**Re: PPL Electric Utilities Corporation
Annual Depreciation Report for the
Year Ended December 31, 2021
Docket No. M-110500.F2022ADR**

Dear Ms. Chiavetta:

Enclosed for filing on behalf of PPL Electric Utilities Corporation ("PPL Electric") is PPL Electric's Annual Depreciation Report ("ADR") for the year ended December 31, 2021. This report is being filed in compliance with the Commission's regulations at 52 Pa. Code § 73.1, et seq.

Pursuant to 52 Pa. Code § 1.11, the enclosed document is to be deemed filed on April 26, 2022, which is the date it was filed electronically using the Commission's E-Filing System.

If you have any questions regarding the enclosed report, please call me or Scott R. Koch, PPL Electric's Rates and Revenue Manager, at (610) 774-2070.

Respectfully submitted,

A handwritten signature in blue ink that reads "Kimberly A. Klock". The signature is written in a cursive, flowing style.

PPL ELECTRIC UTILITIES CORPORATION
ANNUAL DEPRECIATION REPORT
FOR THE YEAR ENDED DECEMBER 31, 2021
DOCKET NO. M-110500.F2022ADR

PPL ELECTRIC UTILITIES CORPORATION
ANNUAL DEPRECIATION REPORT
FOR THE YEAR ENDED DECEMBER 31, 2021
DOCKET NO. M-110500.F2022ADR

EXECUTIVE SUMMARY

This report is prepared by PPL Electric Utilities Corporation (“PPL Electric”) in response to the requirements related to the monitoring of depreciation practices set forth in 52 Pa. Code Chapter 73.9(a). In accordance with these requirements, the report presents a comparison of annual and accrued depreciation by function at December 31, 2019, December 31, 2020 and December 31, 2021; a calculation of remaining life depreciation accrual rates as of December 31, 2021; the 2021 retirements expressed as a percent of the original cost; a summary of the depreciation reserve activity, including the reserve as a percent of original cost; an explanation of any unusual retirements; the net salvage amortization amount for 2022, based on experience for the period 2017 through 2021, and an explanation of exclusions from the experienced net salvage.

The survivor curves presented herein were based on an updated service life study incorporating statistical analyses of data through 2016. The prior service life study was based on data through December 31, 2012. The same methods of depreciation are used in this report as were used in previous Annual Depreciation Reports submitted by PPL Electric during the period 2003 through 2020.

Table 1 sets forth comparisons of the original cost, book reserve and calculated annual depreciation accruals by function as of December 31, 2019,

December 31, 2020 and December 31, 2021. The annual accrual amounts, as summarized, are presented as a percent of original cost for each function and for the total Company.

The composite annual depreciation accrual rate for Intangible Plant decreased from December 31, 2019 to December 31, 2020 due to higher reserve to plant ratio. The rate increased slightly from December 31, 2020 to December 31, 2021 as a result of a lower reserve to plant ratio. The composite rate for Transmission Plant is basically unchanged from December 31, 2019 to December 31, 2020. The composite rate continued to remain basically unchanged from December 31, 2020 to December 31, 2021. The composite annual accrual rate for Distribution Plant from December 31, 2019 to December 31, 2020 is basically unchanged. The composite rate is basically unchanged from December 31, 2020 to December 31, 2021 as well. The composite rate for General Plant decreased from December 31, 2019 to December 31, 2020 due to low growth and a higher reserve to plant ratio. The composite rate decreased from December 31, 2020 to December 31, 2021 due to a higher reserve to plant ratio.

Table 2 summarizes the calculated annual depreciation accrual rates and book depreciation reserve by account as of December 31, 2021. Tables 3 and 4 present a summary of the plant and reserve activity, respectively, for 2021. A review of any unusual entries is set forth in the section “2021 Plant and Reserve Activity”, beginning on page 7. Table 5 sets forth the net salvage accruals for 2022, as determined by the 5-year amortization of the experience during the prior 5-year period 2017 through 2021.

REMAINING LIFE DEPRECIATION ACCRUAL RATES

The annual depreciation accrual rates are calculated as of December 31, 2021 and are based on the straight-line method using the average service life procedure. The annual depreciation accrual rates as of December 31, 2021 are set forth in column 8 of Table 2. The annual accrual rate equals the annual accrual amount in column 6 divided by the original cost in column 3 of Table 2.

For the purpose of calculating the composite remaining life accrual rates as of December 31, 2021, the book reserve by plant account is allocated among vintages in proportion to the calculated accrued depreciation. Descriptions of the derivation of remaining life accruals at a given point in time for all vintages calculated by the average service life (ASL) procedure follow. An example of the calculation is set forth on pages 4 through 6.

For all vintages, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the average remaining life (expectancy) of the vintage. The average remaining life is derived directly from the estimated future survivor curve in accordance with the average service life procedure.

The annual accrual rate for each account is equal to the sum of the remaining life annual accruals divided by the total original cost. The composite remaining life is calculated by dividing the sum of the future book accruals by the sum of the remaining life annual accruals.

For certain General Plant accounts, the amortization amounts, annual and accrued, were based on the age of the vintage and the selected amortization period.

2021 PLANT AND RESERVE ACTIVITY

Table 3 and Table 4, shown on pages 12 through 15 present summaries by account of the plant and reserve accounting activity for 2021. Table 3 sets forth the original cost as of December 31, 2020, the beginning balance; additions; retirements; transfers or adjustments; the balance at the end of the year, December 31, 2021; and the retirements expressed as a percent of the beginning plant balance.

The high retirements in Account 303.20, Miscellaneous Intangible Plant – Software, and Account 303.60, RF Mesh AMR Software, were due to the upgraded applications needed for the system. The high percentage of retirements in Account 364.8, Poles, Towers and Fixtures – Clearing Poles, was due to increased effort to clear the related pole assets. The high retirements for Account 391.1, Office Furniture and Equipment – RF Mesh AMR Computer Equipment, and Account 391.6, Office Furniture and Equipment – Computers, were due to the need to retire high levels of surviving vintages which are fully amortized. The high additions for many accounts were due to the continued expansion throughout the system.

Table 4 sets forth the book depreciation reserve balance at the beginning of the year, January 1, 2021; annual accruals; retirements; gross salvage; cost of removal; transfers or adjustments; the balance at the end of the year, December 31, 2021; and the book reserve as a percent of the plant balance as of December 31, 2021.

AMORTIZATION OF NET SALVAGE

The 2022 amortization amounts for net negative salvage of \$71,163,065 based on the experienced net salvage during the 5-year period 2017 through 2021. The calculation of the amortization amount by function is set forth in Table 5 shown on

page 16. The tabulation sets forth the cost of removal, gross salvage, net salvage and the amortization amount, which is one-fifth of the total net salvage for the 5-year period.

In 2021, PPL Electric experienced no retirements that were incurred under unusual or extraordinary circumstances and, therefore, it submits no such retirements for Commission Staff review.

PPL ELECTRIC UTILITIES CORPORATION
