### QUESTION #3

We have worked with U-haul from off of their moving site called movinghelp.com since May 2016. We worked in a labor only capacity handling household goods. We build a lot of experience loading and unloading household goods into and out of trucks, into and out of homes. We gained five star rating on the U-Haul site. We went on to purchase a medium-sized 15 foot truck from U-Haul in 2020, with which we begun to do interstate moves transporting household goods from state to state for our customers. We continued to achieve the goal of pleased and happy customers which has maintained a five star rating. We utilize to a great extent U-Haul or Penske rental trucks for our full service interstate moves whenever a move requires a bigger truck than what we have. Below is a sample list of some of the Interstate household goods full service move we've completed over a span of two years. This list is by no means exhaustive but just a sample.

#### QUESTION #4

Facility... We rent an office space at 1517 Cedar Cliff Dr., Camphill PA 17011, Suite 102. This facility has five rows of spacious parking lots of which we are authorized by the property management to use the outer lot for parking trucks and trailers if and when necessary. We own one 15 foot box truck, one 6 x 12 enclosed trailer, and one 5 x 8 enclosed trailer which we keep on the parking lot. For the most part we use rental trucks from U-Haul and/or Penske to service our moves. There is also a storage shed on the property which we've been authorized to use for our inventory. We have four regular work vehicles that we use to get to our customers. These vehicles are parked securely in the parking lot. The equipment we use for moves include two wheel dollies, four wheel dollies, shoulder harness moving straps, mattress straps, ratchet straps for tiedown, tool bags containing basic tools for disassembly and reassembly, padded furniture blankets, shrink wrap, rubber bands, tape, three steps step stool, and gloves. Each of our four vehicles is fitted with all these equipment listed above. So when we have a job to do, our crew gets into a work vehicle which is already equipped with what supplies we need and head to the customers destination to take care of their move. The office space that we rent is about the equivalent of a two bedroom apartment. This provides us the room for operational office, main inventory room, additional office, and a training area. We have computer system and a flat screen TV which we use for training. We also have a reliable HP printer and filing cabinets.

#### Record maintenance plan:

We have purchased a moving software or CRM (customer relationship management system) called Movegistics. With this system we will be able to store all of our job information such as workers database, tariffs, customer inquiry, customer booking, estimates, Job order/ work ticket, Dispatch, completed jobs, invoice, Payments and receipts, payroll. This system is a one stop bus stop for moving companies. The search feature makes it so convenient to find information quickly.

We will have a Driver file for each driver that we hire. These files will be secured in a filing cabinet with lock. Each file will contain drivers license, Driver's application, driving record, medical card, background check information, drug test information, and certificate of road test. We will ensure that all records are up-to-date and valid on an annual basis

We will keep logbook Record of all on-duty hours

We will also have a record book for our vehicle maintenance in which we would record every time that we do a maintenance on any of our vehicles as well as the mileage at the time of the maintenance service

We will store some Information digitally on our computer system as well as hardcopy versions in our filing cabinet

#### Communication Network:

Our communication network is through social media, our computer system, tablets and phones. We utilize phone calls, text messaging, and emails.

Customers are able to find us online, through word-of-mouth and repeat customers. Potential customers are able to call in on our phone line or email us or sending a request through our website or Google. We receive alerts whenever there is a customer request via email or Google or website, otherwise the phone rings. We endeavor to promptly respond to customer requests.

When a customer books for a move with us we put it on our schedule/calendar and we maintain contact with the customer through phone calls and text messages leading up to the day of the move. Prior to the day of the move we assign a crew suitable for the move.

We use text messaging and phone calls to contact the crew members to alert them to the pending move.

On the day of the move the assigned crew is dispatched to the customers location to perform the move. Was there a contact with that crew by phone calls or text messages.

Each crew has a crew leader who takes a folder containing the work order which the customer would sign. In light of the CRM we have acquired, The crew leader can now take a tablet which will contain all the information about the move as well as the paperwork which the customer can sign electronically. The move charges is displayed in the tablet and the customer would be able to make payments directly on the tablet at the end of the move.

These tablets enable us to keep communication with the crew as well as keep track of the crew. The job information on the tablet is GPS capable and trackable. We're able to keep track of the crew's movement and the work hours as they are able to clock in and clock out on the tablets. We also maintain communication with Driver by phone But it must be completely hands-free or we simply avoid phone communication during drive time.

At the end of each job we reach out to the customer by phone for a feedback as well as review of our services and performance.
