UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice. UBS Evidence Lab may provide services to other internal and external clients.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is

carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliarios Ltda, UBS Asesores Mexico, S.A. de C.V., UBS Securities Japan Co., Ltd, UBS Wealth Management Israel Ltd and UBS Menkul Degerler AS are affiliates of UBS AG. UBS Financial Services Incorporated of Puerto Rico is a subsidiary of UBS Financial Services Inc. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain and does not undertake banking or investment business activities in Bahrain. Therefore, clients have no protection under local banking and investment services laws and regulations. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This research report is neither intended to be distributed to PRC investors nor to provide securities investment consultancy services within the territory of PRC. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/

companies. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch, with place of business at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE, Luxembourg Branch is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Luxembourg supervisory authority (Commission de Surveillance du Secteur Financier), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Securities Market Law due to the relation with a Foreign Bank. UBS Asesores is a regulated entity and it is subject to the supervision of the Mexican Banking and Securities Commission ("CNBV"), which exclusively regulates UBS Asesores regarding the rendering of portfolio management, as well as on securities investment advisory services, analysis and issuance of individual investment recommendations, so that the CNBV has no surveillance faculties nor may have over any other service provided by UBS Asesores. UBS Asesores is registered before CNBV under Registry number 30060. You are being provided with this UBS publication or material because you have indicated to UBS Asesores that you are a Sophisticated Qualified Investor located in Mexico. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: UBS Switzerland AG and its affiliates (UBS) are not licensed, supervised or regulated in Nigeria by the Central Bank of Nigeria or the Nigerian Securities and Exchange Commission (SEC) and do not undertake banking or investment business activities in Nigeria. The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Nigerian SEC. If you are interested in products of this nature, please let us know and we will direct you to someone who can advise you. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). **Poland**: UBS is a premier global financial services firm offering wealth management services to individual, corporate and institutional investors. UBS is established in Switzerland and operates under Swiss law and in over 50 countries and from all major financial centres. UBS Switzerland AG is not licensed as a bank or as an investment firm under Polish legislation and is not permitted to provide banking and financial services in Poland. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Russia**: This document or information contained therein is for information purposes only and constitute neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. **Singapore**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. **Spain**: This publication is is not intended to constitute a public offer under Spanish law. It is distributed only for information purposes to clients of UBS Europe SE, Sucursal en España, with place of business at Calle María de Molina 4, C.P. 28006, Madrid. UBS Europe SE, Sucursal en España is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Spanish supervisory authority (Banco de España), to which this publication has not been submitted for approval. Additionally it is authorized to provide investment services on securities and financial instruments, regarding which it is supervised by the Comisión Nacional del Mercado de Valores as well. UBS Europe SE, Sucursal en España is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Turkey**: No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 there is no restriction on the purchase or sale of the instruments by residents of the Republic of Turkey. **United Arab Emirates** : UBS is not licensed in the UAE by the Central Bank of UAE or by the Securities & Commodities Authority. The UBS AG Dubai Branch is licensed in the DIFC by the Dubai Financial Services Authority as an authorised firm. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made and will not make any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer or invitation to offer, or solicitation of securities in the territory of Ukraine. Electronic communication must not be considered as an offer to enter into an electronic agreement or electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015. This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed.

Essential Utilities Inc

Q4/2019 Adj. EPS & 2020 Guidance

Q: How did the results compare vs expectations?

A: Q4/full year EPS adjusted for transaction costs and equity dilution $0.34/$1.47 vs. consensus/UBSe $0.31/$1.48 - $0.37/$1.48; prior year $$0.31/$1.41.

Q: What were the most noteworthy areas in the results?

A: Yr/yr results improved due to higher rate & surcharge revenues, commentary suggests that O&M (absent transactions costs) increased in line with expectations.

Q: Has the company's outlook/guidance changed?

A: Illustrative guidance for 2020 of $1.53-$1.58 vs consensus $1.58; EPS growth CAGR off '19 adjusted base through '22 of 5-7%; rate base growth for water, 6-7% and gas, 8-10% through '22; and infrastructure investment through '22 of $2.8 bill.

Q: How would we expect investors to react?

A: Subject to incremental detail at the investor day, we expect a muted reaction to earnings and growth guidance that is modestly lower than current consensus.

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 3.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Forecast returns

Forecast price appreciation	-10.6%
Forecast dividend yield	2.0%
Forecast stock return	-8.6%
Market return assumption	6.2%
Forecast excess return	-14.8%

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.
Our price target is premised upon a 3% discount to the 2021 average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 6% premium to reflect operations in six Fair Market Value states, and 9% discount to reflect impact of lower P/E associated with gas earnings.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 27 February 2020 10:04 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	44%	32%
Neutral	FSR is between -6% and 6% of the MRA.	41%	29%
Sell	FSR is > 6% below the MRA.	15%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 December 2019.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a System, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS") with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch, with place of business at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE, Luxembourg Branch is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Luxembourg supervisory authority (Commission de Surveillance du Secteur Financier), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Securities Market Law due to the relation with a Foreign Bank. UBS Asesores is a regulated entity and it is subject to the supervision of the Mexican Banking and Securities Commission ("CNBV"), which exclusively regulates UBS Asesores regarding the rendering of portfolio management, as well as on securities investment advisory services, analysis and issuance of individual investment recommendations, so that the CNBV has no surveillance faculties nor may have over any other service provided by UBS Asesores. UBS Asesores is registered before CNBV under Registry number 30060. You are being provided with this UBS publication or material because you have indicated to UBS Asesores that you are a Sophisticated Qualified Investor located in Mexico. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: UBS Switzerland AG and its affiliates (UBS) are not licensed, supervised or regulated in Nigeria by the Central Bank of Nigeria or the Nigerian Securities and Exchange Commission (SEC) and do not undertake banking or investment business activities in Nigeria. The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Nigerian SEC. If you are interested in products of this nature, please let us know and we will direct you to someone who can advise you. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the Portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Russia**: This document or information contained therein is for information purposes only and constitute neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. **Singapore**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. **Spain**: This publication is is not intended to constitute a public offer under Spanish law. It is distributed only for information purposes to clients of UBS Europe SE, Sucursal en España, with place of business at Calle María de Molina 4, C.P. 28006, Madrid. UBS Europe SE, Sucursal en España is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Spanish supervisory authority (Banco de España), to which this publication has not been submitted for approval. Additionally it is authorized to provide investment services on securities and financial instruments, regarding which it is supervised by the Comisión Nacional del Mercado de Valores as well. UBS Europe SE, Sucursal en España is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Turkey**: No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 there is no restriction on the purchase or sale of the instruments by residents of the Republic of Turkey. **UAE**: UBS is not licensed in the UAE by the Central Bank of UAE or by the Securities & Commodities Authority. The UBS AG Dubai Branch is licensed in the DIFC by the Dubai Financial Services Authority as an authorised firm. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made and will not make any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products

shall be interpreted as containing an offer or invitation to offer, or solicitation of securities in the territory of Ukraine. Electronic communication must not be considered as an offer to enter into an electronic agreement or electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015.

This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed.

Essential Utilities Inc

Q2'20 EPS $0.29 vs. UBSe $0.26, Consensus $0.22

Q: How did the results compare vs expectations?

A: Better. WTRG reported Q2'20 EPS of $0.29 vs. the prior year quarter of $0.25. UBS and consensus expectations for the quarter were $0.26 and $0.22, respectively.

Q: What were the most noteworthy areas in the results?

A: Vs. the prior year qtr, revenues increased due to the addition of Peoples Gas, higher rates, weather derived volumes and customer growth. Residential water sales were +10% quarter over quarter, while commercial & industrial sales were -16% and -11% respectively. O&M expenses in the quarter rose as a result of the Peoples Gas combination, but were helped by the absence of transaction & integration costs.

Q: Has the company's outlook/guidance changed?

A: Full year '20 guidance of $1.53-$1.58 unchanged, as is the EPS CAGR of 5-7%, rate base growth of 6-7% in water and 8-10% in gas, and projected infrastructure spending of $2.8 billion. Guidance for EPS dispersion across the year is unchanged.

Q: How would we expect investors to react?

A: Better EPS & affirmation of guidance should be well received by investors.

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 3.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Forecast returns

Forecast price appreciation	+0.7%
Forecast dividend yield	2.3%
Forecast stock return	+3.0%
Market return assumption	5.1%
Forecast excess return	-2.1%

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.
Our price target is premised upon a 3% discount to the 2021 average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 6% premium to reflect operations in six Fair Market Value states, and 9% discount to reflect impact of lower P/E associated with gas earnings.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 06 August 2020 10:23 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	49%	32%
Neutral	FSR is between -6% and 6% of the MRA.	39%	30%
Sell	FSR is > 6% below the MRA.	13%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the [European Central Bank (ECB)] and regulated by the BaFin and the ECB. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Securities France S.A. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS") with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Please see important disclosures beginning on page 10

Earnings – ET, LNG, TRGP

- **ET:** *Uh…well…Positive…I guess.* Would call this the beat to beat all beats in the history of Midstream. Almost all in the Intrastate segment as ET noted a $1.5B benefit from higher storage margins and a $1.1B benefit from higher gas sales and retained fuel revenues. Some offsets, but a net ~$2.4B positive impact for the year. EBITDA guidance increased by the amount of the storm benefit plus another $100mm to a new midpoint of $13.1B (not including impact of ENBL merger). ***And we think that could move higher given they have not booked all the storm gains due to some disputes with counterparties.*** We estimate the one-time windfall worth 80c/unit to ET, after factoring in units issued for ENBL transaction.
- **ET (cont'd):** ET reduced debt by $3.7B during Q1. We estimate that the storm windfall lowered by just over 0.2x, and that the full $3.7B debt pay down reduced leverage by 0.34x. We're guessing it is enough to take them off negative credit outlooks. Growth capex +$150mm, to $1.6B on combo of new Permian Bridge project (rich gas line), several smaller project additions and some acceleration of '22 spend into '21. ***Finally, just a darn good conference call, emphasizing the things they did during Uri to keep gas flowing (as opposed to the windfall), talking head-on about improving ESG metrics, and exuding lots of confidence about the outlook for their base business.***
- **LNG:** *Positive.* Monster 40% EBITDA beat vs. consensus, another guidance raise, and new accelerated schedule for SPL Train 6 (now H1'22 vs. prior H2'22). Unlike monster EBITDA beat in Q2'20, this was not driven by an acceleration of revenue recognition from cancelled cargoes, but rather a reflection of the volatile LNG and gas markets in Q1. For second quarter in a row, raised EBITDA guidance by $200mm to new range of $4.3-$4.6B. ***Biggest elements of most recent guidance revision include a roughly $1/mmbtu improvement on the 50 TBtus of open capacity as of last ccall (~$50mm) and 30+ TBtus of new production added to the 2021 forecast at a ~$3/mmbtu margin (~$100mm).***
- **TRGP:** *Positive.* Also a monster EBITDA beat and full year EBITDA guidance raise. Raise in line with Q1 beat plus impact of higher assumed commodity prices in guidance. Adj EBITDA $516mm, a 20%+ beat vs. USCA/street at $401mm/$418mm. Raised full year EBITDA guidance by $125mm, or 7%, to midpoint of $1.85B. ***Bulk of raise appears to be related to Q1 outperformance (~$100m in aggregate composed of a $30mm net Uri benefit combined with unquantified cost savings and non-storm related NGL marketing),*** as we estimate the higher commodity price assumptions are worth ~$25mm of the raise. Leverage now expected to be 4x at year-end vs. prior 4.25x.

U.S. Capital Advisors

Earnings – DCP, MPLX, EPD, AWK, WMB

- **DCP:** *Positive.* DCP finally firmed up Uri impacts as a ~$60mm hit to Q1, bringing EBITDA down to $275mm, a 10% beat vs. USCA/Street. ***Implies ex-weather impact, EBITDA would have been ~$335mm, which would have been a record quarter and beaten pre-Uri street estimates of ~$300mm.*** Real driver of beat was G&A costs of $38mm, down ~$25mm from 2020 quarterly average. FCFaD of $89mm beat vs. USCA's $45mm on higher EBITDA and $19mm lower capex. No change to full year guidance.
- **MPLX:** *Positive.* Adjusted EBITDA +6%/5% vs. USCA/Street, driven by better-than-expected G&P results (higher NGL prices & lower opex). ***Repurchased $155mm of common units in Q1 (introduced $1B buyback program in Q3'20).*** Liquidity includes $24mm in cash and $2.7B available through their revolving credit facility.
- **EPD:** *Neutral.* Big beat, but largely offset in our view by bits and pieces in release about y/y declines in Eagle Ford and Permian. About $250mm storm benefit. No change to capex guidance, and LT capital run rate of $1.5-$2.0B/yr. Think spread/marketing margin >$500-$600mm for the year. ***Opened kimono a little more on energy transition.*** Doing deep dive review on carbon technologies, review of evolutionary technologies, including hydrogen, and looking at sequestering their own carbon and plastics recycling. ***Waiting for clarification on Biden tax policy before pulling trigger on buybacks.***
- ***AWK:*** *Neutral.* In line quarter and no change to recently issued guidance. ***Remain confident that sale of NY assets will close.*** Delay does not impact timing for equity issuance. Filed rate case in WV (5% of revenues) in April, requesting a $32mm revenue increase with a 10.5% ROE. 10-Q noted a subsidiary, American Water Resources, received a subpoena from the U.S. Attorney's Office for the Eastern District of NY seeking information about their operations and contractor network in the New York City area. Company does not believe the investigation will have a material adverse effect on them.
- **WMB:** *Neutral.* Beat EBITDA by $100mm or 7%, but all on winter storm benefits. Raised '21 guidance by $100mm, but one-time storm/other impacts were ~$126mm, so same amount as beat. Leverage 4.2x and expected to end year at that level, down from prior 4.25x. ***WMB is now below their 4.25x Debt/EBITDA target. Market looking for guide posts on capital allocation, but WMB still reviewing internally.*** FCF after dividends and capex $104mm vs. $(47)mm in Q1'20. ***Announced purchase of Sequent Energy, a gas marketing firm,*** from SO for $110mm, including $60mm of working capital. We find that a bit of a head scratcher – see below for more. Should hear something over the next 30-60 days on E&P partner to develop recently acquired Haynesville and Wamsutter properties.

Earnings – NS, ENB, TRP, ENLC, ALTM

- **NS:** *Neutral.* Quarterly EBITDA 3% light vs. consensus on the winter storm, but full year guidance unchanged. ***Raised expectations for Permian 2021 volume exit rate from ~475 mbpd to 500 mbpd*** and expect refined product system at ~100% of pre-pandemic levels for remainder of 2021. Reiterated expectation for 2021 EBITDA to be comparable to 2020 ($723mm) when adjusted for the sale of Texas City assets (USCAe ~$10mm of EBITDA). Will publish first sustainability report later this year.
- **ENB:** *Neutral.* EBITDA largely in line and no change to guidance. Continue to progress on small wind and solar projects, but nothing that moves the needle in a meaningful way. ***Ballpark, would say ~75% of questions on ccall focused on energy transition.*** Segments pretty much inline except: 1) Green Power, with a $34mm or 28% beat vs. USCA, but all on a one-time promote fee; and 2) Energy Services, with a $75mm loss vs. USCA at breakeven, on the lack of basis and quality diffs. ***ENB now expects Energy Services to record a loss in 2021.*** Expect mainline throughput to average 2.8 mmbb/d in 2021 (USCA at 2.8), but expect Q2 to average 2.6 mmbpd due to higher refinery and upgrader maintenance.
- **TRP:** *Neutral.* Adjusted EBITDA in line with consensus. Large KXL impairment taken in Q1, but expected. ***No update on expected costs or timing delays associated with Coastal GasLink project.*** US Gas Pipes was a C$63mm beat vs. USCA (6%) on Columbia Gas implementing new rates effective Feb 1 as a result of the rate case filed in 2020 (new rates remain subject to refund pending outcome of rate case). Power and Storage was a C$47mm beat (35%), though drivers unclear.
- **ENLC:** *Neutral.* EBITDA beat both USCA and street, but otherwise messy quarter with sizeable beats and misses at the segment level from disparate Uri impacts. Announced $60mm acquisition of Amarillo Rattler (~$11mm book value) for expected 6x 2022 EBITDA multiple. Net, net OK had largest negative impact from Uri which, combined with roll-off of $17mm MVC in Q1, led to segment profit declining 46% vs. Q1'20. ***Also laid out various GHG reduction targets – notably, targeting net zero emissions by 2050.*** Interim targets include 30% reduction in methane emissions by 2024 and 30% reduction in CO2e emissions by 2030 (both relative to 2020 baseline).
- **ALTM:** *Neutral.* Quarterly EBITDA essentially in line, with lower EBITDA from JVs offset by a $7.2mm power credit (assuming as a result of Uri) and higher G&P volumes and margins (~$3mm). Modest 2% increase in EBITDA guidance midpoint. ***Raised midpoint of EBITDA guidance $5mm from $250mm to $255mm on higher G&P volumes and Q1 performance.*** Raised G&P volume expectations to 370-410 mmcf/d from 360-400. New volume guidance incorporate two completed DUCs in Q1 and five DUCs expected to be completed in Q2.

Earnings – SMLP, WTRG, ETRN, PAA

- **SMLP:** *Neutral.* Quarterly EBITDA and DCF beats offset by unchanged guidance and lower volumes across the board. Gas volumes -7% vs. Q4'20 and flat y/y. Bakken crude volumes -8% from Q4 and -34% from Q1'20. Reduced revolver debt by $55mm in Q1, and are ***working on a holistic solution to refinance 2022 senior notes (~$234mm) and revolver ($802mm drawn at March 31).*** Double E Pipeline: $4.6mm investment in pipeline during the first quarter and expect credit facility to fund the majority of remaining capital commitment. Expect completion to be at or below $425mm, gross and in-service by 4Q'21.
- **WTRG:** *Neutral.* EBITDA, at $312mm a 2% beat vs. USCA's $305mm. Net Income $184mm, a 7% beat vs. USCA's $171mm, with incremental beat on higher Other Income and lower effective tax rate. 2021 guidance unchanged. Expect to file rate case in PA in 2H'21. ***Continue to be adamant they will close DELCORA acquisition.***
- **ETRN:** *Slight negative.* Earnings beat, but largely on non-cash derivative gain and slight, 1% earnings guide up, but once again delayed MVP in service and raised cost estimate. ***Pushed MVP in-service date to summer 2022 and raised cost estimate to $6.2B (was $5.8-$6.0B)*** due to requested extensions of review time for permits from VA and WV. ETRN's portion is $3.1B, of which $2.3B has been spent to date. Positive news was that GPOR has agreed to honor their gathering contracts with ETRN.
- **PAA:** *Slight negative.* Earnings beat, but no change to full year EBITDA guidance and ***very weak Q2 and Q3 guidance relative to street likely to make investors nervous. Partially offset by further capex cuts (-$65mm) and thus higher expected free cash flow (+$100mm).*** No buybacks during Q1. Guidance for Q2'21 of ~$452mm vs. street $520mm/USCA $478mm. Guidance for Q3'21 of $516mm, vs. street $544mm/USCA $528mm. Have said up to 25% of FCF after dividends could be used for buybacks, but emphasized that could be lower as you have to take into account EBITDA lost from the asset sales.

Earnings Themes

- **Very Positive Sentiment:** What a difference a year makes – really two ends of the spectrum vs. May 2020. Management sounds so upbeat about prospects for their business and their balance sheets – you can hear it in their voices and that's despite the over-arching energy transition theme. It sets up well for 2022.
- **Winter Storm Uri Largely a Big Windfall:** Some massive, needle-moving beats, with only some slight negatives. Some longer-term implications as generators/utilities forced to contract for more firm storage/transportation.
- **So '21 Guidance Higher…:** Haven't tabulated the numbers yet, but definitely will see a nice tick up in '21 consensus driven not just by Uri, but more confidence in commodity prices and volumes.
- **…And Much More FCF:** This week was a blur, but gut feel is that almost every company we cover (ex Canadians) generated FCF after dividends and capex. Have been waiting on this for a long time and have to say it is so nice to see.
- **Plus Debt Reductions:** Also think we are going to see, in aggregate, a very nice step down in debt for the group, with companies achieving or having near-term visibility to long sought-after coveted debt targets.
- **Buybacks Taking a Backseat for Now:** Which means buybacks are on the back burner for now, with the exception of MPLX. We still think 2022 is the year of the buyback, assuming we don't see yet another black swan event.
- **Capex Guidance Largely in Check:** Market has been worried about capex creep, but we just didn't see it (so far). A little higher at ET, but with a >$2B storm benefit, you deserve to go out and buy a new pair of shoes.
- **Meaningful Cost Reductions:** Companies have been tackling costs for the last two years, but they are still coming down nicely. Unsure how much of this quarter's O&M declines were due to storm-induced lower volumes and how much was true cost reductions. And we are in the camp that inflation is about to take off. Love the cost cutting, but watching the outlook closely.
- **Energy Transition:** Dominated some of the calls (ENB) and missing from others (PAA), but each quarter you can see companies making a little more progress on getting their hands around potential opportunities. Way too early for meaningful investment, although we would not be surprised to see some smaller acquisitions over the next 12 months.

WMB Sequent Purchase

- **News:** WMB announced they are buying Sequent Energy from SO for $110mm, including $60mm of working capital. Closing is expected in Q3. Normally we wouldn't write about a $110mm acquisition for a $30B market cap company, but this is interesting.
- **Who is Sequent?:** Gas marketing company formed in 2001 within AGL Resources (former Georgia utility). Sequent, based in Houston, is the 6th largest gas marketer in North America (based on Q4'20 volumes). As part of their business they have contracts for ~1.1 Bcf/d of firm transportation capacity on interstate gas pipelines or up to 5.8 Bcf/d when you include where they are listed as an agent of the shipper. And they have ~15 Bcf of contracted gas storage, or up to 38 Bcf when you include where they are listed as an agent.

Top NA Gas Marketers (Q4'20)

Company	Bcf/d
BP	16.8
Macquarie Energy	11.8
Shell	10.6
Tenaska	10.0

U.S. Capital Advisors

WMB Sequent Purchase, cont'd

- **WMB Ccall Comments:** WMB currently markets ~1 Bcf/d, so this will propel them to a top five-ish position. They expect Sequent to generate ~$20-$30mm of EBITDA/yr.
- **SO Call Comments:** On their earnings call last week, SO announced they were selling Sequent and provided some metrics. "We probably tie up something on average like $200mm worth of working capital so we have to provision for that within our credit facilities and then because of the gross revenue or gross sales associated with that business in forward positions probably something like another $800mm worth of parental support." "If you look at Sequent even prior to when Southern made the acquisition say from 2010 forward, they've averaged ~$40mm in net income. They had two years – one was $260mm and one was $163mmn where they really blew out earnings. Other than that the earnings were near zero." In Q1'21, Sequent generated ~$200mm of net income.
- **Our Thoughts:** ***Sounds like WMB is buying Sequent not because they see some step change in gas volatility or marketed volumes, but because they want maximize commercial opportunities by having a better understanding of daily gas market dynamics.*** Because Sequent has always been owned by a utility, in our view, it has been more de-risked than traditional gas marketing businesses. That said, marketing businesses have scorched more than just a handful of companies, and we are a bit jaded by covering WMB in early 2000s, when multiple downgrades in their debt created a marketing-driven liquidity crisis that almost sent them into bankruptcy. Yes, WMB is a very, very different company today, but that memory is still fresh, so we are in a show-me mode on this acquisition.

IMPORTANT DISCLOSURES

ANALYST CERTIFICATION We, Becca Followill and James Carreker, do hereby certify that the recommendations and opinions expressed in this presentation accurately reflect our personal views about any and all of the subject securities or issues discussed herein. Furthermore, no part of our compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed herein. We do not own any shares directly or indirectly (or any derivative thereof) of the company that is subject to this research report. Neither we nor any member of our households serves as an officer, director or advisory board member of any company that is subject to this presentation.

Employees of U.S. Capital Advisors LLC ("USCA" or "the Firm") not involved in the preparation of this report may have investments in securities or derivatives of securities of companies mentioned in this report, and may buy, sell, or trade them in ways different from, or in a manner inconsistent with, the recommendations and opinions expressed in this report.

IMPORTANT DISCLOSURES Analysts' compensation is not based on investment banking revenue and the analysts are not compensated by the subject companies. USCA provided and received compensation for providing investment banking services for the following subject companies within the past 12 months: Enterprise Products Partners (EPD) and Enviva Partners (EVA). Within the next three months USCA may attempt to seek compensation for investment banking services from the companies mentioned within this report.

IMPORTANT DISCLOSURES

Price Target Methodology:

Utilities
We value utilities on a P/E basis.

C-Corps
For C-Corps, our price targets are based on a sum-of-the parts analysis. In our sum of the parts analysis, we value various business segments on a multiple of forward year(s) EBITDA, with multiples ranging from ~3x to ~12x. The spectrum reflects a wide range of contract lives, commodity sensitivity, volume risk, customer risk, cash flow visibility, growth outlook, etc. LP units are valued at our LP price target. GP values are determined by allocating a proportionate share of the consolidated equity value commensurate with the percent of total distributions the GP receives. We then net out C-Corp level debt and add back in forward year GP distributions received.

MLPs
For MLPs, our price targets are also based on a sum-of-the parts analysis. We value various business segments on a multiple of forward year(s) EBITDA, with multiples ranging from ~4x to ~13x. The spectrum range reflects a wide range of contract lives, commodity sensitivity, volume risk, customer risk, cash flow visibility, growth outlook, etc. We then net out forward year debt and minority interest to arrive at a consolidated equity value. From there we allocate equity value to the MLP based on the proportionate share of distributions the LP receives and add back in forward year distributions to be received.

MLP yield refers to the cash distributions paid out by the MLP, part of which may be treated as a return of capital rather that interest or capital gains.

U.S. Capital Advisors

IMPORTANT DISCLOSURES

Opinion Key:
USCA uses a Buy, Overweight, Hold, Underweight and Sell rating system.

BUY - The stock has among the best combination of risk/reward and positive company specific catalysts within the sector. Stock is expected to trade higher on an absolute basis and be a top performer relative to peer stocks over the next 12 months.

OVERWEIGHT - The stock has above average risk/reward and is expected to outperform peer stocks over the next 12 months.

HOLD - The stock has average risk/reward and is expected to perform in line with peer stocks over the next 12 months.

UNDERWEIGHT - The stock has below average risk/reward and is expected to underperform peer stocks over the next 12 months.

SELL - The stock's risk/reward is skewed to the downside with possible negative company specific catalysts or excessive valuation. The stock is expected to trade lower on an absolute basis and be among the worst performers relative to peer stocks over the next 12 months.

Risks that may impede achievement of price target(s):
Industry wide risks include but are not limited to environmental and regulatory for both pipeline and E&P, aging infrastructure and availability of midstream infrastructure to accommodate new production. Competition for and availability of service crews and drilling rigs. Commodity prices, the economic outlook, access to capital markets. Interest rates. Asset recontracting. Cost overruns.

Utilities

Utility & Infrastructure Daily

Neil Kalton, CFA, Senior Analyst (314) 875-2051
Sarah Akers, CFA, Senior Analyst (314) 875-2040
Jonathan Reeder, Senior Analyst (314) 875-2052

Quick thoughts from Wells Fargo Securities, LLC Utility & Infrastructure Team:

Utilities

Aqua America (WTR/Market Perform)(Reeder) – Yesterday afternoon (9/17), WTR announced that an asset purchase agreement was signed with the Delaware Country Regional Water Quality Control Authority (DELCORA) to purchase the municipal authority's wastewater assets for $276.5M. The agreement marks the culmination of a roughly two month exclusivity period between the two parties to explore a combination, which WTR discussed on the Q2 call in early August. The transaction is subject to Pennsylvania Public Utilities Commission (PaPUC) approval and would more than double WTR's existing 128,000 wastewater connections by adding the equivalent of 165,000 retail customers across 42 Southeast PA municipalities. While the purchase price is a bit north of DELCORA's $220-240M net PP&E value, WTR does not expect the transaction to create any goodwill which seems to suggest that the PaPUC will be asked to approve the deal under the state's fair market value (FMV) law. We expect PaPUC approval could take roughly 12 months and then once the deal closes, another 2-3 years before WTR is able to earn a return on the equity portion of the $276.5M rate base commensurate with the remainder of the water/wastewater business. In addition, we believe DELCORA could add as much as $150M of capex to our prior 2019-23 water capex (ex. M&A) forecast of $2.3B. In terms of equity needs, we think WTR could need to raise an additional $150-175M in 2020 & beyond (likely through establishment of an at-the-market program per management's Q2 call comments) with the bulk needed when the deal closes in 2H'20. Net-net, we believe minimal accretion is likely in 2020 with the DELCORA deal eventually adding roughly $0.05, or 2-3%, to EPS power by 2023. As a reminder, our current WTR 2019-23E EPS (pro forma for the pending Peoples deal but excluding any potential uplift from the planned election of repairs tax deduction at Peoples) are $1.32, $1.57, $1.68, $1.78 & $1.90.

Bigger picture, we are extremely encouraged by WTR's ability to find and get the deal signed with DELCORA for three reasons. First, it shows that management has not taken their eye off growing the regulated water/wastewater business despite the pending move into the gas LDC (local distribution company) business nor has the move into gas soured counterparties willingness to transact with WTR. Second, it further demonstrates that municipals are willing to come to the M&A negotiating table as a way to solve impending challenges. For DELCORA it was an estimated $1.2B of capital investment needed through 2041 which included a substantial amount to comply with Environmental Protection Agency (EPA) mandates to resolve combined sewer overflow problems – rather than put the burden on customer bills, DELCORA plans to place the sales proceeds into a trust to create a "rate stabilization plan" that should help offset those capital needs and save the average retail customer $1,400. Third, the addition of a substantial wastewater presence in Southeast PA could open the door to additional wastewater growth opportunities in the region, much the way WTR expanded its water footprint to the greater Philadelphia suburbs in the 1990s and perhaps to those same communities where the company already serves water.

Please see page 3 for rating definitions, important disclosures and required analyst certifications.
All estimates/forecasts are as of 09/18/19 unless otherwise stated. 09/18/19 05:35:12 ET

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Aqua America, Inc. (WTR)/Market Perform (2)
Price as of 9/17/2019: $43.90
FY 19 EPS: $1.32
FY 20 EPS: $1.57
Shares Out.: 215.7 MM
Market Cap.: $9,469.23 MM

Rating Basis Information:
WTR Thesis: We are attracted to WTR's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations and a strong balance financial profile. Our Market Perform rating reflects valuation considerations in light of WTR's pending agreement to acquire Peoples (a gas utility) and the associated P/E multiple, regulatory and deal execution/integration related risks.

Scott Tipton, Associate Analyst (314) 875-2048

Quick thoughts from Wells Fargo Securities, LLC Utility & Infrastructure Team:

Utilities

Essential Utilities (WTRG/Overweight) (Reeder) - We admittedly missed the ruling by Judge Dozor in the Court of Common Pleas of Delaware County last Monday (12/28). In what we consider to be a very positive development, the judge ruled in favor of DELCORA and WTRG on both matters disputed by Delaware County - the validity of the asset purchase agreement as well as the ability to put the proceeds of the $277M sale into a trust to be used to stabilize ratepayers' bills in the years ahead (keep increases to 3% annually so long as the fund is solvent while ensuring WTRG earns its authorized ROE). While Delaware County has indicated an intention to continue to argue its case as part of the pending PaPUC regulatory approval process (has yet to decide whether to appeal Judge Dozor's ruling), we believe the 12/28 ruling clears the way for WTRG to close the DELCORA deal by Q2'21.

We find it unlikely that the PaPUC will be overly sympathetic to Delaware County's contention that the $277M agreed to sales price that was blessed by the prior County Council undervalues the fair market value (FMV) of the system. It is our understanding that DELCORA struck that price during exclusive negotiations with WTRG in '19 perhaps knowing that it might be less than a closer to $400M price tag defensible by PA's FMV legislation. Rather the lower sales price would serve as a balancing act to help keep the subsequent rate increases to DELCORA customers manageable as WTRG recovers the FMV of the initial investment as well as the roughly $700M of capital investments required by 2028 to keep the system viable. Further, we believe the PaPUC's FMV approval process if anything is geared to protect against the opposite – a utility overpaying FMV and then trying to socialize those higher costs across its entire customer base.

We look towards WTRG's 1/11 investor event for additional insights into getting the deal across the finish line as well as the expected longer-term benefits. As we have previously opined, we believe the DELCORA deal represents material long-term value (that is not currently reflected in the share price!) given meaningful capex needs that fall beyond the current 5-year forecast as well as the likely substantial wastewater tuck-in deals that could transpire in the area. In other words, we believe the DELCORA deal should, at a minimum, allow WTRG to continue to target a 5-7% EPS CAGR through the end of the decade.

Infrastructure

Brookfield Infrastructure (BIP/BIPC)(Overweight) & Brookfield Renewable (BEP/BEPC)(Equal Weight) (Reeder) – Brookfield Asset Management (BAM/Not Covered) along with institutional partners made a public offer before the open on 1/4 to acquire the remaining units of one of its publicly traded

Please see page 4 for rating definitions, important disclosures and required analyst certifications.
All estimates/forecasts are as of 01/05/21 unless otherwise stated. 01/05/21 08:12:41 ET

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

vehicles, Brookfield Property Partners L.P. (BPY/Not Covered), that it does not already own for $16.50/unit or a roughly 15% premium to the 12/31 close. We touched base with a Brookfield Infrastructure contact to confirm our suspicions – this situation is very much unique to BPY and should not be viewed as a potential read-through to either BEP/BEPC or BIP/BIPC. BAM has expressed frustration with the public valuation of BPY's underlying assets since prior to the onset of the pandemic and the stock's underperformance over the last 10 months, ostensibly related to longer term concerns regarding the health of the commercial real estate market, has only exacerbated that frustration. This contrasts to BEP/BEPC and BIP/BIPC which have been warmly embraced by investors, particularly (1) in the wake of the pandemic, (2) amidst the secular shifts towards renewables and infrastructure investment strategies and (3) following the creation of c-corp share classes in '20. As such, investors should not be thinking a potential take-private offer could be coming from BAM for either Brookfield Infrastructure or Brookfield Renewable absent a meaningful, and what we would consider an unexpected, re-rating down in the respective unit/share prices.

Acronyms:

DELCORA – Delaware County Regional Water Quality Control Authority

PaPUC – Pennsylvania Public Utility Commission

Essential Utilities, Inc. (WTRG)/Overweight
Price as of 1/4/2021: $46.19

Brookfield Renewable Corporation (BEPC)/Equal Weight
Price as of 1/4/2021: $57.95
FY 20 FFO/sh: $1.35
FY 21 FFO/sh: $1.43
Shares Out.: 464.0 MM
Market Cap.: $26,888.8 MM

Rating Basis Information:

WTRG Thesis: Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

BIP Thesis: We believe attractive roughly 10% FFO/unit and 8% distribution/unit CAGRs are achievable over the next 5-years driven by a robust capital backlog and a savvy management team that has shown a consistent ability to execute and be good stewards of investor capital. In addition, we are drawn to BIP's diversified business mix – both strategically and geographically – as well as the highly regulated/contracted cash flow profile. We believe the near-term pressures from COVID-19 economic fallout, the strong U.S. dollar, etc. will be offset in the long run by value creating M&A opportunities, some of which may result from pandemic related disruptions in global equity and debt markets.

BIPC Thesis: We believe attractive roughly 10% FFO/unit and 8% distribution/unit CAGRs are achievable over the next 5-years driven by a robust capital backlog and a savvy management team that has shown a consistent ability to execute and be good stewards of investor capital. In addition, we are drawn to BIPC's diversified business mix – both strategically and geographically – as well as the highly regulated/contracted cash flow profile. We believe the near-term pressures from COVID-19 economic fallout, the strong U.S. dollar, etc. will be offset in the long run by value creating M&A opportunities, some of which may result from pandemic related disruptions in global equity and debt markets.

BEP Thesis: We consider BEP – as one of the few sizeable, publicly traded, pure play global renewable companies – to be a compelling way for investors to gain exposure to the decades-long global transformation towards carbon-free electric generation and growing ESG investing mantra. BEP is led by a proven management team with a track record of efficiently deploying (and recycling) capital across the portfolio. BEP's conservative philosophy of amassing a well-diversified global portfolio of predominantly contracted, carbon-free generation assets that are backed by an investment grade balance sheet and healthy cash flows results in a relatively low risk profile versus other renewable asset owners/developers. We believe units of BEP offer investors attractive long-term total return potential comprised of at least 7% FFO/unit growth and a roughly 3% yield with mid-to-upper single digit distribution/unit growth. That said, our Equal Weight rating reflects current valuation considerations.

BEPC Thesis: We consider BEPC – as one of the few sizeable, publicly traded, pure play global renewable companies – to be a compelling way for investors to gain exposure to the decades-long global transformation towards carbon-free electric generation and growing ESG investing mantra. BEPC is led by a proven management team with a track record of efficiently deploying (and recycling) capital across the portfolio. BEPC's conservative philosophy of amassing a well-diversified global portfolio of predominantly contracted, carbon-free generation assets that are backed by an investment grade balance sheet and healthy cash flows results in a relatively low risk profile versus other renewable asset owners/developers. We believe shares of BEPC offer investors attractive long-term total return potential comprised of at least 7% FFO/share growth and a 2.0-2.5% yield with mid-to-upper single digit distribution/share growth. That said, our Equal Weight rating reflects current valuation considerations.

Essential Utilities, Inc.

WTRG: ALJ Recommendation a Setback but DELCORA Deal Far from Dead

Reiterate Overweight

Overweight/$52

Water Utilities

Company Note

- **Key Points.** The ALJ recommendation in the pending DELCORA deal was posted to the PaPUC website on 1/12. It recommends denial as (1) ongoing litigation regarding DELCORA's ability to transfer assets under the asset purchase agreement and (2) failure to attach the rate stabilization plan to the application make it too difficult to make an informed recommendation regarding if the deal is in the public interest. WTRG plans to file objections. This is no doubt a setback but in no way does it appear to kill the DELCORA deal. For starters, it does not necessarily convey the PaPUC commissioners' view (the PaPUC order is due by 3/26). We believe there is still a reasonable pathway to approval – perhaps through settlement – however it could push deal closure beyond early Q2'21. Reiterate Overweight.
- **Ongoing Litigation.** These lawsuits are separate from the 12/28 ruling in favor of DELCORA/WTRG regarding the APA's validity and ability to put the $210M of net proceeds into a trust. Rather five of the 49 municipalities served by DELCORA (represent 9% of annual revenues) have not yet consented to the transfer of the assets and/or assignment of contracts to WTRG – though WTRG reached a settlement on 1/8 with one (Trainer) resolving its issues. Three of the munis (SWDCMA, Lower Chichester and Upland) filed lawsuits in early November in the Delaware County Court of Common Pleas.
- **Path Forward.** At this time it is unclear to us what the path forward would be if settlements are not reached with the remaining four munis and/or the section of the APA that contemplated such a scenario is not upheld/enforced. Can they be carved out of the deal? Once those issues are resolved, the reasonableness of the purchase price under PA's FMV law as well as the public interest determination can be made. The ALJ indicates a new application should be filed to reflect those updates along with the rate stabilization plan and tariff provisions outlining the bill credit mechanism to limit customers' rate increases to a 3% compound annual maximum (so long as the trust remains solvent). If a new application is indeed required, we believe it would push the potential closing date to late '21 or early '22.
- **Reiterate Overweight.** First, getting the $277M DELCORA deal closed is more important than the timing. The near-term EPS impact is minimal. The strategic value is longer-term, including the fact that the bulk of DELCORA's $700M capex needs through '28 fall in the 2026-28 period. Second, our Overweight thesis is not solely predicated on DELCORA closing. As previously stated, though the DELCORA deal is highly supportive of WTRG's growth aspirations, we consider the future to be bright without it, driven by elevated pipeline infrastructure investment needs for the foreseeable future supplemented by municipal M&A trends. We believe relatively low risk, regulated EPS growth of at least 6% is achievable and that rate of growth would simply be enhanced if DELCORA closes.

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Acronyms:

ALJ – Administrative Law Judge
APA – Asset Purchase Agreement
DELCORA – Delaware Country Regional Water Quality Control Authority
FMV – Fair Market Value
PaPUC – Pennsylvania Public Utility Commission
SWDCMA – Southwest Delaware County Municipal Authority

Price Target

Price Target: $52 from NC

Our $52/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.80. For WTRG's water utility multiple, we ascribe a roughly 5% discount to the 21E multiple we use for AWK (34-34.5X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The roughly 5% discount reflects a modestly lower earnings growth rate (we forecast roughly 7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 17.0-17.5X (based on ATO, NWN, OGS & SR) and then apply a roughly 10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework. Key risks relate to regulatory, Peoples gas deal integration and M&A strategy execution.

Investment Thesis

Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio.

In March 2020, WTRG closed on the acquisition of Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, WTRG paid 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to other gas utility transactions at the time. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

Regulated operations account for more than 99% of consolidated revenues. Consolidated EPS is expected to be driven roughly 70% by water utility operations with the gas utility contributing the remaining 30%.

In February 2020, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

SECURITIES: NOT FDIC-INSURED/NOT BANK-GUARANTEED/MAY LOSE VALUE

Company Update — February 25, 2021

Water Utilities

Essential Utilities, Inc. (WTRG)

WTRG: Recent Weakness Provides Attractive Entry Point – We Remain Bullish on WTRG's LT Growth Prospects

Our Call

We believe the recent weakness provides an attractive entry point as the fundamental narrative has not changed. Since 1/8, shares of WTRG are down 11%. This trails "larger cap" water utility peers (-0% to -8%), gas LDCs (+6%) & S&P Utilities (-5%). We reiterate our Overweight rating and $52/sh price target (29X our 22E). WTRG's YE'20 update was consistent with the mid-January guidance event including '21 diluted EPS guidance of $1.64-1.69 (cold YTD weather has Peoples off to a strong start), a 5-7% EPS CAGR target through '23 and $3B of capex over the 2021-23 period which will drive underlying 6-7% water and 8-10% gas rate base CAGRs. Our 21-25E EPS remain $1.67, $1.80, $1.93, $2.07 & $2.20. Our forecast results in an EPS CAGR near the upper end of WTRG's 5-7% range which we believe is reasonable given strong underlying rate base growth driven by accelerated pipeline replacement needs and a municipal M&A strategy that continues to gain momentum.

A Very Healthy Municipal Deal Pipeline. Following a solid 2020 ($63M of deals), 2021 is shaping up to be even better (signed $90M of new deals in 2020). Besides the $277M DELCORA deal, WTRG has five other signed APA's which will add $161M in rate base – includes four separate chunky wastewater deals (East Whiteland, PA $55M; Lower Makefield, PA $53M; Bourbonnais, IL $32M; Williston Township, PA $17.5M). In addition there is the $12M purchase of Shenandoah, PA's water assets – the borough council approved the deal in late November and the APA is still being finalized. WTRG's deal development pipeline remains robust and management continues to express optimism that activity will start ramping up in the years ahead in the four states that only somewhat recently adopted FMV legislation (NC & OH in '18; TX in '19; VA in '20). Our model reflects primarily announced deal closures over the 2020-22 period plus a $75M/year placeholder in '23 & beyond. This could prove conservative if the recent pace continues.

Big Picture DELCORA Thoughts. We believe the deal will close as discussed in greater detail later in this note. Getting DELCORA across the finish line is more important than the timing of it given the longer-term strategic value it represents. Beyond the $277M rate base pick up at closure (expected early Q2'21), we are attracted to (1) the $700M of capital investments – $25-50M/year for typical repair/replace work plus roughly $300M over the 2026-28 period related to DELCORA's treatment plant – as well as (2) the likely substantial wastewater tuck-in deals that could transpire in the area. But our Overweight thesis is not solely predicated on DELCORA closing. We believe relatively low risk, regulated EPS growth in the 5-7% range is achievable without driven by pipeline replacement needs and municipal M&A momentum. That rate of growth would simply be enhanced if DELCORA closes as it should allow WTRG to extend it through the end of the decade and perhaps even raise it.

Next PA Rate Cases

WTRG does not have any major rate-setting procedures pending. The next PA water & wastewater rate case filing is expected around mid-'21 while the next gas one might be made in late '22. While WTRG's PA rate cases can never be overlooked given the meaningful % of rate base represented (more than 70% on the water/wastewater side), the utility has a long history of reaching constructive outcomes via settlement agreements. In addition, despite the pandemic-related economic challenges faced by many ratepayers that has led to heightened rate sensitivity in some states, the PA regulatory environment has upheld its constructive reputation – includes the recent NI rate case outcome as well as the ALJ recommendation in the pending AWK case which honors the 10/30 settlement agreement.

Peoples Repairs Tax Deduction Settlement

Management noted that a verbal settlement has been reached with intervenors that will give back 100% of the catchup benefits to ratepayers over a 5-year period. This contrasts with WTRG's proposal where 40% of the benefits would have been shared directly with ratepayers through surcredits on bills and the remaining 60% used as an increasing income tax expense offset over the 2023-25 period in order to avoid implementing a gas base rate increase prior to 1/1/2026. We view the move as goodwill gesture on WTRG's part to help provide customers with some additional bill relief as they deal with the economic impacts of the pandemic. As noted above, we expect Peoples next base rate filing could occur in late '22.

A Deeper Dive Into The DELCORA Approval Process

Since the ALJ recommendation for denial of the $277M deal was posted to the PaPUC website on 1/12, a few developments have occurred.

(1) **Delaware County on 1/21 appealed the 12/28 decision** by Judge Barry Dozor in the Court of Common Pleas of Delaware County. Recall, Judge Dozer ruled against Delaware County's two claims and in favor of DELCORA and WTRG regarding the validity of the asset purchase agreement as well as the ability to put the net proceeds of roughly $200M from the sale into a trust to be used to stabilize ratepayers' bills in the years ahead.

(2) **Settlements have been reached with two more of the municipalities** that had not yet consented to the transfer of the assets and/or assignment of contracts to WTRG from DELCORA and each has discontinued its Complaint in the Court of Common Pleas of Delaware County. One was SWDCMA which constitutes ~5% of DELCORA's annual revenues or the bulk of the 9% represented by all of the holdouts. That leaves only two remaining (the Townships of Edgmont and Lower Chichester) out of the 49 total municipalities served. Discussions remain ongoing and the parties do not oppose the PaPUC approving the DELCORA transaction with the condition that these contractual issues be resolved prior to closing.

(3) **WTRG and DELCORA withdrew the proposed customer assistance bill payment that the ALJ recommendation concluded was a "rate stabilization" plan**. Rather than show it as a credit against the amount due on wastewater bills, DELCORA customers will get the $200M of net benefits from the transaction through direct mail, quarterly payments.

We continue to believe the DELCORA deal will eventually be approved by the PaPUC and close. For starters, the ALJ recommendation does not necessarily convey the PaPUC commissioners' views. That point was highlighted just recently in the constructive conclusion of NI's rate case despite an ALJ recommendation to deny the requested increase altogether. Approval just may take some additional time beyond WTRG's early Q2'21 target. We cannot rule out the potential need to re-file the PaPUC application and/or extend the current statutory timeframe beyond the 3/26 deadline. With only four of the five PaPUC commissioner chairs filled right now, it is possible a 2-2 stalemate occurs.

But under the assumption the ALJ recommendation is consistent with where commissioner heads were in mid-January, WTRG has largely addressed the concerns expressed, in our opinion. Recall, ALJ rationale for denial was that (1) ongoing litigation regarding DELCORA's ability to transfer assets under the asset purchase agreement and (2) WTRG's failure to attach the rate stabilization plan to the application make it too difficult to make an informed recommendation regarding if the deal is in the public interest.

We believe the 12/28 Court of Common Pleas order combined with the additional municipal settlements (and likely two future ones) should allow the reasonableness of the purchase price under

This document is for bjdingerdissen@essential.co and should not be distributed further.

PA's FMV law as well as the public interest determination to be made by the PaPUC. Reaching a settlement with Delaware County – an outcome that management continues to strive for, possibly even after the 3/26 PaPUC decision deadline – that results in dismissal of the appeal would seemingly de-risk the conclusion even further. Finally, the withdrawal of the "rate stabilization" plan should make the ALJ's concern on that point moot.

Acronyms Used:

ALJ – Administrative Law Judge

APA – Asset Purchase Agreement

DELCORA – Delaware Country Regional Water Quality Control Authority

FMV – Fair Market Value

PaPUC – Pennsylvania Public Utility Commission

Price Target Basis and Risk

Price Target for WTRG: $52.00 from NC

Our $52/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.80. For WTRG's water utility multiple, we ascribe a roughly 5% discount to the 21E multiple we use for AWK (34X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The roughly 5% discount reflects a modestly lower earnings growth rate (we forecast roughly 7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 18.0-18.5X (based on ATO, NWN, OGS & SR) and then apply a roughly 10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework.

Risk for WTRG

Key downside risks include adverse regulatory decisions, issues with the Peoples gas deal integration and earnings accretion, missteps with regards to the M&A strategy and execution as well as potential anti-gas sentiment and ESG concerns stemming from the ownership of a gas utility.

Investment Thesis

WTRG

Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is relatively low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Utilities

Utility & Infrastructure Daily

Neil Kalton, CFA, Senior Analyst (314) 875-2051
Sarah Akers, CFA, Senior Analyst (314) 875-2040
Jonathan Reeder, Senior Analyst (314) 875-2052
Rena Wang, Associate Analyst (314) 875-2049

Quick thoughts from Wells Fargo Securities, LLC Utility & Infrastructure Team:

Utilities

Aqua America (WTR/Market Perform)(Reeder) – We had the chance to catch up with WTR regarding the company's disclosure yesterday (6/12) that a settlement agreement was filed with the PA Public Utilities Commission (PaPUC) in the Peoples merger approval docket (A-2018-3006061). Because there is an outstanding issue between two of the intervenors that prevented a unanimous settlement from being reached – relates to the preferred path forward for a 1,600 customer system – the remainder of the docket must play out as scheduled so that the PaPUC can decide the issue. This is what pushes the expected close of the merger into fall 2019. It is our understanding that the settlement agreement does not address any Peoples revenue requirement issues. Rather the appropriate revenue requirement going forward will be determined as part of the pending Peoples rate case. This could include (1) the potential election and treatment of repairs tax deduction at Peoples (discussed on the Q1'19 earnings call) and (2) the potential to realize (and retain) any merger synergies. We continue to expect a constructive outcome in the Peoples rate case later this year and believe the potential election of repairs tax deduction could be a powerful bargaining chip for the utility as settlement discussions take place. Rate case hearings are scheduled to begin June 18.

In terms of our EPS outlook, as we stated yesterday (6/12), the delayed merger close is likely to negatively impact our current 19E EPS of $1.37 which was predicated on a mid-'19 close. Our preliminary analysis suggests pushing it to the end of Q3'19 could have up to a ($0.10) impact. Importantly, we do not have any reason to believe at this point that our 20-23E of $1.56, $1.66, $1.78 & $1.90 are not still within reason. Given the multiple moving parts in '19 related to the merger and rate relief, we believe investors should focus on '20 & beyond for a better sense of WTR's ongoing EPS power. Our '20 & beyond outlook is predicated on earned ROEs at both the water and gas utilities of 10-10.5%.

Aqua America, Inc. (WTR)/Market Perform (2)
Price as of 6/12/2019: $41.12
FY 19 EPS: $1.37
FY 20 EPS: $1.56
Shares Out.: 178.1 MM
Market Cap.: $7,323.47 MM

Please see page 3 for rating definitions, important disclosures and required analyst certifications.
All estimates/forecasts are as of 06/13/19 unless otherwise stated. 06/13/19 05:27:05 ET

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Rating Basis Information:
WTR Thesis: We are attracted to WTR's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations and a strong balance financial profile. Our Market Perform rating reflects valuation considerations in light of WTR's pending agreement to acquire Peoples (a gas utility) and the associated P/E multiple, regulatory and deal execution/integration related risks.

Important Disclosure for U.S. Clients
This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities and Structured Asset Investors, LLC ("SAI"), a subsidiary of Wells Fargo & Co. and an investment adviser registered with the SEC. If research payments are made separately from commission payments, this report is being provided by SAI. For all other recipients in the U.S. this report is being provided by Wells Fargo Securities.

Important Disclosure for International Clients
EEA - The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a U.K. incorporated investment firm authorized and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 ("the Act"), the content of this report has been approved by WFSIL, an authorized person under the Act. WFSIL does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients.

Australia - Wells Fargo Securities, LLC is exempt from the requirements to hold an Australian financial services license in respect of the financial services it provides to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under U.S. laws which differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC in the course of providing the financial services will be prepared in accordance with the laws of the United States and not Australian laws.

Canada - This report is distributed in Canada by Wells Fargo Securities Canada, Ltd., a registered investment dealer in Canada and member of the Investment Industry Regulatory Organization of Canada (IIROC) and Canadian Investor Protection Fund (CIPF). Wells Fargo Securities, LLC's research analysts may participate in company events such as site visits but are generally prohibited from accepting payment or reimbursement by the subject companies for associated expenses unless pre-authorized by members of Research Management.

Hong Kong - This report is issued and distributed in Hong Kong by Wells Fargo Securities Asia Limited ("WFSAL"), a Hong Kong incorporated investment firm licensed and regulated by the Securities and Futures Commission to carry on types 1, 4, 6 and 9 regulated activities (as defined in the Securities and Futures Ordinance (Cap. 571 The Laws of Hong Kong), "the SFO"). This report is not intended for, and should not be relied on by, any person other than professional investors (as defined in the SFO). Any securities and related financial instruments described herein are not intended for sale, nor will be sold, to any person other than professional investors (as defined in the SFO). The author or authors of this report is or are not licensed by the Securities and Futures Commission. Professional investors who receive this report should direct any queries regarding its contents to Kelly Chiang and Mandy Wan at WFSAL (email: wfsalresearch@wellsfargo.com).

Japan - This report is distributed in Japan by Wells Fargo Securities (Japan) Co., Ltd, registered with the Kanto Local Finance Bureau to conduct broking and dealing of type 1 and type 2 financial instruments and agency or intermediary service for entry into investment advisory or discretionary investment contracts. This report is intended for distribution only to professional investors (Tokutei Toushika) and is not intended for, and should not be relied upon by, ordinary customers (Ippan Toushika).

The ratings stated on the document are not provided by rating agencies registered with the Financial Services Agency of Japan (JFSA) but by group companies of JFSA-registered rating agencies. These group companies may include Moody's Investors Services Inc., Standard & Poor's Rating Services and/or Fitch Ratings. Any decisions to invest in securities or transactions should be made after reviewing policies and methodologies used for assigning credit ratings and assumptions, significance and limitations of the credit ratings stated on the respective rating agencies' websites.

About Wells Fargo Securities

Wells Fargo Securities is the trade name for the capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including but not limited to Wells Fargo Securities, LLC, a U.S. broker-dealer registered with the U.S. Securities and Exchange Commission and a member of NYSE, FINRA, NFA and SIPC, Wells Fargo Prime Services, LLC, a member of FINRA, NFA and SIPC, Wells Fargo Securities Canada, Ltd., a member of IIROC and CIPF, Wells Fargo Bank, N.A. and Wells Fargo Securities International Limited, authorized and regulated by the Financial Conduct Authority.

This report is for your information only and is not an offer to sell, or a solicitation of an offer to buy, the securities or instruments named or described in this report. Aqua America, Inc.

WTR: EPS Outlook Updated As ALJ Recommends Approval Of Peoples Acquisition

Market Perform/$46

Water Utilities
Market Weight

Earnings Estimate Revised Down

- **EPS Outlook Updated As Peoples Merger Close Timing Comes Into Focus.** The assigned Administrative Law Judge (ALJ) to the Peoples merger docket issued the long awaited recommended decision (RD) on 10/28. ALJ Long's RD not only approves WTR's acquisition of the Peoples Companies but adopts the non-unanimous settlement agreement in its entirety. This includes the proposed $120M investment over a 7-year period to update the deteriorated 1,700 customer, 368 mile Goodwin and Tombaugh (G&T) gathering system and replace the existing bare steel pipe as well as a one-time $13M rate credit offered by WTR to partially offset this cost. WTR and the seven other settling parties, including key intervener Office of Consumer Advocate (OCA), support updating the G&T system as the preferred path forward and socializing those costs across Peoples entire customer base whereas the PaPUC's Bureau of Investigation & Enforcement (I&E) and Office of Small Business Advocate believe those customers that cannot be updated economically should be abandoned and forced to convert to an alternative energy source. In fact, ALJ Long goes as far as to characterize the remediation of the G&T system as the most significant benefit of the transaction.

  As we previously discussed, parties have 30 days from the RD to file exceptions and it is likely that the PaPUC (Pennsylvania Public Utilities Commission) may take at least 30 days after that to render a final decision (absent the parties reaching unanimous settlement in light of the ALJ's RD). As such, WTR now anticipates a December 2019 or early 2020 close. We are encouraged by the ALJ's RD and anticipate the PaPUC is likely to ultimately adopt the RD.

  We lower our 19E EPS to $1.19 from $1.32 to reflect an assumed YE'19 close by removing the roughly two months of Peoples net income benefit from our previously assumed end of October '19 deal close. In addition, we made a few other tweaks to our model, primarily related to external financing assumptions including correcting an error that overstated some cash inflows in 2019. As a result, we adjust our 2020-23E EPS down modestly to/from $1.57/$1.58, $1.70/$1.71, $1.80/$1.82 & $1.92/$1.94. This results in a 6.5-7.0% EPS CAGR. As a reminder, our outlook continues to exclude any potential uplift from the planned election of repairs tax deduction at Peoples in 2020. We reiterate our Market Perform rating but lower our 12-18 month price target to $46/share from $47 to reflect lower peer multiples since our last update.

As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Price Target

Price Target: $46 from $47

Our $46/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 2.5% discount to our 70% water/30% gas utility hybrid multiple to our 2021E of $1.71. The 2.5% discount reflects merger execution/integration risk. For WTR's water utility multiple, we start with AWK's 2020 P/E multiple of 30.3X (AWK represents the closest publicly traded peer) and apply a 5% discount (given AWK's higher growth rate and best-in-class management team). For WTR's gas utility multiple, we utilize the 2020 pure play gas LDC median of 24.6X. Key risks include regulatory and M&A strategy execution related.

Investment Thesis

We are attracted to WTR's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations and a strong balance financial profile. Our Market Perform rating reflects valuation considerations in light of WTR's pending agreement to acquire Peoples (a gas utility) and the associated P/E multiple, regulatory and deal execution/integration related risks.

Company Description

Headquartered in Bryn Mawr, PA, Aqua America (WTR) is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTR's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total customer base and nearly 70% of consolidated rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio. Regulated operations account for more than 99% of consolidated revenues.

On 10/23/18, WTR announced a deal to acquire Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, the deal appears to be 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to what we have seen in recent gas utility transactions. WTR expects to close the deal around YE'19, subject to receiving the final necessary regulatory approval from PA. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

WELLS FARGO SECURITIES

2020 EEI Conference Takeaways

Utilities

- **Key Points.** We hosted virtual meetings with 38 companies at the EEI Financial Conference on November 8-11th. The tone of the conversations were positive with sales recovering nicely and most utilities finding offsets (cost controls and regulatory support) to COVID impacts. Further, the de-carbonization theme was in full force with no shortage of investment opportunities to modernize the electric generation fleet as well as the enabling T&D infrastructure. On the strategic front, conversations centered around the trend toward pure play utility models and interest in M&A, particularly on the LDC side given depressed valuations.
- **Strategic Questions Abound.** This year's conference featured many discussions around strategic options as diversified utilities were asked about transitioning to pure play models and combo electric/gas utilities were asked about their appetite for LDC acquisitions. Among the diversified names, ED and SRE expressed the most openness to strategic moves, in our view. Separately, CNP and OGE were fairly reserved on their comments on ENBL, though we expect to hear more from CNP at the 12/7 analyst day. Companies that are in the midst of divesting or potentially divesting assets (EXC, DTE, PEG, PPL) faced questions about whether they would entertain regulated M&A opportunities post-divestiture (assuming they have greater financial flexibility).

  On the LDC front, reviews were mixed with most mgmt. teams expressing confidence in the long-term business model, but some not willing to add gas to the mix. Companies that expressed the most openness to acquiring LDC systems, in our view, were ALE, BKH, MDU, SO and WEC (not without some cautious language). And for good measure, there was a mid-EEI Reuters report suggesting that NEE made a recent offer for EVRG, which both companies talked down.
- **Optimism on Sales**. Most utilities expressed cautious optimism that C&I sales are coming back and some portion of the uptick in residential could be sustainable given a new working environment. Certain utilities in desirable areas (IDA, NWE and POR, for example) also discussed strong in-migration trends as a result of increased mobility/flexibility in the work place.
- **Guidance Updates.** A few utilities used the EEI conference to update capex/growth forecasts. AEP laid out a robust capex refresh that was heavy on renewables and wires investment (surprise, surprise) and continued to support the 5-7% EPS CAGR. ALE lowered the 2019-2024 EPS CAGR to 4% from 5-7% reflecting COVID impacts and pressure on wind returns. And NWE initiated 2021 EPS guidance and increased the 5-year capex budget, which continues to support the mid-point of the 3-6% EPS CAGR.
- **Company-Specific Takeaways in Body of Note.**

Please see page 17 for rating definitions, important disclosures and required analyst certifications. All estimates/forecasts are as of 11/12/20 unless otherwise stated. 11/11/20 21:58:15 ET

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

ALLETE Inc. (ALE/Equal Weight/$58.30) (Akers)

Growth Rate Buckles Under COVID Pressures. ALE is one of the more COVID-exposed companies within our universe because of Minnesota Power's industrial (especially taconite) heavy customer base. Taking various pressures under consideration (electric demand, down-sized transmission project, lower assumed equity issuance price, pressure on wind returns, etc.), mgmt. revised the EPS CAGR to 4% (through '24 off the '19 adjusted base of $3.35) from 5-7%. The growth rate assumes 3% growth at the utility operations and 30% at ALLETE Clean Energy (ACE). The company acknowledged that the 4% CAGR could be conservative should an economic recovery prove faster/stronger than anticipated. On the positive side, ALE is seeing a pickup in steel demand and, importantly, Keetac recently indicated plans to reopen in December, which provides more certainty into 2021, though Verso's future remains unclear. MP filed a request to defer the lost revenue associate with Keetac and Verso – upside to '20E & '21E if approved – and plans to file a general rate case in November '21.

Tone Change on ACE. Mgmt. indicated that ACE is beginning to see pressure on wind returns stemming from increased competition and lower power prices. As a result, the previous target of adding 2-3 wind projects annually may prove challenging. ALE will continue to evaluate wind opportunities, but is also looking at other services, such as solar, storage and grid resiliency as potentially more attractive growth avenues. On the Q3 call, which was during EEI, mgmt. also mentioned the possibility of optimizing the ACE portfolio, which we expect could include asset sales.

Ameren Corporation (AEE/Overweight/$82.37) (Kalton)

Waiting on the CapEx Refresh. EEI is not a big event for AEE as the company provides prompt year EPS guidance and the 5-yr capex refresh in conjunction with Q4 earnings. That being said, we picked up a few tidbits on pending items. First, the renewables RFP in MO is ongoing and it is doubtful that results will be in on time to include in the '21-25 capex refresh – mgmt. is always hesitant to get too far in front of the regulatory approval process in terms of officially adding capital to the base plan. That being said, we think there are plenty of capital investment needs outside the RFP to support a 6%+ EPS CAGR well into the 2020s. As an aside, mgmt. noted that capex spending on technology is up many multiples in MO since the MoPSC approved the PISA mechanism – the reduced regulatory lag allows for improved returns for short lived assets. If/when new MO renewables comes into the fold it remains an open question as to whether it will be purely incremental to the '21-25 plan or whether there will be some capex shifting (factors will include customer rate considerations and financing needs). No new developments on the IL legislative front – mgmt. continues to work with stakeholders as everyone eyes comprehensive energy legislation in the Spring '21 session (and not the Nov. '20 veto session). At issue for AEE are the existing formula rate structure and the allowed ROE methodology for the electric distribution operations and (maybe) the investment rider for the gas utility.

American Electric Power Company, Inc. (AEP/Overweight/$91.15) (Kalton)

New Robust CapEx Plan. While AEP's 5-yr capex refresh ('21-25) was higher than we anticipated ($37B vs. $35B), the underlying drivers were exactly as we expected (wires + renewables). Renewables represents nearly 15% of the planned capex vs. 7% in the original '20-24 capex guidance. Yes, the $2B North Central Wind project was officially added to the capex schedule but other regulated renewables are coming into the fold at AEP's vertically integrated utilities. Renewable additions (owned & PPA) in these jurisdictions are expected to total over 4,600 MW during '21-25 with another 3,400 MW planned for '26-30. As for wires, there is plenty of spend across the board with seams solutions offering potential significant upside in the mid-20s and beyond as transmission grid spend will likely accelerate to better allow for the flow of renewable power across regions. AEP's large geographic footprint combined with strong transmission expertise positions the company for this coming opportunity. All told, the phrase "long capex runway" gets thrown around a lot in the utility sector, but it's clearly appropriate when framing AEP's investment opportunities.

Thoughts on EPS Guidance / Asset Sales. AEP also rolled out initial '21 EPS guidance of $4.51-$4.71, the mid-point of which represents a 6% increase over the '20 EPS guidance mid-point of $4.35 – consistent with AEP's 5-7% EPS CAGR goal. We view the '21 guide as solid but not exceptional (our 21E EPS is $4.70). Notably, the '21 forecasted ROE of 9.0% is a smidge below our estimate of 9.2%. While 20 bps doesn't sound like much, it equates to ~$0.20, or 4%, of EPS power. Keep in mind, the earned ROE guidance heading into '19 was 9.65% and heading into '20 was 9.1% (however, '20 was characterized as a transition year due to a heavy rate case cycle). We think the overall downward trend in allowed ROEs is playing a role in the ROE guidance but it is not the only factor. Mgmt. noted that 30% of the company's capital spend does not have formula or rider rate type recovery, which results in regulatory lag especially as capital spend goes up. This is an area of focus for mgmt. and could result in longer-term

upside if AEP can improve the regulatory frameworks. Last, in our view, there was no discernible change to mgmt.'s thought process around the potential sale of operating utilities. A number of factors go into the calculus including the ability to efficiently recycle capital and the organic growth prospects of the underlying asset (operating utility) in question.

American Water Works (AWK/Equal Weight/$164.37) (Reeder)

If It Ain't Broke, Don't Fix It. This should not come as a shock but management made it clear that the proven strategy and values that have yielded success over the years will continue to be adhered to going forward and it is up to them to continue to execute. Pursuing timely recovery of much needed water/wastewater infrastructure spend while keeping operating costs in check to maintain customer affordability is the core and can lead to attractive 5-7% risk-adjusted EPS growth on its own. Then layer on top a tuck-in acquisition strategy that has gained momentum in recent years and should remain at these elevated levels (if not further accelerate) as (1) states continue to adopt policies to encourage consolidation, (2) COVID and other financial stresses challenge municipal budgets and (3) regulatory requirements make it increasingly difficult to efficiently and effectively operate small-to-mid sized systems. And finally, management is committed to the non-regulated businesses and believe both are complimentary, capital-light ways of augmenting the regulated growth. As such, the 7-10% growth triangle is likely to persist well into the future.

Other Tidbits. Committed To Water/Wastewater. Management believe investors ascribe a high value to the fact that AWK is a pure play water/wastewater utility – and all of the positive long-term fundamentals of the industry like decades long elevated capex needs, consolidation potential, etc. – and is committed to remain that way. The focus is on continuing to build the tuck-in M&A pipeline which is already very strong. Military Marches On. While AWK has won 5 of the last 6 military base awards, the company is by no means resting on its laurels and continues to try to bring value and solutions to the bases under operation to boost its competitive position. AWK is involved in 4 open solicitations, including a Navy base (the first Navy base to embark down the privatization path), and 2 are expected to be awarded within the next 3-6 months. Management indicated the universe of bases yet to be privatized that AWK would be interested in (i.e. sizeable) stands at about 70. External Equity. The plan remains to close the NY American Water cash sale to AQN in Q1 and look to externally raise about $500M of equity in mid-'22. The timing of equity is driven by the rate of capital deployment and would only be accelerated if there is a near-term uptick in municipal deals.

Alliant Energy Corporation (LNT/Overweight/$57.42) (Kalton)

Plenty of Renewables & Distribution. LNT has a wonderfully straightforward story; but there were a couple of nuggets to note from EEI: (1) LNT's recently announced Clean Energy Blueprint in IA includes 400 MW of solar. Notably the solar qualifies for advanced rate making principles including an enhanced ROE (set for the life of the asset). LNT's IA wind farms receive an 11.0% ROE and recent precedent for IA neighbor MidAmerican suggest the solar spend could qualify for a 10.5-10.7% ROE. (2) Both IPL & WPL have been systematically undergrounding their electric distribution systems at a pace of 1.5-2.0% per year and currently sit at 25% undergrounding of LNT's 45,000 mile distribution system (skewed more toward WPL). Given strengthening storms (the recent derecho is an example) and the increasing focus on resiliency/reliability, policymakers may be open to LNT to accelerate the program (it sounds like early days, but mgmt. is evaluating). While we do not expect anything in the near-term, we think this remains an intriguing long—term investment opportunity. At an estimated cost of $100,000-300,000 per mile, we think the undergrounding opportunity is several billion dollars. Again, the work is currently ongoing – but it could be accelerated and be another lever (along with generation transformation) to extend the targeted 6% rate base CAGR well beyond the mid'20s.

AVANGRID (AGR/Overweight/$51.44) (Kalton)

EPS Outlook. Fresh off the heels of AGR's Investor Day, mgmt. helped fill in the blanks on a few of the assumptions underlying the EPS CAGR of 6-8% (off the adjusted '20 EPS base of $2.10) and the '21 & '22 EPS guidance ranges. Our take: we think mgmt. has prudently erred on the side of conservatism particularly as it relates to the regulated utility operations. While the '21-25 guidance contemplates the NY utilities eventually reaching the allowed ROE levels, our sense is that the near-term EPS guidance reflects continued underearning as NYSEG & RG&E continue to ramp up vegetation management spend in order to improve system resiliency. We also think the outlook reflects a pragmatic approach to the pending PNM acquisition taking into account integration risk. However, we believe there could be potential to best AGR's baseline internal goals via (1) the potential for higher capex vs. PNM's current guidance and (2) modest cost savings (sharing of best practices, etc.). In terms of merchant wind pricing,

AGR's near-term guidance reflects flattish power and REC prices of $20-25/MWh and $10/MWh, respectively. Mgmt. remains highly committed to reducing merchant price exposure over time via recontracting.

Offshore Update. Mgmt. remains very excited about AGR's position in the nascent U.S. offshore wind market. In the near-term, Vineyard Wind is one of the three bidders into NY's pending RFP for up to 2,500 MW (AGR owns 50% of Vineyard Wind). The other two bidders are Equinor/BP and Ørsted/ES. Mgmt. noted that Vineyard's bid was for a large amount of capacity given the distance between the company's lease area (off the coast of MA) and NY – the electricity would land onshore in MA and then be wheeled to NY. The winning bid(s) are expected to be announced by YE'20.

Black Hills Corp. (BKH/Equal Weight/$63.63) (Akers)

Next Stop: Growth Rate. BKH plans to provide an EPS growth target in conjunction with the YE update. The company believes there's good line of sight on the gas side given programmatic pipe investments while the electric side can be lumpy depending on IRP/RFP outcomes (likely continue to be somewhat conservative on that front). We expect the growth rate will be in the 5-7% range and we look to the July 2021 IRP filing in WY for additional insight on generation opportunities (could include discussion of carbon capture as WY remains supportive of the coal plants); there's also potential to expand the Renewable Ready subscription program.

ESG & LDCs (and M&A). BKH rolled out plans to reduce GHG emission intensity 70% by 2040 at the electric operations with 50% GHG reductions targeted at the gas utilities by 2035. On the gas side, CO is in the spotlight as there are ongoing discussions – including a recent Commission Informational Meeting – on what the LDCs can do to comply with environmental initiatives. While there are some parties pushing for electrification, BKH appeared encouraged that the utility stakeholders (including electrics) understand the affordability challenges of electrification along with customer choice considerations. As further evidence of the company's comfort with the gas outlook, mgmt. expressed openness to acquisitions within the company's existing jurisdictions. More specifically, BKH would evaluate CNP's AR LDC if it comes up for sale (though the company noted that the service territory is lower growth than its own AR utility).

CenterPoint Energy, Inc. (CNP/Equal Weight/$24.07) (Akers)

What a Difference a Year Makes. We had a very constructive conversation with new CFO Jason Wells. He reiterated that the plan to deliver at the high end of the 5-7% growth rate (off 2020 Utility guidance basis EPS of $1.12-1.20) already contemplates various headwinds/scenarios – these include the 2021 equity dilution headwind, the roll-off of equity returns on transition/securitization bonds at CEHE, one to two LDC sales, and potential strategic alternatives at ENBL that could require more parent debt to be allocated to the utility. Similarly, Mr. Wells confirmed that the $16B capex plan and 10% rate base CAGR already account for the LDC sales (no negative re-basing ahead). On the O&M front, company has already identified meaningful cost cuts for the 2021/2022 time frame and, longer-term, envisions a culture of continuous improvement.

Strategic Update. We look to the 12/7 analyst day for details on the LDCs sale candidates and for insight into the direction on ENBL. On the latter, mgmt. clearly intends for utility earnings to be a bigger piece of the pie over time, but we still think an exchange of shares into a larger MLP (vs. outright cash sale) is a viable option in the review process. Shifting to the LDCs sales, we think a combination of OK, MS, LA and AR could be sale candidates or, on the bigger side, CNP could elect to sell OH. We do not expect the LDCs in TX or IN would be considered given the company's goal to reduce/simplify regulatory jurisdictions and, separately, we suspect MN may be a bit bigger than what CNP needs. The company indicated that the LDC sales are not driven by any long-term electrification concerns and reiterated that their states remain highly supportive of natural gas. That said, having a more electric-centric mix was mentioned as being consistent with the ESG focus, along with making renewable-enabling investments in TX and modernizing the generation fleet in IN (new plan envisions more utility-ownership of renewables).

CMS Energy (CMS/Overweight/$67.01) (Kalton/Reeder)

On Point, As Expected. One did not have to meet with CMS management to know what they would say. And that is not a bad thing! Just the opposite. As CFO Rejji Hayes put it, CMS will give folks "as much certainty on the E as they can and let investors determine the P." It is that de-risked approach to the business – a utility franchise that sports an extensive capex backlog amidst a constructive regulatory backdrop (that is expected to remain steady going forward) and led by a proven management team with a track record of effective cost management in order to deliver consistent 7% EPS growth (why bother even

saying 6-8%!) – that results in an attractive risk-adjusted total return proposition. Then layer on aggressive decarbonization goals for the ESG-friendly crowd and what is there not to like – other than some (not us!) would argue the "P"?

Food For Thought. More COVID Shutdowns. In the event COVID concerns lead to additional restrictions, CMS does not believe commercial & industrial load will be nearly as hard hit as it was in Q2'20 given evidence that businesses have been largely effective at maintaining operations while protecting employees. That said, should headwinds occur that a residential load uptick would not fully offset, you guessed it – costs can be managed! June 2021 IRP Filing. Planning has begun but it does not sound like, at least on a preliminary basis, the plan will look all that different than the prior iteration, even in the context of a potential Biden administration, given CMS's already aggressive stance towards decarbonizing the fleet (0% net emissions by 2040). Management is monitoring storage in terms of both the cost curve decline and increased efficacy but the urgency is not as great as other utilities in terms of balancing the intermittency of renewables given the Ludington Pumped Storage Facility essentially offers CMS more than 1 GW of battery-like capacity. Committed To Non-Regulated. CMS already has a small non-utility earnings mix (~7% with a guide to no more than 10%) which is where some other companies seem to be trying to get. Plus CMS runs the non-utility portion of the portfolio like a utility in terms of the predictability of earnings.

Consolidated Edison Inc. (ED/Equal Weight/$81.72) (Akers)

COVID Impacts. We gained insight into the COVID impacts and impact on guidance. The $0.05 reduction to the top end of the 2020 range (now $4.15-4.30) reflects the continued inability to collect late charges and disconnection/connection fees. The bad debt expense triggered the materiality threshold, which allowed the utilities to book a $50mm deferral, but that was already contemplated in the guidance range. Looking ahead, the company expects commercial fees could resume in Q1 and the timing on residential remains uncertain. ED is seeking approval to defer the lost revenue in a regulatory proceeding, which could provide upside to near-term EPS if approved.

ESG Focus. Mgmt. highlighted opportunities across the platform to advance de-carbonization efforts. These include the EE, EV-enabling and battery storage initiatives at CECONY (not all captured in rate base but all earn returns and, in some cases, incentives), direct investments in renewables at the Clean Energy Business, renewable-enabling electric transmission projects (including offshore wind) and ongoing efforts to reduce emissions from the gas utility operations. ED is also engaging with stakeholders in an effort to allow the utility to invest in large-scale renewables in NY – those discussions are ongoing. Regarding the Clean Energy Business, ED intends to utilize tax equity (a change from prior practice), but continues to see the annual capex run-rate around $400mm. Shifting to the midstream investments, there was no change in tone from the ESG analyst day when mgmt. expressed an openness to divestitures. Specifically to MVP, we sense the company would wait for the project to go online in order to garner a better valuation. Lastly, when asked about potentially acquiring an LDC, mgmt. indicated that it may not be the most attractive opportunity given policy uncertainty going forward, particularly in the Northeast.

DTE Energy (DTE/Overweight/$130.06) (Kalton)

Full Steam Ahead. Post the separation of GSP, DTE has the ability to be one of the fastest growing utilities within our coverage universe as the company targets 5-yr electric and natural gas utility earnings CAGRs of 7-8% and 9%, respectively. When we asked about upside to the already robust $17B regulated utility '21-25 capex plan, mgmt. suggested there was no shortage of capex opportunities and pointed to the company's recent capex refreshes (generally result in 10-20% increases in cumulative 5-yr capex). Switching gears to GSP, mgmt. plans to get out in front of investors as much as possible in front of the planned spin-off in mid '21. CEO Elect David Slater remains excited about the company's organic growth prospects in both the Marcellus and Haynesville shale basins. We also asked whether Spinco would continue to be acquisitive post-spin. It sounds like this remains an open question as mgmt. continues to evaluate the post-spin strategy. In terms of market comparisons for Spinco, DTE views WMB and EQT as most closely resembling Spinco's asset mix/profile, which suggests a valuation range of 8.5-10.0X EV/EBITDA (higher than the 8X multiple assumed in our price target).

Duke Energy (DUK/Equal Weight/$97.31) (Kalton)

Pivoting to Growth. We thought Chair, President & CEO Lynn Good made a highly compelling case for DUK's long-term EPS growth prospects and why it could trend towards the high end of the targeted 4-6% CAGR (off the preliminary '21 EPS base of $5.15). In our view, DUK's messaging to investors has noticeably improved in '20. We point to a focus and execution on cost management along with better

crystallizing (for investors) the long-term generation transformation rate base growth opportunities. Front and center is the recently filed Carolinas IRP, which contemplates substantial spend aimed at decarbonizing DUK's coal heavy generation fleet (hearings are expected to begin in NC during Q2'21). The initial spend is likely to center on solar/battery storage and natural gas-fired generation. Looking beyond the 2020s, the next leg of investment will depend on a number of factors including carbon policies and technology trends. We believe it is at this point that offshore wind could come into the fold (depending upon legislative support) – or not, if it makes more sense to continue down the solar/natural gas path.

Dominion Energy Inc. (D/Equal Weight/$85.68) (Akers)

Execution, Execution, Execution. The message from CEO Bob Blue and CFO Jim Chapman was one of execution with a focus on regulated operations in premium jurisdictions. The company aims to deliver consistent EPS growth aligned with the 6.5% target and appears to be off to a solid start based on the Q3 update. Mgmt. did not express discomfort with the remaining 10-15% of non-utility exposure, noting that it is largely contracted.

Regulatory/Political Update. As it relates to VA, mgmt. acknowledged that it can (and will) get noisy on the political/regulatory front, but highlighted a history of supportive outcomes. The company expects there will be that same opportunity into the 2021 triennial review, particularly given the various items in the toolkit (write-offs, CCROs, etc). The company also expressed cautious optimism heading into the COP process at BOEM given strong local support and project-specific considerations (don't have the same fishery and shipping lane dynamics as other projects); from a timing perspective, being behind other projects may also be beneficial as D can gain insight from others' experience. Shifting to South Carolina, the immediate focus remains on the rate case. Mgmt. indicated nothing out of the ordinary thus far, but acknowledged some uncertainty with recent turnover in the commission (could make it more difficult to settle). Lastly, on the LDCs, D has not seen any anti-gas undertones in the company's service territories and remains very comfortable with those assets in the mix.

Edison International (EIX/Equal Weight/$62.90) (Kalton/Reeder)

Making The Case That Wildfire Risk Is Actually Pretty Low. Management believes the wildfire mitigation plans, Public Safety Power Shutoff policies and improved containment/suppression strategies have vastly reduced the risk of a major California wildfire caused by investor-owned utility equipment. The '19 & '20 wildfire seasons are evidence of that. And planned future mitigation efforts – installing covered conductors, vegetation management with expanded clearances where possible, increasing situational awareness, etc. – should further the cause. Couple the lower event risk with CPUC-sanctioned wildfire insurance programs that are backstopped by the provisions of AB1054, including the liability cap and $21B wildfire fund, means the risk of triggering substantial shareholder liability is pretty low. We note that PCG conveyed a similar message. While this may very well be the case, management acknowledged that it may still take a few more years of benign wildfire seasons for investors, ratings agencies and even insurers to fully recognize the progress that has been made.

Attractive Core Story That Is (Appropriately?) Overshadowed By Wildfire Risk. Excluding the wildfire risk, the underlying EIX story remains attractive with a long runway of transmission and distribution as well as renewable/storage investments needed to support the state's goal to de-carbonize the broad economy. CA regulators have generally been supportive of utility efforts over the years and the framework offers a plethora of cost recovery mechanisms that enable the state's utilities to earn at or above authorized levels. Even the timeliness of CPUC decisions may be improving under President Batjer. EIX's current plan results in a 6.5-7.5% rate base CAGR. Gating factors include the ability to simply execute on all of the work as well as maintain affordability for ratepayers by trying to keep average annual rate increases at or below inflation. Although the average electric bill in CA is roughly 30% below the national average and EIX's bills are roughly 30% lower than in-state peers, O&M efficiency efforts remain a priority.

Emera Inc. (EMA/Equal Weight/$56.24) (Kalton)

Lots Going in FL. Tampa Electric, along with NEE's & DUK's FL electric utilities, are gearing up for base rate filings in 1H'21 for new rates beginning Jan '22. While we consider the FPSC to be a highly constructive regulatory body, rate cases – particularly in the midst of a weak economy – always create a little bit of uncertainty. With that in mind, we view Peoples Gas recent base rate settlement to be a positive date point. Key elements include allowed ROE of 9.9% with an 8.9-11.0% range. This compares with Tampa Electric's current ROE range of 9.25-11.25% - there is an argument to be made that electric

utilities should be awarded a premium ROE to gas LDCs given greater technology risk. Separately, Tampa Electric's growth runway remains robust driven by renewables and reliability spend under the new Storm Protection Plan. On the solar front, Tampa Electric is well into the first 600 MW of planned solar and has an additional 600 MW plus about 30 MW of battery storage planned by '23. Even with these additions, renewables will only represent 12% of Tampa Electric's power supply (natural gas makes up the high majority of the rest). EMA continues to evaluate the optimal resource mix going forward but the full expectation is that solar will grow meaningfully from the 12% level.

News from the North. In late September, Canada Prime Minister Justin Trudeau's Throne Speech (think State of the Union) addressed power transformation and, in particular, the Atlantic Loop transmission project. The Atlantic Loop would bring excess hydro and thermal power from Quebec and New Brunswick, respectively, to Nova Scotia and Newfoundland. If completed, the project would allow Nova Scotia to accelerate the planned retirement of coal generation from 2040 to 2030 (consistent with Canada's target). As a major transmission project that spans multiple regions, Atlantic Loop faces plenty of challenges (including cost allocation). That being said, it also represents a potential meaningful investment opportunity for EMA. Stay tuned!

Entergy Corp. (ETR/Overweight) ($109.83)

Regulatory Updates. ETR's mgmt. team has been making the rounds quite a bit recently between the late September Investor Day, a number of fireside chats in October and the Q3 earnings call. So, we used our EEI meeting to catch up on a few recent developments in what has become a surprisingly straightforward and, in our view, highly compelling rate base growth story. On the regulatory front, ETR recently reached a partial settlement in E-AR's annual FRP filing – the separate request to extend the FRP has a 12/4/20 settlement deadline. In addition, E-LA recently filed a request to extend the company's FRP by three years (through '23) under largely the same terms as the existing FRP (ROE of 9.2%-10.4%). One difference to E-LA's FRP is a proposed distribution recovery mechanism for annual investment in excess of $100mm. Mgmt. stressed that they have a long track record of achieving settlement agreements and we did not get the sense that there were any meaningful roadblocks to prevent settlements in AR & LA (LA is very early in the process). Switching to the pending SERI case at the FERC. ETR does not expect likely commissioner changes at FERC under a Biden administration to have an impact on the resolution (positive or negative). Mgmt. thinks we could gain clarity on the ROE/equity ratio in 1H'21 (already taken into account in ETR's EPS guidance) but the timing of resolution on the broader policy question around uncertain tax positions remains unclear. While mgmt. remains of the opinion that they have a strong argument, should the FERC adopt the ALJ recommendation it presents a $0.15-0.20, or 2-3%, risk to annual EPS power before potential mitigation efforts.

Essential Utilities (WTRG/Overweight/$46.37) (Reeder)

DELCORA Discussion. We devoted a good deal of time to the pending DELCORA transaction as we believe the current share price does not, perhaps appropriately, reflect the considerable long-term benefits from the deal including the meaningful capex needs that fall beyond the current 5-year forecast as well as the likely substantial wastewater tuck-in deals that could transpire in the area. We had three main takeaways. (1) Investors should not rule out the prospects for a settlement in the legal challenge and perhaps optimism in this regard is in part attributable to the confidence that management has conveyed regarding being able to close the deal around the end of Q1'21. (2) Management is pretty comfortable with the PaPUC approval process based on the concerns expressed by the intervening parties as well as previous experience with FMV deal approval in the state. (3) Assuming 1H'21 closure, DELCORA will start earning its full keep in '22 as it will be incorporated in the next PA water/wastewater rate case filing.

Other Notables. Next PA Water Rate Case. Aqua Pennsylvania is likely to file for new rates during 2H'21 with the new rates effective perhaps late 1H'22. Management continues to think PA water rate cases will occur at a 3-year cadence going forward. M&A Strategy. WTRG continues to be focused on bringing other water/wastewater tuck-in deals to bear, including in states beyond PA and IL. OH perhaps offers the most near-term opportunity out of the "new" states. The deal pipeline is robust and water/wastewater tuck-ins are definitely the focus as the company looks to continue to capitalize on the somewhat accelerated pace of municipal deal activity/interest in the sector. Management also reiterated a low (to no?) likelihood of doing another gas deal in the near-term. Guidance Refresh. Finally, the guidance refresh could come as early as January (before the YE2020 call in late February) and is expected to include not only '21 EPS but also refreshes to the 3-year EPS CAGR and capex outlooks.

Evergy, Inc. (EVRG/Overweight/$57.30) (Akers)

Fake News. EVRG issued a statement mid-EEI confirming that there has been no change in strategic direction since the decision to pursue the Sustainability Transformation Plan (STP) and that there is no outstanding offer or bid for the company. That followed a Reuters report that NEE made an offer in the mid-$60s and a statement from Elliott that EVRG should reengage with NEE. For its part, NEE suggested investors not believe everything that shows up in print. All things considered, there's no reason to think there is merit to the Reuters report at this point.

Path Ahead. Mgmt. is focused on executing the STP with a focus on a modern T&D system and kick-starting the ESG aspect of the story, which includes the de-carbonization of the generation fleet. The plan will require supportive regulation, which is a key consideration in the CEO selection process (someone that understands the importance of having strong regulatory relationships) – CEO decision still expected by YE. The cost cutting initiative is also a key component of the story including its role in mitigating customer rate increases. Shifting to capex, we were encouraged to hear that the ~$700mm of renewable (solar) capex in the plan is not dependent on having securitization in place. We look to the 2021 IRP filings for additional insight into the generation outlook.

Eversource Energy (ES/Overweight/$94.42) (Kalton)

CapEx Drivers. We expect ES's upcoming capex refresh in conjunction with Q4 earnings will be more of the same – higher and supportive of a 5-7% EPS CAGR from the base business (ex-offshore wind). ES has already noted a few things that could impact the plan such as (1) the inclusion of Eversource Gas Company of MA (Columbia Gas), which we think could be additive to ES's rate base CAGR, (2) electric transmission including new reliability projects in southeastern MA totaling $175mm and (3) new MA solar legislation that, if passed (likely), would allow NSTAR Electric to develop an additional 230 MW of solar (~$400mm opportunity). It remains unclear whether ES will have clarity on the CT AMI program in time to include it in the refresh. In addition, mgmt. remains optimistic that the MA Grid Mod Plan (2022-2024) will be supportive of AMI. We think the potential CT & MA AMI programs represent a ~1B investment opportunity over a 5-7 year period.

Other Tidbits. (1) Offshore Wind – despite (not unexpected) permitting delays, ES remains bullish on the company's offshore wind program noting that any negative impact of the delays on returns should be mitigated or offset by the positive impact of being able to use larger turbines along with favorable vessel developments afforded by the extra time. In addition, mgmt. thinks President-elect Biden's administration could help speed the process up at BOEM. ES/Ørsted are one of the three bidders participating in NY's offshore wind solicitation for up to 2,500 MW of capacity (a decision is expected by YE'20). While the companies' award in the 1st auction (the 880 MW Sunrise project) bodes well for pending auction, mgmt. emphasized bidding discipline considering there are plenty of other RFPs upcoming in the region (RI, MA, NY). (2) Connecticut – following the public/political outcry to ES's performance in the immediate aftermath of Isaias, it appears that cooler heads are prevailing. PURA's PBR docket will sequence in mid '21 and ES welcomes the opportunity to work under a PBR scheme. ES is also working to insure better storm response with a focus on outage duration and customer communication.

Exelon Corp. (EXC/Overweight/$43.84) (Kalton)

All About the Breakup. EXC's recent proclamation that the company is in fact in the early stages of evaluating separating ExGen from the regulated utility operations took center stage at the company's EEI meetings. We entered the conversation somewhat skeptical that EXC would go down the break-up path nearer-term given our base assumption that IL will pass constructive nuclear-related legislation in the Spring '21 session and that, by doing so, it might prove diplomatically difficult for EXC to immediately turn around and effectuate a spin (or sale). We exited the conversation less skeptical as mgmt. downplayed – to some degree – potential policymaker resistance. In our view, there is a clear industrial logic to separating the businesses (investors prefer pure play regulated utilities, the separated companies will likely have better strategic flexibility, etc.). In addition, once the genie is out of the bottle it is hard to put back. Even though mgmt. was careful to caveat the evaluation process – noting the unique complexities of separating the companies – once the notion is put out into the world the share price embeds an expectation.

IL Clean Energy Update. EXC indicated that there was strong momentum for clean energy legislation heading into the Spring '21 session and noted that, thus far, Gov. Pritzker's carbon price proposal has not seemed to gain much traction. Instead, it sounds like either the Fixed Resource Requirement (FRR) option could still be in play and/or likely changes to the MOPR under a soon-to-be Democrat regime at FERC could provide the Illinois legislature with additional tools to support nuclear. While IL clean energy

legislation conjures up images of Lucy pulling the football away from Charlie Brown, we remain of the strong opinion that the legislature will take the necessary action to keep the state's nuclear fleet operational.

FirstEnergy Corp. (FE/Overweight/$29.79) (Kalton)

A Tough Road Ahead. This was not an easy EEI for FE's mgmt. team coming on the heels of former CEO Chuck Jones' recent termination for code of ethics violations as part of an ongoing internal investigation into FE's potential involvement in the House Bill (HB) 6 bribery scandal. In addition, it sounds like it could be some time before we get clarity on both the pending FBI investigation and FE's internal investigation (mgmt. hoped to have further updates on the internal investigation by the Q4'20 earnings release in early '21). Under this backdrop, we thought Acting CEO Steve Strah did a commendable job in our meeting and came across as very direct and authentic in discussing the serious issues confronting FE. That being said, regaining the trust of FE's constituents (regulators, customers, investors) will not be an easy task and it remains an open question as to whether or not Mr. Strah will be able to pull it off given his lengthy tenure within the company. We also remain mindful that the investigations are ongoing and it is far from clear to what extent FE was involved in the HB 6 scheme – although, Mr. Jones' termination along with several other recent executive terminations and departures from the firm point to some level of wrongdoing.

OH ROEs. FE provided a bit more color on the age-old question of the OH utilities' earned ROE. Per the SEET test (in legislation), FE is allowed to use book equity in the ROE calculation (FE's book equity is higher than equity rate base due to the inclusion of $2.2B of goodwill related to an acquisition in the 1990s). This, along with some other adjustments, helps explain why FE's SEET ROE always results in a lower ROE than what the rate base math suggests. FE plans to provide even more detail in conjunction with the Q4 earnings release. Keep in mind, the OH utilities' current ESP runs through 5/31/24.

Hawaiian Electric Industries (HE/Underweight/$37.05) (Reeder)

Solid Footing Despite COVID. Despite the challenges presented by COVID, particularly in HI where tourism is essentially the lifeblood of the economy, HE is in pretty solid shape and remains focused on helping the state reach the long-term renewables and decarbonization goals. The utility benefits from decoupled rates and COVID expense deferral accounting. The bank's conservative philosophy and strong starting position has allowed it to "bend but not break" under the challenges of COVID. As such, there remains no need for incremental equity at the holding company nor a need for the holding company to invest any capital into the bank, 2021 refinancing needs have been prefunded and HE is committed to maintaining an investment grade structure. As for the dividend, management does not foresee any risk to the current level and reiterated an intent to grow it in-line with earnings over the long-term while maintaining a payout ratio that is commensurate with peers (60-70%).

Here Comes The Sun? The bank's low cost of funds and ability to offset some of the loan loss provision spike with strong mortgage re-financing activities and opportunistic securities sales have kept the bank safely profitable. And management's recent comments regarding the performance of the loan portfolio and the potential for underlying economic conditions to improve as the state recently started re-opening its doors to tourists give reason to believe the worse of the bank could be behind it. While businesses in HI are struggling, customers and the communities served have been resilient, the bank is staying very close to their customers and the high asset quality in the state provide a safeguard. Management reiterated a belief that the bank is well provisioned after Q3 and that the provision is determined based on forward looking information. As such, if tourism gradually returns, another widespread outbreak of COVID is avoided in the coming months (no new shutdowns) and an effective vaccine becomes widely available in '21, it is possible that a good portion of the provision recorded in 2020 could reverse as the economy improves. 76% of deferred loans have already returned to payment and, typically, if there are 6 months of good performance, the loans are eligible to be upgraded and the associated provision reversed.

PBR Me ASAP? The utility continues to believe the transition to a 5-year Performance Based Ratemaking (PBR) framework at some point in '21 will be a net positive in terms of ability to earn close to the allowed ROE. Once implemented, there may be only 30-40 bps of structural regulatory lag remaining. That said, while there seems to be many areas of consensus that have developed amongst parties throughout the PBR proceeding, the devil will be in the details ultimately approved by the commission particularly as they relate to things like how the annual revenue adjustment mechanism works, what the consumer dividend might be and the type and magnitude (collectively up to 100-200 bps of ROE?) of the new performance incentive mechanisms (PIMs). Execution will be critical which also requires cost efficiency improvements, including delivering on the committed $25M of savings by 2022.

IDACORP, Inc. (IDA/Equal Weight/$94.80) (Akers)

Same (Good) Story Near-Term. Mgmt. continues to see strong growth in the Idaho Power Company (IPC) service territory driven by in-migration from surrounding states along with new large load customers. Combined with a strong cost containment efforts, low borrowing costs and creative regulatory solutions, this has allowed IPC to stay out of rate cases while managing to earn reasonable ROEs and deliver on financial targets.

Rate Base Growth Opportunities Brewing Long-Term. Over time, customer growth and coal retirements will drive incremental resource needs. There's also the opportunity for IDA to take over BPA's stake in the Boardman-to-Hemingway (B2H) project and, possibly, to offer a green tariffs that could lead to renewable ownership opportunities over time. Lastly, IDA has been clear that once the new Hells Canyon license is issued (2022 or later), that will result in higher capital and operating expenses. While some of these items could be handled via regulatory solutions (rider-type treatment), the bigger items may require a full vetting in a rate case.

MDU Resources Group, Inc. (MDU/Equal Weight/$24.99) (Akers)

Strategic Update. When asked about the current trend toward pure play models in the utility sector, mgmt. highlighted (1) MDU's general focus on infrastructure, which spans electric/gas utilities, pipelines and construction and (2) a successful track record since divesting the E&P asset. On the M&A front, construction activity has slowed but the company remains active in the pursuit of acquisitions. Mgmt. is also open to adding scale at the regulated utilities including LDCs so long as it makes economic sense (accretive, credit supportive, cost and/or capex levers, etc.). Of note, S&P already raised the FFO/Debt threshold to 22% from 15% due to the non-regulated EBITDA contribution so while utility acquisitions would help the business risk profile, MDU is comfortable with the revised thresholds and, in fact, has a healthy cushion on FFO/Debt.

Construction. Mgmt. disclosed a ~50/50 breakdown between aggregates and vertically integrated activities (hulling, converting to ready-mix, delivering, laying, etc.) within the Materials segment; this is more in-line with peers Summit and Granite vs. pure plays Vulcan and Martin Marietta. Regarding the decline in backlog reported in Q3'20, the company did not appear overly concerned and pointed to the Q1'21 bidding season as the next key data point. Positive drivers include the extension of the FAST Act budget and favorable housing trends. Shifting to Services, mgmt. has been encouraged by the strong performance through the pandemic. While new hospitality projects in Vegas could slowdown, there is line of sight into 2021 from existing projects and, more broadly, MDU is seeing strong growth in the high tech sector, chip manufacturing and data centers along with healthy electric T&D spending trends.

Pipeline. Mgmt. highlighted the largely take-or-pay nature of the pipeline operations and noted that gas volumes are bouncing back in the Bakken (~85% pre-pandemic levels). The company expressed confidence that the revised agreements with shippers on the North Bakken Expansion project are firm and that the project remains on track to secure FERC approval and meet the late '21 in-service target. When asked about threats from de-carbonization, mgmt. expressed skepticism that natural gas can be reasonably replaced on a btu equivalent basis and highlighted gas as a key backstop for renewables.

NextEra Energy (NEE/Overweight/$77.54) (Kalton)

Chasing Our Tails. During EEI, Reuters reported that NEE had made an offer to acquire EVRG for $66/sh. As the story evolved, it became clear that the bid was likely made many months ago while EVRG was in the midst of a strategic evaluation (ultimately, mgmt. and the Board decided not to pursue a sale of the company). For its part, NEE's mgmt. simply indicated that investors should not believe everything they read and intimated that there could be ulterior motives behind the reports. Does NEE remain interested in regulated M&A? Yes, but per our EEI conversation it remains very much a "want" vs. a "need" and the company will only move forward if a transaction checks all the boxes (including EPS accretion factoring in the balance sheet). Looking ahead to '21, the Santee Cooper privatization opportunity in SC remains a possibility as the legislature is expected to take up the issue again in the general session (typically runs through May). Recall, NEE's bid was deemed to be the best option should the legislature decide to sell Santee Cooper. While we tend to think a Santee Cooper privatization is unlikely, it is worth paying attention to heading into '21. We continue to think an acquisition could be immediately 3%+ accretive to EPS and up to 5% within a few years.

NEER is in the Cat Bird Seat. We spent much of our time discussing NEER's competitive advantages along with the overall size of the renewables pie. We always want to remain mindful of the risk of intensifying competition in the renewables arena as energy players increasingly look towards wind & solar

as growth avenues. That being said, we find ourselves agreeing with NEER President John Ketchum in that the company has built such a competitive moat that it will be difficult for newcomers to enter the space and effectively compete. Developing renewables is not as easy as simply buying some equipment and setting up a wind or solar farm. There are all kinds of considerations related to optimal sites, access to transmission, technical expertise, etc. that NEER has spent decades perfecting. Not to mention NEE enjoys enormous scale benefits related to vendor relationships, cost of capital, etc. As for the size of the market – mgmt. continues to believe EIA's projection for 30% wind/solar market share by 2030 as a percent of U.S. power supply (vs. ~10% currently) will prove to be conservative. And green hydrogen has the potential to materially accelerate renewables development looking out beyond '30 – it is clear that NEE sees a lot of potential for hydrogen and we expect (small) announcements on this front will pick up steam in the coming months and years.

NiSource Inc. (NI/Overweight/$24.64) (Akers)

Sensitive to Financing Concerns. No change to the financing plans laid out at the analyst day, but mgmt. was very responsive to concerns on dilution and the equity overhang. We look to the 2021 financing including $600-1,000mm of equity-rich securities (sounds like leaning toward convertibles) as the first major data point informing 2022-2023 block equity needs (currently $500-700mm). Mgmt. also reiterated an openness to portfolio optimization (asset sales) if it is in the best interest of shareholders. We expect the company will take some time to evaluate options and we look to CNP's upcoming LDC sales as a directional data point on gas utility valuations, which could be instructive for NI (and the rest of the combos/LDCs). Separately, we note that NI's financing plans do not include the ongoing $200-300mm of ATM equity needs after 2023 as investments – including the renewable program – are recognized in rates and generate cash.

Perspective on Gas. Mgmt. opined that the valuation de-rating of the LDCs is overdone given both strong demand for the product and readily available low cost supply. The company also sees strong policy support in its remaining service territories and highlighted the high energy content requirements of winter peak energy needs. NI believes it is not a question of whether the distribution pipe system will be used and useful in the future, but rather what will be flowing through the pipes (RNG, hydrogen, etc.).

NorthWestern Corp. (NWE/Overweight/$59.30) (Reeder)

'21 Guidance. Management offered preliminary '21 EPS guidance of $3.40-3.60 but will likely tighten the range to the typical $0.15 variance with the YE'20 report in February. We got the sense the extra $0.05 in the preliminary range was subtracted from what would have otherwise been the bottom end if not for COVID-related uncertainties. The midpoint of the '21 range is 4% above the midpoint of the revised '20 range ($3.30-3.45) but is overall consistent with the original '20 range ($3.45-3.60). It reflects a 0.7-1.0M increase in the diluted average shares out from '20, continued improvement in operating expense levels and decoupling is expected to be implemented at the MT electric utility in mid-'21. Lastly, NWE indicated an expectation that the dividend will be at the upper end of the 60-70% targeted payout ratio – if at 70% while continuing the recent $0.10 annual dividend increase trend, it implies '21 EPS of $3.57.

Capex Budget Increased. NWE rolled out a $2.1B investment plan over the 2021-25 period. The budget represents a $300M increase over the previous 5-year plan and is distributed fairly evenly across the states and utilities (electric vs. gas) relative to each's size. Management characterized the projects as mostly small and relatively low execution risk. The budget is driven by gas and electric transmission and distribution work to accommodate growth across the systems, deal with the shutdown of fossil resources and comply with regulations as well as things like hydro generation facility upgrades and technology (including automated metering infrastructure). The $400M+/year capital plan puts NWE at the midpoint of the 3-6% EPS CAGR target and management noted the growth could be somewhat lumpy based on rate case timing. In addition, it sounds like external equity will be needed fairly regularly to fund the budget and maintain an FFO/Debt ratio in the 14-15% range.

MT Generation Still Upside – And Growing? NWE has bid several projects into the pending 285 MW RFP and reiterated that the $200M capex bogey that they have talked about is based on a level of comfort of what they might win – winning all would be more than $200M. The 3rd party administrator has yet to notify NWE that any of their projects have been eliminated from consideration and management remains confident that their projects are well positioned given the RFP specifications around long duration, flexible capacity. If a NWE project wins, the MT pre-approval process allows AFUDC to be earned as the capital is deployed but then that turns into a cash return with a project-specific ROE once it enters service. The recent termination of the Puget deal (for an increased stake in Colstrip) restores the full 725 MW capacity hole that NWE intends to ultimately fill through multiple RFPs. And the risk of the Colstrip facility shutting down this decade (vs. NWE's 2043 planning assumption) seems elevated, perhaps even more so by

Talen's announcement this week to shut down coal capacity in favor of a more ESG-friendly strategy, which has the potential to add another 222 MW deficit to NWE's MT portfolio.

MT Regulatory Environment. Republicans swept all state offices and the three Montana Public Service Commission (MPSC) elections. While party affiliation has never been a guarantee of constructiveness in MT, we are hopeful that the new MPSC will continue what seemed to be a gradual improvement in the challenging regulatory environment over the last 2 years prior to more recent adverse decisions around COVID expense recovery as well as Colstrip replacement power costs. We also believe it bodes well for the recognition that natural gas needs to play a role in the new generation capacity picture versus some of the Democratic candidates that were more fervent renewables supporters. We were somewhat concerned by the MPSC comments earlier this year around NWE's supply plan perhaps being overly reliant on gas – particularly since we believe NWE's self-build advantages are likely for gas-fired generation.

OGE Energy Corp. (OGE/Overweight/$33.95) (Akers)

Feeling Good. CEO Sean Trauschke struck an optimistic tone on the utility operations, particularly on sales trends. Commercial load flipped to positive in September (vs. year ago period) and mgmt. expects some of the uptick in residential will be sustainable based on work-from-home trends. The company is also bullish on industrial activity and expects Public Authority sales (mostly schools) will pick-up as students return to the classroom. Mgmt. is hopeful that the pre-COVID momentum toward customer growth >1% will return. On the regulatory front, OG&E is focused on executing manageable, straightforward proceedings with a continued focus on customer bills. Lastly, the company plans to file an IRP by October 2021, which could shed light on resource needs. We do not expect any major project revelations, but rather a series of smaller investments (plant conversions to gas and solar additions at the distribution level) along with EE and DR. Overall, things seem to be moving in a positive direction.

Strategic Comments. Mgmt. continues to play its hand close to the vest as it relates to ENBL. The team fully acknowledges the public market dynamics (negative sentiment toward midstream, preference for pure plays) and believes the midstream exposure has overshadowed the utility story. When it comes to potentially selling/swapping into a bigger MLP, OGE considers the aforementioned market/valuation dynamics along with cash flow and credit implications. Separately, when asked about the company's interest in acquiring an LDC (in the context of CNP potentially selling an LDC or two), mgmt. confirmed that gas utilities are not on the company's list.

PG&E Corporation (PCG/Equal Weight/$10.71) (Kalton)

Wildfires Still Top of Mind. First, the lack of a new Safety Certificate from the CPUC remains a little bit disconcerting. That being said, PCG stressed that the prior safety certificate remains in effect until a new one is issued and it is not necessarily uncommon that the issuance has slipped beyond 90 days. In addition, thus far there have been no communications from the CPUC to suggest any major issues with PCG's request. Without a valid Safety Certificate PCG is not afforded the protections of the liability cap under AB1054 (limits wildfire liability to 20% of electric T&D equity rate base, or ~$3B currently). Safety Certificate aside, PCG highlighted substantial progress on wildfire risk mitigation efforts and improvements in the PSPS program vs. '19. Combined with improved containment/suppression strategies, the risk of catastrophic wildfires caused by utility-owned equipment appears to be declining. That being said, we think it may take a few years of benign activity to substantially improve investor confidence. Not surprisingly, mgmt. indicated that the legislature still has little appetite to address the inverse condemnation (IC) doctrine. While AB1054 provides substantial protections, the state's electric utilities still face significant risk relative to utilities in other states as a result of IC. On the capex front, there is no shortage of investment needs as PCG deploys capital to improve grid resiliency, mitigate wildfire risk and support CA's ambitious GHG emission goals. Last, it sounds the like the search for a new CEO is winding down with an announcement expected by YE'20.

Pinnacle West Capital Corp. (PNW/Overweight/$89.59) (Akers)

ACC Profile. The 2020 ACC election resulted in Republican Lea Márquez Peterson retaining her seat with the other two open seats to be filled by Republican Jim O'Connor and Democrat Anna Tovar. It appears that three of the five Commissioners are supportive of a de-carbonization agenda (Peterson, Tovar and sitting Commissioner Kennedy), which aligns with PNW's de-carbonization plan. Favorably, this agenda would appear to conflict with sitting Commissioner (and possible future Chairman) Olson's desire to pursue deregulation. While we reserve judgement until policy discussions are underway and, more so, rate case decisions are issued, our initial view is favorable given both a pro-clean energy and Republican majority. Beyond the ACC make-up, we are encouraged by PNW's focus on improving the company's

position in the state via consensus-building and improved customer service/experience. We think improved regulatory relationships and outcomes would address a key investor concern and allow greater focus on the clean energy growth story, strong balance sheet, effective cost management and strong customer growth.

Rate Case Update. APS filed rebuttal testimony on 11/6 with three key updates: (1) a $15mm reduction to the $184mm rate request reflecting a reduction in the ROE request (to 10.0% from 10.15%), a lower fair value increment (to 0.8% from 1%) and updates to the fuel rates; (2) a proposed Advanced Energy Mechanism (AEM), which would provide rider recovery for clean energy investments and incorporate the DSM and LFCR updates (simplification); and (3) a Coal Community Transition proposal, which is a comprehensive plan to address the Four Corners coal retirement along with various economic development initiatives for the Navajo Nation. It is our understanding that the Navajo Nation is supportive of the coal transition plan along with the AEM. While it is yet to be seen whether other stakeholders support the AEM (key to mitigating regulatory lag and extending the time between rate case filings), we view the updated testimony as an incrementally positive step.

PNM Resources (PNM/Equal Weight/$49.09) (Reeder)

AGR Deal Update. It was not for a lack of effort but we were unable to squeeze out much additional insight regarding how the Avangrid deal (announced 10/21) came about. Management reiterated that a very strategic type of approach was taken to find the right strategic partner for PNM and the communities served. Therefore it was not solely about the price offered. More details will be included in the proxy which is expected to be filed around Christmas. Management believes the prospects of receiving what PNM would deem to be a superior proposal are quite low (again, not just about price) and pretty much shut the door to the prospects of a financial suitor emerging (as was the case in the recent acquisition of PNM's neighbor El Paso Electric) given the need for an acquirer to be strategically aligned. The response to the deal announcement has been positive in NM (governor, legislature, environmental community, etc.) based on AGR's commitment to renewables and the environment and management noted that NM regulators have never turned down a merger application. Both NM and TX are net benefit states and generally those conditions are satisfied by way of rate credits which AGR/PNM stand prepared to offer. Merger approval applications will likely be filed by the end of the month.

Other Business Updates. Constitutional Amendment Passage. The NM regulatory body will be transition to a 3-person appointed commission in 2023 as the amendment passed. Management believes it will not only improve the predictability/stability of the regulatory decisions in the state but also the quality. Therefore, NM has the potential to improve from the commonly held investor notion that the regulatory environment is below average. Four Corners Deal. Management believes NM regulators will be hard pressed to turn down the recently announced deal for PNM to exit Four Corners early given the customer savings associated with it. EPS Power. No real changes in the EPS power of the company looking forward. 2021 EPS power is $2.30-2.40 however PNM will be rolling out guidance in December taking into consideration the latest thoughts around COVID, cost savings and the lack of rate relief or decoupling (both of which were anticipated at one point in '20 to be of help to '21 EPS). Beyond '21, PNM will be deferring to AGR to communicate the growth.

Portland General Electric Company (POR/Equal Weight/$44.57) (Akers)

Mgmt. Bullish on Growth. CFO Jim Lobdell highlighted that growth in POR's service territory has proven resilient with healthy in-migration trends, which may be further helped by COVID as people have more flexibility to work from desirable locations, and continued growth in high tech. This led the company to bring back capex on the Q3 update that was previously removed from the plan. The company still expects 1% sales growth long-term, which could be bolstered by electrification efforts (transportation, but also considering new premise incentives for electric heating, etc.). Separately, Mr. Lobdell spoke of a continued focus on cost controls including greater use of technology and coal unit retirements among a slew of other efforts.

In addition to service territory growth and expense controls, the company's 4-6% EPS growth target is driven by investment in aging infrastructure along with the Wheatridge Renewable Energy Facility. Looking ahead, there could be additional opportunities for generation ownership (upside to the plan) related to one or two RFPs planned for 1H'21 to procure 150 average MW (~450 MW nameplate) of renewables and 700 MW of capacity. Lastly, discussions are ongoing in phase 2 of the Green Future program, which could potentially include utility ownership (TBD).

Regulatory & Other Updates. There was no new information on wildfires (still no evidence that POR's equipment ignited any fires) and the trading loss (investigation ongoing). On the regulatory front, mgmt.

continues to evaluate the timing of the next rate case and highlighted positive data points on the COVID deferral and wildfire deferral, which was approved in ~30 days. While the company still sees 85-90 bps of structural lag related to unrecoverable expenses, there are other areas which could be addressed, such as the PCAM (tightening the deadbands?), storm balancing accounts and the decoupling mechanism, which is set to expire after 2022.

PPL Corporation (PPL/Equal Weight/$29.41) (Kalton)

U.K. Sale & Go-Forward Strategy. The sale of the U.K. utilities continues to progress and mgmt. remains encouraged by the level of interest. An upcoming data point regarding U.K. decarbonization goals will provide parties with guidance into the expected level of long-term investment in the electric distribution systems (arguably a more important driver of value than near-term allowed returns). Timing remains 1H'21 for both the transaction announcement and potential completion given typically quick regulatory approval processes in the U.K. (1-3 months). Post sale, mgmt. is keeping their options open with regard to use of proceeds with share repurchases, regulated M&A (preference towards electric) and additional contracted renewables investment (via Safari Energy) all possibilities.

Kentucky Update. PPL recently filed a notice of intention to file for base rate relief for the KY utilities starting 7/1/21. The filing will include a proposed sur-credit that will be used to mitigate the rate impact on customers via the use of regulatory liabilities. Separately, we spent a good deal of time discussing upside capex opportunities including AMI (a ~$300mm program that PPL intends to revisit with the Kentucky PSC) and generation transformation. The KY utilities own 3,800 MW of coal-fired generation that was developed between 1971-1984 and could be ripe for retirement over the next 10-20 years. PPL characterized the PSC as being most concerned about cost and reliability and is not wedded to fuel type when considering asset replacement proposals. Mgmt. further noted that the economic proposition for solar/battery storage is not quite there (yet).

Public Service Enterprise Group Inc. (PEG/Overweight/$60.88) (Kalton)

Lots to Talk About. (1) Non-nuclear generation sale – mgmt. characterized initial interest in the proposed sale of the fossil fuel generation fleet and solar portfolio as healthy (private equity interest). The solar portfolio is expected to be put up for sale this month with the fossil fuel plants to follow in December. Bids are due in Q1'21 with a sale expected to be announced in mid '21. (2) CEF Filings – mgmt. is optimistic that the New Jersey BPU will bless the $600mm AMI proposal. Conversely, it is unclear to what extent the BPU wants regulated utility involvement in the proposed EV ($300mm) and battery storage ($100mm) programs. Decisions are expected in Q1'21. (3) Stimulus Investment – PSE&G is engaged in early discussions with the BPU Staff around a potential acceleration of Gas System Modernization Program spend and/or electric reliability spend. Should the talks advance, we could see a formal filing within the next 3-6 months. (4) Transmission ROE Discussions – it sounds like the parties (PSE&G, the BPU Staff and the Consumer Advocate) despite being close are currently at a stalemate. From here, either the stalemate breaks or the Staff/Consumer Advocate could launch a formal challenge at FERC (likely a multi-year process). (5) Offshore Wind – PEG expects to make a decision as to whether or not to take up to a 25% interest in Ørsted's 1,100 MW Ocean Wind project by the end of November. We continue to think it is likely that PEG participates. (6) Nuclear – not much new here. PEG has made it clear that the $10/MWh ZEC payment will not be sufficient to keep the company's nuclear units operational longer-term. We expect more clarity on this issue by mid/late '21.

Sempra Energy (SRE/Equal Weight/$133.64) (Akers)

Strategic Capital & LNG. Based on the Q3 call and mgmt. comments at EEI, it appears likely to us that SRE is looking to sell an interest in the LNG portfolio. This would serve two complementary purposes: one, to get an attractive valuation marker for the LNG business; and two, to keep the business mix more heavily weighted toward the regulated utility operations (improves perceived risk profile, which is important to both investors and rating agencies). We do not think a spin of the LNG operations is timely as it provides a competitive advantage to operate under the SRE umbrella. Shifting to Mexico, mgmt. remains bullish long-term while acknowledging challenges presented by the current administration. The company views ECA as a critical asset in Mexico and expressed confidence that the export permit will be received this month with FID by year-end. More broadly, the tone on LNG was constructive as mgmt. indicated that conversations with potential off-takers have picked up and pricing has improved.

Gas in CA. The company expects the friction between SoCalGas and certain environmental interests could continue near-term, but (1) noted that regulatory outcomes have been very supportive of continued investment in the gas infrastructure and (2) expressed confidence that there's a significant long-term role

for the gas LDC infrastructure in a clean energy future (RNG, hydrogen, carbon capture). SoCalGas is making a significant push in RNG and noted that while it appears expensive, costs should be driven down with scale and additional investment (similar to solar and wind in their infancy). We did not get the sense, however, that SRE would look to acquire additional gas utility assets as the company prefers to position the portfolio more directly in alignment with the electrification trend.

Southern Company (SO/Equal Weight/$63.92) (Kalton/Reeder)

The Here and Now. With the finish line nearing on Vogtle Unit 3, it is clear that SO is not taking success for granted. The three risk areas to get to the next major milestone of hot functional testing, in order of increasing importance, are (1) sub-contractor work, (2) bulk electrical work and (3) paperwork – making sure the "as built" condition of the modules conform to the engineering plans so that the requisite ITAACs can be verified by the NRC. If for some reason the inspections, tests, analyses and acceptance criteria (ITAAC) process would uncover the need to submit a license amendment request (LAR), it could potentially take a few weeks to resolve – we believe it is important to note that the NRC is highly supportive of the project as it enters the final stages and has vowed to work expeditiously on their end. That said, management does not believe a LAR is any more likely than some sort of metallurgical condition popping up as the hot functional test ramps up the temperature of the plant components. Overall, management is confident heading into hot functional testing and the overall ability to bring Unit 3 in-service before the end of November '21. And Unit 4 should go better than Unit 3.

Beyond New Nuclear. Assuming the remainder of the new nuclear project goes relatively smoothly, SO is primed to deliver 6%+ EPS growth and this higher growth rate could be fleshed out as part of the YE2020 update. Excluding the "debt only" return penalties imposed by Georgia regulators when the higher price tag and longer schedule had to be recertified, SO has been growing at like 6%. But once both units go online it is projected to add about $200M of net income and generate an additional roughly $800M of cash flow. This should put SO in a position of strength which could include accelerating the dividend growth, upping the capex forecast (assuming rate affordability can be balanced) and/or further improving the credit metrics/rating. In other words, SO could support $8-9B/year of capex without the need to issue equity. A big driver of rate base growth could be early retirement of most of SO's large coal-fired plants and replacing them with renewables and gas as the O&M savings could serve to keep customer bills flat. Embarking on this sort of plan would require the buy-in of AL, GA & MS, including state regulators, and could be propelled forward under a Biden administration with a Republican senate where carbon reduction goals are accelerated.

Growth Outside The Core Regulated Franchises. Three things came up. (1) Renewable deals that meet Southern Power's return hurdles are tough to come by right now. (2) Management did not entirely rule out buying another gas LDC at the right price. (3) SO has clearly been exploring the idea of a synthetic approach to municipal/gov't owned system M&A. SO would lend expertise by operating the system and perhaps even allow access to SO's pool of assets as scale matters in the transition from fossil to zero carbon. This type of approach could overcome the challenge inherent in buying municipal assets including the fact that they are 100% financed with cheap debt and the loss of local ownership.

WEC Energy Group, Inc. (WEC/Equal Weight/$104.43) (Kalton)

Diving Into the '21-25 Capital Plan. Mgmt. provided additional details on the company's '21-25 capital investment plan (called the ESG Progress Plan) – $16.1B plan represents a $1.1B increase from '20-24. The refresh leans more heavily on renewables (25% of the spend) including new regulated solar (800 MW), wind (100 MW) and battery storage (600 MW). The amount of battery storage was a little bit of a surprise to us but mgmt. indicated that the storage integrates nicely into the system. Separately, the contracted renewables bucket (Energy infrastructure) consists of $2.2B of planned investment during the period and incorporates the already announced $400mm Thunderhead project. If WEC executes on the full $2.2B we think Energy Infra's EPS contribution would be ~8% of consolidated EPS in '25, which would still give the company some wiggle room under the 10% threshold (WEC wants to limit non-utility EPS to 10% of total EPS max).

Other Tidbits. (1) Mgmt. indicated that the capital investment plan supports a 5-yr EPS CAGR of just above 6%. Other assumptions underlying this statement include earned ROEs at the allowed levels (little change to allowed ROEs during the period) and equity ratios at the mid-point of the equity ratio ranges of 50-55% for the WI utilities. Optimizing the equity ratio represents a not insignificant EPS opportunity in and of itself. For context, we estimate annual EPS could be $0.10-0.15 higher by '25 if the WI utilities earned the allowed ROEs at a 55% equity layer, which could add 50bps to the 5-yr EPS CAGR. Keep in mind, there is also an opportunity to retain a portion of earnings above the ROE thresholds. Optimizing the WI utilities earnings will depend on a number of factors including future rate case outcomes, sales trends and effective cost management. That being said, the equity ratios provide yet another lever to

help achieve an EPS CAGR toward the upper end of the company's 5-7% goal and/or help offset unforeseen pressures. (2) WEC remains very comfortable with owning gas LDCs and we got the sense they would consider a gas LDC purchase as long as it fit mgmt's famous three criteria: (1) EPS accretive in first full year, (2) credit neutral, and (3) long-term earnings growth prospects consistent with WEC's organic growth. Executive Chairman Gale Klappa suggested that the growth criteria could prove to be an impediment.

Xcel Energy, Inc. (XEL/Equal Weight/$74.69) (Kalton)

CapEx Discussion. Our EEI discussion centered on XEL's recent 5-yr capex refresh for '21-25. As a reminder, the base plan of $22.6B (vs. the '20-24 guidance of $22.0B) results in a rate base CAGR of 6.3% (off the 20E base). In addition, XEL provided a separate analysis including the $1.4B upside related to NSPM's Minnesota Relief & Recovery Proposal consisting of wind repowering ($750mm) and new solar ($650mm). The "incremental" plan would result in a 6.9% rate base CAGR. Mgmt. remains optimistic that the MPUC will approve the spend and noted that the opposition's arguments are consistent with prior arguments in similar proposals (questioning the long-term customer benefits based on NSPM's power price assumptions). Our capex outlook includes the $1.4B of incremental spend. Separately, mgmt. poured cold water on our question as to whether XEL held back other capex from the base plan while NSPM's request is pending – they characterized the base capex plan as fully representing the assessed needs while also pointing out that additional capital tends to come into the plan over time (both traditional capex along with potential PPA buyouts). On the PPA front, mgmt. indicated that while discussions with parties are always ongoing, things tend to heat up around the operating utilities' IRPs.

Hydrogen. We have long viewed XEL as being ahead of the game in terms of long-term system planning and understanding new technology (not to be confused with early adoption as mgmt. carefully considers technology risk and customer rate implications). On that note, mgmt. is evaluating hydrogen as a future fuel source to help bridge the last mile to zero carbon. Our take is that XEL is skeptical that green hydrogen production will be economically attractive and, instead, pointed out that using excess nuclear output from the company's existing nuclear facilities to produce hydrogen could be 1/3 more cost effective. Fun fact: nuclear produced hydrogen is referred to as Purple Hydrogen.

Acronyms

ALJ – Administrative Law Judge

1= Overweight, 2 = Equal Weight, 3 = Underweight, V = Volatile
NA = Not Available, NC = No Change, NE = No Estimate, NM = Not Meaningful

- **Summary.** On 12/8 & 12/9, over 35 electric, gas and water utilities participated in virtual investor meetings at the 2020 Virtual Midstream and Utility Symposium. The tone of conversations was quite positive with companies cautiously optimistic on sales growth into 2021 and poised to advance de-carbonization strategies. In the comments below we expand on general industry takeaways and highlight PEG, WTRG (also increase price target) and ATO as timely investment ideas.

- **No Shortage of Investment Opportunities…** Between aging wires and pipes and the push toward de-carbonization, companies touted significant infrastructure investment opportunities with visibility well beyond the 5-year planning horizons. On the electric generation front, a number of utilities are scheduled to file IRPs in 2021 (BKH, CMS, EVRG, NI, OGE, XEL) with most executives pointing to renewables and peaking gas as the most likely resource solutions. In terms of coal retirements, companies generally are not expecting significant pressure from the Biden EPA only because many have already taken steps to accelerate coal retirements. That said, stricter emission regulations could provide greater justification for local stakeholders to accelerate retirements as several companies are still working out the details on recovery of the un-depreciated plant balances with securitization discussions going on in a number of states.
- **…Gating Factor is Customer Rates.** Utilities are always mindful of customer rate pressure, but we sensed a heightened sensitivity in light of COVID-related considerations. Regulators and politicians have pushed back on requested rate increases during the pandemic with the most recent example being the PA ALJ recommendation to deny NI's rate increase along with less overt actions including downward pressure on allowed ROEs (AZ). In response, many utilities are increasing programs to support low income customers and tightening their belts on the O&M front. Should utilities be able to create rate headroom via cost controls, fuel savings (steel for fuel) and, for certain utilities, customer growth, it could support the acceleration of capex and rate base growth.
- **Comments continue on page 2.**

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

- **New Technology Roundup.** We continue to sense a greater willingness on the part of the historically risk averse utility sector to embrace new technologies. We think this is being driven by a confluence of factors including (1) real and perceived policy pressure (at the state & federal levels), (2) customer demand for clean energy (both C&I and residential) and (3) the growing influence of ESG investing – is it just us or do company executives sound increasingly apologetic if stated generation resource plans still include coal in 2040? Several utilities indicated the potential to either accelerate or scale-up investments in battery storage (CMS) and EV-related infrastructure (DTE, XEL). And, in a mini eyebrow raising move, on 12/8 NEE acquired eIQ Mobility, a provider of software solutions to help assess fleets for a potential transition to electricity or hydrogen fuel. NEE indicated that the acquisition was part of the ongoing "dip your toes" approach into green hydrogen – and that the technology is still several years away from being a "needle mover" from an earnings standpoint – but the momentum continues to build.
- **M&A.** There was a lot of chatter regarding CNP's recent announcement regarding plans to sell LDCs in AR and OK. Nearby utilities BKH and OGS indicated a general openness to giving the assets a look, but not at valuations in the 1.5-2X rate base range – both expressed skepticism that their bids (if they bid) would prevail and appeared content to see a higher valuation from another party, which could lend support for LDC valuations overall. Northern utilities ALE and WEC did not express an interest in the assets and AQN commented that while they haven't ruled LDC acquisitions out, mgmt. prefers electric and water. SR provided broad comments that the company has been out of the M&A space due to frothy takeout multiples and would re-engage at more reasonable valuations along with cultural and regulatory considerations. While not categorically ruling out M&A, NWE noted they like the current electric/gas mix as well as serving areas where gas is not under attack and therefore cannot imagine moving outside of their Midwest region (but did not specify if AR and OK are in their region). Lastly, SWX expressed an openness to acquisitions, which would bolster the utility portion of the earnings mix, but did not comment specific to CNP's assets. More broadly, we think the need to create rate headroom in order to accelerate de-carbonization strategies could drive strategic combinations that offer scale and synergies.
- **Gas LDCs Strike A Positive Tone.** With the LDC utility business model in the spotlight as the electrification theme looms, we sensed greater comfort among gas executives that key stakeholders are acknowledging the role of gas distribution infrastructure in the pursuit of affordable de-carbonization (even in NJ). Companies also highlighted continued strong demand for LDC service including healthy new customer connect trends and opportunities to build-out the gas system into new areas. Consistent with the Q3 calls, most of the companies are actively exploring RNG opportunities and beginning to research the potential of adding hydrogen to the gas mix (early days). When asked whether RNG/hydrogen will detract from natural gas' affordability argument, executives drew a parallel with renewables in their infancy suggesting there's a need and expectation that the cost curves will be driven down over time. The LDCs also touted energy efficiency programs as a much more cost effective avenue toward de-carbonization.

Featured Picks

- **Public Service Enterprise Group (PEG/Overweight)**
  We like the set up for PEG heading into '21 as the company continues to transition to an appealing clean energy, predominantly regulated utility story (85% of earnings). Potential catalysts include (1) completion of the planned sale of the non-regulated fossil fuel and solar generation assets, which will simplify and "clean" up the story, (2) likely additional regulated capex arising out the CEF filings (Cloud & EV) and a new potential accelerated infrastructure investment program and (3) greater clarity on the long-term earnings profile for the nuclear fleet pending the outcome of an ongoing NJ BPU investigation. In the near-term, mgmt. is quite optimistic that the BPU will bless the $721mm CEF-Energy Cloud (AMI) (an all or nothing proposal) but is a little bit more iffy on the $261mm CEF-EV proposal. Evidentiary hearings on both the Energy Cloud and EV filings have been suspended as parties engage in settlement discussions. Separately, we touched on PEG's recent decision to acquire a 25% ownership interest in Ørsted's Ocean Wind project. While not unexpected, the decision frees up mgmt. to discuss the longer-term offshore wind opportunities that will likely sequence after Ocean Wind. Ørsted has 2,400 MW remaining in the Ocean Wind lease area and PEG/Ørsted jointly own the 1,000 MW Garden State Offshore Energy (GSOE) lease area. Now that PEG has opted into Ocean Wind 1, we fully expect Ørsted/PEG to jointly pursue future solicitations in NJ and the Mid-Atlantic (i.e., MD); this could set up for additional growth opportunities post '25 that will supplement PSE&G's strong rate base growth. As for the initial Ocean Wind stake, PEG will generate a substantial amount of cash upfront by taking the ITC & MACRS tax benefits (PEG has a U.S. tax appetite whereas Ørsted does not). We reiterate our Overweight rating and maintain our $69/sh price target.

- **Essential Utilities (WTRG/Overweight)**
  We came away from our WTRG meeting incrementally more bullish on the name and believe there are potential near-term catalysts to build upon the stock's recent strength. First, CEO Chris Franklin expressed confidence in the ability to get the pending DELCORA deal done and believes the judge may rule by Christmas on Delaware County's two legal challenges – the most important of which is the validity of the asset purchase agreement. Mr. Franklin reiterated that the County's concerns seem to be around the price and use of proceeds as opposed to be against actually selling to WTRG. As we have previously opined, a last minute settlement still cannot be ruled out. We believe the DELCORA deal represents material long-term value given meaningful capex needs that fall beyond the current 5-year forecast as well as the likely substantial wastewater tuck-in deals that could transpire in the area. Second, management believes investors will find the 1/11 guidance event constructive both in terms of the updated 3-year EPS and rate base growth outlook as well as environmental commitments at Peoples. Finally, we talked about the water and wastewater M&A pipeline and there continues to be attractive, sizeable opportunities that not too long ago WTRG would have never thought possible. We reiterate our Overweight rating and increase our 12-18 month price target to $52/share (29X our 22E EPS of $1.78) from $47.

- **Atmos Energy Corporation (ATO/Overweight)**
  ATO is our top pick in the Gas LDC space. We see the opportunity for multiple expansion from the current ~10% premium to gas peers. ATO is not a catalyst rich name, but offers consistent 6-8% EPS growth, a relatively low-risk regulated strategy, a strong balance sheet with well above-average credit metrics, supportive regulatory mechanisms and an excellent track record in our view. ATO also operates in gas-friendly states with ~70% of rate base in TX where we expect to see legislation proposed in 2021 that would prohibit the adoption of local bans on new gas hookups. We think continued execution through 2021 along with improving sentiment toward the LDC group will drive outperformance. We reiterate our Overweight rating and maintain our $114/sh price target.

Acronyms:

ALJ – Administrative Law Judge
AMI – Advanced Metering Infrastructure
BPU – Board of Public Utilities
C&I – Commercial & Industrial
DELCORA – Delaware Country Regional Water Quality Control Authority
EPA – Environmental Protection Agency
ESG – Environmental, Social, Governance
EV – Electric Vehicle
IRP – Integrated Resource Plan
ITC – Investment Tax Credit
LDC – Local Distribution Company
MACRS – Modified Accelerated Cost Recovery System
MW - Megawatt
O&M – Operations & Maintenance
RNG – Renewable Natural Gas

Rating Basis Information:

ATO Thesis: We are attracted to ATO's highly visible growth outlook, pure play regulated gas strategy and strong balance sheet. We do not believe these positive features are adequately reflected in the current share price.

PEG Thesis: We believe PEG shares offer investors an attractive risk/reward proposition. Key features include (1) a premier utility with well-above average rate base & EPS growth prospects, (2) a carbon-free nuclear generation fleet that generates significant FCF and (3) a strong balance sheet, which provides the company with financial flexibility.

WTRG Thesis: Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Price Target Information:

PEG Basis and Risks: Our $69/sh price target is based on a sum-of-the-parts analysis consisting of (1) $60.50/sh for PSE&G/Enterprise/Other (~20.5X our 22E EPS of $2.94) and (2) $8.50/sh for PSEG Power based on a DCF analysis. Risks to our valuation include earnings sensitivity to commodity prices, operational risks, unfavorable regulatory/political developments particularly as it relates to PEG's nuclear fleet.

ATO Basis and Risks: Our price target is based on a P/E multiple analysis (apply a 15-20% premium to the Gas LDC peer group multiple of ~18X on our '22E EPS). Key risks include regulatory risk (primarily in TX), potential pushback to rate increases, risk of gas-related incidents, and fluctuations in the Rider Rev mechanism at APT.

WTRG Basis and Risks: Our $52/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.78. For WTRG's water utility multiple, we ascribe a roughly 5% discount to the 21E multiple we use for AWK (34-34.5X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The roughly 5% discount reflects a modestly lower earnings growth rate (we forecast 6-7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 19X (based on ATO, NWN, OGS & SR) and then apply a 5-10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework. Key risks relate to regulatory, Peoples gas deal integration and M&A strategy execution.

Essential Utilities, Inc.

WTRG: Solid Update Provided at 1/11 Guidance Event

WTRG Remains Our Favorite Water Utility Pick

Overweight/$52

Water Utilities

Earnings Estimates Revised Up

- **Key Points.** We viewed WTRG's 1/11 guidance event as supportive of our Overweight thesis. The '21 EPS guidance range of $1.64-1.69 was consistent with investor expectations and management extended the 5-7% EPS CAGR through '23. New items include (1) two new municipal transactions totaling $87M as well as (2) red meat for ESG conscience investors. We nudge up our 2021-24E EPS to/from $1.67/$1.65, $1.80/$1.78, $1.93/$1.91 & $2.07/$2.03. We also introduce our 25E of $2.20. Our forecast results in an EPS CAGR near the upper end of WTRG's targeted 5-7% range which we believe is reasonable given strong underlying rate base growth driven by accelerated pipeline replacement needs supplemented by a municipal M&A strategy that continues to gain momentum.
- **2 New M&A Deals Revealed – Positive Momentum Continues.** WTRG closed four municipal deals in 2020 for total rate base of $63M. In the pending column, the $277M DELCORA deal steals the show however WTRG has four other transactions with a combined value of $144M – includes three separate chunky wastewater deals (East Whiteland, PA $55M; Lower Makefield, PA $53M; Bourbonnais, IL $32M). WTRG has also been announced the winning bidder of two additional systems with a combined value of $30M which will move into the pending column once APA's are finalized. The company's deal development pipeline remains robust and management continues to express optimism that activity will start ramping up in the years ahead in the four states that only somewhat recently adopted FMV legislation (NC & OH in '18; TX in '19; VA in '20). Our model reflects primarily announced deal closures over the 2020-22 period plus a $75M/year placeholder in '23 & beyond.
- **Spotlighting DELCORA (Again!).** As we have previously opined, we believe the DELCORA deal represents material long-term value that is not currently reflected in the share price. Following the favorable court rulings on 12/28, PaPUC approval is the remaining hurdle with next key milestones including a 1/20 anticipated ALJ recommendation and a 3/11 commission approval deadline. Beyond the $277M rate base pick up at closure (expected early Q2'21), we are attracted to (1) the $700M of capital investments – $25-50M/year for typical repair/replace work plus roughly $300M over the 2026-28 period related to DELCORA's treatment plant – as well as (2) the likely substantial wastewater tuck-in deals that could transpire in the area. Simply put, we believe the DELCORA deal should, at a minimum, allow WTRG to continue to target a 5-7% EPS CAGR through the end of the decade if not bump it up to 6-8%.
- We offer some additional highlights from the 1/11 update on p.2 including (1) extension of the rate base growth targets, a brief discussion of the relatively low near-term regulatory risk profile and (3) announcements to hopefully lessen the ESG overhang.

$ EPS	2019A	2020E Curr.	2020E Prior	2021E Curr.	2021E Prior

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Together we'll go far

Other highlights from the 1/11 guidance event and update include:

- **Capex & Rate Base Guidance Largely Upheld.** Management indicated plans to invest $550M on the water/wastewater side (ex. M&A) in '21 and $450M for gas (up from $400M in '20). In total, roughly $3B of spend is expected over the 2021-23 period which will drive underlying 6-7% water/wastewater and 8-10% gas rate base CAGRs through '23. More than 50% of the spend is eligible for rider mechanism recovery

- **WTRG offers investors relatively low near-term regulatory risk.** The next PA water & wastewater rate case filing is expected in late '21. While WTRG's PA rate cases can never be overlooked given the meaningful % of rate base represented (more than 70% on the water/wastewater side), the utility has a long history of reaching constructive outcomes via settlement agreements and the ALJ recommendation in the pending AWK case honors a settlement agreement reached on 10/30.

  Otherwise commission approvals for FMV deals as well as regulatory treatment of the catchup portion of Peoples' repairs tax deduction (RTD) are the main items we are keeping an eye on at the state level. Further on the RTD treatment, a PaPUC order is expected in Q2'20 and we are optimistic that something similar to WTRG's proposal will be adopted. We would not rule out the possibility of a settlement with intervenors and note that evidentiary hearings are scheduled for later this month. Recall, WTRG's proposal would share the benefits 40% with ratepayers (through rate surcredits on bills) with the remaining 60% used as an increasing income tax expense offset over 2023-25 – this would avoid the need for Peoples to file to implement a base rate increase prior to 1/1/2026 while supporting the elevated pace of capex deployment and ensuring a fair opportunity to earn the allowed ROE.

- **Addressing The ESG Overhang.** WTRG committed to reducing annual Scope 1 and 2 GHG emissions by 60% by 2035 (using 2019 baseline) across both the gas and water utility platforms utilizing existing and proven methods and will look to get to net zero once technological advances allow. Other ESG-friendly updates include establishing multi-year plans to increase supplier and employee diversity as well as tying incentive comp to those metrics. Successfully addressing the ESG concerns that arose out of the recent acquisition of the Peoples gas utility and gaining wider spread acceptance by the investment mantra that seems to only be growing in popularity could help close some of the valuation gap between AWK.

Acronyms:

ALJ – Administrative Law Judge
APA – Asset Purchase Agreement
DELCORA – Delaware Country Regional Water Quality Control Authority
ESG – Environmental, Social, Governance
FMV – Fair Market Value
GHG – Greenhouse Gas
PaPUC – Pennsylvania Public Utility Commission

Price Target

Price Target: $52 from NC

Our $52/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.80. For WTRG's water utility multiple, we ascribe a roughly 5% discount to the 21E multiple we use for AWK (34-34.5X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The roughly 5% discount reflects a modestly lower earnings growth rate (we forecast 6-7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 17.0-17.5X (based on ATO, NWN, OGS & SR) and then apply a roughly 10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework. Key risks relate to regulatory, Peoples gas deal integration and M&A strategy execution.

Investment Thesis

Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio.

In March 2020, WTRG closed on the acquisition of Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, WTRG paid 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to other gas utility transactions at the time. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

Regulated operations account for more than 99% of consolidated revenues. Consolidated EPS is expected to be driven roughly 70% by water utility operations with the gas utility contributing the remaining 30%.

In February 2020, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Essential Utilities, Inc.

WTRG: Analyst Day Wrap Up -- Adjusting EPS Outlook

Equal Weight/$45

Water Utilities

Price Target Change

- **Key Points.** WTRG's 2/27 analyst day provided clarity around the company's EPS power for the next few years. After reporting adjusted '19 EPS of $1.47 (reflects the base water business without the impacts from external financings completed in 2019 for the Peoples acquisition), '20 EPS are expected to be $1.53-1.58 (pro forma for a 1/1 Peoples close vs. the anticipated 3/16). In addition, management forecasts a 5-7% EPS CAGR through '22 off the $1.47 base. This trails expected consolidated rate base growth of roughly 8% due to earned ROEs at recent/pending muni deals not yet earning the full keep plus some dilution. However, once another PA water rate case goes into effect (we assume a '21 filing; rates effective '22), then it sounds like EPS growth should track more closely to rate base growth. After flowing '19 actuals and analyst day disclosures through our model, we lower our 20-22E EPS to/from $1.56/$1.57, $1.65/$1.70 & $1.77/$1.80. We project a 6.5% EPS CAGR through '24. No change to our overall thesis or Equal Weight rating despite recent underperformance (down 10% since 2/18 relative to the S&P Utilities) as shares trade in-line with a 70% water/30% gas LDC blended multiple. We lower our 12-18 month price target to $45/share from $48 (26X our 22E) due primarily to lower peer group multiples since our last update.
- **EPS Outlook.** Our 2020-24E EPS are $1.56, $1.65, $1.77, $1.90 & $2.02. The addition of Peoples (3/16 close expected), including the $0.08-0.12 of EPS benefits anticipated by electing and flowing through the current portion of RTD at Peoples Gas, is what allows WTRG to guide to 2020 pro forma EPS of $1.53-1.58 (as if the deal closed 1/1). Our prior outlook did not include the RTD benefits – which we thought offered $0.10-0.15 upside – however we, as well as most investors that we have talked to, did not appreciate the headwinds facing the base water business in '20. This led to the guidance being viewed as somewhat disappointing and shares underperforming. After reporting adjusted '19 EPS of $1.47, management indicated 2020 base water EPS would have been relatively flat, all else equal. This is because (1) '19 benefited from the PA water repair tax deduction flowing to shareholders until new PA rates were effective mid-May, (2) there is roughly $200M of recent municipal system acquisition rate base additions that are not yet earning the allowed ROE in '20 (may actually be closer to break-even) and (3) the absence of any PA DSIC revenues until '21.
- **WTRG's Strategy.** The core growth drivers remain twofold. (1) Reinvest aggressively in existing systems and seek timely regulatory recovery. 2020 capex is $550M for water and $400M for gas with a total of $2.8B budgeted over the 2020-22 period. And we do not expect any falloff in those levels for the foreseeable future. (2) Actively pursue municipal M&A. ***Comment continues on p. 2***

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Together we'll go far

- **WTRG's Strategy *(continued…).*** Deal activity in the industry remains elevated, in large part due to states adopting FMV legislation, and WTRG is in various levels of discussions with systems representing a total of 320,000 customers. Besides PA and IL, WTRG seems to believe OH, TX and KY hold the most promise. Management's compensation is tied to a $60M/yr deal value target and the goal is to achieve 2-3% customer growth through organic and M&A. Management believes the capex budget can be financed without new equity whereas deal flow would require roughly 50% new equity, perhaps through the establishment of an ATM program in front of the DELCORA deal close (expected late '20). Speaking of DELCORA, enthusiasm remains high for the deal from the immediate rate base addition, meaningful future capex needs ($700M by 2028) as well as potential bolt-on wastewater deals perspectives. Other management priorities outlined at the analyst day include completing/integrating the Peoples and DECLORA transactions as well as maintaining ESG appeal (highlighted recent diversity and governance enhancements).

Acronyms:

ATM – At-the-market
DSIC – Distribution System Improvement Charge
ESG – Environmental, Social, and Governance
FMV – Fair Market Value
RTD – Repairs Tax Deduction

Price Target

Price Target: $45 from $48

Our $45/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 2.5% discount to our 70% water/30% gas utility hybrid multiple to our 2022E of $1.77. The 2.5% discount reflects merger execution/integration risk. For WTRG's water utility multiple, we start with AWK's 2021 P/E multiple of 29.4X (AWK represents the closest publicly traded peer) and apply a 5% discount (given AWK's higher growth rate and best-in-class management team). For WTRG's gas utility multiple, we utilize the 2021 pure play gas LDC median of 21.2X. Key risks include regulatory and M&A strategy execution related.

Investment Thesis

We are attracted to WTRG's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations and a strong balance financial profile. Our Equal Weight rating reflects valuation considerations in light of WTRG's pending agreement to acquire Peoples (a gas utility) and the associated P/E multiple, regulatory and deal execution/integration related risks.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio. Regulated operations account for more than 99% of consolidated revenues.

On 10/23/18, WTRG announced a deal to acquire Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, the deal appears to be 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to what we have seen in recent gas utility transactions. WTRG received PA regulatory approval on 1/16 and the deal is expected to close imminently. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

On 2/3, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Essential Utilities, Inc.

WTRG: What's In A Name? - Change Ironically A Harbinger Of COVID Resiliency

Equal Weight/$42

Water Utilities

Price Target Change

- **Key Points.** Management affirmed all aspects of guidance provided at the late February analyst day as WTRG's utility businesses are expected to be resilient to the challenges presented by COVID-19. It helps that the bulk of customers and revenues, for both water and gas, are residential and that the gas utility is past the high-demand heating season. In addition, constructive regulatory treatment of any incremental COVID-19 costs is expected. No change to our 2020-24E EPS of $1.56, $1.65, $1.77, $1.90 & $2.02. Our outlook is consistent with management's 2020 pro forma (as if the Peoples deal closed 1/1 and experienced normal weather from 1/1 through the 3/16 close) EPS guidance of $1.53-1.58 and 5-7% CAGR through 2022 off the '19 base. We reiterate our Equal Weight rating but lower our 12-18 month price target to $42/sh (23.5-24.0X our 22E) from $48/sh due to lower peer group multiples since our last update.
- **COVID-19 Impacts – Sales/Expenses.** Although it is early, management mentioned that preliminary April data shows that the increased residential usage is offsetting the decrease in C&I and gov't/public customers on the water side as the month came in right at budget. And with the heavy-use heating season over on the gas side, management does not see a material financial impact from usage but that could depend on how long the stay-at-home orders are in place. WTRG plans to track COVID-19 related expenses with an expectation that regulators will afford constructive recovery, particularly of bad debt expense given the implemented no shutoff policies for non-payment. Bad debt expense rose to 1.1% of revenues in the 2008-09 financial crisis which is about double the 0.5% that has been historically observed and embedded in water rates. That said, there are some costs that are lower which could help defray any increases. Net-net, the overall expense impact is not expected to be material.
- **COVID-19 Impacts – Capex/Liquidity.** In terms of capital deployment, a two week moratorium implemented on water work in PA did set the utility about $30M behind schedule. However, the ground is expected to be made up over the balance of the year and there is no change to WTRG's overall water and gas capex budgets. Access to capital is not an issue. WTRG, like other utilities, have taken precautionary steps to boost near-term liquidity. The capex budget can be financed without equity but M&A deals will require some – we expect about 50% of the purchase price. With that in mind, we think WTRG could be flexible with the exact timing of the $300M of equity needs outlined for later this year to finance DELCORA and other deals in the pipeline.
- Please see p. 2 for discussions of municipal M&A activity (spoiler alert, COVID-19 could increase the deal flow!), regulatory updates and a brief EPS & capex discussion.

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Together we'll go far

- **COVID-19 Impacts – Municipal M&A.** Similar to the thoughts expressed by AWK a few hours earlier, WTRG expects the volume of municipal M&A discussions/deals to be positively impacted by COVID-19. Many municipalities were already challenged financially and some even operationally (complying with increasingly stringent EPA standards) before the pandemic. The economic shutdowns have likely only exacerbated those pressures.

  Management remains upbeat about the pipeline of deals, noted how a number of decent-sized opportunities have been advanced that can hopefully be talked about in the not so distant future and highlighted how fair market value (FMV) legislation continues to open doors. VA adopted FMV earlier this year – all 8 of WTRG's water states now have it – and deal momentum continues to build in other recently adopted states like OH & TX. Having closed on the Campbell, OH water deal earlier this year, WTRG has the New Garden, PA ($30M), East Norriton, PA ($21M) and DELCORA ($277M) wastewater deals pending. The goal remains to achieve 2-3% customer growth through organic and M&A efforts.

- **Regulatory Updates.** WTRG's near-term regulatory calendar is fairly light as the PA water and gas utilities completed major base rate cases last year. The two proceedings of greatest investor interest are the DELCORA acquisition approval (filed in Q1; late '20 close expected) and PA regulatory treatment of the catch-up component of Peoples repairs tax deduction benefit (file this summer; clarity perhaps around YE'20; any retention by WTRG should be incremental to current outlook). Despite the challenges presented by stay-at-home orders, WTRG has not experienced any material regulatory timeline delays.

- **EPS Outlook.** Our 2020-24E EPS are $1.56, $1.65, $1.77, $1.90 & $2.02. The core growth drivers remain (1) capex/rate base growth by aggressively reinvesting in existing systems and seeking timely regulatory recovery and (2) municipal M&A. 2020 capex remains $550M for water and $400M for gas with a total of $2.8B budgeted over the 2020-22 period and we do not expect any falloff in those levels for the foreseeable future.

- In fact, an internally ordered report conducted by Black & Veatch to assess the overall safety of the Peoples gas system, including pressure risk, was completed earlier this month. While the conclusions were that the system is safe, WTRG is evaluating the recommendations made and preparing an action plan. There is an opportunity to invest more to further enhance safety and that will be addressed in future plans with an eye towards rate affordability.

Acronyms:

C&I – Commercial & Industrial
DELCORA – Delaware Country Regional Water Quality Control Authority

Price Target

Price Target: $42 from $48

Our $42/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.77. For WTRG's water utility multiple, we ascribe a 5-10% discount to the 21E multiple we use for AWK (27.0-27.5X). The 5-10% discount reflects both a modestly lower EPS growth rate (we forecast 6.5% for WTRG vs. 8% for AWK) as well as lower ESG appeal (in particular, the recent Peoples deal). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of roughly 21X. Key risks include regulatory and M&A strategy execution related.

Investment Thesis

We are attracted to WTRG's strong fundamentals - a proven EPS growth strategy, a growing rate base, constructive regulation, efficient operations and a strong balance financial profile. Our Equal Weight rating reflects valuation considerations in light of WTRG's recently closed acquisition of Peoples (a gas utility) and the associated P/E multiple, regulatory and deal execution/integration related risks.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio. Regulated operations account for more than 99% of consolidated revenues.

On 10/23/18, WTRG announced a deal to acquire Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, the deal appears to be 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to what we have seen in recent gas utility transactions. WTRG received PA regulatory approval on 1/16/20 and the deal closed two months later on 3/16. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

On 2/3, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Essential Utilities, Inc.

WTRG: Recent Pullback Creates Opportunity – Upgrade To Overweight

Overweight/$45

Water Utilities

Rating Change

- **Key Points.** We upgrade our rating on shares of WTRG to Overweight from Equal Weight as we believe the recent underperformance has created an attractive entry point. The cause of the relative pullback is not entirely clear (we offer some potential drivers in this report) but the bottom line is that we do not believe anything that has transpired fundamentally since the Q2'20 report in early August has materially impacted (1) the likelihood of DELCORA closing, (2) our EPS outlook or (3) our investment thesis.

  While the DELCORA deal is highly supportive of WTRG's growth aspirations, we consider the future to be bright without it driven by elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends. We believe relatively low risk, regulated EPS growth of at least 6% is achievable – that rate of growth would simply be enhanced if DELCORA closes given the $700M of required investment needed in the system by 2028 as well as potential further municipal wastewater deals in the region. No change to our 2020-24E EPS of $1.56, $1.65, $1.77, $1.90 & $2.02 (which assumes an end of Q1'21 DELCORA close). Our 12-18 month price target of $45/share (25.4X our 22E) is supported by P/E and DDM analyses.

- **Breaking Down Our P/E Valuation – Water.** Our P/E analysis results in a $45/share value and remains predicated on a 70% water/30% gas utility hybrid P/E multiple applied to our 2022E of $1.77. For WTRG's water utility multiple, we ascribe a 5-10% discount to the 21E multiple we use for AWK (30X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The 5-10% discount reflects a modestly lower earnings growth rate (we forecast 6-7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility).

- **Breaking Down Our P/E Valuation – Gas.** For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 18X (based on ATO, NWN, OGS & SR) and then apply a 5-10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of an accelerated pipeline replacement effort under the PaPUC-approved LTIIP program which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive regulatory framework of the PaPUC which includes fully forecasted test years, infrastructure surcharge mechanism recovery and a history of settled regulatory outcomes. ***(Comments continue on p. 2)***

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

- **Breaking Down Our P/E Valuation – Gas.** For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 18X (based on ATO, NWN, OGS & SR) and then apply a 5-10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort (mainly bare unprotected steel) under the PaPUC-approved LTIIP program which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA (the bulk of Peoples service territory), which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive regulatory framework of the PaPUC which includes fully forecasted test years, infrastructure surcharge mechanism recovery and a history of settled regulatory outcomes. Lastly, with the electrification theme gaining momentum and potentially challenging the long-term outlook for the gas LDC model (existential threat?), we no longer believe the publicly traded LDC multiples really reflect a takeout premium and thus no adjustment is necessary when valuing Peoples.

- **Other P/E Valuation Thoughts.** Shares trade at 23.8X & 22.2X our 21E & 22E EPS or roughly 15% discounts to the "large cap" pure play waters (AWK, AWR, CWT, MSEX & SJW) of 27.9X and 26.1X. That seems a bit steep given a relatively commensurate EPS growth profile, a large concentration of EPS power and growth stemming from the water utility and a similarly large concentration of EPS power stemming from the constructive PA regulatory environment. Perhaps the main differences relate to WTRG's inferior ESG appeal and credit metrics (though S&P assigns WTRG an "A"/Stable credit rating; the same as AWK & MSEX, a notch below AWR & CWT and a notch above SJW). If an in-line water multiple was applied, it would suggest a 12-18 month forward share price of closer to $50/share. It is also interesting to note that shares of WTRG currently trade at P/E multiples similar to high quality electric utilities WEC & XEL despite the water utility group median as a whole trading at roughly 70% premiums to regulated electrics.

- **What If DELCORA Does Not Happen?** At the risk of stating the obvious, we prefer the WTRG story with the DELCORA deal closing than without it. DELCORA is really somewhat of a unique strategic deal in our view given it not only increases WTRG's rate base by $277M out of the gate but offers meaningful future capex needs ($700M by 2028) as well as potential bolt-on wastewater deals in the region, particularly from municipalities that are wholesale wastewater customers of DELCORA's as well as the Tredyffrin Township Municipal Authority's trunk sewer system that WTRG acquired in 2018.

  However, much of the accretion and longer-term benefits of the deal that we love so much do not start impacting WTRG's financials until the back half of our 2020-24 outlook or beyond – in fact, we believe the assumptions embedded in our model could prove conservative if DELCORA closes. On the capex side, we only bump up our '21 & '22 forecast by $25M for DELCORA spend and then modestly grow that in '23 & '24 as it is our understanding that the majority of the $700M of capex actually occurs more in the 2026-28 period as a treatment plant expansion and pipeline is needed to get DELCORA off Philadelphia's wastewater system by 2028. On the M&A side, we do not increase our annual deal value placeholder of $60M for the enhanced opportunity set in the Southeast PA region that DELCORA could provide.

  If we were to completely strip out the DELCORA deal, the aforementioned tick up in capex that we assume in '21-24 and all of the associated external financing (including roughly $150M of equity), it only has a modest $0.03-0.05 impact (less than 3%) on our 2021-24E EPS. Keep in mind that when FMV deals are first consummated, the acquiring utility typically just inherits the existing rates and it therefore takes at least 2-3 years to go through a rate case cycle in order get the acquired system's rate base to earn similar returns as the rest of acquiring utility's water or wastewater operations in the state.

  Put another way, we believe WTRG's future growth would still be attractive even if the DELCORA deal does not come to fruition. There would still be time for management to continue to capitalize on the industry's FMV consolidation momentum – including in OH and TX which recently adopted the legislation and where WTRG is the big fish in the pond – and replace the growth that we believe will transpire in the 2nd half of the decade if the DELCORA deal does close.

- **Dissecting The Underperformance.** Since 8/10, shares of WTRG are -18%. Amongst water peers, SJW is -16% over the same period while the others range from -11% (MSEX) to -5% (AWK). Also worth noting, the gas LDCs are -12% while the S&P Utilities are -5%. So what gives? We have fielded a number of inbound inquiries from investors and have talked to the company but it is honestly hard to pinpoint the reason. We offer three potential contributing factors.

(1) Macro And The Flight To Quality. Utilities as a whole have remained out of favor in the risk-on market and those that investors seemingly want to own have been the highest quality names with generally the strongest credit metrics. This would be AWK & AWR on the water side whereas SJW & WTRG have weaker credit metrics due to recent large scale M&A.

(2) Gas Further Out Of Favor. It also does not help that gas LDCs have fallen further out of favor and again trade essentially in-line with electrics on a P/E basis. Gas LDCs used to trade at a premium to electrics (but below waters) due to higher rate base CAGRs spurred by pipe replacement and relatively lower regulatory risk. However the concern lately seems to be more existential due to natural gas bans being contemplated in cities on both the west and east coasts as well as electrification potential and the rising prospects of renewables plus storage to replace gas-fired generation. Most investors that we talk to use a gas multiple to value the 30% of WTRG's EPS derived from Peoples, which is consistent with our approach.

(3) Management Putting The Cart Before The Horse? Uncertainty exists as to whether the pending $277M DELCORA deal actually closes. We are relatively confident in WTRG's ability to gain PaPUC approval though it remains early days. Recently on 8/31, OCA's request (citing COVID) for a 60-day extension of the statutory deadline to 3/26/21 was granted whereas Delaware County's petition (which was supported by OCA and BI&E) to stay the proceeding in its entirety until the Court of Common Pleas litigation (discussed below) concludes was denied – neither should have caused WTRG shares to underperform in our opinion. Key remaining items under the PaPUC's updated procedural schedule issued 9/4 include standard public input hearings on 9/16, intervenor testimony due on 9/29, evidentiary hearings begin 11/9 and a recommended decision by 1/20. While the PaPUC docket is certainly worth monitoring, we consider the courts to be the critical path to deal closure.

There is a complaint in the Court of Common Pleas of Delaware County filed by Delaware County regarding essentially the County Council's attempt to (1) dissolve DELCORA based on an ordinance the County Council passed on 6/4/20 and/or (2) dispute the legality of the irrevocable trust and therefore gain access to the $210M of net sales proceeds (after DELCORA debt pay down) earmarked for the trust fund. If successful on #1, the County Council may argue that the asset purchase agreement with Aqua Pennsylvania is unenforceable. On #2, the County Council would like to see at least some of the proceeds go for taxpayer benefit (offset forecasted tax increases) versus just ratepayers. DELCORA's plan, as outlined when the deal with WTRG was announced in September 2019, is to create a rate stabilization fund (via the trust) that will keep ratepayers' annual bill increases at 3% or less over the next 8 years despite the massive amount of capital that needs to be invested into the system.

A hearing in the court case was held last Wednesday (9/9). WTRG interpreted the judge's tone as leaning positive based on the strong legal arguments in support of the transaction. However, the timeline for resolution appears like it will (not surprisingly) take longer than management originally thought. It is our understanding that the next scheduled court hearing on 9/23 will predominately focus on the issues around the trust while the final hearings are not slated to conclude until 10/21. As such, the judge's ruling might not come until late October at the earliest unless of course a settlement is reached.

Despite this uncertainty, WTRG pulled the trigger on a roughly $300M forward stock offering in mid-August. WTRG could of course elect cash settlement if all of the equity is not ultimately needed (we estimate roughly half is for non-DELCORA deals). Regardless, it is somewhat reminiscent of the share issuance "jumping of the gun" by WTRG & SJW in the recent Peoples & CTWS mergers where ultimate regulatory approval did not come for another roughly 9 months.

That all being said, it is our understanding that the deal is not necessarily dead if the court rules in Delaware County's favor. According to WTRG management, dialogue from the new all-Democrat County Council members seems to support system privatization efforts. Therefore it could be possible to perhaps re-cut the deal – whether that could be done through exclusive negotiations or if the County Council would put the DELCORA system out for bid is unclear (would open the door for others, like AWK who has previously expressed an interest in acquiring the system, to come in and compete). However, if the court only sides with Delaware County regarding the trust and the County Council is able to get their hands on some/all of the sale proceeds, the deal

could still happen it would just result in higher rates for DELCORA ratepayers as WTRG seeks recovery of the significant capital upgrades needed with lower/no funds set aside to help offset the impact.

- **Quick Repairs Tax Update.** The only other WTRG development since the Q2'20 call worth noting relates to Peoples pending request for treatment of the repairs tax catchup benefit. Initial intervenor statements regarding WTRG's proposal were filed on 8/26. Not surprisingly OCA and BI&E expressed concerns regarding the balance of ratepayer and shareholder interests. That said, WTRG was not surprised by the parties' stated positions.

  Recall, WTRG filed in early August for PaPUC treatment of the catch up portion of the Peoples repairs tax deduction election. The filing outlined a $381M catch up deduction and proposed to share the benefits between customers (40%) and shareholders (60%). For customers it would amount to a $14M/year benefit (in the form of a nearly 2% surcredit on the average monthly bill) over 4 years beginning 1/1/21. The remaining benefit would be deferred and amortized as an offset to income tax expense over the 2023-2025 period – specifically, 5% in 2023, 35% in 2024 and 60% in 2025 – in an effort to offset normal regulatory lag while essentially keeping the earned ROE consistent with allowed levels. This would extend the time between the next base rate case to approximately 6 years (delay the need for a base rate increase effective prior to 1/1/2026 per Peoples' current projections) while supporting the elevated pace of capex deployment needed to replace pipes and drive safety improvements.

  WTRG had communications with regulators and other key parties prior to making this filing which makes us hopeful that the proposal will be positively received and that a constructive outcome will ensue, perhaps via a settlement. Approval of the shareholder benefit aspect of the request would increase our confidence in the gas utilities' ability to achieve our forecast – we assume gas utility earned ROEs of 10-10.3% which we believe is reasonable and consistent with Peoples 2019 rate order. On the flip side, if the PaPUC decides to go a different direction with the catchup benefits, we still believe our 2023 & beyond EPS levels are reasonable within the backdrop of the constructive PA regulatory framework. It could simply necessitate filing for a base rate increase sooner which would bring with it associated regulatory risk.

Acronyms:
BI&E – the PaPUC's Bureau of Investigation and Enforcement
DELCORA – Delaware Country Regional Water Quality Control Authority
ESG – Environmental, Social, Governance
FMV – Fair Market Value
LDC – Local Distribution Company
LTIIP – Long-Term Infrastructure Improvement Plan
OCA – Office of Consumer Advocate
PaPUC – Pennsylvania Public Utility Commission
S&P – Standard & Poor's

Price Target

Price Target: $45 from NC

Our $45/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.77. For WTRG's water utility multiple, we ascribe a 5-10% discount to the 21E multiple we use for AWK (30X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The 5-10% discount reflects a modestly lower earnings growth rate (we forecast 6-7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 18X (based on ATO, NWN, OGS & SR) and then apply a 5-10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework. Key risks relate to regulatory, Peoples gas deal integration and M&A strategy execution.

Investment Thesis

Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio.

In March 2020, WTRG closed on the acquisition of Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, WTRG paid 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to other gas utility transactions. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

Regulated operations account for more than 99% of consolidated revenues. Consolidated EPS is expected to be driven roughly 70% by water utility operations with the gas utility contributing the remaining 30%.

In February 2020, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Rating Basis Information:

AWK Thesis: We believe AWK is well positioned to capitalize on favorable industry dynamics which should lead to above average rate base, EPS and DPS growth. Our Equal Weight rating reflects the fact that shares trade at roughly 10% premiums to water utility peers on our 21E & 22E EPS which we believe is adequate. While we consider AWK's EPS (8.0-8.5%) and dividend (9%) growth prospects as well as management team best in class for the water industry (as well as top tier for our utility coverage in general), takeout and liquidity/scarcity premiums that are arguably embedded in the water median multiple should not apply to AWK. In addition, we are cognization of the fact that water utilities as a whole trade at roughly 55% premiums to regulated electric and gas peers.

AWR Thesis: We regard AWR as a low risk water utility with a growing dividend that operates under generally constructive CA regulatory principles. That said, the overall constructiveness of CA regulation has been called into question recently and bears monitoring. On the non-regulated side, we believe ASUS could contribute 20-25% to consolidated EPS with upside potential if new military contracts are awarded. Our Equal Weight rating reflects valuation considerations as shares trade at roughly 10% P/E premiums to water utility peers on our 21E & 22E EPS. We consider a 5-10% premium warranted as AWR has the industry's strongest balance sheet and credit metrics (no new equity is needed) as well as a good financial track record (management consistently executes/delivers strong results). However, those positives are partially by offset by an EPS CAGR (6-7%) that is largely commensurate with peers and heightened regulatory risk.

SJW Thesis: We regard SJW as a relatively low-risk water utility with a secure and growing dividend. Despite the CTWS merger which added regulatory diversity, roughly 60% of utility earnings are derived from California. As such, SJW remains highly dependent upon California regulation which offers the state's utilities generally constructive regulatory principles. That said, the constructiveness of CA regulation has been called into question recently and SJW's lack of a full decoupling mechanism exposes earnings to a degree of volatility that other CA water utilities do not currently face. Our Equal Weight rating is premised on the fact that, given recent outperformance, shares of SJW now trade at only 7-8% discounts to "pure play" water utility peers on our 21E & 22E EPS. While we think shares could continue to "re-rate" a little more over time, the pathway and timing combined with the magnitude of upside is less compelling from a risk/reward standpoint today.

Goldman Sachs & Co. LLC

We reiterate our Buy rating (on Conviction List) on regulated water/gas utility Essential Utilities (WTRG) following 3Q2020 and a positive guidance revision. As highlighted in our recent upgrade note, we continue to see WTRG as a secular winner to benefit from an estimated $750 billion of water infrastructure investment needs (per the EPA) in a very fragmented market. This represents at least a $7bn opportunity – well above its total current water asset base – excluding any market share gains through municipal and other water utility acquisitions.

We see the market valuing WTRG as a 60% gas utility despite its 70% water earnings composition, given the current 6x (20%) P/E discount for the company's water utility segment versus the only other large-cap water utility American Water (AWK, Buy). With WTRG's normalized EPS growth potential similar to AWK's, one of the highest in our coverage universe, and management's strategy to further increase its water utility exposure over time, we believe WTRG deserves a premium valuation to reflect its high growth, largely ESG-friendly profile.

Below we highlight some key takeaways from the 3Q20 earnings call:

- **WTRG continues to benefit from work-from-home (WFH) demand trends.** The company recorded net positive demand at its utilities in both 2Q20 and 3Q20, given the vast majority of its revenues come from its residential customer base, which more than offset declines in commercial and industrial demand. We see this as a positive indicator of its ability to weather covid-related demand changes, which also allowed WTRG to raise its 2020 guidance to the top end of its range. We raise our 2020 EPS to $1.57 from $1.55 partly to reflect this benefit, while our 2021-2022 estimates remain unchanged.
- **Peoples Gas remains a one-off gas utility acquisition.** Management reiterated that the recent acquisition of PA-based Peoples Gas made sense based on its robust organic growth through decarbonizing gas pipe replacements, as well as its favorable geographic position in the heart of the Marcellus shale that provides low-cost for a region where gas remains a complementary energy source for the long-term. That said, they confirmed that future inorganic growth will only come from municipal water system acquisitions. We see WTRG's 70% water utility earnings exposure that should grow over time as still warranting closer to a water utility premium average.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

- **Management still expects the DELCORA wastewater acquisition to close in 1H2021.** While awaiting the outcome on the validity of the asset purchase agreement for the proposed acquisition, management remains confident in their ability to close the deal by March or April 2021. We believe WTRG's pipeline of potential acquisitions should still enable the company to sustain its inorganic growth even if the DELCORA deal does not materialize, with ~$300mn in forward equity already priced to help finance the additions. Our model continues to assume 1Q2021 issuance for the equity.

Our $51 12-month price target (unchanged) is based on a SOTP approach, with 35x/22x P/E applied to our 2021 water/gas utility EPS estimates, respectively. **Downside risks to our call include:** 1) PA regulation turns less constructive, which impacts earnings growth potential given the bulk of WTRG's earnings are derived from the state's water/gas operations, 2) the proposed DELCORA municipal water system acquisition fails to receive necessary approvals for completion, which could impact longer-term water rate base growth outlook barring replacement with other municipal acquisitions, and 3) longer-term growth concerns about the gas utility segment further compresses WTRG's valuation, both on an absolute basis and relative to pure-play water utilities.

Exhibit 1: We continue to view WTRG's meaningful relative P/E discount as unwarranted based on its 70%/30% water/gas profile...
FY2 P/E for AWK, WTRG, and an illustrative performance of a 70%/30% water/gas utility

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., WEC Energy Group, Xcel Energy Inc.

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by the Global Investment Research Division of Goldman Sachs and referred to in this research.

Goldman Sachs has received compensation for investment banking services in the past 12 months: Essential Utilities Inc. ($41.19)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: Essential Utilities Inc. ($41.19)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: Essential Utilities Inc. ($41.19)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: Essential Utilities Inc. ($41.19)

Goldman Sachs makes a market in the securities or derivatives thereof: Essential Utilities Inc. ($41.19)

Goldman Sachs is a specialist in the relevant securities and will at any given time have an inventory position, "long" or "short," and may be on the opposite side of orders executed on the relevant exchange: Essential Utilities Inc. ($41.19)

Distribution of ratings/investment banking relationships

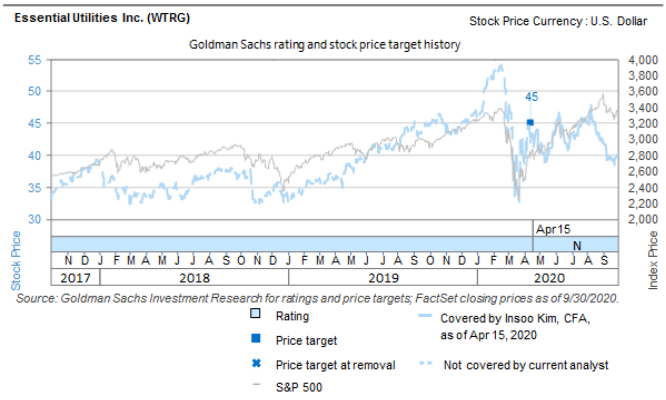
Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	49%	35%	16%	64%	57%	54%

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

As of October 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,122 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

28 May 2020

Essential Utilities (WTRG US)

Buy: Current challenges a catalyst for integration

Equities
Water Utilities

United States

- Challenges in US water – how Essential is responding
- Guidance intact; bond proxy status unaltered
- Maintain Buy rating and USD50 target price

Growth strategy: Essential Utilities has a 3-pronged growth strategy: A growing core water and wastewater business; opportunistic pursuit of large, regulated utility/infrastructure targets – the company delivered on this with the Peoples gas acquisition (recently completed) and the DELCORA waste water transaction, which is expected to complete regulatory approvals by 2022; and MBAs (Market Based Activities), which are probably going to be less of a priority given the current challenges.

COVID-19 challenges: We analyse the risks to Essential from COVID-19 – many of these are mitigated by its large residential customer base. During its Q1 earnings call, management explained that the Peoples acquisition had been completed on the day that the US went into COVID-19 lockdown. This was a catalyst for harmonising business practices across the two separate businesses, so corporate integration might be quicker than otherwise expected. Its 2020 guidance remains: 2020 EPS of USD1.53 to USD1.58, and 2019-22e earnings CAGR of 5% to 7%.

Bond proxy: Essential's share price has outperformed the S&P 500 by 1% since 1 January 2019. It is trading at a discount to its water peer group's 2020e PE, but in line with some of the US electricity utilities, according to Refinitiv Datastream. This reflects, in our view, its multi-utility status. The US Treasury 10-year yield has fallen sharply. WTRG, as a defensive utility, should be inversely correlated to bond yields.

Maintain Buy rating and target price of USD50: We value Essential Utilities via three methodologies: DCF, dividend yield, and the average of PE multiple and rate-based valuations: We now adopt a lower 2.5% risk-free rate (from 3.0%) set by our equity strategists and used for the other US utilities under our coverage. We maintain our equity risk premium and beta assumptions of 3% and 0.60, respectively. Our DCF valuation increases to USD50.0 (from USD41.1). In our PE multiple-based valuation, we maintain our target multiple in line with market peers, at 30.0x. We use an unchanged water peer group P/B of 2.4x as a proxy for a rate-base valuation. This is consistent with the US utilities under our coverage and a proxy for EV. The average of our PE and rate-based valuations adjusts to USD51.6 (from USD51.9). For our Yield-based valuation, we increase our target yield to 2.13% from 1.75%, in line with Water and Related Utilities peers. This results in a lower Yield-based valuation of USD47.5 (from USD57.8). Overall, these valuations lead to an unchanged TP of USD50.00, which implies 21.0% upside. Consequently, we maintain our Buy rating.

Current challenges a catalyst for integration

- Challenges in US water – how Essential is responding
- Guidance intact; bond proxy status unaltered
- Maintain Buy rating and USD50 target price

Investment summary: Three-pronged approach

Essential Utilities has core competencies in infrastructure investment (pipes and water production plant), regulatory affairs, and operations. Using these as pillars, Essential has created a 3- pronged growth strategy:

1. Municipal initiative: A growing core water and wastewater business - Aqua. This remains the primary focus for the company;
2. Strategic M&A: Opportunistic pursuit of large, regulated utility/infrastructure targets – the company delivered on this with the Peoples gas acquisition (recently completed) and the DELCORA waste water transaction, which is expected to complete regulatory approvals by 2022.
3. MBAs (Market Based Activities): Complementary to the regulated businesses. Capitalises on broader infrastructure renewals, but are probably going to be less of a priority given the current challenges.

Customer composition at FY2019

Quick integration

During its Q1 earnings call, management explained that the Peoples acquisition had been completed on the day that the US went into COVID-19 lockdown. This was a catalyst for harmonising business practices across the two separate businesses in order to protect staff, and continue to deliver essential services. This has meant that corporate integration might be quicker than otherwise expected for the two companies.

COVID-19 pandemic related risks for US water and gas utilities

Essential Utilities is a stable company with regulated revenue base. However, it is not completely immune to the impending economic downturn. We highlight some of these risks as follows, how material they are, and discuss how the company is addressing and mitigating them.

- **Customer delinquencies:** Water and gas utilities are expected to experience an increase in customers being delinquent in paying their water bills. However, water utilities will have to continue to provide water to these delinquent customers rather than enact shut-offs. Hence, companies will incur additional costs.
- **Revenue shortfall:** US utilities are likely to experience some revenue shortfall due to declines in commercial, industrial, and institutional water consumption. This revenue shortfall may be offset by an increase in residential user charge revenue due to “stay-at-home” orders. Essential receives only 20% of its revenues from commercial and industrial customers. In April, according to management on the Q1 call, the company saw increased domestic demand from the shutdown offsetting much of the commercial and industrial volume reductions. The same principle applied in the Peoples business.
- **Reduced system development charges:** The COVID-19 crisis may slow the growth in new development and housing starts, which will impact the financial losses of water and gas utilities. A slowing of new customer growth would reduce new system development. Essential however, given its scale, still has growth from infrastructure rehabilitation for its existing customer rate base.
- **Increased personnel expenses:** There may well be some potential for additional costs associated with the pandemic such as for PPE. The company said during the Q1 that these expenses are relatively immaterial.
- **Delayed and reduced capital expenditures:** At Q1, management said only cUSD30m of project work had been delayed compared with its cUSD1bn of capital expenditure run rate.
- **Deferred water and gas rate increases:** Utilities may also experience future revenue losses as a result of deferrals of planned rate increases. These deferrals may exacerbate community economic impacts by further reducing utility capital spending and put the utility sector further behind in addressing its capital infrastructure needs. Essential has pending rate cases in Indiana, New Jersey, North Carolina, and Ohio, with total annualised revenue increase of USD10.1m. Rate cases appear to be proceeding on track and there is no indication of deferrals as yet. Given the rate cases proposed are relatively modest we do not see this as a risk.

Q1 2020 summary

Essential Utilities hosted a conference call for Q1 2020 earnings on 7 May 2020.

- Essential invested USD118.7m in the first three months. This does not include an additional USD53.5m that was invested by Peoples.
- It closed its acquisition of the water system of Campbell, Ohio; a utility with approximately 3,100 customer connections. For the quarter, customer growth for the company's water utilities totalled 0.6%, including organic growth.
- As a preventive measure to address liquidity concerns related to COVID-19 and its potential economic and capital markets impacts, the company secured and borrowed an additional USD500m on a 364-day term loan in early April 2020.

Outlook: FY2020 outlook reiterated

Essential reiterated its FY2020 outlook as follows:

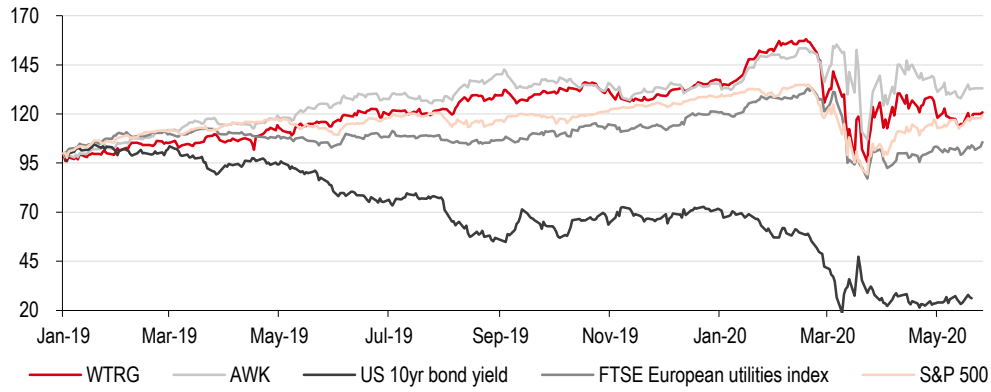
- Essential has signed purchase agreements for other municipal water and wastewater acquisitions that are expected to add the equivalent of over 205,000 water and wastewater retail customers, and approximately USD327m in expected rate base.
- Adjusted income per diluted common share (non-GAAP) of USD1.53 to USD1.58
- 2019-22e earnings CAGR of 5 to 7%
- Regulated water segment infrastructure investments of cUSD550m in 2020
- Regulated natural gas segment infrastructure investments of cUSD400m in 2020 on a full-year basis (adjusted to include capital invested in 2020 prior to Essential's ownership)
- Infrastructure investments of approximately USD2.8bn through 2022 in existing operations to rehabilitate and strengthen water, wastewater, and natural gas systems (including regulated natural gas segment capital invested in 2020 prior to Essential's ownership)
- 2019-22e regulated water segment rate base CAGR of 6% to 7%
- 2019-22e regulated natural gas segment rate base CAGR of 8 to 10%
- Total annual regulated water segment customer growth of between 2% and 3% on average depending upon regulatory approval
- Gas customer count expected to be relatively stable for 2020.

Performance against peers

Essential's share price has outperformed the S&P 500 by 2% since 1 January 2019. It is trading at a discount to its water peer group's 2020e PE, but in line with some of the US electricity utilities according to Refinitiv Datastream. This reflects, in our view, its multi-utility status.

The US Treasury 10-year yield has fallen sharply. WTRG, as a defensive utility, should be inversely correlated to bond yields.

WTRG vs AWK vs UST 10yr bond yield vs FTSE European utilities index vs S&P500



Source: Refinitiv Datastream

Credit metrics analysis

According to Moody's, WTRG needs to maintain its RCF/ net debt ratio in the range of 7%-14% and FFO/ net debt in the range of 11%-18% to maintain its Baa2 credit rating.

During the Q1 2020 conference call, Essential said that as the equity markets recover, the company will look for the appropriate time to issue approximately USD300m of equity in later 2020 or early 2021. That equity, as first mentioned on the Investor Day, is necessary to appropriately capitalise DELCORA and other acquisitions in the pipeline.

We have modelled for this equity issuance as well as completion of this acquisition in 2021. Given the increased equity, the company's credit metrics appear to remain in the target metric range for the current credit rating.

Credit metrics analysis

	2020e	2021e	2022e
RCF/ net debt	8.6%	8.5%	8.3%
FFO/ net debt	14.5%	14.3%	14.0%

Source: HSBC estimates

Change in estimates

We have updated our estimates post the Q1 2020 results posted on 7 May 2020. We have also updated our model for USD300m of equity offering, which has increased our number of shares outstanding and lowered our net debt assumptions for 2021e.

We continue to use pro-forma 2020 assumptions to smooth the effect of the costs and timing of the Peoples deal, excluding transaction costs and assuming the deal was completed to benefit from the gas heating season on a normalised weather basis. This is the basis on which Essential will report its underlying results.

Valuation and risks

We value Essential Utilities via three methodologies: DCF, dividend yield, and the average of PE multiple and rate-based valuations. Taking the average of the three approaches gives us our target price of USD50.00 (unchanged).

- Previously we had used a 3% risk-free rate, in line with the utility methodology set out in our report *European Utilities: The three Rs: Renewables, low rates and low risk* (20 February 2020). We now adopt the lower HSBC 2.5% set by our equity strategists (see *Cost of Equity*, 10 February 2020) and used for other US utilities under our coverage. Our equity risk premium and beta assumptions remain unchanged at 3% and 0.60, respectively. Our DCF valuation increases to USD50.0 (from USD41.1).
- In our PE multiple-based valuation, we maintain our target multiple in line with market peers, at 30.0x. We use a water peer group P/B of 2.4x (unchanged) as a proxy for a rate-based valuation. This is consistent with all US utilities under our coverage and is a proxy for EV. The average of the two declines to USD51.6 (from USD51.9), reflecting our updated estimates.
- For our Yield-based valuation, we increase our target yield to 2.13% from 1.75%, in line with its Water and Related Utilities peers. This results in a decreased Yield valuation of USD47.5 (from USD57.8).

Overall, these changes lead to an unchanged TP of USD50.00, which implies 21.0% upside; we reiterate our Buy rating as we believe the combination of regulated investment and earnings growth is attractive.

Summary of valuation (USD)

Particulars	New	Previous
Current price as on 26-May-20	**41.3**	**NA**
DCF (updated estimates lower risk-free rate	50.0	41.1

Source: HSBC estimates

Downside risks include:

Essential Utilities failing to achieve the desired rate case revisions and infrastructure surcharges; lacking organic growth from asset replacement; inability to take advantage of the Fair Market Value legislation opportunity; dividend growth at a lower rate than we assume; inability to gain the Fair Market Value premium required in the systems it wants to acquire in Pennsylvania. Its current acquisitions of systems – New Garden and Limerick – are facing challenges to the premium proposed by Aqua.

Important disclosures

Equities: Stock ratings and basis for financial analysis

HSBC and its affiliates, including the issuer of this report ("HSBC") believes an investor's decision to buy or sell a stock should depend on individual circumstances such as the investor's existing holdings, risk tolerance and other considerations and that investors utilise various disciplines and investment horizons when making investment decisions. Ratings should not be used or relied on in isolation as investment advice. Different securities firms use a variety of ratings terms as well as different rating systems to describe their recommendations and therefore investors should carefully read the definitions of the ratings used in each research report. Further, investors should carefully read the entire research report and not infer its contents from the rating because research reports contain more complete information concerning the analysts' views and the basis for the rating.

From 23rd March 2015 HSBC has assigned ratings on the following basis:

The target price is based on the analyst's assessment of the stock's actual current value, although we expect it to take six to 12 months for the market price to reflect this. When the target price is more than 20% above the current share price, the stock will be classified as a Buy; when it is between 5% and 20% above the current share price, the stock may be classified as a Buy or a Hold; when it is between 5% below and 5% above the current share price, the stock will be classified as a Hold; when it is between 5% and 20% below the current share price, the stock may be classified as a Hold or a Reduce; and when it is more than 20% below the current share price, the stock will be classified as a Reduce.

Our ratings are re-calibrated against these bands at the time of any 'material change' (initiation or resumption of coverage, change in target price or estimates).

Upside/Downside is the percentage difference between the target price and the share price.

Prior to this date, HSBC's rating structure was applied on the following basis:

For each stock we set a required rate of return calculated from the cost of equity for that stock's domestic or, as appropriate, regional market established by our strategy team. The target price for a stock represented the value the analyst expected the stock to reach over our performance horizon. The performance horizon was 12 months. For a stock to be classified as Overweight, the potential return, which equals the percentage difference between the current share price and the target price, including the forecast dividend yield when indicated, had to exceed the required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). For a stock to be classified as Underweight, the stock was expected to underperform its required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). Stocks between these bands were classified as Neutral.

*A stock was classified as volatile if its historical volatility had exceeded 40%, if the stock had been listed for less than 12 months (unless it was in an industry or sector where volatility is low) or if the analyst expected significant volatility. However, stocks which we did not consider volatile may in fact also have behaved in such a way. Historical volatility was defined as the past month's average of the daily 365-day moving average volatilities. In order to avoid misleadingly frequent changes in rating, however, volatility had to move 2.5 percentage points past the 40% benchmark in either direction for a stock's status to change.

Rating distribution for long-term investment opportunities

As of 27 May 2020, the distribution of all independent ratings published by HSBC is as follows:

Buy	55%	(31% of these provided with Investment Banking Services)
Hold	37%	(31% of these provided with Investment Banking Services)
Sell	8%	(22% of these provided with Investment Banking Services)

For the purposes of the distribution above the following mapping structure is used during the transition from the previous to current rating models: under our previous model, Overweight = Buy, Neutral = Hold and Underweight = Sell; under our current model Buy = Buy, Hold = Hold and Reduce = Sell. For rating definitions under both models, please see "Stock ratings and basis for financial analysis" above.

For the distribution of non-independent ratings published by HSBC, please see the disclosure page available at http://www.hsbcnet.com/gbm/financial-regulation/investment-recommendations-disclosures.

First Read

Essential Utilities Inc

Q1'20 EPS $0.60 vs. Consensus $0.60

What happened?

Essential Utilities reported adjusted normalized operating earnings for Q1'20 of $0.60/share. This compares reasonably well with both consensus and UBS estimates of $0.60 and $0.62, respectively. The adjusted and normalized nature of the earnings reflect the closure of the Peoples Gas acquisition on March 16, resulting in 15 days of actual earnings from that subsidiary, and 75 days of estimated assumed normalized earnings. GAAP earnings for the quarter were $0.20. Full year 2020 guidance, which is premised on the same estimated adjusted normalized basis, was affirmed at $1.53-$1.58, as was the long term earnings growth target of 5-7%.

Regulatory & Acquisition Update:

In conjunction with its earnings release, WTRG updated investors on both its ongoing regulatory calendar and water segment acquisitions. With regard to regulatory activities, the company has completed rate case and surcharge proceedings in IL/VA/OH/NC (representing $5.2mm of annualized revenue increases) and has pending cases in IN/NJ/NC/OH (representing $10.1mm of potential annualized increases). The repairs tax benefit in the quarter totalled $5.9mm, the company will be filing for treatment of the 'catch-up' portion over the summer, this 'catch-up' component is not included in current guidance. Year-to-date, WTRG has closed one acquisition (Campbell – rate base $7.5mm) and three acquisitions are pending (New Garden – rate base $29mm/East Norriton – rate base $21mm/DELCORA – rate base $276mm). Management indicated that they continue to see additional, larger, acquisition opportunities.

Operational Update:

Despite a slight pause on some construction projects (PA) management believe they are on track to achieve their capital spending plan for the year of $1.1 billion (water $550mm/gas $400mm). WTRG continues to see potential capital spending opportunities totalling $2.8 billion through 2022.

Valuation:

The unique nature of 2020 guidance and reporting format make interpretation difficult, however, investors should take comfort in the operating performance of the company.

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES BEGIN ON PAGE 3.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Forecast returns

Forecast price appreciation	+5.7%
Forecast dividend yield	2.5%
Forecast stock return	+8.2%
Market return assumption	5.2%
Forecast excess return	+3.0%

Valuation Method and Risk Statement

Risks include, but are not limited to: rising interest rate; regulatory and policy risks; operational risks; construction risks; water quality, safety and contamination risk; physical risk to the water sources, treatment or delivery systems; cybersecurity risk; drought and extreme weather events.
Our price target is premised upon a 3% discount to the 2021 average UBS water P/E multiple. The discount reflects the sum of: a 5% discount to reflect Water group over-valuation relative to the S&P 500, 5% premium to reflect high quality regulatory jurisdiction ranking, 6% premium to reflect operations in six Fair Market Value states, and 9% discount to reflect impact of lower P/E associated with gas earnings.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 07 May 2020 06:36 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations.

Analyst Certification: Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	48%	32%
Neutral	FSR is between -6% and 6% of the MRA.	40%	28%
Sell	FSR is > 6% below the MRA.	13%	20%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 31 March 2020.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS:Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES:UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means. The level and types of services provided by Global Research to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab you understand that UBS Evidence Lab is a separate department to Global Research and that UBS Evidence Lab does not provide research, investment recommendations or advice.

Clients of UBS Securities Australia Ltd: Distributed by UBS Securities Australia Ltd (ABN 62 008 586 481 and holder of Australian Financial Services License No. 231098). This Document contains general information and/or general advice only and does not constitute personal financial product advice. As such, the Information in this document has been prepared without taking into account any investor's objectives, financial situation or needs, and investors should, before acting on the Information, consider the appropriateness of the Information, having regard to their objectives, financial situation and needs. If the Information contained in this document relates to the acquisition, or potential acquisition of a particular financial product by a 'Retail' client as defined by section 761G of the Corporations Act 2001 where a Product Disclosure Statement would be required, the retail client should obtain and consider the Product Disclosure Statement relating to the product before making any decision about whether to acquire the product. The UBS Securities Australia Limited Financial Services Guide is available at: www.ubs.com/ecs-research-fsg. **New Zealand:** Distributed by UBS New Zealand Ltd. UBS New Zealand Ltd is not a registered bank in New Zealand. You are being provided with this UBS publication or material because you have indicated to UBS that you are a "wholesale client" within the meaning of section 5C of the Financial Advisers Act 2008 of New Zealand (Permitted Client). This publication or material is not intended for clients who are not Permitted Clients (non-permitted Clients). If you are a non-permitted Client you must not rely on this publication or material. If despite this

warning you nevertheless rely on this publication or material, you hereby (i) acknowledge that you may not rely on the content of this publication or material and that any recommendations or opinions in such this publication or material are not made or provided to you, and (ii) to the maximum extent permitted by law (a) indemnify UBS and its associates or related entities (and their respective Directors, officers, agents and Advisors) (each a 'Relevant Person') for any loss, damage, liability or claim any of them may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material and (b) waive any rights or remedies you may have against any Relevant Person for (or in respect of) any loss, damage, liability or claim you may incur or suffer as a result of, or in connection with, your unauthorised reliance on this publication or material. **Korea:** Distributed in Korea by UBS Securities Pte. Ltd., Seoul Branch. This report may have been edited or contributed to from time to time by affiliates of UBS Securities Pte. Ltd., Seoul Branch. This material is intended for professional/institutional clients only and not for distribution to any retail clients. **Malaysia:** This material is authorized to be distributed in Malaysia by UBS Securities Malaysia Sdn. Bhd (Capital Markets Services License No.: CMSL/A0063/2007). This material is intended for professional/institutional clients only and not for distribution to any retail clients. **India:** Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number: INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html**Taiwan:** Except as otherwise specified herein, this material may not be distributed in Taiwan. Information and material on securities/instruments that are traded in a Taiwan organized exchange is deemed to be issued and distributed by UBS Securities Pte. LTD., Taipei Branch, which is licensed and regulated by Taiwan Financial Supervisory Commission. Save for securities/instruments that are traded in a Taiwan organized exchange, this material should not constitute "recommendation" to clients or recipients in Taiwan for the covered companies or any companies mentioned in this document. No portion of the document may be reproduced or quoted by the press or any other person without authorisation from UBS. **Indonesia:** This report is being distributed by PT UBS Sekuritas Indonesia and is delivered by its licensed employee(s), including marketing/sales person, to its client. PT UBS Sekuritas Indonesia, having its registered office at Wisma GKBI, 22nd floor, JL. Jend. Sudirman, kav.28, Jakarta 10210, Indonesia, is a subsidiary company of UBS AG and licensed under Capital Market Law no. 8 year 1995, a holder of broker-dealer and underwriter licenses issued by the Capital Market and Financial Institution Supervisory Agency (now Otoritas Jasa Keuangan/OJK). PT UBS Sekuritas Indonesia is also a member of Indonesia Stock Exchange and supervised by Otoritas Jasa Keuangan (OJK). Neither this report nor any copy hereof may be distributed in Indonesia or to any Indonesian citizens except in compliance with applicable Indonesian capital market laws and regulations. This report is not an offer of securities in Indonesia and may not be distributed within the territory of the Republic of Indonesia or to Indonesian citizens in circumstance which constitutes an offering within the meaning of Indonesian capital market laws and regulations.

Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates ("UBS") with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliarios Ltda, UBS Asesores Mexico, S.A. de C.V., UBS Securities Japan Co., Ltd, UBS Wealth Management Israel Ltd and UBS Menkul Degerler AS are affiliates of UBS AG. UBS Financial Services Incorporated of Puerto Rico is a subsidiary of UBS Financial Services Inc. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain and does not undertake banking or investment business activities in Bahrain. Therefore, clients have no protection under local banking and investment services laws and regulations. **Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This research report is neither intended to be distributed to PRC investors nor to provide securities investment consultancy services within the territory of PRC. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Supervisory Authority. **France**: This publication is distributed by UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, 69, boulevard Haussmann F-75008 Paris, R.C.S. Paris B 421 255 670, to its clients and prospects. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code Monétaire et Financier", regulated by French banking and financial authorities as the "Autorité de Contrôle Prudentiel et de Résolution." **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a

credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Greece**: UBS Switzerland AG and its affiliates (UBS) are not licensed as a bank or financial institution under Greek legislation and do not provide banking and financial services in Greece. Consequently, UBS provides such services from branches outside of Greece, only. This document may not be considered as a public offering made or to be made to residents of Greece. **Hong Kong**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **Indonesia, Malaysia, Phillipines, Thailand**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **India**: UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch, with place of business at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS Europe SE, Luxembourg Branch is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Luxembourg supervisory authority (Commission de Surveillance du Secteur Financier), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Securities Market Law due to the relation with a Foreign Bank. UBS Asesores is a regulated entity and it is subject to the supervision of the Mexican Banking and Securities Commission ("CNBV"), which exclusively regulates UBS Asesores regarding the rendering of portfolio management, as well as on securities investment advisory services, analysis and issuance of individual investment recommendations, so that the CNBV has no surveillance faculties nor may have over any other service provided by UBS Asesores. Essential Utilities, Inc.

WTRG: M&A In Focus – Close Pending Wastewater Deals w/ New Ones Imminent

Overweight/$47

Water Utilities

Price Target Change

- **Key Points.** WTRG reported solid Q3'20 results aided by higher residential water usage due to favorable weather and COVID has FY2020 EPS trending towards top end of the $1.53-1.58 guidance range. In addition, management indicated roughly $70M of additional tuck-in deals were expected to be announced by YE2020. For our part, we increase our 20E EPS accordingly to $1.58 from $1.56 and bump up our '22 & beyond M&A placeholder to $75M/year of deals rather than $60M given the continued positive momentum on that front. Our 2021-24E EPS of $1.65, $1.78, $1.91 & $2.03 reflects a mid-'21 DELCORA close and results in a 6.6% CAGR off the '19 base of $1.47. If we were to strip out the DELCORA deal, it only has a modest $0.03-0.05 impact (less than 3%) on our '22 & beyond EPS. We reiterate our Overweight rating and increase our 12-18 month price target to $47/share (26.4X our 22E EPS) from $45.
- **Water/Wastewater M&A Update.** In addition to getting the $363M of pending deals closed (represents $0.07 of incremental EPS power), management indicated a handful of new deals are expected to be announced by YE'20 representing $70M of rate base and roughly 10,000 customers. Overall, WTRG is actively pursuing (i.e. having dialogue) municipal acquisition opportunities representing 360,000 customers, the majority of which are wastewater. Management expects the level of discussions/deals to be positively impacted by COVID as municipalities face additional financial and operational challenges and we remain optimistic that efforts could start to bear meaningful fruit in WTRG's states that have more recently adopted fair market value legislation (NC, OH, TX & VA) – we note that WTRG is the deepest-pocketed IOU in NC, OH & TX.
- ***DELCORA – The Latest.*** Much investor attention on the Q3 call was understandably on the pending $277M DELCORA wastewater deal that is potentially at risk due to a court challenge by Delaware County's County Council. Hearings were recently completed on the legality of the trust aspect DELCORA's plan and the more important hearings related to the enforceability of the asset purchase agreement (does WTRG have a valid deal?) are expected in the next few weeks. A ruling from the judge in the Court of Common Pleas of Delaware County is expected within 60 days of the hearing. That said, the judge continues to encourage parties to reach a settlement. ***While WTRG management was unable to confirm whether or not settlement discussions are taking place, the company remains confident in the ability to close the deal perhaps by late March or April.*** This is consistent with the PaPUC approval process were evidentiary hearings are scheduled next week and the statutory deadline for a decision is 3/26/21. ***(comments continue on p. 2.)***

Wells Fargo Securities, LLC does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of the report and investors should consider this report as only a single factor in making their investment decision.

Together we'll go far

- ***DELCORA – The Latest (continued…).*** While the DELCORA deal is highly supportive of WTRG's growth aspirations and management continues to express confidence in the ability to close the transaction, we consider the future to be bright without it driven by elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends. We believe relatively low risk, regulated EPS growth of at least 6% is achievable – that rate of growth would simply be enhanced if DELCORA closes, particularly in the later part of our 5-year forecast and beyond, given the $700M of required investment needed in the system by 2028 as well as potential further municipal wastewater deals in the region.

- ***Lower Makefield Township.*** An agreement to acquire the 11,000 connection wastewater system in Bucks County, PA for $53M was announced on 9/24. The deal is subject to PaPUC approval – which we expect will be received – and therefore closure probably is not likely until Q4'21. We view the deal as highly supportive of our EPS outlook as it essentially fills in our full year '21 M&A placeholder of $60M.

Other Q3 Call Nuggets.

- **No Gas M&A** – Management made it clear that all M&A efforts are focused on the water/wastewater platform. No M&A expansion on the gas utility side is being contemplated. That said and despite gas utilities being largely out of favor with investors given anti-gas sentiment (existential threat?) in some parts of the country, management defended the Peoples deal and outlined the why the future is bright for the Western PA utility (and brighter than most other gas LDCs). We largely agree with management's arguments and our positive investment thesis and price target reflect it.

- **ESG** – Appealing to ESG investors/rating agencies is a priority. Management believes the company has made great strides in recent years with plans to further improve and therefore has a good story to tell. WTRG plans to establish credible, meaningful and attainable emissions reduction goals for Peoples within 6 months.

- **Peoples Repairs Tax** – No real updates on this front since WTRG filed in early August for PaPUC treatment of the catch up portion of the Peoples repairs tax deduction election. The filing outlined a $381M catch up deduction and proposed to share the benefits between customers (40%, via a 2% bill surcredit over 2021-24) and shareholders (60%, via an increasing income tax expense offset over 2023-25). If approved, a base rate increase would not be needed prior to 1/1/2026 while supporting the elevated pace of capex deployment.

  WTRG had communications with regulators and other key parties prior to making this filing which makes us hopeful that the proposal will be positively received and that a constructive outcome will ensue. The timing of a potential settlement could be before the evidentiary hearings in late January take place. Whether WTRG settles or the hearings occur and the proceeding is fully litigated, management believes a final decision is likely an early Q2'21 event.

  Approval of the shareholder benefit aspect of the request would increase our confidence in the gas utilities' ability to achieve our forecast – we assume gas utility earned ROEs of 10-10.3% which we believe is reasonable and consistent with Peoples 2019 rate order. On the flip side, if the PaPUC decides to go a different direction with the catchup benefits, we still believe our 2023 & beyond EPS levels are reasonable within the backdrop of the constructive PA regulatory framework. It could simply necessitate filing for a base rate increase sooner which would bring with it associated regulatory risk.

Acronyms:
DELCORA – Delaware Country Regional Water Quality Control Authority
ESG – Environmental, Social, Governance
FMV – Fair Market Value
IOU – Investor Owned Utility
LDC – Local Distribution Company
PaPUC – Pennsylvania Public Utility Commission

Price Target

Price Target: $47 from $45

Our $47/share price target reflects both a P/E multiple and DDM analysis. In terms of P/E, we apply a 70% water/30% gas utility hybrid multiple to our 2022E of $1.78. For WTRG's water utility multiple, we ascribe a 5-10% discount to the 21E multiple we use for AWK (31.5-32X, which is a 5-10% premium to the pure play water peer group median). We consider AWK to be WTRG's closest peer on the water side based on scale, key states/regions and municipal consolidation strategies. The 5-10% discount reflects a modestly lower earnings growth rate (we forecast 6-7% for WTRG's water business vs. 8% for AWK) as well as lower ESG appeal (primarily due to the Peoples gas utility). For WTRG's gas utility multiple, we utilize the 21E pure play gas LDC median of 18X (based on ATO, NWN, OGS & SR) and then apply a 5-10% premium to it. We believe a premium is warranted as (1) Peoples is at the early stages of a multi-year accelerated pipeline replacement effort which is expected to drive healthy rate base growth for the foreseeable future (WTRG's 3-year guidance is 8-10%), (2) we believe Western PA, which sits above the prolific Marcellus and Utica shale plays, is largely immune to the anti-gas sentiment impacting some areas of the country and (3) most of Peoples falls under the constructive PA regulatory framework. Key risks relate to regulatory, Peoples gas deal integration and M&A strategy execution.

Investment Thesis

Our Overweight rating is premised on our belief that WTRG shares do not fully reflect the company's strong fundamentals which include a proven EPS growth strategy, a rate base that is growing at a mid-to-upper single digit CAGR, constructive regulatory treatment (particularly in PA where roughly 70% of earnings are derived and near-term regulatory risk is low as both the water and gas utilities completed rate cases in 2019), an efficient operating model and a solid financial profile. We believe relatively low risk, regulated EPS growth of at least 6% is achievable driven by the timely rate recognition of elevated pipeline infrastructure investment needs for the foreseeable future supplemented by water/wastewater municipal M&A trends.

Company Description

Headquartered in Bryn Mawr, PA, Essential Utilities (WTRG) - formerly Aqua America - is one of the largest U.S.-based investor-owned regulated water and wastewater utilities. The company serves approximately 3 million residents (1 million customer connections) in Pennsylvania, Ohio, North Carolina, Illinois, Texas, New Jersey, Indiana and Virginia. WTRG's largest subsidiary, Aqua Pennsylvania, accounts for approximately half of the company's total water customer base and nearly 70% of consolidated water rate base. Going forward, the company has expressed a desire to accelerate customer growth through a more active and focused acquisition strategy across its entire portfolio.

In March 2020, WTRG closed on the acquisition of Peoples - a predominately Pennsylvania-based gas utility serving 740k customers - from SteelRiver Infrastructure Partners for an enterprise value of $4.275B (includes $1.3B of assumed debt). From a price perspective, WTRG paid 1.9-2.0X rate base, 14.8X EV/EBITDA and nearly 25X P/E - lofty multiples but not that dissimilar to other gas utility transactions at the time. Management expects the deal to be EPS accretive in the first full year after close (2020) but stressed this is a strategic-driven, not synergy-driven, transaction.

Regulated operations account for more than 99% of consolidated revenues. Consolidated EPS is expected to be driven roughly 70% by water utility operations with the gas utility contributing the remaining 30%.

In February 2020, the new name Essential Utilities, Inc. and new ticker WTRG became effective. Prior, the company was known as Aqua America Inc. and traded under the ticker WTR.

Business Strategy and Outlook 11 Jun 2021

For more than 50 years, Essential Utilities--formerly Aqua America--was one of the few pure-play water utilities in the United States. But its $4.3 billion acquisition of Peoples Gas in March 2020 made the company nearly 50% larger and diversified its earnings mix.

The acquisition hasn't changed Essential's core investment proposition. Essential's gas and water utility earnings remain mostly rate regulated, and we expect management to run it like most other regulated U.S. utilities, prioritizing infrastructure investment growth and a robust dividend. Our outlook for 8% earnings growth during the next five years is a little higher than our growth outlook for most other U.S. utilities.

Although core retail water use has been falling steadily as a result of efficiency savings for several decades, Essential has been able to grow earnings and the dividend for many years. Like many utilities, Essential is replacing and upgrading infrastructure that is decades old across its system, resulting in organic rate base growth. We also expect Essential to grow by acquiring small, typically municipal-owned water systems. In the U.S., 85% of the population is served by a municipal water utility, offering a long runway of acquisition growth opportunities.

Similarly, we expect little natural gas usage growth at Peoples Gas, which had been owned by a private equity group. But the gas business still should produce steady earnings growth as Essential replaces and upgrades the system infrastructure.

Fair market value laws in several states support Essential's water business acquisition strategy. These laws require Essential to pay municipalities at least the assessed value of the system it acquires and allow Essential to add these assets to rate base at the assessed value rather than historical cost. The municipalities benefit by ensuring they get fair prices, and Essential shareholders benefit by ensuring the company doesn't overpay for growth. In many cases, these deals are immediately value-accretive. Recent FMV legislation in Kentucky and West Virginia opens acquisition opportunities near areas Essential already serves.

Profile

Essential Utilities is a Pennsylvania-based holding company for U.S. water, wastewater, and natural gas distribution utilities. The company's water business serves 3 million people in eight states. Nearly three fourths of its water earnings come from Pennsylvania, primarily suburban Philadelphia. It also has a small market-based water business that provides water and water services to third parties, notably natural gas producers. Its $4.3 billion Peoples Gas acquisition that closed in March 2020 adds 750,000 gas distribution customers in Pennsylvania, West Virginia, and Kentucky.

Morningstar Analysis

Initiating Coverage of Essential Utilities With Narrow Moat, $39 Fair Value 11 Jun 2021

We are initiating coverage of Essential Utilities with a $39 per share fair value estimate, narrow moat rating, and stable moat trend.

We consider the stock 23% overvalued based on the $48 stock price as of June 11. The stock trades at 28 times our 2021 earnings estimate, a 30% premium to the current median U.S. utilities P/E. Although we think Essential deserves a premium valuation relative to electric and gas utilities because of its higher returns on capital and growth potential in the water business, we think investors should wait for a pullback. Its closest peer, American Water Works, trades at a 30% premium to our fair value estimate and 38 P/E.

Essential, formerly Aqua America, was one of the few pure-play U.S. water distribution and wastewater utilities before acquiring Pennsylvania-based Peoples Gas in 2020. The company now gets two thirds of its earnings from its water business and one third of earnings from gas distribution.

The $4.3 billion Peoples Gas acquisition doesn't change Essential's core regulated utility business model, but we think it was a setback for investors. Essential paid more than double book value for the business, which has good near-term growth potential but long-term uncertainty as the U.S. moves away from fossil fuels. We think that capital would have been better spent growing its water businesses.

Our five-year, 8% annual earnings growth outlook tops most other U.S. utilities' outlooks. We think the water business has long, attractive runway of growth mostly through acquisitions of municipal utilities. Fair market value laws in some states allow Essential to mark up book value on its water acquisitions, eliminating the risk of overpaying.

We expect Essential to continue its impressive dividend growth track record. The company has paid a dividend every year since 1945 and has raised the dividend by 5% or more every year for the last 25 years. We consider management's 65% payout target more attractive than its peers.

Fair Value & Profit Drivers 11 Jun 2021

We are initiating coverage of Essential Utilities with a $39 per share fair value estimate.

We expect earnings to grow 8% annually during the next four years, which is above management's 5%-7% annual earnings growth target. Our growth rate is based on $1 billion of annual capital investment and $150 million of water utility acquisitions per year, on average. Our growth rate is higher than management's target range primarily due to our assumption that Essential will find more acquisition opportunities than it has in the past. We think the spread of fair market value legislation and increasing need for system investments will lead more municipal utilities to consider selling their systems.

Apart from acquisitions, the combination of surcharges and base rate increases support our earnings growth outlook. This includes favorable outcomes for likely base rate reviews in Pennsylvania, its largest service territory, in 2022-23.

In our discounted cash flow valuation, we use a 6.0% cost of capital based on a 7.5% cost of equity. This is lower than the 9% rate of return we expect investors will demand of a diversified equity portfolio, reflecting Essential's lesser sensitivity to the economic cycle and lower degree of operating leverage. We incorporate $5 per share of incremental value to better recognize the benefits accruing to shareholders from Essential having issued debt at coupon rates far below our long-term cost of debt assumption.

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
48.86 USD	39.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Scenario Analysis

In our bear case, a 20% annual reduction in our 2021-24 capital expenditure forecast would lower our fair value estimate by $2 per share. A 50-basis-point cut in our long-term allowed regulatory return on equity assumption would reduce our fair value an additional $3 per share.

In our bull case, a 20% increase in our capital spending assumption would raise our fair value estimate by $2 per share, assuming full regulatory support at current allowed returns. A 50 basis-point increase in our long-term allowed regulatory return on equity assumption would add another $3 per share.

A 50-basis-point change in our cost of equity assumption would lead to a $2 per share change in our fair value estimate.

Economic Moat

We have greater than 50% confidence that Essential can generate economic profits on a consolidated basis for at least the next 10 years based on its efficient scale competitive advantage for its water, wastewater, and natural gas distribution businesses. Essential Utilities' consolidated returns are the foundation for our narrow moat rating.

We have strong confidence that Essential's returns on invested capital will remain at a healthy spread over its weighted average cost of capital for the foreseeable future, leading us to assign the company a narrow moat rating. Essential owns a difficult-to-replicate network of water, wastewater, and natural gas distribution infrastructure that provides essential energy sources to customers. In exchange for a service territory monopoly, state and federal regulators set rates for Essential's water distribution, wastewater, and natural gas distribution utilities at levels that aim to keep customer costs low while providing adequate returns for capital providers. This implicit contract between regulators and the utilities should, in the long run, allow Essential to earn a consistent spread over its cost of capital. Rate-setting mechanisms in the states that Essential serves are mostly constructive, leading to ROICs modestly above its WACC.

In the water distribution and wastewater businesses, Essential enjoys fair market value legislation in seven of the eight states where it has operations. This allows Essential to ensure its growth acquisitions are value-accretive by allowing it to adjust its regulated earning asset base to reflect the deal value based on a third-party valuation. This effectively eliminates the drag on returns created by goodwill and the risk of cost overruns for organic growth investment. Essential made 57 water system acquisitions between 2015 and 2019, and goodwill represented only 1% of Essential's net asset base. Thus, Essential's earned ROICs tend to track very closely its regulatory allowed ROICs, the foundation of an economic moat for regulated utilities.

As with all regulated utilities, we think regulatory caps on revenue and returns preclude Essential from establishing a wide economic moat.

Essential Utilities Inc WTRG (NYSE) | ★★

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
48.86 USD	39.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Essential derives about 1% of earnings from businesses that have few competitive advantages, particularly its water and wastewater services. Essential exited some of these businesses in 2017, and we expect these businesses' share of earnings will continue to shrink as management focuses on growth at the regulated distribution utilities.

Moat Trend

We think Essential's moat trend is stable. We do not expect the regulatory rate structures that support earnings and ROICs for Essential's water or gas utilities to change substantially, given state laws that demonstrate the political and regulatory support for maintaining Essential's financial health, stability, and investments. We believe regulators will rely on state legislation and constructive rate plans to uphold the implicit contract with capital providers that allows Essential to earn above its cost of capital on balance, in the long run. Fair market value legislation ensures Essential's growth-by-acquisition strategy is value-accretive for shareholders.

Bulls Say/Bears Say

Bulls Say

- Constructive regulation allows Essential to raise rates through surcharges or rate cases to reduce regulatory lag and enhance cash flow available to pay the dividend and invest in growth projects.
- Fair market valuation state laws allow Essential to make municipal water utility acquisitions immediately value-accretive for shareholders.
- Essential has raised its dividend 30 times in the last 29 years, including 29 consecutive increases of more than 5%.

Bears Say

- Essential Utilities paid a peak market price for Peoples Gas, which will probably drag on consolidated returns for many years.
- Essential's capital investment plan likely means annual rate increases for most of its customers, which could cause regulatory pushback that would slow earnings growth.
- Rising interest rates could raise financing costs for Essential to fund its investments and make its dividend yield less attractive for income investors.

Financial Strength

Essential maintains a capital structure in line with its regulatory allowed capital structure for ratemaking purposes and leverage metrics in line with high investment-grade credit ratings. We don't expect that to change.We expect Essential to issue new debt to fund growth investments and acquisitions in the coming years. We don't expect any material new equity needs once it completes its $300 million equity forward sale in August. With constructive regulation, we expect Essential will be able to use its cash flow to fund most of its equity investment needs during the next five years.Essential has paid an annual dividend since 1945 and increased it at least 5% for each of the last 25 years. We think Essential will be able to continue growing the dividend at this rate or higher while staying below management's 65% maximum payout ratio threshold, which is in line with Essential's peer utilities.

Risk & Uncertainty

The biggest uncertainty for Essential is rate regulation in the states it serves. Although Essential has a long history of constructive rate regulation, customers and regulators remain sensitive to rate increases that drive Essential's earnings growth. Deterioration of regulatory relations and policies could jeopardize Essential's growth potential.Customer growth and value-accretive water acquisitions have kept earnings growing even while water use has fallen steadily for several decades. Unlike many utilities that have lobbied to decouple rates from usage trends, Essential has maintained usage-based rates to avoid potential pushback from regulators. Customer growth, tax benefits, and constructive rate regulation have more than offset unfavorable usage trends.Essential's ability to make annual rate adjustments in states it serves offsets some of the regulatory ratemaking uncertainty. These surcharges effectively eliminate regulatory lag and improve cash flow to support capital investment and dividends.Essential's large capital investment plan will require good execution to

keep projects on time and on budget. Delays or cost overruns could reduce shareholder returns.Essential also faces environmental, social, and governance risk, given its water and natural gas distribution businesses. At the water business, Essential must meet strict quality measures. It faces the risk of supplying contaminated drinking water for its customers if it has an operational failure, although we think this risk is low. Essential has invested in monitoring technology that allows it to supply water that is far cleaner than government requirements and reduces per- and polyfluoroalkyl substances, or PFAS.At the natural gas business, there is a long-term risk that policymakers will move retail customers away from gas heating, but we think that's unlikely in the near future, given the technical and economic hurdles in the colder climate where Essential operates.

Capital Allocation 11 Jun 2021

We give Essential Utilities a Standard capital allocation rating, balancing the company's long history of shareholder-friendly capital allocation in the water business with what we think was an ill-advised move into the gas business.

Essential has an impressive record of paying a dividend every year since 1945 and raising it 30 times in the last 29 years. While returning this cash to shareholders, Essential still found ways to invest in organic growth and acquisitions.

We think Essential overpaid for Peoples Gas. The equity dilution from the $4.3 billion cash price will be difficult to overcome even if everything goes perfectly. The $2.3 billion of goodwill on its balance sheet following the acquisition will remain a drag on returns. Goodwill was nearly equal to the book value of the assets.

Essential also gave up its premium market valuation with the Peoples acquisition. As one of the few pure-play water utilities, Essential was a staple in portfolios focused on environmental, social, and governance issues, especially water. Adding fossil-fuel exposure with the gas business could turn off some ESG investors. We think this would be an overreaction based on natural gas' low-carbon profile, but that's not likely to persuade strict environmentally focused investors to continue holding Essential.

CEO and chairman Chris Franklin has been in his role since 2015 and with the company for 28 years. CFO Dan Schuller joined the company in 2015.

Analyst Notes

Initiating Coverage of Essential Utilities With Narrow Moat, $39 Fair Value 11 Jun 2021

We are initiating coverage of Essential Utilities with a $39 per share fair value estimate, narrow moat rating, and stable moat trend.

We consider the stock 23% overvalued based on the $48 stock price as of June 11. The stock trades at 28 times our 2021 earnings estimate, a 30% premium to the current median U.S. utilities P/E. Although we think Essential deserves a premium valuation relative to electric and gas utilities because of its higher returns on capital and growth potential in the water business, we think investors should wait for a pullback. Its closest peer, American Water Works, trades at a 30% premium to our fair value estimate and 38 P/E.

Essential, formerly Aqua America, was one of the few pure-play U.S. water distribution and wastewater utilities before acquiring Pennsylvania-based Peoples Gas in 2020. The company now gets two thirds of its earnings from its water business and one third of earnings from gas distribution.

The $4.3 billion Peoples Gas acquisition doesn't change Essential's core regulated utility business model, but we think it was a setback for investors. Essential paid more than double book value for the business, which has good near-term growth potential but long-term uncertainty as the U.S. moves away from fossil fuels. We think that capital would have been better spent growing its water businesses.

Our five-year, 8% annual earnings growth outlook tops most other U.S. utilities' outlooks. We think the water business has long, attractive runway of growth mostly through acquisitions of municipal utilities. Fair market value laws in some states allow Essential to mark up book value on its water acquisitions, eliminating the risk of overpaying.

We expect Essential to continue its impressive dividend growth track record. The company has paid a dividend every year since 1945 and has raised the dividend by 5% or more every year for the last 25 years. We consider management's 65% payout target more attractive than its peers.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

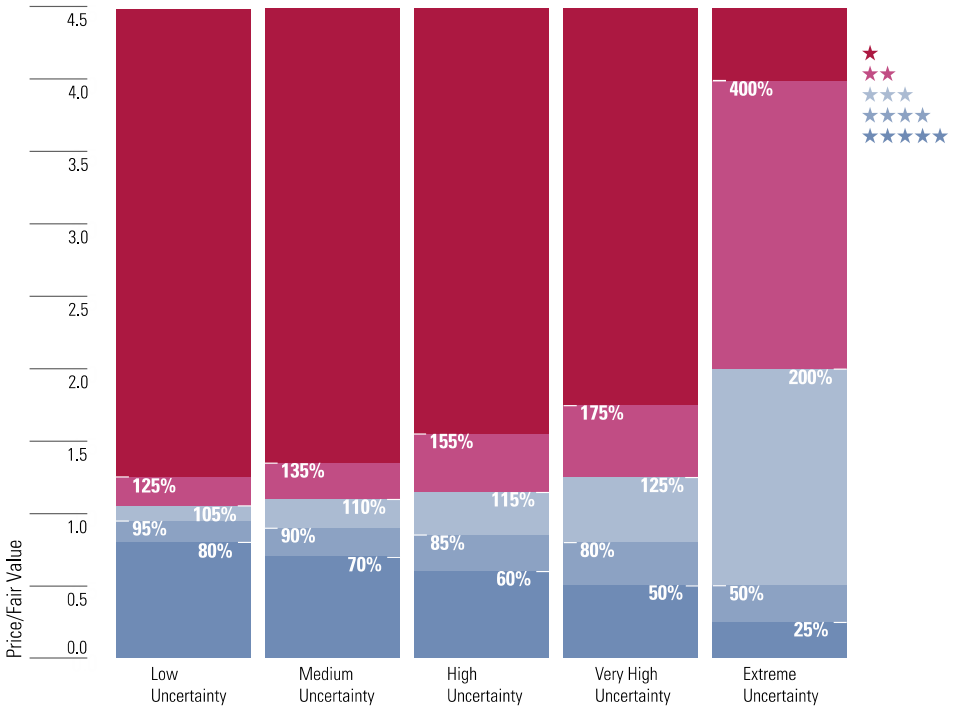
- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology



Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

The analysis within this report is prepared by the person(s) noted in their capacity as an analyst for Morningstar's equity research group. The equity research group consists of various Morningstar, Inc. subsidiaries ("Equity Research Group)". In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission.

The opinions expressed within the report are given in good faith, are as of the date of the report and are subject to change without notice. Neither the analyst nor Equity Research Group commits themselves in advance to whether and in which intervals updates to the report are expected to be made. The written analysis and Morningstar Star Rating for stocks are statements of opinions; they are not statements of fact.

The Equity Research Group believes its analysts make a reasonable effort to carefully research information contained in the analysis. The information on which the analysis is based has been obtained from sources believed to be reliable such as, for example, the company's financial statements filed with a regulator, company website, Bloomberg and any other the relevant press sources. Only the information obtained from such sources is made available to the issuer who is the subject of the analysis, which is necessary to properly reconcile with the facts. Should this sharing of information result in considerable changes, a statement of that fact will be noted within the report. While the Equity Research Group has obtained data, statistics and information from sources it believes to be reliable, neither the Equity Research Group nor Morningstar, Inc.performs an audit or seeks independent verification of any of the data, statistics, and information it receives.

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

This report is for informational purposes only and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist institutional investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed and recommendations made herein may not be suitable for all investors: recipients must exercise their own independent judgment as to the

Goldman Sachs & Co. LLC

Following 4Q2020 earnings, we remain Buy-rated on regulated water utilities American Water (AWK) and Essential Utilities (WTRG, on CL) as we see continued visibility into long-term investment growth from both organic infrastructure modernization and completed municipal system acquisitions, supported by an increasing state/federal focus on water quality and reliability.

Thus far in 2021, in a backdrop where the XLU has underperformed the S&P 500 by 8% driven by rising 10yr bond yields (albeit still at a relatively low ~1.5%), AWK/WTRG shares have declined around 6%/9% on an absolute basis while underperforming the XLU by 1%/4%, respectively. We believe this is driven somewhat by rotation into more value-oriented stocks within our sector, versus anything fundamental to the companies' growth propositions. We view the recent underperformance for both stocks providing a more compelling entry opportunity to gain exposure to these secular winners with a positive ESG footprint, with our $179/$55 price target for AWK/WTRG implying 28%/33% total return, respectively, versus 23% for Regulated Utilities.

WTRG: Water utility expansion, methane reduction strategy fuel growth; remain Buy (on CL)

We stay Buy-rated (on Conviction List) following 4Q2020 earnings on regulated water/gas utility Essential Utilities (WTRG), as we continue to see valuations not fully reflecting the company's primarily water utility exposure, and our expectation for the company to achieve the upper end of its 5-7% EPS CAGR. We believe WTRG's organic/inorganic water growth plans and de-carbonization strategy at its gas utility - as laid out in its January 2021 investor update call - should continue to bolster the case for WTRG as still one of the ESG-friendly stories in our coverage universe. In the near term, we note the pending $276mn DELCORA wastewater system acquisition - with the PA commission decision expected in March - and if completed we expect the Aqua PA utility to file a base rate case later this year. Finally, while WTRG mentioned moderate 1Q21 costs related to their Texas water utilities during the February winter weather event, we note the state represents roughly 6% of total rate base, with management not expecting a net impact to their

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. 2021 guidance forecast.

We maintain our 2021/2022 estimates while introducing 2023/2024 EPS estimates of $1.93/$2.05, respectively, reflecting a 6.7% CAGR from 2020A-2024E and a 7.1% CAGR from the weather-normal 2020 result of $1.56. We continue to embed issuance of the ~$300mn forward equity in 1Q2021 along with the close of the pending DELCORA municipal acquisition; we also assume $200mn of annual equity to finance future organic/acquisition investments while improving WTRG's FFO/debt from 12% in 2021 to 13% by 2024. Our model reflects the water utilities earning moderately below authorized, along with Peoples Gas ROEs trending down to authorized levels by 2024 (given wind-down of tax repairs and an assumed base rate increase in 2024).

Our $55, 12-month price target (unchanged) is based on a SOTP approach, with 35x/21x P/E applied to our 2022 water/gas utility EPS estimates, and 30x blended P/E on 2022 Other EPS, respectively. Downside risks to our call include: 1) PA regulation turns less constructive, which impacts earnings growth potential given the bulk of WTRG's earnings are derived from the state's water/gas operations, 2) water system acquisitions do not receive necessary approvals for completion, which could impact longer-term water rate base growth outlook barring replacement with other municipal acquisitions, and 3) longer-term growth concerns about the gas utility segment further compresses WTRG's valuation, both on an absolute basis and relative to pure-play water utilities.

AWK: Best-in-class EPS/DPS growth with ESG tailwind; Buy

We stay Buy-rated on AWK post 4Q2020 earnings and Analyst Day given best-in-class EPS and dividend growth. We remain positive on AWK given its status as the only large cap, pure play, publicly traded water utility in the US, as well as its best-in-class ~8.5%+ EPS growth through 2024 driven by robust organic and inorganic water investment opportunities. In addition, we look favorably on the company's increased forecast for water/wastewater municipal system acquisitions that should further support AWK's predominantly regulated utility profile. Finally, we expect the stock to continue to benefit from a scarcity premium and ESG friendly profile that should continue to drive its premium valuation.

We tweak our 2021/2022 EPS estimates while introducing 2023/2024 estimates of $4.98/$5.40, respectively, implying an 8.4% CAGR from 2021A-2024E. Our model assumes $300mn/$200mn/$200mn of equity from 2022-2024, resulting in a 59% net debt/cap ratio and ~17% FFO/debt by 2024, along with earned ROEs of 9.2-9.3% at the Regulated segment versus 9.8% authorized.

Our $179, 12-month price target (unchanged) embeds our water base P/E multiple of 30.0x, as well as a 9x (30%) premium to account for AWK's above-average growth and favorable ESG profile, on our 2022 EPS. Key risks include water quality issues, cost management, regulatory environment, growth at non-regulated segments and reduced

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: American Water Works ($141.88) and Essential Utilities Inc. ($42.06)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: American Water Works ($141.88) and Essential Utilities Inc. ($42.06)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: American Water Works ($141.88) and Essential Utilities Inc. ($42.06)

Goldman Sachs makes a market in the securities or derivatives thereof: American Water Works ($141.88) and Essential Utilities Inc. ($42.06)

Goldman Sachs is a specialist in the relevant securities and will at any given time have an inventory position, "long" or "short," and may be on the opposite side of orders executed on the relevant exchange: American Water Works ($141.88) and Essential Utilities Inc. ($42.06)

Distribution of ratings/investment banking relationships

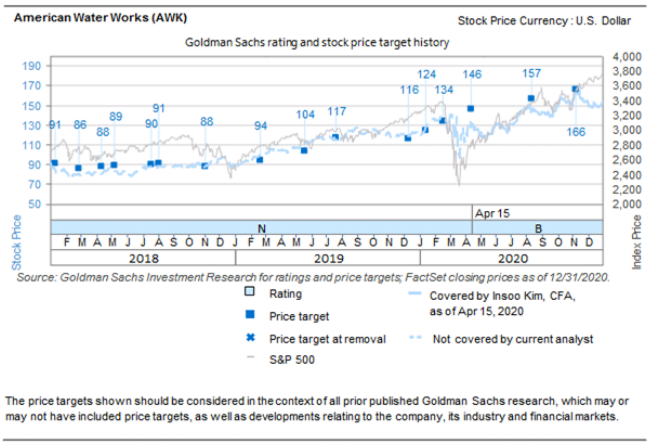
Goldman Sachs Investment Research global Equity coverage universe

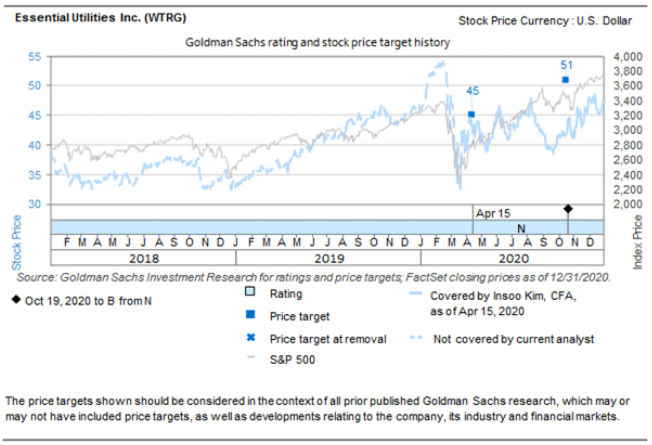
For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	49%	35%	16%	64%	57%	54%

As of January 1, 2021, Goldman Sachs Global Investment Research had investment ratings on 3,072 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)





Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act,

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

Effective from the date of the United Kingdom's departure from the European Union and the European Economic Area ("Brexit Day") the following information with respect to distributing entities will apply:

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: GSI, authorised by the PRA and regulated by the FCA and the PRA, disseminates research in the following jurisdictions within the European Economic Area: the Grand Duchy of Luxembourg, Italy, the Kingdom of Belgium, the Kingdom of Denmark, the Kingdom of Norway, the Republic of Finland, Portugal, the Republic of Cyprus and the Republic of Ireland; GS -Succursale de Paris (Paris branch) which, from Brexit Day, will be authorised by the French Autorité de contrôle prudentiel et de resolution ("ACPR") and regulated by the Autorité de contrôle prudentiel et de resolution and the Autorité des marches financiers ("AMF") disseminates research in France; GSI - Sucursal en España (Madrid branch) authorized in

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

Spain by the Comisión Nacional del Mercado de Valores disseminates research in the Kingdom of Spain; GSI - Sweden Bankfilial (Stockholm branch) is authorized by the SFSA as a "third country branch" in accordance with Chapter 4, Section 4 of the Swedish Securities and Market Act (Sw. lag (2007:528) om värdepappersmarknaden) disseminates research in the Kingdom of Sweden; Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research in the Federal Republic of Germany and those jurisdictions within the European Economic Area where GSI is not authorised to disseminate research and additionally, GSBE, Copenhagen Branch filial af GSBE, Tyskland, supervised by the Danish Financial Authority disseminates research in the Kingdom of Denmark; GSBE - Sucursal en España (Madrid branch) subject (to a limited extent) to local supervision by the Bank of Spain disseminates research in the Kingdom of Spain; GSBE - Succursale Italia (Milan branch) to the relevant applicable extent, subject to local supervision by the Bank of Italy (Banca d'Italia) and the Italian Companies and Exchange Commission (Commissione Nazionale per le Società e la Borsa "Consob") disseminates research in Italy; GSBE - Succursale de Paris (Paris branch), supervised by the AMF and by the ACPR disseminates research in France; and GSBE - Sweden Bankfilial (Stockholm branch), to a limited extent, subject to local supervision by the Swedish Financial Supervisory Authority (Finansinpektionen) disseminates research in the Kingdom of Sweden.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

Americas Energy: GS PUMP Conference: Top ten takeaways from the PUMP Conference panels and dinners

(https://research.gs.com/content/research/themes/power-utilities-mlps-and-pipelines-conference-2019.html)

After hosting this year's GS Power, Utilities, Midstream & Pipeline (PUMP) Conference here in NYC on August 13th, including dinners with FE (Buy), DTE (Buy) and NEE (Buy), we reiterate our top picks, including CL-Buy utilities CNP and SRE, along with NRG within the IPP sector and LNG among midstream stocks.

GS Top Ten Takeaways from Key Panels or Dinners with Company Executives:

1. **FE expects growth to slow after 2021, but from a current elevated rate versus peers of 6%-8%,** as capital spending flattens out and equity financing needs emerge...
2. **...but FE continues to highlight the separation from FES as largely complete.** We note the Nuclear Regulatory Commission's approval of plant ownership licenses - along with bankruptcy court approvals - remain the last steps, expected by 4Q2019.

3. **Substantial regulated renewable development at DTE Electric should support a net income CAGR toward at least the high end of the 7%-8%** operating earnings growth guidance range over the next few years as both the Renewable Energy Plan (REP) and Voluntary Green Program (VGP) spend drives a substantial ramp in renewable capex to meet RPS (renewable portfolio standards) and VGP targets by 2021/2022 - along with the new natural gas power plant in 2022.
4. **Representatives from the credit ratings agencies highlighted** (1) potential does exist, but more time may be needed to prove out the business model, for IPPs to reach investment grade status; (2) changes in oil or especially natural gas production levels could weaken credit metrics for gathering/processing focused midstream companies, but this is not a major 2019 concern yet for the agencies; and (3) offshore wind construction risk emerges now as a credit concern for utility holding companies
5. **NEE views its cost position still as a primary advantage for its FP&L subsidiary** - with costs (per kWh served) at its newly acquired Gulf Power subsidiary almost 2.5x greater than the level at its larger FP&L business, implying ample room for cost management ahead.
6. **More private investment into merchant power likely will occur going forward.** Multiple PE firms highlighted that many conventional merchant generation portfolios deliver double-digit free cash yields - albeit with sizable quarterly volatility - and even after facing new challenges such as subsidized generation (nuclear) in key states like IL, OH, NJ and NY. Funds participating in our conference expect more private capital to come into the space.
7. **WTR highlighted what remains a very attractive M&A landscape for water utilities** as (1) the U.S. has ~40,000+ municipally-owned water systems, and (2) fair market value regulation allows utilities to add goodwill in municipal water utility transactions to rate base.

8. **Capital spending by regulated utilities - as discussed at the conference - will migrate more and more towards distribution** versus spend on other items including large scale transmission.
9. **The Bakken should maintain enough oil/NGL takeaway as new or potential assets come online - more long haul gas pipeline capacity** needs may emerge. In the Bakken, the expansion of the Bakken Pipeline system (DAPL/ETCOP) and startup of OKE's Elk Creek pipeline should provide producers with sufficient long-haul takeaway for both crude oil and natural gas liquids (NGLs). However, there could be additional need for Bakken long-haul natural gas takeaway in the next few years given a reduction in flaring limits and continued growth in gas production.
10. **Along with demand-pull from traditional LNG buyers (including integrated and global utilities), there is growing supply-push from Permian producers** looking to secure flow assurance and end markets for their associated gas production. These producers see new LNG facilities as a way to get their gas to market - and to also reduce flaring levels, assuming pipeline capacity exists to get the gas to the new LNG terminals.

We also highlight a few key insights from panels at the GS PUMP Conference...

Key Trends and Challenges in Midstream Infrastructure in America (Jonathan Stein, CFO, Hess Midstream Partners. Ben Atkins, CFO, NextDecade Corp.)

- NEXT's (Not Covered) Rio Grande LNG project in Brownsville, TX has key competitive advantages over other LNG sites, including proximity to the Permian Basin, and better construction economics given access to labor and an underutilized ship channel.

- A self-funding strategy with minimal leverage remains key to HESM's financing strategy. The partnership is also mitigating its counterparty risk via third-parties - which currently comprise 15% and 30% of HESM's crude oil and natural gas volumes, respectively.

CEO Fireside Chat: The Outlook for Regulated Investment and Growth (Christopher Franklin, Chairman, CEO and President, Aqua America. Charles Jones, President and CEO, FirstEnergy Corp.)

- FE highlighted key types of investment opportunities in a handful of states, including incremental grid modernization in Ohio (i.e., the deployment of ~700,000 smart meters in the state), reliability improvement in Pennsylvania, and renewables as well as energy efficiency in New Jersey (partly driven by the governor's Energy Master Plan).
- WTR noted regulatory encouragement for consolidation across water utilities, as municipalities continue to own the majority of systems in the U.S. Fair market value regulation, allowing acquirers to add goodwill related to water utility M&A in to rate base, has helped make the economics of acquisitions work for IOUs (investor-owned utility).

Merchant and Contracted Power Business Models (Francisco Martinez-Davis, CFO, Atlantica Yield. Brian Vaasjo, President and CEO, Capital Power Corp. Matthew J. O'Connor, Managing Director, Carlyle Power Partners. Darren Olagues, Executive Vice President and CFO, GenOn Energy. Himanshu Saxena, CEO, Starwood Energy Group.)

- The recent delay in the PJM auction was viewed constructively as the correct rules and processes were not in place for a two-step auction. Panelists believe that subsidized assets should not bid in to the same auction as non-subsidized assets, and this will help investors acknowledge/realize the value of competitive assets.

- California's merchant power market structure may create reliability concerns. Current market structure doesn't provide proper compensation for reliability in CA, decreasing interest in incremental baseload generation in the state. In contrast, state policy goals drive significant investment in renewable generation assets. Some panelists believe misaligned incentives and difficulty in forecasting (particularly reliability payments) could create headwinds for CA power investors, but near-term, is supporting elevated RA payments. The GenOn (Not Covered) CFO noted that the NY power market could see a similar uptick in capacity payments as large nuclear assets retire and ambitious renewable goals impact the grid.
- Merchant power (as opposed to contracted power) likely continues to expand globally, with Atlantica Yield's (AY, Not Covered) CFO noting growing levels of comfort with merchant power in other countries -- although not AY's growth strategy. Additionally, panelists highlighted foreign capital searching for yield has driven down financing costs in the U.S., but increased the need for discipline among project developers.

Renewables Ahead, The Role of Natural Gas and The Impact Across the Energy Infrastructure Industries (Peter Oleksiak, Senior Vice President and CFO, DTE Energy. Eric Silagy, President and CEO of FP&L, NextEra Energy)

- NEE highlighted that a combination of customer count and load growth help control the costs of renewables to rate payers, but replacing aging infrastructure continues to provide tailwinds as well. The company noted every $1 of O&M saved creates room for ~$7 of incremental capital spending without impacting customer bills.
- Both NEE and DTE highlighted the cost savings of fleet transformation, with NEE noting $10bn of customer savings since 2001 driven by the heat rate differential between oil and other types of generation. DTE also highlighted the LT savings driven by

fleet rationalization, such as building gas plants near distribution and storage facilities, lower fuel costs, and lower operating and maintenance expenses.

- Within DTE's generation transformation, wind remains the primary source of renewable generation, but DTE expects solar to make headway by the mid-2020s. The company noted (1) it sees significant natural demand from corporates looking to meet internal sustainability goals and (2) its desire to remain in the regulated generation business as it proceeds through fleet transformation - given the value for customers from owning vs PPA'ing a renewable asset as it depreciates.

Generation and Grid Transformation - The Path Ahead (Martin Lyons, Executive Vice President and CFO, Ameren Corporation. Antonio Smyth, Senior Vice President of Transmission, American Electric Power. Rod West, President of Utility Operations, Entergy Corporation.)

- While MO remains a relatively coal-heavy state, AEE expects wind generation capital spending to precede coal plant retirements likely to occur in the next 10-15 years driven by MO's 2035 IRP goals.

The Evolution of State Policies and The Impact on Investment and Opportunity Sets (Stephen Wemple, Director, Consolidated Edison. Maria Pope, President and CEO, Portland General Electric. Steven Rasche, Executive Vice President and CFO, Spire Inc.)

- Panelists highlighted a handful of items on their regulatory wishlists, particularly we flag (1) ED looking for more earnings opportunities from regulatory assets related to renewable projects - as the company cannot own large-scale or customer sited renewables and (2) SR (Not Covered) is looking to replicate Alabama's real-time rate making process in another states.

- POR noted the preference for onshore wind over offshore wind on the West coast continues, driven partly by geographic factors (i.e., wavier waters making the use of buoys to support turbines difficult or the relatively steep nature of the ocean floor) as well as by grid restraints due to the lack of major transmission lines along the coast.

Insights on Power, Utilities and Midstream from the Credit Ratings Agencies (Shalini Mahajan, Managing Director of US Utilities, Fitch Ratings. Peter Molica, Senior Director of US Midstream, Fitch Ratings. James Hempstead, Managing Director of US Utilities, Moody's Investors Service. Elena Nadtotchi, Senior Credit Officer on Oil & Gas, Moody's Investors Service. Michael Grande, Senior Director of Midstream Energy and Refining, S&P Global Ratings. Aneesh Prabhu, Senior Director of Midstream Energy and Refining, S&P Global Ratings.)

- Merchant power can feasibly achieve investment grade credit ratings, but the ratings agencies noted that a limited track record may require more time. The integrated model should in theory work to limit volatility and provide a counter-cyclical business strategy by pairing retail with generation, yet the lack of data around a recession provides little evidence of how it truly holds up under significant stress. Longer-term, the agencies highlighted that there is no fundamental reason why merchant power cannot become IG, given that there is a certain level of debt to EBITDA that would be acceptable and that cash flow volatility has been 17%, lower than some investment grade refiners and with higher cash flow conversion rates.
- Ratings at the holdco level continue to converge to levels around BBB+. With limited benefit to an A credit rating - given tighter spreads - the agencies noted that over the past handful of years, an increasing amount of utility holdcos moved closer to BBB+ and the cash flow to debt metrics for large holding companies declined to about 15% compared to 16% in 2018 and a 2010-2015 average of

about 20%. The agencies highlighted that as utility holdcos give themselves less of a cushion on the credit side, execution risk can become an increasingly large concern over time.

...as well as highlights from our dinners with managements

We hosted a dinner with FE on Tuesday night (8/13) with no new major takeaways, but flag...

- Incremental equity financing will occur to help fund rate base growth and pension requirements - but not likely until 2022+.
- The company views its customer rates as a competitive advantage and does not want to risk losing this edge. FE highlighted its customer bills in key states (NJ, OH, PA, etc.) remain well below peers in those states.
- FE sees limited rate case or regulatory risk - while many investors question earnings levels in OH or PA, the company highlighted that PA earnings levels remain at or below required levels - needing the state's tracker implementation to improve earnings closer to authorized levels.

...while takeaways from our dinner with DTE include...

- Substantial regulated renewable development at DTE Electric should support a net income CAGR toward at least the high end of the 7%-8% operating earnings growth guidance range over the next few years
- Management continues to bake in significant contingencies into DTE's base case guidance. Across the subsidiaries, a level of conservatism makes the 5-7% EPS growth achievable, per management, and DTE highlighted that they often assume mild weather at the regulated segments to determine a starting guidance midpoint, emphasizing the resulting flexibility in their planning.

- Commissioner turnover has continued (with two new commissioners in MI), but DTE believes the key remains providing reliable performance and an open dialogue, understanding the commissioners' goals. Clean energy investments already continue to support significant growth, and the Utility welcomes more opportunities to transform its fleet. In general, following the 2016 energy deal, energy/utility reform does not appear top of mind for state legislators, and they feel comfortable with the current state of regulation.

...and we note a handful of highlights from our dinner with NEE

- The company believes battery storage remains in the very early stages and highlighted expectations to build batteries as part of a wind+solar+battery all-in-one development as well as building batteries in to the distribution and transmission system.
- FP&L highlighted a meaningful difference between its O&M profile relative to the recently acquired Gulf Power. The company noted non-fuel O&M of ~$12/MWh vs Gulf Power's near $30/MWh (near the national average).
- The company remains skeptical of the first wave of offshore wind, highlighting: (1) expectations for massive cost overruns leading to abandoned projects; (2) maintaining and repairing the plants will likely prove more expensive than expected; and (3) believes offshore wind in Europe has advanced largely due to saturation in European power markets.

Ratings and PT information

We reiterate our $47, 12-month target price for FE, derived using a SOTP, and remain Buy rated. Key risks for FE include utility regulation, power demand, cost management, and financing.

We remain Neutral rated AEE with a $76, 12-month price target, derived from a 19.75x P/E multiple on 2021E EPS. Key risks for AEE include regulation, project awards, and financing.

We reiterate our $88, 12-month price target for AEP, derived using a sum-of-the-parts, and remain Neutral rated. Key upside/downside risks for AEP include utility regulation, power demand, cost management, and financing.

We remain Buy rated ETR and derive our 12-month target price of $110 using a sum-of-the-parts valuation. Key risks for ETR include utility regulation, demand, and power pricing.

We reiterate our $86, 12-month price target for ED, derived from an 18x P/E multiple on 2021E EPS, and remain Neutral rated. Key risks for ED include CECONY earned RoEs, the ongoing CECONY rate case, CEB contracts, project awards, and financing.

We remain Sell rated with a $50, 12-month target price for POR, derived 85% using a fundamental 18x P/E multiple on 2021E EPS and 15% using a theoretical M&A 21.0x P/E multiple on 2021E EPS. Key risks include utility regulation and demand.

We remain Buy rated on NEE with our $221, 12-month target price, derived using an SOTP. Key risks include utility regulation, renewable development, and cost management.

We remain Buy rated on DTE with our 12 month $136 target price, derived using an SOTP. Key risks include regulatory, legislative, natural gas production, counterparty, transaction, and financing risk.

We remain Buy rated (on the CL) LNG with an $89, 12-month price target, derived with a 12x EV/EBITDA multiple on 2023E EBITDA. Key risks for LNG include construction costs, project financing, operational risk, and global natural gas prices.

We reiterate our $158, 12-month target price for SRE - derived using a sum-of-the-parts - and remain Buy rated (on the CL). Key risks for SRE include construction, utility regulation, and financing.

We remain Buy rated (on the CL) CNP with a $35, 12-month target price, derived using a sum-of-the-parts. Key risks include oil prices, merger synergies, utility regulation, and demand growth.

We remain Buy rated (on the CL) NRG with a $52, 12-month target price. We base our NRG price target 85% on a sum-of-the-parts implying $52/share and 15% on a 9.25x EV/EBITDA M&A multiple implying $54/share. Key risks include power prices, retail margins, cost management, and customer growth.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. Essential Utilities Inc. (WTRG): 2021 guidance in-line, 5-7% EPS growth extended to 2023

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

Regulated water/gas utility Essential Utilities (WTRG, Buy-CL) today introduced 2021 EPS guidance range of $1.64-$1.69 ($1.67 mid-point), relatively in-line with GS/consensus of $1.68/$1.66. The company also extended its 5-7% EPS CAGR forecast through 2023 (versus 2022 prior), using 2020 as the base while reiterating expectations to achieve the upper end of the 2020 guidance range of $1.53-$1.58. In short, we view today's release as largely in-line with our expectations and reaffirming WTRG's focus on water utility expansion and system de-carbonization. We reiterate our Buy rating (on CL), as we continue to see WTRG as a secular winner to benefit from material water infrastructure investment needs in a fragmented market, with valuations not fully reflecting the company's primarily water utility exposure.

We also highlight some key additional disclosures:

- **Extension of 6-7%/8-10% rate base CAGR through 2023 for water/gas utilities,** respectively, using 2019 as the base. We note the water rate base growth excludes rate base additions from municipal acquisitions; inclusive of acquisitions, we calculate the growth rate at between 8-9%. Management also reaffirmed its strategy to maintain at least a 70%/30% water/gas mix by rate base.
- **Expect DELCORA acquisition close by 2Q2021.** With the recently favorable district court decision supporting the asset purchase agreement (APA) between Aqua and DELCORA, management expects the PA commission to provide its decision in March, with the deal close shortly after. We note this wastewater deal represents the largest municipal acquisition done by WTRG, with the ~$310mn forward equity offering already priced in August 2020.
- **WTRG plans to reduce CO2 emissions 60% by 2035** from 2019 levels, both at the gas and water/wastewater segments, via gas infrastructure replacement as well as using renewable electricity for its water operations.

Our $51, 12-month price target (unchanged) is based on a SOTP approach, with 35x/22x P/E applied to our 2021 water/gas utility EPS estimates, respectively. Downside risks to our call include: 1) PA regulation turns less constructive, which impacts earnings growth potential given the bulk of WTRG's earnings are derived from the state's water/gas operations, 2) the proposed DELCORA municipal water

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

system acquisition does not receive necessary approvals for completion, which could impact longer-term water rate base growth outlook barring replacement with other municipal acquisitions, and 3) longer-term growth concerns about the gas utility segment further compresses WTRG's valuation, both on an absolute basis and relative to pure-play water utilities.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Essential Utilities Inc. is/are relative to the other companies in its/their coverage universe:

Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., WEC Energy Group, Xcel Energy Inc.

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by the Global Investment Research Division of Goldman Sachs and referred to in this research.

Goldman Sachs has received compensation for investment banking services in the past 12 months: Essential Utilities Inc. ($48.72)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: Essential Utilities Inc. ($48.72)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: Essential Utilities Inc. ($48.72)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: Essential Utilities Inc. ($48.72)

Goldman Sachs makes a market in the securities or derivatives thereof: Essential Utilities Inc. ($48.72)

Goldman Sachs is a specialist in the relevant securities and will at any given time have an inventory position, "long" or "short," and may be on the opposite side of orders executed on the relevant exchange: Essential Utilities Inc. ($48.72)

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. not authorised to disseminate research and additionally, GSBE, Copenhagen Branch filial af GSBE, Tyksland, supervised by the Danish Financial Authority disseminates research in the Kingdom of Denmark; GSBE - Sucursal en España (Madrid branch) subject (to a limited extent) to local supervision by the Bank of Spain disseminates research in the Kingdom of Spain; GSBE - Succursale Italia (Milan branch) to the relevant applicable extent, subject to local supervision by the Bank of Italy (Banca d'Italia) and the Italian Companies and Exchange Commission (Commissione Nazionale per le Società e la Borsa "Consob") disseminates research in Italy; GSBE - Succursale de Paris (Paris branch), supervised by the AMF and by the ACPR disseminates research in France; and GSBE - Sweden Bankfilial (Stockholm branch), to a limited extent, subject to local supervision by the Swedish Financial Supervisory Authority (Finansinpektionen) disseminates research in the Kingdom of Sweden.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

Essential Utilities (WTRG, Neutral)

We tweak down our 2020-2022 EPS estimates to $1.55/$1.63/$1.78 from $1.56/$1.65/$1.78, respectively, to reflect 1) 10-Q update, 2) increased equity dilution in 4Q20 from lower assumed share price, and 3) moderately higher interest expense. We note our 2020 estimate incorporates 1Q20 adjusted EPS of $0.60 as reported by the company, which does not include the mild weather impact on the Peoples Gas segment. We assume relatively flattish gas load growth from 2019A-2022E, while embedding +2%/-1% water customer/usage growth during the same period. We continue to view favorably Essential's heavily residential customer mix for both water/gas businesses that could mitigate the negative COVID-19 related demand impact from commercial/industrial customers. While we estimate a robust 6.4% EPS CAGR from 2019A-2022E, we view WTRG's current valuation as fairly representing the company's water/gas utility mix.

Our $45 12-month price target (unchanged) reflects a 12% total return is based on an SOTP valuation methodology. We apply our 30x base water target P/E multiple to 2021E EPS for the water utility segment, along with a 22x P/E multiple to 2021E EPS for the gas utility segment. Our gas multiple reflects a 10% (or 2x) premium to our 20x base gas target P/E, given our view of the segment's above-average rate base and EPS growth. **Key upside risks** include: 1) Peoples Gas acquisition synergies exceed our expectations, elevating EPS growth profile, 2) tax repairs election for the PA gas utility elevates earned ROEs even above our estimate, and 3) WTRG continues to benefit from ESG fund flows, despite its water/gas utility mix profile on a pro-forma basis. **Key downside risks** include: 1) PA regulation turns less constructive, 2) growth from municipal acquisitions slows, and 3) WTRG credit rating is downgraded.

Eversource Energy (ES, Neutral)

We adjust down our 2020 EPS estimate to $3.63 from $3.66 while our 2021/2022 estimates remain unchanged at $3.89/$4.12, respectively. The lower 2020 estimate stems from a combination of lower expected demand at the New Hampshire electric utility (with no decoupling unlike most of the other ES utility jurisdictions), modestly lower estimates for corporate/other, and partially offset by lower O&M expense (assume -1% CAGR from 2019-2022E). Our model does not incorporate the

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

pending $1.1bn acquisition of Nisource's Columbia Gas of Massachusetts (CMA) utility. We view ES with its largely demand decoupled utility portfolio as well positioned to mitigate the current COVID-19 environment while continuing to grow at a robust ~6% EPS CAGR; however, we remain Neutral rated largely on valuation despite acknowledging potential longer-term earnings upside from its investments in offshore wind (mostly in 2024 and beyond).

Our $88 12-month price target (unchanged) implies a 15% total return and is based on a 22.5x P/E applied to our 2021 EPS. **Key upside risks** include improved offshore wind return forecasts, reduced permitting/construction hurdles, indications of additional rate base investments. **Key downside risks** include ineffective cost management, slowing rate base growth, dilutive acquisitions, and delays/cost overruns in ES's offshore wind investments.

Xcel Energy (XEL, Neutral)

We lower our 2020/2021 EPS estimates to $2.75/$2.95 from $2.79/$2.97, while our 2022 estimate remains unchanged at $3.17, implying a 6.3% EPS CAGR from 2019A-2022E. Our adjustments reflect 1) 10-Q update, 2) lower electric demand in 2020/2021 per our GSe forecast, 3) lower O&M expense, and 4) updates related to the recent Texas and New Mexico rate case settlements. Our estimates reflect an 8.6%/8.8%/8.9% earned ROE in 2020-2022, respectively, versus the 9.4% weighted average authorized ROE across the various jurisdictions. We continue to view favorably XEL's revenue decoupling mechanism at its Minnesota and Colorado (residential and small commercial) utilities, which comprise the majority of its consolidated earnings. However, we see the company's ability to implement strong cost controls (-4% to -5% YoY guided by company), especially sustainable cost cuts, as key to achieving its original 2020 EPS guidance range and its 5-7% growth rate. Finally, we view XEL's 7.5% rate base growth as intact, supported by new renewable investments, potential to take ownership of existing PPAs, and ongoing grid modernization efforts.

Our $66 12-month price target (unchanged) reflects a 12% total return and is based on a 2.25x (13%) premium to our baseline 2021E P/E multiple of 20x. Despite our view that XEL could sustain its current ~6.5% EPS growth over the next 10 years given long-term visibility of regulated investment growth, the stock's YTD outperformance - now reflecting a ~3x (15%) premium - makes us incrementally more negative. **Key upside risks** include: 1) Further upward revisions to rate base/EPS growth through increased capital support incremental multiple expansion, 2) XEL realizes higher EPS growth through sustained O&M savings initiatives, and 3) the U.S. government extends federal renewable tax credits, lowering renewable costs and accelerating XEL's capital growth. **Key downside risks** include: 1) negative rate case outcomes impact the utilities' earnings power, 2) XEL realizes less generation into rate base vs. PPA, impacting rate base growth, 3) PPA buyouts do not materialize, stemming incremental rate base growth opportunities, and 4) COVID-19 meaningfully impacts non-decoupled demand in addition to increased cash drag from customer bill non-payment.

Disclosure Appendix

Reg AC

I, Insoo Kim, CFA, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial advisory disclosure

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: Eversource Energy

The rating(s) for Essential Utilities Inc., Eversource Energy and Xcel Energy Inc. is/are relative to the following companies in its coverage universe:

Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Evergy Inc., Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., WEC Energy Group

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by the Global Investment Research Division of Goldman Sachs and referred to in this research.

Goldman Sachs beneficially owned 1% or more of common equity (excluding positions managed by affiliates and business units not required to be aggregated under US securities law) as of the month end preceding this report: Eversource Energy ($78.46)

Goldman Sachs has received compensation for investment banking services in the past 12 months: Essential Utilities Inc. ($41.03), Eversource Energy ($78.46) and Xcel Energy Inc. ($60.37)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: Essential Utilities Inc. ($41.03), Eversource Energy ($78.46) and Xcel Energy Inc. ($60.37)

Goldman Sachs has received compensation for non-investment banking services during the past 12 months: Eversource Energy ($78.46)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: Essential Utilities Inc. ($41.03), Eversource Energy ($78.46) and Xcel Energy Inc. ($60.37)

Goldman Sachs had a non-investment banking securities-related services client relationship during the past 12 months with: Eversource Energy ($78.46) and Xcel Energy Inc. ($60.37)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: Essential Utilities Inc. ($41.03), Eversource Energy ($78.46) and Xcel Energy Inc. ($60.37)

For the exclusive use of INSOO.KIM@GS.COM

Goldman Sachs has managed or co-managed a public or Rule 144A offering in the past 12 months: Eversource Energy ($78.46)

Goldman Sachs makes a market in the securities or derivatives thereof: Essential Utilities Inc. ($41.03), Eversource Energy ($78.46) and Xcel Energy Inc. ($60.37)

Goldman Sachs is a specialist in the relevant securities and will at any given time have an inventory position, "long" or "short," and may be on the opposite side of orders executed on the relevant exchange: Essential Utilities Inc. ($41.03) and Eversource Energy ($78.46)

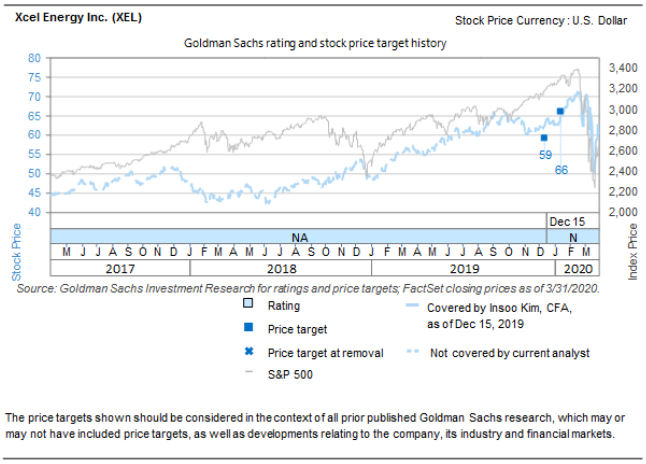
Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

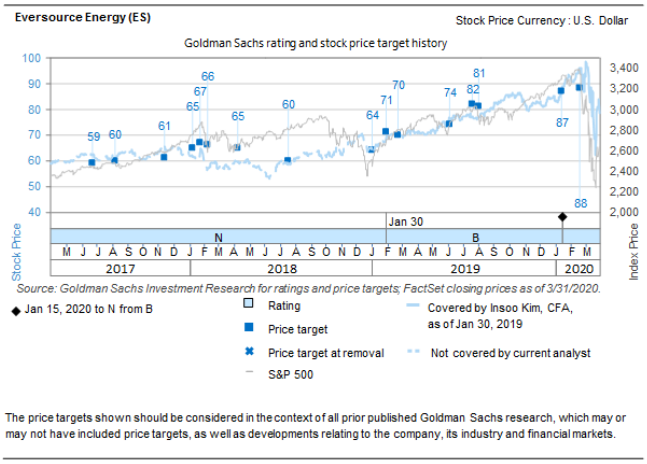
	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	46%	39%	15%	65%	57%	52%

As of April 9, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,023 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage Universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure

For the exclusive use of INSOO.KIM@GS.COM

information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Further information on the covered companies referred to in this research may be obtained from Goldman Sachs (Singapore) Pte. (Company Number: 198602165W). **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

American Water (**AWK**, Buy) and Essential Utilities (**WTRG**, Neutral) reported quarterly earnings this afternoon. **In short, both companies met or exceeded consensus expectations while reaffirming 2020 guidance, EPS growth, and capital forecasts. We also note that both companies' water demand/margins showed relative resiliency in the current COVID-19 environment, given heavy residential customer exposure**; case in point, WTRG recorded an increase in water usage and margins YoY, as robust residential usage more than offset declines in the other customer classes. We expect shares of both companies to react favorably tomorrow.

American Water Works (AWK, Buy): 2Q2020 results relatively inline, 2020 guidance and EPS growth reiterated

AWK reported 2Q2020 adjusted operating EPS of $0.97, inline with GS and above FactSet estimates of $0.97/$0.96 and versus 2Q2019 of $0.94. The company maintained its 2020 EPS guidance range of $3.79-$3.89 ($3.84 midpoint) versus GS/consensus of $3.85/$3.83, while reiterating the long-term EPS growth CAGR of 7-10%.

Regarding COVID-19, AWK pointed to a -$0.05 EPS for the quarter, driven by a -18%/-12% YoY demand impact for its commercial/industrial segment, partially offset by an 8% increase for residential. We note C&I usage constitutes around 30% of total volumes. At the Homeowner Service segment, AWK noted a -$0.01 of impact due to delayed partner relationships. Total COVID-related impact is expected at between -$0.05 to -$0.08 for the year, while consolidated capital spend expectations remain unchanged at $1.9bn.

Key topics to monitor on AWK's earnings call (8/6 @ 9am ET) include (1) updated thoughts on water/wastewater usage trends for the balance of the year, (2) potential for Homeowner Service revenues could be impacted further given COVID-19, (3) thoughts on potential for increased muni acquisition opportunities over the next 1-2 years above forecast, and (4) potential opportunities/challenges for AWK from potential changes to tax reform and or clean energy/water plans.

Essential Utilities (WTRG, Neutral): 2Q2020 beat GS/consensus, 2020 guidance

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

reiterated

WTRG reported 2Q2020 pro-forma EPS of $0.29, vs GS/consensus of $0.17/$0.23, with the beat largely due to quarterly timing of O&M and other expenses, in our view, but also helped by **positive YoY water usage/margins from positive residential demand more than offseting lower C&I usage**. WTRG maintained its 2020 guidance of $1.53 to $1.58, versus GS/consensus of $1.55/$1.56, as well as its 5-7% EPS forecast from 2019A-2022E; we note the 2020 EPS guidance assumes full quarter contribution from the Peoples acquisition. Management also reiterated their 2020 water/gas capex guidance of $550mn/$400mn, as well as $2.8bn of total capex from 2020-2022.

Key topics to monitor on WTRG's earnings call (8/6 @ 11am ET) include (1) assumptions on gas usage trends in 2H2020, (2) latest update on potential revenue/cost synergy levels from integration of Peoples Gas, 3) thoughts on potential for increased muni acquisition opportunities over the next 1-2 years above forecast, and (4) potential opportunities/challenges for WTRG from potential changes to tax reform and or clean energy/water plans.

Price Targets and Key Risks

AWK, Buy: Our $146, 12-month price target is based on a 34.5x P/E multiple on our 2021E EPS. Key risks include water quality issues, cost management, regulatory environment, growth at non-regulated segments, and reduced ESG fund flows.

WTRG, Neutral: Our $45, 12-month price target is based on an SOTP. Key risks include Peoples Gas acquisition synergies, tax repair election in PA, ESG fund flows, PA regulation, growth from municipal acquisitions, and credit rating downgrade.

Disclosure Appendix

Reg AC

I, Insoo Kim, CFA, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for American Water Works and Essential Utilities Inc. is/are relative to the other companies in its/their coverage universe:

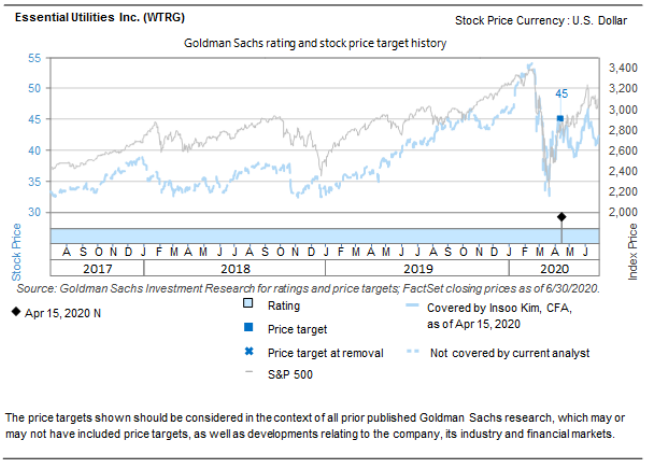
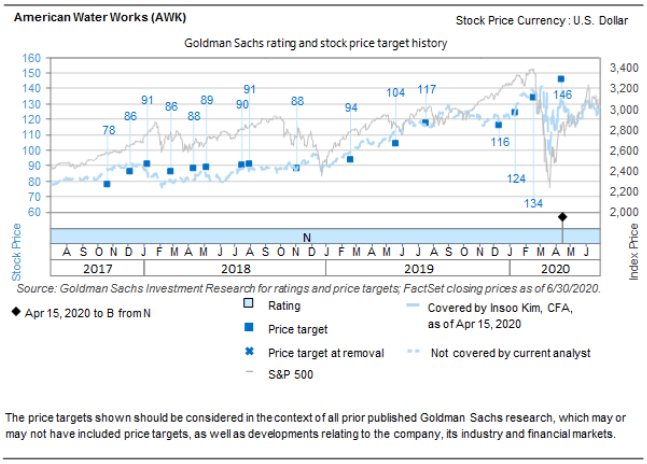
	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	47%	36%	17%	65%	58%	54%

As of July 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,015 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Further information on the covered companies referred to in this research may be obtained from Goldman Sachs (Singapore) Pte. (Company Number: 198602165W). **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Buy CL

Essential Utilities Inc. (WTRG)

The under-appreciated water growth opportunity; Upgrade to Buy (add to CL)

WTRG	12m Price Target: **$51.00**	Price: **$41.55**	Upside: **22.7%**

We upgrade regulated water/gas utility Essential Utilities (WTRG) to Buy from Neutral and add to the Conviction List. As one of two large-cap, publicly traded regulated water utilities in the US, we see WTRG as a secular winner to benefit from an estimated $750 billion of water infrastructure investment needs (per the EPA) in a very fragmented market. This represents at least a $7bn opportunity – well above its total current water asset base – excluding any market share gains through municipal and other water utility acquisitions.

After YTD underperformance of 10% versus the XLU, we see current prices reflecting a 7x (20%) P/E discount for the company's water utility segment (comprising ~70% of total earnings) versus the only other large-cap water utility American Water (AWK, Buy); we view this as unwarranted while undervaluing WTRG's normalized EPS growth potential similar to AWK's, representing one of the highest in our coverage universe.

PM Summary

We upgrade regulated water/gas utility Essential Utilities (WTRG) to Buy from Neutral and add to the Conviction List given the following key points:

1. **We see WTRG as a secular winner to benefit from the EPA's estimated $750 billion of water infrastructure investment needs in a very fragmented market.** With the estimates from the Environmental Protection Agency (EPA), and based on WTRG's current 1% market share of US customer connections, this implies at least a $7bn investment opportunity, translating into 15 years of 6-7% organic earnings growth, or ~8% including municipal acquisitions.
2. **WTRG's recent acquisition of PA-based gas utility diluted its pure-play water profile but supports robust growth through de-carbonization.** We view this acquisition as a one-off investment in gas – from a recent conversation with management – given its geographic proximity to water headquarters, along with a robust growth opportunity via aging pipe replacement investments that should reduce 119k tons of CO2 over the next 15 years, equivalent to emissions from 25k cars or 13k homes.
3. **WTRG should benefit from a scarcity premium** as one of two large-cap, publicly traded water utilities in the US that comprise 80% of the sector's total market capitalization, as well as a **renewed ESG focus** given water utilities still comprise 70% of total earnings and management's focus on increasing the exposure.
4. **We view WTRG's multiple compression versus water utilities as overdone,** with current prices reflecting a 7x (20%) discount for the company's water utility segment versus the only other large-cap water utility American Water (AWK, Buy), which we view as unwarranted (Exhibit 4) given comparable long-term growth potential (Exhibit 5). From another angle, we see the market valuing WTRG as a 60% gas utility despite its 70% water earnings composition. Given management's strategy to further increase its water utility exposure over time, we believe WTRG deserves a premium valuation to reflect its high growth, largely ESG-friendly profile.

Our 12-month price target $51 (from $45 prior) reflects a 24% total return versus 13% for Regulated Utilities, with our estimates reflecting a robust 7% EPS/DPS CAGR from 2019A-2022E versus a 5% average for Regulated Utilities.

Thesis #1: Material investment needs for US water infrastructure provide secular growth opportunity for WTRG

The $750 billion water proposition. Aging infrastructure and increased regulation in the sector are primary drivers for the need to modernize the country's water and wastewater infrastructure related to water quality and the management of water and wastewater residual discharges. Because pipe assets last a long time, water systems that were built in the latter part of the 19th century and throughout much of the 20th century have not, for the most part, experienced the need for pipe replacement on a large scale. To put this aging infrastructure into context, the Environmental Protection Agency (EPA) estimates almost $750 billion of investment needed to upgrade the country's water systems, both public and private, to meet environmental standards. Based on WTRG's current 1% market share of US customer connections, this implies at least a $7bn investment opportunity, more than the company's current ~$5bn water rate base, supporting visibility to grow rate base at the current 6-7% rate for almost the next 15 years (excluding municipal acquisitions).

The water utility sector is highly fragmented... Of the 50,000/15,000 water/wastewater systems nationwide, only 16%/2% are run by investor-owned utilities (IOUs) and privately held water utilities, making the water industry the most fragmented of the major utility industries (electric, natural gas, water/wastewater). With local municipalities owning and operating the majority of the community water systems, many face challenges associated with their aging, deteriorating water and wastewater assets, do not have the expertise or technical capabilities to continue to comply with ever-increasing environmental regulations or simply want to focus on other community priorities.

...and Fair Market Value (FMV) legislation offers acquisition opportunities for

For the exclusive use of INSOO.KIM@GS.COM

WTRG. The sector has been ripe for consolidation for decades and the largest water utilities have recently altered their strategic growth efforts to focus on buying mid-sized municipal water and wastewater systems fueled by fair market value (or FMV); legislation allows the water utilities to include into rate base the fair market value of the acquired municipal water assets instead of the depreciated original cost of water/wastewater assets. FMV is on the books in all of WTRG's 8 operating jurisdictions, which should allow WTRG to aggressively increase its water utility footprint, per the company's current opportunity set that could increase its customers served by 30% if fully successful. For illustrative purposes, a 1% increase in WTRG's market share by people served could add ~100% of WTRG's 2019A water utility rate base (Exhibit 10), all else equal.

Source: Company data, AWWA, Goldman Sachs Global Investment Research

Thesis #2: Gas utility infrastructure investments supports robust growth through de-carbonization

We view the recent Peoples Gas acquisition as a one-off investment into gas utilities. WTRG's October 2018 decision to acquire privately held PA-based gas utility Peoples Gas, and the March 2020 completion, created a new asset mix for the company that now comprises 70%/30% water/gas utility by rate base and earnings. While this diluted the company's pure-play water profile supported by ESG-focused investors, in our view, we believe the investment did offer geographic synergy opportunities given WTRG's PA-based headquarters, while adding an under-invested gas system with robust growth opportunities. We note WTRG does not intend to grow its gas utility footprint through other acquisitions, per our recent conversation with management.

For the exclusive use of INSOO.KIM@GS.COM

Peoples Gas offers robust growth through aging pipe replacement... We see ~10% rate base growth at Peoples Gas from 2019A-2022E primarily driven by long-term visibility of pipeline replacement projects. We note that Peoples has identified more than 2,700 miles of bare steel and cast iron pipe to be replaced under its Long-term Infrastructure Improvement Plan (LTIIP) by 2034 in its PA service territory, which at ~180-200 miles/year of pipe replacement, implies more than 15 years of increased capital spending to help support visibility of 9% rate base CAGR beyond 2022. We note this growth does not depend on new gas customer connections.

...while achieving de-carbonization. In addition to reliability and safety benefits from aging infrastructure replacement, we highlight that these investments also reduce meaningful methane emissions in the process. Per the company's data, the ~200 miles per year of pipe replacement reduces 9,000 tons of CO2, equivalent to emissions from 1,900 cars or 1,000 homes. Based on the 2,700 miles of identified cast iron/bare steel in the Peoples Gas system, this would equate to 25k cars or 13k homes.

Exhibit 11: We view WTRG's acquisition of Peoples Gas as a one-off gas investment that offers geographic synergies and robust growth...

Thesis #3: WTRG should benefit from a scarcity premium, renewed ESG focus

WTRG is one of only two large-cap, publicly traded water utility in the US. Given the very light trading volumes for the majority of the water IOUs, we believe investors have limited options to invest in water utilities, which should benefit WTRG longer-term. In addition, while the company's recent acquisition of Peoples Gas diluted its status as a pure-play water utility, we see WTRG's 70% earnings mix to water utilities and management's strategy to grow the exposure over time should regain the attention of more ESG-focused investors, given their large overweight position to Water Utilities including WTRG per the recent data and publication from our GS SUSTAIN team (Exhibit 14, Exhibit 16).

Thesis #4: WTRG's valuation under-appreciates secular water growth outlook

We view WTRG's multiple compression versus water utilities as overdone, despite its acquisition of privately held PA gas utility Peoples Gas in early 2020 (30% of consolidated earnings) that removed its pure-play water profile and contributed to the underperformance, in our view. Per Exhibit 17, the stock started experiencing P/E multiple compression in October 2018 with the acquisition announcement, with continued pressure following its deal completion in March 2020. The valuation spread versus the other large-cap water utility – American Water (AWK, Buy) – now stands at ~12x P/E on 2021E, versus relatively in-line as of the Peoples Gas acquisition announcement.

We see WTRG's normalized LT EPS growth rate as relatively in-line with that for AWK at around 8% – representing one of the highest growth rates in our coverage universe – given the potential for a 9%+ combined rate base CAGR assuming continued robust municipal acquisitions. We note our estimated 7% EPS CAGR through 2022 reflects certain items including: 1) earnings and financing lag associated with the proposed DELCORA acquisition and timing of inclusion into rate base (1Q2021 equity issuance assumed, rate base inclusion in 2022), 2) the expiration of tax-advantaged rate-making - repairs tax - at the PA water segment and a return to normal rate-making, and 3) the recent election of repairs tax for Peoples Gas and timing of associated earnings benefit.

While we continue to view a discount versus AWK as warranted for WTRG, given our sum-of-the-parts (SOTP) valuation approach for the water/gas businesses versus AWK's pure-play water profile, we see current multiples meaningfully under-valuing the water business (Exhibit 18), based on WTRG's P/E discount versus an illustrative

For the exclusive use of INSOO.KIM@GS.COM

70%/30% water/gas utility mix. In addition, we view management's strategy to increase its water exposure over time as supporting an ESG-friendly profile, which should warrant a premium valuation.

Exhibit 17: WTRG has experienced meaningful relative multiple compression since its announced acquisition of privately held gas utility Peoples Gas

Applying a premium to water segment; upgrade to Buy (add to Conviction List)

Our 2020-2022 EPS estimates remain largely unchanged at $1.55/$1.66/$1.80 – with timing of equity/debt financing the driver of the 2021 estimate from $1.65

For the exclusive use of INSOO.KIM@GS.COM

prior - implying a 7% CAGR from 2019A-2022E, along with similar dividend growth during the period. Our 2021 EPS adjustmentWe believe WTRG could achieve a higher growth rate beyond 2022 and closer to its ~9% blended rate base growth, given the more near-term lag from equity financing for the pending DELCORA municipal acquisition, as well as earning on the added rate base.

We raise our 12-month price target to $51 (from $45 prior) based on a SOTP approach, with 35x/22x P/E applied to our 2021 water/gas utility EPS estimates, respectively. We now apply a 5x premium to our base water P/E multiple of 30x to highlight the company's focus on further increasing its water utility exposure that should elevate its ESG-friendly profile, as well as its scarcity premium as one of two large-cap, publicly traded water utilities. Our valuation reflects a 30.6x blended P/E, below our AWK target multiple of 37x, with the relative discount still warranted given WTRG's water/gas business mix. Our new target reflects a 24% total return versus 13% for Regulated Utilities.

Downside risks to our call include: 1) PA regulation turns less constructive, which impacts earnings growth potential given the bulk of WTRG's earnings are derived from the state's water/gas operations, 2) the proposed DELCORA municipal water system acquisition fails to receive necessary approvals for completion, which could impact longer-term water rate base growth outlook barring replacement with other municipal acquisitions, and 3) longer-term growth concerns about the gas utility segment further compresses WTRG's valuation, both on an absolute basis and relative to pure-play water utilities.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Rating and pricing information

Rating and pricing information: American Water Works (Buy, $155.72)

The rating(s) for Essential Utilities Inc. is/are relative to the other companies in its/their coverage universe:

Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., WEC Energy Group, Xcel Energy Inc.

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by the Global Investment Research Division of Goldman Sachs and referred to in this research.

Goldman Sachs has received compensation for investment banking services in the past 12 months: Essential Utilities Inc. ($41.55)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: Essential Utilities Inc. ($41.55)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: Essential Utilities Inc. ($41.55)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: Essential Utilities Inc. ($41.55)

Goldman Sachs makes a market in the securities or derivatives thereof: Essential Utilities Inc. ($41.55)

Goldman Sachs is a specialist in the relevant securities and will at any given time have an inventory position, "long" or "short," and may be on the opposite side of orders executed on the relevant exchange: Essential Utilities Inc. ($41.55)

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships

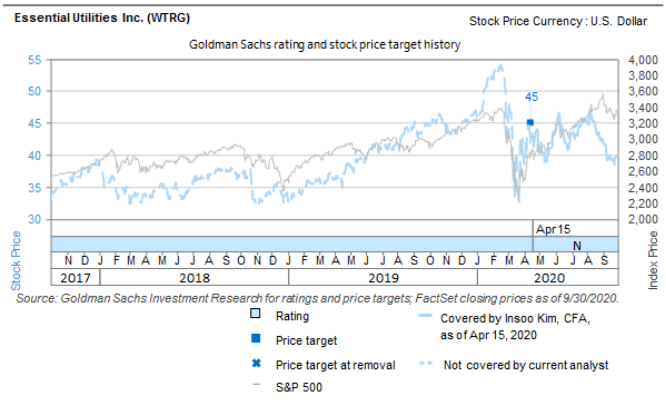
For the exclusive use of INSOO.KIM@GS.COM

As of October 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,122 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs

Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities

For the exclusive use of INSOO.KIM@GS.COM

discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

Goldman Sachs & Co. LLC

After our October 19 note upgrading regulated water utility WTRG to Buy (on CL), we received a wide range of investor feedback on both sides of the aisle, with some in agreement with the attractive relative valuation and robust long-term growth potential, while others remain concerned about the company's water/gas utility profile from an ESG perspective, along with the market's increasingly negative view on the terminal growth rate for gas demand due to electrification.

We highlight below the main discussion points from our investor conversations on the WTRG upgrade:

1. **Some investors see WTRG as a "show me" story,** despite attractive relative valuations, per their view that the PA-based Peoples Gas utility acquisition diluted its status as a pure-play water utility and did not represent the best strategy for value accretion. That said, they are encouraged by management's commitment to increase its 70% water profile (by earnings) through continued water system acquisitions, which investors view as a higher multiple business that they agree is undervalued at current valuations.
2. **What could improve gas utility valuation multiples?** While investors agreed that WTRG should trade at a discount to pure-play water peers given its exposure to a gas utility, they believe a portion of the company's multiple compression is attributed to the increasingly negative view on gas utilities' terminal growth rate from the electrification theme. They acknowledge that Peoples Gas' majority exposure to gas-friendly Pennsylvania and 10+ year of growth through infrastructure replacement investments (without reliance on new customer connections) should support a premium valuation versus gas LDC peers; however, they remain concerned that continued market pressure on this segment could weigh on WTRG's overall valuation longer than expected.
3. **Investors wonder whether WTRG could continue to maintain its overweight position among ESG funds,** with the stock still ranking as a top 20 relative overweight per our GS SUSTAIN team data. With ESG fund flow continuing to increase, the funds' perception of WTRG's 30% gas exposure remain key to closing the valuation gap versus American Water (AWK, Buy), the only other large-cap water utility that still maintains its pure-play water profile. Some thematic investors did acknowledge the de-carbonization benefit of

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

Peoples' gas pipe replacements as a qualifying factor for potential investment; however, others view the elimination of the gas exposure via a spin or sale as the quickest solution to re-capture its clean energy status.

4. **More bearish investors see WTRG un-deserving of a premium P/E multiple,** given their view of the Peoples Gas acquisition as a strategic misstep that may require time to recover. Despite the discount to AWK, they view WTRG's 23-24x P/E on 2022E as not fully capturing the execution and strategic risks, especially versus high-growth, premium electric utilities like Wisconsin Energy (WEC, Sell) or Xcel Energy (XEL, Neutral).

Our $51, 12-month price target (unchanged) is based on a SOTP approach, with 35x/22x P/E applied to our 2021 water/gas utility EPS estimates, respectively. Our valuation reflects a 30.6x blended P/E, below our AWK target multiple of 37x, with the relative discount still warranted given WTRG's water/gas business mix.

Downside risks to our call include: 1) PA regulation turns less constructive, which impacts earnings growth potential given the bulk of WTRG's earnings are derived from the state's water/gas operations, 2) the proposed DELCORA municipal water system acquisition fails to receive necessary approvals for completion, which could impact the longer-term water rate base growth outlook barring replacement with other municipal acquisitions, and 3) longer-term growth concerns about the gas utility segment further compresses WTRG's valuation, both on an absolute basis and relative to pure-play water utilities.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

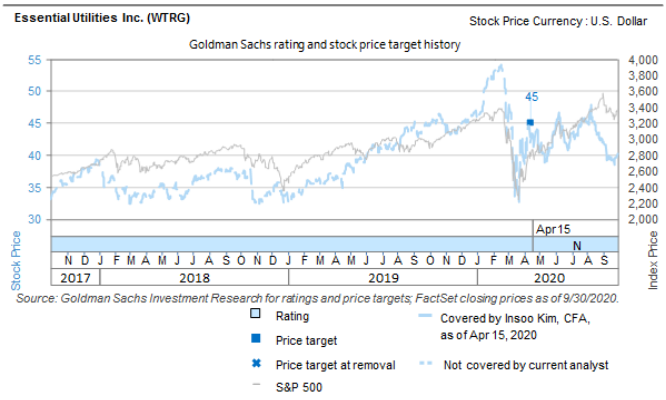
As of October 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,122 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs

Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

PM Summary

We come away from our 2020 Edison Electric Institute (EEI) meetings with management with two major themes:

1. **Clean energy transition and lowering emissions:** Companies remain focused on transitioning their generation fleet towards renewables, reducing emissions while supporting increased investments. Both state policy (Renewable Portfolio Standards) and federal tax credits (ITCs/PTCs) along with declining renewable costs are driving the transition.
2. **Shrink to grow opportunities:** Corporate simplification - either announced or in consideration - are driving many of the Diversified Utilities (CNP, DTE, EXC, PPL) as management teams seek to simplify the story and close valuation discounts.

We remain positive on utilities despite recent upticks in share prices and valuations as the sector still trades at a discount to the S&P500 versus a historical 20%-25% premium in a similar low-rate environment. Additionally, utility yields continue to screen favorably in comparison to IG bonds and the UST 10-year. Our top picks include renewable/green names such as NEP and WTRG (both Buy-rated and on the CL), while attractive generation fleet transformation plays include AEE, DUK, and PNW. For more value opportunities, we also see compelling upside in Buy-rated value names FE and PCG, along with Diversified Utilities with SOTP discounts like Buy-rated DTE, EXC and SRE (on CL).

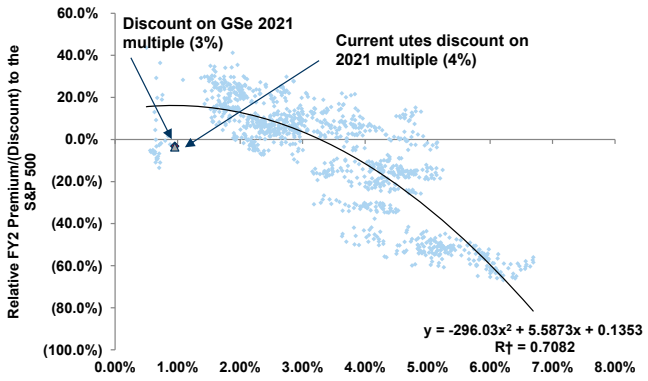
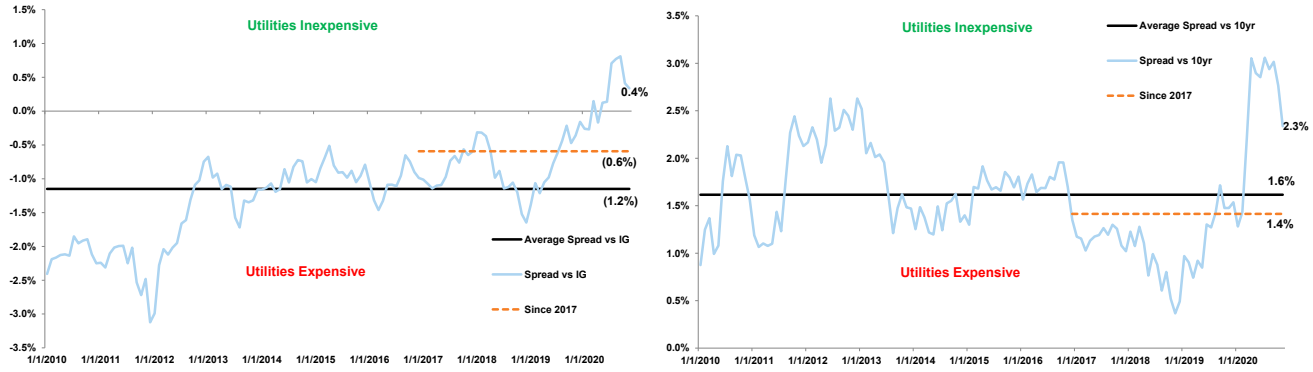
Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Exhibit 1: Utilities currently trade at a discount to the S&P 500, at a 20%-25% discount to what history would imply in a low rate environment
Utilities FY2 P/E premium/(discount) to the S&P vs UST 10-year yields



Source: FactSet, Goldman Sachs Global Investment Research

Exhibit 2: Utilities continue to trade above average yield spreads in relation to IG bonds and US 10-year treasuries
Utilities yield vs IG bonds vs UST 10 year



Source: FactSet

Top 10 Takeaways from EEI

1. **WTRG expects increased municipal water system acquisition opportunities,** driven by potential increased focus on water quality at both the federal and state levels.
2. **SRE appears still super bullish LNG growth** and financing options for developing new LNG without needing sizable contributions from SRE to fund construction.
3. **Securitization and the wildfire certificate process could drive relief rallies in PCG** – as PCG does not seem significantly concerned on receiving the wildfire safety certificate in the near term and securitizing debt in the longer term.
4. **EVRG maintains high conviction in its Sustainable Transformation Plan (STP)** — recognizing though that new state legislation in KS/MO is the key driver to this, with no clarity coming before early 2021.
5. **D highlights its sizable clean energy related growth at its core regulated VA**

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

electric utility - but recognizes permitting hurdles and rate making in VA (longer term) and SC (near term) present risks.

6. **EXC remains a sum of the parts story - and the company does not embed a "carbon value"** in its assessment of its ExGen subsidiary's potential value.
7. **CNP continues to see upside to its regulated growth plan,** at both the electric and gas utilities, while continuing to assess options to reduce its midstream exposure as expeditiously as possible.
8. **PNW remains confident in its robust renewable/storage investment plans,** which should achieve both de-carbonization and long-term customer rate benefit, while looking for a constructive clean energy recovery mechanism.
9. **DTE's 2021 guidance includes more contingency than normal.** Management indicated that given the ongoing pandemic and the uncertainty related to load and margin mix, they believe that they incorporated more than the typical level of conservatism in their initial guidance.
10. **More settlements in Michigan?** With both DTE/CMS announcing rate case settlements this year, the management teams indicated that the new MPSC composition coupled with significant multi-year filings approving large chunks of capex ahead of time could bode well for more settled rate cases in the future.

Company Takeaways

We hosted meetings at the fall EEI (Edison Electric Institute) conference - an industry conference for US utilities. We highlight the following company updates:

- **PPL expects to compare all options against simply reducing debt and buying back shares with potential UK sale proceeds**, but debt reduction remains key post sale to elevate FFO/debt target ~15%-16% from current ~12%-13% level - as detailed in our prior note on this topic. The company hopes, once becoming a pure play US utility, to trade more in line with peer levels post the sale. Likely a federal cash tax payer soon, diversifying into renewables may allow PPL to utilize tax credits and we note management prefers solar over wind from a competitive perspective. Upside may exist to rate base growth in Kentucky — but not till 2022 or later - as they plan to file an Integrated Resource Plan (IRP) in the state to outline gradual generation fleet changes in this coal heavy state.
- **With AZ commission elections complete, PNW remains confident in medium-term renewables/storage investment plans with conviction in ability to demonstrate cost competitiveness.** The company continues to target procurement of utility scale solar coupled with storage aggressively and believes higher clean energy in resource mix creates significant fuel savings despite initial bill impacts. In the ongoing APS rate case, PNW proposed in the recent rebuttal testimony the Advanced Energy Mechanism (AEM), which would provide rider recovery of renewable/storage investments. If not approved in the rate case, the company looks to push the proposal separately, reducing rate case filings while

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

aligning clean energy investment goals. On the financing side, while the outcome of the rate case would give additional clarity on the timing/magnitude of equity issuance (current forecast at around $300-$400mn), management expects issuance timing as prior to the next rate case filing, while noting that an approval of a clean energy rider could help push back such a filing and/or mitigate the amount.

- **CMS remains well positioned to continue executing with supportive regulation and a constant eye on operational improvements.** Management reiterated the low hanging fruit of fuel (Palisades; MCV) and O&M (Karn 1&2 and defined contribution vs benefit) tailwinds benefiting the customer over the current 5 year plan. However, CMS emphasized that the real value continues to come from operational cost improvements that heighten the quality of experience for both customers and employees as ways to benefit all stakeholders in MI. The state remains focused on decarbonizing and CMS believes that their current targets and plans already remain on track or exceed those goals while offering significant growth. However, management did note that energy storage remains an area where the next IRP could see more investment sooner and the coal Campbell Units 1 &2 could potentially retire earlier. Management sees multi-year filings as providing support for potentially settling rate cases given more known and already agreed upon factors during future rate cases, but noted the ongoing electric rate case is already far along given the PFD. CMs does not view longer-term trackers as likely, preferring the flexibility with annual or near annual filings, indicating that performance based ratemaking has come up and is already evident in energy efficiency and RPS spend.
- **ETR sees, as part of its multi year guidance, modest under earning levels continuing — and sizable rate base growth as well - but regulatory risk remains.** The company anticipates earning 9%-9.5% RoE levels - below authorized - given rate increase caps or regulatory lag in a few jurisdictions like AR, MS and LA. The FERC docket for its SERI segment could present downside - they've highlighted $0.15+ of EPS at risk, largely to finance refunds, but believe they could potentially mitigate this. Recent 2020 storms likely cost roughly $2bn - they hope to securitize these, based on precedents in Louisiana and Texas - otherwise financing this could weigh on earnings slightly. Low utility rates relative to other utilities remains a tailwind for rate base growth - they seek to add $1.4bn of renewables to the system over the next few years and could add emerging technologies (a new CCGT that is hydrogen capable) as well - RFP processes, especially for its Texas utility, remain key for investors to monitor. Finally, the company - while not a large coal fired generator - still owns the sizable White Bluffs facility in Arkansas with plans to retire in the late 2020s - an earlier expected retirement, being evaluated now, could add to rate base and earnings growth.
- **AGR remains confident in its offshore wind timeline, in addition to its growth through PNM and NECEC.** On Vineyard Wind, the company is expecting final environmental impact statement (EIS) this week and final approval by end of year, but notes an approval delayed until 1Q2021 would not alter their 2024 COD target. Given this timeline, AGR would still qualify for 18% ITCs, while looking to take advantage of any extensions/changes to offshore wind ITC rules if appropriate. The

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

company also reiterated its interest in onshore transmission for future offshore wind projects, which is not embedded in the current capital plan. On the New England Clean Energy Connect (NECEC) transmission project, AGR continues to monitor the Maine citizens' initiative as the group plans for a 2nd referendum in opposition, but management believes the project's clean energy and economic benefits to the state will outweigh the opposition arguments. Despite the hurdles to overcome with a project of this magnitude, management expressed interest in considering other future large-scale transmission projects to route clean energy to the NY/NE area to meet clean energy targets. Regarding the company's balance sheet forecast, while AGR looks for Moody's to relax the downgrade threshold for post the PNM acquisition, the guided 14.5%+ FFO/debt from 2022-2025 embeds a potential one-notch downgrade at Moody's.

- **The Florida utilities remain a growth engine for NEE while seeing only modest rate case risk - the renewable segment benefits from massive tailwinds and advantages.** NEE anticipates filling a joint rate case for FP&L and Gulf Power in Florida, where 4 of the current 5 PSC commissioners will oversee the 2021 rate case process. While they likely will seek a rate increase, they recognize RoE risks exist - but they also see potential for continued lower costs going forward that would create headroom for higher rate base growth. The company still sees buyer power, financing advantages, lower O&M costs, site selection skills and economies of scale as their biggest advantages in renewables given their status as the biggest US operator - and an extension of renewable tax credits would not change this, if the new administration in Washington pushes for this. Hydrogen grabs a lot of mind share today - they do not see this as a major near term (2021-25) contributor to earnings, but like energy storage 8-10 years ago, see this as worth monitoring as cost curves improve.
- **CNP sees incremental capital spend spread across its electric/gas jurisdictions,** with 2/3 of the $3bn incremental plan expected at the electric utilities (TX/IN). Electric items include transmission connections for increasing solar build in TX, investments to support customer growth (2-2.5% in TX, 1% in Indiana), while gas investments primarily consist of accelerated gas pipe replacements. Management expects the guided 1-2% annual O&M reductions through 2025 driven by unearthing sustainable O&M savings, conversion from coal to natural gas/renewables, and utilizing technology to improve efficiencies. CNP looks to shift to a majority electric utility profile - partly driving its plan to divest one or two of its regulated gas utilities - while continuing to assess options to reduce its midstream exposure as expeditiously as possible.
- **WEC benefits from a favorable service territory - especially for gas utility service - and believes the current state administration will back its recently announced fleet transformation plan**. With Governor Evers' climate task force still underway, WEC does not fully know the impact of any proposals that will emerge - but they believe retiring older coal/gas units and replacing with solar and storage, along with new gas capacity, will fit in well with broader policy objectives. Cost management could continue in the coming years — while 2020 benefited from greater than originally anticipated levels, more integration could drive even lower

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

costs. As a utility in a cash tax paying status, WEC could continue buying renewable projects and keeping the tax benefits - a competitive advantage versus others who need tax equity.

- **DTE maintains outsized regulated growth and contingency in its initial 2021 guidance, noting more cost headroom over time translates to more investment from their substantial backlog of opportunities.** The current 5-year plan assumes regulated net income growth in excess of 7-8%/9% at DTE Electric/Gas, offsetting REF roll-offs and equity conversion headwinds during 2022-2023. While the current capital expenditure forecast implies slower levels during the back half of the 5-year plan, if management can find more cost savings they can pull forward more distribution and potentially renewable capex into the plan. DTE noted that given the uncertainty related to the ongoing pandemic, their initial 2021 guidance implies more than their typical 1 standard deviation below normal load in cushion. Other topics included an expectation to assess retiring the Belle River (2030) and Monroe (2040) coal plants earlier in the next IRP, which could require more capex in 2024/2025 to replace the Belle River capacity but would also require accelerated depreciation of the rate base. Management believes that providing more granularity on a standalone GSP/DTE Midstream company will create value for shareholders, highlighting the strength of their platform and opportunities for growth – especially in the Haynesville as well as the Nexus/Link platforms.
- **Potential corporate structure changes - as initially outlined by EXC in its 3Q2020 release - drove a sizable portion of our discussion with EXC,** as the company evaluates a possible separation of ExGen from the regulated businesses. Realizing higher valuation levels remains a key aspect of the decision making process - but regulatory approvals at state/federal levels remain key as well to whether they move forward or not with any changes. They do not "price in" or assume a value for carbon or a carbon tax when assessing the company's largely nuclear ExGen fleet — as they do not seem overly optimistic of a national carbon regime emerging soon - but see this as a "call option" not embedded in their base case. The company reiterated plans to meet its regulated utility EPS growth guidance given out previously - despite the impact of weak demand driven partially by COVID 19.
- **For AEP, while earned RoE's may decline, higher equity layers could offset this partially.** In our chat with management, they discussed that guidance assumes a low 9% range for earned RoE's - driven by regulatory lag in jurisdictions like Oklahoma and Louisiana - but hope to offset this with increased investment in projects with trackers and with higher equity layers in rates. The new 5-year capital spending plan incorporates not just the North Central wind project, but other smaller scale renewable spend as well as incremental transmission investment.
- **Dominion faces limited regulatory risk in the near term, but acknowledges longer term risk still exists.** The 2021 triennial earnings review in Virginia creates limited risk given the $50mn cap on revenue reductions, but the company did recognize that (1) risk in Virginia exists in the 2024 review, where no revenue reduction caps exist and (2) the ongoing South Carolina rate case may see

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

intervenor testimony that seeks a far lower rate increase than sought by Dominion. Potential changes at the state utility regulatory commission remain worth monitoring in Virginia. D stays positive on gas utilities given trackers that exist in markets like Ohio, paired with opportunities to grow renewable natural gas and even do its first small scale hydrogen pilot test in Utah. D also iterated that it does not expect change in the company's views on its remaining contracted assets like Cove Point LNG or Millstone nuclear in CT.

- **SRE remains very bullish its mix of US utilities and infrastructure businesses - and expects positive LNG related news in the coming months.** With SRE having sold its Latin American utilities and its US renewable business in the last year, the company's new simplified structure should prove easier for investors to understand going forward. Rate base growth remains material in California given the transition to clean energy - and even with a potential risk to authorized RoE's for 2022 there, authorized levels remain above national averages. Texas remains a growth opportunity - they just raised rate base growth projections by $300mn and could see another $775m+ upside in the coming years - and do not expect an overly contentious rate case proceeding in 2021. On the LNG front, Sempra expects to FID the Costa Azul LNG project - and assume limited construction risk — with only $250m of Sempra's equity capital used to finance this project - and still see Port Arthur LNG as one of the few US facilities potentially moving forward in the coming years.
- **WTRG highlights increasing water quality focus as a potential catalyst to support municipal water acquisitions.** While increased federal funding for water infrastructure, if implemented, could deter certain acquisition opportunities, management expects smaller systems to continue to face funding shortages, especially when combined with potential increase in water quality standards. On its recently acquired Peoples Gas system, WTRG expects pipeline replacement to fuel robust rate base growth at Peoples, while its low pressure systems and above-ground checkpoints enhancing its operational safety.
- **ED continues to face uncertainty related to COVID-related costs and storm response,** while reiterating its equity issuance plan (up to $600mn in 2020, $1.1bn total from 2021-2022) with an update expected with 4Q2020 earnings. At CECONY, ED sees potential investment opportunities to improve grid reliability, including potential for additional undergrounding of its distribution system. ED also looks to continue growing its renewable footprint, although offshore wind remains above its risk tolerance level except for associated onshore transmission investments. Finally, management reiterated its view that its midstream equity stakes in Mountain Valley Pipeline (MVP) and Stagecoach are non-core while looking to mitigate the exposure.
- **DUK anticipates trying to put together a coalition to seek electricity related state legislation in N Carolina** – seeking (1) revised rate making – including multi-year plans, decoupling and/or trackers, (2) policy support for a timeline around coal plant retirements, (3) detailed emission reduction targets and (4) policy support for offshore wind. Cognizant of managing the rate impact, which remains key to get industrial customers on board, the company may need to agree to annual or multi-year rate caps. However, we note their IRP (Integrated Resource Plan) base

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

case assumes ~1% annual rate change and the more aggressive no carbon plan assumes ~2.5% annual increases - so none that appear overly material or that would drive rate concerns for customers. Increased spend at the gas utilities will help drive overall rate base growth - they still see these businesses as attractive growth opportunities - as would higher solar related spend at the Florida electric utility. Florida remains worth monitoring given (1) a proposal to add 750 MWs of community solar, which will go before the PSC in late 2020 and (2) next year's rate case, where DUK will likely seek small rate increase levels.

- **The regulatory front and wildfire recovery will drive EIX from here**. EIX remains bullish regarding changes in California utility regulation — they see faster regulatory decisions as showing the state utility commission wants to work in a more expedited approval process. Recent approvals on securitization, insurance cost recovery, COVID 19 cost deferral and recovery, and wildfire spend recovery (2018-2020), show the state continues to see utilities as necessary "partners" in moving to a cleaner energy economy. They view the cost estimates for 2020 wildfires as likely falling within insurance recovery levels and continue to work to resolve claims related to the 2017/2018 wildfires, after reaching settlements with public entities and the subrogation claims holders. EIX still plans to issue $1bn in common equity - more likely doing so after wildfire season ends in late 2020 and as they get closer to reaching settlements with claimants from prior wildfires — and can utilize $800mn of insurance to pay out claims for now on the 2018 wildfires.
- **XEL looks to continue its robust renewable investment pipeline,** while ITC/PTC extensions - if realized - could support incremental renewable PPA buyout opportunities. Along with the renewable theme, XEL highlighted its commitment to support EV infrastructure and increased EV adoption, with $500mn of planned investments across its various jurisdictions. Finally, XEL expects to be able to grow at the upper half of 5-7% EPS growth guidance with just its base capital plan, while the proposed $1.4bn in incremental wind/solar investments could pad the growth toward the upper end of the guidance range, supported by a flattish base O&M CAGR through the mid-2020's.
- **In our discussion with PG&E Corp's (PCG) interim president and other officers, the company highlighted skills sought in incoming CEO/CFO** level personnel - with announcements likely in the months ahead on who will fill these seats. Operational experience, political and regulatory expertise remain key to the skillset needed for PCG's incoming CEO — while the CFO search focuses on individuals with strong investor relations skill sets as well as in balancing capital spend goals with the impact on customer rate levels. The company did not seem overly concerned regarding the Wildfire Safety Certificate process - they view the delay as more of a technical issue - and hope to get resolution soon. The 2019 certificate remains in place unless the state regulator outright rejects their 2020 application. PCG still anticipates $625m of costs related to the 2019 wildfire - but upside to this may exist and certainty may not emerge for another 1-2 years. They remain optimistic about cost savings opportunities as well as on securitization - they hope to finalize the regulatory docket by late spring 2021 and utilize securitization proceeds to pay down temporarily issued debt in the near term (up to $6bn), with

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

plans to pay down $3bn of outstanding holding company debt over the next 2-3 years. Upside may exist to rate base forecast levels - but risks to the authorized RoE for 2022 remains given the state's cost of capital mechanism.

- **Grid infrastructure investment remains top of mind for AEE, while continuing its fleet transition initiatives.** In Illinois, while management continues to pursue passage of the proposed legislation to extend formula rate-making (expiring in 2022) while opening the doors for renewable investments, they view traditional rate-making as relatively constructive as well given a future test year and de-coupling. In Missouri, the utility noted positive feedback and reception from all stakeholders on the recently filed Integrated Resource Plan (IRP) which, combined with ongoing grid investments in the state, should provide robust long-term rate base growth. Management noted that an extension of renewable tax credits - if implemented, could warrant further acceleration of its renewable growth plan.
- **EVRG remains focused on the state legislative front in Kansas and Missouri - outcomes next year likely will significantly impact earnings growth** and realizing EPS targets. The company still believes, as outlined at 2Q2020 earnings, that retiring up to 500 MWs of coal generation earlier than planned - and securitizing these costs - and redeploying the proceeds into new renewables remains, along with raising transmission/distribution investment, the best growth strategy available. They believe strong support exists for energy transition planning in Kansas — and will seek consensus backing on this in Missouri next year - but risks exist that other low cost alternatives, besides simply company owned generation in rate base, could emerge and present a modest risk to their goals of adding more renewables to rate base. Higher transmission spend comes with limited lag — they anticipated higher levels for multiple years to help Kansas integrate wind capacity, but actually see a bit of an uptick in its smaller segment in Missouri (Missouri West). EVRG does not see asset sales as likely needed or leading to lower costs - early retirements remain the core driver.
- **AWK spoke on opportunities to address water contaminants even in the absence of a federal water quality mandate,** which could drive both organic and inorganic growth via continued acquisitions of small municipal water and wastewater systems. While private capital is present in larger systems, AWK is best positioned to do tuck-in deals with 20,000 customers or less, as they can provide investment and improved service while spreading costs across the entire AWK business. The company still expects the NY utility sale to close in early 2021, with NY commission approval the only outstanding condition. AWK continues to replace water pipes within its system, and is targeting a 100-year replacement cycle versus 120-130 years currently compared to many municipal systems at 200 years. AWK's military business continues to see good traction, with numerous opportunities and proposals currently in the works while the Homeowner Services Business has seen some headwind from COVID-19 in 2020 but margins should be stable moving forward ex-COVID.
- **NI continues to see both electric and gas utilities as integral components of the US energy mix.** Management sees an attractive growth trajectory for both types of Utilities, noting that the recent pressure on regulated natural gas valuations

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

in the public markets does not appear to reflect the fundamental value they deliver for customers that is not easily replaced. The company does see opportunities to decarbonize on the natural gas side through infrastructure replacement as well as RNG, especially given Ohio and Indiana offer attractive RNG resource – noting this will represent a small amount of volume. On the electric side, management highlighted that potential renewable tax credit extensions could potentially support further acceleration of coal retirements, pulling Michigan City earlier than 2028. Separately, NI reiterated that management remains comfortable with current guidance, incorporating ~$0.05 of impact related to COVID.

- **POR continues to see state-driven clean energy goals supporting on-going renewable/storage investments in Oregon,** as well a growing focus on EV infrastructure opportunities, especially for industrial customer base. With the recent state wildfires mostly contained, POR continues to assess the overall cost from an expense/capital standpoint, although they see the levels as largely manageable and supported by the approved cost deferrals from the state commission. POR in 4Q2020 earnings looks to provide an update on both the wildfire cost estimate as well as thoughts on timing of the next base rate case; for 2021, the company looks to grow earnings (using 2019 as the base and 4-6% long-term growth forecast) driven by cost management, benefit from the completion of the Wheatridge renewable facility, and lower costs associated with the retired Boardman coal plant.
- **OGE focuses on maintaining and growing its regulated electric utility profile, primarily through continued transmission & distribution investments at its Oklahoma/Arkansas jurisdictions, supported by improving regulatory frameworks through certain investment recovery mechanisms.** While fleet de-carbonization is not a primary investment driver near-term, OGE does see select solar opportunities that could combine with gas-fired generation in replacing retiring coal plants. Finally, management views the growth of its regulated utilities as the primary use of any capital allocation opportunities.

Valuation and Key risks

PPL Corp. (PPL, Neutral): $31/sh 12 month target price is based on a sum of the parts analysis. Key risks include regulatory risk, power demand and financing.

Pinnacle West Capital Corp. (PNW, Buy): $94, 12-month price target based on 19.5x P/E multiple on 2021 EPS. Key downside risks include 1) APS rate case outcome corresponding to our bear-case scenario that could pressure valuation multiples in the near-to-medium term, 2) realized electric demand is worse than expected, impacting earnings and cash flows, 3) the November 2020 election results in a non-constructive commission, and 4) PNW is unable to secure much ownership in future renewable generation build-out, limiting rate base growth.

CMS Energy Corp. (CMS, Buy): $69, 12-month price target based on 24x 2021 P/E multiple. Key risks include regulation, legislation, cost management, and financing.

Entergy Corp. (ETR, Buy): $119, 12 month target price based on a sum of the parts analysis. Primary risks include regulatory risks, power demand and financing.

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

Avangrid Inc. (AGR, Sell): $45, 12-month price target based on a sum-of-the-parts analysis. Key upside risks for AGR include 1) AGR receives approvals to defer all COVID-19 related costs, mitigating the earnings impact, 2) incremental O&M savings help offset other EPS headwinds, and 3) U.S. government extends federal renewable tax credits, which improve future renewable investment return profiles for AGR's renewable business.

NextEra Energy Inc. (NEE, Neutral): $74, 12-month price target based on a sum-of-the-parts analysis. Key risks include Florida utility regulation, renewable development, tax credit legislation, and operating cost management levels.

Centerpoint Energy Inc. (CNP, Neutral): $22, 12-month price target is based on a sum-of-the-parts valuation. Key risks include customer demand/growth, COVID-related costs, and financing.

WEC Energy Group (WEC, Sell): $88, 12-month target price based a 22x P/E multiple on our 2021 EPS. Key risks to our view include higher than expected capital spend and rate base growth for 2021+, lower than expected operating costs and improved demand.

DTE Energy Co. (DTE, Buy): $142, 12 month price target derived from a sum-of-the-parts valuation. Multiple risks exist to our current view of DTE: (1) Unlike a sale, spinoff valuation remains an unknown for shareholders, if midstream valuations change due to adjustments in legislation, taxes, or supply and demand balances in a negative way, this could impact DTE's valuation. (2) The regulated asset base – representing ~70% of earnings today and theoretically 90% post spin-off – maintains a single state regulatory environment. If MI sees significant changes in regulatory quality – especially the ability to earn timely recovery on investment as well as authorized returns — this could impact our view. (3) Similarly, demand, cost, and investment trends in the state remain critical. (4) DTE currently offers a substantial regulated growth profile, in order to finance this DTE may require equity beyond our forecasts or debt financing costs ahead of our expectations.

Exelon Corp. (EXC, Buy): $53, 12-month price target based off a SOTP analysis. Key risks include retail MWh sales, power prices, generation output, and utility regulation.

American Electric Power (AEP, Neutral): $90, 12-month target price based on SOTP. Key risks include power demand, rate case and regulatory risks, as well as financing.

Dominion Energy Inc. (D, Neutral): $84, 12-month target price based on SOTP. Key risks include regulation, project execution, power demand and financing.

Sempra Energy (SRE, Buy on CL): $150, 12-month price target derived using SOTP. Key risks include project awards, regulatory approvals, construction, and financing.

Essential Utilities (WTRG, Buy on CL): $51, 12-month price target based on SOTP. Key risks include regulation, municipal water system acquisition approvals, and longer-term growth concerns about the gas utility weighing on valuation.

ConEdison (ED, Sell): $78, 12-month price target based on 18x P/E on 2021 EPS. Risks

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

include NY utility commission authorization of COVID-19 related costs and bad debt expense, NY economic conditions, renewable segment growth.

Duke Energy (DUK, Buy): $99, 12-month price target based on 19x P/E on 2021 EPS. Key risks include utility regulation, power demand and coal ash related issues.

Edison International (EIX, Buy): $74, 12-month price target based on 17x P/E on 2022 earnings discounted back to 2021. Key risks include wildfire related costs, litigation claims, utility regulation and financing.

Xcel Energy (XEL, Neutral): $71, 12-month price target based on 20x P/E on 2021 EPS. Key risks include upward revisions to rate base/EPS growth, O&M savings, renewable tax credit extension, negative rate case outcomes, less generation in rate base, materialization of PPA buyouts, COVID-19 related cash drag.

PG&E Corp. (PCG, Buy): $15, 12-month price target based on 14x P/E on 2022 EPS discounted back to 2021, and DDM. Key risks include wildfire risk, continued underearning due to legacy holding costs, financing risk and trading risk.

Ameren Corp. (AEE, Buy): $93, 12-month price target based on 24.5x P/E on 2021 EPS. Key risks include regulation, project awards, and financing.

Evergy, Inc. (EVRG, Neutral): $58, 12-month price target based on 18x P/E on 2021 EPS. Key risks include utility regulation, power demand and cost management.

American Water Works (AWK, Buy): $166, 12-month price target based on 39x P/E on 2021 EPS. Key risks include water quality issues, cost management, regulatory environment, growth at non-regulated segments, reduced ESG fund flows.

NiSource (NI, Buy): $27, 12-month price target based on 20x P/E on 2021 EPS. Key risks include Indiana regulatory approvals for renewables, earnings/cash impacts due to COVID-19, higher than expected O&M, electricity demand and customer growth, and financing.

Portland General Electric (POR, Sell): $39, 12-month price target based on 16x P/E on 2021 EPS. Key risks include COVID-19 impacts on earnings/cash, level of COVID/wildfire related cash drag, renewable ownership, and M&A target risk.

OGE Energy (OGE, Neutral): $35, 12-month price target based on 18.5x P/E on 2021 EPS. Key risks include upsized rate base growth, the company could be a target of a take-out, customer and demand growth, further distribution cuts at ENBL, COVID-19 headwinds.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	49%	35%	16%	64%	57%	54%

As of October 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,122 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

Goldman Sachs & Co. LLC

We hosted virtual meetings with Chris Franklin, President and CEO of water/gas utility Essential Utilities (WTRG, Neutral). Key discussion topics included 1) latest demand and financial updates around COVID-19, 2) update on the pending DELCORA municipal water system acquisition as well as the pace of other acquisition opportunities, and 3) strategic thoughts on Essential's water/gas business mix. We remain Neutral-rated WTRG, although we turn incrementally more positive given recent share underperformance versus water utilities and broader regulated utility peers.

Below are our key takeaways from the virtual NDRS:

- **WTRG continues to see COVID-19 impact as manageable,** with increased demand from its predominantly residential customer base (at both water/gas) offsetting the negative impact from lower commercial/industrial load, along with positive weather benefit in 3Q also supporting demand for the year. Regarding bad debt, deferral treatment authorized in Pennsylvania, its largest jurisdiction, should allow WTRG to execute within its guidance range for the year even when accounting for some cash drag. They look for lifting of shutoff moratoriums in the near-term, especially in PA, given the upcoming winter heating season for the gas segment.
- **Despite some opposition, WTRG expects to complete its proposed acquisition of the PA-based municipal wastewater system DELCORA.** Management noted that the dispute with the Delaware County Council stems from plans to utilize a portion of the proceeds to help manage customer bill increases through a trust. Regardless of the outcome on this matter, the company's commitment remains unchanged regarding the proposed acquisition. They now expect a final approval from the Pennsylvania commission by 1Q2021, a moderate delay from the original YE2020 forecast given an extension to the PA regulatory docket. However, given the capital spend for this business isn't slated to begin until beyond 2021, management sees the delay as immaterial to the 2021 earnings potential.
- **The company noted a rapid increase in municipal acquisition interest and activity since the start of COVID-19,** which management partly attributes to the economic pressures facing many municipalities in the current environment.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

WTRG remains active in the various bidding processes, both within its largest territory in PA but also its other jurisdictions, all which allow Fair Market Value treatment - the ability for the private utility to rate base the acquired system at FMV. However, in the next 12-18 months, **they do not anticipate a need to issue common equity** given the relative smaller size of each opportunity relative to the pending DELCORA proposal, and also given the company accounted for certain future transactions in the recent $311mn equity issuance.

- **Water quality remains a key focus, with potential investment opportunities ahead.** The company's water quality standard - 13 parts per trillion (ppt) - remains well below the EPA's 70 ppt advisory level and the CDC's 35 ppt guidance, and management sees increased federal/state focus on this issue creating potential to increase certainty on cost recovery as well capital for rate base, although not a significant portion of the overall planned investments.
- **WTRG looks to assess clean options for gas business,** although they admitted it's still very early in the process given the recent completion of the Peoples Gas system. Management believes there is a long-term need for gas, whether natural gas or other cleaner forms, while seeing old pipe replacement as a more immediate need at its newly acquired Peoples Gas to both improve reliability and reduce methane emissions.
- **WTRG plans to remain predominantly a water utility,** with organic/inorganic growth that could increase its current 70% exposure from its water segment. Management does not have any intention of expanding its gas utility footprint through other acquisitions.

We increase our 2021-2022 EPS estimates to $1.65/$1.80 from $1.63/$1.78 prior with our 2020 EPS of $1.55 unchanged, primarily to reflect 1) 2Q20 actuals and 10-Q update, 2) $311m equity issuance in 3Q20 (moderately higher than our estimate), 3) reduction in debt issuances in 2021, and 3) moderately higher earned ROE expectations at Peoples Gas to account for incremental tax repairs benefit. Our estimates reflect a 6.9% EPS CAGR from 2019-2022E, at the upper end of management's 5-7% forecast.

Our $45 (unchanged), 12-month price target is based on an SOTP approach, with 30x/22x P/E applied to the our 2021 water/gas utility EPS estimate. Upside risks to our call include: 1) Peoples Gas acquisition synergies exceed our expectations, elevating EPS growth profile, 2) tax repairs election for the PA gas utility elevates earned ROEs even above our estimate, and 3) WTRG continues to benefit from ESG fund flows, despite its water/gas utility mix profile on a pro-forma basis. Downside risks to our call include: 1) PA regulation turns less constructive, 2) the proposed DELCORA acquisition fails to receive necessary approvals, and 3) additional longer-term concerns about the gas segment further compresses multiples.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for Essential Utilities Inc. is/are relative to the other companies in its/their coverage universe:

Goldman Sachs Investment Research global Equity coverage universe

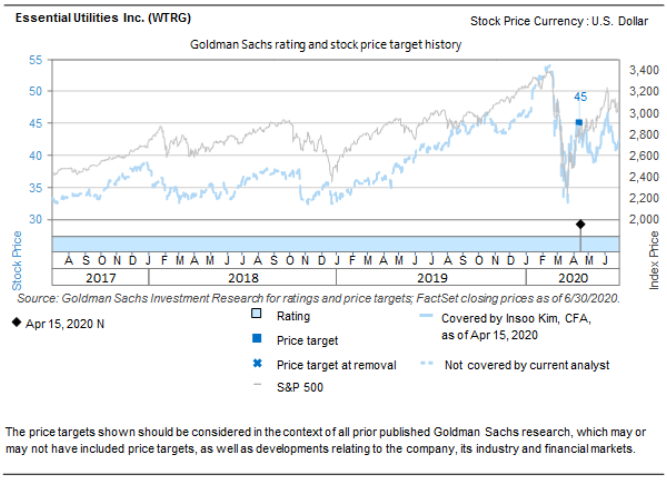
	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	47%	36%	17%	65%	58%	54%

As of July 1, 2020, Goldman Sachs Global Investment Research had investment ratings on 3,015 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)



The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Instruction 598 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Instruction 598, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Further information on the covered companies referred to in this research may be obtained from Goldman Sachs (Singapore) Pte. (Company Number: 198602165W). **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; Ombudsman Goldman Sachs Brazil: 0800 727 5764 and / or ouvidoriagoldmansachs@gs.com. Available Weekdays (except holidays), from 9am to 6pm. Ouvidoria Goldman Sachs Brasil: 0800 727 5764 e/ou ouvidoriagoldmansachs@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by either Goldman Sachs Canada Inc. or Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return

For the exclusive use of BJDINGERDISSEN@ESSENTIAL.CO

potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

HSBC Global Research

28 June 2019

Aqua America (WTR US)

Buy: Multi-utility creation – work-in-progress

Equities
Water Utilities

United States

- Peoples acquisition: completion now likely later in 2019 given regulatory progress; financing has been secured
- Texas: fair market value continues to drive water growth
- Maintain Buy rating; TP increased from USD41 to USD45.5

Peoples Natural Gas update (work in progress). On 11 June, 2019, Aqua America (Aqua), participated in a hearing of the Pennsylvania Public Utility Commission and filed a settlement agreement for the acquisition of Peoples Gas. Two of the parties (intervenors) to the case opposed the settlement because of a disagreement on the treatment of a small gas system. This means the acquisition is now anticipated to occur in the fall of 2019, later than Q2 as originally anticipated by Aqua. Aqua has already started to raise the cUSD2.5bn of equity to buy Peoples. It wants a sufficient equity cushion to maintain a 12-13% FFO/adjusted net debt ratio. Merger approval has already been received in W Virginia and Kentucky.

Texas adopts Fair Market Value legislation

On 12 June Aqua management commented that Texas had become the seventh state to adopt Fair Market Value legislation. This continues to be a key driver for the sales of regulated water systems (at an 'appraised value' at a premium to book value). In 2017 the American Society of Civil Engineers gave Texas a D+ rating for water and D rating for waste water. We think the combination of underinvested public health infrastructure with a mechanism for small cities to sell their systems at a premium to dedicated water companies underpins the strong attraction of US water stocks.

Maintain Buy rating with increased target price of USD45.5 from USD41: We value Aqua America via three methodologies: DCF, dividend yield and the average of a PE multiples and a SOP (rate-based) valuation. Taking the average of the three approaches gives us our target price of USD45.5 (previously USD41). In our DCF valuation, we have updated our assumption of beta from 0.60 to 0.58 which is in line with its market peers. In our multiples-based valuation, we have updated the multiples in line with the market peers. This results in an increase in PE multiple from 26.1x to 27.8x. Finally, in yield valuation, we reduce our yield from 2.25% to 2% which is in line with its peers. Overall, these changes lead to an increased TP of USD45.5 from USD41. Our TP implies 12.5% upside; we reiterate our Buy rating as we believe the combination of regulated investment and earnings growth is attractive.

Note: Priced at close of 26 Jun 2019

Multi-utility creation: work-in-progress

- Peoples Natural Gas acquisition: completion now likely later in 2019 given regulatory progress; financing has been secured
- Fair market value continues to drive water growth: Texas now added to the states adopting the legislation
- Maintain Buy rating; TP increased from USD41 to USD45.5

Investment summary

Aqua America (Aqua) targets regulated asset growth of c7% through to 2021 in its water and wastewater business, supplemented by a strong pipeline of acquisitions of municipal water and wastewater systems. The majority of the states in which Aqua operates are either moving or have already moved to Fair Market Value (FMV), which allows municipalities to sell assets at an appraised value which is generally higher than book value. This 'fair' valuation offers attractive proceeds to a municipality and the ability for Aqua to earn returns on a fairly revalued rate base.

Other regulatory mechanisms, such as infrastructure surcharges allowing annual increases in rates for pipe replacement and the use of future test years in rate cases, are positive steps in removing the regulatory lag and smoothing out the time between rate cases. These changes are helping Aqua to improve the stability of revenues and allow it to accelerate investment.

The recent acquisition of Peoples Natural Gas Company, which is intended to diversify earnings into faster growing gas distribution, has increased the certainty of short-term growth. The high rate base growth (8-10%), once fully integrated, should drive short-term growth.

From a larger base and with organic growth planned in gas, accelerating water acquisitions of a larger size should maintain the 70:30 water to gas mix, which investors believe is an attractive balance of businesses.

Because of these factors we maintain our Buy rating on the stock with a target price of USD45.5.

Latest regulatory developments

On 11 June, 2019, Aqua participated in a hearing of the Pennsylvania Public Utility Commission and filed a settlement agreement for the acquisition of Peoples Gas. Two of the parties (intervenors) to the case opposed the settlement because of a disagreement on the treatment of a small gas system. This means the acquisition is now anticipated to occur in the fall of 2019, later than Q2 as originally anticipated by Aqua. Aqua has already started to raise the cUSD2.5bn of equity to buy Peoples. It wants a sufficient equity cushion to maintain a 12-13% FFO/adjusted net debt ratio. Merger approval has already been received in W Virginia and Kentucky.

PA rate case updates: Aqua's water and gas businesses have both filed for rate increases in their 'home' state of Pennsylvania (PA). It is the first time the company is using the fully projected future test year ending October 2020 for these. New rates are expected to go into effect in the fall 2019. Fair Market Value legislation continues to be a driver for the sales of regulated water systems (at an 'appraised value' at a premium to book value).

Texas adopts Fair Market Value legislation

On 12 June Aqua management commented that Texas had become the seventh state to adopt Fair Market Value legislation. This continues to be a key driver for the sales of regulated water systems (at an 'appraised value' at a premium to book value). In 2017 the American Society of Civil Engineers gave Texas a D+ rating for water and D rating for waste water. The combination of underinvested public health infrastructure with a mechanism for small cities to sell their systems at a premium to dedicated water companies underpins the strong attraction that US water stocks hold for us.

Growth

The company remains on track to grow customers at between 2% and 3% in 2019. Aqua invested USD133.8m in Q1 2019 to improve its infrastructure systems. To replace and expand its water utility infrastructure, the company expects to invest more than USD550m in 2019 and approximately USD1.4bn through 2021.

To date in 2019, the company's state subsidiaries in Ohio, Illinois and Pennsylvania have received rate awards or infrastructure surcharges totalling an estimated increase in annualized revenues of USD4.9m. Aqua currently has rate or surcharge proceedings pending in New Jersey, North Carolina and Ohio collectively totalling for USD6.3m. The timing and extent to which rate increases may be granted by the regulatory agencies will vary by state.

For Q1 2019 Aqua declared a quarterly cash dividend of USD0.2190 per share of common stock which represented 7% y-o-y growth.

Peoples transaction: break-up of the funds

Aqua has secured funding for the Peoples acquisition. Canada Pension Plan Investment Board (CPPIB) has acquired 21.3m newly issued shares of Aqua's common stock. CPPIB's investment is contingent upon the Peoples acquisition going ahead and getting final approval from the regulators. General corporate purposes include working capital and capital needs or repayment of certain revolving credit facility borrowings. During the Q1 2019 conference call Aqua management said, 'Our permanent financing plan targets a strong balance sheet and strong investment grade credit ratings for a fully regulated company.' We believe that Aqua will be able to maintain its credit ratings. Aqua America is rated Baa2 with stable outlook by Moody's. We set out our credit analysis below.

Sources and uses of funds

Sources of funds	USDm	Uses of funds	USDm
Common stock	1294	Peoples equity purchase price	2905
CPPIB Equity Investment	750	Assumption of Peoples debt	1370
Tangible equity units (mandatory convertible)	690	Private placement note refinancing	314
Debt	900	Transaction costs/ expenses	265
Assumption of Peoples debt	1370	General corporate purposes	150
Total Sources of funds	**5004**	**Total uses of funds**	**5004**

Source: Company presentation

Aqua has issued USD900m of senior notes at a weighted average yield of 3.96% with a weighted average maturity of 21 years. In addition to this, on 24 April, Aqua settled interest rate swaps (concurrent with the pricing of senior notes) that resulted in a payment by Aqua of USD83.5m compared with fair value of USD94.6m. Thus in the second quarter a beneficial charge in fair value of USD11.1m should be recorded.

Peoples transaction timeline visualised

Time line	Status
23-Oct-18	Aqua announced acquisition of peoples
13-Nov-18	Aqua files merger application with PA and WV PUCs
20-Nov-18	Aqua files merger application with KY PSC
28-Jan-19	Peoples filed a rate case for PA
8-Feb-19	Aqua filed a rate case settlement for PA
13-Mar-19	KY PSC approved merger application
27-Mar-19	Proposed merger settlement filed with WV PSC
29-Mar-19	Aqua announced USD750m equity investment from CPPIB
Apr-19	Aqua equity and debt offerings
Apr-19	WV PSC approved merger application
May-19	Aqua PA rate case expected to be in effect
4Q 2019	Targeted final resolution of PA merger proceedings
End 2019	Transaction expected to close

Source: Company presentation

Rate cases and surcharges

We can see from the table below that Aqua completed cUSD5m of rates and surcharges by Q1 2019 and has cUSD78m of rate cases and surcharges pending.

On 12 June 2019, Texas announced the adoption of Fair Market Value legislation for the purchase of the water and wastewater systems. Before these changes system values were determined by their depreciation cost, which generally did not reflect a reasonable market value for those assets and became a barrier to a sale.

Aqua's Chairman and CEO Christopher Franklin has said the new law encourages consolidation in the fragmented water and wastewater industry, enabling resources to be shared among a larger service area, which ultimately benefits customers.

Aqua 2019 rates and surcharges for water (W) and wastewater (WW)

State	Type	Annualised revenue increase (USD000)
Completed as at Q1 2019		
Illinois	Surcharge (W)	1394
Illinois	Surcharge (WW)	268
Ohio	Rate case (W)	974
Ohio	Surcharge (W)	2267
Pennsylvania	Surcharges (W/WW)	2
Total completed at Q1 2019		**4905**
Pending as at Q1 2019		
New Jersey	Rate case (W)	7202
North Carolina	Surcharge (W)	602
North Carolina	Surcharges (W/WW)	62
Ohio	Tax compliance surcharge	-3917
Ohio	Surcharge (W)	2335
Pennsylvania	Rate case (W)	58299
Pennsylvania	Rate case (WW)	13470
Total pending at Q1 2019		**78053**

From the table below we believe that signed municipal contracts will help Aqua to reach its target of 2-3% customer growth for FY2019.

Signed municipal agreements at 1Q2019

Acquisitions	State	Type	Total customers	Rate base
New Garden	PA	WW	2106	29500
Schuykill	PA	WW	600	3600
Grant Park	IL	WW	540	2300
Cheltenham	PA	WW	10450	50250
Skyline	IL	W/WW	752	3550
East Norriton	PA	WW	4952	21000
Total			**19400**	**110200**

Source: Company presentation

2019 outlook

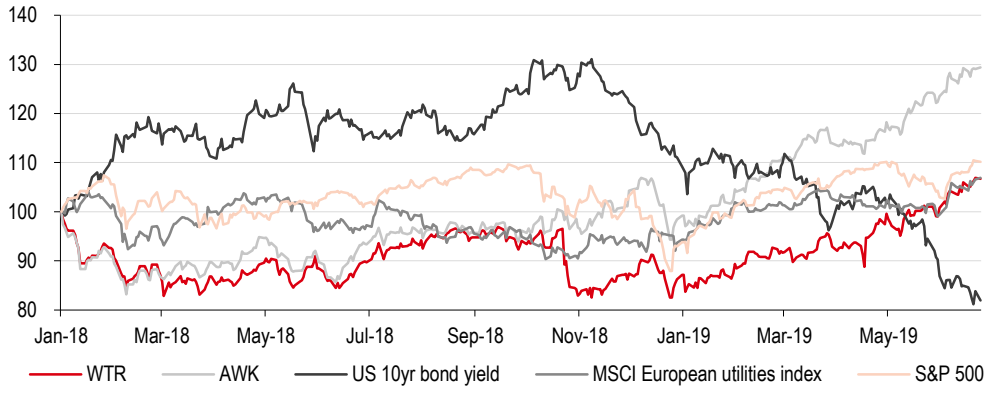
Aqua has guided for adjusted income of USD1.45 to USD1.50 per share (excluding Peoples) for 2019. Infrastructure investments of USD550m in 2019 for communities served by Aqua and investments of USD1.4bn to 2021 were confirmed at the Q1 to rehabilitate and strengthen systems. Aqua is targeting rate base growth of 7% in the water business through to 2021 and 8-10% in the gas business through to 2021. Aqua is targeting total customer growth of between 2-3% for FY2019. It will announce Q2 results on Wednesday, 7 August 2019.

Performance against peers

Aqua's share price has underperformed the S&P 500 by 3% since 1 January 2018, but it has outperformed by c5% YTD and c1.5% over 1 month. It appears that much of the scepticism about creating a multi-utility with the acquisition of Peoples has already been priced in. On our numbers, the deal is accretive in the first full year of the merged group and credit metrics remain on-track, see Credit metrics analysis below. On 2019e PE, it now trades at a discount to its water peer group and is in line with some of the US electricity utilities according to Refinitiv Datastream.

One more point to note is that the US Treasury 10 year yield is falling sharply. Aqua share price, as a defensive utility, is likely to be inversely correlated to bond yields.

Performance of Aqua America vs American Water Works vs UST 10yr vs MSCI European utilities index vs S&P 500 index



Source: Refinitiv DataStream

Change in estimates

We have updated the estimates based on the Q1 2019 results and to take account of the Pennsylvania rate case. This has impacted our estimates slightly. We had already assumed that the Peoples deal would not contribute to earnings until Q1 2020.

Credit metrics analysis

Aqua America is rated Baa2 with stable outlook by Moody's. To maintain this rating, Aqua will need to maintain RCF/Net debt in the range of 7-14% and FFO/Net debt in the range of 11-18%. From the calculated estimates below we can see that Aqua should be able to maintain the rating in the short term, but at the lower end of Moody's range of metrics.

Credit metrics analysis

	2019e	2020e	2021e
RCF/ Net debt	9.2%	7.8%	7.6%
FFO/ Net debt	14.8%	12.7%	12.5%

Source: HSBC estimates

Valuation and risks

We value Aqua America via three methodologies: DCF, dividend yield and the average of PE multiples and SOP (rate-based) valuation. Taking the average of the three approaches gives us our target price of USD45.5 (previously USD41).

In our DCF valuation, we have updated our assumption of beta from 0.60 to 0.58 to be in line with its market peers and have incorporated our updated estimates post Q1 2019 results. In our multiples-based valuation, we have updated the multiples in line with the market peers. This results in increase in PE multiple from 26.1x to 27.8x. Finally, in yield valuation, we have reduced our yield from 2.25% to 2% which is in line with its peers. Overall, these changes lead to an increased TP of USD45.5 from USD41. Our TP implies 12.5% upside; we reiterate our Buy rating as we believe the combination of regulated investment and earnings growth is attractive.

Summary of valuation (USD)

Particulars	New	Previous
Current price as on 26-June-19	**40.5**	**NA**
DCF (updated estimates, lower beta)	46.0	39.5

Downside risks

Aqua America fails to achieve the desired rate case revisions and infrastructure surcharges; it lacks organic growth from asset replacement; it cannot take advantage of the FV market legislation opportunity; its dividend grows at a lower rate than we assume.

It is not able to gain the Fair Market Value premium required in the systems it wants to acquire in Pennsylvania. Its current acquisitions of systems – New Garden and Limerick – are facing challenges to the premium proposed by Aqua.

Important disclosures

Equities: Stock ratings and basis for financial analysis

HSBC and its affiliates, including the issuer of this report ("HSBC") believes an investor's decision to buy or sell a stock should depend on individual circumstances such as the investor's existing holdings, risk tolerance and other considerations and that investors utilise various disciplines and investment horizons when making investment decisions. Ratings should not be used or relied on in isolation as investment advice. Different securities firms use a variety of ratings terms as well as different rating systems to describe their recommendations and therefore investors should carefully read the definitions of the ratings used in each research report. Further, investors should carefully read the entire research report and not infer its contents from the rating because research reports contain more complete information concerning the analysts' views and the basis for the rating.

From 23rd March 2015 HSBC has assigned ratings on the following basis:

The target price is based on the analyst's assessment of the stock's actual current value, although we expect it to take six to 12 months for the market price to reflect this. When the target price is more than 20% above the current share price, the stock will be classified as a Buy; when it is between 5% and 20% above the current share price, the stock may be classified as a Buy or a Hold; when it is between 5% below and 5% above the current share price, the stock will be classified as a Hold; when it is between 5% and 20% below the current share price, the stock may be classified as a Hold or a Reduce; and when it is more than 20% below the current share price, the stock will be classified as a Reduce.

Our ratings are re-calibrated against these bands at the time of any 'material change' (initiation or resumption of coverage, change in target price or estimates).

Upside/Downside is the percentage difference between the target price and the share price.

Prior to this date, HSBC's rating structure was applied on the following basis:

For each stock we set a required rate of return calculated from the cost of equity for that stock's domestic or, as appropriate, regional market established by our strategy team. The target price for a stock represented the value the analyst expected the stock to reach over our performance horizon. The performance horizon was 12 months. For a stock to be classified as Overweight, the potential return, which equals the percentage difference between the current share price and the target price, including the forecast dividend yield when indicated, had to exceed the required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). For a stock to be classified as Underweight, the stock was expected to underperform its required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). Stocks between these bands were classified as Neutral.

*A stock was classified as volatile if its historical volatility had exceeded 40%, if the stock had been listed for less than 12 months (unless it was in an industry or sector where volatility is low) or if the analyst expected significant volatility. However, stocks which we did not consider volatile may in fact also have behaved in such a way. Historical volatility was defined as the past month's average of the daily 365-day moving average volatilities. In order to avoid misleadingly frequent changes in rating, however, volatility had to move 2.5 percentage points past the 40% benchmark in either direction for a stock's status to change.

Rating distribution for long-term investment opportunities

As of 27 June 2019, the distribution of all independent ratings published by HSBC is as follows:

Buy	52%	(29% of these provided with Investment Banking Services)
Hold	38%	(27% of these provided with Investment Banking Services)
Sell	10%	(21% of these provided with Investment Banking Services)

For the purposes of the distribution above the following mapping structure is used during the transition from the previous to current rating models: under our previous model, Overweight = Buy, Neutral = Hold and Underweight = Sell; under our current model Buy = Buy, Hold = Hold and Reduce = Sell. For rating definitions under both models, please see "Stock ratings and basis for financial analysis" above.

For the distribution of non-independent ratings published by HSBC, please see the disclosure page available at http://www.hsbcnet.com/gbm/financial-regulation/investment-recommendations-disclosures.

Essential Utilities (WTRG US)

Buy: Capital raise to underpin growth

Equities
Water Utilities

United States

- H1 results and 3% (USD311m) capital increase should underpin growth
- Fair Value legislation and infrastructure rehabilitation key drivers for growth
- Maintain Buy rating and target price of USD50

H1 2020 results and 3% capital raise: On 5 August 2020, Essential reported its H1 results. EPS was USD0.5, up 28%, and affirmed its full-year guidance of USD1.53-USD1.58. On 10 August 2020, it successfully raised an additional USD311m through issuing 6.7m new shares (c3%) of equity. The need for this to fund regulated growth was previously flagged.

Growth: Essential's equity raise will be used to underpin a stable capital structure in its growing regulated water and gas businesses. US regulators generally assume a capital structure of 50:50 debt and equity so the equilibrium on a growing rate base needs to be maintained. In addition, Essential sees opportunities for further acquisitions using the Fair Value principles. Acquisitions are mostly going to be focused on water rather than gas. Its gas expansion is at present focused on mains replacement at Peoples Gas. Essential is focusing on repair tax principles here, which it has utilised in water in Pennsylvania. The use of capital allowances to reduce taxes delays the need to file for rate cases, smoothing customer rates in times of accelerated investment.

Maintain Buy and target price of USD50: We value Essential Utilities via three methodologies: DCF, dividend yield and the average of our PE multiple and rate-based valuations. Taking the average of the three approaches gives us our target price of USD50.00 (unchanged). In our DCF, we maintain our beta at 0.6, in line with its peers. We update our estimates as explained above, which decreases our DCF valuation to USD48.1 from USD50.0. For our PE-multiple-based valuation, we update our target multiple to 31.0x from 30.0x to keep it in line with peers. We use a water peer group P/B of 2.4x (unchanged) as a proxy for a rate-based valuation, which is consistent with all US utilities under our coverage and is a proxy for EV. The average of the two increases to USD52.1 from USD51.6, reflecting our updated estimates. For our yield-based valuation, we reduce our target yield to 2.0% from 2.13%, in line with its Water and Related Utilities peers. This results in an increase in our yield valuation to USD50.1 from USD47.5. Overall, these changes lead to an unchanged target price of USD50.00, which implies 15.5% upside. We reiterate our Buy rating as we believe the combination of regulated investment growth and earnings growth is attractive.

Note: Priced at close of 25 Aug 2020

Capital raise underpins growth

- H1 results and USD311m (3%) capital increase to underpin growth
- Fair Value legislation and infrastructure rehabilitation key drivers for growth
- Maintain Buy rating and target price of USD50

H1 results and funding for growth

H1 results and 3%capital raise: Essential reported H1 results EPS of USD0.5 +28%. The company affirmed FY guidance of USD1.53 – USD1.58. On 10 August 2020 it successfully raised an additional USD311m 6.7m new shares (c3%) of equity (c3%) of equity. The need for this to fund regulated growth had been previously flagged.

Growth: Essential's equity raise will underpin a stable capital structure in its growing regulated water and gas businesses. US regulated assets assume a capital structure of 50:50 debt and equity so the equilibrium on a growing rate base needs to be maintained. In addition, it sees opportunities for further acquisitions using the Fair Value principles (FV). Acquisitions are mostly going to be focused on water rather than gas. Its gas expansion is at present focused on mains replacement at Peoples Gas. Essential is focusing on repair tax principles here which it has utilised in water in Pennsylvania. Use of capital allowances to reduce tax delays the need to file for rate cases smoothing customer rates in times of accelerated investment.

Performance against peers

Essential's share price has underperformed the S&P 500 by 10% since 1 January 2019. It is trading at a discount to its water peer group's 2020e PE, but in line with some of the US electricity utilities according to Refinitiv Datastream. This reflects, in our view, its multi-utility status. The US Treasury 10-year yield has fallen sharply. WTRG, as a defensive utility, should be inversely correlated to bond yields.

WTRG vs AWK vs UST 10yr vs FTSE European utilities index vs S&P500

Credit metrics analysis

Moody's requires RCF/net debt in the range of 7-14% and FFO/net debt in the range of 11-18% to maintain a Baa credit rating. Essential's credit metrics for 2020, shown below, meet the requirements – it currently has a Baa2 credit rating from Moody's with stable outlook. This is mainly due to the liquidity created by the company by issuing equity as mentioned above.

Credit metrics analysis

	2020e	2021e	2022e
RCF/Net Debt	9.7%	9.4%	9.2%
FFO/Net Debt	16.2%	15.7%	15.2%

Source: HSBC estimates

Estimate changes

We update our model post the H1 2020 results, which included updated guidance due to the COVID-19 pandemic and post the issuance of equity. Essential mentioned at its H1 results that growth for its municipal water segment has been more than offset by the reduction in its industrial and commercial water segments, which reflects the resilience of the municipal segment. Given that we expect increased commercial activities in H2, we increase our estimates for 2020e only slightly as shown in the table below (However, 2020e EPS is lower down due to the slight dilution from equity issuance). For 2021, we assume that Essential begins to utilise the repair tax, which lowers current taxes so increases net income, but the equity issuance dilutes EPS and DPS).

Valuation and risks

We value Essential Utilities using the average of three approaches: 1) DCF; 2) dividend yield; and 3) the average of our PE multiple and rate-based valuations, which renders our unchanged target price of USD50.

- In our DCF, we maintain our beta at 0.6 in line with its peers. We slightly increase our estimates for 2020 but the dilution from the capital increase decreases our DCF valuation marginally from USD50.0 to USD48.1.
- For our yield-based valuation, we reduce our target yield to 2.0% from 2.13% to keep it in line with the water and related utilities peers. This increases our yield valuation to USD50.1 from USD47.5.

- For our PE multiple-based valuation in the average of a PE multiple and rate-based valuation approach, we update our target multiple to 31.0x from 30.0x to keep it in line with that of peers. We continue to use a water peer group P/B of 2.4x as a proxy for a rates-based valuation. This is consistent with all US utilities under our coverage and is a proxy for EV. The average of the two increases to USD52.1 from USD51.6, reflecting our updated estimates. We continue to use regulated water peers not gas utility peers because water utilities have higher implicit growth. Peoples was acquired because it too has an accelerated mains replacement cycle.

Overall, these changes lead to no unchanged in our target price of USD50, which implies 15.5% upside. We reiterate our Buy rating as we believe the combination of regulated investment growth and earnings growth is attractive.

Source: HSBC estimates

Downside risks: Essential Utilities failing to achieve the desired rate case revisions and infrastructure surcharges; lacking organic growth from asset replacement; inability to take advantage of the Fair Market Value legislation opportunity; dividend growth at a lower rate than we assume; inability to gain the Fair Market Value premium required in the systems it wants to acquire in Pennsylvania. Its current acquisitions of systems – New Garden and Limerick – are facing challenges to the premium proposed by Aqua.

Important disclosures

Equities: Stock ratings and basis for financial analysis

HSBC and its affiliates, including the issuer of this report ("HSBC") believes an investor's decision to buy or sell a stock should depend on individual circumstances such as the investor's existing holdings, risk tolerance and other considerations and that investors utilise various disciplines and investment horizons when making investment decisions. Ratings should not be used or relied on in isolation as investment advice. Different securities firms use a variety of ratings terms as well as different rating systems to describe their recommendations and therefore investors should carefully read the definitions of the ratings used in each research report. Further, investors should carefully read the entire research report and not infer its contents from the rating because research reports contain more complete information concerning the analysts' views and the basis for the rating.

From 23rd March 2015 HSBC has assigned ratings on the following basis:

The target price is based on the analyst's assessment of the stock's actual current value, although we expect it to take six to 12 months for the market price to reflect this. When the target price is more than 20% above the current share price, the stock will be classified as a Buy; when it is between 5% and 20% above the current share price, the stock may be classified as a Buy or a Hold; when it is between 5% below and 5% above the current share price, the stock will be classified as a Hold; when it is between 5% and 20% below the current share price, the stock may be classified as a Hold or a Reduce; and when it is more than 20% below the current share price, the stock will be classified as a Reduce.

Our ratings are re-calibrated against these bands at the time of any 'material change' (initiation or resumption of coverage, change in target price or estimates).

Upside/Downside is the percentage difference between the target price and the share price.

Prior to this date, HSBC's rating structure was applied on the following basis:

For each stock we set a required rate of return calculated from the cost of equity for that stock's domestic or, as appropriate, regional market established by our strategy team. The target price for a stock represented the value the analyst expected the stock to reach over our performance horizon. The performance horizon was 12 months. For a stock to be classified as Overweight, the potential return, which equals the percentage difference between the current share price and the target price, including the forecast dividend yield when indicated, had to exceed the required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). For a stock to be classified as Underweight, the stock was expected to underperform its required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). Stocks between these bands were classified as Neutral.

*A stock was classified as volatile if its historical volatility had exceeded 40%, if the stock had been listed for less than 12 months (unless it was in an industry or sector where volatility is low) or if the analyst expected significant volatility. However, stocks which we did not consider volatile may in fact also have behaved in such a way. Historical volatility was defined as the past month's average of the daily 365-day moving average volatilities. In order to avoid misleadingly frequent changes in rating, however, volatility had to move 2.5 percentage points past the 40% benchmark in either direction for a stock's status to change.

Rating distribution for long-term investment opportunities

As of 26 August 2020, the distribution of all independent ratings published by HSBC is as follows:

Buy	55%	(31% of these provided with Investment Banking Services)
Hold	36%	(33% of these provided with Investment Banking Services)
Sell	9%	(25% of these provided with Investment Banking Services)

For the purposes of the distribution above the following mapping structure is used during the transition from the previous to current rating models: under our previous model, Overweight = Buy, Neutral = Hold and Underweight = Sell; under our current model Buy = Buy, Hold = Hold and Reduce = Sell. For rating definitions under both models, please see "Stock ratings and basis for financial analysis" above.

For the distribution of non-independent ratings published by HSBC, please see the disclosure page available at http://www.hsbcnet.com/gbm/financial-regulation/investment-recommendations-disclosures.

Essential Utilities (WTRG US)

Buy: Q3 progress through regulatory complexity

Equities
Water Utilities

United States

- Q3 results – top end of annual EPS targets
- Strong acquisitions pipeline – Delcora complexity the exception to the rule; regulatory settlements for infrastructure continuing
- Maintain Buy rating, increase TP to USD55 (from USD50)

Q3 results summary. For the first nine months of 2020, customer growth for the company's water utilities totalled 1.5%. Essential invested USD554.1m in the first nine months of the year to improve its regulated water and natural gas infrastructure systems. Management expects adjusted EPS at the top end of the USD1.53-1.58 range for 2020e, with an earnings CAGR target of 5-7% for 2019 through to 2022e.

Strong pipeline of acquisitions, regulatory settlements continuing. The company has signed purchase agreements for municipal water and wastewater acquisitions that are expected to add the equivalent of more than 212,000 water and wastewater retail customers and approximately USD363m in expected rate base. Its most significant acquisition, Delcora, is mired in regulatory and legal complexity. Essential hopes that all issues will be resolved by March-April 2021. This complexity, in our view, should be regarded as the exception to what is normally a smooth process. To date in 2020, the regulated water segment has received rate awards or infrastructure surcharges in Illinois, Indiana, North Carolina, Ohio, Virginia and Pennsylvania totalling an estimated annualised revenue increase of USD21.0m.

Maintain Buy rating; increase target price from USD50 to USD55. We value Essential Utilities using the average of three approaches: (1) DCF, (2) dividend yield, and (3) the average of our PE multiple and rate-based valuations, which renders our increased target price of USD55 (previously USD50). In our DCF, we increase our estimates for 2020e slightly and roll forward our base to 2021e, which increases our valuation to USD50.80 (from USD48.10). For our yield-based approach, we maintain our target yield at 2.0%. We have rolled forward the dividend, which increases our yield valuation to USD53.70 from USD50.10. For our approach using the average of PE and rate-based valuations, we update our target multiple to 33.0x from 31.0x. We use a water peer group PB of 2.6x as a proxy for our rate-based valuation. The average of the two increases to USD61.80 (from USD52.10), reflecting our updated estimates. Peoples Natural Gas was acquired because it, too, has an accelerated mains replacement cycle. Overall, these changes lead to an increased target price of USD55 (previously USD50), which implies c23% upside from current levels. We reiterate our Buy rating as we believe the combination of regulated investment growth and earnings growth remains attractive.

Q3 Progress, some regulatory complexity remains

- Q3 results – top end annual EPS targets indicated
- Strong pipeline of acquisitions – Delcora complexity the exception to the rule; regulatory settlements for infrastructure continuing
- Maintain Buy rating; increase TP to USD55 (from USD50)

Q3 2020 results summary

Essential Utilities reported Q3 results on 3 November 2020. The regulated water segment reported revenues for the quarter of USD255.7m, an increase of 5.3%. Increased volume and rates and surcharges were the largest contributors to the increase in revenues for the period, in addition to customer growth from both organic growth and acquisitions. Operations and maintenance expenses for the regulated water segment decreased by 2.2% to USD79.3m for the third quarter of 2020. The regulated natural gas segment reported revenues for the third quarter of 2020 of USD88.9m. Operations and maintenance for the same period for the regulated natural gas segment were USD59.6m and purchased gas costs were USD14.8m. The first nine months of 2020, customer growth for the company's water utilities has totalled 1.5%.

The company has signed purchase agreements for other municipal water and wastewater acquisitions that are expected to add the equivalent of over 212,000 water and wastewater retail customers and approximately USD363m in expected rate base.

Essential invested USD554.1m in the first nine months of the year to improve its regulated water and natural gas infrastructure systems and to enhance its customer service across its operations. This does not include an additional USD53.5m that was invested by Peoples, pre-closing, during the period from 1 January to 15 March 2020.

To date in 2020, the regulated water segment has received rate awards or infrastructure surcharges in Illinois, Indiana, North Carolina, Ohio, Virginia and Pennsylvania totalling an estimated increase in annualized revenues of USD21.0m.

Essential declared a quarterly cash dividend of $0.2507 +7%.

The outlook:

- Expects adjusted income per diluted common share (non-GAAP) at the top end of the USD1.53 to USD1.58 range
- Earnings growth CAGR of 5 to 7% for 2019 through to 2022
- Regulated water segment infrastructure investments of approximately USD550m in 2020
- Regulated natural gas segment infrastructure investments of approximately USD400m in 2020 on full-year basis (adjusted to include capital invested in 2020 prior to Essential's ownership)

- Infrastructure investments of approximately USD2.8bn through to 2022 in existing operations to rehabilitate and strengthen water, wastewater, and natural gas systems (including regulated natural gas segment capital invested in 2020 prior to Essential's ownership)
- Regulated water segment rate base compound annual growth rate of 6 to 7% through to 2022
- Regulated natural gas segment rate base compound annual growth rate of 8 to 10% through to 2022
- Total annual regulated water segment customer growth of between 2 and 3% on average depending upon regulatory approval

Delcora the exception that proves the rule on regulatory complexity – expect closure by March-April 2021

Management provided an update to its proposed Delcora acquisition which is currently mired in regulatory and legal complexity. There is an imminent court proceeding to decide whether there is a valid and enforceable contract in place between Essential and Delcora. In addition, there are separate issues about the Delcora trust. In addition to these legal complexities the PUC will then become involved in assessing the acquisition. Essential hopes that all issues – legal and regulatory – will be resolved by March-April 2021. This complexity, in our view, should be regarded as the exception to what is normally a smooth process.

Use of equity raise proceeds

The CEO also mentioned in the earnings call Q&A that the USD300m August equity offering wold be deployed even if there were continuing delays in the Delcora acquisition. Management is seeing a number of medium to large acquisition opportunities. Equity currently deferred would be deployed as and when needed in order to finance these acquisitions.

Acquisitions will remain focused on water and waste water. The Peoples gas rate base growth is targeted to be 8% to 10% annually without acquisitions given the need for pipe replacement.

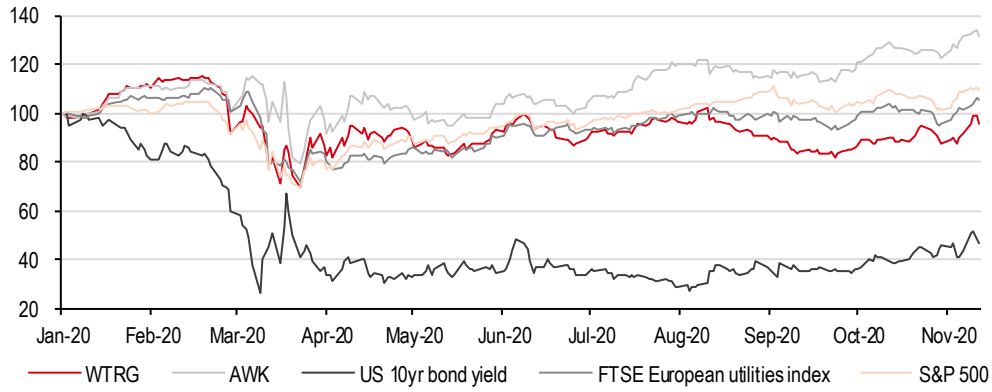
Peoples rate case use tax repair – resolution expected Q2 2021

Essential is focusing on repair tax principles which it has utilised in water in Pennsylvania. It filed a request for USD380 of repair tax in July from the Pennsylvania PUC. This is a catch-up deduction for the tax repair eligible capital invested prior to Essential's ownership of Peoples. Regulatory evidentiary hearings area expected at the end of January. The company expects a final order sometime early in the second quarter of 2021.

Performance against peers

YTD, Essential's share price has underperformed the S&P 500 by 14%. It is trading at a discount to its water peer group's 2020e PE, but in line with some of the US electricity utilities according to Refinitiv Datastream. This reflects, in our view, its multi-utility status. The US Treasury 10-year yield has fallen sharply. WTRG, as a defensive utility, should be inversely correlated to bond yields.

YTD performance of WTRG vs AWK vs UST 10yr vs FTSE European utilities index vs S&P500



Source: Refinitiv Datastream

Credit metrics analysis

Moody's requires RCF/net debt in the range of 7-14% and FFO/net debt in the range of 11-18% to maintain a 'Baa' credit rating. Essential's credit metrics for 2020, shown below, meet the requirements – it currently has a Baa2 credit rating from Moody's with stable outlook.

Credit metrics analysis

	2020e	2021e	2022e	2023e	2024e	2025e
RCF / net debt	8.6%	8.1%	8.1%	8.0%	8.1%	8.3%

Valuation and risks

We value Essential Utilities using the average of three approaches: (1) DCF, (2) dividend yield, and (3) the average of our PE multiple and rate-based valuations, which renders our increased target price of USD55 (previously USD50).

- In our DCF, we maintain our beta at 0.6 in line with its peers. We updated our estimates as above, moved equity issuance to for Delcora to 2021 and rolled forward our DCF valuation to 2021e which increases our valuation from USD48.10 to USD50.80.
- For our yield-based valuation, we maintain our target yield at 2.0% to keep it in line with the water and related utilities peers. We have rolled forward the dividend which increases our yield valuation to USD53.70 from USD50.10.
- For our approach using the average of PE multiple and rate-based valuations, we update our target multiple to 33.0x from 31.0x to keep it in line with that of peers. We use a water peer group PB of 2.6x as a proxy for a rate-based valuation. This is consistent with all US utilities under our coverage and is a proxy for EV. The average of the two increases to USD61.80 (from USD52.10), reflecting our updated estimates. We continue to use regulated water peers, not gas utility peers, because water utilities have higher implicit growth. Peoples was acquired because it, too, has an accelerated mains replacement cycle.

Overall, these changes lead to an increased target price of USD55 (previously USD50), which implies c23% upside from current levels. We reiterate our Buy rating as we believe the combination of regulated investment growth and earnings growth remains attractive.

Summary of valuation (USD)

Particulars	New	Previous
Current price at close of 12-Nov-2020	**44.8**	**NA**
DCF (updated estimates, rolled forward valuation)	50.8	48.1

Source: HSBC estimates

Downside risks: Essential Utilities failing to achieve the desired rate case revisions and infrastructure surcharges; lacking organic growth from asset replacement; inability to take advantage of the Fair Market Value legislation opportunity; dividend growth at a lower rate than we assume; inability to gain the Fair Market Value premium required in the systems it wants to acquire in Pennsylvania. Its current acquisitions of systems – New Garden and Limerick – are facing challenges to the premium proposed by Aqua.

Disclosure appendix

Analyst Certification

The following analyst(s), economist(s), or strategist(s) who is(are) primarily responsible for this report, including any analyst(s) whose name(s) appear(s) as author of an individual section or sections of the report and any analyst(s) named as the covering analyst(s) of a subsidiary company in a sum-of-the-parts valuation certifies(y) that the opinion(s) on the subject security(ies) or issuer(s), any views or forecasts expressed in the section(s) of which such individual(s) is(are) named as author(s), and any other views or forecasts expressed herein, including any views expressed on the back page of the research report, accurately reflect their personal view(s) and that no part of their compensation was, is or will be directly or indirectly related to the specific recommendation(s) or views contained in this research report: Verity Mitchell and Adam Dickens

Important disclosures

Equities: Stock ratings and basis for financial analysis

HSBC and its affiliates, including the issuer of this report ("HSBC") believes an investor's decision to buy or sell a stock should depend on individual circumstances such as the investor's existing holdings, risk tolerance and other considerations and that investors utilise various disciplines and investment horizons when making investment decisions. Ratings should not be used or relied on in isolation as investment advice. Different securities firms use a variety of ratings terms as well as different rating systems to describe their recommendations and therefore investors should carefully read the definitions of the ratings used in each research report. Further, investors should carefully read the entire research report and not infer its contents from the rating because research reports contain more complete information concerning the analysts' views and the basis for the rating.

From 23rd March 2015 HSBC has assigned ratings on the following basis:

The target price is based on the analyst's assessment of the stock's actual current value, although we expect it to take six to 12 months for the market price to reflect this. When the target price is more than 20% above the current share price, the stock will be classified as a Buy; when it is between 5% and 20% above the current share price, the stock may be classified as a Buy or a Hold; when it is between 5% below and 5% above the current share price, the stock will be classified as a Hold; when it is between 5% and 20% below the current share price, the stock may be classified as a Hold or a Reduce; and when it is more than 20% below the current share price, the stock will be classified as a Reduce.

Our ratings are re-calibrated against these bands at the time of any 'material change' (initiation or resumption of coverage, change in target price or estimates).

Upside/Downside is the percentage difference between the target price and the share price.

Prior to this date, HSBC's rating structure was applied on the following basis:

For each stock we set a required rate of return calculated from the cost of equity for that stock's domestic or, as appropriate, regional market established by our strategy team. The target price for a stock represented the value the analyst expected the stock to reach over our performance horizon. The performance horizon was 12 months. For a stock to be classified as Overweight, the potential return, which equals the percentage difference between the current share price and the target price, including the forecast dividend yield when indicated, had to exceed the required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). For a stock to be classified as Underweight, the stock was expected to underperform its required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). Stocks between these bands were classified as Neutral.

*A stock was classified as volatile if its historical volatility had exceeded 40%, if the stock had been listed for less than 12 months (unless it was in an industry or sector where volatility is low) or if the analyst expected significant volatility. However, stocks which we did not consider volatile may in fact also have behaved in such a way. Historical volatility was defined as the past month's average of the daily 365-day moving average volatilities. In order to avoid misleadingly frequent changes in rating, however, volatility had to move 2.5 percentage points past the 40% benchmark in either direction for a stock's status to change.

Rating distribution for long-term investment opportunities

As of 16 November 2020, the distribution of all independent ratings published by HSBC is as follows:

Buy	57%	(33% of these provided with Investment Banking Services)
Hold	34%	(30% of these provided with Investment Banking Services)
Sell	9%	(27% of these provided with Investment Banking Services)

For the purposes of the distribution above the following mapping structure is used during the transition from the previous to current rating models: under our previous model, Overweight = Buy, Neutral = Hold and Underweight = Sell; under our current model Buy = Buy, Hold = Hold and Reduce = Sell. For rating definitions under both models, please see "Stock ratings and basis for financial analysis" above.

For the distribution of non-independent ratings published by HSBC, please see the disclosure page available at http://www.hsbcnet.com/gbm/financial-regulation/investment-recommendations-disclosures.

HSBC Global Research

6 December 2019

Aqua America (WTR US)

Buy: Expansion in progress

Equities
Water Utilities

United States

- 9M2019 net income up 13%; Peoples transaction to be completed in early 2020, Delcora next
- Further expansion in PA through acquisition of DELCORA
- Maintain Buy rating; increase TP from USD45.5 to USD47.5

Still growing: Aqua America (WTR) posted growth of 7.7% and 13.1% in revenue and net income respectively at its 9m results on 5 November. To date in 2019, the company's state subsidiaries in Illinois, New Jersey, North Carolina, Ohio, and Pennsylvania have received rate awards or infrastructure surcharges totalling an estimated increase to annualized revenues of USD59.8m. WTR currently has two rate case proceedings pending in Indiana totalling USD63,000. A dividend of USD0.2343 was announced and its 2019 outlook for EPS is reaffirmed of USD1.45-USD1.50.

DELCORA acquisition: a larger, deeper footprint in Pennsylvania: The September agreement with the Delaware County Regional Water Quality Control Authority (DELCORA), to acquire the municipal authority's wastewater assets for cUSD276.5m, will intensify its activities in the state. The transaction is subject to Pennsylvania Public Utility Commission (PUC) approval.

Peoples transaction to be completed in early 2020: All but two of the interveners to the case have entered into or chosen not to oppose the settlement agreement. On October 28 2019, the administrative law judge rendered a recommended decision concluding that Aqua is technically, legally and financially fit to assume control of Peoples; that the acquisition of Peoples will affirmatively promote the service, accommodation, convenience or safety of the public in some substantial way; and recommended that the Pennsylvania Public Utility Commission issue all approvals necessary for Aqua to carry out the acquisition of Peoples.

Maintain Buy rating with increased target price from USD45.5 to USD47.5: We value Aqua America via three methodologies: DCF, dividend yield and the average of PE multiples and SOP (rate-based) valuation. Taking the average of the three approaches gives us our target price of USD47.5 (previously USD45.5). We have rolled forward our estimates in all valuations detailed below. In our DCF valuation, we maintained our assumption of beta at 0.58 to be in line with its market peers and have rolled forward our valuation to FY2020e. In our multiples based valuation, we have updated the multiples in line with the market peers. This results in an increase in PE multiple from 27.8x to 29.8x. Finally, in our yield valuation, we maintain our yield at 2% which is in line with its peers. Overall, these changes lead to an increased TP of USD47.5 from USD45.5. Our TP implies 5.2% upside; we reiterate our Buy rating as we believe the combination of regulated investment and earnings growth is attractive.

Expansion in progress

- Peoples transaction to be completed in early 2020
- Further expansion in PA through acquisition of DELCORA
- Maintain Buy rating; increase TP from USD45.5 to USD47.5

9M 2019 results summary

Aqua America (WTR) posted its 9M 2019 results on 5th November 2019. WTR posted growth of 7.7% and 13.1% in revenue and net income respectively. Employee-related costs, Peoples transaction-related expenses and growth-related costs were the main contributors to the increase in O&M expenses.

Aqua invested USD401.6m in the first nine months of the year to improve its infrastructure systems.

To date in 2019, the company's state subsidiaries in Illinois, New Jersey, North Carolina, Ohio, and Pennsylvania have received rate awards or infrastructure surcharges totalling an estimated increase to annualised revenues of USD59.8m. WTR currently has two rate case proceedings pending in Indiana totalling revenues of USD63,000. A dividend of USD0.2343 announced.

2019 outlook reaffirmed

- Adjusted income per diluted common share (non-GAAP) of USD1.45 to USD1.50
- Infrastructure investments of approximately USD550 million in 2019 for communities served by Aqua
- Infrastructure investments of approximately USD1.4 billion through to 2021 in existing operations to rehabilitate and strengthen systems
- Rate base compound annual growth rate of 7 percent through 2021
- Total customer growth of between 2 and 3 percent
- Closing of Peoples acquisition expected to occur in early 2020

DELCORA acquisition: a larger, deeper footprint in Pennsylvania

Aqua America announced in September that its Pennsylvania subsidiary, Aqua Pennsylvania Wastewater (Aqua), had signed an asset purchase agreement with the Delaware County Regional Water Quality Control Authority (DELCORA) to acquire the municipal authority's wastewater assets for cUSD276.5m. The transaction is subject to Pennsylvania Public Utility Commission (PUC) approval.

DELCORA serves a population of approximately 500,000 people in 42 municipalities in Southeast Pennsylvania. Aqua estimates that this represents the equivalent of 165,000 retail customers. The customer base consists of retail, commercial, and industrial customers and large wholesale agreements with municipal authorities. Its assets include 168 miles of combined and separate sewer mains, 14 miles of large-diameter force mains, and a 50-million gallon-per-

day wastewater treatment plant that serves the western part of its service territory. Wastewater from the eastern service territory (ESA) is treated by Philadelphia Water Department (PWD). This contract expires in 2028.

Under current arrangement with the PWD, Delcora could incur more than USD1.2bn in total costs through 2042, significantly increasing customer rates. Delcora is also building infrastructure necessary to divert ESA wastewater flows in its own plant. The majority of capex will be undertaken from 2026-28. WTR has experience with large/complex projects and already operates in many Delcora communities.

DELCORA is going to use the proceeds from WTR and put those into a trust, which will be used to offset customer rates for as long as possible given the upward pressure on rates from the investment above.

Pennsylvania PUC approval is required to complete this acquisition. Closing is expected to be in late 2020. This acquisition will be the largest municipal transaction for Aqua America and the largest water/wastewater municipal transaction in Pennsylvania's history.

Peoples transaction timeline

In March 2019, Aqua received regulatory approval for the Peoples transaction from the Kentucky Public Service Commission, and in April 2019, the company received approval from the West Virginia Public Service Commission. On June 26, 2019, the company filed a settlement agreement in the matter pending before the Pennsylvania Public Utility Commission.

On October 28, 2019, the administrative law judge rendered a recommended decision concluding that Aqua is technically, legally and financially fit to assume control of Peoples; that the acquisition of Peoples will affirmatively promote the service, accommodation, convenience or safety of the public in some substantial way; and recommended that the Pennsylvania Public Utility Commission issue all approvals necessary for Aqua to carry out the acquisition of Peoples.

The Commission will review the administrative law judge's recommendation and then issue a final order that is subject to appeal if a party so chooses. Aqua now expects the Peoples acquisition to close in early 2020.

Peoples transaction timeline

23-Oct-18	**WTR announces acquisition of Peoples**
13-Nov-18	WTR files merger application with PA and WV PUCs
20-Nov-18	WTR files merger application with KY PSC
28-Jan-19	Peoples filed a rate case for PA
8-Feb-19	WTR filed a rate case for settlement for PA
13-Mar-19	KY PSC approved merger application
27-Mar-19	Proposed merger settlement filed with WV PSC
29-Mar-19	WTR announced USD750m equity investment from CPPIB
Apr-19	WTR equity and debt offerings
Apr-19	WV PSC approved merger application
May-19	WTR PA rate case in effect
Jul-19	Peoples filed a rate case settlement for PA
28-Oct-19	PA ALJs recommended decision received
29-Oct-19	Peoples rate case in effect
Early 2020	Anticipated closing of the Peoples acquisition

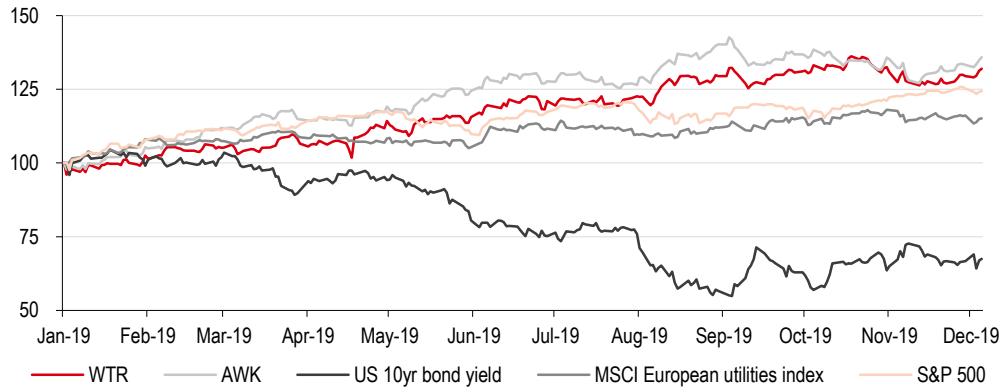
Performance against peers

Aqua's share price has outperformed the S&P 500 by 8% since 1 January 2019. On 2020e PE, it trades at a discount to its water peer group but is in line with some of the US electricity utilities according to Refinitiv Datastream. This reflects, in our view, its future multi-utility status.

One more point to note is that the US Treasury 10-year yield has fallen sharply. WTR, as a defensive utility, should be inversely correlated to bond yields.

YTD performance of WTR vs AWK vs UST 10 yr vs MSCI European utilities index vs S&P 500



Source: Refinitiv Datastream

Valuation and risks

We value Aqua America via three methodologies: DCF, dividend yield and the average of PE multiples and SOP (rate-based) valuation. Taking the average of the three approaches gives us our target price of USD47.5 (previously USD45.5). We have rolled forward our estimates in all valuations detailed below.

In our DCF valuation, we have maintained our assumption of beta at 0.58 to be in line with its market peers and have rolled forward our valuation to FY2020e. In our multiples-based valuation, we have updated the multiples in line with the market peers. This results in an increase in PE multiple from 27.8x to 29.8x. Finally, in our yield valuation, we maintain our yield at 2% which is in line with its peers. Overall, these changes lead to an increased TP of USD47.5 from USD45.5. Our TP implies 5.2% upside; we reiterate our Buy rating as we believe the combination of regulated investment and earnings growth is attractive.

Summary of valuation (USD)

Particulars	New	Previous
Current price as on 5-Dec-19	**45.1**	**NA**
DCF (rolled forward estimates)	47.5	46.0

Downside risks

Aqua America fails to achieve the desired rate case revisions and infrastructure surcharges; it lacks organic growth from asset replacement; it cannot take advantage of the FV market legislation opportunity; its dividend grows at a lower rate than we assume.

It is not able to gain the Fair Market Value premium required in the systems it wants to acquire in Pennsylvania. Its current acquisitions of systems – New Garden and Limerick – are facing challenges to the premium proposed by Aqua.

Analyst Certification

The following analyst(s), economist(s), or strategist(s) who is(are) primarily responsible for this report, including any analyst(s) whose name(s) appear(s) as author of an individual section or sections of the report and any analyst(s) named as the covering analyst(s) of a subsidiary company in a sum-of-the-parts valuation certifies(y) that the opinion(s) on the subject security(ies) or issuer(s), any views or forecasts expressed in the section(s) of which such individual(s) is(are) named as author(s), and any other views or forecasts expressed herein, including any views expressed on the back page of the research report, accurately reflect their personal view(s) and that no part of their compensation was, is or will be directly or indirectly related to the specific recommendation(s) or views contained in this research report: Verity Mitchell and Adam Dickens

Important disclosures

Equities: Stock ratings and basis for financial analysis

HSBC and its affiliates, including the issuer of this report ("HSBC") believes an investor's decision to buy or sell a stock should depend on individual circumstances such as the investor's existing holdings, risk tolerance and other considerations and that investors utilise various disciplines and investment horizons when making investment decisions. Ratings should not be used or relied on in isolation as investment advice. Different securities firms use a variety of ratings terms as well as different rating systems to describe their recommendations and therefore investors should carefully read the definitions of the ratings used in each research report. Further, investors should carefully read the entire research report and not infer its contents from the rating because research reports contain more complete information concerning the analysts' views and the basis for the rating.

From 23rd March 2015 HSBC has assigned ratings on the following basis:

The target price is based on the analyst's assessment of the stock's actual current value, although we expect it to take six to 12 months for the market price to reflect this. When the target price is more than 20% above the current share price, the stock will be classified as a Buy; when it is between 5% and 20% above the current share price, the stock may be classified as a Buy or a Hold; when it is between 5% below and 5% above the current share price, the stock will be classified as a Hold; when it is between 5% and 20% below the current share price, the stock may be classified as a Hold or a Reduce; and when it is more than 20% below the current share price, the stock will be classified as a Reduce.

Our ratings are re-calibrated against these bands at the time of any 'material change' (initiation or resumption of coverage, change in target price or estimates).

Upside/Downside is the percentage difference between the target price and the share price.

Prior to this date, HSBC's rating structure was applied on the following basis:

For each stock we set a required rate of return calculated from the cost of equity for that stock's domestic or, as appropriate, regional market established by our strategy team. The target price for a stock represented the value the analyst expected the stock to reach over our performance horizon. The performance horizon was 12 months. For a stock to be classified as Overweight, the potential return, which equals the percentage difference between the current share price and the target price, including the forecast dividend yield when indicated, had to exceed the required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). For a stock to be classified as Underweight, the stock was expected to underperform its required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). Stocks between these bands were classified as Neutral.

*A stock was classified as volatile if its historical volatility had exceeded 40%, if the stock had been listed for less than 12 months (unless it was in an industry or sector where volatility is low) or if the analyst expected significant volatility. However, stocks which we did not consider volatile may in fact also have behaved in such a way. Historical volatility was defined as the past month's average of the daily 365-day moving average volatilities. In order to avoid misleadingly frequent changes in rating, however, volatility had to move 2.5 percentage points past the 40% benchmark in either direction for a stock's status to change.

Rating distribution for long-term investment opportunities

As of 05 December 2019, the distribution of all independent ratings published by HSBC is as follows:

Buy	52%	(32% of these provided with Investment Banking Services)
Hold	39%	(33% of these provided with Investment Banking Services)
Sell	9%	(25% of these provided with Investment Banking Services)

For the purposes of the distribution above the following mapping structure is used during the transition from the previous to current rating models: under our previous model, Overweight = Buy, Neutral = Hold and Underweight = Sell; under our current model Buy = Buy, Hold = Hold and Reduce = Sell. For rating definitions under both models, please see "Stock ratings and basis for financial analysis" above.

For the distribution of non-independent ratings published by HSBC, please see the disclosure page available at http://www.hsbcnet.com/gbm/financial-regulation/investment-recommendations-disclosures.

Essential Utilities (WTRG US)

Buy: Acquisitions in the bag for growth

Equities
Water Utilities

United States

- Water and wastewater infrastructure business relatively unaffected by COVID-19
- Peoples deal completed; DELCORA on track for 2022; regulatory mechanisms to ease rate case lag; proforma 2020
- Maintain Buy rating; TP increased from USD47.5 to USD50.0

COVID-19 update: The American Water Works Association (AWWA) published the results of an online survey on the impact of the COVID-19 emergency on its member organisations on 10 April. According to the survey, utilities are reacting swiftly to the crisis to guarantee essential services and business continuity, but two thirds expect revenue/cash flow problems within the next two months. The two factors causing financial uncertainty are changes in water demand from non-domestic customers and customer payments during the coronavirus pandemic. However capital investment in asset rehabilitation remains relatively unaffected.

Essential Utilities (EU) has already made two significant acquisitions: The focus for 2020-2022 will be on integrating these and successfully delivering rate cases. Infrastructure surcharges and test years for rate cases help to reduce the regulatory lag. 52% of EU's capex is eligible for these. This provides clarity on the cash flows and reduces uncertainties around translation of rate base growth into earnings. With the completion of the Peoples deal and the gas heating season in Q1 lowering the seasonal contribution to earnings for Q2 and Q3, the company will be reporting earnings for 2020 on a pro-forma basis to improve transparency.

Maintain Buy rating with increased target price, from USD47.5 to USD50.0: We value Essential Utilities via three methodologies: DCF, dividend yield, and the average of PE multiple and SOP (rate-based) valuations. Taking the average of the three approaches gives us our target price of USD50.0 (previously USD47.5). In our DCF valuation, we have updated our beta assumption from 0.58 to 0.60 to be in line with market peers and have updated the model for FY2019 results. Our cost of capital is updated from 4.3% to 5.9%. These changes leads to a fall in the DCF valuation from USD47.5 to USD41.1. In our PE multiple-based valuation, we have updated the multiple in line with market peers, from 29.8x to 30.0x. This leads to an increase in the PE-multiple valuation, from USD45.8 to USD46.8. Our SOP valuation rises from USD44.1 to USD57.1, driven by the updated rate base, and the average of the two rises from USD45.8 to USD52. In our yield valuation, we update our yield from 2% to 1.75%, again in line with peers. This results in an increase in the Yield valuation from USD49.4 to USD57.8. Overall, these changes lead to an increase in our TP from USD47.5 to USD50.0. Our TP implies 15.3% upside and we reiterate our Buy rating as we believe the combination of regulated investment and earnings growth is attractive.

Acquisitions in the bag for growth

- Water and wastewater infrastructure business relatively unaffected by COVID-19
- Peoples deal completed; DELCORA on track for 2022; regulatory mechanisms to ease rate case lag; proforma 2020 results
- Maintain Buy rating; TP increased from USD47.5 to USD50.0

Uncertainties and risks due to COVID-19 pandemic

The American Water Works Association (AWWA) published the results of an online survey on the impact of the COVID-19 emergency on its member organisations on 10 April. According to the survey, utilities are reacting swiftly to the crisis to guarantee essential services and business continuity, but two thirds expect revenue/cash flow problems within the next two months. The two factors causing financial uncertainty are changes in water demand from non-domestic customers and customer payments during the coronavirus pandemic.

The two major challenges that investor-owned utilities identified were ensuring social distancing of the work force and supply chain issues for PPE. In terms of regulatory compliance, an issue that was noted was problems in accessing sampling sites. Most utilities have implemented measures to help customers: more than 90% have suspended water shut-offs, and nearly 50% have restored service to suspended accounts.

Three-pronged investment proposition

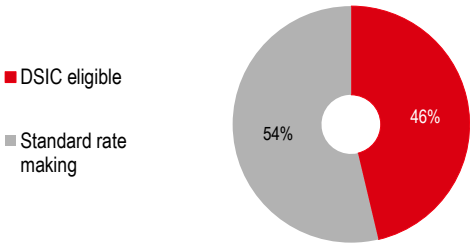
Essential Utilities has core competencies in infrastructure investment (pipes, plants, etc), regulatory affairs and operational excellence. Using these as pillars, Essential has created a 3-pronged growth strategy.

1. Municipal initiative: Driver of growing foundational water and wastewater business. This is the primary focus for the company right now.
2. Strategic M&A: Opportunistic pursuit of large, regulated utility/infrastructure targets – the company delivered on this by the Peoples gas acquisition recently completed and the DELCORA transaction which is expected to complete regulatory approvals by 2022.
3. MBAs (Market Based Activities): Complementary to regulated business. Capitalises on broader infrastructure renewals but is probably going to be less of a priority given the current challenges.

Attractive capex recovery mechanisms

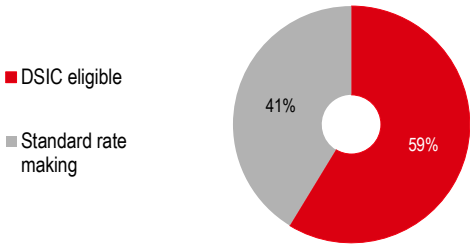
Infrastructure surcharges and test years for rate cases help to reduce regulatory lag. 52% of EU's capex is eligible for these. This provides clarity on the cash flows and reduces uncertainties around translation of the rate base growth into earnings.

Water capex: 2020-22 estimates



Source: WTRG company results presentations - FY2019

Gas capex: 2020-22 estimates



Source: WTRG company results presentations - FY2019

From the table below we can see that most of the states that Essential Utilities operates in have opted for these mechanisms, which is a positive development for the company.

State wise regulations for capex recovery

State	Allowed surcharge
Water	
Pennsylvania	7.5% W; 5%WW
Indiana	10%
Ohio	12.75% W; 9% WW
New Jersey	5%
Illinois	2.5% annual avg increase
North Carolina	5%
Gas	
Pennsylvania	5%
Kentucky	No cap

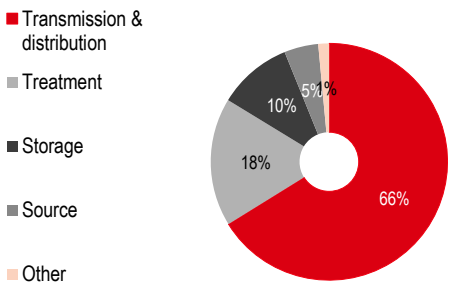
US water infrastructure needs offer opportunities for Aqua

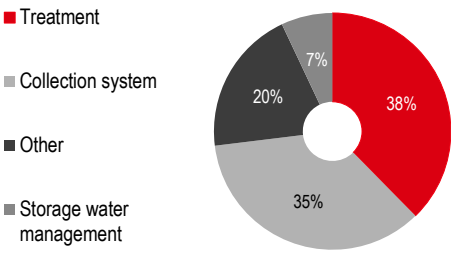
In the charts below we can see the EPA estimates of the US water infrastructure investment needs.

Water - USD473bn



Source: WTRG company results presentations - FY2019

Wastewater - USD271bn



Source: WTRG company results presentations - FY2019

Acquisitions – strong pipeline and primary focus for the company

From the table below we can see that, even with the major deal of DELCORA it has signed, Essential has a decent pipeline of acquisitions. However, due to current COVID-19 pandemic, the closure of some of these may well be delayed into 2021.

Acquisitions - closed and pending at FY2019 results

	State	Type	Total customers	Rate base (USD '000s)
Closed				
Skyline	Illinois	W / WW	752	3550
Phoenixville	Pennsylvania	W	529	2500

East Norriton	Pennsylvania	WW	4952	21000
DELCORA	Pennsylvania	WW	198000	276500
Total			**205058**	**327000**

Source: WTRG company results presentations - FY2019

Guidance for 2020

The guidance for 2020 is as follows:

- Adjusted proforma income per diluted common share (non-GAAP) of USD1.53 to USD1.58. This illustrative guidance includes the full-year effects of the Peoples acquisition as if this transaction closed on January 1, 2020, by including an estimate of the results of Peoples for the period in 2020 prior to closing, excluding transaction-related expenses and the effects of transaction-related commitments to issue rate credits to utility customers.
- 3-year earnings CAGR 5-7% for 2019 through 2022, with the base being 2019 adjusted income per share (non-GAAP).

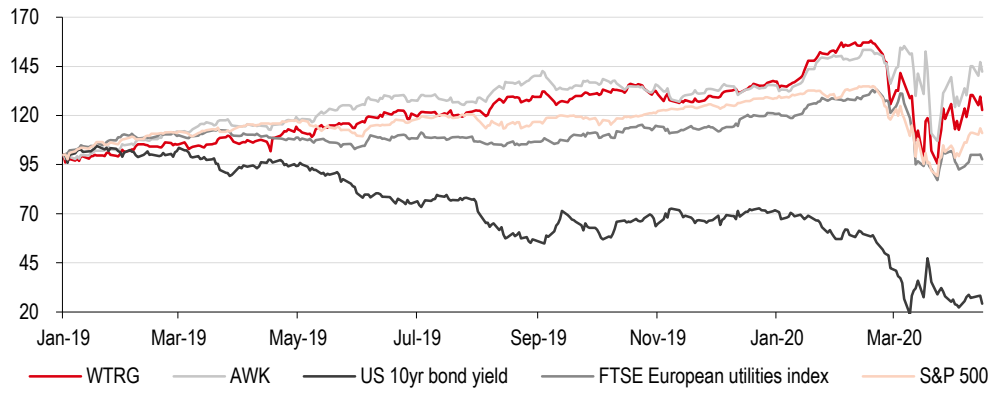
- Infrastructure investment of approximately USD550m in 2020 for communities served by the water operations.
- Infrastructure investment of approximately USD400m in 2020 for communities served by the gas operations.
- Infrastructure investment of approximately USD2.8bn through 2022 in existing water and gas operations to rehabilitate and strengthen systems.
- Rate base compound annual growth rate of 6 to 7% through 2022 in water; and 8 to 10% in gas through to 2022.
- Total annual water customer growth of between 2 and 3% on average, depending upon regulatory approval.

Performance against peers

Essential's share price has outperformed the S&P 500 by 12% since 1 January 2019. On 2020e PE, it is trading at a discount to its water peer group but in line with some of the US electricity utilities according to Refinitiv Datastream. This reflects, in our view, its future multi-utility status.

One more point to note is that the US Treasury 10-year yield has fallen sharply. WTRG, as a defensive utility, should be inversely correlated to bond yields.

Performance of WTRG vs AWK vs UST 10yr vs FTSE European utilities index vs S&P 500



Source: Refinitiv Datastream

Changes in estimates

We have updated our model for FY2019 results and the preliminary impact of COVID-19. We have also updated the model for Peoples proforma numbers for 2020 and included the DELCORA deal in our numbers from 2022. We have also updated the number of shares for 2020 to 254.4m from 215.9m in 2019 according to company guidance associated with the Peoples-related equity offering in 2019.

Valuation and risks

We value Essential Utilities via three methodologies: DCF, dividend yield, and the average of PE multiple and SOP (rate-based) valuations. Taking the average of the three approaches gives us our target price of USD50.0 (previously USD47.5). We have updated the model for FY2019 results.

- In our DCF valuation, we have updated our beta assumption from 0.58 to 0.60 to be in line with market peers. We have also updated the cost of debt from 3.9% to 8.5% and the marginal tax rate from 11% to 13%. These changes lead to updated cost of capital, from 4.3% to 5.9% and a fall in the DCF valuation from USD47.5 to USD41.1.
- In our PE multiple-based valuation, we have updated the multiple in line with market peers, from 29.8x to 30.0x. Our SOP valuation rises from USD44.1 to USD57.1, driven by updated rate base, and the average of the two rises from USD45.8 to USD52.
- In our Yield valuation, we update our yield from 2% to 1.75%, again in line with peers. This results in an increase in the Yield valuation from USD49.4 to USD57.8.

Overall, these changes lead to an increased TP from USD47.5 to USD50.0. Our TP implies 16.7% upside; we reiterate our Buy rating as we believe the combination of regulated investment and earnings growth is attractive.

Downside risks

Essential Utilities fails to achieve the desired rate case revisions and infrastructure surcharges; it lacks organic growth from asset replacement; it cannot take advantage of the Fair Market Value legislation opportunity; its dividend grows at a lower rate than we assume.

It is not able to gain the Fair Market Value premium required in the systems it wants to acquire in Pennsylvania. Its current acquisitions of systems – New Garden and Limerick – are facing challenges to the premium proposed by Aqua.

Important disclosures

Equities: Stock ratings and basis for financial analysis

HSBC and its affiliates, including the issuer of this report ("HSBC") believes an investor's decision to buy or sell a stock should depend on individual circumstances such as the investor's existing holdings, risk tolerance and other considerations and that investors utilise various disciplines and investment horizons when making investment decisions. Ratings should not be used or relied on in isolation as investment advice. Different securities firms use a variety of ratings terms as well as different rating systems to describe their recommendations and therefore investors should carefully read the definitions of the ratings used in each research report. Further, investors should carefully read the entire research report and not infer its contents from the rating because research reports contain more complete information concerning the analysts' views and the basis for the rating.

From 23rd March 2015 HSBC has assigned ratings on the following basis:

The target price is based on the analyst's assessment of the stock's actual current value, although we expect it to take six to 12 months for the market price to reflect this. When the target price is more than 20% above the current share price, the stock will be classified as a Buy; when it is between 5% and 20% above the current share price, the stock may be classified as a Buy or a Hold; when it is between 5% below and 5% above the current share price, the stock will be classified as a Hold; when it is between 5% and 20% below the current share price, the stock may be classified as a Hold or a Reduce; and when it is more than 20% below the current share price, the stock will be classified as a Reduce.

Our ratings are re-calibrated against these bands at the time of any 'material change' (initiation or resumption of coverage, change in target price or estimates).

Upside/Downside is the percentage difference between the target price and the share price.

Prior to this date, HSBC's rating structure was applied on the following basis:

For each stock we set a required rate of return calculated from the cost of equity for that stock's domestic or, as appropriate, regional market established by our strategy team. The target price for a stock represented the value the analyst expected the stock to reach over our performance horizon. The performance horizon was 12 months. For a stock to be classified as Overweight, the potential return, which equals the percentage difference between the current share price and the target price, including the forecast dividend yield when indicated, had to exceed the required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). For a stock to be classified as Underweight, the stock was expected to underperform its required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). Stocks between these bands were classified as Neutral.

*A stock was classified as volatile if its historical volatility had exceeded 40%, if the stock had been listed for less than 12 months (unless it was in an industry or sector where volatility is low) or if the analyst expected significant volatility. However, stocks which we did not consider volatile may in fact also have behaved in such a way. Historical volatility was defined as the past month's average of the daily 365-day moving average volatilities. In order to avoid misleadingly frequent changes in rating, however, volatility had to move 2.5 percentage points past the 40% benchmark in either direction for a stock's status to change.

Rating distribution for long-term investment opportunities

As of 21 April 2020, the distribution of all independent ratings published by HSBC is as follows:

Buy	55%	(31% of these provided with Investment Banking Services)
Hold	36%	(30% of these provided with Investment Banking Services)
Sell	9%	(24% of these provided with Investment Banking Services)

For the purposes of the distribution above the following mapping structure is used during the transition from the previous to current rating models: under our previous model, Overweight = Buy, Neutral = Hold and Underweight = Sell; under our current model Buy = Buy, Hold = Hold and Reduce = Sell. For rating definitions under both models, please see "Stock ratings and basis for financial analysis" above.

For the distribution of non-independent ratings published by HSBC, please see the disclosure page available at http://www.hsbcnet.com/gbm/financial-regulation/investment-recommendations-disclosures.

Q4	$541E	$579E	$601E
Year:	$1,530E	$2,053E	$2,118E

PORTFOLIO MANAGER BRIEF

As the title of our note implies, the key takeaways from WTRG's guidance call for 2021 were all positive. Key areas focused on included earnings (2021 and long-term), capital allocation, emission reduction initiatives, and acquisitions. Given the 2021 EPS guidance range encompassed our pre-existing full year estimate, we've made no changes to our forecasts. We reiterate our BUY rating and $70 Fair Value on WTRG shares.

ANALYST NOTES

- 2021 EPS Guidance Range Encompassed Street Expectations. The expected 2021 EPS guidance range of $1.64 to $1.69 encompassed 7 of 9 published forecasts in FactSet. The company continues to see a 5-7% CAGR on a go forward basis from 2020 through 2023, and it also reiterated its 2020 adjusted EPS guidance range of $1.53 - $1.58. WTRG expects to report 4Q20 and full year 2020 results after market close on 2/24/21.
- Capital Allocation Heavily Tilted to Pennsylvania. For 2021, the capital budget is $1 billion, and of that amount, 55% ($550MM) is slated for water investment, 45% ($450MM) for gas. However, if we break out the CAPEX in terms of state allocation, it looks like approximately $875MM of the investment will occur in Pennsylvania, where WTRG gets its highest returns. One slide that caught our attention was #17, which highlights the breakout of pipe replacement through 2023. The acceleration in gas pipe replacement on a percentage basis is well above that of the water business and again is occurring in Pennsylvania.
- Emission Reductions Will Be Sizable. A fair amount of time was spent on emission reductions (Scope 1 and 2) across all operations. Using 2019 as a baseline, the Company expects a 60% reduction by 2035, and pledged to update stakeholders on the progress towards that goal every 6 months until achieved. Key elements for the gas distribution system include replacing 3,000 miles of leak prone gas distribution pipe, a gathering system repair and replacement program, accelerated leak detection and repair, fugitive gas reinjection during construction, and transitioning to CNG vehicles. For the water and wastewater operations, a commitment to source 100% renewable electricity for the States of Illinois, New Jersey, Ohio, and Pennsylvania by 2022.

RESEARCH ANALYST CERTIFICATIONS AND IMPORTANT DISCLOSURES ARE ON PAGES 3 - 4 OF THIS REPORT

- Acquisition Pipeline Remains Strong. Building on 2020's successful acquisition program (12k new customers, $63MM rate base) in 2021 should be a fairly easy affair, given pending transactions total just shy of 225K customers and $420MM of rate base. The DELCORA transaction remains the "big prize" with its 198K customers and $276MM purchase price. The Company expects to close the DELCORA acquisition in 2Q21. WTRG is actively pursuing municipal opportunities totaling 340K total customers.
- Summary/Valuation. On-the-mark guidance, robust capital investment levels, a strong acquisition pipeline, visible earnings growth, aggressive emission reduction targets.....there was a lot more information in WTRG's "guidance call" than we expected. All the news was good and Essential Utilities continues to be our top pick in the water utility sector. Valuation remains compelling; at a P/E of 27x consensus 2022 forecasts, the shares trade 5 turns below the peer group and carry a sector-high dividend yield of 2.08%. We reiterate our BUY rating and $70 Fair Value, based on a target dividend yield of 1.5% applied to our 2021 estimated dividend of $1.06.

IMPORTANT DISCLOSURES

Research Analyst Certification

I, Michael Gaugler, the Primarily Responsible Analyst for this research report, hereby certify that all of the views expressed in this research report accurately reflect my personal views about any and all of the subject securities or issuers. No part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views I expressed in this research report.

Janney Montgomery Scott LLC ("Janney") Equity Research Disclosure Legend

Janney Montgomery Scott LLC currently acts as a market-maker in the securities of Essential Utilities Inc..

Janney Montgomery Scott LLC intends to seek or expects to receive compensation for investment banking services from Essential Utilities Inc. in the next three months.

The research analyst is compensated based on, in part, Janney Montgomery Scott's profitability, which includes its investment banking revenues.

Definition of Ratings

BUY: Janney expects that the subject company will appreciate in value. Additionally, we expect that the subject company will outperform comparable companies within its sector.

NEUTRAL: Janney believes that the subject company is fairly valued and will perform in line with comparable companies within its sector. Investors may add to current positions on short-term weakness and sell on strength as the valuations or fundamentals become more or less attractive.

SELL: Janney expects that the subject company will likely decline in value and will underperform comparable companies within its sector.

Q3	$244A	$352E	$360E
Q4	$226A	$571E	$579E
Year:	$890A	$1,504E	$2,053E

PORTFOLIO MANAGER BRIEF

WTRG's 1Q20 adjusted EPS results exceeded expectations, in what was probably the most transformational quarter in the Company's history. Q1 saw the final closing of the Peoples Gas transaction, and then a filing with the IRS for tax repair at Peoples Gas. Also completed was an application with Pennsylvania Public Utility Commission (PAPUC) for the DELCORA acquisition. In addition to that the Company changed its name and stock symbol, and then activated its emergency response plans to deal with COVID-19. From our viewpoint, the investment case for ownership of WTRG shares continues to strengthen; and given the current yield of 2.3% (highest in the water sector peer group), we reiterate our BUY rating and $70 Fair Value on WTRG shares.

ANALYST NOTES

1Q20 Results Above Forecasts. On the top line, revenues increased 27% YOY, driven by the addition of Peoples Gas and new rates/surcharges in the water segment. At the bottom line, WTRG chose to elect tax repair accounting methodology for most of the Peoples Gas operations, which generated a $5.9MM tax benefit in the quarter. All-in adjusted EPS of $0.60 was above our $0.53 estimate and consensus of $0.58.

Pennsylvania is Generating Significant Acquisition Activity. While the Company's been active across its geographic footprint in terms of acquisitions, the State of Pennsylvania has been particularly meaningful when it comes to acquiring assets recently. In Q1 the Peoples Gas transaction was completed, and next up is the Delaware County Regional Water Quality Control Authority (DELCORA) which serves 42 municipalities and 500,000 people. Beyond DELCORA, the Company has two more signed agreements in Pennsylvania (New Garden and East Norriton) which will add another 7,000+ customers.

Other substantial targets that have been discussed publicly as potential asset sales in the State include the cities of Pittsburgh, Harrisburg and the Chester Water Authority. All-in the Company has signed purchase agreements expected to add the equivalent of 205,058 water & wastewater customers, with all but 512 of them in the Keystone State. Essential also noted that Virginia recently passed fair market value legislation, which is now in place in all 8 states where Essential operates. We certainly expect competition for assets where opportunities exist, but WTRG should continue to get its fair share of acquisitions within its service territories.

RESEARCH ANALYST CERTIFICATIONS AND IMPORTANT DISCLOSURES ARE ON PAGES 3 - 4 OF THIS REPORT

COVID-19 Actions Mirror Industry-Wide Best Practices. WTRG's response to COVID-19 is mirroring utility industry best practices, including following Federal and local guidelines in the areas of health & safety. Those employees that can work remotely are doing so, and social distancing work practices are in place. The Company suspended customer shut-offs early after COVID-19 risks were identified, and is not entering customer homes for non-essential work. In terms of the balance sheet, WTRG increased liquidity via a $500MM 364 term loan in March.

Regulatory Update. YTD, the Company has completed rate case or surcharge filings for water operations in Illinois, North Carolina, Ohio and Virginia totaling $5.2MM in additional revenues. In the Natural Gas segment, surcharge filings have been completed in Kentucky and Pennsylvania totaling $977K. New base rates are expected shortly in Indiana, New Jersey, North Carolina and Ohio (total requests = $10.1MM).

Summary/Valuation. Successful completion of the Peoples Gas transaction, election of tax repair accounting methodology, additional expected benefits from catch-up tax repair deductions for past investments, the upcoming closing of the DELCORA transaction, a full pipeline of acquisition opportunities across all operating states, continued rate relief.....the list of expected positive impacts on WTRG's financials is quite extraordinary at this moment in time.

In terms of valuation, recall our view on the sector in general that as long as earnings growth continues under the regulated investment model, P/E's may fluctuate with general market conditions but over time dividend increases will continue to push share prices higher as long as 1) interest rates remain static or move lower and 2) yields on utilities compare favorably with other types of investments. We've noted some of our peers are bringing P/E multiple assumptions for utility shares lower and in some cases doing a "sum-of-the-parts" methodology, whereby each reporting segment gets its own multiple. We abandoned that methodology years ago because we found ourselves perpetually missing equity tops when yield (and dividend increases) became the primary focus for utility investors.

Returning to WTRG shares, we note the Company's primary service territory of Pennsylvania remains the most constructive in the U.S. (in our opinion) for both natural gas and water utilities. When we last revisited valuation in our industry piece back on October 7th, the U.S. 10-Year T-Note was at 1.53%. WTRG shares were trading at a P/E of 27x 2021 EPS estimates, for a yield of 2.06%. The Peoples Gas transaction had not closed (and actually dragged on a bit longer than expected), which introduced some minor element of regulatory risk. Fast forward to Friday: the U.S. 10-Year T-Note closed at 0.69%, WTRG shares are trading at a P/E of 24x 2021 EPS estimates, for a yield of 2.33%. The Peoples Gas transaction has now closed, tax repair accounting (and its bottom line benefits) are in place, and regulatory risk present in October is not a factor.

All-in, we believe P/E multiples will once again begin moving higher for all the water utilities, but especially for WTRG shares, given 1) the yield of 2.33%, versus the group average yield of 1.88%, 2) due to our expectations that interest rates will remain low, and 3) that the earnings bias is decidedly upward. The shares hit a 52-week high of $54.52 back on February 18th, and its a stronger Company with better earnings visibility today than it was just 3 months ago. Our view is that the need for yield has intensified, and will remain strong for the foreseeable future. We maintain our BUY rating and $70 Fair Value, based on a P/E of 42x our 2021 EPS estimate of $1.66.

Q4	$474A	$497E	$517E
Year:	$1,463A	$1,836E	$1,920E

PORTFOLIO MANAGER BRIEF

WTRG's 1Q21 EPS results were above our and consensus forecasts, as more favorable winter weather positively impacted the gas segment's results. Despite the outperformance, 2021 EPS guidance was maintained; we've adjusted our estimates to remain "within the lines" of the expected range. All-in, 2021 and 2022 look to be very good years for the Company from an earnings perspective, and our view is WTRG shares remain one of the best values in our coverage universe. We reiterate our BUY rating and $70 Fair Value.

ANALYST NOTES

- 1Q21 Results Nicely Above Expectations. Weather was very favorable in Q1 in southwestern Pennsylvania, which drove a strong performance from WTRG's Peoples Gas operations. Consolidated adjusted EPS of $0.72 was above our $0.66 estimate, which was also consensus.
- Acquisition Updates. The Company continues to push forward on its DELCORA acquisition, which remains in litigation. Delaware County Court has upheld the validity of the sale agreement, but Delaware County has appealed to the state court. WTRG is awaiting a judge's decision for that appeal, which could take six months or more. The Company expects to settle the forward sale agreement of the 6.7MM shares (proceeds to be used primarily for the DELCORA acquisition) no later than (and close to) August 10th, 2021, the last day it can do so.
- DELCORA aside, the pipeline of opportunities continues to be robust, with 395,000 customer connections being pursued. Fair market value legislation across the geographic service territory continues to benefit acquisition activity, with West Virginia and Kentucky the most recent states to pass this type of legislation. On the 1Q21 conference call, WTRG indicated that it expected to be active in Kentucky looking for transactions going forward.
    - Guidance Maintained. For 2021, WTRG's guidance remains as follows:
    - Net income per diluted common share of $1.64 to $1.69,
    - Earnings per share growth CAGR of 5 to 7% for 2020 through 2023,
    - Regulated water segment infrastructure investments of approximately $550 million in 2021,
    - Regulated natural gas segment infrastructure investments of approximately $450 million in 2021,
    - Infrastructure investments of approximately $3 billion through 2023 to rehabilitate and strengthen water, wastewater and natural gas systems,

RESEARCH ANALYST CERTIFICATIONS AND IMPORTANT DISCLOSURES ARE ON PAGES 3 - 4 OF THIS REPORT

  - Regulated water segment rate base compound annual growth rate of 6 to 7% through 2023,
  - Regulated natural gas segment rate base compound annual growth rate of 8 to 10% through 2023,
  - Average annual regulated water segment customer (or equivalent dwelling units) growth of between 2 and 3% from acquisitions and organic customer growth.

- Summary/Valuation. WTRG share prices have been performing better recently, but still lag versus the peer group. We thought a "sum-of-the-parts" valuation might be useful given the disconnect; the gas utility operations are the most difficult to value, given "pure-play" natural gas comparables to Peoples Gas are difficult to come by. We note that Centerpoint Energy (CNP, NR) recently announced the sale of several gas utility properties for 2.5x rate base. If we use the Peoples Gas rate base of $2.5B, applying a 2.5x rate base multiple would equal a $6.25B value. If we divide that by 255MM shares, that translates to a $24.51 per share value.
- The water utility operations present less of a challenge in terms of valuation, given several comparables exist. The most direct comp is likely American Water Works (AWK, BUY) which has sizable operations in Pennsylvania and New Jersey. Those shares command a 37x P/E on 2021 consensus EPS. If we use the midpoint of 2021 EPS guidance for WTRG shares and assume approximately 70% of EPS is derived from water utility operations, that gets us to $1.16 EPS x 37 P/E = $42.92. When added to the aforementioned $24.51 gas utility valuation, that would equate to a Fair Value of $67.43.
- Sum-of-the-parts analysis aside, we favor using dividend yield for water utilities. While we acknowledge that WTRG isn't a pure-play water utility, we believe its ability to increase and pay dividends is as predictable as any water utility in our coverage universe. Currently, the group average dividend yield (including WTRG) is 1.72%, but several water utilities are trading at our target yield of approximately 1.5%. Essential Utilities is currently trading at a yield of 2.15%, highest in the peer group. Given the Company's superior operating footprint (all constructive regulatory environments), we believe the forward earnings outlook is exceptionally strong and we expect the shares to trade to a 1.5% yield based on our 2022 estimated dividend of $1.05, which generates a Fair Value of $70. All-in, regardless of what valuation metric investors choose, the potential share values we've highlighted ($67 / $70) are both higher than yesterday's closing price of $46.76. We reiterate our BUY rating on WTRG shares and $70 Fair Value.

Water Utilities

August 8, 2019

Aqua America, Inc. (WTR) - BUY

WTR: Solid Quarter, Strong Outlook; Maintain BUY Rating, $44 Fair Value

Price:	$42.06
Fair Value Estimate:	$44.00
52-Week Range:	$32.09 - $42.32
Market Cap (MM):	9,072
Shr.O/S-Diluted (mm):	215.7
Average Daily Volume:	1,024,918
Book Value:	$11.17
Dividend:	$0.94
Yield:	2.2%

FYE: Dec	2019E	2020E	2021E
EPS:	$1.50E	$1.56E	$1.70E
Prior EPS:	$1.39	$1.52	NC
P/E Ratio:	28.0x	27.0x	24.7x

Quarterly EPS:

Q1	$0.28A	$0.56E	$0.59E
Q2	$0.37A	$0.19E	$0.21E
Q3	$0.44E	$0.36E	$0.38E
Q4	$0.41E	$0.46E	$0.51E

Quarterly Revenue (M):

Q1	$201A	$681E	$706E
Q2	$219A	$392E	$408E
Q3	$357E	$380E	$397E
Q4	$560E	$596E	$618E
Year:	$1,345E	$2,048E	$2,129E

PORTFOLIO MANAGER BRIEF

WTR's 2Q19 results met expectations, with adjusted EPS of $0.37 meeting the consensus forecast. Quarterly results aside, new acquisition opportunities were a dominant topic during the 2Q conference call, and the pipeline of new opportunities appears to have grown substantially larger. We've made minor adjustments to our forward estimates based on the push-out of the Peoples Gas transaction (our estimates now include the combined entity beginning in 4Q19) and we maintain our BUY rating and $44 Fair Value on WTR shares.

ANALYST NOTES

- 2Q19 Results Inline with Expectations. At the top line, revenues of $219MM benefitted from growth ($4MM) and rates & surcharges ($4MM), with lower consumption providing somewhat of an offset (-$700K) and other items (-$300K). At the bottom line, adjusted EPS of $0.37 met the consensus forecast, but was below our $0.39 estimate.
- Potential Acquisition Opportunities Are Sizable (and Plentiful). Several large-scale acquisition opportunities have developed in Pennsylvania, which could add substantially to the company's size. During the quarter, WTR signed an exclusive agreement with DELCORA, a large municipal wastewater authority in southeastern PA serving 500K people in 42 municipalities. DELCORA and WTR have committed to exclusive discussions regarding DELCORA's potential acquisition. Also in play in Pennsylvania is the water, wastewater and stormwater systems for the City of Harrisburg, the state capital. Then there's the water system that comprises the Chester Water Authority, which Aqua America has pursued previously. A legal fight is taking place between the Authority and the City of Chester over who owns the assets; the city would like to entertain offers, the Authority wishes to stay independent. Overall, the acquisition environment continues to improve, aided by fair market value legislation across the company's geographic footprint.
- Summary/Valuation. With the Peoples Gas acquisition expected to close in the fall, we've already moved to combined estimates (Aqua + Peoples). We expect to continue to refine our forecasts as more information on timing and cost impacts become available, but we believe our estimates are reasonable given the data already available. The outlook for earnings growth (and dividend increases) looks particularly bright, and just on the base assets. Additional acquisitions of size (if they materialize) would likely add additional upside to our forecasts, given the company's disciplined approach when it comes to purchasing assets. In terms

RESEARCH ANALYST CERTIFICATIONS AND IMPORTANT DISCLOSURES ARE ON PAGES 3 - 4 OF THIS REPORT

of valuation, WTR shares still have reasonable upside to our Fair Value of $44 (based on a P/E of 26x our 2021 EPS estimate of $1.70) , so we maintain our BUY rating, recommending investors add on dips, should they occur.

Q3	$357E	$380E	$412E
Q4	$560E	$596E	$633E
Year:	$1,345E	$2,048E	$2,189E

PORTFOLIO MANAGER BRIEF

After the close yesterday, Aqua America announced its second large acquisition in the State of Pennsylvania within a one-year period. The company will pay $276.5MM for an estimated 165,000 retail wastewater customers from the Delaware County Regional Water Quality Control Authority (DELCORA). The announcement was widely anticipated, given previous disclosures that discussions were underway. We expect the deal to close in late 2020, and are making adjustments to our 2021 estimates to reflect anticipated benefits from the acquisition. We reiterate our BUY rating, and raise our Fair Value from $44 to $50, based on a P/E of 28x our 2021 EPS estimate of $1.77.

ANALYST NOTES

- DELCORA Acquisition As Good as it Gets. Pennsylvania has proven to be a target rich environment for Aqua America in terms of M&A, with the company once again announcing a sizable transaction. Following closely on the $4.3B Peoples Gas acquisition announcement, Aqua has come to terms with DELCORA, an expansive wastewater treatment system spanning 42 municipalities in the southeastern part of the state. The price ($276.5MM) looks very favorable, and given the number of estimated customers, likely will not generate goodwill. In the release, the company indicated the system needs $1.2B of investment through 2041, which amounts to meaningful CAPEX annually over the period. And of course, Aqua knows southeastern Pennsylvania extremely well, given its original roots dating back to its Philadelphia Suburban Corporation (previous ticker symbol PSC) days. We expect no problems with the transaction being approved by the Pennsylvania Public Utility Commission, and anticipate a closing in late 2020.
- Summary/Valuation. The last three sizable transactions - DELCORA, Peoples Gas and Limerick have all been in Aqua America's home state of Pennsylvania, which also happens to be the most constructive regulatory environment in the U.S., in our opinion. Returns are solid, the PAPUC has a great reputation of working with utilities to improve infrastructure and manage ratepayer costs, which we note cannot be said of all states across the country. We believe Aqua's demonstrated ability to significantly grow its presence (and future earnings) is worthy of a bump in its valuation, and we raise not only our 2021 EPS estimate, but our P/E multiple assumption. We reiterate our BUY rating and increase our Fair Value target from $44 to $50, based on a P/E of 28x our 2021 EPS estimate of $1.77.

Water Utilities

November 5, 2019

Aqua America, Inc. (WTR) - BUY

WTR: 3Q19 Results Above Expectations; Maintain BUY Rating, $70 Fair Value

Price:	$43.56
Fair Value Estimate:	$70.00
52-Week Range:	$32.09 - $46.90
Market Cap (MM):	9,400
Shr.O/S-Diluted (mm):	215.8
Average Daily Volume:	1,151,504
Book Value:	$17.73
Dividend:	$0.94
Yield:	2.2%

FYE: Dec	2019E	2020E	2021E
EPS:	$1.47E	$1.56E	$1.70E
Prior EPS:	$1.50	NC	$1.77
P/E Ratio:	29.6x	27.9x	25.6x

Quarterly EPS:

Q1	$0.28A	$0.56E	$0.63E
Q2	$0.37A	$0.20E	$0.19E
Q3	$0.48A	$0.30E	$0.28E
Q4	$0.34E	$0.53E	$0.60E

EPS: adjusted

Quarterly Revenue (M):

Q1	$201A	$672E	$711E
Q2	$219A	$392E	$423E
Q3	$244A	$367E	$398E
Q4	$226E	$597E	$635E
Year:	$890E	$2,028E	$2,168E

PORTFOLIO MANAGER BRIEF

WTR's 3Q19 EPS results were above expectations, with adjusted EPS of $0.48 above the consensus forecast of $0.44. The company also reiterated its full year adjusted EPS guidance range of $1.45 to $1.50. With the Peoples Gas transaction now anticipated to close in 4Q19 or early 1Q20, we've removed Peoples Gas forecasts from our 4Q19 estimates (but are maintaining them for 1Q20). With both the Peoples Gas and DELCORA acquisitions moving forward, normal M&A activity and continuing rate relief, we see significant growth in the years ahead. Valuation remains attractive, as well; with the shares trading at a P/E 26x our 2021 EPS estimate of $1.70 and yielding 2.1% (highest in the peer group) we reiterate our BUY rating and $70 Fair Value.

ANALYST NOTES

- 3Q19 Adjusted EPS Results Ahead of Expectations. On the top line, revenues of $244MM were just below consensus of $250MM but higher YoY by 7.7% as rates, growth and volume all positively contributed. The company continues to experience higher O&M expenses due to the Peoples Gas transaction, which negatively impacted GAAP EPS of $0.38. Adjusted 3Q19 EPS was $0.48, 9.4% higher YoY and well above the Street estimate of $0.44.
- Major Acquisitions Still Awaiting Closing. The Peoples Gas transaction is expected to close in late 2019 or early 2020, while DELCORA is expected late 2020. For Peoples Gas, the Administrative Law Judge assigned to the case rendered a positive decision, and recommended the PA Public Utility Commission approve the acquisition. The DELCORA transaction also requires PAPUC approval.
- Regulatory Update. In the company's geographic operating footprint, its received annual rate increases totaling $59.8MM across Illinois, New Jersey, North Carolina, Ohio and Pennsylvania. Peoples Gas filed a settlement agreement in its PA rate case in July 2019, and the PAPUC authorized a $59.5MM increase on October 3, 2019. New rates become effective January 1, 2020.
- Summary/Valuation. Aqua's ability to continue executing acquisitions both large and small sets the stage for continued earnings growth in the years ahead. For both its gas and water assets, the pipeline of opportunities remains robust, and our positive investment thesis remains decidedly bullish. We maintain our BUY rating and $70 Fair Value, based on a P/E of 41x our 2021 EPS estimate of $1.70. We note the shares have the highest yield in the peer group (2.14%) and dividend growth should continue to be mid-to-high single digits for the foreseeable future.

Yield:	2.4%

FYE: Dec	2020E	2021E	2022E
EPS:	$1.58E	$1.67E	$1.78E
Prior EPS:	NC	NC	NC
P/E Ratio:	26.1x	24.7x	23.1x

Quarterly EPS:

Q1	$0.60A	$0.66E	$0.68E
Q2	$0.29A	$0.22E	$0.25E
Q3	$0.23A	$0.26E	$0.27E
Q4	$0.46E	$0.52E	$0.58E

EPS: adjusted

Quarterly Revenue (M):

Q1	$256A	$773E	$794E
Q2	$384A	$342E	$352E
Q3	$349A	$360E	$370E
Q4	$541E	$579E	$601E
Year:	$1,530E	$2,053E	$2,118E

PORTFOLIO MANAGER BRIEF

WTRG's 3Q20 adjusted EPS results were just above our expectations ($0.23 vs. $0.22) which was also consensus. The Company refined its guidance, as it now expects 2020 adjusted EPS at the upper end of its previously communicated $1.53 to $1.58 range (it also expects an earnings growth CAGR of 5-7% for 2019 thru 2022). We've made only minor adjustments to our 2020 & 2021 estimates, and introduced 2022 forecasts. We maintain our BUY rating and $70 Fair Value, based on a P/E of 39x our 2022 EPS estimate of $1.78.

ANALYST NOTES

- 3Q20 Results Just Above Expectations. On the top line, revenues of $349MM were just above our $342MM estimate (consensus was $347MM). The upside in our model surprisingly came from the Gas segment, as our estimates already factored in increased volumes in the Water segment due to the hot & dry summer. OPEX in the quarter came in roughly inline with our forecasts, and adjusted EPS of $0.23 was $0.01 above our and the consensus forecast of $0.22.
- Updated (And Refined) Guidance. For 2020, WTRG now sees adjusted EPS at the upper end of its $1.53 to $1.58 range. The Company expects an earnings growth CAGR of 5-7% for 2019 through 2022. CAPEX remains on track for $550MM for the Water segment in 2020 ($400MM for the Natural Gas segment, including investments made before WTRG ownership). Going forward, it sees $2.8B of infrastructure investment thru 2022.
- Adjusting 2020/2021 Estimates; Introducing 2022 Forecasts. We've made only minor adjustments to our 2020/2021 estimates; for 2020, we were already at the high end of the Company's $1.53 - $1.58 guidance range. We took the $0.01 of EPS from 4Q20 out of the Natural Gas segment; NOAA forecasts for the Northeast see continuing above normal temperatures through the middle of November.
- Summary/Valuation. A solid quarter, healthy M&A activity (with a robust pipeline of opportunities), strong CAPEX profile and attractive valuation are all reasons we recommend Essential Utilities shares at current price levels. We also note that shares yield 2.43%, the highest in the water utility peer group. We maintain our BUY rating and $70 Fair Value, which is based on a P/E of 39x our 2022 EPS estimate of $1.78.

Q3	$349A	$360E	$370E
Q4	$474A	$501E	$526E
Year:	$1,463A	$1,976E	$2,043E

PORTFOLIO MANAGER BRIEF

Essential Utilities 4Q20 adjusted EPS of $0.46 matched our estimate and was slightly ahead of consensus, and its 2021 EPS guidance range of $1.64 to $1.69 compares favorably to our our $1.67 forecast (also consensus). We've made minor adjustments to our forward estimates (see table, this page) and reiterate BUY rating and $70 Fair Value, based on a P/E of 39x our 2022 EPS estimate of $1.78. The shares yield 2.3%, highest in the water utility peer group.

ANALYST NOTES

- 4Q20 Adjusted EPS Met Expectations. On the top line, revenues of $474MM increased 109.7% YOY, benefitting from the Peoples Gas acquisition (+ $241MM) and increased volume, growth, rate and surcharge increases in the regulated water segment (+$10MM) while "other" items netted a -$3MM. On the bottom line, adjusted EPS of $0.46 matched our estimate and was a penny ahead of consensus.
- 2021 Guidance Update. For the full year, key guidance items include EPS ($1.64 to $1.69), EPS CAGR of 5% to 7% for 2020 through 2023, CAPEX of $550MM for the Water segment and $450MM for the Natural Gas segment. For the 2021 through 2023 period, CAPEX of $3B, which is expected to drive rate base compound annual growth of 6%-7% for the Water segment and 8% to 10% for the Natural Gas segment. Other items include Water segment customer growth of 2% to 3% (acquisitions and organic), reduction of Scope 1 and Scope 2 greenhouse gas emissions by 60% by 2035 and multiyear plans to achieve diverse supplier spend and employees of color.
- Regulatory Update. WTRG has received rate awards in NJ, NC, OH and PA of $8.5MM YTD. It has proceedings in VA and IN that would add an estimated $1.8MM in incremental revenues.
- Strong Acquisition Activity Continues. 2021 looks to be a very strong year for acquisitions, with the biggest announced transaction (DELCORA, 198K equivalent dwelling units) expected to receive a Pennsylvania Public Utility Commission (PAPUC) decision in March. All-in, Essential Utilities has six signed purchase agreements encompassing 227K equivalent dwelling units that will add $438MM in rate base when closed. The Company's pipeline of potential acquisitions represents 375K total water/wastewater customers. Its target for 2021 is to sign municipal deals totaling at least $100MM of rate base.

RESEARCH ANALYST CERTIFICATIONS AND IMPORTANT DISCLOSURES ARE ON PAGES 3 - 4 OF THIS REPORT

- Summary/Valuation. We remain perplexed as to why WTRG shares aren't trading at high price levels. The Company's executed in accordance with guidance, has a robust CAPEX plan for the next three years, expects 5%-7% earnings growth through 2023 and continues to close acquisitions of size, augmenting organic growth. Its regulatory risk is probably the lowest of any in the peer group with multi-state operations, and its yield at 2.3% is the highest. Within the water utility peer group, WTRG remains our top pick, and we reiterate our BUY rating and $70 Fair Value, based on a P/E of 39x our 2022 EPS estimate of $1.78. Our target yield for WTRG shares is 1.5% against an expected 2022 annualized dividend of $1.05.

Average Daily Volume:	1,199,373
Book Value:	$17.90
Dividend:	$0.94
Yield:	2.0%

FYE: Dec	2019A	2020E	2021E
EPS:	$1.47A	$1.56E	$1.65E
Prior EPS:		NC	$1.70
P/E Ratio:	31.5x	29.7x	28.1x

Quarterly EPS:

Q1	$0.28A	$0.21E	$0.59E
Q2	$0.37A	$0.20E	$0.20E
Q3	$0.48A	$0.30E	$0.30E
Q4	$0.34A	$0.53E	$0.56E

EPS: adjusted

Quarterly Revenue (M):

Q1	$201A	$207E	$711E
Q2	$219A	$392E	$423E
Q3	$244A	$367E	$398E
Q4	$226A	$597E	$635E
Year:	$890A	$1,562E	$2,168E

PORTFOLIO MANAGER BRIEF

WTR's 4Q19 results met our expectations (top and bottom line), and forward proforma EPS guidance for 2020 was also on target. Looking forward, we've made minor adjustments to our forward estimates (see table, this page) and we maintain our BUY rating and $70 Fair Value on WTR shares.

ANALYST NOTES

- 4Q19 Results Met Expectations. Revenues of $226MM and adjusted EPS of $0.34 met our expectations (consensus was $222MM and $0.30, respectively). 4Q19 results for water utilities are a seasonally weak period and rarely impact water utility estimates or valuations.
- Peoples Gas Update; Just a Little Bit Longer. The Peoples Gas transaction is now expected to close on March 16, 2020, an unfortunate development given Q1 is the seasonally strongest period for Mid-Atlantic gas utilities.
- Long Awaited 2020 Guidance Arrives. Given the delays in closing the Peoples Gas transaction, Essential Utilities is offering pro-forma adjusted 2020 EPS guidance in a range of $1.53 to $1.58, which assumes ownership of Peoples Gas from January 1st (we assume management did this to provide a range of full year earnings potential and to aid analysts in modeling estimates). The company expects to see an EPS CAGR of 5%-7% over the next 3-year period.
- Adjusting Estimates. We made minor adjustments to our forward estimates (see table, this page). Those estimates are what we think the company will actually report on an adjusted basis, not pro-forma. Our proforma adjusted EPS is $1.56, with the difference between the two being the exclusion of gas results in 1Q20.
- Summary/Valuation. 4Q19 results and 2020 guidance turned out as anticipated. Rate case activity remains strong, with 3 states receiving rate awards and infrastructure surcharges totaling $4.8MM (the company has other rate activity pending in 4 states requesting $8.3MM). The acquisition pipeline remains full, and CAPEX trends are robust. 2020 is unfolding as we expected, which required minimal adjustments to estimates. In terms of valuation, we continue to forecast Essential's 2030 dividend at $1.93, which when pegged to our expected U.S. 10-year T-Note yield of 1.5%, generates a Fair Value of $70. We maintain our BUY rating on Essential Utilities.

PORTFOLIO MANAGER BRIEF

Upon review of consensus forecasts for 2020, we are changing our 1Q20 EPS methodology from adjusted actual of $0.21 to pro-forma of $0.53 to prevent any confusion among investors. We made this distinction in our 2/28 note when we indicated our pro-forma EPS estimate for 2020 was $1.56, and there is no change in that regard. We are simply moving all of our 2020 estimates to pro-forma.

Market Cap (MM):	10,954
Shr.O/S-Diluted (mm):	245.0
Average Daily Volume:	1,139,007
Book Value:	$18.83
Dividend:	$0.94
Yield:	2.1%

FYE: Dec	2019A	2020E	2021E
EPS:	$1.47A	$1.58E	$1.67E
Prior EPS:		NC	$1.66
P/E Ratio:	30.4x	28.3x	26.8x

Quarterly EPS:

Q1	$0.28A	$0.60A	$0.66E
Q2	$0.37A	$0.28E	$0.23E
Q3	$0.48A	$0.24E	$0.26E
Q4	$0.34A	$0.46E	$0.52E

EPS: adjusted

Quarterly Revenue (M):

Q1	$201A	$256A	$773E
Q2	$219A	$352E	$342E
Q3	$244A	$342E	$360E
Q4	$226A	$541E	$579E
Year:	$890A	$1,491E	$2,053E

PORTFOLIO MANAGER BRIEF

We've increased our 2Q20 estimates materially (adjusted EPS from $0.23 to $0.28) based on favorable weather patterns for both the natural gas and water segments during the April-June time frame. Full year 2020 adjusted EPS guidance is currently $1.53 - $1.58; we see the potential for that range to tighten (to the upside) or be increased if favorable weather patterns continue. We maintain our BUY rating and $70 Fair Value on WTRG shares.

ANALYST NOTES

- Weather Should Positively Contribute to 2Q20 Results. April in the State of Pennsylvania was surprisingly cold, and we expect Essential's Peoples Gas segment results to benefit. We noted on the UGI Corp website UGI Corp weather that temperatures in April for its UGI Utilities segment (all in Pennsylvania) was 14% colder than normal in April and 23% colder in May.

  As Summer arrived, the weather changed quickly, and its been hot and dry through June and July. That should benefit Essential's water segment results, and we've raised our forecasts as a result. NOAA's 8-14 day outlook sees temperatures remaining above average across much of the United States, and a heatwave started this weekend in the Northeast.

- What Will WTRG Do With Full Year Guidance? Our previous 2Q20 adjusted EPS estimate was $0.23; now its $0.28. We were already at the high end of Company annual guidance before the change. 3Q20 weather is shaping up very nicely as well, with July hot and dry through the 19th, and the current NOAA forecast for that to continue through month-end. We've lowered our 4Q20 forecasts to remain within the Company's guidance range for the full year ($1.53 to $1.58), but we note that if we get a cold 4Q (like last year) WTRG is set-up to outperform its current guidance range.

- Summary/Valuation. Essential Utilities is off to good start in 2020. The closing of its Peoples Gas transaction, coupled with favorable weather patterns should allow it to deliver earnings at or above previous expectations. We still see plenty of upside to share prices; the 2.1% yield remains the highest in the water utility peer group, and with the U.S. 10YR T-Note yield 150bps lower, we continue to recommend accumulation at current levels. We reiterate our BUY rating and $70 Fair Value, based on a P/E of 42x our 2021 EPS estimate of $1.67 (which also equates to a 1.5% dividend yield in 2030 that assumes a 7.5% dividend CAGR).

Q4	$226A	$541E	$579E
Year:	$890A	$1,491E	$2,053E

PORTFOLIO MANAGER BRIEF

WTRG's 2Q20 results exceeded our and consensus expectations both on the top and bottom line. Favorable weather and higher consumption patterns among residential customers offset negative impacts from COVID-19 across C&I segments, and with 3Q weather patterns that have been hot and dry (excluding Monday's wild storm across much of the Company's service territory), the set-up is there for WTRG to meet (or exceed) the top end of its 2020 guidance range, which it reaffirmed. We reiterate our BUY rating and $70 Fair Value, based on a P/E of 42x our 2021 EPS estimate of $1.67. We continue to use estimated dividend growth over a 10-year period pegged to a 1.5% U.S. 10-year T-Note yield to derive our valuation and corresponding P/E multiple.

ANALYST NOTES

- Nothing but Good News in 2Q. On the top line, revenues of $384MM were well above our forecast of $352MM (consensus was $371MM) as favorable weather (for both the natural gas and water segments) and higher residential water consumption offset negative impacts across the commercial and industrial segments. On the bottom line, EPS of $0.29 was just a touch above our $0.28 estimate, but well above consensus of $0.23.
- Acquisitions and CAPEX Tracking to Plan. Acquisitions and organic growth in 1H20 increased the company's customer count by 1.2% (full year target is 2-3%, all in the water segment). Essential has signed purchase agreements that will add the equivalent of over 200,000 water & wastewater customers ($300MM of rate base). The bulk of that growth is tied to its planned DELCORA acquisition, which is expected to close in early 2021. In terms of investments, $293MM in 1H20 thus far, with a target of $550MM in the Water segment. For the natural gas operations, $400MM is planned for 2020 (including capital invested prior to ownership).
- Dividend Increased 7%. Essential Utilities began the week by announcing a 7% dividend increase on Monday, inline with our previous expectations. We watch dividend increases closely, given we set our Fair Value assumptions based on dividend CAGR's aligned with an anticipated US 10YR TNOTE yield of 1.5% in 2030.
- Guidance Maintained. For full year 2020, the guidance highlights are: adjusted EPS in the range of $1.53 to $1.58, earnings growth CAGR of 5-7% for the 2019-2022 time period, and CAPEX of $2.8B through 2022.

RESEARCH ANALYST CERTIFICATIONS AND IMPORTANT DISCLOSURES ARE ON PAGES 3 - 4 OF THIS REPORT

- Summary/Valuation. Essential's first full quarter owning Peoples Gas generated better-than-expected results, which will likely boost investor confidence that it can hit its financial targets and integrate big acquisitions without hiccups. That should lead to expanded valuation metrics and higher share prices. The set-up for WTRG to outperform in 3Q is in place; weather has been near-perfect since the start of the quarter July 1st (excluding Monday's torrential rains up and down the East Coast); NOAA's 8-14 day weather forecasts are calling for a continuation of the trend in the Mid-Atlantic region, where the Company has significant customer concentrations. We reiterate our BUY rating and $70 Fair Value, based on a P/E of 42x our 2021 EPS estimate of $1.67. We continue to use estimated dividend growth over a 10-year period pegged to a 1.5% U.S. 10-year T-Note yield to derive our valuation and corresponding P/E multiple. Our anticipated dividend CAGR over the period is 7.5%.

Aqua America (WTR US)
Not all news is good news

Key points

- Merger settlement is opposed by PAPUC's Staff.
- Peoples' gas settlement is only partial and doesn't seem to include a repair tax deduction.
- We remain on the sidelines, but boost TP to US$38.50 from US$36.50.

Event

- WTR (and AWK) have benefitted from nationalization concerns surrounding UK water utilities. Regulatory updates on WTR's pending merger with Peoples have been mixed, and so far the utilities haven't received even a tentative approval to use a repair tax deduction at Peoples. The latter seems essential for WTR to offer a positive earnings surprise for 2020 and beyond.

Impact

- **Non-unanimous merger settlement:** In early June, WTR agreed to a settlement in the Peoples merger with all but two interveners in the proceeding. The Staff of the PA PUC (I&E) disputes Peoples' treatment of a rural gas system of 1,600 connections (Goodwin/Tombaugh Gathering System), which for years has experienced gas leaks. WTR has agreed to spend US$120m in capex on the system and the spending would be recoverable through general rate cases. The I&E should present their position on the Goodwin/Tombaugh system on July 10, but for now we believe that the Staff wanted the system to be removed from Peoples' rate base and for the customers to be converted to propane, likely at Peoples' unrecoverable expense. WTR now expects an ALJ decision in late summer and the PAPUC decision by Oct/Nov.
- **Gas rate case settlement:** On Friday, Peoples reached a settlement in its pending gas rate case in PA. The settlement happened sooner than we had expected, though cancelled rate case hearings in late June suggested a settlement was imminent. We are waiting for the settlement to be made public, but for now it's our understanding that a main line replacement was excluded from the settlement and will continue to be litigated. Also, the rate case settlement doesn't seem to include any references to a future election of the repair tax deduction, which is essential to accelerate WTR's EPS growth following the Peoples deal.

Earnings and target price revision

- We updated our estimates to reflect the Peoples merger closing in late October. Our new '19/'20/'21 EPS estimates are US$1.30/1.51/1.65 vs US$1.47/1.54/1.62, respectively. We raised our TP to US$38.50 from US$36.50 to reflect a higher '21 anchor PEs for regulated water/gas utilities. Our new TP is based on 24.1x '21E water EPS plus 21.4x '21E gas EPS. Our previous TP was based on 22.8x '21E water EPS plus 21.0x '21E gas EPS.

Price catalyst

- 12-month price target: US$38.50 based on a PER methodology.
- Catalyst: Update on repair tax deduction for Peoples; 2019/2020 EPS guidance.

Action and recommendation

- We reiterate our Neutral rating.

Please refer to page 4 for important disclosures and analyst certification, or on our website www.macquarie.com/research/disclosures.

Macquarie Quant Alpha Model Views

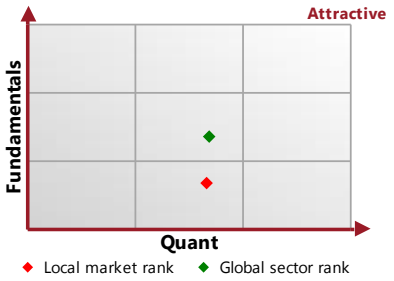
The Quant View page below has been derived from models that are developed and maintained by Sales and Trading personnel at Macquarie. The models are not a product of the Macquarie Research Department.

The quant model currently holds a marginally positive view on Aqua America. The strongest style exposure is Price Momentum, indicating this stock has had strong medium to long term returns which often persist into the future. The weakest style exposure is Valuations, indicating this stock is over-priced in the market relative to its peers.

197/448

Global rank in Utilities

% of BUY recommendations	67% (6/9)
Number of Price Target downgrades	0
Number of Price Target upgrades	2

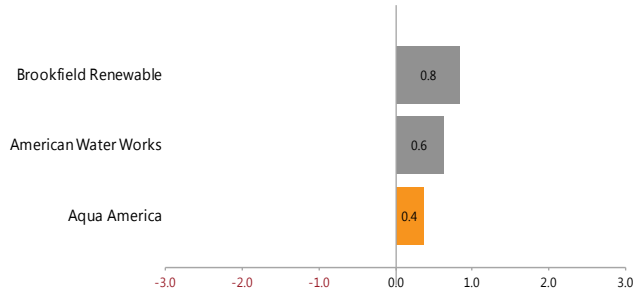


Displays where the company's ranked based on the fundamental consensus Price Target and Macquarie's Quantitative Alpha model.

Two rankings: Local market (United States) and Global sector (Utilities)

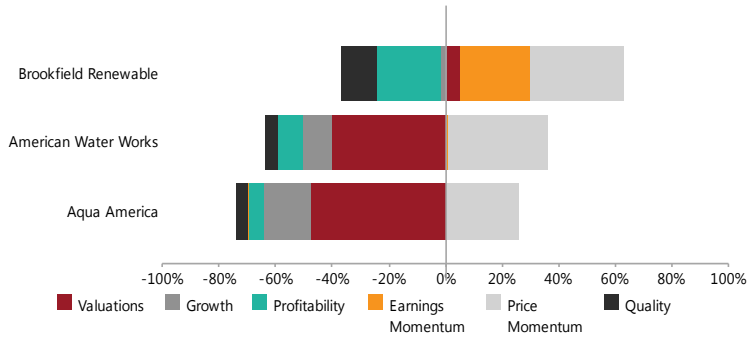
Macquarie Alpha Model ranking

A list of comparable companies and their Macquarie Alpha model score (higher is better).



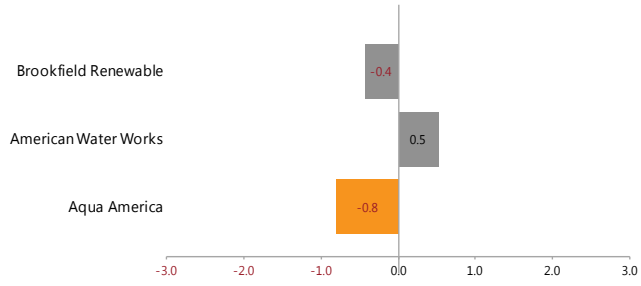
Factors driving the Alpha Model

For the comparable firms this chart shows the key underlying styles and their contribution to the current overall Alpha score.



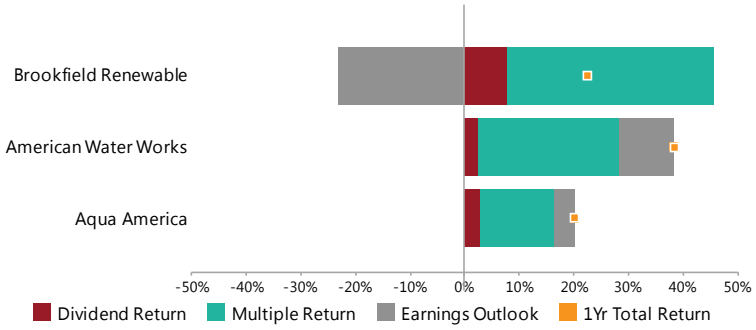
Macquarie Earnings Sentiment Indicator

The Macquarie Sentiment Indicator is an enhanced earnings revisions signal that favours analysts who have more timely and higher conviction revisions. Current score shown below.



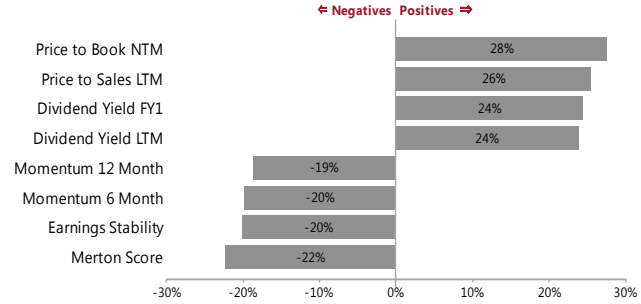
Drivers of Stock Return

Breakdown of 1 year total return (local currency) into returns from dividends, changes in forward earnings estimates and the resulting change in earnings multiple.



What drove this Company in the last 5 years

Which factor score has had the greatest correlation with the company's returns over the last 5 years.



How it looks on the Alpha model

A more granular view of the underlying style scores that drive the alpha (higher is better) and the percentile rank relative to the sector and market.

Recommendation definitions

Macquarie – Asia, USA, Europe and Mazi Macquarie (SA):
Outperform – expected return >10%
Neutral – expected return from -10% to +10%
Underperform – expected return <-10%

Macquarie - Australia/New Zealand
Outperform – expected return >10%
Neutral – expected return from 0% to 10%
Underperform – expected return <0%

Note: expected return is reflective of a Medium Volatility stock and should be assumed to adjust proportionately with volatility risk

Volatility index definition*

This is calculated from the volatility of historical price movements.

Very high–highest risk – Stock should be expected to move up or down 60–100% in a year – investors should be aware this stock is highly speculative.

High – stock should be expected to move up or down at least 40–60% in a year – investors should be aware this stock could be speculative.

Medium – stock should be expected to move up or down at least 30–40% in a year.

Low–medium – stock should be expected to move up or down at least 25–30% in a year.

Low – stock should be expected to move up or down at least 15–25% in a year.
* Applicable to select stocks in Asia/Australia/NZ

Recommendations – 12 months
Note: Quant recommendations may differ from Fundamental Analyst recommendations

Financial definitions

All "Adjusted" data items have had the following adjustments made:
Added back: goodwill amortisation, provision for catastrophe reserves, IFRS derivatives & hedging, IFRS impairments & IFRS interest expense
Excluded: non-recurring items, asset revals, property revals, appraisal value uplift, preference dividends & minority interests

EPS = adjusted net profit / efpowa*
ROA = adjusted ebit / average total assets
ROA Banks/Insurance = adjusted net profit /average total assets
ROE = adjusted net profit / average shareholders' funds
Gross cashflow = adjusted net profit + depreciation
*equivalent fully paid ordinary weighted average number of shares

All Reported numbers for Australian/NZ listed stocks are modelled under IFRS (International Financial Reporting Standards).

Recommendation proportions – For quarter ending 31 March 2019

	AU/NZ	Asia	RSA	USA	CA	EUR	
Outperform	48.45%	56.50%	47.06%	51.94%	68.53%	51.76%	(for global coverage by Macquarie, 3.69% of stocks followed are investment banking clients)
Neutral	35.27%	30.15%	32.94%	42.78%	24.48%	38.19%	(for global coverage by Macquarie, 2.76% of stocks followed are investment banking clients)
Underperform	16.28%	13.35%	20.00%	5.28%	6.99%	10.05%	(for global coverage by Macquarie, 0.89% of stocks followed are investment banking clients)

Aqua America (WTR US)
Pipe dream

Key points

- As a pure-play water utility, WTR would likely be trading 12% higher than currently.
- Peoples deal seemed based on repair tax deduction, but WTR is still studying it.
- Then again, repair tax deduction would just pull forward future earnings.

Event

- We've been watching WTR's pursuit of a gas utility from afar. For now, it seems like WTR's stock would likely be trading 12% higher than currently if the company had just remained a pure-play water utility. The repair tax deduction at Peoples Gas in PA could change the math, but that's likely months away.
- WTR's 2Q19 EPS of US$0.37 was in line with consensus, but excluded a US$0.02 dilution related to the higher share count associated with the Peoples deal. Inclusive of the dilution, WTR's results were in line with our US$0.35 expectation.

Impact

- **A trade-off between PE and EPS growth:** For the five years before the Peoples deal announcement, WTR traded on par with AWK on FY2 PE, though WTR grew EPS at a 4% CAGR over this period and AWK at almost 9%. If WTR had remained a pure-play water utility growing at 4-4.5% annually and the PE parity persisted, we estimate WTR would now be trading at ~US$47/share or almost 12% higher than yesterday's close. WTR currently trades at a 10% '20 PE discount to AWK on our US$1.54/sh '20 proforma EPS, though the deal is EPS neutral then.
- **Repair tax deduction at Peoples:** The diversification into the gas sector was widely expected to weigh on WTR's PE multiple, but in exchange was to align WTR's EPS growth with the 7% water rate base growth, which should happen by '21, we believe. The growth rate could be even higher depending on the repair tax deduction in PA for Peoples, but for now the US$265m (and counting) in deal fees hasn't created much shareholder value, we believe. Peoples Gas' rate case settlement in PA does not include a repair tax deduction, and WTR plans to pursue it only in '20 once it completes the assessment of how much of Peoples' capex would qualify for repair tax expensing. The repair tax was likely the core assumption underpinning the deal's EPS accretion.

Earnings and target price revision

- We raise our estimates to reflect a lower fully diluted share count assuming conversions of tangible equity units at higher stock prices. Our new '19/'20/'21 EPS estimates are US$1.30/1.54/1.68 vs US$1.30/1.51/1.65 previously. We raise our TP to US$41 from US$38.50. The TP remains based on 1.4x our '21 PE anchor for electric utilities for water and 1.2x for WTR's gas business.

Price catalyst

- 12-month price target: US$41.00 based on a PER methodology.
- Catalyst: Analyst day (Dec 5).

Action and recommendation

- We reiterate our Neutral rating.

Please refer to page 4 for important disclosures and analyst certification, or on our website www.macquarie.com/research/disclosures.

Macquarie Quant Alpha Model Views

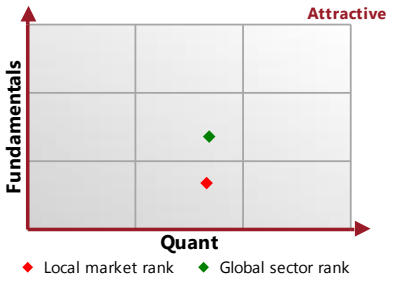
The Quant View page below has been derived from models that are developed and maintained by Sales and Trading personnel at Macquarie. The models are not a product of the Macquarie Research Department.

The quant model currently holds a marginally positive view on Aqua America. The strongest style exposure is Price Momentum, indicating this stock has had strong medium to long term returns which often persist into the future. The weakest style exposure is Valuations, indicating this stock is over-priced in the market relative to its peers.

197/448

Global rank in Utilities

% of BUY recommendations	67% (6/9)
Number of Price Target downgrades	0
Number of Price Target upgrades	2

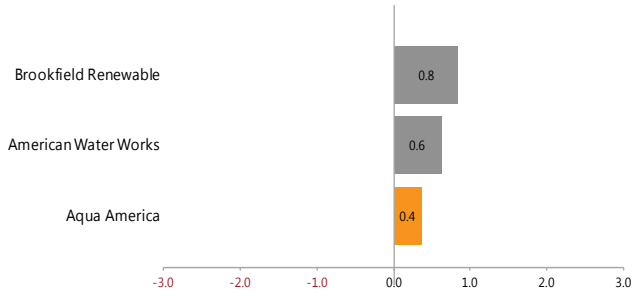


Displays where the company's ranked based on the fundamental consensus Price Target and Macquarie's Quantitative Alpha model.

Two rankings: Local market (United States) and Global sector (Utilities)

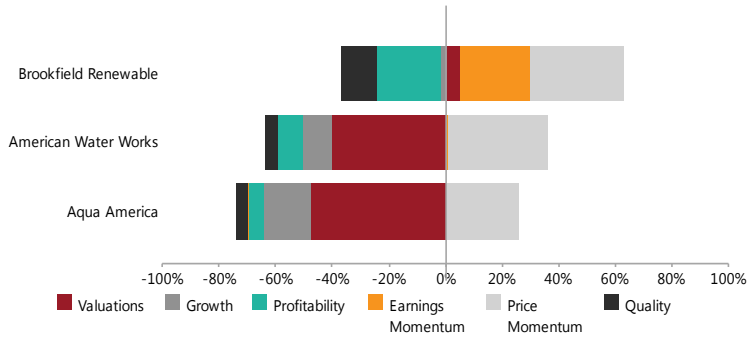
Macquarie Alpha Model ranking

A list of comparable companies and their Macquarie Alpha model score (higher is better).



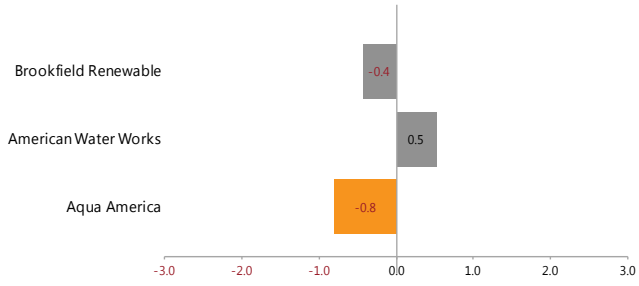
Factors driving the Alpha Model

For the comparable firms this chart shows the key underlying styles and their contribution to the current overall Alpha score.



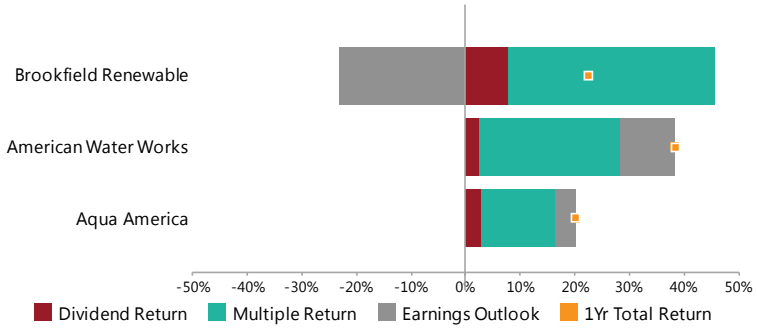
Macquarie Earnings Sentiment Indicator

The Macquarie Sentiment Indicator is an enhanced earnings revisions signal that favours analysts who have more timely and higher conviction revisions. Current score shown below.



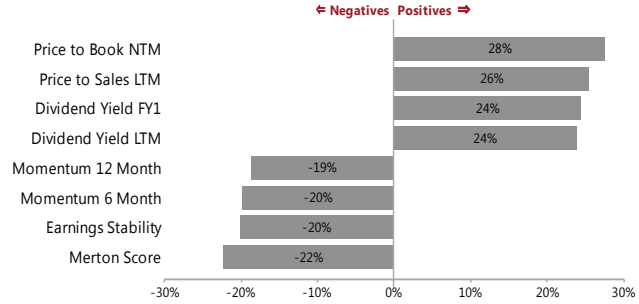
Drivers of Stock Return

Breakdown of 1 year total return (local currency) into returns from dividends, changes in forward earnings estimates and the resulting change in earnings multiple.



What drove this Company in the last 5 years

Which factor score has had the greatest correlation with the company's returns over the last 5 years.



How it looks on the Alpha model

A more granular view of the underlying style scores that drive the alpha (higher is better) and the percentile rank relative to the sector and market.

Recommendation definitions

Macquarie – Asia, USA, Europe and Mazi Macquarie (SA):
Outperform – expected return >10%
Neutral – expected return from -10% to +10%
Underperform – expected return <-10%

Macquarie - Australia/New Zealand
Outperform – expected return >10%
Neutral – expected return from 0% to 10%
Underperform – expected return <0%

Note: expected return is reflective of a Medium Volatility stock and should be assumed to adjust proportionately with volatility risk

Volatility index definition*

This is calculated from the volatility of historical price movements.

Very high–highest risk – Stock should be expected to move up or down 60–100% in a year – investors should be aware this stock is highly speculative.

High – stock should be expected to move up or down at least 40–60% in a year – investors should be aware this stock could be speculative.

Medium – stock should be expected to move up or down at least 30–40% in a year.

Low–medium – stock should be expected to move up or down at least 25–30% in a year.

Low – stock should be expected to move up or down at least 15–25% in a year.
* Applicable to select stocks in Asia/Australia/NZ

Recommendations – 12 months
Note: Quant recommendations may differ from Fundamental Analyst recommendations

Financial definitions

All "Adjusted" data items have had the following adjustments made:
Added back: goodwill amortisation, provision for catastrophe reserves, IFRS derivatives & hedging, IFRS impairments & IFRS interest expense
Excluded: non recurring items, asset revals, property revals, appraisal value uplift, preference dividends & minority interests

EPS = adjusted net profit / efpowa*
ROA = adjusted ebit / average total assets
ROA Banks/Insurance = adjusted net profit /average total assets
ROE = adjusted net profit / average shareholders funds
Gross cashflow = adjusted net profit + depreciation
*equivalent fully paid ordinary weighted average number of shares

All Reported numbers for Australian/NZ listed stocks are modelled under IFRS (International Financial Reporting Standards).

Recommendation proportions – For quarter ending 30 June 2019

	AU/NZ	Asia	RSA	USA	EUR	
Outperform	47.41%	58.03%	49.38%	52.16%	51.95%	(for global coverage by Macquarie, 3.22% of stocks followed are investment banking clients)
Neutral	36.30%	29.24%	32.10%	42.65%	40.69%	(for global coverage by Macquarie, 3.02% of stocks followed are investment banking clients)
Underperform	16.30%	12.74%	18.52%	5.19%	7.36%	(for global coverage by Macquarie, 0.96% of stocks followed are investment banking clients)

To: Marquis, Renee T
Subject: [EXTERNAL] Essential Utilities (WTRG): Initiates 2021 guidance in line with RBC and consensus, reaffirms 2020 guidance, introduces voluntary emissions reductions goals (RBC SPARC)

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

RBC Capital Markets — RBC Insight — Research

Essential Utilities (WTRG): Initiates 2021 guidance in line with RBC and consensus, reaffirms 2020 guidance, introduces voluntary emissions reductions goals

Sentiment Indicator : positive

Produced by Tucker, Shelby (RBC Capital Markets, LLC) on Monday, January 11, 2021, 09:18 AM ET

Disseminated on Monday, January 11, 2021, 09:22 AM ET

Our view: WTRG introduced 2021 EPS guidance of $1.64-$1.69, in line with our estimate of $1.68 and consensus of $1.67. Management also reaffirmed its guidance to the upper end of its 2020 EPS range of $1.53-$1.58. WTRG announced its voluntary goal of reducing 60% of its Scope 1 and Scope 2 emissions by 2035 off 2019 levels, which applies to all its operations across gas, water and wastewater. On the guidance call today, we look forward to management's comments on DELCORA, updates on the proceeding for the catch-up portion of repair tax at Peoples, the timing of drawing down equity from its forward sale and the acquisition pipeline.

Essential Utilities (WTRG, Outperform, $48.72) initiated 2021 EPS guidance of $1.64-$1.69 and reaffirmed its 2020 EPS guidance to the upper end of the $1.53-$1.58 range. We are at $1.57.

DELCORA updates. Following the judge's ruling in December that upheld the validity of DELCORA's asset purchase agreement, WTRG expects a PA PUC Administrative Law Judge recommended decision in January and the DELCORA acquisition to close in the 2Q21.

Slight upward adjustments to capex and rate base. Estimated 2021 capex is $1 billion, compared to the 2020 capex spend of $950 million. The 2021-2023 capex plan stands at $3 billion, an increase from the 2020-2022 plan of $2.8 billion. This results in higher gas rate base estimates in 2021 and 2022 by $100 million and a higher 2022 water rate base estimate by $100 million. 2023 combined water and gas rate base is now estimated at $9.8 billion. Water rate base is still expected to grow at a 6-7% CAGR, excluding acquisitions, and gas is expected to grow at a 8-10% CAGR.

Conference call today at 11:00am ET. Dial in at (800)-367-2403, passcode 1177890.

Essential Utilities Inc

Water and Gas Do Mix After All; Initiating at Outperform

Our view: We fundamentally see Essential Utilities as trading at a discount to its 70% water/30% gas mix. While it has lost some of its ESG/water valuation veneer when it acquired Peoples Gas, we believe the "punishment does not fit the crime". Peoples is a fast-growing gas utility; the water segment should grow through active consolidation. Our sum-of-the-parts suggests $49 of value, which justifies our Outperform rating.

Key points:

- **Essential Utilities is still primarily a water utility.** Essential Utilities (WTRG, formerly known as Aqua America) owns the second largest water utility in the country behind American Water Works. As such, it partakes in many of the broad themes that dominate the water sector: tremendous infrastructure upgrade needs, consolidation including municipal roll-ups, and, for the most part, supportive regulation. Seven out of the eight states in which WTRG's water segment, Aqua, operate have Fair Market Value legislation. Given this, we expect the company to continue to be active in water acquisitions, as exemplified by its $276.5 million pending acquisition of DELCORA, a wastewater municipal provider in Pennsylvania. Our model assumes ~$100 million of annual water acquisitions.
- **Peoples Gas is the right vehicle.** After a lot of fits and starts, WTRG finally closed mid-March its acquisition of Peoples Gas (PNG), a gas utility (LDC) with operations in Pennsylvania, West Virginia, and Kentucky. While investors can debate the wisdom for a water utility to buy a gas utility, we would be hard pressed to find a gas LDC that offers as many opportunities as Peoples does for WTRG. Both are anchored in PA, thus sharing common regulatory relationships, but PNG is in Western PA while Essential's Aqua America covers Eastern PA. This may open opportunities for WTRG to connect with water systems in the west that might have been hard to achieve otherwise. Furthermore, opportunities may exist in WV and KY for water consolidation, although Aqua is not in those states. Furthermore, Peoples Gas has multi-decade backlog of pipeline replacement that should assume strong growth for years to come.
- **Mix of business suggests $49 price target.** We believe that the best way to value the company is by assigning parent costs proportionally to Aqua and to Peoples then assign respective P/E multiples. Our base low-growth (secular) forward P/E multiples for water and gas are 24.9x and 19.3x, respectively. Given that both utilities are growing better than 4% and 3.5%, respectively, we assign a 25% premium for Aqua and 30% for People, to arrive at a blended 29.1x P/E multiple.

Outperform

NYSE: WTRG; USD 42.62

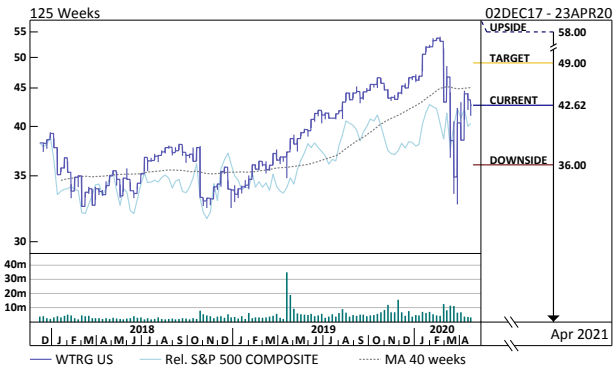
Target/Upside/Downside Scenarios

Exhibit 1: Essential Utilities, Inc.



Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

Price target/base case

We derive our $49 price target by taking our 2021 EPS of $1.67 and using a sum of parts to account for the water and gas operating segments. We apply a 25% premium to our base multiple of 24.9x P/E for water utilities and a 30% premium to our base multiple of 19.3x P/E for gas utilities, given both utilities' greater-than-average growth rates.

Upside scenario

Our upside value of $58 assumes that WTRG executes on greater-than-expected M&A and sees even stronger-than-projected base growth at Peoples. To our 2021E EPS of $1.67 we apply 50% premium to our base multiple of 24.9x P/E for water utilities and a 50% premium to our base multiple of 19.3x P/E for gas utilities.

Downside scenario

Our downside value of $36 assumes the company does not execute on as much M&A as we forecast and that its credit metrics weaken over time, causing the company to issue equity and potentially dilute its share price. To our 2021E EPS of $1.67 we apply -10% discount to our base multiple of 24.9x P/E for water utilities and use our base multiple of 19.3x P/E for gas utilities.

Investment summary

WTRG's acquisition of Peoples and expansion into the natural gas industry creates a strong platform for future growth. We expect to see a significant amount of organic growth at Peoples as well as growth through acquisitions at the water segments. We believe WTRG's water and gas presence in ten states sets it up nicely to expand its footprint. The growing presence of Fair Market Value legislation that allows IOUs to purchase municipal systems at fair value without incurring meaningful goodwill provides a strong backdrop that should encourage transactions. We are initiating coverage with a $49 price target and an Outperform rating.

Potential catalysts:

- Increased adoption of Fair Market Value legislation opens up greater opportunities for WTRG to transact.
- Greater geographic footprint proves advantageous from an M&A standpoint, increasing the amount of acquisitions.

Risks to call:

- Lower-than-anticipated adaptation of fair market value principles across the country could dampen expectations.
- M&A transactions could require greater equity than we forecast, or could result in a weaker balance sheet than we expect.
- Less favorable regulations or disruptions within public utility commissions could weigh on growth.
- Climate variability may cause increased volatility in weather and may impact water usage and related revenue, which may not be recoverable through rates.
- Continued lockdown from coronavirus could impact revenues, through higher bad debt expenses.
- ESG investing continues to gain traction, but WTRG does not meet certain ESG criteria due to Peoples, which makes it harder to benefit from these increased flows.

Shelby Tucker, CFA (212) 428-6462; shelby.tucker@rbccm.com

Key Questions

		Our view
1.	**Is it worth getting into the stock when it is trading at 27.0x NTM P/E?**	The answer depends on how much premium is attributed to ESG for a water-gas multi-utility. In our sum-of-the-parts analysis, we expect water/gas to contribute 70%/30% to 2021E EPS of $1.67. For water valuation, we look to the industry leader American Water Works (NYSE: AWK), which we have assumed a 35% premium above the water base P/E of 24.9x. While Aqua doesn't have the size of AWK, we believe rate base is supported by substantial capex opportunities. Nonetheless, the introduction of natural gas removes some of the ESG appeal. We apply a 25% premium to our water base P/E of 24.9x, resulting in a P/E multiple of 31.1x. Gas valuation is more straightforward. We apply a 30% premium to our gas base P/E of 19.3x, resulting in a P/E multiple of 25.1x, which we consider appropriate due to above-average rate base growth. The sum of the parts results in a blended P/E of 29.4x and total potential return of 17.0% inclusive of a 2.2% dividend yield. Our valuation suggests an attractive entry point.
2.	**What does water-gas combo mean to Essential?**	While the addition of PNG doesn't alter the regulated utility model and should be earnings accretive, it challenges the way we think about valuation as noted above. On a standalone basis, it seems clear to us that PNG now deserves a premium to valuation from its higher-than-average rate base growth (the company expects to see an 8-10% CAGR between 2019 and 2022, vs. peer utility average of 6-7%) following a period of underinvestment. On a consolidated basis, while Aqua remains a solid business, we could contemplate a discount to the lofty valuation that a pure-play water utility typically enjoys, with the involvement of natural gas and a less stellar balance sheet. In some way, the lack of an appropriate comp for a water and gas combo suggest that we are in uncharted territory.
3.	**How do balance sheet metrics fare post-PNG merger?**	Balance sheet looks less padded. We expect Essential to focus on deleveraging over the next few years. We see FFO-to-debt stabilizing in low-teens and debt-to-capital in the mid-fifties by 2023. Compared to water peers, these metrics seem may be on the lower end. However, thresholds for water utilities tend to be lower, with FFO-to-debt threshold at the 9-10% range. Currently, bonds at Essential and PNG are rated A/Baa2 and A/Baa1.
4.	**Will Fair Market Value legislation continue to expand?**	The rise of fair market value is becoming the preferred alternative to the traditional depreciated original cost method, providing mutually beneficial outcomes to both the buyer and seller of municipal systems. Sellers are able to capture the true value of their assets while buyers are allowed to add the total purchase price to rate base, without padding goodwill, dubbing the premium an "acquisition adjustment".
5.	**What are the unique characteristics of the water utility sector vs its electric and gas peers?**	The industry is 2x more capital intensive than the electric sector and 3x more than the gas sector. Despite this, water utilities generally spend the least amount of O&M dollars to maintain their assets. Over the past 20 years, water utility O&M expenses as a percent of PP&E averaged 20% compared to gas utilities of 40% and electric utilities of 60%. Further, the net PP&E to revenues ratio for investor-owned water utilities is about 5.0x, compared to electric utilities of 3.4x and natural gas utilities of 2.3x. In our view, this showcases the importance of infrastructure spending as a key characteristic of the industry's cost structure, making it difficult to reduce capital costs.

Investment Summary

Essential Utilities Inc. (f.k.a. Aqua America, Inc.) is the second largest water and wastewater utility in the U.S., with a market capitalization of $10.6 billion. Before its entry into natural gas, Essential generated virtually all of its revenues through its regulated water utility segment (99.6% of sales) as of 2019, serving an estimated three million customers located primarily in states along the Rust Belt and Texas. On February 3, 2020, the company changed its corporate name to Essential Utilities Inc. following the acquisition of Peoples Natural Gas (PNG), and transformed into gas-water multi-utility with an expanded footprint. We expect water to remain the main contributor to earnings (70%) in 2020, though there are compelling growth opportunities across both segments. To a smaller extent, Essential also operates certain non-utility activities through Aqua Resources and Aqua Infrastructure.

Initiating coverage with $49 price target and Outperform rating. We view Essential as a solid water and gas multi-utility with substantial rate base investment opportunities in both segments. Post-merger with Peoples Natural Gas, Essential extends its operating territory to 10 states including the rust belt and Texas, with a combined rate base of $7.3 billion. The company remains deeply rooted in Pennsylvania, where 66% of combined customers are located. With the addition of PNG, Essential doubles its annual capex to ~$1 billion for 2020. From 2019 through 2022, the company expects to see to its water rate base grow at a 6-7% CAGR and its gas rate base to grow at an 8-10% CAGR. On a consolidated basis, we expect EPS to grow at a 6-7% CAGR during this time frame, an increase from a 4% CAGR between 2015 and 2019 as a pure-play water utility.

We view the regulatory environment in which Essential operates as constructive. More than half of Essential's annual capex is eligible for automatic recovery through surcharges. Further, at the water utilities, seven out of eight states have adopted the so-called Fair Market Value legislation (FMV). Under FMV, goodwill is added to rate base instead of being hung up on the balance sheet. This in turn encourages industry consolidations. Of course, not all deals are created equally. On average, we estimate $0.01 EPS accretion for every $50 million acquisition spend. Including DELCORA's $300 million acquisition (expected close early 2021), Essential has identified opportunities of various sizes that could add up to 320,000 customers, or ~10% of existing total. We also point to the eligibility of tax repair treatment which makes the PNG transaction particularly earnings accretive. Upon election with the IRS, the treatment allows previously capitalized repair costs to be expensed, resulting in higher deductions and lower tax expense without jeopardizing customer bills. An additional look-back deduction would also eligible, but requires some form of approval from the Pennsylvania PUC. We think the ability to stay away from rate cases, as in the case of Aqua Pennsylvania is especially valuable.

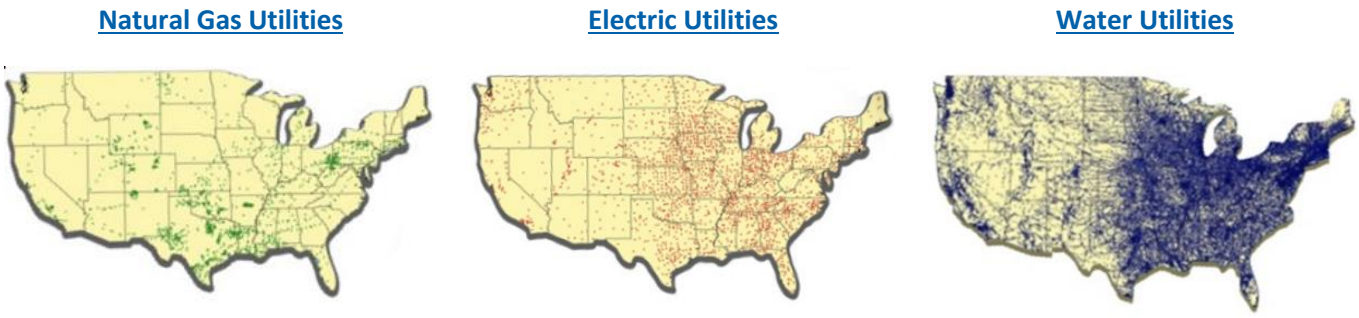
In our view, water and gas is a winning combo. Water remains Essential's core business and enjoys the benefits of an ESG play. Gas, via PNG, provides fast, complementary growth which differentiates Essential from water peers. While 2020 could be an "off-year" with a partial contribution from PNG and management focused on deleveraging, we see Essential getting back on track in 2021. The market has penalized the stock for introducing natural gas in the picture. We believe the "punishment does not fit the crime" and are bullish on the stock. We also recognize that the ESG investing movement has hit a temporary pause. As markets find some degree of normalcy – not necessarily recovery – we expect the movement to regain steam. We see Essential as one of the main beneficiaries of that trend despite its gas business.

Investment Highlights

Municipal acquisitions drive accretion

Fragmented industry ripe for municipal acquisitions. The U.S. water and wastewater industry is heavily commoditized. The fragmented nature of the water industry is highlighted by the roughly 50,000 water systems in the U.S. and about 15,000 community wastewater systems compared to 1,400 gas systems and 3,800 electric systems. Roughly 84% and 98% of the U.S. population is served by municipal water systems and wastewater systems, respectively, according the Environmental Protection Agency (EPA). This underscores the thirst for industry consolidation, in our view. Notably, investor-owned utilities only serve about 16% of the total population.

Exhibit 2: U.S. water among the most fragmented utility sectors



Source: Enviornmental Protection Agency and Energy Information Administration

Fair Market Value legislation has encouraged deal-making. Municipal acquisitions have become a popular theme over the last several years driven by a more favorable regulatory backdrop. The rise of FMV assessment of water and wastewater systems is becoming the preferred alternative to the traditional depreciated original cost method, providing mutually beneficial outcomes to both the buyer and seller of municipal systems. Sellers are able to capture the true value of their assets while buyers are allowed to add the total purchase price to rate base, without padding goodwill, dubbing the premium an “acquisition adjustment”. Currently, 12 states have implemented the measure. We estimate every $50 million (in line with historical average) that Essential deploys towards municipal acquisitions adds a run rate $0.01 to EPS. Kentucky is the only state under Essential’s operating jurisdiction that has not enacted FMV legislation.

Infrastructure surcharges permit rate adjustments outside of rate cases

Regulatory mechanisms that permit investor-owned utilities to adjust rates outside of general rate cases are referred to as infrastructure surcharges. These surcharges generally permit recovery of capital investments multiple times a year, and creates significant flexibility between rate cases. While the main benefit is to reduce regulatory lag, surcharges also allows utilities to stay away from a full rate case which subjects their rate base ROE and equity ratio to review by state commissions. In some way, utilities are able to preserve outperformance by avoiding rate cases. Surcharges come in many forms and are specific to states. For Essential, the main surcharges are the Distribution System Improvement Charge (DSIC), the Water and Sewer System Improvement Charge (WSSIC), and the Qualifying Infrastructure Plant Surcharge (QIPS). Post-PNG transaction, the Pipeline Replacement Program (PRP) also became available. The chart below illustrates the various mechanisms by state and their respective allowed surcharge.

Exhibit 3: Various surcharges employed by Essential, by state

AQUA

State	PA	IN	OH	NJ	IL	NC
Mechanism	DSIC	DSIC	SIC	DSIC	QIPS	WSSIC
Allowed Surcharge	7.5% W 5% WW	10%	12.75% W 9% WW	5%	2.5% average annual increase	5%

PEOPLES

State	PA	KY
Mechanism	DSIC	PRP
Allowed Surcharge	5%	No cap

Source: Company Presentation

Management estimates 52% of total capex between 2020 and 2022 are surcharge-eligible, while the remaining 4% must go through standard rate making. By segment, 46%/58.7% are surcharge-eligible for water/gas. We view these statistics a key component of Essential's robust capital program and long-term EPS growth.

Outsized rate base expansion; PNG as a new platform for growth

The Peoples acquisition creates a strong growth opportunity. Under its previous ownership, Peoples was severely underinvested in and now requires significant upgrades to its infrastructure. The system requires nearly 3,000 miles of gas pipeline replacement. With its accelerated pipe replacement program, the company expects rate base to grow organically at an 8-10% CAGR over the next three years. The election of repair tax at Peoples further increases earnings potential, which we discuss in more detail further down.

The acquisition of PNG represents new but complementary territory to the core water business. Peoples serves territories in Pennsylvania, Kentucky, and West Virginia. Aqua Pennsylvania's footprint is in the eastern side of PA while Peoples, headquartered in Pittsburgh, serves territories on the western side of PA. We believe the company's entrance into the gas industry will help grow its water business as well. Essential will likely be able to take advantage of its increased presence in the Pittsburgh area and entry into new states, and will find a way to aggregate more water assets.

Financial Outlook

Earnings outlook

The company forecasts rate base at its water utilities to grow at a 6-7% CAGR from 2019 through 2022 excluding rate base growth from acquisitions. Its capex is driven by investment in pipeline replacement, water treatment, and metering and IT development. Peoples Gas rate base is expected to grow at an 8-10% CAGR 2019 through 2022, as its aging distribution infrastructure requires significant pipeline replacement. Our 2020 through 2023 earnings per share estimates are $1.21, $1.67, $1.78, and $1.89. Our estimate of $1.21 reflects a partial year of earnings from Peoples as well as the effects of share dilution from 2019 financing. The $0.46 cent EPS increase in 2021 reflects a full year of earnings from Peoples, compared to three quarters in 2020. We expect earnings to increase at a +6.5% CAGR through 2023 based off 2019 adjusted EPS of $1.47. Breaking down the estimates by segment, water contributes ~64% of earnings and gas contributes ~36%. Our estimates reflect investment and continued acquisitions at its water utility and growth through investment at its gas segment. Our +6.5% EPS outlook compares to Essential's historical 4.0% EPS CAGR (2015-2019).

Dividend growth outlook

Essential has increased its common stock dividend at a 7.2% CAGR over the past four years. Our 2020 through 2023 dividend per share estimates are $0.97, $1.038, $1.110, and $1.188 and imply a DPS CAGR of 7%. The historical and forecasted payout remains in the 60%-65% range, excluding the 2020 estimate which is significantly higher due to a partial year of earnings from Peoples Gas.

Exhibit 4: Historical and projected dividend including forecasted EPS

	2018	2019	2020E	2021E	2022E	2023E
Dividend Per Share	$0.847	$0.907	$0.970	$1.038	$1.110	$1.188

Source: Company data, RBC Capital Markets estimates

Sources of funds

We expect Essential to fund its capital expenditures through mostly new debt issuances and retained earnings. Regarding water M&A transactions, we expect the company to finance these transactions through a mixture of debt and equity. In 2020 we model ~$330 million equity in the second half of the year to finance its acquisitions including DELCORA, which is expected to be completed in late 2020 or early 2021. In the following years, we model a base of $50 million of equity, in some years issuing larger block amounts of equity to ensure its credit grade ratings. Historically, capex has been the largest use of cash followed by the dividend payout. Water acquisitions only accounted for ~7% of total capital deployment, but we expect this allocation to increase in future years. We do not model out any M&A transactions at Peoples, as we believe management is being careful about maintaining an earnings mix that is more heavily weighted from water operations.

Credit metrics

Essential is rated A by S&P and Baa2 by Moody's. At the subsidiary level, Aqua is rated A+ and Peoples is rated A. Prior to the acquisition, the company's debt to cap ratio was maintained between 50% and 55%. In future years, we expect this ratio to trend higher and sit around the mid-fifties. Following 2020, we expect FFO-to-debt to be in the low teens, sitting around 13.4% in 2021. We see this move down to ~12% in the following years, which could point to a need to issue a larger amount of equity in 2023. This compares to its four-year historical average of around 20%.

While these metrics seem weak from a gas and electric utility perspective, water utilities may maintain their investment grade rating while having significantly higher debt to cap ratios and lower FFO-to-debt. A water utility may maintain an investment grade rating with a debt to cap as much as 60% and a FFO-to-debt as low as 9%. We expect Essential to remain comfortably far away from hitting these thresholds, and will continue to issue equity to maintain its solid credit metrics as it pursues additional acquisitions.

Exhibit 6: WTRG credit metrics

	2018	2019	2020E	2021E	2022E	2023E

Repair tax is back on the table

Repair tax drove outsized EPS growth between 2013 and 2016 mostly for Aqua Pennsylvania. Essential now plans on electing repair tax for PNG in Pennsylvania. The mechanism has the benefits of keeping customer rates stable while increasing investments (and returns) without having the need to file for a lengthy rate case. For this reason, Essential has been able to stay out of a rate case on the water side since 2012, coupled with the implementation of

distribution surcharge mechanisms, which we had touched on in this report. In a nutshell, the repair tax allows certain maintenance costs previously capitalized to be expensed, effectively increasing deductions on a *tax basis* and improving cash flows. The Pennsylvania PUC then allows flow through tax accounting treatment that lets tax savings flow through to the income statement resulting in a lower effective tax rate and elevated earnings. Essential collects from customers at the statutory tax rate per the existing revenue requirement, but is expected to pay less to the tax authority. The impact is akin to a tax deferral as the benefit is the Thought in a different way, Essential collects the cost of taxes as new investments will bear the cost of higher taxes via the rate.

The amount of deduction is divided into two parts, ongoing deductions and a catch-up deduction for those costs that incurred in the past. Ongoing deductions are straightforward with Essential filing the election with the IRS. Management currently expects 8 to 12 cents of earnings accretion on a run-rate basis. The terms of the catch-up deduction would require approvals from the Pennsylvania state commission. As a reference point, the previous case with Aqua Pennsylvania allowed the deduction to be amortized over 10 years.

Balance Sheet and Expected Capital Deployment

Strong credit metrics to begin with. PNG brings metrics back to industry average. Essential's debt is rated A by S&P and Baa2 by Moody's, which is in line with the water industry. However, credit metrics look superior relative to peers excluding PNG, with debt-to-cap tracking low 50s and FFO-to-debt between high teens and low 20s in the past five years. To put these figures into perspective, AWK, a close peer to Essential before the PNG transaction, features a debt-to-capital ratio just below 60% and FFO-to-debt of mid to high teens during the same period.

Post-PNG transaction, we believe Essential's credit metrics could track closer to levels at AWK. We expect FFO-to-debt to stabilize in lower mid-teens and debt-to-capital at mid-50s, in line with company guidance of 12-14% and 50-55%, respectively. We believe towards 2023 the metrics will track farther away from the company's comfort levels, which may incentivize an equity issuance around that time. It is important to note that while credit agencies have typically considered 11-12% FFO-to-debt as the threshold for investment grade (BBB/Baa2) ratings for gas utilities, their threshold for water utilities is typically even lower in the 9-10% range. Due to the regulated nature of utilities, companies are able to flex their balance sheet to levels that would generally perceived as alarming in other industries. We also give consideration to the fact that PNG's debt (A/Baa1) is rated similarly to Essential (A/Baa2) and do not anticipate any material deterioration after the acquisition. The following summary shows credit ratings among Essential, Aqua America and PNG.

Exhibit 7: Current credit ratings for Essential, Aqua American and PNG

	S&P Global Ratings		Moody's	
	Issuer	Issuance	Issuer	Issuance
Essential	A	A-	Baa2	Baa2
AQUA (PA Subsidiary)	A	A+	--	--
PEOPLES	A	A	Baa1	Baa1

Source: Company Presentation

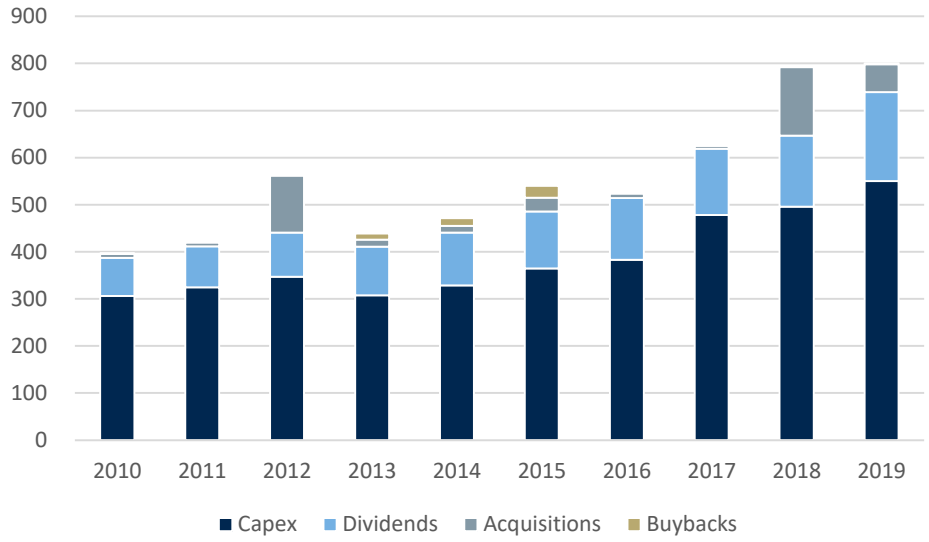
Capital deployment

Tapering expectations on dividends. Essential announced an annualized $0.94/share dividend payment in 2019. Between 2014 and 2019, dividends had achieved 7.3% CAGR along with healthy growth in earnings per share. In our outlook, we estimate dividend to grow in the 6-7% range in near term coupled with acquisitions that are in the $100 million range. Eventually, growth should taper off and fall in line with EPS growth, which we anticipate to be in the 6.0-6.5% range. We believe this enables Essential to manage a payout in the low 60s, in line with company guidance of 60-65% dividend payout. While the range is still a step up from water utility peers, which typically have payout ratios 50-60%, and is more in line with gas utility peers, we believe our estimate represents stabilizing ground after the PNG transaction.

Minimal share buybacks. Since 2010, buybacks averaged ~1% of total capital deployment. An abundance of capital projects in the water industry have stymied the need for buybacks to return capital to shareholders. Given our view of further consolidation in the industry and massive infrastructure upgrade opportunities in water pipes, we don't see buyback activity in the cards anytime soon.

Acquisitions remains a relatively small component; focus turns to organic growth following PNG transaction. Acquisitions have generally not been a large piece of capital deployment. Since 2010, acquisitions totaled 7.5% of overall capital deployment. We believe M&A could be somewhat limited now given the need to deleverage and preserve the strength of the balance sheet as Essential embarks into the gas distribution business. Management sees roughly $100 million of acquisitions per year but could inch higher if a larger deal were to close. The water industry is ripe for consolidation, in our view. We like the roll-up of municipal deals despite accretion being relatively modest. Assuming $100 million of deals, a blended 50% equity ratio and 10% ROE yields 3 cents of accretion on an increasing base, or +2% on current 2020E consensus.

Exhibit 8: Capital deployment, 2010-2019

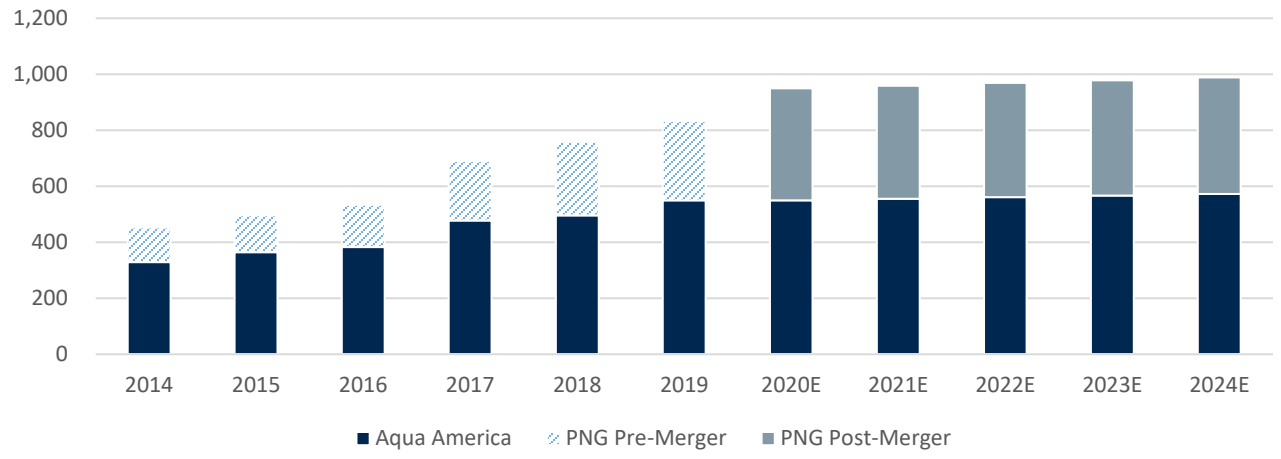


Source: Company 10K

Capital expenditures ramp up in 2020, post-PNG transaction. Core business has a healthy runway, expected to invest $1 billion infrastructure annually with a solid, organic rate base growth of 6-7% for water and 8-10% for gas. Further, more than half (52%) is recoverable through surcharges and the rest through rate cases. We view opportunities for infrastructure upgrade for both gas and water favorably. To put this into perspective, PNG plans to renew about 189 miles of pipeline per year under the long-term infrastructure investment program (LTIIP). Based on current capex expectations for 2020 of $400 million, this implies $2 million per mile of pipe. Management has indicated that there are nearly 3,000 miles of gas main suitable for replacement in Pennsylvania alone. In water and wastewater, the EPA estimates $471 billion and $271 billion worth of infrastructure investments needed as of today, respectively. We acknowledge that all pipes are not created equal and warrant different levels of investment based on deterioration. The opportunities are strongly outlined, however. We remain positive on the regulatory environment for both water and gas.

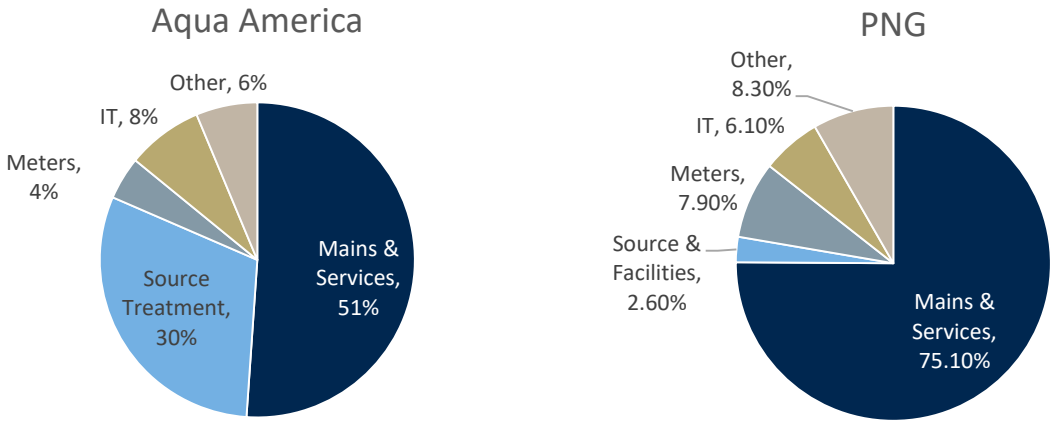
A counterweight to our capex expectations is the temptation to overgrow the gas utility. While gas investments typically generates a better return (8-10% ROE range, vs. 5-6% for water), we believe management could limit the growth in gas giving consideration to valuation of the overall utility. Earnings accretion from gas investments could erode the premium valuation that Essential enjoys from Aqua America. This is especially relevant to some investors who are concerned with ESG considerations. For 2020, we expect the gas/water capex mix to be 42%/58%. Going forward, we believe the ratio could remain static over even tilt towards water.

Exhibit 9: 2020 capex ramps up to $1 billion, slated to invest $2.8 billion, 2020E-2022E



Source: Company Presentation, RBC Capital Markets estimates

Exhibit 10: Infrastructure investments, 2020E-2022E



Source: Company Presentation

Financing

The company plans to finance its acquisitions with a mixture of debt and equity. The company has indicated that an equity issuance of ~$300 million will likely come in late 2020 as the company finances the DELCORA and other acquisitions. In 2020 and 2021 we will see the dilutive effects issuances used to fund the PNG and DELCORA transactions. Looking forward, we model $100 million in acquisitions every year, $50 million of which would be funded through equity.

Upcoming notable acquisitions

DELCORA acquisition should provide upside. In September 2019, Essential (then Aqua America) announced the acquisition of DELCORA wastewater assets for $276.5 million. The acquisition represents the largest municipal acquisition in the company's history. DELCORA is a wastewater authority that treats water for smaller municipal systems that have their own

distribution systems. DELCORA has around 15,000 customers, but the end-use customers of those municipalities total around 200,000. This generates a significant amount of follow-on opportunities to acquire the distribution wastewater systems that DELCORA serves. As with other municipal acquisitions, the company expects to see an earnings lag. Rates at municipal water and wastewater systems are significantly lower than those of investor-owned utilities. Municipalities may not be earning a return, paying taxes, or have other financial commitments, which lowers costs to the end-use customers. The company expects DELCORA to go into the Pennsylvania rate case that will most likely be filed in 2021. With new rates effective thereafter, the company expects full earnings from DELCORA in 2022.

Regulatory jurisdiction

Most of Essential's water, wastewater and now gas utility operations are subject to regulation from state commissions. As these commissions regulate billing rates and terms of services, and approval of rate cases and surcharges, they exert power over the profitability of Essential. Individual policies vary across commissions, and depend on the policies of the state. Essential has historically maintained constructive relationships with them, especially in the home ground Pennsylvania. The following is list of utility commissions within Essential's operating jurisdictions.

Exhibit 11: State utility commissions

State	Utility Commission
Pennsylvania	Pennsylvania Public Utility Commission
Ohio	Public Utilities Commission of Ohio
Texas	Public Utility Commission of Texas
Illinois	Illinois Commerce Commission
North Carolina	North Carolina Utilities Commission
New Jersey	New Jersey Board of Public Utilities
Inidiana	Indiana Utility Regulatory Commission
Virginia	Virginia State Corporation Commission
West Virginia	Public Service Commission of West Virginia
Kentucky	Kentucky Public Service Commisssion

Risks to Rating and Price Target

Less favorable regulatory backdrop. Lower-than-anticipated adaptation of FMV principles across the country could dampen expectations and weigh on growth in the long run. Changes in or less favorable regulations or disruptions within public utility commissions could also weigh on growth.

Integration of PNG takes longer than expected. In that case, we could see higher O&M expenses in 2020 and possibly spilling into 2021. This could hinder Essential's progress to deleverage the company, on a FFO-to-debt basis. However, we view Essential to have a strong leadership with a highly experienced management team which has managed consolidations frequently in the past and believe the integration should proceed as planned.

Poor leverage metrics leads to credit downgrade. As we had noted earlier in the report, we see leverage metrics deteriorating dramatically in 2020. Despite stabilizing in 2021, these metrics cut close to rating thresholds for water utilities. Plus, we are aware of credit rating agencies' sector-wide downgrade, putting even more pressure on companies like Essential. Debt at Essential and PNG are one to two notches away above non-IG rating. Should leverage metrics deteriorate more than expected, we see a credit downgrade weighing down the stock.

Natural gas segment decreases appeal from an ESG perspective. We believe Essential's attractiveness from an ESG standpoint has lessened now that it has entered the natural gas sector. As ESG investing becomes more main stream, we expect to see greater flows into the water sector from specialized funds and awareness of ESG metrics. Water utilities, which have historically traded at a premium to electric and gas utilities, will likely see even higher premiums due to increased investor appetite. We believe that scarcity will partially mitigate the negative impact of its gas segment. There are under ten pure-play water utilities, and Essential had the second-largest water footprint when its operations were only in the water sector. We believe Essential still maintains ESG appeal, but will not benefit as much from the ESG interest as its pure-play water counterparts.

Decrease in water supply and material changes in water usage patterns. Climate variability may cause increased volatility in weather and may impact water usage and related revenue, which may not be recoverable through rates. Increased frequency of rainfall during the warmer months could also weigh on water usage and lead to lower revenues.

Decarbonisation hinders growth opportunities at the gas utility. The transition to electrification may be a risk to growth at Peoples as cities and states take stronger stances on GHG targets and continue to promote decarbonisation and electrification. Legislation and initiatives have encouraged the use of electric appliances and heating systems over traditional gas-based systems. One city in California even banned new gas connections in commercial and residential buildings. The gas distribution system is primarily decoupled, which separates volumes from earnings. This protects Peoples here from a volumes per customer standpoint, but the risk of decarbonisation comes from less connection growth. This discouragement of gas consumption could prevent the company from adding connections and potentially cause it to lose revenues if a customer were to switch entirely to an electric system. The company benefits from a customer count perspective since it charges fixed infrastructure costs, regardless of how much the ratepayer consumes. We believe states in which Peoples operates – PA, WV, and KY – are less likely to discourage the use of natural gas in the near future. However, emissions initiatives down the road could put downward pressure on the stock.

Delays in closing DELCORA. The company expects the DELCORA acquisition to close in late 2020 or early 2021. A delay in the DELCORA acquisition related to COVID-19 or for other reasons could negatively impact earnings in 2022 and onwards. If the acquisition is not

completed before the company goes into its Pennsylvania rate case in 2021, they may risk not being able to file for new rates at DELCORA. The company expects full earnings contributions from DELCORA in 2022, after new rates are implemented. If DELCORA does not make it into the rate case, the company will continue under-earn on the asset until the next rate case since rates for municipal systems are considerably lower than those of investor-owned utilities.

Extension of coronavirus lockdown could further hurt the economy and increase bad debt expenses. Utilities in general have means to recover incurred costs, though they may need to finance these costs while waiting for the commissions to determine the proper recovery mechanism, if permitted. As more customers face hardship, it would put pressure on their ability to pay their bills, including the utility bills. This, in turn, would translate into a revenue shortfall that could create a cash shortfall. We anticipate that commissions will allow these costs to be treated as a regulatory asset to be recovered over time.

Valuation

Outperform, $49 PT

Valuation framework supports high base multiple. To derive our valuation for water, we turn to the dividend discount model (DDM), which we use to calculate the sustainable value of a low-growth utility. We use the parameters that we use for gas utilities for market return (9.75%), beta (0.55), risk-free rate (3.5%), and dividend payout ratio (64%). We have changed our growth assumption to 4% for water from 3.5% for natural gas and we add a 10% ESG/water premium. This results in a base P/E for a low growing water utility at 24.9x forward P/E.

We arrive at our $49 price target using a sum-of-parts method. We apply a 25% premium to our base multiple of 24.9x P/E for water utilities and a 30% premium to our base multiple of 19.3x P/E for gas utilities. We believe both business warrant premiums due to strong growth prospects and footprints in states with constructive regulatory environments. Our price target of $49 implies a total return of ~17% and justifies our Outperform rating.

Valuation considerations

WTRG is currently trading at a 4-turn discount to water peers on 2021E EPS, despite having the second-largest water footprint. This is likely due to the loss of the benefit from the water premium that bolsters its pure-play peers as a result of Essential's plunge into natural gas. We believe the company has a solid earnings mix of 70%-30% water and a premium should still be warranted due to water segments; Essential operates the second largest water business and maintains around 25% of market cap.

We also believe that Peoples creates a strong platform for growth at both the gas and water segments. The multi-decade backlog of pipeline replacement requires significant and accelerated investment that will generate low risk organic rate base growth. Turning to the water segment, we think the water business is well-positioned to further expand its water business. We expect to see the majority of future acquisitions coming from Pennsylvania, which represents Essential's largest water and gas operating segments. We believe Essential's expansion into Western PA due to the Peoples acquisition will further secure the company's presence in the state and help drive acquisition growth for Aqua PA. The acquisition of DELCORA, whose service territories overlap with those incorporated in Aqua PA's footprint, will further increase Essential's presence in PA.

Shelby Tucker, CFA (212) 428-6462; shelby.tucker@rbccm.com

Company Overview

Essential Utilities Inc. (f.k.a. Aqua America, Inc.) is the second largest water and wastewater utility in the U.S., measured by market capitalization. Before its entry into the natural gas industry, Essential generated virtually all of its revenues through its regulated water utility segment (99.6% of sales), serving an estimated three million customers located primarily in states along the rust belt and Texas. Essential's customer base is primarily residential (58%), followed by commercial (16%), wastewater (12%) and other (14%) customers. Essential's growth has been marked by several key transactions, including the acquisition of Peoples Natural Gas Company, LLC ("PNG") in 2020, regulated water operations in Ohio from American Water Works in 2012, regulated water operations from AquaSource in 2003 and the merger with Consumers Water Company in 1999. On February 3, 2020, the company changed its corporate name to Essential Utilities Inc. and extends services to 747,000 gas customers and expands its footprint to include Kentucky and West Virginia. As a complement to their primary regulated business, Essential also operates certain non-utility activities through Aqua Resources and Aqua Infrastructure.

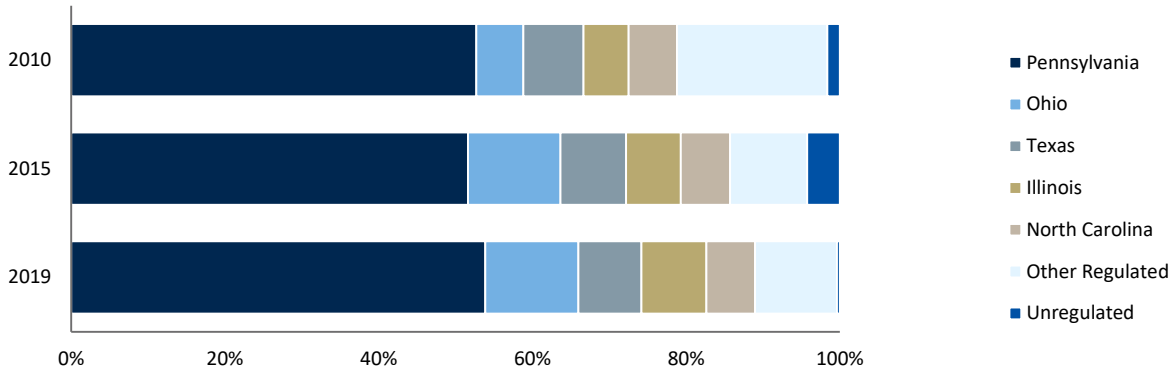
Exhibit 12: Company footprint, including Peoples Natural Gas transaction

Source: Company reports

Regulated water business

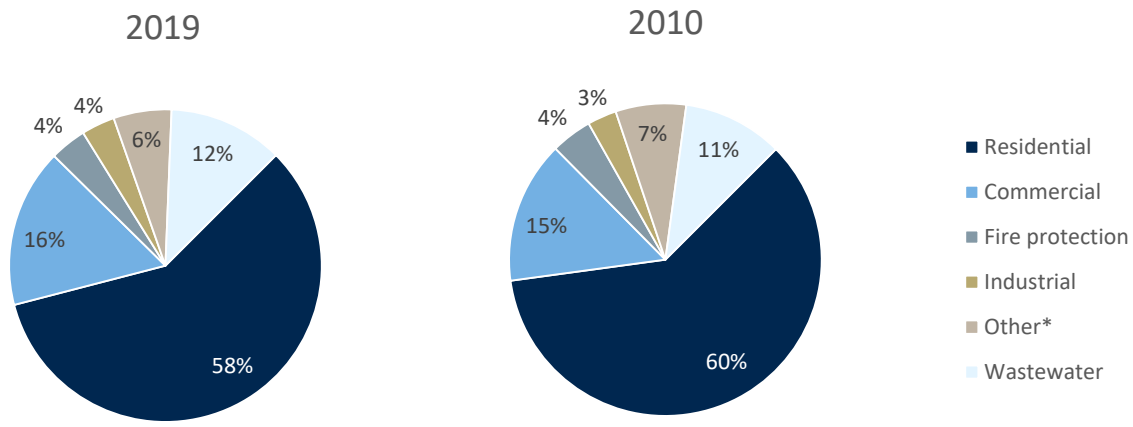
Essential generates virtually all of its revenues through its regulated water business, which serves water and wastewater customers in Pennsylvania, Ohio, Texas, Illinois, North Carolina, New Jersey, Indiana and Virginia. Historically, Pennsylvania is the main operating jurisdiction, accounting for 54% of operating revenues in 2019. Ohio, Texas, and Illinois contribute to the majority of the remaining share of revenues. Over the past decade, the percentage share across these states have remained largely in line year-over-year. Customer growth for the business has been robust, recording 1.8% CAGR in the trailing five years. The majority of customers for water services are residential (58% in 2019), followed by commercial (16%) and wastewater clients (12%).

Exhibit 13: 2019 regulated water segment revenues by state



Source: Company Presentation

Exhibit 14: Regulated water segment revenues by customer class

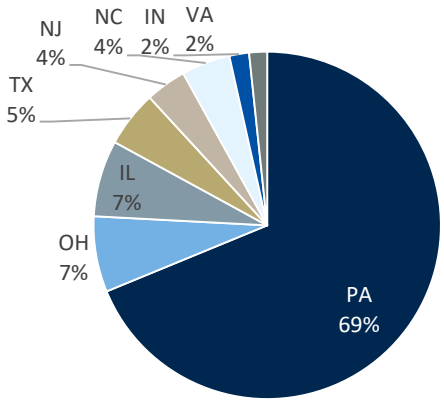


Source: Company Presentation

Water and wastewater service customers are subject to regulation by their respective state utility commissions, which determine billing rates and terms of service, among other regulatory matters. The regulated water business is dependent on water consumption which, in turn, is dependent on weather and temperature conditions much like electric and gas utilities. Generally, dry weather and high temperatures increase water consumption while above-average rainfall and low temperatures decrease water consumption. Given a regulated industry, local authorities may impose consumptions limits which could impact Essential's performance. Operating revenues for the regulated water business and operating revenues as a percentage of total were $805 million/$835 million/$886 million and 99.6%/99.6%/99.4% for 2017/2018/2019.

Utility growth is often referenced by growth in rate base. Between 2020 and 2022, rate base for water and gas are slated to ramp up at 6-7% CAGR to $6.5 billion and 8-10% CAGR to $3.0 billion, respectively. The following chart illustrates the relative sizes of water rate base as of 2018 by state.

Exhibit 15: Essential regulated water utility rate base as of 2018



Source: Company Presentation

Market-based activities

Essential conducts competitive, non-utility businesses through Aqua Resources and Aqua Infrastructure: Aqua Resources manages a water system operating and maintenance contract and offers other water solutions to customers; Aqua Infrastructure provides non-utility raw water supply services for firms in the natural gas drilling industry. Together, these businesses make up less than 0.5% of operating revenues hence immaterial to Essential's overall performance, in our view. The company's direction is consistent with a pure-play regulated utility and we believe the strategy will continue in the foreseeable future.

Peoples Natural Gas

Peoples Natural Gas ("PNG") is the largest natural gas distribution company in Pennsylvania with $2.3 billion rate base as of 2019 year-end. The company serves 747,000 customers across the Pennsylvania (93% of customers), West Virginia and Kentucky. The company's infrastructure is deeply rooted in these states, with 15,000 miles of distribution pipeline, 2,400 miles of gathering pipeline and 310 miles of intrastate transmission pipeline as of 2019. PNG is fully regulated, with 98% of earnings generated through its gas distribution business.

In October 2018, Aqua America announced the intent to acquire PNG for $4.275 billion in an all-cash transaction. The transaction closed on March 16, 2020. Much like other regulated utilities, PNG is regulated by various state commissions which determine customer tariff rates, terms of services and mergers and acquisition-related matters. On a regular basis, PNG files rate increase requests, either via riders or rate cases, to recover and earn a fair return on infrastructure spending. As with the regulated water business, the regulated gas distribution business is dependent on weather conditions and is seasonal by nature. Generally, colder weather increases gas consumption and warmer, milder weather decreases consumption. Certain states provide mechanisms that decouple gas sales from weather effects and helps smooth out earnings of gas utilities. While Pennsylvania and Kentucky offer decoupling, West Virginia does not. Given the high concentration of customers in Pennsylvania, we view the utility to be well-insulated from mild weather.

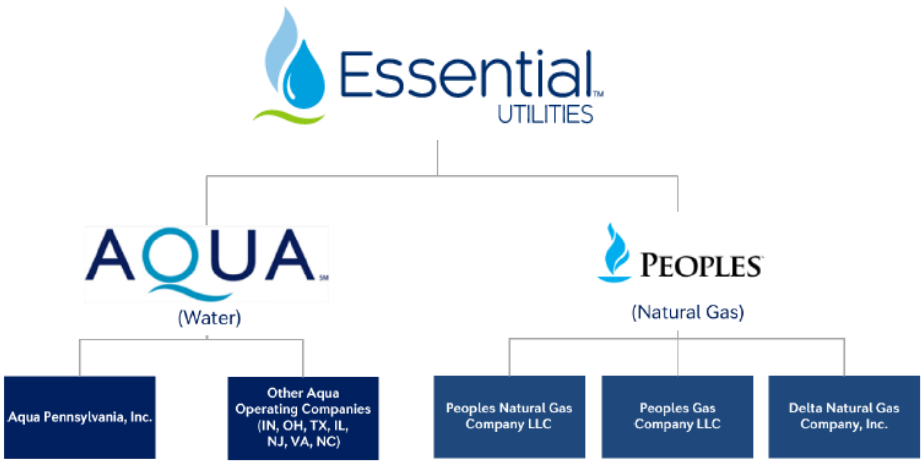
Management has indicated that it expects the business mix to stand at 70% water and 30% gas. It has also been made clear that the company wants to maintain its water-heavy earnings contribution, and will be very selective about any potential gas acquisitions moving forward.

We believe the mix of the two segments is crucial from a valuation standpoint, as this balance will play a significant role in how the stock trades compared to its utility peers.

Corporate structure – Essential Utilities

Despite consolidation in the past decades, Essential features a rather simple corporate structure. Aqua Pennsylvania, which provides regulated water and wastewater services in the state, is the largest entity within the structure and contributes to 54% of consolidated operating revenues. The figure below is a representation of the corporate structure after the PNG acquisition.

Exhibit 16: Essential Utilities corporate structure



Source: Company 10K

Management Team

Extensive industry experience. WTRG's management team has deep experience in the water utility industry, with most key executive officers serving in strategic roles at the company for extensive periods of time. We find the experience in mergers and acquisitions particularly valuable for the company, as it industry positions itself for further consolidation. The officers of Essential Utilities include:

Christopher H. Franklin – Chairman; President and Chief Executive Officer

Mr. Franklin has served as chief executive officer of Essential Utilities since July 2015 and as chairman since December 2017. Mr. Franklin was previously president and chief operating officer, regulated operations. A 20-plus-year veteran of the company, Mr. Franklin has held executive roles in public affairs, customer operations and as regional president of the company's southern and mid-western operations, where he managed eight states. While holding that post, Mr. Franklin significantly increased the performance and earnings power of these diverse state operations, while simultaneously serving as senior vice president of the company's corporate and public affairs, where he was also responsible for the company's federal, state and municipal legislative affairs, investor relations, and communications

Daniel J. Schuller – Executive Vice President and Chief Financial Officer

Mr. Schuller is executive vice president and chief financial officer for Essential. Before becoming Deputy CFO, Mr. Schuller served as Executive Vice President, Strategy and Corporate Development for Aqua America and was responsible for Aqua's strategic growth initiatives.

Mr. Schuller came to Aqua America from J.P. Morgan Asset Management – Infrastructure Investments Group where he had been an investment principal since 2007, providing strategic leadership as a director of portfolio companies including SouthWest Water Company—of which he was responsible for the 100 percent stake held by J.P. Morgan-advised investors—and Summit Utilities. Specifically for SouthWest Water, Mr. Schuller guided the company's turnaround and led its growth strategy, assessing both organic growth and acquisition opportunities. Prior to joining J.P. Morgan, Schuller was a manager at Mars & Co., an international strategy/general management consulting firm, where he led consulting engagements related to growth and profitability for Fortune 500 companies and conducted due diligence for private equity firms.

Richard S. Fox – Executive Vice President and Chief Operating Officer

Mr. Fox was named chief operating officer of Essential Utilities in July 2015. Prior to being appointed COO, he had been regional president for Aqua America since January 2012, heading all of Aqua America's utility operations in Texas, Illinois, North Carolina, Indiana and Virginia. Prior to assuming the role of regional president, he was vice president, customer operations, where he was responsible for all customer service operations for Aqua America's regulated operating subsidiaries, including the company's national customer call centers, national meter operations, and company-wide billing and collections.

Christopher P. Luning – Executive Vice President, General Counsel, and Secretary

Mr. Luning assumed the role of executive vice president, general counsel, and secretary for Essential Utilities in 2012. Mr. Luning is the company's chief legal counsel and oversees and provides strategic direction for the company's legal, human resources, internal audit, and safety departments. He provides direction on all parent company and its subsidiary matters, including corporate governance and board matters. Previously, he held the position of vice president, corporate development and was responsible for leading the Aqua America's corporate development activities, contributing to the company tripling its customer base in the previous 10-year period.

Matthew R. Rhodes – Executive Vice President, Strategy and Corporate Development

Mr. Rhodes was named executive vice president, strategy and corporate development for Essential in June 2018. Prior to this role, Mr. Rhodes served 11 years as a managing director in the investment banking division at Goldman Sachs in the global natural resources group focused on mergers and acquisitions for electric and gas utility clients. Prior to that role, Mr. Rhodes worked at Bank of America and Duke Capital Partners. Mr. Rhodes is the executive sponsor the Essential Utilities' Women Resource Group.

Robert A. Rubin – Senior Vice President, Controller and Chief Accounting Officer

Mr. Rubin was appointed senior vice president, controller and chief accounting officer (CAO) of Essential in January 2012 after having served as chief accounting officer since March 2004 and as controller for the previous five years. As CAO, Mr. Rubin is responsible for Essential's external and internal financial reporting, including that required by the Securities Exchange Commission and Sarbanes Oxley regulations. He is also responsible for taxes, coordinating external audits, corporate accounting and maintaining compliance with accounting standards and principles throughout the company.

Water Utilities in a Splash

Water is the most essential of utility services. The defensiveness of a utility sub-sector is partially defined by its ability to maintain a rate-regulated business model that creates predictable earnings and cash flows, thus allowing for a steady and foreseeable dividend. Fifty years ago, the telecommunication industry was a steady utility until competition was introduced and cellular technology disrupted it. Even twenty years ago, the generation portion of the electric industry was partially deregulated. It is conceivable that in a few decades electricity could be produced locally, thus not requiring a network of wires. Water, on the other hand, cannot be locally produced everywhere. Its pipelines form the least by-passable network among utilities. While most utility services are viewed as essential by the authorities, we believe that a premium consideration is placed on water utilities.

The U.S. water and wastewater industries are ripe for outsized investment opportunities driven by an aging infrastructure. The EPA estimates water utilities will need to invest ~$384 billion in pipes, treatment plants, and storage tanks over the next twenty years due to decades of under-investment. A competing study produced by the America Water Works Association (AWWA) estimates water infrastructure needs will total more than $1 trillion over the same timeframe, assuming pipes are replaced at the end of their service lives. As it stands today, U.S. water systems were slapped with a D+ grade from the American Society of Civil Engineers.

Municipal acquisitions drive accretion opportunities. The EPA estimates 84% of the community water market is serviced by municipalities and 98% of the wastewater systems are government-owned. Contrast that with the electric utilities sector, where investor-owned utilities (IOUs) served 72% of all electricity customers in 2017, according to Energy Information Administration (EIA), a division of the U.S. DOE. Acquisitions of municipalities have been a driver of growth for the water IOUs, having helped the nine largest companies collectively increase earnings at a 7%+ CAGR over the past ten years. Increasingly, states are creating incentives to facilitate such acquisitions, through Fair Market Value (FMV) legislation, which we will cover later. In our view, acquisitions resulting from fair market legislation will only become more prevalent and allow municipalities to focus on other community priorities.

Water lowest risk among utilities; argues for higher valuation. While water headlines can be scary (witness the Flint, Michigan disaster), most of the headlines come from poorly managed municipalities. Water investor-owned utilities (IOUs) do not suffer interruption of service like electric blackouts, the rare gas pipeline explosion, or the more numerous gas leaks. Regulatory outcomes are generally less contentious, with a greater usage of surcharges to grow revenues. The rating agencies recognize the lower risk as their thresholds for credit ratings are lower than those applied to other utilities. All else being equal, the FFO/debt for water utilities can drop to 10% or less and still retain an investment grade rating, a feat less likely to happen for electric utilities. A lower risk typically will lead to a lower discount rate and therefore a higher multiple.

ESG meaningful underlying driver for premium valuation. We believe that ESG (Environment, Social, and Governance) investing will continue to gain traction among fund managers, thus preserving a premium valuation for water utilities. On the environment side of the ledger, water utilities have the lowest carbon footprint of all utilities. Social issues revolve around the product that water utilities provide at a reasonable price. Governance issues are more akin to other industries. For example, while some companies separate the CEO and Chairman role, others do not. While more traditional ESG investors might be precluded from investing in gas/electric utilities due to nuclear assets, gas pipelines, or other aspects of the business model, we do not see a similar restriction on water utilities. Perhaps more importantly, we believe the increasing importance of ESG and the lack of publicly traded pure-play water stocks should only serve to further increase the premium valuations for companies in the industry.

Water Utilities: Industry Overview

Crippling and Aging Water Infrastructure

The average U.S. consumer has grown accustomed to the luxury of receiving clean drinking water and the management of wastewater, with little regard for the complicated and expansive systems necessary to deliver these services. For context, the United States has 1.2 million miles of drinking water supply mains and about an equal amount of sewer pipes. According to the Environmental Protection Agency (EPA) these systems are in dire need of investment, but the general public often has stark views over rising water prices, despite paying less than $0.01 per gallon. Further, water is generally the lowest percentage utility cost per household, despite being labeled as the most important service that customers receive (notably ahead of electricity and heat), according to a study conducted by Xylem Inc. (covered by Deane Dray). The discrepancy between necessary infrastructure investments and customer pushback over the rising cost of water will likely result in a dramatic shift in the way that water is priced in the future. In order for this to happen, water pricing must be restructured to cover the full costs of treatment and delivery to consumers, including expenses related to building, operating and maintaining and replacing water systems.

EPA regulates the industry at the federal level; PUCs at the state level. The EPA is tasked with setting the water quality standards while the state economic regulatory agencies, generally referred to as Public Utility Commissions (PUCs) govern the price impact of water services for investor-owned utilities. Investor-owned utilities are granted authority by each state's PUC to operate in a service area while receiving some protection from competition in exchange for quality and reliable service. The utility is entitled to a reasonable rate of return (allowed return) on prudently invested capital and can recover operating expenses. This is accomplished through rate cases.

Investments are passed onto rates via rate cases. In most states, municipal-owned water utilities generally set their own rates and do not have to go through a state PUC approval process. Political leaders are often reluctant to increase rates as that may cause unpopular opposition from voters. Thus, needed but costly infrastructure repairs may be postponed or avoided in order to keep rates low. Meanwhile, state PUC regulation of investor-owned utilities helps promote necessary infrastructure investment, rehabilitation and/or replacement, and maintenance. It does so not only by enforcing the utility's obligation to provide safe and reliable service, but also by setting rates that cover the costs of providing that service, including a fair return on invested capital.

Water is generally a good value proposition for customers

Most customers don't understand the water framework, but view water as essential. It is a fair characterization to admit that most U.S. customers overlook the value of the water that comes out of their faucets. Ratepayers of municipal systems or investor-owned utilities generally don't think about the pathway of how their water arrives in their homes or how it is treated and to what extent before being delivered. Ratepayers living in rentals may be so disassociated with water bills, they may often not be aware of the cost or dynamics of clean water, but even when paid directly ratepayers scuffle over paying on average less than a token penny per gallon of water vs a typical water bottle costing $1.50.

The average household pays roughly $540 a year for water and wastewater services compared to about $730 for soft drinks alone. In addition, water and wastewater services are typically the lowest percentage utility cost per household, representing about 12% of bills, compared to gas at 18%, telephone at 33%, and electricity at 37%. This historical underpricing of water is largely driven by lingering public perceptions that water is a fundamental human need supplied by the earth itself, i.e. free. These consumer perceptions have prevented

municipal utilities from attracting the necessary capital required to upgrade and maintain networks. Unfortunately, under-investment and inadequate water systems and/or lack of governance have caused instances like Flint, Michigan to occur, rendering national attention given the detrimental health and wellness effects of contaminated water. The water crisis in Flint displayed the disastrous consequences of lead contamination, but importantly also outlined the many other competing agendas that water utilities wrestle with including: (1) managing other drinking containments; (2) supervising wastewater treatment; and (3) handling storm water overflows. Notably, the EPA estimates 1.8 million to 3.5 million people per annum become ill from recreational contact to contaminated water. Further, the EPA estimates that about 850-900 billion gallons of untreated sewage is discharged into waterways every year due to aging pipes and inadequate resources.

Resulting from decades of underinvestment, water's aging infrastructure is in dire need of investment compounded by being the most capital intensive utility subsector. These challenges present ample investment opportunities for investor-owned utilities. The EPA estimates that $775 billion is needed to be invested in water and wastewater through 2040 due to decades of under-investment. A competing study produced by the American Water Works Association (AWWA) estimates water infrastructure needs will total more than $1 trillion over a similar timeframe, assuming pipes are replaced at the end of their service lives. As it stands today, U.S. water systems were slapped with a D+ grade and drinking water systems received a D rating from the American Society of Civil Engineers. Encouragingly, IOUs are increasing liaising with municipalities in mutual efforts to tackle the crippling and aging water infrastructure deficiencies. One of the tools is Fair Market Value legislation that we will be addressing in the next section.

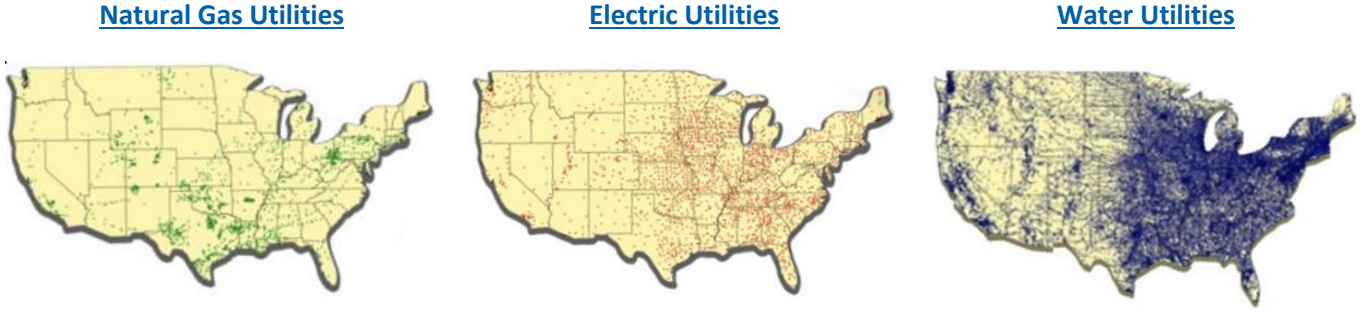
Only a fraction of the contaminants are regulated by the EPA

The EPA only regulates a fraction of the emerging water contaminants presenting a massive gap between the number of chemicals and the amount that are currently regulated. On a global scale, there are roughly 144 million chemicals registered under the Chemicals Abstracts Service. New chemicals are formed rapidly, roughly every 2.5 seconds, caused by a breakdown of existing chemicals. Further, there are about 1,400 microbial pathogens that are managed by water providers and only about 6% are regulated by the EPA. This doesn't mean that consumers aren't focused on the quality of water. For example, perfluorinated compounds (PFCs) were found in 162 water systems across the U.S. impacting 15 million people in 2017. PFCs are known to bioaccumulate and persist in the environment, and animal studies indicate that they are toxic, affecting reproduction and development, despite showing limited health effects in people. To augment to reality of not covering all bases, water utilities are increasingly implementing artificial intelligence (AI) and machine learning technologies to detect a broader range of contaminants.

Highly fragmented industry ripe for consolidation

The U.S. water and wastewater industry is heavily commoditized. The fragmented nature of the water industry is highlighted by roughly 50,000 water systems in the U.S. and about 15,000 community wastewater systems compared to 1,400 gas systems and 3,800 electric systems. Further, roughly 84% and 98% of the U.S. population is served by municipal water systems and wastewater systems, respectively. Additionally, half of the water and wastewater systems serve a population of less than 500, which generally don't provide enough scale that could warrant IOU interest.

Exhibit A: U.S. water among the most fragmented utility sectors



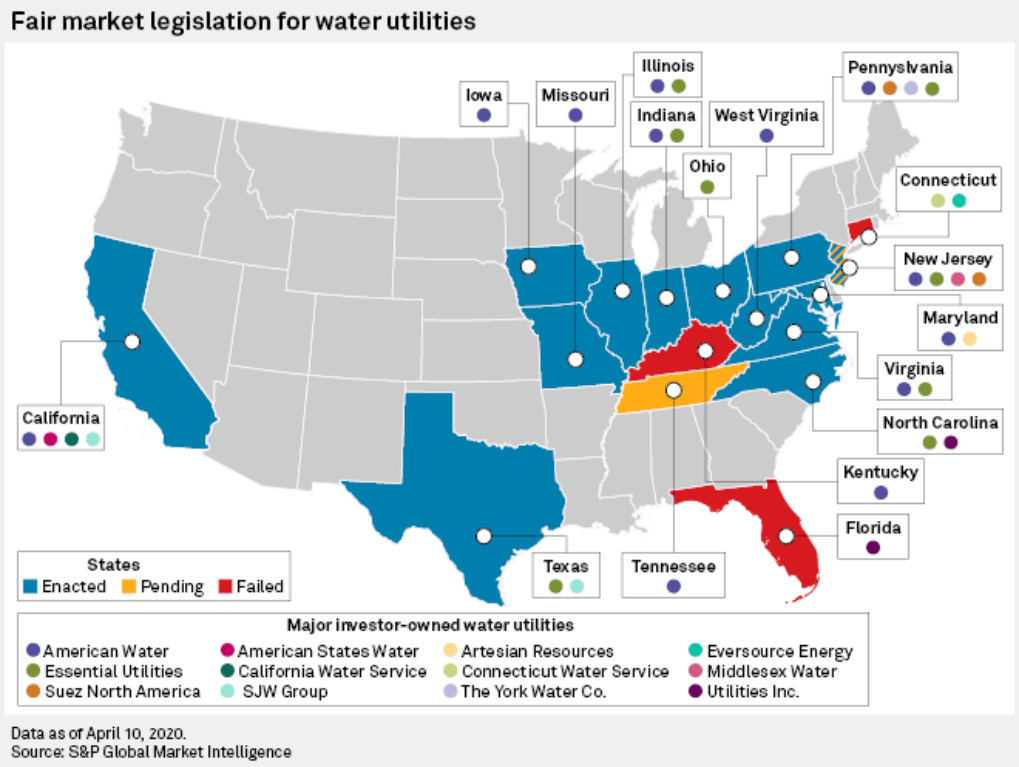
Source: Enviornmental Protection Agency and Energy Information Administration

Fair Market Value Legislation is leading to more deal-making

Fair market value assessment of water and wastewater systems is increasingly becoming a preferred alternative to the traditional depreciated original cost method, providing mutually beneficial outcomes to both the buyer and seller of municipal systems. Sellers are able to capture the true value of their assets while buyers are allowed to add the total purchase price to rate base, without padding goodwill, dubbing the premium an "acquisition adjustment". California became the first state to adopt fair market value legislation in 1997 following the passage of SB 1268. Since California's approval, eleven other states have adopted comparable approaches including Indiana, Missouri, Illinois, Iowa, Ohio, Pennsylvania, New Jersey, Maryland, and North Carolina, Texas, and Virginia. These states have subsequently turned into prime battlegrounds for IOUs fetching acquisition targets, further labeling the water industry as "ripe for consolidation". We believe that this legislation has already proven to and will continue to encourage consolidation in the water and wastewater industry. In our view, further acquisitions of municipal networks will provide operators with an option to exit the management of deteriorating water and wastewater assets, offer the ability to focus on other community priorities, and forfeit the need to comply with ever increasing environmental regulations despite having limited technical expertise. Of the 20,000 municipal water systems that are possible acquisition targets, we believe only a fraction of these are scalable enough to warrant acquisition consideration from IOUs. Companies are generally limited to their core operating states, and the acquired customer count generally needs to pass certain thresholds to be considered a viable takeout candidate.

The idea behind FMV is to create a win-win for IOUs and municipalities. In the utility world, regulators generally do not allow the acquiring company to earn on the full amount that it paid to acquire another company, if a premium is involved. Goodwill in essence becomes a stranded asset. In other industries, to the extent that you can create cost savings through synergies, paying the premium may be justified. However, utility rates are set by regulators that do not allow the company to keep the savings once a rate case is filed. These issues tend to cap the amount that companies are willing to pay for utility assets. The legislation allows IOUs to add approved goodwill to the rate base when buying a municipality or cooperative in states that feature FMV. It allows the acquiring companies to provide a better incentive for the municipality to sell its under-invested assets, while allowing the company a better opportunity to earn a fair return on the acquisition capital.

Exhibit B: Fair market value state legislation and investor-owned water utility footprints

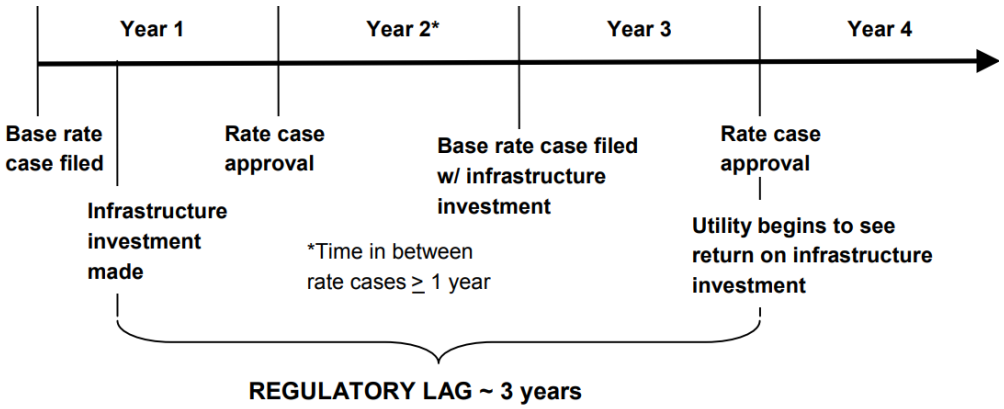


Source: Company reports, S&P Global Market Intelligence

Distribution system improvement charge

Water utilities are roughly 2x more capital intensive than their electric peers and 3x than their gas peers. As a result, repairing and replacing water and wastewater infrastructure has proven to be economically and politically challenging, primarily reflecting the impact on customer rates. To reflect this, public utility commissions (PUCs) have established infrastructure replacement surcharge programs to encourage water and wastewater infrastructure investments. Surcharge programs allow utilities to recover costs in a timelier fashion, effectively allowing them to extend the timeline between filing general rate cases, generally referred to as a stay-out. Surcharges also drive moderate base rate increases for customers, resulting in reduced customer rate shocks. Further, surcharge mechanisms help mitigate regulatory lag. Typically when a regulated water utility invests in a project, it seeks a return by filing for base rate increases through a rate case. Often, this process can be lengthy resulting in the aforementioned regulatory lag, a term coined from the time an investment is made until a utility is able to earn a return on that investment. This lag can obstruct a utilities ability to attract capital, weigh on its credit metrics, and may potentially limit necessary investments in systems.

Exhibit C: Impacting of regulatory lag



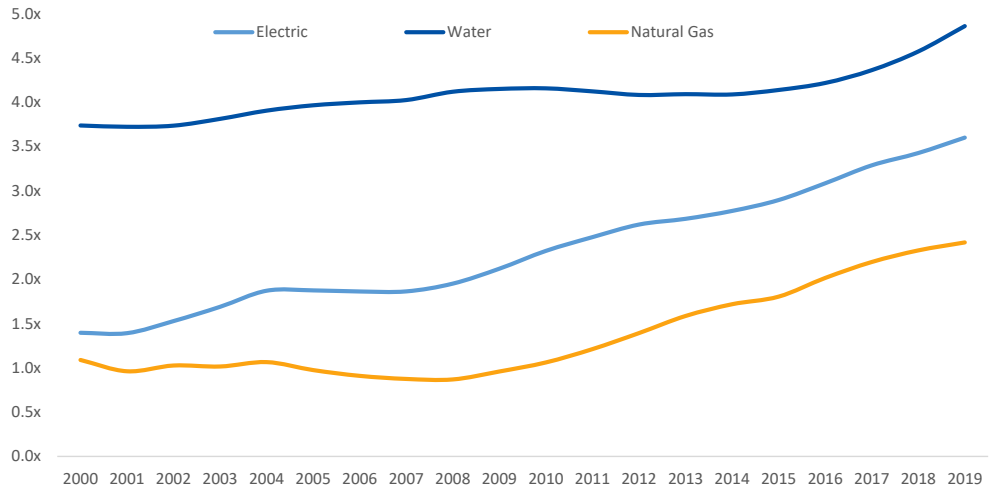
Source: American Water Works White Papers

Regulatory lag tends to have an especially adverse impact for water utilities, and consequently lead to sub-par returns during periods of heavy capital investment, due to the highly capital intensive nature of the businesses. The figure below demonstrates this dynamic. For illustrative purposes, the example showcases a historical test year (investments made during the rate case filing year would not be included in that rate case due to the investments falling outside of the test year). Assuming a general one-year timeline to conduct rate case proceedings, a utility would essentially be disallowed to earn a return on its first year's investments until year three. Surcharge rates are adjusted periodically based on infrastructure projects currently in progress or expected to be complete, but are typically reset to zero when a new base rate case begins, effectively rolling the surcharge based investments into the rate base. Further, surcharge rates are typically capped at 5.0% and 7.5% of a utility's annual revenue.

Capital intensity drives sustainable rate base growth

We believe the water utility sector has several unique and characteristics compared to the electric and gas sectors, particularly as it relates to return-generating projects and the associated revenue requirements to maintain infrastructure investments. Capital costs are mainly concentrated in pumping equipment, treatment facilities, and distribution systems. As noted previously, water utilities are roughly 2.0x more capital intensive than their electric peers and 3.0x more than their gas peers. Further, the net PP&E to revenues ratio for investor-owned water utilities is about 5.0x, compared to electric utilities of 3.4x and natural gas utilities of 2.3x. In our view, this ratio showcases the importance of infrastructure spending as a key characteristic of the industry's cost structure, and therefore making it difficult to pare back and reduce capital costs. Even as companies continue to drive their efficiency ratios lower, notably American Water Works and Aqua America, operating costs can only offset capital costs to a limited extent. In the figure below, we highlight the delta between the net utility PP&E to revenues of the three utility sub-sectors.

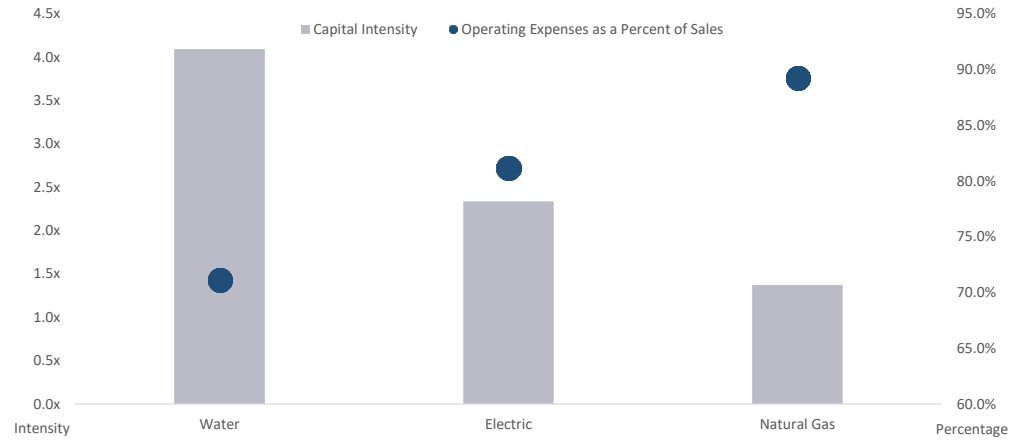
Exhibit D: Net utility PP&E to revenues



Note: Water, Natural Gas, and Electric Peers Include:
Water Peers: ARTNA, AWK, AWR, CWT, MSEX, SJW, WTRG, YORW
Natural Gas Peers: ATO, CPK, NJR, NWN, OGS, SJI, SR, SWX
Electric Peers: AEE, AEP, ED, ES, EVRG, PNM, PNW, PPL, SO, WEC, XEL
Source: Company reports

Despite the aforementioned capital intensive nature of the water utility sector, on a relative basis, companies generally spend the least amount of O&M dollars to maintain their assets vs electric and gas peers. To put this into perspective, over the past twenty years, water utility O&M expenses as a percent of PP&E averaged 20% compared to gas utilities at 40% and electric utilities at 60%. This leads us to believe that more water utility revenues are geared towards return-generating investments vs electric and gas peers which allocate a greater portion of expenses towards pass through costs that generally do not generate a return. This suggests to us that any incremental O&M savings could lead to further investment in capex dollars which eventually translate to higher rate base and earnings growth.

Exhibit E: Capital intensity and O&M expenses by utility sub-sector



Note: Water, Natural Gas, and Electric Peers Include:
Water Peers: ARTNA, AWK, AWR, CWT, MSEX, SJW, WTRG, YORW
Natural Gas Peers: ATO, CPK, NJR, NWN, OGS, SJI, SR, SWX
Electric Peers: AEE, AEP, ED, ES, EVRG, PNM, PNW, PPL, SO, WEC, XEL

Environmental, Social Responsibility, and Governance

Environmental, social responsibility, and governance (ESG) principles are increasingly becoming mainstream components of investment decisions. The Global Sustainable Investment Alliance Review estimates that $17.5 trillion of sustainable-investing AUM globally proactively consider ESG components alongside financial analysis when contemplating investment decisions. To this extent, water utilities are stewards of a critical natural resource which has naturally drawn a connection to ESG principles. We believe American Water has established itself as the ESG template within the utility industry, ranking 23rd on Barron's most sustainable companies list, and the highest ranked utility.

The water utility industry generally scores higher in ESG than its electric/gas counterparts for a variety of reasons. The inherent asset profile for water utilities is considered superior to the asset profile of electric and gas utilities, principally due to the lack of coal, nuclear, natural gas, and pipelines. Additionally, water assets generally are considered higher-quality and safer.

The Sustainable Accounting Standards Board (SASB) provides a framework for analyzing ESG factors among electric, gas, and water utilities. In SASB's Materiality Map, which highlights various dimensions and general issues that would be material in evaluating a company's ESG profile, there are only two general issues that are considered material across electric, gas, and water utilities: Access & Affordability and Business Model Resilience. This highlights the inherent differences among the business profiles, in our view.

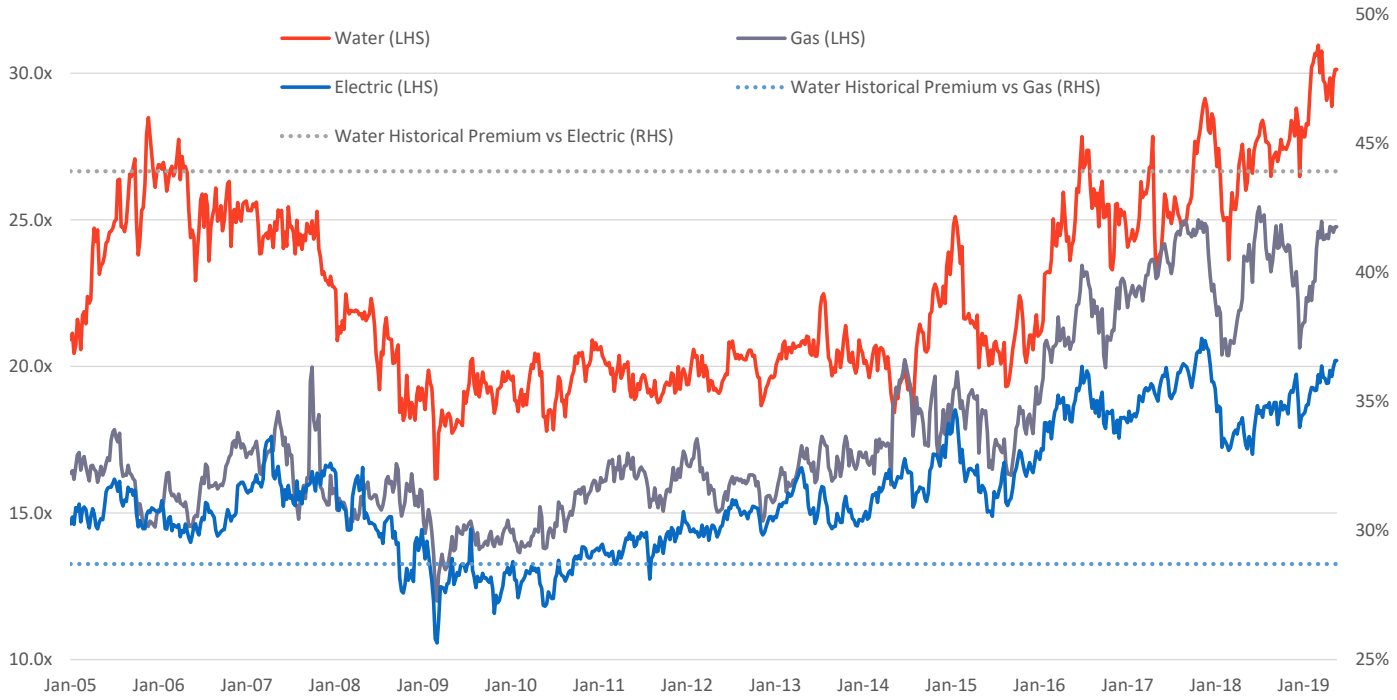
While we recognize that water utilities' environmental aspects are generally accepted as superior to electric/gas utilities, this is not the whole ESG story. When analyzing the ESG profiles of water utilities, it is important to compare water utilities among water utilities, meaning the E becomes less important on a relative basis. To us, key factors to consider include disclosure/quality of data (reporting under SASB standards, issuing sustainability reports, etc.), customer rates at or below national average, diversity of employees and Boards of Directors, and separation of CEO/Chairman.

Valuation Considerations

You Get What You Pay For

Utilities are commonly known for driving predictable earnings growth, and therefore it is common practice to use the price-to-earnings (P/E) ratio to calculate the value of utility equities. Valuations are also driven by utilities' established incumbent status, high barriers to entry, low commodity price exposure, increasing regulatory support, and steady (although generally declining) regulated returns. To this extent, regulated water, electric, and natural gas utilities have historically established what we view as 'entitled' multiples that vary quite a bit from one another. However, these utilities generally do not trade away from their respective peers (water, electric, gas) often, and instead stay within a fairly narrow band of valuation. Over the past fifteen years, water utilities averaged a ~23.0x next-twelve-month P/E ratio, reflecting a +30% premium to its natural gas peers, and a +45% premium vs its electric peers over the course.

Exhibit F: Water, natural gas, and electric utility peers forward P/E ratios



Note: Water, Natural Gas, and Electric Peers Include:
Water Peers: ARTNA, AWK, AWR, CTWS, CWT, MSEX, SJW, WTRG, YORW
Natural Gas Peers: ATO, CPK, NJR, NWN, OGS, SJI, SR, SWX
Electric Peers: AEE, AEP, ED, ES, EVRG, PNM, PNW, PPL, SO, WEC, XEL
Source: FactSet, RBC Capital Markets estimates

We believe structural differences between water utilities and their peers, which include several other factors, have contributed to the lofty historical premium. We highlight some of our observations below:

Naturally lower risk assets. Despite being the most capital intensive utility sector, water utilities are naturally lower risk assets and therefore command higher valuation multiples relative to their electric and natural gas peers. Recent PG&E investor capitulation following the devastating November 2018 Camp Fire, the natural gas explosions plaguing NiSource, or implications of fracking remind us of the elevated risks natural gas and electric utility peers absorb.

We believe prices may be moving higher. Until water is priced in a way that encourages wise use, reflects the true cost of delivering it, and allows for adequate replacement of that infrastructure, Americans will continue to take water for granted, and the infrastructure that makes it so easy for them to do so will continue to deteriorate.

Municipal acquisitions drive positive estimate revisions. Municipal acquisitions, and in particular fair market value legislation allow municipalities to be acquired for fair market prices. In turn, acquirers can add the total purchase price to the rate base, allowing water utilities to earn a return on the full rate base, without padding goodwill on the balance sheet. We estimate every $100 million deployed towards municipal acquisitions adds roughly $5 million to net income, assuming a best case scenario of regulatory lag.

Pure-play scarcity multiple applied to water peers. To a certain extent, water utility valuations are also driven by "scarcity value". This leaves funds with investment specific mandates a small selection of water utilities to invest in. There are only nine publicly traded water utilities, including Essential Utilities. Reflecting this treatment, we observed forced-selling in Essential Utilities (formerly known as Aqua America) shares in conjunction with its October 2018 Peoples Gas acquisition announcement for $4.5 billion.

Bite-sized enterprise values draw takeout considerations. The total market capitalization of publicly traded water utilities stands at roughly $44 billion vs ~$57 billion for their natural gas peers and ~$816 billion for their electric and multi-utility peers. We note that American Water Works and Essential Utilities represent about 78% of the aggregate water utility market capitalizations. In our view, this reflects the relatively bite-sized enterprise values of water utilities, despite above-average P/E ratios. To date, we've only observed Essential Utilities willing to dilute its pure-play water multiple with the announcement of its Peoples Gas acquisition, but we wouldn't rule out water acquisitions by electric and gas utilities. For now, the valuation multiple disparities present challenges to structure accretive acquisitions though we have seen more electric and gas utilities ramp up their respective ESG efforts which we believe could lead to higher valuation multiples for these entities.

Environmental, Social, and Governance (ESG) characteristics drive higher multiples. We believe utilities that have deliberately applied ESG principles fetch higher valuation multiples. The ESG model is easily implemented in the water framework given the very nature of the business models and strategic visions balance the provision of essential services with environmental stewardship, affordability, and financial integrity. To this tune, we believe ESG-focused companies generally exhibit higher quality of earnings driven by lower earnings volatility and higher return on equity. These characteristics have also drive higher P/E ratios.

Distribution Surcharge Infrastructure Changes (DSIC) arguably shift risks away from investors. Water utilities are known to stay out of rate cases and we believe this is a function of DSIC. Surcharges are reset to zero during the next rate or in the event that a company exceeds its allowed ROE.

Valuation framework

Inherent higher growth and ESG premiums lead to sustainably greater valuations. Our valuation framework for utilities is derived from the dividend discount model, where we assume a run rate risk free at 3.5% (well above the current 10-year Treasury yield of 0.65%). Exhibit G below shows the base P/E calculation that we employ for a traditional slow-growing electric utility.

Exhibit G: 3%-growing electric utility starts with a 17.8x forward P/E multiple

Cost of Equity Calculation		Absolute P/E Calculation	
Market Premium	6.3%	Dividend Payout Ratio	66.0%
Regulated Electric Beta	0.53	Dividend/Share Growth (g)	3.0%
10-Yr Treasury	3.50%	ESG premium	0.0%
Return on Equity (k)	6.8%	**RBC's Sustainable P/E**	**17.8x**

Source: Bloomberg; FactSet; RBC Capital Markets

We note that the above calculation tries to capture the long-term run rate utility, which, absent the heavy infrastructure requirements that exist in the electric business today, would likely grow only 3% a year, versus the foreseeable growth of 5%-6% a year.

There are only three variables that change for the water sector. One, we were somewhat surprised that the water utility beta is roughly in line to slightly higher than the electric beta. It may be due to the fact that the majority of water utilities are small to mid cap stocks, which can exhibit greater volatility. Two, the underpinning secular growth of the water sector is greater. We have assumed that a slow growing water company should manage to grow 4% per year. And three, we are introducing an ESG premium to our valuation with the launch of our water utility roll-out. We assume that the group starts with a 10% premium due to a combination of ESG investors and water funds that enhance the scarcity value of water stock. When we factor all that in, we arrive at a base P/E of 24.9x, as shown below. From there, we add a premium or discount based on numerous factors, including: quality of regulation, higher/lower growth rate expectation, quality of earnings/cash flow/credit, etc.

Exhibit H: 4%-growing water utility starts with a 24.9x forward P/E multiple

Cost of Equity Calculation		Absolute P/E Calculation	
Market Premium	6.3%	Dividend Payout Ratio	64.0%
Regulated Water Beta	0.55	Dividend/Share Growth (g)	4.0%
10-Yr Treasury	3.50%	ESG/water premium	10.0%
Return on Equity (k)	6.9%	**RBC's Sustainable P/E**	**24.9x**

To access current conflicts disclosures, clients should refer to https://www.rbccm.com/GLDisclosure/PublicWeb/DisclosureLookup.aspx?entityId=1 or send a request to RBC CM Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

A member company of RBC Capital Markets or one of its affiliates managed or co-managed a public offering of securities for Essential Utilities, Inc. in the past 12 months.

A member company of RBC Capital Markets or one of its affiliates received compensation for investment banking services from Essential Utilities, Inc. in the past 12 months.

RBC Capital Markets, LLC makes a market in the securities of Essential Utilities, Inc..

A member company of RBC Capital Markets or one of its affiliates received compensation for products or services other than investment banking services from Essential Utilities, Inc. during the past 12 months. During this time, a member company of RBC Capital Markets or one of its affiliates provided non-securities services to Essential Utilities, Inc..

RBC Capital Markets has provided Essential Utilities, Inc. with investment banking services in the past 12 months.

RBC Capital Markets has provided Essential Utilities, Inc. with non-securities services in the past 12 months.

Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average.

Ratings

Outperform (O): Expected to materially outperform sector average over 12 months.
Sector Perform (SP): Returns expected to be in line with sector average over 12 months.
Underperform (U): Returns expected to be materially below sector average over 12 months.
Restricted (R): RBC policy precludes certain types of communications, including an investment recommendation, when RBC is acting as an advisor in certain merger or other strategic transactions and in certain other circumstances.
Not Rated (NR): The rating, price targets and estimates have been removed due to applicable legal, regulatory or policy constraints which may include when RBC Capital Markets is acting in an advisory capacity involving the company.
As of March 31, 2020, RBC Capital Markets discontinued its Top Pick rating. Top Pick rated securities represented an analysts best idea in the sector; expected to provide significant absolute returns over 12 months with a favorable risk-reward ratio. Top Pick rated securities have been reassigned to our Outperform rated securities category, which are securities expected to materially outperform sector average over 12 months.

Risk Rating

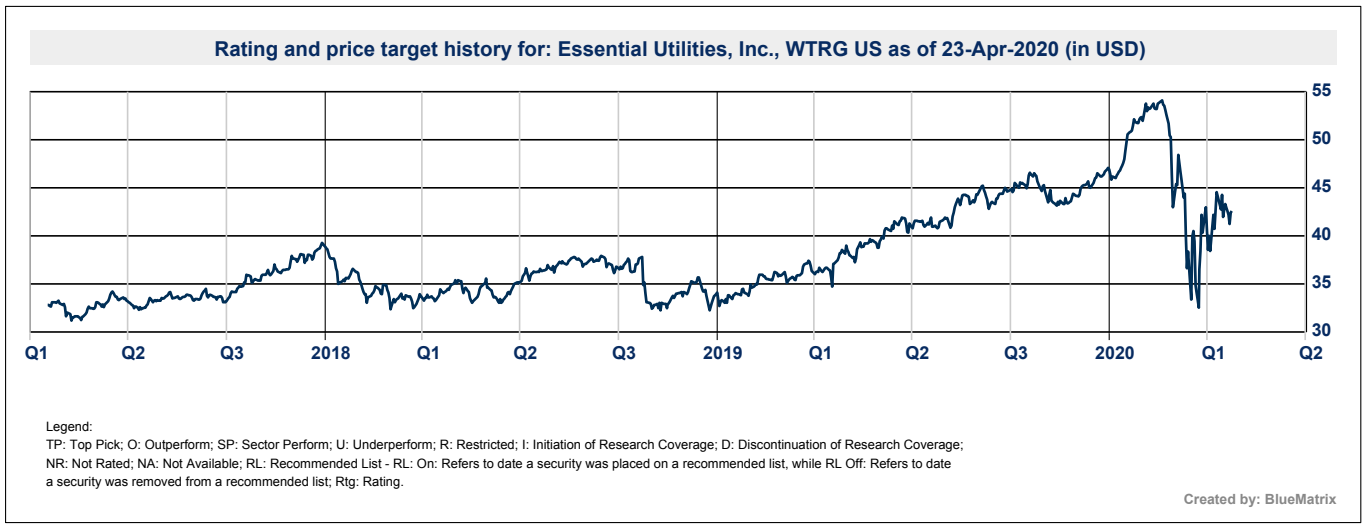
The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm''s own rating categories. Although RBC Capital Markets'' ratings of Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

Distribution of ratings
RBC Capital Markets, Equity Research
As of 31-Mar-2020

			Investment Banking Serv./Past 12 Mos.	
Rating	Count	Percent	Count	Percent
BUY [Outperform]	755	51.64	220	29.14
HOLD [Sector Perform]	619	42.34	126	20.36
SELL [Underperform]	88	6.02	11	12.50



References to a Recommended List in the recommendation history chart may include one or more recommended lists or model portfolios maintained by RBC Wealth Management or one of its affiliates. RBC Wealth Management recommended lists include the Guided Portfolio: Prime Income (RL 6), the Guided Portfolio: Dividend Growth (RL 8), the Guided Portfolio: ADR (RL 10), and the Guided Portfolio: All Cap Growth (RL 12). RBC Capital Markets recommended lists include the Strategy Focus List and the Fundamental Equity Weightings (FEW) portfolios. The abbreviation 'RL On' means the date a security was placed on a Recommended List. The abbreviation 'RL Off' means the date a security was removed from a Recommended List.

Equity valuation and risks

For valuation methods used to determine, and risks that may impede achievement of, price targets for covered companies, please see the most recent company-specific research report at https://www.rbcinsightresearch.com or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7.

Essential Utilities, Inc.

Valuation

Our $49 price target assumes WTRG trades at a 29.4x P/E multiple on our 2021 estimate of $1.67. This multiple represents a 25% premium to our base multiple of 24.9x P/E for water utilities and a 30% premium to our base multiple of 19.3x P/E for gas utilities. The implied return to our $49 price target supports our Outperform rating.

Risks to rating and price target

- Lower-than-anticipated adaptation of fair market value principles across the country could dampen expectations.
- M&A transactions could require greater equity than we forecast, or could result in a weaker balance sheet than we expect.
- Less favorable regulations or disruptions within public utility commissions could weigh on growth.
- Climate variability may cause increased volatility in weather and may impact water usage and related revenue, which may not be recoverable through rates.
- Continued lockdown from coronavirus could impact revenues, through higher bad debt expenses.
- ESG investing continues to gain traction, but WTRG does not meet certain ESG criteria due to Peoples, which makes it ineligible to benefit from these increased flows.

Conflicts policy

RBC Capital Markets Policy for Managing Conflicts of Interest in Relation to Investment Research is available from us on request. To access our current policy, clients should refer to
https://www.rbccm.com/global/file-414164.pdf
or send a request to RBC Capital Markets Research Publishing, P.O. Box 50, 200 Bay Street, Royal Bank Plaza, 29th Floor, South Tower, Toronto, Ontario M5J 2W7. We reserve the right to amend or supplement this policy at any time.

Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.
For a list of all recommendations on the company that were disseminated during the prior 12-month period, please click on the following link: https://rbcnew.bluematrix.com/sellside/MAR.action
The 12 month history of SPARCs can be viewed at https://www.rbcinsightresearch.com.

Analyst certification

Essential Utilities, Inc.

(NYSE: WTRG)

Stock fully valued given market valuations of gas LDCs

Summary:
WTRG's 8.2%/10% water/gas rate base CAGR for 2020-2023 is very impressive, but fully reflected in its current share price, we believe, especially given the ongoing de-rating of gas LDCs, even those with premium rate base/earnings growth prospects. Yesterday, WTRG hosted its 2021 earnings guidance call. The midpoint of its $1.64-1.69 EPS guidance range is in line with consensus expectations.

Highlights

Strong momentum in water/wastewater municipal M&A: WTRG has $420.5MM in pending muni M&A deals on the water/wastewater side, including the $276MM DELCORA transaction which seems likely now that courts have upheld Aqua PA's purchase agreement for the asset. The deals should start boosting WTRG's water earnings in 2022/2023 assuming Aqua PA completes its next water rate case by mid-2022. That's reflected in our model which is based on an 8% water rate base CAGR for 2020-2023. Biden's likely infrastructure spending plan seems unlikely to derail the consolidation of the water/wastewater sector especially in states with the fair value legislation.

De-rating of stocks of gas LDCs: The marginal investor in stocks of US utilities continues to have a strict ESG screen hence the ongoing de-rating of stocks of gas LDCs. Among stand-alone gas LDCs, there is some P/E differentiation between strong (such as ATO or OGS) and weak EPS growers (such as SJI or NJR), but even the premium growers currently trade at a slight 3% discount to an average electric utility on 2023 EPS and at a 46% discount to an average water utility. With an 8-10% rate base CAGR for 2020-2023, WTRG's gas LDC is a fast grower, but that means it deserves to trade at just 16.5x 2023 EPS. A third of WTRG's 2023 EPS should come from gas which is the third highest in our coverage (after ATO and CMS) even after incorporating the DELCORA wastewater transaction.

Tweaking 2021 estimates, adding 2023 estimates: We raised our 2021 EPS estimate to $1.67 from $1.66 to reflect a slightly higher water rate base projection. Our 2022 EPS is unchanged as we added $300MM in equity in 2022 which fully offset the slightly higher water rate base estimate. We introduced our 2023 EPS of $1.90 which also reflects ~ $300MM in equity for that year. That should be enough to fund WTRG's current growth capex assuming the company is able to avoid paying federal cash taxes under Biden's proposed 15% minimum corporate income tax. We don't have PTs for Neutral-rated stocks, but to us, WTRG's current market valuation fully reflects its premium water/gas EPS growth prospects.

Company Description:
WTRG owns and operates water utilities (1 million accounts) and gas utilities (0.74 million accounts) in 10 states though mainly PA.

Essential Utilities, Inc. (WTRG) Disclosures

I, Angie Storozynski, hereby certify: (1) that all of the views expressed in this report accurately reflect my personal views about any and all of the subject securities or issuers; and (2) that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

As with all employees of Seaport Global Securities LLC, a portion of our analysts' compensation is paid from the total collection of revenues from all areas of the firm including but not limited to Investment Banking and Sales and Trading departments. In no instance are research analysts' compensation directly derived from Investment Banking revenues.

Risks & Considerations for Essential Utilities, Inc. (WTRG)

Allowed ROEs for WTRG's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. WTRG's only pending rate case (in NC) is very small.

Lower sales volumes could weigh on WTRG's realized ROEs and thus earnings: A utility can see a meaningful deficiency between its realized and allowed ROE depending on the level of sales volumes and operating expenses. While the latter can be controlled, sharp reductions in sales volumes due to energy efficiency (residential and commercial sales) or closure of industrial facilities. The latter is particularly pronounced during the COVID pandemic. The sharply lower C&I sales volumes could weigh on utility earnings beyond 2020. While rate cases could true up sales volume assumptions, utilities could delay rate filings because their ROE could be reduced during those proceedings on the back of sharply lower interest rates.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, it's up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. WTRG's regulatory calendar is quiet in 2020, with a pending small rate case in NC, and a likely filing for a catch-up repair tax adjustment for Peoples in PA.

Gas utilities have a higher operating risk than water utilities: Over-pressurized gas systems seem to happen more frequently among gas utilities in the US. While we recognize that Peoples Gas is a well-managed system, WTRG's risk profile could further deteriorate with any gas-related operational issues. Additionally, investors increasingly scrutinize the carbon footprint of gas LDCs which in turn weighs on their market valuations.

Risks & Considerations for Atmos Energy Corp. Atmos Energy Corp. (ATO)

Allowed ROEs for ATO's gas LDCs and pipeline could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. ATO's gas LDCs and its pipeline have above-average allowed ROEs and equity ratios especially when compared to regulated electric utilities in TX. Future rate reviews could lead to lower allowed ROEs though cheap natural gas prices are supportive of premium returns for ATO's assets.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, it's up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings.

Gas distribution and transmission systems have a higher operating risk than electric systems: Overpressurized gas distribution pipes have led to explosions and severe regulatory repercussions especially in California and the Northeast. While ATO was not involved in any of these accidents and the company operates in very constructive regulatory regimes, we still see some elevated operating risk vs. an average regulatory utility we cover.

Explanation of Ratings

Seaport Global Securities analyst ratings include (effective Feb. 1, 2017):

Buy - The investment outlook and risk/reward over the following 12 months are favorable on an absolute basis and relative to the peer group.

Neutral - The investment outlook and risk/reward over the following 12 months are neutral on an absolute basis and relative to the peer group.

Sell - The investment outlook and risk/reward over the following 12 months are unfavorable on an absolute basis and relative to the peer group.

NA - A rating is not assigned.

Prior to Feb 1., 2017, Seaport Global Securities analyst ratings included:

Buy - The investment outlook and risk/reward over the following 12 months are very favorable on an absolute basis and relative to the peer group.

Speculative Buy - The investment outlook over the following 12 months is very favorable on an absolute basis and relative to the peer group, however, there is higher than average risk associated with the investment that could result in material loss.

Accumulate - The investment outlook and risk/reward over the following 12 months are favorable on an absolute basis and relative to the peer group.

Neutral - The investment outlook and risk/reward over the following 12 months are neutral on an absolute basis and relative to the peer group.

Reduce - The investment outlook and risk/reward over the following 12 months are unfavorable on an absolute basis and relative to the peer group.

Sell - The investment outlook and risk/reward over the following 12 months are very unfavorable on an absolute basis and relative to the peer group.

NA - A rating is not assigned.

Utilities/Power

Water Utilities: For growth and safety; Initiating coverage of AWK, AWR, CWT, SJW, and WTRG

Summary:
We are initiating coverage of water utilities with a bullish outlook, and **AWK** and **AWR** as our top picks, while we're Neutral on **CWT**, **SJW**, and **WTRG**.
To us, there is no better utility than a water utility:

- The water/wastewater industry remains highly fragmented with ~90% of the US population getting water/wastewater services from municipally-owned systems.
- Water/wastewater systems, especially those owned by municipalities, are heavily under-invested and often non-compliant with EPA regulations. While munis resist water/wastewater M&A, growing budget pressures coupled with fair value laws should facilitate privatizations.
- Outside of CA/HI, water/wastewater bills remain low. The current work-from-home arrangements inflate higher-margin residential water volumes, and we'd expect at least some of this volume uptick to persist beyond 2020, benefiting AWK and WTRG in particular.
- Water/wastewater capex is non-cyclical and highly fragmented.
- Water utilities have high ESG/sustainability ratings. Those translate into rich valuations and a very low cost of financing.

The debate about the right multiple for water vs. electric utilities continues. An average water utility under our coverage grows EPS/DPS at a ~9%/~8% rate or ~300 bps/~300 bps faster than an average regulated electric utility. However, the water EPS growth rates are inflated by recent M&A deals and/or non-water earnings. Based on our 2022 EPS estimates, water utilities under our coverage trade at a ~45% P/E premium to an average regulated electric utility (24.6x vs. 16.9x respectively) which is in line with the historical average. The average 2019 EV/Rate base multiple of 1.78x also seems average.

Highlights

Water utilities: Trading multiples

	Rating	Market Cap ($B)	2019 EV/Rate Base	2022 P/E	2019-2022 EPS CAGR	2019-2022 DPS CAGR
AWK	Buy	22.2	1.74x	26.2x	8.3%	10.0%
AWR	Buy	2.9	1.77x	29.2x	4.9%	7.6%
CWT	Neutral	2.2	1.76x	23.9x	11.5%	7.4%
SJW	Neutral	1.6	1.68x	21.0x	14.0%	6.9%
WTRG	Neutral	10.1	1.94x	22.7x	6.3%	7.0%
Average water			**1.78x**	**24.6x**	**9.0%**	**7.8%**

Water utilities: EPS/DPS CAGRs

	2019-2022 EPS CAGR	2019-2022 DPS CAGR
AWK	8.3%	10.0%
AWR	4.9%	7.6%
CWT	11.5%	7.4%
SJW	14.0%	6.9%
WTRG	6.3%	7.0%
Average	**9.0%**	**7.8%**

Source: Seaport Global Securities

AWK (Buy): AWK's scale and strong operational execution position it well to benefit from ongoing privatization of municipal water/wastewater systems. We acknowledge AWK's 60%+ debt/cap and pending/upcoming rate cases in three of its largest jurisdictions happening during the COVID-19 pandemic. Yet, the strain on municipal budgets on the back of this pandemic could further accelerate muni water deals, with AWK best positioned to consolidate the industry.

AWR (Buy): The company keeps surprising to the upside on its regulated water/electric earnings thanks to strong regulatory and operational execution in CA. Though AWR trades at the highest PE multiple among water names under our coverage, it's largely a function of its military water/wastewater contracts, we believe. When we adjust AWR's EV for those contracts, the stock trades in line with peers on 2019 EV/Rate base.

CWT (Neutral): With its rate base/customer more than a third lower than that of its public peers, CWT offers unmatched long-term EPS growth prospects. Yet, a pending decision by CA regulators in CWT's general rate case could meaningfully increase the volatility in its earnings by removing revenue decoupling and/or balancing accounts for pension/medical expenses. The latter seems likely to us.

SJW (Neutral): The recent cancelation of SJW's temporary revenue decoupling mechanism in CA and a lack of a balancing account for purchase water costs in the state have more severe earnings implications than we once expected. Through the merger with CTWS, SJW reduced its concentration on CA, but the volatility in SJW's earnings is still pretty severe. The stock trades at a large 15% P/E discount to an average water utility on our 2022 EPS though just a 5% discount based on the 2019 EV/Rate base multiples. The volatility in SJW's earnings should persist through at least 2021 because SJW's San Jose Water plans to ask for a purchased water tracker in its next general rate case in CA covering 2022-2024.

WTRG (Neutral): To us, WTRG's recent purchase of a gas utility (Peoples Gas) muddled the original water growth story in exchange for a ~150+ bps pick-up in WTRG's EPS CAGR. Management should pursue a catch-up repair tax deduction for Peoples Gas in PA, but we'd expect most of the earnings benefit to be shared with ratepayers. Given its higher operating risk profile, WTRG's gas earnings are unlikely to ever trade at a water P/E. Given the earnings mix, WTRG seems therefore fairly valued to us.

American Water Works Company, Inc.

(NYSE: AWK)

Best-in-class water growth story

Summary:
We are initiating coverage of AWK with a Buy rating and a $130 price target based on our 2022 SOTP valuation implying 28.4x our 2022 EPS. We see the rich valuation as warranted by AWK's multi-decade investment needs, its low risk profile and growth in ESG-related investing. AWK's above-average 8.3%/10% EPS/DPS CAGR between 2019-2022 should be achievable largely regardless of future economic cycles, driven by organic capex and acquisitions of municipal water systems (~7% EPS growth), with contracted services adding an additional ~1-1.5% to the growth. Assuming no federal infrastructure bill, the current COVID-19 pandemic could, over time, boost muni water/wastewater M&A for large water operators such as AWK. We admit that it's not ideal, however, that AWK will be asking for meaningfully higher rates in three of its largest regulatory jurisdictions (NJ, PA and MO) during the COVID-19 pandemic, or that AWK's net debt/cap should exceed 60% through 2021/2022.

Highlights

Regulated utilities (~88% of 2022 EPS): AWK's 7-8% rate base CAGR between 2019 and 2024 is supported by organic water main replacement capex and acquisitions of municipal water/wastewater systems. While AWK's existing systems offer decades of growth, the customer bill affordability is the key limiting factor for the organic growth. AWK's muni M&A is focused on rural systems with 30,000-60,000 existing customer accounts in states which adopted fair value legislation or similar laws. Assuming no federal infrastructure bill, the muni M&A in the water sector could further accelerate benefiting large water utilities such as AWK in particular, we believe.

Contract-based operations (~12% of 2022 EPS): AWK provides water/wastewater services to 16 military, with pending solicitations for five more contracts, three of which to be awarded still this year. Given the 50-year duration, inflation indexation, premium returns, and the exclusive nature of these contracts we see them as even more valuable than the regulated water business. AWK won more than 50% of all new military water/wastewater service contracts offered to private contractors over the last couple of years, with AWR as the only real competitor in this field. AWK's Homeowner Services business offers warranties mainly for wastewater sewer lines not covered by homeowner's insurance. The business EPS should grow at a ~9% CAGR between 2019 and 2022. We recognize a higher risk profile of this business, reflected in a lower P/E multiple in our 2022 SOTP, but also its strong cash flow generation.

2020 earnings: Management reiterated its 2020 EPS guidance despite the COVID-19 pandemic as higher residential water consumption (~70% of total regulated sales volumes) should more than offset lower C&I volumes, and any meaningful COVID-related expenses, if material, should be deferred. Admittedly, AWK's 2020 earnings guidance always seemed conservative to us though we recognize that it's a particularly busy year on the regulatory front with AWK seeking large revenue increases (US $224MM annualized) in four states, including NJ and PA, AWK's largest jurisdictions, with a likely MO rate case coming later this year.

Company Description:
AWK is the largest publicly-traded regulated water and wastewater utility in the US with operations in 16 states, primarily in the Northeast and the Midwest, serving 3.4 million customer accounts. AWK also engages in unregulated contract-based water/wastewater services for military bases (16 bases) and provides water/wastewater line warranty services (homeowner services) to ~1.5 million residential accounts

Risks

Allowed ROEs for AWK's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings.

Lower sales volumes could weigh on AWK's realized ROEs and thus earnings: A utility can see a meaningful deficiency between its realized and allowed ROE depending on the level of sales volumes and operating expenses. While the latter can be controlled, sharp reductions in sales volumes due to energy efficiency (residential and commercial sales) or closure of industrial facilities. The latter is particularly pronounced during the COVID pandemic. The sharply lower C&I sales volumes could weigh on utility earnings beyond 2020. While rate cases could true up sales volume assumptions, utilities could delay rate filings because their ROE could be reduced during those proceedings on the back of sharply lower interest rates.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. AWK has a particularly busy regulatory calendar in 2020, with rate cases in three of its largest jurisdictions – NJ, PA and MO.

Potentially higher equity needs due to weakening operating cash flows and underfunded pension funds: Lower customer collections (due to lower sales or non-payment) coupled with growing federal cash taxes and underperforming pension funds should be weighing on operating cash flows of regulated utilities especially during/following the COVID-19 pandemic. That in turn could require some deleveraging of balance sheets of regulated utilities thus more equity. AWK already announced ~$500m in new equity as soon as 2022, but the issuances could be enlarged and accelerated to protect AWK's credit ratings.

American States Water Company
(NYSE: AWR)

Pricey water utility, but with best-in-class execution

Summary:
We are initiating coverage of AWR with a Buy rating and an US$84 price target based on our 2022 SOTP valuation which implies 32.6x our 2022 EPS. Trading at 29.2x our '22 EPS, AWR is the most expensive utility under our coverage despite a peer-average EPS/DPS annual growth of ~4.9%/~7.6%. Yet, this is the only CA-based water utility which has always earned at least its allowed ROE and the Street (us included) has historically underestimated AWR's earnings power. While losses in a pension account incurred in March pose some EPS headwind for 2020, we still expect the company to beat its 2020 consensus EPS through higher regulated electric and contract-based earnings. A new general rate case and a cost of capital proceeding will determine AWR's 2022 EPS on the water side, but we still expect our/consensus estimates to turn out low.

Highlights

Regulated water/wastewater utilities (~70% of 2022 EPS): Golden States Water Company (GSWC) has been uniquely successful at earning its allowed ROE and getting regulatory approvals for higher water capex through general rate cases and separate advisory letters. The next general rate case (to be filed in July) and the cost of capital proceeding (to be filed in May 2021) should determine GSWC's earnings power for 2022-2024, and we are hoping for meaningful upside to our 2022 EPS due to higher capex though the allowed ROE (to be determined in a separate proceeding) remains uncertain.

Military contracts/ASUS (~21% of 2022 EPS): Through its unregulated American States Utility Services (ASUS) business, AWR provides water/wastewater services to 11 military bases under 50-year inflation-indexed contracts. The contracts offer periodic openers to account for incremental scope of work thus higher expenses or incremental infrastructure upgrades. Given the duration, premium returns, and the exclusive nature of these contracts we see them as even more valuable than the regulated water business. Hence, in our SOTP, we value the contracts at a 50% P/E premium to water utilities. We see at least three pending RFPs for new water/wastewater contracts for military bases, and while the contract awards may get delayed due to COVID-19, we'd expect at least one of these contracts to be awarded to AWR.

2020 earnings: Thanks to revenue decoupling on both the water and electric side, balancing accounts for both purchased water and power costs, and a catastrophic event memorandum account tracking COVID-related expenses, AWR should not see much of a COVID-19 impact on its regulated earnings if not for losses in one of its pension account, an US$0.08 YoY EPS hit in 1Q20. However, it has yet again become apparent to us that we were underestimating AWR's earnings power on the electric/water side. Management expects to fully execute its water/electric capex plan during 2020. The military contracts division saw some cost overruns during 1Q20, but that's just a timing issue.

Company Description:
AWR is the parent of Golden States Water Co. (GSWC), a regulated water (261,000 water connections in 37 systems) and electric utility (24,400 electric connections in one system) in CA, and American States Utility Services (ASUS), which engages in contract-based water and wastewater services primarily for military bases, currently 11 bases.

Risks

Allowed ROEs for AWR's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. AWR's allowed ROE for its water utility for 2022-2024 should be set by late 2021 in a cost of capital proceeding.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. AWR should be filing a new water rate case by July 2020 with new rates in effect in January 2021.

Returns in pension accounts impact AWR's earnings in between rate cases in CA: AWR has no balancing account tracking changes in returns in its pension accounts. Those changes can be trued up/reflected in AWR's rates during rate cases, but those take place every three years.

Military contracts are highly competitive: Through its unregulated ASUS subsidiary, AWR provides water and wastewater services to 11 military bases. The company awaits awards of up to three more of these contracts in 2020. We assume that AWR secures at least one new military contract per year in 2020-2022 though AWK, AWR's largest competitor, has been winning most of the contract awards as of late.

California Water Services Group

(NYSE: CWT)

Potential earnings volatility overshadows strong rate base growth

Summary:

Thanks to its highly underinvested water systems, CWT offers the fastest earnings growth in regulated water earnings among publicly-traded companies – we project an 11.5% EPS CAGR between 2019 and 2022. However, depending on the outcome of a pending rate case in CA and given conservatism of CWT's management, we could see meaningful volatility in CWT's earnings driven by changes in sales volumes as well higher operating expenses related to pensions, medical insurance and COVID-19. Therefore, we are initiating coverage with a Neutral rating as we await the outcome of CWT's general rate case in CA by July.

Highlights

Regulated water (98% of 2022 EPS): Based on the 2019 rate base per customer connection, CWT's water systems are more than a third less invested than those of its public water peers, even despite sharp capex increases in the last two of CWT's rate cases in CA. CWT's earnings largely followed higher capex and we now project an 11% EPS CAGR between 2019 and 2022. However, CWT awaits a proposed decision in its latest general rate case in CA, and while the utility settled with the consumer advocate on key issues back in October 2019, the revenue decoupling and recovery of pension/ medical costs through balancing accounts remain disputed. We don't expect CWT to lose its revenue decoupling though balancing accounts for pension/medical costs might not get renewed, and that could add some volatility in CWT's earnings.

2020 earnings: CWT is tracking COVID-related expenses in a catastrophic memorandum account, but unlike other CA utilities, it plans to expense the costs until they are recovered in the next rate case. Also, depending on the outcome of the pending general rate case, CWT could be exposed to higher pension and medical costs given a potential removal of balancing accounts for these costs. It helps that CWT never provides earnings guidance, but we see downside to our/consensus estimates for 2020-2022 depending on the outcome of the CA rate case.

CWT: EPS/DPS projections

CWT	2018A	2019A	2020E	2021E	2022E	2019-2022 CAGR

DPS	**0.75**	**0.79**	**0.85**	**0.91**	**0.98**	**7.4%**
Dividend payout	55%	60%	61%	54%	54%	

Source: Company data for 2018-2019; Seaport Global Securities

Company Description:

CWT operates regulated water and wastewater utilities in CA, WA, HI and NM, with 490,000 connections in CA (90%), 36,000 connections in WA (recently doubled through an acquisition), 5,000 in HI, and 8,300 connections in NM.

Risks

Allowed ROEs for CWT's regulated water utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. CWT's allowed ROE for its water utility for 2022-2024 should be set by late 2021 in a cost of capital proceeding.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. CWT awaits a proposed decision in its 2018 general rate case in CA with rates retroactive to January 1, 2021. Though the utility reached a partial settlement with the consumer advocate late in 2019, outstanding issues involve the continuation of the revenue decoupling and balancing accounts for pension and medical expenses. Without those, CWT could see a meaningful spike in its earnings volatility.

SJW Group

(NYSE: SJW)

Earnings volatility too high to handle

Summary:

We are initiating coverage of SJW with a Neutral rating as volatility in SJW's CA earnings (~60% of our 2022 EPS) meaningfully limits the investment appeal of this pure-play regulated water utility. While last year's merger with Connecticut Water Service reduced SJW's exposure to CA and San Jose Water is likely to request a purchased water cost tracker in its next general rate case, we are at least two years away from clarity on this issue. Additionally, SJW's earnings for 2021/2022 should be highly impacted by its upcoming rate cases in CT and CA with some risks of regulatory clawbacks of any merger-related savings, especially in CA.

Highlights

Regulated water/wastewater utilities (95% of 2022 EPS): SJW operates in states with relatively constructive regulatory regimes for water utilities. CT and ME, the jurisdictions of the recently acquired Connecticut Water Service, offer revenue decoupling mechanisms and capex riders thus ensuring that the utilities fully earn their allowed ROEs. In CA, the state offers three-year visibility into capex and separates rate cases from the ROE/equity ratio proceedings, but consumer advocates have been pushing back against revenue decoupling, and San Jose Water has recently lost its temporary decoupling retroactive to 2018. Worse yet, the utility does not currently have a purchased water tracker which should cost SJW even US$0.30 in EPS this year. In TX, SJW sees meaningful growth opportunities supported by a recently adopted fair value legislation, though admittedly starting from a very low customer count. The state has recently adopted a capex recovery rider (DSIC).

2020 earnings: Management issued its first ever earnings guidance in February, but had to lower it by 13% just two months later due to sharply higher purchased water costs due to the lower surface water availability of just ~1.1B vs. 3.5B gallons typically. Additionally, while SJW can track (and eventually recover) COVID-related expenses (including bad debts) in CA through a catastrophic event memorandum account, the utility could see lower capex deployed in the state during 2020, with a catch up in 2021. While SJW no longer has even a temporary revenue decoupling in CA, the COVID pandemic should result in a net increase in water sales volumes as SJW's customer base is predominantly residential (60% of revenues) and apartment buildings dominate among commercial accounts. Those higher volumes could offer some earnings benefit in 2020.

SJW: EPS/DPS growth prospects

SJW	2019A	2020E	2021E	2022E	2019-2022 CAGR
Total EPS	**1.78**	**1.97**	**2.42**	**2.64**	**14.0%**
DPS	**1.20**	**1.28**	**1.37**	**1.47**	**6.9%**
Dividend payout	67%	65%	57%	55%	

Source: Company data for 2019; Seaport Global Securities

Company Description:

SJW Group is a regulated water and wastewater utility serving ~390,000 accounts across CA, CT, TX and ME. SJW merged with Connecticut Water Service in October 2019.

Risks

Allowed ROEs for SJW's regulated water utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. SJW's allowed ROE for its CA water utility for 2022-2024 should be set by late 2021 in a cost of capital proceeding.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. SJW should file a rate case for its new CT business in 2021. Also, the CA utility of SJW should go through a general rate case in the state in 2021 and state regulators could attempt to claw-back some synergies related to the recent merger with CTWS.

SJW's CA earnings are highly volatile: Now that SJW no longer has even a temporary decoupling mechanism in CA, it's CA earnings change along with changes in volumes and changes in purchased water costs. SJW plans to ask for a purchased water cost balancing account in the next rate case in CA, but that means that 2021 could be another weak earnings year before the regulatory fix arrives for 2022, if at all.

Essential Utilities, Inc.

(NYSE: WTRG)

Gas deal muddled the water

Summary:

We are initiating coverage of WTRG with a Neutral rating as we see the stock as close to fairly valued given its water/gas utility mix. WTRG's ~6.3%/7% EPS/DPS CAGR between 2019-2022 should be driven by a 6-7% water and 8-10% rate base growth as well as merger-related synergies related to Peoples Gas. To us, the recent addition of the gas utility to WTRG's core water utility business has diminished the scarcity value of the pure-play water utility in exchange for just a ~150 bps pick-up up in WTRG's consolidated EPS growth. WTRG should try to get some incremental gas utility earnings in PA through a catch-up repair tax deduction, though we'd expect the earnings benefit to be largely clawed back by the state. Assuming no federal infrastructure bill, WTRG could see some incremental municipal water/wastewater M&A on the back of the COVID-19 pandemic, but we prefer to play this benefit through AWK.

Highlights

Regulated water (~67% of 2022 EPS): WTRG's 6-7% water rate base CAGR through 2022 does not incorporate growth through muni acquisitions of water/wastewater systems though WTRG has been very successful at those, especially in PA, its key jurisdiction (68% of 2019 water rate base). All in, we expect WTRG to deliver a ~7% rate base CAGR through 2022, off of 2019 of $5B. Without a federal infrastructure bill supporting upgrades of municipal water/wastewater system, they are likely to be sold to private operators, such as WTRG, at an accelerated pace, following the COVID-19 outbreak, we believe. The growth in WTRG's water rate base should outpace the growth in its water net income through 2022, however, as the Aqua PA pulled forward its earnings through a repair tax election in 2012.

Regulated gas (~33% of 2022 EPS): The 8-10% rate base CAGR on the gas side, together with a recently completed gas rate case in PA and some cost efficiencies related to the merger with WTRG should deliver a 17% net income CAGR for Peoples between 2019 and 2022. That in turn should drive a 6.3% consolidated EPS CAGR for WTRG. That's 100-150 bps higher than our net income growth expectations for WTRG's standalone water business, and admittedly, there could be some further upside to the gas capex and PA could allow WTRG to retain a portion of a catch-up repair tax adjustment. We remain skeptical, however, about the strategic rationale of the gas acquisition as to us it has diminished the scarcity value of WTRG's water utility.

2020 earnings: With higher residential water volumes offsetting lower C&I consumption (~20% of total volumes) and regulators likely allowing for deferrals of COVID costs, WTRG doesn't see risks related to its pro forma 2020 EPS guidance of $1.53-1.58, especially with additional cost levers on the back of the Peoples merger. This should be a quiet year on the regulatory front except for a pending small rate case in NC and a likely filing for a catch-up repair tax deduction in PA, though the timing of the latter is uncertain given the pandemic.

WTRG: EPS breakdown by segment ($)

Source: Company data for 2018-2019; Seaport Global Securities

Company Description:

WTRG owns and operates water utilities (1 million accounts) and gas utilities (0.74 million accounts) in 10 states though mainly PA.

Risks

Allowed ROEs for WTRG's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. WTRG's only pending rate case (in NC) is very small.

Lower sales volumes could weigh on WTRG's realized ROEs and thus earnings: A utility can see a meaningful deficiency between its realized and allowed ROE depending on the level of sales volumes and operating expenses. While the latter can be controlled, sharp reductions in sales volumes due to energy efficiency (residential and commercial sales) or closure of industrial facilities. The latter is particularly pronounced during the COVID pandemic. The sharply lower C&I sales volumes could weigh on utility earnings beyond 2020. While rate cases could true up sales volume assumptions, utilities could delay rate filings because their ROE could be reduced during those proceedings on the back of sharply lower interest rates.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. WTRG's regulatory calendar is quiet in 2020, with a pending small rate case in NC, and a likely filing for a catch-up repair tax adjustment for Peoples in PA.

Gas utilities have a higher operating risk than water utilities: Overpressurized gas systems seem to happen more frequently among gas utilities in the US. While we recognize that Peoples Gas is a well-managed system, WTRG's risk profile could further deteriorate with any gas-related operational issues.

I, Angie Storozynski, hereby certify: (1) that all of the views expressed in this report accurately reflect my personal views about any and all of the subject securities or issuers; and (2) that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

As with all employees of Seaport Global Securities LLC, a portion of our analysts' compensation is paid from the total collection of revenues from all areas of the firm including but not limited to Investment Banking and Sales and Trading departments. In no instance are research analysts' compensation directly derived from Investment Banking revenues.

Risks & Considerations for American Water Works Company, Inc. American Water Works Company, Inc. (AWK)

Allowed ROEs for AWK's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings.

Lower sales volumes could weigh on AWK's realized ROEs and thus earnings: A utility can see a meaningful deficiency between its realized and allowed ROE depending on the level of sales volumes and operating expenses. While the latter can be controlled, sharp reductions in sales volumes due to energy efficiency (residential and commercial sales) or closure of industrial facilities. The latter is particularly pronounced during the COVID pandemic. The sharply lower C&I sales volumes could weigh on utility earnings beyond 2020. While rate cases could true up sales volume assumptions, utilities could delay rate filings because their ROE could be reduced during those proceedings on the back of sharply lower interest rates.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. AWK has a particularly busy regulatory calendar in 2020, with rate cases in three of its largest jurisdictions – NJ, PA and MO.

Potentially higher equity needs due to weakening operating cash flows and underfunded pension funds: Lower customer collections (due to lower sales or non-payment) coupled with growing federal cash taxes and underperforming pension funds should be weighing on operating cash flows of regulated utilities especially during/following the COVID-19 pandemic. That in turn could require some deleveraging of balance sheets of regulated utilities thus more equity. AWK already announced ~$500m in new equity as soon as 2022, but the issuances could be enlarged and accelerated to protect AWK's credit ratings.

Other Companies Mentioned in This Report

- American Water Works Company, Inc. (AWK: $120.17, Buy)
- California Water Services Group (CWT: $43.58)
- Essential Utilities, Inc. (WTRG: $39.90)
- American States Water Company (AWR: $75.62)
- SJW Group (SJW: $55.44)

Explanation of Ratings

Seaport Global Securities analyst ratings include (effective Feb. 1, 2017):

Buy - The investment outlook and risk/reward over the following 12 months are favorable on an absolute basis and relative to the peer group.

Neutral - The investment outlook and risk/reward over the following 12 months are neutral on an absolute basis and relative to the peer group.

Sell - The investment outlook and risk/reward over the following 12 months are unfavorable on an absolute basis and relative to the peer group.

NA - A rating is not assigned.

Prior to Feb 1., 2017, Seaport Global Securities analyst ratings included:

Buy - The investment outlook and risk/reward over the following 12 months are very favorable on an absolute basis and relative to the peer group.

Speculative Buy - The investment outlook over the following 12 months is very favorable on an absolute basis and relative to the peer group, however, there is higher than average risk associated with the investment that could result in material loss.

Accumulate - The investment outlook and risk/reward over the following 12 months are favorable on an absolute basis and relative to the peer group.

Neutral - The investment outlook and risk/reward over the following 12 months are neutral on an absolute basis and relative to the peer group.

Reduce - The investment outlook and risk/reward over the following 12 months are unfavorable on an absolute basis and relative to the peer group.

Sell - The investment outlook and risk/reward over the following 12 months are very unfavorable on an absolute basis and relative to the peer group.

NA - A rating is not assigned.

Utilities/Power

Investor feedback on utilities/power stocks - Part 2

Summary:
Since our initiation of coverage of the Utilities sector last week, we've collected various feedback from clients. As a follow-up to part 1 (click here), we offer additional perspectives on our coverage universe.

- **DTE**'s midstream business continues to weigh on the stock's valuation though investors recognize DTE's exceptional financial track record plus some potential upside to the midstream earnings.
- Investors recognize that **EXC** and **PEG** do not currently reflect any value for their merchant power businesses, with little differentiation between both stocks, but see little incentive to support the names ahead of FRR decisions in IL/NJ and an update on a federal investigation of EXC's lobbying practices in IL.
- The recent short squeeze and upcoming regulatory updates are likely behind a strong outperformance of **AGR** and **PPL** vs. the XLU since our launch (+7.8% for AGR and +9.3% for PPL vs. +5% for XLU). The stories continue to face challenges, but AGR's NY rate case settlement should be filed any day now and the BOEM should update its review of the Vineyard Wind project in mid-June. Ofgem, the UK electric/gas utility regulator, should update its thoughts on allowed returns for electric transmission and gas distribution networks in late June, and that could be neutral to marginally positive for PPL, we believe.
- The recent rally among smid-cap stocks seems to have supported smaller water utilities, with **AWK**, our top pick for water names, trailing smaller names, **SJW** in particular, despite no fundamental updates. Among water names, AWK continues to attract most investor support, especially from those with an ESG mandate. Hedge funds remain attracted to **WTRG** given potential upside to gas earnings in PA and some expecting WTRG's gas earnings to gradually gain a water P/E multiple vs. the current 30% discount, we estimate. Investors recognize AWR's strong operational and financial track record despite a pension-related earnings hit in 1Q20.

Highlights

Regulated/diversified electric/gas utilities:

AGR (Neutral): The updated rate case settlement for AGR's NY utilities (NYSEG & RG&E) should be out any day and that, together with management's outreach has triggered a debate on AGR's bear investment thesis. In ME, AGR has filed a court challenge to the inclusion of the NECEC electric transmission project on the November ballot – a court decision would need to come out before September 11 when the ballots should be printed. Last week's FERC decision on the MISO electric transmission ROE and the methodology to set it has been widely seen as constructive by investors though more for AEP/FE rather than New England transmission operators (AGR/ES). The new methodology when updated for a 100 bps RTO adder would imply a wider range of reasonableness, with the high end 10.6-10.7%, we estimate. Challenges to FERC transmission ROEs for New England operators are still pending, they cover a different/earlier period (thus a higher interest rate environment) and FERC has not yet opined on additional non-RTO ROE adders and thus a cap on the all-in transmission ROEs for new projects. AGR currently earns ~11.3% in all-in transmission ROEs in CT and ME (vs. ~11.5% for ES), so we/investors don't see much (if any) downside to AGR's transmission earnings assuming higher incentive caps. Management still expects the BOEM to comment on the Vineyard Wind (VW) offshore wind project (a supplement to VW's Environmental Impact Statement) on June 12 and the Bureau to issue the final permit for the project in December 2020. Assuming no additional delays, we hope for some positive implications for AGR and ES.

DTE (Buy): Among all of our Buy-rated names, we had expected most constructive investor feedback on DTE given that the stock seemed to be trading even below the fair value of its regulated utilities (assuming a CMS-like P/E). The feedback has been mixed with the stock just marginally outperforming the XLU since our launch though gaining some strength this week. In general, investors recognize DTE's strong execution track record and its premium regulated utilities in MI. They admit that DTE's midstream business is less commodity-price sensitive than average, that it could benefit from higher gathering demand in the Northeast in 2021 and that NEXUS could see some longer-term contracts if/when ACP/MVP pipelines get delayed. Yet, an average investor would rather create a "synthetic DTE" by buying shares of CMS and a midstream business, though the latter would have to come at a negative equity value to truly reflect DTE's current valuation. We hope that with strong operational execution, no negative updates from Antero/Southwestern, and further construction delays for MVP/ACP the DTE stock should continue to re-rate through the end of 2020.

EXC (Buy)/PEG (Neutral): Investors don't see much difference between the two stocks or the reason to support either one any time soon. Neither implies any value for their respective merchant power businesses even though both should see some upside to their nuclear power earnings from IL and NJ eventually pursuing the FRR option outside of the PJM capacity market. For EXC, investors seem reluctant to support the stock ahead of an update on a pending federal investigation of Exelon's/ComEd's lobbying practices in IL or the November legislative session in the state where the FRR future could be decided. For PEG, though the company thinks no

legislation is needed for NJ to pursue an FRR option, the NJ BPU (state's utility regulator) is unlikely to opine on the FRR until early/mid-2021, we believe. In the meantime, PEG's electric transmission ROE should drop and the company is likely to pursue an equity stake in Orsted's Ocean Wind offshore wind project off the coast in NJ, likely intensifying the debate about the future of margins of PEG's gas plants in NJ/MD/CT.

PPL (Neutral): Investors seem unanimously surprised by our Neutral stance on the name despite ongoing FX pressures and the lack of growth prospects for PPL's US utilities until 2025 or beyond. Our Neutral rating was based a combination of somewhat fair valuation and our expectations that Ofgem's pending review of allowed equity returns for electric transmission and gas distribution won't result in an incremental reduction in the equity return (RORE) on the back of lower interest rates. The returns are still coming down however – starting April 2023, we'd expect the realized RORE for WPD to not exceed 9% vs. ~13-13.5% currently. Since our launch, PPL has outperformed the XLU by 420 bps and now the stock seems to imply a 37% premium to the 2022 EV/RAB for WPD assuming just a 5% discount to PPL's slow growing US utilities. The valuation yet again looks rich to us though PPL's 6% 2020 dividend yield does provide some support, and we believe the company could maintain the current level of dividends given lower regulated utility capex.

Water utilities:

AWK (Buy): Investors continue to like the story and, for once, few questioned AWK's current valuation premium vs. an average electric utility (~52% on our 2022 estimates). Investors appreciate how resilient the stock has been YTD (+0.7% vs. -8.7% for XLU and -5.4% for S&P 500). The heavy regulatory calendar for 2020 doesn't seem to worry investors.

AWR (Buy): Dedicated water utility investors recognize AWR's strong earnings/operational track record despite a large pension-related earnings hit in 1Q20. The high valuation premium we assign to AWR's (and AWK's) military contracts has received some debate, but overall we've heard little to no pushback to our bullish stance on AWR especially given growing volatility in earnings of AWR's peers in CA, CWT and SJW.

WTRG (Neutral): Hedge funds and some long-onlys remain attracted to WTRG given potential upside to gas earnings in PA and some expecting WTRG's gas earnings to gradually gain a water P/E multiple vs. the current 30% discount, we estimate. We recognize incremental cost levers on the back of the Peoples merger and that the look back repair tax application to be filed for the business in PA could deliver incremental earnings though it's tough for us to say how meaningful the EPS benefit would be after sharing with ratepayers. We do admit, however, that the stock does not currently discount any incremental earnings upside in PA.

Utilities/Power Disclosures

I, Angie Storozynski, hereby certify: (1) that all of the views expressed in this report accurately reflect my personal views about any and all of the subject securities or issuers; and (2) that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

As with all employees of Seaport Global Securities LLC, a portion of our analysts' compensation is paid from the total collection of revenues from all areas of the firm including but not limited to Investment Banking and Sales and Trading departments. In no instance are research analysts' compensation directly derived from Investment Banking revenues.

MARKETING COMMUNICATION

The Seaport Group Europe LLP ("SGE") and Sea Port Group Securities (Europe) LLP ("SPGSE") are authorized and regulated by the Financial Conduct Authority. Due to their size and structure, their analysts may represent the interests of the firm or of companies referred to in its research. As a result, SGE or SPGSE does not hold its research out as being impartial. This research is non-independent and is classified as a Marketing Communication under the FCA's rule COBS 12.2.18. As such it has not been prepared in accordance with legal requirements designed to promote the independence of investment research and it is not subject to the prohibition on dealing ahead of the dissemination of investment research in COBS 12.2.21. However, SGE and SPGSE have adopted internal procedures which prohibit employees from dealing ahead of the publication of non- independent research, except for legitimate market making and fulfilling clients' unsolicited orders.

Analysts may forward a draft copy of the non-independent research, prior to publication, to the subject company in order to verify facts. Where such verification is sought, the analyst must remove any rating or investment summary from the non-independent research prior to forwarding it to the subject company. Any subsequent amendments to the non-independent research are to correct factual inaccuracies only. Any matters of judgment are the author's own and our analysts will not amend the non-independent research on the basis of an issuer's contrary view.

Price targets or Projections

Price targets or projections, if discussed, reflect in part the analyst's estimates for the company's earnings. The achievement of any price target or projection may be impeded by general market and macroeconomic trends, and by other risks related to the company or the market, and may not occur if the company's earnings fall short of estimate.

DISCLAIMERS

This material is: (i) for your private information, and we are not soliciting any action based upon it; (ii) not to be construed as an offer to sell or a solicitation of an offer to buy any investments or other related financial instruments in any jurisdiction where such offer or solicitation would be illegal; and (iii) is based upon information that we consider reliable, but we do not represent that it is accurate or complete, and it should not be relied upon as such.

Opinions expressed are current opinions as of the original publication date appearing on this material only and the information, including the opinions contained herein, are subject to change without notice. Members of Seaport Global may from time to time perform investment banking or other services (including acting as advisor, manager or lender) for, or solicit investment banking or other business from, companies mentioned herein. Further, members of Seaport Global, and / or its officers, directors and employees, may, from time to time, have long or short positions in, and buy or sell, the investments, securities, derivatives (including options) or other related financial instruments thereof, of companies mentioned herein, or related investments, securities, derivatives or other related financial instruments. In addition, members of Seaport Global may act as a market maker and principal, willing to buy and sell certain of the investments, securities or other related financial instruments of companies mentioned herein. Further, members of Seaport Global may buy and sell certain of the investments, securities or other related financial instruments of companies mentioned herein, as agent for its clients.

Investors should consider this report as only a single factor in making their investment decision and, as such, the report should not be viewed as identifying or suggesting all risks, direct or indirect, that may be associated with any investment decision. SGE, SPGSE and other non-US members of Seaport Global, their officers, directors and employees may, to the extent it relates to non-US issuers and is permitted by applicable law, have acted upon or used this material immediately following, its publication.

The securities described herein may not have been registered under the U.S. Securities Act of 1933 ("ACT") , and, in such case, may not be offered or sold in the United States or to U.S. persons unless they have been registered under such Act, or except in compliance with an exemption from the registration requirements of such Act.

Unless governing law permits otherwise, you must contact a Seaport Global entity in your home jurisdiction if you want to use our services in effecting a transaction in the investments, securities or other related financial instruments mentioned in this material.

This publication has been approved for distribution in the United Kingdom by The Seaport Group Europe LLP and Sea Port Group Securities (Europe) LLP, which are authorized and regulated by the Financial Conduct Authority (FCA). It is intended only for investors who are professional clients and eligible counterparties as defined by the FCA, and may not, therefore, be redistributed to other classes of investors.

The Seaport Group Europe LLP, Sea Port Group Securities (Europe) LLP and other Seaport Global entities manage conflicts identified through the following: their Chinese Wall, confidentiality and conflicts of interest policies, maintenance of a Restricted List and a Watch List, personal account dealing rules, policies and procedures for managing conflicts of interest arising from the allocation and pricing of investments, securities or other related financial instruments and disclosure to clients via client documentation.

Utilities

2Q20 Earnings Preview (Correction*)

Summary:
We expect strong 2Q20 earnings prints for electric utilities thanks to strong residential electric sales, sooner-than expected recovery in C&I loads, and aggressive cost-cutting. Consensus estimates look stale to us, but we expect the strongest positive surprises from MI utilities, **CMS** and **DTE**, though no increase in the 2020 EPS guidance for **DTE** at this point, **SRE**, thanks to tax benefits and cost efficiencies at SDG&E/SoCalGas, and **AEP**, thanks to aggressive cost-cutting which started before COVID. We struggle to call **ETR** results.

There should be plenty of volatility in earnings of water stocks, **CWT** and **AWR** in particular, and that's even before CA makes changes to the revenue decoupling mechanism (WRAM). There should be few surprises from **AWK** and **WTRG**. We chase **AWK** and raise our price target to $145.50 from $130.

Power/retail stocks in TX, **NRG** and **VST**, should report very strong results even though we have yet to see scarcity in spot power prices in ERCOT. Thanks to solid 1H20 results both **NRG** and **VST** should be tracking ahead of the midpoint of their 2020 EBITDA guidance ranges, but we don't expect them to narrow/raise the guidance just yet. We raised our 2021/2022 EBITDA estimates for **VST** to reflect additional hedges.

We updated 2Q20 earnings estimates for: **AEP, AES, AGR, ATO, AWK, AWR, CMS, CWT, D, DTE, DUK, EIX, ES, ETR, EXC, FE, NRG, PCG, PEG, PPL, SJW, SO, SRE, VST and WTRG**. We also increased our price target for **AWK**.
*(*Correction made to the original version of this note: Our 2Q20 estimate for PEG displayed on page 3 has been corrected.)*

Highlights

Electric/gas utilities

An earlier than expected recovery in C&I loads coupled with cost-cutting and some YoY weather benefit should deliver strong earnings beats for MI utilities, **CMS** and **DTE**, in our view. **AEP's** aggressive cost-cutting started pre-COVID should support 2Q20 results while the load weakness should be largely in-line with management's forecasts from the 1Q20 call. The company plans to provide an updated capex and cash flow schedule through 2023 which should incorporate lower capex in 2020 and the $2B North Central Wind project (and its financing). **D** and **SO** should have some weather-related headwinds in 2Q20, but updates on the Vogtle cost schedule (Unit 3 % completion in May and June) and cost contingency being utilized should dominate **SO**'s earnings call. **SO** kept its May 2021 in-service date for Vogtle unit 3 to help with managing the scheduling of the construction work on the site, but the decision has not been well-received by investors. **DUK** plans to provide an update on its capex replacement for the cancelled ACP pipeline only on the 4Q20 earnings call, but we'd expect the replacement for the $2B capex reduction to start only in 2022.

Water utilities

AWK and **WTRG** should have relatively easy YoY comps in the Northeast/Mid-Atlantic as 2Q19 was very rainy, and **WTRG** now has additional cost levers thanks to the Peoples Gas merger. We don't expect any meaningful COVID impacts on their 2Q20 or annual 2020 earnings. Intervener testimonies in **AWK's** NJ rate case should be made public any day now – this rate case together with similar proceedings in PA and MO should dominate **AWK's** earnings call. We are chasing **AWK's** stock by raising our price target to $145.50 from $130 previously.

WTRG's pending acquisition of the Delcora wastewater system in PA has run into legal issues, making investors concerned about the future of municipal water/wastewater M&A.

In CA, Commissioner Guzman Aceves has yet again proposed to do away with the current full revenue decoupling mechanism (WRAM) for investor-owned water utilities, calling it ineffective at promoting water conservation. The CPUC should consider/vote on the proposed decision as soon as August 6. **AWR's** GSWC will have filed its new General Rate Case (GRC) by then while **CWT's** and **AWK's** GRCs in CA are already pending. We therefore assume that any changes to the WRAM, if any, would apply to these companies only in the next GRC, starting in 2024.

CWT keeps waiting for an approval of its GRC to record a revenue increase. In the meantime, **CWT's** quarterly results should continue to come well below expectations. We expect **AWR** to fully recoup the $0.08 EPS hit recorded in 1Q20 related to the underperformance of its pension funds.

Power/retail

The TX load has recovered to pre-COVID levels and while we have seen no real scarcity in power prices so far this summer, strong retail results supported by lower than expected bad debt and optimization of generation hedges should support 2020 EBITDA for **VST** and **NRG** at least at the midpoint of their annual guidance. We don't expect them to narrow the guidance yet, however, as August tends to be a crucial earnings month for both companies.

NRG should provide an update on its 2020 capital allocation strategy which might include another retail acquisition. **VST** hasn't given up on some uplift to forward power curves in TX happening in late August/early September, like we saw last year. Yet, even without the recovery and thanks to additional power hedges, the downside to 2021 EBITDA seems now lower than the $200-250MM below the midpoint of the 2020 guidance range that VST used to quote as a COVID-related downside scenario. Therefore, we raised our 2021/2022 EBITDA expectations for VST to $3,135MM/3,044MM up from $3,034MM/3,009MM, respectively.

We expect **AES** to keep its new/lowered EPS guidance range for 2020 though 2Q20 should be weak on a combination of the DPL/ Argentina/IPL hits, with the earnings uplift from cost-cutting and Southland's PPA should kick in only in 3Q20. The OH and IN load seem to be performing ahead of management's expectations from the 1Q20 earnings call. We await an update on another divestiture of coal-fired plant, potentially Maritza in Bulgaria, we believe.

Utilities

Water utilities – Updated thoughts following 2Q20 earnings season

Summary:
There is no better utility than a water utility, but even they have regulatory issues like potential changes to the revenue decoupling in CA or regulatory/legal delays to asset acquisitions/sales like with **AWK** in NY or **WTRG** in PA. **AWK** and **AWR** remain our favorite water utilities, and we are impressed with **WTRG**'s strong growth prospects on the gas side, especially if the catch-up repair tax deduction in PA is approved. We updated our thoughts on **AWK, CWT, SJW,** and **WTRG**. We are raising our PT for **AWK**. Also note that we published an update on **AWR** last week (link).
Managements of **AWK** and **AWR** will be attending Seaport's Virtual Summer Conference on August 26. Please use the link to register for the event (registration link).

Highlights

AWK – Teflon stock: The COVID-related drop in C&I sales volumes more than offset higher residential sales, leading to a $0.04 EPS hit to AWK's regulated earnings in 2Q20. Management chose not to offset it with cost-cutting though the hot and dry summer in the Mid-Atlantic and the Midwest should do the trick. We have very limited visibility into AWK's large pending rate cases (requesting $294MM in annualized revenue increases) and the sale of the NY system is getting delayed. Yet, those are still not enough to diminish AWK's investment appeal to us. Therefore, we reiterate our Buy rating and raise our PT to $152 from $145.50.

AWR – Appealing EPS/DPS growth despite decoupling uncertainty: Potential changes to AWR's water revenue decoupling caught us by surprise, but we'd still expect the company to earn its allowed ROEs on the water and electric side, and the military contract business to deliver incremental growth. We raise our 2020/2022 EPS and 2020-2022 DPS estimates. We recently trimmed our PT to $83 from $84 to reflect the risk to the water decoupling and reiterated our Buy rating.

CWT – Waiting continues: Last week, the CPUC delayed its decision on changes to the full decoupling mechanism for water utilities (WRAM). Yet, depending on the outcome of a pending rate case in CA (GRC) and given conservatism of CWT's management, we could see meaningful volatility in CWT's earnings driven by changes in sales volumes as well higher operating expenses related to pensions, medical insurance and COVID-19. The stock trades at a 7% 2022 P/E discount to an average water utility which seems fair to us.

SJW – Delivering against lowered guidance: SJW maintained its lowered 2020 EPS guidance range as the $0.30/share EPS hit for higher purchased water costs remained unchanged, water sales were not materially impacted by COVID, and the accounts collections, though slowing, remained strong. The stock trades at an 8% 2022 P/E discount to an average water utility which seems a bit rich to us given the higher-than-average volatility in SJW's sales volumes and thus realized ROEs. We maintain our Neutral rating.

WTRG – Catch-up repair tax deduction in PA: WTRG sees no negative earnings impact from COVID as stronger residential sales offset lower C&I volumes, and the recent merger with Peoples Gas adds cost levers. The catch-up repair tax deduction in PA would extend the strong mid-teen annual EPS growth rate for gas through even 2026. The future of the DELCORA wastewater acquisition remains uncertain, but WTRG already issued equity to finance it. We maintain our Neutral rating.

American Water Works Company, Inc.

(NYSE: AWK)

Teflon stock; raising PT

Summary:
The COVID-related drop in C&I sales volumes more than offset higher residential sales, leading to a $0.04 EPS hit to AWK's regulated earnings in 2Q20. Management chose not to offset it with cost-cutting though the hot and dry summer in the Mid-Atlantic and the Midwest should do the trick. We have very limited visibility into AWK's large pending rate cases (requesting $294MM in revenue increases) and the sale of the NY system is getting delayed. Yet, those are still not enough to diminish AWK's investment appeal to us. Therefore, we reiterate our Buy rating and raise our PT to $152 from $145.50.

Highlights

COVID hit to earnings: In 1H20, the COVID-related pick up in residential sales volumes was not enough to offset lower C&I sales, leading to a $0.04 EPS hit to regulated earnings. Management doesn't want to make arbitrary cost reductions to offset this (hopefully) one-time earnings hit. Given the hot and dry summer in the Mid-Atlantic and the Midwest, the weather-driven spike in usage should offset the COVID expenses, especially as AWK's water demand should have become more sensitive to CDDs and changes in precipitation levels, we believe.

Rate cases: 2020 is a very busy regulatory year for AWK, and we have little clarity on its pending rate cases, in particular in NJ and CA. The interveners in the NJ case filed their testimonies, but those haven't been made public by the regulator/BPU. In CA, the regulator/CPUC proposed to remove full revenue decoupling for water utilities (WRAM) given that it has not resulted in water conservation. The vote of the Commission on this issue has been delayed, and for now, we assume that AWK's pending general rate case in the state should not be affected thus providing visibility into realized ROEs in CA through 2023.

NY asset sale: In November 2019, AWK announced the sale of its NY operations to Liberty Utilities for $608MM and hoped to finalize the transaction in 2H20. The regulatory review of the deal got originally delayed due to COVID, and the NY PSC recently extended from August 3 to October 15 the deadline for munis to submit municipalization proposals for their systems within AWK's NY service territory. Long Island, NY is a challenging jurisdiction for AWK, so we remain hopeful the sale transaction should eventually close, and the ~$400MM in net proceeds should offset AWK's future equity needs.

Estimates and valuation: Our 2021/2022 EPS estimates remain unchanged as we await outcomes of AWK's numerous rate cases. We raised our 2020 EPS estimate to $3.85 from $3.84 based on YTD results and as we expect the summer weather to offset the COVID impact. We raised our PT to $152 from $145.50 as we continue to chase the stock. Our new PT is based on our 2022 SOTP valuation and implies a 33.2x 2022 EPS up from 32x previously.

Company Description:
AWK is the largest publicly-traded regulated water and wastewater utility in the US with operations in 16 states, primarily in the Northeast and the Midwest, serving 3.4 million customer accounts. AWK also engages in unregulated contract-based water/wastewater services for military bases (16 bases) and provides water/wastewater line warranty services (homeowner services) to ~1.5 million residential accounts

California Water Services Group

(NYSE: CWT)

Waiting continues

Summary:

Last week, the CPUC delayed its decision on changes to the full decoupling mechanism for water utilities (WRAM). Yet, depending on the outcome of a pending rate case in CA (GRC) and given conservatism of CWT's management, we could see meaningful volatility in CWT's earnings driven by changes in sales volumes as well higher operating expenses related to pensions, medical insurance and COVID-19. The stock trades at a 7% 2022 P/E discount to an average water utility which seems fair to us.

Highlights

Potential changes to revenue decoupling: One of CPUC Commissioner has renewed her previous proposal to do away with WRAM for CA water utilities as, according to her, it has failed to result in water conservation. The proposed decision related to this issue has been held by the Commission at least until the August 27 meeting of the CPUC. The Commissioner proposed to adopt WRAM changes only in the next rate following the CPUC approval which, if adopted as currently proposed, would mean CWT should retain the full decoupling until the end of 2022, our current assumption.

Awaiting proposed decision in 2020 GRC: The CPUC should issue a proposed decision in this case by late August. While most of the issues in the rate case were settled, the revenue decoupling mechanism and balancing accounts for pension and healthcare expenses were not a part of the settlement.

Estimates and valuation: We lowered our 2020 EPS estimate by $0.01 to $1.38 to reflect COVID-related expenses which are being expensed despite a catastrophic memorandum account which other CA utilities use to defer these costs. CWT trades at a 7% 2022 P/E discount to an average water utility in the US despite premium EPS growth prospects. Yet, the discount seems fair to us given the ongoing uncertainty regarding CWT's general rate case and the potential volatility in CWT's future earnings power.

Company Description:

CWT operates regulated water and wastewater utilities in CA, WA, HI and NM, with 490,000 connections in CA (90%), 36,000 connections in WA (recently doubled through an acquisition), 5,000 in HI, and 8,300 connections in NM.

SJW Group

(NYSE: SJW)

Delivering against lowered guidance

Summary:

SJW maintained its lowered 2020 EPS guidance range as the $0.30/share EPS hit for higher purchased water costs remained unchanged, water sales were not materially impacted by COVID, and the accounts collections, though slowing, remained strong. The stock trades at an 8% 2022 P/E discount to an average water utility which seems a bit rich to us given the higher-than-average volatility in SJW's sales volumes and thus realized ROEs. We maintain our Neutral rating.

Highlights

CA: The water usage volumes tracked authorized sales levels with higher residential sales offsetting lower C&I volumes. San Jose Water had adequate water supplies and continues to expect a ~$0.30 EPS hit in 2020 from the lower availability of surface water. The utility's three-year capex in CA of $320MM remains achievable.

CT: The recent Isaiah storm caused widespread power outages in the state, forcing ~100 facilities of CT Water to run on back-up generators, but the water service continued uninterrupted. We assume that Connecticut Water should be able to defer and subsequently recover incremental costs related to the storm.

Estimates and valuation: SJW reaffirmed its previously lowered 2020 EPS guidance range of $1.95-2.05. In 1H20, SJW recorded $0.12/share in merger-related cost benefits in $0.12/share in other benefits, ahead of our prior expectations. We raised our 2020/2021 EPS estimates to $2.00/2.43 from $1.97/2.42 to reflect stronger-than-expected sales volumes in CA during 2020 and some incremental cost efficiencies in both 2020 and 2021. SJW trades at an 8% 2022 P/E discount to an average water utility while offering a stronger-than-average EPS growth (though with an above-average volatility) and an average DPS growth. To us, SJW deserves a 10%+ discount to an average utility and that's why we stick to our Neutral rating.

Company Description:

SJW Group is a regulated water and wastewater utility serving ~390,000 accounts across CA, CT, TX and ME. SJW merged with Connecticut Water Service in October 2019.

Essential Utilities, Inc.

(NYSE: WTRG)

Catch-up repair tax deduction in PA

Summary:
WTRG sees no negative earnings impact from COVID as stronger residential sales offset lower C&I volumes, and the recent merger with Peoples Gas adds cost levers. The catch-up repair tax deduction in PA would extend the strong mid-teen annual EPS growth rate at Peoples through even 2026. The future of the DELCORA wastewater acquisition remains uncertain, but WTRG already issued equity to finance it. We maintain our Neutral rating.

Highlights

No COVID impact on earnings: With stronger residential sales volumes offsetting lower C&I sales and regulatory deferrals of bad debts and other COVID-related expenses, WTRG saw no earnings impact from the pandemic in 1H20. We could see some positive earnings impact if the current heat continues in PA – dry lawns should be eyesores to residential customers working from home during COVID.

Catch-up repair tax deduction for Peoples Gas in PA: Last week, following consultations with the regulator (PA PUC), Peoples Gas field its long-awaited application in this case. The additional tax deduction of $380.7MM (~$141MM tax benefit) is related to federal and state taxes for tax years 2012-2019 and through March 2020. The company proposed a $14MM annual customer credit for four years (2021-2024) which would represent less than a 2% reduction in a residential monthly bill. It seems very low to us, but is constrained by Peoples' limited tax capacity as the utility uses forward-looking repair tax deductions especially in 2021 and 2022. The remaining $85MM in tax deductions would be used by Peoples in 2023-2026 to boost realized ROEs by reducing the tax expense. It's an interesting proposal as it extends the current strong earnings growth at Peoples through 2026, but doesn't change the growth trajectory through 2022 thus avoiding a likely fierce regulatory battle in PA.

DELCORA wastewater acquisition: Aqua PA believes it has a legally-binding purchase agreement for the wastewater system from last November and the regulatory approval process of the transaction at the PA PUC should conclude in early 2021, assuming no delays. The Delaware County sued to stop the sale and by mid-September a judge in the case should rule if the County has a right to stop the sale transaction. The issue seems to be who gets the net proceeds from the sale transaction (~$200MM) – the County or a trust which would offset future ratepayer bill increases as Aqua plans to invest $700MM in the system over the next couple of years. Last night, WTRG priced a 6.7MM share equity forward which should finance the DELCORA deal, we believe, even though the future of the transaction seems uncertain to us.

Estimates and valuation: We raised our 2020 EPS estimate by $0.01 to $1.56 to reflect favorable weather and no COVID-related EPS drag. We raised our 2022 EPS by $0.01 to $1.77 to reflect marginally higher merger-related cost efficiencies. WTRG trades in line with CWT and slightly higher than SJW based on our 2022 EPS estimates which seems fair to us given that ~30% of WTRG's EPS should come from a gas LDC rather than a water utility.

Company Description:
WTRG owns and operates water utilities (1 million accounts) and gas utilities (0.74 million accounts) in 10 states though mainly PA.

Utilities Disclosures

I, Angie Storozynski, hereby certify: (1) that all of the views expressed in this report accurately reflect my personal views about any and all of the subject securities or issuers; and (2) that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

As with all employees of Seaport Global Securities LLC, a portion of our analysts' compensation is paid from the total collection of revenues from all areas of the firm including but not limited to Investment Banking and Sales and Trading departments. In no instance are research analysts' compensation directly derived from Investment Banking revenues.

Risks & Considerations for American Water Works Company, Inc. American Water Works Company, Inc. (AWK)

Allowed ROEs for AWK's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings.

Lower sales volumes could weigh on AWK's realized ROEs and thus earnings: A utility can see a meaningful deficiency between its realized and allowed ROE depending on the level of sales volumes and operating expenses. While the latter can be controlled, sharp reductions in sales volumes due to energy efficiency (residential and commercial sales) or closure of industrial facilities. The latter is particularly pronounced during the COVID pandemic. The sharply lower C&I sales volumes could weigh on utility earnings beyond 2020. While rate cases could true up sales volume assumptions, utilities could delay rate filings because their ROE could be reduced during those proceedings on the back of sharply lower interest rates.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. AWK has a particularly busy regulatory calendar in 2020, with rate cases in three of its largest jurisdictions – NJ, PA and MO.

Potentially higher equity needs due to weakening operating cash flows and underfunded pension funds: Lower customer collections (due to lower sales or non-payment) coupled with growing federal cash taxes and underperforming pension funds should be weighing on operating cash flows of regulated utilities especially during/following the COVID-19 pandemic. That in turn could require some deleveraging of balance sheets of regulated utilities thus more equity. AWK already announced ~$500m in new equity as soon as 2022, but the issuances could be enlarged and accelerated to protect AWK's credit ratings.

Risks & Considerations for American States Water Company American States Water Company (AWR)

AWR's water utility (GSWC) could see volatility in earnings due to usage: The CPUC considers changes to the current water revenue decoupling mechanism (WRAM). While it should not impact GSWC until the next rate case, covering 2024-2026, CA utility consumer advocates push for an immediate change to the decoupling mechanism. GSWC has always excelled at earning at least its allowed ROE in CA, but it could prove challenging with WRAM.

Allowed ROEs for AWR's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. AWR's allowed ROE for its water utility for 2022-2024 should be set by late 2021 in a cost of capital proceeding.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. AWR should be filing a new water rate case by July 2020 with new rates in effect in January 2021.

Returns in pension accounts impact AWR's earnings in between rate cases in CA: AWR has no balancing account tracking changes in returns in its pension accounts. Those changes can be trued up/reflected in AWR's rates during rate cases, but those take place every three years.

Military contracts are highly competitive: Through its unregulated ASUS subsidiary, AWR provides water and wastewater services to 11 military bases. The company awaits awards of up to three more of these contracts in 2020. We assume that AWR secures at least one new military contract per year in 2020-2022 though AWK, AWR's largest competitor, has been winning most of the contract awards as of late.

Risks & Considerations for California Water Services Group California Water Services Group (CWT)

Allowed ROEs for CWT's regulated water utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. CWT's allowed ROE for its water utility for 2022-2024 should be set by late 2021 in a cost of capital proceeding.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. CWT awaits a proposed decision in its 2018 general rate case in CA with rates retroactive to January 1, 2021. Though the utility reached a partial settlement with the consumer advocate late in 2019, outstanding issues involve the continuation of the revenue decoupling and balancing accounts for pension and medical expenses. Without those, CWT could see a meaningful spike in its earnings volatility.

Risks & Considerations for SJW Group SJW Group (SJW)

Allowed ROEs for SJW's regulated water utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average 10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. SJW's allowed ROE for its CA water utility for 2022-2024 should be set by late 2021 in a cost of capital proceeding.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. SJW should file a rate case for its new CT business in 2021. Also, the CA utility of SJW should go through a general rate case in the state in 2021 and state regulators could attempt to claw-back some synergies related to the recent merger with CTWS.

SJW's CA earnings are highly volatile: Now that SJW no longer has even a temporary decoupling mechanism in CA, it's CA earnings change along with changes in volumes and changes in purchased water costs. SJW plans to ask for a purchased water cost balancing account in the next rate case in CA, but that means that 2021 could be another weak earnings year before the regulatory fix arrives for 2022, if at all.

Risks & Considerations for Essential Utilities, Inc. Essential Utilities, Inc. (WTRG)

Allowed ROEs for WTRG's regulated utilities could fall due to lower market interest rates: Equity returns/ROE of regulated electric/gas/water utilities are indirectly linked to the 10-year Treasury yield. The average allowed ROE of a regulated utility in the US dropped just 25 bps since 2008 despite a 152 bps drop in the average

10-year T yield over this period. However, state utility regulators could sharply reduce allowed ROEs of regulated utilities going forward which currently average 9.75% average. The allowed ROE together with an equity ratio are the key drivers of regulated utility earnings. WTRG's only pending rate case (in NC) is very small.

Lower sales volumes could weigh on WTRG's realized ROEs and thus earnings: A utility can see a meaningful deficiency between its realized and allowed ROE depending on the level of sales volumes and operating expenses. While the latter can be controlled, sharp reductions in sales volumes due to energy efficiency (residential and commercial sales) or closure of industrial facilities. The latter is particularly pronounced during the COVID pandemic. The sharply lower C&I sales volumes could weigh on utility earnings beyond 2020. While rate cases could true up sales volume assumptions, utilities could delay rate filings because their ROE could be reduced during those proceedings on the back of sharply lower interest rates.

Rate case outcomes are hard to predict: While regulated utilities are allowed to recover prudently incurred costs, its up to state utility regulators to determine which costs are in fact recoverable and the return on regulated assets. Some rate case requesting higher revenues may end with a reduction in authorized rates thus revenues and thus earnings. WTRG's regulatory calendar is quiet in 2020, with a pending small rate case in NC, and a likely filing for a catch-up repair tax adjustment for Peoples in PA.

Gas utilities have a higher operating risk than water utilities: Overpressurized gas systems seem to happen more frequently among gas utilities in the US. While we recognize that Peoples Gas is a well-managed system, WTRG's risk profile could further deteriorate with any gas-related operational issues.

Other Companies Mentioned in This Report

Utilities

Water Utilities: Updated thoughts ahead of 3Q20 earnings season

Summary:
The bifurcation in market valuations of US utility stocks stretches to water utilities though it's less pronounced than that among electric utilities. AWK, the top YTD performer among all utilities in the US, beating even NEE, trades at an 19% 2022 P/E premium to all water utilities in the US. The premium grew from just ~1% when we launched coverage in mid-May as investors increasingly flock to (almost) pure-play water utilities with strong ESG growth stories. While gas utilities should contribute only a third of WTRG's earnings and PA is highly supportive of natural gas, WTRG continues to derate on the back of its recent gas LDC acquisition. The stock once trading in line with AWK on FY3, currently trades at a 29% discount to AWK on our 2022 EPS estimates, even though WTRG's muni wastewater M&A pipeline has never been this impressive. Yet, the muni project pipeline is highly dependent on a November court ruling on the DELCORA wastewater system acquisition in PA ($276.5MM) and that uncertainty holds us back. The change to full water revenue decoupling (WRAM) and ongoing delays to CWT's general rate case decision in CA continue to weigh on CWT and AWR, with yet another ugly earnings print likely for CWT. We are increasingly comfortable with the strong earnings trajectory for the two CA water utilities, but remain on the sidelines on CWT as we brace another knee-jerk reaction on a likely big earnings miss in 3Q20.

Highlights

AWK – Strongest utility stock performer and counting: AWK is up ~21% YTD vs. XLU down ~8% and the second best performing water utility, MSEX, down ~2%. Since we launched coverage of AWK in mid-March, AWK's valuation premium to an average water utility grew from less than 1% to 19% currently on 2022 P/Es along with the bifurcation of electric/gas/water utility multiples driven by ESG investors. Though AWK trades at 32.4x our 2022 EPS, we cannot find a better regulated utility growth story in the US even during a year filled with important rate cases. Therefore, we reiterate our Buy rating.

AWR – We can live with WRAM changes, if any, but we'd like to see more military contract awards: We are increasingly comfortable with AWR's ability to earn at least its allowed ROE on the water and electric side, and grow its dividends at a ~9% CAGR through 2022, regardless of future changes to the full water decoupling mechanism (WRAM) which should kick in in 2025, if at all. We'd like to see at least one more military contract award, with at least one more pending solicitation to be resolved in October/ November, we believe. We reiterate our Buy rating.

CWT – Another ugly quarterly print ahead of us, but rate case outcome should be fine, eventually: This should be yet another ugly earnings season for CWT as CA regulators yet again delayed a decision in CWT's never-ending general rate case (GRC), this time until early November. Based on our expectations for the GRC outcome, CWT trades at a 16% 2022 P/E discount to AWR and just a 5% premium to SJW despite heavily under-invested assets of CWT likely driving a premium 11% EPS CAGR through 2022, with little volatility given that the full WRAM modification seems unlikely to impact CWT until 2023. We are concerned of another a knee-jerk pullback in CWT's stock on the back of the upcoming 3Q20 print and that's why we remain on the sidelines.

WTRG – Gas-related discount seemed likely, but it came sooner and larger than expected: We were always skeptical about WTRG's pursuit of a gas LDC, even a fast-growing one, as we worried it would diminish the scarcity value of WTRG's water utility business. Yet, we didn't anticipate the sharp de-rating of gas LDC stocks we saw YTD on concerns over their carbon footprint and electrification of house heating. We don't expect WTRG's ~9% annual gas rate base growth in PA to moderate any time soon, and WTRG's water muni deal pipeline is the strongest in the company's history. We remain on the sidelines as we await a court ruling of the DELCORA acquisition in early November, but find WTRG's value proposition compelling.

American Water Works Company, Inc.

(NYSE: AWK)

Strongest utility stock performer YTD and counting

Summary:

AWK is up ~21% YTD vs. XLU down ~8% and the second best performing water utility, MSEX, down ~2%. Since we launched coverage of AWK in mid-March, AWK's valuation premium to an average water utility grew from less than 1% to 19% currently on 2022 P/Es along with the bifurcation of electric/gas/water utility multiples driven by ESG investors. Though AWK trades at 32.4x our 2022 EPS, we cannot find a better regulated utility growth story in the US even during a year filled with important rate cases. Therefore, we reiterate our Buy rating.

Highlights

COVID and hot/dry summer: According to NOAA, cooling degree days in NJ/PA/IL were up 24%/27%/39% vs. normal and while the precipitation levels were just slightly below normal, we'd expect AWK's residential sales to be sharply up, especially given COVID-related work from home arrangements. C&I sales in the Mid-Atlantic could serve as a drag, but then again some of AWK's service territories fully resumed C&I operations during 3Q20.

Rate cases: We await hearings in AWK's NJ rate case during October. In CA, the regulator/CPUC recently removed the full revenue decoupling for water utilities (WRAM), but AWK's current general rate case should not be impacted. We hope changes among CPUC commissioners could eventually lead to a new/modified WRAM by the time AWK's new rates will be due in 2024.

NY asset sale: In November 2019, AWK announced the sale of its NY operations to Liberty Utilities for $608MM. Long Island munis have until October 15 to submit municipalization proposals for their water systems within AWK's NY service territory. The Massapequa Water District already submitted their proposal to the NY PSC while Sea Cliff and Hempstead continue to consider a municipalization route. AWK remains optimistic about the closing of the NY sale transaction even if small parts of the system were to be excluded due to municipalization.

Military contracts: AWK was recently awarded its 17th water and wastewater service contract for military bases. This time it is a 50-year $771MM contract for the Joint Base Lewis-McChord in WA. This contract is more than 50% larger than AWK's past military contracts, and the company expects another contract award this year, potentially this month. Given the duration, annual indexation and likely expansion of scope of these contracts, we continue to value them at a sharp premium to even regulated water operations.

Homeowner services: AWK entered into a partnership with Iberdrola TX to offer residential customers in the state an optional cooling repair and maintenance plan as well as a surge protection plan. We assume that is the deal which was previously delayed due to COVID. The services covered by this partnership seem unrelated to water which is nothing new for AWK's Homeowner Services business, but it's not ideal for water purists. Then again if we can live with NEE's gas E&P, we can live with AWK's air conditioner service contract.

Company Description:

AWK is the largest publicly-traded regulated water and wastewater utility in the US with operations in 16 states, primarily in the Northeast and the Midwest, serving 3.4 million customer accounts. AWK also engages in unregulated contract-based water/wastewater services for military bases (17 bases) and provides water/wastewater line warranty services (homeowner services) to ~1.5 million residential accounts.

American States Water Company
(NYSE: AWR)

We can live with WRAM changes, but we'd like to see more military contract wins

Summary:
We are increasingly comfortable with AWR's ability to earn at least its allowed ROE on the water and electric side, and grow its dividends at a ~9% CAGR through 2022, regardless of future changes to the full water decoupling mechanism (WRAM) which should kick in in 2025, if at all. We'd like to see at least one more military contract award, with at least one more pending solicitation to be resolved in October/November, we believe. We reiterate our Buy rating.

Highlights

Modifications to full water decoupling and GSWC's pending rate case: In late August, the CPUC removed the full water revenue decoupling (WRAM) for all four investor-owned water utilities in CA which currently use the mechanism, including AWR's GSWC. The Commission ruled that the WRAM removal should impact "any future general rate case applications filed after the effective date of this decision" so we assume that GSWC's current rate case/GRC (filed on July 15) should not be impacted. Comm. Ranldoph who dissented the WRAM change is assigned to GSWC's rate case which, to us, bodes well for the company given that the Commissioner should not be open to the suggestions from the consumer advocate (ORA) to include the WRAM change in the pending proceeding. Assuming a statutory 18-month review period of the rate case, GSWC's new rates should be decided by the end of 2021 and remain in effect through the end of 2024. Therefore, we'd expect the WRAM changes to affect GSWC's earnings only in 2025, if at all. Management insists the company should do just fine even under the new Monterey-style WRAM, and GSWC has a history of earning at least its allowed ROE on the water side. We are still hopeful the Commission could change its mind on the full WRAM, especially given that the current term of Comm. Guzman-Aceves, the author of the WRAM change, should expire by the end of 2022, i.e. before the filing of GSWC's next general rate case.

ASUS: AWK rather than AWR was recently awarded a particularly large $771MM military water/wasterwater service contract in WA, but we expect at least one (if not two) more military contract awards in October/early November. We still hope AWR's ASUS can get at least one more contract though for now, our 2021-2022 estimates assume ASUS growth driven by existing contracts and changes in the scope of work under them.

Company Description:
AWR is the parent of Golden States Water Co. (GSWC), a regulated water (261,000 water connections in 37 systems), Beaver Valley Electric Service (BVESI), an electric utility (24,400 electric connections in one system) in CA, and American States Utility Services (ASUS), which engages in contract-based water and wastewater services primarily for military bases, currently 11 bases.

AWR: EPS breakdown by segment ($)

California Water Services Group

(NYSE: CWT)

Another ugly quarterly print ahead of us, but rate case outcome should be fine

Summary:
This should be yet another ugly earnings season for CWT as CA regulators yet again delayed a decision in CWT's never-ending general rate case (GRC), this time until early November. Based on our expectations for the GRC outcome, CWT trades at a 16% 2022 P/E discount to AWR and just a 5% premium to SJW despite heavily under-invested assets of CWT likely driving a premium 11% EPS CAGR through 2022, with little volatility given that the full WRAM modification seems unlikely to impact CWT until 2023. We are concerned of another a knee-jerk pullback in CWT's stock on the back of the upcoming 3Q20 print and that's why we remain on the sidelines.

Highlights

Change to full revenue decoupling and CWT's pending general rate case in CA: In late August, the CPUC removed the full water revenue decoupling (WRAM) for all four investor-owned water utilities in CA which currently use the mechanism, including CWT. The Commission ruled that the WRAM removal should impact "any future general rate case applications filed after the effective date of this decision". CWT's management believes that it means its current never-ending rate case, covering 2020-2022, won't be impacted, though WRAM remains one of several contested items in the proceeding which was partially settled in October 2019. We assume the WRAM change, if any, won't impact CWT's earnings until 2023.

Another ugly quarterly print ahead of us: The CPUC yet again extended the statutory decline to resolve CWT's general rate case (GRC), this time until early November. We remain optimistic that new/higher rates should kick in still this calendar year, and will be retroactive to 1/1/20, making 4Q20 a big earnings quarter. Yet, in the meantime, we'd expect a ~45% EPS miss vs. adjusted consensus for 3Q20. Yes, it will be just due to timing, but that explanation didn't help the stock following the 1Q20 and 2Q20 earnings misses.

Estimates and valuation: Our 2020-2022 annual estimates remain unchanged as we await the final GRC decision. We changed the quarterly distribution of earnings in 2020 to sharply lower 3Q20 results. Based on our expectations for the GRC outcome, CWT trades at a 16% 2022 P/E discount to AWR and just a 5% premium to SJW despite heavily underinvested assets of CWT likely driving a premium 11% EPS CAGR through 2022 with little volatility given that the full WRAM modification seems unlikely to impact CWT until 2023. We are concerned of another knee-jerk pullback in CWT's stock on the back of the upcoming 3Q20 print and that's why we remain on the sidelines.

Company Description:
CWT operates regulated water and wastewater utilities in CA, WA, HI and NM, with 490,000 connections in CA (90%), 36,000 connections in WA (recently doubled through an acquisition), 5,000 in HI, and 8,300 connections in NM.

Essential Utilities, Inc.

(NYSE: WTRG)

Gas-related discount seemed likely, but it came sooner and larger than expected

Summary:

We were always skeptical about WTRG's pursuit of a gas LDC, even a fast-growing one, as we worried it would diminish the scarcity value of WTRG's water utility business. Yet, we didn't anticipate the sharp de-rating of gas LDC stocks we saw YTD on concerns over their carbon footprint and electrification of house heating. We don't expect WTRG's ~9% annual gas rate base growth in PA to moderate any time soon, and WTRG's water muni deal pipeline is the strongest in the company's history. We remain on the sidelines as we await a court ruling of the DELCORA acquisition in early November, but find WTRG's value proposition compelling.

Highlights

COVID and hot/dry summer: According to NOAA, cooling degree days in Philly were up 27% vs. normal and while the precipitation levels were just slightly below normal, those drying lawns were likely an eyesore for Aqua PA's residential customers working from home. Therefore, we'd expect residential sales volumes to be up sharply vs. management's assumptions. Granted that lower C&I volumes should moderate the earnings impact, but we'd expect very strong prints from WTRG (and AWK) in 3Q20, even with changes in the quarterly distribution in gas earnings, especially with incremental regulatory deferrals of COVID-related expenses.

De-rating of gas LDCs: To us, the March 2020 addition of Peoples Gas LDC to WTRG's core water utility business diminished the scarcity value of the pure-play water utility which used to trade on par with AWK on FY3 EPS. Following the acquisition, WTRG's annual EPS growth picked up by 150-200 bps vs. our prior water-only expectations, but the stock now trades at a 29% 2022 P/E discount to AWK. In 3Q20, WTRG's stock closely tracked that of ATO, a fast-growing gas LDC from the South, with both stocks sharply underperforming XLU by 900 bps and 850 bps, respectively. We continue to project a ~9% annual rate base growth for WTRG's Peoples in PA and ATO in TX, but investors increasingly question the longevity of this infrastructure replacement cycle given the growing push to decarbonize house heating in Europe. Ongoing gas pipe replacement should continue to reduce methane leaks and blending of RNG should lower the carbon footprint of gas LDCs without any detriment to their earnings growth over the next decade if not longer, we believe, as electric heat pumps gain on popularity. Even if hydrogen becomes a commercially viable option in 2030+, gas distribution systems will likely be retrofitted to accommodate this highly flammable, low density gas. In other words, we don't expect the rate base growth of gas LDCs to slow down any time soon.

Municipal wastewater M&A and equity funding: With the recent wastewater system acquisition in Makefield, PA, WTRG has $359MM in pending muni deals in the state, the largest backlog we can recall in Aqua's/WTRG's history. The backlog includes the DELCORA wastewater acquisition ($276.5MM) which continues to face legal challenges, but WTRG's management feels comfortable with its ability to close the transaction in late March/April 2021, following a delayed PA PUC review, and even issued ~$300MM in equity forwards, half of which should finance the DELCORA transaction. WTRG/Aqua PA insists that they have a legally binding asset purchase agreement (APA) for the wastewater system, but courts should rule on the APA validity only November 4-5. The DELCORA transaction should be additive to WTRG's water earnings only in 2022 following Aqua PA's rate case to be filed next year.

Estimates and valuation: We raised our 2020 EPS estimate by $0.02 to $1.58 to reflect very favorable weather in PA during 3Q20 and no COVID-related EPS drag. We raised our 2022 EPS by another $0.01 to $1.78 to reflect a partial earnings impact related to the DELCORA acquisition diluted by a higher share count. WTRG is now the cheapest water utility under our coverage though not if we account for ongoing de-rating of gas LDCs, even those with premium rate base growth such as ATO. We are admittedly attracted to WTRG at this level, but stay on the sidelines as we await court's decision on the DELCORA APA in early November.

Company Description:
WTRG owns and operates water utilities (1 million accounts) and gas utilities (0.74 million accounts) in 10 states though mainly PA.

Explanation of Ratings

Seaport Global Securities analyst ratings include (effective Feb. 1, 2017):

Buy - The investment outlook and risk/reward over the following 12 months are favorable on an absolute basis and relative to the peer group.
Neutral - The investment outlook and risk/reward over the following 12 months are neutral on an absolute basis and relative to the peer group.
Sell - The investment outlook and risk/reward over the following 12 months are unfavorable on an absolute basis and relative to the peer group.
NA - A rating is not assigned.

Prior to Feb 1., 2017, Seaport Global Securities analyst ratings included:

Buy - The investment outlook and risk/reward over the following 12 months are very favorable on an absolute basis and relative to the peer group.
Speculative Buy - The investment outlook over the following 12 months is very favorable on an absolute basis and relative to the peer group, however, there is higher than average risk associated with the investment that could result in material loss.
Accumulate - The investment outlook and risk/reward over the following 12 months are favorable on an absolute basis and relative to the peer group.
Neutral - The investment outlook and risk/reward over the following 12 months are neutral on an absolute basis and relative to the peer group.
Reduce - The investment outlook and risk/reward over the following 12 months are unfavorable on an absolute basis and relative to the peer group.
Sell - The investment outlook and risk/reward over the following 12 months are very unfavorable on an absolute basis and relative to the peer group.
NA - A rating is not assigned.

Utilities

Utilities/Power: Investor sentiment

Summary:
We summarized key investor arguments for electric/gas utility and power stocks with the most positive (AES, ES, ETR, EXC, FE, NEE, NRG), most negative (AGR, ATO, SRE, WTRG) and the tug-of-war sentiment (DTE, DUK, EIX, PPL, SO and VST) ahead of the 3Q20 earnings season and the annual EEI financial conference.

Highlights

Names with most positive investors' sentiment (in alphabetical order):

AES (AES, Buy, PT $21):
- Green wave - more renewable power/storage PPAs + incremental coal plant retirements/divestitures;
- Growth in regulated utility capex/earnings in IN/OH;
- IG rating from S&P as soon as early November.

Entergy (ETR, Buy, PT $113):
- Visible/above-average rate base growth;
- Improving capex execution and regulatory relationships;
- Truly discounted valuation and low customer bills even after securitization of growing storm costs.

Eversource (ES, Buy, PT $99):
- 3Q20 miss + likely delay of the South Fork offshore wind project + likely regulatory fine in CT following storm Isaias.
- Yet, annual EPS growth should rise to 7% for 2021-2023 thanks to Columbia Gas.
- ~10% annual EPS growth in 2024/2025 thanks to offshore wind.

Exelon (EXC, Buy, PT $45):
- Spin-off of ExGen/Constellation seems unlikely any time soon.
- Yet, Biden's wind/Blue sweap could lead to carbon pricing which would be highly beneficial for merchant nuclear plants;
- Current valuation doesn't reflect much value for ExGen.

FirstEnergy (FE, Buy, PT $42):
- Update on the DOJ investigation of lobbying practices surrounding the HB 6 in OH - a potential settlement without admission of any wrongdoing? The first update from CEO since 2Q20 call.
- Continued strong operational performance;
- Current valuation reflects unraveling of regulatory setup in OH (ESP settlement and changes to overearning/SEED test) which are seen as increasingly unlikely;
- A likely M&A target once the DOJ risk is addressed.

NextEra Energy (NEE, Buy, PT $324):
- Accelerating renewable power spending seems largely independent of November election results;
- Marginal investor in US utilities has an ESG mandate so NEE should continue to outperform XLU;
- Biden's win/Blue sweep would be additive to growth of NEER;
- NEE needs to watch its earnings mix for credit reasons - a large regulated utility acquisition could grow in importance after the Democratic sweep.

NRG Energy (NRG, Buy, PT $48):
- Proposed sale of PJM plants and incremental cost efficiencies at NRG could eliminate $750MM in converts to finance Direct Energy;
- PJM coal plant divestitures should boost NRG's ESG profile;
- 20%+ 2022 FCF yield with fewer questions about the longevity of cash flows.

Names with most negative investors' sentiment (in alphabetical order):

Atmos Energy (ATO, Buy, PT $108):
- Marginal equity investor for US utilities is an ESG investor, and he's not interested in gas LDCs, even those in gas supportive states (like TX or PA);
- ATO's P/E premium is measured vs. P/Es of other gas LDCs and not all electric/gas utilities; as other gas LDCs derate so does ATO.

This report is intended for bjdingerdissen@essential.co. Unauthorized distribution prohibited.

- ATO's upcoming addition to the DJUA could boost the stock.

Avangrid (AGR, Neutral, PT N/A):
- Stock sharply re-rated thanks to renewable power halo effect even though AGR's Renewables business struggles;
- Analyst day (Nov 5) should (yet again) re-set earnings expectations:
  - Whisper buy-side expectations for 2022 EPS of $2.45 are already meaningfully below sell-side consensus expectations, however, though the $1.95 midpoint of the new 2020 EPS guidance was lower than the $2.10 whisper number.
- Potential combination with PPL/WPD could still be possible, and could be decided by Iberdrola, AGR's majority owner, in December/ January.

Essential Utilities (WTRG, Neutral, PT N/A):
- Peoples Gas should increasingly suppress WTRG's P/E multiple as ESG investors stay away from gas LDCs;
- WTRG may need to spin off the gas LDC to rebuild its water P/E, or be taken over by an electric/gas utility.

Sempra Energy (SRE, Buy, PT $144):
- Expansion of Cameron or construction of ECA/Port Arthur LNG facilities now very unlikely;
- Monetization of a portion of Cameron LNG terminal should be difficult following lengthy storm-related outages (no backup power);
- Lack of extension of franchise agreement with San Diego would be a major negative leaving SRE with a gas LDC in CA, with limited long-term growth prospects;
- Share buyback is not being executed, and it's announcement on the 2Q20 earnings call is seen by many as an attempt to boost the stock price ahead of a potential regulated utility acquisition in TX. Yet, the company could still reiterate their willingness to support the stock with buybacks.

Tug of war names (in alphabetical order):

DTE Energy (DTE, Buy, PT $133.50):
- Management seems focused on correcting its stock's valuation discount.
- Yet, a spin-off of midstream assets might not create much (if any) shareholder value: a smid-cap midstream stock (~$3-3.5B in market cap) with a major technical overhang (as utility investors will want out) should not trade well.
- Instead, DTE could try to dilutive its midstream exposure through an acquisition of a regulated utility, preferably an electric utility with a contiguous service territory. CMS seems like an unlikely seller so it would have to be outside of MI.

Duke Energy (DUK, Neutral, PT N/A):
- NEE-DUK combination could create very meaningful shareholder value for both companies, and many LO investors continue to expect the combination to eventually happen; A lot depends on the outcome of the November elections.
- A blue sweep in D.C. could make the combination even more likely as NEE should need to address its earnings mix with a likely re-acceleration of its renewable power growth.
- A blue sweep in NC could boost DUK's standalone value and its appeal to NEE.
- The regulatory approval of the combination should be challenging. Investors believe the transaction is being blocked by DUK's Board/management only partly due to regulatory concerns.

Edison International (EIX, Buy, PT $62) and PG&E (PCG, Neutral, PT N/A):
- Recent rebound in stocks of EIX/PCG is seen as driven by a value trade rather than any fundamental reasons,
- Yet, we are getting close to the beginning of a seasonal trade in CA electric utilities.
- The Victims Trust doesn't seem to be shedding PCG's stock. And EIX could be announcing additional settlements of 20172018 wildfires.
- Yet, both stocks need to issue equity as soon as December/January.

PPL (PPL, Neutral, PT N/A):
- The sale of WPD is still months away and 2020 results from the business should disappoint due to COVID.
- Recent CMA rulings on ROEs/capex of UK water utilities are seen as positive for WPD's future earnings power and thus its sale price.
- Yet, WPD's sale would create meaningful shareholder value only if it's sold at north of 1.45x 2021 EV/RAB and PPL manages to eliminate practically all tax leakage.
- It's still possible, especially if Iberdrola were to agree to a swap between WPD and a majority stake in AGR. Yet, it remains unclear if Iberdrola is open to it, and the outcome of the US elections could determine the value of AGR.

Southern Company (SO, Buy, PT $66):
- Cold hydro testing is done and hot functional testing could start as soon as mid/late-November.
- Yet, the duration of the HFT is unknown and no one knows what SO's Georgia Power should uncover once the reactor (Vogtle Unit 3) is pressurized and the stream generator is turned on.

Vistra Energy (VST, Buy, PT $24):

- The stock looks cheap on practically every metric and buybacks should start in early 2021.
- Yet, VST's merchant renewable power/storage investments in TX conflict with VST's bullish views on fwd power prices in the state.
- Investors would prefer more buybacks or an investment in a renewable power developer (like AES's acquisition of sPower). Otherwise, terminal value questions should continue to weigh on the stock.

Utilities Disclosures

I, Angie Storozynski, hereby certify: (1) that all of the views expressed in this report accurately reflect my personal views about any and all of the subject securities or issuers; and (2) that no part of my compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

As with all employees of Seaport Global Securities LLC, a portion of our analysts' compensation is paid from the total collection of revenues from all areas of the firm including but not limited to Investment Banking and Sales and Trading departments. In no instance are research analysts' compensation directly derived from Investment Banking revenues.

Other Companies Mentioned in This Report

- AES Corporation (AES: $20.00, Buy)

Utilities

Utilities/Power/Yieldcos/Water - What we've learned this week

Summary:
AEP's results and comments on the OH political risk bode well for FE. We'd expect solid EEI updates from both, and we're raising our PT for AEP ahead of them. AES's settlement in OH is more impressive than the grid modernization capex would indicate. AGR's proposed acquisition of PNM caught us by surprise, and why the EPS accretion math should work, the addition of NM to AGR's already challenging regulatory jurisdictions surprised us. The deal coupled with commentary from IBE's holders do not bode well for PPL's pending sale of WPD (RAB multiples and a tax shield) though the stock seems to already reflect that. NEE's renewable power growth keeps accelerating and with that the company's need to add regulated utilities. The NEE-DUK deal could look even better after the elections so it's too early to give up on it. SO's updated schedule for its new Vogtle nuke is a bit longer than we had hoped for, but way better than the bear case. And lastly, smid-cap water utilities are getting a technical boost (i.e., AWR, CWT, SJW, WTRG). They do seem undervalued based on fundamentals, but the recent/ongoing move is more about quant screens. Also note that we've updated our models for AEP, NEE, and NEP with this update.

Highlights

AEP (Buy, PT $99 up from $96) and FE (Buy, PT $42) – More regulated renewables at EEI + shedding of OH overhang which bodes well for FE

- There were few surprises from AEP's 3Q20 print, but management plans to comment on AEP's rate based renewable power investments (incremental to the $2B North Central Wind) during the upcoming EEI conference. It sounds like the company plans to pursue renewable power capex in VA and IN, and besides ESG benefits, it should get AEP's EPS CAGR closer to 7% from the current 6.5%, we estimate.
- AEP seems to have shed most of the overhang related to the HB 6 in OH, and investors seem increasingly hopeful that FE will act the same way. FE delayed its 3Q20 print until Nov 2, the day before the elections with the latter being increasingly seen as a particularly sensitive event in OH.
- We updated our model and our annual estimates for AEP remain unchanged, but we raised our PT to $99 from $96 on lower risks in OH. No changes to our estimates/PT for FE as we await management's EEI update.

AES (Buy, PT $21) – Capex boost in OH is small, but lots of positives from PUCO settlement; regulated capex updates from IPL on 3Q20 call

- DP&L, AES's OH regulated utility, just settled with state utility regulators (PUCO) on grid modernization capex, among others. The utility can now invest $249MM over the next four years which is small, but that's just a part of DP&L capex program which includes FERC transmission investments. Also, through the settlement DP&L confirmed its ability to continue to collect $80MM annually under the rate stabilization charge (RSC) and resolved three overearning (SEET) tests. The utility also plans to file another rate case. We expect an update on AES's regulated generation capex in IN (for IPL) on the 3Q20 call.
- No changes to estimates or PT for AES.

AGR (Neutral, PT N/A) and PPL (Neutral, PT N/A) – PNM merger and WPD's valuation

- The PNM acquisition came as a surprise to investors even though everybody seemed aware of IBE's (and thus AGR's) plans to grow its regulated utility presence in the US. A change to the NM utility commission is on the ballot on November 3 – if approved, PNM/AGR could be regulated by three new Commissioners appointed by the Legislature instead of the current five elected Commissioners. That could be an improvement starting Jan 1, 2023, yet the question remains how this potential change should impact the conduct of the current Commissioners over the next 26 months. They will be reviewing the AGR-PNM merger while trying to secure a job on the new downsized Commission. That could mean a longer-than-expected approval process for the deal, investors believe.
- We had openly hoped for a combination of AGR and PPL given IBE's past interest in WPD, PPL's UK distribution networks. Yet, we are hearing from IBE shareholders that the Spanish renewable power major thought the WPD deal would have been too big for them and would have detracted from IBE's renewable power focus. That's bad news for WPD's likely valuation, we believe, as consortiums of financial investors (infra funds) now seem like the most likely buyers of PPL's UK business, and the 1.5x+ EV/RAB seems increasingly unlikely. Then there is the potential Biden win in November and a likely change in the federal tax law which would follow. That in turn could impact the tax leakage associated with the WPD sale. Investors believe that WPD needs to sell above 1.35x 2021 EV/RAB and eliminate practically any tax leakage to create any meaningful shareholder value for PPL at the stock's current share price. And that still seems realistic to us.
- No changes to our recently-updated estimates for AGR. No changes to PPL.

NEE (Buy, PT $324) – 15GW renewable backlog, but regulated utility M&A dominates investor minds

- NEER keeps adding new storage/wind/solar contracts, and the accelerating growth in those unregulated contract-based operations continue to fuel questions on regulated utility M&A. Stand-alone ITCs for storage projects on the back of Biden's wind could lead to retrofits of NEER's existing wind farms thus further boosting the NEER growth. Management emphasizes no pre-set earnings mix or credit concerns, but depending on the outcome of November elections (both federal and state), the NEE-DUK merger rationale could get another boost. As we mentioned in our recent note, investors are increasingly optimistic on this eventual combination.
- We updated our model for NEE and our annual estimates and PT for NEE (and DUK) remain unchanged as we await the eventual outcome of November elections.

NEP (Buy, PT $70) – 15% YoY growth in 4Q20 distributions/share

- The 3Q20 wind (96% of normal) and solar power generation dropped YoY which was in line with our below-consensus expectations for NEP and other yieldcos. Yet, NEP delivered on a 15% YoY growth in unit distributions per share and its ~70% payout ratio leaves plenty of room to continue the ~15% annual growth in distributions through 2022 without any additional outside project acquisitions. It also helps that NEP pursues organic growth through the repowering a of a 125MW wind project in CO or an addition of backup compression capacity at the Agua Dulce gas compressor station, both just completed ahead of schedule and on budget. The repowering of the 100MW Baldwin wind farm in ND should be complete by the year-end.
- We marginally increased our 2020/2021 EBITDA estimates for NEP following the 3Q20 print to $1,263M/$1,291MM up from $1,260MM/$1,289MM, respectively. Our PT remains unchanged.

SO (Buy, PT $66) – Pressurization of Vogtle Unit 3 and operations of its steam generator will start only in January 2021, a month later than hoped
