer, this will be disclosed separately by your Robert W. Baird Limited representative upon request.

Investment involves risk. The price of securities may fluctuate and past performance is not indicative of future results. Any recommendation contained in the research report does not have regard to the specific investment objectives, financial situation and the particular needs of any individuals. You are advised to exercise caution in relation to the research report. If you are in any doubt about any of the contents of this document, you should obtain independent professional advice.

Robert W. Baird Limited and Robert W. Baird & Co. Incorporated have in place organisational and administrative arrangements for the prevention, avoidance, and disclosure of conflicts of interest with respect to research recommendations. Robert W. Baird Limited’s Conflicts of Interest Policy, available here, outlines the approach Robert W. Baird Limited takes in relation to conflicts of interest and includes detail as to its procedures in place to identify, manage and control conflicts of interest. Robert W. Baird Limited and or one of its affiliates may be party to an agreement with the issuer that is the subject of this report relating to the provision of services of investment firms. Robert W. Baird & Co. Incorporated’s policies and procedures are designed to identify and effectively manage conflicts of interest related to the preparation and content of research reports and to promote objective and reliable research that reflects the truly held opinions of research analysts. Robert W. Baird & Co. Incorporated’s research analysts certify on a quarterly basis that such research reports accurately reflect their personal views.

Aqua America, Inc. (WTR)

Announces Major Municipal Acquisition

Reiterate Outperform rating following acquisition announcement. WTR announced an agreement to acquire DELCORA's wastewater assets for $276.5M — the largest municipal acquisition in company and Pennsylvania history. With a prior estimated depreciated rate base of ~$240M, the acquired assets should drive significant rate base growth (~5%+ initially) with an opportunity for ~$1.2B of CapEx over the next 20 years. Financing will likely be the next questions for investors and we think WTR could look to issue an ATM to fund the deal. Remain buyers at current levels.

- **Last night, WTR announced an agreement to acquire DELCORA's wastewater assets for $276.5M, which will be the largest municipal acquisition in PA history.** Delaware Country Regional Water Quality Control Authority (DELCORA) serves ~500k people (estimated ~165k retail customers) in Southeast Pennsylvania; the acquisition is the largest ever municipal acquisition for WTR and the largest water/wastewater deal in Pennsylvania history. WTR previously announced it signed a letter of intent committing to exclusive discussions with DELCORA (see: Q2 Conference Call Highlights). The transaction is subject to approval by the Pennsylvania PUC.
- **Transaction significantly expands WTR's wastewater customer base; DELCORA assets to be aggregated into wastewater business.** For context, WTR serves ~3M people across its asset base— the DELCORA assets alone serve ~500k customers. The company currently has ~100k wastewater customers, so the addition of 165k new retail customers from acquired assets is significant. As part of the acquisition, Aqua will hire all 136 DELCORA employees and will aggregate all wastewater customers into what is effectively the company's new wastewater division.
- **DELCORA depreciated rate base previously forecast at ~$240M; should drive significant (~5%+) growth with an opportunity for further investment over time.** The depreciated rate base for the DELCORA assets was previously estimated at ~$240M and should immediately drive ~5% rate base growth (over YE:19 forecast of ~$5B in rate base for WTR's water assets). Additionally, WTR indicated CapEx need for the acquired assets is forecast at $1.2B through 2041, which should drive further rate base growth over time.
- **Financing likely next question for investors; we think it is possible WTR will look to issue an ATM to fund deal.** Particularly following the Peoples acquisition, we think investors will now focus on financing strategies for the large deal. Management previously indicated it could look to put out an at-the-market program to fund a municipal acquisition of this size, though we will look for more information on the Q3 conference call.

Investment Thesis

US water infrastructure needs should drive long-term earnings growth. The water infrastructure in the United States is in significant need of upgrade and expansion. We believe a significant long-term earnings growth driver for WTR comes from substantial capital investment opportunities, which contribute to rate base growth, and in turn, drives earnings.

Peoples acquisition, a natural gas utility, should add another platform for organic growth. The combined entity is expected to have ~$10.8B in assets and a rate base of >$7.2B, 70% in water and wastewater and 30% in natural gas. We estimate WTR paid ~14.8x EV/EBITDA (based on an enterprise value of $4.275B and 2019E EBITDA of $289M) for the assets. The transaction is subject to regulatory approvals, including approval by public utility commissions in Pennsylvania, Kentucky, and West Virginia, and is expected to close in late-2019.

Planned capital investment should expand rate base and generate growth for the company in the long run. We expect Aqua America's long-term EPS growth to be fueled in part by the company's ~$500 million annual capex investment. $1.4B is expected to be invested into system upgrades (main, pipes, hydrants, etc.) over the next three years, which provides direct value to customers. Discretionary system investments are typically targeted for states with enhanced recovery mechanisms which help stabilize margin and earnings consistencies despite accelerated investment.

The majority of WTR's regulatory operations are located in states that maintain enhanced regulatory recovery mechanisms. The majority of WTR's current operating system employs infrastructure mechanisms, which allow a return on investment outside of a full rate case, substantially reducing regulatory lag time and minimizing rate case activity. These regulatory mechanisms include infrastructure investment riders, statewide rates and incentive mechanisms for acquisitions of troubled water systems. We believe such mechanisms provide a constructive regulatory environment in which to make capital investments, enabling improved and more consistent earned returns, which should lead to a premium peer valuation.

Continued municipal water acquisitions should help customer growth. The company targets 2-3% customer growth in 2019 driven by acquisitions of municipal utilities. Aqua has successfully acquired numerous water and waste water systems in the past decade to supplement its internal growth. Acquisitions also provide significant follow-on investment opportunities as WTR improves the quality of an acquired water system. The company is expected to be a key player in consolidating some of the 53,000 private water systems in the U.S., and rehabilitating those systems to improve water quality and drive investment growth.

Price target $44. Our price target is based on a ~28x P/E multiple on our 2020 EPS estimate, which is in line with comps which are currently trading at a ~24x-31x multiple. We believe this is justified as WTR integrates the Peoples acquisition.

Risks & Caveats

Our suitability rating on Aqua America is Lower Risk. Key risks include the following.

Regulation. Regulated operations are subject to local, state and federal regulations. Changes in the regulatory environment can affect WTR's near-term and long-term performance.

Weather. WTR's businesses are sensitive to fluctuations in the weather. Particularly wet or dry weather can impact near-term financial results.

Acquisition risk. WTR may have the opportunity to purchase assets or companies in the near future. Acquisitions carry risks related to personnel, expected-versus-actual growth and a myriad of unforeseen hurdles, all of which can negatively affect earnings.

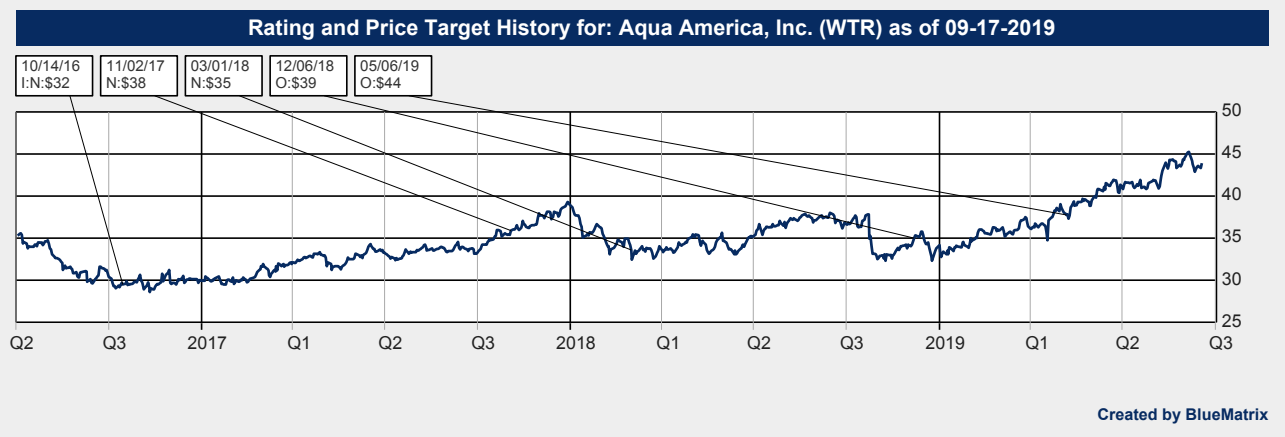
Product quality. Unique among its sister regulated utility sectors, water utilities provide a product that is ingested. Despite robust mandated service quality standards that lower risk, a quality failure could materially impact the earnings and stock of WTR.

Company Description

Aqua America is a holding company for regulated utilities providing water and waste water services to nearly 3 million people located in the eastern half of the U.S. Over 50% of operating revenues and net income are derived from Pennsylvania.

Appendix - Important Disclosures and Analyst Certification

Approved on 18 September 2019 08:43EDT/ Published on 18 September 2019 08:48EDT.



2 Robert W. Baird & Co. Incorporated and/or its affiliates managed or co-managed a public offering of securities of Aqua America, Inc. in the past 12 months.

3 Robert W. Baird & Co. Incorporated and/or its affiliates have received investment banking compensation from Aqua America, Inc. in the past 12 months.

1 Robert W. Baird & Co. Incorporated makes a market in the securities of WTR.

Robert W. Baird & Co. Incorporated (“Baird”) and/or its affiliates expect to receive or intend to seek investment-banking related compensation from the company or companies mentioned in this report within the next three months. Baird may not be licensed to execute transactions in all foreign listed securities directly. Transactions in foreign listed securities may be prohibited for residents of the United States. Please contact a Baird representative for more information.

Investment Ratings: Outperform (O) - Expected to outperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months. Neutral (N) - Expected to perform in line with the broader U.S. equity market over the next 12 months. Underperform (U) - Expected to underperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months.

Risk Ratings: L - Lower Risk – Higher-quality companies for investors seeking capital appreciation or income with an emphasis on safety. Company characteristics may include: stable earnings, conservative balance sheets, and an established history of revenue and earnings. A - Average Risk – Growth situations for investors seeking capital appreciation with an emphasis on safety. Company characteristics may include: moderate volatility, modest balance-sheet leverage, and stable patterns of revenue and earnings. H - Higher Risk – Higher-growth situations appropriate for investors seeking capital appreciation with the acceptance of risk. Company characteristics may include: higher balance-sheet leverage, dynamic business environments, and higher levels of earnings and price volatility. S - Speculative Risk – High growth situations appropriate only for investors willing to accept a high degree of volatility and risk. Company characteristics may include: unpredictable earnings, small capitalization, aggressive growth strategies, rapidly changing market dynamics, high leverage, extreme price volatility and unknown competitive challenges.

Valuation, Ratings and Risks. The recommendation and price target contained within this report are based on a time horizon of 12 months but there is no guarantee the objective will be achieved within the specified time horizon. Price targets are determined by a subjective review of fundamental and/or quantitative factors of the issuer, its industry, and the security type. A variety of methods may be used to determine the value of a security including, but not limited to, discounted cash flow, earnings multiples, peer group comparisons, and sum of the parts. Overall market risk, interest rate risk, and general economic risks impact all securities. Specific information regarding the price target and recommendation is provided in the text of our most recent research report.

Distribution of Investment Ratings. As of August 30, 2019, Baird U.S. Equity Research covered 711 companies, with 60% rated Outperform/Buy, 39% rated Neutral/Hold and 1% rated Underperform/Sell. Within these rating categories, 11% of Outperform/Buy-rated and 3% of Neutral/Hold-rated companies have compensated Baird for investment banking services in the past 12 months and/or Baird managed or co-managed a public offering of securities for these companies in the past 12 months.

Analyst Compensation. Research analyst compensation is based on: (1) the correlation between the research analyst's recommendations and stock price performance; (2) ratings and direct feedback from our investing clients, our institutional and retail sales force (as applicable) and from independent rating services; (3) the research analyst's productivity, including the quality of such analyst's research and such analyst's contribution to the growth and development of our overall research effort; and (4) compliance with all of Baird's internal policies and procedures. This compensation criteria and actual compensation is reviewed and approved on an annual basis by Baird's Research Oversight Committee. Research analyst compensation is derived from all revenue sources of the firm, including revenues from investment banking. Baird does not compensate research analysts based on specific investment banking transactions.

Aqua America, Inc. (WTR)

First Look at Q3 Results

Reiterate Outperform rating after Q3 earnings release. WTR reported results which were in line with consensus estimates, and the company reaffirmed adj. EPS guidance of $1.45 to $1.50 (excluding impact of Peoples acquisition). Importantly, the Peoples acquisition is now expected to close in late 2019 or early 2020 (vs. prior expectation of fall 2019), though WTR appears to be progressing through regulatory proceedings; we believe this is the most important driver of the stock. Additionally, WTR has received $59.8M in annualized revenue increases YTD.

- **Q3 results were in line with consensus EPS estimates due to rate increases and new customers from acquisitions and organic growth.** Q3 revenue was ~$243.6M vs. our/consensus estimates of $241M/$250M, as additional revenue from infrastructure surcharges contributed to ~7.7% growth y/y. Non-GAAP net income (excluding impacts of Peoples transaction-related expenses) was $85.6M vs. $86M/$88M, and EPS was $0.48 vs. $0.48/$0.44, respectively, due to rate increases and regulated growth.
- **WTR reaffirmed 2019 guidance, excluding impact of Peoples acquisition.** WTR continues to expect $1.45 to $1.50 in EPS in 2019 (excluding impacts of Peoples transaction), total customer growth of ~2%-3%, and ~$550M in infrastructure investments.
- **Peoples acquisition now expected to close in late 2019 or early 2020 (vs. prior expectation of fall 2019), though WTR appears to be progressing through regulatory proceedings.** Kentucky and West Virginia approved the Peoples acquisition in March and April, respectively. In Pennsylvania, the Administrative Law Judge issued a recommended decision determining WTR is fit to control Peoples and that the acquisition would be positive for the public; the Pennsylvania Utility Commission will now review the recommendation and issue a final order. WTR now expects the acquisition to close in late 2019 or early 2020.
- **Acquisition activity should continue to drive customer growth in the water business; WTR announced an agreement to acquire DELCORA's wastewater assets for ~$276.5M in Q3.** WTR has signed purchase agreements which are expected to add ~22.6k customer connections by early 2020 (~$110M in rate base, on aggregate). Additionally, WTR announced an agreement to acquire DELCORA's wastewater assets; the largest municipal acquisition in company and Pennsylvania history (see: Municipal Acquisition); we will look for more information on the conference call.
- **Rate increases and surcharges continue to contribute to revenue growth.** WTR has received $59.8M in annualized revenue increases thus far in 2019 due to favorable decisions in rate cases and infrastructure charges in five states.
- **WTR's Q3 earnings call will be held today at 10:00 a.m. CT.** The call can be accessed at www.ir.aquaamerica.com.

Investment Thesis

US water infrastructure needs should drive long-term earnings growth. The water infrastructure in the United States is in significant need of upgrade and expansion. We believe a significant long-term earnings growth driver for WTR comes from substantial capital investment opportunities, which contribute to rate base growth, and in turn, drives earnings.

Peoples acquisition, a natural gas utility, should add another platform for organic growth. The combined entity is expected to have ~$10.8B in assets and a rate base of >$7.2B, 70% in water and wastewater and 30% in natural gas. We estimate WTR paid ~14.8x EV/EBITDA (based on an enterprise value of $4.275B and 2019E EBITDA of $289M) for the assets. The transaction is subject to regulatory approvals, including approval by public utility commissions in Pennsylvania, Kentucky, and West Virginia, and is expected to close in late-2019.

Planned capital investment should expand rate base and generate growth for the company in the long run. We expect Aqua America's long-term EPS growth to be fueled in part by the company's ~$500 million annual capex investment. $1.4B is expected to be invested into system upgrades (main, pipes, hydrants, etc.) over the next three years, which provides direct value to customers. Discretionary system investments are typically targeted for states with enhanced recovery mechanisms which help stabilize margin and earnings consistencies despite accelerated investment.

The majority of WTR's regulatory operations are located in states that maintain enhanced regulatory recovery mechanisms. The majority of WTR's current operating system employs infrastructure mechanisms, which allow a return on investment outside of a full rate case, substantially reducing regulatory lag time and minimizing rate case activity. These regulatory mechanisms include infrastructure investment riders, statewide rates and incentive mechanisms for acquisitions of troubled water systems. We believe such mechanisms provide a constructive regulatory environment in which to make capital investments, enabling improved and more consistent earned returns, which should lead to a premium peer valuation.

Continued municipal water acquisitions should help customer growth. The company targets 2-3% customer growth in 2019 driven by acquisitions of municipal utilities. Aqua has successfully acquired numerous water and waste water systems in the past decade to supplement its internal growth. Acquisitions also provide significant follow-on investment opportunities as WTR improves the quality of an acquired water system. The company is expected to be a key player in consolidating some of the 53,000 private water systems in the U.S., and rehabilitating those systems to improve water quality and drive investment growth.

$44 price target. Our price target is based on a ~28x P/E multiple on our 2020 EPS estimate, which is in line with comps which are currently trading at a ~24x-31x multiple. We believe this is justified as WTR integrates the Peoples acquisition.

Risks & Caveats

Our suitability rating on Aqua America is Lower Risk. Key risks include the following.

Regulation. Regulated operations are subject to local, state and federal regulations. Changes in the regulatory environment can affect WTR's near-term and long-term performance.

Weather. WTR's businesses are sensitive to fluctuations in the weather. Particularly wet or dry weather can impact near-term financial results.

Acquisition risk. WTR may have the opportunity to purchase assets or companies in the near future. Acquisitions carry risks related to personnel, expected-versus-actual growth and a myriad of unforeseen hurdles, all of which can negatively affect earnings.

Product quality. Unique among its sister regulated utility sectors, water utilities provide a product that is ingested. Despite robust mandated service quality standards that lower risk, a quality failure could materially impact the earnings and stock of WTR.

Company Description

Aqua America is a holding company for regulated utilities providing water and waste water services to nearly 3 million people located in the eastern half of the U.S. Over 50% of operating revenues and net income are derived from Pennsylvania.

2 Robert W. Baird & Co. Incorporated and/or its affiliates managed or co-managed a public offering of securities of Aqua America, Inc. in the past 12 months.

3 Robert W. Baird & Co. Incorporated and/or its affiliates have received investment banking compensation from Aqua America, Inc. in the past 12 months.

1 Robert W. Baird & Co. Incorporated makes a market in the securities of WTR.

Appendix – Important Disclosures and Analyst Certification
Robert W. Baird & Co. Incorporated ("Baird") and/or its affiliates expect to receive or intend to seek investment-banking related compensation from the company or companies mentioned in this report within the next three months. Baird may not be licensed to execute transactions in all foreign listed securities directly. Transactions in foreign listed securities may be prohibited for residents of the United States. Please contact a Baird representative for more information.
Investment Ratings: Outperform (O) - Expected to outperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months. **Neutral (N)** - Expected to perform in line with the broader U.S. equity market over the next 12 months. **Underperform (U)** - Expected to underperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months.
Risk Ratings: L - Lower Risk – Higher-quality companies for investors seeking capital appreciation or income with an emphasis on safety. Company characteristics may include: stable earnings, conservative balance sheets, and an established history of revenue and earnings. **A - Average Risk** – Growth situations for investors seeking capital appreciation with an emphasis on safety. Company characteristics may include: moderate volatility, modest balance-sheet leverage, and stable patterns of revenue and earnings. **H - Higher Risk** – Higher-growth situations appropriate for investors seeking capital appreciation with the acceptance of risk. Company characteristics may include: higher balance-sheet leverage, dynamic business environments, and higher levels of earnings and price volatility. **S - Speculative Risk** – High growth situations appropriate only for investors willing to accept a high degree of volatility and risk. Company characteristics may include: unpredictable earnings, small capitalization, aggressive growth strategies, rapidly changing market dynamics, high leverage, extreme price volatility and unknown competitive challenges.
Valuation, Ratings and Risks. The recommendation and price target contained within this report are based on a time horizon of 12 months but there is no guarantee the objective will be achieved within the specified time horizon. Price targets are determined by a subjective review of fundamental and/or quantitative factors of the issuer, its industry, and the security type. A variety of methods may be used to determine the value of a security including, but not limited to, discounted cash flow, earnings multiples, peer group comparisons, and sum of the parts. Overall market risk, interest rate risk, and general economic risks impact all securities. Specific information regarding the price target and recommendation is provided in the text of our most recent research report.
Distribution of Investment Ratings. As of October 31, 2019, Baird U.S. Equity Research covered 715 companies, with 59% rated Outperform/Buy, 40% rated Neutral/Hold and 1% rated Underperform/Sell. Within these rating categories, 10% of Outperform/Buy-rated and 3% of Neutral/Hold-rated companies have compensated Baird for investment banking services in the past 12 months and/or Baird managed or co-managed a public offering of securities for these companies in the past 12 months.
Analyst Compensation. Research analyst compensation is based on: (1) the correlation between the research analyst's recommendations and stock price performance; (2) ratings and direct feedback from our investing clients, our institutional and retail sales force (as applicable) and from independent rating services; (3) the research analyst's productivity, including the quality of such analyst's research and such analyst's contribution to the growth and development of our overall research effort; and (4) compliance with all of Baird's internal policies

and procedures. This compensation criteria and actual compensation is reviewed and approved on an annual basis by Baird's Research Oversight Committee. Research analyst compensation is derived from all revenue sources of the firm, including revenues from investment banking. Baird does not compensate research analysts based on specific investment banking transactions.

Essential Utilities Inc., (WTRG)

Brief Thoughts After Investor Day

Reiterate Outperform rating after investor day. WTRG issued 2020 and three-year EPS growth guidance which was largely in line with expectations and should help calibrate models following the close of the Peoples acquisition (expected mid-March). Importantly, we believe long-term growth drivers are on track: the accelerated pipeline replacement program and long-term water infrastructure need provides CapEx visibility and WTRG continues to execute on its municipal acquisition strategy. We think Essential Utilities is well-positioned for current market volatility, and remain buyers at current levels.

- **WTRG issued 2020 and three-year EPS growth guidance which was largely in line with expectations; EPS growth should align with rate base growth over the long run.** For 2020, WTRG guided to ~$1.53 - $1.58 of adj. EPS (largely in line with consensus of $1.58) and $1.05 - $1.10 of GAAP EPS (assuming 9.5 months of Peoples contribution and transaction expenses). EPS is expected to grow at a 5%-7% CAGR through 2022E, which compares favorably with water utility peers, and overtime management indicated EPS growth should mirror rate base growth (6%-7% growth for water, excluding acquisitions, 8%-10% for Gas).
- **Pipeline replacement at Peoples, along with substantial need for investment in water infrastructure, provides significant visibility on forward CapEx.** WTRG guided to ~$400M of annual CapEx for Peoples alone, as the company operates under an accelerated pipe replacement program; at ~189 miles replaced/year, the business has visibility on 15+ years of increased capital spending (recovered through DSIC). Separately, ongoing CapEx in the water business (~$550M expected in 2020) should drive rate base and earnings growth.
- **WTRG's municipal acquisition strategy is on track, and could help accelerate growth (particularly in the water business).** Since 2015, WTRG has added ~$237M of rate base through 57 acquisitions, and has signed municipal agreements (pending close) for ~$327M of aggregate purchase price, most significantly DELCORA (198k total customers, alone). Moving forward, the company has identified acquisition opportunities totaling ~320k customer additions (majority wastewater), which could contribute to rate base growth over time. As a reminder, every ~$100M of acquired rate base amounts to ~$5M of incremental annual earnings potential.
- **We think WTRG, and the other water utilities under our coverage, are well-positioned in the current macro environment and could be a safe haven during market volatility.** All four utilities under our coverage have significant growth visibility and little to no exposure to trade or the global economy, which we think is a key differentiating factor. Favorable regulatory dynamics, M&A activity and accelerating capital investment should continue to drive EPS growth regardless of broader macro uncertainty. We believe the space is well positioned to outperform the market if volatility and/or macro headwinds persist.

Investment Thesis

US water infrastructure needs should drive long-term earnings growth. The water infrastructure in the United States is in significant need of upgrade and expansion. We believe a significant long-term earnings growth driver for WTRG comes from substantial capital investment opportunities, which contribute to rate base growth, and in turn, drives earnings.

Peoples acquisition, a natural gas utility, should add another platform for organic growth. The combined entity is expected to have ~$10.8B in assets and a rate base of >$7.2B, 70% in water and wastewater and 30% in natural gas. We estimate WTR paid ~14.8x EV/EBITDA (based on an enterprise value of $4.275B and 2019E EBITDA of $289M) for the assets. The transaction is expected to close in mid-March.

Planned capital investment should expand rate base and generate growth for the company in the long run. We expect WTRG's long-term EPS growth to be fueled in part by the company's ~ $950M annual capex investment. Investments are typically targeted for states with enhanced recovery mechanisms which help stabilize margin and earnings consistencies despite accelerated investment.

The majority of WTRG's regulatory operations are located in states that maintain enhanced regulatory recovery mechanisms. The majority of WTRG's current operating system employs infrastructure mechanisms, which allow a return on investment outside of a full rate case, substantially reducing regulatory lag time and minimizing rate case activity. These regulatory mechanisms include infrastructure investment riders, statewide rates and incentive mechanisms for acquisitions of troubled water systems. We believe such mechanisms provide a constructive regulatory environment in which to make capital investments, enabling improved and more consistent earned returns, which should lead to a premium peer valuation.

Continued municipal water acquisitions should help customer growth. The company targets 2-3% customer growth in 2020 driven by acquisitions of municipal utilities. Aqua has successfully acquired numerous water and waste water systems in the past decade to supplement its internal growth. Acquisitions also provide significant follow-on investment opportunities as WTR improves the quality of an acquired water system. The company is expected to be a key player in consolidating some of the 53,000 private water systems in the U.S., and rehabilitating those systems to improve water quality and drive investment growth.

Raising price target to $50. Our price target is based on a ~29x P/E multiple on our 2022 EPS estimate, which is in line with comps which are currently trading at a ~24x-31x multiple. We believe this is justified as WTR integrates the Peoples acquisition.

Risks & Caveats

Our suitability rating on Essential Utilities is Lower Risk. Key risks include the following.

Regulation. Regulated operations are subject to local, state and federal regulations. Changes in the regulatory environment can affect WTRG's near-term and long-term performance.

Weather. WTRG's businesses are sensitive to fluctuations in the weather. Particularly wet or dry weather can impact near-term financial results.

Acquisition risk. WTRG may have the opportunity to purchase assets or companies in the near future. Acquisitions carry risks related to personnel, expected-versus-actual growth and a myriad of unforeseen hurdles, all of which can negatively affect earnings.

Product quality. Unique among its sister regulated utility sectors, water utilities provide a product that is ingested. Despite robust mandated service quality standards that lower risk, a quality failure could materially impact the earnings and stock of WTRG.

Company Description

Essential Utilities is a holding company for regulated utilities providing water and waste water services to nearly 3 million people located in the eastern half of the U.S. Over 50% of operating revenues and net income are derived from Pennsylvania.

ADDITIONAL INFORMATION ON COMPANIES MENTIONED HEREIN IS AVAILABLE UPON REQUEST

The Dow Jones Industrial Average, S&P 500, S&P 400 and Russell 2000 are unmanaged common stock indices used to measure and report performance of various sectors of the stock market; direct investment in indices is not available. Baird is exempt from the requirement to hold an Australian financial services license. Baird is regulated by the United States Securities and Exchange Commission, FINRA, and various other self-regulatory organizations and those laws and regulations may differ from Australian laws. This report has been prepared in accordance with the laws and regulations governing United States broker-dealers and not Australian laws.

Other Disclosures

The information and rating included in this report represent the research analyst’s views based on a time horizon of 12 months, as described above, unless otherwise stated. In our standard company-specific research reports, the subject company may be designated as a “Fresh Pick”, representing that the research analyst believes the company to be a high-conviction investment idea based on a subjective review of one or more fundamental or quantitative factors until an expiration date specified by the analyst but not to exceed nine months. The Fresh Pick designation and specified expiration date will be displayed in standard company-specific research reports on the company until the occurrence of the expiration date or such time as the analyst removes the Fresh Pick designation from the company in a subsequent, standard company-specific research report. The research analyst(s) named in this report may, at times and at the request of clients or their Baird representatives, provide particular investment perspectives or trading strategies based primarily on the analyst’s understanding of the individual client’s objectives. These perspectives or trading strategies generally are responsive to client inquiries and based on criteria the research analyst considers relevant to the client. As such, these perspectives and strategies may differ from the research analyst’s views contained in this report.

Baird and/or its affiliates may provide to certain clients additional or research supplemental products or services, such as outlooks, commentaries and other detailed analyses, which focus on covered stocks, companies, industries or sectors. Not all clients who receive our standard company-specific research reports are eligible to receive these additional or supplemental products or services. Baird determines in its sole discretion the clients who will receive additional or supplemental products or services, in light of various factors including the size and scope of the client relationships. These additional or supplemental products or services may feature different analytical or research techniques and information than are contained in Baird’s standard research reports. Any ratings and recommendations contained in such additional or research supplemental products are consistent with the research analyst’s ratings and recommendations contained in more broadly disseminated standard research reports. Baird disseminates its research reports to all clients simultaneously by posting such reports to Baird’s password-protected client portal, https://bol.rwbaird.com/Login(“BairdOnline”). All clients may access BairdOnline and at any time. All clients are advised to check BairdOnline for Baird’s most recent research reports. After research reports are posted to BairdOnline, such reports may be emailed to clients, based on, among other things, client interest, coverage, stock ownership and indicated email preferences, and electronically distributed to certain third-party research aggregators, who may make such reports available to entitled clients on password-protected, third-party websites. Not all research reports posted to BairdOnline will be emailed to clients or electronically distributed to such research aggregators. To request access to Baird Online, please visit https://bol.rwbaird.com/Login/RequestInstLogin or contact your Baird representative.

Dividend Yield. As used in this report, the term “dividend yield” refers, on a percentage basis, to the historical distributions made by the issuer relative to its current market price. Such distributions are not guaranteed, may be modified at the issuer’s discretion, may exceed operating cash flow, subsidized by borrowed funds or include a return of investment principal.

United Kingdom (“UK”) disclosure requirements for the purpose of distributing this research into the UK and other countries for which Robert W. Baird Limited holds a MiFID passport.

The contents of this report may contain an "investment recommendation", as defined by the Market Abuse Regulation EU No 596/2014 ("MAR"). This report does not contain a “personal recommendation” or “investment advice”, as defined by the Market in Financial Instruments Directive 2014/65/EU (“MiFID”). Essential Utilities Inc., (WTRG)

Solid First Quarter with Peoples, M&A Focus Now on DELCORA

Reiterate Outperform rating after Q1 earnings release. WTRG reported results which were slightly below our estimates, though the company reaffirmed 2020 adj. EPS guidance of $1.53 to $1.58 (excluding impact of Peoples acquisition). Following the close of Peoples on March 16, the M&A focus shifts to DELCORA wastewater assets, which is the largest municipal acquisition in company and Pennsylvania history. We will look for more information on the Q1 conference call, which will be held today at 10 a.m. CT.

- **Q1 results were slightly below our/consensus EPS estimates in the first quarter of Peoples contribution.** Q1 revenue was ~$255.6M vs. our/consensus estimates of $241M/$250M, driven by a $38.5M contribution from Peoples (from March 16 close to quarter end) and rate increases in the regulated water segment. Non-GAAP EPS (excluding contribution of Peoples and transaction-related expenses) was $0.60 vs. $0.65/$0.65, respectively, due to rate increases and regulated growth. On a GAAP basis, EPS of $0.20 exceeded our estimate of $0.08 on a larger Peoples contribution.
- **Importantly, WTRG reaffirmed 2020 guidance and continues to monitor potential impacts of COVID-19.** WTRG continues to expect $1.53 to $1.58 in adj. EPS in 2019 (excluding impacts of Peoples transaction, ~$1.05 - $1.10 on GAAP basis), total water customer growth of ~2%-3%, and ~$950M in infrastructure investments (~$550M in regulated water, ~$400M in natural gas).
- **Acquisition activity should continue to drive customer growth in the water business and WTRG filed the DECLORA wastewater acquisition request with the Pennsylvania PUC.** WTRG has signed purchase agreements which are expected to add ~205k customer connections by early 2020 (~$327M in rate base, on aggregate). These figures include the ~$276.5M (~198k retail customer) DELCORA acquisition, which is the largest municipal acquisition in company and Pennsylvania history.
- **Repair tax deduction for Peoples a ~$5.9M benefit in Q1; should enable further infrastructure investment and increase time between rate cases.** WTRG elected to employ the repair tax deduction for Peoples, which allows a tax deduction for qualifying infrastructure investments and reduces tax expense. The deduction allows WTRG to continue investing while increasing the time between rate cases and limiting the need for future rate increases.
- **Rate increases and surcharges continue to contribute to revenue growth.** The regulated water segment has received $5.2M in annualized revenue increases thus far in 2020 due to favorable decisions in rate cases and infrastructure charges in Illinois, North Carolina, Ohio, and Virginia. The gas segment has received ~$1M of annualized revenue increases.
- **WTRG's Q1 earnings call will be held today at 10:00 a.m. CT.** The call can be accessed at www.ir.aquaamerica.com.

Investment Thesis

US water infrastructure needs should drive long-term earnings growth. The water infrastructure in the United States is in significant need of upgrade and expansion. We believe a significant long-term earnings growth driver for WTRG comes from substantial capital investment opportunities, which contribute to rate base growth, and in turn, drives earnings.

Peoples acquisition, a natural gas utility, should add another platform for organic growth. The combined entity is expected to have ~$10.8B in assets and a rate base of >$7.2B, 70% in water and wastewater and 30% in natural gas. We estimate WTR paid ~14.8x EV/EBITDA (based on an enterprise value of $4.275B and 2019E EBITDA of $289M) for the assets. The transaction is expected to close in mid-March.

Planned capital investment should expand rate base and generate growth for the company in the long run. We expect WTRG's long-term EPS growth to be fueled in part by the company's ~ $950M annual capex investment. Investments are typically targeted for states with enhanced recovery mechanisms which help stabilize margin and earnings consistencies despite accelerated investment.

The majority of WTRG's regulatory operations are located in states that maintain enhanced regulatory recovery mechanisms. The majority of WTRG's current operating system employs infrastructure mechanisms, which allow a return on investment outside of a full rate case, substantially reducing regulatory lag time and minimizing rate case activity. These regulatory mechanisms include infrastructure investment riders, statewide rates and incentive mechanisms for acquisitions of troubled water systems. We believe such mechanisms provide a constructive regulatory environment in which to make capital investments, enabling improved and more consistent earned returns, which should lead to a premium peer valuation.

Continued municipal water acquisitions should help customer growth. The company targets 2-3% customer growth in 2020 driven by acquisitions of municipal utilities. Aqua has successfully acquired numerous water and waste water systems in the past decade to supplement its internal growth. Acquisitions also provide significant follow-on investment opportunities as WTR improves the quality of an acquired water system. The company is expected to be a key player in consolidating some of the 53,000 private water systems in the U.S., and rehabilitating those systems to improve water quality and drive investment growth.

$46 price target. Our price target is based on a ~26x P/E multiple on our 2022 EPS estimate, which is in line with comps which are currently trading at a ~24x-31x multiple. We believe this is justified as WTR integrates the Peoples acquisition.

Risks & Caveats

Our suitability rating on Essential Utilities is Lower Risk. Key risks include the following.

Regulation. Regulated operations are subject to local, state and federal regulations. Changes in the regulatory environment can affect WTRG's near-term and long-term performance.

Weather. WTRG's businesses are sensitive to fluctuations in the weather. Particularly wet or dry weather can impact near-term financial results.

Acquisition risk. WTRG may have the opportunity to purchase assets or companies in the near future. Acquisitions carry risks related to personnel, expected-versus-actual growth and a myriad of unforeseen hurdles, all of which can negatively affect earnings.

Product quality. Unique among its sister regulated utility sectors, water utilities provide a product that is ingested. Despite robust mandated service quality standards that lower risk, a quality failure could materially impact the earnings and stock of WTRG.

Company Description

Essential Utilities is a holding company for regulated utilities providing water and waste water services to nearly 3 million people located in the eastern half of the U.S. Over 50% of operating revenues and net income are derived from Pennsylvania.

2 Robert W. Baird & Co. Incorporated and/or its affiliates managed or co-managed a public offering of securities of Essential Utilities Inc., in the past 12 months.

3 Robert W. Baird & Co. Incorporated and/or its affiliates have received investment banking compensation from Essential Utilities Inc., in the past 12 months.

1 Robert W. Baird & Co. Incorporated makes a market in the securities of WTRG.

Appendix – Important Disclosures and Analyst Certification
Robert W. Baird & Co. Incorporated ("Baird") and/or its affiliates expect to receive or intend to seek investment-banking related compensation from the company or companies mentioned in this report within the next three months. Baird may not be licensed to execute transactions in all foreign listed securities directly. Transactions in foreign listed securities may be prohibited for residents of the United States. Please contact a Baird representative for more information.
Investment Ratings: Outperform (O) - Expected to outperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months. **Neutral (N)** - Expected to perform in line with the broader U.S. equity market over the next 12 months. **Underperform (U)** - Expected to underperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months.
Risk Ratings: L - Lower Risk – Higher-quality companies for investors seeking capital appreciation or income with an emphasis on safety. Company characteristics may include: stable earnings, conservative balance sheets, and an established history of revenue and earnings. **A - Average Risk** – Growth situations for investors seeking capital appreciation with an emphasis on safety. Company characteristics may include: moderate volatility, modest balance-sheet leverage, and stable patterns of revenue and earnings. **H - Higher Risk** – Higher-growth situations appropriate for investors seeking capital appreciation with the acceptance of risk. Company characteristics may include: higher balance-sheet leverage, dynamic business environments, and higher levels of earnings and price volatility. **S - Speculative Risk** – High growth situations appropriate only for investors willing to accept a high degree of volatility and risk. Company characteristics may include: unpredictable earnings, small capitalization, aggressive growth strategies, rapidly changing market dynamics, high leverage, extreme price volatility and unknown competitive challenges.
Valuation, Ratings and Risks. The recommendation and price target contained within this report are based on a time horizon of 12 months but there is no guarantee the objective will be achieved within the specified time horizon. Price targets are determined by a subjective review of fundamental and/or quantitative factors of the issuer, its industry, and the security type. A variety of methods may be used to determine the value of a security including, but not limited to, discounted cash flow, earnings multiples, peer group comparisons, and sum of the parts. Overall market risk, interest rate risk, and general economic risks impact all securities. Specific information regarding the price target and recommendation is provided in the text of our most recent research report.
Distribution of Investment Ratings. As of April 30, 2020, Baird U.S. Equity Research covered 724 companies, with 59% rated Outperform/Buy, 40% rated Neutral/Hold and 1% rated Underperform/Sell. Within these rating categories, 12% of Outperform/Buy-rated and 4% of Neutral/Hold-rated companies have compensated Baird for investment banking services in the past 12 months and/or Baird managed or co-managed a public offering of securities for these companies in the past 12 months.
Analyst Compensation. Research analyst compensation is based on: (1) the correlation between the research analyst's recommendations and stock price performance; (2) ratings and direct feedback from our investing clients, our institutional and retail sales force (as applicable) and from independent rating services; (3) the research analyst's productivity, including the quality of such analyst's research and such analyst's contribution to the growth and development of our overall research effort; and (4) compliance with all of Baird's internal policies

and procedures. This compensation criteria and actual compensation is reviewed and approved on an annual basis by Baird's Research Oversight Committee. Research analyst compensation is derived from all revenue sources of the firm, including revenues from investment banking. Baird does not compensate research analysts based on specific investment banking transactions.
A complete listing of all companies covered by Baird U.S. Equity Research and applicable research disclosures can be accessed at http://www.rwbaird.com/research-insights/research/coverage/third-party-research-disclosures.aspx. You can also call 800-792-2473 or write: Robert W. Baird & Co., Equity Research, 777 E. Wisconsin Avenue, Milwaukee, WI 53202.

Essential Utilities Inc., (WTRG)

Strong Peoples Contribution Drives Earnings Beat

Reiterate Outperform rating after Q2 earnings release. WTRG reported results which exceeded our/consensus estimates driven by a better-than-expected contribution from Peoples. The company reaffirmed 2020 adj. EPS guidance, and continues to target ~$950M of regulated system investment for the year. We will look for an update on the DELCORA acquisition (transaction close previously expected early 2021), which should drive significant rate base and earnings growth, when completed. We will look for more information on the Q2 conference call, which will be held today at 10 a.m. CT.

- **Q2 results exceeded our/consensus EPS driven by a better-than-expected contribution from Peoples.** Q2 revenue was ~$384M vs. our/consensus estimates of $375M/$371M, driven by a $149.6M contribution from Peoples (we modeled $144M for the quarter) and rate increases & surcharges ($7.6M). EPS was $0.29 vs. $0.20/$0.23, largely related to lower-than-expected purchased gas costs ($43M in Q2, vs. our $60M estimate). We will look for more information on the Q2 earnings call.
- **Importantly, WTRG reaffirmed 2020 guidance; continuing to monitor COVID impacts, though volumes have been fairly resilient thus far.** WTRG continues to expect $1.53 to $1.58 in adj. EPS in 2020, ~$950M of regulated system investments ($550M in water, ~$400M in natural gas), and annual rate base growth of 6%-7% for water and 8%-10% for gas. Importantly, Q2 water sales increased 0.3% in Q2, as 10% growth in residential consumption (66% of quarterly consumption) more than offset the declines in commercial & industrial (-16% and -11%, respectively).
- **Substantial dividend increase (~7% annualized) highlights commitment to returning capital to shareholders and long-term value proposition.** WTRG recently increased its dividend ~7%; annualized dividend now amounts to a ~2.2% yield based on the August 5 closing price. WTRG has grown the dividend at a 7.2% CAGR since 2014, and we expect growth to continue, consistent with rate base and EPS growth.
- **Acquisition activity should continue to drive customer growth in the water business; will look for an update on DELCORA acquisition process (previously expected to close in early 2021).** WTRG has closed two acquisitions YTD (~$28.3M of cumulative rate base) and has signed purchase agreements totaling 203k customer connections (~$315M in rate base, on aggregate); we expect this will add ~$15M to annual earnings potential. These figures include the ~$276.5M (~198k retail customer) DELCORA acquisition, which is the largest municipal acquisition in company and Pennsylvania history; we will look for an update on potential transaction timing on the conference call.
- **WTRG's Q2 earnings call will be held today at 10:00 a.m. CT.** The call can be accessed at www.ir.aquaamerica.com.

Investment Thesis

US water infrastructure needs should drive long-term earnings growth. The water infrastructure in the United States is in significant need of upgrade and expansion. We believe a significant long-term earnings growth driver for WTRG comes from substantial capital investment opportunities, which contribute to rate base growth, and in turn, drives earnings.

Peoples acquisition, a natural gas utility, should add another platform for organic growth. The combined entity is expected to have ~$10.8B in assets and a rate base of >$7.2B, 70% in water and wastewater and 30% in natural gas. We estimate WTR paid ~14.8x EV/EBITDA (based on an enterprise value of $4.275B and 2019E EBITDA of $289M) for the assets. The transaction is expected to close in mid-March.

Planned capital investment should expand rate base and generate growth for the company in the long run. We expect WTRG's long-term EPS growth to be fueled in part by the company's ~ $950M annual capex investment. Investments are typically targeted for states with enhanced recovery mechanisms which help stabilize margin and earnings consistencies despite accelerated investment.

The majority of WTRG's regulatory operations are located in states that maintain enhanced regulatory recovery mechanisms. The majority of WTRG's current operating system employs infrastructure mechanisms, which allow a return on investment outside of a full rate case, substantially reducing regulatory lag time and minimizing rate case activity. These regulatory mechanisms include infrastructure investment riders, statewide rates and incentive mechanisms for acquisitions of troubled water systems. We believe such mechanisms provide a constructive regulatory environment in which to make capital investments, enabling improved and more consistent earned returns, which should lead to a premium peer valuation.

Continued municipal water acquisitions should help customer growth. The company targets 2-3% customer growth in 2020 driven by acquisitions of municipal utilities. Aqua has successfully acquired numerous water and waste water systems in the past decade to supplement its internal growth. Acquisitions also provide significant follow-on investment opportunities as WTR improves the quality of an acquired water system. The company is expected to be a key player in consolidating some of the 53,000 private water systems in the U.S., and rehabilitating those systems to improve water quality and drive investment growth.

$46 price target. Our price target is based on a ~26x P/E multiple on our 2022 EPS estimate, which is in line with comps which are currently trading at a ~24x-31x multiple. We believe this is justified as WTR integrates the Peoples acquisition.

Risks & Caveats

Our suitability rating on Essential Utilities is Lower Risk. Key risks include the following.

Regulation. Regulated operations are subject to local, state and federal regulations. Changes in the regulatory environment can affect WTRG's near-term and long-term performance.

Weather. WTRG's businesses are sensitive to fluctuations in the weather. Particularly wet or dry weather can impact near-term financial results.

Acquisition risk. WTRG may have the opportunity to purchase assets or companies in the near future. Acquisitions carry risks related to personnel, expected-versus-actual growth and a myriad of unforeseen hurdles, all of which can negatively affect earnings.

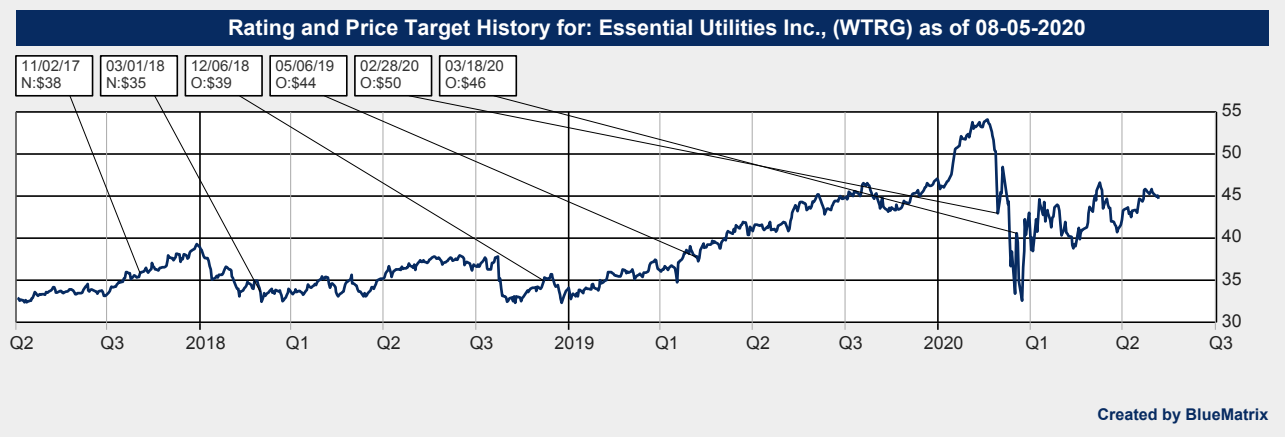
Product quality. Unique among its sister regulated utility sectors, water utilities provide a product that is ingested. Despite robust mandated service quality standards that lower risk, a quality failure could materially impact the earnings and stock of WTRG.

Company Description

Essential Utilities is a holding company for regulated utilities providing water and waste water services to nearly 3 million people located in the eastern half of the U.S. Over 50% of operating revenues and net income are derived from Pennsylvania.

Appendix - Important Disclosures and Analyst Certification

Approved on 05 August 2020 22:44EDT/ Published on 06 August 2020 01:05EDT.



2 Robert W. Baird & Co. Incorporated and/or its affiliates managed or co-managed a public offering of securities of Essential Utilities Inc., in the past 12 months.

3 Robert W. Baird & Co. Incorporated and/or its affiliates have received investment banking compensation from Essential Utilities Inc., in the past 12 months.

1 Robert W. Baird & Co. Incorporated makes a market in the securities of WTRG.

Robert W. Baird & Co. Incorporated ("Baird") and/or its affiliates expect to receive or intend to seek investment-banking related compensation from the company or companies mentioned in this report within the next three months. Baird may not be licensed to execute transactions in all foreign listed securities directly. Transactions in foreign listed securities may be prohibited for residents of the United States. Please contact a Baird representative for more information.

Investment Ratings: Outperform (O) - Expected to outperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months. **Neutral (N)** - Expected to perform in line with the broader U.S. equity market over the next 12 months. **Underperform (U)** - Expected to underperform on a total return, risk-adjusted basis the broader U.S. equity market over the next 12 months.

Risk Ratings: L - Lower Risk – Higher-quality companies for investors seeking capital appreciation or income with an emphasis on safety. Company characteristics may include: stable earnings, conservative balance sheets, and an established history of revenue and earnings. **A - Average Risk** – Growth situations for investors seeking capital appreciation with an emphasis on safety. Company characteristics may include: moderate volatility, modest balance-sheet leverage, and stable patterns of revenue and earnings. **H - Higher Risk** – Higher-growth situations appropriate for investors seeking capital appreciation with the acceptance of risk. Company characteristics may include: higher balance-sheet leverage, dynamic business environments, and higher levels of earnings and price volatility. **S - Speculative Risk** – High growth situations appropriate only for investors willing to accept a high degree of volatility and risk. Company characteristics may include: unpredictable earnings, small capitalization, aggressive growth strategies, rapidly changing market dynamics, high leverage, extreme price volatility and unknown competitive challenges.

Valuation, Ratings and Risks. The recommendation and price target contained within this report are based on a time horizon of 12 months but there is no guarantee the objective will be achieved within the specified time horizon. Price targets are determined by a subjective review of fundamental and/or quantitative factors of the issuer, its industry, and the security type. A variety of methods may be used to determine the value of a security including, but not limited to, discounted cash flow, earnings multiples, peer group comparisons, and sum of the parts. Overall market risk, interest rate risk, and general economic risks impact all securities. Specific information regarding the price target and recommendation is provided in the text of our most recent research report.

Distribution of Investment Ratings. As of July 31, 2020, Baird U.S. Equity Research covered 708 companies, with 62% rated Outperform/Buy, 37% rated Neutral/Hold and 1% rated Underperform/Sell. Within these rating categories, 12% of Outperform/Buy-rated and 5% of Neutral/Hold-rated companies have compensated Baird for investment banking services in the past 12 months and/or Baird managed or co-managed a public offering of securities for these companies in the past 12 months.

Analyst Compensation. Research analyst compensation is based on: (1) the correlation between the research analyst's recommendations and stock price performance; (2) ratings and direct feedback from our investing clients, our institutional and retail sales force (as applicable) and from independent rating services; (3) the research analyst's productivity, including the quality of such analyst's research and such analyst's contribution to the growth and development of our overall research effort; and (4) compliance with all of Baird's internal policies and procedures. This compensation criteria and actual compensation is reviewed and approved on an annual basis by Baird's Research

Oversight Committee. Research analyst compensation is derived from all revenue sources of the firm, including revenues from investment banking. Baird does not compensate research analysts based on specific investment banking transactions.

Other Disclosures

The information and rating included in this report represent the research analyst's views based on a time horizon of 12 months, as described above, unless otherwise stated. In our standard company-specific research reports, the subject company may be designated as a "Fresh Pick", representing that the research analyst believes the company to be a high-conviction investment idea based on a subjective review of one or more fundamental or quantitative factors until an expiration date specified by the analyst but not to exceed nine months. The Fresh Pick designation and specified expiration date will be displayed in standard company-specific research reports on the company until the occurrence of the expiration date or such time as the analyst removes the Fresh Pick designation from the company in a subsequent, standard company-specific research report. The research analyst(s) named in this report may, at times and at the request of clients or their Baird representatives, provide particular investment perspectives or trading strategies based primarily on the analyst's understanding of the individual client's objectives. These perspectives or trading strategies generally are responsive to client inquiries and based on criteria the research analyst considers relevant to the client. As such, these perspectives and strategies may differ from the research analyst's views contained in this report.

Baird and/or its affiliates may provide to certain clients additional or research supplemental products or services, such as outlooks, commentaries and other detailed analyses, which focus on covered stocks, companies, industries or sectors. Not all clients who receive our standard company-specific research reports are eligible to receive these additional or supplemental products or services. Baird determines in its sole discretion the clients who will receive additional or supplemental products or services, in light of various factors including the size and scope of the client relationships. These additional or supplemental products or services may feature different analytical or research techniques and information than are contained in Baird's standard research reports. Any ratings and recommendations contained in such additional or research supplemental products are consistent with the research analyst's ratings and recommendations contained in more broadly disseminated standard research reports. Baird disseminates its research reports to all clients simultaneously by posting such reports to Baird's password-protected client portal, https://bol.rwbaird.com/Login("BairdOnline"). All clients may access BairdOnline and at any time. All clients are advised to check BairdOnline for Baird's most recent research reports. After research reports are posted to BairdOnline, such reports may be emailed to clients, based on, among other things, client interest, coverage, stock ownership and indicated email preferences, and electronically distributed to certain third-party research aggregators, who may make such reports available to entitled clients on password-protected, third-party websites. Not all research reports posted to BairdOnline will be emailed to clients or electronically distributed to such research aggregators. To request access to Baird Online, please visit https://bol.rwbaird.com/Login/RequestInstLogin or contact your Baird representative.

Dividend Yield. As used in this report, the term "dividend yield" refers, on a percentage basis, to the historical distributions made by the issuer relative to its current market price. Such distributions are not guaranteed, may be modified at the issuer's discretion, may exceed operating cash flow, subsidized by borrowed funds or include a return of investment principal.

Overflowing Interest: Downgrading to Neutral

Rating Change: NEUTRAL | PO: 52.00 USD | Price: 50.57 USD

Transaction Approval, New Branding & Leadership

Following the PA PUC's approval of WTR's pending Peoples Gas transaction on Thursday, we are downgrading shares to Neutral. After a rather protracted process since announcing the acquisition in 2018, the commission finally voted 4-1 in favor of the deal, with Commissioner Place the lone commissioner opting against it. Following approval, the company put out a press release mid-afternoon on Thursday announcing their new name, ticker, and executive leadership team ahead of the transaction close. The name will become 'Essential Utilities' on February 3rd (the ticker is also set to transition to WTRG), with Chris Franklin remaining CEO & Chairman of the Pro Forma entity. Since our launch in July, shares are up 23%, outperforming the XLU by 1300bps. While the final commission approval helps to de-risk the earnings profile going forward, we see a more balanced setup into the upcoming Analyst Day (February 27th) when the company lays out their long term guidance (potentially *more smoothed*). We have confidence in the mgmt. team in place and note their ability to effectively deploy their currency for the deal. We further highlight the shares' ability to re-rate higher into the deal - despite the foray into gas - as helping to mitigate ESG concerns around gas utes more broadly. Further, gas is additive.

Updating our Valuation & Moving to the Sidelines

Our estimates remain unchanged following our broader 4Q water preview published last week. While we remain above the street, we see shares as less attractive given elevated expectations into the Analyst Day and caution the lack of clarity around the ability to smooth earnings with implementation of the repairs tax benefit. With our latest valuation, we mark to market our above street estimates for the latest water and gas peer multiples of 28.1x and 19.6x (vs. 26.2x and 19.0x respectively just last week). Even after applying higher premiums to both the water and gas segments – which we see as worthwhile given the purer composition (vs. closest peer AWK with meaningful non-reg) and clear muni-driven EPS growth opportunities - our PO only shifts to $52, implying just 5% TSR. With water multiples overall still quite elevated vs. peer utility asset classes & risk that mgmt. may seek to moderate near-term EPS in favor of a 'trajectory' we d/g.

Company Sector

Water Utilities

Company Description

Aqua America is a regulated water utility providing water or wastewater services to 3M customers in the states of PA, OH, TX, IL, NC, NJ, IN, and WV, with PA segment being the largest contributor to the NI. In Oct 2018, The company announced the acquisition of Peoples Gas in Oct 2018, which the PA PUC approved in January 2020. Peoples Gas is a gas utility providing distribution services to 740,000 customers in PA, WV, and KY.

Investment Rationale

We are Neutral rated on shares of WTR, seeing risk/reward as balanced at the current valuation. We have confidence in the mgmt. team in place and view the People's Gas deal constructively. The re- effective use of their currency can drive value, and the ability for shares to re-rate higher - despite the foray into gas - helps to mitigate ESG concerns around gas utilities more broadly.

Details of Pro Forma 'Essential Utilities' Revealed

Following approval from the Pennsylvania Public Utility Commission on Thursday for their pending acquisition of Peoples Gas, WTR put out a press release mid-afternoon announcing their new name, ticker and executive leadership team ahead of the close. The name will become "Essential Utilities" on Feb 3rd, with Chris Franklin remaining CEO and Chairman of the pro forma entity. The same day, the ticker is set to transition to WTRG. We include the full slate of leadership updates in the exhibit below. Mgmt. plans to host an Analyst Day in New York on February 27th with the release of full year results, which should provide an opportunity to interact and engage in Q&A with the newly introduced executive team.

Despite our more balanced view of shares, we have confidence in the mgmt. team in place and view the deal constructively; the re- effective use of their currency can drive value, and the ability for shares to re-rate higher - despite the foray into gas - helps to mitigate ESG concerns around gas utilities more broadly.

Table 1: WTR Leadership Team: Executives

'Essential Utilities' Executive Leadership Team	
Name	Title
Chris Franklin	Chairman, CEO
Richard Fox	EVP, COO
Christopher Luning	EVP, GC
Matthew Rhodes	EVP, Strategy and Corp Development
Dan Schuller	EVP, CFO
Ruth DeLost-Wylie	SVP, Business Transformation
Susan Haindl	SVP, Chief Administrative Officer
Christina Kelly	SVP, Chief HR Officer
Brian Dingerdissen	VP, Chief of Staff, IR & Communications
Kimberly Joyce	VP, Regulatory & Government Affairs

...but Repairs Tax Details Unaddressed

Despite the protracted timeline for the close of the transaction (we perceive around March 1st as a conservative expectation for final close), the company plans to elect to implement the repairs tax benefit in 2020. Under the strategy, earnings will see a large step up as the company expenses capital costs as opposed to depreciating them over a useful life for tax purposes. The magnitude of the initial increase will ultimately be determined by how much of the capital investment program qualifies for the treatment and whether the commission allows the company to use a catch up component for costs that are currently being depreciated. Our sense is that capital investments back to 2012 could potentially be privy to such treatment – albeit we perceive historical investment as likely more muted relative to future capital expenditures. With any approved catch up component, we also would expect the commission to be inclined to give at least part of the benefit back to customers.

While mgmt. has noted a desire to smooth out the impact from implementation as opposed to a large step up in '20 and minimal growth in future years, how they will approach this remains unclear. Bottom line, we see more execution risk to implementation given the elevated expectations implied by the current share price. Look for additional details at the upcoming Analyst Day on February 27th.

EPS Estimates

The exhibit below reflects our unchanged EPS estimates into the upcoming Analyst Day. We remain 3% above the street for '21 given what we perceive as strong earnings upside from the election of the Repairs Tax Benefit. That said, we perceive higher expectations from the buy side as largely priced in at the current valuation.

Table 1: EPS Estimates: still meaningfully above Street ests, but this moderates

EPS Estimates	2019E	2020E	2021E	2022E	2023E
PA	$1.05	$0.79	$0.77	$0.82	$0.86

PO Shifts to $52: Downgrade to Neutral

The exhibit below reflects our latest SOTP. While our estimates remain unchanged, we mark to market for the latest utility peer multiples and update our premium/discount assumptions. Latest peer multiples shift to 28.1x and 19.6x for water and gas, respectively vs. 26.2x and 19.0x previously.

We now apply premiums to the water segment of 2x for PA (up from 1.5x previously), and add additional premiums of 2x, 3x, and 1x for OH, IL, and NC, respectively. We continue to highlight IL as a key state to watch for consolidation in the industry.

Following approval of the Peoples Gas transaction by the commission last week, we apply a 2x premium to the LDC peer group (compared to a -0.5x discount previously).

Despite the higher premiums ascribed in our valuation and our street-high estimates, our SOTP suggests limited upside after the latest run-up in share price. While our PO shifts to $52, we now see risk/reward as more fairly balanced at the current share price. Downgrade to Neutral.

We treat the blended entity with premium multiples still and see its fully regulated profile with sustained EPS growth as superior among water utility peers. We stress the ongoing municipal acquisition cycle appears to have accelerated of late (see our water preview) with datapoints suggesting this should indeed persist. We see the relative market cap size and breadth of state involvement as allowing larger market-cap companies to prove more nimble in pursuing municipal acquisitions.

Table 2: WTR SOTP

Water Utilities	2022 EPS		P/E Multiple				Equity Value		
		Peer	Prem/Disc	Low	Base	High	Low	Base	High

Source: BofA Global Research, Bloomberg

Price objective basis & risk

Aqua America (WTR)
Our price objective is $52 based on our SOTP approach, applying a peer multiple to the water utility and gas utility, respectively and accounting for expected growth for each sector. We apply a 2.0x premium to Peoples Gas given the organic growth opportunities.We net out parent debt and parent interest expense associated with parent debt 50/50 weighed basis.

Risks to the downside are acquisition risk, deteriorating regulatory outcomes, and risks from a lower rerating following the diversification into gas.

Risks to the upside include upward revisions to street estimates and further accretion from implementation of the Repairs Tax Benefit

The Investment Opinion System is contained at the end of the report under the heading "Fundamental Equity Opinion Key". Dark grey shading indicates the security is restricted with the opinion suspended. Medium grey shading indicates the security is under review with the opinion withdrawn. Light grey shading indicates the security is not covered. Chart is current as of a date no more than one trading day prior to the date of the report.

Equity Investment Rating Distribution: Utilities Group (as of 31 Dec 2019)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	63	44.06%	Buy	44	69.84%
Hold	43	30.07%	Hold	31	72.09%
Sell	37	25.87%	Sell	27	72.97%

Equity Investment Rating Distribution: Global Group (as of 31 Dec 2019)

Coverage Universe	Count	Percent	Inv. Banking Relationships*	Count	Percent
Buy	1560	50.49%	Buy	991	63.53%
Hold	717	23.20%	Hold	461	64.30%
Sell	813	26.31%	Sell	415	51.05%

* Issuers that were investment banking clients of BofA Securities or one of its affiliates within the past 12 months. For purposes of this Investment Rating Distribution, the coverage universe includes only stocks. A stock rated Neutral is included as a Hold, and a stock rated Underperform is included as a Sell.

FUNDAMENTAL EQUITY OPINION KEY: Opinions include a Volatility Risk Rating, an Investment Rating and an Income Rating. *VOLATILITY RISK RATINGS*, indicators of potential price fluctuation, are: A - Low, B - Medium and C - High. *INVESTMENT RATINGS* reflect the analyst's assessment of a stock's: (i) absolute total return potential and (ii) attractiveness for investment relative to other stocks within its *Coverage Cluster* (defined below). There are three investment ratings: 1 - Buy stocks are expected to have a total return of at least 10% and are the most attractive stocks in the coverage cluster; 2 - Neutral stocks are expected to remain flat or increase in value and are less attractive than Buy rated stocks and 3 - Underperform stocks are the least attractive stocks in a coverage cluster. Analysts assign investment ratings considering, among other things, the 0-12 month total return expectation for a stock and the firm's guidelines for ratings dispersions (shown in the table below). The current price objective for a stock should be referenced to better understand the total return expectation at any given time. The price objective reflects the analyst's view of the potential price appreciation (depreciation).

Investment rating	Total return expectation (within 12-month period of date of initial rating)	Ratings dispersion guidelines for coverage cluster*
Buy	≥ 10%	≤ 70%
Neutral	≥ 0%	≤ 30%
Underperform	N/A	≥ 20%

* Ratings dispersions may vary from time to time where BofA Global Research believes it better reflects the investment prospects of stocks in a Coverage Cluster.

***INCOME RATINGS*, indicators of potential cash dividends, are: 7 - same/higher (dividend considered to be secure), 8 - same/lower (dividend not considered to be secure) and 9 - pays no cash dividend.** *Coverage Cluster* is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector, region or other classification(s). A stock's coverage cluster is included in the most recent BofA Global Research report referencing the stock.

Investors should seek financial advice regarding the appropriateness of investing in financial instruments and implementing investment strategies discussed or recommended in this document and should understand that statements regarding future prospects may not be realized. Any decision to purchase or subscribe for securities in any offering must be based solely on existing public information on such security or the information in the prospectus or other offering document issued in connection with such offering, and not on this document.
Securities and other financial instruments referred to herein, or recommended, offered or sold by BofA Securities, are not insured by the Federal Deposit Insurance Corporation and are not deposits or other obligations of any insured depository institution (including, Bank of America, N.A.). Investments in general and, derivatives, in particular, involve numerous risks, including, among others, market risk, counterparty default risk and liquidity risk. No security, financial instrument or derivative is suitable for all investors. In some cases, securities and other financial instruments may be difficult to value or sell and reliable information about the value or risks related to the security or financial instrument may be difficult to obtain. Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment. Past performance is not necessarily a guide to future performance. Levels and basis for taxation may change.
This report may contain a short-term trading idea or recommendation, which highlights a specific near-term catalyst or event impacting the issuer or the market that is anticipated to have a short-term price impact on the equity securities of the issuer. Short-term trading ideas and recommendations are different from and do not affect a stock's fundamental equity rating, which

reflects both a longer term total return expectation and attractiveness for investment relative to other stocks within its Coverage Cluster. Short-term trading ideas and recommendations may be more or less positive than a stock's fundamental equity rating.
BofA Securities is aware that the implementation of the ideas expressed in this report may depend upon an investor's ability to "short" securities or other financial instruments and that such action may be limited by regulations prohibiting or restricting "shortselling" in many jurisdictions. Investors are urged to seek advice regarding the applicability of such regulations prior to executing any short idea contained in this report.
Foreign currency rates of exchange may adversely affect the value, price or income of any security or financial instrument mentioned herein. Investors in such securities and instruments, including ADRs, effectively assume currency risk.
UK Readers: The protections provided by the U.K. regulatory regime, including the Financial Services Scheme, do not apply in general to business coordinated by BofA Securities entities located outside of the United Kingdom.
BofAS or one of its affiliates is a regular issuer of traded financial instruments linked to securities that may have been recommended in this report. BofAS or one of its affiliates may, at any time, hold a trading position (long or short) in the securities and financial instruments discussed in this report.
BofA Securities, through business units other than BofA Global Research, may have issued and may in the future issue trading ideas or recommendations that are inconsistent with, and reach different conclusions from, the information presented herein. Such ideas or recommendations may reflect different time frames, assumptions, views and analytical methods of the persons who prepared them, and BofA Securities is under no obligation to ensure that such other trading ideas or recommendations are brought to the attention of any recipient of this information.
In the event that the recipient received this information pursuant to a contract between the recipient and BofAS for the provision of research services for a separate fee, and in connection therewith BofAS may be deemed to be acting as an investment adviser, such status relates, if at all, solely to the person with whom BofAS has contracted directly and does not extend beyond the delivery of this report (unless otherwise agreed specifically in writing by BofAS If such recipient uses the services of BofAS in connection with the sale or purchase of a security referred to herein, BofAS may act as principal for its own account or as agent for another person. BofAS is and continues to act solely as a broker-dealer in connection with the execution of any transactions, including transactions in any securities referred to herein.

Prospects for 1Q20: COVID, oil prices and mild weather

We present our 1Q20 regulated preview including LNT, AEE, AEP, AWK, ED, DTE, DUK, EIX, ETR, WTRG, EVRG, ES, FE, PNW, PPL, WEC, and XEL. Overall, we see the sector splitting into stocks well-suited to weather the storm that started in 1Q – and those that are less equipped. Key factors that distinguish between these include: Having decoupling and/or bad debt trackers to balance out decreases in demand from COVID, oil price, and mild weather pressures (**ES**, **ED**, **WEC**); revenues with a heftier reliance on resi or fixed-charges vs industrial or volumetric (**FE**, **AWK**, **WTRG**) strong FFO/debt metrics (**AEE**); and having room in original 2020 O&M projections for more savings given these pressures (both **LNT** and **XEL** had factored in increases YoY). We have updated our models and made a number of changes to our ests and POs using a 17.6x peer multiple for both electric and gas.

Key company views for 1Q

For 1Q, we expect **EIX** mgmt. to focus on wildfire mitigation execution as well as decoupling/other constructive regulatory mechanisms to offset COVID related pressures; focus remains on the equity overhang where mgmt. is likely to delay its '20 issuance into 2H - *'20* equity addresses mgmt.'s current expectations for wildfire related liabilities and timely recovery of memo accounts ($1.09bn in aggregate); we believe clarity on these outcome remain protracted and uncertain at best. For **DUK**, we see a weak 1Q with weather related headwinds; expect mgmt. to talk-up cost reductions up to $150mn to offset COVID related pressures (3-5% decline in load?); rate case risks in Carolinas remain with ROE and coal ash to be litigated with still wide bid-ask. Resi compositions of **AWK** and **WTRG** should help limit load degradation, they are largely not decoupled. LT, we would expect tailwinds for further industry consolidation as muni's face add'l budget pressure and see both base capital plans as intact over the forecast period with upside from tuck-ins. While **PPL** is decoupled in the UK, we stress a year two lag before true up and see the company as particularly exposed to load degradation in KY as near term rate relief seems less likely given the current rate paradigm and international crisis (albeit plans for timing not totally clear). UK risks appear to be improving but watch govt reactions to Covid on biz response. On top of O&M room (with -8c YoY), we see **LNT**'s Wisconsin regulatory env, confidence in getting renewables online (w/ two of four already commissioned), and credit metrics ($1.17bn of available liquidity) as strengths. **XEL** too could have more O&M savings and push out rate cases expected this year depending on if spend can be tracked. **AEP** is sensitive given it already factors in significant O&M savings in 2020 guide, but the company has noted it could bend the curve further to mitigate demand impacts from COVID and oil prices; some reprieve at Indiana (still underway) and confidence on North Central have us remain at Buy. **FE** is expected to have a quiet quarter as the Street awaits updates of the the New Jersey rate cases; the rest of the year is quiet on the reg front (a pos). For **AEE** we look for any sign of accelerated coal retirement given this fall's integrated resource plan (IRP) but note federal coal quality regulations have been eased of late. Finally, **ES** may start to give a (further) sense of incremental grid mod spend and is largely one of the lease impacted companies as it is almost fully decoupled. **Click for our other previews: SMID-cap (PacNW), SMID-cap (rest of country), PEG & EXC, AGR & NEE, Gas LDCs and Other Diversifieds**

BofA Securities does and seeks to do business with issuers covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

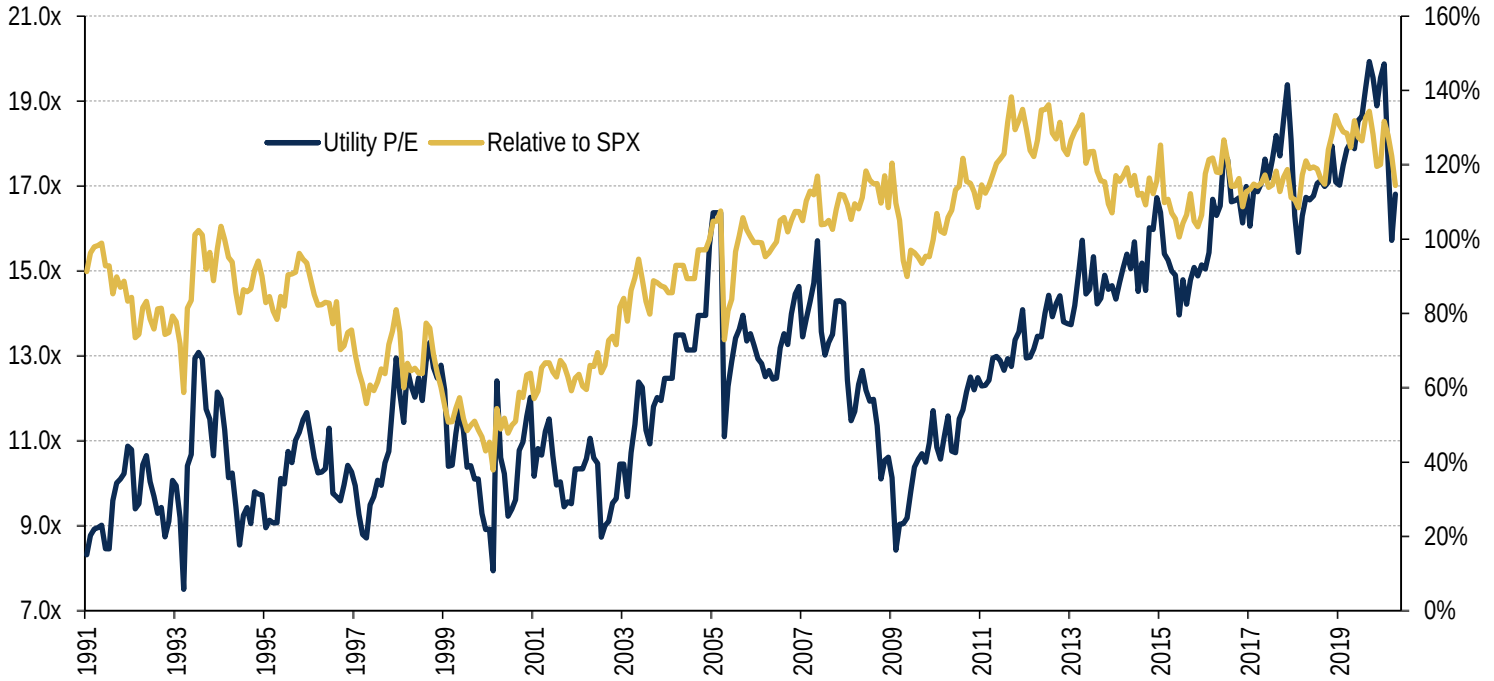
Macro Backdrop

We believe investors are generally skeptical of current sector valuations – and see the continued upward trajectory of the sector as still showing an expensive backdrop from a high level perspective. The chart below shows the latest mark-to-market of the group on an absolute basis and against the SPX; utilities are now trading below their all-time highs on both a relative and absolute basis.

Chart 1: Utility PE vs SPX

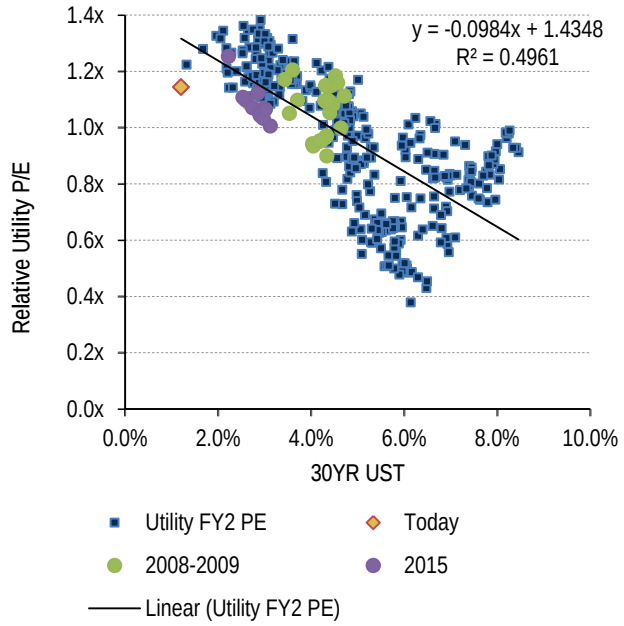


Source: BofA Global Research Estimates, company report, Bloomberg

When adjusting for the S&P itself *and* the treasury environment: different story

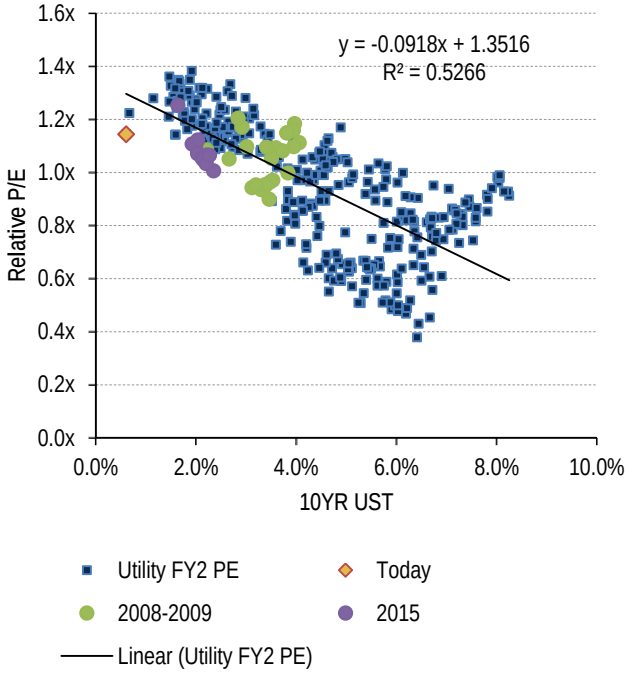
In the exhibits below, we show a time series of where the sector has traded relative to the linear regression on a relative and absolute basis for Treasuries to illustrate the premium; the group has started to trade more in line with its historical linear relationship with 10Yr and 30 Yr Treasuries on a relative basis and could argue somewhat cheap vs historical relationships.

Chart 2: Relative Utility PE vs. 30 YR UST



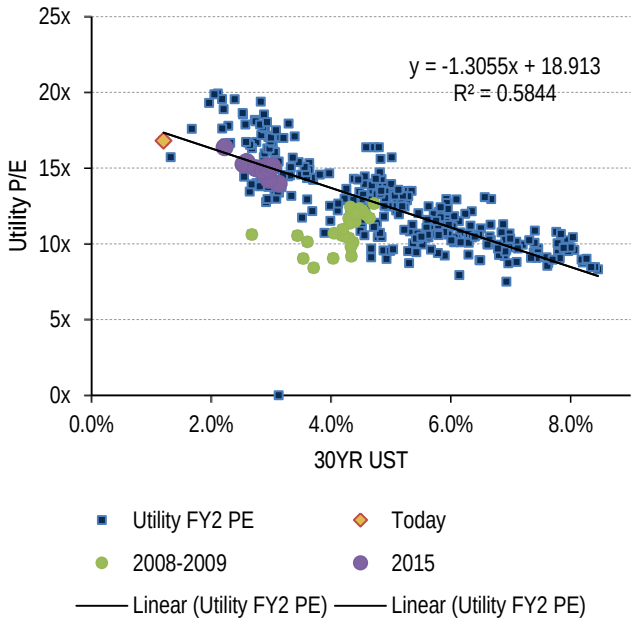
Source: BofA Global Research, Bloomberg

Chart 3: Relative Utility PE vs. 10 YR UST



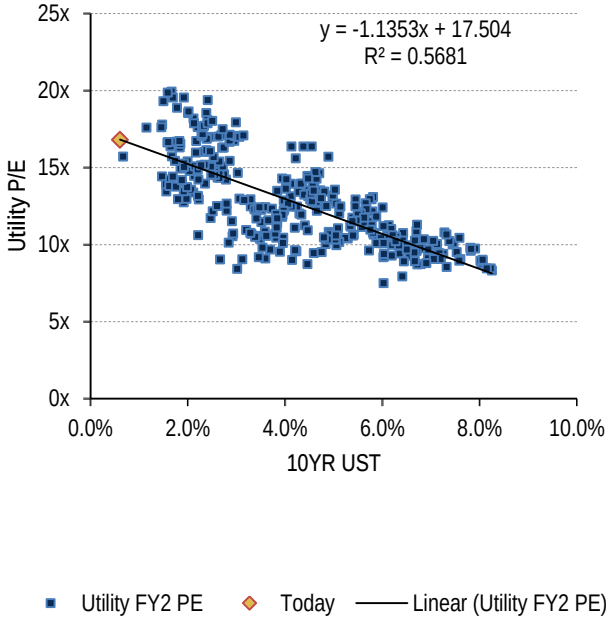
Source: BofA Global Research, Bloomberg

Chart 4: Absolute Utility PE vs. 30 YR UST



Source: BofA Global Research, Bloomberg

Chart 5: Absolute Utility PE vs. 10 YR UST

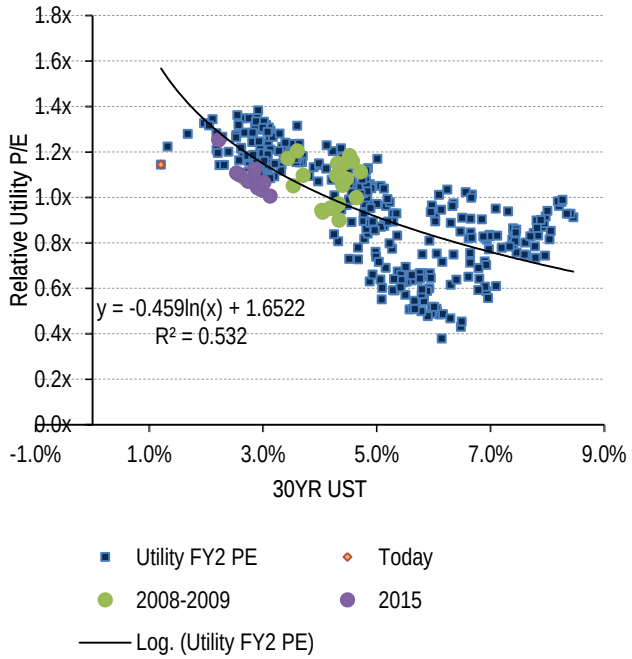


Source: BofA Global Research, Bloomberg

Non-linear makes more sense to us...

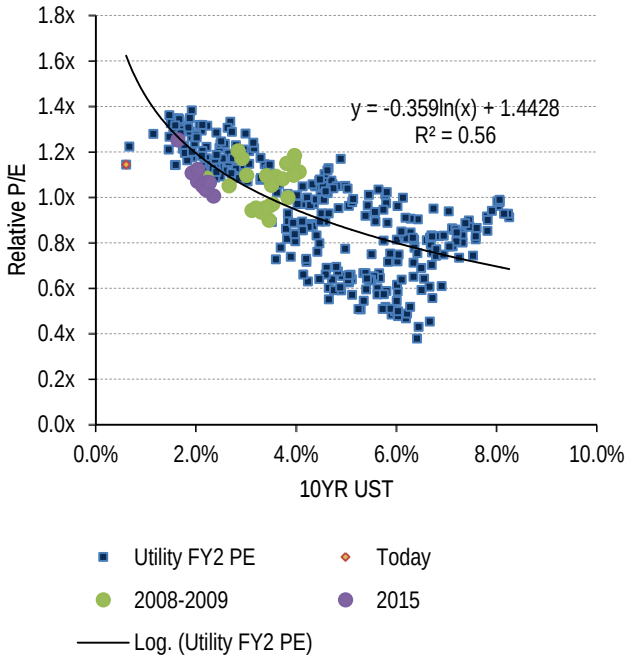
We provide the non-linear relationship below as well given the greater percent change on valuations for every 1% move. We emphasize the limited shift in authorized returns through the cycle also argues that value creation should accelerate with rates declining too. On this basis, the sector looks much less expensive.

Chart 6: Relative Utility PE vs. 30 YR UST



Source: BofA Global Research, Bloomberg

Chart 7: Relative Utility PE vs. 10 YR UST



Source: BofA Global Research, Bloomberg

Alliant (LNT)

We reiterate our Buy going into the 1Q20 call. We adjust down '20 and '21 ests -2c to reflect potential demand impacts from COVID, oil, and 1Q weather – balanced by our expectation that LNT has room for O&M savings as -8c YoY is included in the co's original '20 ests. This takes into account the co's recently disclosed electric sales sensitivity (1% change correlates with an EPS impact of 2c for resi, 1c for industrial, and 1c for commercial), the forecast of 1% sales increasing this yr, and the class breakdown ('19 margins 46% resi, 28% commercial, 26% industrial – with 30-40% of industrial demand fixed, and a hefty chunk agriculture focused that we see as more resilient). We see the company as having stronger credit metrics as well, with $1.17bn of available liquidity as of April 2, 2020. Also recall LNT executed on equity in March. We see other positives for the company including its regulatory relationship in Wisconsin (having deferral of bad debts approved), its ongoing renewable deliveries for the two wind projects to commission in 3Q-4Q (two already commissioned in 1Q), and West Riverside to commission next quarter. Finally, we anticipate the company discusses its forthcoming Wisconsin rate case and solar case. We forecast a 1Q20 estimate of $0.55/sh (the same as Consensus).

LNT 1Q20 Walk

Below we forecast a $0.55/sh 1Q20 EPS, compared to a $0.55/sh Consensus and a $0.53/sh 1Q19 EPS the prior year.

- **Drivers**: We expect about +19c of benefits from the IPL Gas and Electric base rate increases and WPL Electric's as well.
- **Other**: We expect a few of the drivers that LNT provided in its 2020 annual walk (e.g. depreciation, AFUDC, interest expense, other expenses) will be weighted to later quarters, meaning less of an impact of 1Q. Note LNT also has some equity dilution.
- **Wildcard**: As for most companies, the mild winter was noticeable for LNT. We note that 1Q19 saw a +5c benefit (to be reversed now) associated with 800 heating degree days more than average; as such, we expect a -3c hurt in 1Q20 from the mild winter that was 500 days below average. COVID shouldn't impact LNT in a big way yet, since stay at home started mid-March; we expect that the leap day benefit largely counter-balances demand impact since LNT doesn't have decoupling.

Table 3: LNT 1Q20 walk

1Q20 EPS Walk	Notes	EPS Impact
1Q19 Starting Point		$0.53
Weather impact 1Q19	*Had positive*	($0.05)
Weather impact 1Q20	*Very mild*	($0.03)
IPL Base rate increase	*IPL Electric effective 1/8/20; IPL Gas effective 12/18/19*	$0.10
WPL Electric	*New rates at WPL*	$0.09
Depreciation	*-$0.18/sh for full year; weighted more heavily later in yr*	($0.03)
AFUDC increases	*-$0.13/sh for full year*	($0.02)
Other items / O&M / ATC	*-$0.08/sh for full year*	($0.02)
Int Expense	*Debt issuance at WPL and IPL - less neg impact: some was later / intr rates better*	($0.01)
COVID	*Stay at home mid-March balanced by leap yr extra day*	$0.00
Dilution	*Incremental equity dilution*	($0.02)
1Q20 EPS		$0.55
Consensus		$0.55
2020 EPS		$2.44
2020 Consensus EPS		$2.41
2020 Guidance		2.34-2.48
1Q19 Sharecount		237
1Q20 Sharecount		245

Source: BofA Global Research estimates, company report, Bloomberg

Items to track going into 1Q20 call

Key COVID considerations

- **Retail electric margins and sensitivities**: LNT provided sales sensitivities in early April, indicating that a +1% change in electric sales in '20 correlates with a $0.02/sh resi impact, a $0.01/sh commercial impact, and a $0.01/sh industrial impact. It also shared that its 2019 retail electric margins were split such that 46% were resi, 28% commercial, and 26% industrial. Also importantly, LNT acknowledged that 40% of Iowa and 30% of Wisconsin C&I margins are demand-based charges.

- **Diverse industrial customers not all equally impacted**: LNT has a number of C&I customer types, diversifying demand impact. In Iowa, customers are particularly focused on food/agriculture – as well as some chemicals, and manufacturing. In Wisconsin, customers are focused on metals, chemicals, petroleum and plastics (i.e. biofuels), and food. We expect that ethanol has of course been pressured by oil and gas prices, but note that electric demand from farmers should still stays strong as it is too soon to decrease long-term food demand expectations (which would require decisions now to plant less crops for a lower yield this fall).

- **Not decoupled (*for now*) *but* Wisconsin grants bad debt mechanism**: LNT is not decoupled and in its original 2020 guidance expected about 1% sales growth; this included the leap year and industrial customers with operational issues in '19 coming back to normal in '20. Importantly, we see Wisconsin as a positive regulatory environment for LNT, particularly as the state regulators recently approved deferral of bad debts above the revenue requirement. We highlight that the state is evaluating how to proceed with impacts to demand, and we look for future commentary around decoupling in the future.

- **Space for more O&M cuts**: LNT has some room in its earnings for more O&M savings, particularly as it baked in -$0.08/sh YoY in its annual 2020 walk. We expect that the company has some leverage to increase O&M savings in 2020 making the company more resilient to COVID impacts.

- **We expect more demand data to come**: LNT has real-time demand data for resi and commercial customers since AMI exists in both WI & IA, but LNT has about a month lag for industrial data given the meter technology. We expect LNT to provide more customer class-specific impacts from COVID on demand during the 1Q call.

Wisconsin

- **Rate case**: LNT is still analyzing how to file its Wisconsin rate case during this sensitive time, such that it is mindful of its customers during the economic hardship COVID presents to many. We expect to hear more details on requests on the call.

- **Solar filing**: LNT continues to plan to file for about half of its targeted 1Q solar build in 2Q. The company is wrapping up development activity since Wisconsin requires exact sites pre-filing (Iowa allows the site to be named after). While details might be ready on the 1Q call, some more details might come after.

- **West Riverside Energy Center**: LNT's 730MW gas plant is still expected to commission next quarter (2Q20).

Iowa

- **Renewables on schedule**: Amidst the rush to commission wind by year-end to effortlessly qualify for the production tax credit (PTC), LNT is in good shape. Two IPL projects are already in service (201MW Whispering Willow North, and 200MW Golden Plains), and the remaining 130MW Richland project (expected in service 3Q20) is currently receiving timely equipment deliveries. This on time delivery applies for the Wisconsin wind farm too (150MW Kossuth expected in service 4Q20)

- **Multi-year cases**: We still think there's a potential for multi-year cases in the future, but doubt this will take up much of the conversation on the 1Q call.

Estimates

We include our latest EPS estimates and ROEs below by subsidiary. We tweak down our estimates by a few pennies in '20 and '21 to reflect how LNT is not decoupled and could see EPS impacts from lower demand – but with our expectation the company has some ability to ramp up O&M cuts. We are at the middle of the 5-7% guidance range for LNT looking at '18-'23 CAGR.

Table 4: LNT EPS Estimates

EPS by Segment	2017A	2018A	2019E	2020E	2021E	2022E	2023E

Ameren (AEE)

Our latest EPS projections of $3.43/sh (vs '20 guidance of $3.40-3.60/sh) factor in lower 30-year Treasury assumptions starting at 1.5% in 2020, a lower base ROE for FERC jurisdiction (10.38% with 50bps adder), and our expectation that there is room for cost savings since AEE in its 2020 guidance acknowledged O&M would be increasing at Missouri and Illinois Gas (the exact amount not disclosed). We note that AEE is decoupled in IL, which we think will be a clear benefit; note this leaves about ½ of ratebase (in MO) not decoupled. Although more exposed in MO, we view the company's low portion of industrial energy demand as a positive as well (class break down: 50% margins resi, 40% commercial, 10% industrial), and note that impact of commercial demand is typically more protracted given many billing cycles are 12-month trailing. More specifically, we would expect O&M savings balance out MO commercial sales impact for '20. This still leaves us at ~7% for '20-24 EPS CAGR. Outside of COVID and demand, we expect 1Q commentary to highlight the strong pipeline opportunities the company has outside of its five-year and ten-year capex projections. We specifically watch for any hinting toward potential accelerated retirement of unscrubbed coal, but note that with the outstanding 8th Circuit Case on EPA regulations and lack of securitization legislation will indicate a later update here. Finally, we note the company has strong FFO/debt metrics that sets it apart from peers. As for 1Q20, we expect a $0.67/sh quarter impacted by mild winter, limited COVID impact on demand (due to shoulder month), and lower energy efficiency benefits. Maintain Buy.

1Q20 Walk

We expect a $0.67/sh 1Q20 estimate, versus a Consensus of $0.74/sh and a prior year's 1Q19 est of $0.78/sh.

- **Drivers**: We expect the 1Q result of the Treasury will bring down Illinois Electric ROEs by -2c; this is largely counteracted by ratebase growth (balancing ROE revisions) in IL Electric, IL Growth, and Transmission (+2c).

- **Other**: Note that 1Q19 included $0.03/sh of weather and $0.06/sh of energy efficiency that need to be backed out. The 2019 spring Callaway outage mostly impacted 2Q19, and new rates in AEE Missouri will be a 2Q20 item as well. The company benefited from two refi's in 2019: One March 6th that replaced a $329mn 6.7% with a 450mn 3.5%, and one Oct 1st that replaced a $244mn 5.10% with a $330 3.25%. Lower tax benefits with share-base comp usually benefits 1Q (+3c) and dilution from the $100mn drip is nearly flat.

- **Wildcard**: We see 1Q20 as a mild winter. Looking at heating degree days (HDD) of 2019 and 2020 versus the 10-year average (2009-2018) in Saint Louis, we find 236 more days in 1Q19 and 202 less days in 1Q20. As 1Q19 benefited AEE by +3c, we adjust 1Q19 by -3c. O&M will be another wildcard: We factor in -1c compared to 2019. Finally, COVID impacts on demand are unknown but likely limited in 1Q given the shoulder month it would have impacted (i.e. March).

Key considerations

We see AEE as well suited to recover on the rebound more than peers.

- **Strong growth yet to come**: AEE showed its growth strength at 4Q19 when it added $3bn to its five-year capex & disclosed a substantial 10-year $36bn runway of 'business as usual' investments. We perceive some slight risks to further acceleration previously contemplated this Fall with IRP update, but overall see among the best positioned longer-term ratebase growth stories. Bottom line we see capex backdorp as securing EPS growth of the 7-8% range (with DPS growth that should beat that given the lower payout ratio), but it will help AEE achieve of on the best 'rate of change' ESG stories in the sector to come. We acknowledge potential pressures on ’20 EPS guide from 30-year treasuries in tandem.

- **Potential accelerated coal retirements & rate-based replacements**: We note AEE might have the opportunity to accelerate its ratebase plan this fall with is integrated resource plan (IRP) filing. Note, though, that actual timing of MO coal retirement could depend on securitization legislation (in '21) as well as Sept resource filing: both key upsides on capex.

- **Illinois is likely later-dated**: While AEE might have upside via more renewables in IL, an extension of formula rates in IL at a higher auth ROE, and more transmission projects, it will likely be a challenge this year. We expect social distancing makes getting to all legislative decisions in the May session difficult, and we could see other issues fill up the November veto session as well. Based on our latest industry conversations, we are expecting a little more difficulty for a broad energy reform involving nukes in the near-term – and could see further out legislation that includes more folks (e.g. labor, environmental) in the future with perhaps more modest gains for utilities (e.g. just formula rates rather than ratebasing renewables).

- **Good balance sheet**: Finally, it would be remiss to ignore AEE's stronger FFO/debt metrics, with projected 19.2% in '19-'25 vs. credit rating 17% min and regulated avg of 16.5% (& larger caps even lower).

- **COVID impact**: AEE in the near-term faces a lower COVID impact given seasonality (i.e. shoulder months limit heating/cooling) and given half of its rate base has limited exposure (i.e. IL electric has full decoupling; IL gas has full decoupling for resi & small commercial & a bad debt expense tracker). AEE faces exposure in MO outside of its energy efficiency mechanism; with 50% of margins resi, 40% commercial, and 10% industrial, increase in resi may offset some drop in commercial but with billing cycles this will likely impact '21 as well.

Estimates

Our estimates remain largely the same as we already adjusted down our EPS expectations for ’20 and beyond given COVID impact on demand (no decoupling in MO) as well as lowered IL ROEs given where 30-year Treasuries have fared thus far. We continue to expect a 1.5% +580bps IL Electric earned ROE.

American Electric Power (AEP)

We see the 1Q20 call quite important as it will set the stage for FY20 guidance. It is clear AEP will be negatively impacted by very mild winter as it is not fully decoupled (we factor in -10c for 1Q20 given an even more mild winter than 1Q17, which was -8c YoY). Shares remain among the most controversial of large-cap peers. On top of this, we expect AEP to face lower electric demand from low oil prices' impact on industrial customers (O&G represent 30% of this class) as well as its outcome of its pending Indiana rehearing request. Even so, AEP has been clear that even though it already factors in 'bending the curve' O&M cost cuts, it could factor in more later this year to balance out some of these impacts. The degree to which is so far unclear, so we await commentary to provide a sense. We weigh in the full North Central Wind into our valuation as we see it proceeding forward in key states, but look for any commentary on financing the project (if the asset rotation is possible to pay for the equity check). Upside includes repowering opportunities from the SRE portfolio. We reiterate Buy at a $93/sh PO with an updated peer multiple of 17.6x. Finally, we forecast $1.03/sh for 1Q20 EPS – lower than a $1.15/sh Consensus and 1Q19 results of $1.19/sh.

1Q20 AEP EPS Walk

We estimate EPS of $1.03/sh for 1Q20. This compares to Consensus of $1.15/sh and last year's 1Q19 EPS of $1.19/sh.

- **Drivers**: Apart from weather, 1Q will be driven by a -9c Ohio regulatory provision, YoY wholesale rate changes (+6c for wholesale with Michigan going into effect in February, West Virginia, Arkansas, and Oklahoma last year), and some improvements in O&M (although many are planned for later this year)

- **Other**: A number of 2020 full year walk items are weighted heavier towards other quarters. This includes the -10c for 2020 wholesale load (mostly in 2-3Q), +19c for 2020 O&M (mostly after 1Q), -3c Texas carrying charges (a 2Q item), and a -9c Transmission HoldCo true-up (a 2Q item).

- **Wildcard**: The mild weather will likely account for around -10c YoY for 1Q given that a slightly less mild winter in 1Q17 represented -8c YoY. Note that AEP also has a +1c to return to normal from 1Q19.

Key items for the 1Q20 call

- **Indiana**: The final outcome for I&M's rate case in Indiana is still underway. Previously, we highlighted that it was possible AEP face a -7c impact from loss of wholesale revenues ($46mn) associated with the case (on top of the ROE result). We note that at the end of March, the Indiana regulatory commission gave the company results of a compliance filing that updated the net impact of the case from $8mn to $26mn. The outcome of the rehearing to recoop the remaining portion associated with wholesale revenues is due 60 days from 3/31. Stay tuned here.

- **Exposure to Covid**: We could see AEP towards the lower end of its guided '20 range based on its exposure to the industrial sales (and specifically Oil & Gas prone growth assumptions). Note that 30% of industrial sales is based on O&G – and that looking at 4Q19, AEP's Industrial GWh growth was 3.5% for the oil & gas related sectors but -6.1% for others. With sensitivity of $0.015/sh for every 1% change in industrial volume (the same for every 1% change in commercial volume as well), we expect the potential loss (vs. the company's originally projected 3.2% growth YoY in industrial GWh Sales) could be a significant driver for a '20 EPS reduction. Flat industrial growth in '20 would bring down '20 EPS by -$0.05/sh alone, and an actual drop in industrial volumes (which we see more likely due to its oil biz dependency) could mean a revision closer to -$0.10 or more. Here, we acknowledge AEP's less decouple profile (largely just Ohio and Texas through regular use of TCOS/DCOS riders) leaves some greater risk vs other more pre play utilities.

- **O&M and mitigating factors**: AEP factors in +19c of O&M cost savings YoY (equates to $200mn of savings established last Nov at EEI) into its 2020 walk already. While not commenting on flexibility, the company noted that it would be evaluating yet further reductions to bend the O&M curve even more this year in effort to balance some of the impacts of lower demand. We see O&M as a mitigating factor to COVID / oil price impacts on demand, Indiana's rate case outcome, and poor 1Q weather. Other ways to mitigate could include filing new rate cases. Finally, we continue to perceive mgmt. strategy as among the best positioned vs. peers between its largely transmission oriented growth strategy and nascent renewable build efforts.

- **Load loss**: As AEP experienced some load loss on the industrial side last year, it factored in some load loss assumptions for 2020 in the residential segment given the normal business cycle for the utility usually sees trends lead by industrial and then followed by resi 12 months later. AEP had factored in a resi decrease of 1.4%. We watch here as COVID work from home mandates could result in more residential use of electric.

- **Wind catcher**: With Louisiana filing its settlement, we await more official certainty before AEP announces how it plans to finance the project. Prior calls have identified 50% to two-thirds financed with equity. We look for whether the company is still able to pursue asset rotations in this environment.

- **Liquidity**: We highlight that AEP had $2.1bn in liquidity at the end of 2019 and that it signed a $1bn credit agreement several weeks ago as well. We expect that the company addresses liquidity and credit concerns as all companies in the utility space have looked to do. Finally, we note that Moody's previously placed AEP on negative outlook last November, but that credit rating agency is well aware of North Central Wind (and the equity associated with the project) as well as measures to reduce O&M at AEP. Note that our FFO/debt reconciliations are roughly around 15% (the company guides to mid-teens).

Estimates

Below we include our estimates largely unchanged from before – still at the bottom of 2020 guidance. We already factored in negative impacts expected from oil price impact as well as COVID impact on industrial demand and the cautious result at Indiana (although still could be mitigated). We note other moving pieces include a further O&M push and 1Q weather pressures.

American Water Works (AWK)

Amid the escalation of the COVID pandemic, we expect continued execution by AWK with their inaugural ten year capital forecast of $20-22Bn intact and the company recently taking action to proactively address NT liquidity. We don't perceive any meaningful delays in spend or regulatory filings (albeit note the timing shift for new rates to take effect for NYAW) and with recent changes in mgmt. taking effect in the beginning of the month, we have confidence in the team's ability to navigate the crisis with potential for a further acceleration in muni acquisitions during any recovery period. While we appreciate the scarcity element and higher sustained investment trajectory for the subsector, we ultimately see the steep premium as unwarranted. We reiterate our Underperform rating.

AWK 1Q20 Earnings Walk

We forecast 1Q20 adjusted EPS of $0.67, in line with consensus and a $0.06 uptick from 1Q19 results of $0.61.

- **Key Drivers:** The primary positive drivers y/y are new rates implemented across a number of states in their footprint as well as various infrastructure surcharges. Partially offsetting results at the regulated segment includes higher D&A and O&M, as well as a bit of a drag at the parent level offsetting MBB contributions.

Table 12: AWK 1Q20 Walk

Predictable Execution Amid Unpredictable Crisis

Amid the escalating COVID crisis, mgmt. of AWK has maintained a clear focus on liquidity: in addition to their $2.25Bn revolver, the company entered into a $750Mn term loan, drawing $500Mn to hold in cash for add'l flexibility. The company has no near term debt maturities and remains confident in its ability to access both debt & equity markets (no equity needed in '20) as they still expect to fully execute on their capital investment plan of $20-$22Bn over the next ten years (any 2020 delays are expected to be made up later this year). To date, the company hasn't seen major disruptions to the supply chain: key distributors have indicated excess inventory, while chemical providers are meeting needs and reporting no shortages. On the margin, we sense commercial trucking capacity as mgmt's only potential concern for transport of chemicals or bottled water in the event of a major service outage – and the company said it has secured contracts with two suppliers with relationships with gov't agencies in any event.

Reg., Leg., and Muni Prospects

We further perceive regulatory filings as generally proceeding as planned – while remote - with no anticipation of a delay in their ongoing NJ rate case. That said, late last month, NYAW announced postponement of the rate increase and improvement charge. We could also see a further uptick in bad debt expense with no real time tracker for recovery. With resi composing 69% of revenue, we see load impact as likely more muted, however. Given the already longer process of engaging in municipal transactions, mgmt hasn't seen particular delays on the acquisition front and we perceive a potential for further acceleration in industry consolidation under a recovery scenario as munis focus on the small businesses. Meanwhile, the capital light MBB is continuing to generate cash with no impacts yet to Military and an expectation that the customer base in homeowners services will be maintained in any economic downturn.

EPS Estimates

The exhibit below reflects our latest EPS estimates with annuals remaining unchanged ahead of our 1Q preview and as we await additional data points. We continue to expect sustained long term growth within their 7-10% LT EPS CAGR and 7% rate base growth longer term.

Valuation

The exhibit below reflects our latest valuation: We mark to market our valuation for the latest water utility multiple of 26.3x (vs. 25.2x), with our PO shifting to $133. We maintain our Underperform rating given the large premium vs. electric & gas peers, which we see as unjustified given its only modest relative growth premium.

Consolidated Edison (ED)

ED is expected to deliver Q1 results down slightly from the prior-year quarter. Our 1Q20 estimate of $1.33/sh compared to adjusted EPS of $1.39/sh in 1Q19 and Street consensus of $1.42/sh – we see downside here as effects of Covid-related slowdown are more fully reflected in consensus estimates. ED's main electric and gas business at the Con Edison Company of New York (CECONY) and Orange & Rockland (O&R) is fully decoupled leaving its earnings relatively defensive in the face of Covid-related slowdowns amid ongoing shut-in orders, with the Steam business being the only one exposed to weather and load factors. ED's non-regulated business should see a modest uplift in 2020 on higher earnings from the ongoing Mountain Valley Pipeline (MVP) project as well as the normalizing effect of weather-curtailed renewable production in the Clean Energy Business (CEB).

1Q20 Quarterly Walk

We see Q1 EPS at $1.33/sh, slightly below Street at $1.42 though we perceive downside to consensus ests after weather and demand considerations are more fully factored in to forecasts. Weather is expected to be a drag (we estimate 5 cents, see below) due to milder weather in Q1 2020 affecting principally the Steam business (CECONY and O&R are decoupled for Electric and Gas) offset partially by normalization of the negative effect from 1Q19. We expect a $0.12/sh uplift from new rates at the gas and electric utilities in effect since January with new rates in place following the approval of the joint settlement in the CECONY rate case, and modest uplift at CEB from improving wind resource in Q1 (ex HLBV impact). Key unknown is the drag from stock-based compensation (SBC) which becomes incrementally larger depending on the y/y share price return as of the end of the quarter – given market volatility in Q1 this item is particularly difficult to estimate, though we assume some drag given the share price was higher *on average* during 1Q20 as compared to the prior year.

Table 15: ED 1Q20 Earnings Walk

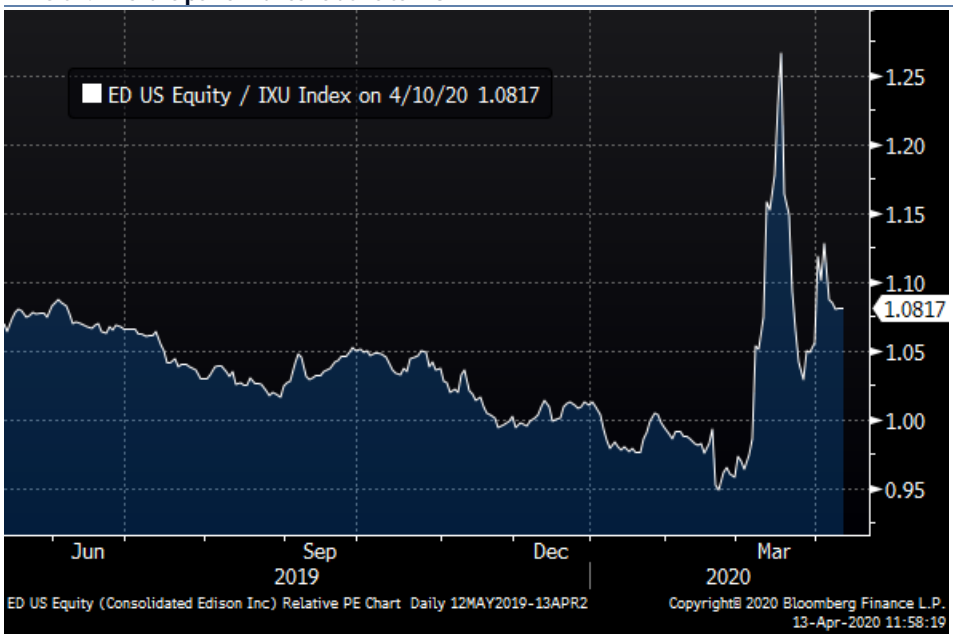
Stock trading dynamics

Shares of ED have held up relatively well during the March market volatility which was kicked off by concerns about the economic effect of Covid. ED remains one of the more defensive names in our coverage owing to its largely decoupled business – both Electric and Gas distribution at CECONY and O&R are decoupled, leaving the much smaller Steam business along with the Rockland Electric Company (RECO) exposed to changes in load. The New York Independent System Operator (NYISO) has reported electricity demand in Zone J declining by as much as 18% during the weeks since the shut in orders began, largely driven by lower morning peaks as commercial customers are shut down and commuting has declined precipitously. While the timing of the Covid demand shock is more likely to impact Q2, we note that milder Q1 weather can be a negative driver for the steam business, though ED does not disclose sensitivities. ED has weather normalization at the CECONY and O&R gas businesses but not at the electric utility. While ED does not have a separate bad debt expense rider, each rate case creates an allocation for bad debt expense that is then recovered through rates. Nonetheless, on a 2-year forward PE relative to the IXU, ED shares continue to screen relatively expensive. Accordingly we remain comfortable with our Neutral rating, seeing risk and reward as largely balanced.

Exhibit 1: ED share performance relative to IXU



Source: Bloomberg

Weather should be more impactful than demand in Q1

We expect that despite ED's largely decoupled business, the impact of milder than normal weather in Q1 results will be more pronounced in 2020, on an order of magnitude more in line with Q1 2018. As measured by heating degree days at LaGuardia Airport, Q1 was 20% warmer than normal, a level of mild weather last approached in 2016 and 2017. ED's reported weather impact on the steam business includes both the normalization of the prior year's impact as well as that of the current year. As such it is more instructive to look at the total delta in deviation from normal from year to year – note that in 2016 HDDs swung from 18% above normal to 16% below normal, an aggregate change of -34% which resulted in a significant 12 cent impact on EPS. The change in 2020 is not as dramatic as 2019 was only slightly below normal in terms of HDDs, accordingly the total drop in HDDs including the impact of the current year is -18%. We therefore estimate that the impact on EPS from weather impacts on the Steam business is -$0.05. We not however that this impact is historically volatile and numerous factors affect the total EPS swing including the timing of when the biggest deltas from normal occur – HDDs in Jan-Feb are "worth more" in an EPS sense than

those in more shoulder months of Mar-Apr generally speaking. 2020 saw relatively consistent trends in weather, with each Q1 month recording double-digit percentage declines from normal including 20%/15% declines in Jan/Feb. In 2016 by contrast, Jan-Feb declines were approximately 10% while March HDDs were 30% below normal. Bottom line: we see weather as a likely negative driver in Q1 on an order of magnitude similar to 2018. We see this as a much more impactful Q1 event than Covid-related demand declines owing to the timing of state shut-in orders, though both will be Q1 headwinds with the mix shifting toward demand declines looking forward to Q2 and beyond.

Table 16: New York City HDD data

	Q1 2015	Q1 2016	Q1 2017	Q1 2018	Q1 2019	Q1 2020

Credit and financing update

ED's 3-year financing plan includes up to $1.8B of equity issuance in 2020-22. Needs in the current year are seen at up to $600m on top of $88m of equity forwards settled in January, while the forecast for the two following years calls for $1.1B. Street estimates were higher than our forecast. However, they still trail the announced issuance by ~$400m through 2022. On the credit side, Fitch lowered outlooks of ED and its subsidiaries CECONY and Orange and Rockland Utilities Inc. to negative from stable reflecting a weak financial profile associated with lower demand and higher than anticipated bad debt expense involving NY power market due to COVID 19. Admittedly, the companies have revenue recovery mechanisms in place to deal with such situations but Fitch expects those are not sufficient enough to protect the utilities. We continue to see ED's consolidated CFO pre-WC to net debt metric as bouncing back from the ~15% level at the end of 2019, increasing to 17-18% by 2024.

EPS Estimates

We tweak our 2020 estimates lower on Covid and weather impact at the Steam business, reducing earned ROE to 8.8% (in line with authorized) from 8.9% while we continue to reflect 10 bps of over-earning at CECONY in 2021 and beyond. We also reflect a slight uptick in results at the CEB y/y as below-normal results from 2019 are normalized, though in the long-term growth in this business is expected to come principally via contractual escalators and investment in incremental projects. Our estimates are modestly below Street consensus in '20 and '22 and in-line in '21, reflecting a CAGR of ~4% over our 2019 estimate.

Table 18: ED updated estimates

Valuation

We update our PO to $93 following mark to market of the latest peer group multiples of 17.6x for electric and 17.6x for gas. We remain Neutral on ED as the latest guidance provides a below-peer rate of return of 3-5% over a five year period based off 2020's guidance, which implies minimal growth over 2019 at the midpoint. While in our view shares are largely derisked in terms of rate case uncertainty with new rates in place for three years, we would expect the market to remain focused near-term impacts from warmer weather and Covid-related demand destruction in the near term along with a focus on the below-average growth trajectory and uncertain cadence of 2021-22 equity issuance in the medium term. Reiterate Neutral.

Duke Energy (DUK)

With DUK's upcoming 1Q call, we expect a sharp focus on cost reduction mitigation measures to offset in part COVID-19 related pressures. While mgmt. is still assessing the impact on load and delayed bad debt expense recovery, we could potentially see up to a -$0.14-16/sh headwind assuming just 2-3% load degradation (although could be materially higher than this) on C&I/wholesale customers and $20mn incremental bad debt similar to '09 levels if not for offsets. Specific details on cost cuts have yet to be delineated, although we look back to 2017 where weather was a significant headwind with mgmt. offsetting the impact through cost reductions of $100-150mn, which would translate to $0.11-$0.16/sh EPS benefit in 2020. Ability to bend the cost curve is notable and opportune following last year favorable weather and pull-ahead on O&M execution. Beyond 1Q details around load pressures and cost reduction, we look to discussions around the North Carolina rate cases where we remain cautious given litigated ROEs and coal ash pressures; perceive the risks of negative revisions to be largely known/priced-in. With potential for multi-year rates/ ROE banding in exchange for enhanced customer metrics the Carolina jurisdictions could be partially de-risked following rate case outcome. Longer-term, the NC IRP filing in Sept that could create additional opportunities for DUK in terms of clean energy and coal reduction opportunities, although we look for further discussion on natural gas build considerations given still uncertainty around ACP. Net-net, we maintain our Neutral rating.

DUK 1Q20 EPS walk

We forecast 1Q20 EPS of $1.14 compared to 1Q19 results of $1.24 and consensus estimates of $1.24. While our estimates are below consensus and down -3% YoY it includes -$0.08 of negative weather est in the quarter. With rate cases in the Carolinas/IN expected to be implemented in 2H and potential cost cuts upwards of $0.16/sh we see the ability to hold the line of 2020 guide.

- **Key drivers**: Positive YoY drivers include the implementation of rates and riders at the electric utilities (+$0.08), the wholesale contract moving to formula rates (+$0.01), new rates at Piedmont (+$0.04), AFUDC on Atlantic Coast Pipeline (+$0.01), other gas utility growth (+$0.01), Offsetting results are regulatory lag (-$0.04), impacts from COVID on load growth (-$0.02), the tax true-up reversal at the gas segment (-$0.06), higher interest expense (-$0.01), preferred coupon interest expense (-$0.04), share dilution (-$0.01), and increased O&M expense due to the Feb. storms in the Carolinas (-$0.03).

- **Unknowns**: Weather is expected to be unfavorable driver in the quarter with HDDs 20% below the norm and 15-18% below the prior year, although slightly offset by more favorable CDDS; the exact magnitude is unclear. Another unknown impact is the decline in load growth from COVID19; while mgmt. provides sensitivity that every 1% decline in load equates to a $0.15/sh impact with industrial load ~20% of retail sales, which has lower margins compared to the other customer classes and Commercial load ~30% of retail, and the ~15% from wholesale, the exact extent of the decline is difficult to discern in 1Q. Further, it remains unclear if the company was able to bend the cost curve on O&M costs, which could be a potential offset, although likely to show up in 2Q.

Bending the O&M cost curve

Given the potential implications from a decline in load with the electric utility largely exposed as several C&I customers have announced closures in its service territory (see further below), we expect mgmt. to look to mitigate these impacts through reductions in O&M. While the company has not yet announced these mitigating measures, we look back to 2017 where weather was a severe headwind with mgmt. able to offset that by $100-150mn in cost reductions. We could very well see mgmt. announce similar cost reductions (relative to flat growth yoy) that would result in a $0.11-$0.16/sh EPS benefit in 2020 to offset (or at least partially) the below headwinds to load. Additionally, mgmt. executed on pulling cost forward with favorable weather last year, including $0.04/sh for foundation giving that could be a benefit as well. While details on where these O&M levers are going to come from have yet to be disclosed, we look forward to additional commentary from mgmt. to see if these are more transitory (i.e. at the utility level) or through sustainable corp. overhead reductions. Net-net, we see this as a positive as it would be able to offset headwinds from load this year.

Load growth considerations and decoupling

DUK's electric utilities & infrastructure jurisdiction (~83% of 2020 adjusted EPS contribution according to guidance) does not have decoupling and is much more exposed to load. On a sensitivity basis, every +/- 1% change in electric load across all customer classes equates to +/- $0.15 change in EPS. Note DUK's industrial load is ~20% of its retail business, which has lower margins compared to the other customer classes driving a lower impact to EPS ($0.02/sh for every 1% change). Commercial load accounts for ~30% of retail, residential is ~35% and the remaining ~15% is wholesale. As we've mentioned before, the residential market may be set up to benefit from COVID-19 as people continue to self-quarantine in their homes (especially true as we enter peak

cooling demand with more residential customers utilizing air conditioning). We also highlight that wholesale represents 15% of its load with every 1% load loss in retail, equating to $0.02-0.03/sh impact to EPS; although this is likely overestimating the impact to some extent as its largest wholesale customers in the Carolinas are residential. Also, the impact for wholesale would only impact the current year as volumes get reset in the following year's rates automatically.

While mgmt. is still assessing the impacts to load, there have been several announced closures in DUK's service territory: BMW in NC and Fiat in IN announced closures in mid-march while many schools and small businesses have also announced closures. See our assumptions below for potential headwinds to EPS from a 2% decline in load (w/ a partial offset by 0.5% increase in residential load), although see this offset in part from increased O&M cost cuts.

Table 21: DUK EPS Load Sensitivity and Assumptions

DUK Load Sensitivity	Every 1% change	Assume 2% decline in load (ex-residential)
Industrial	$0.02	-$0.04
Commercial	$0.05	-$0.09
Residential	$0.09	$0.04
Wholesale	$0.03	-$0.05
Total Headwind		-$0.14

Source: BofA Global Research estimates, company report

Gas LDC's decoupled in NC with weather normalization in SC/TN

On the positive side, most of DUK's gas jurisdiction is decoupled or has weather normalization with only about 9% of total gas earnings exposed to load (~91% of Gas Utilities & Infrastructure business has mostly fixed margins). Piedmont is fully decoupled in North Carolina (75% of Piedmont gas business). South Carolina and Tennessee have weather protection only (25%). From an earnings contribution standpoint Gas Utilities & Infrastructure only accounts for ~12% of 2020 adj. EPS or ~10% excluding ACP's EPS per DUK's latest guidance.

Bad debt expense and recovery of COVID costs

DUK has a bad debt expense rider in Piedmont for fuel expenses (60% of the bill) and a full rider for all bad debt expense at Duke OH gas and electric. For Duke Ohio, bad debt expense is collected through annual uncollectible riders for both the gas and electric businesses, with true-ups. For the Piedmont businesses, these are collected in the fuel rider, and mgmt. can update the fuel costs as often as it needs, although tends to do it every six months driven by under or over-collection status as the cost of natural gas changes. For the other jurisdictions, mgmt. will be tracking incremental bad debt expenses and other COVID-19 related expenses, and if significant, would explore regulatory asset treatment similar to other extraordinary costs when material to the respective utility. *While the majority of the business does not have a bad debt expense rider/mechanism we continue to see a relatively minimal impact from incremental costs associated with bad debt: for context, the company experienced $20mn of incremental bad debt during the 2008/2009 financial recession, which would translate to $0.02-$0.03/sh today (assuming inflationary increase in today's dollars).*

NC rate cases remain key to watch: ROE and coal ash

We continue to expect DUK's rate case in the Carolinas to have a similar outcome to Dominion's coal ash order potentially further cautious for earned/recoverable ROEs where we already assume $0.10-$0.13/sh eventual drag. Further, we expect the ROE to be litigated in the Duke Energy Progress (DEP) case with intervenor testimony on April 13th likely to give further indication of staffs issue with ROE given the wide discrepancy between parties on the current interest rate environment and cost of capital (which has rebounded precipitously for DUK of late). Rate cases remain cautious although see risks of the negative revisions priced-in/largely known.

EPS estimates

We provide our EPS estimates below and see a 4.5% CAGR through '24 with estimates slightly below street and mgmt. guide for 5% growth at the mid-point. See headwinds in 2020 despite sizeable O&M reductions given weather headwinds and reduction in load. We don't expect a guidance cut to be clear with '20 despite 1Q pressures, particularly considering cost levers. DUK appears among the most confident in sourcing these offsets across the sector.

Valuation: PO of $93

Our PO of $93 based on our latest EPS estimates and mark to market of peer utility multiples of 17.9x for gas and electric. Ability to turn the narrative in the NC jurisdiction would clearly help shares to re-rate on DUK shares although still look for execution.

Critically, the ability to implement PBR (Performance Based Rates) potentially in exchange for implementation of an ROE band/and or multi-year stay out of rate cases appears increasingly likely and among a handful of understated emerging positive trends for shares. We anticipate further discussion albeit beyond the scope of the near-term pressures and Covid related concerns.

DTE Energy

We forecast 1Q20 adjusted EPS of $1.80 vs. $2.05 in 1Q19 and $1.98 consensus. Our estimate is well below last year's result due to this quarter's unique combination of weather, Covid impacts, and reversals of one time items. We expect consensus estimates to be revised substantially lower going into the Q1 print. We stress non-reg continues to garner disproportionate attention relative to its modest implied value after multiple contraction in midstream sector. We see shares as entirely fairly rated vs. peers (earlier shares offered a double-digit total return on utility-only values).The strategic question embedded is just how to view non-regulated when netting parent level debt against these businesses (with their depressed trading multiples/valuations of late). We appreciate that this is principally a consideration of debt allocation (ascribing some of the holdco debt to the utility or not), but with just ~$2/sh out of $100+/sh stock (<2% of total value), we sense overly focused Street on very limited side of biz.

- **Key Drivers:** Primary drivers include weather which is an 8 cent drag from normalizing 2019 results and a further 17 cent drag given heating degree days (HDD) 16% below normal. Q1 2017 saw a weather impact of similar magnitude with corresponding drag of $13m at the electric utility. We likewise assume weather-related drag of 10 cents at the gas utility given that the HDD deviation from normal was -16% in 2020 vs. +5% in 2019. We additionally assume 1 cent drag at both the electric and gas utilities stemming from demand impact of Covid – this impact is expected to be modest given the timing of shut down orders in late March. We continue to incorporate the impact of new electric rates which went into effect in May 2019 along with correspondingly higher D&A and interest expense. While DTE mgmt. has flagged its previous expectation to utilize financial contingency to mitigate impacts of weather on its utility results, we expect a partial offset to weather impact (and none to Covid impact) in Q1 due to timing.

- **Unknown:** Precise weather-related impacts are difficult to estimate although we see Q1 2017 as a comparable period (albeit with fewer storm expenses). Covid-related demand shifts in late March are expected to show an increase in residential load and a larger (in % terms) decrease across both commercial and industrial (C&I). The Energy Trading business is difficult to forecast owing to the opaque nature of its operations – given significant volatility across most asset classes in the quarter there is potential for an above/below normal quarter, although we do not incorporate this into our estimates.

Milder weather compounding Covid slowdown in Q1

Q1 2020 was substantially warmer in DTE's service territory than normal, with heating degree days (HDDs) 16% below average levels. The last time the service area experienced conditions with the same order of magnitude deviation from normal was Q1 of 2017 when HDDs 14% above normal created a $13m drag at the electric utility. We also assume that the weather-related drag on the gas business was 10 cents in Q1 2020, as compared to a 5 cent benefit in 2019. The effects of milder weather in 2020 are compounded by the fact that 2019's positive weather result of 5 cents gas and 3 cents electric is being reversed. We expect that DTE mgmt. should be able to utilize its financial contingency to offset a significant portion of weather-related impact in 2020 *throughout the course of the year*, though given timing of warmer months in Q1 we expect a partial offset of weather drag in the quarter, with further mitigation likely in Qs 2-4 through management of timing of O&M expenditures being the primary lever. We note that Q2 is typically a shoulder quarter with relatively low weather impact, while Covid-related slowdown is expected to affect demand in the quarter disproportionately – see more below.

Covid impact on load – Q2 seen most affected

DTE's latest disclosures include earnings sensitivity for all customer classes to a 1% swing in demand. As with most public utilities, residential sales provide the highest margin at $15m annual impact, followed by commercial ($6m), industrial ($1m), and other ($2m). These sensitivities assume a flat 1% impact to demand over the course of a full calendar year. Though DTE has not provided March demand impact by customer class, initial commentary from peer utilities suggests a trend of residential growth in the mid-single digits serving as a partial offset to commercial and industrial sales that decline by 10-15%. Assuming that DTE Electric sees a gain of 5% residential demand and a drop of 15% across the other customer classes through the entirety of Q2, we estimate an earnings impact of -$15m, or 1.2% of DTE's 2020 earnings guidance at the midpoint ($1,270m). Note this is an illustrative case and DTE has not provided demand estimates, and actual demand will vary depending on when Covid stay-at-home restrictions are lifted.

Table 25: DTE electric demand impact

Flat 1% annual impact

Customer type	Sensitivity (%)	Annual earnings impact ($m)
Residential	-1.0%	15
Commercial	-1.0%	6
Industrial	-1.0%	1
Other	-1.0%	2
Total		24
2020 guide midpoint		1,270

Industrial	-15.0%	(4)
Other	-15.0%	(8)
Total		(15)
2020 guide midpoint		1,270
Decline impact		-1.2%

Source: BofA Global Research Estimates, company report, Bloomberg

We note that DTE's utilities entered 2020 well-positioned with mgmt. touting significant financial contingency that would enable the company to "nail it" in both the electric and gas business – in fact the company reiterated 2020 guidance in March as the Covid pandemic shock was spreading. We expect that mild Q1 weather combined with Covid impact will weigh on earned ROEs in 2020, with the impact partially but not completely offset via O&M management by utilizing the financial contingency built up in 2019. We therefore reduce our forecast for earned ROEs in 2020 at both the electric and gas utilities to 9.9% from 10.0%; note that we had previously reduced our authorized and earned ROE forecast at both the electric and gas utilities for 2021+ to reflect risk around authorized ROEs from the persistent low interest rate environment. With our reduced estimates, we still see the electric and gas businesses achieving results near the low end of mgmt.'s reaffirmed guidance range – with a protracted demand impact related to Covid as the most pressing near-term risk.

Table 26: Utility ROEs incrementally lower in 2020 on weather/Covid

ROEs

Electric rate case decision expected by early May

Under Michigan state law, the commission is required to issue a final decision in the pending rate case within 10 months of the filing, by May 8. The commission has not yet indicated whether it may extend the timeline due to the Covid emergency and staff resources likely focused on ensuring that gas and electric service continues uninterrupted. DTE Electric filed a request for a $343m increase premised on a 10.5% ROE and $18.2B rate base. Staff countered with a recommendation for an increase of $195m, a 9.8% ROE, and $18.1B rate base. Recently, the administrative law judge (ALJ) handling the case issued a recommendation for a rate increase of $99.8m based on an ROE of 9.8% and rate base of $17.1B. At issue in the ALJ recommendation which supports the position of intervener the Association of Businesses Advocating Tariff Equity (ABATE) which claims that DTE's prepaid pension asset of ~$800m be excluded from the working capital portion of rate base as DTE did not establish that the pension asset was fully funded by investor capital or that it provides benefits to ratepayers. This is an area where the ALJ disagrees with commission staff, which approved the inclusion of the asset in rate base in the previous rate case (U-20162) but directed DTE to provide additional evidence that the asset should be included in working capital including the source of the funding of the prepaid pension asset in the current filing. DTE's testimony

asserts that the pension asset is 1) reasonable and prudent as it reduces ongoing pension costs and 2) it contributes to an increased deferred tax component in DTE Electric's weighted average cost of capital, reducing overall cost. The ALJ concludes its argument stating that DTE made "no effort whatsoever" to demonstrate that the entirety of the prepaid pension asset was supplied by investors rather than ratepayers.

Below we include a summary of the rate base impact from the ALJ proposal as compared to both DTE's request and commission staff proposal. Staff's recommendation for approved rate base was generally in line with the company's request, which stands to further highlight the degree to which the ALJ recommendation stands out in proposing to exclude the pension asset.

Table 28: Rate base recommendations

DTE projected rate base ($m)

	DTE	ALJ	Delta	Staff
Net plant	16,775	16,514	(261)	
Working capital	1,392	582	(810)	
Total rate base	18,167	17,096	(1,071)	18,120

Source: MPSC docket #U-20561

Based on intervener, staff, and the ALJ's filings, three outcomes are possible with respect to the pension asset:

- **Accept ALJ recommendation without modification.** In the event that the commission were to accept the ALJ/ABATE position, DTE Electric's revenue requirement would be reduced by $56.8m according to company filings.
- **Accept ALJ recommendation with the modification that pension expense be adjusted which results in higher recovery through rates.** DTE's rebuttal filing claims that to exclude the pension asset without considering the impact on expense is unfairly punitive. The company claims that if the pension asset were excluded from rate base, the pension expense should be increased correspondingly (by $58m per DTE calculation) which would subsequently be recovered in rates, resulting in a largely revenue-neutral outcome.
- **Reject ALJ recommendation – status quo outcome.** This option would not affect the treatment of the pension asset on working capital and DTE would continue to recover. Notably this position is supported by commission staff in docketed reply to exceptions.

Midstream: will gas price recovery de-risk prospects post contracts?

We maintain our forecast in DTE's midstream business, seeing ~9% earnings growth through 2024 from the midpoint of 2020 guidance which already bakes in a ~30% increase over 2019, driven mainly by the full-year contribution of the Momentum midstream assets purchased in Q4 of 2019. Post 2020 growth in the segment is driven primarily by the placing in service of a gathering pipeline at Momentum (late 2020 in-service) as well as continued investment in compression and other organic growth initiatives at NEXUS, Link, and other "legacy" midstream assets.

We likewise maintain a balanced view on DTE's exposure to Indigo Natural Resources, its primary counterparty in the Haynesville basin. Indigo maintains relatively low leverage for its sector (~1.0x EBITDA post-transaction). *Critically, we see the potential for gas price appreciation into the future as offsetting our otherwise concerns embedded on volume related concerns in coming years. For now we see volume-related concerns and broader midstream concerns raised by many investors as simply less relevant given where shares are priced.*

The company is largely hedged forward for its projected 2020 production, with some 2021 volumes hedged as well - while commodity price risk exists given ongoing supply-demand imbalance in US basins, we note Indigo mgmt. appears to be prudently hedging its forward exposure amid an uncertain price environment. We note DTE maintains minimum volume commitments (MVCs) with Indigo covering 90% of its expected volume from the Haynesville basin through 2020, with volume growth covering the remaining 10% of company forecast revenue - note forward sales by Indigo suggest performing under the MVCs should be an achievable goal in the near term.

Bottom line: the market has discounted DTE shares to the point where they trade with little implied value in the midstream business. We stress that investor attention here is disproportionate given healthy utility earnings visibility through the forecast despite near term risks.

EPS Estimates

We previously updated our 2020 estimates to reflect lower earned ROEs of 9.9% at the Electric and Gas utilities (10.0% previously). Our new consolidated 2020 estimate of $6.56 is below the midpoint of the $6.47-6.75 range recently reiterated by mgmt. We continue to see the long-term outlook as largely intact, having previously reduced our earned ROE assumption at the Electric and Gas utilities to 9.9% to reflect rate case risk in a low rate environment. Our updated 2020 estimate is several cents below Street though we stress downside to consensus estimates as the effects of Covid become more fully integrated in forecasts. We also highlight that earnings from the Energy Trading business may exhibit more volatility in the short term, though we continue to forecast a growth trajectory in line with previous mgmt. guidance given the opaque nature of the segment.

Table 29: EPS estimates

PO to $112; reiterate Neutral

We view risks around DTE's growth story as balanced, given the premium utility growth seen in the forecast period as balanced by less certain midstream outlook, primarily driven by single counterparty exposure at Blue Union. DTE's updated long-term guidance calls for operating EPS growth at a 5-7% CAGR from the midpoint of 2020's initial guidance of $6.61. Our updated forecast results in a 2020-2024 consolidated EPS CAGR of 5.3%, near the midpoint of mgmt's range. We apply peer group multiples of 17.6x for both the electric and gas utilities (previously, 17.9x/17.9x for electric and gas,

respectively), 8.0x midstream EBITDA multiples to the cogen/legacy coke battery and GSP businesses, a lower 6x EBITDA multiple to the Energy Trading business to reflect its lower-quality earnings profile, and an NPV valuation to the RNG development opportunity which yields an implied EBITDA multiple of 6.8x. We also tweak our valuation discount for the Momentum Midstream biz to -2.0x to reflect ongoing risk around producer activity in US shale basins. With these assumptions our resulting $112 PO reflects high single digit upside potential and we remain Neutral.

Table 30: DTE SOTP

DTE Energy: Poised to deliver in '20, but earnings quality concerns persist	Julien Dumoulin-Smith	07 February 2020

Edison International (EIX)

EIX shares have underperformed the broader utility index since early March (-4% vs XLU) despite decoupling and other regulatory mechanisms to offset COVID related pressures given still $800mn in pending equity needs. While we see recent moves by mgmt. to allow for delay of equity issuance into 2H, potentially allowing for the broader market to recover we remain focused on the total quantum of equity needs to right-size the balance sheet. The '20 equity addresses mgmt.'s current expectations for wildfire related liabilities and timely recovery of memo accounts ($1.09bn in aggregate); we believe clarity on these outcome remain protracted and uncertain at best. With shares trading at a 30% discount to the group (20% after adjusting for potential for additional dilution), we sense investor optimism that shares can close the gap and re-rate to some extent. Nonetheless, we remain sober on these prospects pending clearer articulation of equity from mgmt. and maintain our Neutral rating.

1Q20 EPS walk

We forecast 1Q20 EPS of $0.81 compared to 1Q19 results of $0.63 and consensus estimates of $0.77.

- **Key drivers**: Positive YoY drivers include increase FERC and CPUC core contribution (+$0.16), lower O&M expenses (+$0.04), energy efficiency benefits, and higher financing and other benefits, including lower D&A (+$0.08).
- **Unknowns**: We highlight uncertainty with O&M expenses as it continues to be somewhat challenging to handicap given the company will defer costs that are over and above the authorized limit; with $0.14 drag of O&M expected in 2020 compared to $0.25 drag in 2019, we expect a positive variance in 1Q20 and highlight that much of the accelerated covered conductor program occurred in 1H19 last year and not necessarily the same cadence this year. Another unknown item is just how much equity of the $800mn in 2020 guidance has been issued to date; we assume none given the state of equity markets with the issuance likely deferred to 2H20.

Table 31: EIX 1Q20 EPS walk

Pending equity needs: waiting on more certainty

The recent $800mn term loan that EIX drew down on likely provides flexibility with the timing of EIX's pending equity issuance ($600mn of "new" equity + $200mn on ATM). While the '20 equity addresses mgmt.'s current expectations for wildfire related liabilities, timely recovery of memo accounts ($1.09bn in aggregate), and a clarity on

these outcome remain protracted and uncertain (mgmt.'s confidence remains a tad cryptic). The recent ALJ approval of the capital structure waiver is just one piece to the puzzle to gain more clarity on forward looking equity assumptions.

Capital structure waiver approved by ALJ

The Administrative Law Judge (ALJ) issued a proposed decision (PD) approving the applications of EIX for the waiver of the capital structure. The ALJ recommended: 1) approve the waiver for *two years* or until the CPUC determines cost recovery for '17/18 wildfire events, whichever comes first (we expect some migration to HoldCo debt through this period likely); 2) limit the scope of exclusions to non-cash charges and debt issuance equal to or less than the aggregate net non-cash charges stemming from the '17/18 fires; and, 3) SCE should be required to submit an advice letter stating it has returned to its authorized cap structure or a timeline/plan over which SCE will return 90 days after the CPUC determines cost recovery of '17/18 fires. The ALJ also recommended EIX should notify the CPUC if its equity ratio declines 1% or more from most recent level reported. *We perceive the terms of approval as adding pressure to provide a clear(er) view of equity needs in parallel to Street - albeit with substantial uncertainties may just provide a transition to HoldCo rather than net increase in equity to pay down OpCo debt that waiver would support for two-years.*

For EIX, the approval would represent one of three steps needed to keep $600mn of 2020 equity needs to address wildfire related costs intact. The other criteria include no movement in the wildfire liability of $4.9bn and cost recovery of $1bn in memo accounts (as well as those associated with 2020). We reiterate our uncertainty on total equity needs but see two-year transition as likely tied to a shift in debt rather than further equity (as best we read prior commentary from mgmt), but this remains unclear (as mgmt has specifically qualified equity contemplated thus far is strictly for 'core' purposes for minimal needs on ongoing basis).

Tracking the memo recovery

Mgmt. recently filed its 2019-2019 Fire Memorandum Account (FMA) update, which initiated track 2 of the 2021 General Rate Case (GRC) proceeding. The company is seeking recovery of $509mn of O&M related expenses and $302mn of capital spending. This is considered track 2 of its memo recovery request with a decision not expected until 1Q21 with the GRC. The more near-term item is from the GSRP with a decision expected in April 2020, although again these costs are not similar to the other memo accounts and is more related to capital spending rather than O&M with the latter having a bigger impact on cash flows. The other items pertain to a decision with Wildfire Memorandum Expense Account (WEMA) for higher insurance cost vs. those approved (requesting $505mn in recovery) with a decision expected in Aug. 2020 and the (Catastrophic Event Memorandum Account) CEMA with a decision in March 2021 (for $88mn request).

We stress that this does not include 2020 costs that mgmt. will file at YE w/ a decision in ’22 (potentially growing by $200-300mn incremental). Currently, mgmt. is deferring these costs, although it’s not getting any cash recovery, hence the impacts to credit metrics. We continue to see uncertainty around these items and look for more clarity in the coming months to understand the totality of equity needs as mgmt. has its own internal planning assumptions around recovery.

Bottom line, recovery clarity could still take some time and we continue to see some risks on recovery (whether with the ~$120 mn of recoveries not necessarily tied to precedence or the ~$500Mn of additional insurance expenditures tied to last year that mgmt. did not receive approval for in its last rate case).

Table 32: EIX Wildfire Memorandum Accounts

COVID-19 related Impacts

Mgmt. has noted that most its critical work (safety work, wildfire mitigation spend) continues with only 10-20% of work deferred and is thus far not seeing any impacts to its capex budget or permitting. Given minimal impact to capex, decoupling, and ability to delay 2020 equity issuance, we largely see 2020 EPS guidance as intact.

Decoupling limits impact due to any loss of load

EIX has a decoupling mechanism with cost recovered on an annual basis. The regulatory framework requires the California Utilities to recover authorized revenue based on estimated annual demand forecasts approved in regular proceedings before the CPUC. However, actual demand for natural gas and electricity will generally vary from CPUC-approved forecasted demand due to the impacts from weather volatility, energy efficiency programs, rooftop solar and other factors affecting consumption.

Under the General Rate Case (GRC)/California Public Utility Commission (CPUC) jurisdiction, Investor Owned Utilities (IOUs) get recovery of an uncollectible percentage of revenue based on a historical 10-year average of actual uncollectible expense. To the extent that costs are in excess of the uncollectible factor result, there would be an earnings impact. For Federal Energy Regulatory Commission (FERC) rates, the formula rate mechanism could provide for a true-up. We would expect the Emergency Customer Protections Memorandum Account (ECPMA) to track costs related to COVID-19 given the state of emergency in CA.

Managing the upcoming wildfire season will be critical

Communication with local authorities and the state is crucial given the need to focus on investments to harden the grid ahead of the upcoming wildfire season while at the same time procuring generators for its most critical customers. We see prioritization of wildfire mitigation and communication with the market as critical, especially ahead of the upcoming wildfire season. Public Safety Power Shutoffs (PSPS) efforts are likely to continue into the '20 season; and while weather conditions similar to last year would result in fewer shut-offs, mgmt. is going to continue covered conductors in the riskiest areas (1K circuit miles) and re-inspect structures in more than 50% of high-fire risk areas in order to raise the wind threshold and have an overall smaller impact on customers.

ROE concerns abated for now

Given the volatility of Moody's Baa Index and utilities waived the trigger in the '08 financial crisis (to the upside), we could see something similar happen this time around to avoid volatility in customer rates. We stress that the Moody's BAA Utility Bond index has since rebounded, placing rates within the band and abating any near-term risk to potential CPUC authorized ROEs. Meanwhile, we continue to see potential for a FERC ROE settlement regardless of base ROE policy uncertainties.

EPS Estimates

We provide our latest EPS estimates for EIX, tweaking slightly given the current share price that we assume equity is issued at. EPS estimates largely in-line with street, although above consensus in outer years given we net out equity in our SOTP rather than through dilution in EPS (stress consensus estimates are not transparent on amount of equity assumed).

Valuation: $69

We move our PO to $69 (from $61) based on peer multiples of 17.6x (from 16.2x). While we see upside in our SOTP analysis, we still see the total quantum of equity needs as uncertain and dependent on recovery of memo accounts and wildfire liabilities remaining unchanged. We admit disproportionate upside vs. peers even when including additional equity to address balance sheet but unknown around future wildfire exposures keeps us Neutral rated.

Entergy (ETR)

Our 1Q20 EPS estimate of $1.01/sh is slightly below Street estimates at $1.08/sh. Our 2020 estimate of $5.51 was recently updated to below the midpoint of mgmt.'s range of $5.45-5.75. We see the double impact of milder weather in Q1 and potential lost sales from prolonged Covid-related shut in orders as driving downside risk in the near term. We see ETR as well-positioned for managing the difficult operating conditions in 2020 given the opportunity to rely on flexing the O&M lever as highlighted by mgmt. on our recent conference call, as well as significant visibility into industrial project pipeline in its Gulf service territory which remains intact. We continue to see the renewable angle as the principal long-term play as the company looks to replace several GW of aging fossil generation toward the back half of the decade – with the recent 250 MW solar RFP announcement the latest example. Maintain Buy.

ETR 1Q20 Earnings Walk

We forecast 1Q20 adjusted EPS of $1.01 vs. $0.82 in 1Q19 and $1.08 consensus.

- **Key Drivers:** Key positive drivers include the implementation of new rates (+$0.46sh) including ETR AR through the Formula Rate Plan (FRP), ETR LA through the AMI rider and the base rate proceeding, and a full quarter's effect of the SCPS rider and Choctaw in rates at ETR MS. We additionally see weather as being a small uplift though this is driven by normalization of temps vs. 2019 as 2020 HDDs were below normal across the service territory. Negative drivers include higher O&M spend (-$0.05), and higher D&A primarily driven by addition of new generation assets and ongoing investment in transmission and distribution rate base (-$0.14).

- **Unknowns:** Weather is expected to be a small uplift on Q1 results; however magnitude is difficult to estimate. The magnitude by which industrial load growth is affected by Covid related shut downs is a meaningful consideration though we note some latitude to manage this through O&M.

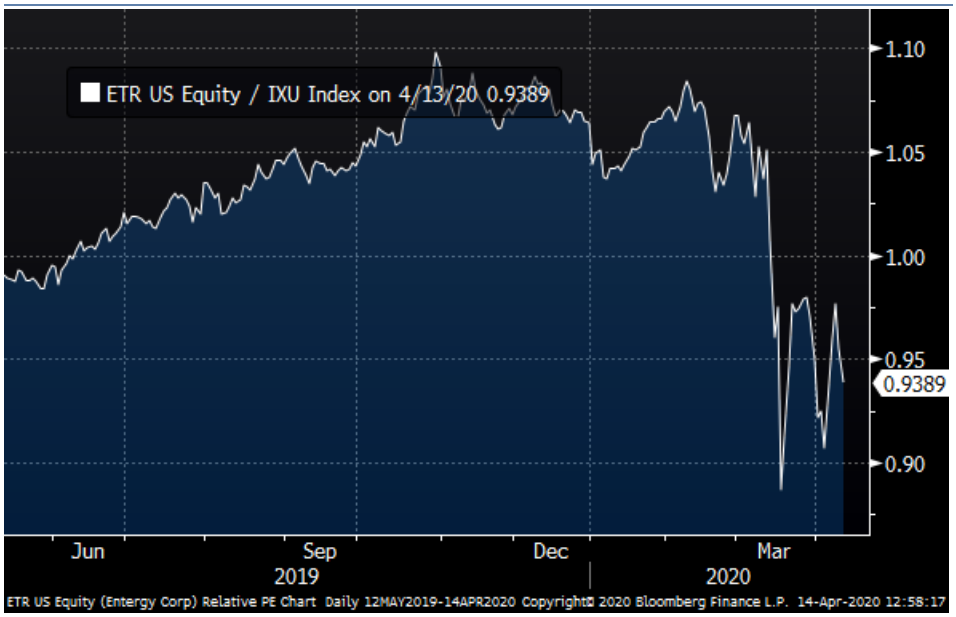
What do we think of shares?

Shares of ETR de-rated vs. the peer group at the outset of the Covid crisis and now trade at a relative discount to the group on a forward PE basis – shares remain 1-2x turns below our electric peer group multiple for 2022 EPS since beginning their de-rating in early March. ETR's 2020 forecast included an assumption of 2% growth in weather-adjusted billed sales growth which included +5.5% growth in industrial sales with residential and commercial slightly down – with our previously-lowered estimates, we are assuming a 4-5% decline in industrial sales ($0.08-0.10 EPS impact), similar to that experienced in the 2008-09 recession, with shares continuing to screen cheap with our lower forecast. Mgmt. additionally indicated that no large customers with industrial projects in the pipeline have delayed or otherwise changed plans for new build facilities along the Gulf Coast, a signal that long-term demand growth remains intact despite near term headwinds. We maintain our confidence in ETR's long-term sustained investment profile between its entirely unscrubbed coal portfolio of ~2.2 GW and its largely steam-based gas and oil fleet which totals ~7 GW. We see investment in replacing these aging assets as the driver toward further re-rating with ETR steadily moving down the road of closing legacy nuclear plants and executing on its top quartile ratebase growth among peers and our estimated ~6% EPS CAGR through 2022. The renewable opportunity remains considerable as utility scale solar in its Mississippi and Louisiana territories and potentially wind in Arkansas are poised to replace aging fossil generation in the coming decade, supporting earnings growth over the medium to long term.

Exhibit 2: ETR relative value chart



Source: Bloomberg

Sizing the Covid impact on demand – look to '08

Mgmt.'s most recent comments regarding Covid impact on demand the company does has not seen a meaningful reduction in demand from either Residential, Commercial, or Industrial customers but acknowledges that an impact is expected as the slowdown continues. Given ETR's largely Gulf-region service area, the largest source of its demand is from Industrial customers which account for an estimated 40% of load, followed by Residential (~31%) and Commercial (~29%). Given different characteristics of each load type, mgmt. estimates that margins and corresponding EPS impact from Industrial ($0.02 EPS per 1% change in MWh sold) customers to be lowest among the three groups with Commercial ($0.05) and Residential ($0.09) following.

Table 36: ETR customer classes: we admit more load exposure to industrial, but perceive real residential offset given 9c:2c relative EPS exposure

Customer Class	% of Load	EPS impact
Industrial	40%	0.02
Residential	31%	0.09
Commercial	29%	0.05

Source: BofA Global Research Estimates, company report

During the 2008 crisis, demand from its Industrial customers declined by 4.5% in 2008 and 2009, followed by a rebound where growth averaged ~3% per annum for the decade that followed. While mgmt. expects some as-yet-unquantifiable impact on its Industrial load, thus far the impact has been limited. Mgmt expects the Gulf region to remain resilient during the economic slowdown given access to cheap natural gas feedstock, high-tech nature of industrial operations, and access to inexpensive electricity in its territory.

Managing opex is one of the key levers that mgmt. expects to utilize to offset declining load growth amid a likely slowdown. Flexing spending is a common practice for managing the effects of short term impacts such as above or below-average weather, with the ability to manage spending in the near term to partially mitigate the impact of lower growth. The other key lever being continuous improvement, which results in a more long-term bending of the opex curve – mgmt. points to last year's Q2 result where permanent cost cuts resulted in an increase in headroom for additional capex investment.

Changes in demand are an important driver as ETR has no decoupling in any of the jurisdictions where it operates – LA, AR, TX, MS, and NO. The highest sensitivity to changes in demand is residential sales with $0.09 EPS impact for a 1% change in demand, while the commercial impact of $0.05 and industrial impact of $0.02 are more tempered. While ETR does not have bad debt expense tracking across its jurisdictions, historically it has been able to achieve recovery of outsized bad debt expenses via regulatory assets. Off system sales are generally not a large driver of variability and not expected to be in the current environment. ETR has formula-based ratemaking in all jurisdictions except NO and TX, allowing for more timely recovery than under a traditional rate case structure, another lever that could potentially mitigate lost revenues due to the exogenous Covid shock.

Solar dev: Sunflower approved, 250 MW LA RFP coming

ETR MS' 100 MW Sunflower Solar facility received approval from the state's utility commission in April, clearing the way for the project to go forward. Under ETR's agreement with developer Recurrent Energy, Recurrent will construct the plant with ETR taking over upon completion. Under the proposed recovery mechanism ETR MS will add the $153m project cost to rates contemporaneous with the closing of the transfer from the developer to the utility under ETR MS' existing formula rate plan mechanism. The decision by the utility commission came in under ETR's original estimated time frame of Q2 2020 with expected project completion and transfer date by the end of 2021.

Separately ETR has announced the issuance of a new 250 MW RFP for solar generation in Louisiana. The proposals are to be structured either as build-own-transfer similar to Sunflower or self-build alternatives for up to 250 MW of generation, and/or one or more PPAs for up 100 MW. Projects are required to have a fully executed interconnection agreement with the Midcontinent Independent System Operator (MISO). Optional storage may be included with proposals as well. Draft proposals are due in April and final submissions are due in June with bidder registration to take place in July.

Grand Gulf lease complaint questions recovery

System Energy Resources Inc. (SERI) has been involved in multi-year complaints regarding its ROE and equity component as well as its sale-leaseback renewal. The sale-leaseback renewal docket (EL18-152) received a proposed administrative law judge (ALJ)

decision in April under which the ALJ found that SERI had recovered most of the cost of the original plant under its lease signed in 1988 that ran through 2015 (since renewed), and that there is no need for SERI to continue to recover its annual lease payments of 17m annually since lease renewal in 2015. ETR maintains that the lease transaction was entered prudently and has resulted in significant customer savings over the years, and that recovery should continue under the current lease. We note that the potential impact on near-term earnings would be limited to any reserve taken by SERI in order to account for a potential adverse ruling. While no formal timeframe has been set out for a final ruling by the Federal Energy Regulatory Commission (FERC), past precedent suggests that a final ruling would not be likely until 2021 or later.

EPS estimates

We previously reduced our 2020 estimates reflecting likely near-term impacts from lower industrial demand driven by fallout from the COVID crisis. Similar to the 2008-09 crisis, we adjusted our 2020 estimates to reflect a 4-5% decline in industrial sales (approx. $0.08-0.10 EPS impact per ETR sensitivities), though the key in our view is to what extent mgmt. is able to offset the impacts of lower industrial output with opex reductions. Meanwhile we stress that different from 2008-2009, ongoing industrialization projects do not appear poised to end and its critical to watch how these trend in coming months with regards to '20 industrial sales (there could very well be more of a lag effect stretching into '21 given both 12-month trialing C&I peak demand charges along with the ongoing growth of projects already in construction in petrochem, etc). We remain toward the low end of mgmt's guidance range in 2020 when we expect the most impact from Covid to hit, with a consolidated EPS trajectory within mgmt's long term 5-7% range in the latter years of the forecast period.

Source: Bank of America estimates, company report, Bloomberg

Valuation: PO $122, maintain Buy

Our PO moves to $122/sh applying our electric utility sum of the parts multiple of 17.6x to each of ETR's utilities and grossing the multiple up for capital appreciation by 5%. We reduce 2.0x valuation premiums at EAI, ELL, EMI and 1.0x premiums at ENOI and ETI to reflect downside risk associated with lost sales. On our estimates, ETR's total return prospects remain compelling at current valuations, particularly as shares have de-rated

vs the peer group of late. Reiterate Buy. *We see ETR as among the most compelling opportunities in our utility coverage given implied concerns on load and Oil & Gas exposure. We emphasize while there could indeed some further load risk, embedded Formula Rate Plans (FRPs) should enable resiliency. These FRP mechanisms are frequently under-appreciated relative to filters screening for decoupling by investors.*

Essential Utilities (WTRG)

We see WTRG's execution on their capital plans as largely intact outside of a modest $30Mn delay related to temporary work stoppage in PA (which will likely be trued up within the calendar year). We would anticipate some further tailwinds from acceleration in muni deals during a recovery period and await looming equity likely later this year to finance the pending DELCORA acquisition. Meanwhile, we further continue to await developments around the catch up component of repairs tax implementation as additional upside to the recently rolled out guidance with a filing this quarter. We reiterate our Neutral rating on shares of WTRG, seeing risk/reward as fairly balanced at the current valuation.

WTRG 1Q20 Earnings Walk

We forecast 1Q20 adjusted EPS of $0.61 compared to 1Q19 adjusted results of $0.28 and consensus of $0.58. We see consensus as not fully appreciating the adjusted numbers reflecting weather-normalized load on the gas business.

- **Key Drivers:** The primary positive drivers y/y are new rates for the legacy water business and gas contribution following the Peoples Gas acquisition offset by higher O&M and dilution.

Table 39: WTRG 1Q20 Walk

WTRG 1Q20 Earnings Walk		EPS
WTRG 1Q19 EPS	$	0.28

Contemplating the COVID IMPACT

Latest discussions with management have stressed the capital forecast (and recent EPS guidance) as largely intact outside of a $30Mn delay related to a two week work stoppage in PA when 500 contractors were out of work. We stress this as modest amid the $950Mn to be deployed with an expectation for this to be made up by the end of the calendar year, and see no material issues other than some small timing nuances.

While the company does not have decoupling mechanisms in a sizable way (despite PA companies privy to such mechanisms, the mechanism is only utilized in IL), industrial load is only ~3% of the overall mix for the water biz and less than 1% for gas (gas shoulder season should further limit any NT impact). During the recession in 08-09, the company did not see a large reduction on load, but we stress bill collection as more critical to watch given the moratorium on shutoffs this time. Initial discussions thus far haven't indicated any signs of trouble (typical run rate is about 50bp and 200bps for Aqua and Peoples, respectively. With TX already announcing a provision to track COVID-related expenses, we further await any add'l announcements in their ten state jurisdictions given what we expect to be a clear focus for regulators.

The remaining jurisdictions haven't seen an impact outside PA with regulatory or construction delays and muni conversations ongoing, albeit developments remain fluid: while WTRG doesn't have a particularly busy reg agenda, we could see a slight delay in the DELCORA acquisition (seemingly early next year vs. late this year/early next year) but would nonetheless anticipate equity for the transaction to be raised towards the back half of 2020. Latest conversations suggest ~$300Mn. While any infrastructure/federal

stimulus for water remains a wildcard, we see recovery out of COVID as likely another tailwind for industry consolidation.

Contemplating Repairs & LT Prospects

At their Analyst Day in February, mgmt. noted plans to invest $950Mn in 2020 for the year with visibility to ~$2.8Bn through '22, translating to rate base CAGRs of 6-7% for the water biz and 8-10% for gas (This excludes any acquisitions despite what we increasingly view as a bullish landscape for further muni acquisition acceleration – and reflecting DELCORA alone into rate base would already provide another few hundred bps of growth). Overall, we expect enabling legislation & emerging contaminants – in addition to COVID recovery tailwinds – to drive further consolidation prospects for water longer term.

Meanwhile, we await potential upside from any clarity around commission treatment of the Repairs Tax catch up component. Recall the election of tax repair for People's largest Pennsylvania sub, Peoples Natural Gas, which we perceive to be ~90% of the gas business. The company expects the election to directly contribute ~$0.08-$0.12 in 2020 – and we perceive this as a good run rate going forward. We expect the company to file something this quarter around a catch up component, with potential clarity around any construct later in the year (to determine flow through benefit to shareholders which remains less clear cut and excluded from the latest guidance.

EPS Estimates

The exhibit below reflects our current EPS estimates ahead of the upcoming quarter, with NT numbers coming down slightly. We continue to model to the high end of their LT CAGR guidance.

Evergy Inc (EVRG)

EVRG 1Q20 Earnings Walk

We forecast 1Q20 adjusted EPS of $0.40 vs. consensus of $0.49 (we note downside risk to Street estimates as Covid effects become more fully reflected over time) and pro-forma 1Q19 results of $0.44. Our full-year forecast for EVRG of $3.06/sh is updated from $3.15 previously as we expect some Covid-related slowdowns to materialize in reduced demand. We remain concerned on load trends for EVRG but given no '20 guidance, this limits near-term revision risk. Given ongoing strategic questions what will mgmt's ability/comfort with articulating cost cuts be to mitigate this outcome. *Management states they will attempt to cut cost however did not provide any further specifics; mgmt. also said it was also difficult to see load impacts given how much later KS was to implement Covid-related stay-at-home orders suggesting negligible impact on 1Q and even early impacts on 2Q.*

- **Key Drivers:** Weather is expected to be a drag of $0.13/sh as we normalize for the positive effects of 1Q19 (5 cents) and account for milder weather in 1Q20 that reduced the number of Heating Degree Days (HDDs) in EVRG's service area. O&M savings including merger synergies are expected to provide an uplift of 6 cents as the company continues to look for ways to cut costs in order to realize full merger synergies, offset Sibley and Jeffery rulings from 2019, and offset potential Covid-related drag on demand. We additionally see 5 cents of accretion from a lower share count in Q1 2020 following EVRG's share buyback program, but note that as this program has been suspended following the Elliott agreement this effect will abate in future quarters.

- **Unknowns:** Weather was noticeably milder in Q1 2020 than normal, with HDDs 15-16% below normal throughout much of EVRG's service territory. We note that weather impact on utility results is driven not just by the aggregate number of HDDs but also in the timing of deviations from norm (Jan HDDs worth more than March), and as such the precise weather impact is difficult to gauge. The Covid effect will likely be modest in Q1 as shut-in rules in EVRG's service territory were implemented in a staggered approach at the end of the quarter – we estimate 1 cent drag. The additional question looking ahead is to what extent, if any, EVRG is able to offset the effects of reduced demand by commercial and industrial (C&I) customers with further cost cuts in the short term.

Table 42: EVRG Q1 walk: a bit weaker too vs Street on mild weather

Earnings Walk	Notes	EPS
1Q19 EPS		0.44

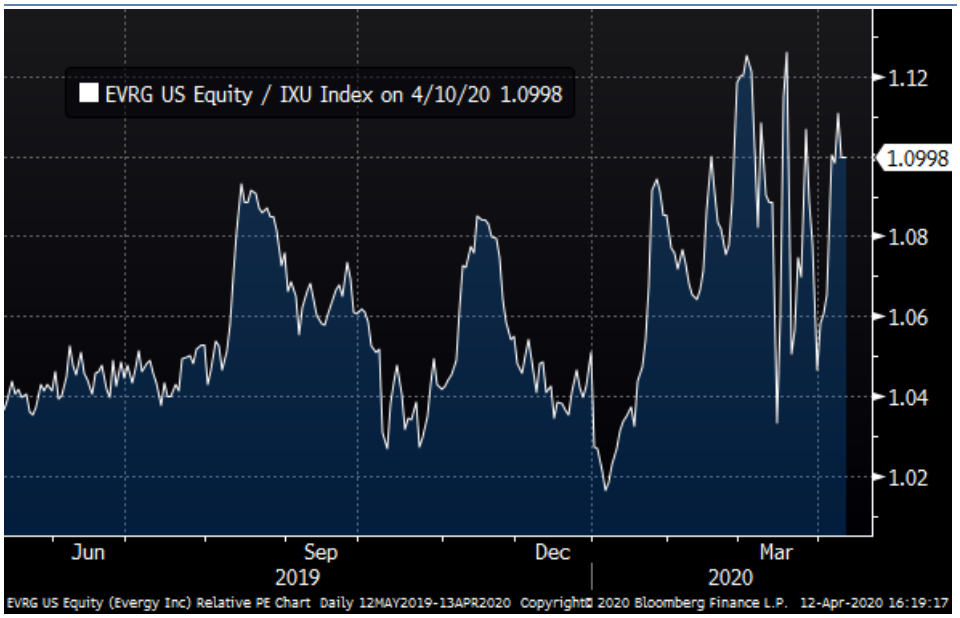
Shares reflect Covid, but strategic angle is still there

Shares of EVRG have bounced back amid substantial volatility in mid March. We note shares have outperformed the peer group since our upgrade to Buy following EVRG's Q1 results and announcement of agreement with Elliott: Evergy, Inc: Upgrade to Buy on activist engagement, cost controls, capex, & strategic angles too 03 March 2020.

Exhibit 3: EVRG relative chart



Source: Bloomberg

- **We see some short-term impact stemming from Covid.** Both the KS and MO utilities have bad debt recovery imputed in their current rates based on historical test years - recall that EVRG's rate stay outs are until 2022 and 2023 in Missouri and Kansas, respectively. The utilities do not have trackers for recovery of bad debt expense in between rate cases. Likewise the EVRG utilities do not have decoupling in either KS or MO although they have some energy efficiency mechanisms such as Missouri Energy Efficiency Investment Act (MEEIA). Off system sales are generally not a significant driver historically - the last major impact from wholesale pricing was related to the polar vortex in 2014. Estimated EPS impact from a 1% swing in demand is $0.10 ($0.05 from residential, $0.04 from commercial, $0.01 from industrial), *among the highest EPS sensitivity across our coverage universe making shares more at risk of Covid related demand destruction. That said early indications from OG&E of a very modest load impact appear to de-risk EVRG shares, and also notable is the lack of '20 EPS guidance range, forcing more of a long-term focus rather than near-term impacts of Covid in '20 (different vs peers). The real question is to what extent management can source yet further cost cuts during its stay out to offset more ongoing pressures from lower Covid-related load. We also continue to assume recovery of bad debt expenses, a consistent assumption across most jurisdictions, just could be a while before cash recovery is enabled.*
- **Cost-cutting already a big part of the strategy.** The key short-term question for EVRG (and most utilities that are not decoupled) is to what extent mgmt. can flex O&M controls to mitigate the impact of lost sales stemming from shut-in orders. EVRG has been implementing merger synergies from its last transaction and had already included an incremental ~$30m in its 2020 forecast from continuing realization of these savings – for example combining all back office systems across all utilities under one customer management system. In addition, 2019 rulings in the Jeffrey and Sibley matters put additional pressure on mgmt. to realize *further cost cuts* in order to preserve ROEs at the Kansas and Missouri utilities, respectively. To what extent mgmt. can wring out additional cuts to offset mild Q1 weather and lost

sales remains the key question – we lowered out 2020 ests. by 9 cents across the consolidated franchise to account for this additional pressure on ROEs.

Strategic review: timeline and accretion scenario

EVRG's Strategic Review & Operations Committee (SROC) created in EVRG's agreement with Elliott outlines specific dates by which proposals must be submitted, voted on, and presented publicly. Two of the four members of the SROC are the new directors selected by Elliott - industry vets Paul Keglevic and Kirk Andrews - giving the activist manager even representation with incumbent directors. Unsurprisingly, given intense focus by utility mgmt. teams and state utility regulators (not limited to EVRG) on maintaining ongoing service amid the Covid emergency, the SROC issued an updated time frame pushing back its most significant deliverables further into the year. We view the revised timeframe below as merely reflecting the practical realities of evaluating a complex transaction amid work-from-home restrictions and market volatility and remain constructive on the overall direction of the review.

- **SROC recommendation to Board due Jul 30.** The original timeline called for the committee to present to the Board its recommendation of a transaction or standalone strategy by May 30 – note that the specific recommendation will also determine the level of public disclosure, as we detailed previously.
- **Board announcement by August 17.** Previously June 17, giving the Board the same number of days to evaluate as under the previous timeframe.
- **Modified standalone plan by Oct 14 if selected.** Originally the deadline was Sep 4, so the time frame for a presentation of a potential standalone plan has been pushed back by six weeks. We continue to view this as the less likely option given specific wording of the SROC agreement and note that logistics around presenting such a plan may require rethinking in the wake of Covid.

Analyzing accretion from a potential NEE deal: running the math

Below we provide an alternative version of our previous illustrative accretion/dilution analysis on NEE's prospective acquisition of EVRG. For this scenario, we assume no debt addition at parent level, essentially keeping the FFO/Debt unchanged at NEE. The scenario yields $0.15 or 1.5% accretion ex-synergies for 2021E; we view synergies as necessary to sustain accretion through longer-term. We anticipate some degree of financial re-leveraging of NEE nonetheless with upwards of 3%+ accretion to NEE in this instance.

Table 43: Illustrative accretion - NEE acquisition of EVRG

	2020E	2021E	2022E	2023E	2024E

Estimates

Our estimates reflect near-term 9 cents consolidated earnings drag related to Covid in 2020, as we see limited oppty for mitigation of lost sales given EVRG's lack of a decoupling mechanism and ongoing efforts to cut costs across the franchise already underway given merger synergies and Sibley/Jeffrey offset requirements. Our estimates are below Street in 2020 though we perceive downside here as consensus forecasts are updated to more fully reflect Covid impacts. We expect Covid to not be a driver of downside risks past 2020 and our estimates in future years remain largely unchanged as we see EVRG as largely able to achieve authorized ROEs in this period.

Table 44: EVRG estimates

Valuation

We updated our PO to $69 reflecting an updated electric utility peer group multiple of 17.6x (17.9x previously). Our valuation is largely unaffected by the near-term drag on our estimates related to milder weather and Covid as both are expected to normalize by 2022. Shares have re-rated vs the peer group since our upgrade to Buy though we still perceive upside to the current share price amid ongoing strategic review.

We perceive many investors as cautious into 1Q updates given exposure to Covid despite backdrop around strategic actions possible.

Eversource (ES)

We point to Eversource as one of the more protected names from COVID given its mostly decoupled status and capex upside around grid mod and AMI (incl. EV infra/storage spend) in CT and MA. We expect the call to be relatively muted as many updates are coming later this year. Offshore wind awaits BOEM's (the Bureau of Ocean Energy Mgmt's) cumulative impact study before ES can comment on the timeline of its first project (the small South Fork project to commission in 2022 – before others). Further, approval for AMI / grid mod upside remain protracted with CT's filing potentially being looked at this July, still indicating that the earliest spend could be implemented is '21. Finally, we note that the Columbia Gas of Massachusetts is expected to close in 3Q, with filings expected (including the key one with Mass Department of Public Utilities) in the next month or so. We continue to expect ES maintains its 5-7% LT EPS growth CAGR, estimating that the CAGR remains towards the mid-point even when factoring in upside capex opportunities and the meaningful EPS uplift into '24 associated with offshore wind. We maintain our Underperform rating on shares given pricey nature relative to peers; seeing limited near-term upside capex catalysts ahead. As for the quarter, we expect a $1.02/sh – the same as Consensus.

1Q20 ES EPS Walk

Below we forecast a $1.02/sh quarter for 1Q20, the same as Consensus. This is compared to a $0.97/sh 1Q19 EPS.

- **Drivers**: We find about +12c YoY for the quarter thanks to rate case increases that increased at the beginning of this year (e.g. CLP, NSTAR & WMECO Phase II rates) or were effective over the last year (e.g. interim rate increase for PSNH July 2019).
- **Other**: Adding up the pieces of parent, D&A, interest, property taxes, and other, we find about a -4c hurt this quarter. We highlight that O&M is flat YoY, which indicates the company could 'bend the curve' and save more if needed depending on COVID impacts.
- **Wildcard**: We factor in -2c of weather to reflect PSNH – the only subsidiary not decoupled. Note that weather was very mild in 1Q, but PSNH represents only 6% of ratebase.

Table 46: ES 1Q20 EPS Walk

ES Energy Earnings Walk	EPS
Adjusted EPS 1Q19	$0.97
Utility	
Weather	
Return to normal	$0.00
Current quarter: Really mild, only PSNH not decoupled	($0.02)
Transmission & Distribution	
Ratebase transmission earnings	$0.03
NSTAR Electric & WMECO rates Phase II Jan 1, 2020	$0.02
Aquarion contribution	$0.00
CLP Phase II rates effective May 1, 2019	$0.02
Loss of generation	$0.00
Yankee Gas rates effective Jan 1, 2020	$0.02
Interim rate increase PSNH effective July 1, 2019	$0.03
Other	
Parent, D&A, Interest, Property taxes, Other expenses	($0.04)
O&M	$0.00
Parent	$0.00
One-time: Merger recovery in 4Q18	$0.00
One-time: Loss of NPT AFUDC Earnings	($0.01)
Dilution	($0.00)
1Q20E Adjusted EPS	$1.02
1Q20 BofA Model	$1.02
1Q20E Consensus	$1.02

Table 46: ES 1Q20 EPS Walk

ES Energy Earnings Walk	EPS
2020E BofA EPS	$3.65
2020E Consensus	$3.64
2020 Guidance	3.40-3.50
Shares Outstanding 1Q19	318
Shares Outstanding 1Q20	331

Key points for 1Q

- **COVID**: ES has full revenue decoupling for all of its utilities with the exception of PSNH, which is currently in a pending ratecase. As such, ES revenues are decoupled from load reduction impact at the rest of its utility subsidiaries aside from PSNH. Decoupling base lines rise with base rate increases as well. ES has a bad debt expense rider but only for medical and low-income customers. We see this as common amongst names that do have trackers (typically usually at the gas subs or at specific customer classes).

- **Financing activity strong in 1Q**: We expect ES to discuss its financing over the last few months, including $350mn of parent notes in Jan, $400mn of NSTAR Electric green bonds in March, and closing out the forward by the end of March.

- **Capex upside**: While ES provided a five-year capex roll-forward through 2020 on the last call, the company still has upside spend related to grid mod in CT and NH, AMI in MA and CT ($1bn), and natural gas distribution spend in MA (perhaps related to the NiSource subsidiary acquisition). We still await a more firm timeline associated with these opportunities as they aren't factored into guidance yet. We focus moreso on AMI in CT given activity is starting to pick up on the opportunity that could result in a proceeding starting this July.

- **Offshore wind**: The South Fork project is the first and smallest at (just 90MW + a 40MW upgrade) of ES's offshore wind projects expected to come online with a commissioning date of 2022. We point out that ES is still awaiting a cumulative impact study coming from BOEM, which could impact its online date. We point out that given ES plans to monetize the investment tax credit (ITC), we see less pressure for the project to *have* to commission within a four-year build window to qualify for the credit (it could instead prove continuous efforts towards completion). The more concerning issue would be re-negotiating the power purchase agreement (PPA) with Long Island. We stay tuned here, but we expect ES to wait to provide clarity around South Fork once BOEM's cumulative impact study timeline is certain.

- **NSTAR Gas rate case**: On Nov 8, ES subsidiary, NSTAR Gas filed its expected gas rate request with the MA DPU for a $38mn rate increase at a 10.45% ROE and 54.85% equity ratio. The filing includes a proposed performance based rate (PBR) mechanism including inflation and a 1.3% adder and would support a meaningful 5-year rate stayout. The filing includes a long-term plan to fund safety and reliability improvements following the Merrimack Valley incident with NI subsidiary Columbia Gas, which we expect to support express incremental distribution capex likely to be reflected in the 4Q capex update. Proposed rates would be effective Oct 1st 2020.

- **PSNH**: We also look for updates on the Public Service of New Hampshire (PSNH) rate case (Docket DE 19-057). Recall, the NH PUC Staff recommended a $24.4mn rate increase at a 8.5% ROE, 50% equity ratio, ~$1.15Bn year-end ratebase, denial of proposed multi-year rate plan, and proposal for a Grid Transformation and Enablement Program (GTEP). ES originally requested a $69.3mn increase in permanent rates at a 10.4% ROE, 54.85% equity layer, and ~$1.215Bn ratebase. The NH PUC has already approved a $28mn interim rate increase for PSNH, slightly

lower than the $33mn requested by ES, effective Aug 1st (benefiting 2H19 earnings). A final PUC decision is expected May 20, 2020 barring a settlement.

Estimates

We largely leave estimates untouched owing to Eversource's resilient decoupling mechanisms in all subsidiaries outside PSNH.

Table 47: ES EPS Estimates

EPS by Business	2016A	2017A	2018E	2019E	2020E	2021E	2022E	2023E	2024E

Valuation

We MtM the peer multiple to 17.6x and increase premiums to 2x for CL&P, WMECO & NSTAR to reflect decoupling mechanisms (vs 1x for PSNH),1x for gas names, and 3x for Aquarion. Even so, this results in only an $83/sh PO and we reiterate our Underperform rating.
