(1) No user shall contribute or cause to be contributed, directly or indirectly, any pollutant, or waste which will cause pass through or interference with the operation or performance of the treatment plant. These general prohibitions apply to all such users of the treatment plant whether or not the user is subject to national categorical pretreatment standards or any other national, state or local pretreatment standards or requirements.

(2) The following limitations and prohibitions shall apply to all users of the treatment plant:

(a) Unpolluted water or waste prohibition. No person shall discharge to the public sanitary sewage system unpolluted water or waste capable of being disposed of by any means other than discharge into the public sanitary sewage system, including but not limited to noncontact cooling water, except under such conditions as may be authorized in a permit issued by the Authority pursuant to this article.

(b) Stormwater prohibition. No person shall discharge to the public sanitary sewage system any amount of unpolluted stormwater, including but not limited to surface water, foundation drainwater, groundwater, roof runoff or surface drainage. All connections which would result in the discharge of inflow are hereby specifically prohibited.

(c) Dilution of wastes prohibited. No user shall ever increase the use of process water or, in any way, attempt to dilute a discharge as a partial or complete substitute for adequate pretreatment to achieve compliance with the limitations contained in the national categorical pretreatment standards, or in any other pollutant-specific limitation developed by the Authority or DEP.

(d) Grease and oil prohibitions. No person shall discharge to the public sanitary sewage system any grease, oils or grease-interceptor wastes capable of being disposed of by any means other than discharge into the public sanitary sewage system, except under such conditions as may be authorized in a permit issued by the Authority pursuant to this article. In addition, discharge of petroleum oil, nonbiodegradable cutting oil, or products of mineral oil origin in amounts causing interference or pass through at the treatment plant is prohibited.

(e) Other general prohibitions. Except as otherwise provided, no person shall discharge or cause to be discharged, any waste or other matter or substance:

[1] That could cause pass through or interference, alone or in conjunction with a waste or wastes from other sources.

[2] Containing any liquids, solids or gases which by reason of their nature or quantity are, or may be, sufficient either alone or by interaction with other substances to cause fire or explosion or be injurious in any other way to the treatment plant or to the operation of the treatment plant.

[3] Containing any noxious or malodorous or toxic gases/vapors/fumes or substance, which alone or by interaction with other wastes, is capable of creating a public nuisance or hazard to life or preventing entry into sewers for their maintenance and repair. The discharge of wastes that result in gases, vapors or fumes in quantities that could cause worker health or safety problems at the treatment plant is specifically prohibited.

[4] Containing garbage that is not ground garbage.

[5] Containing any solid or viscous substances in quantities or of size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the treatment plant. Such substances include, but are not limited to ashes, cinders, sand, mud, straw, shavings, metal, glass, bones, rags, feathers, tar, plastic, wood, paunch manure, butchers offal, whole blood, bentonite, lye, building materials, rubber, hair, leather, porcelain, china, ceramic wastes, asphalt, paint and waxes.

[6] Containing a toxic pollutant or poisonous substance in sufficient quantity, either singly or by interaction with any sewage treatment process, to constitute a hazard to humans or animals or to create any hazard in the receiving stream of the treatment plant, or that exceeds any applicable limitation set forth in a national categorical pretreatment standard.

[7] Containing total solids, total suspended solids or BOD of such character or quantity that unusual attention or expense is required to handle such materials at the treatment plant, except as may be approved by the Authority, or as may be otherwise provided herein.

[8] Containing any radioactive wastes or isotopes except in compliance with applicable state or federal regulations.

[9] Prohibited by any permit issued by the Commonwealth of Pennsylvania, or by the EPA or any other federal agency.

[10] That constitute a slug, as defined in this article.

B. Specific discharge prohibitions. The discharge of the following wastes into the treatment plant is hereby specifically prohibited:

(1) Wastes containing more than 100 milligrams per liter (mg/L) of grease and oil, if the grease and oil is of unknown or petroleum origin in a Tier I or Tier II waste; or containing more than 200 milligrams per liter (mg/L) of grease and oil in a Tier I waste, or more than 10,000 milligrams per liter (mg/L) of grease and oil in a Tier II waste, if the grease and oil is determined to be of an animal or vegetable origin. The differentiation between grease and oil of animal/vegetable origin and those of petroleum origin shall be made by the Authority.

(2) Wastes having a temperature higher than 150º F. or less than 32º F., but in no case heat in such quantities that the temperature of the influent to the treatment plant exceeds 104º F. or inhibits the biological activity of the treatment plant.

(3) Wastes having a closed cup flash point of less than 140º F. as determined by a method listed under 40 CFR 261.21 and amendments thereto are specifically prohibited. At no time shall two successive readings on an explosion hazard meter, at the point of discharge into the system (or at any point in the system) be more than 5%, nor any single reading over 10%, of the lower explosive limit (LEL) of the meter.

(4) Wastes having a pH lower than 6.0 or greater than 9.5 in a Tier I waste, or a pH lower than 5.0 or greater than 9.5 in a Tier II waste, or having any corrosive or scale-forming property capable of causing damage or hazards to structures, equipment, bacterial action, or health or safety hazards to operating personnel or the sewer system or the treatment plant.

(5) Wastes that exceed any of the following concentrations in a discharge to the process stream of the treatment plant from a connected user as sewage or Tier I waste or from a nonconnected discharge (through a licensed waste hauler) as a Tier I waste, as a daily composite sample or grab sample: **[Amended 12-8-2010 by Ord. No. 228-2010]**

	Tier I Limits	
Parameter	**Limitation**	**Units**
Arsenic (total)	0.04	mg/L
Cadmium (total)	0.09	mg/L
Chromium (total)	6.00	mg/L
Chromium (hexavalent)	0.12	mg/L
Copper (total)	1.00	mg/L
Cyanide (total)	0.26	mg/L
Lead (total)	0.10	mg/L
Mercury (total)	0.005	mg/L

Tier I Limits

Parameter	Limitation	Units
Molybdenum (total)	0.50	mg/L
Nickel (total)	0.90	mg/L
Selenium (total)	0.50	mg/L
Silver (total)	0.08	mg/L
Zinc (total)	1.00	mg/L

(6) Wastes that exceed any of the following concentrations in a discharge to the septage discharge station of the treatment plant from a nonconnected discharge (through a licensed waste hauler) as a Tier II Waste in a grab sample or daily composite sample: **[Amended 12-8-2010 by Ord. No. 228-2010]**

Tier II Limits

Parameter	Limitation	Units
Arsenic (total)	6.00	mg/L
Cadmium (total)	0.50	mg/L
Chromium (total)	21.00	mg/L
Chromium (hexavalent)	0.50	mg/L
Copper (total)	50.00	mg/L
Cyanide (total)	0.26	mg/L

Molybdenum (total)	5.00	mg/L
Nickel (total)	5.00	mg/L
Selenium (total)	4.00	mg/L
Silver (total)	5.00	mg/L
Zinc (total)	95.00	mg/L

ND = Not detectable

(7) Individual control limits. If the Authority determines that a waste from any significant industrial user or significant waste generator poses a unique potential for pass through or interference due to the quality or quantity of the discharge, the Authority shall place special requirements or limits, in excess of those contained in this article, in any industrial waste discharge permit or waste permit to prevent such pass through or interference. Such individual control limits may include, but are not limited to solvent/toxic organic management plans (STOMPs), toxic reduction evaluation plans (TREs), hazardous waste disposal plans, slug discharge control plans or specific numerical limitations on substances.

(8) Any pollutant, including oxygen demanding pollutants (BOD etc.) released in a discharge at a flow rate and/or pollutant concentration which will cause interference with or pass through at the treatment plant.

(9) Wastes containing color from any source that when diluted with distilled water 1:10 will have a luminescence of 10% or greater and a purity of 90% or less, at its dominant wavelength by the tristimulus method, or containing any objectionable color not removed by the treatment process utilized by the Authority.

(10) Wastes containing more than 10 milligrams per liter (mg/L) of hydrogen sulfide, sulfur dioxide or nitrous oxide as determined by a method referenced in 40 CFR Part 136 and amendments thereto or any method approved by the EPA.

(11) Trucked industrial waste, holding tank waste or septage, except at discharge points designated by the Authority in accordance with § 154-89B of this article.

C. Federal and state requirements.

(1) Primary of state and federal requirements. Nothing in this section shall be construed to provide lesser discharge standards than are presently or may hereafter be imposed and required by the EPA or DEP.

(2) National categorical pretreatment standards. The National Categorical Pretreatment Standards, as defined in § 154-86B (relating to definitions) and promulgated by the EPA as of May 9, 1994, and the National Prohibitive Discharge Standards, as defined in § 154-86B and promulgated by the EPA as of May 9, 1994, are specifically incorporated herein by reference. A National Categorical Pretreatment Standard or a National Prohibitive Discharge Standard and Pretreatment Standard, as defined in § 154-86B, and promulgated by the EPA subsequent to May 9, 1994, is specifically incorporated by reference upon publication in the Federal Register as final rulemaking. Any EPA standard as defined above which is more stringent than that imposed under this article shall immediately supersede the less stringent requirement upon incorporation by reference as provided herein.

(3) Pennsylvania state standards. Upon the promulgation of any Pennsylvania state (DEP) standards or requirements, the DEP standards or requirements shall immediately supersede the limitations imposed under this article if the DEP standards are more stringent than federal limitations or requirements or the limitations and requirements imposed under this article.

D. Accidental and slug discharges.

(1) Accidental discharge and slug discharge prevention. All users shall provide and maintain at their own expense facilities adequate, in the judgment of the Authority, to prevent accidental discharge of prohibited and/or regulated substances and/or slug discharges and to protect the public sanitary sewage system from damages caused by such substances. No industrial user or significant waste generator which commences discharge to the treatment plant after the effective date of this article shall be permitted to introduce pollutants into the treatment plant until the Authority has reviewed and approved that user's accidental discharge prevention or slug prevention procedures (if those procedures are required by the Authority). Users designated as SIUs after October 14, 2005, must be evaluated for the need for a slug control discharge plan within one year of designation. If the Authority decides a slug control plan is needed, the plan shall contain, at a minimum, the following elements: **[Amended 2-11-2009 by Ord. No. 216-2009]**

(a) Description of discharge practices, including nonroutine batch discharges;

(b) Description of stored chemicals;

(c) Procedures for immediately notifying the POTW of slug discharges, including any discharge that would violate a prohibition under 40 CFR 403.5 (b), with procedures for follow-up written notification within five days; and

(d) If necessary, procedures to prevent adverse impact from accidental spills, including inspection and maintenance of storage areas, handling and transfer of materials, loading and unloading operations, control of plant site run-off, worker training, building of containment structures or equipment measures for containing toxic organic pollutants (including solvents), and/or measures and equipment necessary for emergency response.

(2) Accidental and/or slug discharge notification. In the ease of an accidental and/or slug discharge to the treatment plant the user shall immediately telephone and notify the Authority of the accident. The notification shall include information regarding the location of the discharge, the type of pollutants involved, the concentration and volume of the discharge and corrective actions taken and/or contemplated.

(3) Accidental and/or slug discharge report. Within five working days following an accidental and/or slug discharge, the user shall submit to the Authority a detailed written report describing the cause of the discharge and the measures to be taken by the user to prevent similar future occurrences. Such notification shall not relieve the user of any expense, loss, damage, or other liability which may be incurred as a result of damage to the treatment plant, fish kills, or

any other damage to person or property; nor shall such notification relieve the user of any fines, civil penalties, or other liability which may be imposed by this article or other applicable law.

(4) Employee notice concerning accidental and/or slug discharge. A notice shall be permanently posted on the user's bulletin board or other prominent place advising employees whom to call in the event of a dangerous discharge. Employers shall insure that all employees who may cause or suffer such a dangerous discharge to occur are advised of the emergency notification procedure.

E. Grease and sand interceptors.

(1) Interceptors required. Grease, oil and sand interceptors or retainers shall be installed by the user at his own expense when, in the opinion of the Authority, such are necessary for the proper handling of liquid wastes containing grease, oil or sand in excessive amounts, and of such other harmful ingredients. Such interceptors shall be of a type and capacity approved by the Authority and shall be located as to be readily and easily accessible for cleaning by the user and for inspection by the Authority.

(2) Interceptor maintenance. Where installed, all grease, oil and sand interceptors shall be maintained by the user, at his own expense, and shall be kept in continuous and efficient operation at all times.

F. Hazardous wastes; general notification requirements. All users shall notify in writing the EPA, DEP and the Authority of any discharge of a substance whereby if otherwise disposed of would be hazardous waste (listed or characteristic under Section 3001 of RCRA) into the public sanitary sewage system per the requirements of 40 CFR 403.12 (p) (1) through (4).

§ 154-88. Surcharges and fees for certain wastes.

Surcharges and fees for certain wastes.

A. Surcharges required. Although the sewage treatment works will be capable of treating certain industrial wastes, the actual treatment of such wastes may increase the cost of operating and maintaining the public sanitary sewage system. Therefore, there will be imposed upon each user discharging such waste into the public sanitary sewage system a surcharge or surcharges which are intended to cover such additional costs. Such surcharges shall be in addition to regular sewage service charges and shall be payable as herein provided.

B. Determination of surcharges.

(1) The strength of any industrial or commercial waste discharge which is to be subject to a surcharge as determined by Subsection C of this § 154-88 shall be determined quarterly, or more frequently, as the Authority shall determine. The surcharge shall be

determined from samples taken either at the manhole or metering chamber referred to in this article, or at any other sampling point mutually agreed upon by the Authority and the producer of such waste. The frequency and duration of the sampling period shall be such as, in the opinion of the Authority, will permit a reasonably reliable determination of the average composition of such waste, exclusive of stormwater runoff.

(2) Samples shall be collected or their collection supervised by a representative of the Authority and will be samples that reasonably reflect the characteristics of the waste. Except as hereinafter provided, the strength of waste so found by analysis shall be used for establishing the surcharge or surcharges. However, the Authority may, if it so elects, accept the results of routine sampling and analyses by the producer of such wastes in lieu of making its own sampling and analyses.

C. Calculation of surcharges. In the event that, after sampling and analysis as prescribed in Subsection B hereof, any industrial or commercial waste is found by the Authority to have pollutants of BOD concentration in excess of 250 milligrams per liter (mg/L) and/or total suspended solids concentration in excess of 250 milligrams per liter (mg/L), the producer of said waste shall pay a strength-of-waste surcharge in addition to the regular sewage service charge, which surcharge shall be computed by using the following formula:

S = 0.00834 QI [(BODI - 250) TA + (TSSI - 250) TB]

Where:

S is the surcharge to be added to the basic user charge.

QI is the industrial or commercial waste flow expressed in million gallons.

0.00834 is a constant to convert waste concentration.

BODI and TSSI are the respective concentrations of BOD and total suspended solids of the industrial or commercial waste expressed in milligrams per liter (mg/L).

250 is a constant which expresses the waste load concentrations of BOD and total suspended solids for normal domestic strength sewage in milligrams per liter (mg/L).

TA and TB are actual treatment costs incurred by the Authority per 1,000 pounds of BOD and total suspended solids, respectively. These costs are determined annually by the Authority base:d upon actual costs of operation and maintenance.

When a value of BOD and/or total suspended solids is less than 250 milligrams per liter (mg/L), than 250 milligrams per liter (mg/L) shall be used in the calculation of the surcharge.

D. Sampling fees and schedules. All industrial or commercial users and all significant waste generators shall be assessed a fee or service charge

for each sampling to be performed by the Authority. The fees to the user for each sampling shall include charges, as determined by the Authority, for sample collection, analysis and administrative services, and shall be in addition to any costs of sample collection and analysis which the user performs or has performed independently or privately.

§ 154-89. Administration.

A. General; permits required for certain wastes. Only sanitary sewage may be discharged into the public sanitary sewage system except as may be authorized by the Authority in accordance with the provisions of this article concerning industrial waste discharge permits, waste hauler licenses, waste generator permits and commercial discharge permits.

B. Permits and licenses.

(1) Permits and licenses required. No sanitary sewage, industrial waste, trucked industrial waste, holding tank waste or septage shall be discharged to the treatment plant from any significant industrial user, significant waste generator or waste hauler other than that for which the following permits or licenses have been issued:

(a) Significant industrial users require industrial waste discharge permits;

(b) Significant waste generators require waste permits; or,

(c) Waste haulers require waste hauler licenses.

(2) Commercial discharge permits. When determined by the Authority, a commercial establishment may be required to obtain a commercial discharge permit.

(3) Permit and license applications.

(a) All industrial users, waste generators and waste haulers proposing to contribute to the public sanitary sewage system shall make application for a permit or license according to Subsection B(1) and (2) of this section. All existing significant industrial users, significant waste generators and waste haulers contributing to the treatment plant at the time of the adoption of this article shall apply for a permit or license within 30 days after the adoption of this article, and shall obtain a permit or license within 90 days after the effective date of this article. Any user required to apply for a permit or license shall complete and file an application form approved by the Authority, accompanied by a nonreturnable processing fee to be set by the Authority. Proposed new industrial users shall apply at least 90 days prior to connecting to or contributing to the treatment plant. In support of the application for an industrial waste discharge permit, commercial discharge

permit, waste permit or waste hauler license the user may be required to submit, in units and terms appropriate for evaluation, any of the following information, including, but not limited to:

[1] Name, address, location, phone number;

[2] Standard industrial classification (SIC) number according to the Standard Industrial Classification Manual, Bureau of the Budget, 1987;

[3] Names of responsible individuals;

[4] Waste constituents and characteristics, before and after pretreatment, as determined by a reliable analytical laboratory;

[5] Time and duration of contribution;

[6] Average daily waste flow rates and/or estimated or required daily discharge volumes and frequency, including daily, monthly and seasonal variations, if any;

[7] Site plans, plumbing plans and details to show all sewers, sewer connections, and appurtenances by the size, location and elevation;

[8] Description of activities, and plant processes on the premises including all materials which are or could be discharged;

[9] Description of waste to be discharged;

[10] Where known, the nature and concentration of any pollutants in the discharge which are limited by the Authority, state or federal pretreatment standards, and a statement reviewed by an authorized representative of the user (as defined in § 154-86B of this article) and certified to by a qualified professional, indicating whether or not the pretreatment standards are being met on a consistent basis and if not, whether additional pretreatment is required for the user to meet applicable pretreatment standards;

[11] If additional pretreatment and/or operation and maintenance (O&M) will be required to meet pretreatment standards, the shortest schedule by which the user will provide such additional pretreatment. The completion date in this schedule shall not be later than the compliance date established for the applicable pretreatment standard;

[12] Make, model, year, capacity and vehicle registration number of all vehicles to be used for transportation and discharge at the treatment plant;

[13] Number and type of employees, and hours of operation of plant and proposed or actual hours of operation of pretreatment system; and,

[14] Any other information as may be deemed by the Authority to be necessary to evaluate the permit application.

(b) The Authority shall also have, at its discretion, the right to inspect the premises, equipment and material, and laboratory testing facilities of the applicant. The completed application shall be signed by the user's responsible individuals. The Authority will evaluate the data furnished by the user for completeness and may require additional information. After evaluation and acceptance of the data furnished as a complete application, the Authority may for cause shown either refuse to issue or may issue a permit or license subject to terms and conditions provided herein.

(c) If the application for a permit or license is denied by the Authority, or if the discharge indicated from the application is not in accordance with the requirements of this article, the user may have the Authority review the denial, provided the user shall give written notice of his request within 30 days after receiving the denial. The Authority shall review the permit application, the written denial, and such other evidence and matters as the applicant shall present at a public hearing following receipt of request for its review, and the decision of the Authority rendered publicly shall be final.

(4) Terms and conditions of permits and licenses. Permits and licenses may include any of the following terms and conditions, including, but not limited to: **[Amended 2-11-2009 by Ord. No. 216-2009]**

(a) Maximum discharge flow rate;

(b) Term of permit;

(c) Definitions;

(d) General limitations;

(e) Specific limitations;

(f) Special conditions;

(g) Self-monitoring requirements (including sampling, reporting, notification and recordkeeping);

(h) Reopener clause;

(i) Compliance schedules (if required);

(j) Statements of applicable civil and criminal penalties;

(k) Statement of nontransferability; or

(l) Best management practices.

(5) Industrial waste discharge permit and commercial discharge permit. Industrial waste discharge permits and commercial discharge permits shall be issued for a specified time period, not to exceed five years. The user shall apply for permit reissuance a minimum of 90 days prior to the expiration of the user's existing permit accompanied by a nonreturnable processing fee to be set from time to time by ordinance of the Authority. The terms and conditions of the permit may be subject to modification by the Authority during the term of the permit to accommodate changing conditions and as local, state and federal laws, rules and regulations are modified or amended, or other just cause exists. The user shall be informed of any proposed changes in his permit at least 60 days prior to the effective date of change. Any changes or new conditions in the permit shall include a reasonable time schedule for compliance, including a comment period which shall be the first 30 days of the sixty-day period prior to the effective date of change.

(6) Waste permit and waste hauler license duration. Waste permits and waste hauler licenses shall be issued for a specified time period, not to exceed one year. Each significant waste generator or waste hauler shall apply for a waste permit or waste hauler license reissuance a minimum of 30 days prior to the expiration of the existing permit or license accompanied by a nonreturnable processing fee to be set from time to time by ordinance of the Authority. The terms and conditions of the waste permit or waste hauler license shall be subject to modification by the Authority during the term of the permit or license to accommodate changing conditions and as local, state and federal laws, rules and regulations are modified or amended, or other just cause exists.

(7) Permit and license transfer. Permits and licenses are issued to a specific operation. No permit or license shall be assigned or transferred or sold to a new owner, new user, different premises, or a new or changed operation without the prior approval of the Authority upon written application therefor accompanied by a nonreturnable processing fee to be set from time to time by ordinance of the Authority. Any succeeding owner or user shall also comply with the terms and conditions of the existing permit or license.

(8) Revocation of permits and licenses.

(a) All permits and licenses are subject to revocation according to the provisions outlined in § 154-89C of this article.

(b) In the event that any discharge of material to a sewer shall materially and substantially differ in type or volume from that shown in the application or permit, the person and user shall immediately cease and desist from such discharge.

(c) The Authority may suspend any permit, license, and/or waste treatment service when such suspension is necessary, in the judgment of the Authority, in order to stop a discharge which presents a hazard to the public health, safety, or welfare, to the environment or operations at the Authority's treatment plant or upon a finding that the discharger has violated any provisions of this article. Any discharger notified of such a suspension shall immediately stop the discharge of all wastes into the system. The Authority may reinstate the permit or license upon proof of satisfactory compliance with all discharge requirements of this article and all other requirements of the Authority.

(d) In the event of a failure of a person to comply voluntarily with the suspension order, the Authority may take such steps as deemed necessary including immediate severance of the sewer connection, to prevent or minimize damage to the system or endangerment to any individuals. The Authority may reinstate the permit, license and/or the waste treatment service upon proof of the elimination of the noncomplying discharge. A detailed written statement submitted by the user describing the causes of the harmful contribution and the measures taken to prevent any future occurrence shall be submitted to the Authority within 15 days of the date of the occurrence.

C. Permit/license revocation causes for revocation. An industrial waste discharge permit or a hauler license or a waste permit or a commercial discharge permit may be revoked by the Authority for, including, but not limited to, the following causes.

(1) Failure of a permittee or licensee to accurately report his wastewater characteristics;

(2) Failure of a permittee to report significant changes in operations which affect wastewater characteristics;

(3) Refusal of access to the permittee's premises or licensee's vehicle for the purpose of inspection or monitoring;

(4) Any violation of any condition of any permit or license or this article;

(5) Falsification of self-monitoring reports;

(6) Application falsification;

(7) Tampering with monitoring equipment; or,

(8) Failure to meet compliance schedule.

D. Compliance schedules.

(1) Compliance schedules required. If additional pretreatment and/or operation and maintenance procedures are required for a permittee to meet all applicable regulations contained herein, the shortest schedule by which the permittee can provide such additional pretreatment and/or operation and maintenance procedures may be issued by the Authority or submitted by the permittee to the Authority for review and approval. The completion date for this schedule shall not be later than the compliance date established for applicable pretreatment standards. The Authority shall have the right to deny or to require the modification of proposed compliance schedules.

(2) Compliance schedule increments of progress. The schedule shall contain increments of progress in the form of dates for the commencement and completion of major events leading to the construction and operation of additional pretreatment required for the permittee to meet the applicable pretreatment standards (e.g., hiring an engineer, completing preliminary plans, completing final plans, executing contract for major components, commencing construction, completing construction, etc.).

(3) Time limits for increments of progress. No increment of progress shall exceed nine months.

(4) Compliance schedule compliance reports. Not later than 14 days following each date in the schedule and the final date for compliance, the user shall submit a progress report to the Authority including, as a minimum, whether or not it complied with the increment of progress to be met on such date and, if not, the date on which the user expects to comply with this increment of progress, the reason for delay, and the steps being taken by the permittee to return to the schedule established. In no event shall more than nine months elapse between such progress reports to the Authority. Failure to meet required milestone dates shall constitute a violation of this article.

E. Record maintenance.

(1) Record retention requirements. All users shall maintain and retain all records, including, but not limited to, documentation associated with best management practices, relating to wastewater discharged for a period of not less than three years and shall afford the Authority access thereto at all reasonable times. This period of retention shall be extended during the course of any unresolved

litigation. Such records shall include for all samples: **[Amended 2-11-2009 by Ord. No. 216-2009]**

(a) The date, exact place, method, and time of sampling and the names of the person or persons taking the samples;

(b) The date(s) and time(s) the analyses were performed;

(c) Who performed the analyses;

(d) The analytical techniques/methods used; and

(e) The results of such analyses.

(2) Availability of records. All records maintained by users relating to compliance with pretreatment standards shall be made available to officials of the EPA, DEP and the Authority for inspection and copying upon request.

F. Industrial agreements. Industrial agreements required. As a condition precedent to the issuance of an industrial waste discharge permit, the Authority shall require industrial users to enter into agreements with the Authority containing such provisions as the Authority deems appropriate in furtherance of its effort to comply with regulations promulgated by the EPA in 40 CFR Part 403. Industrial users shall comply with federal, state and local statutes, ordinance rules and regulations, and with the provisions of such agreements; and in the event of conflict between provisions, shall comply with whichever provision on a particular matter is most stringent or more strict.

G. Pretreatment and handling of industrial wastes.

(1) General. Users shall provide necessary pretreatment as required to comply with this article and shall achieve compliance with all national categorical pretreatment standards within time limitations as specified in 40 CFR Part 403 and amendments thereto. Any facilities required to pretreat wastewater to a level acceptable to the Authority shall be provided, operated and maintained at the user's expense. Detailed plans showing the pretreatment facilities and operating procedures shall be submitted to the Authority for review, and shall be acceptable to the Authority before construction of the facility. The review of such plans and operating procedures and approval of such plans as required by § 154-89G(3) of this article shall in no way relieve the user from the responsibility of modifying the facility as necessary to produce an effluent acceptable to the Authority under the provisions of this article. Any subsequent changes in the pretreatment facilities or method of operation shall be reported to and be acceptable to the Authority prior to the user's initiation of the changes.

(2) Purposes and pretreatment. The Authority may require the owner of an improved property to construct, operate and maintain at his

expense a pretreatment facility when, in the opinion of the Authority, such facility is necessary to reduce quantities and/or concentrations of pollutants or flows to:

(a) Decrease the concentration levels of pollutants in the wastewater discharge to comply with the maximum limits specified in § 154-87 of this article;

(b) Prevent excessive quantities of flow; or

(c) Prevent discharges (flow or concentration) of pollutants from the user which may cause interference or pass through at the Authority's treatment plant.

(3) Review and approval of pretreatment facilities. If required by the Authority, no pretreatment plant and facilities shall be constructed or operated unless all plans, specifications, technical operating data, and other information pertinent to its proposed operation and maintenance are reviewed by the Authority and found by the Authority to conform to all Authority regulations; and unless written approval of the plans, specifications, technical operating data and biosolids disposal methods has been obtained by the Authority from the EPA, the Commonwealth of Pennsylvania, and any other local, state or federal agency having regulatory authority with respect thereto, providing such approval is required by those agencies.

(4) Pretreatment facility maintenance requirement. All such pretreatment facilities as required by this article shall be maintained continuously in satisfactory and effective operating conditions by the user or person operating and maintaining the facility served thereby, and at the user's expense. The Authority shall have access to such facilities at all reasonable times for purposes of inspection and testing.

(5) Rejection of waste if not adequately pretreated. The Authority reserves the right to reject admission to the system of any waste harmful to the public sanitary sewage system or to the receiving stream, to compel discontinuance of use of the public sanitary sewage system or to compel pretreatment of industrial wastes in order to prevent discharges deemed harmful to or having a deleterious effect upon any portion of the public sanitary sewage system or receiving stream.

H. Sampling procedures and reporting criteria for industrial users, waste haulers waste generators.

(1) Self-monitoring reports. **[Amended 2-11-2009 by Ord. No. 216-2009**

(a) All significant industrial users shall submit at least twice annually to the Authority a self-monitoring report on a form

approved by the Authority indicating the nature and concentration of pollutants in the waste discharged to the Authority treatment plant which are of particular concern to the Authority and which are limited by this article. The waste characteristics to be measured and reported shall be determined by the Authority and specified in the industrial waste discharge permit or waste permit. All wastewater samples must be representative of the user's discharge. In cases where the article requires compliance with a best management practice or pollution prevention alternative, the user shall submit documentation as required by the Authority to determine compliance of the user. If an industrial user monitors any pollutant more frequently than required by the Authority, using the procedures prescribed in 40 CFR Part 403.12 (g) (4), the results of this monitoring shall be included in the report. In addition, this report shall include flow information for the reporting period, and shall be signed by the user's responsible individuals. This report shall be received by the Authority no later than the 30th day of the month following the quarter for which the report is required.

(b) All categorical industrial users and categorical waste generators shall submit at least twice annually to the Authority a self-monitoring report on a form approved by the Authority indicating the nature and concentration of pollutants in the waste discharged to the Authority treatment plant which are of particular concern to the Authority and which are limited by this article. The waste characteristics to be measured and reported shall be determined by the Authority and specified in the industrial waste discharge permit or waste permit. All wastewater samples must be representative of the user’s discharge, and, for all parameters required to be analyzed utilizing a grab sample, a minimum of one grab sample must be collected and analyzed for each parameter. In cases where the article requires compliance with a best management practice or pollution prevention alternative, the user shall submit documentation as required by the Authority to determine compliance of the user. If a categorical industrial user or categorical waste generator monitors any pollutant more frequently than required by the Authority, using the procedures prescribed in 40 CFR Part 403.12 (g) (4), the results of this monitoring shall be included in the report. In addition, this report shall include flow information for the reporting period and shall be signed by the user’s responsible individuals. This report shall be received by the Authority no later than the 30th day of the month following the period for which the report is required.

(c) All significant waste generators shall submit at least annually to the Authority a self-monitoring report on a form approved by

the Authority indicating the nature and concentration of pollutants in the waste discharged to the Authority treatment plant which are of particular concern to the Authority and which are limited by this article. The waste characteristics to be measured and reported shall be determined by the Authority and specified in the industrial waste discharge permit or waste permit. All wastewater samples must be representative of the user's discharge, and, for all parameters required to be analyzed utilizing a grab sample, a minimum of one grab sample must be collected and analyzed for each parameter. In cases where the resolution requires compliance with a best management practice or pollution prevention alternative, the user shall submit documentation as required by the Authority to determine compliance of the user. If a significant waste generator monitors any pollutant more frequently than required by the Authority, using the procedures prescribed in 40 CFR Part 403.12 (g) (4), the results of this monitoring shall be included in the report. In addition, this report shall include flow information for the reporting period, and shall be signed by the user's responsible individuals. This report shall be received by the Authority no later than the 30th day of the month following the period for which the report is required.

(2) Responsible individuals. All significant industrial users, significant waste generators, licensed waste haulers and industrial users issued commercial discharge permits shall designate responsible individuals as described by this article.

(3) Signatory requirements. All reports submitted pursuant to requirements outlined in this article, including but not limited to the "Baseline Monitoring Report," the "Self Monitoring Report" and the "Report on Compliance with National Categorical Pretreatment Standards or Ninety-Day Compliance Report" shall be signed by the user's responsible individuals.

(4) Certification requirements. All reports referenced in § 154-89H of this article, as well as industrial waste discharge permit applications, waste permit applications and waste hauler license applications submitted pursuant to § 154-89A of this article, shall include the following statement:

I certify, under penalty of law, that this document and all attachments, were prepared under my direction or supervision in accordance with a system designed to assure that quality personnel properly gather, and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

(5) Monitoring manholes. Whenever required by the Authority, the owner of any property served by a building sewer carrying wastewater and material shall install a large manhole or sampling chamber, flow-metering chamber, flow-monitoring equipment, pH-monitoring equipment and other appurtenances in the building sewer to facilitate the observation, sampling and measurement of the combined flow of wastes from the user's premises into the public sanitary sewage system. These monitoring facilities shall be constructed in accordance with plans and specifications approved by the Authority and installed and maintained at all times at the user's expense. There shall be ample room in each sampling chamber to accurately sample and composite samples for analysis. The chamber shall be safely and easily and independently (of other premises and buildings of users) accessible to authorized representatives of 1:he Authority at all times. When construction of a sampling chamber and monitoring facilities are not economically or otherwise feasible in the opinion of the Authority, alternative arrangements for sampling and monitoring may be made at the discretion of the Authority.

(6) Flow monitoring and recording. Each flow-measuring chamber shall contain a Parshall flume, weir or similar device with a recording and totalizing register for measuring liquid quantity, or the metered water supply to the industrial plant may be used as a measure of liquid quantity where it is substantiated by the Authority that the metered water supply and waste quantities are approximately equal or where a measurable adjustment agreed to by the Authority is made in the metered water supply to determine the liquid waste quantity.

(7) Sampling by Authority. Samples shall be taken as deemed appropriate by the Authority. All significant industrial users shall be sampled by the Authority at least once per year. Such sampling shall be done as prescribed by the Authority to insure that the compliance of the user is determined with a reasonable degree of certainty for the entire reporting period. Samples shall be taken at the manhole or metering chamber referred to in § 154-89H(5) of this article, or in the absence of such manhole or metering

chamber, at such place as the Authority shall determine will provide a representative sample of the discharge and shall represent the entire flows from the significant industrial user.

(8) Inspection and verification of sampling and testing. The sampling frequency, sampling device, sampling methods, and analyses of samples shall be subject, at any time, to inspection and verification by the Authority.

(9) Sampling and testing methods. All sampling measurements, tests and analyses of the characteristics of waters and wastes shall be determined in accordance with procedures contained in 40 CFR Part 136, and amendments hereto or any other method approved by the EPA.

(10) Confidentiality of information.

(a) The Authority shall consider all information regarding an industrial user's or waste generator's effluent characteristics as being nonconfidential and may make all such information available to the public without restriction, unless the user specifically requests and is able to demonstrate to the satisfaction of the Authority that the release of such information would divulge information of processes or methods of production entitled to protection as trade secrets of the user.

(b) Upon written request, at the time of submission of the data by the industrial user or waste generator furnishing a report, permit application or answering a questionnaire, those portions of any document which might disclose trade secrets or secret processes shall not be disclosed to any person other than to duly authorized representatives of the EPA or DEP. Any effluent data of a user's waste will not be recognized as confidential information or as a trade secret.

(11) Sampling and testing costs. When the Authority conducts its own sampling and/or analyses of wastes discharged by any user, the Authority may make or have made any such tests, and the user shall reimburse the Authority for the full cost thereof. Such costs shall be established by ordinance annually.

(12) Ninety-day compliance reports.

(a) Within 90 days following the date for final compliance with applicable national categorical pretreatment standards or, in the case of a new source, following commencement of the introduction of wastewater into the treatment plant, any industrial user or waste generator subject to national categorical pretreatment standards and requirements shall submit to the Authority a report containing the information listed in 40 CFR Part 403.12 (b) (4) through (6) indicating the nature and concentration for all pollutants in the discharge

from the regulated process which are limited by the national categorical pretreatment standards and the average and maximum daily flow for these process units in the user facility which are limited by such pretreatment standards. Industrial users or waste generators subject to equivalent mass or concentration limits established in accordance with 40 CFR Part 403.6 (c), must include in the report a reasonable measure of the user's long term production rate. For all other industrial users subject to categorical pretreatment standards expressed in terms of allowable pollutant discharge per unit of production (or other measure of operation), this report shall include the user's actual production during the appropriate sampling period.

(b) The report shall indicate the compliance status of the user with the applicable pretreatment standards as listed in 40 CFR 403.12 (b) and (d), whether the applicable pretreatment standards are being met on a consistent basis and, if not, what additional operation and maintenance and/or pretreatment is necessary to bring the user into compliance with all applicable pretreatment standards. This statement shall be signed by the user's responsible individuals.

(13) Baseline monitoring reports. All industrial users and waste generators subject to national categorical pretreatment standards shall submit to the Authority, within 180 days after the effective date of a categorical standard or the final administrative decision on a category determination under 40 CFR 403.6 (a) (4), whichever is later, a report (baseline monitoring report) which indicates the compliance status of the user with the applicable national categorical pretreatment standards as listed in 40 CFR 403.12 (b).

(14) New or increased contributions. All industrial users, waste haulers or waste generators shall immediately notify the Authority prior to any changes in the volume or character of their waste discharge or in the operation of their pretreatment processes that may result in interference or pass through at the treatment plant, or affect the potential for a slug discharge to the treatment plant. The Authority reserves the right to deny the admission of or to require the pretreatment of all discharges to the public sanitary sewage system. **[Amended 2-11-2009 by Ord. No. 216-2009]**

(15) Mass limitations. The Authority may impose mass limitations on users which, in the opinion of the Authority are using dilution to meet applicable pretreatment standards or requirements, or in other cases where the imposition of mass limitations are appropriate. In such cases, the report required by Subsection H(12) of this subsection shall indicate the mass of pollutants regulated by pretreatment standards in the effluent of the user. These reports shall contain the results of sampling and analysis of the discharge, including the flow and the nature and concentration,

or production and mass where required by the Authority, of pollutants contained herein which are limited by the applicable pretreatment standards. The frequency of monitoring shall be prescribed in accordance with procedures established by the EPA pursuant to Section 304 (g) of the CWA and contained in 40 CFR Part 136, and amendments thereto, or with any other test procedures approved by the EPA.

(16) Notice of violation/resampling requirement. If sampling performed by an industrial user or significant waste generator indicates a violation, the industrial user or significant waste generator shall notify the Authority within 24 hours of becoming aware of the violation. The industrial user or significant waste generator shall also repeat the sampling and analysis and submit the results of the repeat analysis to the Authority within 30 days after becoming aware of the violation pursuant to 40 CFR Part 403.12 (g). Where the Authority has performed the sampling and analysis in lieu of the industrial user or significant waste generator, the Authority must perform the repeat sampling and analysis within 30 days unless it notifies the industrial user or significant waste generator of the violation and requires the industrial user or significant waste generator to perform the repeat analysis. **[Amended 2-11-2009 by Ord. No. 216-2009]**

I. Annual fee. All permitted industrial users shall be subject to an annual fee to defray the cost of administration of this article. The annual fee shall be set from time to time by ordinance of the Authority.

J. Administrative fee. All connected and nonconnected users utilizing the services of the Authority under this article shall be subject to an administrative fee to defray the cost of processing invoices, bills and other charges and fees for such services. The administrative fee shall be set from time to time by ordinance of the Authority.

§ 154-90. Enforcement.

A. Enforcement response; enforcement response plan. Enforcement actions taken by the Authority shall be consistent with an enforcement response plan maintained at the wastewater treatment plant offices.

B. Inspection rights.

(1) General. Any duly authorized employee or agent of the Authority bearing credentials which so identify them shall be permitted at any reasonable time to enter upon all properties served by the treatment plant or all properties generating trucked waste for discharge to the treatment plant, or licensed vehicles transporting waste for the purpose of discharge at the treatment plant, for the purpose of inspecting, observing, measuring, sampling and testing, as may be required in pursuance of the implementation and enforcement of the terms and provisions of this article. Any records

of monitoring activities or results maintained by any user shall be made available for inspection and copying by the Authority and/or the DEP and/or the EPA. Users may be required by the Authority to install monitoring equipment, as per 40 CFR 403.8 (f) (1) (v). **[Amended 2-11-2009 by Ord. No. 216-2009]**

(2) All significant industrial users and all significant waste generators shall be inspected by the Authority at least once per year.

C. Injunctive relief.

(1) General. The Authority reserves the right to seek injunctive relief for noncompliance by any industrial user or waste generator with any pretreatment standard or pretreatment requirement, or for noncompliance by any person with any provision of this article.

(2) The Authority, through counsel, may petition the Court for the issuance of a preliminary or permanent injunction (or both, as may be appropriate), which restrains or compels the activities on the part of the industrial user, waste generator, or person, including a prayer for payment of costs and attorney's fees as may be authorized by law. In addition, the Authority shall have such remedies to collect all fees incurred by the Authority as a result of this petition as it has to collect other sewer service charges.

D. Show-cause hearing.

(1) General. The Authority may order any industrial user which causes or contributes to a violation of this article or industrial waste discharge permit or order issued hereunder, to show cause why a proposed enforcement action should not be taken. Notice shall be served on the industrial user specifying the time and place for the meeting, the proposed enforcement action and the reasons for such action, and a request that the user show cause why this proposed enforcement action should not be taken.

(2) The notice of the meeting shall be served personally or by registered or certified mail to any principal executive, general partner, corporate officer or owner of the industrial user at least 10 days prior to the hearing. Whether or not a duly notified industrial user appears as noticed, immediate enforcement action may be pursued.

E. Emergency response.

(1) General.

(a) The Authority may suspend the waste treatment service and/or industrial waste discharge permit, waste permit, waste hauler license, or commercial discharge permit whenever such suspension is necessary in order to stop an actual or threatened discharge presenting or causing an imminent or

substantial endangerment to the health or welfare of persons, the public sanitary sewage system or the environment.

(b) Any user notified of a suspension of the waste treatment service and/or industrial waste discharge permit, waste permit, waste hauler license or commercial discharge permit shall immediately stop or eliminate its contribution. In the event of a user's failure to immediately comply voluntarily with the suspension order, the Authority shall take such steps as deemed necessary, including the immediate severance of the sewer connection, to prevent or minimize damage to the treatment plant, its receiving stream, or endangerment to any individuals. The Authority may allow the user to recommence its discharge when the endangerment has passed, unless the permit revocation proceedings set forth in § 154-89B(8) of this article are initiated against the user.

(2) Report requirements. Any industrial user which is responsible, in whole or in part, for imminent endangerment shall submit a detailed written statement describing the causes of the harmful contribution and the measures taken to prevent any future occurrence to the Authority prior to the date of a show cause hearing as described in § 154-90D of this article.

F. Administrative fine.

(1) General. Notwithstanding any other section of this article, any user, industrial user or waste generator or waste hauler who is found to have violated any provision of this article, or commercial discharge permit or industrial waste discharge permit, or waste permit or hauler license or order issued hereunder, shall be fined in an amount up to $1,000 per violation. Each day on which noncompliance shall occur or continue shall be deemed a separate and distinct violation. All fine money shall be made payable to the Authority. The Authority shall have such other collection remedies as it has to collect other service charges. Unpaid charges, fines and penalties shall constitute a lien against the individual user's property.

(2) Appeals. Users who desire to dispute such fines must file a request before the Authority to reconsider the fine within 10 working days of being notified of the fine.

G. Civil penalties.

(1) General. Any person who violates any substantive or procedural provision of § 154-87 hereof or any term or condition of any industrial waste discharge permit, commercial discharge permit or waste permit shall be subject to a civil penalty not to exceed $25,000 per day for each violation. Each violation for each separate day shall constitute a separate and distinct violation. Notwithstanding the foregoing, a single operational upset which

gives rise to simultaneous violations shall be treated as a single violation.

(2) Appeals. Users who desire to dispute such fines must file a request before the Authority to reconsider the fine within 10 working days of being notified of the fine.

H. Criminal penalties.

(1) General. Any person who willfully or negligently violates any provision of a municipal ordinance incorporating the provisions of this article, or who violates any condition of an industrial waste discharge permit, a waste permit, a hauler license, a commercial discharge permit or an order issued pursuant to this article and incorporating ordinance, is guilty of a summary offense, and, following institution of a summary proceeding by the municipality and, upon conviction, such person shall be subject to a fine of not less than $100 nor more than $1,000 for each separate offense, and, in default of the payment of such a fine, a person shall be imprisoned for a period of 30 days.

(2) Partnership, corporations and associations. If such person violating the provisions of this article shall be a partnership, then the members thereof, or if such person be a corporation or association, then the officers, members, agents, servants, or employees thereof shall, in default of payment of any fine levied under this section, be imprisoned in the county prison.

(3) Continuing violations. Each day of continued violation of any provision of this article and incorporating ordinance shall constitute a separate offense.

(4) Transfer of fine money. All fine money assessed through suit or summary proceedings before any District Justice, pursuant to this section, shall be transferred to the municipality instituting the summary proceeding for the use and benefit of the Valley Forge Sewer Authority.

I. Notice of violation; general. Whenever the Authority determines that any industrial user or waste generator or waste hauler has violated any provisions of any permit or license issued under any section of this article, or a compliance schedule issued under § 154-89D of this article, the Authority or its duly authorized representative shall serve upon said user a written notice of violation. Within 10 working days of the receipt of this notice, a written response to this notice, including an explanation of the cause of the violation and a plan for the correction and prevention thereof, shall be submitted to the Authority by the user. Submission of this plan in no way relieves the user of liability for any violations occurring before or after receipt of the notice of violation.

J. Public notification; public notice of significant noncompliance. The Authority shall at least annually publish in the largest daily newspaper

published in the area encompassed by the Authority, a list of the users which were significantly violating applicable pretreatment standards or requirements or other provisions of this article, or who were determined to be in significant noncompliance, during the 12 previous months. Significant noncompliance shall be determined according to the standards as defined in 40 CFR Part 403.8 (f) (2) (vii).

ARTICLE VIII
Sewer Extensions

§ 154-91. Permit required for subdivision or land development.

No person shall be permitted to develop a subdivision, tract or parcel of land without first obtaining a sewer permit from the Authority. Such permit shall be issued to the person required to comply to this Part 2 subject always to compliance with the Code.

§ 154-92. Escrow required.

No lot in a subdivision may be sold, no permit shall be issued to erect, alter or repair any building in a subdivision, tract or parcel of land until the sewer permit is approved, recorded and escrow moneys have been posted with the Authority sufficient to cover the construction cost of the sewer installation, engineering and/or review, inspection during construction and other direct costs incurred by the Authority resulting from this particular work.

§ 154-93. Prerequisites for use of system.

A. The following procedure outlines the prerequisites to be fulfilled by the owner and the special requirements of the Authority. Generally the following events must take place prior to the use of the collection system by the owner.

   (1) Preliminary approval by Authority.

   (2) Prepare detailed plans and specifications.

   (3) Approval of plans and specifications by Authority.

   (4) Enter into agreement with the Authority.

   (5) Construct system.

B. Preliminary approval. Preliminary or initial approval of the project at the expense of the owner is required by the Authority in order that the Authority may review what is proposed and provide whatever prior planning is necessary to include additional users in the system. In general, the Authority and consulting engineer review will determine:

   (1) If plan conforms to the Township Master Sewer Plan.

   (2) If existing sewer system and appurtenances are of sufficient size and capacity for inclusion of additional users.

   (3) A Planning Module as required by the Pennsylvania Department of Environmental Protection shall be submitted to the Township, at the owner's expense.

C. Prepare detailed plans and specifications.

(1) Detailed plans, profiles and construction specifications are to be prepared for the project. Minimum design standards as set forth in the "Sewerage Manual" of the Pennsylvania Department of Environmental Protection are to be maintained in all situations. Sewer plans shall conform to all the specifications established by the Authority. In no cases will lesser standards than exist in the present specifications or as outlined in this Part 2 be adopted by the Authority.

(2) Where pump station or ejector stations are used in the design, standby generation will be required as an auxiliary source of electrical power. The generator equipment will be of sufficient size to supply electrical power to the entire pump and/or ejector station. Emergency or bypass connection that would bypass the pumps and/or ejector station is prohibited. The specification for the pump and ejector station and emergency generation equipment shall be subject to the review and approval of the Authority and the consulting engineer.

(3) Standard specifications for the collection sewers shall be purchased from the Authority.

(4) Information relative to specifications for building sewers is available in Articles III and IV of this Part 2.

(5) The owner shall submit a specified number of the as-built plans to the Township prior to the Authority's final acceptance of the system.

D. Approval of plans and specifications.

(1) The Authority and consulting engineer, at the expense of the owner shall review plans and specifications submitted to the Authority.

(2) After the plans and specifications have been approved by the Township and the consulting engineer, the Authority will submit the plans and specifications to the Pennsylvania Department of Environmental Protection for approval of that portion of the sewer system governed by their regulations. The Township shall also apply for state, county and Township highway permit(s), stream encroachment permit(s), railroad crossing permit(s) and all other permits associated with the sewer extension.

(3) The owner shall prepare applications for all permits required, at his expense, and submit them to the Township.

E. Enter into agreement with Authority. The Authority Solicitor, at the expense of the owner, shall prepare an agreement between the Township and owner. The agreement shall, among other items, provide for the owner to escrow sufficient funds to defray the Authority costs for:

(1) Review and approval of plans.

(2) Preparation of agreements and permits.

(3) Inspection of construction by consulting engineer.

(4) Design fee for consulting engineer if applicable.

F. Construction and inspection.

(1) The owners shall construct, at their own expense, all lines, pumping facilities and appurtenances required for their development regardless of the proximity of the development to the Township collection system.

(2) All construction work associated with the sewer lines and appurtenances within the corporation limits of the Township shall be subject to inspection by the Authority and the consulting engineer. After a final inspection and acceptance of the collection system the Authority will issue a certificate of completion which will state that the collection has been constructed according to the Authority requirements. Requirements for maintenance bonds, dedication, conveyance of sewer right-of-ways are contained in Chapter 175, Subdivision and Land Development, of the Code of Township of East Whiteland.

ARTICLE IX
Miscellaneous Provisions

§ 154-94. Tampering with sewage system prohibited.

A. No unauthorized person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is part of the municipal sewage works.

B. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct.

§ 154-95. Right to inspect; owner's liability for defects and inspection costs.

A. The Authority and other duly authorized employees of the Township bearing proper credentials and identification shall be permitted at any time to enter upon all properties for the purpose of inspection, observation, measurement, sampling, testing, supervising, and any other functions relating to service rendered by the Township through the sewer system in accordance with the provisions of this Part 2.

B. All found defects shall be corrected at the owner's expense.

C. If defects are found as a result of an inspection, test, sample, measurement, or observation, the owner will indemnify the Authority for the cost of said inspection, observation, measurement, sample, test or supervision.

§ 154-96. Notice of violations; time for cure; violations and penalties.

A. Any person found to be violating any provision of this Part 2, except § 154-94, shall be served by the Township with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

B. Violation and enforcement provision. Any person who violates or permits the violation of any provision of this Part 2 shall, upon conviction thereof in a summary proceeding brought before a District Justice under the Pennsylvania Rules of Criminal Procedure, be guilty of a summary offense, and shall be subject to the payment of a fine of not less than $100 and not more than $1,000, plus the costs of prosecution. In default of payment thereof, the defendant may be sentenced to imprisonment in the county prison for a term of not more than 30 days. Each provision of this Part 2 that is violated shall constitute a separate offense, and each day or portion thereof in which a violation of this Part 2 is found to exist shall constitute a separate offense, each of which violations shall be punishable by a separate fine imposed by the District

Justice of not less than $100 and not more than $1,000, plus the costs of prosecution, or upon default of payment thereof, the defendant may be sentenced to imprisonment in the county prison for a term of not more than 30 days. All fines and penalties collected for the violation of this Part 2 shall be paid to the Township Treasurer. **[Amended 7-2-1996 by Ord. No. 111-96; 4-1-1997 by Ord. No. 117-97]**

§ 154-97. Liability of violators for damages and expenses.

Any person violating any of the provisions of this Part 2 shall become liable to the Authority for any expense, loss, or damage occasioned the Authority by reason of such violation.

§ 154-98. Engineering requirements.

In order to maintain the same standards that exist in the sewage collection system and as set out in this Part 2, the Authority shall require any property owner applying for a sewer permit to have the collection system engineered in one of the following ways:

A. The property owner may request that the Authority through the consulting engineer, prepare plans and specifications, obtain approvals from the Department of Environmental Protection of the Commonwealth of Pennsylvania and from any other governmental regulatory body having jurisdiction, and inspect construction of the sewer system in accordance with approved plans and specifications; or

B. The property owner may retain a professional engineer with experience in the design of sewer systems, waste treatment plants and related appurtenances; said engineer to prepare plans and specifications in accordance with this Part 2, and obtain approval from the Authority and the Department of Environmental Protection of the Commonwealth of Pennsylvania and any other governmental regulatory body having jurisdiction.

§ 154-99. When effective.

This Part 2 shall be in full force and effect from and after the date of its passage, approval, recording and publication as provided by law.

§ 154-100. Method of service of notice.

Unless otherwise specifically provided, whenever notice is required by this Part 2 to be served on any person and/or property owners, such service shall be made personally upon the owner, if he can be found in the Township, or an adult person residing on the property affected, or in case personal service cannot be made upon the owner, or an adult person cannot be found residing on the property, said notice shall be tacked or posted conspicuously on the premises.

§ 154-101. Limitation on waiving provisions.

No officer or employee of the Authority is authorized to vary the provisions of this Part 2 without the express action of the Township Board of Supervisors.

§ 154-102. Power to contract.

The Township has the express right, power, and authority to enter into agreements, contracts, or arrangements with any persons for the purpose of effectuating the provisions of this Part 2.

§ 154-103. Substitution of Township for Authority.

The Authority may at any time elect to lease some or all of its facilities to the Township and may, by agreement with the Township, delegate back to the Township any rights, privileges, duties or obligations as may be set forth in this Part 2. In such event, or in the event that the Authority and the Township may agree, in all or any portion of this Part 2 where the word "Authority" may appear, the word "Township" may be substituted with the same force and effect as if it was therein written ab initio. If at any time the word "Township" may appear in this Part 2 and the Authority agrees, the word "Authority" may be substituted for the word "Township" in such section with the same force and effect as if it was therein written ab initio.

Part 3
[Adopted 12-27-1995 By Ord. No. 107-95]
Sewer Rents

ARTICLE X
Rates and Charges

§ 154-104. Sewer districts. [Amended 3-5-1996 by Ord. No. 109-96; 12-18-1996 by Ord. No. 115-96; 11-14-2007 by Ord. No. 200-2007; 4-10-2019 by Ord. No. 308-2019]

The Township shall be divided into five sanitary sewer districts: District A, comprising that part of East Whiteland Township not included within Districts B, C, D, and E; District B, comprised of those properties served by the western extension of the Route 30 sewer main; District C, comprised of the residential dwellings located in the Lockwood Chase subdivision; District D, comprised of all properties that flow into and whose effluent is treated at the sanitary sewage facility that serves the dwellings in the Malvern Hunt development; District E, compromised of all commercial and residential properties located in the Atwater development south of the quarry; and such additional districts as shall be established by ordinance from time to time by the Board. The geographic boundaries of each such district shall be shown on the Township's Sewer Districts Map, which is authorized hereby, incorporated herein by reference thereto, and made a part hereof. Such Map shall be amended from time to time as authorized by the Board by resolution or as necessitated by amendment of this chapter. Together, these districts shall constitute the East Whiteland Public Sanitary Sewer System. All sewer transmission, trunk, interceptor and outfall mains, manholes, pumping stations and other facilities owned by or dedicated to the Authority and now physically located or hereafter installed, constructed, replaced, repaired and maintained within each such district shall constitute a part of the sewer system of each such district.

§ 154-105. Definitions.

Unless the context specifically indicates otherwise, the meaning of terms used in this Part 3 shall be as follows:

AUTHORITY — East Whiteland Municipal Authority, as presently or hereafter constituted, which has been created by the Board of Supervisors and to which has been referred by the Board of Supervisors the specific project of sewers.

BOARD — The Board of Supervisors as the governing body of the Township.

COMMERCIAL ESTABLISHMENT — Any structure or any portion thereof intended to be used wholly or in part for the purposes of carrying on a trade, business or profession or for social, amusement, religious, education, charitable or public use, and which contains plumbing for kitchen, toilet or washing facilities. Hotels, motels, boarding or rooming houses and institutional dormitories shall be included in this definition, except as otherwise provided in the schedule set forth in § 154-106 hereof.

INDUSTRIAL ESTABLISHMENT — Any structure or any portion thereof, intended to be used wholly or in part for the manufacturing, fabricating, processing, cleaning, laundering or assembly of any product, commodity or article.

INDUSTRIAL USER — (as defined in the United States Environmental Protection Agency Rules and Regulations, 40 CFR 35.905-8)

A. Any nongovernmental user of publicly owned treatment works identified in the Standard Industrial Classification Manual, 1972, Office of Management and Budget, as amended and supplemented, under the following divisions:

B. Division A: Agriculture, Forestry, and Fishing.

C. Division B: Mining.

D. Division D: Manufacturing.

E. Division E: Transportation, Communications, Electric, Gas, and Sanitary Services.

F. Division I: Services.

G. A user in the divisions listed may be excluded if it is determined that it will introduce primarily segregated domestic wastes or wastes from sanitary conveniences.

INDUSTRIAL WASTE — Any solid, liquid, or gaseous substance or waterborne wastes or form of energy rejected or escaping from any industrial, manufacturing, trade or business process or from the development, recovery or processing of natural resources, as distinct from sanitary sewage.

OWNER — Any person vested with ownership, legal or equitable, sole or partial, of any property served, directly or indirectly by the sewer system.

PERSON — Any individual, firm, company, association, society, corporation or group.

PRIVATE DWELLING UNIT — Any room, group of rooms, house trailer, structure, dwelling or enclosure intended to be occupied as separate living quarters by a family or other group of persons living together or by persons living alone but excluding institutional dormitories. Each private dwelling unit in a double house, row or connection houses, in a trailer park or in an apartment or condominium or cooperative development will be billed as a separate entity.

PUBLIC WATER SYSTEM — A water supply system regulated by the Pennsylvania Public Utility Commission, and any other "community water system," as defined in the regulations of the Pennsylvania Department of Environmental Protection.

SANITARY SEWAGE — The normal water carrying household and toilet wastes from residences, business buildings, institutions, commercial and industrial establishments.

SEWER SYSTEM — All temporary and permanent facilities at any time, and from time to time, owned by the Authority and leased to and operated by the Township and used or usable for, or in connection with, the collection of waste waters.

TOWNSHIP — The Township of East Whiteland, Chester County, Pennsylvania.

§ 154-106. Imposition of sewer rent or charge. [Amended 3-5-1996 by Ord. No. 109-96; 12-18-1996 by Ord. No. 115-96; 5-5-1998; 11-18-1999 by Ord. No. 127-99]

There is hereby imposed upon each owner of each property served by the sewer system and having the use thereof, a sewer rent or charge, which shall be uniform throughout each sewer district, but which may vary from district to district, payable in equal quarterly payments as hereinafter provided, for the use, whether direct or indirect, of the sewer system, based on the schedules of classifications and rates or charges and calculated as hereinafter set forth for each such sewer district.

A. Compliance with EPA regulations. The sewer rent shall be determined in accordance with the United States Environmental Protection Agency (US EPA) Rules and Regulations CFR 35.928 and 40 CFR 35.935-13 and Appendix B to Part 35. The user charges for all classifications set forth below shall be subject to annual review and periodic revisions to reflect the actual operation and maintenance costs of the sewer system, and of the transmission and treatment facilities owned by others but used by the sewer system.

B. Unit Schedule for Availability Charge.

	Category	Number of EDU
(1)	Each private dwelling unit or living unit	1
(2)	Each individual commercial establishment or business, having 10 or less of its own employees, attached to or forming a part of owner's residence, unless otherwise specified herein	1
(3)	Each additional 5 of its own employees or fraction thereof	1/2
(4)	Each individual commercial establishment or business, having 10 or less of its own employees, not attached to or forming a part of owner's residence, unless otherwise specified herein	1

(5)	Each additional 5 of its own employees or fraction thereof	1/2
(6)	(i) Hotel guest room/suite, motel guest room/ suite and conference center guest room/suite with kitchenette - 2.5 bedrooms	1
	(ii) Hotel guest room/suite, motel guest room/ suite and conference center guest room/suite without kitchenette - 3.0 bedrooms	1
	(iii) Kitchenette shall include any one or more of the following facilities or combination thereof: (i) sink and refrigerator; (ii) sink and stove; (iii) sink and dishwasher; (iv) sink and disposal	
(7)	Each restaurant (without liquor license) per 25 seats	1
(8)	Each restaurant (with liquor license) per 10 seats	1
(9)	Each service station garage and automobile repair shop, without carwash facilities:	
	2 bays or less	2
	Each additional bay over 2	1
(10)	Each barber or beauty shop, not attached to owner's residence:	
	2 chairs or less	1 1/2
	Each additional two chairs or fraction thereof	1/2
(11)	Each firehouse	1 1/2
(12)	Each church or chapel	1
(13)	Each public swimming pool or private swimming club	3
(14)	Each school, public or private, having:	
	Toilet facilities only, per 25 pupils and staff or fraction thereof	1
	Toilet facilities and kitchen, per 20 pupils and staff or fraction thereof	1
	Toilet facilities and gymnasium, per 15 pupils and staff or fraction thereof	1
	Toilet facilities, kitchen and gymnasium, per 12 pupils and staff or fraction thereof	1
(15)	Each property having a commercial garbage grinder of 3/4 horsepower or greater per grinder	1
(16)	Each business providing showers for employees:	

	7 or less employees	1
	Each additional 7 employees or fraction thereof	
(17)	Each funeral home	2
(18)	Each nursing home, per bed	3/4

C. Computation of charges.

(1) If two or more private dwelling units or commercial establishments are connected through a single lateral, or if two or more families use separate cooking and/or toilet facilities in a single dwelling, or if two or more types of use are made of the same property, the availability component under the foregoing schedule shall be computed as through each such unit and establishment and each such family and each such types of use were a separate property or user with a separate connection to the sewer system.

(2) To compute the sewer rate for facilities in a single commercial establishment which consists of multiple uses, such as a shopping center or an office building, each unit, tenant, or use shall be calculated by using the above schedule as though each unit, tenant, or use were a separate property or user with a separate connection to the sewer system. In such cases, the owner shall be liable for the full sewer charges but the owner may request the Township to bill individual units as an accommodation. Such accommodation shall not relieve the owner of the underlying obligations. Charges shall be due and payable on all units whether vacant or occupied. If the unit is vacant, one-half of the EDUs assigned to the space shall be used for the calculation. **[Amended 8-9-2006 by Ord. No. 184-2006]**

(3) The sewer rate for each owner whose charge is based upon the number of employees shall be computed on the basis of the average number of employees for the calendar quarter preceding the date for the quarterly bill.

(4) The Township shall be entitled to request from each owner and to receive promptly periodic information as to the number of employees or pupils at the property. Information as to employees shall be furnished semiannually in the form of a certified list of the names of all employees and independent contractors based at the property. In the event that the Township is not provided with accurate information, including supporting documentation, to determine the number of employees or pupils and staff using any property or such data as may be necessary to determine a user classification or rate, the Township's estimate or determination thereof shall be conclusive.

(5) The Township reserves the right to change unit values from time to time, to add or delete property classifications, and in cases of

dispute, to determine the property classification of a given property.

D. Sewer rates. **[Amended 12-18-2001 by Ord. No. 135-2001; 8-9-2006 by Ord. No. 184-2006; 11-14-2007 by Ord. No. 200-2007; 11-12-2008 by Res. No. 15-2008; 2-12-2014 by Ord. No. 252-2014; 12-14-2016 by Ord. No. 287-2016]**

(1) Sewer District A: The sewer rate shall be established by resolution of the Board of Supervisors and such rate resolution shall be amended from time to time as the Board of Supervisors deems appropriate.

(2) Sewer District B: The sewer rate shall be established by resolution of the Board of Supervisors and such rate resolution shall be amended from time to time as the Board of Supervisors deems appropriate.

(3) Sewer District C: The sewer rate shall be established by resolution of the Board of Supervisors and such rate resolution shall be amended from time to time as the Board of Supervisors deems appropriate.

(4) Sewer District D: The sewer rate shall be established by resolution of the Board of Supervisors and such rate resolution shall be amended from time to time as the Board of Supervisors deems appropriate.

(5) Sewer District E: The sewer rate shall be established by resolution of the Board of Supervisors and such rate resolution shall be amended from time to time as the Board of Supervisors deems appropriate.

(6) Commercial and industrial users: The owner of each commercial and industrial user, whose total quarterly sewage discharge or water consumption is greater than 100,000 gallons, shall pay a sewer rate to be established by resolution of the Board of Supervisors, and such rate resolution shall be amended from time to time as the Board of Supervisors deems appropriate. **[Added 4-10-2019 by Ord. No. 308-2019]**

(a) Where the use of water by a commercial or industrial establishment is such that substantial portions of the water so used is not discharged into the sewer system, the quantity of water used to determine the usage component shall be computed by one of the following methods:

[1] Method No. 1: By placing the meter or measuring device on the sewer connection. The reading from this meter or measuring device shall be used in computing the usage component; or

[2] Method No. 2: By placing the meter or measuring device on the effluent not discharging into the sewer system. The reading from this meter or measuring device will then be deducted from the total water meter reading and the remainder shall be used in computing the usage component.

(b) When an owner can demonstrate that it is not practical to install meters or measuring devices or where the Township determines that because of infiltration or after cause, the amount of waste water discharged to the system exceeds the readings of the water meter, in either case the Township may determine, in such manner and by such methods as it may prescribe, the amount of wastewater discharged into the sewer system, and the quantity so determined to be discharged shall be used to determine the usage component, which determination shall be final.

(c) Measuring devices. All meters or other measuring devices not provided by the public water system, but which may be used under the provisions of this chapter, shall be furnished and installed by the owner and shall be under the control of the Township and may be tested, inspected or repaired by Township employees or agents whenever necessary. The owner shall be responsible for its maintenance and safekeeping and all repairs which are made necessary to ordinary wear and tear or other causes. Bills for such repairs, if made by the Township or Township's agents, shall be due and payable at the same time and collected in the same manner as are the bills for sewer services, and such bills from and after their due date shall constitute a lien upon the property upon which such measuring device is installed. The Township shall have the right to read all meters or measuring devices, and they shall be available to Township employees or agents for meter reading at any reasonable time.

(7) Single-family residential users in Sewer Districts A, B, C, D, and E shall be entitled to a discount of the annual rates set forth herein upon payment of the full amount of the annual sewer bill not later than 30 days after the date of the first bill issued by the Township for that calendar year. The discounted amount shall be established by resolution of the Board of Supervisors, and such resolution shall be amended from time to time as the Board of Supervisors deems appropriate. **[Added 4-10-2019 by Ord. No. 308-2019]**

§ 154-107. Exclusion of industrial waste.

Industrial wastes may be discharged into the sewer system only pursuant to written agreement with the Township and the Valley Forge Sewer Authority and upon obtaining an industrial waste discharge permit from Valley Forge Sewer Authority; provided that rules, regulations and acceptability

standards which may from time to time be adopted by the Township and Valley Forge Sewer Authority prescribed for the pretreatment of Industrial Waste are fully complied with to the satisfaction of the Township and Valley Forge Sewer Authority. Industrial wastes to be acceptable for collection and/or treatment must not exceed the characteristics set forth in Part 2, Sewer Use, of this Chapter 154. Industrial waste surcharges will be imposed and collected by the Valley Forge Sewer Authority, and will be in addition to the rentals imposed herein.

§ 154-108. Changes in classifications; additional classifications and modifications.

If the use or classification of any property should change within any quarterly billing period, the difference in sewer rental, if any, prorated on a monthly basis to the end of the then current calendar quarter will be charged or credited, as the case may be, on the bill for the succeeding calendar quarter. Additional classifications and additional sewer rentals may be established by the Township from time to time.

§ 154-109. Payments; initial billing. [Amended 3-5-1996]

The payments for the sewer rents (including the availability component and the usage component) by each owner shall begin immediately upon completion of the sewer connection (i.e., sewage flow is accepted into the sewer system). The sewer rents imposed shall be payable quarterly, in advance, and rent for each calendar quarter shall be billed and payable within 15 days following the beginning of each quarterly billing period, i.e., on the 15th day of January, April, July and October in each year. Rent for any billing period in which a connection is made shall be prorated, and shall be billed in conjunction with the next regular billing or by special billing as the officials responsible for billing may elect.

§ 154-110. Penalties for delinquent payment; liens.

A. The charges for sewer service shall be subject to 10% penalty if not paid within 60 days after the date of the bill. If not paid within 120 days after the date of the bill, the bill plus the penalty shall bear interest from the due date at the rate of 1% per month or fraction thereof, or the maximum as permitted by law, until paid. Any unpaid sewer rent, together with penalties and interest thereon to the extent permitted by law, and all delinquent costs, shall be a lien on the property served, which may be collected by action in assumpsit, by distress and/or by a lien filed in the nature of a municipal claim and/or by termination of services as and to the extent provided by law. In addition, any costs and/or attorney's fees incurred by the Township shall be added to the unpaid sewer rent, to the extent permitted by law, along with penalties and interest as set forth above, and the aggregate of the same shall be entered as a lien on the property served.

B. All owners connected to the sewer system must give the Township their correct address and must inform the Township of any change of address. Failure to receive bills will not be considered an excuse for nonpayment nor permit an extension of the period during which bills are payable at face.

C. Payments made, as evidenced by the United States Post Office mark, on or previous to the end of the period during which the bills are payable at face, will be deemed to be a payment within such period.

D. All sewer rentals, together with all penalties, interest and costs, including attorney's fees, to the extent permitted by law, not paid on or before the end of 180 days from the date of each bill shall be deemed to be delinquent. All delinquent sewer rentals and all penalties, interest and costs, including attorney's fees, shall be a lien on the property served and shall be entered as a lien against such property in the office of the Prothonotary of Chester County and shall be collected in the manner provided by law for the filing and collection of such liens.

§ 154-111. Segregation of sewer revenues.

The funds received by the Township from the collection of the sewer rental and charges and all penalties and interest thereon, as herein provided for, shall be segregated and kept separate and apart, except for purposes of investment, from all other funds of the Township and shall be used only for the purpose of defraying the expenses of the Township in the operation, maintenance, repair, alteration, inspection, depreciation or other expenses in relation to such sewer system and for such payments as the Township may be required to make to the Valley Forge Sewer Authority or to the Tredyffrin Township Municipal Authority in connection with transportation and treatment service or under any lease or agreement it may enter into in connection with the financing of the sewer system pursuant to the provisions of the Act of May 2, 1945, P.L. 382, as amended.[6] Such funds, however, may be invested in common with other Township funds pending the use thereof for the purposes above specified, provided that the amounts of such funds and the income therefrom can at all times be traced and determined.

§ 154-112. Separate account for certain revenue. [Amended 3-5-1996]

Beginning with the year 1996, the budget and the annual financial statements for the Sewer Fund of the Township will separately set forth the estimated and actual revenues derived from tapping fees, and the income estimated and actually earned on the Construction Fund held by the Trustee under the Trust Indenture of the East Whiteland Township Municipal Authority (said tapping fee revenue and interest income being herein collectively called the "Capital Income").

---

6. Editor's Note: See 53 P.S. § 301 et seq.

§ 154-113. Rules and regulations.

The Township reserves the right to, and may from time to time, adopt, revise, amend and readopt such rules and regulations as it deems necessary and proper for the use and operation of the sewer system, and all such rules and regulations shall be and become a part of this Part 3.

§ 154-114. Termination of service.

The Township reserves the right to restrict or discontinue the owner's use of the sewer service if the owner fails to comply with the established effluent standards, or comply with other provisions of this Part 3.

Part 4
On-Lot Sewage Disposal Systems

[Adopted 12-12-2007 By Ord. No. 202-2007]

ARTICLE XI
Sewage Management Program for On-Lot Systems

§ 154-115. Short title; legislative authority; purpose.

A. This article shall be known and may be cited as an "Ordinance Providing for a Sewage Management Program for East Whiteland Township."

B. Pursuant to Section 1522 of the Second Class Township Code (Act of May 1, 1933, P.L. 103, No. 69, as amended through Act 60-1995)[7]; the Clean Streams Law (Act of June 22, 1937, P.L. 1987, No. 394, as amended, 35 P.S. §§ 691.1 to 691.1001); and the Pennsylvania Sewage Facilities Act (Act of January 24, 1966, P.L. 1535, as amended, 35 P.S. § 750.1 et seq., known as "Act 537"), specifically Title 25, Chapter 71, Section 71.71, it is the power and the duty of East Whiteland Township to provide for adequate sewage treatment facilities and for the protection of the public health by prohibiting the discharge of untreated or inadequately treated sewage. The Official Sewage Facilities Plan for East Whiteland Township states that it is necessary to formulate and implement a sewage management program to effectively prevent and abate water pollution and hazards to the public health caused by improper treatment and disposal of sewage.

C. The purpose of this article is to provide for the regulation, inspection, maintenance and rehabilitation of on-lot sewage disposal systems; to permit intervention in situations which may constitute a public nuisance or hazard to the public health; and to establish penalties and appeal procedures necessary for the proper administration of a sewage management program.

§ 154-116. Definitions.

As used in this article, the following terms shall have the meanings indicated:

ABSORPTION AREA — A component of an individual or community sewage system where liquid from a septic tank seeps into the soil; it consists of an aggregate-filled area containing piping for the distribution of liquid in the soil or sand/soil combination located beneath the aggregate.

AUTHORIZED AGENT — The Township Codes Enforcement Officer, a sewage enforcement officer, employee of the Township, professional engineer, plumbing inspector or any other qualified or licensed person who is authorized to function within specified limits as an agent of East Whiteland Township to administer or enforce the provisions of this article.

---

7. Editor's Note: See 53 P.S. § 66601.

BOARD — The Board of Supervisors of East Whiteland Township, Chester County, Pennsylvania.

COMMUNITY ON-LOT DISPOSAL SYSTEMS (COLDS) — Any system, whether publicly or privately owned, for the collection of sewage of a liquid nature from two or more lots, and the treatment and/or disposal of the sewage on one or more of the lots or at any other location for final disposal in whole or in part into the soil. This includes land application by spray irrigation.

LOT — A parcel of land, the land area of which is contiguous and undivided by a street and which conforms to the provisions of Chapter 200, Zoning, and Chapter 175, Subdivision and Land Development, of the Code of the Township of East Whiteland and any other Township ordinances, codes, regulations, plans and maps; or any other parcel or tract of land, whether or not improved.

MALFUNCTION — A condition which occurs when an on-lot sewage disposal system discharges sewage onto the surface of the ground, into groundwaters of this commonwealth or into surface waters of this commonwealth, backs up into a building connected to the system or in any manner causes a nuisance or hazard to the public health or pollution of ground- or surface water or contamination of public or private drinking water wells. Systems shall be considered to be malfunctioning if any condition noted above occurs for any length of time during any period of the year.

ON-LOT SEWAGE SYSTEM — A system of piping, treatment tanks or other facilities serving a single lot and collecting, treating and disposing of sewage into a subsurface absorption area or spray irrigation system.

OWNER — An individual, association, public or private corporation for profit or not for profit, partnership, firm, trust, estate, department, board, bureau or agency of the United States or commonwealth, political subdivision, municipality, district, authority or other legal entity which is recognized by the law as the subject of rights and duties, being the title owner of property in East Whiteland Township. The term includes members of an association, partnership or firm and the officers of a local agency or municipal, public or private corporation, for profit or not for profit.

PERSON — Any individual, partnership, corporation or other legal entity.

RETAINING TANK (also called a "holding tank") — A watertight receptacle which receives and retains sewage and is designed and constructed to hold sewage pending the ultimate disposal of the sewage at another site.

SEWAGE — Any substance that contains any of the waste products or excrement or other discharge from the bodies of human beings or animals and any noxious or deleterious substances being harmful or inimical to the public health or to animal or aquatic life or to the use of water for domestic water supply or for recreation or which constitutes pollution under the Act of June 22, 1937 (P.L. 1987, No. 394), known as the "Clean Streams Law," as amended.

SEWAGE ENFORCEMENT OFFICER — The Chester County Health Department.

TOWNSHIP — East Whiteland Township, Chester County, Pennsylvania.

TREATMENT TANK — A watertight receptacle which receives the discharge of sewage from a house or building sewer line and is designed and constructed so as to permit settling of settleable solids from the liquid digestion of the organic matter by detention and discharge of the liquid portion into a distribution system or pit for underground dispersion or elevated sand mound, individual spray irrigation. Treatment tanks include septic tanks, cesspools, aerobic units and the like.

§ 154-117. Scope; applicability.

A. The requirements of this article shall be effective throughout the municipal limits of East Whiteland Township, Chester County.

B. Applicability.

(1) The operation, maintenance and repair of an individual, commercial or community on-lot sewage system shall be the responsibility of the property owner; provided, however, that maintenance and repair shall be subject to the continuing surveillance and inspection by the Township, its authorized agent and/or the Sewage Enforcement Officer.

(2) It shall be the responsibility of the property owner who utilizes an on-lot sewage disposal system to have it pumped in accordance with the schedule set forth in § 154-119 of this article and to make such other repairs or replacements as are necessary to prevent the malfunctioning of the system.

(3) The construction, repair and/or replacement of an individual, commercial or community on-lot disposal system shall be subject to the issuance of appropriate permits by the Chester County Health Department and/or PADEP.

§ 154-118. Inspection.

A. All on-lot systems, COLDS and small flow treatment facilities shall be subject to periodic inspections and shall be subject to inspection at any time if one or more of the following events occurs:

(1) During the installation of any individual, commercial or community on-lot sewage system or small flow treatment facilities.

(2) If the licensed septic tank contractor performing his regular pumpout schedule contacts the Township or Chester County Health Department that a serious malfunction condition exits at an on-lot system or small flow treatment facility.

(3) If the owner or a neighboring property owner of a facility contacts the Township, PADEP or the Chester County Health Department.

(4) If the owner fails to submit the proof of pumping within 90 days after the date on which pumping is required as specified in § 154-119.

(5) For a small flow treatment facility, in addition to the above, if periodic reports submitted to the Township or PADEP indicate that the facility effluent is not achieving its minimum requirements.

B. Items to be inspected for on-lot systems:

(1) Baffle condition.

(2) Extensions (riser rings).

(3) Inspection ports.

(4) High water level in tank.

(5) Wet areas near system or site.

(6) Noticeable odors.

(7) Sewer backup into house.

(8) Abundant grass growth near system or site.

(9) Backflow of water from absorption area to tank.

C. For the small flow treatment facility, the following inspections should be made in addition to any of the applicable items under Subsection B:

(1) Evidence that the system is operating in accordance with the design.

(2) Test for alternating of blowers and other operating parts.

(3) Inspect outfall line, if any, for evidence of recent discharge and no clogs in the outfall line.

(4) Inspect discharge effluent for clarity and sampling if deemed appropriate.

§ 154-119. On-lot/COLDS maintenance.

A. Treatment tank systems. The owner of a lot who uses a treatment tank system must have the tank(s) pumped and the contents disposed of at a licensed sewage disposal facility at least once every three years by a Chester County Health Department licensed septic tank contractor. Every owner of a treatment tank system existing on any lot on the effective date of this article shall submit proof of the required pumping and disposal to the Township's Codes Enforcement Officer not later than May 31, 2008, in the form of a receipted bill issued by the

contractor or such other proof as shall be acceptable to said Officer. If a system has been pumped within 12 months of the May 31, 2008, deadline, proof of such pumping shall be submitted to the Township's Code Enforcement Officer. That system will then have to be pumped prior to the expiration of three years from the date that the system was last pumped. Thereafter, proof of pumping shall be submitted to the Codes Enforcement Officer demonstrating pumping and disposal of the system's contents within the preceding twelve-month period at least once every three years. The owner of a system installed after the effective date of this article shall henceforth pump his system in accordance with the schedule set forth herein.

B. Retaining tanks. The owner of a lot utilizing a retaining tank(s) or a sewage treatment system designed or operated as a retaining tank on the effective date of this article shall enter into a written contract with a Chester County Health Department licensed septic tank contractor requiring periodic pumping and disposal of the tank's contents in accordance with the schedule required by the permit which authorized the installation and use of the retaining tank system. A copy of the contract shall be filed by the owner with the Codes Enforcement Officer by May 31, 2008, and annually thereafter and shall be in effect and valid for a period of at least one year. The owner of a system installed after the effective date of this article shall submit the required contract to the Codes Enforcement Officer within one year of the installation and annually thereafter.

C. Stream discharge systems. The owner of a lot on which a stream discharge sewerage system approved and permitted by the PADEP has been installed shall register the system with the Township within 90 days following the effective date of this article by filing a copy of the current PADEP permit, together with any other information required by the Codes Enforcement Officer to verify the current validity of the permit and copies of any tests verifying the system's operational integrity performed during the 12 months immediately preceding the registration. The owner of a system installed after the effective date of this article shall register the system with the Township within 90 days of such installation. The Codes Enforcement Officer or other authorized agent shall arrange for periodic inspections as required.

D. Community on-lot disposal systems (COLDS). The operator(s) of any COLDS permitted for flows over 2,500 gallons per day shall submit regular reports to the Township. Reports shall be in the PADEP format for municipal waste load management and discharge monitoring reports. Reports are to be submitted to the Township at least as often and at the same time as they are to be submitted to PADEP.

E. Compliance. Failure to comply with the provisions of Subsections A through D of this § 154-119 or to correct any defect determined during an inspection conducted pursuant to § 154-118 hereof within the time specified for by the Codes Enforcement Officer shall constitute a violation of this article, subjecting the owner of the property on which

the system is installed to the enforcement and penalty provisions of §§ 154-121 and 154-122 of this article.

F. Change of ownership. Prior to the conveyance of any lot which is subject to the provisions of this article, the sewage system installed on such lot shall be pumped and its contents disposed of as required by this section, unless the owner has filed with the Township a receipt issued by a licensed septic tank contractor proving that the system was pumped out within the immediately preceding six-month period. Following any conveyance of the lot, the owner shall be subject to the provisions of this article.

G. Promulgation of regulations and required proof. In addition to the requirements specified in this section, the Board may, by resolution, promulgate such forms and regulations for the administration and enforcement of this article as it shall determine necessary. Failure of a lot owner to receive or secure any required form shall not constitute a defense to the enforcement or penalty provisions of this article.

§ 154-120. System rehabilitation.

When the Township becomes aware of a violation(s) of this article, regulations promulgated by the Township hereunder or County Health Department regulations, it shall report such violation(s) to the Chester County Health Department and/or PADEP. All facilities regulated in this article shall be subject to the applicable rules and regulations of the Chester County Health Department and/or PADEP.

§ 154-121. Enforcement; appeals.

A. The Township's Codes Enforcement Officer shall have the power and authority to determine all issues relating to compliance with the provisions of this article and to bring and prosecute in the name of the Township enforcement and penalty proceedings for violations of its provisions.

B. Notice. If it appears that a violation of this article has occurred, the Township's Codes Enforcement Officer shall issue an enforcement notice to the property owner. Such notice shall be personally delivered or sent via certified mail to the owner of record of the property where the violation has occurred. The enforcement notice shall state the following:

(1) The name of the owner of record and any other person against whom the Township intends to take action.

(2) The location of the property where the violation has occurred.

(3) The specific violation of this article.

(4) The date before which steps for compliance must be completed.

(5) That failure to comply with the notice within the time specified constitutes a violation with possible sanctions imposed.

C. Appeals from the Codes Enforcement Officer's determinations or interpretations of the provisions of this article shall be taken to the Board within 30 days from the date of such determination or interpretation. Appeals shall be heard and determined in accordance with the provisions of the Local Agency Law. The Board may request documentation and consult with the Township Engineer or Solicitor or other competent authorities as it determines necessary for a just resolution of the appeal and may impose the reasonable costs thereof upon the appellant; provided, however, that the Board shall have no jurisdiction to hear or determine any appeal from the action of the Codes Enforcement Officer in prosecuting a violation of this article in a summary proceeding before a District Justice.

§ 154-122. Violations and penalties.

Any person who violates any provision of this article or who fails to comply with any of its provisions or regulations promulgated hereunder or who fails or refuses to comply with any lawful notice, order or direction of the Codes Enforcement Officer shall be guilty of a summary offense and, upon conviction by a District Justice, shall pay a fine of not less than $100 nor more than $1,000, together with the costs of prosecution, and upon default in payment of the fine and costs, shall be subject to imprisonment in the county prison for a term not exceeding 30 days. Each day during which any violation of this article continues shall constitute a separate offense punishable by like fine or imprisonment.

§ 154-123. Fee schedule.

The Board of Supervisors shall, by resolution, adopt a fee schedule for the administration of this article. Said schedule shall be kept on file by the Township Secretary and shall be reviewed and revised as necessary.

NOTICE TO BE SENT TO AQUA CUSTOMERS

NOTICE OF PROPOSED ACQUISITION AND RATE BASE ADDITION
Docket No. A-2021-3026132

Dear Customer:

On [DATE], the Pennsylvania Public Utility Commission (PUC) conditionally accepted for filing the application of Aqua Pennsylvania Wastewater, Inc. (Aqua) for approval to acquire the East Whiteland Township (East Whiteland) wastewater system assets. East Whiteland serves approximately 3,900 customers in Chester County, Pennsylvania. Aqua's application also requests that the PUC authorize an addition of up to $54.93 million to Aqua's rate base pursuant to 66 Pa. C.S. § 1329. A utility's rate base is the value of property used by the utility to provide service to its customers and is one of several components used to establish a utility's customer rates.

Aqua periodically makes applications to the PUC for newly acquired systems which requires Aqua to send these types of notices. This notice is specific to the East Whiteland acquisition and you may receive additional notices regarding other acquisitions in the future.

This acquisition will not immediately, but may in the future, affect water and/or wastewater bills of Aqua customers, including the new East Whiteland Township wastewater customers. Aqua is not requesting a rate increase as part of the acquisition. Your rates will not change as a result of this transaction until the conclusion of an Aqua rate case where Aqua includes the East Whiteland system and requests and receives PUC approval to increase its rates. At that time, based on a preliminary analysis of the potential rate impacts, Aqua estimates that the rates of the average customer could increase. The amount of the increase will be determined in Aqua's next base rate case and will be dependent on how the PUC chooses to apportion the increase among Aqua's acquired and existing customers. The tables below present non-binding, estimated incremental rate effects of the proposed rate base addition on Aqua's existing water and wastewater customers:

Aqua Wastewater Customers

Rate Class	Average Usage	Estimated Monthly Increase	Estimated Percentage Increase
Residential	3,020 gal/month	$4.62	4.67%
Commercial	21,940 gal/month	$14.53	4.67%
Industrial	3,200 gal/month	$3.74	4.67%

Aqua Water Customers

Rate Class	Average Usage	Estimated Monthly Increase	Estimated Percentage Increase
Residential	4,080 gal/month	$0.33	0.41%
Commercial	37,050 gal/month	$2.06	0.41%
Industrial	211,510 gal/month	$9.72	0.41%

The amounts stated above could change and will depend on how the PUC chooses to apportion any increase among the types of service, rate zones, and classes of customers.

PUC ROLE

The state agency which approves acquisitions and rates for regulated public utilities is the PUC. The PUC will review and investigate the proposed acquisition and requested $54.93 million in additional rate base. After examining the evidence, the PUC may approve, modify or deny the acquisition and may approve or modify the $54.93 million addition to rate base. The PUC will issue a decision on the application on or around [DATE].

ACTIONS YOU CAN TAKE

You can support or challenge Aqua's request by:

1) Sending a letter to the PUC. You can tell the PUC why you support or object to Aqua's acquisition of East Whiteland's wastewater system in your letter. This information can be helpful when the PUC investigates the application. Send your letter to the Pennsylvania Public Utility Commission, Post Office Box 3265, Harrisburg, PA 17105-3265.

2) Attending or presenting testimony at a PUC Public Input Hearing. You can attend or be a witness at a PUC public input hearing. The PUC holds public input hearings if it opens an investigation into Aqua's transaction and there is enough interest in the case. At these hearings, you can present your views in person to the PUC judge and to company representatives. Testimony under oath becomes part of the application case record. The PUC holds these hearings in the service area of the company. For more information, call the PUC at 1.800.692.7380.

3) Filing a protest or a petition to intervene. If you want to be a party to the case, you must file a protest or a petition to intervene. You then have an opportunity to take part in all the hearings about the proposed acquisition. You can receive copies of all materials distributed by the other parties. Protests and petitions to intervene must be filed in accordance with 52 Pa. Code (relating to public utilities) on or before [DATE]. Filings must be made with the Secretary of the Pennsylvania Public Utility Commission at P.O. Box 3265, Harrisburg,

PA 17105-3265, with a copy served on Aqua's counsel at Thomas, Niesen & Thomas, LLC, Attn: Thomas T. Niesen, 212 Locust Street, Suite 302, Harrisburg, PA 17101.

The documents filed as part of this application are available for inspection and copying at the Office of the Secretary of the PUC between 8 a.m. and 4:30 p.m., Monday through Friday, on the PUC's website at www.puc.pa.gov and at Aqua's offices at 762 West Lancaster Avenue, Bryn Mawr, PA 19010. The PUC docket number is A-2021-3026132.

Board of Supervisors: Susan Drummond • Scott Lambert • Richard Orlow **Township Manager:** John Nagel

June 3, 2020

To the Board of Supervisors and Citizens of East Whiteland Township:

We are pleased to present to you the Comprehensive Annual Financial Report of East Whiteland Township for the fiscal year ended December 31, 2019. A complete set of financial statements presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants is presented herewith.

This report consists of management's representations concerning the finances of East Whiteland Township. Consequently, responsibility for both the accuracy of the data, and the completeness and fairness of the presentation, including all disclosures, rests with the Township's management. To the best of our knowledge, the information presented in this report is accurate in all material respects and is reported in a manner designed to fairly represent the financial position and results of operations of the funds and component units of East Whiteland Township. All disclosures necessary to enable the reader to gain an understanding of East Whiteland Township's financial activities have been included.

East Whiteland Township's financial statements have been audited by Maillie LLP, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of East Whiteland Township for the fiscal year ending December 31, 2019, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures of the financial statements; assessing the accounting principles used and significant estimates by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion that East Whiteland Township's financial statements for the fiscal year ended December 31, 2019, are fairly presented in conformity with GAAP. The independent auditors' report is presented at the beginning of the Financial Section of this report.

The purpose of this report is to provide readers with useful information concerning the Township's financial position and operations. Generally Accepted Accounting Principles (GAAP) require that management provide a narrative introduction, overview and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. East Whiteland Township's MD&A can be found immediately following the report of the independent auditors.

Profile of the Township

East Whiteland Township is located in the middle of the Chester Valley in east-central Chester County, about 25 miles west of central Philadelphia. With about 11 square miles of land area, the Township measures slightly more than four miles in an east-west direction and 2.8 miles from north to south.

East Whiteland Township is located in a diverse and dynamic suburban area traversed by several important highways, with an excellent mix of housing and expanding opportunities for employment, making it one of the most desirable communities in the region in which to live and work. As part of the Great Valley School District, East Whiteland houses the middle and senior schools as well as the K.D. Markley Elementary School. East Whiteland is also home for Immaculata University and has campuses for the Drexel University Lebow College of Business and Penn State University Great Valley.

Whiteland Township was part of the Welsh Tract purchased from William Penn in 1684 by a group of Quakers. In 1704, part of the tract became Whiteland Township. In 1765, by decree of the County Court the Township was divided into East and West Whiteland Townships. Historically, East Whiteland Township was predominantly agricultural, with several crossroad villages strung along Lancaster Pike and mills along Valley Creek. The arrival of railroads in the mid 1800's led to the development of several mineral extraction businesses followed by construction materials processing, steel fabricating, petroleum and natural gas storage and transmission, and disposal of waste materials. With the completion of route 202 through the Township in the 1960's, East Whiteland evolved into a major office employment center, and some of the previously dominant businesses ceased operation while others continue to function in a community that has changed a great deal over the years. In 1950 the Township population was 1,740. The current estimated resident population is 11,000, however, the number of people that work in the municipality on a daily basis is more than 30,000.

East Whiteland Township is governed by a three member elected Board of Supervisors that serves as the Township's legislative and policymaking body. The Board members are elected at large to staggered six-year terms. East Whiteland Township operates under the auspices of the Pennsylvania Second Class Township Code. The Board of Supervisors is empowered to appoint professionals to assist in the operation of the Township and to furnish advice and counsel on technical matters. Additionally, the Board appoints all the members of the various boards and commissions, including the Planning Commission and Zoning Hearing Board. The Tax Collector and three member Board of Auditors are elected positions. Levying taxes and authorizing appropriations are the responsibility of the Board of Supervisors.

The Board of Supervisors is assisted by a full-time appointed Township Manager who is responsible for the day-to-day operations of the Township. The Township provides a full range of municipal services. The public safety programs include police, fire protection, building inspection, planning, zoning, emergency management and code enforcement. East Whiteland Township partners with the East Whiteland Township Volunteer Fire Association to provide emergency services. The countless hours spent by the volunteers in protecting the community are greatly appreciated. Public works programs include street maintenance and repair, street lighting, snow removal, traffic signalization, street markings, sewer system maintenance, storm sewer and storm water basin maintenance and maintenance of Township buildings and park facilities. The Township owns and maintains numerous community and neighborhood parks and nature areas and supports the Friends of Summer Stage to provide free summer concerts in Valley Creek Park.

Major Initiatives

Following are some of the major initiatives undertaken by the Township in 2019:

- **Commercial and Residential Development** continue to be a major focus in East Whiteland Township. Our staff works with the developers to ensure the Township interests are protected and the Comprehensive Plan goals are met.

- **Traffic issues** - In 2014, the Township secured an ARLE grant of $445,000 to upgrade traffic signals in the Township to reduce traffic congestion. This project began in 2018 and was fully implemented in 2019. The Route 30 Corridor Master Plan for the widening of Rt. 30, land use, and pedestrian traffic was completed during 2018. In addition, the Act 209 Transportation Study was completed and a transportation impact fee to be imposed upon new subdivision and new development to fund transportation capital improvements in accordance with a transportation capital improvements plan and a roadway sufficiency analysis.

- **Multi-year Financial Management Plan** - In 2018, with a grant from the Commonwealth of Pennsylvania Department of Community and Economic Development and its Early Intervention Program, the Township worked with consultants to develop a multi-year financial management plan that included an assessment of operations and financial condition. The Township had recently relied on non-recurring revenues to cover recurring operating costs, pension costs are increasing and unfunded liabilities are growing. A baseline projection showed a deficit of $1.5 million in 2019 with deficits continuing through 2023 absent corrective action. Ultimately, to close the deficit, an increase to the local earned income tax rate was passed for 2019. For 2019 the earned income tax rate was increased to 0.75% from 0.50%. The five year forecast was rolled forward and updated in 2019 and utilized as a tool for planning and budgeting.

  Controlling health insurance costs continues to be a primary focus and the Township's AFSCME and Police employees moved to a plan with design changes that reduced current costs and cost growth while still providing quality coverage for its employees in May 2019 and in February 2020, respectively.

Fund Balance Policy

The Township has adopted GASB Statement No. 54, which redefined how fund balances of the Governmental Funds are presented in the financial statements. Fund balances are classified as follows: Non spendable, Restricted, Committed, Assigned and Unassigned.

Long-Term Debt Activity

For more detailed information on long-term debt activity, please see Notes to the Basic Financial Statements (Note F, Long-Term Debt).

Capital Asset Activity

For more detailed information on capital asset activity, please see the Notes to the Basic Financial Statements (Note C, Capital Assets).

Local Economy

Located in east-central Chester County with its highly trained and educated workforce, desirable quality of life, competitive tax structure and close proximity to Philadelphia, PA, East Whiteland Township has a diverse and dynamic economy, boasting over 1,000 businesses.

Due to the coronavirus (SARS-CoV-2) pandemic and associated societal and business closures ordered by the Commonwealth of Pennsylvania, the general outlook for the economy of East Whiteland Township is uncertain. Locally planned continues to move into production in 2020. However, the Township's economy and large tax base is expected to slow in the near term as a decrease in earned income tax revenue in the range of 6.3% - 12.6% is anticipated before continuing to grow, driven in large part by business and commercial development, and by new residential construction. East Whiteland Township is home to the Great Valley Corporate Center and serves as U.S headquarters and Regional Headquarters to several national and international firms including Saint-Gobain, Vishay and Cerner Corporation. Vanguard has plans to add 500,000 square feet of office space and new jobs are expected over the next several years. Although there are major employers in the Township, the employment base is not dominated by one business or industry. The Township's business base consists of software development and application firms, telecommunication firms, e-commerce companies, design and manufacturing businesses, and pharmaceutical research firms. As noted, the Township hosts corporate and regional headquarters operations as well as trade and professional associations, retail firms, wholesale distributors, and business and financial services. Noting the list of Principal Employers in the Statistical Section of this report, the top employers comprised approximately 32% of the workforce in 2019. This diversity would provide stability to weather downturns in the economy.

During 2019, land development and subdivision activity continued. A number of mixed use developments including over 1,000 units of housing are expected to be completed over the next five years. There is also approximately 800,000 square feet of commercial properties under construction or pending development. The Township has updated and will continue to update some aspects of the zoning for the Route 30 Corridor to encourage redevelopment.

A more detailed analysis of the Township's overall financial condition during the fiscal year ended 2019 is included as part of Management's Discussion and Analysis section of this report.

Long-Term Financial Planning

The Board of Supervisors and Township staff is committed to providing value to the taxpayers by maintaining quality service levels and offering new benefits whenever the opportunity presents itself and the Township's fiscal position permits. To accomplish this, the Township regularly evaluates its revenue generating strategy. The Township has also developed and maintains a multi-year financial management plan and multi-year financing plans for replacement of capital assets and infrastructure improvements.

Also, as a part of sound fiscal planning, the Township has adopted a fund balance policy that is compliant with GASB 54 for determining fund balance categories and based on recommendations from the Government Finance Officers Association for maintaining a fund balance in the General Fund of approximately two months of expenditures, or a range of fifteen to twenty percent of General Fund appropriations. Due to the uncertainty associated with the coronavirus pandemic, the Board of Supervisors assigned $4,050,000 of fund balance to tax rate stabilization.

Internal Controls

The management of the Township is responsible for establishing and maintaining an internal control structure designed to ensure that the assets of the Township are protected from loss, theft, or misuse and to ensure that adequate accounting data is compiled and maintained to allow for the preparation of financial statements in conformity with generally accepted accounting principles. The internal control structure is designed to provide reasonable, but not absolute, assurance that the Township's objectives are met. The concept of reasonable assurance recognizes that:

1. The cost of a control should not exceed its benefit, and

2. The evaluation of cost and benefits requires estimates and judgments by management.

All internal accounting control evaluations occur within the above framework. We believe that the Township's internal accounting controls adequately safeguard assets and provide reasonable assurance of proper recording of transactions and maintenance of asset accountability.

In addition to the above controls, the Township maintains budgetary accounting controls. The objective of these controls is to ensure compliance with legal provisions embodied in the annual budget approved by the Board of Supervisors. Activities of all Township funds, with the exception of developers' escrow funds and pension trust funds, are included in the annual appropriation budget. The annual budget process officially begins in July of each year with the request for budget proposals sent to the Township's department heads. Throughout the course of September and October, requests for funding are submitted and reviewed by the Township management. A proposed annual budget is submitted to the Board of Supervisors in October or November. The Board holds a public hearing on the proposed budget and the process culminates with a vote for adoption by the governing body in December. The Township's fiscal year begins on January 1st and ends on December 31st. All annual appropriations lapse at year-end.

Although the Township maintains the legal level of control established by law for its operating budget, the Board of Supervisors has also established an internal budgetary control system at the departmental level. Each department is required to operate within the annual departmental budget established by the Board of Supervisors.

As demonstrated by the statements and schedules included in the financial section of this report, the Township continues to meet its responsibility for sound financial management.

Awards and Acknowledgements

Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to East Whiteland Township for its comprehensive annual financial report for the fiscal year ended December 31, 2018. This was the fourth consecutive year that the government has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to GFOA to determine its eligibility for another certificate.

Preparation of this report would have been impossible without the hard work of the Finance Department staff, not just in the compilation of information at year-end, but in maintaining the Township's financial records and fiscal control system throughout the year. We also wish to thank our auditors, Maillie LLP, for their expertise and assistance throughout this process.

We greatly appreciate the ongoing support and guidance we receive from the Board of Supervisors.

Respectfully Submitted,

John B. Nagel

Independent Auditors' Report

To the Township Supervisors
East Whiteland Township
Frazer, Pennsylvania

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund and the aggregate remaining fund information of East Whiteland Township as of and for the year ended December 31, 2019, and the related notes to the financial statements, which collectively comprise East Whiteland Township's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

East Whiteland Township's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

To the Township Supervisors
East Whiteland Township
Frazer, Pennsylvania

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund and the aggregate remaining fund information of as of December 31, 2019, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America (GAAP).

Emphasis of Matter

For the year ended December 31, 2019, East Whiteland Township adopted new accounting guidance, implementing Governmental Accounting Standards Board Statement No. 84, *Fiduciary Activities*. Our opinion is not modified with respect to this matter.

As discussed in Note Q to the financial statements, subsequent to year end, a global pandemic due to the spread of the COVID-19 coronavirus caused the United States government to declare a national emergency. The pandemic has resulted in economic uncertainties which have the potential to have a significant impact on all Township operations. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that management's discussion and analysis on pages 17 through 27, budgetary comparison information on pages 87 and 88, pension plan information on pages 89 through 97 and post-employment benefits other than pension plan information on pages 98 through 100 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise East Whiteland Township's basic financial statements. The supplementary information listed in the table of contents is presented for purposes of additional analysis and is not a required part of the basic financial statements.

To the Township Supervisors
East Whiteland Township
Frazer, Pennsylvania

The supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

OVERVIEW OF THE FINANCIAL STATEMENTS

Management's Discussion and Analysis provides an introduction to the Township's basic financial statements. The basic financial statements include:

1. Township-Wide Financial Statements
2. Fund Financial Statements
3. Notes to the Financial Statements

Additional information is also provided to supplement the basic financial statements.

Township-Wide Financial Statements

The Township's annual report contains two Township-Wide Financial Statements. They are the *Statement of Net Position* and the *Statement of Activities.* These statements provide both long-term and short-term information about the Township's overall financial status. Financial reporting at this level is similar to that found in the private sector with its basis in full accrual accounting and the elimination or reclassification of internal activities.

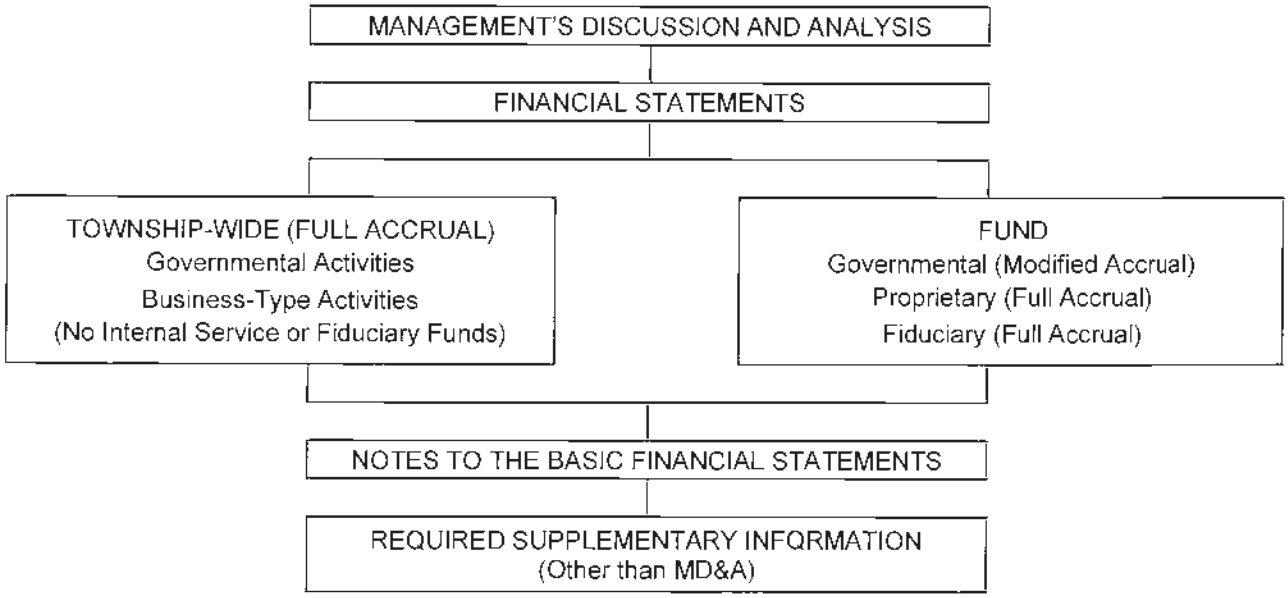
The *Statement of Net Position* provides information on all of the Township's assets and liabilities, with the difference reported as *Net Position.* Over time, increases or decreases in net position serve as a useful indicator of whether the Township's financial position is improving or deteriorating. Evaluation of the overall economic health of the Township would include other non-financial factors such as changes in the taxpayer base or the condition of the Township's infrastructure, in addition to the financial information provided in this report.

The *Statement of Activities* reports how the Township's net position changed during the current fiscal year. All current year revenues and expenditures are included in this report regardless of when cash is received or paid. An important purpose of the Statement of Activities is to show the financial reliance of the Township's various activities or services on revenues provided by the Township's taxpayers.

Both Township-Wide Financial Statements are divided into two categories:

1. ***Governmental Activities***: Most of the Township's basic services are included here, such as general government, public safety, public works and recreation. These activities are principally supported by taxes and intergovernmental revenues.
2. ***Business-Type Activities***: Services which are intended to recover all or most of their costs through user fees and charges. The Township's sewer system is the only business-type activity.

Fund Financial Statements



The Fund Financial Statements provide more detailed information about the Township's Funds, focusing on its most significant or "Major Funds" - not the Township as a whole. A fund is an accountability unit used to maintain control over resources segregated by specific sources of funding or spending on particular programs.

- Some funds are required by state law or bond covenants.
- The Township establishes other funds to control and manage money for particular purposes or to show that it is properly using certain revenues.

The Township has three kinds of Funds:

- ***Governmental Funds***: Most of the Township's basic services are included in Governmental Funds, which generally focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the Governmental Funds' statements provide a detailed *short-term view* that helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the Township's programs. Because this information does not encompass the additional long-term focus of the Township-Wide statements, additional information is presented that explains the relationship (or differences) between them.
- ***Proprietary Funds***: Services for which the Township charges a fee are generally reported in Proprietary Funds. Proprietary Funds are reported in the same way as the Township-Wide statements. The Township's Enterprise Funds (one type of Proprietary Fund) are the same as its business-type activities but provide more detail and additional information, such as cash flows.
- ***Fiduciary Funds***: The Township is the trustee, or fiduciary, for assets that belong to others, such as the pension plans. The Township is responsible for ensuring that the assets reported in these funds are used only for their intended purposes and by those to whom the assets belong. The Township excludes these activities from the Township-Wide financial statements because it cannot use these assets to finance its operations. The Township's Fiduciary Funds are the Police Pension Fund, the Non-Uniformed Pension Fund, the Firefighter Pension Fund, and the OPEB Trust Fund. The Township also has a Custodial Fund used for deposits the Township holds as prepayments for engineering reviews and other developer costs paid by the Township. When the projects are completed, any balances are returned to the developer

Narrative Discussion and Analysis

Within this section of East Whiteland Township's annual financial report, the Township's management provides narrative discussion and analysis of the financial activities of the Township for the fiscal year ended December 31, 2019. The Township's financial performance is discussed and analyzed within the context of the accompanying financial statements following this section.

FINANCIAL HIGHLIGHTS

- **Total Net Position** - Assets and Deferred Outflows of Resources exceeded liabilities by $38,186,021 for the fiscal year reported. This total includes both governmental and business-type (Sewer) activities. Capital Assets total $28,177,298, which includes property and equipment net of accumulated depreciation and reduced for outstanding debt related to the purchase or construction of capital assets. The balance is unrestricted assets of $9,384,062 and restricted assets of $624,661 for highway and street projects. Total liabilities include $7.7 million in outstanding debt for GOB governmental bonds and $16.1 million for GOB sewer bonds. Although the Township's investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources since the capital assets themselves cannot be used to liquidate these liabilities.

- Cash and Investments - Total Township assets included $24,953,117 in cash and cash equivalents and $252,052 in financial investments, $15,121,394 in the Governmental Funds and $10,083,775 in the Sewer Fund.

- **Governmental Fund Balances** - At the end of 2019, the Township's governmental funds' combined ending fund balance was $17,489,068, an increase of $3,611,243 from the prior year primarily due to an increase in the earned income tax (EIT) rate from 0.5% to 0.75% resulting in revenues that were $3,221,000 higher than the prior year. Of the current balance, $624,661 is restricted for highway and street projects, and $16,864,407 is assigned for the various purposes on the face of the balance sheet.

- **Total General Obligation Bonds Outstanding** decreased by $1,010,000 from 2018 due to principal reductions in the four current general obligation bond issues.

Governmental Activities

Governmental Revenue - 2019

As indicated in the Condensed Statements of Activities (Figure I-3) and displayed in Figure I-4, the primary source of revenue for the township is local taxes which include Earned Income Taxes, Local Services Taxes, and Real Estate (Property and Transfer) Taxes.

- Earned Income Taxes (EIT) totaling $9,741,890 and Local Services Taxes (LST) totaling $1,322,836 were 57% and 8% of revenue respectively. EIT exceeded 2018 reported collections by $3,221,365 (49%) and LST increased by $59,939 (5%). The increase in EIT is attributed to an increase in the EIT rate to 0.75% from 0.50%.

- Real Estate Taxes totaled $757,124 (4% of revenue), an increase of $27,463 (4%) in 2019 related to new construction and reassessments.

- Transfer Taxes totaled $1,199,970 (7% of revenue), a decrease of $1,791,333 (-60%) from 2018 as there were several large commercial properties that transferred ownership in 2018 that were non-recurring in 2019

Service Revenue mostly related to permits, public safety fees, engineering reviews, grants and state aid totaled $1,995,593 (12% of revenue). This was $1,689,221 less than the prior year primarily related to decreased permit fees related to development in the Township (-$1,400,000), and less traffic impact fees collected from developers to fund transportation improvements in accordance with the Township's transportation capital improvements plan (-$200,000).

In 2019 the Township received capital grant funding of $503,494 (3% of revenue) through the State's Automated Red Light Enforcement Program Project Funds.

Governmental Expenses - 2019

As indicated in the Condensed Statements of Activities (Figure I-3) and displayed in Figure I-4, total expenses of the Township's governmental activities, public safety programs account for $9,312,035, or 63% of the total expenses for the Township's governmental activities. Public safety includes the police, codes, and planning & zoning departments plus a full-time staff of 10 firefighters/EMTs who complement the local volunteer fire company. General Administration, and Highway and Street Services account for 12% and 22% respectively of the total expenses.

Total expenses decreased $788,173 (-5%) as follows:

- Public Safety decreased by $583,322 (-6%) in 2019, primarily due to decreased medical costs in our police plan (-$272,000) and decreased premiums in our fire plan (-$75,000), a one-time contribution to the local volunteer fire company for two new fire trucks in 2018 (-$300,000), and decreased postretirement benefit expense (-$570,000). These decreases were offset by funding of post-retirement benefits that was deferred in the prior year ($202,000), increased police pension expense ($118,000), contract annual wage increases for all public safety departments and new police hires, offset by reduced part time hours and overtime ($240,000), and increased information technology costs due to system changes and upgrades ($75,000).

- General Government expenses decreased by $193,313 (-10%) in 2019, primarily due to a decrease in medical insurance premiums due to a less costly plan (-$62,000), a decrease in pension expense (-$61,000), a decrease in information technology related payroll and expense (-$42,000) and lower engineering and solicitor costs and other professional services costs related to special projects and studies (-$154,000), including DCED Early Implementation Program, the Route 30 Corridor Study and the Act 209 Traffic Impact Study. These decreases were offset by an increase in professional services related to labor contract negotiations for the East Whiteland Police Association and AFSCME contracts that expired December 31, 2018 ($55,000), an increase in EIT tax collection fees due to the increase in EIT tax collected ($20,000), and funding of post-retirement benefits that was deferred in the prior year ($51,000).

- Culture and recreation expenses increased $46,482 (23%) in 2019 due to a change in the summer camp program from half day to full day.

Governmental Net Position - 2019

As a result of the 2019 Governmental Activities noted above, East Whiteland recognized a $2,474,730 increase in Net Position. The ending Net Position remains healthy at $11.7 million including $14.9 million in cash to manage annual expenses if revenue timing is an issue.

Business-Type Activities

The Township's only business-type activity is its sewer operation. East Whiteland Township's sewer system includes 13 sewer pumping stations and approximately 77 miles of pipeline. The Township accepts flows and collects sewer rental fees from the adjoining municipalities of East Goshen Township, Charlestown Township and Malvern Borough. The Township, in turn, pays sewer rental fees to neighboring Tredyffrin Township and East Goshen Township, and a public utility company for conveyance and to the Valley Forge Sewer Authority for waste treatment.

- **Service Revenue** in fiscal year 2019 was $4,745,887 or $369,999 less than 2018 due to a decrease in sewer rental fees of $131,000 related to a reduction in water usage by high volume customers, a decrease in connection fees of $43,000, and a decrease in tapping fees of $279,000. Revenue from tapping fees in 2019 is still significant at $944,000. A 2019 insurance reimbursement of $85,000 covered emergency repairs and by-pass charges due to a sinkhole at one of the Township's pump stations.

- **Sewer Expenses** increased $704,000 primarily due to increases in conveyance costs ($513,000), treatment costs ($94,000), waste treatment plant construction charges ($105,000), pump station emergency repairs due to a sinkhole ($90,000), and offset by a decrease in medical insurance premiums due to a less costly plan (-$34,000) and decreased postretirement benefit expense (-$81,000).

- **The Sewer Fund Net Position** at the end of 2019 improved by $1,172,043 related to contributed capital of $182,000 from the dedication of the Townes of Malvern Phase 1 sanitary sewer system, insurance reimbursement of $395,000 for capital construction to rebuild the pump station that was lost due to a sinkhole, reimbursements of prior year waste treatment costs of $288,000, tapping fees of $944,000, and offset by increased sewer expenses of $704,000 described in the paragraph above. The unrestricted net position of the Proprietary Fund amounted to $8,229,857.

FINANCIAL ANALYSIS OF THE TOWNSHIP'S FUNDS

Governmental Funds

Governmental Funds are reported in the Fund Statements with a short-term focus on the inflow and outflow of financial resources. This information is valuable in assessing resources available for upcoming financial requirements. Governmental Funds reported ending fund balances of $17,489,068. Of this year-end total: $4,050,000 is assigned for tax rate stabilization, $500,000 is assigned for pension stabilization, $350,000 is assigned for other postemployment benefits, $650,000 is assigned for storm water management, $2,650,000 is assigned for volunteer committee resources for such purposes as the acquisition of open space, the protection of historic, natural and scenic resources, to establish trails, bike paths, sidewalks and pathways, and energy conservation, $3,250,000 is assigned for the renovation of municipal infrastructure, $2,093,868 is assigned as budget contingency, $726,023 is assigned for capital improvement projects, $500,000 is assigned for equipment, $1,038,779 is assigned for highway and street projects and $1,055,737 is assigned for park development projects. Restricted fund balances include $624,661 for highway and street projects.

Major Governmental Funds - The General Fund is the Township's primary operating fund. The General Fund balance at fiscal year-end was $7,043,868, an increase of $2,516,243 over 2018. The General Fund balance is 57% of our 2019 operating expense and 45% of revenue.

The **Capital Improvement Fund** is a reserve fund for various capital purchases and improvements. The fiscal year-end balance for the Capital Improvement Fund was $8,726,023. This is an increase of $725,728 over the ending fund balance for 2018, resulting from an excess of revenues over expenditures in 2019 from non-recurring revenue that was transferred from the General Fund and assigned for specific projects.

Proprietary Funds

The only Township Proprietary Fund is the Sewer Fund, which was discussed previously under business-type activities.

GENERAL FUND BUDGETARY HIGHLIGHTS

During 2019, there were budget amendments to the original approved General Fund budget to recognize additional revenue of $180,000 from real estate transfer taxes collected, $400,000 from earned income tax, $31,530 from summer camp program fees and $26,000 from interest income, as well as reductions in building permit revenue from development of $200,000, and to make supplemental appropriations netting to $113,000 for certain General Fund operating expenditures.

General Fund actual revenues were higher than the final amended budgeted revenues by $777,524 primarily due to earned income taxes which exceeded budget by $640,890, and unbudgeted insurance claims reimbursements of $120,000.

Overall, general fund actual expenditures were $1,128,024 better than the final budget. The services that had significant favorable variances were as follows:

General Government	$146,309
Police	$606,841
Code Enforcement	$135,739
Public works, highways and streets general services	$75,526
Public works, highways and streets winter maintenance	$57,893
Public works, road maintenance and repair	$32,441

On the schedules of revenues and other financing sources and the schedule of functional expenditures by activities and other financing uses for the General Fund, the net position is better than the budget by $1,405,548 due to the reasons listed above and offset by the excess of revenues over expenditures in 2019 that was transferred out to the Capital Improvement Fund.

CAPITAL ASSETS - NET OF DEPRECIATION

The Township's investment in capital assets, net of depreciation, decreased $560,000 to $51,536,513. Capital Assets for our Sewer system including 13 pump stations and 77 miles of pipeline, comprise $34,143,673 of the total. Infrastructure incorporating 45 miles of road and traffic signals at 39 intersections, is $6,546,003 of the total. Buildings and Improvements comprise $8,029,037. For the detailed information about Capital Assets please see Note C in the report. The schedule (Figure I-5) below details Capital Assets, net of depreciation.

LONG-TERM DEBT

Long-term debt consists of debt incurred for the purchase and development of capital assets; and for the recording of compensated absences payable to employees, net pension liability and other post-employment benefits (OPEB) liability. The total long-term debt decreased $1,139,000 mostly due to a net increase of $1,292,000 in the OPEB liability primarily resulting from changes of assumptions changing the mortality tables used, and offset by a decrease of $1,426,000 in the pension liability resulting from plan fiduciary net position at 12/31/2019, and a decrease in the bonds for $1,010,000 in principal payments. For more information on long-term debt please see Note F in the report.

NEXT YEAR'S BUDGETS AND RATES

The general outlook for the economy of East Whiteland Township is uncertain due to the coronavirus (SARS-CoV-2) pandemic and associated societal and business closures ordered by the Commonwealth of Pennsylvania. These closures began in early to mid-March 2020 and will continue in some form into the foreseeable future. However, the shutdowns exempted approximately 70% of the U.S. economy and Statewide construction was permitted to resume on May 1, 2020. Locally planned development activity continues to move into production in 2020. Building permit activity and fees based on permits issued to date and in the approval process are relatively unaffected. In the short run, this will continue to add to our building permit fees, transfer taxes and sewer tapping fees and ultimately to our real estate tax, earned income tax and local services tax revenue. For 2020, there will be no rate increase for real estate tax which has been the same low rate of .445 mills for over 25 years nor for the earned income tax rate which increased from 0.5% to 0.75% in 2019. For 2020, the earned income tax budget increased 4% or $350,000 to $9.05 million, and the real estate tax budget decreased 0.7% or $5,180 to $755,820. However it is expected that actual earned income tax received will be between $905,000 – $1,810,000 less, representing 6.3% -12.6% of the General Fund, than the budgeted figure due to the pandemic.

Operating expenses are expected to continue to increase over the next few years as municipal services are heavily labor intensive, and wage and benefit costs continue to increase. However, due to cost savings measures taken in 2019 and others that may be necessary in 2020 due to the pandemic, these increases can be moderated. In 2015 we took steps to reduce the healthcare costs by joining the Delaware Valley Health Insurance Trust for two of our three employee groups. In 2019 the healthcare plan for one employee group and non-represented employees was replaced with a less costly plan. In 2020 the Township's pension costs will increase by 4.2%. 2020 post-retirement benefit costs will be roughly the same as in 2019, being $503,000.

Seventy six (76%) percent of the Township's full time employees (45 of 59) are represented by unions including the East Whiteland Police Association, the International Association of Fire Fighters (IAFF), and the American Federation of State, County and Municipal Employees (AFSCME). None of the three agreements will expire in 2020. Wage increases under the three contracts in 2020 are 3.5%, 3.75%, and 3.75% in the order as listed above.

Increases in East Whiteland sewer infrastructure and department expenses and costs for the sewer treatment plants that service East Whiteland Township continue to impact sewer fund finances. During 2018 we completed commercial sewer rate and tapping fee studies. The rates for high volume commercial sewer services increased 10% for 2019 and additional revenue of $55,000 was budgeted for 2019 and 2020. The rates for all other sewer services and tapping fees will remain the same for 2020.

2020 projects include Conestoga Road and Planebrook Road sewer system expansion design, construction of Bacton Hill Park phase 1, planning for a new building to house the Police Department on the Township campus, additional road resurfacing and traffic improvement projects. The Act 209 Transportation Study that was completed in 2018 resulted in a new traffic impact fee to be used for traffic capital improvements. Recreation impact fees from development and grants will be used to fund the Bacton Hill Park phase 1 construction project.

CONTACTING THE TOWNSHIP'S FINANCIAL MANAGEMENT

This financial report is designed to provide a general overview of the Township's finances, comply with finance-related laws and regulations and demonstrate the Township's commitment to accountability. If you have any questions about this report or need additional information, please contact the Finance Department at 209 Conestoga Road, Frazer, PA 19355.

EAST WHITELAND TOWNSHIP

RECONCILIATION OF TOTAL GOVERNMENTAL FUNDS BALANCES
TO NET POSITION OF GOVERNMENTAL ACTIVITIES
DECEMBER 31, 2019

TOTAL GOVERNMENTAL FUNDS BALANCES	$ 17,489,068
Capital assets used in governmental activities are not current financial resources and therefore are not reported in the funds. These assets consist of:	
Cost of capital assets	59,527,914
Accumulated depreciation	(42,135,074)
Some liabilities are not due and payable in the current period and therefore are not reported in the funds. Those liabilities consist of:	
Interest payable	(3,167)
Bonds payable	(7,741,044)
Net OPEB liability	(12,961,571)
Net pension liability	(4,519,015)
Compensated absences	(33,245)
Deferred charges used in governmental activities are not financial resources and therefore are not reported in the funds. These assets consist of:	
Deferred amount on refunding, net of amortization	307,582
Deferred inflows and outflows of resources related to pension and OPEB activities are not financial resources and, therefore, are not reported in the governmental funds.	1,801,036
Some of the Township's revenues will be collected after year-end but are not available soon enough to pay for the current period's expenditures and therefore are deferred in the funds.	5,760
NET POSITION OF GOVERNMENTAL ACTIVITIES	$ 11,738,244

See accompanying notes to the basic financial statements.

EAST WHITELAND TOWNSHIP

RECONCILIATION OF THE GOVERNMENTAL FUNDS STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES TO THE STATEMENT OF ACTIVITIES YEAR ENDED DECEMBER 31, 2019

NET CHANGE IN FUND BALANCES - TOTAL GOVERNMENTAL FUNDS	$	3,611,243
Capital outlays are reported in Governmental Funds as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which depreciation exceeds ($1,968,897) capital outlays ($1,261,778) in the current period		(707,119)
Because some property taxes will not be collected for several months after the Township's fiscal year ends, they are not considered as "available" revenues in the Governmental Funds. Deferred tax revenues increased by this amount this year.		(10,070)
The issuance of long-term debt (e.g., bonds, leases) provides current financial resources to Governmental Funds, while the repayment of the principal of long-term debt consumes the current financial resources of Governmental Funds Neither transaction, however, has any effect on net position. Also, Governmental Funds report the effect of issuance costs, premiums, discounts and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items.		
Repayment of bond principal		295,000
Amortization of bond discount and premium		1,801
Amortization of deferred amount on refunding		(15,444)
Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the Governmental Funds.		(701,495)
In the statement of activities, compensated absences (vacations and sick leave) are measured by the amounts earned during the year. In the Governmental Funds, however, expenditures for these items are measured by the amount of financial resources used (essentially, the amounts paid).		(612)
Interest on long-term debt in the statement of activities differs from the amount reported in the Governmental Funds because interest is recognized as an expenditure in the funds when it is due and thus requires the use of current financial resources. In the statement of activities, however, interest expense is recognized as the interest accrues, regardless of when it is due.		1,426
CHANGE IN NET POSITION OF GOVERNMENTAL ACTIVITIES	$	2,474,730

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Reporting Entity

East Whiteland Township ("the Township") was established in 1765 and is an organized township having the powers, duties, and privileges granted townships by the Commonwealth of Pennsylvania Second Class Township Code, Act of May 1, 1933 (P.L. 103, No. 69), reenacted and amended November 9, 1995 (P.L. 350, No. 60). The Township is governed by a three-member board of supervisors elected for a six-year term by the citizens of the Township. The Board is organized with a chairman and vice-chairman elected annually at the reorganization meeting held on the first Monday of the year.

The township complies with generally accepted accounting principles ("GAAP"). GAAP includes all relevant Governmental Accounting Standards Board ("GASB") pronouncements. The accounting and reporting framework and the more significant accounting policies are discussed in subsequent subsections of this Note.

Financial accountability is defined in GASB Statement No. 14, "The Financial Reporting Entity," as amended by GASB Statement No. 61. The Township is financially accountable for legally separate organizations if it appoints a voting majority of the organization's board and (1) it is able to impose its will on that organization; or (2) there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the Township. The Township also may be financially accountable if an organization is fiscally dependent on the Township regardless of whether the organization has a separately elected governing board, a governing board appointed by a higher level of government, or a jointly appointed board.

Blended Component Units:

The Police Pension Plan is a single employer defined benefit pension plan that provides pensions for all regular, full-time sworn police officers. Although the plan is a separate legal entity it is reported as if it is part of the government as it is governed by a committee comprised of members appointed by the Township Board of Supervisors and the Township is responsible for funding the plan. The plan is reported as a fiduciary fund and issues separate financial statements.

The Non-Uniformed Employees' Pension Plan is a single employer defined benefit pension plan that provides pensions for all regular full-time, non-uniformed employees. Although the plan is a separate legal entity it is reported as if it is part of the government as it is governed by a committee comprised of members appointed by the Township Board of Supervisors and the Township is responsible for funding the plan. The plan is reported as a fiduciary fund and does issues separate financial statements.

The Firefighters Pension Plan is a single employer defined benefit pension plan that provides pensions for all regular full-time, firefighters. Although the plan is a separate legal entity it is reported as if it is part of the government as it is governed by a committee comprised of members appointed by the Township Board of Supervisors and the Township is responsible for funding the plan. The plan is reported as a fiduciary fund and does issues separate financial statements.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The Postemployment Benefits Other Than Pensions Plan is a single-employer defined benefit healthcare plan that provides medical insurance and life insurance benefits to eligible retirees. Although the plan is a separate legal entity it is governed by a committee comprised of members appointed by the Township Board of Supervisors and the Township is responsible for funding the plan. The plan is reported as a fiduciary fund and does not issue separate financial statements.

Government-Wide and Fund Financial Statements

The accompanying financial statements of the Township are in accordance with the provisions of the Governmental Accounting Standards Board (GASB) Statement No. 34, *Basic Financial Statements--and Management's Discussion and Analysis--for State and Local Governments*, as amended by GASB Statement No. 37, *Basic Financial Statements--and Management's Discussion and Analysis--for State and Local Governments--Omnibus*, GASB Statement No. 38, *Certain Financial Statement Note Disclosures*, and GASB Statement No. 41, *Budgetary Comparison Schedules--Perspective Differences*. The requirements of this new reporting model are described below.

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on the activities of the primary government, except for Fiduciary Funds and Agency Funds. For the most part, the effect of interfund activity has been removed from these statements.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for Governmental Funds, Proprietary Funds and Fiduciary Funds, even though the latter are excluded from the government-wide financial statements. Major individual Governmental Funds are reported as separate columns (Other Governmental Funds) in the fund financial statements.

Measurement Focus, Basis of Accounting and Basis of Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Governmental Funds financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. For this purpose, the Township considers revenues to be available if they are collected within 60 days of the end of the fiscal period. Under this basis, certain revenues (those susceptible to accrual, readily measurable and available as to amount and anticipated as being readily collectible) are recorded on the accrual basis. Property taxes, earned income taxes, local services taxes and licenses associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. All other revenues are recognized only when received in cash. Expenditures, with the exception of interest requirements on long-term debt, are accounted for on the accrual basis of accounting.

The Township reports the following major governmental funds:

- The *General Fund* is the government's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

- The *Capital Improvement Fund* accounts for the resources to be used for the acquisition, construction, or improvement of major capital assets for general government purposes.

The Township reports the following major Proprietary funds

- The *Sewer Fund* accounts for operations related to the collection of wastewater and the operation of sewage pumping stations. The sewage is transported to a sewer treatment plant not owned by the Township.

Additionally, the Township reports the following Fiduciary Fund Types:

- The *Pension Trust Funds* are used to account for the activities of the Police, Firefighter and Non-Uniformed Pension Plans, which accumulate resources for pension benefit payments to qualified employees.

- The *OPEB Trust Fund* is used to account for the assets held by the Township to pay for postemployment medical benefits.

- The *Custodial Fund* is used to account for monies held by the Township for developer escrow deposits.

Amounts reported as *program revenues* include: (1) charges to customers or applicants for goods, services, or privileges provided, (2) operating grants and contributions and (3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Proprietary Funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a Proprietary Fund's principal ongoing operations. The principal operating revenues of the Sewer Fund are charges to customers for sales and services. Operating expenses for the Township's enterprise funds include sewer disposal, salaries, recycling, supplies, and administrative costs, and depreciation. All revenues or expenses not meeting this definition are reported as nonoperating revenues and expenses.

Stewardship, Compliance and Accountability

Budgets and Budgetary Accounting - The Township follows the procedures outlined below, which comply with legal requirements in establishing the budgetary data reflected in the financial statements:

1. Budgets are legally adopted on an annual basis for most Township funds, which is consistent with generally accepted accounting principles. The operating budget includes proposed expenditures and the means of financing them.

2. Prior to November 15 of the preceding fiscal year, the Township prepares a budget for the next succeeding calendar year beginning January 1. The operating budget includes proposed expenditures and the means of financing them.

3. A meeting of the Board of Supervisors is then called for the purpose of adopting the proposed budget.

4. Prior to December 31, the budget is legally enacted through passage of a resolution by the Board of Supervisors.

5. The budget must be filed with the Pennsylvania Department of Community and Economic Development by January 31.

6. Budgets for the funds are prepared on the modified accrual basis of accounting.

Once a budget is approved, it can be amended at the function and fund level only by approval of majority of the members of the Board of Supervisors. Amendments are presented to the Board at its regular meetings. Each amendment must have the Board's approval. Such amendments are made before the fact, are reflected in the official minutes of the Board, and are not made after fiscal year end as dictated by law.

The budget is controlled by the finance officer at the revenue and expenditures function/object level. Budgeted amounts are as amended by the Board of Supervisors. For 2019, individual amendments were not material in relation to the original appropriations. All budget appropriations lapse at year end.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The General Fund, Capital Improvements Fund, Transportation Improvement Fund, Street Light Fund, Park Development Fund, and State Fund all have legally adopted budgets for the year ended December 31, 2019.

Assets, Liabilities and Equity

Deposits and Investments - The Township's cash and cash equivalents including demand deposits and short-term investments with original maturities of three months or less from the date of acquisition are considered to be cash on hand.

Statutes authorize the Township to invest in: 1) obligations, participations and other instruments of any Federal agency, 2) repurchase agreements with respect to U.S. Treasury bills or obligations, 3) negotiable certificates of deposit, 4) bankers' acceptances, 5) commercial paper, 6) shares of an investment company registered under the Investment Company Act of 1940 whose shares are registered under the Securities Act of 1933, and 7) savings or demand deposits. The specific conditions under which the District may invest in these categories are detailed in Pennsylvania Act No. 53 of 1973, as amended by Pennsylvania Act No. 10 of 2016. Investments are stated at fair value except for certificates of deposit which are stated at amortized cost.

Under Act No. 72, enacted by the General Assembly of the Commonwealth of Pennsylvania, the funds deposited with the various banks are permitted to be secured on a pooled basis with all other public funds which the banking institution has on deposit. These may be bonds of the United States, any state of the United States, or bonds of any political subdivision of Pennsylvania or the general state authority or their authorities created by the General Assembly of the Commonwealth of Pennsylvania, or insured with the Federal Deposit Insurance Corporation. The market value of such bonds pledged must equal 102% of the funds deposited. The security pledged by the various depositories utilized during the year and at December 31, 2019, was in excess of the minimum requirements just described.

The Township has adopted GASB Statement No. 72, *Fair Value Measurement and application.* In accordance with this Statement, investments in marketable securities with readily determinable fair value and all investments in debt securities are reported at their fair values.

The law provides that the Township's Pension Trust Funds may invest in any form or type of investment, financial instrument, or financial transaction if determined by the Township to be prudent.

Receivables and Payables - Activity between funds that is representative of lending/borrowing arrangements outstanding at the end of the fiscal year is referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the noncurrent portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Real Estate Taxes - Real estate taxes are recorded as revenues when the taxes are levied. All property tax receivables are shown net of an allowance for uncollectibles. At December 31, 2019, all tax receivables were deemed to be fully collectible. There is no tax receivable allowance due to the materiality of the outstanding receivables.

Real estate taxes are levied on January 1 on property values assessed as of the same date. Taxes are billed March 1 and are due on June 30 of each year. A 2% discount is provided for taxes paid prior to May 1. A 10% penalty is applied to taxes paid after June 30. Any unpaid bills at December 31 are subject to lien, and penalties and interest are assessed.

Other taxes levied in 2019:

Real estate transfer tax ..... 0.5% of sales price
Earned income tax ..... 0.5% of gross income
Local service tax .....$52 per person

Provision for Estimated Uncollectible Receivables - No provision is considered necessary for other receivables.

Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The Township has three items that qualify for reporting in this category. The deferred charge on refunding results from the difference in carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. Deferred outflows of resources related to pensions is reported in the government-wide statement of net position and the proprietary fund statement of net position and is the result of differences between pension plan expected and actual experience and changes in pension plan assumptions. Deferred outflows of resources related to OPEB is reported in the government-wide statement of net position and the proprietary fund statement of net position and are the result of differences between expected and actual experience, and changes of assumptions.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Township has three items, which qualify for reporting in this category. Unavailable revenue, which arises only under a modified accrual basis of accounting, is reported only in the Governmental Funds balance sheet. The Governmental Funds report unavailable revenues from property taxes. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available. Deferred inflows of resources related to pensions is reported in the government-wide statement of net position and the proprietary fund statement of net position and is the result of differences between pension plan expected and actual experience and the difference between projected and actual investment earnings. Deferred inflows of resources related to OPEB is reported in the government-wide statement of net position and the proprietary fund statement of net position and is the result of differences between changes of assumptions, and the difference between projected and actual investment earnings.

Capital Assets - Capital assets, which include property, plant, equipment and infrastructure assets (e.g., roads, bridges, sidewalks and similar items) are reported in the applicable governmental or business – type activities columns in the entity-wide financial statements as well as in the proprietary fund financial statements. The township capitalizes assets with an initial, individual cost of more than $5,000 and an estimated useful life in excess of one year. The Township reports infrastructure assets on a network and subsystem basis. Accordingly, the amounts spent for the construction or acquisition of infrastructure assets are capitalized and reported in the entity-wide financial statements regardless of their amount. Such assets are recorded at historical cost if purchased or constructed. In accordance with GASB Statement No. 51, "Accounting and Financial Reporting for Intangible Assets," the Township capitalizes contributions to the Valley Forge Sewer Authority for the purchase of additional sewer treatment capacity.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed, inclusive of ancillary costs.

Depreciation has been provided over the estimated useful lives of property, plant and equipment using the straight-line method as follows:

	Years
Site improvements	20
Buildings and improvements	20-40
Infrastructure	15-50
Machinery and equipment	3-12
Vehicles	3-12

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Long-Term Obligations - In the government-wide financial statements and the Proprietary Fund Types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or Proprietary Fund Type statement of net position.

In the fund financial statements, Governmental Fund Types reports discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received and discounts paid on debt issuance are reported as other financing sources and uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures, except for refunding's paid from proceeds which are reported as other financing uses.

Net Position Flow Assumption

Sometimes the Township will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide and Proprietary Fund financial statements, a flow assumption should be made about the order in which the resources are considered to be applied. It is the Township's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

In the fund financial statements, Governmental Fund Types recognize bond premiums and discounts, as well as issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt are reported as other financing uses. Issuance costs, even if withheld from the actual net proceeds received, are reported as expenditures.

Net Position - The Township has implemented GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. This statement provides more clearly defined fund balance categories to make the nature and extent of the constraints placed on the Township's fund balances more transparent. The following classifications describe the relative strength of the spending constraints:

- **Nonspendable Fund Balance** - Amounts that are not in spendable form (such as inventory) or are required to be maintained intact.

- **Restricted Fund Balance** - Amounts constrained to specific purposes by their providers (such as grantors, bondholders and higher levels of government) through constitutional provisions or by enabling legislation.

- **Committed Fund Balance** - Amounts constrained to specific purposes by the Township itself, using its highest level of decision-making authority (the Board of Supervisors). To be reported as committed, amounts cannot be used for any other purpose unless the Township takes the same highest level action to remove or change the constraint.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

- **Assigned Fund Balance** - Amounts the Township intends to use for a specific purpose. Intent can be expressed by the Board of Supervisors or by an official or body to which the Board of Supervisors delegates the authority. As of December 31, 2019, the Board has not delegated the authority to assign fund balance.

- **Unassigned Fund Balance** - Amounts available for any purpose. Positive amounts are reported only in the General Fund.

The Board of Supervisors establishes (and modifies or rescinds) fund balance commitments by passage of a motion, which is the most binding action management can take. Assigned fund balance is intended to be used by the Township for specific purposes but does not meet the criteria to be classified as restricted or committed.

The Township will typically use restricted fund balances first, followed by committed resources and then assigned resources, as appropriate opportunities arise, but reserves the right to selectively spend unassigned resources first to defer the use of these other classified funds.

Cash and Cash Equivalents - For purposes of reporting cash flows for the Proprietary Funds, all highly liquid investments with original maturities of three months or less are considered short-term investments.

Compensated Absences - Full-time employees are granted vacation benefits in varying amounts to specified maximums. Certain employees may carry over 40 hours of unused vacation time into the following year or receive compensation for those hours. Certain employees may accumulate up to 480 hours of unused sick time and, depending on years of services, may receive payment for some or all of that time at retirement or resignation. The liability for those compensated absences is recorded as long-term debt in the entity-wide and proprietary fund financial statements. In the fund financial statements, governmental funds report a liability for compensated absences only if they have matured. Historically the General Fund has been responsible for liquidation of compensated absences associated with governmental activities. Compensated absences associated with business-type activities are liquidated from the fund in which the liability was generated.

Prepaid Items - Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements. Prepaid items are accounted for under the consumption method.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Accordingly, actual results could differ from those estimates.

Concentrations of Credit Risk - The Township's revenues and receivables for taxes and utility service are mostly derived from residents and businesses located in the Township and are, therefore, subject to the economic conditions of the area.

NOTE B - DEPOSITS AND INVESTMENTS

Deposits

Custodial Credit Risk - Custodial credit risk is the risk that, in the event of a bank failure, the Township's deposits may not be returned to it. As of December 31, 2019, $986,137 of the total bank balance of $27,164,958 was insured by the Federal Depository Insurance Corporation. The remaining bank balance of $26,178,821 was exposed to credit risk because it was uninsured and collateralized in accordance with Act 72 of the Commonwealth of Pennsylvania Legislature, which permits the institution to pool collateral for all governmental deposits and has the collateral held by a custodian in the institution's name.

Investments

As of December 31, 2019, the Township had the following investments:

Investment Type	Amortized Cost	Fair Value	Total	Investment Maturities Less Than One Year
GOVERNMENTAL ACTIVITIES				
Certificates of deposit	$ 252,052	$ -	$ 252,052	$ 252,052
FIDUCIARY FUNDS				
Domestic equity mutual funds	$ -	$ 12,375,713	$ 12,375,713	$ 12,375,713
International equity mutual funds	-	2,878,203	2,878,203	2,878,203
Fixed income mutual funds	-	4,997,863	4,997,863	4,997,863
Real estate mutual funds	-	881,576	881,576	881,576
TOTAL FIDUCIARY FUNDS	$ -	$ 21,133,355	$ 21,133,355	$ 21,133,355

Fair Value Measurement - The Township categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted market prices in active markets for identical assets: Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The Township has the following recurring fair value measurements as of December 31, 2019:

Investments in domestic equity mutual funds of $12,375,713, international equity mutual funds of $2,878,203, fixed income mutual funds of $4,997,863, and real estate mutual funds of $881,576 are valued using quoted market prices (Level 1 inputs).

Interest Rate Risk - This is the risk that changes in interest rates will adversely affect the fair market value of an investment. The Township's investment policy includes a balancing provision to address this type of risk.

NOTE B - DEPOSITS AND INVESTMENTS (Continued)

Credit Risk - This is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. State law limits the investment of government funds as described in Note A. The Township's investment policy does not further limit its investment choices.

Concentration of Credit Risk - This is the risk of loss attributed to the magnitude of a government's investment in a single issuer. There are no investments in any one issuer that is in excess of 5 percent of the government's total investments.

NOTE C - CAPITAL ASSETS

Changes in capital asset activity for the year ended December 31, 2019, were as follows:

	Balance January 1, 2019	Increases	Decreases	Balance December 31, 2019
GOVERNMENTAL ACTIVITIES				
Capital assets not being depreciated

NOTE D - INTERFUND RECEIVABLES, PAYABLES AND TRANSFERS

Interfund receivables and payables at December 31, 2019, are as follows:

	Due from Other Funds	Due to Other Funds
GOVERNMENTAL FUNDS		
General Fund	$ 20,556	$ 600,000
Capital Improvement Fund	600,000	2,063
BUSINESS-TYPE ACTIVITIES		
Sewer Fund	-	18,493
	$ 620,556	$ 620,556

These balances resulted from the time lag between the dates that (1) interfund goods and services are provided or reimbursable expenditures occur, (2) transactions are recorded in the accounting system and (3) payments between funds are made.

Interfund transfers at December 31, 2019, are as follows:

	Transfer Out	Transfer In
GOVERNMENTAL FUNDS		
General Fund	$ 975,600	$ 166,165
Capital Improvement Fund	15,101	975,600
Park Development Fund	-	15,101
BUSINESS-TYPE ACTIVITIES		
Sewer Fund	166,165	-
	$ 1,156,866	$ 1,156,866

Transfers are used to (1) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them and (2) use unrestricted revenues collected in the General Fund to account for saving for future capital projects.

NOTE E - RECEIVABLES

Receivables as of December 31, 2019, are as follows:

	General Fund	Capital Improvement Fund	Other Governmental Funds	Sewer Fund	Totals
RECEIVABLES					
Accounts	$ 78,055	$ 445,000	$ 369	$ 1,151,871	$ 1,675,295
Taxes	2,402,411	-	-	-	2,402,411
	$ 2,480,466	$ 445,000	$ 369	$ 1,151,871	$ 4,077,706

NOTE F - LONG-TERM DEBT

Long-term liability for the year ended December 31, 2019, is as follows:

NOTE F - LONG-TERM DEBT (Continued)

Payments on the bonds and loans payable pertaining to the Township's governmental activities are made by the General Fund. Payments of compensated absences, net pension obligations and net other postemployment benefit obligations pertaining to the Township's governmental activities are made by the General Fund.

Governmental Activities Debt

General Obligation Series of 2014 - General Obligation Bonds, Series of 2014 were issued in the original amount of $8,040,000. Interest rates range from 1.0% to 4.0% with interest payable semi-annually and principal payable annually from June 2015 through December 2039. These bonds were issued to finance the new Public Works building and additional park developments.

General Obligation Series of 2016 - General Obligation Bonds, Series of 2016 were issued in the original amount of $6,160,000. Interest rates range from 2.0% to 3.0% with interest payable semi-annually and principal payable annually from June 2017 through December 2039. These bonds were issued to advance refund a portion of the General Obligation Bonds, Series of 2014 and to pay the cost of the bond issuance. The refunding resulted in an economic gain of $297,663 and a decrease in future cash flows of $307,026.

Business-Type Activities Debt

General Obligation Bonds, Series of 2012A - General Obligation Bonds, Series of 2012A, were issued in the original amount of $4,685,000. Interest rates range from 0.9% to 3.0% with interest payable semi-annually and principal payable annually from September 2013 through September 2020. These bonds were issued to redeem and prepay 1999 Bonds to reduce costs.

General Obligation Bonds, Series of 2012B - General Obligation Bonds, Series of 2012B, were issued in the original amount of $4,130,000. Interest rates range from 1.0% to 3.0% with interest payable semi-annually and principal payable annually from September 2020 through September 2025. These bonds were issued to redeem and prepay 2005 bonds to reduce costs.

General Obligation Bonds, Series of 2013A - General Obligation Bonds, Series of 2013A, were issued in the original amount of $12,145,000. Interest rates range from 2.0% to 3.6% with interest payable semi-annually from September 2013 through September 2038. These bonds were issued to finance sewer expansions and upgrades.

NOTE F - LONG-TERM DEBT (Continued)

Total Scheduled Annual Debt Service

The Township's total scheduled annual debt service on all long-term debt is as follows:

Year Ending December 31,	Governmental Activities	
	Principal	Interest
2020	$ 310,000	$ 200,130
2021	315,000	193,930
2022	320,000	187,630
2023	325,000	180,690
2024	330,000	173,090
2025 to 2029	1,780,000	745,910
2030 to 2034	2,010,000	524,940
2035 to 2039	2,315,000	212,550
	$ 7,705,000	$ 2,418,870

Year Ending December 31,	Business-Type Activities	
	Principal	Interest
2020	$ 735,000	$ 516,407
2021	755,000	497,782
2022	765,000	480,920
2023	790,000	461,996
2024	805,000	441,420
2025 to 2029	3,905,000	1,858,172
2030 to 2034	4,435,000	1,213,024
2035 to 2038	4,135,000	380,123
	$ 16,325,000	$ 5,849,844

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN)

Police Pension Plan

Summary of Significant Accounting Policies - Police Pension Plan investments are carried at fair value as reported by the investment managers. Short-term investments are reported at cost, which approximates fair value. Financial information of the Township's Police Pension Plan is presented on the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due. Employer contributions to each plan are recognized when due as required by the Act. For the purpose of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position have been determined on the same basis as they are reported by the pension plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with benefit terms.

Plan Description

Plan Administration - The Township administers the Police Pension Plan--a single-employer defined benefit pension plan that provides pensions for all regular, full-time police officers. The plan is part of the Township's financial reporting entity and is included in the Township's financial statements as a Pension Trust Fund. The plan does not issue separate, stand-alone financial statements.

The plan is governed by the Township Board of Supervisors which is responsible for the management of plan assets. The Township Board of Supervisors has appointed the Pension Board as the official body to which all related investment matters of the plan are delegated. The Pension Board consists of five members, which may consist of elected officials, management, and/or members of the plan. The Township Board of Supervisors has delegated the authority to manage certain plan assets to TCG Investment Advisory, Inc., with Broadridge Matrix Trust Company as custodian.

Plan Membership - At December 31, 2019, plan membership consisted of the following:

Inactive plan members or beneficiaries currently receiving benefits	13
Inactive plan members entitled to but not yet receiving benefits	-
Active plan members	22
	35

Benefits Provided - The Police Pension Plan provides retirement benefits as well as death and disability benefits under Pennsylvania Act 600.

Eligibility Requirements:

Normal Retirement - Age 50 and 25 years of service.

Early Retirement - 20 or more years of service.

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN) (Continued)

Vesting - None for the first 12 years of service; thereafter, 100%. If a member dies before the pension becomes vested, the surviving spouse or minor children shall receive repayment of the member's contributions, if any, plus interest.

Retirement Benefit:

The monthly pension shall be 50% of the average monthly salary over the participant's last 36 months of employment, plus an incremental pension of $25 per month for each completed year of service in excess of twenty-five years up to a maximum of $100 per month. The early retirement pension shall be the actuarial equivalent of a partial superannuation retirement benefit.

Survivor Benefit:

A pension benefit shall be automatically provided to a retired officer's spouse or to the spouse of an officer eligible to retire, equal to no less than 50% of the eligible pension. If no spouse, or if spouse subsequently dies, the benefit shall apply to children under age 18, or if attending college, under or attaining age 23.

Disability Benefit:

Service-Related - The monthly disability pension benefit shall be calculated at no less than 50% of the member's salary at the time the disability was incurred. Said pension shall be reduced by any benefits received for the same injuries under the Social Security Act.

Nonservice-Related - None.

Post-Retirement Adjustments:

A cost of living adjustment may be provided to retired officers. Annual adjustment not to exceed the increase in the Consumer Price Index from year to year with a 3% maximum annual increase. Total adjustments not to exceed 30% of the retiree's original pension.

The benefit provisions of the Township's Police Pension Plan are established by Township ordinances.

Contributions - Pennsylvania Act 205 of 1984 (as amended) requires that annual contributions be based upon the minimum municipal obligation (MMO), which is based on the plan's actuarial valuation. The MMO includes the normal cost, estimated administrative expenses and an amortization contribution of the unfunded actuarial accrued liability, less estimated member contributions, and a credit equal to 10% of the excess (if any) of the actuarial value of assets over the actuarial accrued liability. The Commonwealth provides an allocation of funds, which must be used for pension funding. A financial requirement established by the MMO, which exceeds state and member contributions, must be funded by the employer.

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN) (Continued)

As a condition of participation, participants are required to make contributions to the plan. Covered employees are required by statute to contribute 5% of their compensation to the plan. The Township is required by statute, principally Pennsylvania Act 205, to contribute the remaining amounts necessary to finance the plan.

In 2019, the MMO obligation for the Police Pension Plan was $504,774. For the year 2019, contributions of $504,774 were made by the Township.

Administrative costs, which may include, but are not limited to, investment management fees and actuarial services, are charged to the appropriate plan and funded through the MMO and/or plan earnings. On-behalf payments of fringe benefits and salaries for the Township's employees were recognized as revenues and expenditures during the year.

Investments

Investment Policy - The Pension Board, with the assistance of TCG Investment Advisory, Inc., shall select the appropriate asset weighting percentage to be allocated to each specific asset class. Each asset class shall consist of a combination of investment options that have been made available to obtain the absolute investment objective of the fund. Investments shall be diversified with the intent to minimize the risk of large investment losses. Consequently, the total portfolio will be constructed and maintained to provide prudent diversification with regard to the concentration of holdings in investment funds specializing in individual issues, issuers, countries, governments or industries. The following was the Board's adopted asset allocation policy as of December 31, 2019:

Asset Class	Target Allocation
Domestic equity	50%
International equity	8%
Fixed income	35%
Real estate	5%
Cash	2%
	100%

Concentrations - There are no investments in any one issuer that is in excess of 5 percent of the total investments.

Rate of Return - For the year ended December 31, 2019, the annual money-weighted rate of return on plan investments, net of plan investment expense, was 22.26%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN) (Continued)

Net Pension Liability of the Township - The components of the net pension liability of the Township at December 31, 2019, were as follows:

Total pension liability	$ 13,765,847
Plan fiduciary net position	(10,943,594)
NET PENSION LIABILITY	$ 2,822,253
Plan fiduciary net position as a percentage of the total pension liability	79.50%

Actuarial Assumptions - The total pension liability was determined by an actuarial valuation as of December 31, 2019, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3%
Salary increases	5% annual increase
Investment rate of return	7.5%

Mortality rates were based on the PubS-2010 mortality table, including rates for disabled retirees and contingent survivors. Incorporated into the table are rates projected generationally using Scale MP-2018 to reflect mortality improvement.

Due to the size of the plan, there have been no experience studies used to determine plan assumptions.

The long-term expected rate of return on plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the plan's target asset allocation as of December 31, 2019 (see the plan's investment policy) are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic equity	5.50% - 7.50%
International equity	4.50% - 6.50%
Fixed income	1.00% - 3.00%
Real estate	4.50% - 6.50%
Cash	0.00% - 1.00%

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN) (Continued)

Discount Rate - The discount rate is based on the long-term expected rate of return on plan investments that are expected to be used to finance the payments of benefits. The plan's fiduciary net position is projected to be sufficient to make projected benefit payments and the plan assets are expected to be invested using a strategy to achieve that return. The employer has always met the funding requirements of Pennsylvania law Act 205 of 1984. Act 205 requires full funding of the entry age normal cost plus plan expenses, as well as amortization of the unfunded liability to ultimately achieve a 100% funded status.

Changes in the Net Pension Liability

	Governmental Activities		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a)-(b)
Balances at December 31, 2018	$ 12,142,675	$ 8,897,862	$ 3,244,813
Changes for the year			
Service cost	341,224	-	341,224
Interest cost	991,401	-	991,401
Changes for experience	(92,874)	-	(92,874)
Changes of assumptions	935,117	-	935,117
Contributions			
Employer	-	504,774	(504,774)
Member	-	140,354	(140,354)
Net investment income	-	1,962,030	(1,962,030)
Benefit payments	(551,696)	(551,696)	-
Administrative expenses	-	(9,730)	9,730
Net changes	1,623,172	2,045,732	(422,560)
Balances at December 31, 2019	$ 13,765,847	$ 10,943,594	$ 2,822,253

Sensitivity of the Net Pension Liability to Changes in the Discount Rate - The following presents the net pension liability of the Township, calculated using the discount rate of 7.5%, as well as what the Township's net pension would be if it were calculated using a discount rate that is one percentage point lower (6.5%) or one percentage point higher (8.5%) than the current rate:

	1% Decrease (6.5%)	Current Discount Rate (7.5%)	1% Increase (8.5%)
Net pension liability	$ 4,445,234	$ 2,822,253	$ 1,462,296

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN) (Continued)

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions - For the year ended December 31, 2019, the Township recognized pension expense of $750,225 for this pension plan, and $1,375,143 for all pension plans.. At December 31, 2019, the Township reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Governmental Activities	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 42,112	$ 170,108
Changes of assumptions	988,308	-
Net difference between projected and actual earnings on pension plan investments	-	315,825
Total	$ 1,030,420	$ 485,933

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ending December 31,	
2020	$ 80,460
2021	71,234
2022	229,985
2023	(153,030)
2024	105,281
Thereafter	210,557

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN)

Non-Uniformed Pension Plan

Summary of Significant Accounting Policies - Non-Uniformed Pension Plan investments are carried at fair value as reported by the investment managers. Short-term investments are reported at cost, which approximates fair value. Financial information of the Township's Non-Uniformed Pension Plan is presented on the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due. Employer contributions to each plan are recognized when due as required by the Act. For the purpose of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position have been determined on the same basis as they are reported by the pension plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with benefit terms.

Plan Description

Plan Administration - The Township administers the Non-Uniformed Pension Plan--a single-employer defined benefit pension plan that provides pensions for all regular, full-time non-uniformed employees. The plan is part of the Township's financial reporting entity and is included in the Township's financial statements as a Pension Trust Fund. The plan does not issue separate, stand-alone financial statements.

The plan is governed by the Township Board of Supervisors which is responsible for the management of plan assets. The Township Board of Supervisors has appointed a pension committee as the official body to which all related investment matters of the plan are delegated. The pension committee consists of five members, which may consist of elected officials, management, and/or members of the plan. The Township Board of Supervisors has delegated the authority to manage certain plan assets to TCG Investment Advisory, Inc., with Broadridge Matrix Trust Company as custodian.

Plan Membership - At December 31, 2019, plan membership consisted of the following:

Inactive plan members or beneficiaries currently receiving benefits	21
Inactive plan members entitled to but not yet receiving benefits	3
Active plan members	16
	40

Benefits Provided - The Non-Uniformed Pension Plan provides retirement and other benefits.

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN) (Continued)

Eligibility Requirements:

Normal Retirement - For participants represented by a collective bargaining unit and hired prior to January 1, 2006, the normal retirement date is age 64 and 10 years of service. For participants not represented by a collective bargaining agreement and hired prior to January 1, 2006, the normal retirement date is age 63 and 10 years of service. For participants hired on or after January 1, 2006, the normal retirement date is age 64 and 10 years of service.

Early Retirement - Age 55 and 10 years of service.

Vesting - For participants hired on or after January 1, 2006 - none for the first 10 years of service; thereafter, 100%. For participants hired prior to January 1, 2006 - 50% after 5 full years of service; thereafter, 10% per year until 100% vested after 10 years. If a member dies before the pension becomes vested, the surviving spouse or minor children shall receive repayment of the member's contributions, if any, plus interest.

Retirement Benefit:

For participants hired on or after January 1, 2006, the monthly pension shall be 2.00% for each year of service times the average monthly compensation over the participants last 60 months of employment. For participants hired prior to January 1, 2006, the monthly pension shall be 50% of the final average monthly compensation over the participant's last 36 months of employment. The early retirement pension shall be a partial superannuation retirement benefit determined by a table in the governing resolution.

Disability Benefit:

Service-Related - The accrued retirement benefit determined at the date of disability. The disability benefit shall commence at the normal retirement date.

The benefit provisions of the Township's Non-Uniformed Pension Plan are established by Township ordinances.

Contributions - Pennsylvania Act 205 of 1984 (as amended) requires that annual contributions be based upon the minimum municipal obligation (MMO), which is based on the plan's actuarial valuation. The MMO includes the normal cost, estimated administrative expenses and an amortization contribution of the unfunded actuarial accrued liability, less estimated member contributions, and a credit equal to 10% of the excess (if any) of the actuarial value of assets over the actuarial accrued liability. The Commonwealth provides an allocation of funds, which must be used for pension funding. A financial requirement established by the MMO, which exceeds state and member contributions, must be funded by the employer.

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN) (Continued)

Covered employees are required to contribute 5% of their compensation to the plan. The Township is required by statute, principally Pennsylvania Act 205, to contribute the remaining amounts necessary to finance the plan. Contribution provisions are established by Pennsylvania law and may be amended only as allowed by Pennsylvania law.

In 2019, the MMO obligation for the Non-Uniformed Pension Plan was $394,490. For the year 2019, contributions of $394,490 were made by the Township.

Administrative costs, which may include, but are not limited to, investment management fees and actuarial services, are charged to the appropriate plan and funded through the MMO and/or plan earnings. On-behalf payments of fringe benefits and salaries for the Township's employees were recognized as revenues and expenditures during the year.

Investments

Investment Policy - The Pension Board, with the assistance of TCG Investment Advisory, Inc., shall select the appropriate asset weighting percentage to be allocated to each specific asset class. Each asset class shall consist of a combination of investment options that have been made available to obtain the absolute investment objective of the fund. Investments shall be diversified with the intent to minimize the risk of large investment losses. Consequently, the total portfolio will be constructed and maintained to provide prudent diversification with regard to the concentration of holdings in investment funds specializing in individual issues, issuers, countries, governments or industries.

The following was the Committee's adopted asset allocation policy as of December 31, 2019:

Asset Class	Target Allocation
Domestic equity	61%
International equity	9%
Fixed income	23%
Real estate	4%
Cash	3%
	100%

Concentrations - There are no investments in any one issuer that is in excess of 5 percent of the total investments.

Rate of Return - For the year ended December 31, 2019, the annual money-weighted rate of return on plan investments, net of plan investment expense, was 22.27%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN) (Continued)

Net Pension Liability of the Township - The components of the net pension liability of the Township at December 31, 2019, were as follows:

Total pension liability	$ 8,211,938
Plan fiduciary net position	(7,082,251)
NET PENSION LIABILITY	$ 1,129,687
Plan fiduciary net position as a percentage of the total pension liability	86.24%

Actuarial Assumptions - The total pension liability was determined by an actuarial valuation as of December 31, 2019, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3%
Salary increases	4.5% annual increase
Investment rate of return	7.5%

Mortality rates were based on the PubS-2010 mortality table, including rates for disabled retirees and contingent survivors. Incorporated into the table are rates projected generationally using Scale MP-2018 to reflect mortality improvement.

Due to the size of the plan, there have been no experience studies used to determine plan assumptions.

The long-term expected rate of return on plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the plan's target asset allocation as of December 31, 2019 (see the plan's investment policy) are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic equity	5.50% - 7.50%
International equity	4.50% - 6.50%
Fixed income	1.00% - 3.00%
Real estate	4.50% - 6.50%
Cash	0.00% - 1.00%

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN) (Continued)

Discount Rate - The discount rate is based on the long-term expected rate of return on plan investments that expected to be used to finance the payments of benefits. The plan's fiduciary net position is projected to be sufficient to make projected benefit payments and the plan assets are expected to be invested using a strategy to achieve that return. The employer has always met the funding requirements of Pennsylvania law Act 205 of 1984. Act 205 requires full funding of the entry age normal cost plus plan expenses, as well as amortization of the unfunded liability to ultimately achieve a 100% funded status.

Changes in the Net Pension Liability

	Governmental Activities		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a)-(b)
Balances at December 31, 2018	$ 6,428,838	$ 4,800,798	$ 1,628,040

Balances at December 31, 2019	$ 1,396,036	$ 1,203,988	$ 192,049

Sensitivity of the Net Pension Liability to Changes in the Discount Rate - The following presents the net pension liability of the Township, calculated using the discount rate of 7.5%, as well as what the Township's net pension would be if it were calculated using a discount rate that is one percentage point lower (6.5%) or one percentage point higher (8.5%) than the current rate:

	1% Decrease (6.5%)	Current Discount Rate (7.5%)	1% Increase (8.5%)
Net pension liability	$ 1,943,522	$ 1,129,687	$ 431,063

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN) (Continued)

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions - For the year ended December 31, 2019, the Township recognized pension expense of $424,539 for this pension plan, and $1,375,143 for all pension plans.. At December 31, 2019, the Township reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Governmental Activities	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 269,957	$ 166,824
Changes in assumptions	285,842	-
Net difference between projected and actual earnings on pension plan investments	-	237,535
Total	$ 555,799	$ 404,359

	Business-Type Activities	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 55,292	$ 34,169
Changes in assumptions	58,546	-
Net difference between projected and actual earnings on pension plan investments	-	48,652
Total	$ 113,838	$ 82,821

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN) (Continued)

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ending December 31,	Governmental Activities	Business-Type Activities
2020	$ 65,180	$ 13,349
2021	53,718	11,003
2022	131,902	27,016
2023	(119,568)	(24,490)
2024	20,208	4,139

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN)

Firefighter Pension Plan

Summary of Significant Accounting Policies - The Pension Plan investments are carried at fair value as reported by the investment managers. Short-term investments are reported at cost, which approximates fair value. Financial information of the Township's Firefighter Pension Plan is presented on the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due. Employer contributions to each plan are recognized when due as required by the Act. For the purpose of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position have been determined on the same basis as they are reported by the pension plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with benefit terms.

Plan Description

Plan Administration - The Township administers the Firefighter Pension Plan--a single-employer defined benefit pension plan that provides pensions for all regular, full-time firefighter employees. The plan is part of the Township's financial reporting entity and is included in the Township's financial statements as a Pension Trust Fund. The plan does not issue separate, stand-alone financial statements.

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

The plan is governed by the Township Board of Supervisors which is responsible for the management of plan assets. The Township Board of Supervisors has appointed a pension committee as the official body to which all related investment matters of the plan are delegated. The pension committee consists of five members, which may consist of elected officials, management, and/or members of the plan. The Township Board of Supervisors has delegated the authority to manage certain plan assets to TCG Investment Advisory, Inc., with Broadridge Matrix Trust Company as custodian.

Plan Membership - At December 31, 2019, plan membership consisted of the following:

Inactive plan members or beneficiaries currently receiving benefits	1
Inactive plan members entitled to but not yet receiving benefits	1
Active plan members	9
	11

Benefits Provided - The Firefighter Pension Plan provides retirement and other benefits.

Eligibility Requirements:

Normal Retirement - Age 50 and 25 years of service.

Early Retirement - 20 or more years of service, actuarially reduced to reflect early commencement of benefits.

Vesting - None for the first 10 years of service; thereafter, 100%. If a member dies before the pension becomes vested, the surviving spouse or minor children shall receive repayment of the member's contributions, if any, plus interest.

Retirement Benefit:

Service-Related - The accrued retirement benefit determined at the date of disability. The disability benefit shall commence when the participant has been declared totally and permanently disabled.

Nonservice-Related - None

The benefit provisions of the Township's Firefighter Pension Plan are established by Township ordinances.

Contributions - Pennsylvania Act 205 of 1984 (as amended) requires that annual contributions be based upon the minimum municipal obligation (MMO), which is based on the plan's actuarial valuation. The MMO includes the normal cost, estimated administrative expenses and an amortization contribution of the unfunded actuarial accrued liability, less estimated member contributions, and a credit equal to 10% of the excess (if any) of the actuarial value of assets over the actuarial accrued liability. The Commonwealth provides an allocation of funds, which must be used for pension funding. A financial requirement established by the MMO, which exceeds state and member contributions, must be funded by the employer.

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

Covered employees are required to contribute 5% of their compensation to the plan. The Township is required by statute, principally Pennsylvania Act 205, to contribute the remaining amounts necessary to finance the plan. Contribution provisions are established by Pennsylvania law and may be amended only as allowed by Pennsylvania law.

In 2019, the MMO obligation for the Firefighter Pension Plan was $158,964. For the year 2019, contributions of $158,964 were made by the Township.

Administrative costs, which may include, but are not limited to, investment management fees and actuarial services, are charged to the appropriate plan and funded through the MMO and/or plan earnings. On-behalf payments of fringe benefits and salaries for the Township's employees were recognized as revenues and expenditures during the year.

Investments

Investment Policy - The Pension Board, with the assistance of TCG Investment Advisory, Inc., shall select the appropriate asset weighting percentage to be allocated to each specific asset class. Each asset class shall consist of a combination of investment options that have been made available to obtain the absolute investment objective of the fund. Investments shall be diversified with the intent to minimize the risk of large investment losses. Consequently, the total portfolio will be constructed and maintained to provide prudent diversification with regard to the concentration of holdings in investment funds specializing in individual issues, issuers, countries, governments or industries.

The following was the Committee's adopted asset allocation policy as of December 31, 2019:

Asset Class	Target Allocation
Domestic equity	59%
International equity	11%
Fixed income	23%
Real estate	4%
Cash	3%
	100%

Concentrations - There are no investments in any one issuer that is in excess of 5 percent of the total investments.

Rate of Return - For the year ended December 31, 2019, the annual money-weighted rate of return on plan investments, net of plan investment expense, was 21.94%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

Net Pension Liability of the Township - The components of the net pension liability of the Township at December 31, 2019, were as follows:

Total pension liability	$ 3,272,205
Plan fiduciary net position	(2,513,081)
NET PENSION LIABILITY	$ 759,124
Plan fiduciary net position as a percentage of the total pension liability	76.80%

Actuarial Assumptions - The total pension liability was determined by an actuarial valuation as of December 31, 2019, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3%
Salary increases	4.5% annual increase
Investment rate of return	7.5%

Mortality rates were based on the PubS-2010 mortality table, including rates for disabled retirees and contingent survivors. Incorporated into the table are rates projected generationally using Scale MP-2018 to reflect mortality improvement.

Due to the size of the plan, there have been no experience studies used to determine plan assumptions.

The long-term expected rate of return on plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the plan's target asset allocation as of December 31, 2019 (see the plan's investment policy) are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic equity	5.50% - 7.50%
International equity	4.50% - 6.50%
Fixed income	1.00% - 3.00%
Real estate	4.50% - 6.50%
Cash	0.00% - 1.00%

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

Discount Rate - The discount rate is based on the long-term expected rate of return on plan investments that expected to be used to finance the payments of benefits. The plan's fiduciary net position is projected to be sufficient to make projected benefit payments and the plan assets are expected to be invested using a strategy to achieve that return. The employer has always met the funding requirements of Pennsylvania law Act 205 of 1984. Act 205 requires full funding of the entry age normal cost plus plan expenses, as well as amortization of the unfunded liability to ultimately achieve a 100% funded status.

Changes in the Net Pension Liability

	Governmental Activities		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a)-(b)
Balances at December 31, 2018	$ 2,815,754	$ 1,885,873	$ 929,881
Changes for the year			
Service cost	108,980	-	108,980
Interest cost	227,986	-	227,986
Changes for experience	49,237	-	49,237
Changes in assumptions	70,248	-	70,248
Contributions			
Employer	-	158,964	(158,964)
Member	-	47,172	(47,172)
Net investment income	-	431,042	(431,042)

Net changes	456,451	627,208	(170,757)
Balances at December 31, 2019	$ 3,272,205	$ 2,513,081	$ 759,124

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

Sensitivity of the Net Pension Liability to Changes in the Discount Rate - The following presents the net pension liability of the Township, calculated using the discount rate of 7.5%, as well as what the Township's net pension would be if it were calculated using a discount rate that is one percentage point lower (6.5%) or one percentage point higher (8.5%) than the current rate:

	1% Decrease (6.5%)	Current Discount Rate (7.5%)	1% Increase (8.5%)
Net pension liability	$ 1,204,934	$ 759,124	$ 387,271

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions - For the year ended December 31, 2019, the Township recognized pension expense of $200,379 for this pension plan, and $1,375,143 for all pension plans. At December 31, 2019, the Township reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Governmental Activities	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 236,066	$ -
Changes in assumptions	175,437	-
Net difference between projected and actual earnings on pension plan investments	-	94,967
Total	$ 411,503	$ 94,967

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ending December 31,	
2020	$ 28,510
2021	28,935
2022	55,267
2023	(6,039)
2024	50,410
Thereafter	159,453

NOTE J - NON-UNIFORM EMPLOYEE DEFINED CONTRIBUTION PENSION PLAN

Plan Description

The Township has established the East Whiteland Township Non-Uniform Employee Defined Contribution Pension Plan (the "Plan"), which provides pension benefits for its full-time, non-union, non-uniform employees as defined in the plan, and who were hired on or after January 1, 2017. There is a six month period of service required in order to participate. The Plan is a single-employer defined contribution money purchase pension plan under Section 401 (a) of the Internal Revenue Code. In a defined contribution plan, the benefits to be received by an employee depend solely on the amount contributed to the participant's account and related returns on investments of those contributions. ICMA Retirement Corporation serves as the third-party administrator for the Plan, maintaining records of individual account balances and administering receipt and payment of funds. All funds contributed by the employees and employer are invested with the funds offered through ICMA-RC. The Plan does not issue separate, stand-alone financial statements.

NOTE J - NON-UNIFORM EMPLOYEE DEFINED CONTRIBUTION PENSION PLAN (Continued)

Funding Policy

Each eligible employee covered under the Plan must make an irrevocable election to contribute 2%, 3% or 4% of gross wages. The Township contributes 4%, 6% or 8% of each participating employee's gross wages to the Plan, respectively, depending on the employee's contribution percentage. For example, if the employee elects a 2% contribution, the Township will contribute 4%; if the employee elects a 3% contribution, the Township will contribute 6%. The Township's contributions for employees and earnings allocated to their accounts vest based on period of service completed, as follows:

Period of Service Completed	% Vested
Zero	0%
One	20%
Two	40%
Three	60%
Four	80%
Five	100%

Retirement benefits may be obtained at age 65. The Township made contributions of $39,774, of which $0 was funded by state-shared revenues and $39,774 was funded by the Township. Employee contributions to the Plan were $19,887.

At December 31, 2019, there were no investments in any one organization that represented 5% or more of total plan assets available for benefits other than mutual funds, which do not require disclosure of concentration per GASB Statement No. 40.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB)

Summary of Significant Accounting Policies - The OPEB Plan investments are carried at fair value as reported by the investment managers. Short-term investments are reported at cost, which approximates fair value. Financial information of the Township's OPEB Plan is presented on the accrual basis of accounting. Employer contributions to each plan are recognized when due.

Plan Description

Plan Administration - The Township's post-employment healthcare plan is a single-employer defined benefit healthcare plan. The plan provides medical insurance and life insurance benefits to eligible retirees. Spouses and other dependents are not covered under the plan. The Board of Supervisors assigns the authority to establish and amend benefit provisions. The plan does not issue separate, stand-alone financial statements. The plan is part of the Township's financial reporting entity and is included in the Township's financial statements as a Trust Fund. The plan does not issue separate, stand-alone financial statements.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

The plan is governed by the Township Board of Supervisors which is responsible for the management of plan assets. The Township Board of Supervisors has appointed a pension committee as the official body to which all related investment matters of the plan are delegated. The pension committee consists of five members, which may consist of elected officials, management, and/or members of the plan. The Township Board of Supervisors has delegated the authority to manage certain plan assets to TCG Investment Advisory, Inc., with Broadridge Matrix Trust Company as custodian.

Plan Membership - At December 31, 2019, plan membership consisted of the following:

Inactive plan members or beneficiaries currently receiving benefits	21
Inactive plan members entitled to but not yet receiving benefits	3
Active plan members	54
	78

Benefits Provided

Eligibility Requirements:

Police Officers - Medical and life insurance benefits are payable for members who retire after attaining age 50 with 20 years of service. However, receipt of benefits are deferred to the date on which the officer qualifies for normal retirement had the officer remained in service (25 years of service).

Firefighters - Firefighters hired prior to December 31, 2011 or Part-time Firefighters hired prior to December 31, 2011 and subsequently promoted to full-time status, medical benefits are payable for members who retire after attaining age 50 with 20 years of service.

Non-Uniformed Employees - Medical benefits are payable for members who retire after attaining age 55 with 20 years of service.

Medical Benefits Payable upon Retirement:

Police Officers - Eligible retirees may participate in the employer's group medical plan, while under age 65 which includes basic medical, prescription drug, dental and vision coverage. At ages 65 and older, member remains in the same group medical. However, Medicare will pay primary. In addition, officers retiring after January 1, 1999 are required to enroll in Medicare Part B coverage and the Township reimburses the retiree for coverage. Officers retiring after December 31, 2013 are required to enroll in Medicare Part D coverage and the Township shall reimburse the retiree for coverage. In addition to the aforementioned benefits, officers hired prior to September 24, 2019 who retire after September 24, 2019 will receive a $700 annual HRA contribution. These officers receive the same health benefits as active officers and are subject to any changes to the active plan made by agreement or an arbitration award. For officers hired after September 24, 2019, post-retirement medical benefits and the $700 annual HRA contribution cease when the officer becomes eligible for Medicare.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

Firefighters - Eligible retirees may participate in the employer's group medical plan, while under age 65 which includes basic medical, prescription drug, dental and vision coverage. At age 65, the member is no longer eligible to receive coverage.

Non-Uniformed Employees - Eligible retirees may participate in the employer's group medical plan, while under age 65 which includes basic medical, prescription drug, dental and vision coverage. At ages 65 and older, member remains in the same group medical. However, Medicare will pay primary. In addition, all retirees shall be required to enroll in Medicare Part B and Part D coverage and the Township reimburses the retiree for Medicare Part B and Part D coverage.

Union - Eligible employees that retire by December 31, 2022 may participate in the employer's group medical plan while under age 65, which includes basic medical, prescription drug, dental and vision coverage. At ages 65 and older, member remains in the same group medical. However, Medicare will pay primary. In addition, all retirees shall be required to enroll in Medicare Part B and Medical Part D coverage and the Township reimburses the retiree for coverage. However, for eligible employees who have 10 years of service as of December 31, 2022, if the healthcare plan designs change for active employees, retiree coverage will change as well. In addition, any employee hired on or after January 1, 2019 or an employee who does not have 10 years of service as of December 31, 2022 and who has at least twenty (20) years of service with the Township shall be provided post-retirement medical benefits including prescription for the retiree only until the retiree reaches age 65, becomes eligible for Medicare, or the retiree dies, whichever occurs first. If the healthcare plan designs change for active employees, retiree coverage will change as well. These retirees shall be required to enroll in Medicare Part B and Medical Part D coverage and will not be reimbursed for the Part B and Part D monthly premiums.

Disability Benefits:

Disabled Officers are eligible to continue receiving coverage for life if their disability is service related.

Life Insurance Benefits Payable upon Retirement:

Eligible retired police officers who retire while in the employ of the Township after 20 years of service are provided a life insurance benefit equal to $20,000 until age 65. At ages 65 and older, the Township provides a life insurance benefit of $10,000.

Dependents:

Spouses and other dependents are not covered under the Plan.

The benefit provisions of the Township's OPEB Plan are established by Township ordinances.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

Funding Policy

Member contributions are not required under the plan. The contribution requirements of plan members are established and may be amended by the Board of Supervisors. The Township is accounting for these expenditures on a "pay-as-you-go" basis. The costs of administering the plans are paid by the Township.

Investments

Investment Policy - The Pension Board, with the assistance of TCG Investment Advisory, Inc., shall select the appropriate asset weighting percentage to be allocated to each specific asset class. Each asset class shall consist of a combination of investment options that have been made available to obtain the absolute investment objective of the fund. Investments shall be diversified with the intent to minimize the risk of large investment losses. Consequently, the total portfolio will be constructed and maintained to provide prudent diversification with regard to the concentration of holdings in investment funds specializing in individual issues, issuers, countries, governments or industries. The following was the Committee's adopted asset allocation policy as of December 31, 2019:

Asset Class	Target Allocation
Domestic equity	34%
International equity	10%
Fixed income	50%
Real estate	3%
Cash	3%
	100%

Concentrations - There are no investments in any one issuer that is in excess of 5 percent of the total investments.

Rate of Return - For the year ended December 31, 2019, the annual money-weighted rate of return on plan investments, net of plan investment expense, was 23.39%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

Net OPEB Liability of the Township - The components of the net OPEB liability of the Township at December 31, 2019, were as follows:

Total OPEB liability	$ 15,479,099
Plan fiduciary net position	(1,595,705)
NET OPEB LIABILITY	$ 13,883,394
Plan fiduciary net position as a percentage of the total pension liability	10.31%

Actuarial Assumptions - The total OPEB liability was determined by an actuarial valuation as of December 31, 2019, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3%
Salary increases	4.5-5.0% annual increase
Investment rate of return	3.98%

The healthcare cost trend rate is 5.5% in 2019 through 2023. Rates gradually decrease from 5.4% in 2024 to 4.0% in 2075 and later based on the Society of Actuaries Long-Run Medical Cost Trend Model.

Mortality rates were based on the PubS-2010 mortality table for Police and Fire and the PubG-2010 mortality table for Non-Uniformed employees.

Due to the size of the plan, there have been no experience studies used to determine plan assumptions.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

The long-term expected rate of return on plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the plan's target asset allocation as of December 31, 2019 (see the plan's investment policy) are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic equity	5.50% - 7.50%
International equity	4.50% - 6.50%
Fixed income	1.00% - 3.00%
Real estate	4.50% - 6.50%
Cash	0.00% - 1.00%

Discount Rate - The discount rate used to measure the total OPEB liability was 3.98%. The plan's fiduciary net position is not projected to be sufficient to make projected benefit payments. As a result, the discount rate is based on the long-term expected rate of return on OPEB plan investments of 7.0% and the municipal bond rate of 3.26% based on the S&P Municipal Bond 20 Year High Grade Rate Index as of December 31, 2019.

Changes in Assumptions - In the 2019 actuarial valuation, the discount rate changed from 3.81% to 3.98%. The trend assumption was updated. The mortality table was changed from the IRS 2017 Small Plan Combined Static Mortality table to the PubS-2010 mortality table for Police and Fire and the PubG-2010 mortality table for Non-Uniformed employees.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

Sensitivity of the Net OPEB Liability to Changes in the Discount Rate - The following presents the net OPEB liability of the Township, calculated using the discount rate of 3.98%, as well as what the Township's net OPEB liability would be if it were calculated using a discount rate that is one percentage point lower (2.98%) or one percentage point higher (4.98%) than the current rate:

	1% Decrease (2.98%)	Current Discount Rate (3.98%)	1% Increase (4.98%)
Net OPEB liability	$ 16,419,927	$ 13,883,394	$ 11,844,764

Sensitivity of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rate - The following presents the net OPEB liability of the Township, as well as what the Township's net OPEB liability would be if it were calculated using healthcare cost trend rates that are one percentage point lower (5.0% decreasing to 2.8%) or one percentage point higher (7.0% decreasing to 4.8%) than the current healthcare cost trend rates:

	1% Decrease (4.5% Decreasing to 3.0%)	Healthcare Cost Trend Rates (5.5% Decreasing to 4.0%)	1% Increase (6.5% Decreasing to 5.0%)
Net OPEB liability	$ 11,589,651	$ 13,883,394	$ 16,769,995

OPEB Expense and Deferred Outflows of Resource and Deferred Inflows of Resources Related to OPEB – For the year ended December 31, 2019, the Township recognized OPEB expense of $717,779. At December 31, 2019, the Township reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Governmental Activities	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 401,566	$ -
Changes in assumptions	957,147	489,015
Net difference between projected and actual earnings on pension plan investments	-	81,125
Total	$ 1,358,713	$ 570,140

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

	Business-Type Activities	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ -	$ 374,759
Changes in assumptions	91,778	51,314
Net difference between projected and actual earnings on pension plan investments	38,520	-
Total	$ 130,298	$ 426,073

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

Year Ending December 31,	Governmental Activities	Business-Type Activities
2020	$ 130,817	$ (45,039)
2021	130,816	(45,037)
2022	140,853	(44,568)
2023	96,189	(49,700)
2024	144,950	(55,716)
Thereafter	144,948	(55,715)

NET POSITION HELD IN TRUST AT END OF YEAR	$ 7,082,251	$ 2,513,081	$ 10,943,594	$ 1,595,705	$ 22,134,631

NOTE M - EXCESS OF EXPENDITURES OVER APPROPRIATIONS

The General Fund incurred expenditures in excess of appropriations in the following amounts for the year ended December 31, 2019:

General government - tax collection	$ 36,253
Public safety - fire protection	111
Debt service	201

The excess expenditures above were covered by budgeted expenses exceeding incurred expenditures in other expense categories.

NOTE N - RISK MANAGEMENT

The Township is exposed to various risks of loss related to tort; theft of, damage to, and destruction of assets; errors and omission injuries to employees; and natural disasters. Significant losses are covered by commercial insurance for all major programs. There were no significant reductions in insurance coverages of the 2019 year. Settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

NOTE O - GUARANTEE OF FIRE COMPANY DEBT

During 2014, the Township guaranteed a $4,000,000 loan made to the East Whiteland Township Volunteer Fire Association dated May 6, 2014 with a maturity date of May 6, 2042. As of December 31, 2019, the Township has determined that there is currently no evidence that the Association will default on its loan, and therefore, no liability is reflected in the financial statements.

NOTE P - PRIOR PERIOD RESTATEMENT

The Township implemented GASB Statement No. 84, Fiduciary Activities. The objective of GASB Statement No. 84 is to improve guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported.

For the fiduciary fund custodial activities, the Township has treated the beginning of year net position of $375,442 as having been recognized in the period incurred. The Township has adjusted beginning net position for their fiduciary activities from $0 to $375,442.

NOTE Q - SUBSEQUENT EVENT

Subsequent to year end, a global pandemic due to the spread of the COVID-19 coronavirus caused the United States government to declare a national emergency. The pandemic has led to widespread voluntary and government-mandated closings of local stores and businesses, which has resulted in significant job losses. These job losses have the potential to have a significant impact on all aspects of Township operations including tax collections and the collection of sewer charges. In addition, due to the temporary closure of all businesses that are not deemed life sustaining, State tax revenues are also significantly decreased. This decrease could result in less grant money that is relied upon by local municipalities to fund specific projects. Overall, decreased funding could result in the Township having to curtail or eliminate some non-essential services and furlough employees.

Due to the pandemic, the financial markets have experienced significant market decline since the beginning of the year. These losses, if not regained, will have a significant detrimental impact on the value of the investments held by the Township's pension and OPEB plans. Decreases in the value of investments held by the Plans may result in a significant impact on the pension and OPEB liabilities and related deferred inflows and outflows related to the pension and OPEB plans. At this point, the extent to which COVID-19 will impact our financial condition or results of operations is uncertain and cannot be reasonably estimated at this time.

NOTES TO SCHEDULE

Changes in assumptions. In 2019 the mortality rates were updated to the PubS-2010 mortality tables, and the investment rate of return was revised to 7.5% from 8.0%. In 2017 the mortality rates were based on the IRS 2017 Static Combined Table for Small Plans. In prior years, the mortality rates were based on the RP-2000 Table for Males or Females

This schedule is intended to show information for ten years. all available information is displayed. Additional information will be displayed as it becomes available.

Covered payroll	$ 2,617,694	$ 2,220,748	$ 2,376,418	$ 2,181,320	$ 1,932,369	$ 1,739,660
Contribution as a percentage of covered payroll	19.28%	13.70%	12.55%	16.19%	17.68%	13.37%

NOTES TO SCHEDULE

Actuarially determined contribution rates are calculated based on the plan's most recent available Act 205 actuarial valuation report. The January 1, 2017 actuarial valuation report was utilized for the 2019 Minimum Municipal Obligation calculation. The January 1, 2015 actuarial valuation report was utilized for the 2018 and 2017 Minimum Municipal Obligation calculation. The January 1, 2013 actuarial valuation report was utilized for the 2016 and 2015 Minimum Municipal Obligation calculation. The January 1, 2011 actuarial valuation report was utilized for the 2014 and 2013 Minimum Municipal Obligation calculations. The following actuarial methods and assumptions were used to determine contribution rates.

Methods and assumptions used to determine contribution rates:

Actuarial valuation date	1/1/17	1/1/15	1/1/13	1/1/11
Actuarial cost method	Entry age	Entry age	Entry age	Entry age
Amortization method	Level dollar	Level dollar	Level dollar	Level dollar
Remaining amortization period	9 years	10 years	12 years	13 years
Asset valuation method	Market	Market	Market	Smoothing
Salary increases	5%	5%	5%	5%
Investment rate of return	8%	8%	8%	8%
Disability rates	None	None	None	None
Termination rates	W65	W65	W65	None
Mortality	IRS 2017 Static Combined	RP2000	RP2000	RRB92
Retirement age	50	50	50	50
Cost-of-living adjustments	None	None	None	None

This schedule is intended to show information for ten years, all available information is displayed. Additional information will be displayed as it becomes available.

STATISTICAL SECTION

STATISTICAL SECTION
(Unaudited)

This part of East Whiteland Township's Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, notes disclosures and required supplementary information says about the Township's overall financial health.

Contents

Financial Trends

These schedules contain trend information to help the reader understand how the Township's financial performance and well-being have changed over time.

Revenue Capacity

These schedules contain information to help the reader assess the Township's most significant local revenues sources, the earned income tax, and property tax.

Debt Capacity

These schedules present information to help the reader assess the affordability of the Township's current levels of outstanding debt and the Township's ability to issue additional debt in the future.

Demographic and Economic Information

These schedules offer demographic and economic indicators to help the reader understand the environment within which the Township's financial activities take place.

Operation Information

These schedules contain service and miscellaneous data to help the reader understand how the information in the Township's financial report relates to the service the Township provides and the activities it performs.

Sources: Unless otherwise noted, the information in these schedules is derived from the Annual Financial Reports for the relevant year. The Township implemented GASB Statement No. 34 for fiscal year ended December 31, 2003; schedules presenting government-wide information include information beginning in that year.

Notes:

(1) Net (expense) revenue is the difference between expenses and program revenues of a function or program. It indicates the degree to which a function or program is supported with its own fees and program-specific grants versus its reliance upon funding from taxes and other general revenues. Numbers in parenthesis indicate that expenses were greater than program revenues and therefore general revenues were needed to finance that function or program. Numbers without parenthesis indicate that program revenues were more than sufficient to cover expenses.

(2)Prior to 2015, the depreciation was not allocated to the specific governmental activities in the statement of Activities source document.

Table 16

EAST WHITELAND TOWNSHIP
Computation of Direct and Overlapping Debt
as of December 31, 2019

Jurisdiction	Total Debt Outstanding	Assessed Value	Percentage Applicable to East Whiteland	Amount Applicable to East Whiteland
Direct:				
East Whiteland Township	$ 7,741,044	$ 3,394,447,781	100%	$ 7,741,044
Overlapping:				
Great Valley School District	22,018,449	3,818,966,671	88.9%	19,570,863
Chester County (2)	497,780,000	38,700,276,590	8.8%	43,660,882
Total Overlapping Debt	519,798,449	42,519,243,261		63,231,746
Total Debt	$ 527,539,493	$ 45,913,691,042		$ 70,972,790

(1) Overlapping governments are those that coincide, at least in part, with the geographic boundaries of the Township. This schedule estimates the portion of the outstanding debt of those overlapping governments that is borne by the residents and businesses of East Whiteland Township.

(2) Proportional share of existing debt as of December 31, 2019 is based on the ratio of East Whiteland's assessed value to Chester County's and Great Valley School District's assessed value respectively.

Board of Supervisors: Susan Drummond • Scott Lambert • Richard Orlow **Township Manager:** John Nagel

June 10, 2021

To the Board of Supervisors and Citizens of East Whiteland Township:

We are pleased to present to you the Comprehensive Annual Financial Report of East Whiteland Township for the fiscal year ended December 31, 2020. A complete set of financial statements presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants is presented herewith.

This report consists of management's representations concerning the finances of East Whiteland Township. Consequently, responsibility for both the accuracy of the data, and the completeness and fairness of the presentation, including all disclosures, rests with the Township's management. To the best of our knowledge, the information presented in this report is accurate in all material respects and is reported in a manner designed to fairly represent the financial position and results of operations of the funds and component units of East Whiteland Township. All disclosures necessary to enable the reader to gain an understanding of East Whiteland Township's financial activities have been included.

East Whiteland Township's financial statements have been audited by Maillie LLP, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of East Whiteland Township for the fiscal year ending December 31, 2020, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures of the financial statements; assessing the accounting principles used and significant estimates by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion that East Whiteland Township's financial statements for the fiscal year ended December 31, 2020, are fairly presented in conformity with GAAP. The independent auditors' report is presented at the beginning of the Financial Section of this report.

The purpose of this report is to provide readers with useful information concerning the Township's financial position and operations. Generally Accepted Accounting Principles (GAAP) require that management provide a narrative introduction, overview and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. East Whiteland Township's MD&A can be found immediately following the report of the independent auditors.

Profile of the Township

East Whiteland Township is located in the middle of the Chester Valley in east-central Chester County, about 25 miles west of central Philadelphia. With about 11 square miles of land area, the Township measures slightly more than four miles in an east-west direction and 2.8 miles from north to south.

East Whiteland Township is located in a diverse and dynamic suburban area traversed by several important highways, with an excellent mix of housing and expanding opportunities for employment, making it one of the most desirable communities in the region in which to live and work. As part of the Great Valley School District, East Whiteland houses the middle and senior schools as well as the K.D. Markley Elementary School. East Whiteland is also home for Immaculata University and has campuses for the Drexel University Lebow College of Business and Penn State University Great Valley.

Whiteland Township was part of the Welsh Tract purchased from William Penn in 1684 by a group of Quakers. In 1704, part of the tract became Whiteland Township. In 1765, by decree of the County Court the Township was divided into East and West Whiteland Townships. Historically, East Whiteland Township was predominantly agricultural, with several crossroad villages strung along Lancaster Pike and mills along Valley Creek. The arrival of railroads in the mid 1800's led to the development of several mineral extraction businesses followed by construction materials processing, steel fabricating, petroleum and natural gas storage and transmission, and disposal of waste materials. With the completion of route 202 through the Township in the 1960's, East Whiteland evolved into a major office employment center, and some of the previously dominant businesses ceased operation while others continue to function in a community that has changed a great deal over the years. In 1950 the Township population was 1,740. The current estimated resident population is 11,000, however, the number of people that work in the municipality on a daily basis is more than 30,000.

East Whiteland Township is governed by a three member elected Board of Supervisors that serves as the Township's legislative and policymaking body. The Board members are elected at large to staggered six-year terms. East Whiteland Township operates under the auspices of the Pennsylvania Second Class Township Code. The Board of Supervisors is empowered to appoint professionals to assist in the operation of the Township and to furnish advice and counsel on technical matters. Additionally, the Board appoints all the members of the various boards and commissions, including the Planning Commission and Zoning Hearing Board. The Tax Collector and three member Board of Auditors are elected positions. Levying taxes and authorizing appropriations are the responsibility of the Board of Supervisors.

The Board of Supervisors is assisted by a full-time appointed Township Manager who is responsible for the day-to-day operations of the Township. The Township provides a full range of municipal services. The public safety programs include police, fire protection, building inspection, planning, zoning, emergency management and code enforcement. East Whiteland Township partners with the East Whiteland Township Volunteer Fire Association to provide emergency services. The countless hours spent by the volunteers in protecting the community are greatly appreciated. Public works programs include street maintenance and repair, street lighting, snow removal, traffic signalization, street markings, sewer system maintenance, storm sewer and storm water basin maintenance and maintenance of Township buildings and park facilities. The Township owns and maintains numerous community and neighborhood parks and nature areas and supports the Friends of Summer Stage to provide free summer concerts in Valley Creek Park.

Major Initiatives

Following are some of the major initiatives undertaken by the Township in 2020:

- **Commercial and Residential Development** continue to be a major focus in East Whiteland Township. Our staff works with the developers to ensure the Township interests are protected and the Comprehensive Plan goals are met.

- **Traffic issues** - In 2014, the Township secured an ARLE grant of $445,000 to upgrade traffic signals in the Township to reduce traffic congestion. This project began in 2018 and was fully implemented in 2019. Due to COVID PennDot has not finalized any grant for 2020 or 2021. The Route 30 Corridor Master Plan for the widening of Rt. 30, land use, and pedestrian traffic was completed during 2018. Implementation of this Master Plan is ongoing. In addition, the Act 209 Transportation Study was completed and a transportation impact fee to be imposed upon new subdivision and new development to fund transportation capital improvements in accordance with a transportation capital improvements plan and a roadway sufficiency analysis. The Township continues to collect impact fees for all new developments.

- **Multi-year Financial Management Plan** - In 2018, with a grant from the Commonwealth of Pennsylvania Department of Community and Economic Development and its Early Intervention Program, the Township worked with consultants to develop a multi-year financial management plan that included an assessment of operations and financial condition. The Township had recently relied on non-recurring revenues to cover recurring operating costs, pension costs are increasing and unfunded liabilities are growing. A baseline projection showed a deficit of $1.5 million in 2020 with deficits continuing through 2023 absent corrective action. Ultimately, to close the deficit, an increase to the local earned income tax rate was passed for 2019. For 2019 the earned income tax rate was increased to 0.75% from 0.50%. The five year forecast was rolled forward and updated in 2019 and utilized as a tool for planning and budgeting for 2019 and 2020.

  Controlling health insurance costs continues to be a primary focus and the Township's AFSCME and Police employees moved to a plan with design changes that reduced current costs and cost growth while still providing quality coverage for its employees in May 2019 and in February 2020, respectively.

Fund Balance Policy

The Township has adopted GASB Statement No. 54, which redefined how fund balances of the Governmental Funds are presented in the financial statements. Fund balances are classified as follows: Non spendable, Restricted, Committed, Assigned and Unassigned.

Long-Term Debt Activity

For more detailed information on long-term debt activity, please see Notes to the Basic Financial Statements (Note F, Long-Term Debt).

Capital Asset Activity

For more detailed information on capital asset activity, please see the Notes to the Basic Financial Statements (Note C, Capital Assets).

Local Economy

Located in east-central Chester County with its highly trained and educated workforce, desirable quality of life, competitive tax structure and close proximity to Philadelphia, PA, East Whiteland Township has a diverse and dynamic economy, boasting over 1,000 businesses.

Due to the coronavirus (SARS-CoV-2) pandemic and associated societal and business closures ordered by the Commonwealth of Pennsylvania, the general outlook for the economy of East Whiteland Township is uncertain. Locally planned continues to move into production in 2021. However, the Township's economy and large tax base is expected to slow in the near term as a decrease in earned income tax revenue in the range of 6.3% - 12.6% is anticipated before continuing to grow, driven in large part by business and commercial development, and by new residential construction. East Whiteland Township is home to the Great Valley Corporate Center and serves as U.S headquarters and Regional Headquarters to several national and international firms including Saint-Gobain, Vishay and Cerner Corporation. Vanguard has plans to add 500,000 square feet of office space and new jobs are expected over the next several years. Although there are major employers in the Township, the employment base is not dominated by one business or industry. The Township's business base consists of software development and application firms, telecommunication firms, e-commerce companies, design and manufacturing businesses, and pharmaceutical research firms. As noted, the Township hosts corporate and regional headquarters operations as well as trade and professional associations, retail firms, wholesale distributors, and business and financial services. Noting the list of Principal Employers in the Statistical Section of this report, the top employers comprised approximately 31% of the workforce in 2020. This diversity would provide stability to weather downturns in the economy.

During 2020, land development and subdivision activity continued. A number of mixed-use developments including over 1,000 units of housing are expected to be completed over the next five years. There is also approximately 800,000 square feet of commercial properties under construction or pending development. The Township has updated and will continue to update some aspects of the zoning for the Route 30 Corridor to encourage redevelopment.

A more detailed analysis of the Township's overall financial condition during the fiscal year ended 2020 is included as part of Management's Discussion and Analysis section of this report.

Long-Term Financial Planning

The Board of Supervisors and Township staff is committed to providing value to the taxpayers by maintaining quality service levels and offering new benefits whenever the opportunity presents itself and the Township's fiscal position permits. To accomplish this, the Township regularly evaluates its revenue generating strategy. The Township has also developed and maintains a multi-year financial management plan and multi-year financing plans for replacement of capital assets and infrastructure improvements.

Also, as a part of sound fiscal planning, the Township has adopted a fund balance policy that is compliant with GASB 54 for determining fund balance categories and based on recommendations from the Government Finance Officers Association for maintaining a fund balance in the General Fund of approximately two months of expenditures, or a range of fifteen to twenty percent of General Fund appropriations. Due to the uncertainty associated with the coronavirus pandemic, the Board of Supervisors assigned $5,050,000 of fund balance to tax rate stabilization.

Internal Controls

The management of the Township is responsible for establishing and maintaining an internal control structure designed to ensure that the assets of the Township are protected from loss, theft, or misuse and to ensure that adequate accounting data is compiled and maintained to allow for the preparation of financial statements in conformity with generally accepted accounting principles. The internal control structure is designed to provide reasonable, but not absolute, assurance that the Township's objectives are met. The concept of reasonable assurance recognizes that:

1. The cost of a control should not exceed its benefit, and

2. The evaluation of cost and benefits requires estimates and judgments by management.

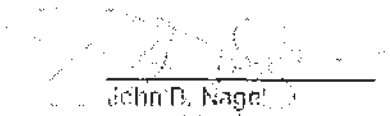
All internal accounting control evaluations occur within the above framework. We believe that the Township's internal accounting controls adequately safeguard assets and provide reasonable assurance of proper recording of transactions and maintenance of asset accountability.

In addition to the above controls, the Township maintains budgetary accounting controls. The objective of these controls is to ensure compliance with legal provisions embodied in the annual budget approved by the Board of Supervisors. Activities of all Township funds, with the exception of developers' escrow funds and pension trust funds, are included in the annual appropriation budget. The annual budget process officially begins in July of each year with the request for budget proposals sent to the Township's department heads. Throughout the course of September and October, requests for funding are submitted and reviewed by the Township management. A proposed annual budget is submitted to the Board of Supervisors in October or November. The Board holds a public hearing on the proposed budget and the process culminates with a vote for adoption by the governing body in December. The Township's fiscal year begins on January 1st and ends on December 31st. All annual appropriations lapse at year-end.

The Township maintains the legal level of control at the departmental level for its operating budget, and the Board of Supervisors has also established an internal budgetary control system at the departmental level. Each department is required to operate within the annual departmental budget established by the Board of Supervisors.

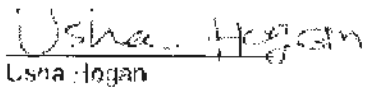
As demonstrated by the statements and schedules included in the financial section of this report, the Township continues to meet its responsibility for sound financial management.

Awards and Acknowledgements



Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to East Whiteland Township for its comprehensive annual financial report for the fiscal year ended December 31, 2019. This was the fifth consecutive year that the government has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to GFOA to determine its eligibility for another certificate.



Preparation of this report would have been impossible without the hard work of the Finance Department staff, not just in the compilation of information at year-end, but in maintaining the Township's financial records and fiscal control system throughout the year. We also wish to thank our auditors, Maillie LLP, for their expertise and assistance throughout this process.

We greatly appreciate the ongoing support and guidance we receive from the Board of Supervisors.

Respectfully Submitted,

John D. Nagel

Independent Auditors' Report

To the Township Supervisors
East Whiteland Township
Frazer, Pennsylvania

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund and the aggregate remaining fund information of East Whiteland Township as of and for the year ended December 31, 2020, and the related notes to the financial statements, which collectively comprise East Whiteland Township's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

East Whiteland Township's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

To the Township Supervisors
East Whiteland Township
Frazer, Pennsylvania

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund and the aggregate remaining fund information of as of December 31, 2020, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America (GAAP).

Emphasis of Matter

As discussed in Note P to the financial statements, the spread of the COVID-19 coronavirus is affecting the United States and global economies and may have an impact on East Whiteland Township's operational and financial performance. At this point, East Whiteland Township cannot reasonably estimate the impact on its operations or financial results. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that management's discussion and analysis on pages 17 through 27, budgetary comparison information on pages 87 and 88, pension plan information on pages 89 through 97 and post-employment benefits other than pension plan information on pages 98 through 100 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise East Whiteland Township's basic financial statements. The supplementary information listed in the table of contents is presented for purposes of additional analysis and is not a required part of the basic financial statements.

To the Township Supervisors
East Whiteland Township
Frazer, Pennsylvania

The supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Limerick, Pennsylvania

OVERVIEW OF THE FINANCIAL STATEMENTS

Management's Discussion and Analysis provides an introduction to the Township's basic financial statements. The basic financial statements include:

1. Township-Wide Financial Statements
2. Fund Financial Statements
3. Notes to the Financial Statements

Additional information is also provided to supplement the basic financial statements.

Township-Wide Financial Statements

The Township's annual report contains two Township-Wide Financial Statements. They are the *Statement of Net Position* and the *Statement of Activities.* These statements provide both long-term and short-term information about the Township's overall financial status. Financial reporting at this level is similar to that found in the private sector with its basis in full accrual accounting and the elimination or reclassification of internal activities.

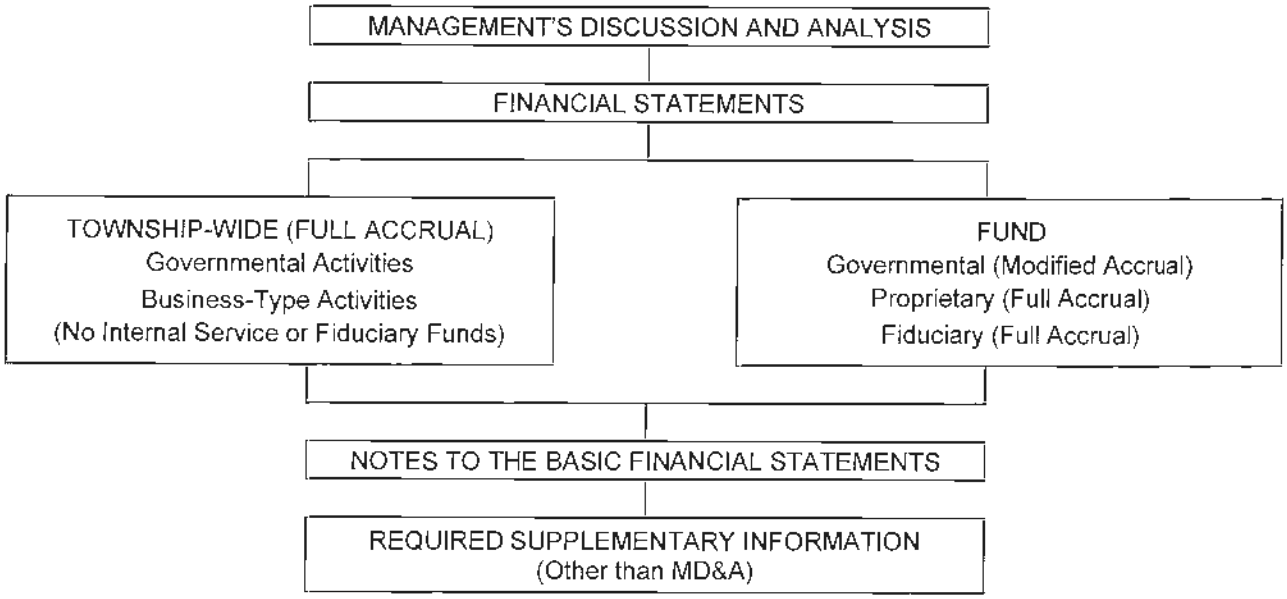
The *Statement of Net Position* provides information on all of the Township's assets and liabilities, with the difference reported as *Net Position*. Over time, increases or decreases in net position serve as a useful indicator of whether the Township's financial position is improving or deteriorating. Evaluation of the overall economic health of the Township would include other non-financial factors such as changes in the taxpayer base or the condition of the Township's infrastructure, in addition to the financial information provided in this report.

The *Statement of Activities* reports how the Township's net position changed during the current fiscal year. All current year revenues and expenditures are included in this report regardless of when cash is received or paid. An important purpose of the Statement of Activities is to show the financial reliance of the Township's various activities or services on revenues provided by the Township's taxpayers.

Both Township-Wide Financial Statements are divided into two categories:

1. ***Governmental Activities***: Most of the Township's basic services are included here, such as general government, public safety, public works and recreation. These activities are principally supported by taxes and intergovernmental revenues.
2. ***Business-Type Activities***: Services which are intended to recover all or most of their costs through user fees and charges. The Township's sewer system is the only business-type activity.

Fund Financial Statements



The Fund Financial Statements provide more detailed information about the Township's Funds, focusing on its most significant or "Major Funds" - not the Township as a whole. A fund is an accountability unit used to maintain control over resources segregated by specific sources of funding or spending on particular programs.

- Some funds are required by state law or bond covenants.
- The Township establishes other funds to control and manage money for particular purposes or to show that it is properly using certain revenues.

The Township has three kinds of Funds:

- ***Governmental Funds***: Most of the Township's basic services are included in Governmental Funds, which generally focus on (1) how cash and other financial assets that can readily be converted to cash flow in and out and (2) the balances left at year-end that are available for spending. Consequently, the Governmental Funds' statements provide a detailed *short-term view* that helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the Township's programs. Because this information does not encompass the additional long-term focus of the Township-Wide statements, additional information is presented that explains the relationship (or differences) between them.
- ***Proprietary Funds***: Services for which the Township charges a fee are generally reported in Proprietary Funds. Proprietary Funds are reported in the same way as the Township-Wide statements. The Township's Enterprise Funds (one type of Proprietary Fund) are the same as its business-type activities but provide more detail and additional information, such as cash flows.
- ***Fiduciary Funds***: The Township is the trustee, or fiduciary, for assets that belong to others, such as the pension plans. The Township is responsible for ensuring that the assets reported in these funds are used only for their intended purposes and by those to whom the assets belong. The Township excludes these activities from the Township-Wide financial statements because it cannot use these assets to finance its operations. The Township's Fiduciary Funds are the Police Pension Fund, the Non-Uniformed Pension Fund, the Firefighter Pension Fund, and the OPEB Trust Fund. The Township also has a Custodial Fund used for deposits the Township holds as prepayments for engineering reviews and other developer costs paid by the Township. When the projects are completed, any balances are returned to the developer

Narrative Discussion and Analysis

Within this section of East Whiteland Township's annual financial report, the Township's management provides narrative discussion and analysis of the financial activities of the Township for the fiscal year ended December 31, 2020. The Township's financial performance is discussed and analyzed within the context of the accompanying financial statements following this section.

FINANCIAL HIGHLIGHTS

- **Total Net Position** - Assets and Deferred Outflows of Resources exceeded liabilities by $40,572,323 for the fiscal year reported. This total includes both governmental and business-type (Sewer) activities. Capital Assets total $27,677,722, which includes property and equipment net of accumulated depreciation and reduced for outstanding debt related to the purchase or construction of capital assets. The balance is unrestricted assets of $12,224,509 and restricted assets of $670,092 for highway and street projects. Total liabilities include $7.4 million in outstanding debt for GOB governmental bonds and $15.6 million for GOB sewer bonds. Although the Township's investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources since the capital assets themselves cannot be used to liquidate these liabilities.

- Cash and Investments - Total Township assets included $29,026,727 in cash and cash equivalents and $253,451 in financial investments, $18,647,739 in the Governmental Funds and $10,632,439 in the Sewer Fund.

- **Governmental Fund Balances** - At the end of 2020, the Township's governmental funds' combined ending fund balance was $21,353,645, an increase of $3,864,577 from the prior year primarily due to an increase in revenue tax collection ($314,000), permit, fees, and fines ($338,000), other miscellaneous revenue ($395,000). Of the current balance, $670,092 is restricted for highway and street projects, and $20,682,060 is assigned for the various purposes on the face of the balance sheet.

- **Total General Obligation Bonds Outstanding** decreased by $1,045,000 from 2019 due to principal reductions in the four current general obligation bond issues.

Governmental Activities

Governmental Revenue - 2020

As indicated in the Condensed Statements of Activities (Figure I-3) and displayed in Figure I-4, the primary source of revenue for the township is local taxes which include Earned Income Taxes, Local Services Taxes, and Real Estate (Property and Transfer) Taxes.

- Earned Income Taxes (EIT) totaling $10,056,315 and Local Services Taxes (LST) totaling $1,312,250 were 59% and 8% of revenue, respectively. EIT exceeded 2019 reported collections by $314,425 (3%) due to a net increase in the earned income tax of resident and nonresident taxpayers while LST remained flat $10,586 (-1%).

- Real Estate Taxes totaled $775,205 (5% of revenue), an increase of $8,011 (1%) in 2020 related to new construction and reassessments.

- Transfer Taxes totaled $1,098,937 (6% of revenue), a decrease of $101,033 (-8%) from 2019 as there were some commercial properties that transferred ownership in 2019 that were non-recurring in 2020.

Service Revenue mostly related to permits, public safety fees, engineering reviews, grants and state aid totaled $1,995,264 (12% of revenue) and, it was the same as prior year.

Governmental Expenses - 2020

As indicated in the Condensed Statements of Activities (Figure I-3) and displayed in Figure I-4, total expenses of the Township's governmental activities, public safety programs account for $10,178,070, or 66% of the total expenses for the Township's governmental activities. Public safety includes the police, codes, and planning & zoning departments plus a full-time staff of 10 firefighters/EMTs who complement the local volunteer fire company. General Administration, and Highway and Street Services account for 11% and 19% respectively of the total expenses.

Total expenses increased $476,842 (3%) as follows:

- Public Safety increased by $866,035 (9%) in 2020, the increase is primarily due to increase in police wages ($449,000), increase in police post-retirement benefit ($131,000), increase in fire department wages ($342,000), increase in planning salary ($92,000), these increases were in part due to annual contract and in part due to new hires. These costs were offset by decrease in medical cost (-$123,00), decrease in fire department's wages (-$219,000) because of no benefit cost associated with the new part time employees.

- General Government expenses decreased by $73,952 (-4%) in 2020, primarily due to a decrease in medical insurance premiums due to a less costly plan (-$34,000), a decrease in information technology related payroll and expense (-$21,000) and lower engineering and solicitor costs and other professional services costs related to special projects and studies (-$123,000), a decrease in computer services finance (-$21,000). an increase in EIT tax collection fees due to the increase in EIT tax collected ($33,000) and increase in computer services admin ($27,000).

- Public Works-highways and streets decreased by $315,230 (-10%) in 2020 mainly due to COVID 19 and its impact on the construction business

- Culture and recreation expenses decreased $34,049 (-14%) in 2020 due to a change in the summer camp program due to COVID19.

Governmental Net Position - 2020

As a result of the 2020 Governmental Activities noted above, East Whiteland recognized a $2,050,906 increase in Net Position. The ending Net Position remains healthy at $13.8 million including $18.4 million in cash to manage annual expenses if revenue timing is an issue.

Business-Type Activities

The Township's only business-type activity is its sewer operation. East Whiteland Township's sewer system includes 13 sewer pumping stations and approximately 77 miles of pipeline. The Township accepts flows and collects sewer rental fees from the adjoining municipalities of East Goshen Township, Charlestown Township and Malvern Borough. The Township, in turn, pays sewer rental fees to neighboring Tredyffrin Township and East Goshen Township, and a public utility company for conveyance and to the Valley Forge Sewer Authority for waste treatment.

- **Service Revenue** in fiscal year 2020 was $4,327,245 or $418,642 less than 2019 due to mainly a decrease in revenue from tapping fees which is $548,000 or $396,000 less than 2019. The decrease in tapping fee was due to COVID19 impact on the business.

- **Sewer Expenses** decreased $83,000 due to the greatest impact of pandemic on construction reduction throughout the year 2020.

- **The Sewer Fund Net Position** at the end of 2020 improved by $335,396 mainly related to increase in wastewater treatment of $169,954, increase in sewer rents of $56,374, increase in connection fee of $5,613 and reductions in expense of $83,000 in 2020.

FINANCIAL ANALYSIS OF THE TOWNSHIP'S FUNDS

Governmental Funds

Governmental Funds are reported in the Fund Statements with a short-term focus on the inflow and outflow of financial resources. This information is valuable in assessing resources available for upcoming financial requirements. Governmental Funds reported ending fund balances of $21,353,645. Of this year-end total: $5,050,000 is assigned for tax rate stabilization, $500,000 is assigned for pension stabilization, $500,000 is assigned for other postemployment benefits, $650,000 is assigned for storm water management, $3,000,000 is assigned for volunteer committee resources for such purposes as the acquisition of open space, the protection of historic, natural and scenic resources, to establish trails, bike paths, sidewalks and pathways, and energy conservation, $4,625,000 is assigned for the renovation of municipal infrastructure, $2,375,687 is assigned as budget contingency, $864,094 is assigned for capital improvement projects, $500,000 is assigned for equipment, $1,042,944 is assigned for highway and street projects and $1,574,335 is assigned for park development projects. Restricted fund balances include $670,092 for highway and street projects.

Major Governmental Funds - The General Fund is the Township's primary operating fund. The General Fund balance at fiscal year-end was $8,477,180, an increase of $1,433,312 over 2019. The General Fund balance is 68% of our 2020 operating expense and 54% of revenue.

The **Capital Improvement Fund** is a reserve fund for various capital purchases and improvements. The fiscal year-end balance for the Capital Improvement Fund was $10,589,094. This is an increase of $1,863,071 over the ending fund balance for 2019, resulting from an excess of revenues over expenditures in 2020 from non-recurring revenue that was transferred from the General Fund and assigned for specific projects.

Proprietary Funds

The only Township Proprietary Fund is the Sewer Fund, which was discussed previously under business-type activities.

GENERAL FUND BUDGETARY HIGHLIGHTS

Overall, general fund actual expenditures were $1,760,527 better than the final budget. The services that had significant favorable variances were as follows:

General Government	$244,842
Police	$717,578
Code Enforcement	$268,883
Public works, highways and streets general services	$135,698
Public works, highways and streets winter maintenance	$151,502
Public works, road maintenance and repair	$42,883
Public works, traffic signals	$35,782
Culture recreation, other	$110,451

On the schedule of sources and uses for the General Fund, including Other Financing Sources, the net position is better than the budget by $857,071 due to the reasons listed above and offset by the excess of revenues over expenditures in 2020 that was transferred out to the Capital Improvement Fund.

CAPITAL ASSETS - NET OF DEPRECIATION

The Township's investment in capital assets, net of depreciation, decreased $1,487,000 to $50,050,518. Capital Assets for our Sewer system including 13 pump stations and 77 miles of pipeline, comprise $33,740,402 of the total. Infrastructure incorporating 45 miles of road and traffic signals at 39 intersections, is $5,568,447 of the total. Buildings and Improvements comprise $7,796,540. For the detailed information about Capital Assets please see Note C in the report. The schedule (Figure I-5) below details Capital Assets, net of depreciation.

Capital Assets - Net of Depreciation (In Thousands of Dollars)

LONG-TERM DEBT

Long-term debt consists of debt incurred for the purchase and development of capital assets; and for the recording of compensated absences payable to employees, net pension liability and other post-employment benefits (OPEB) liability. The total long-term debt increased $2,253,000 mostly due to a net increase of $4,950,000 in the OPEB liability primarily resulting from changes of assumptions changing the mortality tables used and offset by a decrease of $1,659,000 in the pension liability resulting from plan fiduciary net position at 12/31/2020, and a decrease in the bonds for $1,045,000 in principal payments. For more information on long-term debt please see Note F in the report.

NEXT YEAR'S BUDGETS AND RATES

The general outlook for the economy of East Whiteland Township is uncertain due to the coronavirus (SARS-CoV-2) pandemic and associated societal and business closures ordered by the Commonwealth of Pennsylvania. These closures began in early to mid-March 2020 and will continue in some form into the foreseeable future. However, the shutdowns exempted approximately 70% of the U.S. economy and Statewide construction was permitted to resume on May 1, 2020. Locally planned development activity continues to move into production in 2020 and 2021. Building permit activity and fees based on permits issued to date and in the approval, process is relatively unaffected. In the short run, this will continue to add to our building permit fees, transfer taxes and sewer tapping fees and ultimately to our real estate tax, earned income tax and local services tax revenue. For 2021, there will be no rate increase for real estate tax which has been the same low rate of .445 mills for over 25 years nor for the earned income tax rate which increased from 0.5% to 0.75% in 2019. For 2021, the earned income tax budget decreased 11% or $900,000 to $8.2 million, the real estate tax budget is 755,820 the same as the 2020, and the local services taxes decreased by 10% or $135,000 to $1,215,000.

Operating expenses are expected to continue to increase over the next few years as municipal services are heavily labor intensive, and wage and benefit costs continue to increase. However, due to cost savings measures taken in 2020 and others that may be necessary in 2021 due to the pandemic, these increases can be moderated. In 2015 we took steps to reduce the healthcare costs by joining the Delaware Valley Health Insurance Trust for two of our three employee groups. In 2019 the healthcare plan for one employee group and non-represented employees was replaced with a less costly plan. In 2021 the Township's pension costs will increase by 22.5%. The post-retirement benefit costs will also increase.

Seventy six (76%) percent of the Township's full time employees (45 of 59) are represented by unions including the East Whiteland Police Association, the International Association of Fire Fighters (IAFF), and the American Federation of State, County and Municipal Employees (AFSCME). All the three agreements will expire in 2021. Wage increases under the three contracts in 2021 are 3.5%, 3.75%, and 3.75% in the order as listed above.

Increases in East Whiteland sewer infrastructure and department expenses and costs for the sewer treatment plants that service East Whiteland Township continue to impact sewer fund finances. During 2018 we completed commercial sewer rate and tapping fee studies. The rates for all other sewer services and tapping fees will remain the same for 2021.

2021 projects include Conestoga Road and Planebrook Road sewer system expansion design, construction of Bacton Hill Park phase 1, planning for a new building to house the Police Department on the Township campus, additional road resurfacing and traffic improvement projects. The Act 209 Transportation Study that was completed in 2018 resulted in a new traffic impact fee to be used for traffic capital improvements. Recreation impact fees from development and grants will be used to fund the Bacton Hill Park phase 1 construction project.

Malvern Hunt flow diversion project will be done in 2021 at an approximate cost of $135,000. The decommissioning of the plant will also start this year, but the costs have not been established yet.

The Township is also proposing a sale of the sewer system. The goal in the potential sale of our sewer system is to focus its resources on other core government functions while ensuring safe, reliable, and professional sewer service at affordable rates for its residents. The Township has systems with aging infrastructure which over time will require additional investment. Due to this needed investment, it is projected that rates will rise regardless if the system remains with the Township or is sold.

The sanitary sewer system and related equipment would be sold to the buyer. Service would continue as usual only under different ownership. No employees would lose their jobs, they will stay with the Township and be reassigned within the public works department. The Township will maintain control of its Act 537 Planning. Rates will be governed by the PUC after the mandatory 3-year rate freeze.

The possible uses of proceeds: Reduce Debt: Pay off outstanding debt related to both sewer and the public works facility; Fund Development of Township Campus: Includes construction of a new police station, renovation of current administration building, and other improvements; Preserve Open Space: Locate and preserve parcels which meet the community's needs through easements or acquisition; Improve/Add to Township Parks and Trails; Implement Roadway Projects to Improve Traffic Flow; Maintain Selected Historical Resources.

Aqua submitted a bid for $55 million with a proposed three year rate freeze. The Board of Supervisors awarded the bid to Aqua in November 2020. Due diligence on the proposed sale continues. If successful, it is expected that settlement will occur around January 2022.

CONTACTING THE TOWNSHIP'S FINANCIAL MANAGEMENT

This financial report is designed to provide a general overview of the Township's finances, comply with finance-related laws and regulations and demonstrate the Township's commitment to accountability. If you have any questions about this report or need additional information, please contact the Finance Department at 209 Conestoga Road, Frazer, PA 19355.

EAST WHITELAND TOWNSHIP

RECONCILIATION OF TOTAL GOVERNMENTAL FUNDS BALANCES
TO NET POSITION OF GOVERNMENTAL ACTIVITIES
DECEMBER 31, 2020

TOTAL GOVERNMENTAL FUNDS BALANCES	$	21,353,645
Capital assets used in governmental activities are not current financial resources and therefore are not reported in the funds. These assets consist of:		
Cost of capital assets		60,383,350
Accumulated depreciation		(44,073,234)
Some liabilities are not due and payable in the current period and therefore are not reported in the funds. Those liabilities consist of:		
Interest payable		(2,733)
Bonds payable		(7,429,243)
Net OPEB liability		(17,615,643)
Net pension liability		(2,968,490)
Compensated absences		(27,677)
Deferred charges used in governmental activities are not financial resources and therefore are not reported in the funds. These assets consist of:		
Deferred amount on refunding, net of amortization		292,138
Deferred inflows and outflows of resources related to pension and OPEB activities are not financial resources and, therefore, are not reported in the governmental funds.		3,862,569
Some of the Township's revenues will be collected after year-end but are not available soon enough to pay for the current period's expenditures and therefore are deferred in the funds.		14,468
NET POSITION OF GOVERNMENTAL ACTIVITIES	$	13,789,150

See accompanying notes to the basic financial statements.

See accompanying notes to the basic financial statements.

EAST WHITELAND TOWNSHIP

RECONCILIATION OF THE GOVERNMENTAL FUNDS STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN FUND BALANCES TO THE STATEMENT OF ACTIVITIES YEAR ENDED DECEMBER 31, 2020

NET CHANGE IN FUND BALANCES - TOTAL GOVERNMENTAL FUNDS	$	3,864,577
Capital outlays are reported in Governmental Funds as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which depreciation ($1,938,160) exceeds capital outlays ($855,436) in the current period.		(1,082,724)
Because some property taxes will not be collected for several months after the Township's fiscal year ends, they are not considered as "available" revenues in the Governmental Funds. Deferred tax revenues increased by this amount this year.		8,708
The issuance of long-term debt (e.g., bonds, leases) provides current financial resources to Governmental Funds, while the repayment of the principal of long-term debt consumes the current financial resources of Governmental Funds. Neither transaction, however, has any effect on net position. Also, Governmental Funds report the effect of issuance costs, premiums, discounts and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items.		
Repayment of bond principal		310,000
Amortization of bond discount and premium		1,801
Amortization of deferred amount on refunding		(15,444)
Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the Governmental Funds.		(1,042,014)
In the statement of activities, compensated absences (vacations and sick leave) are measured by the amounts earned during the year. In the Governmental Funds, however, expenditures for these items are measured by the amount of financial resources used (essentially, the amounts paid).		5,568
Interest on long-term debt in the statement of activities differs from the amount reported in the Governmental Funds because interest is recognized as an expenditure in the funds when it is due and thus requires the use of current financial resources. In the statement of activities, however, interest expense is recognized as the interest accrues, regardless of when it is due.		434
CHANGE IN NET POSITION OF GOVERNMENTAL ACTIVITIES	$	2,050,906

See accompanying notes to the basic financial statements.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Reporting Entity

East Whiteland Township ("the Township") was established in 1765 and is an organized township having the powers, duties, and privileges granted townships by the Commonwealth of Pennsylvania Second Class Township Code, Act of May 1, 1933 (P.L. 103, No. 69), reenacted and amended November 9, 1995 (P.L. 350, No. 60). The Township is governed by a three-member board of supervisors elected for a six-year term by the citizens of the Township. The Board is organized with a chairman and vice-chairman elected annually at the reorganization meeting held on the first Monday of the year.

The township complies with generally accepted accounting principles ("GAAP"). GAAP includes all relevant Governmental Accounting Standards Board ("GASB") pronouncements. The accounting and reporting framework and the more significant accounting policies are discussed in subsequent subsections of this Note.

Financial accountability is defined in GASB Statement No. 14, "The Financial Reporting Entity," as amended by GASB Statement No. 61. The Township is financially accountable for legally separate organizations if it appoints a voting majority of the organization's board and (1) it is able to impose its will on that organization; or (2) there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the Township. The Township also may be financially accountable if an organization is fiscally dependent on the Township regardless of whether the organization has a separately elected governing board, a governing board appointed by a higher level of government, or a jointly appointed board.

Fiduciary Component Units:

The Police Pension Plan is a single employer defined benefit pension plan that provides pensions for all regular, full-time sworn police officers. Although the plan is a separate legal entity it is reported as if it is part of the government as it is governed by a committee comprised of members appointed by the Township Board of Supervisors and the Township is responsible for funding the plan. The plan is reported as a fiduciary fund and issues separate financial statements.

The Non-Uniformed Employees' Pension Plan is a single employer defined benefit pension plan that provides pensions for all regular full-time, non-uniformed employees. Although the plan is a separate legal entity it is reported as if it is part of the government as it is governed by a committee comprised of members appointed by the Township Board of Supervisors and the Township is responsible for funding the plan. The plan is reported as a fiduciary fund and does issues separate financial statements.

The Firefighters Pension Plan is a single employer defined benefit pension plan that provides pensions for all regular full-time, firefighters. Although the plan is a separate legal entity it is reported as if it is part of the government as it is governed by a committee comprised of members appointed by the Township Board of Supervisors and the Township is responsible for funding the plan. The plan is reported as a fiduciary fund and does issues separate financial statements.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The Postemployment Benefits Other Than Pensions Plan is a single-employer defined benefit healthcare plan that provides medical insurance and life insurance benefits to eligible retirees. Although the plan is a separate legal entity it is governed by a committee comprised of members appointed by the Township Board of Supervisors and the Township is responsible for funding the plan. The plan is reported as a fiduciary fund and does not issue separate financial statements.

Government-Wide and Fund Financial Statements

The accompanying financial statements of the Township are in accordance with the provisions of the Governmental Accounting Standards Board (GASB) Statement No. 34, *Basic Financial Statements--and Management's Discussion and Analysis--for State and Local Governments*, as amended by GASB Statement No. 37, *Basic Financial Statements--and Management's Discussion and Analysis--for State and Local Governments--Omnibus*, GASB Statement No. 38, *Certain Financial Statement Note Disclosures*, and GASB Statement No. 41, *Budgetary Comparison Schedules--Perspective Differences.* The requirements of this new reporting model are described below.

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on the activities of the primary government, except for Fiduciary Funds and Agency Funds. For the most part, the effect of interfund activity has been removed from these statements.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

Separate financial statements are provided for Governmental Funds, Proprietary Funds and Fiduciary Funds, even though the latter are excluded from the government-wide financial statements. Major individual Governmental Funds are reported as separate columns (Other Governmental Funds) in the fund financial statements.

Measurement Focus, Basis of Accounting and Basis of Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Governmental Funds financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. For this purpose, the Township considers revenues to be available if they are collected within 60 days of the end of the fiscal period. Under this basis, certain revenues (those susceptible to accrual, readily measurable and available as to amount and anticipated as being readily collectible) are recorded on the accrual basis. Property taxes, earned income taxes, local services taxes and licenses associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. All other revenues are recognized only when received in cash. Expenditures, with the exception of interest requirements on long-term debt, are accounted for on the accrual basis of accounting.

The Township reports the following major governmental funds:

- The *General Fund* is the government's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

- The *Capital Improvement Fund* accounts for the resources to be used for the acquisition, construction, or improvement of major capital assets for general government purposes.

The Township reports the following major Proprietary funds

- The *Sewer Fund* accounts for operations related to the collection of wastewater and the operation of sewage pumping stations. The sewage is transported to a sewer treatment plant not owned by the Township.

Additionally, the Township reports the following Fiduciary Fund Types:

- The *Pension Trust Funds* are used to account for the activities of the Police, Firefighter and Non-Uniformed Pension Plans, which accumulate resources for pension benefit payments to qualified employees.

- The *OPEB Trust Fund* is used to account for the assets held by the Township to pay for postemployment medical benefits.

- The *Custodial Fund* is used to account for monies held by the Township for developer escrow deposits.

Amounts reported as *program revenues* include: (1) charges to customers or applicants for goods, services, or privileges provided, (2) operating grants and contributions and (3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Proprietary Funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a Proprietary Fund's principal ongoing operations. The principal operating revenues of the Sewer Fund are charges to customers for sales and services. Operating expenses for the Township's enterprise funds include sewer disposal, salaries, recycling, supplies, and administrative costs, and depreciation. All revenues or expenses not meeting this definition are reported as nonoperating revenues and expenses.

Stewardship, Compliance and Accountability

Budgets and Budgetary Accounting - The Township follows the procedures outlined below, which comply with legal requirements in establishing the budgetary data reflected in the financial statements:

1. Budgets are legally adopted on an annual basis for most Township funds, which is consistent with generally accepted accounting principles. The operating budget includes proposed expenditures and the means of financing them.

2. Prior to November 15 of the preceding fiscal year, the Township prepares a budget for the next succeeding calendar year beginning January 1. The operating budget includes proposed expenditures and the means of financing them.

3. A meeting of the Board of Supervisors is then called for the purpose of adopting the proposed budget.

4. Prior to December 31, the budget is legally enacted through passage of a resolution by the Board of Supervisors.

5. The budget must be filed with the Pennsylvania Department of Community and Economic Development by January 31.

6. Budgets for the funds are prepared on the modified accrual basis of accounting.

Once a budget is approved, it can be amended at the function and fund level only by approval of majority of the members of the Board of Supervisors. Amendments are presented to the Board at its regular meetings. Each amendment must have the Board's approval. Such amendments are made before the fact, are reflected in the official minutes of the Board, and are not made after fiscal year end as dictated by law.

The budget is controlled by the finance officer at the revenue and expenditures function/object level. Budgeted amounts are as amended by the Board of Supervisors. For 2020, individual amendments were not material in relation to the original appropriations. All budget appropriations lapse at year end.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The General Fund, Capital Improvements Fund, Transportation Improvement Fund, Street Light Fund, Park Development Fund, and State Fund all have legally adopted budgets for the year ended December 31, 2020.

Assets, Liabilities and Equity

Deposits and Investments - The Township's cash and cash equivalents including demand deposits and short-term investments with original maturities of three months or less from the date of acquisition are considered to be cash on hand.

Statutes authorize the Township to invest in: 1) obligations, participations and other instruments of any Federal agency, 2) repurchase agreements with respect to U.S. Treasury bills or obligations, 3) negotiable certificates of deposit, 4) bankers' acceptances, 5) commercial paper, 6) shares of an investment company registered under the Investment Company Act of 1940 whose shares are registered under the Securities Act of 1933, and 7) savings or demand deposits. The specific conditions under which the District may invest in these categories are detailed in Pennsylvania Act No. 53 of 1973, as amended by Pennsylvania Act No. 10 of 2016. Investments are stated at fair value except for certificates of deposit which are stated at amortized cost.

Under Act No. 72, enacted by the General Assembly of the Commonwealth of Pennsylvania, the funds deposited with the various banks are permitted to be secured on a pooled basis with all other public funds which the banking institution has on deposit. These may be bonds of the United States, any state of the United States, or bonds of any political subdivision of Pennsylvania or the general state authority or their authorities created by the General Assembly of the Commonwealth of Pennsylvania, or insured with the Federal Deposit Insurance Corporation. The fair value of such bonds pledged must equal 102% of the funds deposited. The security pledged by the various depositories utilized during the year and at December 31, 2020, was in excess of the minimum requirements just described.

The Township has adopted GASB Statement No. 72, *Fair Value Measurement and application*. In accordance with this Statement, investments in marketable securities with readily determinable fair value and all investments in debt securities are reported at their fair values.

The law provides that the Township's Pension Trust Funds may invest in any form or type of investment, financial instrument, or financial transaction if determined by the Township to be prudent.

Receivables and Payables - Activity between funds that is representative of lending/borrowing arrangements outstanding at the end of the fiscal year is referred to as either "due to/from other funds" (i.e., the current portion of interfund loans) or "advances to/from other funds" (i.e., the noncurrent portion of interfund loans). All other outstanding balances between funds are reported as "due to/from other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances."

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Real Estate Taxes - Real estate taxes are recorded as revenues when the taxes are levied. All property tax receivables are shown net of an allowance for uncollectibles. At December 31, 2020, all tax receivables were deemed to be fully collectible. There is no tax receivable allowance due to the materiality of the outstanding receivables.

Real estate taxes are levied on January 1 on property values assessed as of the same date. Taxes are billed March 1 and are due on June 30 of each year. A 2% discount is provided for taxes paid prior to May 1. A 10% penalty is applied to taxes paid after June 30. Any unpaid bills at December 31 are subject to lien, and penalties and interest are assessed.

Other taxes levied in 2020:

Real estate transfer tax ..... 0.5% of sales price
Earned income tax ..... 0.5% of gross income
Local service tax .....$52 per person

Provision for Estimated Uncollectible Receivables - No provision is considered necessary for other receivables.

Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The Township has three items that qualify for reporting in this category. The deferred charge on refunding results from the difference in carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. Deferred outflows of resources related to pensions is reported in the government-wide statement of net position and the proprietary fund statement of net position and is the result of differences between pension plan expected and actual experience and changes in pension plan assumptions. Deferred outflows of resources related to OPEB is reported in the government-wide statement of net position and the proprietary fund statement of net position and are the result of differences between expected and actual experience, and changes of assumptions.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The Township has three items, which qualify for reporting in this category. Unavailable revenue, which arises only under a modified accrual basis of accounting, is reported only in the Governmental Funds balance sheet. The Governmental Funds report unavailable revenues from property taxes. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available. Deferred inflows of resources related to pensions is reported in the government-wide statement of net position and the proprietary fund statement of net position and is the result of differences between pension plan expected and actual experience and the difference between projected and actual investment earnings. Deferred inflows of resources related to OPEB is reported in the government-wide statement of net position and the proprietary fund statement of net position and is the result of differences between changes of assumptions, and the difference between projected and actual investment earnings.

Capital Assets - Capital assets, which include property, plant, equipment and infrastructure assets (e.g., roads, bridges, sidewalks and similar items) are reported in the applicable governmental or business – type activities columns in the entity-wide financial statements as well as in the proprietary fund financial statements. The township capitalizes assets with an initial, individual cost of more than $5,000 and an estimated useful life in excess of one year. The Township reports infrastructure assets on a network and subsystem basis. Accordingly, the amounts spent for the construction or acquisition of infrastructure assets are capitalized and reported in the entity-wide financial statements regardless of their amount. Such assets are recorded at historical cost if purchased or constructed. In accordance with GASB Statement No. 51, "Accounting and Financial Reporting for Intangible Assets," the Township capitalizes contributions to the Valley Forge Sewer Authority for the purchase of additional sewer treatment capacity.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized.

Major outlays for capital assets and improvements are capitalized as projects are constructed, inclusive of ancillary costs.

Depreciation has been provided over the estimated useful lives of property, plant and equipment using the straight-line method as follows:

	Years
Site improvements	20
Buildings and improvements	20-40
Infrastructure	15-50
Machinery and equipment	3-12
Vehicles	3-12

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Long-Term Obligations - In the government-wide financial statements and the Proprietary Fund Types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or Proprietary Fund Type statement of net position.

In the fund financial statements, Governmental Fund Types reports discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received and discounts paid on debt issuance are reported as other financing sources and uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures, except for refunding's paid from proceeds which are reported as other financing uses.

Net Position Flow Assumption

Sometimes the Township will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide and Proprietary Fund financial statements, a flow assumption should be made about the order in which the resources are considered to be applied. It is the Township's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

In the fund financial statements, Governmental Fund Types recognize bond premiums and discounts, as well as issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt are reported as other financing uses. Issuance costs, even if withheld from the actual net proceeds received, are reported as expenditures.

Net Position - The Township has implemented GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. This statement provides more clearly defined fund balance categories to make the nature and extent of the constraints placed on the Township's fund balances more transparent. The following classifications describe the relative strength of the spending constraints:

- **Nonspendable Fund Balance** - Amounts that are not in spendable form (such as inventory) or are required to be maintained intact.

- **Restricted Fund Balance** - Amounts constrained to specific purposes by their providers (such as grantors, bondholders and higher levels of government) through constitutional provisions or by enabling legislation.

- **Committed Fund Balance** - Amounts constrained to specific purposes by the Township itself, using its highest level of decision-making authority (the Board of Supervisors). To be reported as committed, amounts cannot be used for any other purpose unless the Township takes the same highest level action to remove or change the constraint.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

- **Assigned Fund Balance** - Amounts the Township intends to use for a specific purpose. Intent can be expressed by the Board of Supervisors or by an official or body to which the Board of Supervisors delegates the authority. As of December 31, 2020, the Board has not delegated the authority to assign fund balance.

- **Unassigned Fund Balance** - Amounts available for any purpose. Positive amounts are reported only in the General Fund.

The Board of Supervisors establishes (and modifies or rescinds) fund balance commitments by passage of a motion, which is the most binding action management can take. Assigned fund balance is intended to be used by the Township for specific purposes but does not meet the criteria to be classified as restricted or committed.

The Township will typically use restricted fund balances first, followed by committed resources and then assigned resources, as appropriate opportunities arise, but reserves the right to selectively spend unassigned resources first to defer the use of these other classified funds.

Cash and Cash Equivalents - For purposes of reporting cash flows for the Proprietary Funds, all highly liquid investments with original maturities of three months or less are considered short-term investments.

Compensated Absences - Full-time employees are granted vacation benefits in varying amounts to specified maximums. Certain employees may carry over 40 hours of unused vacation time into the following year or receive compensation for those hours. Certain employees may accumulate up to 480 hours of unused sick time and, depending on years of services, may receive payment for some or all of that time at retirement or resignation. The liability for those compensated absences is recorded as long-term debt in the entity-wide and proprietary fund financial statements. In the fund financial statements, governmental funds report a liability for compensated absences only if they have matured. Historically the General Fund has been responsible for liquidation of compensated absences associated with governmental activities. Compensated absences associated with business-type activities are liquidated from the fund in which the liability was generated.

Prepaid Items - Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements. Prepaid items are accounted for under the consumption method.

Use of Estimates - The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures during the reporting period. Accordingly, actual results could differ from those estimates.

Concentrations of Credit Risk - The Township's revenues and receivables for taxes and utility service are mostly derived from residents and businesses located in the Township and are, therefore, subject to the economic conditions of the area.

NOTE B - DEPOSITS AND INVESTMENTS

Deposits

Custodial Credit Risk - Custodial credit risk is the risk that, in the event of a bank failure, the Township's deposits may not be returned to it. As of December 31, 2020, $986,418 of the total bank balance of $30,826,736 was insured by the Federal Depository Insurance Corporation. The remaining bank balance of $29,840,318 was exposed to credit risk because it was uninsured and collateralized in accordance with Act 72 of the Commonwealth of Pennsylvania Legislature, which permits the institution to pool collateral for all governmental deposits and has the collateral held by a custodian in the institution's name.

Investments

As of December 31, 2020, the Township had the following investments:

Investment Type	Amortized Cost	Fair Value	Total	Investment Maturities Less Than One Year
GOVERNMENTAL ACTIVITIES				
Certificates of deposit	$ 253,451	$ -	$ 253,451	$ 252,052
FIDUCIARY FUNDS				
Domestic equity mutual funds	$ -	$ 14,986,382	$ 14,986,382	$ 14,986,382
International equity mutual funds	-	3,570,923	3,570,923	3,570,923
Fixed income mutual funds	-	5,613,757	5,613,757	5,613,757
Real estate mutual funds	-	433,971	433,971	433,971
TOTAL FIDUCIARY FUNDS	$ -	$ 24,605,033	$ 24,605,033	$ 24,605,033

Fair Value Measurement - The Township categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted market prices in active markets for identical assets: Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The Township has the following recurring fair value measurements as of December 31, 2020:

Investments in domestic equity mutual funds of $14,986,382, international equity mutual funds of $3,570,923, fixed income mutual funds of $5,613,757, and real estate mutual funds of $433,971 are valued using quoted market prices (Level 1 inputs).

Interest Rate Risk - This is the risk that changes in interest rates will adversely affect the fair value of an investment. The Township's investment policy includes a balancing provision to address this type of risk.

NOTE B - DEPOSITS AND INVESTMENTS (Continued)

Credit Risk - This is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. State law limits the investment of government funds as described in Note A. The Township's investment policy does not further limit its investment choices.

Concentration of Credit Risk - This is the risk of loss attributed to the magnitude of a government's investment in a single issuer. There are no investments in any one issuer that is in excess of 5 percent of the government's total investments.

NOTE C - CAPITAL ASSETS

Changes in capital asset activity for the year ended December 31, 2020, were as follows:

	Balance January 1, 2020	Increases	Decreases	Balance December 31, 2020
GOVERNMENTAL ACTIVITIES				
Capital assets not being depreciated

NOTE D - INTERFUND RECEIVABLES, PAYABLES AND TRANSFERS

Interfund receivables and payables at December 31, 2020, are as follows:

	Due from Other Funds	Due to Other Funds
GOVERNMENTAL FUNDS		
General Fund	$ 1,156,991	$ 2,255,922
Capital Improvement Fund	2,106,134	147,636
Street Light Fund	447	2,377
Park Development Fund	149,600	247,817
State Fund	-	326,767
BUSINESS-TYPE ACTIVITIES		
Sewer Fund	188	432,841
	$ 3,413,360	$ 3,413,360

These balances resulted from the time lag between the dates that (1) interfund goods and services are provided or reimbursable expenditures occur, (2) transactions are recorded in the accounting system and (3) payments between funds are made.

Interfund transfers at December 31, 2020, are as follows:

	Transfer Out	Transfer In
GOVERNMENTAL FUNDS		
General Fund	$ 2,106,134	$ 168,345
Capital Improvement Fund	-	2,106,134
BUSINESS-TYPE ACTIVITIES		
Sewer Fund	168,345	-
	$ 2,274,479	$ 2,274,479

Transfers are used to (1) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them and (2) use unrestricted revenues collected in the General Fund to account for saving for future capital projects.

NOTE E - RECEIVABLES

Receivables as of December 31, 2020, are as follows:

	General Fund	Other Governmental Funds	Sewer Fund	Totals
RECEIVABLES				
Accounts	$ 357,694	$ 619	$ 728,725	$ 1,087,038
Taxes	2,512,102	-	-	2,512,102
	$ 2,869,796	$ 619	$ 728,725	$ 3,599,140

NOTE F - LONG-TERM DEBT

Long-term liability for the year ended December 31, 2020, is as follows:

	Balance January 1, 2020	Additions	Reductions	Balance December 31, 2020	Due Within One Year
GOVERNMENTAL ACTIVITIES					
General Obligation Bonds					
Series of 2014	$ 1,640,000	$ -	$ (260,000)	$ 1,380,000	$ 265,000
Series of 2016	6,065,000	-	(50,000)	6,015,000	50,000

TOTAL BUSINESS-TYPE ACTIVITIES LONG-TERM LIABILITIES	$ 17,200,103	$ 300,044	$ (834,697)	$ 16,665,450	$ 757,260

NOTE F - LONG-TERM DEBT (Continued)

Payments on the bonds and loans payable pertaining to the Township's governmental activities are made by the General Fund. Payments of compensated absences pertaining to the Township's governmental activities are made by the General Fund.

Governmental Activities Debt

General Obligation Series of 2014 - General Obligation Bonds, Series of 2014 were issued in the original amount of $8,040,000. Interest rates range from 1.0% to 4.0% with interest payable semi-annually and principal payable annually from June 2015 through December 2039. These bonds were issued to finance the new Public Works building and additional park developments.

General Obligation Series of 2016 - General Obligation Bonds, Series of 2016 were issued in the original amount of $6,160,000. Interest rates range from 2.0% to 3.0% with interest payable semi-annually and principal payable annually from June 2017 through December 2039. These bonds were issued to advance refund a portion of the General Obligation Bonds, Series of 2014 and to pay the cost of the bond issuance. The refunding resulted in an economic gain of $297,663 and a decrease in future cash flows of $307,026.

Business-Type Activities Debt

General Obligation Bonds, Series of 2012A - General Obligation Bonds, Series of 2012A, were issued in the original amount of $4,685,000. Interest rates range from 0.9% to 3.0% with interest payable semi-annually and principal payable annually from September 2013 through September 2020. These bonds were issued to redeem and prepay 1999 Bonds to reduce costs.

General Obligation Bonds, Series of 2012B - General Obligation Bonds, Series of 2012B, were issued in the original amount of $4,130,000. Interest rates range from 1.0% to 3.0% with interest payable semi-annually and principal payable annually from September 2020 through September 2025. These bonds were issued to redeem and prepay 2005 bonds to reduce costs.

General Obligation Bonds, Series of 2013A - General Obligation Bonds, Series of 2013A, were issued in the original amount of $12,145,000. Interest rates range from 2.0% to 3.6% with interest payable semi-annually from September 2013 through September 2038. These bonds were issued to finance sewer expansions and upgrades.

NOTE F - LONG-TERM DEBT (Continued)

Total Scheduled Annual Debt Service

The Township's total scheduled annual debt service on all long-term debt is as follows:

Year Ending December 31,	Governmental Activities Principal	Governmental Activities Interest
2021	$ 315,000	$ 193,930
2022	320,000	187,630
2023	325,000	180,690
2024	330,000	173,090
2025	345,000	164,950
2026 to 2030	1,820,000	706,450
2031 to 2035	2,060,000	468,900
2036 to 2039	1,880,000	143,100
	$ 7,395,000	$ 2,218,740

Year Ending December 31,	Business-Type Activities Principal	Business-Type Activities Interest
2021	$ 755,000	$ 497,782
2022	765,000	480,920
2023	790,000	461,996
2024	805,000	441,420
2025	830,000	417,570
2026 to 2030	3,905,000	1,741,282
2031 to 2035	4,585,000	1,061,012
2036 to 2038	3,155,000	231,455
	$ 15,590,000	$ 5,333,437

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN)

Police Pension Plan

Summary of Significant Accounting Policies - Police Pension Plan investments are carried at fair value as reported by the investment managers. Short-term investments are reported at cost, which approximates fair value. Financial information of the Township's Police Pension Plan is presented on the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due. Employer contributions to each plan are recognized when due as required by the Act. For the purpose of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position have been determined on the same basis as they are reported by the pension plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with benefit terms.

Plan Description

Plan Administration - The Township administers the Police Pension Plan--a single-employer defined benefit pension plan that provides pensions for all regular, full-time police officers. The plan is part of the Township's financial reporting entity and is included in the Township's financial statements as a Pension Trust Fund. The plan does not issue separate, stand-alone financial statements.

The plan is governed by the Township Board of Supervisors which is responsible for the management of plan assets. The Township Board of Supervisors has appointed the Pension Board as the official body to which all related investment matters of the plan are delegated. The Pension Board consists of five members, which may consist of elected officials, management, and/or members of the plan. The Township Board of Supervisors has delegated the authority to manage certain plan assets to TCG Investment Advisory, Inc., with Broadridge Matrix Trust Company as custodian.

Plan Membership - At December 31, 2020, plan membership consisted of the following:

Inactive plan members or beneficiaries currently receiving benefits	13
Inactive plan members entitled to but not yet receiving benefits	-
Active plan members	22
	35

Benefits Provided - The Police Pension Plan provides retirement benefits as well as death and disability benefits under Pennsylvania Act 600.

Eligibility Requirements:

Normal Retirement - Age 50 and 25 years of service.

Early Retirement - 20 or more years of service.

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN) (Continued)

Vesting - None for the first 12 years of service; thereafter, 100%. If a member dies before the pension becomes vested, the surviving spouse or minor children shall receive repayment of the member's contributions, if any, plus interest.

Retirement Benefit:

The monthly pension shall be 50% of the average monthly salary over the participant's last 36 months of employment, plus an incremental pension of $25 per month for each completed year of service in excess of twenty-five years up to a maximum of $100 per month. The early retirement pension shall be the actuarial equivalent of a partial superannuation retirement benefit.

Survivor Benefit:

A pension benefit shall be automatically provided to a retired officer's spouse or to the spouse of an officer eligible to retire, equal to no less than 50% of the eligible pension. If no spouse, or if spouse subsequently dies, the benefit shall apply to children under age 18, or if attending college, under or attaining age 23.

Disability Benefit:

Service-Related - The monthly disability pension benefit shall be calculated at no less than 50% of the member's salary at the time the disability was incurred. Said pension shall be reduced by any benefits received for the same injuries under the Social Security Act.

Nonservice-Related - None.

Post-Retirement Adjustments:

A cost of living adjustment may be provided to retired officers. Annual adjustment not to exceed the increase in the Consumer Price Index from year to year with a 3% maximum annual increase. Total adjustments not to exceed 30% of the retiree's original pension.

The benefit provisions of the Township's Police Pension Plan are established by Township ordinances.

Contributions - Pennsylvania Act 205 of 1984 (as amended) requires that annual contributions be based upon the minimum municipal obligation (MMO), which is based on the plan's actuarial valuation. The MMO includes the normal cost, estimated administrative expenses and an amortization contribution of the unfunded actuarial accrued liability, less estimated member contributions, and a credit equal to 10% of the excess (if any) of the actuarial value of assets over the actuarial accrued liability. The Commonwealth provides an allocation of funds, which must be used for pension funding. A financial requirement established by the MMO, which exceeds state and member contributions, must be funded by the employer.

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN) (Continued)

As a condition of participation, participants are required to make contributions to the plan. Covered employees are required by statute to contribute 5% of their compensation to the plan. The Township is required by statute, principally Pennsylvania Act 205, to contribute the remaining amounts necessary to finance the plan.

In 2020, the MMO obligation for the Police Pension Plan was $535,400. For the year 2020, contributions of $535,400 were made by the Township.

Administrative costs, which may include, but are not limited to, investment management fees and actuarial services, are charged to the appropriate plan and funded through the MMO and/or plan earnings. On-behalf payments of fringe benefits and salaries for the Township's employees were recognized as revenues and expenditures during the year.

Investments

Investment Policy - The Pension Board, with the assistance of TCG Investment Advisory, Inc., shall select the appropriate asset weighting percentage to be allocated to each specific asset class. Each asset class shall consist of a combination of investment options that have been made available to obtain the absolute investment objective of the fund. Investments shall be diversified with the intent to minimize the risk of large investment losses. Consequently, the total portfolio will be constructed and maintained to provide prudent diversification with regard to the concentration of holdings in investment funds specializing in individual issues, issuers, countries, governments or industries. The following was the Board's adopted asset allocation policy as of December 31, 2020:

Asset Class	Target Allocation
Domestic equity	50%
International equity	8%
Fixed income	35%
Real estate	5%
Cash	2%
	100%

Concentrations - There are no investments in any one issuer that is in excess of 5 percent of the total investments.

Rate of Return - For the year ended December 31, 2020, the annual money-weighted rate of return on plan investments, net of plan investment expense, was 14.09%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN) (Continued)

Net Pension Liability of the Township - The components of the net pension liability of the Township at December 31, 2020, were as follows:

Total pension liability	$ 14,703,891
Plan fiduciary net position	(12,682,236)
NET PENSION LIABILITY	$ 2,021,655
Plan fiduciary net position as a percentage of the total pension liability	86.25%

Actuarial Assumptions - The total pension liability was determined by an actuarial valuation as of January 1, 2019, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3%
Salary increases	5% annual increase
Investment rate of return	7.5%

Mortality rates were based on the PubS-2010 mortality table, including rates for disabled retirees and contingent survivors. Incorporated into the table are rates projected generationally using Scale MP-2018 to reflect mortality improvement.

Due to the size of the plan, there have been no experience studies used to determine plan assumptions.

The long-term expected rate of return on plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the plan's target asset allocation as of December 31, 2020 (see the plan's investment policy) are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic equity	5.50% - 7.50%
International equity	4.50% - 6.50%
Fixed income	1.00% - 3.00%
Real estate	4.50% - 6.50%
Cash	0.00% - 1.00%

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN) (Continued)

Discount Rate - The discount rate is based on the long-term expected rate of return on plan investments that are expected to be used to finance the payments of benefits. The plan's fiduciary net position is projected to be sufficient to make projected benefit payments and the plan assets are expected to be invested using a strategy to achieve that return. The employer has always met the funding requirements of Pennsylvania law Act 205 of 1984. Act 205 requires full funding of the entry age normal cost plus plan expenses, as well as amortization of the unfunded liability to ultimately achieve a 100% funded status.

Changes in the Net Pension Liability

	Governmental Activities		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a)-(b)
Balances at December 31, 2019	$ 13,765,847	$ 10,943,594	$ 2,822,253
Changes for the year			
Service cost	358,285	-	358,285
Interest cost	1,053,344	-	1,053,344
Changes for experience	-	-	-
Changes of assumptions	-	-	-
Contributions			
Employer	-	535,400	(535,400)
Member	-	137,161	(137,161)
Net investment income	-	1,544,906	(1,544,906)
Benefit payments	(473,585)	(473,585)	-
Administrative expenses	-	(5,240)	5,240
Net changes	938,044	1,738,642	(800,598)
Balances at December 31, 2020	$ 14,703,891	$ 12,682,236	$ 2,021,655

Sensitivity of the Net Pension Liability to Changes in the Discount Rate - The following presents the net pension liability of the Township, calculated using the discount rate of 7.5%, as well as what the Township's net pension would be if it were calculated using a discount rate that is one percentage point lower (6.5%) or one percentage point higher (8.5%) than the current rate:

	1% Decrease (6.5%)	Current Discount Rate (7.5%)	1% Increase (8.5%)
Net pension liability	$ 3,709,651	$ 2,021,655	$ 607,374

NOTE G - DEFINED BENEFIT PENSION PLAN (POLICE PENSION PLAN) (Continued)

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions - For the year ended December 31, 2020, the Township recognized pension expense of $388,759 for this pension plan, and $704,835 for all pension plans. At December 31, 2020, the Township reported deferred outflows of resources and deferred inflows of resources related to the Police Pension Plan from the following sources:

	Governmental Activities	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 28,075	$ 115,581
Changes of assumptions	814,724	-
Net difference between projected and actual earnings on pension plan investments	-	836,688
Total	$ 842,799	$ 952,269

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ending December 31,	
2021	$ (72,140)
2022	86,611
2023	(296,404)
2024	(38,094)
2025	222,168
Thereafter	(11,611)

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN)

Non-Uniformed Pension Plan

Summary of Significant Accounting Policies - Non-Uniformed Pension Plan investments are carried at fair value as reported by the investment managers. Short-term investments are reported at cost, which approximates fair value. Financial information of the Township's Non-Uniformed Pension Plan is presented on the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due. Employer contributions to each plan are recognized when due as required by the Act. For the purpose of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position have been determined on the same basis as they are reported by the pension plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with benefit terms.

Plan Description

Plan Administration - The Township administers the Non-Uniformed Pension Plan--a single-employer defined benefit pension plan that provides pensions for all regular, full-time non-uniformed employees. The plan is part of the Township's financial reporting entity and is included in the Township's financial statements as a Pension Trust Fund. The plan does not issue separate, stand-alone financial statements.

The plan is governed by the Township Board of Supervisors which is responsible for the management of plan assets. The Township Board of Supervisors has appointed a pension committee as the official body to which all related investment matters of the plan are delegated. The pension committee consists of five members, which may consist of elected officials, management, and/or members of the plan. The Township Board of Supervisors has delegated the authority to manage certain plan assets to TCG Investment Advisory, Inc., with Broadridge Matrix Trust Company as custodian.

Plan Membership - At December 31, 2020, plan membership consisted of the following:

Inactive plan members or beneficiaries currently receiving benefits	23
Inactive plan members entitled to but not yet receiving benefits	3
Active plan members	14
	40

Benefits Provided - The Non-Uniformed Pension Plan provides retirement and other benefits.

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN) (Continued)

Eligibility Requirements:

Normal Retirement - For participants represented by a collective bargaining unit and hired prior to January 1, 2006, the normal retirement date is age 64 and 10 years of service. For participants not represented by a collective bargaining agreement and hired prior to January 1, 2006, the normal retirement date is age 63 and 10 years of service. For participants hired on or after January 1, 2006, the normal retirement date is age 64 and 10 years of service.

Early Retirement - Age 55 and 10 years of service.

Vesting - For participants hired on or after January 1, 2006 - none for the first 10 years of service; thereafter, 100%. For participants hired prior to January 1, 2006 - 50% after 5 full years of service; thereafter, 10% per year until 100% vested after 10 years. If a member dies before the pension becomes vested, the surviving spouse or minor children shall receive repayment of the member's contributions, if any, plus interest.

Retirement Benefit:

For participants hired on or after January 1, 2006, the monthly pension shall be 2.00% for each year of service times the average monthly compensation over the participants last 60 months of employment. For participants hired prior to January 1, 2006, the monthly pension shall be 50% of the final average monthly compensation over the participant's last 36 months of employment. The early retirement pension shall be a partial superannuation retirement benefit determined by a table in the governing resolution.

Disability Benefit:

Service-Related - The accrued retirement benefit determined at the date of disability. The disability benefit shall commence at the normal retirement date.

The benefit provisions of the Township's Non-Uniformed Pension Plan are established by Township ordinances.

Contributions - Pennsylvania Act 205 of 1984 (as amended) requires that annual contributions be based upon the minimum municipal obligation (MMO), which is based on the plan's actuarial valuation. The MMO includes the normal cost, estimated administrative expenses and an amortization contribution of the unfunded actuarial accrued liability, less estimated member contributions, and a credit equal to 10% of the excess (if any) of the actuarial value of assets over the actuarial accrued liability. The Commonwealth provides an allocation of funds, which must be used for pension funding. A financial requirement established by the MMO, which exceeds state and member contributions, must be funded by the employer.

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN) (Continued)

Covered employees are required to contribute 5% of their compensation to the plan. The Township is required by statute, principally Pennsylvania Act 205, to contribute the remaining amounts necessary to finance the plan. Contribution provisions are established by Pennsylvania law and may be amended only as allowed by Pennsylvania law.

In 2020, the MMO obligation for the Non-Uniformed Pension Plan was $392,050. For the year 2020, contributions of $392,050 were made by the Township.

Administrative costs, which may include, but are not limited to, investment management fees and actuarial services, are charged to the appropriate plan and funded through the MMO and/or plan earnings. On-behalf payments of fringe benefits and salaries for the Township's employees were recognized as revenues and expenditures during the year.

Investments

Investment Policy - The Pension Board, with the assistance of TCG Investment Advisory, Inc., shall select the appropriate asset weighting percentage to be allocated to each specific asset class. Each asset class shall consist of a combination of investment options that have been made available to obtain the absolute investment objective of the fund. Investments shall be diversified with the intent to minimize the risk of large investment losses. Consequently, the total portfolio will be constructed and maintained to provide prudent diversification with regard to the concentration of holdings in investment funds specializing in individual issues, issuers, countries, governments or industries.

The following was the Committee's adopted asset allocation policy as of December 31, 2020:

Asset Class	Target Allocation
Domestic equity	61%
International equity	9%
Fixed income	23%
Real estate	4%
Cash	3%
	100%

Concentrations - There are no investments in any one issuer that is in excess of 5 percent of the total investments.

Rate of Return - For the year ended December 31, 2020, the annual money-weighted rate of return on plan investments, net of plan investment expense, was 13.92%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN) (Continued)

Net Pension Liability of the Township - The components of the net pension liability of the Township at December 31, 2020, were as follows:

Total pension liability	$ 8,485,689
Plan fiduciary net position	(7,994,036)
NET PENSION LIABILITY	$ 491,653
Plan fiduciary net position as a percentage of the total pension liability	94.21%

Actuarial Assumptions - The total pension liability was determined by an actuarial valuation as of January 1, 2019, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3%
Salary increases	4.5% annual increase
Investment rate of return	7.5%

Mortality rates were based on the PubS-2010 mortality table, including rates for disabled retirees and contingent survivors. Incorporated into the table are rates projected generationally using Scale MP-2018 to reflect mortality improvement.

Due to the size of the plan, there have been no experience studies used to determine plan assumptions.

The long-term expected rate of return on plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the plan's target asset allocation as of December 31, 2020 (see the plan's investment policy) are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic equity	5.50% - 7.50%
International equity	4.50% - 6.50%
Fixed income	1.00% - 3.00%
Real estate	4.50% - 6.50%
Cash	0.00% - 1.00%

NOTE H - DEFINED BENEFIT PENSION PLAN (NON-UNIFORMED PENSION PLAN) (Continued)

Discount Rate - The discount rate is based on the long-term expected rate of return on plan investments that expected to be used to finance the payments of benefits. The plan's fiduciary net position is projected to be sufficient to make projected benefit payments and the plan assets are expected to be invested using a strategy to achieve that return. The employer has always met the funding requirements of Pennsylvania law Act 205 of 1984. Act 205 requires full funding of the entry age normal cost plus plan expenses, as well as amortization of the unfunded liability to ultimately achieve a 100% funded status.

Changes in the Net Pension Liability

	Governmental Activities		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a)-(b)
Balances at December 31, 2019	$ 6,815,902	$ 5,878,263	$ 937,638
Changes for the year			
Service cost	144,215	-	144,215

2024	(53,928)	(11,046)
2025	-	-

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN)

Firefighter Pension Plan

Summary of Significant Accounting Policies - The Pension Plan investments are carried at fair value as reported by the investment managers. Short-term investments are reported at cost, which approximates fair value. Financial information of the Township's Firefighter Pension Plan is presented on the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due. Employer contributions to each plan are recognized when due as required by the Act. For the purpose of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position have been determined on the same basis as they are reported by the pension plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with benefit terms.

Plan Description

Plan Administration - The Township administers the Firefighter Pension Plan--a single-employer defined benefit pension plan that provides pensions for all regular, full-time firefighter employees. The plan is part of the Township's financial reporting entity and is included in the Township's financial statements as a Pension Trust Fund. The plan does not issue separate, stand-alone financial statements.

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

The plan is governed by the Township Board of Supervisors which is responsible for the management of plan assets. The Township Board of Supervisors has appointed a pension committee as the official body to which all related investment matters of the plan are delegated. The pension committee consists of five members, which may consist of elected officials, management, and/or members of the plan. The Township Board of Supervisors has delegated the authority to manage certain plan assets to TCG Investment Advisory, Inc., with Broadridge Matrix Trust Company as custodian.

Plan Membership - At December 31, 2020, plan membership consisted of the following:

Inactive plan members or beneficiaries currently receiving benefits	2
Inactive plan members entitled to but not yet receiving benefits	1
Active plan members	8
	11

Benefits Provided - The Firefighter Pension Plan provides retirement and other benefits.

Eligibility Requirements:

Normal Retirement - Age 50 and 25 years of service.

Early Retirement - 20 or more years of service, actuarially reduced to reflect early commencement of benefits.

Vesting - None for the first 10 years of service; thereafter, 100%. If a member dies before the pension becomes vested, the surviving spouse or minor children shall receive repayment of the member's contributions, if any, plus interest.

Retirement Benefit:

Service-Related - The accrued retirement benefit determined at the date of disability. The disability benefit shall commence when the participant has been declared totally and permanently disabled.

Nonservice-Related - None

The benefit provisions of the Township's Firefighter Pension Plan are established by Township ordinances.

Contributions - Pennsylvania Act 205 of 1984 (as amended) requires that annual contributions be based upon the minimum municipal obligation (MMO), which is based on the plan's actuarial valuation. The MMO includes the normal cost, estimated administrative expenses and an amortization contribution of the unfunded actuarial accrued liability, less estimated member contributions, and a credit equal to 10% of the excess (if any) of the actuarial value of assets over the actuarial accrued liability. The Commonwealth provides an allocation of funds, which must be used for pension funding. A financial requirement established by the MMO, which exceeds state and member contributions, must be funded by the employer.

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

Covered employees are required to contribute 5% of their compensation to the plan. The Township is required by statute, principally Pennsylvania Act 205, to contribute the remaining amounts necessary to finance the plan. Contribution provisions are established by Pennsylvania law and may be amended only as allowed by Pennsylvania law.

In 2020, the MMO obligation for the Firefighter Pension Plan was $174,500. For the year 2020, contributions of $174,500 were made by the Township.

Administrative costs, which may include, but are not limited to, investment management fees and actuarial services, are charged to the appropriate plan and funded through the MMO and/or plan earnings. On-behalf payments of fringe benefits and salaries for the Township's employees were recognized as revenues and expenditures during the year.

Investments

Investment Policy - The Pension Board, with the assistance of TCG Investment Advisory, Inc., shall select the appropriate asset weighting percentage to be allocated to each specific asset class. Each asset class shall consist of a combination of investment options that have been made available to obtain the absolute investment objective of the fund. Investments shall be diversified with the intent to minimize the risk of large investment losses. Consequently, the total portfolio will be constructed and maintained to provide prudent diversification with regard to the concentration of holdings in investment funds specializing in individual issues, issuers, countries, governments or industries.

The following was the Committee's adopted asset allocation policy as of December 31, 2020:

Asset Class	Target Allocation
Domestic equity	59%
International equity	11%
Fixed income	23%
Real estate	4%
Cash	3%
	100%

Concentrations - There are no investments in any one issuer that is in excess of 5 percent of the total investments.

Rate of Return - For the year ended December 31, 2020, the annual money-weighted rate of return on plan investments, net of plan investment expense, was 14.53%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

Net Pension Liability of the Township - The components of the net pension liability of the Township at December 31, 2020, were as follows:

Total pension liability	$ 3,595,481
Plan fiduciary net position	(3,056,717)
NET PENSION LIABILITY	$ 538,764
Plan fiduciary net position as a percentage of the total pension liability	85.02%

Actuarial Assumptions - The total pension liability was determined by an actuarial valuation as of January 1, 2019, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3%
Salary increases	4.5% annual increase
Investment rate of return	7.5%

Mortality rates were based on the PubS-2010 mortality table, including rates for disabled retirees and contingent survivors. Incorporated into the table are rates projected generationally using Scale MP-2018 to reflect mortality improvement.

Due to the size of the plan, there have been no experience studies used to determine plan assumptions.

The long-term expected rate of return on plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the plan's target asset allocation as of December 31, 2020 (see the plan's investment policy) are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic equity	5.50% - 7.50%
International equity	4.50% - 6.50%
Fixed income	1.00% - 3.00%
Real estate	4.50% - 6.50%
Cash	0.00% - 1.00%

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

Discount Rate - The discount rate is based on the long-term expected rate of return on plan investments that expected to be used to finance the payments of benefits. The plan's fiduciary net position is projected to be sufficient to make projected benefit payments and the plan assets are expected to be invested using a strategy to achieve that return. The employer has always met the funding requirements of Pennsylvania law Act 205 of 1984. Act 205 requires full funding of the entry age normal cost plus plan expenses, as well as amortization of the unfunded liability to ultimately achieve a 100% funded status.

Changes in the Net Pension Liability

	Governmental Activities		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (a)-(b)
Balances at December 31, 2019	$ 3,272,205	$ 2,513,081	$ 759,124

Sensitivity of the Net Pension Liability to Changes in the Discount Rate - The following presents the net pension liability of the Township, calculated using the discount rate of 7.5%, as well as what the Township's net pension would be if it were calculated using a discount rate that is one percentage point lower (6.5%) or one percentage point higher (8.5%) than the current rate:

	1% Decrease (6.5%)	Current Discount Rate (7.5%)	1% Increase (8.5%)
Net pension liability	$ 1,011,402	$ 538,764	$ 145,120

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions - For the year ended December 31, 2020, the Township recognized pension expense of $126,244 for this pension plan, and $704,835 for all pension plans. At December 31, 2020, the Township reported deferred outflows of resources and deferred inflows of resources related to the Firefighter Pension Plan from the following sources:

	Governmental Activities	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 206,623	$ -
Changes in assumptions	154,470	-
Net difference between projected and actual earnings on pension plan investments	-	216,661
Total	$ 361,093	$ 216,661

NOTE I - DEFINED BENEFIT PENSION PLAN (FIREFIGHTER PENSION PLAN) (Continued)

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year Ending December 31,	
2021	$ (6,964)
2022	19,368
2023	(41,938)
2024	14,513
2025	50,410
Thereafter	109,043

NOTE J - NON-UNIFORM EMPLOYEE DEFINED CONTRIBUTION PENSION PLAN

Plan Description

The Township has established the East Whiteland Township Non-Uniform Employee Defined Contribution Pension Plan (the "Plan"), which provides pension benefits for its full-time, non-union, non-uniform employees as defined in the plan, and who were hired on or after January 1, 2017. There is a six month period of service required in order to participate. The Plan is a single-employer defined contribution money purchase pension plan under Section 401 (a) of the Internal Revenue Code. In a defined contribution plan, the benefits to be received by an employee depend solely on the amount contributed to the participant's account and related returns on investments of those contributions. ICMA Retirement Corporation serves as the third-party administrator for the Plan, maintaining records of individual account balances and administering receipt and payment of funds. All funds contributed by the employees and employer are invested with the funds offered through ICMA-RC. The Plan does not issue separate, stand-alone financial statements.

NOTE J - NON-UNIFORM EMPLOYEE DEFINED CONTRIBUTION PENSION PLAN (Continued)

Funding Policy

Each eligible employee covered under the Plan must make an irrevocable election to contribute 2%, 3% or 4% of gross wages. The Township contributes 4%, 6% or 8% of each participating employee's gross wages to the Plan, respectively, depending on the employee's contribution percentage. For example, if the employee elects a 2% contribution, the Township will contribute 4%; if the employee elects a 3% contribution, the Township will contribute 6%. The Township's contributions for employees and earnings allocated to their accounts vest based on period of service completed, as follows:

Period of Service Completed	% Vested
Zero	0%
One	20%
Two	40%
Three	60%
Four	80%
Five	100%

Retirement benefits may be obtained at age 65. The Township made contributions of $45,805, of which $0 was funded by state-shared revenues and $45,805 was funded by the Township. Employee contributions to the Plan were $22,903.

At December 31, 2020, there were no investments in any one organization that represented 5% or more of total plan assets available for benefits other than mutual funds, which do not require disclosure of concentration per GASB Statement No. 40.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB)

Summary of Significant Accounting Policies - The OPEB Plan investments are carried at fair value as reported by the investment managers. Short-term investments are reported at cost, which approximates fair value. Financial information of the Township's OPEB Plan is presented on the accrual basis of accounting. Employer contributions to each plan are recognized when due.

Plan Description

Plan Administration - The Township's post-employment healthcare plan is a single-employer defined benefit healthcare plan. The plan provides medical insurance and life insurance benefits to eligible retirees. Spouses and other dependents are not covered under the plan. The Board of Supervisors assigns the authority to establish and amend benefit provisions. The plan does not issue separate, stand-alone financial statements. The plan is part of the Township's financial reporting entity and is included in the Township's financial statements as a Trust Fund. The plan does not issue separate, stand-alone financial statements.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

The plan is governed by the Township Board of Supervisors which is responsible for the management of plan assets. The Township Board of Supervisors has appointed a pension committee as the official body to which all related investment matters of the plan are delegated. The pension committee consists of five members, which may consist of elected officials, management, and/or members of the plan. The Township Board of Supervisors has delegated the authority to manage certain plan assets to TCG Investment Advisory, Inc., with Broadridge Matrix Trust Company as custodian.

Plan Membership - At December 31, 2020, plan membership consisted of the following:

Inactive plan members or beneficiaries currently receiving benefits	21
Inactive plan members entitled to but not yet receiving benefits	3
Active plan members	54
	78

Benefits Provided

Eligibility Requirements:

Police Officers - Medical and life insurance benefits are payable for members who retire after attaining age 50 with 20 years of service. However, receipt of benefits are deferred to the date on which the officer qualifies for normal retirement had the officer remained in service (25 years of service).

Firefighters - Firefighters hired prior to December 31, 2011 or Part-time Firefighters hired prior to December 31, 2011 and subsequently promoted to full-time status, medical benefits are payable for members who retire after attaining age 50 with 20 years of service.

Non-Uniformed Employees - Medical benefits are payable for members who retire after attaining age 55 with 20 years of service.

Medical Benefits Payable upon Retirement:

Police Officers - Eligible retirees may participate in the employer's group medical plan, while under age 65 which includes basic medical, prescription drug, dental and vision coverage. At ages 65 and older, member remains in the same group medical. However, Medicare will pay primary. In addition, officers retiring after January 1, 1999 are required to enroll in Medicare Part B coverage and the Township reimburses the retiree for coverage. Officers retiring after December 31, 2013 are required to enroll in Medicare Part D coverage and the Township shall reimburse the retiree for coverage. In addition to the aforementioned benefits, officers hired prior to September 24, 2019 who retire after September 24, 2019 will receive a $700 annual HRA contribution. These officers receive the same health benefits as active officers and are subject to any changes to the active plan made by agreement or an arbitration award. For officers hired after September 24, 2019, post-retirement medical benefits and the $700 annual HRA contribution cease when the officer becomes eligible for Medicare.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

Firefighters - Eligible retirees may participate in the employer's group medical plan, while under age 65 which includes basic medical, prescription drug, dental and vision coverage. At age 65, the member is no longer eligible to receive coverage.

Non-Uniformed Employees - Eligible retirees may participate in the employer's group medical plan, while under age 65 which includes basic medical, prescription drug, dental and vision coverage. At ages 65 and older, member remains in the same group medical. However, Medicare will pay primary. In addition, all retirees shall be required to enroll in Medicare Part B and Part D coverage and the Township reimburses the retiree for Medicare Part B and Part D coverage.

Union - Eligible employees that retire by December 31, 2022 may participate in the employer's group medical plan while under age 65, which includes basic medical, prescription drug, dental and vision coverage. At ages 65 and older, member remains in the same group medical. However, Medicare will pay primary. In addition, all retirees shall be required to enroll in Medicare Part B and Medical Part D coverage and the Township reimburses the retiree for coverage. However, for eligible employees who have 10 years of service as of December 31, 2022, if the healthcare plan designs change for active employees, retiree coverage will change as well. In addition, any employee hired on or after January 1, 2019 or an employee who does not have 10 years of service as of December 31, 2022 and who has at least twenty (20) years of service with the Township shall be provided post-retirement medical benefits including prescription for the retiree only until the retiree reaches age 65, becomes eligible for Medicare, or the retiree dies, whichever occurs first. If the healthcare plan designs change for active employees, retiree coverage will change as well. These retirees shall be required to enroll in Medicare Part B and Medical Part D coverage and will not be reimbursed for the Part B and Part D monthly premiums.

Disability Benefits:

Disabled Officers are eligible to continue receiving coverage for life if their disability is service related.

Life Insurance Benefits Payable upon Retirement:

Eligible retired police officers who retire while in the employ of the Township after 20 years of service are provided a life insurance benefit equal to $20,000 until age 65. At ages 65 and older, the Township provides a life insurance benefit of $10,000.

Dependents:

Spouses and other dependents are not covered under the Plan.

The benefit provisions of the Township's OPEB Plan are established by Township ordinances.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

Funding Policy

Member contributions are not required under the plan. The contribution requirements of plan members are established and may be amended by the Board of Supervisors. The Township is accounting for these expenditures on a "pay-as-you-go" basis. The costs of administering the plans are paid by the Township.

Investments

Investment Policy - The Pension Board, with the assistance of TCG Investment Advisory, Inc., shall select the appropriate asset weighting percentage to be allocated to each specific asset class. Each asset class shall consist of a combination of investment options that have been made available to obtain the absolute investment objective of the fund. Investments shall be diversified with the intent to minimize the risk of large investment losses. Consequently, the total portfolio will be constructed and maintained to provide prudent diversification with regard to the concentration of holdings in investment funds specializing in individual issues, issuers, countries, governments or industries. The following was the Committee's adopted asset allocation policy as of December 31, 2020:

Asset Class	Target Allocation
Domestic equity	34%
International equity	10%
Fixed income	50%
Real estate	3%
Cash	3%
	100%

Concentrations - There are no investments in any one issuer that is in excess of 5 percent of the total investments.

Rate of Return - For the year ended December 31, 2020, the annual money-weighted rate of return on plan investments, net of plan investment expense, was 15.52%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

Net OPEB Liability of the Township - The components of the net OPEB liability of the Township at December 31, 2020, were as follows:

Total OPEB liability	$ 20,675,789
Plan fiduciary net position	(1,843,347)
NET OPEB LIABILITY	$ 18,832,442
Plan fiduciary net position as a percentage of the total OPEB liability	8.92%

Actuarial Assumptions - The total OPEB liability was determined by an actuarial valuation as of January 1, 2019, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3%
Salary increases	4.5-5.0% annual increase
Investment rate of return	2.44%

The healthcare cost trend rate is 5.5% in 2020 through 2023. Rates gradually decrease from 5.4% in 2024 to 4.0% in 2075 and later based on the Society of Actuaries Long-Run Medical Cost Trend Model.

Mortality rates were based on the PubS-2010 mortality table for Police and Fire and the PubG-2010 mortality table for Non-Uniformed employees.

Due to the size of the plan, there have been no experience studies used to determine plan assumptions.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

The long-term expected rate of return on plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best estimates of arithmetic real rates of return for each major asset class included in the plan's target asset allocation as of December 31, 2020 (see the plan's investment policy) are summarized in the following table:

Asset Class	Long-Term Expected Real Rate of Return
Domestic equity	5.50%-7.50%
International equity	4.50%-6.50%
Fixed income	1.00%-3.00%
Real estate	4.50%-6.50%
Cash	0.00%-1.00%

Discount Rate - The discount rate used to measure the total OPEB liability was 2.44%. The plan's fiduciary net position is not projected to be sufficient to make projected benefit payments. As a result, the discount rate is based on the long-term expected rate of return on OPEB plan investments of 7.0% and the municipal bond rate of 1.93% based on the S&P Municipal Bond 20 Year High Grade Rate Index as of December 31, 2020.

Changes in Assumptions - In the 2020 actuarial valuation, the discount rate changed from 3.98% to 2.44%. The trend assumption was updated. The mortality table was changed from the IRS 2017 Small Plan Combined Static Mortality table to the PubS-2010 mortality table for Police and Fire and the PubG-2010 mortality table for Non-Uniformed employees.

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

Balances at December 31, 2020	$ 1,335,901	$ 119,102	$ 1,216,799

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

Sensitivity of the Net OPEB Liability to Changes in the Discount Rate - The following presents the net OPEB liability of the Township, calculated using the discount rate of 2.44%, as well as what the Township's net OPEB liability would be if it were calculated using a discount rate that is one percentage point lower (1.44%) or one percentage point higher (3.44%) than the current rate:

	1% Decrease (1.44%)	Current Discount Rate (2.44%)	1% Increase (3.44%)
Net OPEB liability	$ 22,611,523	$ 18,832,442	$ 15,850,111

Sensitivity of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rate - The following presents the net OPEB liability of the Township, as well as what the Township's net OPEB liability would be if it were calculated using healthcare cost trend rates that are one percentage point lower (5.0% decreasing to 2.8%) or one percentage point higher (7.0% decreasing to 4.8%) than the current healthcare cost trend rates:

	1% Decrease (5.0% Decreasing to 2.8%)	Healthcare Cost Trent Rates (6.0% Decreasing to 3.8%)	1% Increase (7 0% Decreasing to 4.8%)
Net OPEB liability	$ 15,361,026	$ 18,832,442	$ 23,306,196

OPEB Expense and Deferred Outflows of Resource and Deferred Inflows of Resources Related to OPEB – For the year ended December 31, 2020, the Township recognized OPEB expense of $1,788,887. At December 31, 2020, the Township reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	Governmental Activities	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 334,638	$ -
Changes in assumptions	4,284,741	407,512
Net difference between projected and actual earnings on pension plan investments	-	173,973
Total	$ 4,619,379	$ 581,485

NOTE K - POSTEMPLOYMENT BENEFITS OTHER THAN PENSIONS (OPEB) (Continued)

	Business-Type Activities	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ -	$ 312,299
Changes in assumptions	303,664	42,762
Net difference between projected and actual earnings on pension plan investments	23,055	-
Total	$ 326,719	$ 355,061

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

Year Ending December 31,	Governmental Activities	Business-Type Activities
2021	$ 685,257	$ (8,370)
2022	695,294	(7,901)
2023	650,630	(13,033)
2024	699,390	(19,049)
2025	726,134	(17,851)
Thereafter	581,189	37,862

CHANGE IN NET POSITION	911,785	543,636	1,738,642	247,642	3,441,705
NET POSITION HELD IN TRUST AT BEGINNING OF YEAR	7,082,251	2,513,081	10,943,594	1,595,705	22,134,631
NET POSITION HELD IN TRUST AT END OF YEAR	$ 7,994,036	$ 3,056,717	$ 12,682,236	$ 1,843,347	$ 25,576,336

NOTE M - EXCESS OF EXPENDITURES OVER APPROPRIATIONS

The General Fund incurred expenditures in excess of appropriations in the following amounts for the year ended December 31, 2020:

General government - tax collection	$ 57,029
General government -municipal buildings	12,731
Public safety - fire protection	6,951
Public safety - planning and zoning	58,625

The excess expenditures above were covered by budgeted expenses exceeding incurred expenditures in other expense categories.

NOTE N - RISK MANAGEMENT

The Township is exposed to various risks of loss related to tort; theft of, damage to, and destruction of assets; errors and omission injuries to employees; and natural disasters. Significant losses are covered by commercial insurance for all major programs. There were no significant reductions in insurance coverages of the 2020 year. Settlement amounts have not exceeded insurance coverage for the current year or the three prior years.

NOTE O - GUARANTEE OF FIRE COMPANY DEBT

During 2014, the Township guaranteed a $4,000,000 loan made to the East Whiteland Township Volunteer Fire Association dated May 6, 2014 with a maturity date of May 6, 2042. As of December 31, 2020, the Township has determined that there is currently no evidence that the Association will default on its loan, and therefore, no liability is reflected in the financial statements.

NOTE P - RISKS AND UNCERTAINTIES

On March 11, 2020 the World Health Organization declared the novel coronavirus ("COVID-19") outbreak a pandemic which has impacted the global economy. Although no significant financial impact has occurred thus far, the COVID-19 pandemic is still on-going and the duration and extent of the related financial impact on the Borough's net position and statement of activities is uncertain and cannot be reasonably estimated at this time.

NOTE Q- SUBSEQUENT EVENT

In November 2020, the Board of Supervisors awarded a bid to Aqua for a proposed sale of the sewer system for $55 million. Due diligence on the proposed sale continues. If successful, it is expected that settlement will occur around January 2022.

NOTES TO SCHEDULE

Changes in assumptions: In 2019 the mortality rates were updated to the PubS-2010 mortality tables, and the investment rate of return was revised to 7.5% from 8.0%. In 2017 the mortality rates were based on the IRS 2017 Static Combined Table for Small Plans. In prior years, the mortality rates were based on the RP-2000 Table for Males or Females.

This schedule is intended to show information for ten years, all available information is displayed. Additional information will be displayed as it becomes available.

Contribution as a percentage of covered payroll	19.33%	19.28%	13.70%	12.55%	16.19%	17.68%	13.37%

NOTES TO SCHEDULE

Actuarially determined contribution rates are calculated based on the plan's most recent available Act 205 actuarial valuation report. The January 1, 2017 actuarial valuation report was utilized for the 2020 and 2019 Minimum Municipal Obligation calculation. The January 1, 2015 actuarial valuation report was utilized for the 2018 and 2017 Minimum Municipal Obligation calculation. The January 1, 2013 actuarial valuation report was utilized for the 2016 and 2015 Minimum Municipal Obligation calculation. The January 1, 2011 actuarial valuation report was utilized for the 2014 and 2013 Minimum Municipal Obligation calculations. The following actuarial methods and assumptions were used to determine contribution rates.

Methods and assumptions used to determine contribution rates:

Actuarial valuation date	1/1/17	1/1/15	1/1/13	1/1/11
Actuarial cost method	Entry age	Entry age	Entry age	Entry age
Amortization method	Level dollar	Level dollar	Level dollar	Level dollar
Remaining amortization period	9 years	10 years	12 years	13 years
Asset valuation method	Fair	Fair	Fair	Smoothing
Salary increases	5%	5%	5%	5%
Investment rate of return	8%	8%	8%	8%
Disability rates	None	None	None	None
Termination rates	W65	W65	W65	None
Mortality	IRS 2017 Static Combined	RP2000	RP2000	RRB92
Retirement age	50	50	50	50
Cost-of-living adjustments	None	None	None	None

This schedule is intended to show information for ten years, all available information is displayed. Additional information will be displayed as it becomes available.

NOTES TO SCHEDULE

Actuarially determined contribution rates are calculated based on the plan's most recent available Act 205 actuarial valuation report. The January 1, 2017 actuarial valuation report was utilized for the 2020 and 2019 Minimum Municipal Obligation calculation. The January 1, 2015 actuarial valuation report was utilized for the 2018 and 2017 Minimum Municipal Obligation calculation. The January 1, 2013 actuarial valuation report was utilized for the 2016 and 2015 Minimum Municipal Obligation calculation. The January 1, 2011 actuarial valuation report was utilized for the 2014 and 2013 Minimum Municipal Obligation calculations. The following actuarial methods and assumptions were used to determine contribution rates.

Methods and assumptions used to determine contribution rates:

Actuarial valuation date	1/1/17	1/1/15	1/1/13	1/1/11
Actuarial cost method	Entry age	Entry age	Entry age	Entry age
Amortization method	Level dollar	Level dollar	Level dollar	Level dollar
Remaining amortization period	7 years	4 years	7 years	8 years
Asset valuation method	Fair	Fair	Fair	Smoothing
Salary increases	4.5%	4.5%	5%	6%
Investment rate of return	7.5%	7.5%	8%	8%
Disability rates	None	None	None	None
Termination rates	W65	W65	W65	W65
Mortality	IRS 2017 Static Combined Table	RP2000	RP2000	GAM71
Retirement age	64	64	65	63
Cost-of-living adjustments	None	None	None	None

This schedule is intended to show information for ten years, all available information is displayed. Additional information will be displayed as it becomes available.

NOTES TO SCHEDULE

Changes in assumptions: In 2020 the discount rate changed from 3.98% to 2.44%. In 2019 the discount rate changed from 3.81% to 3.98%. The trend assumption was updated. The mortality table was changed from the IRS 2017 Small Plan Combined Static Mortality table to the PubS-2010 mortality table for Police and Fire and the PubG-2010 mortality table for Non-Uniformed employees. In 2018 the discount rate was changed from 3.55% to 3.81%.

Changes in benefit terms: In 2019, police officers retiring after 9/24/2019 will enroll in the active health plan. Also, Non-Uniformed Union employees who do not have 10 years of service as of 12/31/2022 will not receive post 65 benefits.

STATISTICAL SECTION

STATISTICAL SECTION
(Unaudited)

This part of East Whiteland Township's Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, notes disclosures and required supplementary information says about the Township's overall financial health.

Contents

Financial Trends

These schedules contain trend information to help the reader understand how the Township's financial performance and well-being have changed over time.

Revenue Capacity

These schedules contain information to help the reader assess the Township's most significant local revenues sources, the earned income tax, and property tax.

Debt Capacity

These schedules present information to help the reader assess the affordability of the Township's current levels of outstanding debt and the Township's ability to issue additional debt in the future.

Demographic and Economic Information

These schedules offer demographic and economic indicators to help the reader understand the environment within which the Township's financial activities take place.

Operation Information

These schedules contain service and miscellaneous data to help the reader understand how the information in the Township's financial report relates to the service the Township provides and the activities it performs.

Sources: Unless otherwise noted, the information in these schedules is derived from the Annual Financial Reports for the relevant year. The Township implemented GASB Statement No. 34 for fiscal year ended December 31, 2003; schedules presenting government-wide information include information beginning in that year.

(1) Net (expense) revenue is the difference between expenses and program revenues of a function or program. It indicates the degree to which a function or program is supported with its own fees and program-specific grants versus its reliance upon funding from taxes and other general revenues. Numbers in parenthesis indicate that expenses were greater than program revenues and therefore general revenues were needed to finance that function or program. Numbers without parenthesis indicate that program revenues were more than sufficient to cover expenses.

(2)Prior to 2015, the depreciation was not allocated to the specific governmental activities in the statement of Activities source document.

Table 16

EAST WHITELAND TOWNSHIP
Computation of Direct and Overlapping Debt
as of December 31, 2020

Jurisdiction	Total Debt Outstanding	Assessed Value	Percentage Applicable to East Whiteland	Amount Applicable to East Whiteland
Direct:				
East Whiteland Township	$ 7,741,044	1,729,508,446	100%	$ 7,741,044
Overlapping:				
Great Valley School District	22,018,449	3,818,966,671	45.3%	9,971,570
Chester County (2)	497,780,000	38,700,276,590	4.5%	22,245,699
Total Overlapping Debt	519,798,449	42,519,243,261		32,217,269
Total Debt	$ 527,539,493	$ 44,248,751,707		$ 39,958,313

(1) Overlapping governments are those that coincide, at least in part, with the geographic boundaries of the Township This schedule estimates the portion of the outstanding debt of those overlapping governments that is borne by the residents and businesses of East Whiteland Township.

(2) Proportional share of existing debt as of December 31, 2019 is based on the ratio of East Whiteland's assessed value tc Chester County's and Great Valley School District's assessed value respectively.

Debt Service	511,130	511,130	0
Recreation	139,200	104,000	-25.3
Total Expenditures	**$14,323,821**	**$13,748,756**	**-4.1%**

2021 Final Budget Revenues

- Earned Income Taxes
  - Earlier this year, our Board asked staff to project potential lost EIT revenue as a result of the pandemic. So far, that situation has not occurred.
  - We budgeted $9 million for EIT in 2020 and will likely surpass that. However, with a possible surge this Fall or Winter, we may experience a significant loss in revenue for 2021. Staff had projected possible losses, of 10% and 20%. We included a 10% reduction in 2021 collections.
- Real Estate Transfer Taxes
  - Normally robust volume and level of property transfers, averaging over $1 million annually.
  - Limited mount of significant “shovel ready” projects expected in 2021, recommending a $500,000 reduction budget, to $500,000.
  - Core amount of transfer activity as well as one or two significant “speculative” transfers that occur in a municipality that has potential for development or redevelopment.
- Building Permits
  - Similar to Real Estate Transfer Taxes, we anticipate a significant reduction in permit revenue for 2021. Staff projects a loss of $500,000 in permit revenue in 2021.

2021 Final Budget Expenditures

- Compensation – Our organization costs are mostly driven by labor contracts. In 2021, all three contracts are settled (Police – 3.6%; Fire – 3.5%; and AFSCME – 3.75%). Non union budgeted raises at 3.5%.
- Medical Insurance – DVHT We continue to benefit from arbitration awards and negotiated settlements of labor contracts that resulted in significant, sustainable healthcare concessions. Our current estimate for medical insurance for 2021 is $1,381,836, compared with $1,768,200 for 2020, or an annual savings of $386,364. In addition, we terminated our self insured plan in February 2020. We continue to pay a modest amount of "run out" or timing of claims through December 2020. In 2021 and years after, we will recognize an additional annual savings of $120,000.
- Pension – In September, our Board approved Minimum Municipal Obligation budgets for 2021, resulting in a $217,676 increase due to life expectancies and poor investment performance.
- OPEB – Our OPEB costs are a combination of full group plan coverage for retirees only, through DVHT, and Medicare reimbursement for retirees only. Our current estimate for OPEB for 2021 is $429,900, compared with $503,300 for 2020, or an annual savings of $73,400. We are recognizing similar savings through our arbitration awards and negotiated settlements of labor contracts.

2021 Final Budget Expenditures (Continued)

- Overtime – Due to the pandemic, overtime this year continues to be moderate. Staff recommends the same overtime budgets for 2021.
- Information Technology – We have service contracts (IT) for police and civilian departments with All Covered. Our contract rates will not increase in 2021. We maintain software applications for each department and are looking to streamline applications next year.
- Vehicle & Equipment Replacement Plans – Since 2015, the Township has invested in the future replacement of our fleet and essential equipment. Each item is annually evaluated for useful life and replacement cost. Staff recommends that we continue funding ($305,063) these plans in 2021.
- Debt Service – Our only non Sewer debt is for the Public Works facility. The debt service for 2021 is $508,930. Our outstanding non Sewer debt is $7,395,000 as of December 2020.

2021 Final Budget
Net Deficit

- As of September 2020, we projected $12.7 million in revenues and $14.7 million in expenses, for a net deficit of $2 million.
- As of November 2020, we identified additional cost savings that reduced our net deficit to about $1 million.
- Through December 2020 and throughout 2021, staff will be identifying further cost reductions to help reduce our net deficit even further.

Fund Balance (Designated Reserves) – 12/31/2019

- Tax Rate Stabilization - $4,050,000
- Budgetary Reserve - $2,093,868
- Renovate Municipal Infrastructure - $3,250,000
- Volunteer Committee Resources - $2,650,000
- Highway & Street Projects - $1,000,000
- Capital Improvement - $726,023
- Stormwater Management - $650,000
- Equipment - $500,000
- Pension - $500,000
- OPEB - $350,000
- Total - $15,769,891

2020 MUNICIPAL ANNUAL AUDIT AND FINANCIAL REPORT

City of: _____ County: _____

Borough of: _____ County: _____

Township of: EAST WHITELAND County: CHESTER

Municipality of: _____ County: _____

Section I - Introduction

Statutory Requirements

- State law, under the provisions of the Borough Code, First Class Township Code and Second Class Township Code, requires that either the borough controller, elected auditors or appointed auditors file an Annual Audit and Financial Report.
- State law, under the provisions of the Third Class City Code, requires a city's Director of Accounts and Finance to file an Annual Audit and Financial Report.
- The state's Administrative Code requires home rule municipalities to file an Annual Audit and Financial Report.
- The Annual Audit and Financial Report forms, supplied by the Pennsylvania Department of Community and Economic Development (DCED), were developed and approved by a Uniform Forms Committee composed of representatives of the respective municipal associations.
- Form DCED-CLGS-30 (See Section IV) is the form adopted by the Committee for use by all municipalities in Pennsylvania to fulfill their statutory reporting requirements.

One Form

All municipalities are required to submit forms electronically to DCED. The online form contains the same categories as in previous years: assets, liabilities, revenues and expenditures. Enter data only for those funds that your municipality uses. Leave the remaining columns blank. The online form will automatically calculate the amounts in the "Total" column.

Submitting the Report

- File one copy by the designated date at each of the places listed on page 9.
- DO NOT submit a paper copy of this report to DCED. Reports must be submitted online at: www.munstats.pa.gov/forms/login.aspx (Please see the e-filing instructions on page 7.)
- The online system will automatically round all figure to the nearest whole dollar. The system will also add all rows and columns, following basic accounting principles.
- Appointed independent auditors should attach their own opinion in the "Final Review" step of the online form. Additionally, appointed independent auditors should place a checkmark in Section II at the bottom of the "Final Review" step, then choose the "Appointed Auditor/CPA" title from the dropdown and provide a name and contact number in order to submit the form online.
- Elected controllers should place a checkmark in the box in Section I at the bottom of the "Final Review" step of the online form then choose the "Controller" title from the dropdown and provide a name and contact number in order to submit the form online.
- Elected Auditors must place a check mark in the box in Section I of the "Final Review" step of the online form, then choose the "Elected Auditor" title from the dropdown and provide the name and phone number for **at least 2 of the 3 elected auditors**. If you appointed an auditor to fill an elected auditor position, please choose the "Elected Auditor" title, not the "Appointed Auditor/CPA" title when submitting online.
- If you need assistance or have any questions when completing this report, please contact the Governor's Center for Local Government Services (GCLGS) toll-free at 888-223-6837.

ELECTED CONTROLLER'S/AUDITOR'S CERTIFIED OPINION

To the: Governing Body of the Municipality
President Judge of the Court of Common Pleas
Secretary of the Department of Community & Economic Development

I/We, the undersigned, the duly elected (or appointed replacement), qualified, and acting controller/auditors of the _____ have audited, adjusted, and settled the various funds and account groups of the _____ for the year ended December 31, 2015. My/Our audit, adjustment, and settlement was made in accordance with law rather than with generally accepted auditing standards.

(PLEASE CROSS OUT ONLY IF ON MODIFIED ACCRUAL/ACCRUAL BASIS)

This municipality's policy is to prepare its financial statements on the basis of cash receipts and disbursements; consequently, certain revenues and the related assets are recognized when received rather than when earned, and certain expenditures or expenses are recognized when paid rather than when a liability is incurred. Accordingly, the accompanying financial statements are not intended to present the financial position and results of operations of this municipality in conformity with generally accepted accounting principles.

These financial statements do not include all of the disclosures required by generally accepted accounting principles.

In my/our opinion, the aforementioned financial statements present the financial position of the various funds and account groups of the municipality of _____ for the year ended December 31, 2015, and the results of operations of such funds in accordance with the law.

Permit

pennsylvania
DEPARTMENT OF ENVIRONMENTAL PROTECTION

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF POINT AND NON-POINT SOURCE MANAGEMENT

WATER QUALITY MANAGEMENT PERMIT

PERMIT NO. 1599418

AMENDMENT NO. _____

APS ID. 916602

AUTH. ID. 1139890

A. PERMITTEE (Name and Address): CLIENT ID#: **78789**
East Whiteland Township
209 Conestoga Road
Frazer, PA 19355

B. PROJECT/FACILITY (Name):
Malvern Hunt WWTP

C. LOCATION (Municipality, County): SITE ID#: **527339**
East Whiteland Township, Chester County

D. THIS PERMIT APPROVES THE OPERATION OF SEWAGE FACILITIES CONSISTING OF:
The Malvern Hunt Pump Station with comminutor, an influent bar screen, a two sell aerated treatment lagoon, a storage lagoon, a chlorine disinfection system, and spray fields.

Pump Stations: _____	Manure Storage:	Sewage Treatment Facility:		
Design Capacity: _____ GPM	Volume: _____ MG	Annual Average Flow:	**0.105**	MGD
	Freeboard: _____ inches	Design Hydraulic Capacity:	**0.128**	MGD
		Design Organic Capacity:	**222**	lb/day

E. APPROVAL GRANTED BY THIS PERMIT IS SUBJECT TO THE FOLLOWING:

1. **Permit Renewal:** All operations and procedures shall be in accordance with the Water Quality Management Permit application dated **5/23/2016**, its supporting documentation and addendums dated _____, which are hereby made a part of this permit.

   Amendments: All construction, operations and procedures shall be in accordance with the Water Quality Management Permit Amendment application dated _____ and its supporting documentation and addendums dated _____, which are hereby made a part of this amendment.

   Except for any herein approved modifications, all terms, conditions, supporting documentation and addendums approved under Water Quality Management Permit No. _____ dated _____ shall remain in effect.

   Transfers: Water Quality Management Permit No. _____ dated _____ and conditions, supporting documentation and addendums are also made part of this transfer.

2. Permit Conditions Relating to Sewerage are attached and made part of this permit.
3. Special Conditions **1 through XVII** are attached and made part of this permit.

F. THE AUTHORITY GRANTED BY THIS PERMIT IS SUBJECT TO THE FOLLOWING FURTHER QUALIFICATIONS:

1. If there is a conflict between the application or its supporting documents and amendments and the attached conditions, the attached conditions shall apply.
2. Failure to comply with the rules and regulations of DEP or with the terms or conditions of this permit shall void the authority given to the permittee by the issuance of this permit.
3. This permit is issued pursuant to the Clean Streams Law Act of June 22, 1937, P.L. 1987, as amended 35 P.S. §691.1 *et seq.* Issuance of this permit shall not relieve the permittee of any responsibility under any other law.

SPECIAL CONDITIONS

Water Quality Management Permit No. 1599418

Malvern Hunt WWTP

East Whiteland Township, Chester County

I. Discharge Limitations and Monitoring Requirements

Effluent from the sewage treatment plant shall be sampled at a point after chlorination and shall be limited at all times as follows:

	Discharge Limitations (mg/l)			Monitoring Requirements	
Parameter	Average Monthly	Average Weekly	Instantaneous Maximum	Measurement Frequency	Sample Type
Influent Flow (mgd)	0.105			Continuous	Recorded
$CBOD_5$	25		50	1/Month	Grab
Suspended Solids	30		60	1/Month	Grab
Fecal Coliform	200/100 ml as geometric average			1/Month	Grab
pH	Within limits of 6.0 to 9.0 standard units at all times			1/Month	Grab

Additional treatment requirements include the satisfactory disposal of sludge and the reduction of quantities of oils, greases, acids, alkalis, toxic, taste and odor producing substances, inimical to the public interest to levels which will not pollute the receiving waters.

Monitoring results shall be reported monthly on the Discharge Monitoring Report (DMR). The term "grab" sample means an individual sample collected in less than 15 minutes. Samples and measurements taken as required, herein, shall be representative of the volume and nature of the monitored discharge.

II. Copies of monthly Discharge Monitoring Reports must be submitted within 28 days of the end of the monitoring period to:

Department of Environmental Protection
Southeast Regional Office
Water Management
2 East Main Street
Norristown, PA 19401

III. Groundwater Monitoring Requirements

The permittee shall effectively monitor the quality of the groundwater. The parameters to be tested, and frequency of analysis and other monitoring requirements shall be as follows:

A. Quarterly analysis of groundwater sampled at groundwater monitoring wells **MW-L1, MW-L2, MW-L3, MW-S1, MW-S2, MW-S3, MW-S6, MW-S7, and MW-S8,** shall consist of: static water level, sampling depth, turbidity, pH, chloride, total phosphorus, ammonia nitrogen, nitrate nitrogen, nitrite nitrogen, total dissolved solids, fecal coliform, and alkalinity.

B. Groundwater elevations must be measured prior to purging the groundwater monitoring well.

C. Before collection of the groundwater sample, a groundwater monitoring well shall be properly purged and allowed to recover to at least 90 percent of the well volume that was present prior to purging.

D. All groundwater samples shall be collected from within the top five feet of the water elevation within the well column.

IV. Groundwater Monitoring Data Reporting Requirements

All groundwater data shall be submitted to DEP **annually** and be in **report form.** The report shall be due to DEP within 28 days of the end of the month of permit issuance. For example, if your permit was issued on March 4th, then your annual report is due by April 28th. The annual report shall be mailed under separate cover and addressed to:

Department of Environmental Protection
Southeast Regional Office
Water Management Program
2 East Main Street
Norristown, PA 19401

Attention: Hydrogeologist
Planning Section

V. The annual groundwater monitoring report shall include the following information:

A. General Information

i. Facility name
ii. Facility permit number
iii. Facility location (including municipality and county)
iv. Facility contact information:

a. permittee name, address, and telephone number
b. contact name and title
c. facility operator name, address, and telephone number
d. facility consultant name, address, and telephone number

B. Site Data

i. A brief narrative that provides the date and description of any facility event which may have impacted any part of the groundwater monitoring program. (e.g., collapse of groundwater monitoring well, etc.).

ii. Average effluent flow for the year covered by this report.

iii. In tabular form, the following information needs to be provided for at least the last 5 years of system operation:

a. Date of sampling
b. Groundwater elevations
c. Sampling depth
d. Identification of upgradient and downgradient wells
e. The results of the analysis of the samples

iii. Background groundwater data generated prior to system start-up. **This information is absolutely needed and needs to be included in the data tabulation.**

C. Comprehensive Groundwater Evaluation (CGE)

As part of the facility's 5-year permit renewal application, the permittee shall submit a report that is a result of a comprehensive evaluation of the systems impact on groundwater. A Registered P.G. must identify any trends which may pose a threat to human health or certify that none are present. Should adverse impacts to groundwater be identified, the permittee needs to recommend actions to address the potential threat.

D. **Groundwater Background Report**

Within 60 days of system start up, or upon issuance of permit renewal a Groundwater Background Report shall be submitted to DEP. The report shall include the follow information:

i. Site Information

a. Brief narrative, including site limitations.
b. Soil type and bedrock lithology beneath the absorption areas.
c. Site drawings showing general location of absorption fields and monitoring wells. Drawings must show site topography.

ii. Construction details of each groundwater monitoring well shall include:

a. Well depth.
b. Casing depth.
c. Static water levels.
d. Surface elevation.
e. Well log.
f. Water bearing zones.
g. Top of casing elevation.
h. Ground surface elevation.

VI. Unless, otherwise, specified in this permit, the test procedures for analysis of pollutants shall be those contained in 40 C.F.R. Part 136, or alternative test procedures approved pursuant to that Part. For the analysis of CBOD5, consult Section 507 of Standard Methods.

VII. Effective disinfection to control disease producing organisms shall be the production of an effluent which will contain a concentration neither greater than 200/100 ml of Fecal Coliform organisms, as a geometric average value nor greater than 1000/100 ml of these organisms in a more than 10 percent of the samples tested.

VIII. If the permittee monitors any pollutant more frequently than the permit requires, the results of this monitoring shall be incorporated, as appropriate, into the calculations used to report self-monitoring data on the DMR.

IX. The authorization to discharge contained in Section D of this permit shall expire in five years from the date of issuance, or reissuance. Application for renewal of this permit, or notification of intent to cease discharging by the expiration date, must be submitted to the Department at least 180 days prior to the above expiration date (unless permission has been granted by the Department for submission at a later date). In the event that a timely and complete application for renewal has been submitted and the Department is unable, through no fault of the permittee, to reissue the permit before the above expiration date, the terms and conditions of this permit will be automatically continued and will remain fully effective and enforceable pending the grant or denial of the application for permit renewal. The application for renewal shall be submitted on the appropriate Water Quality Management Part II Application forms and shall include a tabulated summary of all groundwater monitoring data for the previous five years, including a discussion of groundwater quality trends resulting from this discharge.

X. Sprayfield Weekly Maximum Hydraulic Loadings

A. Effluent flows to each sprayfield must be consistent with the maximum hydraulic loading requirements of the following tables, which provide the weekly maximum gallons for each irrigation zone.

MAXIMUM WEEKLY SPRAYFIELD HYDRAULIC LOADINGS IN GALLONS

Spray Zone 1 6.16 Acres Woods		
Month	Inches/Acre/Week	Maximum/Week Gallons
January	0.50	83,671
February	0.50	83,671
March	1.27	212,539
April	1.50	251,020
May	2.00	334,691
June	2.50	418,369
July	2.50	418,369
August	2.50	418,369
September	2.50	418,369
October	1.55	259,410
November	1.16	194,126
December	0.50	83,671

Spray Zone 2 6.19 Acres Woods		
Month	Inches/Acre/Week	Maximum/Week Gallons
January	0.50	84,079
February	0.50	84,079
March	1.27	213,574
April	1.50	252,243
May	2.00	336,321
June	2.50	420,406
July	2.50	420,406
August	2.50	420,406
September	2.50	420,406
October	1.55	260,673
November	1.16	195,072
December	0.50	84,079

Spray Zone 3 6.15 Acres Woods		
Month	Inches/Acre/Week	Maximum/Week Gallons
January	0.50	83,536
February	0.50	83,536
March	1.27	212,194
April	1.50	250,613
May	2.00	334,148
June	2.50	417,690
July	2.50	417,690
August	2.50	417,690
September	2.50	417,690
October	1.55	258,989
November	1.16	193,811
December	0.50	83,536

B. The permittee shall include with the monthly Discharge Monitoring Report a Supplemental Land Application System Form 3800-FM-BPNPSM0449 that indicates the gallons per day discharged to the spray irrigation zones.

C. Spray irrigation events shall consist of simultaneous operation of two zones with one zone left off for a week-long resting period. All zones shall be rested each month.

D. Application of the effluent shall be managed to prevent runoff from the permitted spray fields and ponding of effluent.

E. No irrigation is to occur on frozen soils.

F. No irrigation is to occur if more than 0.5 inches of rainfall has fallen during the previous 24 hours.

G. The operator is to assess soil moisture content and soil/vegetation conditions frequently. It is the operator's responsibility to inspect the fields on a routine basis to prevent and/or address damage to the irrigation fields.

H. The spray fields shall be maintained to ensure that vegetation does not interfere with or impair proper operation of the spray heads.

I. Fallen trees in wooded spray fields are required to be removed. All work must be conducted during dry or frozen soil conditions to prevent damage to the soil.

XI. At all times, the wastewater level in the storage lagoon shall be managed within the low and high water level parameters as designed. The water level shall be controlled so that a freeboard of at least 24 inches is maintained at all times. The Department must be notified if the water level is anticipated to enter freeboard.

XII. Recording of Results

For each measurement or sample taken pursuant to the requirements of this permit, the permittee shall record the following information:

A. The exact place, date, and time of sampling or measurement.
B. The person(s) who performed the sampling or measurement.
C. The dates the analyses were performed.
D. The person(s) who performed the analyses.
E. The analytical techniques or methods used.
F. The results of such analyses.

XIII. Recordkeeping and Retention

The permittee shall keep records of operation and efficiency of the wastewater treatment facilities. All records of monitoring activities and results (including all original strip chart recordings for continuous monitoring instrumentation and calibration and maintenance records), copies of all reports required by this permit, and records of all data used to complete the application for this permit shall be retained by the permittee for three (3) years. The three-year period shall be extended as requested by the Department.

XIV. The facility shall be operated under the charge of a responsible operator(s) certified under the Pennsylvania Water and Wastewater Systems Operations Certification Act (Act 11). The operator(s) shall comply with the continuing education requirements required under the regulations and guidelines related to Act 11.

XV. Laboratory Certification

Facilities that test or analyze environmental samples used to demonstrate compliance with this permit shall be in compliance with laboratory accreditation requirements of act 90 of 2002 (27 Pa. Code C.S. §§ 4101-4113) and 25 Pa. Code Chapter 252, relating to environmental laboratory accreditation. An environmental laboratory is any facility engaged in the testing or analysis of environmental samples required by a statute administered by the Department relating to the protection of the environment or of public health, safety, and welfare.

XVI. Right of Entry

Pursuant to Sections 5(b) and 305 of Pennsylvania's Clean Stream Law, the permittee shall allow authorized representatives of Department of Environmental Protection upon the presentation of credentials and other documents as may be required by law:

A. To enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit.

B. To have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit.

C. To inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit.

D. To sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act or The Clean Streams Law, any substances or parameters at any location.

XVII. If there is a change in ownership of this facility or in permittee name, an application for transfer of permit must be submitted to the Department.

RE: Malvern Hunt Pump Station
East Whiteland Township, Chester County
Water Quality Management (WQM) Part II Permit Application

Dear Mr. Patel:

On behalf of East Whiteland Township, please find enclosed the WQM Part II Permit Application for the existing Malvern Hunt Pump Station. The application has been submitted through the OnBase Forms Upload tool. The $100 application fee will be mailed under a separate cover. In addition, a copy of the Application has also been sent to the Delaware River Basin Commission.

The application package includes the following:

1. Engineers Report.
2. PaDEP Permit Application General Information Form.
3. WQM Part II Permit Application
4. USGS 7.5' Topographic Map (Phoenixville, PA Quadrangle).
5. Act 14 Notifications
6. Record Drawings

Please note that the Malvern Hunt Pump Station is an existing station that was originally permitted in conjunction with the Water Quality Management (WQM) permit for the Malvern Hunt Wastewater Treatment plant. The Township has received approval to decommission the Treatment plant and divert the flows from this station to public sewer. This application is intended to create a new (separate) WQM permit for the pump station.

Should you require any further information, or have any questions, please feel free to contact me.

Sincerely,

PENNONI

Charles Faulkner

D. MALVERN HUNT EXHIBITS

1.0 INTRODUCTION

This permit application is being submitted to establish a new Water Quality Management (WQM) Permit for the existing Malvern Hunt Pump Station. The current WQM Permit (WQM1599418) is for the pump station, influent bar screen, aerated treatment lagoon, a storage lagoon, chlorine disinfection and spray field. The Township desires to decommission the existing Malvern Hunt WWTP. To maintain the operations of the station a new WQM permit for the existing pump station is required.

East Whiteland Township is proposing to redirect all flows from the Malvern Hunt Wastewater Treatment Plant (WWTP) to the existing public sewer system. Wastewater would be conveyed through the Valley Creek Trunk sewer for treatment at Valley Forge Sewer Authority's wastewater treatment plant.

The WWTP treats an average of 46,000 GPD of wastewater from the Malvern Hunt residential development. The WWTP is permitted for the treatment of 105,000 GPD annual average with a hydraulic capacity of 128,000 GPD. The facility was constructed in 2000 by The Cutler Group who operated and maintained the facility until 2007 when ownership was transferred to East Whiteland Township. Flows to the WWTP consist entirely of sewage from the Malvern Hunt residential development; the plant does not receive flows form any other source.

In 2010, a 10-inch sewer extension was constructed along the Chester Valley Trail adjacent to the WWTP to serve the proposed Whiteland Village Retirement Community. The main was dedicated to East Whiteland Township. The main flows to the Mill Lane Pump Station, which conveys the flows through the Mathews Road meter to the Valley Creek trunk sewer and ultimately to the Valley Forge Wastewater Treatment Plant.

The WWTP influent pump station associated with the Malvern Hunt development will remain in its entirety. The existing 6-inch force main will be redirected and extended approximately 250 LF to the public sewer within the Chester Valley Trail. A manhole will be constructed on the 10-inch main to facilitate the connection. The WWTP will be abandoned in accordance with the closure plan approved by PADEP.

2.0 EXISTING WASTEWATER PUMPING STATION

Constructed in 2000, the Malvern Hunt Pump Station is located at 30 Corbin Drive, Malvern PA 19341. The station is bound by N Malvern Hunt Way on the north and Fairwind Lane on the South. Thus, station serves 279 residential homes. No future connections are projected. The station is a typical submersible type station, equipped with two (2) explosion proof pumps. Wastewater is discharged through a 6-inch force main which discharges into the Malvern Hunt WWTP. The pumps are rated at 300 gpm at 48.4 feet TDH.

Since the pump station was designed and constructed in 2000 and no future connections are projected, the basis of design year of 2000 was used to establish design capacity. Using the 2000 census data of 2.70 persons per household, 100 gpd per person and the 279 existing residential homes, the pump stations design average annual flow is 0.0753 MGD. From the PADEP Sewage Pumping Station Guidance a peaking factor of 3.87 was selected to establish a peak instantaneous

flow of 0.2914 MGD. Table 1 below shows the historic flows for the pump station. Over the last 5-years the average annual flow is 0.0455 MGD.

Max 3 Month Ave Flow (GPD)	**46,318**	**49,800**	**45,333**	**52,567**	**46,367**

Malvern Hunt Pump Station consists of the following features:

A. Wetwell Chamber:

- The pump wet well is a below-grade, precast concrete structure (8'-0" Ø x 18'- 3" deep) with one to one slope chamfers.
- The wet well is equipped with a grinder unit on the 10" DIP influent line.

B. Valve Vault Chambers:

The first valve vault chamber is a detached below-grade, precast concrete structure (6'-0" Ø x 6'- 0" high) with access hatch and aluminum ladder.

There are two 6" check valves, two 6" gate valves and two pressure gauges installed. The effluent lines combine into a common 6-inch DIP force main.

The second valve vault chamber is a detached below-grade, precast concrete structure 4'-0" Ø housing the flow meter.

C. Force main:

Wastewater is discharged through approximately 2,725 linear foot 6-inch DIP force main which discharges into Malvern Hunt WWTP. Minimum velocities within the force main are approximately 3.1 feet per second at 300 gpm.

D. Site Property:

The site property is surrounded by a cyclone fence with barbed wire, under lock and key for security.

A masonry building exists for locating the station's electrical power controls, pump controls, auto dialer, diesel generator and storage supply equipment.

Lighting for the site is provided for any night work. Water service is provided at the site for wash-down of the pump station equipment.

An alarm system with automatic callout dialer notifies personnel of an emergency at the stations. The wetwell is monitored for low water level, high water level, and motor failure alarms, as well as for loss of electrical service, emergency generator shutdown and low fuel alarm.

4.0 FLOW DIVERSION

The Township plans to extend the force main approximately 250 LF to an existing 10-inch gravity main south of the WWTP property. The main is a tributary to Mill Lane Pump Station and will ultimately be treated at the Valley Forge Wastewater Treatment Plant.

PROJECT INFORMATION

Project Name
Malvern Hunt Pump Station

Project Description
This permit application is required to establish a new Water Quality Management (WQM) Permit for the existing Malvern Hunt Pump Station. Currently the WQM Permit is grouped-in with the Malvern Hunt WWTP. The Township desires to decommission the WWTP and redirect flows from the pump station to the existing public sewer system via an approximately 250 LF extension of the force main for treatment at Valley Forge Sewer Authority WWTP.

Time Schedules	Project Milestone (Optional)
February 2021	537 Sewer Planning Approval
May 2021	WQM Part II Permit Approval
July 2021	Connect Existing Pump Station to Public Sewer

1. **Is the project located in or within a 0.5-mile radius of an Environmental Justice community as defined by DEP?** ☒ Yes ☐ No

   To determine if the project is located in or within a 0.5-mile radius of an environmental justice community, please use the online Environmental Justice Areas Viewer.

2. **Have you informed the surrounding community prior to submitting the application to the Department?** ☒ Yes ☐ No

   Method of notification: Advertisement with sewage facility planning module

3. **Have you addressed community concerns that were identified?** ☐ Yes ☐ No ☒ N/A

   If no, please briefly describe the community concerns that have been expressed and not addressed.

   No public comments were received

4. **Is your project funded by state or federal grants?** ☐ Yes ☒ No

   Note: If "Yes", specify what aspect of the project is related to the grant and provide the grant source, contact person and grant expiration date.

   Aspect of Project Related to Grant
   Grant Source: _____
   Grant Contact Person: _____
   Grant Expiration Date: _____

5.	**Is this application for an authorization on Appendix A of the Land Use Policy? (For referenced list, see Appendix A of the Land Use Policy attached to GIF instructions)** **Note:** If "No" to Question 5, the application is not subject to the Land Use Policy. If "Yes" to Question 5, the application is subject to this policy and the Applicant should answer the additional questions in the **Land Use Information** section.	☒	Yes	☐	No

LAND USE INFORMATION

Note: Applicants should submit copies of local land use approvals or other evidence of compliance with local comprehensive plans and zoning ordinances.

1.	**Is there an adopted county or multi-county comprehensive plan?**	☒	Yes	☐	No
2.	**Is there a county stormwater management plan?**	☒	Yes	☐	No
3.	**Is there an adopted municipal or multi-municipal comprehensive plan?**	☒	Yes	☐	No
4.	**Is there an adopted county-wide zoning ordinance, municipal zoning ordinance or joint municipal zoning ordinance?** **Note:** If the Applicant answers "No" to either Questions 1, 3 or 4, the provisions of the PA MPC are not applicable and the Applicant does not need to respond to questions 5 and 6 below. If the Applicant answers "Yes" to questions 1, 3 and 4, the Applicant should respond to questions 5 and 6 below.	☒	Yes	☐	No
5.	**Does the proposed project meet the provisions of the zoning ordinance or does the proposed project have zoning approval?** If zoning approval has been received, attach documentation.	☒	Yes	☐	No
6.	**Have you attached Municipal and County Land Use Letters for the project?**	☐	Yes	☒	No

COORDINATION INFORMATION

Note: The PA Historical and Museum Commission must be notified of proposed projects in accordance with DEP Technical Guidance Document 012-0700-001 utilizing the Project Review Form.

If the activity will be a mining project (i.e., mining of coal or industrial minerals, coal refuse disposal and/or the operation of a coal or industrial minerals preparation/processing facility), respond to questions 1.0 through 2.5 below.

If the activity will not be a mining project, skip questions 1.0 through 2.5 and begin with question 3.0.

1.0	**Is this a coal mining project?** If "Yes", respond to 1.1-1.6. If "No", skip to Question 2.0.	☐	Yes	☒	No
1.1	**Will this coal mining project involve coal preparation/ processing activities in which the total amount of coal prepared/processed will be equal to or greater than 200 tons/day?**	☐	Yes	☐	No
1.2	**Will this coal mining project involve coal preparation/ processing activities in which the total amount of coal prepared/processed will be greater than 50,000 tons/year?**	☐	Yes	☐	No
1.3	**Will this coal mining project involve coal preparation/ processing activities in which thermal coal dryers or pneumatic coal cleaners will be used?**	☐	Yes	☐	No
1.4	**For this coal mining project, will sewage treatment facilities be constructed and treated waste water discharged to surface waters?**	☐	Yes	☐	No
1.5	**Will this coal mining project involve the construction of a permanent impoundment meeting one or more of the following criteria: (1) a contributory drainage area exceeding 100 acres; (2) a depth of water measured by the upstream toe of the dam at maximum storage elevation exceeding 15 feet; (3) an impounding capacity at maximum storage elevation exceeding 50 acre-feet?**	☐	Yes	☐	No
1.6	**Will this coal mining project involve underground coal mining to be conducted within 500 feet of an oil or gas well?**	☐	Yes	☐	No
2.0	**Is this a non-coal (industrial minerals) mining project?** If "Yes", respond to 2.1-2.6. If "No", skip to Question 3.0.	☐	Yes	☒	No

2.1	**Will this non-coal (industrial minerals) mining project involve the crushing and screening of non-coal minerals other than sand and gravel?**	☐	Yes	☐	No
2.2	**Will this non-coal (industrial minerals) mining project involve the crushing and/or screening of sand and gravel with the exception of wet sand and gravel operations (screening only) and dry sand and gravel operations with a capacity of less than 150 tons/hour of unconsolidated materials?**	☐	Yes	☐	No
2.3	**Will this non-coal (industrial minerals) mining project involve the construction, operation and/or modification of a portable non-metallic (i.e., non-coal) minerals processing plant under the authority of the General Permit for Portable Non-metallic Mineral Processing Plants (i.e., BAQ-PGPA/GP-3)?**	☐	Yes	☐	No
2.4	**For this non-coal (industrial minerals) mining project, will sewage treatment facilities be constructed and treated waste water discharged to surface waters?**	☐	Yes	☐	No
2.5	**Will this non-coal (industrial minerals) mining project involve the construction of a permanent impoundment meeting one or more of the following criteria: (1) a contributory drainage area exceeding 100 acres; (2) a depth of water measured by the upstream toe of the dam at maximum storage elevation exceeding 15 feet; (3) an impounding capacity at maximum storage elevation exceeding 50 acre-feet?**	☐	Yes	☐	No
3.0	**Will your project, activity, or authorization have anything to do with a well related to oil or gas production, have construction within 200 feet of, affect an oil or gas well, involve the waste from such a well, or string power lines above an oil or gas well?** If "Yes", respond to 3.1-3.3. If "No", skip to Question 4.0.	☐	Yes	☒	No
3.1	**Does the oil- or gas-related project involve any of the following: placement of fill, excavation within or placement of a structure, located in, along, across or projecting into a watercourse, floodway or body of water (including wetlands)?**	☐	Yes	☐	No
3.2	**Will the oil- or gas-related project involve discharge of industrial wastewater or stormwater to a dry swale, surface water, ground water or an existing sanitary sewer system or storm water system?** If "Yes", discuss in *Project Description*.	☐	Yes	☐	No
3.3	**Will the oil- or gas-related project involve the construction and operation of industrial waste treatment facilities?**	☐	Yes	☐	No
4.0	**Will the project involve a construction activity that results in earth disturbance?** If "Yes", specify the total disturbed acreage.	☒	Yes	☐	No
4.0.1	**Total Disturbed Acreage** 0.016				
4.0.2	**Will the project discharge or drain to a special protection water (EV or HQ) or an EV wetland?**	☒	Yes	☐	No
4.0.3	**Will the project involve a construction activity that results in earth disturbance in the area of the earth disturbance that are contaminated at levels exceeding residential or non-residential medium-specific concentrations (MSCs) in 25 Pa. Code Chapter 250 at residential or non-residential construction sites, respectively?**	☐	Yes	☒	No
5.0	**Does the project involve any of the following: water obstruction and/or encroachment, wetland impacts, or floodplain project by the Commonwealth/political subdivision or public utility?** If "Yes", respond to 5.1-5.7. If "No", skip to Question 6.0.	☐	Yes	☒	No
5.1	**Water Obstruction and Encroachment Projects – Does the project involve any of the following: placement of fill, excavation within or placement of a structure, located in, along, across or projecting into a watercourse, floodway or body of water?**	☐	Yes	☐	No

5.2	**Wetland Impacts – Does the project involve any of the following: placement of fill, excavation within or placement of a structure, located in, along, across or projecting into a wetland?**	☐	Yes	☐	No
5.3	**Floodplain Projects by the Commonwealth, a Political Subdivision of the Commonwealth or a Public Utility – Does the project involve any of the following: placement of fill, excavation within or placement of a structure, located in, along, across or projecting into a floodplain?**	☐	Yes	☐	No
5.4	**Is your project an interstate transmission natural gas pipeline?**	☐	Yes	☐	No
5.5	**Does your project consist of linear construction activities which result in earth disturbance in two or more DEP regions AND three or more counties?**	☐	Yes	☐	No
5.6	**Does your project utilize Floodplain Restoration as a best management practice for Post Construction Stormwater Management?**	☐	Yes	☐	No
5.7	**Does your project utilize Class V Gravity / Injection Wells as a best management practice for Post Construction Stormwater Management?**	☐	Yes	☐	No
6.0	**Will the project involve discharge of construction related stormwater to a dry swale, surface water, ground water or separate storm water system?**	☐	Yes	☒	No
6.1	**Will the project involve discharge of industrial waste stormwater or wastewater from an industrial activity or sewage to a dry swale, surface water, ground water or an existing sanitary sewer system or separate storm water system?**	☐	Yes	☒	No
7.0	**Will the project involve the construction and operation of industrial waste treatment facilities?**	☐	Yes	☒	No
8.0	**Will the project involve construction of sewage treatment facilities, sanitary sewers, or sewage pumping stations?** If "Yes", indicate estimated proposed flow (gal/day). Also, discuss the sanitary sewer pipe sizes and the number of pumping stations/treatment facilities/name of downstream sewage facilities in the *Project Description*, where applicable. **8.0.1 Estimated Proposed Flow (gal/day)** 45,000 avg.	☒	Yes	☐	No
9.0	**Will the project involve the subdivision of land, or the generation of 800 gpd or more of sewage on an existing parcel of land or the generation of an additional 400 gpd of sewage on an already-developed parcel, or the generation of 800 gpd or more of industrial wastewater that would be discharged to an existing sanitary sewer system?**	☐	Yes	☒	No
	9.0.1 Was Act 537 sewage facilities planning submitted and approved by DEP? If "Yes" attach the approval letter. Approval required prior to 105/NPDES approval.	☐	Yes	☒	No
10.0	**Is this project for the beneficial use of biosolids for land application within Pennsylvania?** If "Yes" indicate how much (i.e. gallons or dry tons per year). **10.0.1 Gallons Per Year (residential septage)** _____ **10.0.2 Dry Tons Per Year (biosolids)**	☐	Yes	☒	No
11.0	**Does the project involve construction, modification or removal of a dam?** If "Yes", identify the dam. **11.0.1 Dam Name**	☐	Yes	☒	No
12.0	**Will the project interfere with the flow from, or otherwise impact, a dam?** If "Yes", identify the dam. **12.0.1 Dam Name**	☐	Yes	☒	No

13.0	**Will the project involve operations (excluding during the construction period) that produce air emissions (i.e., NOX, VOC, etc.)?**	☐	Yes	☒	No
	13.0.1 If "Yes", is the operation subject to the agricultural exemption in 35 P.S. § 4004.1?	☐	Yes	☐	No
	13.0.2 If the answer to 13.0.1 is "No", identify each type of emission followed by the estimated amount of that emission. **Enter all types & amounts of emissions; separate each set with semicolons.**				
14.0	**Does the project include the construction or modification of a drinking water supply to serve 15 or more connections or 25 or more people, at least 60 days out of the year?** If "Yes", check all proposed sub-facilities.	☐	Yes	☒	No
	14.0.1 Number of Persons Served _____				
	14.0.2 Number of Employee/Guests _____				
	14.0.3 Number of Connections _____				
	14.0.4 Sub-Fac: Distribution System	☐	Yes	☐	No
	14.0.5 Sub-Fac: Water Treatment Plant	☐	Yes	☐	No
	14.0.6 Sub-Fac: Source	☐	Yes	☐	No
	14.0.7 Sub-Fac: Pump Station	☐	Yes	☐	No
	14.0.8 Sub Fac: Transmission Main	☐	Yes	☐	No
	14.0.9 Sub-Fac: Storage Facility	☐	Yes	☐	No
15.0	**Will your project include infiltration of storm water or waste water to ground water within one-half mile of a public water supply well, spring or infiltration gallery?**	☐	Yes	☒	No
16.0	**Is your project to be served by an existing public water supply?** If "Yes", indicate name of supplier and attach letter from supplier stating that it will serve the project.	☐	Yes	☒	No
	16.0.1 Supplier's Name _____				
	16.0.2 Letter of Approval from Supplier is Attached	☐	Yes	☐	No
17.0	**Will this project be served by on-lot drinking water wells?**	☐	Yes	☒	No
18.0	**Will this project involve a new or increased drinking water withdrawal from a river, stream, spring, lake, well or other water bod(ies)?** If "Yes", reference Safe Drinking Water Program.	☐	Yes	☒	No
	18.0.1 Source Name				
19.0	**Will the construction or operation of this project involve treatment, storage, reuse, or disposal of waste?** If "Yes", indicate what type (i.e., hazardous, municipal (including infectious & chemotherapeutic), residual) and the amount to be treated, stored, re-used or disposed.	☐	Yes	☒	No
	19.0.1 Type & Amount				
20.0	**Will your project involve the removal of coal, minerals, contaminated media, or solid waste as part of any earth disturbance activities?**	☐	Yes	☒	No
21.0	**Does your project involve installation of a field constructed underground storage tank?** If "Yes", list each Substance & its Capacity. **Note:** Applicant may need a Storage Tank Site Specific Installation Permit.	☐	Yes	☒	No
	21.0.1 Enter all substances & capacity of each; separate each set with semicolons. _____				

22.0	**Does your project involve installation of an aboveground storage tank greater than 21,000 gallons capacity at an existing facility?** If "Yes", list each Substance & its Capacity. **Note:** Applicant may need a Storage Tank Site Specific Installation Permit. **22.0.1 Enter all substances & capacity of each; separate each set with semicolons.**	☐	Yes	☒	No
23.0	**Does your project involve installation of a tank greater than 1,100 gallons which will contain a highly hazardous substance as defined in DEP's Regulated Substances List, 2570-BK-DEP2724?** If "Yes", list each Substance & its Capacity. **Note:** Applicant may need a Storage Tank Site Specific Installation Permit. **23.0.1 Enter all substances & capacity of each; separate each set with semicolons.**	☐	Yes	☒	No
24.0	**Does your project involve installation of a storage tank at a new facility with a total AST capacity greater than 21,000 gallons?** If "Yes", list each Substance & its Capacity. **Note:** Applicant may need a Storage Tank Site Specific Installation Permit. **24.0.1 Enter all substances & capacity of each; separate each set with semicolons.**	☐	Yes	☒	No
	NOTE: If the project includes the installation of a regulated storage tank system, including diesel emergency generator systems, the project may require the use of a Department Certified Tank Handler. For a full list of regulated storage tanks and substances, please go to www.dep.pa.gov search term storage tanks				
25.0	**Will the intended activity involve the use of a radiation source?**	☐	Yes	☒	No

CERTIFICATION

I certify that I have the authority to submit this application on behalf of the applicant named herein and that the information provided in this application is true and correct to the best of my knowledge and information.

For applicants supplying an EIN number: I am applying for a permit or authorization from the Pennsylvania Department of Environmental Protection (DEP). As part of this application, I will provide DEP with an accurate EIN number for the applicant entity. By filing this application with DEP, I hereby authorize DEP to confirm the accuracy of the EIN number provided with the Pennsylvania Department of Revenue. As applicant, I further consent to the Department of Revenue discussing the same with DEP prior to issuance of the Commonwealth permit or authorization.

GENERAL INFORMATION FORM -- AUTHORIZATION APPLICATION APPLICANT'S CHECKLIST

This final checklist is to assist the applicant in assuring that all requests for responses, contacts, additional documentation, etc. have been addressed. Please check the following list to make sure that you have included all the required information. Failure to provide all of the requested information will delay the processing of the application and may result in the application being placed on hold with no action, or will be considered withdrawn and the application file closed. This applicant's checklist need not be returned to DEP with your completed application.

REQUIREMENTS		
☒	**1.**	**ATTACHMENTS.** The completion of the GIF may require the submission of some or all of the following. Where appropriate, include the appropriate attachment(s) with the completed GIF.
	☒	**a) Site Information, Written Directions to Site** – Attach additional sheets as necessary.
	☒	**b) Facility Information, Latitude/Longitude** – Attach additional sheets as necessary.
	☒	**c) Project Information, Project Description** – Attach additional sheets as necessary.
	☒	**d) Project Information, Time Schedules** -- Attach additional sheets as necessary.
	☒	**e) Land Use Information** – Please attached completed County and Municipal Land Use Letters. If County and Municipal Land Use Letters are not included, please attach documentation indicating zoning approval (for early opt-out option), or certified mail receipts indicating that requests for County and Municipal Land Use Letters were sent to the county and municipality. For more information, see GIF Instructions and the Department's Policy for Consideration of Local Comprehensive Plans and Zoning Ordinances in DEP Review of Authorizations for Facilities and Infrastructure – Document ID: 012-0200-001.
	☒	**f) Coordination Information** - If land is disturbed, it may be the applicant's responsibility to also notify the PA Historical and Museum Commission, Bureau of Historic Preservation, 400 North Street, Floor 2, Harrisburg, PA 17120-0093, (717) 787-3362.
		PHMC notification is required for construction activities that have not been exempted under DEP's Policy for PHMC and DEP Coordination During Permit Application Review and Evaluation of Historic Resources:
		For additional information, see Project Review Form instructions to determine whether submission of information to PHMC is required for this permit application.
	☒	**g) Coordination Information, Question 9.0.1** – Attach copy – Act 537 Approval Letter. Note: Approval required prior to 105/NPDES approval.
	☐	**h) Coordination Information, Question 16.0.2** – Attach copy – Public Water Supplier's Agreement Letter to Serve the Project.
☒	**2.**	**CONTACTS MADE.** According to information provided in the Coordination Information section, the appropriate DEP office may need to be contacted; as well as some agencies outside DEP. See the Instructions document for appropriate contact per coordination question.
		In addition to contacts referenced above, prior to proceeding with any project, DEP encourages applicants to be in touch with municipal and county governments to get information on and secure, if possible, any local permits or approvals that might be required for the project. By doing so, potential conflicts at the local level can be resolved prior to application submission to DEP.
☒	**3.**	**BEFORE YOU DIG -- CONTACT.** Pennsylvania One Call System at 1-800-242-1776.
☒	**4.**	**APPLICATION SUBMITTED.** Application has been completed and properly signed according to instructions and type codes; and will be submitted to the appropriate DEP office.

SEWER EXTENSIONS
MODULE 17

APPLICANT NAME	East Whiteland Township

PROJECT INFORMATION

If the project is associated with existing or proposed residential or industrial development, complete the following:

Name of Development: Malvern Hunt
Type of Development: Residential
Number of Units: 279 Project Acreage:

BASIS OF DESIGN

Design Year: 2000	Design Population: 753

SEWER SYSTEM

1. CLASS OF CONSTRUCTION ☐ NEW SYSTEM ☐ REPLACEMENT OF EXISTING SYSTEMS ☒ SANITARY
2. INITIAL POPULATION 753 DESIGN YEAR POPULATION 753

3. List the WQM permit number of the sewer to which this system connects.	E15-821
4. List the WQM permit number of the treatment facility receiving flow from this system.	1599422 1599422A2
5. What is the reserve capacity of the most limiting component between this connection and the treatment facility?	Valley Creek Trunk Sewer (see attached capacity letters)

6. LOCATION

USGS Quadrangle Name: Malvern

Latitude/Longitude of Connection Point	Latitude			Longitude		
	Degrees	Minutes	Seconds	Degrees	Minutes	Seconds
	40	2	41	78	35	34

7. DESIGN FLOW DATA

a.	Laterals and Submain Sewers		(GPCD)	
b.	Average Daily Flow		(mgd)	0.0753
c.	Infiltration/Inflow (I/I)		(mgd)	
d.	Industrial Waste Flow		(mgd)	
e.	Total Average Design Flow		(mgd)	0.0753
f.	Maximum Expected Flowrate	(Peak Instantaneous)	(mgd)	0.2914

8. Describe measures taken to minimize I/I in the system including leakage test and reference applicable portion of the specifications.

The tie-in point, Whiteland Village Sewer Extension, was installed in 2009. During construction the sewer was pressure tested and manholes were vacuum tested to minimize I/I. All new lines installed will be pressure tested and manholes will be vacuum tested to minimize I/I.

PUMP STATIONS
MODULE 22

APPLICANT NAME	East Whiteland Township

PUMP STATION (Submit separate module for each pump station.)

1.	PUMP STATION NAME: Malvern Hunt Pump Station	
2.	List the WQM permit number of the sewer to which this system connects.	E15-821
3.	List the WQM permit number of the treatment facility receiving flow from this system.	1599422 1599422 A2
4.	What is the reserve capacity of the most limiting component between this connection and the treatment facility?	Valley Creek Trunk Sewer (See attached capacity Letters)

5. LOCATION (street name, etc.): Corbin Drive, Malvern PA 19341

USGS Quadrangle Name: Malvern

Latitude/Longitude of Pump Station	Latitude			Longitude		
	Degrees	Minutes	Seconds	Degrees	Minutes	Seconds
	40	2	41	78	35	34

Latitude/Longitude of Connection Point	Latitude			Longitude		
	Degrees	Minutes	Seconds	Degrees	Minutes	Seconds
	40	2	28	75	35	12

6. TYPE (e.g., conventional, suction lift, ejector or submersible): submersible

7. INITIAL POPULATION TO BE SERVED: 753 FUTURE POPULATION TO BE SERVED:
DESIGN YEAR: 2000

8. DESIGN INFORMATION:		AVG (mgd)	MAX (Peak Instantaneous) (mgd)
a.	Domestic Flowrate (based on design population to be served)	0.0753	0.2914
b.	Industrial Flowrate		
c.	Infiltration/Inflow (I/I) Rate		
d.	Design Flowrate		
e.	Effective Wet Well Capacity	(gal) 1,691	
f.	Detention Time	(min) 5.64	
g.	Design Average Velocity in Force Main	(fps) 3.1	
h.	Total Dynamic Head (Pump Station + Force Main)	Static Head 12.5 ft	
		Friction Loss 35.9 ft	
		TDH 48.4 ft	
i.	Diameter of Force Main	6 inches	

9. Describe the proposed project with respect to the 100-year flood elevation, ventilation, emergency power provision and alarm system.
The Existing pump station is outside the 100-year flood elevation. The station is submersible, the wet well is vented through the building roof. They system has a emergency diesel generator and alarm dialer currently.

EWTPX 01003 CERTIFIED MAIL/RETURN RECEIPT

John Nagel, Township Manager
East Whiteland Township
209 Conestoga Road
Frazer, PA 19355

RE: Act 14 Notification
Application for Water Quality Management Permit
Malvern Hunt Pump Station Redirection

Dear Mr. Nagel:

The purpose of this notification is to inform you of our intent to submit a Water Quality Management Permit (WQMP) application to the Pennsylvania Department of Environmental Protection (DEP) for the following:

Application Type: WQMP
Applicant Name: East Whiteland Township
Facility Name: Malvern Hunt Pump Station
Facility Address: 30 Corbin Drive
Municipality: East Whiteland Township
County: Chester
Description of Project: This permit application is required to establish a new Water Quality Management (WQM) Permit for the existing Malvern Hunt Pump Station. Currently the WQM Permit is grouped-in with the Malvern Hunt WWTP. The Township desires to decommission the WWTP and redirect flows from the WWTP to the existing public sewer system via an approximately 250 LF extension of the force main for treatment at Valley Forge Sewer Authority WWTP.

This notice is required by Act 14, which amended the Commonwealth of Pennsylvania Administrative Code. Act 14 requires that each applicant for a DEP permit give written notice to the municipality and the county in which the permitted activity is located. The written notices must be received by the Municipality and County at least 30 days before the DEP may issue or deny a permit.

If you have any questions, please contact the Pennsylvania Department of Environmental Protection (DEP) at the office below:

Southeast Regional Office
2 East Main Street
Norristown, PA 19401

Sincerely,

PENNONI ASSOCIATES INC.

West Chester, PA 19380

RE: Act 14 Notification
Application for Water Quality Management Permit
Malvern Hunt Pump Station Redirection

Dear Mrs. Moskowitz:

The purpose of this notification is to inform you of our intent to submit a Water Quality Management Permit (WQMP) application to the Pennsylvania Department of Environmental Protection (DEP) for the following:

Application Type: WQMP
Applicant Name: East Whiteland Township
Facility Name: Malvern Hunt Pump Station
Facility Address: 30 Corbin Drive
Municipality: East Whiteland Township
County: Chester
Description of Project: This permit application is required to establish a new Water Quality Management (WQM) Permit for the existing Malvern Hunt Pump Station. Currently the WQM Permit is grouped-in with the Malvern Hunt WWTP. The Township desires to decommission the WWTP and redirect flows from the WWTP to the existing public sewer system via an approximately 250 LF extension of the force main for treatment at Valley Forge Sewer Authority WWTP.

This notice is required by Act 14, which amended the Commonwealth of Pennsylvania Administrative Code. Act 14 requires that each applicant for a DEP permit give written notice to the municipality and the county in which the permitted activity is located. The written notices must be received by the Municipality and County at least 30 days before the DEP may issue or deny a permit.

If you have any questions, please contact the Pennsylvania Department of Environmental Protection (DEP) at the office below:

RE: DRBC Notification
Application for Water Quality Management Permit
Malvern Hunt Pump Station Redirection

Dear Mr. Kovach:

The purpose of this notification is to inform you of our intent to submit a Water Quality Management Permit (WQMP) application to the Pennsylvania Department of Environmental Protection (DEP) for the following:

Application Type: WQMP
Applicant Name: East Whiteland Township
Facility Name: Malvern Hunt Pump Station
Facility Address: 30 Corbin Drive
Municipality: East Whiteland Township
County: Chester
Description of Project: This permit application is required to establish a new Water Quality Management (WQM) Permit for the existing Malvern Hunt Pump Station. Currently the WQM Permit is grouped-in with the Malvern Hunt WWTP. The Township desires to decommission the WWTP and redirect flows from the WWTP to the existing public sewer system via an approximately 250 LF extension of the force main for treatment at Valley Forge Sewer Authority WWTP.

This notice is required by Act 14, which amended the Commonwealth of Pennsylvania Administrative Code. Act 14 requires that each applicant for a DEP permit give written notice to the municipality and the county in which the permitted activity is located. The written notices must be received by the Municipality and County at least 30 days before the DEP may issue or deny a permit.

If you have any questions, please contact the Pennsylvania Department of Environmental Protection (DEP) at the office below:

Southeast Regional Office
2 East Main Street
Norristown, PA 19401

Sincerely,

PENNONI ASSOCIATES INC.

Charles Faulkner

Re: Approval Letter – Minor Act 537 Plan Update
Decommissioning of Malvern Hunt Wastewater Treatment Plant
Special Study
Status: ISSUED
APS No. 38912, AUTH ID No. 1344008
East Whiteland Township
Chester County

Dear Mr. Nagel:

We have completed our review of your municipality's Act 537 Special Study for the Decommissioning of Malvern Hunt Wastewater Treatment Plant for East Whiteland Township ("Township"), Chester County, as prepared by Pennoni Associates, Inc. The plan was received by the Department of Environmental Protection ("DEP") on October 23, 2020. Additional information in support of this plan was received by DEP on February 1, 2021, February 10, 2021 and February 25, 2021. This plan is being submitted to the Department in accordance with the provisions set forth by Section 5 of the Pennsylvania Sewage Facilities Act and Chapter 71, the Administration of Sewage Facilities Program. The review was conducted in accordance with the provisions of the Pennsylvania Sewage Facilities Act.

Approval of the plan is hereby granted.

The plan provides for the decommissioning of the Malvern Hunt Wastewater Treatment Plant ("WWTP") and the connection of the Malvern Hunt development to the Township public sewer system. The existing 279 residential units within the Malvern Hunt development will connect via the existing influent pump station and an approximately 250 linear foot extension of the existing six-inch pump station force main that will connect into the existing ten-inch interceptor sewer located within the Chester Valley Trail adjacent to the WWTP lagoons.

This project will be connected to the Township's collection system and will generate 76,725 gallons of sewage per day to be treated at the Valley Forge Sewer Authority Wastewater Treatment Facility.

The existing Malvern Hunt collection and conveyance system including the pump station and force main will continue to be owned by the Township. The parcels containing the WWTP's storage lagoons and spray fields will also continue to be owned by the Township. The Township has stated that there are no redevelopment plans for either the WWTP storage lagoon parcel or the spray field parcel at this time. Should the Township consider redevelopment of either parcel in the future, the Township will contact DEP in order to determine if additional sewage facilities planning is required.

The decommissioning of the WWTP and connection of the existing development to the public sewer system shall be completed consistent with the implementation schedule received by DEP on February 1, 2021.

We ask that the Township submit an acceptable closure plan for the WWTP, storage lagoons and spray system. Unless otherwise directed to electronically submit the closure plan, mail the plan to: Department of Environmental Protection, Clean Water Program, 2 East Main Street, Norristown, PA 19401 (attention: Permits Section). The permittee must develop and submit a Closure Plan to DEP describing how and when the sewage treatment facility will be closed with a proposed schedule.

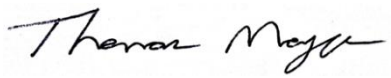
This approval is specifically made contingent upon the applicant acquiring all necessary property rights by easement or otherwise, providing for the satisfactory construction, operation, maintenance, and replacement of all sewerage structures associated with the approved discharge in, along, or across private property, with full rights of ingress, egress and regress.

Any person aggrieved by this action may appeal the action to the Environmental Hearing Board (Board), pursuant to Section 4 of the Environmental Hearing Board Act, 35 P.S. § 7514, and the Administrative Agency Law, 2 Pa.C.S. Chapter 5A. The Board's address is:

Environmental Hearing Board
Rachel Carson State Office Building, Second Floor
400 Market Street
P.O. Box 8457
Harrisburg, PA 17105-8457

TDD users may contact the Environmental Hearing Board through the Pennsylvania Relay Service, 800-654-5984.

Appeals must be filed with the Board within 30 days of receipt of notice of this action unless the appropriate statute provides a different time. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decisional law.



A Notice of Appeal form and the Board's rules of practice and procedure may be obtained online at http://ehb.courtapps.com or by contacting the Secretary to the Board at 717-787-3483. The Notice of Appeal form and the Board's rules are also available in braille and on audiotape from the Secretary to the Board.

IMPORTANT LEGAL RIGHTS ARE AT STAKE. YOU SHOULD SHOW THIS DOCUMENT TO A LAWYER AT ONCE. IF YOU CANNOT AFFORD A LAWYER, YOU MAY QUALIFY FOR FREE PRO BONO REPRESENTATION. CALL THE SECRETARY TO THE BOARD AT 717-787-3483 FOR MORE INFORMATION. YOU DO NOT NEED A LAWYER TO FILE A NOTICE OF APPEAL WITH THE BOARD.

IF YOU WANT TO CHALLENGE THIS ACTION, YOUR APPEAL MUST BE FILED WITH AND RECEIVED BY THE BOARD WITHIN 30 DAYS OF RECEIPT OF NOTICE OF THIS ACTION.

If you have any questions, please contact Ms. Kelly Boettlin of this office at 484.250.5184 or at kboettlin@pa.gov.

Sincerely,

Mr. Thomas Magge
Regional Manager

SPECIAL CONDITIONS

Water Quality Management Permit No. 1599418

Malvern Hunt WWTP

East Whiteland Township, Chester County

I. Discharge Limitations and Monitoring Requirements

Effluent from the sewage treatment plant shall be sampled at a point after chlorination and shall be limited at all times as follows:

	Discharge Limitations (mg/l)			Monitoring Requirements	
Parameter	Average Monthly	Average Weekly	Instantaneous Maximum	Measurement Frequency	Sample Type
Influent Flow (mgd)	0.105			Continuous	Recorded
$CBOD_5$	25		50	1/Month	Grab
Suspended Solids	30		60	1/Month	Grab
Fecal Coliform	200/100 ml as geometric average			1/Month	Grab
pH	Within limits of 6.0 to 9.0 standard units at all times			1/Month	Grab

Additional treatment requirements include the satisfactory disposal of sludge and the reduction of quantities of oils, greases, acids, alkalis, toxic, taste and odor producing substances, inimical to the public interest to levels which will not pollute the receiving waters.

Monitoring results shall be reported monthly on the Discharge Monitoring Report (DMR). The term "grab" sample means an individual sample collected in less than 15 minutes. Samples and measurements taken as required, herein, shall be representative of the volume and nature of the monitored discharge.

II. Copies of monthly Discharge Monitoring Reports must be submitted within 28 days of the end of the monitoring period to:

Department of Environmental Protection
Southeast Regional Office
Water Management
2 East Main Street
Norristown, PA 19401

III. Groundwater Monitoring Requirements

The permittee shall effectively monitor the quality of the groundwater. The parameters to be tested, and frequency of analysis and other monitoring requirements shall be as follows:

A. Quarterly analysis of groundwater sampled at groundwater monitoring wells **MW-L1, MW-L2, MW-L3, MW-S1, MW-S2, MW-S3, MW-S6, MW-S7, and MW-S8,** shall consist of: static water level, sampling depth, turbidity, pH, chloride, total phosphorus, ammonia nitrogen, nitrate nitrogen, nitrite nitrogen, total dissolved solids, fecal coliform, and alkalinity.

B. Groundwater elevations must be measured prior to purging the groundwater monitoring well.

C. Before collection of the groundwater sample, a groundwater monitoring well shall be properly purged and allowed to recover to at least 90 percent of the well volume that was present prior to purging.

D. All groundwater samples shall be collected from within the top five feet of the water elevation within the well column.

IV. Groundwater Monitoring Data Reporting Requirements

All groundwater data shall be submitted to DEP **annually** and be in **report form.** The report shall be due to DEP within 28 days of the end of the month of permit issuance. For example, if your permit was issued on March 4th, then your annual report is due by April 28th. The annual report shall be mailed under separate cover and addressed to:

Department of Environmental Protection
Southeast Regional Office
Water Management Program
2 East Main Street
Norristown, PA 19401

Attention: Hydrogeologist
Planning Section

V. The annual groundwater monitoring report shall include the following information:

A. General Information

i. Facility name
ii. Facility permit number
iii. Facility location (including municipality and county)
iv. Facility contact information:

a. permittee name, address, and telephone number
b. contact name and title
c. facility operator name, address, and telephone number
d. facility consultant name, address, and telephone number

B. Site Data

i. A brief narrative that provides the date and description of any facility event which may have impacted any part of the groundwater monitoring program. (e.g., collapse of groundwater monitoring well, etc.).

ii. Average effluent flow for the year covered by this report.

iii. In tabular form, the following information needs to be provided for at least the last 5 years of system operation:

a. Date of sampling
b. Groundwater elevations
c. Sampling depth
d. Identification of upgradient and downgradient wells
e. The results of the analysis of the samples

iii. Background groundwater data generated prior to system start-up. **This information is absolutely needed and needs to be included in the data tabulation.**

C. Comprehensive Groundwater Evaluation (CGE)

As part of the facility's 5-year permit renewal application, the permittee shall submit a report that is a result of a comprehensive evaluation of the systems impact on groundwater. A Registered P.G. must identify any trends which may pose a threat to human health or certify that none are present. Should adverse impacts to groundwater be identified, the permittee needs to recommend actions to address the potential threat.

D. **Groundwater Background Report**

Within 60 days of system start up, or upon issuance of permit renewal a Groundwater Background Report shall be submitted to DEP. The report shall include the follow information:

i. Site Information

a. Brief narrative, including site limitations.
b. Soil type and bedrock lithology beneath the absorption areas.
c. Site drawings showing general location of absorption fields and monitoring wells. Drawings must show site topography.

ii. Construction details of each groundwater monitoring well shall include:

a. Well depth.
b. Casing depth.
c. Static water levels.
d. Surface elevation.
e. Well log.
f. Water bearing zones.
g. Top of casing elevation.
h. Ground surface elevation.

VI. Unless, otherwise, specified in this permit, the test procedures for analysis of pollutants shall be those contained in 40 C.F.R. Part 136, or alternative test procedures approved pursuant to that Part. For the analysis of CBOD5, consult Section 507 of Standard Methods.

VII. Effective disinfection to control disease producing organisms shall be the production of an effluent which will contain a concentration neither greater than 200/100 ml of Fecal Coliform organisms, as a geometric average value nor greater than 1000/100 ml of these organisms in a more than 10 percent of the samples tested.

VIII. If the permittee monitors any pollutant more frequently than the permit requires, the results of this monitoring shall be incorporated, as appropriate, into the calculations used to report self-monitoring data on the DMR.

IX. The authorization to discharge contained in Section D of this permit shall expire in five years from the date of issuance, or reissuance. Application for renewal of this permit, or notification of intent to cease discharging by the expiration date, must be submitted to the Department at least 180 days prior to the above expiration date (unless permission has been granted by the Department for submission at a later date). In the event that a timely and complete application for renewal has been submitted and the Department is unable, through no fault of the permittee, to reissue the permit before the above expiration date, the terms and conditions of this permit will be automatically continued and will remain fully effective and enforceable pending the grant or denial of the application for permit renewal. The application for renewal shall be submitted on the appropriate Water Quality Management Part II Application forms and shall include a tabulated summary of all groundwater monitoring data for the previous five years, including a discussion of groundwater quality trends resulting from this discharge.

X. Sprayfield Weekly Maximum Hydraulic Loadings

A. Effluent flows to each sprayfield must be consistent with the maximum hydraulic loading requirements of the following tables, which provide the weekly maximum gallons for each irrigation zone.

MAXIMUM WEEKLY SPRAYFIELD HYDRAULIC LOADINGS IN GALLONS

Spray Zone 1 6.16 Acres Woods		
Month	Inches/Acre/Week	Maximum/Week Gallons
January	0.50	83,671
February	0.50	83,671
March	1.27	212,539
April	1.50	251,020
May	2.00	334,691
June	2.50	418,369
July	2.50	418,369
August	2.50	418,369
September	2.50	418,369
October	1.55	259,410
November	1.16	194,126
December	0.50	83,671

Spray Zone 2 6.19 Acres Woods		
Month	Inches/Acre/Week	Maximum/Week Gallons
January	0.50	84,079
February	0.50	84,079
March	1.27	213,574
April	1.50	252,243
May	2.00	336,321
June	2.50	420,406
July	2.50	420,406
August	2.50	420,406
September	2.50	420,406
October	1.55	260,673
November	1.16	195,072
December	0.50	84,079

Spray Zone 3 6.15 Acres Woods		
Month	Inches/Acre/Week	Maximum/Week Gallons
January	0.50	83,536
February	0.50	83,536
March	1.27	212,194
April	1.50	250,613
May	2.00	334,148
June	2.50	417,690
July	2.50	417,690
August	2.50	417,690
September	2.50	417,690
October	1.55	258,989
November	1.16	193,811
December	0.50	83,536

B. The permittee shall include with the monthly Discharge Monitoring Report a Supplemental Land Application System Form 3800-FM-BPNPSM0449 that indicates the gallons per day discharged to the spray irrigation zones.

C. Spray irrigation events shall consist of simultaneous operation of two zones with one zone left off for a week-long resting period. All zones shall be rested each month.

D. Application of the effluent shall be managed to prevent runoff from the permitted spray fields and ponding of effluent.

E. No irrigation is to occur on frozen soils.

F. No irrigation is to occur if more than 0.5 inches of rainfall has fallen during the previous 24 hours.

G. The operator is to assess soil moisture content and soil/vegetation conditions frequently. It is the operator's responsibility to inspect the fields on a routine basis to prevent and/or address damage to the irrigation fields.

H. The spray fields shall be maintained to ensure that vegetation does not interfere with or impair proper operation of the spray heads.

I. Fallen trees in wooded spray fields are required to be removed. All work must be conducted during dry or frozen soil conditions to prevent damage to the soil.

XI. At all times, the wastewater level in the storage lagoon shall be managed within the low and high water level parameters as designed. The water level shall be controlled so that a freeboard of at least 24 inches is maintained at all times. The Department must be notified if the water level is anticipated to enter freeboard.

XII. Recording of Results

For each measurement or sample taken pursuant to the requirements of this permit, the permittee shall record the following information:

A. The exact place, date, and time of sampling or measurement.
B. The person(s) who performed the sampling or measurement.
C. The dates the analyses were performed.
D. The person(s) who performed the analyses.
E. The analytical techniques or methods used.
F. The results of such analyses.

XIII. Recordkeeping and Retention

The permittee shall keep records of operation and efficiency of the wastewater treatment facilities. All records of monitoring activities and results (including all original strip chart recordings for continuous monitoring instrumentation and calibration and maintenance records), copies of all reports required by this permit, and records of all data used to complete the application for this permit shall be retained by the permittee for three (3) years. The three-year period shall be extended as requested by the Department.

XIV. The facility shall be operated under the charge of a responsible operator(s) certified under the Pennsylvania Water and Wastewater Systems Operations Certification Act (Act 11). The operator(s) shall comply with the continuing education requirements required under the regulations and guidelines related to Act 11.

XV. Laboratory Certification

Facilities that test or analyze environmental samples used to demonstrate compliance with this permit shall be in compliance with laboratory accreditation requirements of act 90 of 2002 (27 Pa. Code C.S. §§ 4101-4113) and 25 Pa. Code Chapter 252, relating to environmental laboratory accreditation. An environmental laboratory is any facility engaged in the testing or analysis of environmental samples required by a statute administered by the Department relating to the protection of the environment or of public health, safety, and welfare.

XVI. Right of Entry

Pursuant to Sections 5(b) and 305 of Pennsylvania's Clean Stream Law, the permittee shall allow authorized representatives of Department of Environmental Protection upon the presentation of credentials and other documents as may be required by law:

A. To enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit.

B. To have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit.

C. To inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit.

D. To sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act or The Clean Streams Law, any substances or parameters at any location.

XVII. If there is a change in ownership of this facility or in permittee name, an application for transfer of permit must be submitted to the Department.

REVISION DATE: 3/3/2020

MAP NOTES:

Mapping information was derived from various planning documents including Schoor DePalma's Sanitary Sewer Meter Location Plan, Kohli & Associates Township plan, Roy F. Weston's Master Sanitary Sewer System Plan, Chester County Recorder of Deeds Plans, and township as-built plans received by ARRO. The mapping is incomplete and will be improved as as-built and other plan information is updated into the GIS. This GIS database will provide a framework for modeling the collection system to analyze capacity issues and make recommended improvements to mitigate capacity deficiencies.

Data Sources: East Whiteland Township, Schoor DePalma, Kohli & Associates, Roy F. Weston, Chester County Recorder of Deeds and ARRO.

NOTES:

1. PLANEBROOK ROAD PUMP STATION WAS PLACED IN SERVICE IN NOVEMBER OF 2018 AND THE FRAME AVENUE PUMP STATION WAS DECOMISSIONED
2. CHURCH ROAD PUMP STATION WAS DECOMMISSIONED IN MARCH OF 2020

WATER QUALITY MANAGEMENT PERMIT FOR THE VALLEY FORGE SEWER AUTHORITY WASTEWATER TREATMENT PLANT

pennsylvania
DEPARTMENT OF ENVIRONMENTAL PROTECTION
SOUTHEAST REGIONAL OFFICE

December 28, 2010

Mr. Martin Goldberg, P.E.
Operations Manager
Valley Forge Sewer Authority
333 Pawlings Road
Phoenixville, PA 19460

Re: Valley Forge Sewer Authority
WWTP – Expansion
Sewerage 1599422-A2
File Type: Permit
Schuylkill Township
Chester County

Dear Mr. Goldberg:

Your permit is enclosed.

You must comply with all Standard and Special Conditions attached to this permit. Construction must be done in accordance with the permit application and all supporting documentation. Please review the permit conditions and the supporting documentation submitted with your application before starting construction.

Any person aggrieved by this action may appeal, pursuant to Section 4 of the Environmental Hearing Board Act, 35 P.S. Section 7514, and the Administrative Agency Law, 2 Pa.C.S. Chapter 5A, to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, 717.787.3483. TDD users may contact the Board through the Pennsylvania Relay Service, 800.654.5984. Appeals must be filed with the Environmental Hearing Board within 30 days of receipt of written notice of this action unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in braille or on audiotape from the Secretary to the Board at 717.787.3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decisional law.

IF YOU WANT TO CHALLENGE THIS ACTION, YOUR APPEAL MUST REACH THE BOARD WITHIN 30 DAYS. YOU DO NOT NEED A LAWYER TO FILE AN APPEAL WITH THE BOARD.

IMPORTANT LEGAL RIGHTS ARE AT STAKE, HOWEVER, SO YOU SHOULD SHOW THIS DOCUMENT TO A LAWYER AT ONCE. IF YOU CANNOT AFFORD A LAWYER, YOU MAY QUALIFY FOR FREE PRO BONO REPRESENTATION. CALL THE SECRETARY TO THE BOARD (717.787.3483) FOR MORE INFORMATION.

If you have any questions, please call Mr. James Roth at 484.250.5169.

Sincerely,

Jenifer Fields, P.E.
Regional Manager

C. LOCATION (Municipality, County): **Schuylkill Township** **Chester County**	SITE ID#: **255005**

D. THIS AMENDMENT APPROVES THE EXPANSION OF SEWERAGE FACILITIES FROM 9.2 MGD to 11.75 MGD. MODFICATIONS TO ACCOMMODATE THE EXPANSION CONSIST OF: **construction of a new headworks facility, maintenance and design improvements to the primary clarifier system, construction of a third aeration tank, installation of a fourth secondary clarifier, upgrades to the return activated sludge system, installation of a third gravity sludge thickener, installation of a third sludge dewatering centrifuge, replacement of scum box pumps, various plant electrical improvements, and modifications to the Operations Building odor control system.**

Pump Stations: ____ Design Capacity: ____ GPM Average Annual Flow: ____ GPD	Manure Storage: Volume _____ MG Freeboard: _____ inches	Industrial Wastewater/Sewage Treatment Facility: Annual Average Flow: **11.75** MGD Design Hydraulic Capacity: **11.75** MGD Design Organic Capacity: **26,700** lb/day

E. APPROVAL GRANTED BY THIS PERMIT IS SUBJECT TO THE FOLLOWING:

1. **New Permits:** All construction, operations, and procedures shall be in accordance with the Water Quality Management Permit application dated ____, its supporting documentation, and addendums dated ____, which are hereby made a part of this permit.

   Amendments: All construction, operations, and procedures shall be in accordance with the Water Quality Management Permit Amendment application dated **09/15/10** and its supporting documentation, and addendums dated ____, which are hereby made a part of this amendment.

   Except for any herein approved modifications, all terms, conditions, supporting documentation and addendums approved under Water Quality Management Permits Nos. **1599422 and 1599422A1** dated **06/19/00 and 03/22/10, respectively**, shall remain in effect.

   Transfers: Water Quality Management Permit No. ____ dated ____ and conditions, supporting documentation and addendums are also made part of this transfer.

2. **Permit Conditions Relating to Sewerage** are attached and made part of this permit.

3. Special Conditions numbered ____ are attached and made part of this permit.

F. THE AUTHORITY GRANTED BY THIS PERMIT IS SUBJECT TO THE FOLLOWING FURTHER QUALIFICATIONS:

1. If there is a conflict between the application or its supporting documents and amendments and the attached conditions, the attached conditions shall apply.
2. Failure to comply with the rules and regulations of DEP or with the terms or conditions of this permit shall void the authority given to the permittee by the issuance of thia permit.
3. This permit is issued pursuant to the Clean Streams Law Act of June 22, 1937, P.L. 1987, as amended 35 P.S. §691.1 *et seq.* Issuance of this permit shall not relieve the permittee of any responsibility under any other law.

PERMIT CONDITIONS RELATING TO SEWERAGE

For use in Water Quality Management Permits

(Place a √ in the box that applies)

General

☒ 1. Consistent with the Department of Environmental Protection's (DEP) technical guidance document *Conducting Technical Reviews of Water Quality Management Permit Wastewater Treatment Facilities* (DEP ID: 362-2000-007) available on DEP's website at www.dep.state.pa.us . DEP considers the registered Professional Engineer whose seal is affixed to the design documents to be fully responsible for the adequacy of all aspects of the facility design.

☒ 2. The permittee shall adopt and enforce an ordinance requiring the abandonment of privies, cesspools or similar receptacles for human waste and onlot sewage disposal systems on the premises of occupied structures accessible to public sewers. All such structures must be connected to the public sewers.

☐ 3. The outfall sewer or drain shall be extended to the low water mark of the receiving body of water. Where necessary to ensure proper mixing and waste assimilation, an outfall sewer or drain may be extended with appurtenances below the low water mark and into the bed of a navigable stream provided that the permittee has secured an easement, right-of-way, license or lease from DEP in accordance with Section 15 of the Dam Safety and Encroachments Act, the Act of November 26, 1978, P.L. 1375, as amended.

☒ 4. The approval is specifically made contingent on the permittee acquiring all necessary property rights, by easement or otherwise, providing for the satisfactory construction, operation, maintenance and replacement of all sewers or sewerage structures in, along or across private property with full rights of ingress, egress and regress.

☒ 5. When construction of the approved sewerage facilities is completed and before they are placed in operation, the permittee shall notify DEP in writing so that a DEP representative may inspect the facilities.

☒ 6. If, at any time, the sewerage facilities covered by this permit create a public nuisance, including but not limited to, causing malodors or causing environmental harm to waters of the Commonwealth, DEP may require the permittee to adopt appropriate remedial measures to abate the nuisance or harm.

☐ 7. This permit authorizes the construction and operation of the proposed sewerage facilities until such time as facilities for conveyance and treatment at a more suitable location are installed and capable of receiving and treating the permittee's sewage. Such facilities must be in accordance with the applicable municipal official plan adopted pursuant to Section 5 of the Pennsylvania Sewage Facilities Act, the Act of January 24, 1966, P.L. 1535 as amended. When such municipal sewerage facilities become available, the permittee shall provide for the conveyance of the sewage to these sewerage facilities, abandon the use of these approved facilities and notify DEP accordingly. This permit shall then, upon notice from DEP, terminate and become null and void and shall be relinquished to DEP.

☒ 8. This permit does not relieve the permittee of its obligations to comply with all federal, interstate, state or local laws, ordinances and regulations applicable to the sewerage facilities.

☒ 9. This permit does not give any real or personal property rights or grant any exclusive privileges, nor shall it be construed to grant or confirm any right, easement or interest in, on, to or over any lands which belong to the Commonwealth.

☐ 10. The authority granted by this permit is subject to all effluent requirements, monitoring requirements and other conditions as set forth in NPDES Permit No. **PA0043974** and all subsequent amendments and renewals. No discharge is authorized from these facilities unless approved by an NPDES Permit.

Construction

☒ 11. An Erosion and Sedimentation (E&S) Plan must be developed prior to construction of the permitted facility, pursuant to Title 25 Pa. Code Chapter 102, and implemented during and after the earth disturbance activity.

If the activity involves 5 or more acres of earth disturbance, or from 1 to 5 acres of earth disturbance with a point source discharge to surface waters of the Commonwealth, an NPDES permit for the Discharge of Stormwater Associated with Construction Activity is required.

In addition to the state NPDES permitting requirements, some municipalities, through local ordinances, require the E&S Control Plan to be reviewed and approved by the local County Conservation District office prior to construction. For specific information regarding E&S control planning approval and NPDES permitting requirements, please contact your local County Conservation District office.

☒ 12. The facilities shall be constructed under the supervision of a Pennsylvania registered Professional Engineer in accordance with the approved reports, plans and specifications.

☒ 13. A Pennsylvania registered Professional Engineer shall certify that construction of the permitted facilities was completed in accordance with the application and design plans submitted to DEP, using "Post Construction Certification" (3800-PM-WSWM0179a). It is the permittee's responsibility to ensure that a Professional Engineer is on-site to provide the necessary oversight and/or inspections to certify the facilities. The certification must be submitted to DEP before the facility is placed in operation. If requested, "es-built" drawings, photographs (if available) and a description of any DEP-approved deviations from the application and design plans must be submitted to DEP within 30 days of certification.

☐ 14. Manhole inverts shall be formed to facilitate the flow of the sewage and to prevent the stranding of sewage solids. The manhole structure shall be built to prevent undue infiltration, entrance of street wash or grit and provide safe access to facilitate manhole maintenance activities.

☐ 15. The local Waterways Conservation Officer of the Pennsylvania Fish and Boat Commission (PFBC) shall be notified when the construction of any stream crossing and/or outfall is started and completed. A written permit must be secured from the PFBC if the use of explosives in any waterways is required and the permittee shall notify the local Waterways Conservation Officer when explosives are to be used.

Operation and Maintenance

☒ 16. The permittee shall maintain records of "as-built" plans showing all the treatment facilities as actually constructed together with facility operation and maintenance (O&M) manuals and any other relevant information that may be required. Upon request, the "as-built" plans and O&M manuals shall be filed with DEP.

☐ 17. The sewers shall have adequate foundation support as soil conditions require. Trenches shall be back-filled to ensure that sewers will have proper structural stability, with minimum settling and adequate protection against breakage. Concrete used in connection with these sewers shall be protected from damage by water, freezing, drying or other harmful conditions until cured.

☒ 18. Stormwater from roofs, foundation drains, basement drains or other sources shall not be admitted directly to the sanitary sewers.

☐ 19. The approved sewers shall be maintained in good condition, kept free of deposits by flushing or other cleaning methods and repaired when necessary.

☒ 20. The sewerage facilities shall be properly operated and maintained to perform as designed.

☒ 21. The attention of the permittee is called to the highly explosive nature of certain gases genereted by the digestion of sewage solids when these gases are mixed in proper proportions with air and to the highly toxic character of certain gases arising from such digestion or from sewage in poorly ventilated compartments or sewers. Therefore, at all places throughout the sewerage facilities where hazard of fire, explosion or danger from toxic gases may occur, the permittee shall post conspicuous permanent and legible warnings. The permittee shall instruct all employees concerning the aforesaid hazards, first aid and emergency methods of meeting such hazards and shall make all necessary equipment and material accessible.

☒ 22. An operator certified in accordance with the Water and Wastewater Systems Operator Certification Act of February 21, 2002, 63 P.S. §§1001, *et seq.* shall operate the sewage treatment plant.

☒ 23. The permittee shall properly control any industrial waste discharged into its sewerage system by regulating the rate and quality of such discharge, requiring necessary pretreatment and excluding industrial waste, if necessary, to protect the integrity or operation of the permittee's sewerage system.

☒ 24. There shall be no physical connection between a public water supply system and a sewer or appurtenance to it which would permit the passage of any sewage or polluted water into the potable water supply. No water pipe shall pass through or come in contact with any part of a sewer manhole.

☐ 25. All connections to the approved sanitary sewers must be in accordance with the corrective action plan as contained in the approved Title 25 Pa. Code Chapter 94 Municipal Wasteload Management Annual Report.

☒ 26. Collected screenings, slurries, sludge and other solids shall be handled and disposed of in compliance with Title 25 Pa. Code Chapters 271, 273, 275, 283 and 285 (related to permits and requirements for land filling, land application, incineration and storage of sewage sludge), Federal Regulations 40 CFR 257 and the Federal Clean Water Act and its amendments.

Mr. Louis F. Smith, Manager
East Goshen Township
1580 Paoli Pike
West Chester, PA 19380

Re: Ridley Creek STP Upgrades
Sewerage 1502404
File Type: Permit
East Goshen Township
Chester County

Dear Mr. Smith:

Your permit is enclosed.

You must comply with all Standard and Special Conditions attached to this permit. Construction must be done in accordance with the permit application and all supporting documentation. Please review the permit conditions and the supporting documentation submitted with your application before starting construction.

Enclosed is the "Sewage and Industrial Wastewater Facilities Construction Certification" form. A Pennsylvania-registered Professional Engineer must sign and complete this form prior to startup of the facilities (see Special Conditions). You or your authorized representative must also sign the form. This certification and other post-construction documentation must be submitted to the Department within 30 days following startup of the facilities.

Any person aggrieved by this action may appeal, pursuant to Section 4 of the Environmental Hearing Board Act, 35 P.S. Section 7514, and the Administrative Agency Law, 2 Pa.C.S. Chapter 5A, to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, 717-787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, 800-654-5984. Appeals must be filed with the Environmental Hearing Board within 30 days of receipt of written notice of this action unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in braille or on audiotape from the Secretary to the Board at 717-787-3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decisional law.

IF YOU WANT TO CHALLENGE THIS ACTION, YOUR APPEAL MUST REACH THE BOARD WITHIN 30 DAYS. YOU DO NOT NEED A LAWYER TO FILE AN APPEAL WITH THE BOARD.

IMPORTANT LEGAL RIGHTS ARE AT STAKE, HOWEVER, SO YOU SHOULD SHOW THIS DOCUMENT TO A LAWYER AT ONCE. IF YOU CANNOT AFFORD A LAWYER, YOU MAY QUALIFY FOR FREE PRO BONO REPRESENTATION. CALL THE SECRETARY TO THE BOARD (717-787-3483) FOR MORE INFORMATION.

If you have any questions, please call Mr. David Talley at 484-250-5181.

Sincerely,

Jenifer Fields, P.E.

Dear Mr. Smith:

Your permit is enclosed.

You must comply with all Standard and Special Conditions attached to this permit.

We would like to bring your attention to the Department's new electronic Discharge Monitoring Report (eDMR) program. The program can be accessed through the Internet at www.dep.state.pa.us/edmr and can be used in lieu of paper DMR submissions. Please find enclosed additional information concerning eDMR. We highly encourage your participation in this program.

Any person aggrieved by this action may appeal, pursuant to Section 4 of the Environmental Hearing Board Act, 35 P.S. Section 7514, and the Administrative Agency Law, 2 Pa.C.S. Chapter 5A, to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, 717.787.3483. TDD users may contact the Board through the Pennsylvania Relay Service, 800.654.5984. Appeals must be filed with the Environmental Hearing Board within 30 days of receipt of written notice of this action unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in braille or on audiotape from the Secretary to the Board at 717.787.3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decisional law.

IF YOU WANT TO CHALLENGE THIS ACTION, YOUR APPEAL MUST REACH THE BOARD WITHIN 30 DAYS. YOU DO NOT NEED A LAWYER TO FILE AN APPEAL WITH THE BOARD.

PERMIT ISSUED: February 21, 2012

BY: _____

TITLE: Water Management Program Manager

Re 30 (joh11wqm)363-3a

Sewerage Permit No. 1500410
East Goshen Municipal Authority
East Goshen Township, Chester County

This permit is subject to the following Special Condition(s):

I. **Groundwater Monitoring Requirements**

The permittee shall effectively monitor the quality of the groundwater. The parameters to be tested and frequency of analysis and other monitoring requirements shall be as follows:

- Quarterly analysis of groundwater sampled at groundwater monitoring wells MW-1, MW-2, and MW-3 shall consist of: static water level, sampling depth, turbidity, pH, chloride, total phosphates, ammonia nitrogen, nitrate nitrogen, nitrite nitrogen, total dissolved solids, fecal coliform, and alkalinity.

- All groundwater monitoring wells shall be properly purged prior to collection of the groundwater sample.

- All groundwater samples shall be collected from within the top five feet of the water elevation within the well column.

II. **Groundwater Monitoring Data Reporting Requirements**

All groundwater data shall be submitted to the Department of Environmental Protection (Department) **annually** and be in **report form.** The report shall be due to the Department within 28 days of the end of your annual permit cycle. For example, if your permit was issued on March 4, 2008, then your Annual Report is due by April 28, 2009. The Annual Report shall be mailed under separate cover and addressed to:

Department of Environmental Protection
Southeast Regional Office
Water Management Program
2 East Main Street
Norristown, PA 19401

Attention: Hydrogeologist
Planning Section

The annual groundwater monitoring report shall include the following information:

1. General Information

   A. Facility name
   B. Facility permit number
   C. Facility location (including municipality and county)

D. Facility contact information:

- Permittee name, address, and telephone number
- Contact name and title
- Facility operator name, address, and telephone number
- Facility consultant name, address, and telephone number

2. Site Information

A. Brief narrative, including site limitations.

B. Soil type and bedrock lithology beneath the absorption areas.

C. Site drawings showing general location of absorption fields and monitoring wells. Drawings must show site topography.

3. Construction details of each groundwater monitoring well shall include:

A. Well depth.
B. Casing depth.
C. Static water levels.
D. Surface elevation.
E. Well log.
F. Water bearing zones.
G. Top of casing elevation.
H. Ground surface elevation.

4. Site History

A. Date site 537 approval issued.

B. Date site permit issued.

C. Date groundwater monitoring began.

D. Date treatment plant started operation.

E. Date land application of treated wastewater started.

F. Date of any additional permit actions and description of actions (e.g., waiver of special conditions or anything else which may impact content within this permit). Include copy of any correspondence in correspondence section.

G. Date and description of any enforcement action.

H. Date and description of any facility event which impacted any part of the facility, including the groundwater monitoring wells, whether or not it resulted in an enforcement action (e.g., irrigation pump failure, collapse of groundwater monitoring well, etc.).

5. Site Data

   A. Average effluent flow for the year covered by the report.

   B. In tabular form, the following information needs to be provided for at least the last 5 years of system operation:

      i. Date of sampling.
      ii. Groundwater elevation.
      iii. Sampling depth.
      iv. Identification of upgradient and downgradient wells.
      v. The results of the analysis of the samples.

   C. Background groundwater data generated prior to system startup. **This information is absolutely needed.**

6. Correspondence

   This section shall contain copies of correspondence with the Department relevant to system operations. Correspondence to be included is the following:

   A. Recent permit modifications or amendments.
   B. Any approvals related to facility operation.
   C. Enforcement actions, including NOVs.
   D. Any other correspondence pertinent to system operation.

7. Comprehensive Groundwater Evaluation (CGE)

   As part of the facility's 5-year permit renewal application, the permittee shall submit a report that is a result of a comprehensive evaluation of the systems impact on groundwater. A Registered P.G. must identify any trends which may pose a threat to human health or certify that none are present. Should adverse impacts to groundwater be identified, the permittee needs to recommend actions to address the potential threat.

III. Effective disinfection to control disease producing organisms shall be the production of an effluent which will contain a concentration not greater than 200/100 ml of Fecal Coliform organisms, as a geometric average value nor greater than 1,000/100 ml of these organisms in more than 10 percent of the samples tested.

IV. If there is a change in ownership of this facility or in permittee name, an application for transfer of permit must be submitted to the Department.

V. Copies of monthly Discharge Monitoring Reports must be submitted within 28 days of the end of the monitoring period to:

Department of Environmental Protection
Southeast Regional Office
Water Management
2 East Main Street
Norristown, PA 19401

VI. The water level, within the impoundments, shall be controlled so that a freeboard of at least 24 inches is maintained at all times.

VII. Spray irrigation shall not occur on frozen soil or during prolonged or heavy rainfall events. Effluent may not be applied if more than 0.5 inches of rainfalls during the previous 24-hour period.

VIII. If the effluent from the, herein approved, sewage treatment facilities creates a health hazard or nuisance, the permittee shall, upon notice from the Department, provide such additional treatment as may be required by the Department.

IV. Discharge Limitations and Monitoring Requirements

Effluent from the sewage treatment plant shall be sampled from the effluent port at the pump station and shall be limited at all times as follows:

	Discharge Limitations (mg/l)			**Monitoring Requirements**	
Parameter	**Average Monthly**	**Average Weekly**	**Instantaneous Maximum**	**Measurement Frequency**	**Sample Type**
Flow (mgd)	0.135			Continuous	Recorded
$CBOD_5$	25	40	50	1/Month	8 Hour Composite
Suspended Solids	30	45	60	1/Month	8 Hour Composite
Fecal Coliform	200/100 ml as geometric average			1/Month	Grab
pH	Within limits of 6.0 to 9.0 standard units at all times			1/Month	Grab

*Total Nitrogen = Total Kjeldahl Nitrogen + Nitrite (NO_2) + Nitrate (NO_3)

Additional treatment requirements include the satisfactory disposal of sludge and the reduction of quantities of oils, greases, acids, alkalis, toxic, taste, and odor producing substances, inimical to the public interest to levels which will not pollute the receiving waters. Monitoring results shall be reported monthly on the Discharge Monitoring Report (DMR). The term "composite" sample means a combination of individual samples collected at regular intervals over a time period. The term "grab" sample means an individual sample collected in less than 15 minutes. Samples and measurements taken as required, herein, shall be representative of the volume and nature of the monitored discharge.

X. The authorization to discharge contained in Section C of this permit shall expire in 5 years from the date of issuance, or reissuance. Application for renewal of this permit, or notification of intent to cease discharging by the expiration date, must be submitted to the Department at least 180 days prior to the above expiration date (unless permission has been granted by the Department for submission at a later date). In the event that a timely and complete application for renewal has been submitted and the Department is unable, through no fault of the permittee, to reissue the permit before the above expiration date, the terms and conditions of this permit will be automatically continued and will remain fully effective and enforceable pending the grant or denial of the application for permit renewal. The application for renewal shall be submitted on the appropriate Water Quality Management Part II Application forms and shall include a tabulated summary of all groundwater monitoring data for the previous 5 years, including a discussion of groundwater quality trends resulting from this discharge.

XI. Unless, otherwise, specified in this permit, the test procedures for analysis of pollutants shall be those contained in 40 C.F.R. Part 136, or alternative test procedures approved pursuant to that Part. For the analysis of $CBOD_5$, consult Section 507 of Standard Methods.

XII. Application of effluent shall be managed to prevent runoff of effluent from the permitted sprayfield and ponding of effluent in the spray area.

XIII. **Sprayfield Hydraulic Loading Requirements**

The recorded effluent flow to the Applebrook Golf Course must be consistent with the maximum hydraulic loading rates per week shown in the following table (the maximum hydraulic rates per week cannot be exceeded):

Month	Number of Spray Days	Application Rate Inches/Acre/Week	Maximum Hydraulic – Loading in Gallons per Week on 60 Acres of Wetted Golf Course Area
January	0		
February	0		
March	0		
April	27	0.6	945,000
May	31	0.6	945,000
June	30	0.6	945,000
July	31	0.6	945,000
August	31	0.6	945,000
September	30	0.6	945,000
October	31	0.6	945,000
November	0		
December	0		

At no time shall the application rate exceed 0.199-inch per hour for any spray area. The wastewater application shall be determined by the golf conrse manager based on turf conditions and best golf course management practices.

During drought emergency, the treated wastewater from the Ridley Creek sewage treatment plant for spray application shall be pumped directly to the wet well serving the spray pumps. The wastewater may be sprayed on greens, trees, fairways, and rough areas of the golf course.

XIV. If the permittee monitors any pollutant more frequently than the permit requires, the results of this monitoring shall be incorporated, as appropriate, into the calculations used to report self-monitoring data on the DMR.

XV. **Recording of Results**

For each measurement or sample taken pursuant to the requirements of this permit, the permittee shall record the following information:

1. The exact place, date, and time of sampling or measurement.

2. The person(s) who performed the sampling or measurement.

3. The dates the analyses were performed.

4. The person(s) who performed the analyses.

5. The analytical techniques or methods used.

6. The results of such analyses.

XVI. **Recordkeeping and Retention**

The permittee shall keep records of operation and efficiency of the wastewater treatment facilities. All records of monitoring activities and results (including all original strip chart recordings for continuous monitoring instrumentation and calibration and maintenance records), copies of all reports required by this permit, and records of all data used to complete the application for this permit shall be retained by the permittee for three (3) years. The three-year period shall be extended as requested by the Department.

XVII. Consistent with Department policy, the Department did not conduct a detailed technical review of the application for this permit. The Department considers the registered professional engineer whose seal is affixed to the design documents, to be fully responsible for the adequacy of all aspects of the facility design.

XVIII. **Laboratory Certification**

The Environmental Laboratory Accreditation Act of 2002 requires that all environmental laboratories register with the Department. An environmental laboratory is any facility engaged in the testing or analysis of environmental samples required by a statute administered by the Department relating to the protection of the environment or of public health, safety, and welfare.

NPDES PERMIT – VALLEY FORGE SEWER AUTHORITY
WASTEWATER TREATMENT PLANT

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF CLEAN WATER

pennsylvania
DEPARTMENT OF ENVIRONMENTAL PROTECTION

AUTHORIZATION TO DISCHARGE UNDER THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM DISCHARGE REQUIREMENTS FOR PUBLICLY OWNED TREATMENT WORKS (POTWs)

NPDES PERMIT NO: PA0043974

In compliance with the provisions of the Clean Water Act, 33 U.S.C. Section 1251 *et seq.* ("the Act") and Pennsylvania's Clean Streams Law, as amended, 35 P.S. Section 691.1 *et seq.*,

Valley Forge Sewer Authority
333 Pawling Road
Phoenixville, PA 19460-2656

is authorized to discharge from a facility known as **Valley Forge Sewer Authority WWTP**, located at **333 Pawling Road, Schuylkill Township, Chester County**, to **Schuylkill River (WWF, MF)** in Watershed(s) **3-F** in accordance with effluent limitations, monitoring requirements and other conditions set forth in Parts A, B and C hereof.

THIS PERMIT SHALL BECOME EFFECTIVE ON JANUARY 1, 2020

THIS PERMIT SHALL EXPIRE AT MIDNIGHT ON DECEMBER 31, 2024

The authority granted by this permit is subject to the following further qualifications:

1. If there is a conflict between the application, its supporting documents and/or amendments and the terms and conditions of this permit, the terms and conditions shall apply.

2. Failure to comply with the terms, conditions or effluent limitations of this permit is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application. (40 CFR 122.41(a))

3. A complete application for renewal of this permit, or notice of intent to cease discharging by the expiration date, must be submitted to DEP at least 180 days prior to the above expiration date (unless permission has been granted by DEP for submission at a later date), using the appropriate NPDES permit application form. (40 CFR 122.41(b), 122.21(d))

   In the event that a timely and complete application for renewal has been submitted and DEP is unable, through no fault of the permittee, to reissue the permit before the above expiration date, the terms and conditions of this permit, including submission of the Discharge Monitoring Reports (DMRs), will be automatically continued and will remain fully effective and enforceable against the discharger until DEP takes final action on the pending permit application. (25 Pa. Code §§ 92a.7(b), (c))

4. This NPDES permit does not constitute authorization to construct or make modifications to wastewater treatment facilities necessary to meet the terms and conditions of this permit.

DATE PERMIT ISSUED December 11, 2019

ISSUED BY /s/

Total Phosphorus	XXX	XXX	XXX	XXX	Report	XXX	Upon Request	Grab
Iron, Dissolved	XXX	XXX	XXX	XXX	Report	XXX	Upon Request	Grab

Samples taken in compliance with the monitoring requirements specified above shall be taken at the following location(s):

at Outfall 002

PART A - EFFLUENT LIMITATIONS, MONITORING, RECORDKEEPING AND REPORTING REQUIREMENTS (Continued)

Additional Requirements

1. The permittee may not discharge:

   a. Floating solids, scum, sheen or substances that result in observed deposits in the receiving water. (25 Pa Code § 92a.41(c))

   b. Oil and grease in amounts that cause a film or sheen upon or discoloration of the waters of this Commonwealth or adjoining shoreline, or that exceed 15 mg/l as a daily average or 30 mg/l at any time (or lesser amounts if specified in this permit). (25 Pa. Code § 92a.47(a)(7), § 95.2(2))

   c. Substances in concentration or amounts sufficient to be inimical or harmful to the water uses to be protected or to human, animal, plant or aquatic life. (25 Pa Code § 93.6(a))

   d. Foam or substances that produce an observed change in the color, taste, odor or turbidity of the receiving water, unless those conditions are otherwise controlled through effluent limitations or other requirements in this permit. For the purpose of determining compliance with this condition, DEP will compare conditions in the receiving water upstream of the discharge to conditions in the receiving water approximately 100 feet downstream of the discharge to determine if there is an observable change in the receiving water. (25 Pa Code § 92a.41(c))

2. The monthly average percent removal of BOD_5 or $CBOD_5$ and TSS must be at least 85% for POTW facilities on a concentration basis except where 25 Pa. Code 92a.47(g) and (h) are applicable to facilities with combined sewer overflows (CSOs) or as otherwise specified in this permit. (25 Pa. Code § 92a.47(a)(3))

3. If the permit requires the reporting of average weekly statistical results, the maximum weekly average concentration and maximum weekly average mass loading shall be reported, regardless of whether the results are obtained for the same or different weeks.

4. The permittee shall monitor the sewage effluent discharge(s) for the effluent parameters identified in the Part A limitations table(s) during all bypass events at the facility, using the sample types that are specified in the limitations table(s). Where the required sample type is “composite”, the permittee must commence sample collection within one hour of the start of the bypass, wherever possible. The results shall be reported on the Daily Effluent Monitoring supplemental form (3800-FM-BCW0435) and be incorporated into the calculations used to report self-monitoring data on Discharge Monitoring Reports (DMRs).

Footnotes

(1) When sampling to determine compliance with mass effluent limitations, the discharge flow at the time of sampling must be measured and recorded.

(2) This is the minimum number of sampling events required. Permittees are encouraged, and it may be advantageous in demonstrating compliance, to perform more than the minimum number of sampling events.

Supplemental Information

(1) The hydraulic design capacity of 11.75 million gallons per day for the treatment facility is used to prepare the annual Municipal Wasteload Management Report to help determine whether a "hydraulic overload" situation exists, as defined in Title 25 Pa. Code Chapter 94.

(2) The effluent limitations for Outfall 001 were determined using an effluent discharge rate of 11.75 MGD.

(3) The organic design capacity of 26,700 lbs BOD_5 per day for the treatment facility is used to prepare the annual Municipal Wasteload Management Report to determine whether an “organic overload” condition exists, as defined in 25 Pa. Code Chapter 94.

(4) Total Nitrogen is the sum of Total Kjeldahl-N (TKN) plus Nitrite-Nitrate as N (NO_2+NO_3-N), where TKN and NO_2+NO_3-N are measured in the same sample.

II. DEFINITIONS

At Outfall (XXX) means a sampling location in outfall line XXX below the last point at which wastes are added to outfall line (XXX), or where otherwise specified.

Average refers to the use of an arithmetic mean, unless otherwise specified in this permit. (40 CFR 122.41(l)(4)(iii))

Best Management Practices (BMPs) means schedules of activities, prohibitions of practices, maintenance procedures and other management practices to prevent or reduce the pollutant loading to surface waters of the Commonwealth. The term also includes treatment requirements, operating procedures and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage. The term includes activities, facilities, measures, planning or procedures used to minimize accelerated erosion and sedimentation and manage stormwater to protect, maintain, reclaim, and restore the quality of waters and the existing and designated uses of waters within this Commonwealth before, during and after earth disturbance activities. (25 Pa. Code § 92a.2)

Bypass means the intentional diversion of waste streams from any portion of a treatment facility. (40 CFR 122.41(m)(1)(i))

Calendar Week is defined as the seven consecutive days from Sunday through Saturday, unless the permittee has been given permission by DEP to provide weekly data as Monday through Friday based on showing excellent performance of the facility and a history of compliance. In cases when the week falls in two separate months, the month with the most days in that week shall be the month for reporting.

Clean Water Act means the Federal Water Pollution Control Act, as amended (33 U.S.C.A. §§ 1251 to 1387).

Composite Sample (for all except GC/MS volatile organic analysis) means a combination of individual samples (at least eight for a 24-hour period or four for an 8-hour period) of at least 100 milliliters (mL) each obtained at spaced time intervals during the compositing period. The composite must be flow-proportional; either the volume of each individual sample is proportional to discharge flow rates, or the sampling interval is proportional to the flow rates over the time period used to produce the composite. (EPA Form 2C)

Composite Sample (for GC/MS volatile organic analysis) consists of at least four aliquots or grab samples collected during the sampling event (not necessarily flow proportioned). The samples must be combined in the laboratory immediately before analysis and then one analysis is performed. (EPA Form 2C)

Daily Average Temperature means the average of all temperature measurements made, or the mean value plot of the record of a continuous automated temperature recording instrument, either during a calendar day or during the operating day if flows are of a shorter duration.

Daily Discharge means the discharge of a pollutant measured during a calendar day or any 24-hour period that reasonably represents the calendar day for purposes of sampling. For pollutants with limitations expressed in units of mass, the "daily discharge" is calculated as the total mass of the pollutant discharged over the day. For pollutants with limitations expressed in other units of measurement, the "daily discharge" is calculated as the average measurement of the pollutant over the day. (25 Pa. Code § 92a.2, 40 CFR 122.2)

Daily Maximum Discharge Limitation means the highest allowable "daily discharge."

Discharge Monitoring Report (DMR) means the DEP or EPA supplied form(s) for the reporting of self-monitoring results by the permittee. (25 Pa. Code § 92a.2, 40 CFR 122.2)

Estimated Flow means any method of liquid volume measurement based on a technical evaluation of the sources contributing to the discharge including, but not limited to, pump capabilities, water meters and batch discharge volumes.

Geometric Mean means the average of a set of n sample results given by the n^{th} root of their product.

Grab Sample means an individual sample of at least 100 mL collected at a randomly selected time over a period not to exceed 15 minutes. (EPA Form 2C)

Hauled-In Wastes means any waste that is introduced into a treatment facility through any method other than a direct connection to the sewage collection system. The term includes wastes transported to and disposed of within the treatment facility or other entry points within the collection system.

Hazardous Substance means any substance designated under 40 CFR Part 116 pursuant to Section 311 of the Clean Water Act. (40 CFR 122.2)

Immersion Stabilization (i-s) means a calibrated device is immersed in the wastewater until the reading is stabilized.

Indirect Discharger means a non-domestic discharger introducing pollutants to a Publicly Owned Treatment Works (POTW) or other treatment works. (25 Pa. Code § 92a.2, 40 CFR 122.2)

Industrial User means a source of Indirect Discharge. (40 CFR 403.3)

Instantaneous Maximum Effluent Limitation means the highest allowable discharge of a concentration or mass of a substance at any one time as measured by a grab sample. (25 Pa. Code § 92a.2)

Measured Flow means any method of liquid volume measurement, the accuracy of which has been previously demonstrated in engineering practice, or for which a relationship to absolute volume has been obtained.

Monthly Average Discharge Limitation means the highest allowable average of "daily discharges" over a calendar month, calculated as the sum of all "daily discharges" measured during a calendar month divided by the number of "daily discharges" measured during that month. (25 Pa. Code § 92a.2)

Municipality means a city, town, borough, county, township, school district, institution, authority or other public body created by or pursuant to State law and having jurisdiction over disposal of sewage, industrial wastes, or other wastes. (25 Pa. Code § 92a.2)

Municipal Waste means garbage, refuse, industrial lunchroom or office waste and other material, including solid, liquid, semisolid or contained gaseous material resulting from operation of residential, municipal, commercial or institutional establishments and from community activities; and sludge not meeting the definition of residual or hazardous waste under this section from a municipal, commercial or institutional water supply treatment plant, waste water treatment plant or air pollution control facility. (25 Pa. Code § 271.1)

Publicly Owned Treatment Works (POTW) means a treatment works as defined by §212 of the Clean Water Act, owned by a state or municipality. The term includes any devices and systems used in the storage, treatment, recycling and reclamation of municipal sewage or industrial wastes of a liquid nature. The term also includes sewers, pipes or other conveyances if they convey wastewater to a POTW providing treatment. The term also means the municipality as defined in section 502(4) of the Clean Water Act, which has jurisdiction over the indirect discharges to and the discharges from such a treatment works. (25 Pa Code § 92a.2, 40 CFR 122.2)

Residual Waste means garbage, refuse, other discarded material or other waste, including solid, liquid, semisolid or contained gaseous materials resulting from industrial, mining and agricultural operations and sludge from an industrial, mining or agricultural water supply treatment facility, wastewater treatment facility or air pollution control facility, if it is not hazardous. The term does not include coal refuse as defined in the Coal Refuse Disposal Control Act. The term does not include treatment sludges from coal mine drainage treatment plants, disposal of which is being carried on under and in compliance with a valid permit issued under the Clean Streams Law. (25 Pa Code § 287.1)

Severe Property Damage means substantial physical damage to property, damage to the treatment facilities that causes them to become inoperable, or substantial and permanent loss of natural resources that can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production. (40 CFR 122.41(m)(1)(ii))

Stormwater means the runoff from precipitation, snow melt runoff, and surface runoff and drainage. (25 Pa. Code § 92a.2)

Stormwater Associated With Industrial Activity means the discharge from any conveyance that is used for collecting and conveying stormwater and that is directly related to manufacturing, processing or raw materials storage areas at an industrial plant, and as defined at 40 CFR §122.26(b)(14)(i) – (ix) and (xi) and 25 Pa. Code § 92a.2.

Toxic Pollutant means those pollutants, or combinations of pollutants, including disease-causing agents, which after discharge and upon exposure, ingestion, inhalation or assimilation into any organism, either directly from the environment or indirectly by ingestion through food chains may, on the basis of information available to DEP cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions, including malfunctions in reproduction, or physical deformations in these organisms or their offspring. (25 Pa. Code § 92a.2)

Weekly Average Discharge Limitation means the highest allowable average of "daily discharges" over a calendar week, calculated as the sum of all "daily discharges" measured during a calendar week divided by the number of "daily discharges" measured during that week.

III. SELF-MONITORING, REPORTING AND RECORDKEEPING

A. Representative Sampling

1. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity (40 CFR 122.41(j)(1)). Representative sampling includes the collection of samples, where possible, during periods of adverse weather, changes in treatment plant performance and changes in treatment plant loading. If possible, effluent samples must be collected where the effluent is well mixed near the center of the discharge conveyance and at the approximate mid-depth point, where the turbulence is at a maximum and the settlement of solids is minimized. (40 CFR 122.48, 25 Pa. Code § 92a.61)

2. Records Retention (40 CFR 122.41(j)(2))

   Except for records of monitoring information required by this permit related to the permittee's sludge use and disposal activities which shall be retained for a period of at least 5 years, all records of monitoring activities and results (including all original strip chart recordings for continuous monitoring instrumentation and calibration and maintenance records), copies of all reports required by this permit, and records of all data used to complete the application for this permit shall be retained by the permittee for 3 years from the date of the sample measurement, report or application, unless a longer retention period is required by the permit. The 3-year period shall be extended as requested by DEP or the EPA Regional Administrator.

3. Recording of Results (40 CFR 122.41(j)(3))

   For each measurement or sample taken pursuant to the requirements of this permit, the permittee shall record the following information:

   a. The exact place, date and time of sampling or measurements.
   b. The person(s) who performed the sampling or measurements.
   c. The date(s) the analyses were performed.
   d. The person(s) who performed the analyses.
   e. The analytical techniques or methods used; and the associated detection level.
   f. The results of such analyses.

4. Test Procedures

   a. Facilities that test or analyze environmental samples used to demonstrate compliance with this permit shall be in compliance with laboratory accreditation requirements of Act 90 of 2002 (27 Pa. C.S. §§ 4101-4113) and 25 Pa. Code Chapter 252, relating to environmental laboratory accreditation.

   b. Test procedures (methods) for the analysis of pollutants or pollutant parameters shall be those approved under 40 CFR Part 136 or required under 40 CFR Chapter I, Subchapters N or O, unless the method is specified in this permit or has been otherwise approved in writing by DEP. (40 CFR 122.41(j)(4), 122.44(i)(1)(iv))

   c. Test procedures (methods) for the analysis of pollutants or pollutant parameters shall be sufficiently sensitive. A method is sufficiently sensitive when 1) the method minimum level is at or below the level of the effluent limit established in the permit for the measured pollutant or pollutant parameter; or 2) the method has the lowest minimum level of the analytical methods approved under 40 CFR Part 136 or required under 40 CFR Chapter I, Subchapters N or O, for the measured pollutant or pollutant parameter; or 3) the method is specified in this permit or has been otherwise approved in writing by DEP for the measured pollutant or pollutant parameter. Permittees have the option of providing matrix or sample-specific minimum levels rather than the published levels. (40 CFR 122.44(i)(1)(iv))

5. Quality/Assurance/Control

In an effort to assure accurate self-monitoring analyses results:

a. The permittee, or its designated laboratory, shall participate in the periodic scheduled quality assurance inspections conducted by DEP and EPA. (40 CFR 122.41(e), 122.41(i)(3))

b. The permittee, or its designated laboratory, shall develop and implement a program to assure the quality and accurateness of the analyses performed to satisfy the requirements of this permit, in accordance with 40 CFR Part 136. (40 CFR 122.41(j)(4))

B. Reporting of Monitoring Results

1. The permittee shall effectively monitor the operation and efficiency of all wastewater treatment and control facilities, and the quantity and quality of the discharge(s) as specified in this permit. (25 Pa. Code §§ 92a.3(c), 92a.41(a), 92a.44, 92a.61(i) and 40 CFR §§ 122.41(e), 122.44(i)(1))

2. The permittee shall use DEP's electronic Discharge Monitoring Report (eDMR) system to report the results of compliance monitoring under this permit (see www.dep.pa.gov/edmr). Permittees that are not using the eDMR system as of the effective date of this permit shall submit the necessary registration and trading partner agreement forms to DEP's Bureau of Clean Water (BCW) within 30 days of the effective date of this permit and begin using the eDMR system when notified by DEP BCW to do so. (25 Pa. Code §§ 92a.3(c), 92a.41(a), 92a.61(g) and 40 CFR § 122.41(l)(4))

3. Submission of a physical (paper) copy of a Discharge Monitoring Report (DMR) is acceptable under the following circumstances:

   a. For a permittee that is not yet using the eDMR system, the permittee shall submit a physical copy of a DMR to the DEP regional office that issued the permit during the interim period between the submission of registration and trading partner agreement forms to DEP and DEP's notification to begin using the eDMR system.

   b. For any permittee, as a contingency a physical DMR may be mailed to the DEP regional office that issued the permit if there are technological malfunction(s) that prevent the successful submission of a DMR through the eDMR system. In such situations, the permittee shall submit the DMR through the eDMR system within 5 days following remedy of the malfunction(s).

4. DMRs must be completed in accordance with DEP's published DMR instructions (3800-FM-BCW0463). DMRs must be received by DEP no later than 28 days following the end of the monitoring period. DMRs are based on calendar reporting periods and must be received by DEP in accordance with the following schedule:

   - Monthly DMRs must be received within 28 days following the end of each calendar month.
   - Quarterly DMRs must be received within 28 days following the end of each calendar quarter, i.e., January 28, April 28, July 28, and October 28.
   - Semiannual DMRs must be received within 28 days following the end of each calendar semiannual period, i.e., January 28 and July 28.
   - Annual DMRs must be received by January 28, unless Part C of this permit requires otherwise.

5. The permittee shall complete all Supplemental Reporting forms (Supplemental DMRs) attached to this permit, or an approved equivalent, and submit the signed, completed forms as attachments to the DMR, through DEP's eDMR system. DEP's Supplemental Laboratory Accreditation Form (3800-FM-BCW0189) must be completed and submitted to DEP with the first DMR following issuance of this permit, and anytime thereafter when changes to laboratories or methods occur. (25 Pa. Code §§ 92a.3(c), 92a.41(a), 92a.61(g) and 40 CFR § 122.41(l)(4))

6. The completed DMR Form shall be signed and certified by either of the following applicable persons, as defined in 25 Pa. Code § 92a.22:

- For a corporation - by a principal executive officer of at least the level of vice president, or an authorized representative, if the representative is responsible for the overall operation of the facility from which the discharge described in the NPDES form originates.
- For a partnership or sole proprietorship - by a general partner or the proprietor, respectively.
- For a municipality, state, federal or other public agency - by a principal executive officer or ranking elected official.

If signed by a person other than the above and for co-permittees, written notification of delegation of DMR signatory authority must be submitted to DEP in advance of or along with the relevant DMR form. (40 CFR § 122.22(b))

7. If the permittee monitors any pollutant at monitoring points as designated by this permit, using analytical methods described in Part A III.A.4. herein, more frequently than the permit requires, the results of this monitoring shall be incorporated, as appropriate, into the calculations used to report self-monitoring data on the DMR. (40 CFR 122.41(l)(4)(ii))

C. Reporting and Notification Requirements

1. Planned Changes to Physical Facilities – The permittee shall give notice to DEP as soon as possible but no later than 30 days prior to planned physical alterations or additions to the permitted facility. A permit under 25 Pa. Code Chapter 91 may be required for these situations prior to implementing the planned changes. A permit application, or other written submission to DEP, can be used to satisfy the notification requirements of this section.

   Notice is required when:

   a. The alteration or addition to a permitted facility may meet one of the criteria for determining whether a facility is a new source in 40 CFR 122.29(b). (40 CFR 122.41(l)(1)(i))

   b. The alteration or addition could significantly change the nature or increase the quantity of pollutants discharged. This notification applies to pollutants which are not subject to effluent limitations in this permit. (40 CFR 122.41(l)(1)(ii))

   c. The alteration or addition results in a significant change in the permittee's sludge use or disposal practices, and such alteration, addition, or change may justify the application of permit conditions that are different from or absent in the existing permit, including notification of additional use or disposal sites not reported during the permit application process or not reported pursuant to an approved land application plan. (40 CFR 122.41(l)(1)(iii))

   d. The planned change may result in noncompliance with permit requirements. (40 CFR 122.41(l)(2))

2. Planned Changes to Waste Stream – Under the authority of 25 Pa. Code § 92a.24(a) and 40 CFR 122.42(b), the permittee shall provide notice to DEP and EPA as soon as possible but no later than 45 days prior to any planned changes in the volume or pollutant concentration of its influent waste stream as a result of indirect discharges or hauled-in wastes, as specified in paragraphs 2.a. and 2.b., below. Notice shall be provided on the “Planned Changes to Waste Stream” Supplemental Report (3800-FM-BCW0482), available on DEP’s website. The permittee shall provide information on the quality and quantity of waste introduced into the POTW, and any anticipated impact of the change on the quantity or quality of effluent to be discharged from the POTW (40 CFR 122.42(b)(3)). The Report shall be sent via Certified Mail or other means to confirm DEP’s receipt of the notification. DEP will determine if the submission of a new application and receipt of a new or amended permit is required.

   a. Introduction of New Pollutants (25 Pa. Code § 92a.24(a), 40 CFR 122.42(b)(1))

      New pollutants are defined as parameters that meet one or more of the following criteria:

(i) Any pollutants that were not detected in the facilities' influent waste stream as reported in the permit application; and have not been approved to be included in the permittee's influent waste stream by DEP in writing.

(ii) Any new introduction of pollutants into the POTW from an indirect discharger which would be subject to Sections 301 or 306 of the Clean Water Act if it were directly discharging those pollutants (40 CFR 122.42(b)(1)).

The permittee shall provide notification of the introduction of new pollutants in accordance with paragraph 2 above. The permittee may not authorize the introduction of new pollutants until the permittee receives DEP's written approval.

b. Increased Loading of Approved Pollutants (25 Pa. Code § 92a.24(a), 40 CFR 122.42(b)(2))

Approved pollutants are defined as parameters that meet one or more of the following criteria:

(i) Were detected in the facilities' influent waste stream as reported in the permittee's permit application; or have been previously approved to be included in the permittee's influent waste stream by DEP in writing.

(ii) Have an effluent limitation or monitoring requirement in this permit.

The permittee shall provide notification of the introduction of increased influent loading (lbs/day) of approved pollutants in accordance with paragraph 2 above when (1) the cumulative increase in influent loading (lbs/day) exceeds 20% of the maximum loading reported in the permit application, or a loading previously approved by DEP and/or EPA, or (2) may cause an exceedance in the effluent of Effluent Limitation Guidelines (ELGs) or limitations in Part A of this permit, or (3) may cause interference or pass through at the POTW (as defined at 40 CFR 403.3), or (4) may cause exceedances of the applicable water quality standards in the receiving stream. Unless specified otherwise in this permit, if DEP does not respond to the notification within 30 days of its receipt, the permittee may proceed with the increase in loading. The acceptance of increased loading of approved pollutants may not result in an exceedance of ELGs or effluent limitations, may not result in a hydraulic or organic overload condition as defined in 25 Pa. Code § 94.1, and may not cause exceedances of the applicable water quality standards in the receiving stream.

3. Reporting Requirements for Hauled-In Wastes

a. Receipt of Residual Waste

(i) The permittee shall document the receipt of all hauled-in residual wastes (including but not limited to wastewater from oil and gas wells, food processing waste, and landfill leachate), as defined at 25 Pa. Code § 287.1, that are received for processing at the treatment facility. The permittee shall report hauled-in residual wastes on a monthly basis to DEP on the "Hauled In Residual Wastes" Supplemental Report (3800-FM-BCW0450) as an attachment to the DMR. If no residual wastes were received during a month, submission of the Supplemental Report is not required.

The following information is required by the Supplemental Report. The information used to develop the Report shall be retained by the permittee for five years from the date of receipt and must be made available to DEP or EPA upon request.

(1) The dates that residual wastes were received.

(2) The volume (gallons) of wastes received.

(3) The license plate number of the vehicle transporting the waste to the treatment facility.

(4) The permit number(s) of the well(s) where residual wastes were generated, if applicable.

(5) The name and address of the generator of the residual wastes.

(6) The type of wastewater.

The transporter of residual waste must maintain these and other records as part of the daily operational record (25 Pa. Code § 299.219). If the transporter is unable to provide this information or the permittee has not otherwise received the information from the generator, the residual wastes shall not be accepted by the permittee until such time as the permittee receives such information from the transporter or generator.

(ii) The following conditions apply to the characterization of residual wastes received by the permittee:

(1) If the generator is required to complete a chemical analysis of residual wastes in accordance with 25 Pa. Code § 287.51, the permittee must receive and maintain on file a chemical analysis of the residual wastes it receives. The chemical analysis must conform to the Bureau of Waste Management's Form 26R except as noted in paragraph (2), below. Each load of residual waste received must be covered by a chemical analysis if the generator is required to complete it.

(2) For wastewater generated from hydraulic fracturing operations ("frac wastewater") within the first 30 production days of a well site, the chemical analysis may be a general frac wastewater characterization approved by DEP. Thereafter, the chemical analysis must be waste-specific and be reported on the Form 26R.

b. Receipt of Municipal Waste

(i) The permittee shall document the receipt of all hauled-in municipal wastes (including but not limited to septage and liquid sewage sludge), as defined at 25 Pa. Code § 271.1, that are received for processing at the treatment facility. The permittee shall report hauled-in municipal wastes on a monthly basis to DEP on the "Hauled In Municipal Wastes" Supplemental Report (3800-FM-BCW0437) as an attachment to the DMR. If no municipal wastes were received during a month, submission of the Supplemental Report is not required.

The following information is required by the Supplemental Report:

(1) The dates that municipal wastes were received.

(2) The volume (gallons) of wastes received.

(3) The BOD_5 concentration (mg/l) and load (lbs) for the wastes received.

(4) The location(s) where wastes were disposed of within the treatment facility.

(ii) Sampling and analysis of hauled-in municipal wastes must be completed to characterize the organic strength of the wastes, unless composite sampling of influent wastewater is performed at a location downstream of the point of entry for the wastes. The influent BOD_5 characterization for the treatment facility, as reported in the annual Municipal Wasteload Management Report per 25 Pa. Code Chapter 94, must be representative of the hauled-in municipal wastes received.

4. Unanticipated Noncompliance or Potential Pollution Reporting

   a. Immediate Reporting - The permittee shall immediately report any incident causing or threatening pollution in accordance with the requirements of 25 Pa. Code §§ 91.33 and 92a.41(b).

      (i) If, because of an accident, other activity or incident a toxic substance or another substance which would endanger users downstream from the discharge, or would otherwise result in pollution or create a danger of pollution or would damage property, the permittee shall immediately notify DEP by telephone of the location and nature of the danger. Oral notification to the Department is required as soon as possible, but no later than 4 hours after the permittee becomes aware of the incident causing or threatening pollution.

      (ii) If reasonably possible to do so, the permittee shall immediately notify downstream users of the waters of the Commonwealth to which the substance was discharged. Such notice shall include the location and nature of the danger.

      (iii) The permittee shall immediately take or cause to be taken steps necessary to prevent injury to property and downstream users of the waters from pollution or a danger of pollution and, in addition, within 15 days from the incident, shall remove the residual substances contained thereon or therein from the ground and from the affected waters of this Commonwealth to the extent required by applicable law.

   b. The permittee shall report any noncompliance which may endanger health or the environment in accordance with the requirements of 40 CFR 122.41(l)(6). These requirements include the following obligations:

      (i) 24 Hour Reporting - The permittee shall orally report any noncompliance with this permit which may endanger health or the environment within 24 hours from the time the permittee becomes aware of the circumstances. The following shall be included as information which must be reported within 24 hours under this paragraph (40 CFR 122.41(l)(6)(ii)):

         (1) Any unanticipated bypass which exceeds any effluent limitation in the permit;

         (2) Any upset which exceeds any effluent limitation in the permit; and

         (3) Violation of the maximum daily discharge limitation for any of the pollutants listed in the permit as being subject to the 24-hour reporting requirement.

      (ii) Written Report - A written submission shall also be provided within 5 days of the time the permittee becomes aware of any noncompliance which may endanger health or the environment. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.

      (iii) Waiver of Written Report - DEP may waive the written report on a case-by-case basis if the associated oral report has been received within 24 hours from the time the permittee becomes aware of the circumstances which may endanger health or the environment. Unless such a waiver is expressly granted by DEP, the permittee shall submit a written report in accordance with this paragraph. (40 CFR 122.41(l)(6)(iii))

5. Other Noncompliance

   The permittee shall report all instances of noncompliance not reported under paragraph C.4 of this section or specific requirements of compliance schedules, at the time DMRs are submitted, on the Non-Compliance Reporting Form (3800-FM-BCW0440). The reports shall contain the information listed in paragraph C.4.b.(ii) of this section. (40 CFR 122.41(l)(7))

PART B

I. MANAGEMENT REQUIREMENTS

A. Compliance

1. The permittee shall comply with all conditions of this permit. If a compliance schedule has been established in this permit, the permittee shall achieve compliance with the terms and conditions of this permit within the time frames specified in this permit. (40 CFR 122.41(a)(1))

2. The permittee shall submit reports of compliance or noncompliance, or progress reports as applicable, for any interim and final requirements contained in this permit. Such reports shall be submitted no later than 14 days following the applicable schedule date or compliance deadline. (25 Pa. Code § 92a.51(c), 40 CFR 122.47(a)(4))

B. Permit Modification, Termination, or Revocation and Reissuance

1. This permit may be modified, terminated, or revoked and reissued during its term in accordance with 25 Pa. Code § 92a.72 and 40 CFR 122.41(f).

2. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition. (40 CFR 122.41(f))

3. In the absence of DEP action to modify or revoke and reissue this permit, the permittee shall comply with effluent standards or prohibitions established under Section 307(a) of the Clean Water Act for toxic pollutants within the time specified in the regulations that establish those standards or prohibitions. (40 CFR 122.41(a)(1))

C. Duty to Provide Information

1. The permittee shall furnish to DEP, within a reasonable time, any information which DEP may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. (40 CFR 122.41(h))

2. The permittee shall furnish to DEP, upon request, copies of records required to be kept by this permit. (40 CFR 122.41(h))

3. Other Information - Where the permittee becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to DEP, it shall promptly submit the correct and complete facts or information. (40 CFR 122.41(l)(8))

4. The permittee shall provide the following information in the annual Municipal Wasteload Management Report, required under the provisions of Title 25 Pa. Code Chapter 94:

   a. The requirements identified in 25 Pa. Code § 94.12.

   b. The identity of any indirect discharger(s) served by the POTW which are subject to pretreatment standards adopted under Section 307(b) of the Clean Water Act; the POTW shall also specify the total volume of discharge and estimated concentration of each pollutant discharged into the POTW by the indirect discharger.

   c. A “Solids Management Inventory” if specified in Part C of this permit.

   d. The total volume of hauled-in residual and municipal wastes received during the year, by source.

   e. The Annual Report requirements for permittees required to implement an industrial pretreatment program listed in Part C, as applicable.

D. General Pretreatment Requirements

1. Any POTW (or combination of POTWs operated by the same authority) with a total design flow greater than 5 million gallons per day (MGD) and receiving from industrial users pollutants which pass through or interfere with the operation of the POTW or are otherwise subject to Pretreatment Standards will be required to establish a POTW Pretreatment Program unless specifically exempted by the Approval Authority. A POTW with a design flow of 5 MGD or less may be required to develop a POTW Pretreatment Program if the Approval Authority finds that the nature or volume of the industrial influent, treatment process upsets, violations of effluent limitations, contamination of sludge, or other circumstances warrant in order to prevent interference or pass through. (40 CFR 403.8)

2. Each POTW with an approved Pretreatment Program pursuant to 40 CFR 403.8 shall develop and enforce specific limits to implement the prohibitions listed in 40 CFR 403.5(a)(1) and (b), and shall continue to develop these limits as necessary and effectively enforce such limits. This condition applies, for example, when there are planned changes to the waste stream as identified in Part A III.C.2. If the permittee is required to develop or continue implementation of a Pretreatment Program, detailed requirements will be contained in Part C of this permit.

3. For all POTWs, where pollutants contributed by indirect dischargers result in interference or pass through, and a violation is likely to recur, the permittee shall develop and enforce specific limits for indirect dischargers and other users, as appropriate, that together with appropriate facility or operational changes, are necessary to ensure renewed or continued compliance with this permit or sludge use or disposal practices. Where POTWs do not have an approved Pretreatment Program, the permittee shall submit a copy of such limits to DEP when developed. (25 Pa. Code § 92a.47(d))

E. Proper Operation and Maintenance

1. The permittee shall employ operators certified in compliance with the Water and Wastewater Systems Operators Certification Act (63 P.S. §§ 1001-1015.1).

2. The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the terms and conditions of this permit. Proper operation and maintenance includes, but is not limited to, adequate laboratory controls including appropriate quality assurance procedures. This provision also includes the operation of backup or auxiliary facilities or similar systems that are installed by the permittee, only when necessary to achieve compliance with the terms and conditions of this permit. (40 CFR 122.41(e))

F. Duty to Mitigate

The permittee shall take all reasonable steps to minimize or prevent any discharge, sludge use or disposal in violation of this permit that has a reasonable likelihood of adversely affecting human health or the environment. (40 CFR 122.41(d))

G. Bypassing

1. Bypassing Not Exceeding Permit Limitations - The permittee may allow a bypass to occur which does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to assure efficient operation. These bypasses are not subject to the provisions in paragraphs two, three and four of this section. (40 CFR 122.41(m)(2))

2. Other Bypassing - In all other situations, bypassing is prohibited and DEP may take enforcement action against the permittee for bypass unless:

a. A bypass is unavoidable to prevent loss of life, personal injury or "severe property damage." (40 CFR 122.41(m)(4)(i)(A))

b. There are no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate backup equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance. (40 CFR 122.41(m)(4)(i)(B))

c. The permittee submitted the necessary notice required in paragraph G.4 below. (40 CFR 122.41(m)(4)(i)(C))

3. DEP may approve an anticipated bypass, after considering its adverse effects, if DEP determines that it will meet the conditions listed in paragraph G.2 above. (40 CFR 122.41(m)(4)(ii))

4. Notice

a. Anticipated Bypass – If the permittee knows in advance of the need for a bypass, it shall submit prior notice, if possible, at least 10 days before the bypass. (40 CFR 122.41(m)(3)(i))

b. Unanticipated Bypass – The permittee shall submit oral notice of any other unanticipated bypass within 24 hours, regardless of whether the bypass may endanger health or the environment or whether the bypass exceeds effluent limitations. The notice shall be in accordance with Part A III.C.4.b.

H. Sanitary Sewer Overflows (SSOs)

An SSO is an overflow of wastewater, or other untreated discharge from a separate sanitary sewer system (which is not a combined sewer system), which results from a flow in excess of the carrying capacity of the system or from some other cause prior to reaching the headworks of the sewage treatment facility. SSOs are not authorized under this permit. The permittee shall immediately report any SSO to DEP in accordance with Part A III.C.4 of this permit.

I. Termination of Permit Coverage (25 Pa. Code § 92a.74 and 40 CFR 122.64)

1. Notice of Termination (NOT) – If the permittee plans to cease operations or will otherwise no longer require coverage under this permit, the permittee shall submit DEP's NPDES Notice of Termination (NOT) for Permits Issued Under Chapter 92a (3800-BCW-0410), signed in accordance with Part A III.B.6 of this permit, at least 30 days prior to cessation of operations or the date by which coverage is no longer required.

2. Where the permittee plans to cease operations, NOTs must be accompanied with an operation closure plan that identifies how tankage and equipment will be decommissioned and how pollutants will be managed.

3. The permittee shall submit the NOT to the DEP regional office with jurisdiction over the county in which the operation is located.

II. PENALTIES AND LIABILITY

A. Violations of Permit Conditions

Any person violating Sections 301, 302, 306, 307, 308, 318 or 405 of the Clean Water Act or any permit condition or limitation implementing such sections in a permit issued under Section 402 of the Act is subject to civil, administrative and/or criminal penalties as set forth in 40 CFR 122.41(a)(2).

Any person or municipality, who violates any provision of this permit; any rule, regulation or order of DEP; or any condition or limitation of any permit issued pursuant to the Clean Streams Law, is subject to criminal and/or civil penalties as set forth in Sections 602, 603 and 605 of the Clean Streams Law.

B. Falsifying Information

Any person who does any of the following:

- Falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required to be maintained under this permit, or

- Knowingly makes any false statement, representation, or certification in any record or other document submitted or required to be maintained under this permit (including monitoring reports or reports of compliance or noncompliance)

Shall, upon conviction, be punished by a fine and/or imprisonment as set forth in 18 Pa.C.S.A § 4904 and 40 CFR 122.41(j)(5) and (k)(2).

C. Liability

Nothing in this permit shall be construed to relieve the permittee from civil or criminal penalties for noncompliance pursuant to Section 309 of the Clean Water Act or Sections 602, 603 or 605 of the Clean Streams Law.

Nothing in this permit shall be construed to preclude the institution of any legal action or to relieve the permittee from any responsibilities, liabilities or penalties to which the permittee is or may be subject to under the Clean Water Act and the Clean Streams Law.

D. Need to Halt or Reduce Activity Not a Defense

It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. (40 CFR 122.41(c))

III. OTHER RESPONSIBILITIES

A. Right of Entry

Pursuant to Sections 5(b) and 305 of Pennsylvania's Clean Streams Law, and Title 25 Pa. Code Chapter 92a and 40 CFR 122.41(i), the permittee shall allow authorized representatives of DEP and EPA, upon the presentation of credentials and other documents as may be required by law:

1. To enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit; (40 CFR 122.41(i)(1))

2. To have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit; (40 CFR 122.41(i)(2))

3. To inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices or operations regulated or required under this permit; and (40 CFR 122.41(i)(3))

4. To sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act or the Clean Streams Law, any substances or parameters at any location. (40 CFR 122.41(i)(4))

B. Transfer of Permits

1. Transfers by modification. Except as provided in paragraph 2 of this section, a permit may be transferred by the permittee to a new owner or operator only if this permit has been modified or revoked and reissued, or a minor modification made to identify the new permittee and incorporate such other requirements as may be necessary under the Clean Water Act. (40 CFR 122.61(a))

2. Automatic transfers. As an alternative to transfers under paragraph 1 of this section, any NPDES permit may be automatically transferred to a new permittee if:

   a. The current permittee notifies DEP at least 30 days in advance of the proposed transfer date in paragraph 2.b. of this section; (40 CFR 122.61(b)(1))

   b. The notice includes the appropriate DEP transfer form signed by the existing and new permittees containing a specific date for transfer of permit responsibility, coverage and liability between them; and (40 CFR 122.61(b)(2))

   c. DEP does not notify the existing permittee and the proposed new permittee of its intent to modify or revoke and reissue this permit, the transfer is effective on the date specified in the agreement mentioned in paragraph 2.b. of this section. (40 CFR 122.61(b)(3))

   d. The new permittee is in compliance with existing DEP issued permits, regulations, orders and schedules of compliance, or has demonstrated that any noncompliance with the existing permits has been resolved by an appropriate compliance action or by the terms and conditions of the permit (including compliance schedules set forth in the permit), consistent with 25 Pa. Code § 92a.51 (relating to schedules of compliance) and other appropriate Department regulations. (25 Pa. Code § 92a.71)

3. In the event DEP does not approve transfer of this permit, the new owner or operator must submit a new permit application.

C. Property Rights

The issuance of this permit does not convey any property rights of any sort, or any exclusive privilege. (40 CFR 122.41(g))

D. Duty to Reapply

If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee must apply for a new permit. (40 CFR 122.41(b))

E. Other Laws

The issuance of this permit does not authorize any injury to persons or property or invasion of other private rights, or any infringement of state or local law or regulations.

IV. ANNUAL FEE

Permittees shall pay an annual fee in accordance with 25 Pa. Code § 92a.62. Annual fee amounts are specified in the following schedule and are due on each anniversary of the effective date of the most recent new or reissued permit. All flows identified in the schedule are annual average design flows. (25 Pa. Code § 92a.62)

Small Flow Treatment Facility (SRSTP and SFTF)	$0
Minor Sewage Facility < 0.05 MGD (million gallons per day)	$250
Minor Sewage Facility ≥ 0.05 and < 1 MGD	$500
Minor Sewage Facility with CSO (Combined Sewer Overflow)	$750
Major Sewage Facility ≥ 1 and < 5 MGD	$1,250
Major Sewage Facility ≥ 5 MGD	$2,500
Major Sewage Facility with CSO	$5,000

As of the effective date of this permit, the facility covered by the permit is classified in the following fee category: **Major Sewage Facility >=5 MGD**.

Invoices for annual fees will be mailed to permittees approximately three months prior to the due date. In the event that an invoice is not received, the permittee is nonetheless responsible for payment. Throughout a five year permit term, permittees will pay four annual fees followed by a permit renewal application fee in the last year of permit coverage. Permittees may contact the DEP at 717-787-6744 with questions related to annual fees. The fees identified above are subject to change in accordance with 25 Pa. Code § 92a.62(e).

Payment for annual fees shall be remitted to DEP at the address below by the anniversary date. Checks should be made payable to the Commonwealth of Pennsylvania.

PA Department of Environmental Protection
Bureau of Clean Water
Re: Chapter 92a Annual Fee
P.O. Box 8466
Harrisburg, PA 17105-8466

PART C

I. OTHER REQUIREMENTS

A. No storm water from pavements, area ways, roofs, foundation drains or other sources shall be directly admitted to the sanitary sewers associated with the herein approved discharge.

B. The approval herein given is specifically made contingent upon the permittee acquiring all necessary property rights by easement or otherwise, providing for the satisfactory construction, operation, maintenance or replacement of all sewers or sewerage structures associated with the herein approved discharge in, along, or across private property, with full rights of ingress, egress and regress.

C. Collected screenings, slurries, sludges, and other solids shall be handled and disposed of in compliance with 25 Pa. Code, Chapters 271, 273, 275, 283, and 285 (related to permits and requirements for landfilling, land application, incineration, and storage of sewage sludge), Federal Regulation 40 CFR 257, Pennsylvania Clean Streams Law, Pennsylvania Solid Waste Management Act of 1980, and the Federal Clean Water Act and its amendments. The permittee is responsible to obtain or assure that contracted agents have all necessary permits and approvals for the handling, storage, transport, and disposal of solid waste materials generated as a result of wastewater treatment.

D. In accordance with 40 CFR Part 435, Subpart C, the permittee shall not accept wastewater pollutants associated with production, field exploration, drilling, well completion, or well treatment for unconventional oil and gas extraction (including, but not limited to, drilling muds, drill cuttings, produced sand, produced water). Unconventional oil and gas means crude oil and natural gas produced by a well drilled into a shale and/or tight formation (including, but not limited to, shale gas, shale oil, tight gas, and tight oil). This prohibition does not apply to wastewater generated from stripper wells as defined at 40 CFR Part 435, Subpart F.

E. The permittee shall optimize chlorine dosages used for disinfection or other purposes to minimize the concentration of Total Residual Chlorine (TRC) in the effluent, meet applicable effluent limitations, and reduce the possibility of adversely affecting the receiving waters. Optimization efforts may include an evaluation of wastewater characteristics, mixing characteristics, and contact times, adjustments to process controls, and maintenance of the disinfection facilities. If DEP determines that effluent TRC is causing adverse water quality impacts, DEP may reopen this permit to apply new or more stringent effluent limitations and/or require implementation of control measures or operational practices to eliminate such impacts.

   Where the permittee does not use chlorine for primary or backup disinfection, but proposes the use of chlorine for cleaning or other purposes, the permittee shall notify DEP prior to initiating use of chlorine and monitor TRC concentrations in the effluent on each day in which chlorine is used. The results shall be submitted as an attachment to the DMR.

F. Notification of the designation of the responsible operator must be submitted to the permitting agency by the permittee within 60 days after the effective date of the permit and from time to time thereafter as the operator is replaced.

G. The DEP may identify and require certain discharge specific data to be submitted before the expiration date of this permit. Upon notification by the DEP, the permittee will have 12 months from the date of the notice to provide the required data. These data, along with any other data available to the DEP, will be used in completing the Watershed TMDL/WLA Analysis and in establishing discharge effluent limits. In the event that DEP requires the submission of data pursuant to this condition, the permittee shall have the right to appeal or otherwise contest the requirement.

H. The seasonal effluent limitations for fecal coliform are based on Chapter 92a (§ 92a.47(4) & (5)) of DEP's regulations and Delaware River Basin Commission's (DRBC's) Water Quality Regulations at § 4.30.4.A. DEP's regulations govern the summer limits for fecal coliform while the winter limits are based on DRBC's regulations. The DRBC regulations state that during winter season from October through April, the instantaneous maximum concentration of fecal coliform organisms shall not be greater than 1,000 per 100

milliliters in more than 10 percent of the samples tested. For reporting purposes, a copy of the guidelines on the 10 percent rule is enclosed with the permit.

I. The permittee shall not accept hauled-in wastes at the treatment facility under the following conditions, unless otherwise approved by DEP in writing:

- When acceptance of hauled-in wastes would cause a hydraulic or organic overload as defined in Chapter 94.1 of the DEP's regulations.
- When the treatment facility is considered to be in an existing hydraulic or organic overload condition, as determined by the permittee or DEP, as defined in Chapter 94.1 of the DEP's regulations.
- When the instantaneous flow at the treatment facility exceeds the Chapter 94 hydraulic design capacity of the facility multiplied by a peaking factor of three, and for 24 hours following exceedance of this threshold.

J. The permittee shall develop a treatment facility operations and maintenance (O&M) plan addressing key wastewater processes. The plan shall be reviewed annually and updated when appropriate. The plan shall be submitted to DEP for review upon request. For the purpose of this paragraph, a key wastewater process includes any equipment or process that, if it fails, may cause the discharge of raw wastewater or wastewater that fails to meet NPDES permit discharge requirements, or a failure that may threaten human or environmental health. The O&M plan shall include the following, at a minimum:

1. A process control strategy that includes a schedule for process control sampling, monitoring, testing, and recordkeeping.
2. A plan that identifies how key wastewater processes shall be monitored and adjusted while the facility is staffed.
3. A plan that identifies how key wastewater processes will be monitored while the treatment facility is not staffed.
4. For treatment plants that are impacted by wet weather flows, the permittee shall develop and implement a wet weather operations strategy that minimizes or eliminates the wash out of solids from the treatment system while maximizing the flow through the treatment plant.
5. An emergency plan that identifies how the facility will be operated during times of emergency. For example, the plan shall detail how key wastewater processes will be repaired or replaced in the event of a failure while minimizing loss of life and property damage to the facility. This plan shall also include emergency contact numbers for local emergency response agencies, plant personnel, critical suppliers and vendors, and DEP contacts, at a minimum.
6. A preventative maintenance plan that includes a schedule for preventative maintenance for all equipment within the treatment system. A spare parts inventory shall be included as part of this plan.
7. A solids management plan that identifies how solids produced by the facility will be wasted, treated, and ultimately disposed of.

II. POTW PRETREATMENT PROGRAM IMPLEMENTATION

A. General Requirement – The permittee shall operate and implement a POTW pretreatment program in accordance with the federal Clean Water Act, the Pennsylvania Clean Streams Law, and the federal General Pretreatment Regulations at 40 CFR Part 403. The program shall also be implemented in accordance with the permittee's approved pretreatment program and any modifications thereto submitted by the permittee and approved by the Approval Authority.

B. Annual Report and Other Requirements – The permittee shall submit a Pretreatment Annual Report by March 31 of each year to EPA that describes the permittee's pretreatment activities for the previous calendar

year. The Pretreatment Annual Report shall include a description of pretreatment activities in all municipalities from which wastewater is received at the permittee's POTW. The Pretreatment Annual Report shall include the following information, at minimum:

1. Industrial Listing – The Annual Report shall contain an updated industrial listing providing the names and addresses of all current Significant Industrial Users (SIUs) and Non-Significant Categorical Industrial Users (NSCIUs), as defined in 40 CFR 403.3, and the categorical standard, if any, applicable to each. The listing must: (1) identify any users that are subject to reduced reporting requirements under 40 CFR 403.12(e)(3); (2) identify which users are NSCIUs; (3) identify any users that have been granted a monitoring waiver in accordance with 40 CFR 403.12(e)(2) as well as the pollutants for which the waiver was granted and the date of the last POTW sampling event for each pollutant; and (4) identify any categorical industrial users that have been given mass-based limits in place of concentration-based categorical limits in accordance with 40 CFR 403.6(c)(5) or concentration-based limits in place of mass-based categorical limits in accordance with 40 CFR 403.6(c)(6).

   In addition, the Annual Report shall contain a summary of any hauled-in wastes accepted at the POTW including the source of the wastes (domestic, commercial or industrial) and the receiving location for acceptance of the wastes. For each industrial source (whether or not classified as an SIU), the report shall indicate (1) the name and address of the industrial source; (2) the average daily amount of wastewater received; (3) a brief description of the type of process operations conducted at the industrial facility; (4) whether the source facility is a categorical industrial user (including NSCIU), significant industrial users, or non-significant industrial user; and (5) any controls imposed on the user.

2. Control Mechanism Issuance – The Annual Report shall contain a summary of SIU control mechanism issuance, including a list of issuance, effective, and expiration dates for each SIU control mechanism. For each general control mechanism issued, provide the names of all SIUs covered by the general control mechanism and an explanation of how the users meet the criteria of 40 CFR 403.8(f)(1)(iii)(A) for issuance of a general control mechanism.

3. Sampling and Inspection – The Annual Report shall contain a summary of the number and types of inspections and sampling events of SIUs by the permittee, including a list of all SIUs either not sampled or not inspected, and the reason that the sampling and/or inspection was not conducted. For any user subject to reduced reporting under 40 CFR 403.12(e)(3), the list shall include the date of the last POTW sampling event and the date of the last POTW inspection of the user. In addition, the report shall include a summary of the number of self-monitoring events conducted by each SIU and the number required to be conducted, including a list of all SIUs that did not submit the required number of reports and the reason why the reports were not submitted. For NSCIUs, the report shall provide the date of the compliance certification required under 40 CFR 403.12(q).

4. Industrial User Compliance and POTW Enforcement – The Annual Report shall contain a summary of the number and type of violations of pretreatment standards and requirements, including local limits, and the actions taken by the permittee to obtain compliance, including compliance schedules, penalty assessments and actions for injunctive relief. The report shall state whether each SIU was in significant noncompliance, as that term is defined in 40 CFR Section 403.8(f)(2)(viii), and include the parameter(s) in violation, the period of violation, the actions taken by the POTW in response to the violations, and the compliance status at the end of the reporting period. A copy of the publication of users meeting the significant noncompliance criteria shall be included. In addition, the report shall provide a list of users previously designated as NSCIUs that have violated (to any extent) any pretreatment standard or requirement during the year and the date and description of the violation(s).

5. Summary of POTW Operations – The Annual Report shall contain a summary of any interference, pass-through, or permit violations by the POTW and indicate the following: (1) which, if any, permit violations may be attributed to industrial users; (2) which IU(s) are responsible for such violations; and (3) the actions taken to address these events. The report shall also include all sampling and analysis of POTW treatment plant influent, effluent, and sludge conducted during the year for local limit and priority pollutants identified pursuant to Section 303(d) of the Clean Water Act, 33 U.S.C. 1313(d).

6. Pretreatment Program Changes – The Annual Report shall contain a summary of any changes made or proposed to the approved program during the period covered by the report and the date of submission to the Approval Authority.

A summary of pretreatment activities shall be incorporated into the permittee's Annual Municipal Wasteload Management Report required by 25 Pa. Code Chapter 94 and referenced in Part B I.C.4 of this permit.

C. Routine Monitoring – The permittee shall conduct monitoring at its treatment plant that, at a minimum, includes quarterly influent, effluent, and sludge analysis for all pollutants for which local limits have been established, and an annual priority pollutant scan for influent and sludge.

D. Notification of Pass Through or Interference – The permittee shall notify EPA and DEP, in writing, of any instance of pass through or interference, as defined at 40 CFR 403.3(p) and (k), respectively, known or suspected to be related to a discharge from an IU into the POTW. The notification shall be attached to the DMR submitted to EPA and DEP and shall describe the incident, including the date, time, length, cause (including responsible user if known), and the steps taken by the permittee and IU (if identified) to address the incident. A copy of the notification shall also be sent to the EPA at the address provided below.

E. Headworks Analysis – The permittee shall submit to EPA a reevaluation of its local limits based on a headworks analysis of its treatment plant within one (1) year of permit issuance, and provide a revised submission within three (3) months of receipt of comments from EPA or DEP unless a longer period of time is granted in writing by EPA or DEP. In order to ensure that the permittee's discharge complies with water quality standards, the reevaluation of local limits shall consider, at a minimum, all water quality standards under 25 Pa. Code Chapter 93 applicable to the pollutants included in the reevaluation, unless the POTW is subject to an effluent limitation for the pollutant in Part A of this permit. The list of pollutants to be evaluated, as well as a sampling plan for collection of necessary data, shall be submitted to EPA within three (3) months of permit issuance. Unless otherwise approved in writing, the list of pollutants shall include arsenic, cadmium, chromium, copper, cyanide, lead, mercury, molybdenum, nickel, selenium, silver, zinc, BOD_5, TSS, ammonia, any pollutants for which a local limit currently exists, any pollutant limited in this permit, as well as any other pollutants that have been identified in the POTW through monitoring or the receipt of indirect discharges and hauled-in wastes in quantities that have the potential to cause pass through and/or interference. For example, facilities receiving residual waste from oil and gas operations should include pollutants such as Total Dissolved Solids (TDS), specific ions such as chlorides and sulfates, specific radionuclides, metals such as barium and strontium, and other pollutants that could reasonably be expected to be present. Within four (4) months of acceptance of the headworks analysis by the Approval Authority, the permittee shall adopt the revised local limits and, if necessary to ensure that the limits are enforceable throughout the service area, notify all contributing municipalities of the need to adopt the revised local limits.

F. Changes to Pretreatment Program – EPA and DEP may require the permittee to submit for approval changes to its pretreatment program if any one or more of the following conditions is present:

1. The program is not implemented in accordance with 40 CFR Part 403;

2. Problems such as interference, pass through or sludge contamination develop or continue;

3. The POTW proposes to introduce new pollutants or an increased loading of approved pollutants as described in Part A III.C.2 of this permit;

4. Federal, State, or local requirements change;

5. Changes are needed to assure protection of waters of the Commonwealth.

Program modification is necessary whenever there is a significant change in the operation of the pretreatment program that differs from the information contained in the permittee's submission, as approved under 40 CFR 403.11.

G. Procedure for Pretreatment Program Changes – Upon submittal by the permittee, and written notice of approval by the Approval Authority to the permittee of any changes to the permittee's approved pretreatment

program, such changes are effective and binding upon the permittee unless the permittee objects within 30 days of receipt of the written notice of approval. Any objection must be submitted in writing to EPA and DEP.

H. Correspondence – The Approval Authority shall be EPA at the following address:

Pretreatment Coordinator (3WD41)
U.S. Environmental Protection Agency
1650 Arch Street
Philadelphia, PA 19103-2029

III. SOLIDS MANAGEMENT

A. The permittee shall manage and properly dispose of sewage sludge and/or biosolids by performing sludge wasting that maintains an appropriate mass balance of solids within the treatment system. The wasting rate must be developed and implemented considering the specific treatment process type, system loadings, and seasonal variation while maintaining compliance with effluent limitations. Holding excess sludge within clarifiers or in the disinfection process is not permissible.

B. The permittee shall submit the Supplemental Reports entitled, "Supplemental Report – Sewage Sludge/Biosolids Production and Disposal" (Form No. 3800-FM-BCW0438) and "Supplemental Report – Influent & Process Control" (Form No. 3800-FM-BCW0436), as attachments to the DMR on a monthly basis. When applicable, the permittee shall submit the Supplemental Reports entitled, "Supplemental Report – Hauled In Municipal Wastes" (Form No. 3800-FM-BCW0437) and "Supplemental Report – Hauled In Residual Wastes" (Form No. 3800-FM-BCW0450), as attachments to the DMR.

C. By March 31 of each year, the permittee shall submit a "Sewage Sludge Management Inventory" that summarizes the amount of sewage sludge and/or biosolids produced and wasted during the calendar year from the system. The "Sewage Sludge Management Inventory" may be submitted with the Municipal Wasteload Management Report required by Chapter 94. This summary shall include the expected sewage sludge production (estimated using the methodology described in the U.S. EPA handbook, "Improving POTW Performance Using the Composite Correction Approach" (EPA-625/6-84-008)), compared with the actual amount disposed during the year. Sludge quantities shall be expressed as dry weight in addition to gallons or other appropriate units.

IV. WHOLE EFFLUENT TOXICITY (WET)

A. General Requirements

1. The permittee shall conduct Chronic WET tests as specified in this section. The permittee shall collect discharge samples and perform WET tests to generate chronic survival and reproduction data for the cladoceran, *Ceriodaphnia dubia* and chronic survival and growth data for the fathead minnow, *Pimephales promelas*.

2. Samples shall be collected at Outfall 001 in accordance with paragraph E.

3. The permittee shall perform testing using the following dilution series: 3%, 6%, 12%, 56%, and 100% effluent, with a control, where 12% is the facility-specific Target In-Stream Waste Concentration (TIWC).

4. The determination of whether a test endpoint passes or fails shall be made using DEP's WET Analysis Spreadsheet (available at www.dep.pa.gov/wett) by comparing replicate data for the control with replicate data for the TIWC dilution or any dilution greater than the TIWC.

5. The permittee shall submit only valid WET test results to DEP.

B. Test Frequency and Reporting

1. WET testing shall be conducted annually, at a minimum, during the period January 1 – December 31. Annual WET tests must be completed at least 6 months apart, and shall start in the year the permit becomes effective if the permit effective date is prior to October 1.

2. A complete WET test report shall be submitted to the DEP regional office that issued the permit within 45 days of test completion. A complete WET test report submission shall include the information contained in paragraph H, below. The permittee shall continue annual WET monitoring, at a minimum, during the permit renewal review period and during any period of administrative extension of this permit.

3. If a test failure is determined for any endpoint during annual monitoring, the permittee shall initiate a re-test for the species with the failure within 45 days of test completion. All endpoints for the species shall be evaluated in the re-test. The results of the re-test shall be submitted to the DEP regional office that issued the permit.

4. If a passing result is determined for all endpoints in a re-test, the permittee may resume annual monitoring.

5. If there is a failure for one or more endpoints in a re-test, the permittee shall initiate or continue quarterly WET testing for both species until there are four consecutive passing results for all endpoints. The results of all tests shall be submitted to the DEP regional office that issued the permit. In addition, the permittee shall initiate a Phase I Toxicity Reduction Evaluation (TRE) as specified in paragraph C, below.

6. The permittee must report the results of each test endpoint that has a WET reporting requirement in Part A of this permit on the Discharge Monitoring Report (DMR). Test results shall be reported on the DMR in terms of acute or chronic Toxicity Units (TUa or TUc), where TUa is used for acute tests and TUc is used for chronic tests. If DEP's WET Analysis Spreadsheet indicates a passing result for an endpoint, report the value obtained from the expression "1/TIWC". If the Spreadsheet indicates a failure, report the value obtained from the expression "> 1/TIWC". If a dilution higher than the TIWC dilution is used for the comparison with the control, report the value obtained from the expression "1/dilution". For example, an acute test endpoint failure at a TIWC dilution of 50% would be reported as "> 2.0 TUa" (1/0.5).

7. The permittee shall attach the WET Analysis Spreadsheet for the latest four consecutive WET tests to the NPDES permit renewal application that is submitted to DEP at least 180 days prior to the permit expiration date.

C. Phase I Toxicity Reduction Evaluation (TRE)

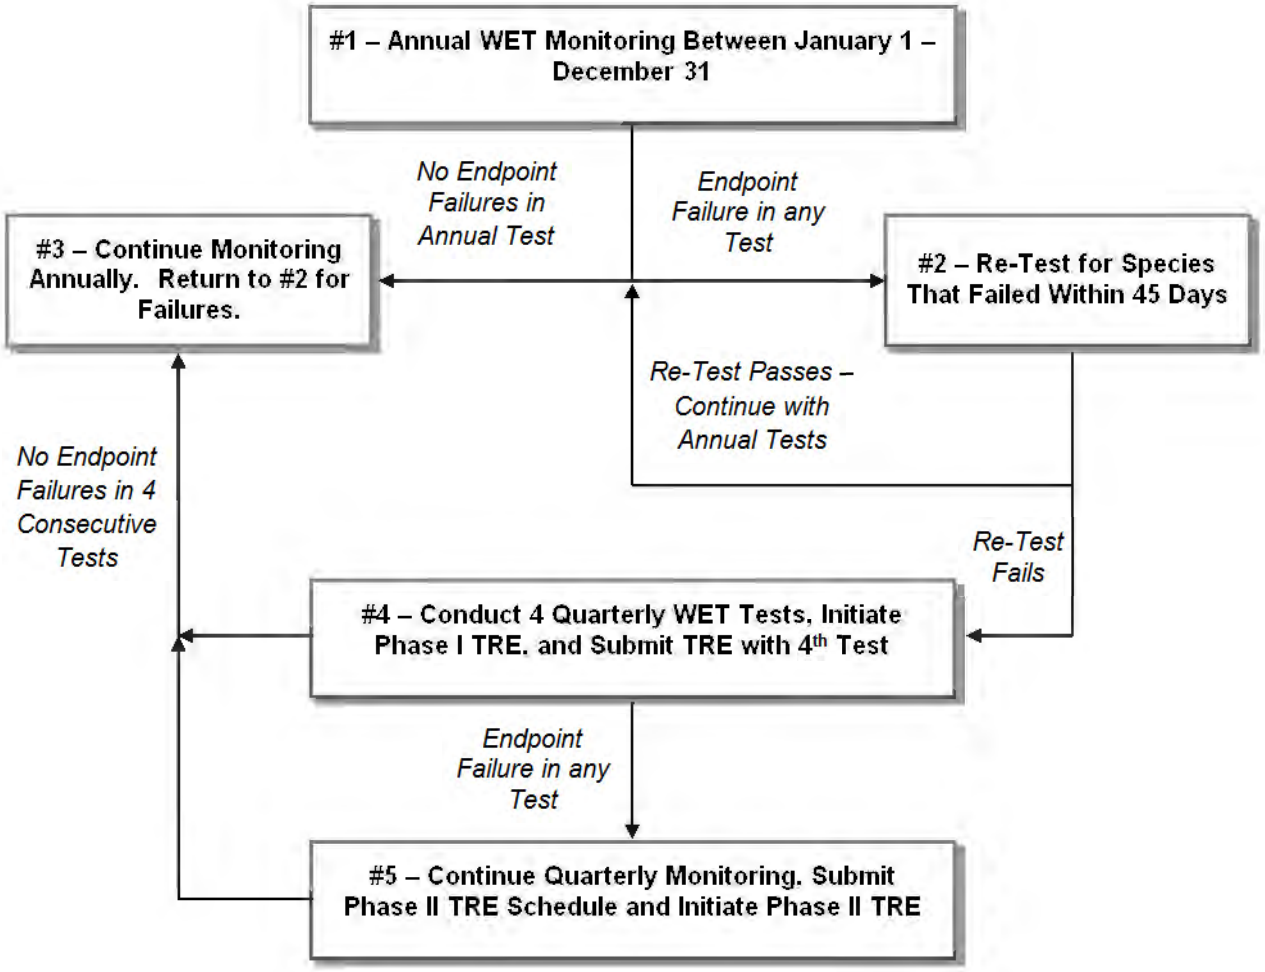
1. The Phase I TRE trigger is one WET endpoint failure followed by a re-test that confirms the failure for the same species. When the TRE process is triggered, quarterly WET testing shall be initiated for both species until there are four consecutive passing results for all endpoints. The Phase I TRE may include a Toxicity Identification Evaluation (TIE) if the permittee cannot immediately identify the possible causes of the effluent toxicity and the possible sources of the causative agents.

2. The permittee shall, within one year following the Phase I TRE trigger, submit a Phase I TRE report to the DEP regional office that issued the permit. The Phase I TRE shall be conducted in accordance with EPA's guidance, "Toxicity Reduction Evaluation for Municipal Wastewater Treatment Plants" (EPA/833B-99/002), "Generalized Methodology for Conducting Industrial Toxicity Reduction Evaluations" (EPA/600/2-88/070), and other relevant EPA guidance, as applicable. If a TIE is conducted as part of the Phase I TRE, it shall conform to EPA's guidance, "Methods for Aquatic Toxicity Identification Evaluations Phase I" (EPA/600/6-91/003), "Phase II" (EPA/600/R-92/080), "Phase III" (EPA/600/R-92/081) and other relevant EPA guidance. The Phase I TRE report shall be submitted with the fourth quarterly WET test report that is completed following the Phase I TRE trigger. The TRE shall include all activities undertaken to identify the cause(s) and source(s) of toxicity and any control efforts.

3. If all four quarterly WET tests produce passing results for all endpoints during the Phase I TRE process, performance of a Phase II TRE is not required, and annual WET testing in accordance with paragraph B.1 may resume.

4. If the four WET tests produce at least one failing result during the Phase I TRE process, the permittee shall continue quarterly WETT monitoring for both species and initiate a Phase II TRE in accordance with paragraph D. In this case, the Phase I TRE must include a schedule for completion of the Phase II TRE. The schedule must include interim milestones and a final completion date not to exceed two years from the initiation of the Phase II TRE. The permittee shall implement the Phase II TRE in accordance with the schedule unless DEP issues written approval to modify the schedule or cease performance of the Phase II TRE.

5. Re-tests during the TRE process are required for invalid tests but are optional and at the discretion of the permittee for valid tests. The results of all re-tests must be submitted to the DEP regional office that issued the permit along with the required elements in paragraph H.



D. Phase II Toxicity Reduction Evaluation (TRE)

1. The Phase II TRE trigger is one WET endpoint failure during performance of the Phase I TRE. A Phase II TRE, if required, shall conform to EPA's guidance, "Toxicity Reduction Evaluation for Municipal Wastewater Treatment Plants" (EPA/833B-99/002), "Generalized Methodology for Conducting Industrial Toxicity Reduction Evaluations" (EPA/600/2-88/070), and other relevant EPA guidance, as applicable. A Phase II TRE evaluates the possible control options to reduce or eliminate the effluent toxicity and the implementation of controls.

2. Once initiated, the Phase II TRE must continue until the source(s) of toxicity are controlled as evidenced by four consecutive WET test passing results for all endpoints, and a final TRE report must be submitted on or before the date specified in the schedule, unless otherwise approved by DEP in writing.

3. If four consecutive quarterly WET tests produce passing results for all endpoints during the Phase II TRE process, annual WET testing in accordance with paragraph B.1 may be initiated or resume.

An overview of the process described in paragraphs B, C and D is presented below:

E. Sample Collection

For each acute testing event, a 24-hour flow-proportioned composite sample shall be collected. For each chronic testing event, three 24-hour flow-proportioned, composite samples shall be collected over a seven day exposure period. The samples must be collected at a frequency of not greater than every two hours and must be flow-proportioned. The samples must be collected at the permit compliance sampling location. Samples must be analyzed within 36 hours from the end of the compositing period and must be placed on ice and held at ≤ 6°C. Refer to the sample handling and preservation regulations set forth in 40 CFR 136, 25 Pa. Code Chapter 252, The NELAC Institute (TNI) Standard, and the appropriate EPA methods.

F. Test Conditions and Methods

Laboratories must be accredited by the DEP Laboratory Accreditation Program in order to perform and report WET tests for NPDES permit compliance. Laboratories must be either State or NELAP accredited.

1. Acute tests shall be completed in accordance with EPA's "Methods for Measuring the Acute Toxicity of Effluents and Receiving Waters to Freshwater and Marine Organisms" (EPA-821-R-02-012, latest edition). Forty eight (48) hour static non-renewal tests shall be used.

2. Chronic tests shall be completed in accordance with EPA's "Short-term Methods for Estimating the Chronic Toxicity of Effluents and Receiving Waters to Freshwater Organisms" (EPA-821-R-02-013, latest edition). Seven (7) day tests shall be used with renewal every 24 hours.

3. The quality assurance and control (QA/QC) requirements and test acceptability standards specified in EPA's test methods and the requirements set forth in 25 Pa Code Chapter 252 or the TNI Standard must be followed.

4. If the permittee or its accredited laboratory determines that QA/QC requirements and/or test acceptability standards have not been met, a re-test shall be initiated within 45 days. Original test data must be maintained by the laboratory and be submitted to DEP upon request. The justification for a re-test must be clearly documented and kept on file with the sample results.

G. Chemical Analyses

Chemical analyses must follow the requirements of the EPA methods and applicable State and/or Federal regulations.

1. Chemical analysis on effluent samples shall include pH, Conductivity, Total Alkalinity, Total Hardness, Total Residual Chlorine, Total Ammonia (Unionized Ammonia), Dissolved Oxygen and temperature. Chemical analyses as described in the EPA Methods (above) shall be performed for each sampling event, including each new batch of dilution water and each testing event.

2. In addition to the chemical analyses required above, those parameters listed in Part A of the NPDES permit for the outfall(s) tested shall be analyzed concurrently with the WET test by using the method(s) specified in the permit.

H. WET Report Elements

WET test reports that are submitted to DEP must include the requirements identified in 25 Pa. Code § 252.401(j)(1) – (15) or in the TNI Standard, or equivalent, as well as the following information:

1. A general test description, including the origin and age of test organisms, dates and results of reference toxicant tests, light and temperature regimes, and other documentation that QA and test acceptability criteria as specified in EPA's methods and DEP's QA Summaries have been met.

2. A description of sample collection procedures and sampling location.

3. Name(s) of individual(s) collecting and transporting samples, including sample renewals, and the date(s) and time(s) of sample collection.

4. All chemical and physical data including laboratory quantitation limits and observations made on the species. The hardness shall be reported for each test condition.

5. Copies of raw data sheets and/or bench sheets with data entries and signatures.

6. When effluents are dechlorinated, dechlorination procedures must be described and if applicable a thiosulfate control used in addition to the normal dilution water control. If the thiosulfate control results are significantly different from the normal control, as determined using DEP's WET Analysis Spreadsheet, the thiosulfate control shall be used in the spreadsheet for comparison with the TIWC condition. The WET report must specify which control was used to determine whether the test result is pass or fail.

7. A description of all observations or test conditions that may have affected the test outcome.

8. Control charts for the species tested regarding age, temperature test range, mortality data and all reference toxicant tests.

9. A completed WET test summary report (3800-FM-BCW0485).

10. A DEP WET Analysis Spreadsheet printout that provides control and TIWC replicate data and displays the outcome of the test (pass or fail) for each endpoint tested.

    WETT reports shall be submitted to the DEP regional office that issued the permit and, for discharges to the Delaware River basin, the Delaware River Basin Commission (DRBC).

V. REQUIREMENTS APPLICABLE TO STORMWATER OUTFALLS

A. The permittee is authorized to discharge non-polluting stormwater from its site, alone or in combination with other wastewaters, through the following outfall: Outfall 002

   Monitoring requirements and effluent limitations for these outfalls are specified in Part A of this permit, if applicable.

B. Preparedness, Prevention and Contingency (PPC) Plan

   1. The permittee shall develop and implement a PPC Plan in accordance with 25 Pa. Code § 91.34 following the guidance contained in DEP's "Guidelines for the Development and Implementation of Environmental Emergency Response Plans" (DEP ID 400-2200-001), its NPDES-specific addendum and the minimum requirements below.

      a. The PPC Plan must identify all potential sources of pollutants that may reasonably be expected to affect the quality of stormwater discharges from the facility.

      b. The PPC Plan must describe preventative measures and BMPs that will be implemented to reduce or eliminate pollutants from coming into contact with stormwater resulting from routine site activities and spills.

      c. The PPC Plan must address actions that will be taken in response to on-site spills or other pollution incidents.

      d. The PPC Plan must identify areas which, due to topography or other factors, have a high potential for soil erosion, and identify measures to limit erosion. Where necessary, erosion and sediment control measures must be developed and implemented in accordance with 25 Pa. Code Chapter 102 and DEP's "Erosion and Sediment Pollution Control Manual" (DEP ID 363-2134-008).

      e. The PPC Plan must address security measures to prevent accidental or intentional entry which could result in an unintentional discharge of pollutants.

      f. The PPC Plan must include a plan for training employees and contractors on pollution prevention, BMPs, and emergency response measures.

      g. If the facility is subject to SARA Title III, Section 313, the PPC Plan must identify releases of "Water Priority Chemicals" within the previous three years. Water Priority Chemicals are those identified in EPA's "Guidance for the Determination of Appropriate Methods for the Detection of Section 313 Water Priority Chemicals" (EPA 833-B-94-001, April 1994). The Plan must include an evaluation of all activities that may result in the stormwater discharge of Water Priority Chemicals.

      h. Spill Prevention Control and Countermeasure (SPCC) plans may be used to meet the requirements of this section if the minimum requirements are addressed.

   2. The permittee shall review and if necessary update the PPC Plan on an annual basis, at a minimum, and when one or more of the following occur:

      a. Applicable DEP or federal regulations are revised, or this permit is revised.

      b. The PPC Plan fails in an emergency.

c. The facility's design, industrial process, operation, maintenance, or other circumstances change in a manner that materially increases the potential for fires, explosions or releases of toxic or hazardous constituents; or which changes the response necessary in an emergency.

d. The list of emergency coordinators or equipment changes.

e. When notified in writing by DEP.

The permittee shall maintain all PPC Plan updates on-site, make the updates available to DEP upon request.

C. Minimum Required BMPs

In addition to BMPs identified in the PPC Plan, the permittee shall implement the following minimum BMPs relating to stormwater pollution prevention:

1. If applicable, post-construction stormwater BMPs that are required under 25 Pa. Code Chapter 102 must be maintained.

2. Manage sludge in accordance with all applicable permit requirements.

3. Store chemicals in secure and covered areas on impervious surfaces away from storm drains.

4. For new facilities and upgrades, design wastewater treatment facilities to avoid, to the maximum extent practicable, stormwater commingling with sanitary wastewater, sewage sludge, and biosolids.

5. Efficiently use herbicides for weed control. Where practicable, use the least toxic herbicide that will achieve pest management objectives. Do not apply during windy conditions.

6. Do not wash parts or equipment over impervious surfaces that wash into storm drains.

7. Implement infiltration techniques, including infiltration basins, trenches, dry wells, porous pavement, etc., wherever practicabl

D. Routine Inspections.

Areas contributing to a stormwater discharge associated with industrial activity shall be visually inspected for evidence of, or the potential for, pollutants entering the drainage system. BMPs in the PPC Plan and required by this permit shall be inspected on a semiannual basis, at a minimum, to determine whether they are adequate and properly implemented in accordance with the terms of this permit or whether additional control measures are needed. Documentation of inspections shall be maintained on-site and be made available to DEP upon request.

E. Stormwater Sampling Requirements

If stormwater sampling is required in Part A of this permit, the following requirements apply:

1. All samples shall be collected from the discharge resulting from a storm event that is greater than 0.1 inch in magnitude and that occurs at least 72 hours from the previously measurable (greater than 0.1 inch rainfall) storm event. The 72-hour storm interval is waived when the preceding storm did not yield a measurable discharge, or if the permittee is able to document that a less than 72-hour interval is representative for local storm events during the sample period.

2. Grab samples shall be taken during the first 30 minutes of the discharge. If the collection of a grab sample during the first 30 minutes is not possible, a grab sample can be taken during the first hour of the discharge, in which case the discharger shall provide an explanation of why a grab sample during the first 30 minutes was not possible.

VI. PCB POLLUTANT MINIMIZATION PLAN AND MONITORING

A. On April 7, 2007, the U.S. Environmental Protection Agency (EPA) Region 3 adopted a Total Maximum Daily Load (TMDL) for Polychlorinated Biphenyls (PCBs) in the Schuylkill River. Implementation of the TMDL requires that permitted facilities that discharge directly to the Schuylkill River conduct sampling for PCBs and, based upon review of the results, develop and implement a PCB Pollutant Minimization Plan (PMP). The Schuylkill River's PCB TMDL was established using a water quality criterion of 0.044 ng/l for PCBs. Based on the sampling results submitted by the facility, this facility is required to develop and implement a PCB PMP.

B. The permittee shall collect one 24-hour composite sample annually during a wet weather flow and one 24-hour composite sample annually during a dry weather flow. The samples shall be collected from Outfall 001.

C. All sample analyses shall be performed using EPA Method 1668A, Revision A: Chlorinated Biphenyl Congeners in Water, Soil, Sediment, and Tissue by HRGC/HRMS (EPA-821-R-00-002, December 1999) as supplemented or amended, and results for all 209 PCB congeners shall be reported. Project-specific sample collection protocols, analytical procedures, and reporting requirements of the Delaware River Basin Commission (DRBC) shall be followed (see www.nj.gov/drbc/quality/toxics/pcbs/monitoring.html). Monitoring information, sample data, and reports associated with PCB monitoring shall be submitted to DEP and DRBC in the form of two compact discs in the format referenced at www.nj.gov/drbc/library/documents/PCB-EDD011309.pdf.

D. In accordance with the EPA TMDL for PCBs for the Schuylkill River, the permittee submitted a PMP for PCBs to DEP and DRBC on March 29, 2017 and a completeness determination was made on August 8, 2017. The permittee shall continue to comply with the requirements of Section 4.30.9 of DRBC's Water Quality Regulations. Additional information regarding PMP development may be found at www.nj.gov/drbc/programs/quality/pmp.html. In addition, the permittee shall:

1. Continue to implement the PMP to achieve PCB loading reduction goals.

2. Submit an Annual Report on the yearly anniversary of the commencement of the PMP to DEP and DRBC consistent with the guidance at www.nj.gov/drbc/programs/quality/pmp.html.

The PMP Annual Report, and PCB data shall be submitted to DEP and DRBC at the following addresses:

NPDES PERMIT
EAST GOSHEN MUNICIPAL AUTHORITY
WASTEWATER TREATMENT PLANT

pennsylvania
DEPARTMENT OF ENVIRONMENTAL
PROTECTION

April 18, 2017

CERTIFIED MAIL NO. 7015 0640 0002 3147 7148

Mr. Louis Smith
Township Manager
East Goshen Municipal Authority
1580 Paoli Pike
West Chester, PA 19380-6107

Re: Final NPDES Permit- Sewage
East Goshen Municipal Authority
NPDES Permit No. PA0050504
Authorization ID No. 1150974
East Goshen Township, Chester County

Dear Mr. Smith:

Your NPDES permit is enclosed. Please read the permit carefully. The permit expires on the date identified on page 1 of the permit. A renewal application must be submitted to this office 180 days prior to the permit expiration date, if a discharge is expected to continue past the expiration date of the permit.

Any person aggrieved by this action may appeal, pursuant to Section 4 of the Environmental Hearing Board Act, 35 P.S. Section 7514, and the Administrative Agency Law, 2 Pa.C.S. Chapter 5A, to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, P.O. Box 8457, Harrisburg, PA 17105-8457, 717.787.3483. TDD users may contact the Board through the Pennsylvania Relay Service, 800.654.5984. Appeals must be filed with the Environmental Hearing Board within 30 days of receipt of written notice of this action unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in braille or on audiotape from the Secretary to the Board at 717.787.3483. This paragraph does not, in and of itself, create any right of appeal beyond that permitted by applicable statutes and decisional law.

IF YOU WANT TO CHALLENGE THIS ACTION, YOUR APPEAL MUST REACH THE BOARD WITHIN 30 DAYS. YOU DO NOT NEED A LAWYER TO FILE AN APPEAL WITH THE BOARD.

IMPORTANT LEGAL RIGHTS ARE AT STAKE, HOWEVER, SO YOU SHOULD SHOW THIS DOCUMENT TO A LAWYER AT ONCE. IF YOU CANNOT AFFORD A LAWYER, YOU MAY QUALIFY FOR FREE PRO BONO REPRESENTATION. CALL THE SECRETARY TO THE BOARD (717.787.3483) FOR MORE INFORMATION.

If you have any questions, please contact Mr. James (Jim) M. McTish, Jr. at 484.250.5180.

Sincerely,

Jenifer L. Fields, P.E.
Environmental Program Manager
Clean Water Program

AUTHORIZATION TO DISCHARGE UNDER THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM DISCHARGE REQUIREMENTS FOR PUBLICLY OWNED TREATMENT WORKS (POTWs)

NPDES PERMIT NO: PA0050504

In compliance with the provisions of the Clean Water Act, 33 U.S.C. Section 1251 *et seq.* ("the Act") and Pennsylvania's Clean Streams Law, as amended, 35 P.S. Section 691.1 *et seq.*,

East Goshen Municipal Authority Chester County
1580 Paoli Pike
West Chester, PA 19380-6107

is authorized to discharge from a facility known as **East Goshen Municipal Authority STP & Sewer System**, located in **East Goshen Township, Chester County**, to **Ridley Creek** in Watershed(s) **3-G** in accordance with effluent limitations, monitoring requirements and other conditions set forth in Parts A, B and C hereof.

THIS PERMIT SHALL BECOME EFFECTIVE ON **May 1, 2017**

THIS PERMIT SHALL EXPIRE AT MIDNIGHT ON **April 30, 2022**

The authority granted by this permit is subject to the following further qualifications:

1. If there is a conflict between the application, its supporting documents and/or amendments and the terms and conditions of this permit, the terms and conditions shall apply.

2. Failure to comply with the terms, conditions or effluent limitations of this permit is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application. (40 CFR 122.41(a))

3. A complete application for renewal of this permit, or notice of intent to cease discharging by the expiration date, must be submitted to DEP at least 180 days prior to the above expiration date (unless permission has been granted by DEP for submission at a later date), using the appropriate NPDES permit application form. (40 CFR 122.41(b), 122.21(d))

   In the event that a timely and complete application for renewal has been submitted and DEP is unable, through no fault of the permittee, to reissue the permit before the above expiration date, the terms and conditions of this permit, including submission of the Discharge Monitoring Reports (DMRs), will be automatically continued and will remain fully effective and enforceable against the discharger until DEP takes final action on the pending permit application. (25 Pa. Code §§ 92a.7(b), (c))

4. This NPDES permit does not constitute authorization to construct or make modifications to wastewater treatment facilities necessary to meet the terms and conditions of this permit.

DATE PERMIT ISSUED April 18, 2017 **ISSUED BY**

Jenifer L. Fields, P.E.
Clean Water Program Manager
Southeast Regional Office

Permit No. PA0050504

PART A - EFFLUENT LIMITATIONS, MONITORING, RECORDKEEPING AND REPORTING REQUIREMENTS

I. A. For Outfall 001 , **Latitude** 39° 59' 9.19" , **Longitude** 75° 31' 26.33" , **River Mile Index** 18.72 , **Stream Code** 00621

Receiving Waters: Ridley Creek

Type of Effluent: Sewage Effluent

1. The permittee is authorized to discharge during the period from **May 1, 2017** through **April 30, 2022**.

2. Based on the anticipated wastewater characteristics and flows described in the permit application and its supporting documents and/or amendments, the following effluent limitations and monitoring requirements apply (see also Additional Requirements and Footnotes).

Parameter	Effluent Limitations						Monitoring Requirements	
	Mass Units (lbs/day) (1)		Concentrations (mg/L)				Minimum (2) Measurement Frequency	Required Sample Type
	Average Monthly	Weekly Average	Minimum	Average Monthly	Weekly Average	Instant. Maximum		
Flow (MGD)	Report	Report Daily Max	XXX	XXX	XXX	XXX	Continuous	Measured
pH (S.U.)	XXX	XXX	6.0	XXX	9.0 Max	XXX	1/day	Grab
Dissolved Oxygen	XXX	XXX	5.0	XXX	XXX	XXX	1/day	Grab
Carbonaceous Biochemical Oxygen Demand (CBOD5) Nov 1 - Apr 30	125	188	XXX	20	30	40	1/week	24-Hr Composite
Carbonaceous Biochemical Oxygen Demand (CBOD5) May 1 - Oct 31	62	94	XXX	10	15	20	1/week	24-Hr Composite
Biochemical Oxygen Demand (BOD5) Raw Sewage Influent	Report	XXX	XXX	Report	XXX	XXX	1/week	24-Hr Composite
Total Suspended Solids Raw Sewage Influent	Report	XXX	XXX	Report	XXX	XXX	1/week	24-Hr Composite
Total Suspended Solids	62	94	XXX	10.0	15.0	XXX	1/week	24-Hr Composite
Fecal Coliform (CFU/100 ml)	XXX	XXX	XXX	200 Geo Mean	XXX	1000	1/week	Grab

Outfall 001, Continued (from May 1, 2017 through April 30, 2022)

Parameter	Effluent Limitations						Monitoring Requirements	
	Mass Units (lbs/day) (1)		Concentrations (mg/L)				Minimum (2) Measurement Frequency	Required Sample Type
	Average Monthly	Weekly Average	Minimum	Average Monthly	Weekly Average	Instant. Maximum		
Ammonia-Nitrogen Nov 1 - Apr 30	44	XXX	XXX	7.0	XXX	14	1/week	24-Hr Composite
Ammonia-Nitrogen May 1 - Oct 31	16	XXX	XXX	2.5	XXX	5	1/week	24-Hr Composite
Total Phosphorus	3.0	XXX	XXX	0.5	XXX	1	1/week	24-Hr Composite

Samples taken in compliance with the monitoring requirements specified above shall be taken at the following location(s):
At discharge prior to wetland for Outfall 001, and at effluent pump chamber for Outfall 002 (3).

PART A - EFFLUENT LIMITATIONS, MONITORING, RECORDKEEPING AND REPORTING REQUIREMENTS

I. B. For Outfall 002 , **Latitude** 40° 0' 19.00" , **Longitude** 75° 32' 5.00" , **River Mile Index** 18.72 , **Stream Code** 00621

Receiving Waters: Ridley Creek

Type of Effluent: Sewage Effluent

1. The permittee is authorized to discharge during the period from **May 1, 2017** through **April 30, 2022**.

2. Based on the anticipated wastewater characteristics and flows described in the permit application and its supporting documents and/or amendments, the following effluent limitations and monitoring requirements apply (see also Additional Requirements and Footnotes).

Parameter	Effluent Limitations						Monitoring Requirements	
	Mass Units (lbs/day) (1)		Concentrations (mg/L)				Minimum (2) Measurement Frequency	Required Sample Type
	Average Monthly	Weekly Average	Minimum	Average Monthly	Weekly Average	Instant. Maximum		
Flow (MGD)	Report	Report Daily Max	XXX	XXX	XXX	XXX	Continuous	Measured
pH (S.U.)	XXX	XXX	6.0	XXX	9.0 Max	XXX	1/day	Grab
Dissolved Oxygen	XXX	XXX	5.0	XXX	XXX	XXX	1/day	Grab
Carbonaceous Biochemical Oxygen Demand (CBOD5) Nov 1 - Apr 30	125	188	XXX	20	30	40	1/week	24-Hr Composite
Carbonaceous Biochemical Oxygen Demand (CBOD5) May 1 - Oct 31	62	94	XXX	10	15	20	1/week	24-Hr Composite
Total Suspended Solids	62	94	XXX	10.0	15.0	XXX	1/week	24-Hr Composite
Fecal Coliform (CFU/100 ml)	XXX	XXX	XXX	200 Geo Mean	XXX	1000	1/week	Grab
Ammonia-Nitrogen Nov 1 - Apr 30	44	XXX	XXX	7.0	XXX	14	1/week	24-Hr Composite
Ammonia-Nitrogen May 1 - Oct 31	16	XXX	XXX	2.5	XXX	5	1/week	24-Hr Composite

Outfall 002, Continued (from May 1, 2017 through April 30, 2022)

Parameter	Effluent Limitations						Monitoring Requirements	
	Mass Units (lbs/day) [1]		Concentrations (mg/L)				Minimum [2] Measurement Frequency	Required Sample Type
	Average Monthly	Weekly Average	Minimum	Average Monthly	Weekly Average	Instant. Maximum		
Total Phosphorus	3.0	XXX	XXX	0.5	XXX	1	1/week	24-Hr Composite

Samples taken in compliance with the monitoring requirements specified above shall be taken at the following location(s):

At discharge prior to wetland for Outfall 001, and at effluent pump chamber for Outfall 002 [3].

PART A - EFFLUENT LIMITATIONS, MONITORING, RECORDKEEPING AND REPORTING REQUIREMENTS (Continued)

Additional Requirements

1. The permittee may not discharge:

   a. Floating solids, scum, sheen or substances that result in observed deposits in the receiving water. (25 Pa Code § 92a.41(c))

   b. Oil and grease in amounts that cause a film or sheen upon or discoloration of the waters of this Commonwealth or adjoining shoreline, or that exceed 15 mg/l as a daily average or 30 mg/l at any time (or lesser amounts if specified in this permit). (25 Pa. Code § 92a.47(a)(7), § 95.2(2))

   c. Substances in concentration or amounts sufficient to be inimical or harmful to the water uses to be protected or to human, animal, plant or aquatic life. (25 Pa Code § 93.6(a))

   d. Foam or substances that produce an observed change in the color, taste, odor or turbidity of the receiving water, unless those conditions are otherwise controlled through effluent limitations or other requirements in this permit. For the purpose of determining compliance with this condition, DEP will compare conditions in the receiving water upstream of the discharge to conditions in the receiving water approximately 100 feet downstream of the discharge to determine if there is an observable change in the receiving water. (25 Pa Code § 92a.41(c))

2. The monthly average percent removal of BOD_5 or $CBOD_5$ and TSS must be at least 85% for POTW facilities on a concentration basis except where 25 Pa. Code 92a.47(g) and (h) are applicable to facilities with combined sewer overflows (CSOs) or as otherwise specified in this permit. (25 Pa. Code § 92a.47(a)(3))

3. If the permit requires the reporting of average weekly statistical results, the maximum weekly average concentration and maximum weekly average mass loading shall be reported, regardless of whether the results are obtained for the same or different weeks.

4. The permittee shall monitor the sewage effluent discharge(s) for the effluent parameters identified in the Part A limitations table(s) during all bypass events at the facility, using the sample types that are specified in the limitations table(s). Where the required sample type is "composite", the permittee must commence sample collection within one hour of the start of the bypass, wherever possible. The results shall be reported on the Daily Effluent Monitoring supplemental form (3800-FM-BPNPSM0435) and be incorporated into the calculations used to report self-monitoring data on Discharge Monitoring Reports (DMRs).

5. The total average flow for Outfalls 001 and 002 may not exceed 0.75 MGD. Outfall 002 flows reported to DEP must be measured based on pumping rate and time or other methods.

Footnotes

(1) When sampling to determine compliance with mass effluent limitations, the discharge flow at the time of sampling must be measured and recorded.

(2) This is the minimum number of sampling events required. Permittees are encouraged, and it may be advantageous in demonstrating compliance, to perform more than the minimum number of sampling events.

(3) Samples collected at Outfall 001 may be used to represent effluent quality at Outfall 002.

Supplemental Information

(1) The hydraulic design capacity of 0.75 million gallons per day for the treatment facility is used to prepare the annual Municipal Wasteload Management Report to help determine whether a "hydraulic overload" situation exists, as defined in Title 25 Pa. Code Chapter 94.

Permit No. PA0050504

(2) The effluent limitations for Outfalls 001 and 002 were determined using effluent discharge rates of 0.75 MGD and 0.135 MGD, respectively.

(3) The organic design capacity of 2098 lbs BOD_5 per day for the treatment facility is used to prepare the annual Municipal Wasteload Management Report to determine whether an "organic overload" condition exists, as defined in 25 Pa. Code Chapter 94.

(4) Total Nitrogen is the sum of Total Kjeldahl-N (TKN) plus Nitrite-Nitrate as N (NO_2+NO_3-N), where TKN and NO_2+NO_3-N are measured in the same sample.

II. DEFINITIONS

At Outfall (XXX) means a sampling location in outfall line XXX below the last point at which wastes are added to outfall line (XXX), or where otherwise specified.

Average refers to the use of an arithmetic mean, unless otherwise specified in this permit. (40 CFR 122.41(l)(4)(iii))

Best Management Practices (BMPs) means schedules of activities, prohibitions of practices, maintenance procedures and other management practices to prevent or reduce the pollutant loading to surface waters of the Commonwealth. The term also includes treatment requirements, operating procedures and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage. The term includes activities, facilities, measures, planning or procedures used to minimize accelerated erosion and sedimentation and manage stormwater to protect, maintain, reclaim, and restore the quality of waters and the existing and designated uses of waters within this Commonwealth before, during and after earth disturbance activities. (25 Pa. Code § 92a.2)

Bypass means the intentional diversion of waste streams from any portion of a treatment facility. (40 CFR 122.41(m)(1)(i))

Calendar Week is defined as the seven consecutive days from Sunday through Saturday, unless the permittee has been given permission by DEP to provide weekly data as Monday through Friday based on showing excellent performance of the facility and a history of compliance. In cases when the week falls in two separate months, the month with the most days in that week shall be the month for reporting.

Clean Water Act means the Federal Water Pollution Control Act, as amended (33 U.S.C.A. §§ 1251 to 1387).

Composite Sample (for all except GC/MS volatile organic analysis) means a combination of individual samples (at least eight for a 24-hour period or four for an 8-hour period) of at least 100 milliliters (mL) each obtained at spaced time intervals during the compositing period. The composite must be flow-proportional; either the volume of each individual sample is proportional to discharge flow rates, or the sampling interval is proportional to the flow rates over the time period used to produce the composite. (EPA Form 2C)

Composite Sample (for GC/MS volatile organic analysis) consists of at least four aliquots or grab samples collected during the sampling event (not necessarily flow proportioned). The samples must be combined in the laboratory immediately before analysis and then one analysis is performed. (EPA Form 2C)

Daily Average Temperature means the average of all temperature measurements made, or the mean value plot of the record of a continuous automated temperature recording instrument, either during a calendar day or during the operating day if flows are of a shorter duration.

Daily Discharge means the discharge of a pollutant measured during a calendar day or any 24-hour period that reasonably represents the calendar day for purposes of sampling. For pollutants with limitations expressed in units of mass, the "daily discharge" is calculated as the total mass of the pollutant discharged over the day. For pollutants with limitations expressed in other units of measurement, the "daily discharge" is calculated as the average measurement of the pollutant over the day. (25 Pa. Code § 92a.2, 40 CFR 122.2)

Daily Maximum Discharge Limitation means the highest allowable "daily discharge."

Discharge Monitoring Report (DMR) means the DEP or EPA supplied form(s) for the reporting of self-monitoring results by the permittee. (25 Pa. Code § 92a.2, 40 CFR 122.2)

Estimated Flow means any method of liquid volume measurement based on a technical evaluation of the sources contributing to the discharge including, but not limited to, pump capabilities, water meters and batch discharge volumes.

Geometric Mean means the average of a set of n sample results given by the n^{th} root of their product.

Grab Sample means an individual sample of at least 100 mL collected at a randomly selected time over a period not to exceed 15 minutes. (EPA Form 2C)

Hauled-In Wastes means any waste that is introduced into a treatment facility through any method other than a direct connection to the sewage collection system. The term includes wastes transported to and disposed of within the treatment facility or other entry points within the collection system.

Hazardous Substance means any substance designated under 40 CFR Part 116 pursuant to Section 311 of the Clean Water Act. (40 CFR 122.2)

Immersion Stabilization (i-s) means a calibrated device is immersed in the wastewater until the reading is stabilized.

Indirect Discharger means a non-domestic discharger introducing pollutants to a Publicly Owned Treatment Works (POTW) or other treatment works. (25 Pa. Code § 92a.2, 40 CFR 122.2)

Industrial User means a source of Indirect Discharge. (40 CFR 403.3)

Instantaneous Maximum Effluent Limitation means the highest allowable discharge of a concentration or mass of a substance at any one time as measured by a grab sample. (25 Pa. Code § 92a.2)

Measured Flow means any method of liquid volume measurement, the accuracy of which has been previously demonstrated in engineering practice, or for which a relationship to absolute volume has been obtained.

Monthly Average Discharge Limitation means the highest allowable average of "daily discharges" over a calendar month, calculated as the sum of all "daily discharges" measured during a calendar month divided by the number of "daily discharges" measured during that month. (25 Pa. Code § 92a.2)

Municipality means a city, town, borough, county, township, school district, institution, authority or other public body created by or pursuant to State law and having jurisdiction over disposal of sewage, industrial wastes, or other wastes. (25 Pa. Code § 92a.2)

Municipal Waste means garbage, refuse, industrial lunchroom or office waste and other material, including solid, liquid, semisolid or contained gaseous material resulting from operation of residential, municipal, commercial or institutional establishments and from community activities; and sludge not meeting the definition of residual or hazardous waste under this section from a municipal, commercial or institutional water supply treatment plant, waste water treatment plant or air pollution control facility. (25 Pa. Code § 271.1)

Publicly Owned Treatment Works (POTW) means a treatment works as defined by §212 of the Clean Water Act, owned by a state or municipality. The term includes any devices and systems used in the storage, treatment, recycling and reclamation of municipal sewage or industrial wastes of a liquid nature. The term also includes sewers, pipes or other conveyances if they convey wastewater to a POTW providing treatment. The term also means the municipality as defined in section 502(4) of the Clean Water Act, which has jurisdiction over the indirect discharges to and the discharges from such a treatment works. (25 Pa Code § 92a.2, 40 CFR 122.2)

Residual Waste means garbage, refuse, other discarded material or other waste, including solid, liquid, semisolid or contained gaseous materials resulting from industrial, mining and agricultural operations and sludge from an industrial, mining or agricultural water supply treatment facility, wastewater treatment facility or air pollution control facility, if it is not hazardous. The term does not include coal refuse as defined in the Coal Refuse Disposal Control Act. The term does not include treatment sludges from coal mine drainage treatment plants, disposal of which is being carried on under and in compliance with a valid permit issued under the Clean Streams Law. (25 Pa Code § 287.1)

Severe Property Damage means substantial physical damage to property, damage to the treatment facilities that causes them to become inoperable, or substantial and permanent loss of natural resources that can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production. (40 CFR 122.41(m)(1)(ii))

Stormwater means the runoff from precipitation, snow melt runoff, and surface runoff and drainage. (25 Pa. Code § 92a.2)

Stormwater Associated With Industrial Activity means the discharge from any conveyance that is used for collecting and conveying stormwater and that is directly related to manufacturing, processing or raw materials storage areas at an industrial plant, and as defined at 40 CFR §122.26(b)(14)(i) – (ix) and (xi) and 25 Pa. Code § 92a.2.

Toxic Pollutant means those pollutants, or combinations of pollutants, including disease-causing agents, which after discharge and upon exposure, ingestion, inhalation or assimilation into any organism, either directly from the environment or indirectly by ingestion through food chains may, on the basis of information available to DEP cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions, including malfunctions in reproduction, or physical deformations in these organisms or their offspring. (25 Pa. Code § 92a.2)

Weekly Average Discharge Limitation means the highest allowable average of "daily discharges" over a calendar week, calculated as the sum of all "daily discharges" measured during a calendar week divided by the number of "daily discharges" measured during that week.

III. SELF-MONITORING, REPORTING AND RECORDKEEPING

A. Representative Sampling

1. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity (40 CFR 122.41(j)(1)). Representative sampling includes the collection of samples, where possible, during periods of adverse weather, changes in treatment plant performance and changes in treatment plant loading. If possible, effluent samples must be collected where the effluent is well mixed near the center of the discharge conveyance and at the approximate mid-depth point, where the turbulence is at a maximum and the settlement of solids is minimized. (40 CFR 122.48, 25 Pa. Code § 92a.61)

2. Records Retention (40 CFR 122.41(j)(2))

   Except for records of monitoring information required by this permit related to the permittee's sludge use and disposal activities which shall be retained for a period of at least 5 years, all records of monitoring activities and results (including all original strip chart recordings for continuous monitoring instrumentation and calibration and maintenance records), copies of all reports required by this permit, and records of all data used to complete the application for this permit shall be retained by the permittee for 3 years from the date of the sample measurement, report or application, unless a longer retention period is required by the permit. The 3-year period shall be extended as requested by DEP or the EPA Regional Administrator.

3. Recording of Results (40 CFR 122.41(j)(3))

   For each measurement or sample taken pursuant to the requirements of this permit, the permittee shall record the following information:

   a. The exact place, date and time of sampling or measurements.
   b. The person(s) who performed the sampling or measurements.
   c. The date(s) the analyses were performed.
   d. The person(s) who performed the analyses.
   e. The analytical techniques or methods used; and the associated detection level.
   f. The results of such analyses.

4. Test Procedures

   a. Facilities that test or analyze environmental samples used to demonstrate compliance with this permit shall be in compliance with laboratory accreditation requirements of Act 90 of 2002 (27 Pa. C.S. §§ 4101-4113) and 25 Pa. Code Chapter 252, relating to environmental laboratory accreditation.

   b. Test procedures (methods) for the analysis of pollutants or pollutant parameters shall be those approved under 40 CFR Part 136 or required under 40 CFR Chapter I, Subchapters N or O, unless the method is specified in this permit or has been otherwise approved in writing by DEP. (40 CFR 122.41(j)(4), 122.44(i)(1)(iv))

   c. Test procedures (methods) for the analysis of pollutants or pollutant parameters shall be sufficiently sensitive. A method is sufficiently sensitive when 1) the method minimum level is at or below the level of the effluent limit established in the permit for the measured pollutant or pollutant parameter; or 2) the method has the lowest minimum level of the analytical methods approved under 40 CFR Part 136 or required under 40 CFR Chapter I, Subchapters N or O, for the measured pollutant or pollutant parameter; or 3) the method is specified in this permit or has been otherwise approved in writing by DEP for the measured pollutant or pollutant parameter. Permittees have the option of providing matrix or sample-specific minimum levels rather than the published levels. (40 CFR 122.44(i)(1)(iv))

5. Quality/Assurance/Control

   In an effort to assure accurate self-monitoring analyses results:

   a. The permittee, or its designated laboratory, shall participate in the periodic scheduled quality assurance inspections conducted by DEP and EPA. (40 CFR 122.41(e), 122.41(i)(3))

   b. The permittee, or its designated laboratory, shall develop and implement a program to assure the quality and accurateness of the analyses performed to satisfy the requirements of this permit, in accordance with 40 CFR Part 136. (40 CFR 122.41(i)(4))

B. Reporting of Monitoring Results

1. The permittee shall effectively monitor the operation and efficiency of all wastewater treatment and control facilities, and the quantity and quality of the discharge(s) as specified in this permit. (25 Pa. Code §§ 92a.3(c), 92a.41(a), 92a.44, 92a.61(i) and 40 CFR §§ 122.41(e), 122.44(i)(1))

2. The permittee shall use DEP's electronic Discharge Monitoring Report (eDMR) system to report the results of compliance monitoring under this permit (see www.dep.pa.gov/edmr). Permittees that are not using the eDMR system as of the effective date of this permit shall submit the necessary registration and trading partner agreement forms to DEP's Bureau of Clean Water (BCW) within 30 days of the effective date of this permit and begin using the eDMR system when notified by DEP BCW to do so. (25 Pa. Code §§ 92a.3(c), 92a.41(a), 92a.61(g) and 40 CFR § 122.41(l)(4))

3. Submission of a physical (paper) copy of a Discharge Monitoring Report (DMR) is acceptable under the following circumstances:

   a. For a permittee that is not yet using the eDMR system, the permittee shall submit a physical copy of a DMR to the DEP regional office that issued the permit during the interim period between the submission of registration and trading partner agreement forms to DEP and DEP's notification to begin using the eDMR system.

   b. For any permittee, as a contingency a physical DMR may be mailed to the DEP regional office that issued the permit if there are technological malfunction(s) that prevent the successful submission of a DMR through the eDMR system. In such situations, the permittee shall submit the DMR through the eDMR system within 5 days following remedy of the malfunction(s).

4. DMRs must be completed in accordance with DEP's published DMR instructions (3800-FM-BPNPSM0463). DMRs must be received by DEP no later than 28 days following the end of the monitoring period. DMRs are based on calendar reporting periods and must be received by DEP in accordance with the following schedule:

   - Monthly DMRs must be received within 28 days following the end of each calendar month.
   - Quarterly DMRs must be received within 28 days following the end of each calendar quarter, i.e., January 28, April 28, July 28, and October 28.
   - Semiannual DMRs must be received within 28 days following the end of each calendar semiannual period, i.e., January 28 and July 28.
   - Annual DMRs must be received by January 28, unless Part C of this permit requires otherwise.

5. The permittee shall complete all Supplemental Reporting forms (Supplemental DMRs) attached to this permit, or an approved equivalent, and submit the signed, completed forms as attachments to the DMR, through DEP's eDMR system. DEP's Supplemental Laboratory Accreditation Form (3800-FM-BPNPSM0189) must be completed and submitted to DEP with the first DMR following issuance of this permit, and anytime thereafter when changes to laboratories or methods occur. (25 Pa. Code §§ 92a.3(c), 92a.41(a), 92a.61(g) and 40 CFR § 122.41(l)(4))

6. The completed DMR Form shall be signed and certified by either of the following applicable persons, as defined in 25 Pa. Code § 92a.22:

- For a corporation - by a principal executive officer of at least the level of vice president, or an authorized representative, if the representative is responsible for the overall operation of the facility from which the discharge described in the NPDES form originates.
- For a partnership or sole proprietorship - by a general partner or the proprietor, respectively.
- For a municipality, state, federal or other public agency - by a principal executive officer or ranking elected official.

If signed by a person other than the above and for co-permittees, written notification of delegation of DMR signatory authority must be submitted to DEP in advance of or along with the relevant DMR form. (40 CFR § 122.22(b))

7. If the permittee monitors any pollutant at monitoring points as designated by this permit, using analytical methods described in Part A III.A.4. herein, more frequently than the permit requires, the results of this monitoring shall be incorporated, as appropriate, into the calculations used to report self-monitoring data on the DMR. (40 CFR 122.41(l)(4)(ii))

C. Reporting and Notification Requirements

1. Planned Changes to Physical Facilities – The permittee shall give notice to DEP as soon as possible but no later than 30 days prior to planned physical alterations or additions to the permitted facility. A permit under 25 Pa. Code Chapter 91 may be required for these situations prior to implementing the planned changes. A permit application, or other written submission to DEP, can be used to satisfy the notification requirements of this section.

   Notice is required when:

   a. The alteration or addition to a permitted facility may meet one of the criteria for determining whether a facility is a new source in 40 CFR 122.29(b). (40 CFR 122.41(l)(1)(i))

   b. The alteration or addition could significantly change the nature or increase the quantity of pollutants discharged. This notification applies to pollutants which are not subject to effluent limitations in this permit. (40 CFR 122.41(l)(1)(ii))

   c. The alteration or addition results in a significant change in the permittee's sludge use or disposal practices, and such alteration, addition, or change may justify the application of permit conditions that are different from or absent in the existing permit, including notification of additional use or disposal sites not reported during the permit application process or not reported pursuant to an approved land application plan. (40 CFR 122.41(l)(1)(iii))

   d. The planned change may result in noncompliance with permit requirements. (40 CFR 122.41(l)(2))

2. Planned Changes to Waste Stream – Under the authority of 25 Pa. Code § 92a.24(a) and 40 CFR 122.42(b), the permittee shall provide notice to DEP and EPA as soon as possible but no later than 45 days prior to any planned changes in the volume or pollutant concentration of its influent waste stream as a result of indirect discharges or hauled-in wastes, as specified in paragraphs 2.a. and 2.b., below. Notice shall be provided on the "Planned Changes to Waste Stream" Supplemental Report (3800-FM-BPNPSM0482), available on DEP's website. The permittee shall provide information on the quality and quantity of waste introduced into the POTW, and any anticipated impact of the change on the quantity or quality of effluent to be discharged from the POTW (40 CFR 122.42(b)(3)). The Report shall be sent via Certified Mail or other means to confirm DEP's receipt of the notification. DEP will determine if the submission of a new application and receipt of a new or amended permit is required.

   a. Introduction of New Pollutants (25 Pa. Code § 92a.24(a), 40 CFR 122.42(b)(1))

      New pollutants are defined as parameters that meet one or more of the following criteria:

(i) Any pollutants that were not detected in the facilities' influent waste stream as reported in the permit application; and have not been approved to be included in the permittee's influent waste stream by DEP in writing.

(ii) Any new introduction of pollutants into the POTW from an indirect discharger which would be subject to Sections 301 or 306 of the Clean Water Act if it were directly discharging those pollutants (40 CFR 122.42(b)(1)).

The permittee shall provide notification of the introduction of new pollutants in accordance with paragraph 2 above. The permittee may not authorize the introduction of new pollutants until the permittee receives DEP's written approval.

b. Increased Loading of Approved Pollutants (25 Pa. Code § 92a.24(a), 40 CFR 122.42(b)(2))

Approved pollutants are defined as parameters that meet one or more of the following criteria:

(i) Were detected in the facilities' influent waste stream as reported in the permittee's permit application; or have been previously approved to be included in the permittee's influent waste stream by DEP in writing.

(ii) Have an effluent limitation or monitoring requirement in this permit.

The permittee shall provide notification of the introduction of increased influent loading (lbs/day) of approved pollutants in accordance with paragraph 2 above when (1) the cumulative increase in influent loading (lbs/day) exceeds 20% of the maximum loading reported in the permit application, or a loading previously approved by DEP and/or EPA, or (2) may cause an exceedance in the effluent of Effluent Limitation Guidelines (ELGs) or limitations in Part A of this permit, or (3) may cause interference or pass through at the POTW, or (4) may cause exceedances of the applicable water quality standards in the receiving stream. Unless specified otherwise in this permit, if DEP does not respond to the notification within 30 days of its receipt, the permittee may proceed with the increase in loading. The acceptance of increased loading of approved pollutants may not result in an exceedance of ELGs or effluent limitations, may not result in a hydraulic or organic overload condition as defined in 25 Pa. Code § 94.1, and may not cause exceedances of the applicable water quality standards in the receiving stream.

3. Reporting Requirements for Hauled-In Wastes

a. Receipt of Residual Waste

(i) The permittee shall document the receipt of all hauled-in residual wastes (including but not limited to wastewater from oil and gas wells, food processing waste, and landfill leachate), as defined at 25 Pa. Code § 287.1, that are received for processing at the treatment facility. The permittee shall report hauled-in residual wastes on a monthly basis to DEP on the "Hauled In Residual Wastes" Supplemental Report (3800-FM-BPNPSM0450) as an attachment to the DMR. If no residual wastes were received during a month, submission of the Supplemental Report is not required.

The following information is required by the Supplemental Report. The information used to develop the Report shall be retained by the permittee for five years from the date of receipt and must be made available to DEP or EPA upon request.

(1) The dates that residual wastes were received.

(2) The volume (gallons) of wastes received.

(3) The license plate number of the vehicle transporting the waste to the treatment facility.

(4) The permit number(s) of the well(s) where residual wastes were generated, if applicable.

(5) The name and address of the generator of the residual wastes.

(6) The type of wastewater.

The transporter of residual waste must maintain these and other records as part of the daily operational record (25 Pa. Code § 299.219). If the transporter is unable to provide this information or the permittee has not otherwise received the information from the generator, the residual wastes shall not be accepted by the permittee until such time as the permittee receives such information from the transporter or generator.

(ii) The following conditions apply to the characterization of residual wastes received by the permittee:

(1) If the generator is required to complete a chemical analysis of residual wastes in accordance with 25 Pa. Code § 287.51, the permittee must receive and maintain on file a chemical analysis of the residual wastes it receives. The chemical analysis must conform to the Bureau of Waste Management's Form 26R except as noted in paragraph (2), below. Each load of residual waste received must be covered by a chemical analysis if the generator is required to complete it.

(2) For wastewater generated from hydraulic fracturing operations ("frac wastewater") within the first 30 production days of a well site, the chemical analysis may be a general frac wastewater characterization approved by DEP. Thereafter, the chemical analysis must be waste-specific and be reported on the Form 26R.

b. Receipt of Municipal Waste

(i) The permittee shall document the receipt of all hauled-in municipal wastes (including but not limited to septage and liquid sewage sludge), as defined at 25 Pa. Code § 271.1, that are received for processing at the treatment facility. The permittee shall report hauled-in municipal wastes on a monthly basis to DEP on the "Hauled In Municipal Wastes" Supplemental Report (3800-FM-BPNPSM0437) as an attachment to the DMR. If no municipal wastes were received during a month, submission of the Supplemental Report is not required.

The following information is required by the Supplemental Report:

(1) The dates that municipal wastes were received.

(2) The volume (gallons) of wastes received.

(3) The BOD_5 concentration (mg/l) and load (lbs) for the wastes received.

(4) The location(s) where wastes were disposed of within the treatment facility.

(ii) Sampling and analysis of hauled-in municipal wastes must be completed to characterize the organic strength of the wastes, unless composite sampling of influent wastewater is performed at a location downstream of the point of entry for the wastes. The influent BOD_5 characterization for the treatment facility, as reported in the annual Municipal Wasteload Management Report per 25 Pa. Code Chapter 94, must be representative of the hauled-in municipal wastes received.

4. Unanticipated Noncompliance or Potential Pollution Reporting

   a. Immediate Reporting - The permittee shall immediately report any incident causing or threatening pollution in accordance with the requirements of 25 Pa. Code §§ 91.33 and 92a.41(b).

      (i) If, because of an accident, other activity or incident a toxic substance or another substance which would endanger users downstream from the discharge, or would otherwise result in pollution or create a danger of pollution or would damage property, the permittee shall immediately notify DEP by telephone of the location and nature of the danger. Oral notification to the Department is required as soon as possible, but no later than 4 hours after the permittee becomes aware of the incident causing or threatening pollution.

      (ii) If reasonably possible to do so, the permittee shall immediately notify downstream users of the waters of the Commonwealth to which the substance was discharged. Such notice shall include the location and nature of the danger.

      (iii) The permittee shall immediately take or cause to be taken steps necessary to prevent injury to property and downstream users of the waters from pollution or a danger of pollution and, in addition, within 15 days from the incident, shall remove the residual substances contained thereon or therein from the ground and from the affected waters of this Commonwealth to the extent required by applicable law.

   b. The permittee shall report any noncompliance which may endanger health or the environment in accordance with the requirements of 40 CFR 122.41(l)(6). These requirements include the following obligations:

      (i) 24 Hour Reporting - The permittee shall orally report any noncompliance with this permit which may endanger health or the environment within 24 hours from the time the permittee becomes aware of the circumstances. The following shall be included as information which must be reported within 24 hours under this paragraph (40 CFR 122.41(l)(6)(ii)):

         (1) Any unanticipated bypass which exceeds any effluent limitation in the permit;

         (2) Any upset which exceeds any effluent limitation in the permit; and

         (3) Violation of the maximum daily discharge limitation for any of the pollutants listed in the permit as being subject to the 24-hour reporting requirement.

      (ii) Written Report - A written submission shall also be provided within 5 days of the time the permittee becomes aware of any noncompliance which may endanger health or the environment. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.

      (iii) Waiver of Written Report - DEP may waive the written report on a case-by-case basis if the associated oral report has been received within 24 hours from the time the permittee becomes aware of the circumstances which may endanger health or the environment. Unless such a waiver is expressly granted by DEP, the permittee shall submit a written report in accordance with this paragraph. (40 CFR 122.41(l)(6)(iii))

5. Other Noncompliance

   The permittee shall report all instances of noncompliance not reported under paragraph C.4 of this section or specific requirements of compliance schedules, at the time DMRs are submitted, on the Non-Compliance Reporting Form (3800-FM-BPNPSM0440). The reports shall contain the information listed in paragraph C.4.b.(ii) of this section. (40 CFR 122.41(l)(7))

PART B

I. MANAGEMENT REQUIREMENTS

A. Compliance

1. The permittee shall comply with all conditions of this permit. If a compliance schedule has been established in this permit, the permittee shall achieve compliance with the terms and conditions of this permit within the time frames specified in this permit. (40 CFR 122.41(a)(1))

2. The permittee shall submit reports of compliance or noncompliance, or progress reports as applicable, for any interim and final requirements contained in this permit. Such reports shall be submitted no later than 14 days following the applicable schedule date or compliance deadline. (25 Pa. Code § 92a.51(c), 40 CFR 122.47(a)(4))

B. Permit Modification, Termination, or Revocation and Reissuance

1. This permit may be modified, terminated, or revoked and reissued during its term in accordance with 25 Pa. Code § 92a.72 and 40 CFR 122.41(f).

2. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition. (40 CFR 122.41(f))

3. In the absence of DEP action to modify or revoke and reissue this permit, the permittee shall comply with effluent standards or prohibitions established under Section 307(a) of the Clean Water Act for toxic pollutants within the time specified in the regulations that establish those standards or prohibitions. (40 CFR 122.41(a)(1))

C. Duty to Provide Information

1. The permittee shall furnish to DEP, within a reasonable time, any information which DEP may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. (40 CFR 122.41(h))

2. The permittee shall furnish to DEP, upon request, copies of records required to be kept by this permit. (40 CFR 122.41(h))

3. Other Information - Where the permittee becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or in any report to DEP, it shall promptly submit the correct and complete facts or information. (40 CFR 122.41(l)(8))

4. The permittee shall provide the following information in the annual Municipal Wasteload Management Report, required under the provisions of Title 25 Pa. Code Chapter 94:

   a. The requirements identified in 25 Pa. Code § 94.12.

   b. The identity of any indirect discharger(s) served by the POTW which are subject to pretreatment standards adopted under Section 307(b) of the Clean Water Act; the POTW shall also specify the total volume of discharge and estimated concentration of each pollutant discharged into the POTW by the indirect discharger.

   c. A "Solids Management Inventory" if specified in Part C of this permit.

   d. The total volume of hauled-in residual and municipal wastes received during the year, by source.

   e. The Annual Report requirements for permittees required to implement an industrial pretreatment program listed in Part C, as applicable.

D. General Pretreatment Requirements

1. Any POTW (or combination of POTWs operated by the same authority) with a total design flow greater than 5 million gallons per day (MGD) and receiving from industrial users pollutants which pass through or interfere with the operation of the POTW or are otherwise subject to Pretreatment Standards will be required to establish a POTW Pretreatment Program unless specifically exempted by the Approval Authority. A POTW with a design flow of 5 MGD or less may be required to develop a POTW Pretreatment Program if the Approval Authority finds that the nature or volume of the industrial influent, treatment process upsets, violations of effluent limitations, contamination of sludge, or other circumstances warrant in order to prevent interference or pass through. (40 CFR 403.8)

2. Each POTW with an approved Pretreatment Program pursuant to 40 CFR 403.8 shall develop and enforce specific limits to implement the prohibitions listed in 40 CFR 403.5(a)(1) and (b), and shall continue to develop these limits as necessary and effectively enforce such limits. This condition applies, for example, when there are planned changes to the waste stream as identified in Part A III.C.2. If the permittee is required to develop or continue implementation of a Pretreatment Program, detailed requirements will be contained in Part C of this permit.

3. For all POTWs, where pollutants contributed by indirect dischargers result in interference or pass through, and a violation is likely to recur, the permittee shall develop and enforce specific limits for indirect dischargers and other users, as appropriate, that together with appropriate facility or operational changes, are necessary to ensure renewed or continued compliance with this permit or sludge use or disposal practices. Where POTWs do not have an approved Pretreatment Program, the permittee shall submit a copy of such limits to DEP when developed. (25 Pa. Code § 92a.47(d))

E. Proper Operation and Maintenance

1. The permittee shall employ operators certified in compliance with the Water and Wastewater Systems Operators Certification Act (63 P.S. §§ 1001-1015.1).

2. The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the terms and conditions of this permit. Proper operation and maintenance includes, but is not limited to, adequate laboratory controls including appropriate quality assurance procedures. This provision also includes the operation of backup or auxiliary facilities or similar systems that are installed by the permittee, only when necessary to achieve compliance with the terms and conditions of this permit. (40 CFR 122.41(e))

F. Duty to Mitigate

The permittee shall take all reasonable steps to minimize or prevent any discharge, sludge use or disposal in violation of this permit that has a reasonable likelihood of adversely affecting human health or the environment. (40 CFR 122.41(d))

G. Bypassing

1. Bypassing Not Exceeding Permit Limitations - The permittee may allow a bypass to occur which does not cause effluent limitations to be exceeded, but only if it also is for essential maintenance to assure efficient operation. These bypasses are not subject to the provisions in paragraphs two, three and four of this section. (40 CFR 122.41(m)(2))

2. Other Bypassing - In all other situations, bypassing is prohibited and DEP may take enforcement action against the permittee for bypass unless:

   a. A bypass is unavoidable to prevent loss of life, personal injury or "severe property damage." (40 CFR 122.41(m)(4)(i)(A))

b. There are no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate backup equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance. (40 CFR 122.41(m)(4)(i)(B))

c. The permittee submitted the necessary notice required in paragraph G.4 below. (40 CFR 122.41(m)(4)(i)(C))

3. DEP may approve an anticipated bypass, after considering its adverse effects, if DEP determines that it will meet the conditions listed in paragraph G.2 above. (40 CFR 122.41(m)(4)(ii))

4. Notice

a. Anticipated Bypass – If the permittee knows in advance of the need for a bypass, it shall submit prior notice, if possible, at least 10 days before the bypass. (40 CFR 122.41(m)(3)(i))

b. Unanticipated Bypass – The permittee shall submit oral notice of any other unanticipated bypass within 24 hours, regardless of whether the bypass may endanger health or the environment or whether the bypass exceeds effluent limitations. The notice shall be in accordance with Part A III.C.4.b.

H. Sanitary Sewer Overflows (SSOs)

An SSO is an overflow of wastewater, or other untreated discharge from a separate sanitary sewer system (which is not a combined sewer system), which results from a flow in excess of the carrying capacity of the system or from some other cause prior to reaching the headworks of the sewage treatment facility. SSOs are not authorized under this permit. The permittee shall immediately report any SSO to DEP in accordance with Part A III.C.4 of this permit.

II. PENALTIES AND LIABILITY

A. Violations of Permit Conditions

Any person violating Sections 301, 302, 306, 307, 308, 318 or 405 of the Clean Water Act or any permit condition or limitation implementing such sections in a permit issued under Section 402 of the Act is subject to civil, administrative and/or criminal penalties as set forth in 40 CFR 122.41(a)(2).

Any person or municipality, who violates any provision of this permit; any rule, regulation or order of DEP; or any condition or limitation of any permit issued pursuant to the Clean Streams Law, is subject to criminal and/or civil penalties as set forth in Sections 602, 603 and 605 of the Clean Streams Law.

B. Falsifying Information

Any person who does any of the following:

- Falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required to be maintained under this permit, or

- Knowingly makes any false statement, representation, or certification in any record or other document submitted or required to be maintained under this permit (including monitoring reports or reports of compliance or noncompliance)

Shall, upon conviction, be punished by a fine and/or imprisonment as set forth in 18 Pa.C.S.A § 4904 and 40 CFR 122.41(j)(5) and (k)(2).

C. Liability

Nothing in this permit shall be construed to relieve the permittee from civil or criminal penalties for noncompliance pursuant to Section 309 of the Clean Water Act or Sections 602, 603 or 605 of the Clean Streams Law.

Nothing in this permit shall be construed to preclude the institution of any legal action or to relieve the permittee from any responsibilities, liabilities or penalties to which the permittee is or may be subject to under the Clean Water Act and the Clean Streams Law.

D. Need to Halt or Reduce Activity Not a Defense

It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. (40 CFR 122.41(c))

III. OTHER RESPONSIBILITIES

A. Right of Entry

Pursuant to Sections 5(b) and 305 of Pennsylvania's Clean Streams Law, and Title 25 Pa. Code Chapter 92a and 40 CFR 122.41(i), the permittee shall allow authorized representatives of DEP and EPA, upon the presentation of credentials and other documents as may be required by law:

1. To enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit; (40 CFR 122.41(i)(1))

2. To have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit; (40 CFR 122.41(i)(2))

3. To inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices or operations regulated or required under this permit; and (40 CFR 122.41(i)(3))

4. To sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act or the Clean Streams Law, any substances or parameters at any location. (40 CFR 122.41(i)(4))

B. Transfer of Permits

1. Transfers by modification. Except as provided in paragraph 2 of this section, a permit may be transferred by the permittee to a new owner or operator only if this permit has been modified or revoked and reissued, or a minor modification made to identify the new permittee and incorporate such other requirements as may be necessary under the Clean Water Act. (40 CFR 122.61(a))

2. Automatic transfers. As an alternative to transfers under paragraph 1 of this section, any NPDES permit may be automatically transferred to a new permittee if:

   a. The current permittee notifies DEP at least 30 days in advance of the proposed transfer date in paragraph 2.b. of this section; (40 CFR 122.61(b)(1))

   b. The notice includes the appropriate DEP transfer form signed by the existing and new permittees containing a specific date for transfer of permit responsibility, coverage and liability between them; and (40 CFR 122.61(b)(2))

   c. DEP does not notify the existing permittee and the proposed new permittee of its intent to modify or revoke and reissue this permit, the transfer is effective on the date specified in the agreement mentioned in paragraph 2.b. of this section. (40 CFR 122.61(b)(3))

d. The new permittee is in compliance with existing DEP issued permits, regulations, orders and schedules of compliance, or has demonstrated that any noncompliance with the existing permits has been resolved by an appropriate compliance action or by the terms and conditions of the permit (including compliance schedules set forth in the permit), consistent with 25 Pa. Code § 92a.51 (relating to schedules of compliance) and other appropriate Department regulations. (25 Pa. Code § 92a.71)

3. In the event DEP does not approve transfer of this permit, the new owner or operator must submit a new permit application.

C. Property Rights

The issuance of this permit does not convey any property rights of any sort, or any exclusive privilege. (40 CFR 122.41(g))

D. Duty to Reapply

If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee must apply for a new permit. (40 CFR 122.41(b))

E. Other Laws

The issuance of this permit does not authorize any injury to persons or property or invasion of other private rights, or any infringement of state or local law or regulations.

IV. ANNUAL FEE

Permittees shall pay an annual fee in accordance with 25 Pa. Code § 92a.62. Annual fee amounts are specified in the following schedule and are due on each anniversary of the effective date of the most recent new or reissued permit. All flows identified in the schedule are annual average design flows. (25 Pa. Code § 92a.62)

Small Flow Treatment Facility (SRSTP and SFTF)	$0
Minor Sewage Facility < 0.05 MGD (million gallons per day)	$250
Minor Sewage Facility ≥ 0.05 and < 1 MGD	$500
Minor Sewage Facility with CSO (Combined Sewer Overflow)	$750
Major Sewage Facility ≥ 1 and < 5 MGD	$1,250
Major Sewage Facility ≥ 5 MGD	$2,500
Major Sewage Facility with CSO	$5,000

As of the effective date of this permit, the facility covered by the permit is classified in the following fee category: **Minor Sewage Facility >=0.05 and <1 MGD**.

Invoices for annual fees will be mailed to permittees approximately three months prior to the due date. In the event that an invoice is not received, the permittee is nonetheless responsible for payment. Throughout a five year permit term, permittees will pay four annual fees followed by a permit renewal application fee in the last year of permit coverage. Permittees may contact the DEP at 717-787-6744 with questions related to annual fees. The fees identified above are subject to change in accordance with 25 Pa. Code § 92a.62(e).

Payment for annual fees shall be remitted to DEP at the address below by the anniversary date. Checks should be made payable to the Commonwealth of Pennsylvania.

PA Department of Environmental Protection
Bureau of Clean Water
Re: Chapter 92a Annual Fee
P.O. Box 8466
Harrisburg, PA 17105-8466

PART C

I. OTHER REQUIREMENTS

A. No storm water from pavements, area ways, roofs, foundation drains or other sources shall be directly admitted to the sanitary sewers associated with the herein approved discharge.

B. The approval herein given is specifically made contingent upon the permittee acquiring all necessary property rights by easement or otherwise, providing for the satisfactory construction, operation, maintenance or replacement of all sewers or sewerage structures associated with the herein approved discharge in, along, or across private property, with full rights of ingress, egress and regress.

C. Collected screenings, slurries, sludges, and other solids shall be handled and disposed of in compliance with 25 Pa. Code, Chapters 271, 273, 275, 283, and 285 (related to permits and requirements for landfilling, land application, incineration, and storage of sewage sludge), Federal Regulation 40 CFR 257, Pennsylvania Clean Streams Law, Pennsylvania Solid Waste Management Act of 1980, and the Federal Clean Water Act and its amendments. The permittee is responsible to obtain or assure that contracted agents have all necessary permits and approvals for the handling, storage, transport, and disposal of solid waste materials generated as a result of wastewater treatment.

D. Notification of the designation of the responsible operator must be submitted to the permitting agency by the permittee within 60 days after the effective date of the permit and from time to time thereafter as the operator is replaced.

Supplemental Form Inventory

The following supplemental forms (indicated in the check box column) are attached to this permit and must be completed and submitted to DEP in accordance with the permit and the supplemental form instructions. If the eDMR system is used to submit DMR reports, the spreadsheet versions of these supplemental forms, where applicable, should be used and attached to the eDMR submissions. A link to DEP's supplemental form website is available when logging into the eDMR system.

INSTRUCTIONS FOR COMPLETING DAILY EFFLUENT MONITORING SUPPLEMENTAL REPORT

Use this form to report daily monitoring results for the parameters that must be monitored in effluent for compliance with the permit. Results for influent parameters are normally reported on Form 3800-FM-BPNPSM0436.

1. Enter Facility Name, Municipality, County, Watershed No., Laboratories, Month, Year, NPDES Permit No., Outfall No., and Permit Expiration Date (it is noted that this information may be pre-populated if you have received this form with your permit). For Laboratories, list the names of all laboratories where samples were analyzed during the month, including on-site analysis.

2. In the column headers, below "Effluent Parameters," enter the names of parameters in the permit. Since limited space is provided, abbreviation may be necessary. If there are more parameters for an outfall than columns provided on the form, attach an additional sheet.

3. Below parameter names, and to the right of "Q" (Qualifier) column headers, enter the units associated each parameter (it is noted that this information may be pre-populated if you have received this form with your permit).

4. Enter monitoring results for parameters in the rows corresponding to the day of the month in which samples were collected. Enter results exactly as reported by the laboratory, or if measured with on-site equipment, to the level of precision recommended by the equipment manufacturer. Enter data qualifiers such as "<," ">," "J," and others in the "Q" column.

5. Calculate and report average values at the bottom of the table in accordance with the DMR Instructions (3800-FM-BPNPSM0463) and DEP guidance (3800-BK-DEP3047). Note – for bacteria, calculate and report the geometric mean value.

6. Type the name of the person who prepared the form, the person's job title, and sign and date the form after reading the certification statement.

INSTRUCTIONS FOR COMPLETING INFLUENT & PROCESS CONTROL SUPPLEMENTAL REPORT

1. Enter Facility Name, Municipality, County, Watershed No., Month, Year, NPDES Permit No., and Permit Expiration Date.

2. For **Influent**, enter daily average Influent Flow (MGD) (if an influent flow meter is in use), daily influent BOD_5 or BOD_5 concentrations (mg/l) and loads (lbs), and daily influent TSS concentrations (mg/l) and loads (lbs). Calculate loads by multiplying daily average flow (MGD) by daily average concentration (mg/l) and a conversion factor of 8.34. If an influent flow meter is not in use, you may use results from an effluent flow meter.

3. For **Process Control**, enter daily average Mixed Liquor Suspended Solids (MLSS) (mg/l) and daily average Aeration Dissolved Oxygen (DO) for aerobic biological treatment systems, and total daily Sludge Wasted (removed from biological treatment), in gallons, for all treatment system types. If a parameter does not apply to your facility, leave the column blank. Information for other parameters such as Return Activated Sludge (RAS) Rate, Recirculation Rate (for fixed media treatment systems), Sludge Blanket Thickness, Sludge Volume Index, and others may be requested by the DEP office that issued the permit.

4. Type the name of the person who prepared the form, the person's job title, and sign and date the form after reading the certification statement.

INSTRUCTIONS FOR COMPLETING HAULED IN MUNICIPAL WASTES SUPPLEMENTAL REPORT

This form is intended for documenting the receipt of municipal wastes including sewage sludge, septage and other municipal wastewaters hauled in from other facilities for processing and/or disposal at your facility. This form should not be used for reporting receipt of residual wastes (e.g., food processing wastes, oil and gas wastewater, landfill leachate, etc.) - please use Form 3800-FM-BPNPSM0450 for reporting this information.

1. Enter Facility Name, Municipality, County, Watershed No., Month, Year, NPDES Permit No., and Permit Expiration Date.

2. For septage, sludge and other wastewaters (specify type in the space provided), record the daily volume received in gallons, the daily BOD_5 concentration (average), the daily BOD_5 load in lbs (average), and the disposal location. For disposal location, specify the plant location or tank receiving hauled in wastes (e.g., headworks, primarily clarifier, digester, etc.).

3. Determine daily BOD_5 concentrations in mg/l by sampling loads in accordance with the permit or otherwise as determined by the facility. Periodic sampling of loads is encouraged to improve confidence in reported results.

4. Calculate the average, daily total and monthly total values and report the values in the spaces provided.

5. Type the name of the person who prepared the form, the person's job title, and sign and date the form after reading the certification statement.

pennsylvania
DEPARTMENT OF ENVIRONMENTAL PROTECTION

INSTRUCTIONS FOR COMPLETING SEWAGE SLUDGE / BIOSOLIDS SUPPLEMENTAL REPORT

1. Enter Facility Name, Municipality, County, Watershed No., Month, Year, NPDES Permit No., and Permit Expiration Date.

Biosolids Production Information

2. For each off-site removal event for liquid sewage sludge or biosolids and for dewatered sewage sludge or biosolids, and for each event where dewatered sewage sludge or biosolids are incinerated on-site, list the date of the event, identify the gallons (liquid) or tons (dewatered) removed or incinerated and the percent solids (e.g., 10%, 20%, etc.) Report only sewage sludge or biosolids that have been removed from the plant digesters and other solids which have been **permanently** removed from the treatment process. Do **not** include sewage sludge or biosolids from other facilities that are processed at your facility. (If there were no off-site removal events during the month, check the box above the table).

   Calculate dry tons for liquid sewage sludge or biosolids by multiplying the volume (gallons) by the percent solids and by a conversion factor of 0.0000417. For example, if 2,500 gallons of liquid biosolids is removed, and the percent solids is 3.0%, dry tons is calculated as:

   2,500 gallons x 3.0% x 0.0000417 = 0.31 dry tons

   Calculate dry tons for dewatered sewage sludge or biosolids by multiplying the tons dewatered by the percent solids and by a conversion factor of 0.01. For example, if 5 tons of dewatered biosolids is removed, and the percent solids is 50%, dry tons is calculated as:

   5 tons x 50% x 0.01 = 2.5 dry tons

   The **% Solids** of liquid or dewatered sewage sludge or biosolids must be determined periodically through laboratory testing. Do not estimate or guess this value. An acceptable test method is method 2540B in *Standard Methods for the Examination of Water and Wastewater*, 18th edition, where samples are dried at 103-105°C. Other references such as ASTM may have equivalent tests which are also acceptable.

Biosolids and Incinerator Ash Disposal and Beneficial Use Information

3. Report sewage sludge, biosolids, and ash disposal and beneficial use information by disposal/application site. There are columns for four possible sites per month - if more sites are needed, attach additional pages. For each Site Name, listed at the top of the column, enter the Municipality and County of the site, the DEP Permit No. (i.e., Biosolids permit number for land application, landfill waste management permit number, etc.), Type of Material (sewage sludge, biosolids, or incinerator ash), Dry Tons Applied/Disposed at the site for the month, Type of Disposal/Use (e.g., reed beds, agricultural utilization, composting, landfill, other treatment plant, etc.) and the name of the hauler (company or individual name).

4. Type the name of the person who prepared the form, the person's job title, and sign and date the form after reading the certification statement.

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
BUREAU OF POINT AND NON-POINT SOURCE MANAGEMENT

pennsylvania
DEPARTMENT OF ENVIRONMENTAL PROTECTION

INSTRUCTIONS FOR COMPLETING NON-COMPLIANCE REPORTING FORM

Use this supplemental form to report all permit violations and any other non-compliance that may endanger health or the environment, in accordance with your permit. Complete all sections that apply. If you are reporting violations of permit limits, monitoring requirements or schedules that do not pose an immediate threat to health or the environment, you may attach this form to the Discharge Monitoring Report (DMR). If you are reporting other non-compliance events, and the deadline for a written report (e.g., 5 days) does not coincide with your submission of the DMR, this form should be submitted separately to the Department by the reporting deadline set forth in the permit.

If you are unsure of whether an incident constitutes non-compliance that may endanger health or the environment, it is recommended that you notify the Department verbally as soon as possible after you become aware of the incident. Title 25, Pa. Code §§ 91.33 and 91.34 (regarding incidents causing or threatening pollution and activities utilizing pollutants, respectively), in part requires immediate notification by telephone to the Department of pollution incidents, remediation, and may require an additional report on the incident or plan of pollution prevention measures.

Instructions:

1. Enter the name of the facility, the municipality and county where it is located, the month and year when violations occurred, and the NPDES or WQM permit number for the facility.

2. If there were violations of permit effluent limitations during the month, check the box next to "Violations of Permit Effluent Limitations." (Note – if using the electronic version of this form, check the boxes first, and then select Tools – Unprotect Document to enter additional information). Enter the date of the violation (if a violation of a minimum or maximum limit, the date of sample collection, or if a violation of an average limit, the end of the monitoring period), the parameter name, the permit limit and units, the statistical code (e.g., "MIN", "MAX", "MO AVG", etc.), the measured result and units, the cause of the violation and the corrective action taken. **If there are more than two violations during the monitoring period and/or if the space provided is insufficient to explain the cause or corrective action, please attach additional pages.**

3. If there are Sanitary Sewer Overflow (SSO) discharges or other unauthorized discharges from the facility (e.g., spills, leaks, etc.) that enter or have the potential to enter waters of the Commonwealth, including groundwater, notify DEP by phone as soon as possible, and document the discharge on this form by checking the box next to "Sanitary Sewer Overflows and Other Unauthorized Discharges." Record the event (discharge) date, the substance discharged (e.g., sewage, on-site chemicals, etc.), the location where the discharge occurred (e.g., manhole number, pump station name, equipment description, etc.), the volume discharged (gallons), the approximate duration of the discharge (hours), the receiving waters (name of stream or groundwater), the impact on the receiving waters, if observed (e.g., solids deposition, foam, fish kill, etc.), the cause of the discharge, and the date on which the Department was verbally notified. **If there are more than two discharge events during the monitoring period and/or if the space provided is insufficient to explain the discharge, please attach additional pages.**

4. If there are other violations of the permit, check the box next to "Other Permit Violations," and check the appropriate box that describes the violation type. If not identified on the form, check the box next to "Other" and provide a written explanation. **If the space provided is insufficient to explain the violation, please attach additional pages.**

5. Type your name and title and sign and date the form after reading the certification statement.

If you have questions about completing this form, contact the Clean Water Program Operations Section of the Department in your region:

Southeast Region – (484) 250-5970
Northeast Region – (570) 826-2553
Southcentral Region – (717) 705-4707
Northcentral Region – (570) 327-3636
Southwest Region – (412) 442-4060
Northwest Region – (814) 332-6942

SUPPLEMENTAL LABORATORY ACCREDITATION FORM[1]

Permittee Name: East Goshen Municipal Authority Chester County

Address: 1580 Paoli Pike
West Chester, PA 19380-6107

PERMIT NUMBER	MONITORING PERIOD Year/Month/Day						
PA0050504				TO			

PARAMETER	ANALYSIS METHOD	LAB NAME	LAB ID NUMBER[2]

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibly of fine and imprisonment for knowing violations.

Name/Title Principal Executive Officer **Phone:** _____ **Signature of Principal Executive Officer or Authorized Agent**

_____ **Date:** _____ _____

[1] Submit this form with the first Discharge Monitoring Report (DMR) or Annual Report, where sample results are submitted to the Department for compliance purposes. You do not need to send this form to the Department again UNLESS there has been a change to the lab(s), parameter(s) or method(s) of analysis.

[2] For parameter(s) covered under accreditation-by-rule, submit the lab's registration number in lieu of an accreditation number.

VFSA has not received the complete Electronic Data Deliverable (EDD) package to date from the laboratory which performed the Dry Weather and Wet Weather PCB analyses for 2016. VFSA will submit the complete EDD package to PADEP and DRBC in a timely fashion once the packages are received.	Martin F. Goldberg	194283	610-935-1553

COMMENTS DETAILS

Comment	Operator Name	Operator Certification Number	Operator Contact Number
The RAW Influent CBOD and BOD and FINAL Effluent CBOD analyses for July 1, 9, 14, 15, 23, 28, 29, the FINAL Effluent Fecal coliform analyses for July 1, 2, 14, 15, 16, 28, 29, 30, the TDS, Total Nitrogen, and Total Phosphorus analyses for July 5, 12, 19, 26 and the Total Copper analysis for July 11 were performed by ALS Environmental, PA Lab ID 22-293. Please note, due to telemetry errors there was not adequate final effluent composite sample to perform the required analyses on July 4, 5 and 14, and the final effluent analytical data for those days are based on grab samples.	Martin F. Goldberg	194283	6109351553

COMMENTS DETAILS

Comment	Operator Name	Operator Certification Number	Operator Contact Number
The RAW Influent CBOD and BOD and FINAL Effluent CBOD analyses for December 1, 2, 10, 15, 16, 17, 22, 23, the FINAL Effluent Fecal coliform analyses for December 1, 2, 3, 15, 16, 17, 22, 23, 24, the TDS, Total Nitrogen, and Total Phosphorus analyses for December 6, 13, 20, 27 and the Total Copper analysis for December 6 were performed by ALS Environmental, PA Lab ID 22-293. Please note, due to extremely cold weather conditions, the composite sampler lines for the Raw Influent and Final Effluent samplers froze resulting in Grab samples only on Dec 26-31 for the Raw Influent and Dec 28-31 for the Final Effluent. Also, VFSA has observed that there may be irregularities in the final effluent flow data that may be suspect and should be subjected to more detailed analysis. This is in spite of regular calibrations performed by professionals on behalf of VFSA in accordance with the Treatment Plant Agreement. Accordingly, the VFSA is contracting with an independent engineering consultant to perform this detailed analysis in order to assure that the data utilized are accurate. The Authority will keep you informed as to the progress and results of this work as it becomes available. Finally, a revised Jan 2017 Influent and Process Control Report has also been attached to this eDMR report to correct errors in the Jan 2017 sludge wasted volume previously reported.	Martin F. Goldberg	194283	610-935-1553

VFSA has not received both Electronic Data Deliverable (EDD) packages to date from the laboratory which performed the Dry Weather and Wet Weather PCB analyses for 2017. VFSA will submit the complete EDD packages to PADEP and DRBC in a timely fashion once both packages are received.	Martin F. Goldberg	194283	610-935-1553

COMMENTS DETAILS

Comment	Operator Name	Operator Certification Number	Operator Contact Number
The RAW Influent CBOD and BOD and FINAL Effluent CBOD analyses for January 7, 12, 13, 14, 19, 20, 28, the FINAL Effluent Fecal coliform analyses for January 12, 13, 14, 19, 20, 21, the TDS, Total Nitrogen, and Total Phosphorus analyses for January 3, 10, 17, 24, 31 and the Total Copper analysis for January 4 were performed by ALS Environmental, PA Lab ID 22-293. Please note, due to extremely cold weather conditions, the composite sampler lines for the Raw Influent and Final Effluent samplers were frozen resulting in Grab samples only on January 1-9 for the Raw Influent and January 1 for the Final Effluent.	Martin F. Goldberg	194283	610-935-1553

74315	09/01/2018	09/30/2018	Fecal Coliform	Instantaneous Maximum	1987	1000	No./100 ml	Final Effluent (001)	Unknown	See attached comments	On 9-7-18, VFSA lab staff completed the fecal coliform analysis for the sample collected Thursday, 9-6-18, reporting a value of 1,987 colonies per 100 mL. On 9-7-18 VFSA contacted Mr. David Wolfinger of PADEP by voice and email messages to inform him of the result and the actions VFSA was taking to determine the cause. VFSA lab staff scheduled ALS labs to begin performing the daily fecal coliform analysis for the samples 9-7-18 through Monday Sep 10, 2018, in order to allow VFSA lab staff to repeat the required QC/QA procedures on the fecal coliform supplies and growth media used to perform this analysis. All QC/QA retests negative, which is the preferred result, but did not help identify what may have caused the fecal coliform result from Sep 6, 2018. Concurrently, VFSA O & M staff performed a complete check of the UV system and noted the UV system appeared to be functioning correctly with no apparent problems. Again, although this is the preferred result, it did not help identify a cause. Also, on 9-7-18, after checking and confirming proper operation of the UV system, VFSA O & M staff increased the UV dosage of the ultraviolet disinfection system. The analytical results for the samples analyzed by ALS laboratories during this time follow: Friday, Sep 7, 2018 = 2 colonies/100 mL; Saturday Sep 8, 2018 = 6 colonies/100 mL; Sunday Sep 9, 2018 = 7 colonies/100 mL; Monday Sep 10, 2018 = 10 colonies/100 mL On Monday Sep 10, 2018, VFSA staff collected two fecal coliform samples within a few minutes of each other, sending one sample to ALS and keeping the other sample for analysis by the VFSA laboratory. The Monday Sep 10, 2018, sample analyzed by the VFSA laboratory had a fecal coliform result of 7 colonies/100 mL. VFSA averaged the results of the two samples analyzed by both labs and has reported a value of 9 colonies/100 mL for Monday Sep 10, 2018. VFSA updated Mr. Wolfinger by email on 9-25-18 to update him on the findings of the investigation. VFSA staff also notified the Delaware River Basin Commission by email on 9-25-18 of the exceedance and actions taken per the requirements of the Authority's DRBC docket. Since the fecal coliform result of 9-6-18, there has not been another exceedance of the fecal coliform limits. As previously noted, there is, unfortunately, no definitive reason for why this violation occurred. VFSA laboratory, operations and maintenance staff will continue to be vigilant in their QC/QA, sampling, analysis, operations and maintenance procedures in order to protect against another occurrence of this sort.

The RAW Influent CBOD and BOD and FINAL Effluent CBOD analyses for September 9, 14, 15, 16, 21, 22, 23, 28, 29, the FINAL Effluent Fecal coliform analyses for September 7, 8, 9, 10, 14, 15, 16, 21, 22, 23, 28, 29, 30, the TDS, Total Nitrogen, and Total Phosphorus analyses for September 5, 12, 19, 26 and the Total Copper analysis for September 5 were performed by ALS Environmental, PA Lab ID 22-293. Note, the Fecal coliform result reported for September 10 is an average of the independent fecal coliform analyses performed by ALS Environmental (result = 10 colonies/100 mL) and the VFSA treatment plant laboratory (result = 7 colonies/100 mL). Also, the Raw influent sample data for 9-30-18 was determined to be not representative of the waste stream and has not been included on the September 2018 VFSA INFLUENT AND PROCESS CONTROL supplemental report or in the calculations for the DMR	Martin F. COMMENT DETAILS

Comments	Operator Name	Operator Certification Number	Operator Contact Number
The RAW Influent CBOD and BOD and FINAL Effluent CBOD analyses for February 1, 2, 10, 15, 16, 17, 24, the FINAL Effluent Fecal coliform analyses for February 1, 2, 3, 15, 16, 17, 18, the TDS, Total Nitrogen, and Total Phosphorus analyses for February 6, 13, 20, 27 and the Total Copper analysis for February 14 were performed by ALS Environmental, PA Lab ID 22-293. Raw Influent TSS, CBOD and BOD samples for February 8, 9, and 22 were determined to be non-representative and were not included in the monthly data. Also, due to extremely cold weather conditions causing freezing of the composite sampler suction tubing, the Raw Influent analyses for Feb 1, 2019, and the Final Effluent analyses for Feb 1 and Feb 2 were from Grab samples.	Martin F. Goldberg	194283	(610)-935-1553

	Facility Parameter Comments	After the fecal coliform results of May 24 and May 28, VFSA began sending daily fecal coliform samples to ALS (on May 29, 2019). The VFSA lab repeated all required fecal coliform QC/QA–all QC/QA checks passed. VFSA O & M staff confirmed UV system was operating correctly, but a scum buildup was found near the end of both UV channels. The scum was tested by the VFSA lab and found to have a value of > 200,000 MPN/100 ml of fecal coliform. O & M staff have been dispersing the scum daily.

COMMENT DETAILS

Comments	Operator Name	Operator Certification Number	Operator Contact Number
The RAW Influent CBOD and BOD and FINAL Effluent CBOD analyses for June 1, 16, 21, 22, 23, 28, 29, the FINAL Effluent Fecal coliform analyses for June 1 through June 23, and June 27 through June 30, the TDS, Total Nitrogen, and Total Phosphorus analyses for June 5, 12, 19, 26 and the Total Copper analysis for June 5 were performed by ALS Environmental, PA Lab ID 22-293. On June 24 through June 26, the VFSA lab and ALS both performed fecal coliform analyses - the results reported are the average of the two sample results (VFSA 6-24 result = 1, ALS 6-24 result = 2; VFSA 6-25 result = 2, ALS 6-25 result = 8; VFSA 6-26 result = 58, ALS 6-25 result = 62). Also, the raw influent TSS, BOD and CBOD data for June 1, 9, 18, 19, and 27 were deemed non-representative and were not included in the monthly calculations.	Martin F. Goldberg	194283	(610)-935-1553
