In re: Docket No. A-2021-3026132
Application of Aqua Pennsylvania Wastewater, Inc. pursuant to Sections 1102, 1329, 507 and 2102 of the Public Utility Code for Approval of its Acquisition of the Wastewater System Assets of East Whiteland Township

Dear Secretary Chiavetta:

We are counsel to Aqua Pennsylvania Wastewater, Inc. ("Aqua") and are submitting, via electronic filing with this letter, Aqua's Application, pursuant to Sections 1102, 1329, 507 and 2102 of the Public Utility Code, for Approval of its Acquisition of the Wastewater System Assets of East Whiteland Township ("EWT"). Please note that the filing includes a Confidential and Proprietary Sewage Facilities Map and a Confidential and Proprietary Appendix A to Mr. Packer's testimony, which is Exhibit U to the Application. The Confidential and Proprietary Sewage Facilities Map and Confidential and Proprietary Appendix A to Mr. Packer's testimony are being submitted via electronic mail.

The filing also includes Confidential and Public Work Paper Files, as follows:

1. Confidential Work Paper Files, in Excel format, of Gannett Fleming Valuation and Rate Consultants, LLC, the Utility Valuation Expert selected by Aqua, are provided via electronic mail to the Secretary's Bureau. Gannett Fleming considers its Work Paper Files, in Excel Format, to be both Confidential and Proprietary.

2. Confidential Work Paper Files, in Excel format, of AUS Consultants, the Utility Valuation Expert selected by EWT, are provided via electronic mail to the Secretary's Bureau. AUS considers its Work Paper Files, in Excel Format, to be both Confidential and Proprietary.

3. Confidential Work Paper File, in Excel Format, of Appendix A to Mr. Packer's testimony is provided via electronic mail to the Secretary's Bureau. Aqua considers Mr. Packer's Work Paper File, in Excel Format, to be both Confidential and Proprietary.

4. A Public Work Paper File in Excel Format for the Engineer's Asset Inventory is provided via email to the Secretary's Bureau.

We ask that the Public Utility Commission not allow any public disclosure of the Confidential and Proprietary Map, Confidential and Proprietary Appendix A to Exhibit U or Confidential and Proprietary Excel Files and that the Commission take appropriate steps to exclude the Confidential and Proprietary Information from any and all public folders.

Please contact me at your earliest opportunity if anything further is required in regard to this Application.

Our check in the amount of $350.00 in payment of the filing fee is being sent to you by overnight delivery.

Very truly yours,

THOMAS, NIESEN & THOMAS, LLC

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Application of Aqua Pennsylvania Wastewater, Inc. (hereinafter referred to as "Aqua" or "Applicant") pursuant to Sections 1102 and 1329 of the Public Utility Code for:	:	**Docket No. A-2021-3026132**
(1) approval of the acquisition by Aqua of the wastewater system assets of East Whiteland Township ("EWT" or "Township") situated within the Township of East Whiteland, Chester County, Pennsylvania;	:	
(2) approval of the right of Aqua to begin to offer, render, furnish and supply wastewater service to the public in portions of East Whiteland Township, Chester County, Pennsylvania; and	:	
(3) an order approving the acquisition that includes the ratemaking rate base of the East Whiteland Township wastewater system assets pursuant to Section 1329(c)(2) of the Public Utility Code.	:	
Request for Approval of Contracts, including Assignments of Contracts, between Aqua and East Whiteland Township, Pursuant to Section 507 of the Public Utility Code	:	
Request for Approval of a Contract between Affiliated Interests, Pursuant to Section 2102 of the Public Utility Code	:	

APPLICATION

To the Pennsylvania Public Utility Commission ("Commission"):

I. BACKGROUND

1. The name and address of Applicant are:

Aqua Pennsylvania Wastewater, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010

2. The name, address and contact information for Applicant's counsel are:

Thomas T. Niesen, Esq.
Thomas, Niesen & Thomas, LLC
212 Locust Street, Suite 302
Harrisburg, PA 17101
tniesen@tntlawfirm.com
Tel. No. (717) 255-7600
Fax No. (717) 236-8278

3. Pursuant to Sections 1102 and 1329 of the Pennsylvania Public Utility Code, 66 Pa. C.S. §§ 1102 and 1329, Applicant hereby requests that the Commission: (1) approve Aqua's acquisition of the wastewater system assets ("**Assets**") of EWT; (2) approve the right of Aqua to begin providing wastewater service in the requested territory, as shown as the area outlined in red on the map attached hereto as **Exhibit A** (the "**Requested Territory**");[1] and (3) include, in its Order approving the acquisition, the ratemaking rate base of the Assets as determined under Section 1329(c)(2) of the Public Utility Code.

4. The map of the Requested Territory includes a north arrow depicting map orientation, a graphic scale, the municipal boundaries of EWT and identification and depiction of all private and public roads relative to the Requested Territory. A bearing and angle description of the Requested Territory is included on Exhibit A. The Requested Territory is approximately 8.37 square miles (5,358 acres).

5. Aqua and EWT have reached an agreement regarding the acquisition of the Township Assets, as evidenced by the *Asset Purchase Agreement*, dated as of January 8, 2021, and attached hereto as **Exhibit B** (the "**Agreement**"). Applicant respectfully requests that the Commission issue an

[1] A CONFIDENTIAL facilities map is included with the Asset Inventory as addressed *infra*.

Order and *Certificates of Public Convenience* approving and addressing the items requested in this Application.

6. An **Application Filing Checklist** identifying topics addressed and the section, paragraph and page number where they can be found is included with this Application.

II. AFFECTED ENTITIES

7. Aqua is a regulated public utility company, duly organized and existing under the laws of the Commonwealth of Pennsylvania. Aqua is engaged in the wastewater service business and furnishes wastewater service to approximately 45,000 customer accounts, as reflected in documents already on file with the Commission. Aqua's existing service territories cover various Counties throughout Pennsylvania including parts of Chester County.

8. EWT is a duly organized and validly existing Township of the Second Class. Township owns the sanitary wastewater collection system which provides sanitary wastewater service to approximately 3,895 customers in EWT.

9. Applicant incorporates into this Application other information on file with the Commission that establishes the fact that Aqua is qualified to provide adequate public wastewater service. Aqua will supplement this Application with all additional information the Commission may require. Financial Statements of Aqua for 2020 are attached hereto as **Exhibit C**.

III. PLANT-IN-SERVICE

10. Aqua will acquire EWT's wastewater collection system assets as defined in the Agreement. All assets are located in the Township except for the King Road Pump Station (Pump Station No. 12) which is located on the border between EWT and East Goshen Township.

11. A Sewage Facilities Assessment with Original Cost Estimate of the EWT Sanitary Sewer System, prepared by Pennoni Associates, Inc., Consulting Engineers ("Asset Inventory"), is attached hereto as **Exhibit D**. The facilities map included with the Asset Inventory is considered CONFIDENTIAL.

12. The Asset Inventory explains that the EWT collection system has approximately 57 miles of gravity sewer collection mains, in sizes ranging from 8 inches to 36 inches in diameter, and the System has approximately 5 miles of force mains in sizes ranging from 4 to 14 inches. The Asset Inventory also details the 12 Township owned pump stations.

13. A list of non-depreciable property is presented in Section 8 of the Asset Inventory. The EWT System has no plant held for future use and none is included in the Asset Inventory.

14. All component facilities are installed. The approximate time of installation of component facilities is addressed in Section 8 of the Asset Inventory and in Mr. Bubel's testimony.

15. Wastewater treatment is mainly provided by the Valley Forge Sewer Authority ("VFSA") at its Wastewater Treatment Plant ("WWTP") located in Schuylkill Township, Chester County, pursuant to a Wastewater Service Agreement, dated November 1, 1970, Amended as of December 1, 1974, January 1, 1983, December 2, 1985, and October 4, 1994, by and between VFSA, the Townships of Schuylkill, East Pikeland, Charlestown, EWT, Tredyffrin, Willistown, and Easttown, the Borough of Malvern, EWT Municipal Authority[2], Easttown Municipal Authority, and Tredyffrin Township Municipal Authority. EWT also owns the Malvern Hunt WWTP, which is in the process of being decommissioned and converted into a pump station. Following the decommissioning of the Malvern Hunt WWTP, which is expected to be completed in 2021, all wastewater flows previously sent to Malvern Hunt WWTP will be treated at the VFSA WWTP.

[2] The EWT Municipal Authority was terminated by Ordinance enacted on July 8, 2015.

Chapter 94 Reports to the Department of Environmental Protection ("DEP") of EWT for the Malvern Hunt WWTP and the Township are attached hereto as **Exhibit E1**. The Malvern Hunt WWTP has a permitted capacity of 0.128 million gallons per day ("MGD") with elevation ("EL") between EL 356 and 362. A copy of VFSA's 2020 Chapter 94 Report to DEP for the VFSA WWTP is attached hereto as **Exhibit E2**. The VFSA WWTP has a permitted capacity of 11.75 MGD with EL between EL 90 and EL 105.

16. EWT accepts flow into its Trunkline ("EWT Trunkline") from the Borough of Malvern and Charlestown Township, which then flows for treatment at the VFSA. This arrangement is set forth in the EWT Trunkline Agreement of February 1, 1971, as amended December 12, 1979, and April 18, 2014. Additionally, EWT has several areas of its system that are on the border between EWT and East Goshen Township. While EWT owns the facilities within its borders, flows from these EWT customers are sent to the East Goshen Municipal Authority ("EGMA") WWTP. These arrangements between EWT and East Goshen Township are set forth in the Exhibit F contracts. A copy of EGMA's Chapter 94 Report is attached hereto as **Exhibit E3.** The EGMA WWTP has a permitted capacity of 0.75 MGD with EL between EL 365 and EL 380.

17. Elevation of the EWT collection system and the service area varies:

EL 354 to EL 566 along the western boundary.

EL 364 to EL 582 along the southern boundary.

EL 388 to EL 666 along the northern boundary.

EL 198 to EL 364 along the eastern boundary.

18. Water service in the Requested Territory is provided by Aqua PA and private wells.

19. The original cost, by year and major plant category, of EWT's used and useful plant in service is $44,447,309 with a related calculation depreciation reserve of $10,491,713.

20. Tentative journal entries to record the transaction are presented in Section IV.

IV. ASSET PURCHASE AGREEMENT

21. The Asset Purchase Agreement is dated January 8, 2021. The purchase price is Fifty-Four Million Nine Hundred Thirty Thousand Dollars ($54,930,000.00).

22. The purchase price is based on arm's length negotiations. Aqua and Township are not affiliated with each other.

23. Aqua will use short term debt initially for the purchase of the assets with the expectation that the short term debt will be converted to long term debt and equity capital at a later date.

24. The wastewater system assets to be transferred are the "Acquired Assets" and have the meaning specified in Section 2.01 of the Agreement. The Assets include the assets, properties and rights of the Township used in the system and all pipes, pumping stations, generators, manholes and pipelines and billing and collections related assets necessary to run the system.

25. Acquired Assets also include the twenty-two contracts identified on Schedule 4.13 of the Agreement to which Township is a party (the "Assigned Contracts"). The Assigned Contracts are attached hereto as **Exhibit F1**, **Exhibit F2**, **Exhibit F3**, **Exhibit F4**, **Exhibit F5**, **Exhibit F6**, **Exhibit F7**, **Exhibit F8**, **Exhibit F9**, **Exhibit F10**, **Exhibit F11**, **Exhibit F12**, **Exhibit F13**, **Exhibit F14**, **Exhibit F15**, **Exhibit F16**, **Exhibit F17**, **Exhibit F18**, **Exhibit F19**, **Exhibit F20**, **Exhibit F21**, and **Exhibit F22**, respectively:[3]

> F1 – Valley Forge Treatment Plant Agreement, dated November 1, 1970, by and between Valley Forge Sewer Authority; the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown, and Eastown; the Borough of Malvern; Malvern Municipal

[3] As noted below, Exhibits F2 and F6 are missing certain pages and/or exhibits. The Company and EWT have sought to obtain the missing items from the parties to the contracts through Right to Know ("RTK") requests. Should the documents/information requested via RTK be located and become available, Aqua will supplement the Application and record accordingly.

Authority; East Whiteland Municipal Authority; Tredyffrin Township Municipal Authority; and Easttown Township Municipal Authority.

F2 – Composite Amendment No. 1 to Valley Creek Trunk Sewer Agreement, East Whiteland Trunk Line Agreement, and Valley Forge Sewage Treatment Plant Agreement dated December 1, 1974, by and between Tredyffrin Township Municipal Authority, Township of Tredyffrin, Township of Schuylkill, Township of East Pikeland, Township of Charlestown, Township of East Whiteland, Township of Willistown, Township of Easttown, Borough of Malvern, Valley Forge Sewer Authority, Malvern Municipal Authority, East Whiteland Municipal Authority, and Easttown Municipal Authority[4]

F3 – Amendment to Valley Forge Sewer Treatment Plant Agreement, dated January 1, 1983, by and between Valley Forge Sewer Authority; the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown, and Easttown; the Borough of Malvern; Malvern Municipal Authority; East Whiteland Municipal Authority; Easttown Municipal Authority; Tredyffrin Township Municipal Authority; and Willistown Township Municipal Authority

F4 – Supplement to Valley Forge Sewage Treatment Plant Agreement For the Purpose of Complying with United States Environmental Protection Agency Regulations, dated December 2, 1985, by and between Valley Forge Sewer Authority; the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown, and Eastown; the Borough of Malvern; Malvern Municipal Authority; East Whiteland Municipal Authority; Tredyffrin Township Municipal Authority; Easttown Township Municipal Authority, and Willistown Township Municipal Authority.

F5 – Addendum to Valley Forge Sewage Treatment Plant Agreement for the Purpose of Permitting and Administering the Sale of Reserved Capacity Among the Parties, dated May 26, 1994, by and between Valley Forge Sewer Authority, the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown, and Easttown; the Borough of Malvern; East Whiteland Township Municipal Authority; Easttown Municipal Authority; and Tredyffrin Township Municipal Authority

F12 – Agreement, dated July 10, 1995, by and between Malvern Borough, East Whiteland Township, and East Whiteland Municipal Authority

F13 – Sewage Treatment Agreement, dated October 17, 2000, by and between East Goshen Township, East Goshen Municipal Authority, East Whiteland Township, and East Whiteland Municipal Authority

F14 – Sewage Capacity / Service Agreement, dated November 1, 2000, by and between East Whiteland Township, East Whiteland Township Municipal Authority, Tredyffrin Township, Tredyffrin Township Municipal Authority, and Trammell Crow Northeast Metro Development, Inc.

F15 – Addendum to Sewage Capacity / Service Agreement, dated November 19, 2015, by and between East Whiteland Township and Tredyffrin Township with the joinders of RLD Atwater JV, LLC and The Haven At Atwater Village, LLC.

F16 – Sewage Treatment Agreement, dated March 2, 2004, by and between East Whiteland Township, East Goshen Township, and Malvern Institute for Psychiatric & Alcoholic Studies

F17 – Wastewater Conveyance Agreement, dated November 20, 2018, by and between Aqua Resources, Inc., Tredyffrin Township, East Whiteland Township, Willistown Township, Charlestown Township, Schuylkill Township, East Pikeland Township, Easttown Township, Eastown Township Municipal Authority, The Borough of Malvern, Tredyffrin Township Municipal Authority, and Valley Forge Sewer Authority

F18 – Agreement with Public Utility or Municipality for Crossing Under Railroad Private Property, dated March 21, 1972, by and between Reading Company and East Whiteland Municipal Authority

F19 – License Agreement for Wire, Pipe and Cable Transverse Crossings and Longitudinal Occupations, dated July 11, 1975, by and between Penn Central Transportation Company and East Whiteland Municipal Authority

F20 – License Agreement, dated November 18, 1993, by and between National Railroad Passenger Corporation and East Whiteland Township Municipal Authority[6]

F21 – Amendment to License Agreement, dated May 6, 2002, by and between National Railroad Passenger Corporation and East Whiteland Township Municipal Authority[7]

F22 – License Agreement, dated September 10, 1999, by and between National Railroad Passenger Corporation and East Whiteland Township[8]

26. Acquired Assets also include all Authorizations and Permits of or held by EWT (to the extent transferrable to Aqua under applicable Law), including all Authorizations and Permits which are environmental permits, other operating permits and those items listed or described on Schedule 4.12 of the Agreement.

27. "Excluded Assets," which are those assets not being transferred to Aqua, has the meaning specified in Section 2.02 of the Agreement. Excluded Assets include Stormwater System Assets, spray irrigation system associated with the Malvern Hunt WWTP, contracts that are not Assigned Contracts, cash and cash equivalents and the assets, properties and rights set forth in Schedule 2.02(h) of the Agreement.

28. "Assumed Liabilities" has the meaning specified in Section 2.04(a) of the Agreement and include all liabilities and obligations arising out of or relating to Aqua's ownership or operation of the wastewater system and the Acquired Assets on or after Closing.

29. The tentative journal entries to record the transfer in Aqua's accounts are:

	Debit	Credit
Utility Plant Purchased	$54,930,000	
Cash/Short Term Debt		$54,930,000

[6] The Company will enter into a new license agreement with Amtrak (formerly National Railroad Passenger Corporation prior to closing.

[7] The Company will enter into a new license agreement with Amtrak (formerly National Railroad Passenger Corporation prior to closing.

[8] The Company will enter into a new license agreement with Amtrak (formerly National Railroad Passenger Corporation prior to closing.

V. CUSTOMERS

30. EWT provides wastewater service to 3,895 customers which are broken down by District. District A and B 3,053 customers, District C 28 customers, District D 279 customers, District E 522 customers, and 13 high volume commercial customers.

31. Wastewater flow for EWT customers was approximately 505,789,000 gallons for 2020. The Township bills on an EDU basis and does not track usage by customer class, except for high volume users.

32. Township projects growth of 2,442 Equivalent Dwelling Units over the next five years.

VI. RATES

33. After Closing, Aqua will implement EWT's sanitary wastewater rates in effect at closing as reflected on Schedule 7.03(a) of the Agreement. Aqua and EWT have agreed that rates shall not be increased until after the third anniversary of the Closing Date.[9] The Township presently bills on an annual basis. Aqua will convert EWT customers to monthly billing at closing. A schedule of rates tariff page implementing monthly rates for Township customers post-closing is attached hereto as **Exhibit G**.

34. As presented in Schedule 7.03(a) of the Agreement, EWT has flat rates for residential customers which are billed on an EDU basis. High volume customers, which are customers that have more than 100,000 gallons of water usage in a quarter, are billed a quarterly usage charge of $6.20 per 1,000 gallons. A copy of EWT's currently effective Rate Ordinance is attached hereto as **Exhibit H**.

35. Upon Commission approval of this Application and completion of the proposed transaction, Aqua will begin to provide wastewater service in its name to the customers in the

[9] As explained in the testimony of Aqua witness Packer, the three-year rate freeze is not a rate stabilization plan.

Requested Territory. It will implement its *Rules and Regulations* to govern the provision of wastewater service in the Requested Territory, as those *Rules and Regulations* are in effect from time to time for Aqua.

36. Copies of the notices that will be sent to customers of Aqua and to customers of EWT describing the filing and the anticipated effect on rates are attached hereto as **Exhibit I1** and **Exhibit I2**.

VII. COST OF SERVICE

37. Copies of EWT's Annual Financial Report for 2019 and 2020 are attached hereto as **Exhibit J1** and **Exhibit J2**. For the year ended December 31, 2020, the Township had approximately $44,707,000 of long-term debt, and the details of long-term debt obligations and debt service on the sewer system are described under Business-Type Activities in Exhibit J2, pages 53-55.

38. Copies of EWT's Adopted Annual Budgets for 2020 and 2021 are attached hereto as **Exhibit J3** and **Exhibit J4**.

39. A copy of EWT's most recent annual report filed with the Department of Community and Economic Development is attached hereto as **Exhibit K**.

40. Aqua projects annual revenue of $3,769,536 from the EWT customers based on EWT's current rate schedule, calculated as follows:

		Customers		*Gallons*	*EDU's*	*Revenue*
	Current Rates	*2020*	*Method*	*2020*	*2020*	*2020*
Service Charges:						
Sewer District A & B	$400.00	3,053	per EDU annually		6,566	$2,626,400
Sewer District C	$542.00	28	per EDU annually		28	$15,176
Sewer District D	$600.00	279	per EDU annually		279	$167,400
Sewer District E	$480.00	522	per EDU annually		772	$370,560
High Volume Customers	$6.20 per 1,000 gallons	13	per 1,000 Gallons	58,064,516	13	$360,000
Other Charges:						$230,000
Total Revenue at Present Rates		**3,895**		**58,064,516**	**7,658**	**$3,769,536**

41. Aqua estimates annual operating and maintenance expenses of $1,965,601 based on EWT's operating expenses presented in the 2019 financial statements, adjusted by the Company.

VIII. PROOF OF COMPLIANCE

42. Aqua will operate and manage the EWT wastewater system as a standalone collection system, but within Aqua's footprint, from its Southeastern Division Office in Bryn Mawr, Pennsylvania. The system is approximately 11 miles from the Company's Southeastern Division Office. Mr. John M. Bright will be the assigned Certified Wastewater Operator for the system. Mr. Bright's currently effective Wastewater Operator's License is attached hereto as **Exhibit L**.

43. The Water Quality Management ("WQM") Permit for the Malvern Hunt WWTP issued in 2016 and the WQM Permit Application for the Pump Station are attached as **Exhibit M1**.[10] A WQM permit for the VFSA WWTP is attached as **Exhibit M2**. A WQM permit for the EGMA WWTP is

[10] As noted above, the Malvern Hunt WWTP is expected to be decommissioned prior to closing. If decommission of the Malvern Hunt WWTP occurs before closing, the 2016 WQM Permit for the WWTP will not be transferred.

attached as **Exhibit M3**. The VFSA WWTP and EGMA WWTP are not part of the acquisition transaction. The National Pollution Discharge Elimination System Permits for the VFSA WWTP and the EGMA WWTP are attached hereto as **Exhibit N1** and **Exhibit N2**, respectively. Copies of Discharge Monitoring Reports ("DMR") for the Malvern Hunt WWTP, VFSA WWTP and the EGMA WWTP, from January 2016 through December 2020, are attached hereto as **Exhibit N3**, **Exhibit N4**, and **Exhibit N5**, respectively.

44. EWT did not have any Notices of Violation within the last five years. EWT was released from its Corrective Action Plan on September 1, 2015, by letter from DEP which is attached hereto as **Exhibit O**.

45. Aqua is a Class A utility. It is in good standing with DEP and in general compliance with DEP with regard to the provision of wastewater service.

46. The service area comprising the Requested Territory is consistent with EWT's sewage planning and in compliance with DEP approved Act 537 Plans. A copy of EWT's Act 537 Plan documents is attached hereto as **Exhibit P1** (1995 Plan), **Exhibit P2** (Special Study 2011), **Exhibit P3** (Special Study 2013), **Exhibit P4** (Special Study 2015), **Exhibit P5** (Special Study 2016), and **Exhibit P6** (Planning Modules). A copy of the VFSA Act 537 Plan is attached hereto as **Exhibit P7**. A copy of the East Goshen Act 537 Plan is attached hereto as **Exhibit P8**. Aqua also has included in the Requested Territory areas of the Township under construction for sewage service anticipated to be completed after Closing. Copies of letters to EWT and Chester County Planning Commissions regarding Aqua's Requested Territory are included as **Exhibit P9** and **Exhibit P10**.

47. The web address for the EWT Comprehensive Plan is: http://www.eastwhiteland.org/DocumentCenter/View/446?dl=0. The web address for the Chester County Comprehensive Plan is: https://chescoplanning.org/Landscapes3/PDF/Landscapes3.pdf.

48. Aqua has an existing operational presence and wastewater professionals in the area. Aqua provides wastewater service in Chester County and in neighboring Willistown Township. The acquisition will easily fold into Aqua's existing wastewater operations. A listing of Aqua's nearby territory and facilities is as follows:

Aqua Facilities	Location	Distance from Township
Willistown Woods System	West Chester, PA	5 miles
Deerfield Knoll System	West Chester, PA	5 miles
Plumsock System	West Chester, PA	5 miles
Southeastern Division Office	Bryn Mawr, PA	11 miles

49. Aqua is not anticipating any physical, operational or managerial changes at its Southeastern Office as a result of the acquisition. Aqua will be adding 3 additional operators to address the day-to-day operations of EWT which are expected to be added in Q1 2022.

50. Planned capital improvements are addressed in Mr. Bubel's testimony.

IX. AFFECTED PERSONS

51. No corporation or entity, except EWT, is now furnishing or has corporate or franchise rights to furnish wastewater service in the Requested Territory, and no competitive condition will be created by approval of this Application. Water and wastewater service providers abutting or within one mile of the Requested Territory are as follows:

i. Within neighboring Charlestown Township, water service is provided by Aqua PA and private wells. Wastewater service is provided by VFSA and private septic systems.

ii. Within neighboring Tredyffrin Township, water service is provided by Aqua PA and private wells. Wastewater service is provided by Tredyffrin Township and private septic systems.

iii. Within neighboring Willistown Township, water service is provided by Aqua PA and private wells. Wastewater service is provided by Willistown Township, Aqua, and private septic systems.

iv. Within neighboring Malvern Borough, water service is provided by Aqua PA and private wells. Wastewater service is provided by Malvern Borough and private septic systems.

v. Within neighboring East Goshen Township, water service is provided by Aqua PA and private wells. Wastewater service is provided by EGMA and private septic systems.

vi. Within neighboring West Goshen Township, water service is provided by Aqua PA and private wells. Wastewater service is provided by West Goshen Township Sewer Authority and private septic systems.

vii. Within neighboring West Whiteland Township, water service is provided by Aqua PA and private wells. Wastewater service is provided by West Whiteland Township and private septic systems.

viii. Within neighboring Uwchlan Township, water service is provided by Aqua PA and private wells. Wastewater service is provided by Uwchlan Township Municipal Authority and private septic systems.

ix. Within neighboring West Pikeland Township, water service is provided by Aqua PA and private wells. Wastewater service is provided by Aqua and private septic systems.

X. REASONS SUPPORTING THIS APPLICATION

52. Approval of this Application is necessary or proper for the service, accommodation, convenience or safety of the public. As summarized below and discussed further in the testimonies of Mr. Packer and Mr. Bubel, which as identified in Section XI below, are attached hereto as **Exhibit U** and **Exhibit V**:

a. Aqua has the technical, regulatory, financial and legal fitness to operate the Assets of EWT, and to maintain the operations and make improvements to meet continuing and future customer needs.[11] The proposed transaction will not have an adverse effect on the service provided to existing customers of Aqua;

[11] As a certificated provider of utility service, Aqua's fitness is presumed. *See Re Pennsylvania-American Water Company,* 85 PA PUC 548 (1995).

b. EWT has agreed to sell its Assets. The public interest and need will be served by allowing Aqua, in lieu of EWT, to provide wastewater service in the Requested Territory and to address the issues of regulatory requirements and capital expenditures. The EWT system will benefit from the support of wastewater professionals throughout Aqua's organization;

c. The acquisition is consistent with the Commission's long-standing policy supporting the consolidation/regionalization of water/wastewater systems. Through consolidation/regionalization, the utility industry has a better chance to realize the benefits of better management practices, economies of scale, and the resulting greater environmental/economic benefits. The Commission has previously stated that "acquisitions of smaller systems by larger more viable systems will likely improve the overall long-term viability of the water and wastewater industry."[12] The benefits of consolidation/regionalization, ultimately, inure to customers both existing and acquired;

d. Aqua provides utility service to approximately 45,000 wastewater customers and has years of experience operating wastewater treatment and collection systems in a safe, reliable and efficient manner. Aqua has the managerial, technical, and financial resources to improve the operations of the Township;

e. In *McCloskey v. Pa. P.U.C.*, 195 A.3d 1055 (Pa. Cmwlth. 2018), *petition for allowance of appeal denied* No. 703 MAL 2018 (April 23, 2019), the Commonwealth Court held that Commission findings: (i) that Aqua, as the owner of numerous water and wastewater systems has sufficient operational expertise and ability to raise capital to support system operations; and (ii) that the Commission has a policy of

[12] Pennsylvania Public Utility Commission, Final Policy Statement on Acquisitions of Water and Wastewater Systems, Docket No. M-00051926, Final Order at 18 (Aug. 17, 2006).

consolidation/regionalization of wastewater system assets that allows for increased maintenance, upgrade and expansion of public sewer and water facilities, are substantial evidence, consistent with *Popowsky v. Pa. P.U.C.*, 937 A.2d 1040 (Pa. 2007) to support a conclusion that there is a public benefit to a transaction;

f. The acquisition of the EWT Sewer system will increase Aqua's customer base by approximately 9%. With a larger customer base, future infrastructure investments, Statewide, will be shared at a lower incremental cost per customer for all Aqua customers; and

g. The acquisition will not have any immediate impact on the rates of either existing customers of Aqua or Township customers. As discussed in the testimony of Mr. Packer and presented in the Notice to customers, the increase in rate base may ultimately require an increase in revenue. The hypothetical impact on rates is outweighed by the recognized benefits of Aqua's ownership including its expertise and ability to raise capital; the furtherance of consolidation/regionalization of wastewater services; and the spreading of costs over a larger customer base. Perhaps more significantly, the acquisition furthers the objective of the General Assembly with the enactment of Section 1329. While *McCloskey* concludes that rate impact should be addressed, it recognizes that it is not dispositive in the Commission's determination of substantial affirmative benefits.

XI. ADDITIONAL INFORMATION REQUIRED BY SECTION 1329 OF THE PUBLIC UTILITY CODE AND THE PUBLIC UTILITY COMMISSION'S 1329 CHECKLIST

53. Aqua and EWT have agreed to use the process presented in Section 1329 of the Public Utility Code, 66 Pa. C.S. § 1329, to determine the fair market value of the Assets and the ratemaking rate base. Aqua's verified statement that it selected Gannett Fleming Valuation and Rate Consultants,

LLC ("Gannett Fleming") as its Utility Valuation Expert is attached hereto as **Exhibit AA1**. EWT's verified statement that it selected AUS Consultants ("AUS") as its Utility Valuation Expert is attached hereto as **Exhibit AA2**.

54. As required by Section 1329(d)(1)(i), copies of the Fair Market Value Appraisal Reports of Gannett Fleming, Utility Valuation Expert, and AUS, Utility Valuation Expert, are attached hereto as **Exhibit Q** and **Exhibit R**, respectively. Confidential and Proprietary Work Paper Files, in Excel Format, of Gannett Fleming and AUS are provided with the Application.

55. Applicant states that the purchase price of the Assets of the selling utility as agreed to by Aqua and EWT is $54,930,000.

56. The ratemaking rate base determined pursuant to Section 1329(c)(2) of the Public Utility Code is $54,930,000, being the lesser of the purchase price of $54,930,000 negotiated by Aqua and EWT and the average of the fair market value appraisals which is $56,724,729 – determined by $55,668,000 presented in the appraisal of Gannett Fleming and $57,781,458 presented in the appraisal of AUS.

57. Aqua will incur transaction and closing costs of approximately $308,300, which it will include in its rate base.

58. A schedule of rates tariff page implementing rates equal to the rates of EWT at the time of closing is attached hereto as Exhibit G, as previously stated.

59. Applicant verifies that Gannett Fleming was selected by Aqua, the acquiring public utility, and that AUS was selected by EWT, the selling municipality.

60. The Utility Valuation Experts were paid $60,190.47 for the completed Fair Market Value Appraisal Reports. Documentation of the fees paid to Gannett Fleming and AUS, including the valuation service agreements and all associated invoices, are attached hereto as **Exhibit S1** and

Exhibit S2, respectively. Fees paid to the Utility Valuation Experts did not exceed 5% of the fair market value of the selling utility.

61. Statements of Gannett Fleming and of AUS verifying that they have no affiliation with Aqua or EWT as specified in Section 1329; that their Appraisals determined fair market value in compliance with the most recent edition of the Uniform Standards of Professional Appraisal Practice as of the date of their report, employing the cost, market and income approaches; and that they applied applicable jurisdictional exceptions to their submitted Appraisal are attached hereto as **Exhibit T1** and **Exhibit T2**, respectively.

62. The testimony of William C. Packer, in support of this Application is attached hereto as **Exhibit U**.[13] Mr. Packer's testimony explains that Aqua is not presenting a rate stabilization plan. Aqua is proposing to implement EWT's existing rates after Closing and to maintain those rates until the next Aqua rate proceeding following Closing of the transaction.

63. The testimony of Mark J. Bubel, Sr., in support of this Application is attached hereto as **Exhibit V**.

64. The testimony of John Nagel, Township Manager of EWT, in support of the Application is attached hereto as **Exhibit W**.

65. The Engineer's Asset Inventory of tangible assets of EWT is attached hereto as Exhibit D as aforesaid.

66. The testimony of Harold Walker, III, in support of the Gannett Appraisal is attached hereto as **Exhibit X**.

67. The testimony of Jerome C. Weinert in support of the AUS Consultants Appraisal is attached hereto as **Exhibit Y**.

---

[13] Exhibit U has an Appendix A, which is CONFIDENTIAL and is submitted in CONFIDENTIAL and PUBLIC forms.

68. Answers to the Section 1329 Application Standard Data Requests are attached hereto as **Exhibit Z.**

XII. SECTION 507 APPROVAL OF ASSIGNMENT OF CONTRACTS

69. Section 507 of the Code provides that, except for contracts between a public utility and a municipal corporation to furnish service at tariff rates, no contract or agreement between a public utility and a municipal corporation shall be valid unless filed with the Commission at least 30 days prior to its effective date.

70. Aqua requests that that the Commission, to the extent necessary, issue certificates for filing, pursuant to Section 507, for the following contracts, which will be assigned to Aqua at closing.

i. F1 – Valley Forge Treatment Plant Agreement, dated November 1, 1970, by and between Valley Forge Sewer Authority; the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown, and Eastown; the Borough of Malvern; Malvern Municipal Authority; East Whiteland Municipal Authority; Tredyffrin Township Municipal Authority; and Easttown Township Municipal Authority.

ii. F2 – Composite Amendment No. 1 to Valley Creek Trunk Sewer Agreement, East Whiteland Trunk Line Agreement, and Valley Forge Sewage Treatment Plant Agreement dated December 1, 1974, by and between Tredyffrin Township Municipal Authority, Township of Tredyffrin, Township of Schuylkill, Township of East Pikeland, Township of Charlestown, Township of East Whiteland, Township of Willistown, Township of Easttown, Borough of Malvern, Valley Forge Sewer Authority, Malvern Municipal Authority, East Whiteland Municipal Authority, and Easttown Municipal Authority

iii. F3 – Amendment to Valley Forge Sewer Treatment Plant Agreement, dated January 1, 1983, by and between Valley Forge Sewer Authority; the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown, and Easttown; the Borough of Malvern; Malvern Municipal Authority; East Whiteland Municipal Authority; Easttown Municipal Authority; Tredyffrin Township Municipal Authority; and Willistown Township Municipal Authority

iv. F4 – Supplement to Valley Forge Sewage Treatment Plant Agreement For the Purpose of Complying with United States Environmental Protection Agency Regulations, dated December 2, 1985, by and between Valley Forge Sewer Authority; the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown, and

Eastown; the Borough of Malvern; Malvern Municipal Authority; East Whiteland Municipal Authority; Tredyffrin Township Municipal Authority; Easttown Township Municipal Authority, and Willistown Township Municipal Authority.

v. F5 – Addendum to Valley Forge Sewage Treatment Plant Agreement for the Purpose of Permitting and Administering the Sale of Reserved Capacity Among the Parties, dated May 26, 1994, by and between Valley Forge Sewer Authority, the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown, and Easttown; the Borough of Malvern; East Whiteland Township Municipal Authority; Easttown Municipal Authority; and Tredyffrin Township Municipal Authority

vi. F6 – East Whiteland Trunk Line Agreement, dated February 1, 1971, by and between East Whiteland Municipal Authority, the Township of East Whiteland, Malvern Municipal Authority, the Borough of Malvern, and Valley Forge Sewer Authority

vii. F7 – Amendment to East Whiteland Trunk Line Agreement, dated December 12, 1979, by and between East Whiteland Municipal Authority, the Township of East Whiteland, the Borough of Malvern, Malvern Municipal Authority, and Valley Forge Sewer Authority

viii. F8 – Amendment to East Whiteland Trunkline Agreement, dated April 18, 2014, by and between East Whiteland Township, East Whiteland Municipal Authority, and Valley Forge Sewer Authority

ix. F9 – Sidley Road Trunk Line Repairs Agreement, dated December 27, 1978, by and between East Whiteland Municipal Authority and Valley Forge Sewer Authority

x. F10 – Sewage Treatment Agreement, dated November 17, 1987, by and between East Goshen Township, East Goshen Municipal Authority, East Whiteland Township, and East Whiteland Municipal Authority

xi. F11 – Agreement, dated September 14, 1993, by and between Willistown Township, East Whiteland Township and East Whiteland Municipal Authority

xii. F12 – Agreement, dated July 10, 1995, by and between Malvern Borough, East Whiteland Township, and East Whiteland Municipal Authority

xiii. F13 – Sewage Treatment Agreement, dated October 17, 2000, by and between East Goshen Township, East Goshen Municipal Authority, East Whiteland Township, and East Whiteland Municipal Authority

xiv. F14 – Sewage Capacity / Service Agreement, dated November 1, 2000, by and between East Whiteland Township, East Whiteland Township Municipal Authority, Tredyffrin Township, Tredyffrin Township Municipal Authority, and Trammell Crow Northeast Metro Development, Inc.

xv. F15 – Addendum to Sewage Capacity / Service Agreement, dated November 19, 2015, by and between East Whiteland Township and Tredyffrin Township with the joinders of RLD Atwater JV, LLC and The Haven At Atwater Village, LLC.

xvi. F16 – Sewage Treatment Agreement, dated March 2, 2004, by and between East Whiteland Township, East Goshen Township, and Malvern Institute for Psychiatric & Alcoholic Studies

xvii. F17 – Wastewater Conveyance Agreement, dated November 20, 2018, by and between Aqua Resources, Inc., Tredyffrin Township, East Whiteland Township, Willistown Township, Charlestown Township, Schuylkill Township, East Pikeland Township, Easttown Township, Eastown Township Municipal Authority, The Borough of Malvern, Tredyffrin Township Municipal Authority, and Valley Forge Sewer Authority

xviii. F18 – Agreement with Public Utility or Municipality for Crossing Under Railroad Private Property, dated March 21, 1972, by and between Reading Company and East Whiteland Municipal Authority

xix. F19 – License Agreement for Wire, Pipe and Cable Transverse Crossings and Longitudinal Occupations, dated July 11, 1975, by and between Penn Central Transportation Company and East Whiteland Municipal Authority

xx. F20 – License Agreement, dated November 18, 1993, by and between National Railroad Passenger Corporation and East Whiteland Township Municipal Authority[14]

xxi. F21 – Amendment to License Agreement, dated May 6, 2002, by and between National Railroad Passenger Corporation and East Whiteland Township Municipal Authority[15]

xxii. F22 – License Agreement, dated September 10, 1999, by and between National Railroad Passenger Corporation and East Whiteland Township[16]

---

[14] The Company will enter into a new license agreement with Amtrak (formerly National Railroad Passenger Corporation prior to closing.

[15] The Company will enter into a new license agreement with Amtrak (formerly National Railroad Passenger Corporation prior to closing.

[16] The Company will enter into a new license agreement with Amtrak (formerly National Railroad Passenger Corporation prior to closing.

XIII. SECTION 2102 APPROVAL OF CONTRACTS BETWEEN AFFILIATED INTERESTS

71. Section 2102 of the Code provides that, no contract or arrangement providing for the furnishing of management, supervisory, construction, engineering, accounting, legal, financial, or similar services, and no contract or arrangement for the purchase, sale, lease, or exchange of any property, right, or thing or for the furnishing of any service, property, right or thing other than those above enumerated, made or entered into after the effective date of this section between a public utility and any affiliated interest shall be valid or effective unless and until such contract or arrangement has received the written approval of the commission.

72. Upon Closing of the Proposed Transaction Aqua will take assignment from EWT of EWT's interest in the Wastewater Conveyance Agreement among Aqua Resources, Inc. and the Townships of Tredyffrin, EWT, Willistown, Charlestown, Schuylkill, East Pikeland and Easttown, Easttown Township Municipal Authority, the Borough of Malvern, Tredyffrin Township Municipal Authority, and VFSA, dated November 20, 2018, included and noted above as Exhibit F17. Aqua requests that the Commission, to the extent necessary, approve, pursuant to Section 2102, Exhibit F17, which will become an affiliated contract at Closing. Additional discussion is provided in Mr. Packer's Testimony, Exhibit U.

XIV. OTHER APPROVALS, CERTIFICATES, REGISTRATIONS AND RELIEF, IF ANY

73. Aqua asks that the Commission issue such other approvals, certificates, registrations and relief, if any, that may be required with respect to Aqua's acquisition of the EWT wastewater system assets.

XV. CONCLUSION

WHEREFORE, Aqua requests that the Public Utility Commission approve this Application, filed pursuant to Sections 1102, 1329, 507, and 2102 of the Public Utility Code, and:

a. Issue *Certificates of Public Convenience* under §1102 of the Pennsylvania Public Utility Code:

(1) Authorizing Aqua to acquire, by purchase, the wastewater system assets of East Whiteland Township; and

(2) Authorizing Aqua to begin to offer, render, furnish and supply wastewater service to the public in the Requested Territory covered by this Application.

b. Authorize Aqua to file tariff revisions, effective upon one day's notice, to:

(1) Include within its territory all the Requested Territory covered by this Application;

(2) Adopt and apply East Whiteland Township's rates as set forth in this Application as Aqua's Base Rates within the Requested Territory; and

(3) Apply Aqua's *Rules and Regulations* within the Requested Territory.

c. Enter an *Order* approving this Application and Aqua's acquisition of the Assets and, as part of that *Order* include the ratemaking rate base of East Whiteland Township as $54,930,000 pursuant to Section 1329(c)(2) of the Public Utility Code;

d. Approve Contracts, including Assignment of Contracts, between Aqua and East Whiteland Township, pursuant to Section 507 of the Public Utility Code;

e. Approve the Contract between Aqua and Aqua Resources, Inc., pursuant to Section 2102 of the Public Utility Code; and

f. Issue such other approvals, certificates, registrations and relief, if any, under the Public Utility Code that may be required with respect to Aqua's acquisition of the East Whiteland Township wastewater system assets.

Respectfully submitted,

AQUA PENNSYLVANIA WASTEWATER, INC.

Counsel for Aqua Pennsylvania Wastewater, Inc.

Date: July 23, 2021

VERIFICATION

I, William C. Packer, Vice President, Regulatory Accounting and Regional Controller of Aqua Pennsylvania, Inc., hereby state that the facts set forth in the foregoing Application of Aqua Pennsylvania Wastewater, Inc., pursuant to Sections 1102, 1329, 507 and 2102 of the Public Utility Code, for approvals and an order relating to the acquisition of the wastewater system assets of East Whiteland Township are true and correct to the best of my knowledge, information and belief and that I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. § 4904 (relating to unsworn falsification to authorities).

William C. Packer

William C. Packer
Vice President, Regulatory
Accounting and Regional Controller
Aqua Pennsylvania, Inc.

Dated: July 23, 2021

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Application of Aqua Pennsylvania Wastewater, Inc. (hereinafter referred to as "Aqua" or "Applicant") pursuant to Sections 1102 and 1329 of the Public Utility Code for:	:	**Docket No. A-2021-3026132**
(1) approval of the acquisition by Aqua of the wastewater system assets of East Whiteland Township ("EWT" or "Township") situated within the Township of East Whiteland, Chester County, Pennsylvania;	:	
(2) approval of the right of Aqua to begin to offer, render, furnish and supply wastewater service to the public in portions of East Whiteland Township, Chester County, Pennsylvania; and	:	
(3) an order approving the acquisition that includes the ratemaking rate base of the East Whiteland Township wastewater system assets pursuant to Section 1329(c)(2) of the Public Utility Code.	:	
Request for Approval of Contracts, including Assignments of Contracts, between Aqua and East Whiteland Township, Pursuant to Section 507 of the Public Utility Code	:	
Request for Approval of a Contract between Affiliated Interests, Pursuant to Section 2102 of the Public Utility Code	:	

CERTIFICATE OF SERVICE

I hereby certify that I have this 23rd day of July, 2021, served a true and correct copy of the foregoing Application, with Exhibits, and Work Paper Files, including Confidential Work Paper Files in Excel Format, upon the persons and in the manner set forth below:

APPLICATION CHECKLIST

1.	Transmittal letter with caption and statement that the filing is pursuant to 66 Pa. C.S. § 1329.		Yes	
2.	Verification form that is signed by an officer or authorized employee of the company, is dated, and accurately references the case.		Yes	
3.	Certificate of Service indicating that a complete copy of the application with exhibits was served by registered or certified mail, return receipt requested, or by hand delivery, upon the statutory advocates (OCA, OSBA) and the Bureau of Investigation and Enforcement.		Yes	A Certificate of Service is included with the Application
4.	Provide responses to Section 1329 Application Standard Data Requests, including electronic working documents (i.e., Excel spreadsheets) for all the filing's schedules, studies, and working papers to the extent practicable.		Yes	Section XI and Exhibit Z
5.	Provide copies of two independent appraisals by separate utility valuation experts for use in establishing the fair market value of the Selling Utility.		Yes	Section XI, Paragraph 54, Page 18 and Exhibits Q and R
6.	State the purchase price of the seller as agreed to by the buyer and seller.		Yes	Section XI, Paragraph 55, Page 18
7.	State the total fees paid to the utility valuation experts for providing the completed appraisals for the acquisition and provide documentation, i.e., the valuation service agreement and all associated invoices, supporting the subject fee amounts.		Yes	Section XI, Paragraph 60, Pages 18 and 19 and Exhibits S1 and S2
8.	Buyer and Seller Verification Statements:			
	a. Provide a verification statement of the Buyer that its utility valuation expert was selected by the Buyer.		Yes	Section XI, Paragraph 59, Page 18 and Exhibit AA1
	b. Provide a verification statement of the Seller that its utility valuation expert was selected by the Seller.		Yes	Section XI, Paragraph 59, Page 18 and Exhibit AA2
9.	Utility Valuation Expert Verification Statements:			
	a. Buyer Utility Valuation Expert has no affiliation with the buyer or seller		Yes	Section XI, Paragraph 61, Page 19 and Exhibit T1

APPLICATION CHECKLIST

	b. Buyer Utility Valuation Expert determined fair market value in compliance with the most recent edition of the Uniform Standards of Professional Appraisal Practice as of the date of the report employing the cost, market, and income approaches.		Yes	Section XI, Paragraph 61, Pages 19 and Exhibit T1
	c. Buyer Utility Valuation Expert applied applicable jurisdictional exceptions to the submitted appraisal.		Yes	Section XI, Paragraph 61, Page 19 and Exhibit T1
	d. Seller Utility Valuation Expert has no affiliation with the buyer or seller		Yes	Section XI, Paragraph 61, Page 19 and Exhibit T2
	e. Seller Utility Valuation Expert determined fair market value in compliance with the most recent edition of the Uniform Standards of Professional Appraisal Practice as of the date of the report employing the cost, market, and income approaches.		Yes	Section XI, Paragraph 61, Page 19 and Exhibit T2
	f. Seller Utility Valuation Expert applied applicable jurisdictional exceptions to the submitted appraisal.		Yes	Section XI, Paragraph 61, Page 19 and Exhibit T2
10.	Estimated or, if available, actual transaction and closing costs incurred by the buyer that will be included in its rate base.		Yes	Section XI, Paragraph 57, Page 18
11.	State the ratemaking rate base as required in 66 Pa. C.S. § 1329 and specify whether it is based on either the fair market value determined by the valuation experts or the asset purchase price.		Yes	Section XI, Paragraph 56, Page 18
12.	Provide a proposed tariff containing a rate equal to the existing rates of the seller at the time of the acquisition and a rate stabilization plan, if applicable to the acquisition.		Yes	Section VI, Paragraph 33, Page 10 and Exhibit G
13.	Seller Testimony			
	a. Provide seller direct testimony supporting the application, if any.		Yes	Section XI, Paragraph 64, Page 19 and Exhibit W
	b. Provide seller UVE direct testimony.		Yes	Section XI, Paragraph 67, Page 19 and Exhibit Y
14.	Buyer Testimony:			
	a. Provide buyer direct testimony supporting the application.		Yes	Section XI, Paragraphs 62 and 63, Page 19 and Exhibits U and V
	b. Provide buyer UVE direct testimony.		Yes	Section XI, Paragraph 66, Page 19 and Exhibit X

APPLICATION CHECKLIST

15.	Plant in Service:			
	a. Provide an inventory of the used and useful plant assets to be transferred. Identify separately any utility plant that is held for future use.		Yes	Section III, Paragraphs 11, 12 and 13, Page 4 and Exhibit D
	b. Provide a list of all non-depreciable property such as land and rights-of-way.		Yes	Section III, Paragraph 13, Page 4 and Exhibit D
	c. State the DEP-permitted productive or treatment capacity of sources or treatment facility and the pipe sizes and material used for construction for all transmission and distribution or collection facilities.		Yes	Section III, Paragraphs 12, 15 and 16, Pages 4 and 5, Exhibit D and Exhibit V
	d. State the elevations of major facilities and service areas.		Yes	Section III, Paragraph 17, Page 5 and Exhibit V
	e. State the approximate time schedule for installation of the various component facilities.		Yes	Section III, Paragraph 14, Page 4 and Exhibits D and V
	f. State the tentative journal entries for booking the acquisition.		Yes	Section IV, Paragraph 29, Pages 9 and 10
16.	Map of Service Area - provide a scalable map or plan of suitable scale highlighting the boundaries of the proposed service area that includes:			
	a. The extent of the proposed service area with any existing adjoining service areas identified.		Yes	Section I, Paragraph 3, Page 2 and Exhibit A
	b. A north arrow depicting map orientation.		Yes	Section I, Paragraph 4, Page 2 and Exhibit A
	c. A written description of the boundaries for the service territory utilizing bearing angles and distances.		Yes	Section I, Paragraph 4, Page 2 and Exhibit A
	d. Size of the service territory area in terms of acres or square miles.		Yes	Section I, Paragraph 4, Page 2 and Exhibit A
	e. Identification and depiction of all municipal boundaries relative to the service area.		Yes	Section I, Paragraph 4, Page 2 and Exhibit A

APPLICATION CHECKLIST

	f. Depiction of the location or route of the waterworks or wastewater collection, treatment or disposal facilities.		Yes	Section III, Paragraph 11, Page 4, Exhibit D and Confidential Sewage Facilities Maps
17.	Customers:			
	a. State the seller's actual number of customers by class and quantify the related consumption or gallons treated in the current calendar year and future number of connections anticipated for the next 5 years and, if available, the next 10 years.		Yes	Section V, Paragraph 30, Page 10, Exhibits U (Appendix A), V and W
	b. Buyer shall demonstrate its ability to provide adequate water supply, treatment, storage and distribution or adequate wastewater collection, treatment or disposal capacity to meet present and future customer demands.		Yes	Exhibit V
	c. For **water** system acquisitions, quantify the number of public and private fire hydrants.		N/A	
18.	Rates:			
	a. State the current rates of the seller.		Yes	Section VI, Paragraph 34, Page 10 and Exhibit H
	b. Provide a copy of the seller's current rules and regulations for service.		Yes	Section VI, Paragraph 34, Page 10 and Exhibit H
	c. Provide a proposed tariff or tariff supplement showing the rates, proposed rules, and conditions of service.		Yes	Section VI, Paragraph 33, Page 10 and Exhibit G
	d. Provide a copy of the notification sent, or which will be sent, to affected customers describing the filing and the anticipated effect on rates.		Yes	Section VI, Paragraph 36, Page 11 and Exhibits I1 and I2
19.	Cost of Service:			
	a. Provide a copy of the seller's two most recent audited financial statements.		Yes	Section VII, Paragraph 37, Page 11 and Exhibits J1 and J2
	b. Provide a copy of the seller's two most recent adopted budgets.		Yes	Section VII, Paragraph 38, Page 11 and Exhibits J3 and J4

APPLICATION CHECKLIST

	c. Provide a copy of the seller's most recent annual report filed with the Commonwealth's Department of Community and Economic Development.		Yes	Section VII, Paragraph 39, Page 11 and Exhibit K
	d. Provide calculations quantifying the projected revenues and expenses for the acquisition.		Yes	Section VII, Paragraph 40, Page 11
	e. State whether the seller has any outstanding loans on the utility plant and identify the nature, terms, and payment history.		Yes	Section VII, Paragraph 37, Page 11
20.	Proof of Compliance - provide proof of compliance with applicable design, construction and operation standards of DEP or of the county health department, or both, including:			
	a. For **water** system acquisitions, provide copies of the public water supply/water quality management permits for the utility plant.		N/A	
	b. For **wastewater** system acquisitions, provide copies of the water quality management and National Pollution Discharge Elimination System (NPDES) permits for the utility plant.		Yes	Section VIII, Paragraph 43, Pages 12 and 13, Exhibits M1, M2 and M3 and Exhibits N1 through N5
	c. For **wastewater** system acquisitions, provide a copy of the Chapter 94 Municipal Wasteload Management Report that was most recently submitted to DEP.		Yes	Section III, Paragraphs 15 and 16, Pages 4 and 5 and Exhibits E1 through E3
	d. Valid buyer's certified operators' certificates appropriate to the facilities being acquired.		Yes	Section VIII, Paragraph 42, Page 12 and Exhibit L
	e. Provide documentation evidencing a 5-year compliance history with DEP with an explanation of each violation for the seller's utilities that have been providing service as well as provide a copy of any DEP-approved corrective action plans.		Yes	Section VIII, Paragraph 44, Page 13 and Exhibits O and V
	f. Provide documentation of all Notices of Violation issued to seller by DEP for the last 5 years, an explanation of each, including a description of any corrective or compliance measures taken.		Yes	Section VIII, Paragraph 44, Page 13 and Exhibit O
	g. Statement attesting to Aqua's compliance history with DEP		Yes	Section VIII, Paragraph 45, Page 13
	h. Provide a statement clarifying whether the acquired plant will be physically interconnected to the buyer's system or be operated as a standalone system.		Yes	Section VIII, Paragraph 42, Page 12
	i. Provide a statement that explains how the acquisition will fit into the current operations of the buyer.		Yes	Section VIII, Paragraph 48, Page 14

APPLICATION CHECKLIST

	j. Provide a statement that identifies the staff, district or division of the buyer that will operate and manage the acquisition.		Yes	Section VIII, Paragraph 42, Page 12 and Paragraph 48, Page 14
	k. Provide a statement quantifying the distance in miles the acquisition is from the buyer's existing system or facilities.		Yes	Section VIII, Paragraph 42, Page 12 and Paragraph 48, Page 14
	l. Provide a statement that identifies all planned physical, operational and managerial changes of the buyer that will occur after closing and state the timeframe and cost for each.		Yes	Section VIII, Paragraph 49, Page 14 and Exhibit V
21.	Affected Persons. State the identity of all public utilities, municipalities, municipal authorities, cooperatives and associations which provide public water service or wastewater collection, treatment or disposal service within each municipality, or a municipality directly adjacent to the municipality(ies), in which the applicant seeks to provide service that abuts or is situated within one mile of the applicant's proposed facilities.		Yes	Section IX, Paragraph 51, Pages 14 and 15
22.	Other requirements - demonstrate compliance with the following:			
	a. For **wastewater** system acquisitions, demonstrate compliance with the DEP-approved Act 537 Official Sewage Facilities Plans for the affected municipalities (including the extent of the requested service territory).		Yes	Section VIII, Paragraph 46, Page 13
	b. For **wastewater** system acquisitions, provide a copy of the DEP-approved Act 537 Official Sewage Facilities Plans for the affected municipalities.		Yes	Section VIII, Paragraph 46, Page 13 and Exhibits P1 through P8
	c. For **wastewater** system acquisitions, state the method of water service being provided in the requested wastewater service territory (i.e., public water or private wells) and identify the name of water utility, if applicable.		Yes	Section III, Paragraph 18, Page 5
	d. For **water** system acquisitions, state the method of wastewater service being provided in the requested water service territory (i.e., public wastewater or private on-lot) and identify the name of wastewater utility, if applicable.		N/A	
	e. Provide evidence the filing is consistent with the affected municipality and county comprehensive plans if the filing proposes to expand service beyond the existing plant footprint.		Yes	Section VIII, Paragraphs 46 and 47, Page 13

APPLICATION CHECKLIST

23.	Verification:			
	a. For **water** system acquisitions, provide a verification that the water sources and customers are metered in accordance with 52 Pa. Code § 65.7 (relating to metered service). If unmetered water service is currently provided, the applicant shall provide a metering plan to the Commission.		N/A	
	b. Include a statement that there is no affiliation between the buyer and seller.		Yes	Section IV, Paragraph 22, Page 6
	c. Include a statement that the agreement was conducted at arm's length.		Yes	Section IV, Paragraph 22, Page 6
	d. Include a statement explaining how the customers will benefit from the Buyer's ownership.		Yes	Section X and Exhibits U, V and W
24.	Asset Purchase Agreement (APA):			
	a. Provide a copy of the APA that is signed by all parties.		Yes	Section I, Paragraph 5, Pages 2 and 3 and Exhibit B
	b. APA clearly states the purchase price and terms.		Yes	Section IV, Paragraph 21, Page 6 and Exhibit B
	c. APA clearly states whether all assets or only a portion of the assets are to be purchased (e.g., water treatment and distribution or wastewater collection and treatment).		Yes	Section IV, Paragraph 24, Page 6 and Exhibit B
	d. APA adequately describes the assets to be acquired.		Yes	Section IV, Paragraphs 24, 25 and 26, Pages 6, 7, 8 and 9 and Exhibit B
	e. APA adequately describes the assets to be excluded.		Yes	Section IV, Paragraph 27, Page 9 and Exhibit B
25.	Provide a copy of all municipal and affiliate contracts to be assumed by buyer as part of the acquisition and a list and annual dollar value of other contracts.		Yes	Section IV, Paragraph 25, Pages 6, 7, 8 and 9 and Exhibits F1, through F22

SANITARY SEWER ASSET PURCHASE AGREEMENT

THIS SANITARY SEWER ASSET PURCHASE AGREEMENT ("Agreement"), dated as of January 8, 2021 (the "Effective Date"), is made and entered into by and between the Township of East Whiteland, Chester County, a body corporate and politic, organized and existing under the laws of the Commonwealth of Pennsylvania (the "Seller"), and Aqua Pennsylvania Wastewater, Inc. (the "Buyer"), a corporation organized and existing under the laws of the Commonwealth of Pennsylvania.

RECITALS:

WHEREAS, Seller, acting by and through the Board of Supervisors of East Whiteland Township, Chester County (the "Township Board") owns and operates a sanitary wastewater collection and conveyance system (the "System") that provides sanitary wastewater service to various customers in East Whiteland Township, Pennsylvania (the "Service Area") and as set forth on Schedule A; and

WHEREAS, Buyer is a regulated public utility organized and existing under the laws of the Commonwealth of Pennsylvania that furnishes wastewater service to the public in several counties, including Chester County, Pennsylvania; and

WHEREAS, Buyer, in reliance upon the representations, warranties and covenants of Seller herein, desires to purchase and acquire from Seller, and Seller, in reliance upon the representations, warranties and covenants of Buyer herein, desires to sell, transfer and convey to Buyer all of the assets of the System (other than the Excluded Assets), and in connection therewith, Buyer has agreed to assume certain ongoing obligations and liabilities of Seller related to the acquired assets, all on the terms and conditions set forth in this Agreement.

NOW, THEREFORE, in consideration of the mutual representations, warranties, covenants, and agreements stated in this Agreement, the receipt and sufficiency of which hereby are acknowledged, intending to be legally bound, the Parties agree as follows:

ARTICLE I.

DEFINITIONS

In addition to the capitalized terms defined elsewhere in this Agreement, the following terms, as used in this Agreement (unless otherwise specified herein), have the meanings set forth in this Article I:

"**Acquired Assets**" has the meaning specified in Section 2.01.

"**Affiliate**" means, when used to indicate a relationship with a specified Person, a Person that, directly or indirectly, through one or more intermediaries, has a 10% or more voting or economic interest in such specified Person or controls, is controlled by or is under common control with (which includes, with respect to a managed fund or trust, the right to direct or cause the direction of the management and policies of such managed fund or trust as manager, advisor, supervisor, sponsor or trustee pursuant to relevant contractual arrangements) such specified

Person, and a Person is deemed to be controlled by another Person if controlled in any manner whatsoever that results in control in fact by that other Person (or that other Person and any Person or Persons with whom that other Person is acting jointly or in concert), whether directly or indirectly and whether through share ownership, a trust, a contract or otherwise (and for purposes of this definition, a managed fund or trust is deemed to be an Affiliate of the Person managing, supervising, sponsoring or advising such fund or trust and a limited partner in a managed fund or trust is deemed to be an Affiliate of such fund or trust and of the Person managing, supervising, sponsoring or advising such fund or trust).

"**Agreement**" has the meaning specified in the Preamble to this Agreement (and includes all Schedules and Exhibits referred to herein), as amended, modified and supplemented from time to time in accordance with the terms hereof.

"**Assigned Contracts**" has the meaning specified in Section 2.01(c).

"**Assignment and Assumption Agreement**" has the meaning specified in Section 13.02(c).

"**Assumed Liabilities**" has the meaning specified in Section 2.04(a).

"**Authorizations and Permits**" mean all licenses, permits, franchises, authorizations, certificates, registrations, consents, orders, adjudications, variances, waivers and approvals currently in effect issued or granted by Governmental Authorities, including without limitation, environmental permits, operating permits and approvals that are held by Seller that primarily relate directly or indirectly to the operation of the System, including those set forth on Schedule 4.12.

"**Business Day**" means any day that is neither a Saturday, Sunday nor a day observed as a holiday by either the Commonwealth of Pennsylvania or the United States government.

"**Buyer**" has the meaning specified in the Preamble of this Agreement.

"**Buyer Fundamental Representations**" has the meaning specified in Section 8.01.

"**Buyer Indemnified Persons**" has the meaning specified in Section 8.02.

"**CERCLA**" means the Comprehensive Environmental Response Compensation and Liability Act of 1980, 42 U.S.C. §9601 et seq., as amended.

"**Closing**" means the consummation of the sale and purchase of the Acquired Assets and assumption of the Assumed Liabilities, the release/waiver of liabilities and the other transactions contemplated by this Agreement, all in accordance with the terms and conditions of this Agreement and as specified in Article XIII.

"**Closing Date**" has the meaning specified in Section 13.01.

"**Closing Effective Time**" has the meaning specified in Section 13.01.

"**Code**" means the Internal Revenue Code of 1986, as amended.

"**Confidential Information**" means any information about Buyer, Seller or the System related to the transactions contemplated by this Agreement, except that such term does not include information which the receiving Party can demonstrate (a) is generally available to or known by the public other than as a result of improper disclosure by the receiving Party, (b) is obtained by the receiving Party from a source other than the disclosing Party, and that source was not bound by a duty of confidentiality to the disclosing Party with respect to such information, or (c) is legally in the public domain.

"**Customer Sewer Laterals**" has the meaning specified in Section 2.02(k).

"**Direct Claim**" has the meaning specified in Section 8.04(c).

"**Easements**" means all easements, rights of way, licenses, use agreements, occupancy agreements, leases and other agreements and appurtenances for and over the real property of third parties that are necessary for or used in connection with the operation of the System or to provide continuous and unimpeded rights of way for the Acquired Assets (including access thereto).

"**EDU**" means equivalent dwelling unit and having a use rate of 275 gallons per day.

"**Effective Date**" has the meaning specified in the Preamble.

"**Environment**" means soil, surface waters, ground waters, land, stream sediments, flora, fauna, surface or subsurface strata and ambient air.

"**Environmental Claims**" means all notices of investigations, warnings, notice letters, notices of violations, Liens, orders, claims, demands, suits or administrative or judicial actions for any injunctive relief, fines, penalties, third party claims, or other claims asserting violations of Environmental Requirements or responsibility for Environmental Liabilities.

"**Environmental Conditions**" means the Release of Hazardous Materials or the presence of Hazardous Materials on, in, under or within any property (including the presence in the Environment), other than the presence of Hazardous Materials in locations and at concentrations that are naturally occurring.

"**Environmental Liabilities**" means any legal obligation or liability arising under Environmental Requirements or related to or arising out of any Environmental Condition, including those consisting of or relating to any (a) duty imposed by, breach of or noncompliance with any Environmental Requirements; (b) environmental, health or safety matters or conditions (including on-site or off-site contamination, occupational safety and health and regulation of Hazardous Materials); (c) Remedial Action undertaken by any Person; (d) bodily injury (including illness, disability and death, and regardless of when any such bodily injury occurred, was incurred or manifested itself), property damage (including trespass, nuisance, wrongful eviction and deprivation of the use of real or personal property), or other losses or damages incurred by any other Person (including any employee or former employee of such Person); (e) any injury to, destruction of, or loss of natural resources, or costs of any natural resource damage assessments; (f) exposure of any Person to any Hazardous Materials; and (g) the presence or Release of any Hazardous Materials.

"**Environmental Requirements**" mean all present Laws (including common law), regulations, legally binding or otherwise enforceable requirements and Authorizations and Permits relating to human health, pollution, or protection of the Environment (including ambient air, surface water, ground water, land surface or surface strata), including (i) those relating to emissions, discharges, Releases, or threatened Releases of Hazardous Materials, and (ii) those relating to the identification, generation, manufacture, processing, distribution, use, treatment, storage, disposal, release, recovery, transport or other handling of Hazardous Materials. Without limiting the previous, the term "**Environmental Requirements**" includes (1) CERCLA; the Superfund Amendments and Reauthorization Act, Public Law 99-499, 100 Stat. 1613; the Emergency Planning and Community Right to Know Act, 42 U.S.C. Sections 11001-11050; the Resource Conservation and Recovery Act, 42 U.S.C. Sections 6901-6992k ("RCRA"); the Safe Drinking Water Act, 42 U.S.C. Sections 300f to 300j-26; the Toxic Substances Control Act, 15 U.S.C. Sections 2601-2692; the Hazardous Materials Transportation Act, 49 U.S.C. Sections 5101-5127; the Federal Water Pollution Control Act, 33 U.S.C. Sections 1251-1387; the Oil Pollution Act of 1990, 33 U.S.C. Sections 2701--2761; the Clean Air Act, 42 U.S.C. Sections 7401-7671q; the Atomic Energy Act of 1954, as amended, 42 U.S.C. Sections 2011 et seq.; the Low Level Radioactive Waste Policy Act, as amended, 42 U.S.C. Section 2021b et seq.; the Occupational Safety and Health Act, 29 U.S.C. Sections 651-678, and the regulations promulgated pursuant to the above-listed federal statutes, and (2) counterpart Laws and regulations promulgated or issued by any state or local Governmental Authority, specifically including the Pennsylvania Storage Tank and Spill Prevention Act of 1989 (35 Pa. C.S.A. § 6021.101 *et. seq.*).

"**EPA**" means the United States Environmental Protection Agency, or a successor Governmental Authority with substantially similar power and authority thereto.

"**Equipment and Machinery**" means (i) all the equipment, tangible personal property, machinery, office furniture and equipment, fixtures, tooling, spare maintenance or replacement parts, environmental testing equipment, and vehicles owned or leased by Seller (including all leases of such property), which are primarily used in the operation of the System, (ii) any rights of Seller to warranties applicable to the foregoing (to the extent assignable), and licenses received from manufacturers and Seller of any such item, and (iii) any related claims, credits, and rights of recovery with respect thereto, as set forth on Schedule 4.10.

"**Excluded Assets**" has the meaning specified in Section 2.02.

"**Excluded Liability**" or "**Excluded Liabilities**" means all liabilities other than Assumed Liabilities.

"**Files and Records**" means all files and records of Seller primarily relating to the System and the Acquired Assets, whether in hard copy, digital, or magnetic or other format including data, geographic information system data, plans, contracts and recorded knowledge relating to the Acquired Assets (including property records, related to the foregoing), customer and supplier records, customer lists (both current and prospective), customer billing records, records of sales calls, manuals, books, files, records, engineering data, procedures, systems, instructions, drawings, blueprints, plans, designs, specifications, equipment lists, parts lists, equipment maintenance records, equipment warranty information, plant plans, specifications and drawings, sales and

advertising material, and computer software, and records relating to the System, whether stored on-site or off-site.

"**Final Order**" means a Governmental Approval by a Governmental Authority as to which (a) no request for stay of the action is pending, no such stay is in effect and if any time period is permitted by statute or regulation for filing any request for such stay, such time period has passed, (b) no petition for rehearing, reargument or reconsideration of the action is pending and the time for filing any such petition has passed, (c) such Governmental Authority does not have action under consideration on its own motion and (d) no appeal to a court or administrative tribunal or a request for stay by a court or administrative tribunal of the Government Authority's action is pending or in effect and the deadline for filing any such appeal or request for stay has passed.

"**Governmental Approval**" means any consent, approval, authorization, notice, filing, registration, submission, reporting, order, adjudication or similar item of, to or with any Governmental Authority.

"**Governmental Authority**" or "**Governmental Authorities**" means any court, department, commission, board, bureau, municipality, municipal authority (established pursuant to the Municipal Authorities Act of the Commonwealth of Pennsylvania), agency or instrumentality of the United States, any state, county, city or political subdivision thereof, or any foreign governmental body, including without limitation, the PaPUC, the EPA, PaDEP and the Township Board.

"**Hazardous Materials**" means any solid, liquid, gas, odor, heat, sound, vibration, radiation or other substance or emission which is a contaminant, pollutant, dangerous substance, toxic substance, hazardous waste, residual waste, solid waste, hazardous material or hazardous substance which is or becomes regulated by applicable Environmental Laws or which is classified as hazardous or toxic under applicable Environmental Laws (including gasoline, diesel fuel or other petroleum hydrocarbons, polychlorinated biphenyls, asbestos and urea formaldehyde foam insulation).

"**Indemnified Party**" means any Buyer Indemnified Persons or Seller Indemnified Persons, as applicable, entitled to indemnification pursuant to Article VIII.

"**Indemnifying Party**" means a Party which is obligated to indemnify the Buyer Indemnified Persons or the Seller Indemnified Persons, as applicable, pursuant to Article VIII.

"**Knowledge**" means either (i) the actual knowledge of a Representative of Buyer and the knowledge that each such person would reasonably be expected to obtain in the course of diligently performing his or her duties for Buyer or (ii) the actual knowledge of a Representative of Seller, the knowledge that each such person would reasonably be expected to obtain in the course of diligently performing his or her duties for Seller, as applicable based on the context in which the term is used.

"**Land Development Agreement / Financial Security Agreement**" means any agreement between Seller and an applicant for subdivision and/or land development approval pursuant to the Pennsylvania Municipalities Planning Code, pursuant to which applicant is required to construct

public improvements and required to post financial security, for the benefit of Seller, to secure applicant's obligations under such agreement.

"**Law**" means any applicable law, statute, regulation, ordinance, rule, order, judicial, administrative and regulatory decree, judgment, adjudication, consent decree, settlement agreement or governmental requirement enacted, promulgated, entered into, agreed or imposed by any Governmental Authority, as may be in effect at the relevant time or times in the context in which the term is used.

"**Liability Cap**" has the meaning specified in Section 8.05(c).

"**Lien**" means any lien in a fixed and ascertainable monetary sum, or any pledge, mortgage, deed of trust or security interest securing a fixed and ascertainable monetary sum, or any charge or claim in a fixed and ascertainable monetary sum. In addition, in connection with Real Property, any item otherwise falling within the definition of a "Lien" must be filed of record by the responsible Party in accordance with the terms of this Agreement.

"**Loss**" means any and all losses, liabilities, obligations, damages, penalties, interest, Taxes, claims, actions, demands, causes of action, judgments, reasonable attorneys', consultants' and other professional fees, and all other reasonable costs and expenses sustained or incurred in investigating, preparing or defending or otherwise incident to any such claim, action, demand, cause of action or judgment or the enforcement of a Party's rights under Article VIII; except that "**Losses**" shall not include punitive, incidental, consequential, special or indirect damages, including loss of future revenue or income, loss of business reputation or opportunity relating to the breach or alleged breach of this Agreement, or diminution of value or any damages based on any type of multiple, except in the case of fraud or to the extent actually awarded to a Governmental Authority or other third party in respect of a Third Party Claim.

"**Material Adverse Effect**" means any result, occurrence, fact, change, event or effect that has a materially adverse effect on the business, financial condition, physical condition or results of operations of the System, except that no effect arising out of or in connection with or resulting from any of the following is deemed, either alone or in combination, to constitute or contribute to a Material Adverse Effect: (i) general economic conditions or changes in those conditions; (ii) financial, banking, currency or capital markets fluctuations or conditions (either in the United States or any international market and including changes in interest rates); (iii) conditions affecting the real estate, financial services, construction, water utility or sewer utility industries generally; (iv) any existing event, circumstance, condition or occurrence of which Buyer has Knowledge as of the Effective Date; (v) any action, omission, change, effect, circumstance or condition contemplated by this Agreement or attributable to the execution, performance or announcement of this Agreement or the transactions contemplated hereby; and (vi) negligence, intentional misconduct or bad faith of Buyer or its Representatives.

"**Missing Easements**" means, as of any particular date, each material Easement that is for or used in connection with the operation of the System or to provide continuous and unimpeded rights of way for the Acquired Assets (including access thereto) that either (a) has not been obtained by Seller as of such date or (b) if such Easement has been obtained by Seller as of such date, and such Easement is not sufficient to operate the System as currently conducted.

"**MS4 System**" or **"Municipal Separate Storm Sewer System**" means the current and any future assets and facilities, built, operated or maintained, or real property ("**MS4 System Real Property**") and Stormwater System Assets owned by Seller and used for the purpose of capturing, conveying and discharging stormwater separate from the System.

"**Outside Date**" means 365 days after the date the application to the PaPUC is accepted as complete by the PaPUC and the statutory 6-month consideration period is initiated.

"**PaDEP**" means the Pennsylvania Department of Environmental Protection, or any successor Governmental Authority with substantially similar powers thereto.

"**PaPUC**" means the Pennsylvania Public Utility Commission, or any successor Governmental Authority with substantially similar powers thereto.

"**Party**" means Buyer or Seller and the term "Parties" means collectively Buyer and Seller.

"**PCB Equipment**" means PCB equipment as defined in 40 C.F.R. Part 761.

"**Pending Development Plan**" means any subdivision or land development plan that has been submitted to Seller for approval pursuant to the Pennsylvania Municipal Planning Code, as updated prior to Closing.

"**Permitted Liens**" means (a) Liens for Taxes not yet due and payable or being contested in good faith by appropriate procedures; (b) easements, rights of way, zoning ordinances and other similar encumbrances affecting Real Property and Easements as set forth on Schedule 4.09; (c) other than with respect to Real Property owned by Seller, Liens arising under original purchase price conditional sales contracts and equipment leases with third parties entered into in the ordinary course of business; and (d) other imperfections of title or Liens, if any, that have not had, and would not have, a Material Adverse Effect.

"**Person**" means any individual (including, the heirs, beneficiaries, executors, legal representatives or administrators thereof), corporation, partnership, joint venture, trust, limited liability company, limited partnership, joint stock company, unincorporated association or other entity or a Governmental Authority.

"**Plan**" has the meaning specified in Section 7.10(a).

"**Purchase Price**" has the meaning specified in Section 3.01.

"**Real Property**" means those certain parcels of land, with the buildings, improvements, and Equipment and Machinery thereon or therein, that are part of the System and fee simple title to which is to be conveyed by Seller to Buyer as part of the Acquired Assets.

"**Regulated Asbestos Containing Material**" means regulated asbestos containing material as defined by 40 C.F.R. § 61.141.

"**Release**" means any actual or threatened spilling, leaking, pumping, pouring, injecting, emptying, discharging, emitting, escaping, leaching, dumping, disposal, or release or migration of

Hazardous Materials into the Environment, including the abandonment or discarding of barrels, containers and other receptacles containing any Hazardous Materials.

"**Remedial Action**" means any and all actions to (a) investigate, clean up, remediate, remove, treat, contain or in any other way address any Hazardous Materials in the Environment, (b) prevent the Release or threat of Release or minimize the further Release of any Hazardous Materials so it does not migrate or endanger public health or welfare or the indoor or outdoor Environment, and (c) perform pre-remedial studies and investigations and post-remedial monitoring, maintenance and care. The term "**Remedial Action**" includes any action which constitutes (i) a "removal", "remedial action" or "response" as defined by Section 101 of CERCLA, 42 U.S.C. §§ 9601(23), (24), and (25); (ii) a "corrective action" as defined in RCRA, 42 U.S.C. § 6901 et seq.; or (iii) a "response" or "interim response" as defined in the Pennsylvania Hazardous Sites Cleanup Act, 35 P.S. §6020.103.

"**Representative**" means, with respect to any Person, any director, officer, employee, official, lender mortgagee, financier, provider of any financial instrument (or any agent or trustee acting on their behalf), partner, member, owner, agent, lawyer, accountant, auditor, professional advisor, consultant, engineer, contractor, other Person for whom such Person is at law responsible or other representative of such Person and any professional advisor, consultant or engineer designated by such Person as its "Representative."

"**Schedules**" means the disclosure schedules delivered by Seller and Buyer, respectively, concurrently with the execution and delivery of this Agreement, and as may be supplemented and updated pursuant to Sections 9.03 and 10.04. Any disclosure set forth on any particular Schedule is deemed disclosure in reference to all Schedules comprising the Schedules to which such disclosure is reasonably apparent.

"**Seller**" has the meaning specified in the Preamble of this Agreement.

"**Seller Fundamental Representations**" has the meaning specified in Section 8.01.

"**Seller Indemnified Persons**" has the meaning specified in Section 8.03.

"**Seller DEP Permits**" means the Water Quality Management Permits set forth on Schedule 4.12, each issued by PaDEP to Seller with respect to the System, including any revisions or amendments thereto. This definition shall not include any permit issued and related to the Stormwater System Assets.

"**Service Area**" has the meaning specified in the recitals to this Agreement.

"**Stormwater System Assets**" means all assets owned by Seller, and used exclusively in the operation or maintenance of the MS4 System, including (i) drains, pipes and collection basins and all other stormwater drainage assets used exclusively for stormwater collection, conveyance and discharge; (ii) catch basins, inlets, pipes and all other stormwater lateral facilities (the "**Stormwater Lateral Facilities**") that connect surface stormwater drains to storm conveyances which discharge to surface waters; (iii) interest in real estate directly associated with (i) and (ii); and (iv) any related permits.

"**Supplies**" means all lubricants, spare parts, fuel, chemicals, raw materials, and other supplies and inventory, and all rights to warranties received from suppliers with respect to the foregoing, and related claims, credits, and rights of recovery with respect thereto that are necessary to operate the System.

"**System**" has the meaning specified in the recitals to this Agreement and shall include the Acquired Assets and exclude the Excluded Assets.

"**Taxes**" means any federal, state, local or foreign income, gross receipts, license, payroll, employment, excise, severance, stamp, occupation, premium, windfall profits, environmental, customs duties, permit fees, capital stock, franchise, profits, withholding, social security, unemployment, disability, real property, personal property, parking, sales, use, transfer, registration, value added, alternative or add-on minimum, estimated or other tax, levy, impost, stamp tax, duty, fee, withholding or similar imposition of any kind payable, levied, collected, withheld or assessed at any time, including any interest, penalty or addition thereto, whether disputed or not.

"**Third Party Claim**" has the meaning specified in Section 8.05(a).

"**Threshold Amount**" has the meaning specified in Section 8.05(a).

"**Title Commitment**" has the meaning specified in Section 6.01.

"**Title Company**" has the meaning specified in Section 6.01.

"**Title Policy**" has the meaning specified in Section 2.03.

"**Township Board**" the meaning specified in the Preamble of this Agreement.

"**Township Senior Staff**" means the Township Manager, Assistant Manager, Superintendent of Public Works and the Township Engineer.

"**UCC Search**" has the meaning specified in Section 6.04.

"**Unscheduled Real Property**" has the meaning specified in Section 6.06.

"**Utility Valuation Expert**" means an expert that was approved by the PaPUC and is currently, at the time of this Agreement, on the list of approved appraisers maintained by the PaPUC.

ARTICLE II.

TERMS OF PURCHASE AND ASSUMPTION OF LIABILITIES

Section 2.01. Purchase and Sale of Acquired Assets.

Subject to the terms and conditions set forth in this Agreement, at Closing, Buyer shall purchase from Seller and Seller shall sell, transfer, assign and deliver to Buyer, free and clear of all Liens except for Permitted Liens, all of Seller's right, title and interest in and to all assets, facilities, business, goodwill, properties and rights of Seller of every kind and description, whether tangible or intangible, real, personal or mixed, wherever situated, in each case used in, held for use in, or acquired or developed for use in, the System, or otherwise related to, or arising out of the operation or conduct of the System (whether or not any such assets have any value for accounting purposes or are carried or reflected on the books or financial records of Seller), including any of the foregoing in which Seller is entitled to acquire rights in the future pursuant to Pending Development Plans (other than the rights of Seller pursuant to Section 2.02(d)) or development plans approved pursuant to this Agreement, but in all cases other than the Excluded Assets (collectively referred to as the "Acquired Assets"), including:

(a) all real property and appurtenant interests, rights of way used in, or necessary for, the operation of the System, including without limitation (i) good and marketable fee simple title to the Real Property set forth on Schedule 4.09, and (ii) all Easements, including without limitation those set forth on Schedule 4.09;

(b) all sanitary wastewater related treatment, collection and conveyance facilities, including all collection system mains (whether gravity or force mains), laterals (from the collection system main to the edge-of-road or curb-line when the main is located within a public right-of-way or the edge of an easement where the main is located within private property), pumping stations, generators, manholes, and other related appurtenances and any billing and collections related assets necessary to own and operate the System;

(c) all contracts, licenses, and leases to which Seller is a party or beneficiary or payee, including without limitation, all construction contracts, surety bonds, operation and maintenance agreements, management agreements, reserved capacity agreements, architect agreements and consultant agreements, and agreements relating to vehicles and other items of personal property as set forth on Schedule 4.13 (the "Assigned Contracts");

(d) all Supplies;

(e) all personal property and fixed assets, including all Equipment and Machinery, auxiliary equipment and plant equipment, including without limitation those items set forth on Schedule 4.10;

(f) all expenses prepaid by Seller and security deposits paid by Seller;

(g) all Files and Records;

(h) all Authorizations and Permits of or held by Seller (to the extent transferrable to Buyer under Law), including all Authorizations and Permits which are environmental permits, Seller DEP Permits other than those NPDES permits that relate to the Stormwater System Assets, other operating permits and those items set forth on Schedule 4.12; and

(i) all goodwill of the System.

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE SELLER MAKES NO EXPRESS OR IMPLIED REPRESENTATION OR WARRANTY REGARDING ANY REPRESENTATION REGARDING THE FUTURE PROFITABILITY OR FUTURE EARNINGS PERFORMANCE OF THE ACQUIRED ASSETS OR THE SYSTEM OR ANY FUTURE RATEMAKING THAT MAY BE ALLOWED BY THE PAPUC FOR ANY OF THE ACQUIRED ASSETS. NOTWITHSTANDING THE FOREGOING, ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE VALID UNTIL THE TIME OF CLOSING.

Section 2.02. Excluded Assets.

Notwithstanding anything herein to the contrary, the Acquired Assets shall not include the following (the "Excluded Assets"):

(a) the Stormwater System Assets, including any related NPDES permits;

(b) all contracts, licenses and leases that are not Assigned Contracts;

(c) the seals, organizational documents, minute books, tax returns, books of account or other records having to do with the organization of Seller;

(d) cash and cash equivalents, including (i) accounts receivable and amounts earned by Seller but not yet billed attributable to services rendered by Seller as of or before the Closing Date and (ii) EDU fees owed to Seller at or before the Closing Date for any Pending Development Plan but not yet paid to Seller;

(e) all insurance policies of Seller and all rights to applicable claims and proceeds thereunder;

(f) all rights to any outstanding lien related to non-payment by a System customer existing at or before the Closing Date and all actions, suits or claims of any nature available to or being pursued by Seller, whether arising by way of counterclaim or otherwise;

(g) all assets, properties and rights used by Seller other than those which primarily relate to the operations of the System;

(h) the assets, properties and rights specifically set forth on Schedule 2.02(h);

(i) the MS4 System Real Property;

(j) the rights which accrue or will accrue to Seller under this Agreement and any related agreement, exhibit or schedule; and

(k) all connecting facilities originating from Seller's terminus point of the collection facilities at the edge-of-road or curb-line when the facilities are located with a public right-of-way or the edge of an easement where the collection facilities are located within private property to and throughout the customer's property, including grinder pumps (the "Customer Sewer Laterals").

Section 2.03. Sale Free of Liens.

After Buyer fulfills its obligations pursuant to Section 3.01(a), on the Closing Date, the Acquired Assets will be free and clear of all Liens other than Permitted Liens. Seller shall convey the Acquired Assets by appropriate special warranty or other deed (subject to Section 6.02(c)), bills of sale, endorsements, assignments and other instruments of transfer or conveyance described herein, and if not expressly described herein, then by transfer documents satisfactory in form and substance reasonably acceptable to Buyer and Seller and their counsel in their reasonable, good faith discretion. At Closing, title to the Real Property shall be good and marketable and insured by the Title Company, at the Title Company's filed rates, as a good and marketable title, free and clear of all Liens and exceptions to coverage, except for the Permitted Liens, pursuant to an owner's policy of title insurance on the American Land Title Association's ("ALTA") Owner's Form 2006, subject to the terms of Section 6.02 (the "Title Policy").

Section 2.04. Assumption of Liabilities.

(a) On the terms and conditions set forth in this Agreement and excluding the Excluded Liabilities, Buyer shall assume and pay, perform and discharge when due any and all liabilities and obligations of Seller both (1) arising under Seller DEP Permits (arising from, related to, or based on events or circumstances occurring on or after the Closing Date), and (2) arising out of or relating to the System or the Acquired Assets on or after the Closing, including the following:

(i) all liabilities and obligations under the Assigned Contracts and Authorizations and Permits resulting from events that occur or conditions that arise on or after the Closing;

(ii) any litigation initiated against Seller related to the System or the Acquired Assets resulting from events that occur on or after Closing or conditions that arise on or after the Closing;

(iii) all liabilities and obligations for Taxes relating to the System, its operation, the Acquired Assets and the Assumed Liabilities attributable to the period after the Closing Date; and

(iv) all other liabilities and obligations arising out of or relating to Buyer's ownership or operation of the System and the Acquired Assets on or after the Closing (all of the aforementioned liabilities in this Section 2.04(a) are referred to as the "Assumed Liabilities").

(b) At the Closing, to the extent Seller is not released therefrom, Buyer shall indemnify Seller against any Loss relating to the Assumed Liabilities in accordance with Section 8.03.

(c) Buyer shall not assume or be liable to pay any liabilities or obligations relating to the Excluded Liabilities or any other liabilities or obligations that are not Assumed Liabilities.

Section 2.05. Further Assurances.

At any time and from time to time after the Closing Date, Seller shall, upon the request of Buyer, and Buyer shall, upon the request of Seller, at the cost of requesting Party, promptly execute, acknowledge and deliver, or cause to be executed, acknowledged and delivered, such other instruments of conveyance and transfer and other documents, and perform or cause to be performed such further acts, as may be reasonably required to evidence or effectuate, or more fully evidence or effectuate, (a) the sale, conveyance, transfer, assignment and delivery hereunder of the Acquired Assets to Buyer, (b) the assumption by Buyer of any of the Assumed Liabilities, (c) performance by the Parties of any of their other respective obligations under this Agreement, (d) the vesting in Buyer of all right, title and interest in the Acquired Assets and the System as specified in this Agreement, and (e) any other matters reasonably requested by a Party to carry out the provisions, purposes and intent of this Agreement.

Section 2.06. Certain Transfers; Assignment of Contracts.

(a) Notwithstanding anything to the contrary in this Agreement, and subject to the provisions of this Section 2.06(a) and Section 2.06(a), to the extent that the sale, transfer, assignment, conveyance and delivery, or attempted sale, transfer, assignment, conveyance and delivery, to Buyer of any Assigned Contract or other Acquired Asset would result in a violation of Law, or would require the consent, authorization, approval or waiver of any Person (other than the Parties), including any Governmental Authority, and such consent, authorization, approval or waiver shall not have been obtained before the Closing, this Agreement shall not constitute a sale, transfer, assignment, conveyance and delivery, or an attempted sale, transfer, assignment, conveyance and delivery, thereof (any such Acquired Asset, a "Nonassignable Asset"). Following the Closing, Seller and Buyer shall use its commercially reasonable efforts (at the cost and expense of the Party that is responsible for compliance with such Law or obtaining such consent, authorization, approval or waiver), and shall cooperate with each other, to obtain any such required consent, authorization, approval or waiver, or any release, substitution, novation or amendment required to sell, transfer, assign, convey and deliver any such Nonassignable Asset to Buyer and in no event will Buyer be required to pay any additional consideration therefor. Once such consent, authorization, approval, waiver, release, substitution or amendment is obtained, Seller shall sell, transfer, assign, convey and deliver to Buyer the relevant Acquired Asset to which such consent, authorization, approval, waiver, release, substitution or amendment relates for no additional consideration. Any applicable sales, transfer and other similar Taxes in connection with such sale, transfer, assignment, conveyance and delivery shall be paid one-half (50%) by Buyer and one-half (50%) by Seller.

(b) Until such time as a Nonassignable Asset is transferred to Buyer pursuant to this Article II, Buyer and Seller shall cooperate in any commercially reasonable and economically feasible arrangements (such as subleasing, sublicensing or subcontracting) to provide to the Parties

the economic and, to the extent permitted under Law, operational equivalent of the transfer of such Nonassignable Asset to Buyer at the Closing and the performance by Buyer of its obligations with respect thereto, and so long as Seller transfers and turns over all economic and beneficial rights with respect to each such Nonassignable Asset, Buyer shall, to the extent permitted under Law and the terms of any applicable contract that is a Nonassignable Asset, as agent or subcontractor for Seller, pay, perform and discharge the liabilities and obligations of Seller thereunder from and after the Closing Date, but only to the extent that such liabilities and obligations would be Assumed Liabilities if the applicable consent or approval had been obtained on or before the Closing Date and such Nonassignable Asset had been assigned to Buyer at Closing. To the extent permitted under Law, Seller shall hold in trust for and pay to Buyer promptly upon receipt thereof, such Nonassignable Asset and all income, proceeds and other monies received by Seller with respect to such Nonassignable Asset in connection with the arrangements under this Article II.

(c) If, following the Effective Date and before the Closing, Buyer identifies any contract to which Seller is a party which is not set forth on Schedule 4.13, and Buyer reasonably determines such contract is necessary or useful to the operation of the System, Buyer shall notify Seller of such determination and Seller shall, promptly following receipt of such notice, deliver to Buyer an updated Schedule 4.13 reflecting the addition of such contract, and such contract will be an "Assigned Contract" for all purposes hereunder.

(d) If during the twelve (12) month period following the Closing, Buyer or Seller identifies any contract to which Seller was a party as of the Closing and which (i) was not set forth on Schedule 4.13 (as may be updated pursuant to (c)) and (ii) Buyer reasonably believes is necessary or useful to the operation of the System, Seller shall, promptly following Buyer's written request therefor, execute, acknowledge and deliver, or cause to be executed, acknowledged and delivered, such other instruments of conveyance and transfer and other documents, and perform or cause to be performed such further acts, as may be reasonably required to evidence or effectuate, or more fully evidence or effectuate the assignment of such contract to Buyer for no additional consideration, and upon such assignment, such contract is deemed an Assigned Contract for all purposes hereunder.

ARTICLE III.

PURCHASE PRICE AND ADDITIONAL PURCHASE PRICE

Section 3.01. Purchase Price.

The purchase price for the Acquired Assets is Fifty Four Million Nine Hundred Thirty Thousand Dollars ($54,930,000) (the "Purchase Price") which Buyer shall pay as follows at Closing:

(a) Buyer shall pay, subject to any adjustment pursuant to Section 3.01(b) and any amounts required to be deposited into the escrow fund pursuant to Section 6.05(e), to Seller by wire transfer of immediately available funds the Purchase Price to one or more accounts that Seller designates and provides to Buyer at least three (3) Business Days before the Closing Date; and

(b) Final Billing: The Buyer is entitled to all customer billings with respect to sanitary wastewater customers' services for the period on or after the Closing Effective Time, and Seller is

entitled to all such billings for the period before the Closing Effective Time. The Parties shall cooperate to calculate an agreed upon proration of billing amounts and to the extent that either Party collects billings that are attributable to service provided by the other Party, the Party holding the other Party's billing collections shall pay such amount to the other Party.

(c) In addition to the Purchase Price, Buyer shall pay Seller up to Seventy Thousand Dollars ($70,000) as reimbursement for engineering and legal fees incurred related to this transaction to one or more accounts that Seller designates and provides to Buyer at least three (3) Business Days before the Closing Date. Seller shall provide Buyer with invoices evidencing the amount of transaction-related fees incurred at least five (5) Business Days before the Closing Date.

Section 3.02. Fair Consideration.

The consideration specified in this Article III represents fair consideration and reasonable equivalent value for the sale and transfer of the Acquired Assets and the transactions, covenants and agreements set forth in this Agreement, which consideration was agreed upon as the result of arm's-length good faith negotiations between the Parties and their respective Representatives.

Section 3.03. Transfer Taxes.

Any and all deed stamps or transfer Taxes which may be due the Commonwealth of Pennsylvania or any political subdivision in connection with the sale, transfer, assignment, conveyance and delivery hereunder of the Acquired Assets to Buyer (collectively, "Transfer Taxes"), shall be paid one-half (50%) by Buyer and one-half (50%) by Seller.

ARTICLE IV.

REPRESENTATIONS AND WARRANTIES OF SELLER

Seller makes only the representations and warranties which are set forth in this Article IV.

As a material inducement to Buyer to enter into this Agreement and to consummate the transactions contemplated by this Agreement, Seller represents and warrants, as of the Effective Date and as of the Closing Date (except to the extent any of the following representations and warranties specifically apply to or relate to another date, in which event such representations and warranties shall be true and correct as of such other date), as follows:

Section 4.01. Organization.

Seller is a body corporate and politic, organized and existing under the Second Class Township Code of the Commonwealth of Pennsylvania.

Section 4.02. Power and Authority.

Seller has (i) duly adopted an authorizing ordinance or resolution authorizing the transactions contemplated herein, which remains in full force and effect, (ii) duly authorized and approved the execution and delivery of this Agreement and (iii) duly authorized and approved the performance by Seller of its obligations contained in this Agreement. Seller has all requisite power

and authority to own, lease and operate the Acquired Assets and the System and has the power and authority to enter into this Agreement and to do all acts and things and execute and deliver all other documents as are required hereunder to be done, observed or performed by it in accordance with the terms of this Agreement.

Section 4.03. Enforceability.

This Agreement has been duly authorized, executed and delivered by Seller and is a valid and legally binding obligation of Seller, enforceable against Seller in accordance with the terms hereof, subject only to applicable bankruptcy, insolvency and similar laws affecting the enforceability of the rights of creditors generally and to general principles of equity.

Section 4.04. No Conflict or Violation.

The execution and delivery of this Agreement by Seller, the consummation of the transactions contemplated by this Agreement and the performance by Seller of the terms, conditions and provisions hereof has not and will not contravene or violate or result in a breach of (with or without the giving of notice or lapse of time, or both) or acceleration of any material obligations of Seller under (i) any Law or (ii) any agreement, instrument or document to which Seller is a party or by which it is bound.

Section 4.05. Consents and Approvals.

Schedule 4.05 sets forth a list of each consent, waiver, authorization or approval of any Governmental Authority, or of any other Person, and each declaration to or filing or registration with any Governmental Authority required in connection with the execution and delivery of this Agreement by Seller or the performance by Seller of its obligations hereunder.

Section 4.06. Undisclosed Liabilities

Except as set forth in Schedule 4.06, there are no liabilities or obligations of Seller, either accrued, absolute, contingent or otherwise, relating to the Acquired Assets, other than liabilities incurred in the ordinary course that could not reasonably be expected to have a Material Adverse Effect on Buyer.

Section 4.07. Absence of Certain Changes or Events.

Except as set forth on Schedule 4.07, since December 31, 2016, there has not been any transaction or occurrence that has resulted or is reasonably likely to result in a Material Adverse Effect and Seller has operated and maintained the System since that date in the ordinary course.

Section 4.08. Tax Matters.

Except as set forth in Schedule 4.08 or as would not have a Material Adverse Effect, (i) Seller has timely paid all Taxes that may have been or may be due and payable by Seller on or before the Closing Date, arising from the ownership or operation of the Acquired Assets or the System on or before the Closing Date (ii) no taxing authority has asserted any claim against the Seller for the assessment of any additional tax liability or initiated any action or proceeding which

could result in such an assertion; and (iii) the Seller has made all withholding of Taxes required to be made under all Laws and regulations, including without limitation, withholding with respect to compensation paid to employees, and the amounts withheld have been properly paid over to the appropriate taxing authorities.

Section 4.09. Real Property and Easements.

Schedule 4.09 sets forth all Real Property of Seller and separately identifies all Easements. Seller does not lease (as lessee) any real property that is used in the operation of the System. There are no pending condemnation proceedings relating to any of the Real Property or Easements nor has Seller actually received any written threats of any condemnation proceedings and, to the Knowledge of Seller, no such proceedings are threatened. Seller has not received any written notices of any violations of any Law from any Governmental Authority with respect to the Real Property or the Easements which has not been cured in all material respects and, to Seller's Knowledge, no such violations of Law exist. With respect to the Real Property, (i) there are no leases, options, rights of reversions or other rights of use or rights to acquire the Real Property held by third parties, (ii) Seller is in sole possession of the Real Property, and (iii) to Seller's Knowledge there are no encroachments either way across the boundary of the Real Property, nor any dispute with adjacent real property owners over the location of boundaries or potential claims adverse to title. With respect to each Easement, (i) there are no leases, options, rights of reversions or other rights of use or rights to acquire the Easement held by third parties, and (ii) to Seller's Knowledge there are no disputes with adjacent real property owners of the owners of the real property encumbered by the Easement over the location of boundaries or potential claims adverse to title.

Section 4.10. Equipment and Machinery.

All Equipment and Machinery included in the Acquired Assets is set forth on Schedule 4.10. Except as set forth in Schedule 4.10, Seller has good title, free and clear of all Liens (other than the Permitted Liens and Liens that will be released on or before Closing) to the Equipment and Machinery owned by Seller. Except as set forth on Schedule 4.10, all the Equipment and Machinery is owned by Seller, and none is leased or used under any conditional sales, title-retention, lease, license or similar arrangement.

Section 4.11. Environmental Compliance.

Except as set forth on Schedule 4.11, or that otherwise could not be expected to have a Material Adverse Effect:

(a) The System as currently operated by Seller and all operations and activities conducted by Seller with respect to the System are in compliance in all material respects with all applicable Environmental Requirements.

(b) Seller has generated, used, handled, treated, stored and disposed of all Hazardous Materials in (i) compliance in all material respects with all applicable Environmental Requirements and (ii) a manner that has not given, and could not reasonably be anticipated to give, rise to Environmental Liabilities.

(c) Seller has not received notice of any Environmental Claims related to the System that have not been fully and finally resolved, and to the Knowledge of Seller no claims of Environmental Liabilities have been threatened allegedly arising from or relating to the System that have not been fully and finally resolved.

(d) Hazardous Materials are not present at or on the System or Acquired Assets, there has been no Release of Hazardous Materials at, on or from any part of the System or the Acquired Assets, in each case in a manner that violates any Environmental Requirements or has resulted in, or could reasonably be anticipated to give rise to, Environmental Liabilities.

(e) No Lien or activity use limitation or institutional control has been recorded affecting any Acquired Assets by any Governmental Authority due to either the presence of any Hazardous Material on or off the Acquired Assets or a violation of any Environmental Requirement.

(f) There are no underground storage tanks on or at any of the Acquired Assets. Any underground storage tanks previously located at the Acquired Assets have been removed or otherwise closed, plugged and abandoned in compliance with applicable Environmental Requirements in effect at the time of such closure.

(g) No PCB Equipment is on or at any of the Acquired Assets. Any PCB Equipment that previously existed at the Acquired Assets has been flushed of polychlorinated byphenyls or has been removed and properly disposed of, in compliance with applicable Environmental Requirements, and any remaining PCB Equipment is labeled to the extent required under applicable Environmental Requirements and being managed in compliance with applicable Environmental Requirements.

(h) No Regulated Asbestos Containing Material exists in or on the Acquired Assets in an aggregate amount that would reasonably be expected to result in an Environmental Liability; and any Regulated Asbestos Containing Material is being managed in compliance with all applicable Environmental Requirements.

(i) Seller has delivered to Buyer (1) all material environmental site assessments or reasonable and accurate summaries thereof pertaining to the System, (2) all material compliance audits or compliance assurance reviews prepared within the previous five (5) years or reasonable and accurate summaries thereof relating to compliance with Environmental Requirements by the System, and (3) reasonable and accurate summaries of, or all material documents pertaining to, any known and unresolved Environmental Liabilities incurred in relation to the System, to the extent possessed by or under the reasonable control of Seller.

Section 4.12. Authorizations and Permits.

Schedule 4.12 sets forth the Authorizations and Permits of Seller that are currently in full force and effect; (ii) Seller has made true and complete copies of all Authorizations and Permits available to Buyer; and (iii) except as set forth on Schedule 4.12, Seller is in compliance with all terms, conditions and requirements of all Authorizations and Permits, except in each case where such violation or failure, individually or in the aggregate, would not have a Material Adverse

Effect, and no proceeding is pending or, to the Knowledge of Seller threatened relating to the revocation or limitation of any of the Authorizations or Permits, other than those revocations or limitations which do not individually or in the aggregate have a Material Adverse Effect.

Section 4.13. System Contracts.

(a) Schedule 4.13 sets forth a complete and accurate list of all the Assigned Contracts.

(b) Seller has made available to Buyer true and complete copies of all of the Assigned Contracts.

(c) All of the Assigned Contracts set forth on Schedule 4.13 are in full force and effect. Seller has not, nor to the Knowledge of Seller has any other party thereto, breached any material provision of or defaulted under the material terms of, nor does any condition exist which, with notice or lapse of time, or both, would cause Seller, or to the Knowledge of Seller, any other party, to be in default under any Assigned Contract.

Section 4.14. Compliance with Law; Litigation.

(a) Seller has operated and is operating the System in compliance, in all material respects, with all Laws, Authorizations and Permits and is not in breach of any Law, Authorization or Permit that would have a Material Adverse Effect on the operations of the System or on Buyer. There are no Authorizations or Permits from any Governmental Authority necessary for the operation of the System as currently being operated except for those Authorizations and Permits set forth on Schedule 4.12.

(b) Except at set forth on Schedule 4.14, there are no facts, circumstances, conditions or occurrences regarding the System that could reasonably be expected to give rise to any environmental claims or governmental enforcement actions that could reasonably be expected to have a Material Adverse Effect, and there are no past, pending or threatened environmental claims or governmental enforcement actions against Seller that individually or in the aggregate could reasonably be expected to have a Material Adverse Effect.

(c) Except at set forth on Schedule 4.14, no action, suit or proceeding, at law or in equity, or before or by any Governmental Authority, is pending nor, to the Knowledge of Seller, threatened against Seller before or at the time of Closing that could reasonably be expected to have a Material Adverse Effect on the operations of the System. As of the Effective Date, no action, suit or proceeding, at Law or in equity, or before or by any Governmental Authority, is pending nor, to the Knowledge of Seller, threatened against Seller which could materially affect the validity or enforceability of this Agreement.

Section 4.15. Broker's and Finder's Fees.

No broker, finder, or Person is entitled to any commission or finder's fee by reason of any agreement or action of Seller in connection with this Agreement or the transactions contemplated by this Agreement. Seller shall pay when due the fees and expenses of their financial and technical advisors. Seller has employed Public Financial Management, Inc., as municipal advisor to provide transaction structuring advice and to provide Seller with municipal advice relating to the sale of

the System. Seller shall pay all fees owed to Public Financial Management, Inc. in connection with the transactions contemplated by this Agreement.

Section 4.16. Title to the Acquired Assets; Sufficiency.

(a) Except as set forth on Schedule 4.16(a), Seller has good and marketable title to, all Real Property, and valid leasehold interest in or valid licenses or Easements to use and access, all of the Acquired Assets, free and clear of all Liens, other than Permitted Liens and Liens which will be fully and unconditionally released at or before Closing. The use of the Acquired Assets is not subject to any Liens, other than Permitted Liens, and such use does not encroach on the property or the rights of any Person.

(b) Except as set forth on Schedule 4.16(b), the Acquired Assets are sufficient for, and constitute all the assets, properties, business, goodwill and rights of every kind and description, and services required for, the continued conduct and operation of the System by Buyer in substantially the same manner as currently conducted and operated by Seller. Except for the Excluded Assets and except as set forth on Schedule 4.16(b), (i) the Acquired Assets, taken as a whole, comprise all the assets, properties, business, goodwill and rights of every kind and description used or held for use in, or useful or necessary to the operation of the System as currently operated by Seller, and (ii) there are no assets, properties, business, goodwill, rights or services used in the conduct or operation of the System that are owned by any Person other than Seller that will not be licensed or leased to Buyer under valid, current license arrangements or leases. None of the Excluded Assets are material to the System.

Section 4.17. Pending Development Plans.

Schedule 4.17 sets forth a full and complete list of all Pending Development Plans as of the Effective Date. Each Pending Development Plan, if consummated could result in the expansion of the Service Area. Seller provides no assurances whatsoever that any development or expansion of the Service Area associated with any Pending Development Plan will actually be undertaken or completed. The Parties expect that Schedule 4.17 will change from time to time between the Effective Date and Closing, and the Seller shall provide updates to Schedule 4.17 pursuant to Section 9.03.

Section 4.18. Land Development Agreements/Financial Security Agreements

Schedule 4.18 sets forth a list of all Land Development / Financial Security Agreements existing as of the Effective Date between Seller and any third party.

ARTICLE V. REPRESENTATIONS AND WARRANTIES OF BUYER

Buyer makes only the representations and warranties which are set forth in this Article V.

As a material inducement to Seller to enter into this Agreement and to consummate the transactions contemplated by this Agreement, Buyer represents and warrants to Seller, as of the Effective Date and as of the Closing Date (except to the extent any of the following representations and warranties specifically apply or relate to another date, in which event such representations and warranties shall be true and correct as of such other date), as follows:

Section 5.01. Organization.

Buyer is duly organized, validly existing and in good standing under the laws of the state of its organization.

Section 5.02. Authorization and Validity of Agreement.

Buyer has the power and authority to enter into this Agreement and to do all acts and things and execute and deliver all other documents as are required hereunder to be done, observed or performed by it in accordance with the terms of this Agreement. This Agreement has been duly authorized, executed and delivered by Buyer and is a valid and legally binding obligation of Buyer, enforceable against it in accordance with the terms hereof, subject only to applicable bankruptcy, insolvency and similar laws affecting the enforceability of the rights of creditors generally and to general principles of equity.

Section 5.03. No Conflict or Violation.

The execution and delivery of this Agreement by Buyer, the consummation of the transactions contemplated hereby and the performance by Buyer of the terms, conditions and provisions hereof has not and will not contravene or violate or result in a material breach of (with or without the giving of notice or lapse of time, or both) or acceleration of any material obligations of Buyer under (i) any Law, (ii) any material agreement, instrument or document to which Buyer is a party or by which it is bound or (iii) the articles, bylaws or governing documents of Buyer.

Section 5.04. Consents and Approvals.

Schedule 5.04 sets forth a list of each consent, waiver, authorization or approval of any Governmental Authority, or of any other Person, and each declaration to or filing or registration with any Governmental Authority required in connection with the execution and delivery of this Agreement by Buyer or the performance by Buyer of its obligations hereunder.

Section 5.05. Broker's and Finder's Fees.

No broker, finder or third party is entitled to any commission or finder's fee in connection with this Agreement or the transactions contemplated by this Agreement.

Section 5.06. Financial Wherewithal.

Upon Closing, and after giving effect to the consummation of the transactions contemplated hereby and the incurrence of any indebtedness in connection therewith, Buyer shall have the financial ability and will have sufficient working capital for its needs and anticipated needs to operate the System as a certificated public utility system regulated by the PaPUC, authorized, among things, to provide wastewater utility services to retail residential, commercial and industrial customers in the System.

Section 5.07. Sufficient Funds.

Buyer shall have sufficient funds available at Closing to consummate the transactions contemplated by this Agreement, to pay the Purchase Price in accordance with Article III and expenses related to the transactions contemplated by this Agreement, and on and after Closing, to generally provide ownership, operation and capital for the operations and capital needs of the System following the Closing, and assuring that the customers of the System will receive safe, adequate and reliable wastewater service equal to or better than such customers would have received without the transactions contemplated by this Agreement and at all times consistent with the provisions of the Pennsylvania Public Utility Code, 66 Pa. C. S. § 101 *et seq*, and Law.

Section 5.08. Independent Decision.

Except as expressly set forth in this Agreement, or any of the related agreements, Buyer acknowledges that (a) neither Seller nor any other Person has made any representation or warranty, express or implied, as to the accuracy or completeness of the System or information provided to Buyer, and (b) neither Seller nor any other Person shall have or be subject to any liability to Buyer or any other Person resulting from the distribution to Buyer, or Buyer use of, any information regarding the System or Acquired Assets that has been furnished or made available to Buyer and its Representatives.

Section 5.09. Scheduled Matters.

Buyer acknowledges that: (a) the inclusion of any matter on any Schedule shall not be deemed an admission by Seller that such listed matter is material or that such listed matter has or could have a material adverse effect or constitutes a material liability with respect to the Acquired Assets; (b) matters reflected in the Schedules are not necessarily limited to matters required by this Agreement to be reflected in such Schedules; and (c) such additional matters are set forth for informational purposes only and do not necessarily include other matters of a similar nature.

Section 5.10. Independent Investigation.

Buyer acknowledges that it has conducted an independent investigation of the financial condition, assets, liabilities, properties and projected capital needs and operations of the System in making its determination as to the propriety of the transaction contemplated by this Agreement and, in entering into this Agreement and related agreements, has relied solely on the results of its investigation and on the representations and warranties of Seller expressly contained in Article IV of this Agreement.

Section 5.11. Litigation.

Buyer is not in breach of any Law that could have a material adverse effect on the operations of the System or Buyer. Neither Buyer nor any Affiliate of Buyer is listed on any of the following lists maintained by the Office of Foreign Assets Control of the United States Department of the Treasury, the Bureau of Industry and Security of the United States Department of Commerce or their successors, or on any other list of Persons with which Seller may not do business under Law: the Specially Designated Nationals List, the Denied Persons List, the Unverified List, the

Entity List and the Debarred List. Except as set forth on Schedule 5.11, no action, suit or proceeding, at law or in equity, or before or by any Governmental Authority, is pending nor, to the Knowledge of Buyer, threatened against Buyer before or at the time of Closing, which will have a material adverse effect on (i) the transactions contemplated by this Agreement or (ii) the validity or enforceability of this Agreement.

ARTICLE VI.

TITLE TO REAL PROPERTY; EASEMENTS

Section 6.01. Evidence of Title.

Subject to Section 6.06, with respect to all Real Property, Buyer shall obtain at its sole cost and expense a commitment for a Title Policy (the "Title Commitment"), issued by a title insurance company selected by Buyer and licensed to insure title to real property by the Commonwealth of Pennsylvania (the "Title Company"). Promptly following the Effective Date, Buyer shall order the Title Commitment from the Title Company and shall provide Seller evidence of the order. Notwithstanding anything to the contrary in Section 6.02(a), a purported Objection Notice is void with respect to any parcel of Real Property if, within thirty (30) Business Days after the Effective Date, Buyer has not ordered the Title Commitment from the Title Company for such parcel of Real Property and provided Seller with evidence of the order.

Section 6.02. Objections to Title.

(a) Notice of Objections. Within thirty (30) Business Days of Buyer's receipt of the Title Commitment for any of the parcels of Real Property, Buyer shall deliver to Seller a true, correct and complete copy of the Title Commitment and true, correct, complete and legible copies of all exception documents listed in the Title Commitment, along with Buyer's notice to Seller of any exceptions to title set forth on Schedule B of the Title Commitment to which Buyer objects (the "Objection Notice"). The exceptions listed in the Title Objection Notice are referred to as the "Title Objection Items." None of the following are Title Objection Items: (a) Permitted Liens, (b) items that pertain to Buyer or any requirements, conditions or obligations of Buyer, (c) matters of record that are set forth in the Title Commitment and adversely restrict or prevent the use of the Real Property in the operation of the System and (d) standard Title Company exceptions (such as the "survey" exception). Any Objection Notice which does not include a true, correct and complete copy of the Title Commitment and true, correct, complete and legible copies of any and all exception documents listed in the Title Commitment is void. If Buyer provides Seller with an Objection Notice, Seller shall use its commercially reasonable efforts to have all of the Title Objection Items cured, satisfied or released of record, or bond over, by the Title Company ("Cure" or "Cured") before or as of the Closing. At or before the Closing, Seller shall deliver written evidence to Buyer, in form and substance reasonably satisfactory to Buyer and at Seller's cost and expense, evidencing that Seller has Cured all Title Objection Items.

(b) Liens. Without limiting Seller's obligations pursuant to Section 6.02(a), before or as of the Closing, Seller shall, at its sole cost and expense, Cure any Lien encumbering the Real Property which can be Cured by the payment of money (other than Permitted Liens).

(c) Title Endorsements/Survey. Buyer shall pay for any endorsements required by Buyer or any mortgagee of Buyer to the Title Policy. If any survey is required by Buyer or its mortgagee, either as a condition to any endorsement or otherwise, Buyer shall pay to obtain the survey and all related costs and expenses. If Buyer obtains a survey of any Real Property and wants the deed to contain the legal description based on a survey, if the same is not identical to the legal description contained in Seller's deed of record, Seller is not obligated to include the same in the deed to Buyer unless the survey is certified to Seller and such description is included in the deed on a "quitclaim" basis only and without warranty of title.

(d) License at Closing. Seller shall provide Buyer with a license agreement granting Buyer a license in all of Seller's rights to access Real Property in order to allow Buyer to operate and maintain the System until such time as Buyer is provided title to such Real Property as provided for in this Agreement. For the avoidance of doubt, Seller shall provide such title as soon as reasonably practicable in accordance with Section 6.01.

(e) Insurable Claims. To the extent any Claim for Losses under Article VIII is an Insurable Claim, Buyer shall assert and pursue with reasonable diligence the Insurable Claim against the Title Company (which includes commencing litigation and diligently prosecuting the Insurable Claim to judgment) before pursuing a Claim for Losses under Article VIII. Following a non-favorable judgment that substantially denies the relief sought by Buyer from the Title Company in connection with the Insurable Claim (each a "Non-Favorable Judgment"), Buyer may, following such Non-Favorable Judgment, pursue Seller with a Claim for Losses under Article VIII (any Claim against Seller following an attempted Insurable Claim against the Title Company is a "Residual Title Claim"). Notwithstanding anything to the contrary in Article VIII, Buyer must assert a Claim for Losses based upon a Residual Title Claim within sixty (60) day of the Non-Favorable Judgment. For purposes of this Section 6.02(d), an "Insurable Claim" means a Claim that: (i) arises out of Buyer's discovery of a title defect or encumbrance with respect to any of the Real Property following the Closing Date that materially restricts or prevents the use of such Real Property in the operation of the System; and (ii) is a claim against the Title Company under the Title Policy. Buyer acknowledges that any Claims that it could otherwise bring as a breach of a covenant of title under the special warranty deed to the Real Property is included within the Claim for Losses under Article VIII and is subject to the terms of this Section 6.02(d) of first pursuing the same as an Insurable Claim.

Section 6.03. Title Expenses.

Irrespective of whether Closing occurs, Buyer shall pay all costs and expenses for obtaining the Title Commitment, Title Policy and any survey. Seller shall pay for all expenses to release, satisfy or bond over any Liens, and to effect the Cure of any Title Objection Items that Seller undertakes to Cure, including the cost of any title endorsement to insure Buyer against any adverse effect of such Title Objection Items.

Section 6.04. UCC Search; Releases.

Not later than sixty (60) Business Days after the Effective Date, Buyer shall obtain at its sole cost and expense a Uniform Commercial Code search against Seller covering any of the personal property or fixtures included among the Acquired Assets from the Office of the Secretary

of the Commonwealth of Pennsylvania and the Recorder of Chester County, Pennsylvania (the "UCC Search"). On or before the Closing, Seller shall obtain at its sole cost and expense releases of any and all security interests in any of the Acquired Assets which are not Permitted Liens. Seller shall provide the form of the releases of any security interests to Buyer on or before the Closing Date.

Section 6.05. Easements.

(a) Promptly after the Effective Date and before the Closing, Seller shall, at its sole cost and expense, cause an abstractor selected by Seller and reasonably acceptable to Buyer and the Title Company (the "Abstractor") to perform a search of the public land records of Chester County, based on Seller's records and plans of the System (and such other sources of information as are reasonably related thereto), by means of searching the grantee index in the names of Seller and such other searches as the Abstractor may reasonably make, to (i) identify and provide Buyer with title information on all recorded Easements, and (ii) together with Seller, identify all Missing Easements. During this process, as the Abstractor provides written search results to Seller (including updated versions of the Abstractor search result chart), Seller will promptly provide the same to Buyer for its review, and Seller shall, or shall cause the Abstractor to, provide Buyer with periodic updates (which shall occur no less frequently than bi-weekly) on the status of the activities set forth in the previous sentence. Promptly after the Effective Date, Seller shall engage an engineer to develop a map of all collection pipes, services, pump stations, manholes of the System and identify each parcel within the Service Area that Seller's sanitary wastewater conveyance facilities encroaches upon private property for use in connection with the Abstractor's report to identify the Missing Easements.

(b) Notice of Objections. Within forty five (45) days of Buyer's receipt from the Seller (or the Abstractor or an engineer) of the information described in subsection 6.05(a), Buyer shall deliver to Seller written notice identifying the encumbrances on the Easements that, in Buyer's reasonable opinion, could materially and adversely restrict or prevent the use of the Easements in the operation of the System, (an "Easement Objection Notice"). Buyer shall not be permitted to include in its Easement Objection Notice any encumbrances that: (a) are Permitted Liens, (b) pertain to the Buyer or any requirements, conditions or obligations of the Buyer, or (c) are matters of record and set forth in the Abstractor's search results that do not, in Buyer's reasonable opinion, materially and adversely restrict or prevent the use of the Easements in the operation of the System (specifically including mortgages or other instruments securing indebtedness incurred by the owner of the land burdened by the Easement) (such exceptions objected to in the Objection Notice, the "Easement Objection Items." If Buyer provides the Seller with an Easement Objection Notice, the Seller shall use commercially reasonable efforts to have the Easement Objection Items Cured, prior to or as of the Closing. If Seller is unable to Cure any Easement Objection Item, Seller shall grant Buyer a license pursuant to Section 6.05(d) in all of Seller's rights necessary to access Easements and operate and maintain the System until such time as Buyer is provided title to such Easement as provided for in this Agreement.

(c) If during the process of Abstractor's review and investigation of the Chester County land records, Seller determines that there is a Missing Easement, Seller shall take any and all actions (including the use of its power of condemnation) to obtain any Missing Easements so that the same may be sold, assigned, transferred and conveyed to Buyer at the Closing pursuant to the terms and

conditions of this Agreement. All costs and expenses incurred in connection with obtaining each Missing Easement (including any payment to a landowner in connection with condemnation, in lieu of condemnation or otherwise) shall be paid by Seller and no additional consideration shall be payable by Buyer for any Missing Easement. If Seller has not obtained all Missing Easements by the date that is sixty (60) Business Days after the date that Abstractor has completed its review of the County land records and delivered the last results to Seller (the "Abstract Completion Date"), then, no later than thirty (30) Business Days after the Abstract Completion Date (but in any event no later than thirty (30) days before the Closing), Seller shall commence and file in the Court of Common Pleas, Chester County, a condemnation or eminent domain proceeding to obtain any and all such Missing Easements. For the purposes of clarity, upon obtaining each Missing Easement (including upon the final resolution of a condemnation proceeding), each Missing Easement that has been acquired or obtained by Seller will be considered an Easement.

(d) License at Closing. Seller shall provide Buyer with a license agreement granting Buyer a license in all of Seller's rights to access Easement in order to allow Buyer to operate and maintain the System until such time as Buyer is provided title to such Easement as provided for in this Agreement.

(e) Escrow at Closing for Missing Easements. For all of the Missing Easements listed on attached Schedule 6.05(e) as of the Closing Date, Seller will have additional time following the Closing Date to secure and assign and transfer the Missing Easements to Buyer. Seller shall diligently pursue and deliver the Missing Easements on or before the third (3rd) anniversary of the Closing Date, subject to any extension as permitted by Escrow Agreement, in the form attached as Exhibit C, that will require, among other things, the funding of an escrow account in the amount of Two Thousand Dollars ($2,000) per Missing Easements listed on attached Schedule 6.05(e) as of the Closing Date to secure the Seller's obligations under this Agreement and the Escrow Agreement.

Section 6.06. Unscheduled Property.

The Parties acknowledge that Seller may own interests in or have the legal right to use or occupy the Real Property and Easements that is necessary or essential to the operation of the System and that is not set forth on Schedule 4.09 (the "Unscheduled Real Property"). If the Parties discover before or after the Closing Date, one or more parcels of Unscheduled Real Property, the discovering Party shall notify the non-discovering Party of the discovery. In addition to its obligations in Section 2.03, Seller shall convey, assign or otherwise transfer any rights to each parcel of Unscheduled Real Property, without additional consideration payable by Buyer, in such a manner as to provide Buyer with reasonable assurances that Buyer may use or occupy the Unscheduled Real Property as it was used by Seller as of the Effective Date.

ARTICLE VII.

OTHER AGREEMENTS

Section 7.01. Taxes.

Seller shall pay any and all Taxes, if any, arising out of the ownership of the Acquired Assets and out of the operation of the System before the Closing.

Section 7.02. Cooperation on Tax Matters.

Seller shall furnish or cause to be furnished to Buyer, as promptly as practicable, whether before or after the Closing Date, such information and assistance relating to the System as is reasonably necessary for the preparation and filing by Buyer of any filings relating to any Tax matters.

Section 7.03. Rates.

(a) Rates. Buyer shall implement the Seller's sanitary wastewater base rates then in effect at Closing, as set forth on Schedule 7.03(a) (the "Base Rate") as Buyer's effective sanitary wastewater base rates, provided that the rates set forth on Schedule 7.03(a) (at Closing) shall not be lower than those in effect on the date the Effective Date. Buyer shall not propose to increase Base Rates until after the third anniversary of the Closing Date. Buyer intends to bill customers on a monthly basis instead of annual billing, which Buyer will prorate accordingly. At and after the Closing, Buyer shall charge and collect its then-existing miscellaneous fees and charges and apply its then-existing rules and regulations for wastewater service in the Buyer's tariff (or rules and regulations), as amended from time to time, within the Service Area.

(c) PaPUC Approval. The Buyer shall include the rate provisions of Sections 7.03(a) in its requested PaPUC Governmental Approval.

Section 7.04. Buyer Taxpayer.

From and after the Closing Date, Buyer acknowledges that, upon conveyance of the Acquired Assets to Buyer, Buyer will be subject to, among other Taxes, real estate Taxes, which Buyer shall pay when due.

Section 7.05. PaPUC Approval.

(a) Promptly after the Effective Date, Buyer shall timely initiate and faithfully prosecute the necessary proceedings to obtain from the PaPUC (i) the issuance of certificates of public convenience to Buyer to provide wastewater services in the Service Area and (ii) the approval of the acquisition of the System by Buyer under terms and conditions that are reasonably acceptable to Seller and Buyer. Seller shall cooperate with and assist Buyer in proceedings before the PaPUC.

(b) Buyer and Seller hereby agree that the procedures for determining fair market value of the System and Acquired Assets outlined in subsection (a) of Section 1329 of Title 66 of the

Pennsylvania Consolidated Statutes ("Section 1329") shall be utilized and filed with the PaPUC as contemplated by Section 1329.

(c) The fees and expenses related to engaging the licensed engineer for such Section 1329 determination shall be paid one-half (50%) by Buyer and one-half (50%) by Seller.

(d) Buyer, in Buyer's first base rate proceeding with respect to the System following the Closing, shall propose the use of statutory and regulatory mechanisms available to benefit the Buyer's acquired customers for ratemaking purposes.

Section 7.06. Remedies for Breach of Article VII Agreements.

If Buyer breaches any of the covenants and agreements set forth in this Article VII following Closing, in addition to all other rights and remedies available at law or in equity, including specific performance and/or injunctive relief, Seller may commence proceedings before the PaPUC seeking enforcement of such covenants and agreements.

Section 7.07. Operation and Maintenance of the MS4 System.

Subject to Law, Seller, shall at all times maintain ownership of its MS4 System and Stormwater System Assets. Seller will maintain any NPDES permits related to the Stormwater System Assets.

Section 7.08. Utility Valuation Experts.

Buyer and Seller shall each be responsible for the costs associated with their respective Utility Valuation Expert for the preparation and completion of their respective Utility Valuation Expert's appraisal report and any additional work by their respective Utility Valuation Expert necessary to assist in the processing and prosecution of the application to the PaPUC in regard to this transaction under Section 1329.

Section 7.09. EDU Allocations.

In connection with EDU allocations, Buyer shall at all times act in compliance with Seller's ordinances, including those with respect to zoning and land use, the Seller's Act 537 plan and the Seller's comprehensive plans.

Section 7.10 Act 537 Plan.

(a) Buyer acknowledges that Seller previously drafted and committed to an Act 537 Plan under the Pennsylvania Sewage Facilities Act (the original plan established in 1995, together with all subsequent amendments, the "Plan"), which has been made available to Buyer and which may be amended pursuant to Section 12.08 hereunder. Buyer understands that the Plan contains obligations and commitments, as more fully set forth in the Plan to complete certain improvements and upgrades to the System (the "System Improvements"). Buyer shall accept and complete all of the System Improvements as Seller agreed to complete under the Plan.

(b) Buyer acknowledges the Seller has jurisdiction over sewage facilities planning and sewer service through the Plan and its Act 537 planning program, zoning, subdivision and land development ordinances and comprehensive land use planning policies. Buyer and Seller shall cooperate with respect to current and future sewage facilities planning and sewer service consistent with the provisions of this Section 7.10.

(c) Subject to PaPUC approval of the Service Area as specified in Section 7.10, Buyer shall extend sewer lines and provide sewage collection and treatment services to properties within the Service Area in a manner consistent with the Plan and the Buyer's Tariff. Pursuant to Section 12.08, Seller will confer with Buyer concerning any amendment to the Plan that would affect the provision of sewage collection and treatment services within the Service Area. Seller will not propose or adopt any amendment to the Plan that would reduce the Service Area or divert wastewater flows generated from properties located within the Service Area from being served by the System without the approval of Buyer.

(d) Buyer will not request, pursue, or implement expansions of the System within the Seller's border beyond the current Service Area (that would trigger a Plan amendment) without the prior written approval of Seller and the PaDEP. Seller shall promptly notify and confer with Buyer, and consider Buyer's comments, concerning any proposed Plan amendment (including any sewage facilities planning module) that would involve the provision of sewage collection and treatment services by the System to area or properties outside of the Service Area. With respect to any such potential Plan amendment, Seller and Buyer shall cooperate in evaluating alternatives for provision of sewage services to such areas consistent with the requirements of 25 Pa Code Ch. 71, including consideration of the technical feasibility, economic feasibility and cost effectiveness, consistency with the objectives and policies of plans and requirements of 25 Pa. Code Ch. 71.21(a)(5), consistency with municipal land use plans and ordinances, subdivision ordinances and other ordinances and plans for controlling land use and development, technically and administratively able to be implemented, and other factors required under Act 537 or under Buyer's Tariff.

(e) If Seller and Buyer each determine that the provision of sewage collection and treatment services by the System to certain areas or properties outside of the Service Area is technically feasible, economically feasible and cost effective, and meets all of the requirements set forth in Act 537 and 25 Pa. Code Ch. 71, the Seller shall amend the Plan to include such identified areas and properties in the Service Area. If Seller amends the Plan pursuant to this subsection and such amendment is approved by PaDEP, (i) Buyer shall request that the modified Service Area be approved by PaPUC; and (ii) subject to PaPUC approval of the inclusion of such modified Service Area, Buyer shall extend sewer lines and provide sewage collection services to properties within such Service Area in a manner consistent with the Plan and Buyer's Tariff.

Section 7.11 Compliance and Operational Reports.

After the Effective Date and through the Closing Date, Seller shall provide Buyer with a periodic report to the person designated by Buyer, disclosing any and all material compliance or operational deficiencies that occurred during the previous month.

Section 7.12 Required Sewer Projects / Malvern Hunt System.

(a) Subject to extensions set forth in subsection (b) below, on or prior to the later to occur of: (i) the first anniversary of the Closing Date; or (ii) first anniversary following the date on which Seller secures and assigns to Buyer: all permits required from any Governmental Authority having jurisdiction over the Required Sewer Projects or the completion thereof; and all easements or other property rights required to complete the Required Sewer Projects, Buyer shall complete the sewer projects set forth on Schedule 7.12 (the "Required Sewer Projects") and a map of the expanded Service Area anticipated to result from the Required Sewer Projects as set forth on Schedule 7.12. Each Required Sewer project is deemed complete only upon notice of Seller's reasonable satisfaction of completion. After the Closing Date and through the completion date of each Required Sewer Project, Buyer shall provide Seller with a periodic report to the person designated by Seller, with an update and status report regarding each Required Sewer Project.

(b) The one (1) year deadline set forth in subsection (a) above shall be extended for any delays resulting from the discovery of concealed subsurface conditions, including but not limited to, the presence of rock or infrastructure of other utilities requiring relocation.

(c) Seller shall be responsible for all work to decommission the Excluded Assets specified on Schedule 2.02(h) (the "Malvern Hunt System") and for constructing all gravity and / or force main piping systems required to divert sewage flow into the existing collection system included with the Acquired Assets, all in compliance with applicable Laws. The decommissioning work conducted by Seller shall include upgrade of existing pumping systems if needed. Seller shall be responsible for post-decommissioning water quality sampling of existing groundwater monitoring wells as well as preparation of a final closure report to PA DEP if required by DEP.

Section 7.13 Governance Matters.

Effective on the Closing Date, Seller shall:

(i) provide Buyer with all financial information and other reports or communications received by Seller from the Valley Forge Sewer Authority within two (2) Business Days of receipt of such information by Seller from the Valley Forge Sewer Authority; and

(ii) appoint, as Seller representative, the person identified by Buyer to the joint board pursuant to the Valley Forge Sewage Treatment Plant Agreement and any successor to any subsequent term.

ARTICLE VIII.

INDEMNIFICATION

Section 8.01. Survival.

All representations and warranties contained in this Agreement shall survive until twelve (12) months following the Closing Date, except that (a) the representations and warranties of Seller set forth in Section 4.01 (Organization), Section 4.02 (Power and Authority), Section 4.03 (Enforceability) and Section 4.15 (Brokers' and Finders' Fees) (collectively, the "Seller

Fundamental Representations") shall survive the Closing indefinitely or until the latest date permitted by Law, and (b) the representations and warranties of Buyer set forth in Section 5.01 (Organization), Section 5.02 (Authorization and Validity of Agreement), and Section 5.05 (Brokers' and Finders' Fees) (collectively, the "Buyer Fundamental Representations") shall survive the Closing indefinitely or until the latest date permitted by Law. The covenants and agreements of the Parties contained in this Agreement survive the Closing indefinitely or for the shorter period explicitly specified therein, except that for those covenants and agreements that survive for a shorter period, breaches thereof survive indefinitely or until the latest date permitted by Law. Notwithstanding the preceding sentences, (x) any breach of representation, warranty, covenant or agreement in respect of which indemnity may be sought under this Agreement shall survive the time at which it would otherwise terminate pursuant to the preceding sentences, if notice of the inaccuracy or breach thereof giving rise to such right of indemnity shall have been given to the Party against whom such indemnity may be sought before such time, and (y) nothing contained in this Section 8.01 shall limit in any way any rights a Party may have to bring claims grounded in fraud, intentional misrepresentation or willful misconduct, which rights shall survive the Closing indefinitely.

Section 8.02. Indemnification by Seller.

To the maximum extent permitted by Law and subject to the terms and conditions of this Article VIII, Seller shall indemnify, defend and hold harmless, Buyer and its successors and Affiliates and their respective employees, officers, directors, trustees and agents (the "Buyer Indemnified Persons"), from and against any and all claims for Losses arising from or relating to: (a) any misrepresentation as to, or any material inaccuracy in, any of the representations and warranties of Seller contained in this Agreement or in any exhibit, schedule, certificate or other instrument or document furnished or to be furnished by Seller before the Closing pursuant to this Agreement (without regard to any materiality, Material Adverse Effect or related qualifications in the relevant representation or warranty (except where such provision requires disclosure of lists of items of a material nature or above a specified threshold)); (b) any breach or nonfulfillment of any of the covenants or agreements of Seller contained in this Agreement or in any exhibit, schedule, certificate or other instrument or document furnished or to be furnished by Seller before the Closing pursuant to this Agreement; or (c) any Excluded Liability or Excluded Asset.

Section 8.03. Indemnification by Buyer.

To the maximum extent permitted by Law and subject to the terms and conditions of this Article VIII, Buyer shall defend, indemnify and hold harmless Seller and its successors and Affiliates and each of their respective employees, officers, directors and agents (the "Seller Indemnified Persons") from and against any and all claims for Losses arising from or relating to: (a) any material misrepresentation as to, or any material inaccuracy in, any of the representations and warranties of Buyer contained in this Agreement or in any exhibit, schedule, certificate or other instrument or document furnished or to be furnished by Buyer pursuant to this Agreement; (b) any material breach of any of the covenants or agreements of Buyer contained in this Agreement or in any exhibit, schedule certificate or other instrument or document furnished or to be furnished by Buyer pursuant to this Agreement; (c) any Assumed Liability as and when payment and performance is due, including without limitation any liability related to any claims by any Governmental Authority; (d) Buyer's actions involving Environmental Laws, Hazardous

Materials or environmental claims from and after the Closing Date; or (e) the ownership, operation or control of the Acquired Assets or the System from and after the Closing Date.

Section 8.04. Indemnification Procedure.

(a) Third Party Claims. If any Indemnified Party receives notice of the assertion or commencement of any action, suit, claim or other legal proceeding made or brought by any Person who is not a Party or an Affiliate of a Party or a Representative of a Party (a "Third Party Claim") against such Indemnified Party with respect to which the Indemnifying Party may be obligated to provide indemnification under this Agreement, the Indemnified Party shall promptly notify the Indemnifying Party thereof. The failure to give such prompt notice shall not, however, relieve the Indemnifying Party of its indemnification obligations, except and only to the extent that the Indemnifying Party forfeits material rights or material defenses by reason of such failure. Such notice by the Indemnified Party shall describe the Third Party Claim in reasonable detail and shall indicate the estimated amount, if reasonably practicable, of the Loss that has been or may be sustained by the Indemnified Party. The Indemnifying Party may participate in, or by giving notice to the Indemnified Party (and subject to the other requirements herein) to assume the defense of any Third Party Claim at the Indemnifying Party's expense and by the Indemnifying Party's own counsel (which counsel shall be reasonably acceptable to the Indemnified Party), so long as (i) the Indemnifying Party notifies the Indemnified Party, within ten (10) Business Days after the Indemnified Party has given notice of the Third Party Claim to the Indemnifying Party (or by such earlier date as may be necessary under applicable procedural rules in order to file a timely appearance and response) that the Indemnifying Party is assuming the defense of such Third Party Claim, and if the Indemnifying Party assumes control of such defense it must first agree and acknowledge in such notice that the Indemnifying Party is fully responsible (with no reservation of any rights other than the right to be subrogated to the rights of the Indemnified Party) for all Losses relating to such Third Party Claim, (ii) the Indemnifying Party conducts the defense of the Third Party Claim actively and diligently and at its own cost and expense, and (iii) the Third Party Claim (A) does not involve injunctive relief, specific performance or other similar equitable relief, any claim in respect of Taxes, any Governmental Authority, any criminal allegations, or any potential damage to the goodwill, reputation or overriding commercial interests of Buyer or its Affiliates, (B) is not one in which the Indemnifying Party is also a party and joint representation would be inappropriate or there may be legal defenses available to the Indemnified Party which are different from or additional to those available to the Indemnifying Party, or (C) does not involve a claim which, upon petition by the Indemnified Party, the appropriate court rules that the Indemnifying Party failed or is failing to vigorously prosecute or defend. The Indemnified Party shall reasonably cooperate in good faith in such defense. If the Indemnifying Party assumes the defense of any Third Party Claim, subject to Section 8.04(b), it may take such action as it deems necessary to avoid, dispute, defend, appeal or make counterclaims pertaining to any such Third Party Claim in the name and on behalf of the Indemnified Party. The Indemnified Party may, at its own cost and expense, participate in the defense of any Third Party Claim with counsel selected by it subject to the Indemnifying Party's right to control the defense thereof. If the Indemnifying Party elects not to compromise or defend such Third Party Claim or fails to promptly notify the Indemnified Party in writing of its election to defend as specified in this Agreement, the Indemnified Party may, subject to Section 8.04(b), pay, compromise, and defend such Third Party Claim and seek indemnification for any and all Losses based upon, arising from or relating to such

Third Party Claim. Seller and Buyer shall reasonably and in good faith cooperate with each other in all reasonable respects in connection with the defense of any Third Party Claim, including making available records relating to such Third Party Claim and furnishing, without expense (other than reimbursement of actual out-of-pocket expenses) to the defending party or management employees of the non-defending party as may be reasonably necessary for the preparation of the defense of such Third Party Claim.

(b) Settlement of Third Party Claims. Notwithstanding any other provision of this Agreement, the Indemnifying Party shall not enter into settlement of any Third Party Claim without the prior written consent of the Indemnified Party (which consent shall not be unreasonably withheld or delayed), except as specified in this Section 8.04(b). If a firm offer is made to settle a Third Party Claim without leading to liability or the creation of a financial or other obligation on the part of the Indemnified Party and provides, in customary form, for the unconditional release of each Indemnified Party from all liabilities and obligations in connection with such Third Party Claim and the Indemnifying Party desires to accept and agree to such offer, the Indemnifying Party shall promptly notify the Indemnified Party. If the Indemnified Party fails to consent to such firm offer within fifteen (15) days after its receipt of such notice, the Indemnified Party may continue to contest or defend such Third Party Claim and in such event, the maximum liability of the Indemnifying Party as to such Third Party Claim shall not exceed the amount of such settlement offer. If the Indemnified Party fails to consent to such firm offer and also fails to assume defense of such Third Party Claim, the Indemnifying Party may settle the Third Party Claim upon the terms set forth in such firm offer to settle such Third Party Claim. If the Indemnified Party has assumed the defense pursuant to Section 8.04(a), it shall not agree to any settlement without the written consent of the Indemnifying Party (which consent shall not be unreasonably withheld or delayed).

(c) Direct Claims. Any claim by an Indemnified Party with respect to any Loss which does not arise or result from a Third Party Claim (a "Direct Claim") shall be asserted by the Indemnified Party giving the Indemnifying Party prompt notice thereof. The failure to give such prompt notice shall not, however, relieve the Indemnifying Party of its indemnification obligations, except and only to the extent that the Indemnifying Party forfeits material rights or material defenses by reason of such failure. Such notice by the Indemnified Party shall describe the Direct Claim in reasonable detail and shall indicate the estimated amount, if reasonably practicable, of the Losses that have been or may be sustained by the Indemnified Party. The Indemnifying Party shall have thirty (30) days after its receipt of such notice to respond in writing to such Direct Claim. During such thirty (30) day period, the Indemnified Party shall reasonably cooperate and assist the Indemnifying Party in determining the validity and amount of such Direct Claim. If the Indemnifying Party does not so respond within such thirty (30) day period, by delivery of notice disputing the basis or amount of the Direct Claim, the Indemnifying Party shall be deemed to have rejected such claim, in which case the Indemnified Party shall be free to pursue such remedies as may be available to the Indemnified Party on the terms and subject to the provisions of this Agreement. If the Indemnifying Party has timely disputed its indemnity obligation for any Losses with respect to such Direct Claim, the Parties shall proceed in good faith to negotiate a resolution of such dispute and, if not resolved through negotiations, such dispute may be resolved by litigation in an appropriate court of jurisdiction determined pursuant to this Agreement.

Section 8.05. Limitations on Indemnification Obligations.

(a) Subject to the other limitations contained in this Section 8.05, neither Buyer nor Buyer Indemnified Persons shall seek indemnification pursuant to Section 8.02(a) (other than for an intentional breach of any agreement or covenant contained in this Agreement or for breach of Seller's Fundamental Representations) unless the aggregate amount of Losses incurred by Buyer and Buyer Indemnified Persons under this Agreement exceeds one (1) percent of the Purchase Price in the aggregate (the "Threshold Amount"), in which case Seller will then be liable only for Losses in excess of the Threshold Amount, except that the limitations contained in this Section 8.05(a) shall not apply to any claims for indemnification based on fraud, intentional misrepresentation or willful misconduct.

(b) Subject to the other limitations contained in this Section 8.05 neither Seller nor the Seller Indemnified Persons shall seek indemnification pursuant to Section 8.03(a) (other than for an intentional breach of any agreement or covenant contained in this Agreement) unless the aggregate amount of Losses incurred by Seller and Seller Indemnified Persons under this Agreement exceeds the Threshold Amount, in which case Buyer will then be liable only for Losses in excess of the Threshold Amount, except that the limitations contained in this Section 8.05(a) shall not apply to any claims for indemnification based on fraud, intentional misrepresentation or willful misconduct.

(c) Except in the case of fraud, intentional misrepresentation or willful misconduct (for which all applicable legal and equitable remedies will be available to Buyer), the Buyer Indemnified Parties shall only be entitled to assert claims under Section 8.02(a) (other than claims with respect to breaches of any of the Seller Fundamental Representations, which shall not be limited by this Section 8.05(c)) up to the aggregate amount of 5% of Purchase Price (the "Liability Cap"), which shall represent the sole and exclusive remedy of Buyer and the other Buyer Indemnified Parties for any such claims under Section 8.02(a) (other than claims with respect to breaches of any of the Seller Fundamental Representations or in the case of fraud, intentional misrepresentation or willful misconduct which shall not be subject to the Liability Cap, but shall be capped at the Purchase Price).

(d) Payments by an Indemnifying Party pursuant to Section 8.02 or Section 8.03 in respect of any Loss shall be limited to the amount of any liability or damage that remains after deducting therefrom any insurance proceeds and any indemnity, contribution or other similar payment received or reasonably expected to be received by the Indemnified Party in respect of any such claim. The Indemnified Party shall use its commercially reasonable efforts to recover under insurance policies or indemnity, contribution or other similar agreements for any Losses before seeking indemnification under this Agreement.

(e) Payments by an Indemnifying Party pursuant to Section 8.02 or Section 8.03 in respect of any Loss shall be reduced by an amount equal to any Tax benefit realized or reasonably expected to be realized as a result of such Loss by the Indemnified Party.

(f) Each Indemnified Party shall take, and cause its Affiliates to take, all reasonable steps to mitigate any Loss upon becoming aware of any event or circumstance that would be

reasonably expected to, or does, give rise thereto, including incurring costs only to the minimum extent necessary to remedy the breach that gives rise to such Loss.

(g) Subject to the provisions of Sections 3.01, 7.06, 15.11 and any other provisions for equitable relief and/or specific performance, the Parties' sole and exclusive remedy with respect to any and all claims for any breach of any representation, warranty, covenant, agreement or obligation set forth herein or otherwise relating to the subject matter of this Agreement, shall be pursuant to the indemnification provisions set forth in this Article VIII. Each Party hereby waives, to the fullest extent permitted under Law, any and all rights, claims and causes of action for any breach of any representation, warranty, covenant, agreement or obligation set forth herein or otherwise relating to the subject matter of this Agreement it may have against the other Party and their Affiliates and each of their respective Representatives arising under or based upon any Law, except pursuant to the indemnification provisions set forth in this Article VIII. Nothing in this Section 8.05(g) shall limit any Party's right to seek and obtain any equitable relief and/or specific performance pursuant to this Agreement.

Section 8.06. Knowledge of Breach.

Neither Party shall be liable for any Losses based upon or arising out of any inaccuracy in or breach of any representations or warranties of such Party contained in this Agreement if the Party claiming such Losses had Knowledge of such inaccuracy or breach before the Closing.

ARTICLE IX.

PRE-CLOSING COVENANTS OF SELLER

Section 9.01. Operation of the System.

Except as otherwise expressly permitted by this Agreement, as required by Law or with the prior written consent of Buyer (which consent shall not be unreasonably withheld, delayed or conditioned), from the Effective Date until the Closing, Seller shall (i) operate and manage the System only in the ordinary course of business in accordance with past practices and procedures, (ii) collect accounts receivable and pay accounts payable in the ordinary course and in a manner consistent with its past practices, (iii) comply in all material respects with all Laws and Authorizations and Permits, (iv) use its commercially reasonable efforts to maintain and preserve intact the business and assets of the System and preserve the rights, franchises, goodwill and relationships of Seller and the System and its customers, lenders, suppliers, regulators, and others having business relationships with Seller and the System, (iv) continue to collect EDU Fees, and sewer rents in a manner consistent with past practice, without discounting such EDU Fees, and sewer rents, (v) perform all of its obligations under all Assigned Contracts, and (vi) not take any action, or omit to take any action, that would cause to occur a fact, circumstance, condition or occurrence regarding the System or any of the Acquired Assets that could reasonably be expected to have a Material Adverse Effect.

Section 9.02. Cooperation.

Seller shall reasonably cooperate with Buyer and its employees, attorneys, accountants and other agents and, generally, act in reasonably good faith to timely effectuate the purposes of this Agreement and the consummation of the transactions contemplated by this Agreement.

Section 9.03. Supplements and Updates.

Seller shall promptly deliver to Buyer any supplemental information and reports updating the information set forth in the representations and warranties set forth in Article IV of this Agreement so that such representations and warranties as supplemented by such information will be true and correct as of the Closing Date (or such other date as specified in such representations and warranties) as if then made. Within ten (10) Business Days of having Knowledge of the same, but in no event later than three (3) Business Days before the Closing Date, Seller shall promptly advise Buyer of any facts which would be a breach of a representation or warranty as of the date made or a default in a covenant contained herein.

Section 9.04. Consents and Approvals.

Promptly after the Effective Date, or as required by Law, except as otherwise expressly specified in this Agreement, Seller shall file all applications and reports that are required to be filed by Seller with any Governmental Authority necessary to undertake and consummate the transactions contemplated in this Agreement as set forth on Schedule 4.05. Seller shall also promptly provide all information that any Governmental Authority may require in connection with any such application or report. Seller shall use its commercially reasonable efforts to obtain each consent, waiver, authorization or approval of any kind from any Person in connection with the transactions contemplated by this Agreement. All authorizations of any Governmental Authority necessary to consummate the transactions contemplated by this Agreement will be in form and content reasonably satisfactory to Buyer and Seller before Closing and shall be final and non-appealable. If a party to the PaPUC proceeding appeals PaPUC authorization of the transaction, Buyer and Seller may mutually agree to proceed to consummate the transaction.

Section 9.05. Pending Development Plan Agreements / Future Developments.

Seller shall enforce all of its rights and the counterparties' obligations under any agreements relating to Pending Development Plans in existence as of the Effective Date, which shall not be amended without notice to and the consent of Buyer, which consent shall not be unreasonably withheld and Buyer shall provide such consent to Seller within fifteen (15) days of notice from Seller or this consent requirement is deemed waived by Buyer after such date. After the Effective Date, Seller shall not enter into any new agreements (including Land Development Agreements and Financial Security Agreements) with landowners regarding the construction of any sewer facilities which, upon completion of construction, will be transferred to Buyer pursuant to Section 2.01 without notice to and the consent of Buyer, which consent shall not be unreasonably withheld and Buyer shall provide such consent to Seller within seven (7) days of notice from Seller or this consent requirement is deemed waived by Buyer after such date. For the avoidance of doubt, any attempt by Buyer to withhold consent for entry into any amendment or new agreement by Seller pursuant to this Section 9.05 that is, in the opinion of Seller's solicitor, required pursuant

to the Pennsylvania Municipal Planning Code is deemed unreasonable. Prior to Closing, Seller shall complete the dedication of all Acquired Assets.

ARTICLE X.

PRE-CLOSING COVENANTS OF BUYER

Section 10.01. Actions Before the Closing Date.

Buyer shall not take any action which shall cause it to be in breach of any representation, warranty, covenant or agreement contained in this Agreement or cause it to be unable to perform in any material respect its obligations hereunder, and Buyer shall use its commercially reasonable efforts (subject to any conditions set forth in this Agreement) to perform and satisfy all conditions to Closing to be performed or satisfied by Buyer under this Agreement, including action necessary to obtain all consents and approvals from any Person required to be obtained by Buyer to effect the transactions contemplated by this Agreement.

Section 10.02. Governmental Approvals.

Promptly after the execution of this Agreement, or as required by Law, except as otherwise expressly specified in this Agreement, Buyer shall file all applications and reports that are required to be filed by Buyer with any Governmental Authority as set forth on Schedule 5.04. Buyer shall also promptly provide all information that any Governmental Authority may reasonably require in connection with any such application or report.

Section 10.03. Cooperation.

Buyer shall reasonably cooperate with Seller and their employees, attorneys, accountants and other agents and, generally, do such other acts and things in good faith as may be reasonable to timely effectuate the purposes of this Agreement and the consummation of the transactions contemplated in accordance with the provisions of this Agreement.

Section 10.04. Supplements and Updates.

Buyer shall promptly deliver to Seller any supplemental information updating the information set forth in the representations and warranties set forth in Article V of this Agreement so that such representations and warranties as supplemented by such information will be true and correct as of the Closing Date (or such other date as specified in such representations and warranties) as if then made. At least three (3) Business Days before the Closing Date, Buyer shall advise Seller of any facts which would be a breach of a representation or warranty as of the date made or a default in a covenant contained herein.

ARTICLE XI.

CONDITIONS PRECEDENT TO OBLIGATIONS OF SELLER

The obligation of Seller to consummate the transactions provided for in this Agreement is subject to the satisfaction, at or before the Closing, of the following conditions, any one or more of which may be waived in writing by Seller in its sole discretion:

Section 11.01. Consents and Approvals.

Receipt of all required material, consents, waiver, authorizations or approvals of any Governmental Authority, or of any other Person and any other approvals necessary to consummate the transactions contemplated by this Agreement set forth in Schedule 5.04, including without limitation all required EPA and PaDEP approvals and all such Authorizations and Permits and Governmental Approvals must be final (and not subject to any appeal and any applicable appeal period having expired).

Section 11.02. Representations and Warranties of Buyer.

The representations and warranties made by Buyer in Article V which are (a) not qualified by materiality must be true and correct in all material respects on and as of the Closing Date (except for representations or warranties that speak of a specific date or time other than the Closing Date which must be true and correct in all material respects as of such specified date) and (b) qualified by materiality must be true and correct in all respects on and as of the Closing Date (except for representations or warranties that speak of a specific date or time other than the Closing Date which must be true and correct in all respects as of such specified date), and Seller must have received a certificate to that effect from a duly authorized officer of Buyer dated as of the Closing Date.

Section 11.03. PaPUC Approval.

PaPUC must have issued a Final Order approving the acquisition of the System under terms and conditions that are reasonably acceptable to Seller and Buyer. If a party to the PaPUC proceeding appeals or files a petition for reconsideration of PaPUC authorization of the transaction, Buyer and Seller may mutually agree to proceed to consummate the transaction.

Section 11.04. No Injunctions.

Neither Seller nor Buyer are subject to any injunction, preliminary restraining order or other similar decree of a court of competent jurisdiction prohibiting the consummation of the transactions contemplated by this Agreement.

Section 11.05. Performance of the Obligations of Buyer.

Buyer must have performed in all material respects all obligations required under this Agreement to be performed by Buyer on or before the Closing Date, and Seller must have received a certificate to that effect from Buyer dated the Closing Date.

Section 11.06. Deliveries by Buyer.

Buyer must have made delivery to Seller of the documents and items specified in Section 13.03 herein.

Section 11.07. No Material Adverse Effect.

There must not have occurred any event or condition which gives rise to a Material Adverse Effect with respect to the Acquired Assets or the System.

ARTICLE XII.

CONDITIONS PRECEDENT TO OBLIGATIONS OF BUYER

The obligation of Buyer to consummate the transactions provided for in this Agreement is subject to the satisfaction, at or before the Closing, of the following conditions, any one or more of which may be waived in writing by Buyer in its sole discretion:

Section 12.01. Consents and Approvals.

Receipt of all required material, consents, waivers, authorizations or approvals of any Governmental Authority, or of any other Person and any other approvals necessary to consummate the transactions contemplated by this Agreement set forth in Schedule 4.05, including without limitation all required EPA and PaDEP approvals and all such Authorizations and Permits and Governmental Approvals must be final (and not subject to any appeal and any applicable appeal period having expired).

Section 12.02. Representations and Warranties of Seller.

The representations and warranties made by Seller in Article IV this Agreement (disregarding all "materiality" and "Material Adverse Effect" or similar qualifications contained therein) must be true and correct on and as of the Closing Date (except for representations and warranties expressly stated to relate to a specific date, in which case each such representation and warranty must be true and correct as of such earlier date), with only such exceptions as would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect, and Buyer must have received a certificate to that effect from Seller dated as of the Closing Date.

Section 12.03. PaPUC Approval.

PaPUC must have issued a Final Order approving the acquisition of the System under terms and conditions that are reasonably acceptable to Seller and Buyer. If a party to the PaPUC proceeding appeals PaPUC authorization of the transaction, Buyer and Seller may mutually agree to proceed to consummate the transaction.

Section 12.04. No Injunctions.

Neither Seller nor Buyer are subject to any injunction, preliminary restraining order or other similar decree of a court of competent jurisdiction prohibiting the consummation of the transactions contemplated by this Agreement.

Section 12.05. No Material Adverse Effect.

There must not have occurred any event or condition which gives rise to a Material Adverse Effect with respect to the Acquired Assets or the System.

Section 12.06. Deliveries by Seller.

Seller must have made delivery to Buyer of the documents and items specified in Section 13.02 herein.

Section 12.07. Performance of the Obligations of Seller.

Seller must have performed in all material respects all obligations required under this Agreement to be performed by Seller on or before the Closing Date, and Buyer must have received a certificate to that effect from Seller dated the Closing Date.

Section 12.08. Act 537 Plan.

The Seller must have obtained PaDEP approval of all Act 537 Plan revisions or updates (i) required by PaDEP in order to allow acquisition of the System by Buyer or (ii) otherwise required to address other outstanding deficiencies with respect to existing Act 537 Plan, upon terms and conditions satisfactory to Buyer in its reasonable discretion. Notwithstanding the previous sentence, Buyer shall be responsible for the costs of preparing and submitting any necessary revisions to the Act 537 Plan required to allow acquisition of the System by Buyer. Seller and Buyer shall cooperate regarding the Act 537 Plan submission and PaDEP approval process.

ARTICLE XIII.

CLOSING

Section 13.01. Closing Date.

The Closing shall take place at the offices of Hamburg, Rubin, Mullin, Maxwell and Lupin, PC (375 Morris Rd, Lansdale, PA 19446) at 10:00 a.m. Eastern Standard Time on the earliest agreed upon date or within twenty (20) Business Days after the date upon which all the conditions precedent to Closing described in this Agreement have been fulfilled or waived and Buyer and Seller receive the last of the required consents, waivers, authorizations and approvals from the Governmental Authorities, in each case, for the transactions contemplated by this Agreement, or at such other place and time, by such other method, or on such other date, as may be mutually agreed to by the Parties (the "Closing Date"). The Closing will be effective at 12:01 a.m., East Whiteland Township, PA time, on the Closing Date (the "Closing Effective Time").

Section 13.02. Deliveries by Seller.

At the Closing, Seller shall deliver or cause to be delivered to Buyer executed copies of the following agreements, documents and other items:

(a) A Bill of Sale transferring all of the Acquired Assets comprising personal property, in the form attached as Exhibit A;

(b) Possession of the Acquired Assets, including without limitation, the Real Property, the Easements and an interest in the Missing Easements, including a license from Seller to Buyer;

(c) A duly executed counterpart to an Assignment and Assumption Agreement with respect to the Assumed Liabilities (the "Assignment and Assumption Agreement"), in the form attached as Exhibit B;

(d) The consents to transfer all of the Assigned Contracts and Authorizations and Permits (including environmental Authorizations and Permits), to the extent required hereunder;

(e) One or more special warranty or other deeds in recordable form reasonably acceptable to Buyer transferring fee simple title of Real Property;

(f) Copies or originals of all Files and Records, materials, documents and records in possession of Seller relating to the Real Property or the Assigned Contracts;

(g) Certificate of Seller pursuant to Section 12.02 of this Agreement;

(h) Certificate of Seller pursuant to Section 12.07 of this Agreement;

(i) Any documents duly executed by Seller required by the Title Company to issue final owner's title policies in accordance with the provisions of Article VI;

(j) A duly executed counterpart to the Escrow Agreement; and

(k) All such other instruments of conveyance or other documents as shall, in the reasonable opinion of Buyer and its counsel, be necessary to transfer to Buyer the Acquired Assets in accordance with this Agreement or to carry out the terms of this Agreement, duly executed and acknowledged by Seller, if necessary, and in a recordable form.

Section 13.03. Deliveries by Buyer.

At the Closing, Buyer shall deliver or caused to be delivered to Seller the following agreements, documents and other items:

(a) Payment in full of the Purchase Price;

(b) A duly executed counterpart to the Assignment and Assumption Agreement;

(c) Certificate of Buyer pursuant to Section 11.02 of this Agreement;

(d) Certificate of Buyer pursuant to Section 11.05 of this Agreement;

(e) Evidence of PaPUC approval as specified in Section 12.03;

(f) A duly executed counterpart to the Escrow Agreement; and

(g) All such other instruments of assumption as shall, in the reasonable opinion of Seller and its counsel, be necessary for Buyer to assume the Assumed Liabilities in accordance with this Agreement.

ARTICLE XIV.

TERMINATION

Section 14.01. Events of Termination.

This Agreement may be terminated and abandoned at any time before the Closing:

(a) By the mutual consent of Seller and Buyer;

(b) By either Seller or Buyer, upon notice, if:

(i) the Closing does not occur on or before the Outside Date, except Buyer has the one-time right, upon notice to Seller, to extend the Outside Date for up to ninety (90) days if, in the Buyer's sole discretion, any such amount of time up to ninety (90) days is necessary to obtain a required Governmental Approval; or

(ii) any Governmental Authority issues an order, decree or ruling or taken any other action, in each case permanently restraining, enjoining or otherwise prohibiting the material transactions contemplated by this Agreement and such order, decree, ruling or other action becomes final and non-appealable;

(c) By Seller (if Seller is not then in material breach of any provision of this Agreement) if a material breach of any covenant or agreement to be performed or complied with by Buyer pursuant to the terms of this Agreement or of any representation or warranty of Buyer contained in this Agreement, which breach (i) has continued without cure for a period of sixty (60) days following notice thereof by Seller to Buyer or if such breach cannot be cured and (ii) would result in a condition to Closing set forth in Article XI of this Agreement not being satisfied (which condition has not been waived by Seller in writing); or

(d) By Buyer (if Buyer is not then in material breach of any provision of this Agreement) if a material breach of any covenant or agreement to be performed or complied with by Seller pursuant to the terms of this Agreement or of any representation or warranty of Seller contained in this Agreement, which breach (i) has continued without cure for a period of sixty (60) days following notice thereof by Buyer to Seller or if such breach cannot be cured and (ii) would result in a condition to Closing set forth in Article XII of this Agreement not being satisfied (which condition has not been waived by Buyer in writing).

This Agreement may not be terminated after the Closing.

Section 14.02. Effect of Termination.

If this Agreement is terminated by Seller or Buyer pursuant to Section 14.01, notice thereof will be given promptly to the other and all further obligations of the Parties terminate without further action by either Party and without liability or other obligation of either Party to the other Party hereunder, except that no Party will be released from liability hereunder if this Agreement is terminated and the transactions abandoned by reason of any willful breach of this Agreement.

Section 14.03. Damages for Willful Breach.

If this Agreement is terminated as a result of willful breach by either Party as described in Section 14.02, the Party who willfully breached the Agreement is liable for Losses incurred by the non-breaching Party as a result of the breach in accordance with Article VIII.

ARTICLE XV.

MISCELLANEOUS

Section 15.01. Confidentiality.

Except as and to the extent required by Law (including but not limited to the Pennsylvania Right-To-Know Act at 65 Pa § 67.101) or pursuant to an order of a court of competent jurisdiction and as required hereunder to obtain any and all required Governmental Approvals, neither Party shall, directly or indirectly, disclose or use (and no Party shall permit its Representatives to disclose or use) any Confidential Information with respect to the other Party furnished, or to be furnished, by such other Party or its Affiliates or Representatives to the other Party or its Affiliates or Representatives in connection herewith at any time or in any manner other than in connection with the completion of the transactions contemplated by this Agreement and related transactions.

Section 15.02. Public Announcements.

Subject to Law or listing rules of an exchange on which Buyer's parent corporation's stock is listed, and except as otherwise set forth herein, the initial public announcement relating to the transactions contemplated herein will be mutually agreed upon and jointly made by the Parties. Subsequent public announcements related to the sale of the System by one Party shall be provided to the other Party as soon as reasonably practicable before issuance.

Section 15.03. Notices.

All notices, other communications and approvals required or permitted by this Agreement shall be in writing, shall state specifically that they are being given pursuant to this Agreement and shall be addressed as follows:

in the case of Seller:

East Whiteland Township

209 Conestoga Road
Frazer, PA 19355
Attention: Manager

with a copy to:

Hamburg, Rubin, Mullin, Maxwell and Lupin, PC
375 Morris Rd
Lansdale, PA 19446
Attention: Joseph J. McGrory, Jr., Solicitor

in the case of Buyer:

Aqua Pennsylvania Wastewater, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010
Attention: Marc A. Lucca, President
malucca@aquaamerica.com

with a copy to:

Aqua Pennsylvania Wastewater, Inc.
762 W. Lancaster Avenue
Bryn Mawr, PA 19010
Attention: Frances Orth, Esq., Vice President, Senior Managing Counsel
fporth@aquaamerica.com

or such other persons or addresses as a Party may from time to time designate by notice to the other Party. A notice, other communication or approval is deemed to have been sent and received (i) on the day it is delivered, or if such day is not a Business Day or if the notice is received after ordinary office hours (time or place of receipt), the notice, other communication or approval is deemed to have been sent and received on the next Business Day, or (ii) on the fourth Business Day after mailing if sent by United States registered or certified mail.

Section 15.04. Headings.

The article, section and paragraph headings in this Agreement are for reference purposes only and do not affect the meaning or interpretation of this Agreement.

Section 15.05. Severability.

If any term, provision, covenant or restriction contained in this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remainder of the terms, provisions, covenants and restrictions contained in this Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

Section 15.06. Entire Agreement.

This Agreement is the entire agreement between the Parties pertaining to the subject matter hereof and supersedes all prior agreements, negotiations, discussions and understandings, written or oral, between the Parties. There are no representations, warranties, conditions or other agreements, whether direct or collateral, or express or implied, that form part of or affect this Agreement, or that induced any Party to enter into this Agreement or on which reliance is placed by any Party, except as specifically set forth in this Agreement. The Parties acknowledge and agree that (i) each has substantial business experience and is fully acquainted with the provisions of this Agreement, (ii) the provisions and language of this Agreement have been fully negotiated and (iii) no provision of this Agreement shall be construed in favor of any Party or against any Party by reason of such provision of this Agreement having been drafted on behalf of one Party rather than the other Party.

Section 15.07. Amendments; Waivers.

The Parties may amend this Agreement only by the Parties' written agreement that identifies itself as an amendment to this Agreement. Any waiver of, or consent to depart from, the requirements of any provision of this Agreement will be effective only if it is in writing and signed by the Party giving it, and only in the specific instance and for the specific purpose for which it has been given. No failure on the part of any Party to exercise, and no delay in exercising, any right under this Agreement will operate as a waiver of such right. No single or partial exercise of any such right will preclude any other or further exercise of such right or the exercise of any other right.

Section 15.08. Parties in Interest; Third Party Beneficiary.

This Agreement is not intended to and shall not be construed to create upon any Person other than the Parties any rights or remedies hereunder.

Section 15.09. Anti-Assignment; Successors and Assigns.

Neither Party to this Agreement may assign any right or delegate any performance under this Agreement without the prior written consent of the other Party. A purported assignment or purported delegation without prior written consent is void. This agreement is binding upon, and inures to the benefit of, the Parties and their permitted respective successors and assigns.

Section 15.10. Governing Law; Jurisdiction.

The laws of the Commonwealth of Pennsylvania (without giving effect to its conflicts of law principles) govern all matters arising and relating to this Agreement, including torts. The Parties irrevocably agree and consent to the jurisdiction of the United States District Court for the Eastern District of Pennsylvania and the Court of Common Pleas of Chester County, Pennsylvania, for the adjudication of any matters arising under or in connection with this Agreement. Any action initiated in court shall be filed and litigated (including all discovery proceedings) exclusively in the United States District Court for the Eastern District of Pennsylvania and the Court of Common Pleas of Chester County, Pennsylvania, and each Party irrevocably submits to the exclusive

jurisdiction of such courts in any such suit, action or proceeding. Service of process, summons, notice or other document by mail to such Party's address set forth herein shall be effective service of process for any suit, action or other proceeding brought in any such court. EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT OR THE OTHER TRANSACTION DOCUMENTS IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE OTHER TRANSACTION DOCUMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY. EACH PARTY TO THIS AGREEMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION.

Section 15.11. Specific Performance.

Irreparable damage would occur if any provision of this Agreement were not performed in accordance with the terms hereof and that the Parties may seek specific performance of the terms hereof, in addition to any other remedy to which they are entitled at law or in equity if the other Party has performed in accordance with the terms hereof.

Section 15.12. Counterparts; Electronic Mail; Facsimile Execution.

This Agreement may be executed in any number of counterparts which, taken together, is one and the same agreement. This Agreement becomes effective when it has been executed by each Party and delivered to both Parties. To evidence the fact that it has executed this Agreement, a Party may send a copy of its executed counterpart to the other Party by electronic mail or facsimile transmission. Such Party is deemed to have executed and delivered this Agreement on the date it sent such electronic mail or facsimile transmission. In such event, such Party shall forthwith deliver to the other Party an original counterpart of this Agreement executed by such Party.

ASSET PURCHASE AGREEMENT

By and Between

Township of East Whiteland, Chester County,

As Seller

and

Aqua Pennsylvania Wastewater, Inc. As Buyer

SCHEDULES AND EXHIBITS

Capitalized terms used in the Schedules which are not otherwise defined herein shall have the respective meanings ascribed to such terms in the Agreement. The Schedules are to be read in their entirety. Nothing in the Schedules is intended to broaden the scope of any representation or warranty in the Agreement. The disclosure of any item, explanation, exception or qualification in any Schedule is disclosure of that item for all purposes for which disclosure is required under the Agreement when it is reasonably apparent from the context that such item, explanation, exception or qualification also relates to another Schedule irrespective of whether any cross reference is made or no Schedule is provided with respect to a representation. Other than as expressly set forth herein or when the Schedules reference agreements or other matters not documented in a separate writing, all descriptions of agreements, written materials or other matters appearing herein, are summary in nature and are qualified by reference to the complete documents, which have been supplied to the Buyer or its counsel.

Exhibit A

BILL OF SALE

THIS BILL OF SALE is made as of this ____ day of _____, 202_, by and between **TOWNSHIP OF EAST WHITELAND, CHESTER COUNTY** (the "Seller") and **AQUA PENNSYLVANIA WASTEWATER, INC.** (the "Buyer," and, together with Seller, each a "Party" and collectively, the "Parties").

B A C K G R O U N D:

A. Seller and Buyer have entered into that certain Asset Purchase Agreement dated as of January 8, 2021 (the "Purchase Agreement"), pursuant to which Seller has agreed, among other things, to sell, transfer, convey, assign and deliver to Buyer and Buyer has agreed to purchase from Seller the Acquired Assets, including, without limitation, all of its personal property and fixed assets including equipment, machinery, vehicles, auxiliary equipment and plant equipment, as more thoroughly described on Exhibit "A" attached hereto and incorporated herein by reference (collectively, the "Personal Property").

B. Seller desires hereunder to transfer and assign to Buyer the Personal Property pursuant to the Purchase Agreement and Buyer desires to accept the sale, transfer, conveyance, assignment and delivery thereof.

C. All capitalized terms not defined herein shall have the meaning ascribed to such term in the Purchase Agreement.

NOW, THEREFORE, in consideration of the mutual covenants contained in the Purchase Agreement and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound hereby, the Parties hereto agree as follows:

1. Transfer and Assignment. Seller hereby sells, transfers, assigns, delivers and conveys to Buyer, its successors and assigns, all of Seller's right, title and interest in, to and under the Personal Property.

2. Acceptance of Transfer and Assignment. Buyer hereby accepts the transfer, conveyance, assignment and delivery of the Personal Property.

3. Absolute Transfer. It is the intention of Seller to transfer absolute title of the Personal Property to Buyer.

4. Counterparts; Facsimile Signatures. This Agreement may be executed in any number of counterparts which, taken together, shall constitute one and the same agreement. This Agreement shall be effective when it has been executed by each Party and delivered to both Parties. To evidence the fact that it has executed this Agreement, a Party may send a copy of its executed counterpart to the other Party by facsimile transmission. Such Party shall be deemed to have executed and delivered this Agreement on the date it sent such facsimile transmission. In such event, such Party shall forthwith deliver to the other Party an original counterpart of this Agreement executed by such Party.

5. Governing Law; Jurisdiction. This Agreement shall be construed and enforced in accordance with, and governed by, the laws of the Commonwealth of Pennsylvania (without giving effect to the principles of conflicts of laws thereof). The Parties hereto irrevocably agree and consent to the jurisdiction of the United States District Court for the Eastern District of Pennsylvania and the Court of Common Pleas of Chester County, Pennsylvania, for the adjudication of any matters arising under or in connection with this Agreement. Any action initiated in court shall be filed and litigated (including all discovery proceedings) exclusively in the United States District Court for the Eastern District of Pennsylvania and the Court of Common Pleas of Chester County, Pennsylvania, and each party irrevocably submits to the exclusive jurisdiction of such courts in any such suit, action or proceeding. Service of process, summons, notice or other document by mail to such Party's address set forth herein shall be effective service of process for any suit, action or other proceeding brought in any such court. EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS AGREEMENT OR THE OTHER TRANSACTION DOCUMENTS IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE OTHER TRANSACTION DOCUMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY. EACH PARTY TO THIS AGREEMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION.

6. Binding Effect. This Bill of Sale shall be binding upon and inure to the benefit of Seller and Buyer and their respective successors and assigns.

7. Further Assurances. Each Party hereto covenants and agrees, at its own expense, to take such further action and execute and deliver such further instruments of conveyance and transfer

and of assumption as may be reasonably requested by the other Party to carry out the provisions and purpose of this Agreement.

[Remainder of Page Intentionally Blank; Signature Page Immediately Follows]

IN WITNESS WHEREOF, the undersigned have caused this Bill of Sale to be duly executed on the day and year first above written.

EXHIBIT A

Personal Property

All of Seller's right, title and interest in and to all assets, facilities, business, goodwill, properties and rights of Seller of every kind and description, whether tangible or intangible, real, personal or mixed, wherever situated, in each case used in, held for use in, or acquired or developed for use in, the System (capitalized terms contained herein not otherwise defined within this document shall have the meanings assigned to them in the Purchase Agreement, unless the context shall otherwise require), or otherwise related to, or arising out of the operation or conduct of the System (whether or not any such assets have any value for accounting purposes or are carried or reflected on the books or financial records of Seller), including any of the foregoing in which Seller is entitled to acquire rights in the future pursuant to Pending Development Plans (other than the rights of Seller pursuant to Section 2.02(d)) of the Purchase Agreement or development plans approved pursuant to this Agreement, but in all cases other than the Excluded Assets (the foregoing collectively referred to as the "Acquired Assets"), including:

(a) all sanitary wastewater related pumping and conveyance facilities, including but not limited to all collection system pipes, pumping stations, hoists, generators, manholes and pipelines and any billing and collections related assets necessary to run the System;

(b) all Supplies;

(c) all personal property and fixed assets, including all Equipment and Machinery, auxiliary equipment and plant equipment, including without limitation those items listed on Schedule 4.10 of the Purchase Agreement; and

(d) all Files and Records.

Exhibit B

ASSIGNMENT AND ASSUMPTION AGREEMENT

THIS ASSIGNMENT AND ASSUMPTION AGREEMENT (this "Assignment") is entered into effective as of this _____ day of June, 202__, by and between **TOWNSHIP OF EAST WHITELAND, CHESTER COUNTY**, a Pennsylvania municipality (the "Assignor") and **AQUA PENNSYLVANIA WASTEWATER, INC.**, a Pennsylvania corporation (the "Assignee," and, together with Assignor, each a "Party" and collectively, the "Parties").

A. Assignor, as Seller, and Assignee, as Buyer, are parties to that certain Asset Purchase Agreement dated as of January 8, 2021 (the "Purchase Agreement"), pursuant to which Assignor has agreed, among other things, to sell, transfer, convey, assign and deliver to Assignee and Assignee has agreed to purchase from Assignor the Acquired Assets.

B. Sections 2.01, 2.04, 13.02 and 13.03 of the Purchase Agreement contemplate that at Closing, Assignor will assign to Assignee and Assignee will accept and assume, all of Assignor's right, title and interest in to any and all Assigned Contracts and Authorizations and Permits and, including, without limitation, all of the assets more thoroughly described on Exhibit "A" attached hereto and incorporated herein by reference (collectively, the "Assigned Business Deliverables") necessary for the operation of the Acquired Assets.

C. Unless herein otherwise defined, all terms defined in the Purchase Agreement shall have the meanings ascribed to them in the Purchase Agreement when used in this Assignment.

NOW, THEREFORE, in consideration of mutual promises contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound, the Parties hereto agree as follows:

1. Assignment of Assigned Business Deliverables. Assignor hereby assigns, transfers, sets over, conveys and delivers to Assignee, and Assignee hereby accepts, all of Assignor's right, title and interest in and to all Assigned Business Deliverables, together with all rights and privileges of any nature thereunder accruing to Assignor on or after the date hereof.

2. Indemnification by Assignor. Assignor hereby agrees to indemnify, defend and hold harmless Assignee and the Buyer Indemnified Persons from, of and against any and all losses arising out of or relating to the breach by Assignor of any of the obligations, terms or covenants of Assignor, under or pursuant to the Assigned Business Deliverables that accrued prior to the date hereof subject to Assignor's indemnification obligations under Article VIII of the Purchase Agreement.

3. Indemnification by Assignee. Assignee hereby agrees to indemnify, defend and hold harmless Assignor and Seller Indemnified Parties from, of and against any and all losses arising out of or relating to the breach by Assignee of any of the obligations, terms or covenants of Assignee, under or pursuant to the Assigned Business Deliverables that accrue on or after the date hereof subject to Assignee's indemnification obligations under Article VIII of the Purchase Agreement.

4. Counterparts; Facsimile Signatures. This Assignment may be executed in any number of counterparts which, taken together, shall constitute one and the same agreement. This Assignment shall be effective when it has been executed by each Party and delivered to both Parties. To evidence the fact that it has executed this Assignment, a Party may send a copy of its executed counterpart to the other Party by facsimile transmission. Such Party shall be deemed to have executed and delivered this Assignment on the date it sent such facsimile transmission. In such event, such Party shall forthwith deliver to the other Party an original counterpart of this Assignment executed by such Party.

5. Successors; Assigns. Neither Party hereto shall assign or delegate this Assignment or any rights or obligations hereunder without the prior written consent of the other Parties hereto, and any attempted assignment or delegation without prior written consent shall be void and of no force or effect.

6. Governing Law; Jurisdiction. This Assignment shall be construed and enforced in accordance with, and governed by, the laws of the Commonwealth of Pennsylvania (without giving effect to the principles of conflicts of laws thereof). The Parties hereto irrevocably agree and consent to the jurisdiction of the United States District Court for the Eastern District of Pennsylvania and the Court of Common Pleas of Chester County, Pennsylvania, for the adjudication of any matters arising under or in connection with this Assignment. Any action initiated in court shall be filed and litigated (including all discovery proceedings) exclusively in the United States District Court for the Eastern District of Pennsylvania and the Court of Common Pleas of Chester County, Pennsylvania, and each party irrevocably submits to the exclusive jurisdiction of such courts in any such suit, action or proceeding. Service of process, summons, notice or other document by mail to such Party's address set forth herein shall be effective service of process for any suit, action or other proceeding brought in any such court. EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS ASSIGNMENT OR THE OTHER TRANSACTION DOCUMENTS IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE OTHER TRANSACTION DOCUMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY. EACH PARTY TO THIS ASSIGNMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS - REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION.

7. Further Assurances. Each Party hereto covenants and agrees, at its own expense, to take such further action and execute and deliver such further instruments of conveyance and transfer and of assumption as may be reasonably requested by the other Party to carry out the provisions and purpose of this Assignment.

8. Absolute Assignment. It is the intention of Assignor to transfer absolute title of the Assigned Business Deliverables to Assignee, its successors and assigns, free of any redemption by Assignor or its successors and assigns.

[**REMAINDER OF PAGE INTENTIONALLY BLANK;**
SIGNATURE PAGE IMMEDIATELY FOLLOWS]

IN WITNESS WHEREOF, the parties hereto have caused this Assignment to be duly executed as of the day and year first written above.

Assigned Business Deliverables

All of Seller's right, title and interest in and to all assets, facilities, business, goodwill, properties and rights of Seller of every kind and description, whether tangible or intangible, real, personal or mixed, wherever situated, in each case used in, held for use in, or acquired or developed for use in, the System (capitalized terms contained herein not otherwise defined within this document shall have the meanings assigned to them in the Purchase Agreement, unless the context shall otherwise require), or otherwise related to, or arising out of the operation or conduct of the System (whether or not any such assets have any value for accounting purposes or are carried or reflected on the books or financial records of Seller), including any of the foregoing in which Seller is entitled to acquire rights in the future pursuant to Pending Development Plans (other than the rights of Seller pursuant to Section 2.02(d)) of the Purchase Agreement or development plans approved pursuant to this Agreement, but in all cases other than the Excluded Assets (the foregoing collectively referred to as the "Acquired Assets"), including:

(a) all real property and appurtenant interests used in the operation of the System, including without limitation (i) good and marketable fee simple title to the Real Property described and identified on Schedule 4.09 of the Purchase Agreement, and (ii) all Easements, including without limitation those identified on Schedule 4.09 of the Purchase Agreement;

(b) all contracts, licenses, and leases to which Seller is a party, including without limitation, all construction contracts, surety bonds, operation and maintenance agreements, management agreements, reserved capacity agreements, architect agreements and consultant agreements, and agreements relating to all other items of personal property as set forth on Schedule 4.13 of the Purchase Agreement (the "Assigned Contracts");

(c) all expenses prepaid by Seller and security deposits paid by Seller;

(d) all Authorizations and Permits of or held by Seller (to the extent transferrable to Buyer under applicable Law), including all Authorizations and Permits which are environmental permits, Seller's NPDES Permits other than those NPDES permits that relate to the Stormwater System Assets, other operating permits and those items listed or described on Schedule 4.12 of the Purchase Agreement; and

(e) all goodwill of the System.

Exhibit C

ESCROW AGREEMENT

THIS ESCROW AGREEMENT (the "Escrow Agreement") is made as of this _____ day of _____, 202_, by and among **AQUA PENNSYLVANIA WASTEWATER, INC.**, a Pennsylvania corporation ("Buyer"), **EAST WHITELAND TOWNSHIP** ("Seller"), and _____, a _____ _____ (the "Escrow Agent"), as escrow agent. Each of the Buyer, Seller and the Escrow Agent shall be referred to herein as a "Party" and collectively, as the 'Parties".

WHEREAS, Buyer and Seller are Parties to that certain Asset Purchase Agreement dated January 8, 2021, as amended by the updated and supplemented representations, warranties and schedules required by Section 9.03 of the Asset Purchase Agreement (all of the foregoing collectively, the "Purchase Agreement"). Solely as between Buyer and Seller, terms not otherwise defined herein shall have the respective meanings ascribed to them in the Purchase Agreement

WHEREAS, concurrently with the execution and delivery of this Escrow Agreement, the Buyer and Seller are closing on the transactions contemplated by the Purchase Agreement.

WHEREAS, the Purchase Agreement requires Seller to transfer or assign certain real property interests to Buyer for Acquired Assets situated upon lands owned by third parties, specifically including sewer lines encroaching upon land owned by third parties (collectively referred to herein as "Easements"). The Easements are identified on Schedule 4.09 of the Purchase Agreement, as that Schedule was amended as an attachment to the Closing Certificate delivered by Seller to Buyer on the date hereof.

WHEREAS, as of the date of this Escrow Agreement, Seller has not transferred or assigned [_____] of the Easements (collectively, the "Missing Easements", the list of which is attached hereto as **Exhibit "A"**) which therefore will not be transferred to Buyer at Closing. Seller and Buyer have agreed to permit Seller to assign and transfer the Missing Easements following Closing pursuant to the terms of this Escrow Agreement.

WHEREAS, Buyer has agreed to deposit [_____] Dollars ($[____.__]) of the Purchase Price in escrow with the Escrow Agent (in accordance with Section 2 hereof) (the "Easement Escrow Fund" or the "Escrow Fund"), in order to secure Seller's obligations to assign and transfer all of the Missing Easements after the date hereof.

NOW, THEREFORE, in consideration of the premises and the covenants and agreements set forth herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound hereby, the parties hereto hereby agree as follows:

1. Escrow Fund. Buyer is delivering on the date hereof to the Escrow Agent an amount in cash equal to the Escrow Fund, which funds are to be held in escrow by the Escrow Agent pursuant hereto and released in accordance with the terms hereof.

2. Protection and Investment of Escrow Fund. The Escrow Agent shall separately hold and safeguard the Easement Escrow Fund for such period of time that any funds remain therein, shall treat the Escrow Fund as a separate escrow account in accordance with the terms of this Escrow Agreement and not as its property and shall hold and dispose of the Escrow Fund only in accordance with the terms of this Escrow Agreement. The Escrow Fund shall be held in escrow in a separate account held in a national banking association regulated by the OCC and authorized to conduct business in Pennsylvania. The Escrow Agent shall deposit the Escrow Fund into an interest-bearing account.

3. Term. This Escrow Agreement shall be for a term ending on the [____] (___) year anniversary of the date of this Escrow Agreement (the "Term"), subject to extension in the event that there are pending claims upon the expiration of the Term, or upon the Seller's delivery to Buyer of all Missing Easements, whichever is sooner.

4. Distributions from Easement Escrow Fund. The Easement Escrow Fund shall be distributed to Seller or Buyer (such Party in such capacity, the "Withdrawing Party") in accordance with the following terms:

(a) Subject to Section 4(c) below, the Easement Escrow Fund shall be distributed to Seller (such Party in such capacity, the "Withdrawing Party") in accordance with the following terms:

(i) Seller shall be entitled to quarterly distributions from the Escrow Fund calculated as: the number of Missing Easements delivered to Buyer during the preceding calendar quarter which satisfy the criteria set forth herein (each, an "Easement Document"), multiplied by **[$_____]**, subject to a maximum aggregate distribution under this subparagraph (i) during the Term of _____ Dollars ($_____). In order for a Missing Easement to be included as an Easement Document for purposes of determining distributions under this subsection (a), the Easement Document must satisfy the following criteria:

(A) the Easement Document shall be in the form of (1) a recorded deed of easement or a recorded deed in lieu of condemnation, in each case duly executed by the third party granting the rights set forth therein, or (2) a final, unappealable order of court in a condemnation proceeding;

(B) the Easement Document shall be perpetual in duration and shall adequately describe the area of land encumbered by such Easement Document which shall include adequate vehicular access to the Acquired Assets situated therein and adequate area for maintaining, repairing and replacing said Acquired Assets when necessary;

(C) the Easement Document shall satisfy all requirements for recording such Easement Document as imposed by the Chester County Recorder of Deeds; and

(D) any Easement Document in the form attached hereto as **Exhibit "B"** which, upon delivery to Buyer, complies with subparagraphs (A) through (C) above, shall be deemed to satisfy all requirements upon which a release from the Escrow Fund is conditioned.

(ii) Subject to subparagraph (iii) below, the remaining _____ Dollars ($____) shall be distributed to Seller upon Seller's delivery of the last of the [____] Missing Easement Documents (satisfying all criteria set forth in subparagraph (i) above) to Buyer in accordance with the terms hereof.

(b) All disbursements made under subparagraphs (a)(i) and (a)(ii) above shall occur within ten (10) days after the Escrow Agent has received a Withdrawal Request as set forth in Section 4(d) hereof.

(c) The balance in the Escrow Fund, if any, existing upon expiration of the Term following any distribution owed to Seller resulting from delivery of Easement Documents during the quarter in which the Term expires, shall be distributed to Buyer.

(d) Within ten (10) days following the end of each calendar quarter during the Term (in which case only Seller shall be the Withdrawing Party) or, in the event that there is a balance in the Escrow Fund existing upon expiration of the Term, then within ten (10) days of the expiration of the Term (in which case either Seller or Buyer may be the Withdrawing Party)the Withdrawing Party shall request a disbursement from the Easement Escrow Fund (a "Withdrawal Request") by delivering to Escrow Agent and the other Party to this Escrow Agreement a written notice of such request (a "Withdrawal Request Notice"). The Withdrawal Request Notice shall describe the basis and amount of the Withdrawal Request, which, with respect to Seller, shall be calculated in accordance with Section 4(a)(i) above, and shall include any documentation (including Easement Documents delivered to Buyer) evidencing the basis for the amount of the Withdrawal Request, and a certification that a copy of the Withdrawal Request has been delivered to the other Party. The Escrow Agent shall release to the Withdrawing Party the amount of the Withdrawal Request from the Easement Escrow Fund on or before the tenth (10th) day after the date when the Escrow Agent receives the Withdrawal Request Notice, provided that, if the Escrow Agent, within such period of ten (10) days, receives from the other Party (in such capacity, an "Objecting Party") a written notice of dispute of the Withdrawal Request (which notice shall include a certification by the Objecting Party that it has delivered a copy of such notice to Withdrawing Party) then the Escrow Agent shall continue to hold the amount set forth in the Withdrawal Request in the Easement Escrow Fund pursuant to this Escrow Agreement until the Escrow Agent receives either written instructions signed by the Withdrawing Party and the Objecting Party directing a release from the Easement Escrow Fund, or a final order of a court of competent jurisdiction (from which there is no further appeal or for which the time to appeal has expired without such appeal having been taken) directing a release from the Easement Escrow Fund. The Escrow Agent shall make distributions from the Easement Escrow Fund in accordance with such instructions or order within two (2) business days after receipt of either.

(e) Should a dispute arise between the Parties as to whether an Easement Document satisfies the criteria for release under subparagraph (a)(i) above, the Parties shall jointly select a neutral attorney with expertise in real property transactions to serve as mediator of the dispute and both parties shall diligently pursue a resolution of such dispute in good faith. In the event that the parties are unable to resolve such dispute within sixty (60) days following the delivery by the Objecting Party to the withdrawing of the notice of objection, either Party may pursue a claim in the Chester County Court of Common Pleas.

5. Default & Remedies.

(a) It shall be a default of this Escrow Agreement if Seller shall fail to diligently pursue the delivery of all Easement Documents using commercially reasonable efforts and to transfer such interests to Buyer on or before the expiration of the Term ("Default").

(b) In the event of a Default, Buyer may, at Buyer's sole discretion, after first providing written notice to Seller and a thirty (30) day cure period thereafter to Seller, undertake to obtain such easements on its own or file suit in a court of competent jurisdiction seeking specific performance in the form of an order requiring Seller to obtain all Easement Documents, including by way of the exercise of its power of eminent domain. Buyer and Seller acknowledge that the remedies at law for any breach or threatened breach, including monetary damages, may be inadequate compensation for any loss and that any defense in any action for specific performance that a remedy at law would be adequate is waived. Any requirements for the securing or posting of a bond with such remedy are waived by the Buyer and Seller.

(c) If Seller Defaults and Buyer elects to pursue a remedy under Paragraph 4(b) above, Buyer shall be entitled to recover from Seller all actual damages, including costs and reasonable attorneys' fees incurred in obtaining the outstanding easements or in bringing an action seeking specific performance of the terms of this Escrow Agreement. In the event Seller incurs a liability to Buyer under this Section 5(c), any amount distributed to Buyer pursuant to Section 4(c) above shall be applied as a credit to such amount owed by Seller to Buyer under this Section 5(c). The establishment of the amount of the Escrow Fund shall not limit Buyer's right to recovery hereunder or under the Purchase Agreement.

6. Limitation of Escrow Agent's Liability.

(a) Limitation on Liability. The Escrow Agent shall incur no liability with respect to any action taken or suffered by it in reliance upon any notice, direction, instruction, consent, statement or other documents believed by it to be genuine and duly authorized, nor for other action or inaction, except its own willful misconduct or gross negligence. If any controversy arises between the parties to this Escrow Agreement, or with any other Party, concerning the subject matter of this Escrow Agreement, its terms or conditions, the Escrow Agent will not be required to resolve the controversy or to take any action regarding it. The Escrow Agent may hold all documents and funds and may wait for settlement of any such controversy by final appropriate legal proceedings or by written agreement of Buyer and Seller. The Escrow Agent shall not be responsible for the sufficiency of this Escrow Agreement or any other agreement referred to herein. The Escrow Agent is not responsible for determining and verifying the authority of any person acting or purporting to act on behalf of any Party to this Escrow Agreement; provided, however, Escrow Agent shall use commercially reasonable efforts to ascertain whether or not such person has the requisite authority required to act on behalf of a Party. In all questions arising under this Escrow Agreement, the Escrow Agent may rely on the advice of counsel, and the Escrow Agent shall not be liable to anyone and shall be fully indemnified for anything done, omitted or suffered in good faith by the Escrow Agent based on such advice. The Escrow Agent shall not be required to take any action hereunder involving any expense unless the payment of such expense is made or provided for in a manner satisfactory to it in its sole judgment. In no event shall the Escrow Agent be liable for indirect, punitive, special or consequential damages (including, but not limited to lost profits), even if Escrow Agent has been advised of the likelihood of such damages or penalty and regardless of the form of action. Escrow Agent undertakes to perform only such duties as are expressly set forth herein and no duties shall be implied. Escrow Agent has no fiduciary or

discretionary duties of any kind. Escrow Agent's permissive rights shall not be construed as duties. Escrow Agent shall have no liability under and no duty to inquire as to the provisions of any document other than this Escrow Agreement, including without limitation any other agreement between any or all of the parties hereto or any other persons even though reference thereto may be made herein and whether or not a copy of such document has been provided to Escrow Agent. Escrow Agent shall not be responsible for delays or failures in performance resulting from acts of God, strikes, lockouts, riots, acts of war or terror, epidemics, governmental regulations, fire, communication line failures, computer viruses, attacks or intrusions, power failures, earthquakes or any other circumstance beyond its control. Escrow Agent shall not be obligated to take any legal action in connection with the Escrow Fund, this Escrow Agreement or the Purchase Agreement or to appear in, prosecute or defend any such legal action. If any portion of the Escrow Fund is at any time attached, garnished or levied upon, or otherwise subject to any writ, order, decree or process of any court, or, in case disbursement of the Escrow Fund, is stayed or enjoined by any court order, Escrow Agent is authorized, in its sole discretion, to respond as it deems appropriate or to comply with all writs, orders, decrees or process so entered or issued, including but not limited to those which it is advised by legal counsel of its own choosing is binding upon it, whether with or without jurisdiction; and if Escrow Agent relies upon or complies with any such writ, order, decree or process, it shall not be liable to any of the parties hereto or to any other person or entity by reason of such compliance even if such order is reversed, modified, annulled, set aside or vacated. Notwithstanding the foregoing, Escrow Agent shall immediately provide written notice to Seller and Buyer if any portion of the Escrow Fund is at any time attached, garnished or levied upon, or otherwise subject to any writ, order, decree or process of any court, or, in case of disbursement of the Escrow Fund, is stayed or enjoined by any court order. Nothing herein shall preclude Escrow Agent from acting in any other capacity for any other Party hereto or for any other person or entity.

(b) Indemnification. Buyer and Seller agree jointly and severally to indemnify the Escrow Agent for, and hold it harmless against, any claim (whether asserted by Buyer, Seller or any other person or entity), loss, liability or expense incurred by the Escrow Agent except to the extent directly caused by gross negligence or willful misconduct on the part of the Escrow Agent (as determined by a court of competent jurisdiction), arising out of or in connection with its carrying out of its duties hereunder, and in connection therewith to indemnify the Escrow Agent, its directors, officers, partners, employees and agents against any and all expenses, including reasonable attorneys' fees and expenses and the cost of defending any action, suit or proceeding or resisting any claim or enforcing Buyer's or Seller's obligations under this Escrow Agreement. The obligations of Buyer and Seller under this Section shall survive any termination of this Escrow Agreement and the resignation or removal of Escrow Agent.

(c) Authority to Interplead. Buyer and Seller authorize the Escrow Agent, if a dispute exists with respect to any obligation of Escrow Agent hereunder or the Escrow Agent is threatened with litigation or is sued, to interplead all interested parties in any court located in Chester County, Pennsylvania and to deposit the Escrow Fund with the clerk of that court after deduction and payment to the Escrow Agent of all its unpaid expenses. In the event of any dispute, the Escrow Agent shall be entitled to petition a court of competent jurisdiction and shall perform any acts ordered by such court.

7. Successor Escrow Agents. The Escrow Agent may resign at any time upon giving at least thirty (30) days' written notice to Seller and Buyer and, after the date of such resignation notice, notwithstanding any other provision of this Escrow Agreement, Escrow Agent's sole

obligation will be to hold the Escrow Fund pending appointment of a successor Escrow Agent. Similarly, Escrow Agent may be removed at any time by Buyer and Seller giving at least thirty (30) days' prior written notice to Escrow Agent specifying the date when such removal shall take effect. No such resignation or removal shall become effective until the appointment of a successor escrow agent which shall be accomplished as follows: Buyer and the Seller shall use their commercially reasonable efforts to mutually agree on a successor escrow agent within thirty (30) days after receiving such notice. If the parties fail to agree upon a successor escrow agent within such time, the Escrow Agent may petition a court of competent jurisdiction to appoint a successor escrow agent, and all costs and expenses related to such petition shall be paid jointly and severally by Buyer and Seller. The successor escrow agent shall execute and deliver an instrument accepting such appointment and it shall, without further acts, be vested with all the estates, properties, rights, powers, and duties of the predecessor escrow agent as if originally named as escrow agent. Upon appointment of a successor escrow agent, and payment of the Escrow Fund to the successor escrow agent, after deduction and payment to the retiring Escrow Agent of all reasonable actual expenses payable to, incurred by, or expected to be incurred by the retiring Escrow Agent in connection with the performance of its duties and the exercise of its rights hereunder, the Escrow Agent shall be discharged from any further duties and liability under this Escrow Agreement. After any retiring, Escrow Agent's resignation or removal, the provisions of this Escrow Agreement shall inure to its benefit as to any actions taken or omitted to be taken by it while it was Escrow Agent under this Escrow Agreement.

8. Further Instruments. If the Escrow Agent reasonably requires other or further instruments in connection with its performance of its duties, the necessary parties hereto shall join in furnishing such instruments.

9. Termination. This Escrow Agreement shall terminate upon the earlier of expiration of the Term or such time as no funds remain in the Easement Escrow Fund due to distribution in accordance with Section 4 of this Escrow Agreement.

10. Waiver & Other Remedies. The rights and remedies herein reserved to Buyer or Seller are cumulative and not alternative.

11. Compensation of Escrow Agent. The Escrow Agent shall not be compensated or charge fees for acting as Escrow Agent, but shall be reimbursed by the parties for reasonable expenses actually paid to third parties and incurred for service as Escrow Agent only, subject to reasonable substantiation of such expenses

12. General.

(a) Governing Law and Jurisdiction. This Escrow Agreement shall be construed and enforced in accordance with, and governed by, the laws of the Commonwealth of Pennsylvania (without giving effect to the principles of conflicts of laws thereof). The Parties hereto irrevocably agree and consent to the jurisdiction of the United States District Court for the Eastern District of Pennsylvania and the Court of Common Pleas of Chester County, Pennsylvania, for the adjudication of any matters arising under or in connection with this Agreement. Any action initiated in court shall be filed and litigated (including all discovery proceedings) exclusively in the United States District Court for the Eastern District of Pennsylvania and the Court of Common Pleas of Chester County, Pennsylvania, and each party irrevocably submits to the exclusive

jurisdiction of such courts in any such suit, action or proceeding. Service of process, summons, notice or other document by mail to such Party's address set forth herein shall be effective service of process for any suit, action or other proceeding brought in any such court. EACH PARTY ACKNOWLEDGES AND AGREES THAT ANY CONTROVERSY WHICH MAY ARISE UNDER THIS ESCROW AGREEMENT IS LIKELY TO INVOLVE COMPLICATED AND DIFFICULT ISSUES AND, THEREFORE, EACH SUCH PARTY IRREVOCABLY AND UNCONDITIONALLY WAIVES ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY LEGAL ACTION ARISING OUT OF OR RELATING TO THIS AGREEMENT, THE AGREEMENT, THE OTHER TRANSACTION DOCUMENTS OR THE TRANSACTIONS CONTEMPLATED HEREBY OR THEREBY. EACH PARTY TO THIS ESCROW AGREEMENT CERTIFIES AND ACKNOWLEDGES THAT (A) NO REPRESENTATIVE OF ANY OTHER PARTY HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT SEEK TO ENFORCE THE FOREGOING WAIVER IN THE EVENT OF A LEGAL ACTION, (B) SUCH PARTY HAS CONSIDERED THE IMPLICATIONS OF THIS WAIVER, (C) SUCH PARTY MAKES THIS WAIVER VOLUNTARILY, AND (D) SUCH PARTY HAS BEEN INDUCED TO ENTER INTO THIS ESCROW AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION.

(b) Notices. All notices, requests, claims and other communications under this Escrow Agreement shall be in writing and shall be deemed given if delivered personally or by overnight courier to the parties at the following addresses (or at such other address for a Party as shall be specified by notice from such Party):

if to the Escrow Agent, to:

_____

Any notice addressed to the Escrow Agent shall be effective only upon receipt.

(c) Headings. The article, section and paragraph headings in this Escrow Agreement are for reference purposes only and shall not affect the meaning or interpretation of this Escrow Agreement.

(d) Severability. If any term, provision, covenant or restriction contained in this Escrow Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remainder of the terms, provisions, covenants and restrictions contained in this Escrow Agreement shall remain in full force and effect and shall in no way be affected, impaired or invalidated.

(e) Entire Agreement. This Escrow Agreement, including the relevant provisions of the Closing Agreement pertaining to the parties' rights and obligations regarding the Missing Easements, constitute the entire agreement between the Parties pertaining to the subject matter hereof and supersedes all prior agreements, negotiations, discussions and understandings, written or oral, between the Parties. There are no representations, warranties, conditions or other agreements, whether direct or collateral, or express or implied, that form part of or affect this Agreement, or that induced any Party to enter into this Escrow Agreement or on which reliance is placed by any Party, except as specifically set forth in this Escrow Agreement. The Parties acknowledge and agree that (i) each has substantial business experience and is fully acquainted with the provisions of this Escrow Agreement, (ii) the provisions and language of this Escrow Agreement have been fully negotiated and (iii) no provision of this Escrow Agreement shall be construed in favor of any Party or against any Party by reason of such provision of this Escrow Agreement having been drafted on behalf of one Party rather than the other Party.

(f) Amendments; Waivers. This Escrow Agreement may be amended, changed or supplemented only by a written agreement signed by the Parties. Any waiver of, or consent to depart from, the requirements of any provision of this Escrow Agreement shall be effective only if it is in writing and signed by the Party giving it, and only in the specific instance and for the specific purpose for which it has been given. No failure on the part of any Party to exercise, and no delay in exercising, any right under this Escrow Agreement shall operate as a waiver of such right. No single or partial exercise of any such right shall preclude any other or further exercise of such right or the exercise of any other right.

(g) Parties in Interest; Third Party Beneficiary. Except as hereinafter provided, this Escrow Agreement is not intended to and shall not be construed to create upon any Person other than the Parties any rights or remedies hereunder.

(h) Successors and Assigns. This Escrow Agreement shall be binding upon, and inure to the benefit of, the Parties hereto and their respective successors and assigns; provided, however, that no party may assign any of its rights or delegate any of its duties under this Escrow Agreement without the prior written consent of the other party hereto and any attempted assignment or delegation without prior written consent shall be void and of no force or effect.

(i) Specific Performance. The Parties agree that irreparable damage would occur if any provision of this Escrow Agreement were not performed in accordance with the terms hereof and that the Parties shall be entitled to specific performance of the terms hereof, in addition to any other remedy to which they are entitled at law or in equity if the other Party has performed in accordance with the terms hereof.

(j) Counterparts; Facsimile; Execution. This Escrow Agreement may be executed in any number of counterparts which, taken together, shall constitute one and the same agreement. This Escrow Agreement shall be effective when it has been executed by each Party and delivered to both Parties. To evidence the fact that it has executed this Escrow Agreement, a Party may send a copy of its executed counterpart to the other Party by facsimile transmission. Such Party shall be deemed to have executed and delivered this Escrow Agreement on the date it sent such facsimile transmission. In such event, such Party shall forthwith deliver to the other Party an original counterpart of this Escrow Agreement executed by such Party.

(k) To help the government fight the funding of terrorism and money laundering activities, federal law requires all financial institutions to obtain, verify and record information that identifies each person who opens an account. For a non-individual person such as a business entity, a charity, a trust or other legal entity, Escrow Agent requires documentation to verify its formation and existence as a legal entity. Escrow Agent may require financial statements, licenses or identification and authorization documents from individuals claiming authority to represent the entity or other relevant documentation. Buyer and Seller agree to provide all information requested by Escrow Agent in connection with any legislation or regulation to which Escrow Agent is subject, in a timely manner. Escrow Agent's appointment and acceptance of its duties under this Escrow Agreement is contingent upon verification of all regulatory requirements applicable to Buyer, Seller and any of their permitted assigns, including successful completion of a final background check. These conditions include, without limitation, requirements under the USA Patriot Act, the USA FREEDOM Act, the Bank Secrecy Act, and the U.S. Department of the Treasury Office of Foreign Assets Control. If these conditions are not met, Escrow Agent may at its option promptly terminate this Escrow Agreement in whole or in part and refuse any otherwise permitted assignment by Buyer or Seller, without any liability or incurring any additional costs.

13. Representations and Warranties. Buyer and Seller each respectively make the following representations and warranties to Escrow Agent:

(a) it has full power and authority to execute and deliver this Escrow Agreement and to perform its obligations hereunder; and this Escrow Agreement has been duly approved by

all necessary action and constitutes its valid and binding agreement enforceable in accordance with its terms.

(b) each of the applicable persons designated on **Exhibit "C"** attached hereto has been duly appointed to act as its authorized representative hereunder and individually has full power and authority on its behalf to execute and deliver any instruction or direction, to amend, modify or waive any provision of this Escrow Agreement and to take any and all other actions as its authorized representative under this Escrow Agreement and no change in designation of such authorized representatives shall be effective until written notice of such change is delivered to each other Party to this Escrow Agreement pursuant to Section 14(a) and Escrow Agent has had reasonable time to act upon it.

(c) no printed or other material in any language, including any prospectus, notice, report, and promotional material or the rights, powers, or duties of Escrow Agent under this Escrow Agreement shall be issued by any other parties hereto, or on such Party's behalf, without the prior written consent of Escrow Agent.

(d) it will not claim any immunity from jurisdiction of any court, suit or legal process, whether from service of notice, injunction, attachment, execution or enforcement of any judgment or otherwise.

14. Security Procedures. In the event instructions, including funds transfer instructions, address change or change in contact information are given to Escrow Agent (other than in writing at the time of execution of this Escrow Agreement), whether in writing, by facsimile or otherwise, Escrow Agent is authorized but shall not be required to seek confirmation of such instructions by telephone call-back to any person designated by the instructing Party on **Exhibit "C"** hereto, and Escrow Agent may rely upon the confirmation of anyone purporting to be the person so designated. The persons and telephone numbers for call-backs may be changed only in writing actually received and acknowledged by Escrow Agent and shall be effective only after Escrow Agent has a reasonable opportunity to act on such changes. Buyer and Seller agree that Escrow Agent may at its option record any telephone calls made pursuant to this Section. Escrow Agent in any funds transfer may rely solely upon any account numbers or similar identifying numbers provided by Buyer or Seller to identify (i) the beneficiary, (ii) the beneficiary's bank, or (iii) an intermediary bank, even when its use may result in a person other than the beneficiary being paid, or the transfer of funds to a bank other than the beneficiary's bank or an intermediary bank so designated. Buyer and Seller acknowledge that these optional security procedures are commercially reasonable.

15. Tax Reporting. Escrow Agent shall have no responsibility for the tax consequences of this Escrow Agreement and Buyer and Seller shall consult with independent counsel concerning any and all tax matters. Buyer and Seller jointly and severally agree to (a) assume all obligations imposed now or hereafter by any applicable tax law or regulation with respect to payments or performance under this Escrow Agreement and (b) request and direct the Escrow Agent in writing with respect to withholding and other taxes, assessments or other governmental charges, and advise the Escrow Agent in writing with respect to any certifications and governmental reporting that may be required under any applicable laws or regulations. Except as otherwise agreed by Escrow Agent in writing, Escrow Agent has no tax reporting or withholding obligation except with respect to Form 1099-B reporting on payments of gross proceeds under Internal Revenue Code Section

6045 and Form 1099 and Form 1042-S reporting with respect to investment income earned on the Escrow Fund, if any. To the extent that U.S. federal imputed interest regulations apply, Buyer and Seller shall, no later than five (5) Business Days after the effective date of this Escrow Agreement, so inform the Escrow Agent, provide the Escrow Agent with all imputed interest calculations and direct the Escrow Agent to disburse imputed interest amounts as Buyer and Seller deem appropriate. The Escrow Agent shall rely solely on such provided calculations and information and shall have no responsibility for the accuracy or completeness of any such calculations or information. Buyer and Seller shall provide Escrow Agent a properly completed IRS Form W-9 or Form W-8, as applicable, for each payee. If requested tax documentation is not so provided, Escrow Agent is authorized to withhold taxes as required by the United States Internal Revenue Code and related regulations. Buyer and Seller have determined that any interest or income on the Escrow Fund shall be reported on an accrual basis and deemed to be for the account of Seller.

Chester County Tax Parcel Number:

DEED OF EASEMENT

THIS DEED OF EASEMENT is made this [ ] day of [ ], 20[ ] by and between **[Grantor]**, having a mailing address of [address] (the "**Grantor**"), and **AQUA PENNSYLVANIA WASTEWATER, INC.**, a corporation organized and existing under the laws of Pennsylvania of the Commonwealth of Pennsylvania, having a business address of 762 W. Lancaster Avenue, Bryn Mawr, Pennsylvania, 19010 (the "**Grantee**").

RECITALS

WHEREAS, Grantee owns and operates the sanitary wastewater collection system (the "**System**"), which collects sanitary wastewater from customers in and around the Township of East Whiteland, Pennsylvania, and transports its sewage for treatment at a plant owned and operated by the Valley Forge Sewer Authority.

WHEREAS, certain underground sanitary sewer lines owned by Grantee (the "**Sewer Lines**") are situated within the real property owned by the Grantor described on **Exhibit "A"** attached hereto (the "**Property**") which either were never the subject of an instrument that was recorded in the Chester County Recorder of Deeds office.

WHEREAS, the parties wish to document Grantee's rights to own, operate, maintain and replace the Sewer Lines with the boundaries of the Property.

NOW, THEREFORE, the said Grantor, for and in consideration of the sum of Ten and 00/100 Dollars ($10.00), lawful money of the United States of America, unto it well and truly paid

by East Whiteland Township (as predecessor to Grantee as owner of the Sewer Lines) on behalf of the said Grantee, at or before the sealing and delivery hereof, the receipt of whereof is hereby acknowledged, by these presents hereby does grant, convey, bargain and sell, alien, enfeoff, release and confirm unto the said Grantee, its respective successors, and assigns forever, a permanent and perpetual, non-exclusive easement for access, ingress, egress and regress to the Sewer Lines, and for using, operating, altering, inspecting, repairing, removing, improving, replacing, maintaining and installing the Sewer Lines, as they exist or may be installed and exist in the future on the real estate described on **Exhibit "B"** (the **"Easement Area"**).

TOGETHER WITH the right to use, repair, remove, reconstruct and reinstall the Sewer Lines, the right to access such facilities, and the right to make excavations and trim or remove trees, brush, undergrowth, landscaping and other obstructions in the exercise of the foregoing rights.

THE EASEMENT GRANTED HEREIN are permanent and perpetual and are covenants running with the lands burdened by the easement described in this Deed of Easements.

TO HAVE AND TO HOLD this Deed of Easement with the wastewater system improvements thereon installed and erected, hereditaments and premises hereby granted, or mentioned and intended so to be, with appurtenances, all and singular and the rights, liberties, privileges, above-described, unto the said Grantee, its successors and assigns forever.

AND THE SAID GRANTOR, for itself, its successor and assigns, does by these presents covenant, promise, grant and agree, to and with the Grantee, its successors and assigns, by these presents, that it, the said Grantor and its successors and assigns, all and singular the hereditaments, premises, and land hereby described and granted, or mentioned and intended so to be, with the appurtenances, unto the said Grantee, its successors and assigns, against them the said Grantor and its successors and assigns, and against all and every person and persons whomsoever lawfully claiming or to claim the same or any part thereof, by, from or under it, them or any of them, shall and will **WARRANT** and forever **DEFEND.**

This Deed of Easement and all of the covenants herein contained shall inure to the benefit of, and shall be binding upon the Grantor, its successors and assigns, and Grantee, its successors and assigns.

Expanded Service Area Map

Schedule 2.02(h)

Excluded Assets

The Malvern Hunt Pumping Station, force main and the gravity sewer collection system within the Malvern Hunt Wastewater Treatment Plant (the "WWTP") will be included in the Acquired Assets. However, it is expected that the spray irrigation system associated with the WWTP, including the treatment ponds and the spray irrigation fields, will be decommissioned and, along with associated parcels 42-3-47 and 42-3-127, will be excluded from the sale.

Schedule 4.05

Consents and Approvals

1. Pennsylvania Public Utility Commission ("PaPUC") Approval of Transaction

2. PaPUC Approval of Consent to Assignment and Amendment to Sewer Service Agreements and Related Amendments

3. Pennsylvania Department of Environmental Protection ("PaDEP") Approval of Sanitary Sewer Collection and Conveyance System Act 537 Plan recognizing transfer of wastewater collection system from Seller to Buyer

4. PaDEP Approval of Transfer of all NPDES[1] and WQM Permits

[1] NPDES permits will not be transferred if the Malvern Hunt WWTP is decommissioned prior to closing, as anticipated.

Schedule 4.06

Undisclosed Liabilities

None.

Schedule 4.07

Events Having a Material Adverse Effect

None.

Schedule 4.08

Tax Matters

None.

Schedule 4.09

Real Property and Easements; Liens

The "Matthews Road Drainage Area" in the list below is the name given to the eastern portion of the Township which does not drain into a pump station. All other drainage area names are based upon the pump station names on the aforementioned plans. The instruments have the following abbreviations: DB (deed book), MB (miscellaneous book) and PB (plan book). The properties located within the Church Road drainage area on the March 3, 2020 sanitary sewer system plan are incorporated into the Planebrook drainage area in this list.

Environmental Compliance

Sanitary System Overflow (SSO) Reporting for Operating Years 2016 through 2020:

- Pursuant to the Chapter 94 Municipal Wasteload Management Annual Report for Operating Year 2016, there was no reported SSO within the East Whiteland Township wastewater collection and conveyance system.
- Pursuant to the Chapter 94 Municipal Wasteload Management Annual Report for Operating Year 2017, there was no reported SSO within the East Whiteland Township wastewater collection and conveyance system.
- Pursuant to the Chapter 94 Municipal Wasteload Management Annual Report for Operating Year 2018, there were three (3) SSOs:
    - On June 11, 2018 and August 13, 2018 SSOs occurred at manhole 6-9, located at 249 Lancaster Avenue. These 2 SSOs were caused by rain events exceeding 3" per hour. On November 30, 2018, the Township diverted the flow from the Frame Avenue Pump Station to the Planebrook Pump Station, which reduced the flow by 80,000 GPD on Lancaster Avenue at the location of the overflows. Also, the Church Road Sewer Extension, referenced on Schedule 4.12, which was completed in March 2020, will redirect the flow associated with the Church Road Pump Station from the Lancaster Avenue area where these SSOs occurred.
    - On August 23, 2018 an SSO occurred at manholes 18A-1 to 18 A-2, located on Warren Avenue, which was caused by a clogged pipe. The pipe was cleared and flow resumed.
- Pursuant to the Chapter 94 Municipal Wasteload Management Annual Report for Operating Year 2019, there was no reported sanitary system overflow within the East Whiteland Township wastewater collection and conveyance system.
- Pursuant to the Chapter 94 Municipal Wasteload Management Annual Report for Operating Year 2020, there was no reported SSO within the East Whiteland Township wastewater collection and conveyance system.

Corrective Action Plan (CAP) and Connection Management Plan (CMP):

- From 2013 to 2014 the Township was under a CAP. Phases 1 and 2 of the CAP required improvements to the Mill Lane and Sidley Collection System. Phase 3 of the CAP required improvements to the Lee Boulevard Pump Station. Upgrade improvements were also made to the sanitary sewer within Conestoga Road. Approximately 3,780 L.F. of new 18", 20" and 24" pipe were installed to replace existing deteriorating sewer. The CAP was lifted by

the DEP in 2015 after the Township completed the gravity sewer main replacement from the Mill Lane Pump Station to Lee Boulevard.

- The conditions of the CMP currently on file with the PADEP are still in effect for the contributory drainage areas from Charlestown that flow through the Mill Lane and Sidley Road sewer systems.

Schedule 4.12

Authorizations and Permits

537 Plan:

- East Whiteland Township Act 537 Sewage Facilities Plan, dated May 2, 1995
- East Whiteland Township Act 537 Sewage Facilities Plan Special Study for the Mill Lane Pump Station Replacement Project (Route 401 Area (Area 1), Bacton Hill and Swedesford Road Areas (Area 2), Planebrook Area (Area 3), Church Road Extension – to Eliminate Church Road Pump Station (Area 4), and Immaculata University Area (Area 5)), as prepared by Advanced GeoServices and revised September 2011.
- East Whiteland Township/Charlestown Township (Southside) Act 537 Sewage Facilities Plan Special Study for the North-Central portion of East Whiteland Township and the South-Central portion of Charlestown Township (to accommodate future flow needs for Charlestown Township and East Whiteland Township), as prepared by Arro Consulting, Inc. dated February 2013.
- East Whiteland Township/Great Valley Corporate Center Act 537 Sewage Facilities Plan Special Study for upgrades of the Willburdale Pump Station and Flat Road Pump Station (for wastewater needs of the Great Valley Corporate Campus), as prepared by Arro Consulting, Inc. dated April 2015 and revised September 2015.
- East Whiteland Township Act 537 Sewage Facilities Plan Special Study for Frame Avenue/Planebrook Road Sewer Extension, as prepared by Arro Consulting, Inc. dated August 2016, with a last revision date of October 30, 2018.
- East Whiteland Township Sewage Facilities Planning Module (Component 3m) Planebrook Road Area Sewer Extension, as prepared by Arro Consulting, Inc. dated March 2020. This module is for the extension of public sanitary sewer service from the existing manhole located on Planebrook Road to properties currently served by on-lot disposal systems along Planebrook Road, Elk Drive, Fairview Drive, Prospect Avenue, Golf Circle, Bracken Avenue, and Davis Avenue. This module was approved by the DEP pursuant to that certain approval letter dated February 26, 2021.

WQM Permits

Pump Station	**WQM Permit Number**
Deer Run	1571413
Mill Lane	1575412

Permit No. 1502418 for sewer extension completed in 2004 for approximately 250 homes located in the King Road, Carol Lane and Summit Road areas.

Permit No. 1599418 for the Malvern Hunt sewage treatment plant.[2]

[2] Will not be transferred if the Malvern Hunt WWTP is decommissioned prior to closing, as anticipated.

Schedule 4.13

Assigned Contracts

Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
Sewage Treatment Agreement	East Goshen Township East Goshen Municipal Authority East Whiteland Township East Whiteland Municipal Authority	November 17, 1987	Transmission of sewage from 23 lots located in East Whiteland (the "EW Lots") Township within the Lockwood Chase Development from East Whiteland through East Goshen Township's sewage collection system to the Lockwood Chase Plant (leased and operated by East Goshen Township) for treatment.
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
Sewage Treatment Agreement	East Goshen Township East Whiteland Township	October 17, 2000	Transmission of sewage from 4 lots located in East Whiteland

	East Whiteland Municipal Authority		Township within the Mill Valley subdivision from East Whiteland through East Goshen's sewage collection system, to the West Goshen Treatment Plant for treatment. East Goshen reserves its capacity in the West Goshen Treatment Plant for East Whiteland.
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
Agreement	Malvern Borough East Whiteland Township East Whiteland Municipal Authority	July 10, 1995	Transmission of sewage from 19 lots located in East Whiteland Township within the Erin Glenn subdivision from East Whiteland through the Erin Glen Meter into Malvern Borough's collection system, then

			back to East Whiteland through the Warren Avenue Meter (which will then go through the East Whiteland Trunkline to Valley Forge Sewage Treatment Plant).
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
Agreement	Willistown Township East Whiteland Township East Whiteland Municipal Authority	September 14, 1993	Transmission of sewage from 114 apartments in East Whiteland Township within the Woodview Apartments from East Whiteland to the collection system in Willistown (which will then go through the Valley Creek Trunkline to the Valley Forge Sewage Treatment Plant).

Name of Contract	Parties to Contract	Date of Contract	Subject
Sewage Capacity/Service Agreement	East Whiteland Township East Whiteland Municipal Authority Tredyffrin Township Tredyffrin Township Municipal Authority Trammell Crow Northeast Metro Development, Inc.	November 1, 2000	Transmission of sewage from the portion of the Great Valley Corporate Campus (developed by Trammel Crow) located in East Whiteland Township (the "EW Portion") that is required to be served by the Valley Forge Sewage Treatment Plant ("VFSTP") under East Whiteland's 537 Plan. Tredyffrin sold its reserve capacity in the VFSTP to Trammel Crow for use by the EW Portion. Tredyffrin bills East Whiteland for its flow into Tredyffrin's system. Sewage is transmitted

			from the EW Portion through the Valley Creek Trunkline (in Tredyffrin) to the VFSTP for treatment.
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
Addendum to Sewage Capacity/Service Agreement dated November 1, 2000	East Whiteland Township Tredyffrin Township RLD Water JV, LLC The Haven at Atwater Village, LLC	November 19, 2015	Modifies the Agreement dated November 1, 2000 to address additional flow from the Havens Apartment Complex, located in East Whiteland (the "Atwater Capacity"). The addendum adds RLD Atwater and The Haven at Atwater Village as parties. Tredyffrin will bill East Whiteland a sewer rental charge for the first 46,393 GPD of flows from the Atwater Capacity. For

			the average daily flows over 46,393 GPD, Tredyffrin will be entitled to collect a conveyance fee (but not a treatment fee) – as of March 2020, the conveyance fee has not yet been established or charged.
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
East Whiteland Trunk Line Agreement	East Whiteland Township East Whiteland Municipal Authority Malvern Municipal Authority Borough of Malvern Valley Forge Sewer Authority	February 1, 1971	Transmission of sewage from the municipalities through the East Whiteland Trunkline (the "Trunkline") to the Valley Forge Sewage Treatment Plant ("VFSTP"), including charges for maintenance and repairs to the Trunkline.

Name of Contract	Parties to Contract	Date of Contract	Subject
Amendment to East Whiteland Trunk Line Agreement	East Whiteland Township East Whiteland Municipal Authority Malvern Municipal Authority Borough of Malvern Valley Forge Sewer Authority ("VFSA")	December 12, 1979	Addendum to the Agreement dated February 1, 1971 to address the reservation by EW for the VFSA of reserved capacity in the Trunkline and the Mill Lane Pump Station and the transmission of sewage from Charlestown Township through the Trunkline to the VFSTP. The addendum also adds VFSA as a municipality under the agreement, as it owns and operates the Charlestown Sewer System.
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
Amendment to East Whiteland Trunk Line Agreement	East Whiteland Township	April 18, 2014	Addendum to the Agreement dated February 1, 1971 establishing an

	East Whiteland Municipal Authority Valley Forge Sewer Authority		increased reserve capacity for the VFSA within the East Whiteland sewer system and establishing the related cost sharing between East Whiteland and VFSA.
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
Valley Forge Sewer Treatment Plant Agreement	Schuylkill Township East Pikeland Township Charlestown Township East Whiteland Township East Whiteland Municipal Authority Tredyffrin Township Tredyffrin Municipal Authority Willistown Township	November 1, 1970	Transmission and treatment of sewage from the municipalities to the Valley Forge Sewage Treatment Plant ("VFSTP"), including charges for maintenance and repairs to the VFSTP.

	Easttown Township Easttown Municipal Authority Malvern Borough Malvern Municipal Authority Valley Forge Sewer Authority ("VFSA")		
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
Composite Amendment No. 1	Schuylkill Township East Pikeland Township Charlestown Township East Whiteland Township Tredyffrin Township Willistown Township Easttown Township Malvern Borough East Whiteland Municipal Authority	December 1, 1974	This amendment amends portions of (and specifically Section 2.03 and certain Exhibits) of the Valley Creek Trunk line Agreement, the East Whiteland Trunk line Agreement and the Valley Forge Sewer Treatment Plant Agreement to address the construction

	Tredyffrin Municipal Authority Easttown Municipal Authority Malvern Municipal Authority Valley Forge Sewer Authority ("VFSA")		by and reimbursement of Tredyffrin Authority by the other municipalities for its construction of the portion of the Valley Creek Trunk Sewer located in Valley Forge State Park. Also addresses the award of and credit for certain grants from the EPA to each of the authorities for the respective collection systems.

Name of Contract	Parties to Contract	Date of Contract	Subject
Agreement	East Whiteland Municipal Authority Valley Forge Sewer Authority	December 27, 1978	East Whiteland Municipal Authority and VFSA agreed to share costs for the Sidley Road Trunk line repairs. Schedule A (detailing the repairs and referenced in the agreement) is not included.

Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
Amendment to Valley Forge Sewage Treatment Agreement	Schuylkill Township East Pikeland Township Charlestown Township East Whiteland Township East Whiteland Municipal Authority Tredyffrin Township Tredyffrin Municipal Authority Willistown Township Easttown Township Easttown Municipal Authority Malvern Borough Malvern Municipal Authority Valley Forge Sewer Authority (“VFSA”)	January 1, 1983	This amendment changed the interest rates for late payments.

Name of Contract	Parties to Contract	Date of Contract	Subject
Supplement to Valley Forge Sewage Treatment Agreement for the Purpose of Complying with the United States Environmental Protection Agency Regulations	Schuylkill Township East Pikeland Township Charlestown Township East Whiteland Township East Whiteland Municipal Authority Tredyffrin Township Tredyffrin Municipal Authority Willistown Township Easttown Township Easttown Municipal Authority Malvern Borough Malvern Municipal Authority Valley Forge Sewer Authority ("VFSA")	December 2, 1985	This supplement includes requirements that the municipalities, in order to comply with EPA regulations, enact ordinances to include monitoring, reporting and other requirements for industrial users and it gives VFSA authority to inspect, charge, fine, etc. industrial users and act on behalf of each municipality if necessary.

Name of Contract	Parties to Contract	Date of Contract	Subject
Addendum to Valley Forge Sewage Treatment Agreement for the Purpose of Permitting and administering the Sale of Reserved Capacity among the Parties	Schuylkill Township East Pikeland Township Charlestown Township East Whiteland Township East Whiteland Municipal Authority Tredyffrin Township Tredyffrin Municipal Authority Willistown Township Easttown Township Easttown Municipal Authority Malvern Borough Malvern Municipal Authority Valley Forge Sewer Authority ("VFSA")	May 26, 1994	This addendum addresses disparities between the reserved capacities of the various municipalities by allowing for the permanent sale of unused reserved capacity between the municipalities, with the consent of VFSA and pursuant to certain offer and sale procedures.

Name of Contract	Parties to Contract	Date of Contract	Subject
Wastewater Conveyance Agreement	Aqua Resources, Inc. Schuylkill Township East Pikeland Township Charlestown Township East Whiteland Township Tredyffrin Township Willistown Township Easton Township Easton Municipal Authority Malvern Borough Valley Forge Sewer Authority ("VFSA")	November 20, 2018	The transmission of sewage from the municipalities through the Valley Creek Trunkline (owned by Aqua) to be treated at Valley Forge Sewer Treatment Plant ("VFSTP"). The VFSA agrees to accept, treat and dispose of such sewage pursuant to this Agreement and the Valley Forge Sewage Treatment Plant Agreement.
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
Sewer Treatment Agreement	East Whiteland Township East Goshen Township Malvern Institute for Psychiatric and Alcoholic Studies	March 2, 2004	Transmission of flow from the Malvern Institute property located in East Goshen, through East Whiteland Township's

			system to the Valley Forge Sewage Treatment Plant. The agreement also addresses the permanent sewer easement that Malvern Institute conveyed and granted across its property to allow East Whiteland to construct a sanitary sewer line and the King Road Pump Station.
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
National Railroad Passenger Corporation License Agreement	National Railroad Passenger Corporation (NRPC) East Whiteland Township Municipal Authority	November 18, 1993	NRPC granted an exclusive license to East Whiteland to construct, maintain, repair, alter, renew, relocate and remove an iron sewer pipe, encased in a steel casing pipe, for a distance of approximately

			250 feet under NRPC's right-of-way. The pipe conveys sanitary sewage from the Southridge Subdivision to East Whiteland's collection system.
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
National Railroad Passenger Corporation Amendment to License Agreement	National Railroad Passenger Corporation East Whiteland Township Municipal Authority	May 6, 2002	Amends November 18, 1993 License Agreement. Changes description and location of pipe to be installed and adds additional lump sum rent payment of $16,315 for May 6, 2002 (date of Amendment) through October 31, 2018 and $250 fee for expenses and preparation of Amendment. Previous lump sum payment of $13,120 was made

			upon execution of original agreement (as well as $500 for expenses and license preparation).
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
National Railroad Passenger Corporation License Agreement	National Railroad Passenger Corporation East Whiteland Township	September 10, 1999	NRPC granted an exclusive license to East Whiteland to construct, maintain, repair, alter, renew, relocate and remove an iron sewer pipe, encased in a steel casing pipe, for a distance of approximately 267 feet near Sugartown Road. The pipe conveys sanitary sewage from the Sugartown Ridge Subdivision to East Whiteland's collection system.

Name of Contract	Parties to Contract	Date of Contract	Subject
Agreement with Public Utility or Municipality for Crossing under Railroad Private Property	Reading Company East Whiteland Municipal Authority	March 21, 1972 (no set term)	Reading Company (RC) granted a license across and under its tracks, right of way and property to East Whiteland Municipal Authority (EW) to lay, maintain, and use two steel pipes in steel casing pipes 1,600 feet west and 511 feet west of Valley Store Station in East Whiteland Township (the "Facilities"). EW is responsible for all costs of construction, relocation and removal and for all taxes assessed against the Facilities. There is an annual $40 charge for the license, to be adjusted by RC every fifth year commencing

			on January 1, 1977. In the event that RC deems it necessary that the Facilities be altered or changed, EW must do so within 30 days of notice of such from RC. Upon termination of the agreement (by RC if there is a breach by EW), EW is required to remove the Facilities and restore the premises to good condition.
Name of Contract	**Parties to Contract**	**Date of Contract**	**Subject**
License Agreement for Wire, Pipe and Cable Transverse Crossings and Longitudinal Occupations	Penn Central Transportation Company East Whiteland Municipal Authority	July 11, 1975 (no set term)	Penn Transportation Company (PTC) granted a license across and under its tracks, right of way and property to East Whiteland Municipal Authority (EW) to construct, maintain, alter

			renew, relocate and ultimately remove a sewage main under Railroad Bridge No. 2.73 and 2 manholes at valuation station 2284+49, located 1399 feet west of mile post 3 (west of Knickerbocker station) (the "Facilities"). EW is responsible for all costs of construction, relocation and removal and for any taxes assessed against the Facilities. In addition to reimbursement to PTC for the cost of preparing the agreement, there was a $1,100 licensing fee paid to PTC. PTC must consent to any alterations to the planned Facilities required by EW.

			In the event that PTC deems it necessary that the location of the Facilities be altered, EW must do so at EW's sole cost and expense. Upon termination of the agreement, EW is required to remove the Facilities and restore the premises to good condition, at EW's sole cost and expense.

Schedule 4.14

Seller Litigation

None.

Schedule 4.16(a)

Exception to Title to Acquired Assets

None.

Schedule 4.16(b)

Sufficiency

None.

Schedule 4.17

Pending Development Plans

1. Phase 1 – Conestoga Road (Rt. 401) (TO BE COMPLETED BY SELLER)

Scope of work is to connect 22 properties (one has been connected) to the existing 8" sanitary main within the right-of-way of Conestoga Road.

- This project requires a Highway Occupancy Permit (HOP) from PennDOT, which has been obtained.
- As of July, 2021, this project is essentially complete. The laterals have all been installed and the contractor is in the process of completing restoration work.
- It is anticipated that the project will be complete (including all paperwork) by the end of October, 2021.

Also see Required Sewer Projects to be completed by Buyer on Schedule 7.12.

Schedule 4.18

Land Development/Financial Security Agreements

None.

Schedule 5.04

Consents and Approvals

1. Pennsylvania Public Utility Commission (the "PaPUC") Approval of Transaction

2. PaPUC Approval of Consent to Assignment and Amendment to Sewage Treatment Agreements and Related Amendments

3. Pennsylvania Department of Environmental Protection (the "PaDEP") Approval of Sanitary Sewer Collection and Conveyance System Act 537 Plan recognizing transfer of wastewater collection system from Seller to Buyer

4. PaDEP transfer of all NPDES[3] and WQM Permits

[3] NPDES permits will not be transferred if the Malvern Hunt WWTP is decommissioned prior to closing, as anticipated.

Schedule 5.11

Buyer Litigation

None.

Schedule 6.05(e)

Missing Easements

To be provided at Closing.

Schedule 7.03(a)

Rates

Sewer District	**Rate**
Sewer District A	$400/EDU/Year or $33.33/EDU/Month
Sewer District B	$400/EDU/Year or $33.33/EDU/Month
Sewer District C	$542/EDU/Year or $45.17/EDU/Month
Sewer District D	$600/EDU/Year or $50.00/EDU/Month
Sewer District E	$480/EDU/Year or $40.00/EDU/Month

Commercial and Industrial users whose quarterly sewer discharge or water consumption is in excess of 100,000 gallons shall pay a quarterly charge of $6.20 per 1,000 gallons.

Schedule 7.12

Required Sewer Projects

A. North Bacton Hill Road and Swedesford Road:

   a. Generally consisting of those parcels abutting the following roads:

      i. North Bacton Hill Road from Swedesford Road to Spring Valley Road.

      ii. Spring Valley Road from North Bacton Hill Road to the Conestoga Road.

      iii. South Bacton Hill Road from Swedesford Road to the cul-de-sac.

      iv. Swedesford Road from Bacton Hill Road to a point approximately 620-feet west of the intersection.

B. Planebrook Road:

   a. Generally consisting of those parcels abutting the following roads and/or unopened streets:

      i. Planebroook Road form Bracken Avenue to the Route 202 overpass.

      ii. Elk Drive from Planebrook Road to the cul-de-sac.

      iii. Fairway Drive from Planebrook Road to the cul-de-sac.

      iv. Golf View Lane from Planebrook Road to the cul-de-sac.

      v. Prospect Avenue from Planebrook Road to UPI #42-30-8 (2 Prospect Avenue), including a spur to service UPI #42-3-174.

      vi. Bracken Avenue form Planebrook Road to Coffman Street including the following spurs:

         1. East of Coffman Street to service UPI #42-3-216.1, UPI #42-3-216.2 and UPI #42-3-216.3

         2. North of Bracken Avenue within "Davis Avenue" to service UPI #42-3R-28

The installations in A and B above shall be in general conformance with the following design plans completed by ARRO Consulting Inc.:

- Plans Entitled "*North Bacton Hill & Swedesford Road Areas Sanitary Sewer Phase 2"*, 24-sheets, dated January 23, 2020

- Plans Entitled *"Planebrook Road Areas Sanitary Sewers Phase 4"*, 19 sheets, dated January 23, 2020.

Gravity and Low Pressure System Service Connections for A and B above:

- The Required Sewer Projects described in sections A and B above will provide service connections to the curb, ROW line, or property line as shown on the plans.
- The respective property owners will be responsible, at their own expense, for connecting to the service connection provided as noted above. Buyer will have no responsibility for infrastructure located within the boundaries of the property owners' properties.
- Notwithstanding references to "E-One Grinder Pumps" on the plans, Buyer will have no responsibility for grinder pumps which will remain the responsibility of the property owners served by such grinder pumps.

Permitting - The Township is in the process of obtaining all required permits for the above projects in A and B above.

Easements - Various easements will be required for portions of the proposed sewer within Prospect Avenue, Bracken Avenue and Davis Avenue in the Planebrook Road project. The Township will retain responsibility for securing all necessary easements per Section 7.12(a) of the Asset Purchase Agreement.

1. EXECUTIVE SUMMARY

As required by PA Act 12 of 2016 and following the guidelines of the "Uniform System of Accounts for Class A Wastewater Utilities", an assessment of the tangible assets of facilities and equipment of the East Whiteland Township wastewater utility has been prepared as part of the asset purchase agreement with Aqua Pennsylvania Wastewater, Inc. (Aqua). Each facility and class of equipment was coded based on Section 300 of the "Wastewater Utility Plant Accounts" of the Guidelines. The Asset Survey included the 12 Township owned pump stations and associated force mains, and approximately 60 miles of gravity sewers. Asset cost information was derived from various sources. Site visits to each of the facilities were conducted to inventory the equipment and assess conditions.

Site inventories and facility conditions were documented on facility information sheets and summarized in the facility description summaries.

Conditions of the Pump Stations varies from fair to very good based on the age and/or completion of recent improvements.

Gravity sewer and force main conditions were not determined. The piping installation period ranges from approximately the late 1970s to 2019.

A complete list of the assets and available original costs is provided in Section 8 of this report.

2. PURPOSE OF REPORT

The purpose of this report is to "conduct an assessment of the tangible assets of the selling utility" per the requirements of PA Act 12 of 2016.

This engineering assessment will be used by the Utility Value Experts (UVEs) retained by both the seller (East Whiteland Township) and buyer (AQUA). The engineering assessment followed the practices and procedures of the Public Utility Commission (PUC) and National Association of Regulatory Utility Commissioners (NARUC) Systems of Accounts. The engineering assessment report documents the conditions and original costs of East Whiteland Township's assets that will be used as the common list for the UVEs to develop their appraisal of the system.

The report preparation process included meeting with key Township and Aqua representatives to identify and confirm specific information needed to support the assessment and to prepare the report, providing a mutually agreed upon scope of work with East Whiteland Township and Aqua. The inventory is a compilation of data gathered by the Township and Pennoni, developed from institutional knowledge, available records, maps, work orders, payment records from construction projects, GIS, site evaluations, and other sources to provide an inventory and listing.

This report contains the following:

- An inventory of the used and useful assets to be transferred, compiled by year and account (codes).
- A list of non-depreciable property such as land and rights-of-way.
- A review of system components, plans, and reports of key facilities. This includes:
  - Permitted discharges, including regulatory requirements
  - Pumping Stations (12 each), including force mains
  - Gravity collection system
  - Metering stations
- Summary of the operation and maintenance expenses based upon review of Township operating records.
- An assessment of the identified assets.
- Determination and/or establishment of an original cost of construction for each asset.

Assets were identified through various sources. Force main sizes and quantities were taken from GIS and project drawings. Pump Stations were field inventoried and evaluated; and, supplemented with information obtained from drawings, where available. Asset costs are based on Construction Escrow Releases/Estimates where available or estimated current cost and back calculated to the year of installation using the ENR Construction Cost Index.

A coding system as described in Section 300 of the Uniform System of Accounts for Class A Wastewater Utilities was used for classifying various assets. Section 300 as well as the listing of codes can be found in Appendix B. The entire Uniform System of Accounts can be found in the Digital Files.

3. SYSTEM DESCRIPTION

System Summary

East Whiteland Township is responsible for the safe collection and transmission of an average over 1.062 million gallons per day (MGD) of wastewater generated in southeastern Pennsylvania (A map of the service areas is located in Appendix A, Figure A1). East Whiteland Township's facilities serve residential, commercial, institutional, and industrial customers all within Chester County. The Township owns and operates a system consisting of 12 pump stations and associated force mains, and approximately 60 miles of gravity collection system mains and interceptor sewers for the conveyance of wastewater to the Valley Forge Sewer Authority Wastewater Treatment Plant via the Valley Creek Trunk Sewer. The Township does not have any property held for future use.

In addition to customers within the Township, East Whiteland Township also collects/conveys sewage to/from municipalities that border the Township including Malvern Borough, Tredyffrin Township Charlestown Township and Willistown Township. Agreements with these municipalities, (or entities operating their respective system) outline the responsibilities regarding this relationship.

4. INVENTORY OF ASSETS

4.1. PUMP STATIONS

P.S. 1 - AKA Deer Run PS

Facility Description (see attached Information Sheet)

P.S. 1 is located at 15 Deer Run Lane and is equipped with (2) 90-GPM dry pit submersible pumps. Wastewater is discharged through an 830 foot, 4-inch ACP force main that ties into the existing sewage collection system at Manhole 826 located on Conestoga Road near Deer Run Ln. The pump station was installed in 1976.

The pump wet well is (5-ft diameter, 12-ft deep) with 24-inch MH cover hatchway. The control panel is custom manufactured.

The Building (10-ft x 12-ft) is constructed of concrete with brick facade and asphalt shingle roof in good condition. The building contains florescent lighting and 1 steel door.

The Generator is a Generac SD00353G163, 35 KW unit with 132-gallon fuel tank. The Automatic Transfer Switch (ATS) is manufactured by Cummins Power Command.

The property is surrounded by a 136 LF 6-ft chain link with barbed wire fence.

Property Condition

The building is in good condition, the roof is in good condition and all HVAC systems appear to be in good condition.

OVERALL BUILDING AND FACILITY ASSESSMENT						
Pumps and controls are original and in fair condition. Building and other facilities are in good condition. Generator is was replaced in 2018 and is in very good condition.						

P.S. 2 - AKA Mill Lane PS

Facility Description (see attached Information Sheet)

P.S. 2 is located at 202 Conestoga Rd and is equipped with (3) 1600-GPM dry pit submersible pumps. Wastewater is discharged through a 3400 LF, 14-inch DIP force main that ties into the existing sewage collection system at Manhole 826 located on Conestoga Road near Deer Run Lane. The pump station was installed in 1976 and reconstructed 2013.

The pump wet well is Concrete (9-ft x 30-inch x 31-ft deep) with 42-inch x 42-inch and 36-inch x 36-inch hatchways. The control panel is manufactured by Healy-Ruff. There are (6) 12-inch gate valves and (3) 12-inch check valves installed in 2013. The influent line to the wet well contains a bar screen.

The Building (32-ft x 22-ft) is constructed of masonry block and asphalt shingle roof in good condition. The building contains 2 steel doors.

The Generator is an Onan DFEK-1207638, 500 KW unit with 850-gallon fuel tank. The Automatic Transfer Switch (ATS) is an ASCO 7000 series.

The property is surrounded by a 600 LF 6-ft cyclone with barbed wire fence.

Property Condition

The building is in very good condition, the roof is in good condition and all HVAC systems are in very good condition.

OVERALL BUILDING AND FACILITY ASSESSMENT						
The pump station was built in 2013 and is in excellent condition. The property is shared with the Police Department which includes their impoundment lot. The former pump station is used for storage, pumps and related equipment have been removed.						

P.S. 3 - AKA Wilburdale PS

Facility Description (see attached Information Sheet)

P.S. 3 is located at 101 Flat Rd. and is equipped with (2) 930-GPM submersible pumps. Wastewater is discharged through a 1935 LF, 10-inch PVC force main that ties into the existing sewage collection system at Manhole 1202 located on Flat Road by Sidley Road. The pump station was installed in 1979 and reconstructed 2017.

The pump wet well is precast concrete (12-ft dia. x appr. 18-ft deep) with 6-ft x 4.5-ft hatchway. There are (3) 4-inch gate valves, (2) 4-inch check valves within a (12.5-ft x 10-ft x 5-ft deep) valve box installed in 2017. The control panel is manufactured by Stacon.

The Building (15-ft x 13-ft) is constructed of concrete block and asphalt shingle roof in very good condition. The building contains outdoor walpacks lighting and 1 steel door.

The Generator is an MTU 4R0113DS50 50 KW unit with 185-gallon fuel tank. The Automatic Transfer Switch (ATS) is an ASCO 7000 series.

The property is not fenced.

Property Condition

The building is in very good condition, the roof is in very good condition.

OVERALL BUILDING AND FACILITY ASSESSMENT						
The facility was installed in 2017 and is in excellent condition.						

P.S. 4 - AKA Lee Boulevard PS

Facility Description (see attached Information Sheet)

P.S. 4 is located at 13 Lee Blvd and is equipped with (2) 470-GPM Submersible pumps. Wastewater is discharged through a 3310 LF, 8-inch DIP force main that ties into the existing sewage collection system at Manhole 1582 located on Yellow Spring Road at Lee Boulevard. The pump station was installed in 1987 and reconstructed 2007.

The pump wet well is precast concrete (9-ft diam. X 15-ft deep (est)) with 4.5-ft x 4.5-ft aluminum hatchway. There are (2) 6-inch check valves and (2) 6-inch gate valves. The control panel is manufactured by Flygt.

The Building (11.5-ft x 15.5-ft) is constructed of prefabricated masonry and asphalt shingle roof in good condition. The building contains Halogen wall pack lighting and 1 steel door.

The Generator is an Katolight D50FJJ4T2 50 KW unit with 140-gallon fuel tank. The Automatic Transfer Switch (ATS) is manufactured by ASCO.

The property is surrounded by a 115 LF 6-ft cyclone with barbed wire fence.

Property Condition

The building is in very good condition, the roof is in good condition.

P.S. 5 - AKA Meadowview PS

Facility Description (see attached Information Sheet)

P.S. 5 is located at 317 Swedesford Rd and is equipped with (2) 80-GPM submersible pumps. Wastewater is discharged through a 1245 LF, 4-inch ACP force main that ties into the existing sewage collection system at Manhole 822 located on Manor View Circle by Valley Creek Road. The pump station was installed in 1980.

The pump wet well is precast concrete (6-ft dia. x 12-ft deep) with 3-ft x 6-ft hatchway. There are (2) 4-inch check valves and (2) 4-inch plug valves. The control panel is custom manufactured.

The property is surrounded by a 112 LF chain link and wood stockade fence.

Property Condition

The facility is in fair condition.

P.S. 6 - AKA Flat Road PS

Facility Description (see attached Information Sheet)

P.S. 6 is located at 601 Flat Rd and is equipped with (2) 275-GPM submersible pumps. Wastewater is discharged through a 1655 LF, 6-inch ACP force main that ties into the existing sewage collection system at Manhole 1323 located on Great Valley Parkway parallel to Flat Road. The original pump station was installed in 1979. In January of 2019 a sinkhole developed at the station. This required the station to be reconstructed at a new location. The new station went online in 2019. Components, such as the control panel and pumps (2002), were incorporated from the decommissioned Frame Avenue Pump Station.

The pump wet well is precast concrete (8-ft diam. x 16.85-ft deep) with a 3-ft x 4-ft hatchway. There are (2) 4-inch check valves and (2) 4-inch gate valves. The control panel is manufactured by Flygt. The facility has no generator.

The property is not fenced in.

Property Condition

The facility is in very good condition.

Components, such as the control panel and pumps (2002), were incorporated from the decommissioned Frame Avenue Pump Station. All in very good condition.

P.S. 7 - AKA Lapp Road PS

Facility Description (see attached Information Sheet)

P.S. 7 is located at 510 Lapp Rd and is equipped with (2) 315-GPM submersible pumps. Wastewater is discharged through a 3715 LF, 6-inch PVC force main that ties into the existing sewage collection system at Manhole 746 located on Valley Stream Parkway near Morehall Road. The pump station was installed in 1995 and upgraded in 2000.

The pump wet well is precast concrete (6-ft dia x 20-ft deep (est)) with 4-ft x 4-ft aluminum hatchway. There are (2) 4-inch check valves and (2) 4-inch gate valves. The control panel is manufactured by Flygt.

The Generator is an Onan DGDA-3384553 80 KW unit. The Automatic Transfer Switch (ATS) is an ASCO 300 series. The wet well is oversized to accommodate excess volume to compensate for the lack of a generator.

The property is surrounded by a 150 LF 60-ft chain link with barbed wire fence.

Property Condition

The facility is in fair condition.

P.S. 8 - AKA Westgate PS

Facility Description (see attached Information Sheet)

P.S. 8 is located at 331 Lancaster Ave and is equipped with (2) 700-GPM pumps. Wastewater is discharged through a 1620 LF, 8-in PVC force main that ties into the existing sewage collection system at Manhole 530 located on Lancaster Avenue near Maple Linden Lane. The pump station was installed in 1988 and upgraded in 2001.

The pump wet well is precast concrete (9-ft dia. x 12-ft deep) with aluminum 3-ft x 6-ft hatchway. There are (2) 6-inch check valves and (2) 6-inch gate valves. The control panel is manufactured by Flygt.

The Generator is an Onan DGEA 125 KW unit with integral fuel tank. The Automatic Transfer Switch (ATS) is manufactured by Onan.

The property is surrounded by a 150 LF 6-ft chain link with barbed wire fence.

Property Condition

The facility is in fair condition.

P.S. 11 - AKA Hillbrook Circle PS

Facility Description (see attached Information Sheet)

P.S. 11 is located at 379 Conestoga Rd and is equipped with (2) 295-GPM submersible pumps. Wastewater is discharged through a 785 LF, 4-inch PVC force main that ties into the existing sewage collection system at Manhole 985 located on Clover Mill Lane near Craig Lane. The pump station was installed in 2000.

The pump wet well is precast concrete (8-ft diam x 25-ft deep) with 3-ft x 5-ft alum hatchway. There are (2) 4-inch check valves and (2) 4-inch gate valves. The control panel is manufactured by Flygt.

The Building (12-ft x 15-ft) is constructed of concrete block and asphalt shingle roof in good condition. The building contains florescent lighting and 1 steel door.

The Generator is an Onan DGCA-5007330GS 50 KW unit. The Automatic Transfer Switch (ATS) is manufactured by Cummins.

The property is not fenced.

Property Condition

OVERALL BUILDING AND FACILITY ASSESSMENT						
The overall facility is in good condition. The building is in very good condition and the roof is in good condition.						

P.S. 12 - AKA King Road PS

Facility Description (see attached Information Sheet)

P.S. 12 is located at 340 King Rd within an easement in Williston Township and is equipped with (2) 258-GPM Submersible pumps. Wastewater is discharged through a 2400 LF, 4-inch PVC force main that ties into the existing sewage collection system at Manhole 338 located on Amy Lane near W. King Road. The pump station was installed in 2004.

The pump wet well is precast concrete (7-ft diam. x 15-ft est) with 4-ft x 4.5-ft aluminum hatchway. There are (2) 4-inch check valves and (2) 4-inch gate valves. The control panel is manufactured by Flygt.

The Building (13-ft x 10-ft) is constructed of concrete block and asphalt shingle roof in good condition. The building contains halogen wall pack lighting and 1 steel door.

The Generator is an Onan DGHE-5636689B 50 KW unit with 145-gallon fuel tank. The Automatic Transfer Switch (ATS) is manufactured by Cummin Power Command.

The property is not fenced.

Property Condition

The building is in very good condition, the roof is in good condition and all HVAC systems are in good condition.

OVERALL BUILDING AND FACILITY ASSESSMENT						
The overall facility was in very good condition. The roof was in good condition.						

P.S. 13 - AKA Malvern Hunt PS

Facility Description (see attached Information Sheet)

P.S. 13 is located at 30 Corbin Dr and is equipped with (2) 300-GPM submersible pumps. Wastewater is discharged through a 2860 LF, 6-inch DIP force main that ties into the existing sewage collection system at Manhole 101 located on Chester Valley Trail near Swedesford Road. The pump station was installed in 2000.

The pump wet well is precast concrete (9-ft dia. x 15-ft deep (est)) with 7.5-ft x 6-ft aluminum hatchway. The control panel is manufactured by Flygt. There are (2) 6-inch check valves and (2) 6-inch gate valves. The influent line to the wet well contains a 3 HP Muffin Monster.

The Building (14-ft x 16-ft) is constructed of concrete block with stucco and asphalt shingle roof in very good condition. The building contains halogen wall pack lighting and 1 steel door.

The Generator is an Katolight D50FJJ4 50 KW unit with 150-gallon fuel tank. The Automatic Transfer Switch (ATS) is manufactured by Katolight.

The property is surrounded by a 200 LF 6-ft cyclone fence. This facility also has a chemical dosing system, which contains 100-gallon fuel tank and LMI Dosing pump. The system is not currently in use.

Property Condition

The building is in fair condition, the roof is in very good condition and all HVAC systems are in very good condition.

OVERALL BUILDING AND FACILITY ASSESSMENT						
The building, generator and control panels are all in fair condition. The pump station guide rails and some support bracket have begun to rust.						

P.S. 14 - AKA Planebrook Road PS

Facility Description (see attached Information Sheet)

P.S. 14 is located at 170 Cricket Drive and is equipped with (2) 390-GPM submersible pumps. Wastewater is discharged through a 2545 LF, 8-inch PVC force main that ties into the existing sewage collection system at Manhole 113 located on Phoenixville Pike at Chester Valley Trail. The pump station was installed in 2018.

The pump wet well is precast concrete (9-ft dia. x 18-ft Deep) with 6-ft x 6-ft aluminum hatchway. There are (2) 4-inch check valves and (6) 4-inch gate valves. The control panel is manufactured by Flygt/Stacon.

The Building (12.5-ft x 15.5-ft) is constructed of Concrete Block and asphalt shingle roof in very good condition. The building contains LED wall pack lighting and 1 steel door.

The Generator is an MTU4R0113 DS50 50 KW unit with 185-gallon fuel tank. The Automatic Transfer Switch (ATS) is an ASCO 7000 series.

The property is surrounded by a 225 LF 6-ft cyclone fence.

Property Condition

The building is in very good condition, the roof is in very good condition and all HVAC systems are in good condition.

4.2. COLLECTION SYSTEM

East Whiteland Township owns the collection system identified within this report. There are also privately owned systems within the Township that connect to the Township system. collection system generally consists of 8-inch to 36-inch gravity piping and laterals within the right of way. A map of the collection system can be found in Appendix A, Figure A1. Related cost data for the collection system can be found in Section 8 under account codes 361.21, 361.23, and 360.21.

4.3. METER PITS

A total of eleven (11) meter pits measure flow to/from the Township. However, East Whiteland Township only owns the following three (3):

- Erin Glen Meter located within the vicinity of Kerry lane and Iris way adjacent to Malvern Borough.
- Woodview Apartments Meter located within the East Whiteland Township portion of the apartment complex at the southeast corner of the Township.
- Mathews Road meter located on the border with Tredyffrin Township at the southeast corner of the Township.

All other meters are owned and operated by other municipalities or the Valley Forge Sewer Authority.

5. OWNED PROPERTY & EASEMENTS OF VALUE

Property that was directly purchased by the Township and easements acquired are listed in Section 8 – "List of Assets and Costs". The value of said easements are listed with a purchase price of $1 and included in the original purchase price of the facilities listed in Section 8 – "List of Assets and Costs".

Frazer, PA 19355

B. PROJECT/FACILITY (Name):
Malvern Hunt WWTP

C. LOCATION (Municipality, County): SITE ID#: **527339**
East Whiteland Township, Chester County

D. THIS PERMIT APPROVES THE OPERATION OF SEWAGE FACILITIES CONSISTING OF:
The Malvern Hunt Pump Station with comminutor, an influent bar screen, a two sell aerated treatment lagoon, a storage lagoon, a chlorine disinfection system, and spray fields.

Pump Stations: _____	Manure Storage:	Sewage Treatment Facility:		
Design Capacity: _____ GPM	Volume: _____ MG	Annual Average Flow:	**0.105**	MGD
	Freeboard: _____ inches	Design Hydraulic Capacity:	**0.128**	MGD
		Design Organic Capacity:	**222**	lb/day

E. APPROVAL GRANTED BY THIS PERMIT IS SUBJECT TO THE FOLLOWING:

1. **Permit Renewal:** All operations and procedures shall be in accordance with the Water Quality Management Permit application dated **5/23/2016**, its supporting documentation and addendums dated _____, which are hereby made a part of this permit.

   Amendments: All construction, operations and procedures shall be in accordance with the Water Quality Management Permit Amendment application dated _____ and its supporting documentation and addendums dated _____, which are hereby made a part of this amendment.

   Except for any herein approved modifications, all terms, conditions, supporting documentation and addendums approved under Water Quality Management Permit No. _____ dated _____ shall remain in effect.

   Transfers: Water Quality Management Permit No. _____ dated _____ and conditions, supporting documentation and addendums are also made part of this transfer.

2. Permit Conditions Relating to Sewerage are attached and made part of this permit.
3. Special Conditions **1 through XVII** are attached and made part of this permit.

F. THE AUTHORITY GRANTED BY THIS PERMIT IS SUBJECT TO THE FOLLOWING FURTHER QUALIFICATIONS:

1. If there is a conflict between the application or its supporting documents and amendments and the attached conditions, the attached conditions shall apply.
2. Failure to comply with the rules and regulations of DEP or with the terms or conditions of this permit shall void the authority given to the permittee by the issuance of this permit.
3. This permit is issued pursuant to the Clean Streams Law Act of June 22, 1937, P.L. 1987, as amended 35 P.S. §691.1 *et seq.* Issuance of this permit shall not relieve the permittee of any responsibility under any other law.

SPECIAL CONDITIONS

Water Quality Management Permit No. 1599418

Malvern Hunt WWTP

East Whiteland Township, Chester County

I. Discharge Limitations and Monitoring Requirements

Effluent from the sewage treatment plant shall be sampled at a point after chlorination and shall be limited at all times as follows:

	Discharge Limitations (mg/l)			Monitoring Requirements	
Parameter	Average Monthly	Average Weekly	Instantaneous Maximum	Measurement Frequency	Sample Type
Influent Flow (mgd)	0.105			Continuous	Recorded
$CBOD_5$	25		50	1/Month	Grab
Suspended Solids	30		60	1/Month	Grab
Fecal Coliform	200/100 ml as geometric average			1/Month	Grab
pH	Within limits of 6.0 to 9.0 standard units at all times			1/Month	Grab

Additional treatment requirements include the satisfactory disposal of sludge and the reduction of quantities of oils, greases, acids, alkalis, toxic, taste and odor producing substances, inimical to the public interest to levels which will not pollute the receiving waters.

Monitoring results shall be reported monthly on the Discharge Monitoring Report (DMR). The term "grab" sample means an individual sample collected in less than 15 minutes. Samples and measurements taken as required, herein, shall be representative of the volume and nature of the monitored discharge.

II. Copies of monthly Discharge Monitoring Reports must be submitted within 28 days of the end of the monitoring period to:

Department of Environmental Protection
Southeast Regional Office
Water Management
2 East Main Street
Norristown, PA 19401

III. Groundwater Monitoring Requirements

The permittee shall effectively monitor the quality of the groundwater. The parameters to be tested, and frequency of analysis and other monitoring requirements shall be as follows:

A. Quarterly analysis of groundwater sampled at groundwater monitoring wells **MW-L1, MW-L2, MW-L3, MW-S1, MW-S2, MW-S3, MW-S6, MW-S7, and MW-S8,** shall consist of: static water level, sampling depth, turbidity, pH, chloride, total phosphorus, ammonia nitrogen, nitrate nitrogen, nitrite nitrogen, total dissolved solids, fecal coliform, and alkalinity.

B. Groundwater elevations must be measured prior to purging the groundwater monitoring well.

C. Before collection of the groundwater sample, a groundwater monitoring well shall be properly purged and allowed to recover to at least 90 percent of the well volume that was present prior to purging.

D. All groundwater samples shall be collected from within the top five feet of the water elevation within the well column.

IV. Groundwater Monitoring Data Reporting Requirements

All groundwater data shall be submitted to DEP **annually** and be in **report form.** The report shall be due to DEP within 28 days of the end of the month of permit issuance. For example, if your permit was issued on March 4th, then your annual report is due by April 28th. The annual report shall be mailed under separate cover and addressed to:

Department of Environmental Protection
Southeast Regional Office
Water Management Program
2 East Main Street
Norristown, PA 19401

Attention: Hydrogeologist
Planning Section

V. The annual groundwater monitoring report shall include the following information:

A. General Information

i. Facility name
ii. Facility permit number
iii. Facility location (including municipality and county)
iv. Facility contact information:

a. permittee name, address, and telephone number
b. contact name and title
c. facility operator name, address, and telephone number
d. facility consultant name, address, and telephone number

B. Site Data

i. A brief narrative that provides the date and description of any facility event which may have impacted any part of the groundwater monitoring program. (e.g., collapse of groundwater monitoring well, etc.).

ii. Average effluent flow for the year covered by this report.

iii. In tabular form, the following information needs to be provided for at least the last 5 years of system operation:

a. Date of sampling
b. Groundwater elevations
c. Sampling depth
d. Identification of upgradient and downgradient wells
e. The results of the analysis of the samples

iii. Background groundwater data generated prior to system start-up. **This information is absolutely needed and needs to be included in the data tabulation.**

C. Comprehensive Groundwater Evaluation (CGE)

As part of the facility's 5-year permit renewal application, the permittee shall submit a report that is a result of a comprehensive evaluation of the systems impact on groundwater. A Registered P.G. must identify any trends which may pose a threat to human health or certify that none are present. Should adverse impacts to groundwater be identified, the permittee needs to recommend actions to address the potential threat.

D. **Groundwater Background Report**

Within 60 days of system start up, or upon issuance of permit renewal a Groundwater Background Report shall be submitted to DEP. The report shall include the follow information:

i. Site Information

a. Brief narrative, including site limitations.
b. Soil type and bedrock lithology beneath the absorption areas.
c. Site drawings showing general location of absorption fields and monitoring wells. Drawings must show site topography.

ii. Construction details of each groundwater monitoring well shall include:

a. Well depth.
b. Casing depth.
c. Static water levels.
d. Surface elevation.
e. Well log.
f. Water bearing zones.
g. Top of casing elevation.
h. Ground surface elevation.

VI. Unless, otherwise, specified in this permit, the test procedures for analysis of pollutants shall be those contained in 40 C.F.R. Part 136, or alternative test procedures approved pursuant to that Part. For the analysis of CBOD5, consult Section 507 of Standard Methods.

VII. Effective disinfection to control disease producing organisms shall be the production of an effluent which will contain a concentration neither greater than 200/100 ml of Fecal Coliform organisms, as a geometric average value nor greater than 1000/100 ml of these organisms in a more than 10 percent of the samples tested.

VIII. If the permittee monitors any pollutant more frequently than the permit requires, the results of this monitoring shall be incorporated, as appropriate, into the calculations used to report self-monitoring data on the DMR.

IX. The authorization to discharge contained in Section D of this permit shall expire in five years from the date of issuance, or reissuance. Application for renewal of this permit, or notification of intent to cease discharging by the expiration date, must be submitted to the Department at least 180 days prior to the above expiration date (unless permission has been granted by the Department for submission at a later date). In the event that a timely and complete application for renewal has been submitted and the Department is unable, through no fault of the permittee, to reissue the permit before the above expiration date, the terms and conditions of this permit will be automatically continued and will remain fully effective and enforceable pending the grant or denial of the application for permit renewal. The application for renewal shall be submitted on the appropriate Water Quality Management Part II Application forms and shall include a tabulated summary of all groundwater monitoring data for the previous five years, including a discussion of groundwater quality trends resulting from this discharge.

X. Sprayfield Weekly Maximum Hydraulic Loadings

A. Effluent flows to each sprayfield must be consistent with the maximum hydraulic loading requirements of the following tables, which provide the weekly maximum gallons for each irrigation zone.

MAXIMUM WEEKLY SPRAYFIELD HYDRAULIC LOADINGS IN GALLONS

Spray Zone 1 6.16 Acres Woods		
Month	Inches/Acre/Week	Maximum/Week Gallons
January	0.50	83,671
February	0.50	83,671
March	1.27	212,539
April	1.50	251,020
May	2.00	334,691
June	2.50	418,369
July	2.50	418,369
August	2.50	418,369
September	2.50	418,369
October	1.55	259,410
November	1.16	194,126
December	0.50	83,671

Spray Zone 2 6.19 Acres Woods		
Month	Inches/Acre/Week	Maximum/Week Gallons
January	0.50	84,079
February	0.50	84,079
March	1.27	213,574
April	1.50	252,243
May	2.00	336,321
June	2.50	420,406
July	2.50	420,406
August	2.50	420,406
September	2.50	420,406
October	1.55	260,673
November	1.16	195,072
December	0.50	84,079

Spray Zone 3 6.15 Acres Woods		
Month	Inches/Acre/Week	Maximum/Week Gallons
January	0.50	83,536
February	0.50	83,536
March	1.27	212,194
April	1.50	250,613
May	2.00	334,148
June	2.50	417,690
July	2.50	417,690
August	2.50	417,690
September	2.50	417,690
October	1.55	258,989
November	1.16	193,811
December	0.50	83,536

B. The permittee shall include with the monthly Discharge Monitoring Report a Supplemental Land Application System Form 3800-FM-BPNPSM0449 that indicates the gallons per day discharged to the spray irrigation zones.

C. Spray irrigation events shall consist of simultaneous operation of two zones with one zone left off for a week-long resting period. All zones shall be rested each month.

D. Application of the effluent shall be managed to prevent runoff from the permitted spray fields and ponding of effluent.

E. No irrigation is to occur on frozen soils.

F. No irrigation is to occur if more than 0.5 inches of rainfall has fallen during the previous 24 hours.

G. The operator is to assess soil moisture content and soil/vegetation conditions frequently. It is the operator's responsibility to inspect the fields on a routine basis to prevent and/or address damage to the irrigation fields.

H. The spray fields shall be maintained to ensure that vegetation does not interfere with or impair proper operation of the spray heads.

I. Fallen trees in wooded spray fields are required to be removed. All work must be conducted during dry or frozen soil conditions to prevent damage to the soil.

XI. At all times, the wastewater level in the storage lagoon shall be managed within the low and high water level parameters as designed. The water level shall be controlled so that a freeboard of at least 24 inches is maintained at all times. The Department must be notified if the water level is anticipated to enter freeboard.

XII. Recording of Results

For each measurement or sample taken pursuant to the requirements of this permit, the permittee shall record the following information:

A. The exact place, date, and time of sampling or measurement.
B. The person(s) who performed the sampling or measurement.
C. The dates the analyses were performed.
D. The person(s) who performed the analyses.
E. The analytical techniques or methods used.
F. The results of such analyses.

XIII. Recordkeeping and Retention

The permittee shall keep records of operation and efficiency of the wastewater treatment facilities. All records of monitoring activities and results (including all original strip chart recordings for continuous monitoring instrumentation and calibration and maintenance records), copies of all reports required by this permit, and records of all data used to complete the application for this permit shall be retained by the permittee for three (3) years. The three-year period shall be extended as requested by the Department.

XIV. The facility shall be operated under the charge of a responsible operator(s) certified under the Pennsylvania Water and Wastewater Systems Operations Certification Act (Act 11). The operator(s) shall comply with the continuing education requirements required under the regulations and guidelines related to Act 11.

XV. Laboratory Certification

Facilities that test or analyze environmental samples used to demonstrate compliance with this permit shall be in compliance with laboratory accreditation requirements of act 90 of 2002 (27 Pa. Code C.S. §§ 4101-4113) and 25 Pa. Code Chapter 252, relating to environmental laboratory accreditation. An environmental laboratory is any facility engaged in the testing or analysis of environmental samples required by a statute administered by the Department relating to the protection of the environment or of public health, safety, and welfare.

XVI. Right of Entry

Pursuant to Sections 5(b) and 305 of Pennsylvania's Clean Stream Law, the permittee shall allow authorized representatives of Department of Environmental Protection upon the presentation of credentials and other documents as may be required by law:

A. To enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this permit.

B. To have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit.

C. To inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit.

D. To sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the Clean Water Act or The Clean Streams Law, any substances or parameters at any location.

XVII. If there is a change in ownership of this facility or in permittee name, an application for transfer of permit must be submitted to the Department.

WASTEWATER UTILITY PLANT ACCOUNTS

The wastewater utility plant accounts have been designed utilizing an account matrix. The matrix employs a list of object accounts which in effect act as control accounts. The object accounts are further segregated by the matrix into classifications by functions or subaccount. The instructions for segregating the object accounts to the function subaccount are contained in Accounting Instruction 32. Listed below are the object account descriptions.

351. Organization

This account shall include all fees paid to federal or state governments for the privilege of incorporation and expenditures incident to organizing the corporation, partnership or other enterprise and putting it into readiness to do business. A sample of items to be included in this account are listed below.

1. Actual cost of obtaining certificates authorizing an enterprise to engage in the public utility business.
2. Fees and expenses for incorporation.
3. Fees and expenses for mergers or consolidations.
4. Office expenses incident to organizing the utility.
5. Stock and minute books and corporate seal.

Note A:--This account shall not include any discounts upon securities issued or assumed; nor shall it include any costs incident to negotiating loans, selling bonds or other evidences of debt, or expenses in connection with the authorization, issuance and sale of capital stock.

Note B:--Exclude from this account and include in the appropriate expense account the cost of preparing and filing papers in connection with the extension of the term of incorporation unless the first organization costs have been written off. Where charges are made to this account for expenses incurred in mergers, consolidations or reorganizations, amounts previously included herein or in similar accounts in the books of the companies concerned shall be excluded from this account.

352. Franchises

A. This account shall include amounts paid to the federal government, to a state or to a political subdivision thereof in consideration for franchises, consents or certificates, running in perpetuity or for a specified term of more than one year, together with necessary and reasonable expenses incident to procuring such franchises, consents or certificates of permission and approval, including expenses of organizing and merging separate corporations, where statutes require solely for the purpose of acquiring franchise.

B. If a franchise or certificate is acquired by assignment, the charge to this account in respect thereof shall not exceed the amount paid therefor by the utility to the assignor, nor shall it exceed the amount paid by the original grantee, plus the expense of acquisition to such grantee. Any excess of the amount actually paid by the utility over the amount specified shall be charged to account 426 - Miscellaneous Nonutility Expenses.

C. When any franchise has expired, the book cost thereof shall be credited hereto and charged to account 426 - Miscellaneous Nonutility Expenses, or to account 110.1 - Accumulated Amortization of Utility Plant in Service, as appropriate.

D. Records supporting this account shall be kept so as to show separately the book cost of each franchise.

Note:--Annual or other periodic payments under franchises shall not be included herein but in the appropriate expense account.

353. Land and Land Rights

This account shall include the cost of land and land rights used in connection with wastewater collection, pumping, treatment and disposal, reclaimed water treatment and distribution and general plant operations (See Accounting Instruction 24). A sample of items to be included in this account are listed below:

1. Bulkheads buried, not requiring maintenance or replacement.
2. Cost, first, of acquisition including mortgages and other liens assumed (but not subsequent interest thereon).
3. Condemnation proceedings, including court and counsel costs.
4. Consents and abutting damages, payment for.
5. Conveyancers' and notaries' fees.
6. Fees, commissions, and salaries to brokers, agents, and others in connection with the acquisition of the land or land rights.
7. Leases, cost of voiding upon purchase to secure possession of land.
8. Removing, relocating, or reconstructing property of others, such as buildings, highways, railroads, bridges, cemeteries, churches, telephone and power lines, etc., in order to acquire quiet possession.
9. Retaining walls unless identified with structures.
10. Special assessments levied by public authorities for public improvements on the basis of benefits for new

roads, new bridges, new sewers, new curbing, new pavements, and other public improvements, but not taxes levied to provide for the maintenance of such improvements.

11. Surveys in connection with the acquisition, but not amounts paid for topographical surveys and maps where such costs are attributable to structures or plant equipment erected or to be erected or installed on such land.
12. Taxes assumed, accrued to date of transfer of title.
13. Title, examining, clearing, insuring and registering in connection with the acquisition and defending against claims relating to the period prior to the acquisition.
14. Appraisals prior to closing title.
15. Cost of dealing with distributees or legatees residing outside of the state or county, such as recording power of attorney, recording will or exemplification of will, recording satisfaction of state tax.
16. Filing satisfaction of mortgage.
17. Documentary stamps.
18. Photographs of property at acquisition.
19. Fees and expenses incurred in the acquisition of sewer rights, and grants.
20. Cost of fill to extend bulkhead line over land under water, where riparian rights are held, which is not occasioned by the erection of a structure.
21. Sidewalks and curbs constructed by the utility on public property.
22. Labor and expenses in connection with securing rights of way, where performed by company employees and company agents.

354. Structures and Improvements

This account shall include the cost in place of structures and improvements used in connection with wastewater collection, pumping, treatment and disposal, reclaimed water treatment and distribution and general plant operations (See Accounting Instruction 25). A sample of items to be included in this account are listed below:

1. Architects' plans and specifications including supervision.
2. Boilers, furnaces, piping, wiring, fixtures, and machinery for heating, lighting, signaling, ventilating and air conditioning systems, plumbing, vacuum cleaning systems, incinerator and smoke pipe, flues, etc.

3. Bulkheads, including dredging, riprap fill, piling, decking, concrete fenders, etc., when exposed and subject to maintenance and replacement.
4. Commissions and fees to brokers, agents, architects and others.
5. Conduit (not to be removed) with its contents.
6. Damages to abutting property during construction.
7. Drainage systems.
8. Elevators, cranes, hoists, etc., and the machinery for operating them.
9. Excavation, including shoring, bracing, bridging, refill and disposal of excess excavated material, cofferdams around foundations, pumping water from cofferdam during construction, test borings.
10. Fences and fence curbs (not including protective fences isolating items of equipment, which should be charged to the appropriate equipment account).
11. Fire protection systems when forming a part of a structure.
12. Flagpole.
13. Floor covering (permanently attached).
14. Foundations and piers for machinery, constructed as a permanent part of a building or other item listed herein.
15. Grading and clearing when directly occasioned by the building of a structure.
16. Intrasite communication system, poles, pole fixtures, wires and cables.
17. Landscaping, lawns, shrubbery, etc.
18. Leases, voiding upon purchase, to secure possession of structures.
19. Leased property, expenditures on.
20. Lighting fixtures and outside lighting systems.
21. Marquee, permanently attached to building.
22. Painting, first cost.
23. Permanent paving, concrete, brick, flagstone, asphalt, etc., within the property lines.
24. Partitions, including movable.
25. Permits and privileges.
26. Power boards for services to a building.
27. Refrigerating systems for general use.
28. Retaining walls except when identified with land.
29. Roadways.
30. Roofs.
31. Scales, connected to and forming a part of a structure.
32. Water and wastewater systems, for general use.
33. Sidewalks, culverts, curbs and streets constructed by the utility on its property.

34. Sprinkling systems.
35. Stacks -- brick, steel, or concrete, when set on foundation forming part of general foundation and steelwork of a building.
36. Steel inspection during construction.
37. Storage facilities constituting a part of a building.
38. Storm doors and windows.
39. Temporary heating during construction (net cost).
40. Temporary water connection during construction (net cost).
41. Temporary shanties and other facilities used during construction (net cost).
42. Topographical maps.
43. Vaults constructed as part of a building.
44. Watchmen's sheds and clock systems (net cost when used during construction only).
45. Water meters and supply system for a building or for general company purposes.
46. Water supply piping, hydrants and wells.
47. Yard surfacing, gravel, concrete, or oil (First cost only).
48. Tunnels, intake and discharge when constructed as part of a structure including sluice gates and those constructed to house.

355. Power Generation Equipment

A. This account shall include the cost installed of any equipment used for the production of power principally used in pumping operations.

B. Subaccounts shall be maintained hereunder for the cost of equipment used for each type of power generating equipment.

360. Collecting Sewers - Force

This account shall include all sewers which are used to lift sewage from a low elevation to a higher elevation. The force sewer will include that pipe between the discharge outlet of the lift station and the receiving manhole.

361. Collecting Sewers - Gravity

This account shall include the installed cost of all gravity collecting sewers, interceptor, branch, trunk, lateral including service wye, and manholes and lampholes. Manholes shall be included as a separate unit of property.

362. Special Collecting Structures

Inverted siphon shall be included in this account but so

distinctly noted; also any other special designed structures unusual to the wastewater system should be included herein but specifically noted as to what they do.

363. Services to Customers

This account shall include the installed cost of service sewers, from collection sewer to the customer's property or curb line. A sample of items to be included in this account are listed below:

1. Jointing and jointing material.
2. Manhole or clean-out.
3. Municipal inspection and permits
4. Pavement disturbed.
5. Protection of street openings.
6. Tapping saddle.
7. Service connection wye shall be included in account 363 instead of account 361 when company owns service sewers to customers property line.

364. Flow Measuring Devices

A. This account shall include the cost of flow measuring and recording equipment and initial testing used for measuring the quantity of wastewater or wastewater effluent delivered by customers, whether actually in service or held in reserve.

B. When flow measuring equipment is permanently retired from service, the amount at which it is included herein shall be credited to this account.

C. The records covering flow measuring equipment shall be so kept that the utility can furnish information as to the number of devices of each type and size in service and in reserve, as well as the location of each device included in this account.

365. Flow Measuring Installations

A. This account shall include the cost of labor employed, materials used and expenses incurred in connection with the original installation of customers' flow measuring equipment. A sample of items to be included in this account are listed below:

1. Floats, connections, flumes, or wires.
2. Special manhole, boxes, or other separate housing.

B. When a flow measuring installation is permanently retired from service, the cost thereof shall be credited to this account.

366. Reuse Services

A. This account shall include the cost installed of reclaimed water service pipes and accessories leading to the customers' premises.

B. A complete reclaimed water service begins with the connection on the main and extends to but does not include the connection with the customer's meter. A stub service extends from the main to the property line, or the curb stop (curb stop cock).

C. Services which have been used but have become inactive shall be retired from utility plant in service immediately if there is no prospect for future use.

Items

1. Corporation stops or tees.
2. Gate valves and boxes.
3. Goose necks.
4. Jointing and jointing material.
5. Municipal inspection or permits.
6. Pavements disturbed.
7. Pipes.
8. Placing pipes and accessories.
9. Protection of street openings.
10. Service or curb boxes.
11. Service or curb stops (curb stop cocks).
12. Tapping main.
13. Tapping saddle.

367. Reuse Meters and Meter Installations

A. This account shall include the cost of meters, devices and appurtenances attached thereto, used for measuring the quantity of reclaimed water delivered to users, whether actually in service or held in reserve. It shall also include the cost of labor employed, materials used and expenses incurred in connection with the original installation of a customer's meters and devices and appurtenances attached thereto.

B. When a meter and/or meter installation is permanently retired from service, the amount at which it is included herein shall be credited to this account.

C. The records covering meters shall be so kept that the utility can furnish information as to the number of meters of each type and size in service and in reserve as well as the location of each meter included in this account.

D. A sample of items to be included in this account are listed

below:

1. Meters, including badging and initial testing.
2. Remote meter registers.
3. Installation labor (first installation only).
4. Meter coupling.
5. Meter bars.
6. Meter yokes.
7. Meter fittings, connections and shelves.
8. Meter vaults or boxes.
9. Stops.

Note A:--This account shall not include meters for recording the output of a supply or treatment plant, or those located on mains. It includes only those meters to record reclaimed water delivered to customers, including company use and for those used elsewhere in the system if a type available for general use.

Note B:--The utility shall maintain a statistical record to show separately the number of each type and size of meter or group of types and sizes as carried in the continuing property record. Underlying records shall be kept so that the utility can determine readily for each such classification the number of company-owned meters in service (subdivided between active and inactive) and the number of meters carried herein but not in service, the latter to include meters undergoing repairs; and the number of meters in service owned by customers.

370. Receiving Wells

This account shall include the cost of constructing wells at pumping stations or at other junction points along the collecting system, used for intercepting wastewater for clearing and screening, transfer to a pumping well or otherwise further convey it along the collecting system to the treatment plant or point of final
discharge. This account shall include any chemical feed apparatus and holding basins associated with the receiving well.

371. Pumping Equipment

This account shall include the cost installed of pumping equipment driven by electric power or diesel engines. A sample of items to be included in this account are listed below:

1. Motors or engines for driving pumps.
2. Pumps, including settings, gearing, shafting and belting.
3. Sewage piping within station, including valves.
4. Auxiliary equipment for motors and pumps such as oiling systems, cooling systems, condensers, etc.

5. Electrical power lines and switching.
6. Foundations, frames, and bed plates.
7. Hoist units.

374. Reuse Distribution Reservoirs

This account shall include the cost in place of reservoirs, tanks and appurtenances used in storing reclaimed water for distribution. A sample of items to be included in this account are listed below:

1. Bridges and culverts.
2. Clearing land.
3. Dams.
4. Embankments.
5. Fences.
6. Foundations.
7. Gates and gate houses.
8. Landscaping.
9. Lighting systems.
10. Piping system within reservoirs.
11. Retaining walls.
12. Roads and paths.
13. Rust-proofing apparatus.
14. Sewer drain or storm sewer.
15. Spillways and channels.
16. Standpipes.
17. Tanks.
18. Towers.
19. Valves.

375. Reuse Transmission and Distribution System

A. This account shall include the cost installed of reclaimed water transmission and distribution mains and appurtenances. A sample of items to be included in this account are listed below:

1. Air chambers.
2. Blow-offs and overflows.
3. Bridges and culverts.
4. Electrolysis control equipment.
5. Gauges and recorders.
6. Jointing and jointing material.
7. Manholes.
8. Meters and appurtenances.
9. Municipal inspection or permits.
10. Pavement disturbed, including cutting and replacing pavement, pavement base and sidewalks.
11. Pipes.
12. Fire mains.
13. Fire Hydrants.

B. Records supporting this account shall be so kept as to show separately the cost of mains of different sizes and types and of each tunnel, bridge, or river crossing.

380. Treatment and Disposal Equipment

This account shall include the cost installed of apparatus equipment and other facilities used for the treatment of wastewater, disposal of sewage wastes and the treatment of effluent for reuse. A sample of items to be included in this account are listed below:

1. Aeration chambers.
2. Chemical equipment.
3. Disinfection facilities.
4. Filters.
5. Imhoff tank.
6. Land fill equipment and appurtenances.
7. Monitoring equipment.
8. Oxidation pond or lagoon.
9. Sedimentation equipment.
10. Septic tank.
11. Screen unit.
12. Sludge system.
13. Trucks, tractors, or other equipment used primarily for sludge or other waste disposal.
14. Package mechanical treatment plant.
15. Sedimentation basin.
16. Sludge digestion equipment.
17. Sludge filtration or dewatering equipment.

381. Plant Sewers

This account shall include the cost installed of plant yard piping and appurtenances, and facilities required to dispose of treatment plant liquid effluent into the outfall sewer line. A sample of items to be included in this account are listed below:

1. Unit to unit sections of yard piping.
2. Valves and vaults.
3. Pipe tunnels and galleries.
4. Filter and filter backwash piping.

382. Outfall Sewer Lines

This account shall include the installed cost of sewer line carrying effluent from treatment facility to point of discharge. Includible in this account would be headwall or outlet.

389. Other Plant and Miscellaneous Equipment

This account shall include the cost installed of all other intangible, collection system pumping, treatment and disposal, reclaimed water treatment and reclaimed water distribution plant not provided for in the foregoing accounts.

390. Office Furniture and Equipment

A. This account shall include the cost of office furniture and equipment owned by the utility and devoted to utility service, and not permanently attached to buildings, except the cost of such furniture and equipment which the utility elects to assign to other plant accounts on a functional basis. A sample of items to be included in this account are listed below:

1. Book cases and shelves.
2. Desk, chairs, and desk equipment.
3. Drafting room equipment.
4. Electronic data processing equipment.
5. Filing, storage and other cabinets.
6. Floor covering.
7. Library and library equipment.
8. Mechanical office equipment such as accounting machines, typewriters, etc.
9. Safes.
10. Tables.

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

391. Transportation Equipment

This account shall include the cost of transportation vehicles used for utility purposes. A sample of items to be included in this account are listed below:

1. Airplanes.
2. Automobiles.
3. Bicycles.
4. Electrical vehicles.
5. Motor trucks.
6. Motorcycles.
7. Repair cars or trucks.
8. Tractors and trailers.
9. Other transportation vehicles.

392. Stores Equipment

A. This account shall include the cost of equipment used for the receiving, shipping, handling and storage of materials and supplies.

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location. A sample of items to be included in this account are listed below:

1. Chain falls.
2. Counters.
3. Cranes (portable).
4. Elevating and stacking equipment (portable).
5. Hoists.
6. Lockers.
7. Scales.
8. Shelving.
9. Storage bins.
10. Trucks, hand and power driven.
11. Wheelbarrows.

393. Tools, Shop and Garage Equipment

This account shall include the cost of tools, implements, and equipment used in construction, repair work, general shops and garages and not specifically provided for or includible in other accounts. A sample of items to be included in this account are listed below:

1. Air compressors.
2. Anvils.
3. Automobile repair shop equipment.
4. Battery charging equipment.
5. Belts, shafts and countershafts.
6. Boilers.
7. Cable pulling equipment.
8. Concrete mixers.
9. Drill presses.
10. Derricks.
11. Electric equipment.
12. Engines.
13. Forges.
14. Furnaces.
15. Foundations and settings specially constructed for and not expected to outlast the equipment for which provided.
16. Gas producers.
17. Gasoline pumps, oil pumps and storage tanks.
18. Greasing tools and equipment.

19. Hoists.
20. Ladders.
21. Lathes.
22. Machine tools.
23. Motor driven tools.
24. Motors.
25. Pipe threading and cutting tools.
26. Pneumatic tools.
27. Pumps.
28. Riveters.
29. Smithing equipment.
30. Tool racks.
31. Vises.
32. Welding apparatus.
33. Work benches.

394. Laboratory Equipment

A. This account shall include the cost installed of laboratory equipment used for general laboratory purposes and not specifically provided for or includible in other departmental or functional plant accounts. A sample of items to be included in this account are listed below:

1. Autoclaves.
2. Barometers.
3. Cameras.
4. Centrifuge.
5. Distilling apparatus.
6. Furnaces.
7. Microscopes.
8. Ovens.
9. Pitometers.
10. Rain gauges.
11. Refrigerators.
12. Scales.
13. Sterilizers.
14. Stop watches.
15. Testing machines.
16. Therometers.
17. Voltmeters.
18. Other bacteriological, electric, chemical hydraulic or research equipment.

B. If the utility has equipment includible in this account at more than one location, separate records shall be maintained for each location.

395. Power Operated Equipment

This account shall include the cost of power operated equipment used in construction of repair work exclusive of equipment includible in other accounts. Include, also, the tools and accessories acquired for use with such equipment and the vehicle on which such equipment is mounted. A sample of items to be included in this account are listed below:

1. Air compressors, including driving unit and vehicle.
2. Back filling machines.
3. Boring machines.
4. Bulldozers.
5. Cranes and joists.
6. Diggers.
7. Engines.
8. Pile drivers.
9. Pipe cleaning machines.
10. Pipe coating or wrapping machines.
11. Tractors - Crawler type.
12. Trenchers.
13. Other power operated equipment.

Note:--It is intended that this account include only such large units as are generally self-propelled or mounted on moveable equipment.

396. Communication Equipment

This account shall include the cost installed of telephone, telegraph and wireless equipment for general use in connection with utility operations. A sample of items to be included in this account are listed below:

1. Antennae.
2. Booths.
3. Cables.
4. Distribution boards.
5. Extension cords.
6. Gongs.
7. Handsets, manual and dial.
8. Insulators.
9. Intercommunicating sets.
10. Loading coils.
11. Operators desks.
12. Poles and fixtures used wholly for telephone and telegraph wires.
13. Radio transmitting and receiving sets.
14. Remote control equipment and lines.
15. Sending keys.
16. Storage batteries.

17. Switchboards.
18. Teleautograph circuit connections.
19. Telegraph receiving sets.
20. Telephone and telegraph circuits.
21. Testing instruments.
22. Towers.
23. Underground conduit used wholly for telephone or telegraph wires and cable wires.

397. Miscellaneous Equipment

This account shall include the cost of equipment, apparatus, etc., used in utility operations, and which is not includible in any other account. A sample of items to be included in this account are listed below:

1. Hospital and infirmary equipment.
2. Kitchen equipment.
3. Recreation equipment.
4. Radios.
5. Restaurant equipment.
6. Soda fountains.
7. Operator's cottage furnishings.
8. Electric signs advertising the corporate name or symbol, plant or facility name, or otherwise serving only the general purpose of acquainting the public with the facilities and services of the utility.
9. Other miscellaneous equipment.

Note:--Miscellaneous equipment of the nature indicated above wherever practicable shall be included in the utility plant accounts on a functional basis.

398. Other Tangible Plant

This account shall include the cost of tangible utility plant not provided for elsewhere.

§ 1329. Valuation of acquired water and wastewater systems.

(a) Process to establish fair market value of selling utility.--Upon agreement by both the acquiring public utility or entity and the selling utility, the following procedure shall be used to determine the fair market value of the selling utility:

(1) The commission will maintain a list of utility valuation experts from which the acquiring public utility or entity and selling utility will choose.

(2) Two utility valuation experts shall perform two separate appraisals of the selling utility for the purpose of establishing its fair market value.

(3) Each utility valuation expert shall determine fair market value in compliance with the Uniform Standards of Professional Appraisal Practice, employing the cost, market and income approaches.

(4) The acquiring public utility or entity and selling utility shall engage the services of the same licensed engineer to conduct an assessment of the tangible assets of the selling utility. The assessment shall be incorporated into the appraisal under the cost approach required under paragraph (3).

(5) Each utility valuation expert shall provide the completed appraisal to the acquiring public utility or entity and selling utility within 90 days of execution of the service contract.

(b) Utility valuation experts.--

(1) The utility valuation experts required under subsection (a) shall be selected as follows:

(i) one shall be selected by the acquiring public utility or entity; and

(ii) one shall be selected by the selling utility.

(2) The utility valuation experts shall not:

(i) derive any material financial benefit from the sale of the selling utility other than fees for services rendered; or

(ii) be an immediate family member of a director, officer or employee of either the acquiring public utility, entity or selling utility within a 12-month period of the date of hire to perform an appraisal.

(3) Fees paid to utility valuation experts may be included in the transaction and closing costs associated with acquisition by the acquiring utility or entity. Fees eligible for inclusion may be of an amount not exceeding 5% of the fair market value of the selling utility or a fee approved by the commission.

(c) Ratemaking rate base.--The following apply:

(1) The ratemaking rate base of the selling utility shall be incorporated into the rate base of:

(i) the acquiring public utility during the acquiring public utility's next base rate case; or

(ii) the entity in its initial tariff filing.

(2) The ratemaking rate base of the selling utility shall be the lesser of the purchase price negotiated by the acquiring public utility or entity and selling utility or the fair market value of the selling utility.

(d) Acquisitions by public utility.--The following apply:

(1) If the acquiring public utility and selling utility agree to use the process outlined in subsection (a), the acquiring public utility shall include the following as an attachment to its application for commission approval of the acquisition filed pursuant to section 1102 (relating to enumeration of acts requiring certificate):

(i) Copies of the two appraisals performed by the utility valuation experts under subsection (a).

(ii) The purchase price of the selling utility as agreed to by the acquiring public utility and selling utility.

(iii) The ratemaking rate base determined pursuant to subsection (c)(2).

(iv) The transaction and closing costs incurred by the acquiring public utility that will be included in its rate base.

(v) A tariff containing a rate equal to the existing rates of the selling utility at the time of the acquisition and a rate stabilization plan, if applicable to the acquisition.

(2) The commission shall issue a final order on an application submitted under this section within six months of the filing date of an application meeting the requirements of subsection (d)(1).

(3) If the commission issues an order approving the application for acquisition, the order shall include:

(i) The ratemaking rate base of the selling utility, as determined under subsection (c)(2).

(ii) Additional conditions of approval as may be required by the commission.

(4) The tariff submitted pursuant to subsection (d)(1)(v) shall remain in effect until such time as new rates are approved for the acquiring public utility as the result of a base rate case proceeding before the commission. The acquiring public utility may collect a distribution system improvement charge during this time, as approved by the commission under this chapter.

(5) The selling utility's cost of service shall be incorporated into the revenue requirement of the acquiring public utility as part of the acquiring utility's next base rate case proceeding. The original source of funding for any part of the water or sewer assets of the selling utility shall not be relevant to determine the value of said assets.

(e) Acquisitions by entity.--An entity shall provide all the information required by subsection (d)(1) to the commission as an attachment to its application for a certificate of public convenience filed pursuant to section 1102.

(f) Postacquisition projects.--The following apply:

(1) An acquiring public utility's postacquisition improvements that are not included in a distribution improvement charge shall accrue allowance for funds used during construction after the date the cost was incurred until the asset has been in service for a period of four years or until the asset is included in the acquiring public utility's next base rate case, whichever is earlier.

(2) Depreciation on an acquiring public utility's postacquisition improvements that have not been included in the calculation of a distribution system improvement charge shall be deferred for book and ratemaking purposes.

(g) Definitions.--The following words and phrases when used in this section shall have the meanings given to them in this section unless the context clearly indicates otherwise:

"Acquiring public utility." A water or wastewater public utility subject to regulation under this title that is acquiring a selling utility as the result of a voluntary arm's-length transaction between the buyer and seller.

"Allowance of funds used during construction." An accounting practice that recognizes the capital costs, including debt and equity funds that are used to finance the construction costs of an improvement to a selling utility's assets by an acquiring public utility.

"Entity." A person, partnership or corporation that is acquiring a selling utility and has filed or whose affiliate has

filed an application with the commission seeking public utility status pursuant to section 1102.

"Fair market value." The average of the two utility valuation expert appraisals conducted under subsection (a)(2).

"Ratemaking rate base." The dollar value of a selling utility which, for postacquisition ratemaking purposes, is incorporated into the rate base of the acquiring public utility or entity.

"Rate stabilization plan." A plan that will hold rates constant or phase rates in over a period of time after the next base rate case.

"Selling utility." A water or wastewater company located in this Commonwealth, owned by a municipal corporation or authority that is being purchased by an acquiring public utility or entity as the result of a voluntary arm's-length transaction between the buyer and seller.

"Utility valuation expert." A person hired by an acquiring public utility and selling utility for the purpose of conducting an economic valuation of the selling utility to determine its fair market value.

(Apr. 14, 2016, P.L.76, No.12, eff. 60 days)

2016 Amendment. Act 12 added section 1329.

Notes:

1. Reflects generic unit prices for various components of a sewer system within this region. The schedule was a basis of cost for previous Assessment reports in the region.

2. Prices from 2015 unless otherwise noted, Table ENR CCI (2015) = 10035

3. The "Blended Cost" is a combined cost that accounts for the percentage of the overall system constructed within a completed roadway. Approximate percentages were determined from Township Records.

4. The "Blended Cost" is a combined cost that accounts for the percentage of laterals installed 2005 & later, assumed to be developer installed, and % of laterals installed before 2005, assumed to be Township installed. This number is assumed to be in the year 2012 and is then brought back for all of the other years.

1. INTRODUCTION

As required by Chapter 94, Municipal Wasteload Management, Title 25 of the Rules and Regulations of the Pennsylvania Department of Environmental Protection (PADEP), this report summarizes the operation of the East Whiteland Township (Township) Malvern Hunt Wastewater Treatment Plant (WWTP) for the past five years, and projected loading for the next five years. Data presented in the tables and graphs included in the Appendices were taken from 2020 plant operating records.

The WWTP is located in East Whiteland Township, Chester County, Pennsylvania. The plant has a permitted 0.105 MGD lagoon treatment and spray irrigation system that is designed to serve the 279 unit residential community of Malvern Hunt.

The facility was constructed in 2000 by the Cutler Group, Inc. and was owned and operated by the Cutler Group, Inc. until October 31, 2007 when Water Quality Management Permit No. 1599418 for the WWTP was transferred to East Whiteland Township. The Township contracted Miller Environmental, Inc. to operate the WWTP from October 2007 to July 2011. ARRO Consulting, Inc. has been operating the WWTP since August 2011.

The WWTP process is an aerated lagoon treatment system, consisting of an influent pump station, a headworks with a comminutor and influent bar screen, a secondary treatment lagoon, storage/polishing lagoon, and effluent spray pumps. Sewage flow to the treatment lagoon is continuous, going through aeration, solid-liquid separation settling, and decanting processes. The treated water is discharged through an 8-inch diameter gravity main to the storage/polishing lagoon. The supernatant of the storage/polishing lagoon is chlorinated prior to being pumped out for spray irrigation.

The WWTP spray irrigation is applied to three (3) zones located in woodlands north of the Malvern Hunt development (18.5 acres total). By the current permit the facility can simultaneously spray in two of the three zones, alternating the three zones with a minimum of five days rest period for the inactive zone. The application rate to the spray zones cannot exceed 0.25 inches per hour at any time.

2. HYDRAULIC AND ORGANIC LOADINGS

2.1 2020 Plant Performance

Malvern Hunt development is fully built-out with 279 residential units. The WWTP currently has a permitted hydraulic capacity of 0.105 MGD Annual Average Flow (AAF) with a design hydraulic capacity of 0.393 MGD. The design organic capacity of the facility is 222 lbs BOD_5/day.

Table 1 of Appendix A contains the 2020 plant performance information for the WWTP. During 2020 the average sewage flow was 49,203 gallons-per-day (gpd) (0.0492 MGD), well below the permitted limit of 0.105 MGD. The highest consecutive maximum three-month average for 2020 was 55,100 gpd (0.0551 MGD).

Influent BOD_5 and total suspended solids are tabulated in Table 1. The plant's current permitted maximum monthly organic influent limit is 222 lbs/day. During 2020 the maximum monthly influent organic load was 112 lbs/day. Permitted discharge limits for $CBOD_5$ and suspended solids are 25 mg/l and 30 mg/l, respectively. During 2020 the highest monthly effluent $CBOD_5$ was 12.4 mg/l and the highest monthly effluent total suspended solids was 11.6 mg/l, both parameters at or below the permitted limits.

2.2 Current Hydraulic and Organic Loadings

Table 2 of Appendix A contains a summary of monthly average hydraulic loadings on the Malvern Hunt WWTP for the years 2016 through 2020. Flow has fluctuated over this period with a maximum average annual flow of 49,203 gpd (0.0492 MGD) in 2020 and a minimum average annual flow of 44,292 gpd (0.0443 MGD) in 2019. Current flows remain below the permitted limit of 0.105 MGD (105,000 gpd) for average annual flow.

The highest maximum three-month flow for the time period was 52,567 gpd (0.0526 MGD) in 2018 and the minimum three-month flow was 45,333 gpd (0.0453 MGD) in 2017. The average 5-year flow peaking factor is 1.056.

Influent BOD and TSS samples are collected once a month. Effluent samples are collected on the same day as influent samples during land application months, generally March through November, but during 2020 April through November. In months where no effluent

land applications occur effluent testing is suspended. Table 1A contains the results of the monthly sampling and also the approximate influent flow on the day of sampling.

Table 3 of Appendix A contains the average annual organic loadings for the plant during the years from 2016 and 2020. In 2020 the average annual BOD_5 loading increased from the previous year's level to 112 lbs./day, with maximum 1-month loading of 176 lbs./day. These loadings are below the plant's permitted influent loading limit of 222 lbs./day. The average 5-year organic peaking factor is 1.53.

3. 5-YEAR HYDRAULIC AND ORGANIC LOADING PROJECTIONS

As previously stated, the WWTP hydraulic loading data has been available since the start-up of the WWTP, but organic loading data has only been available since August of 2011. Also, the Malvern Hunt Development is currently built out with 279 units and no population changes are expected for the next five years. Table 4 of Appendix A contains the summary of past and projected hydraulic and organic loadings for the WWTP. As demonstrated by Exhibit 1 and Exhibit 2 in Appendix A, the WWTP is not projected to expect hydraulic or organic overloads in the next five years.

4. SEWER EXTENSIONS

Malvern Hunt Development is currently built-out with 279 units and no future extensions and connections are expected.

5. PROGRAM FOR SANITARY SEWER MONITORING, MAINTENANCE, AND REPAIR

Operation and maintenance activities for the treatment plant and collection system are performed by the treatment plant operator and the Township's public works crew. The mechanical equipment in the treatment facility is inspected weekly by the plant operator. Maintenance performed is logged into the plant's record.

The plant operator routinely performs the laboratory analyses required for process control and discharge permit reporting purposes. Results of the analyses are recorded on a monthly log. A copy is forwarded to the appropriate State and Federal agencies as required by the facility's WQM permit.

6. CONDITION OF THE SEWER SYSTEM

The Township is continuing the corrective measures necessary to prevent unwanted runoff from entering into the system, thus reducing the inflow/infiltration in the system. The Township has created a numbering system for all 1,452 manholes in its sanitary sewer system, including Malvern Hunt WWTP drainage area, and located each manhole with a GPS locating device. A sewer system layer has been developed in the Township's GIS data map with each manhole located and identified with its corresponding number. The Township is beginning to televise its system again and is inputting this information onto the new GIS layer to allow the Township to better detect and remedy excessive infiltration and inflow if encountered.

7. SEWAGE PUMPING STATIONS

There is one pumping station within the collection system and it receives all the sewage flow from the Malvern Hunt development and pumps it to the WWTP. The station was constructed in 2000 and it has two (2) pumps – one operating, one backup – with each pump rated at approximately 300 gpm or 432,000 gpd (0.4320 MGD). The pumps alternate lead-lag at the station. A magnetic flow meter is located on the force main leaving the station. The meter totalizer amounts are logged approximately each work-day, which excludes weekends and holidays; therefore, instantaneous readings can't be made during peak flow events, only maximum daily readings are available.

Based on the 2020 metering records, the average daily flow leaving the station was 49,203 gpd (0.0492 MGD) and the maximum daily flow was 195,836 gpd (0.1958 MGD) following a 5.86-inch rainfall event. There were no instances in 2020 in which both the lead and lag pump were operating simultaneously. As the Malvern Hunt development is built out no additional flows would be expected; therefore, the influent pumps are expected to be able to handle any future peak flows if they can manage current peak flows.

There are two effluent spray pumps at the WWTP that operate alternately. Each pump has a hydraulic design capacity of 220 gpm or 316,800 gpd (0.3168 MGD). In 2020, the annual average flow for the effluent spray pumps was 73,540 gpd (0.0735 MGD) and the maximum daily flow was 164,000 gpd (0.1640 MGD). One pump is able to handle all normal flow to the spray fields.

8. PUMPING STATION FLOW DURING MAJOR STORM EVENTS

The Department requires Chapter 94 Reports to include a discussion of metered flow data for the collection and conveyance systems, specifically during major storm events (greater than 1.0 inch of rain).

Exhibit 3 of Appendix A contains a graph of the monthly rainfall and flow totals at the WWTP. The chart shows that rainfall does not have influence on the monthly flow at the WWTP.

Table 5 of Appendix A contains a summary of the rainfall and metered flow at the Malvern Hunt metered influent pump station for the ten (10) days in 2020 where rain fell more than 1.0-inch plus in a 24-hour period and Exhibit 4 of Appendix A is the chart developed from this data. As related to yearly average flow, the peaking factor for the pump station during the rain events is:

Pump Station	Annual Avg. Flow (MGD)	Peak Flow (MGD)	Rain Events Peaking Factor	
			High	Average
Malvern Hunt	0.0492	0.1958	3.98	2.14

The high peaking factor at the pump station occurred during a 5.86-inch rainfall event in August 2020. The high peaking factor is within the Department's current pump station peaking factor guidelines.

9. INDUSTRIAL WASTES

There is no industrial waste discharged to Malvern Hunt's WWTP.

10. CALIBRATION REPORTS

The flow meter was calibrated quarterly during 2020. Copies of the calibration reports are included in Appendix B.

RE: Township of East Whiteland
2020 Chapter 94 Report

Dear Mr. O'Neil:

On behalf of the Township of East Whiteland, please find enclosed two (2) copies of the 2020 Chapter 94 Annual Report for the Township's sewerage facilities.

Should you have any questions concerning this, please feel free to contact the undersigned.

Sincerely,

PENNONI

Charles Faulkner

CHAPTER 94 MUNICIPAL WASTELOAD MANAGEMENT ANNUAL REPORT

For Calendar Year: 2020

☐ Permittee is owner and/or operator of a POTW or other sewage treatment facility
☒ Permittee is owner and/or operator of a collection system tributary to a POTW not owned/operated by permittee

GENERAL INFORMATION

Permittee Name:	**EAST WHITELAND TOWNSHIP**	Permit No.:	**PA N/A**
Mailing Address:	**209 CONESTOGA ROAD**	Effective Date:	**N/A**
City, State, Zip:	**FRAZER, PA 19355**	Expiration Date:	**N/A**
Contact Person:	**John Nagel**	Renewal Due Date:	**N/A**
Title:	**TOWNSHIP MANAGER**	Municipality:	**EAST WHITELAND**
Phone:	**610-897-4205**	County:	**CHESTER**
Email:	**JNAGEL@EASTWHITELAND.ORG**	Consultant Name:	**PENNONI ASSOCIATES INC.**

CHAPTER 94 REPORT COMPONENTS

1. Attach to this report a line graph depicting the monthly average flows (expressed in MGD) for each month for the past 5 years and projecting the flows for the next 5 years. The graph must also include a line depicting the hydraulic design capacity per the WQM permit. (25 Pa. Code § 94.12(a)(1))

   Check the appropriate boxes:
   - ☐ Line graph for flows attached (**Attachment**)
   - ☐ DEP Chapter 94 Spreadsheet used (**Attachment**)
   - ☒ Section 1 is not applicable (report is for a collection system).

2. Attach to this report a line graph depicting the monthly average organic loads (express as lbs BOD5/day) for each month for the past 5 years and projecting the organic loads for the next 5 years. The graph must also include a line depicting the organic design capacity of the treatment plant per the WQM permit. (25 Pa. Code § 94.12(a)(2))

   Check the appropriate boxes:
   - ☐ Line graph for organic loads attached (**Attachment**)
   - ☐ DEP Chapter 94 Spreadsheet used (**Attachment**)
   - ☒ Section 2 is not applicable (report is for a collection system).

3. If the DEP Chapter 94 Spreadsheet was not used to determine projections, discuss the basis for the hydraulic and organic projections. In all cases, include a description of the time needed to expand the plant to meet the load projections, if necessary, and data used to support the projections should be included in an appendix to this report. (25 Pa. Code § 94.12(a)(3))

   Attachment A shows the historic and projected hydraulic demand for the service area of East Whiteland Township. The hydraulic projections were calculated based on the 2020 annual average flow and the proposed connections for the next five years.

   East Whiteland Township owns and operates a wastewater treatment plant associated with the Malvern Hunt subdivision. The WWTP consists of aerated lagoons and land application of effluent. A separate Chapter 94 report will be submitted which addresses this WWTP.

4. Attach a map showing all sewer extensions constructed within the past calendar year, sewer extensions approved or exempted in the past year in accordance with Act 537 and Chapter 71, but not yet constructed, and all known proposed projects which require public sewers but are in the preliminary planning stages. The map must be accompanied by a list summarizing each extension or project and the population to be served by the extension or project. If a sewer extension approval or proposed project includes schedules describing how the project will be completed over time, the listing should include that information and the effect this build-out-rate will have on populations served. (25 Pa. Code § 94.12(a)(4))

   Check the appropriate boxes:

   ☒ Map showing sewer extensions constructed, approved/exempted but not yet constructed, and proposed projects attached (**Attachment B**)

   ☒ List summarizing each extension or project attached (**Attachment C**)

   ☒ Schedules describing how each project will be completed over time and effects attached (**Attachment C**)

   Comments:

   Attachment B - East Whiteland Sanitary Sewer Collection System has been updated to include all sewer extensions completed in 2020.

   Attachment C provides a list of projects which were constructed in 2020, under construction currently, or will be constructed and connect to the system within the next five years.

5. Discuss the permittee's program for sewer system monitoring, maintenance, repair and rehabilitation, including routine and special activities, personnel and equipment used, sampling frequency, quality assurance, data analyses, infiltration/inflow monitoring, and, where applicable, maintenance and control of combined sewer regulators during the past year. Attach a separate sheet if necessary. (25 Pa. Code § 94.12(a)(5))

   See Attachment D

6. Discuss the condition of the sewer system including portions of the system where conveyance capacity is being exceeded or will be exceeded in the next 5 years and portions where rehabilitation or cleaning is needed or is underway to maintain the integrity of the system and prevent or eliminate bypassing, CSOs, SSOs, excessive infiltration and other system problems. Attach a separate sheet if necessary. (25 Pa. Code § 94.12(a)(6))

Check the appropriate boxes:

☐ System experienced capacity-related bypassing, SSOs or surcharging during the report year. On a separate sheet, list the date, location, and reason for each bypass, SSO or surcharge event.

☒ System did not experience capacity-related bypassing, SSOs or surcharging during the report year.

Comments:

See Attachment E

7. Attach a discussion on the condition of sewage pumping (pump) stations. Include a comparison of the maximum pumping rate with present maximum flows and the projected 2-year maximum flows for each station. (25 Pa. Code § 94.12(a)(7))

Check the appropriate boxes:

☐ The collection system does not contain pump stations

☒ The collection system does contain pump stations (Number – **12**)

☒ Discussion of condition of each pump station attached (**Attachment F**)

8. If the sewage collection system receives industrial wastes (i.e., non-sanitary wastes), attach a report with the information listed below. (25 Pa. Code § 94.12(a)(8))

a. A copy of any ordinance or regulation governing industrial waste discharges to the sewer system or a copy of amendments adopted since the initial submission of the ordinance or regulation under Chapter 94, if it has not previously been submitted.

b. A discussion of the permittee's or municipality's program for surveillance and monitoring of industrial waste discharges into the sewer system during the past year.

c. A discussion of specific problems in the sewer system or at the plant, known or suspected to be caused by industrial waste discharges and a summary of the steps being taken to alleviate or eliminate the problems. The discussion shall include a list of industries known to be discharging wastes which create problems in the plant or in the sewer system and action taken to eliminate the problem or prevent its recurrence. The report may describe pollution prevention techniques in the summary of steps taken to alleviate current problems caused by industrial waste dischargers and in actions taken to eliminate or prevent potential or recurring problems caused by industrial waste dischargers.

Check the appropriate boxes:

☒ Industrial waste report as described in 8 a., b. and c. attached (**Attachment G**)

☐ Industrial pretreatment report as required in an NPDES permit attached (**Attachment**)

DocuSign Envelope ID: 0626E1A3-5A63-4A89-91B0-9D6EE86AA83D

9. Existing or Projected Overload.

Check the appropriate boxes:

☐ This report demonstrates an existing hydraulic overload condition.
☐ This report demonstrates a projected hydraulic overload condition.
☐ This report demonstrates an existing organic overload condition.
☐ This report demonstrates a projected organic overload condition.

If one or more boxes above have been checked, attach a Corrective Action Plan (CAP) to reduce or eliminate present or projected overloaded conditions under §§ 94.21 and/or 94.22 (relating to existing overload and projected overload). (25 Pa. Code § 94.12(a)(9))

☐ Corrective Action Plan attached (**Attachment**)

10. Where required by the NPDES permit, attach a Sewage Sludge Management inventory that demonstrates a mass balance of solids coming in and leaving the facility over the previous calendar year.

☐ Sewage Sludge Management Inventory attached (**Attachment**)

11. For facilities with CSOs and where required by the NPDES permit, attach an Annual CSO Report (including satellite combined sewer systems).

☐ Annual CSO Report attached (**Attachment**)

12. For POTWs, attach a calibration report documenting that flow measuring, indicating and recording equipment has been calibrated annually. (25 Pa. Code § 94.13(b))

☐ Flow calibration report attached (**Attachment**)

RESPONSIBLE OFFICIAL CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowledge of violations. See 18 Pa. C.S. § 4904 (relating to unsworn falsification).

CHAPTER 94 MUNICIPAL WASTELOAD MANAGEMENT ANNUAL REPORT INSTRUCTIONS

This form has been developed to promote consistency in the development of annual municipal wasteload management reports ("Chapter 94 reports") required by 25 Pa. Code § 94.12. At least two copies of the complete report must be submitted to the appropriate regional office of the Department of Environmental Protection (DEP) by March 31.

Enter the calendar year that the report covers at the top of the form. Check the appropriate box to indicate whether the permittee is the owner/operator of a publicly owned treatment works (POTW) or other sewage treatment facility, or is the owner/operator of a sewage collection system that is tributary to a POTW owned/operated by a different entity.

General Information

Record the name of the permittee, the permittee's full mailing address, the permittee's contact person and this person's title, phone number and email address. Also record the permit number (NPDES or WQM), the effective date of permit coverage, the expiration date of permit coverage (if applicable), the date by which an application or NOI is due for reissuance (renewal) (if applicable), the municipality and county where the sewage treatment facility or collection system is located, and the name of the consultant (company name), if any, who assisted in the preparation of the form.

Chapter 94 Report Components

This section requests responses to 12 questions that, if applicable, must be addressed for a complete Chapter 94 report. Questions 1 – 9 and 12 come directly from the Chapter 94 regulations, i.e., 25 Pa. Code §§ 94.12(a)(1) – 94.12(a)(9) and 94.13(b). Some questions request that you check an appropriate box, attach the information requested, and specify the attachment number, while responses to other questions may be entered directly on the form.

For Questions 1 and 2, permittees may use DEP's Chapter 94 Spreadsheet to satisfy 25 Pa. Code §§ 94.12(a)(1) and 94.12(a)(2), respectively. DEP encourages use of the Chapter 94 Spreadsheet to provide consistency in the format and calculations associated with hydraulic and organic load evaluations (see www.depweb.state.pa.us/chapter94). If the Chapter 94 Spreadsheet was used, check the appropriate box(es) and attach printouts of the data and graphs to the Chapter 94 report. If this report is being used for a collection system only, these graphs are not needed.

For Question 6, if the permittee checks the box that there were capacity-related bypasses or SSOs during the report year, in general the box for existing hydraulic overload in Question 9 should be checked. If the permittee checks the box in Question 6 because surcharging occurred during the report year, in general the box for projected hydraulic overload in Question 9 should be checked.

For Question 8, if the permittee has an EPA-approved pretreatment program, attachment of an annual pretreatment report as required in an NPDES permit will satisfy the requirement for an industrial waste report.

For Question 10, if a permit requires a "Sewage Sludge Management" inventory, check the appropriate box if the inventory is attached to the Chapter 94 report.

For Question 11, if an NPDES permit (individual permit or, for satellite collection systems, PAG-06 General NPDES permit coverage) requires an Annual CSO (Status) report, attach the CSO report to the Chapter 94 report and check the appropriate box.

Certification

In accordance with 25 Pa. Code § 94.12(a), both the individual who prepared the report and (a responsible official of) the permittee must sign the report. The term "responsible official" for a municipality is a principal executive officer or ranking elected official.

Questions on the completion of Chapter 94 reports may be directed to DEP's Bureau of Point and Non-Point Source Management at (717) 787-8184 or to the appropriate DEP regional office (contact information available by visiting DEP's website, www.depweb.state.pa.us, and selecting Regional Resources).

REVISION DATE: 3/3/2020

MAP NOTES:

Mapping information was derived from various planning documents including Schoor DePalma's Sanitary Sewer Meter Location Plan, Kohli & Associates Township plan, Roy F. Weston's Master Sanitary Sewer System Plan, Chester County Recorder of Deeds Plans, and township as -built plans received by ARRO. The mapping is incomplete and will be improved as as-built and other plan information is updated into the GIS. This GIS database will provide a framework for modeling the collection system to analyze capacity issues and make recommended improvements to mitigate capacity deficiencies.

Data Sources: East Whiteland Township, Schoor DePalma, Kohli & Associates, Roy F. Weston, Chester County Recorder of Deeds and ARRO.

NOTES:

1. PLANEBROOK ROAD PUMP STATION WAS PLACED IN SERVICE IN NOVEMBER OF 2018 AND THE FRAME AVENUE PUMP STATION WAS DECOMISSIONED
2. CHURCH ROAD PUMP STATION WAS DECOMMISSIONED IN MARCH OF 2020

Program for Sanitary Sewer Monitoring, Maintenance and Repair

[25 Pa. Code § 94.12(a)(5)]

The Township monitors sewer flow leaving and entering the Township via flow meters on a daily basis. Flow Reports are compiled on a monthly basis. Any irregular patterns are investigated and corrected as soon as possible. Meter pits are checked on a routine basis to determine if the meters are functioning properly and that there is no debris accumulating within the flumes.

The Townships Public Works Department is responsible for normal daily maintenance and preventative maintenance of the sewage collection system including pump stations. The Public Works Department also is responsible for handling emergency conditions on a 24-hour basis. Ongoing visual inspections indicate the sewer is generally in good condition.

The Township Sewer Department uses video inspection equipment to inspect sewer mains for infiltration, roots and grease and locate areas of I/I. The Department is able to determine areas of concern, clean lines and make any necessary repairs as required. As an on-going practice, the Township periodically flushes the sanitary sewer lines throughout the Township.

Manhole covers are adjusted and/or watertight gaskets are being installed in low-lying areas. As part of the township's street resurfacing program, manhole covers and frames are being replaced with new gaskets covers as required and are adjusted to the new pavement grades to help eliminate inflow. Manhole inserts have been added in areas that were experiencing inflow through manhole covers.

By ordinance, all new sewer lines, laterals and building sewer must be inspected and air tested by the Township Sewer Engineer or Code Official before the lines are put into service. This procedure had allowed the Township to detect potential defective workmanship and materials, and/or in the process eliminate any potential for future I/I.

The Township is continuing the corrective measures necessary to prevent unwanted runoff from entering into the system, thus reducing the I/I in the system. The Township has created a numbering system for all manholes in its sanitary sewer system and located each manhole with GPS. A sewer system layer had been developed in its GIS data map with each manhole located and identified. The Township is beginning to televise its system again and is inputting this information onto the new GIS layer to allow the Township to better detect and remedy excessive infiltration and inflow if encountered.

ATTACHMENT E

Condition of the Sewer System

[25 Pa. Code § 94.12(a)(6)]

The Mill Lane Sewer Main Replacement Phase 1 construction project was operational as of November 2013, and the Sidley Road Sewer Main Replacement Phase 2 construction project was operational as of March 2014.the completion of the Phase 1 and 2 projects eliminated the hydraulic restriction in the East Whiteland Township sewer mains in the Mill Land and Sidley Road areas. Consequently, the connection restriction for East Whiteland has also been eliminated for the Mill Lane and Sidley Road areas.

The Improvements to the Mill Lane and Sidley Road sewer system also completed Phase 1 and 2 aspects of the Corrective Action Plan (CAP) currently on file with PaDEP. Phase 3 of the CAP related to improvements to the Lee Boulevard Pump Station are still to be implemented. The conditions of the Connection Management Plan Currently on file with PaDEP are still in effect for the contributory drainage areas from Charlestown that flows through the Mill Lane and Sidley Road Sewer Systems.

In 2016, upgrade improvements were made to the sanitary sewer within Conestoga Road. Approximately 3,780 L.F. of new 18-inch, 20-inch and 24-inch pipe were installed to replace existing deteriorating sewer.

During 2017, the following sanitary sewer system work was done.

- Wilburdale Pump Station and Force main improvements were completed,
- Planebrook Pump Station force main improvements were completed.
- Deer Run Pump Station emergency generator replacement was started and were completed in 2018

During 2018 , the following sanitary sewer system work was done.

- On August 23, 2018, a portion of a 10-inch sewer main collapsed on Warren Avenue. The repair consisted of replacing approximately 100 L.F. of the deteriorated main.
- Construction of Planebrook Pump Station was complete.
- On November 30, 2018, Frame Ave Pump Station was decommissioned and flow was diverted to the Planebrook Pump Station.

During 2019, the following sanitary sewer system work was done.

- Flat Road Pump Station was shut down on January 24, 2019 due to a sinkhole which developed at the station and jeopardized the integrity of the station. A new pump station was built and put into service in October of 2019.
- Construction of the Chester Valley Golf Course Sewer Extension began in December of 2019.

During 2020, the following sanitary sewer system work was done.

- Pump #1 at Westgate Pump Station was replaced on April 14, 2020 with a new pump.

- Church Road Pump Station was turned off on March 14, 2020 and flow was diverted through the new gravity sewer installed line through Chester Valley Golf Course.

There were no Sanitary Sewer Overflows (SSOs) in 2020.

ATTACHMENT F

Sewage Pumping Stations

[25 Pa. Code § 94.12(a)(7)]

There are currently twelve (12) pumping stations in operation that convey sanitary sewage flow within the Township. In 2018 Frame Ave Pump Station was abandoned/demolished and all flow was diverted to the newly constructed Planebrook Pump Station. The twelfth pump station is associated with the Malvern Hunt WWTP, which is covered under its own Chapter 94 Report

All pump stations, except Mill Lane, have two pumps that alternate lead-lag. The Mill Lane Pump Station has three variable speed pumps. Two pumps operate and one pump is standby.

Only the Mill Lane, Wilburdale and newly constructed Planebrook Pump Station are equipped with a magnetic flow meter to measure the pump station flows. Flow at the other eight (8) pump stations are calculated based on the monthly pump run-time data multiplied by the pump design capacity.

Township staff visits all pump stations on a regular basis to determine the condition and document the flow. If a discrepancy is noted during these visits, the Township investigates the cause and takes appropriate action. Heavy maintenance and repairs are handled by outside personnel under contract with the Township. The emergency generators are checked for readiness by exercising the units once a week.

All Township pump stations are equipped with emergency alarms. In the event of an alarm, an automatic dialer contacts Township personnel to alert them of the condition.

Industrial Waste

[25 Pa. Code § 94.12(a)(8)]

A. A copy of the Townships ordinance regulating industrial waste discharges to the sewer system is as follows

§154-107 Exclusion of industrial waste

Industrial wastes may be discharged into the sewer system only pursuant to written agreement with the Township and the Valley Forge Sewer Authority and upon obtaining an industrial waste discharge permit from Valley Forge Sewer Authority; provided that rules, regulations and acceptability standards which may from time to time be adopted by the Township and Valley Forge Sewer Authority prescribed for the pretreatment of Industrial Waste are fully complied with to the satisfaction of the Township and Valley Forge Sewer Authority. Industrial wastes to be acceptable for collection and/or treatment must not exceed the characteristics set forth in Part 2, Sewer Use, of this Chapter 154. Industrial waste surcharges will be imposed and collected by the Valley Forge Sewer Authority and will be in addition to the rentals imposed herein.

B. The Township does not sample or test the discharge from the industrial customers or the sewage leaving the Township. Industrial customers monitor their own systems and send quarterly records to the Valley Forge Sewer Authority (VFSA) to verify compliance with the Authority's effluent guidelines. VFSA and the Township have agreements in place with each industrial customer which establishes their discharge guidelines, responsibilities for maintaining effluent quality and consequences should they fail to comply with the agreement. In addition, both entities have the right to spot check the industrial effluent at any time to verify compliance. VFSA samples the Township's effluent at such time it considers it necessary to check compliance with the inter-community agreement.

C. The Township does not sample or test the discharge from the industrial customers or the sewage leaving the Township.

CHAPTER 94 MUNICIPAL WASTELOAD MANAGEMENT ANNUAL REPORT

For Calendar Year: 2020

☒ Permittee is owner and/or operator of a POTW or other sewage treatment facility
☐ Permittee is owner and/or operator of a collection system tributary to a POTW not owned/operated by permittee

GENERAL INFORMATION			
Permittee Name:	**VALLEY FORGE SEWER AUTHORITY REGIONAL TREATMENT PLANT REPORT**	Permit No.:	**PA0043974**
Mailing Address:	**333 PAWLING ROAD**	Effective Date:	**1/1/20**
City, State, Zip:	**PHOENIXVILLE, PA 19460**	Expiration Date:	**12/31/24**
Contact Person:	**Mr. Martin F. Goldberg**	Renewal Due Date:	**7/4/24**
Title:	**Operations Manager**	Municipality:	**Schuylkill Township**
Phone:	**610-935-1553**	County:	**Chester**
Email:	**mgoldberg@vfsa.com**	Consultant Name:	

CHAPTER 94 REPORT COMPONENTS

1. Attach to this report a line graph depicting the monthly average flows (expressed in MGD) for each month for the past 5 years and projecting the flows for the next 5 years. The graph must also include a line depicting the hydraulic design capacity per the WQM permit. (25 Pa. Code § 94.12(a)(1))

Check the appropriate boxes:

☒ Line graph for flows attached (**Attachment 1**)
☒ DEP Chapter 94 Spreadsheet used (**Attachment 1**)
☐ Section 1 is not applicable (report is for a collection system).

2. Attach to this report a line graph depicting the monthly average organic loads (express as lbs BOD5/day) for each month for the past 5 years and projecting the organic loads for the next 5 years. The graph must also include a line depicting the organic design capacity of the treatment plant per the WQM permit. (25 Pa. Code § 94.12(a)(2))

Check the appropriate boxes:

☒ Line graph for organic loads attached (**Attachment 1**)
☒ DEP Chapter 94 Spreadsheet used (**Attachment 1**)
☐ Section 2 is not applicable (report is for a collection system).

3. If the DEP Chapter 94 Spreadsheet was not used to determine projections, discuss the basis for the hydraulic and organic projections. In all cases, include a description of the time needed to expand the plant to meet the load projections, if necessary, and data used to support the projections should be included in an appendix to this report. (25 Pa. Code § 94.12(a)(3))

Not applicable

4. Attach a map showing all sewer extensions constructed within the past calendar year, sewer extensions approved or exempted in the past year in accordance with Act 537 and Chapter 71, but not yet constructed, and all known proposed projects which require public sewers but are in the preliminary planning stages. The map must be accompanied by a list summarizing each extension or project and the population to be served by the extension or project. If a sewer extension approval or proposed project includes schedules describing how the project will be completed over time, the listing should include that information and the effect this build-out-rate will have on populations served. (25 Pa. Code § 94.12(a)(4))

Check the appropriate boxes:

☒ Map showing sewer extensions constructed, approved/exempted but not yet constructed, and proposed projects attached (**Attachment**)

☒ List summarizing each extension or project attached (**Attachment**)

☐ Schedules describing how each project will be completed over time and effects attached (**Attachment**)

Comments:

Please see individual partner reports included as Section 3 of the 2020 VFSA Chapter 94 Municipal Wastelaod Management Annual Report.

5. Discuss the permittee's program for sewer system monitoring, maintenance, repair and rehabilitation, including routine and special activities, personnel and equipment used, sampling frequency, quality assurance, data analyses, infiltration/inflow monitoring, and, where applicable, maintenance and control of combined sewer regulators during the past year. Attach a separate sheet if necessary. (25 Pa. Code § 94.12(a)(5))

Please see individual partner reports included as Section 3 of the 2020 VFSA Chapter 94 Municipal Wastelaod Management Annual Report.

6. Discuss the condition of the sewer system including portions of the system where conveyance capacity is being exceeded or will be exceeded in the next 5 years and portions where rehabilitation or cleaning is needed or is underway to maintain the integrity of the system and prevent or eliminate bypassing, CSOs, SSOs, excessive infiltration and other system problems. Attach a separate sheet if necessary. (25 Pa. Code § 94.12(a)(6))

Check the appropriate boxes:

☒ System experienced capacity-related bypassing, SSOs or surcharging during the report year. On a separate sheet, list the date, location, and reason for each bypass, SSO or surcharge event.

☐ System did not experience capacity-related bypassing, SSOs or surcharging during the report year.

Comments:

Please see individual partner reports included as Section 3 of the 2020 VFSA Chapter 94 Municipal Wastelaod Management Annual Report.

7. Attach a discussion on the condition of sewage pumping (pump) stations. Include a comparison of the maximum pumping rate with present maximum flows and the projected 2-year maximum flows for each station. (25 Pa. Code § 94.12(a)(7))

Check the appropriate boxes:

☐ The collection system does not contain pump stations

☐ The collection system does contain pump stations (Number –)

☒ Discussion of condition of each pump station attached (**Attachment**)

8. If the sewage collection system receives industrial wastes (i.e., non-sanitary wastes), attach a report with the information listed below. (25 Pa. Code § 94.12(a)(8))

a. A copy of any ordinance or regulation governing industrial waste discharges to the sewer system or a copy of amendments adopted since the initial submission of the ordinance or regulation under Chapter 94, if it has not previously been submitted.

b. A discussion of the permittee's or municipality's program for surveillance and monitoring of industrial waste discharges into the sewer system during the past year.

c. A discussion of specific problems in the sewer system or at the plant, known or suspected to be caused by industrial waste discharges and a summary of the steps being taken to alleviate or eliminate the problems. The discussion shall include a list of industries known to be discharging wastes which create problems in the plant or in the sewer system and action taken to eliminate the problem or prevent its recurrence. The report may describe pollution prevention techniques in the summary of steps taken to alleviate current problems caused by industrial waste dischargers and in actions taken to eliminate or prevent potential or recurring problems caused by industrial waste dischargers.

Check the appropriate boxes:

☐ Industrial waste report as described in 8 a., b. and c. attached (**Attachment**)

☒ Industrial pretreatment report as required in an NPDES permit attached (**Attachment**)

9. Existing or Projected Overload.

Check the appropriate boxes:

☐ This report demonstrates an existing hydraulic overload condition.
☐ This report demonstrates a projected hydraulic overload condition.
☐ This report demonstrates an existing organic overload condition.
☐ This report demonstrates a projected organic overload condition.

If one or more boxes above have been checked, attach a Corrective Action Plan (CAP) to reduce or eliminate present or projected overloaded conditions under §§ 94.21 and/or 94.22 (relating to existing overload and projected overload). (25 Pa. Code § 94.12(a)(9))

☐ Corrective Action Plan attached (**Attachment**)

10. Where required by the NPDES permit, attach a Sewage Sludge Management inventory that demonstrates a mass balance of solids coming in and leaving the facility over the previous calendar year.

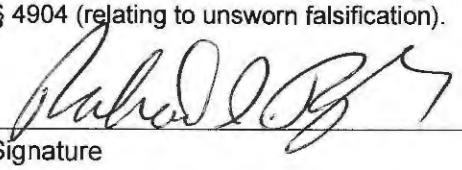
☐ Sewage Sludge Management Inventory attached (**Attachment**)

11. For facilities with CSOs and where required by the NPDES permit, attach an Annual CSO Report (including satellite combined sewer systems).

☐ Annual CSO Report attached (**Attachment**)

12. For POTWs, attach a calibration report documenting that flow measuring, indicating and recording equipment has been calibrated annually. (25 Pa. Code § 94.13(b))

☒ Flow calibration report attached (**Attachment 2**)



RESPONSIBLE OFFICIAL CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowledge of violations. See 18 Pa. C.S. § 4904 (relating to unsworn falsification).

CHAPTER 94 MUNICIPAL WASTELOAD MANAGEMENT ANNUAL REPORT INSTRUCTIONS

This form has been developed to promote consistency in the development of annual municipal wasteload management reports ("Chapter 94 reports") required by 25 Pa. Code § 94.12. At least two copies of the complete report must be submitted to the appropriate regional office of the Department of Environmental Protection (DEP) by March 31.

Enter the calendar year that the report covers at the top of the form. Check the appropriate box to indicate whether the permittee is the owner/operator of a publicly owned treatment works (POTW) or other sewage treatment facility, or is the owner/operator of a sewage collection system that is tributary to a POTW owned/operated by a different entity.

General Information

Record the name of the permittee, the permittee's full mailing address, the permittee's contact person and this person's title, phone number and email address. Also record the permit number (NPDES or WQM), the effective date of permit coverage, the expiration date of permit coverage (if applicable), the date by which an application or NOI is due for reissuance (renewal) (if applicable), the municipality and county where the sewage treatment facility or collection system is located, and the name of the consultant (company name), if any, who assisted in the preparation of the form.

Chapter 94 Report Components

This section requests responses to 12 questions that, if applicable, must be addressed for a complete Chapter 94 report. Questions 1 – 9 and 12 come directly from the Chapter 94 regulations, i.e., 25 Pa. Code §§ 94.12(a)(1) – 94.12(a)(9) and 94.13(b). Some questions request that you check an appropriate box, attach the information requested, and specify the attachment number, while responses to other questions may be entered directly on the form.

For Questions 1 and 2, permittees may use DEP's Chapter 94 Spreadsheet to satisfy 25 Pa. Code §§ 94.12(a)(1) and 94.12(a)(2), respectively. DEP encourages use of the Chapter 94 Spreadsheet to provide consistency in the format and calculations associated with hydraulic and organic load evaluations (see www.depweb.state.pa.us/chapter94). If the Chapter 94 Spreadsheet was used, check the appropriate box(es) and attach printouts of the data and graphs to the Chapter 94 report. If this report is being used for a collection system only, these graphs are not needed.

For Question 6, if the permittee checks the box that there were capacity-related bypasses or SSOs during the report year, in general the box for existing hydraulic overload in Question 9 should be checked. If the permittee checks the box in Question 6 because surcharging occurred during the report year, in general the box for projected hydraulic overload in Question 9 should be checked.

For Question 8, if the permittee has an EPA-approved pretreatment program, attachment of an annual pretreatment report as required in an NPDES permit will satisfy the requirement for an industrial waste report.

For Question 10, if a permit requires a "Sewage Sludge Management" inventory, check the appropriate box if the inventory is attached to the Chapter 94 report.

For Question 11, if an NPDES permit (individual permit or, for satellite collection systems, PAG-06 General NPDES permit coverage) requires an Annual CSO (Status) report, attach the CSO report to the Chapter 94 report and check the appropriate box.

Certification

In accordance with 25 Pa. Code § 94.12(a), both the individual who prepared the report and (a responsible official of) the permittee must sign the report. The term "responsible official" for a municipality is a principal executive officer or ranking elected official.

Questions on the completion of Chapter 94 reports may be directed to DEP's Bureau of Point and Non-Point Source Management at (717) 787-8184 or to the appropriate DEP regional office (contact information available by visiting DEP's website, www.depweb.state.pa.us, and selecting Regional Resources).

CHAPTER 94
MUNICIPAL WASTELOAD MANAGEMENT
REGIONAL TREATMENT PLANT ANNUAL REPORT
(In PADEP Format)

CALENDAR YEAR 2020

For: **THE VALLEY FORGE SEWER AUTHORITY**
WASTEWATER TREATMENT PLANT
CHESTER COUNTY, PENNSYLVANIA
333 PAWLING ROAD
PHOENIXVILLE, PA 19460

INTRODUCTION

The Valley Forge Sewer Authority (VFSA) owns and operates an advanced secondary regional publicly owned treatment works permitted by the Pennsylvania Department of Environmental Resources (PADEP), in conjunction with the United States Environmental Protection Agency (USEPA), under Discharge Permit # PA0043974.

The VFSA provides both wastewater conveyance and treatment to its Member Municipalities consisting of Schuylkill, East Pikeland, and Charlestown Townships. Additionally, wastewater treatment (not conveyance) is provided to the Partner Municipalities which include Easttown, East Whiteland, Tredyffrin and Willistown Townships and Malvern Borough. On December 19, 2018, Aqua Resources, Inc. purchased the assets of the Valley Creek Trunk Sewer (VCTS) and took over operations December 20, 2018. Beginning with the 2019 VFSA Regional Chapter 94 Report an additional collection system Chapter 94 report submitted by Aqua Resources for the Valley Creek Trunk Sewer (VCTS) system is included.

The VFSA treatment plant began treatment of wastewater during or about January 1978. The plant receives flow from the municipalities listed above from two force mains. There is one thirty inch diameter force main from the Partner Municipalities, containing wastewater flow from the Wilson Road and Valley Creek pump stations. There is also a twenty inch diameter force main from the Member Municipalities containing wastewater flow from the Pickering and Perkiomen pump stations. Flow from the two force mains combines immediately prior to the raw influent structure. The raw influent structure meters and diverts the flow into one of two primary clarifiers (operated in parallel) for gravity settling to remove heavy inorganic and organic solids, also reducing Biochemical Oxygen Demand (BOD_5). Following the primary clarifiers, further reduction of BOD_5, sufficient to also allow Nitrification, occurs biologically in the two activated sludge aeration tanks. Final settling is achieved following the aeration tanks in four final clarifiers also operated in parallel. The final treatment step prior to discharge to the Schuylkill River is ultraviolet light (UV) disinfection. Wastewater solids produced during primary clarification are pumped through cyclone degritters where grit is removed from the wastewater, sent to one of three treatment plant gravity thickeners where it is combined with other plant solids (scum, trucked wastewater and waste activated sludge).

In addition to its connected customers, VFSA also receives regulated and non-regulated (residential) trucked waste at a designated receiving station for preliminary treatment and equalization prior to combination with other plant solids in gravity thickeners. The gravity thickened solids produced in the sludge thickeners are pumped to centrifuges for dewatering. The resulting cake solids produced by the centrifuge dewatering process are alkaline stabilized by mixing dewatered sludge solids with hydrated lime, resulting in a biosolids product registered with the Pennsylvania Department of Agriculture as a fertilizer product. For more than ten years all of the VFSA biosolids have been land applied for beneficial agricultural reuse.

Act 537 Sewage Facility Planning

The long-term wastewater treatment needs for the areas served by the Valley Forge Sewer Authority (VFSA) were described in the Act 537 Plan, which was approved by the PADEP on March 10th of 2009. The basis for the 2009-approved Plan included the expansion of the VFSA treatment plant including the addition of a third aeration tank and a fourth final clarifier,

additional solids handling capacity, and new UV disinfection. UV disinfection was added in the summer of 2011 on an expedited basis in order to provide the required capacity for future disinfection as well as eliminate the risks inherent by the use of liquid chlorine.

In the winter of 2012 after discussions with its partners and the PADEP, VFSA conducted testing which successfully documented the treatment plant's capability to adequately treat wastewater for BOD5 and ammonia removal without the addition of a third aeration tank. With PADEP's concurrence the third aeration tank remains a part of the Act 537 plan, but construction has been deferred to a later date when this capacity may be required. Other items added consist of a third gravity thickener and a new third centrifuge. Final design – consisting of contracts for general construction, mechanical and electrical components - were completed in late 2012 with public bids occurring in January 2013. The three contracts were awarded and construction began in 2013 with substantial completion of the project achieved by October 20, 2016.

Construction of the VFSA influent chamber fine screen for rag and debris removal was substantially completed and placed in operation January 2020. Although this doesn't relate directly to capacity, it will improve upon process stability and reduce O & M costs.

1. HYDRAULIC LOADING

The current permitted capacities of the VFSA treatment plant are:

	Post Expansion
Annual Average Capacity	11.75 mgd
Hydraulic Design Capacity	11.75 mgd
Organic Design Capacity	26,700 lbs/day

The 2020 VFSA Annual Chapter 94 spreadsheet attached as Attachment A of Section 1 contains the summary of VFSA's treatment plant flows for the years 2016 through 2020. The Annual Average (AA) flow for 2020 was **6.801** MGD, which is fifty-eight percent of the post-expansion permitted AA capacity of **11.75** MGD.

The 2020 VFSA wastewater treatment plant flow was generated by an average of 30,399 EDUs. The year end baseline EDUs used in the projected flow calculations is 30,518.

By PADEP defimition in the Chapter 94 Municipal Wasteload Management Annual Report template, a hydraulic overload condition at the WWTP exists when, during any 3 consecutive month period, the average flow exceeds the hydraulic design capacity of the WWTP. This condition did not occur during 2020.

The VFSA treatment plant is not currently in a hydraulic overload condition therefore a Corrective Action Plan (CAP) or Connection Management Plan (CMP) are not applicable.

During 2020 there were ten days on which there were precipitation totals of one inch or greater. There were **no** exceedances of the NPDES permit due to High Flow conditions during 2020.

The annual hydraulic loading from trucked wastes is less than one percent of the total annual plant's influent, is not considered significant in regards to overall plant flow and is not included in the hydraulic projections in the VFSA DEP Chapter 94 spreadsheet.

2. ORGANIC LOADING

VFSA's Annual Average (AA) organic loading for 2020, including trucked in waste loading, was **9,994,** LB/day BOD_5, which is thirty-seven percent of the post-expansion permitted AA capacity of **26,700** LB/day BOD_5.

By PADEP definition in the Chapter 94 Municipal Wasteload Management Annual Report template an organic overload condition at the WWTP exists when, during any month the average organic loading exceeds the permitted organic design capacity of the WWTP. This condition did not occur during 2020.

Treatment plant influent $CBOD_5$ and BOD_5 samples are twenty-four hour flow proportioned composite samples collected, preserved and analyzed in accordance with

the Title 40 of the Code of Federal Regulations, Part 136. These $CBOD_5$ and BOD_5 samples are collected for analysis from the plant's raw influent structure, after initial mixing of the two force mains tributary to the treatment plant and treatment by the influent fine screen, but prior to any treatment units and recycle/return flows from the treatment plant.

VFSA calculates influent organic loadings for each day on which samples are collected for both influent $CBOD_5$ and BOD_5 utilizing PADEP's recommended method. The results are summarized in the VFSA DEP Chapter 94 spreadsheet.

Trucked waste contributes a BOD_5 load on the plant which should be accounted for and included in the Chapter 94 organic projections. This report maintains that assumption and is confirmed in the 5 year look back table below:

VALLEY FORGE SEWER AUTHORITY
Chapter 94 Historic Organic Loading
Monthly Organic Loading (ppd) Trucked Wastewater

MONTH	2016	2017	2018	2019	2020	Five Year Avg BOD5
JANUARY	2,722	488	707	1,541	773	1,246
FEBRUARY	2,731	457	343	1,393	699	1,125
MARCH	2,176	366	635	1,899	796	1,174
APRIL	2,571	442	586	1,326	671	1,119
MAY	2,452	446	623	1,110	557	1,038
JUNE	1,678	390	708	978	625	876
JULY	679	332	982	1,030	527	710
AUGUST	565	386	641	710	425	546
SEPTEMBER	488	335	594	661	512	518
OCTOBER	632	380	534	1,141	743	686
NOVEMBER	904	431	890	989	763	795
DECEMBER	1,240	240	1,704	1,155	538	975
AVERAGE	1,570	391	746	1,161	636	901
MAX MONTH	2,731	488	1,704	1,899	796	2,731

All values are in Lbs/Day BOD_5

The 2020 monthly average organic loading was calculated by adding the estimated organic loading from trucked in waste to the influent loading and is included in the DEP Chapter 94 spreadsheet monthly organic BOD_5 loads.

All contributing Partners of the regional treatment plant responded to the request for data necessary to compile this report. VFSA coordinates the responses within this submittal. The hydraulic and organic loading projections to establish treatment plant projections were prepared on the basis of wastewater treatment plant flow records and EDU projections supplied by the individual Partner municipalities. Please see Section 3 of the

2020 VFSA Chapter 94 Municipal Wasteload Management Annual Report for copies of the VFSA Member Municipalities and individual Partner Municipality reports.

3. **NOT APPLICABLE**
4. **SEWER EXTENSIONS**
5. **PROGRAM FOR SANITARY SEWER MONITORING, MAINTENANCE, REPAIR AND REHABILITATION**
6. **CONDITION OF THE SEWER SYSTEM**
7. **SEWAGE PUMPING STATIONS**

Information For Components 4 Through 7, Including The Requested Maps, Data And Supporting Information For Those Components, Can Be Found In The Valley Forge Sewer Authority and Partner Municipality Portions Of Section 3 Of The 2020 VFSA Chapter 94 Municipal Wasteload Management Annual Report.

8. INDUSTRIAL WASTES

The Industrial Pretreatment Program as approved by the United States Environmental Protection Agency (USEPA) is administered by the Valley Forge Sewer Authority on behalf of all partner municipalities. Included in the Industrial Wastes section is a comprehensive report of the activities conducted by the Authority in regards to this program. The VFSA Board of Directors has adopted by resolution a USEPA approved industrial waste pretreatment program as part of the VFSA's rules and regulations. Each Member and Partner municipality has adopted, at a minimum, the VFSA's rules and regulations regarding sewer system use as a part of their local ordinance structure. VFSA's rules and regulations and the tributary municipalities' ordinances are periodically amended to address new or revised federal, state or local rules and regulations. VFSA maintains current copies of Member and Partner municipality ordinances on file at the administrative/laboratory building adjacent to the treatment plant. Please see Section 2 of the 2020 VFSA Chapter 94 Municipal Wasteload Management Annual Report.

9. EXISTING OR PROJECTED OVERLOAD

Per the individual member reports attached the following member municipalities currently either have CAP/CMP plans submitted or approved by PADEP, while Malvern Borough, Tredyffrin Township, Valley Forge Sewer Authority and Willistown are currently not in overload conditions and do not require a CAP/CMP plan:

1) Easttown Twp - CAP/CMP approved by PADEP October 25, 2011.
2) East Whiteland Twp - CAP/CMP in effect.

(See the individual partner municipality Chapter 94 Municipal Chapter 94 Wasteload Management Annual Reports in Section 3 for more details.)

10. SEWAGE SLUDGE MANAGEMENT INVENTORY – NOT APPLICABLE

11. FACILITIES WITH CSOs – NOT APPLICABLE

12. ANNUAL CALIBRATION REPORT

VFSA has a contract with Allied Control Services, Inc. to check and calibrate the meters serving the WWTP and the municipal collections systems at least annually. (As a matter of course, most meters are calibrated on a quarterly basis). Please see Attachment No. 2 of Section 1 of the 2020 VFSA Chapter 94 Municipal Wasteload Management Regional Treatment Plant Annual Report for a copy of the fourth quarter 2020 calibration reports. Meter calibration reports for the whole year are available for review at the VFSA administration building.

HEALTHCARE

HUMAN SERVICES ASSISTANT

Trenton Psychiatric Hospital is seeking applicants who, under the guidance and direction of a Registered Nurse, will assist in the care of our adult patients who are undergoing treatment for acute and persistent mental illnesses.

All positions are hourly and earn sick leave time. Depending on the needs of our facility at the time of your employment, you may be scheduled to work one of the three shifts: 6:45AM- 3:15 PM, 2:45 PM-11:15 PM, or 10:45 PM-7:15 AM. Some weekend and holiday work will be required.

The pay rate is $16.85 per hour.

Preference will be given to candidates with at least one year of experience in a healthcare related field, or who are currently enrolled in an educational program that is considered to have a healthcare focus.

You must possess a valid driver's license to apply for the position.

Applications can be obtained from the first floor of the Parker Building at the address indicated below or can be requested via e-mail from Deborah.Kidd@doh.nj.gov

Applications cannot be requested via phone call.

LEGAL NOTICES

LEGAL NOTICE

NOTICE IS HEREBY GIVEN in accordance with the Limerick Township Zoning Ordinance of 1961, as amended, of a hearing before the Limerick Township Zoning Hearing Board on Wednesday, March 24, 2021, at 6:30 p.m., at the Limerick Township Municipal Building, 646 W. Ridge Pike, Limerick Township, Montgomery County, Pennsylvania, on the Application of John R. Maddonni, Jr., 333 River Road, Collegeville, Pennsylvania, 19426.

The Applicant is the owner of property located at 40 Penn Road, Limerick Township, Montgomery County, Pennsylvania, identified as Tax Parcel Number 37-00-03498-00-2 (hereinafter referred to as "Subject Property"). The Subject Property is located in an O/LI – Office/Limited Industrial Zoning District, is approximately 5.31 acres in size and is improved with a 25,200 square foot warehouse. The Applicant proposes to convert a portion of the existing warehouse to an indoor recreation facility and is requesting the following relief from the Limerick Township Zoning Ordinance:

1. A variance from § 184-87 to permit the existing 21 parking spaces to satisfy the requirement of off-street parking.

2. A variance from § 184-155 to permit an indoor recreational facility to occupy 10,800 square feet of the existing 25,200 square feet structure.

At the time of the hearing, any person or party interested will be given full opportunity to be heard. The Board reserves the right to conduct such other business as may come before it.

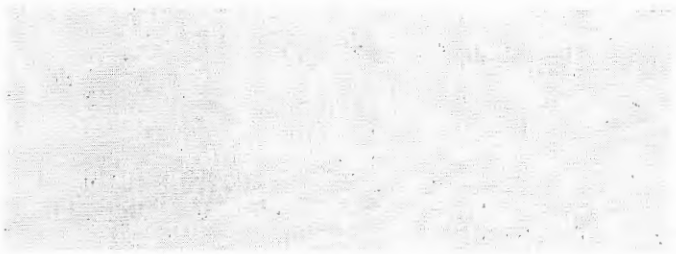
Program Implementation - Hauled Waste

Does the POTW receive any discharges of

Receive Groundwater From Hydrocarbon Cleanup Site?	NO
Receive Hauled Septage (Domestic Only)?	YES
Receive Hauled Waste From Industrial Sources?	YES
Receive Hauled Waste From Commercial Sources?	YES
Receive Hauled Categorical Waste?	YES
Receive Hauled Grease Interceptor/Trap Waste?	NO
Receive Landfill Leachate?	YES
Receive CERCLA Cleanup Wastes?	NO
Receive Hazardous (RCRA) Waste?	NO
RV Dump Stations in Service Area?	NO
Receive Other Unique Waste?	NO
Receive Oil & Gas Waste from Stripper wells?	NO

As defined at 40 CFR



If you accept any trucked or hauled waste, indicate all of the following that apply to your POTW

Legal Authority To Control Hauled Waste?	YES
POTW Issues Permits For Hauled Wastes?	YES
POTW Has A Designated Disposal Site For Hauled Wastes?	YES
POTW Controls Access At The Designated Disposal Station?	YES
POTW Uses A Manifest System To Track/Control Hauled Wastes?	YES
POTW Believes That Illegal Dumping May Be Occurring In Its Jurisdiction?	NO

What parameter if any do you surcharge

Surcharge for BOD?	YES
Surcharge for TSS?	YES
Surcharge for Oil and Grease?	NO
Surcharge for Flow?	NO
Surcharge for Ammonia?	NO
Surcharge for COD?	NO
Surcharge for TKN?	NO
Surcharge for Other Parameters?	NO

2020 Chapter 94 Report
ARRO # 5080.95

Dear Mr. Taylor:

On behalf of our client, Easttown Municipal Authority, please find enclosed the Authority's 2020 Annual Report for inclusion within the 2020 VFSA Chapter 94 Report. We trust that you will find the enclosed information satisfactory.

As always, if you have any questions or require any additional information, please feel free to contact me via email at brady.flaharty@arroconsulting.com or telephone at 610.495.2118.

Sincerely,

Brady L. Flaharty

1. INTRODUCTION

This Municipal Wasteload Management Annual Report is prepared in accordance with the Pennsylvania Department of Environmental Protection (Department) Chapter 94 for the Easttown Municipal Authority sewerage collection and conveyance system tributary to the Valley Forge Sewer Authority Wastewater Treatment Plant.

Easttown Municipal Authority (Authority) owns the sanitary sewer collection and conveyance systems within Easttown Township under Water Quality Management Permit No. 1503401. Easttown Township operates and maintains the facilities.

The Authority sanitary sewer collection system provides for collection of domestic sewage from Easttown Township, a suburban residential area encompassing several watersheds. Wastewater from each of these watersheds flows by gravity to one of twelve pumping stations, which ultimately convey the wastewater to a wastewater treatment plant operated by the Valley Forge Sewer Authority via the Aqua Resources, Inc.'s Valley Creek Trunk Sewer (VCTS) collection system. There is a small portion of the system, consisting of approximately 50 homes in the Valley Forge Road area, which drains through the Tredyffrin Township collection system into the Radnor-Haverford-Marple Authority system. There is also a small portion of the system, comprised of approximately 176.4 EDUs, that drains through Tredyffrin Township to Upper Merion Township's Trout Run Water Pollution Control Center.

The sanitary sewer collection system is comprised of roughly 319,415 lineal feet of Authority gravity sewer and 15,980 lineal feet of private gravity sewer, with approximately 1,743 manholes, and 8,011 lineal feet of low pressure force main. There are approximately 2,945 residential homes and 317 small businesses connected to the collection system. The conveyance systems are comprised of twelve (12) sewage pump stations with approximately 41,344 lineal feet of force main.

2. HYDRAULIC LOADINGS

Sewage flow from the Authority system is measured at three pumping stations, Berwyn, Daylesford and Saybrook, which each convey wastewater directly into the Tredyffrin Township collection system.

Exhibit 'A' contains a summary of Easttown total monthly flow to VFSA for 2020 and the previous 4 years, along with the 2020 monthly rainfall. The 2020 monthly flow and rainfall is charted in Exhibit 'E'.

During 2020 the measured sewage flow from the Authority sewer system averaged 1,283,410 gallons-per-day. This represents a decrease of approximately 66,581 gallons-per-day versus 2019 flows.

3. 5-YEAR HYDRAULIC AND ORGANIC LOADING PROJECTIONS

The total number of EDUs connected at the end of 2020 was 3857.4, which produced an average annual flow of 1.283 MGD and 332.7 gpd/EDU.

The number of EDUs and total average daily flow over the next five (5) years are both projected to increase as follows:

		Additional # of EDUs	*Total # of EDUs*	*Total Flow (MGD)**
Actual	*2020*	6.7	3,857.4	1.283
Projected	*2021*	60.5	3,917.9	1.304
Projected	*2022*	60.5	3,978.4	1.324
Projected	*2023*	60.5	4,038.9	1.344
Projected	*2024*	60.5	4,099.4	1.364
Projected	*2025*	60.5	4,159.9	1.384

* Projected flows are based on 2020 average gpd/EDU.

The increase in the number of connections was derived by interpolation of the Year 2040 Easttown Projected Flow, specified as 1.686 MGD, which is contained in the *Act 537 Supplement for Wilson Road Force Main*, Table 3-3, Average Daily Wastewater Flow Projections.

A summary of the EDUs, flows and organic loadings over the last five years and those projected for the next five years, along with graphs depicting the past and projected flows

and loadings, are included in Exhibit 'B'. The 2020 average annual loading was estimated to be 2,408 lbs./day based on an assumed BOD5 concentration of 225 mg/l. The maximum 1-month loading was estimated to be 3,257 lbs./day. The average 5-year ratio organic peaking factor is 1.38.

4. SEWER EXTENSIONS

There were three sewer extensions constructed in 2020, which were in the Berwyn Pump Station drainage area (Berwyn Village, Phase 1; 200 Church Road; 616 Leopard Road Subdivision).

Exhibit 'C' contains an updated Easttown Township Approved and Projected EDU map and an accompanying tracking list for the sanitary sewer system. EDUs are tracked by both Authority pump station drainage area and unmetered drainage area to the Valley Forge Sewer Authority wastewater treatment plant, by unmetered drainage area to the Radnor-Haverford-Marple Sewer Authority wastewater treatment plant and by unmetered drainage area to the Upper Merion Township Trout Run water pollution control plant. There are currently 4,114.9 EDUs connected to the Easttown Township sanitary sewer system with 4,732 projected to be connected by 2040. The tracking list and map is updated periodically as requests for connections are made and the Department approves EDUs.

5. PROGRAM FOR SANITARY SEWER MONITORING, MAINTENANCE, AND REPAIR

The sewer system is maintained by the Township Sewer Crew. The basic operation force consists of one (1) Crew Chief, and three (3) Pump Station Operators. This group is responsible for routine sewer and pump station maintenance and repairs. The Sewer Crew personnel on a daily basis check all pump stations with various readings and notations made for each station as well as conditions and status of major operational components. Each pump station is equipped with various alarms and an automatic dialer to notify Sewer Crew personnel in the event of an equipment malfunction or an unusual system condition. The Sewer Crew also has computer software installed at the Municipal

Garage and at the Crew Chief's home that allow real-time monitoring of each pump station. Additionally, a weekly "on-call" rotation is in place whereby two of the four-man crew is available at any given time to handle emergency situations.

The Township contracts with Municipal Maintenance Company (MMC) to provide quarterly detailed inspections of each station within the system. MMC generates a report detailing specific conditions and suggested corrective measures. Township personnel formulate a plan to perform the necessary maintenance and repair, either in-house or contracted services. All necessary repairs are made in a timely manner.

6. CONDITION OF THE SEWER SYSTEM

During 2020, six sanitary sewer overflow events were reported within the Authority's collection system.

- Four (4) overflow events occurred within the Berwyn Pump Station drainage area. The existing WQM permit issued by PADEP prevents the Township from setting the pump variable frequency drives to ultimate station capacity. PADEP directed the Township to submit an Act 537 Special Study, which was submitted and approved in 2020. The resetting of the VFDs to ultimate capacity would likely mitigate the likelihood of future wet weather events.
  - **January 25, 2020**: A total of 2.21 inches of rain fell. The station went into high-water alarm. For approximately 1 ½ hours an unknown amount of sewage leaked from MH #1267 into the adjacent unnamed tributary to the Darby Creek.
  - **July 10, 2020**: A total of 3.21 inches of rain fell. The station went into high-water alarm. For approximately 2 hours an unknown amount of sewage leaked from MH #1267.
  - **August 4, 2020**: A total of 5.86 inches of rain fell. The station went into high-water alarm. For approximately 3 ½ hours an unknown amount of sewage leaked from MH #1267.
  - **December 24, 2020**: A total of 2.65 inches of rain fell. The station went into high-water alarm. For approximately 2 hours an unknown amount of sewage

leaked from MH #1267. After the rain subsided the station was able to maintain incoming flow.

- Two (2) overflow events occurred within the Daylesford Pump Station drainage area. The existing WQM permit issued by PADEP prevents the Township from setting the pump variable frequency drives to ultimate station capacity. The resetting of the VFDs to ultimate capacity would likely mitigate the likelihood of future wet weather events.
  - **August 4, 2020**: A total of 5.86 inches of rain fell. For approximately 2 hours an unknown amount of sewage leaked from MH #1146. After the rain subsided the station was able to maintain incoming flow.
  - **December 24, 2020**: A total of 2.65 inches of rain fell. For approximately 2 hours an unknown amount of sewage leaked from MH #1146.

The Authority has televised certain portions of the sanitary sewer system in the Berwyn, Daylesford, Devon Hunt, Exeter, Millbrook, Newtown, Pinecroft, Saybrook and Spring Knoll Pump Station drainage areas. From 2012 through 2017 approximately 79,369 ft. of sanitary sewer has been televised. The televising found 80 pipe segment defects, 72 lateral defects and 23 manhole defects that were allowing or had potential to allow infiltration into the sanitary sewer system. Inflow/Infiltration (I/I) mitigation repair activities to correct defects found during the televising were started in July 2011 and continued through 2020.

7. SEWAGE PUMPING STATIONS

The Township operates twelve (12) pumping stations owned by the Municipal Authority. All pumping stations are equipped with magnetic flow meters that measure the flows. Exhibit 'D' contains the 2020 flow information for each pump station.

During 2020 no overflow event was reported at any of the Authority pumping stations.

The Daylesford Pump Station's Sharps Woods Gravity and Force Main Replacement project was substantially completed in November 2020.

As a result of completed and planned I/I reduction work it is anticipated that there will be no need to upgrade or expand the Saybrook Pump Station.

8. PUMPING STATION FLOW DURING MAJOR STORM EVENTS

The Department requires Chapter 94 reports to include a discussion of metered flow data for the collection and conveyance systems, specifically during major storm events (greater than 1.0 inch of rain).

Exhibit 'F' contains a summary of Easttown total monthly flow versus rainfall to VFSA from its three major pump stations – Berwyn, Daylesford and Saybrook – and also the charts of the monthly and average yearly flow for these pump stations.

Exhibit 'G' contains a summary of monthly flow versus rainfall at the nine (9) small metered satellite pump stations – Berwyn Estates, Devon Hunt, Exeter, Fox Creek, Millbrook, Newtown, Pinecroft, Spring Knoll, and The Greens – and also the charts of the monthly and average yearly flow for these pump stations.

Exhibit 'H' contains a summary of the rainfall and the metered flows at all twelve (12) of the Authority's pump stations for the ten (10) days in 2020 where rain fell more than 1-inch plus in a 24-hour period. The charts in Exhibits 'I' and 'J' were developed from this data.

Exhibit 'I' contains a chart for the Berwyn, Daylesford, and Saybrook Pump Stations during the ten (10) rain events. As related to yearly average flow, the peaking factors for the three pump station meters during the rain events are as follows:

Pump Station	Yearly Avg. Flow (MGD)	Rain Events Peaking Factor	
		High	Average
Berywn	0.8102	2.22	1.34
Daylesford	0.2823	1.82	1.19
Saybrook	0.1078	1.48	1.08

In conclusion, the peaking factors for Berwyn, Daylesford and Saybrook Pump Stations during the high rain event are within the Department's current peaking factor guidelines. However, as part of its CMP program, the Authority will continue to actively pursue I/I

in the drainage areas of contributing upstream pump stations to Berwyn Pump Station, especially Devon Hunt and Exeter.

Exhibit 'J' contains the charts of peak rain event flows at the nine (9) small metered satellite pump stations – Berwyn Estates, Devon Hunt, Exeter, Fox Creek, Millbrook, Newtown, Pinecroft, Spring Knoll, and The Greens. As related to yearly average flow, the peaking factors for the nine (9) pump stations during the rain events are as follows:

Pump Station	Yearly Avg. Flow (MGD)	Rain Events Peaking Factor	
		High	Average
Berwyn Estates	0.007	1.44	1.11
Devon Hunt	0.072	2.17	1.38
Exeter	0.009	2.74	1.39
Fox Creek	0.014	1.75	1.17
Millbrook	0.003	1.55	1.06
Newtown	0.174	2.47	1.41
Pinecroft	0.003	1.86	1.15
Spring Knoll	0.044	2.42	1.46
The Greens	0.021	1.35	1.10

9. INDUSTRIAL WASTES

There are no known industrial waste dischargers within Easttown Township.

10. CORRECTIVE ACTION PLAN

The Department mandated the Authority to develop a CMP/CAP in December 2010. ARRO Consulting, Inc. prepared a Capacity Management Plan (CMP) and an associated Strategic I/I Reduction Plan, which collectively makes up the Corrective Action Plan (CAP) that sets forth the actions the Authority would take to reduce overloads and provide additional capacity in its sanitary sewer system. The CAP/CMP that was submitted to PADEP by transmittal letter dated February 10, 2011 and, after minor revisions, was approved by PADEP by letter, dated October 25, 2011.

All of Easttown's CAP milestone work within the Berwyn Pump Station and Saybrook Pump Station drainage areas is complete. The CAP milestone work at Daylesford Pump Station, including the Sharp's Woods gravity and force main, is complete. The Valley

Creek Trunk Sewer gravity system upgrade in Tredyffrin Township and the Wilson Road Force Main Rehabilitation, into which flow the effluent from Berwyn Pump Station and Saybrook Pump Station, are also complete.

An Act 537 Special Study was prepared for the Township to establish the average annual capacities for the Township's pump stations. The Act 537 Special Study was submitted in October 2020. PADEP submitted comments in November 2020 and responses to the comments were submitted in December 2020. Final PADEP approval of the study was received by letter, dated January 11, 2021.

ARRO recently submitted Water Quality Management (WQM) Permit Applications for the Berwyn, Daylesford, Devon Hunt, Newtown and Spring Knoll Pumping Stations at the request of the Department relative to the Authority's request to turn each of these pumping stations up to full pumping capability. With the submission of the WQM Permit Applications, completion of CAP milestone work and Department approval of the Act 537 Special Study, and based on the measured flow in 2020 as discussed herein, Easttown respectfully requests to be released from the CAP/CMP requirements for the Daylesford Pumping Station, Saybrook Pumping Station and VFSA Unmetered drainage areas as identified in the Exhibit C *Easttown Township Approved and Projected Connections* map contained in this report. Easttown is embarking on a broad scope I/I project in 2021, and assuming the intended results are achieved, will be requesting to be released from the CAP/CMP in the Berwyn Pumping Station drainage area and its subdrainage areas in the 2021 Chapter 94 Report.

11. CALIBRATION REPORTS

The flow meters at Berwyn, Daylesford and Saybrook Pump Stations were calibrated during 2020. Copies of the calibration reports are included in Exhibit 'K'.

Notes:

(1) Berwyn, Daylesford and Saybrook pumping stations convey flow to the Vally Creek Trunk Sewer. The stations listed directly under those whose names are in bold type are tributary to that station whose name is in bold type.

(2) Current and Ultimate Permit Peak Flow Capacity based on one pump always on stand-by.

(3) Actual Annual Average Daily Flows are as per flow meter readings for all pumping stations.

(4) Projected Annual Average Daily flow in 2022 and at buildout (2040) is based on an interpolation of the Year 2040 Easttown Projected Flow, specified as 1.686 MGD, which is contained in the *Act 537 Supplement for Wilson Road Force Main*, Table 3-3, Average D

(5) PADEP Peaking Factor is interpolated from PADEP Southeast Regional Office's "Sewage Pumping Station Guidance (Rev. 3/24/99)".

(6) All flow rates above are in gallons per day (gpd).

RE: Township of East Whiteland
2020 Chapter 94 Report

Dear Mr. O'Neil:

On behalf of the Township of East Whiteland, please find enclosed two (2) copies of the 2020 Chapter 94 Annual Report for the Township's sewerage facilities.

Should you have any questions concerning this, please feel free to contact the undersigned.

Sincerely,

PENNONI

Charles Faulkner

CHAPTER 94 MUNICIPAL WASTELOAD MANAGEMENT ANNUAL REPORT

For Calendar Year: 2020

☐ Permittee is owner and/or operator of a POTW or other sewage treatment facility
☒ Permittee is owner and/or operator of a collection system tributary to a POTW not owned/operated by permittee

GENERAL INFORMATION

Permittee Name:	**EAST WHITELAND TOWNSHIP**	Permit No.:	**PA N/A**
Mailing Address:	**209 CONESTOGA ROAD**	Effective Date:	**N/A**
City, State, Zip:	**FRAZER, PA 19355**	Expiration Date:	**N/A**
Contact Person:	**John Nagel**	Renewal Due Date:	**N/A**
Title:	**TOWNSHIP MANAGER**	Municipality:	**EAST WHITELAND**
Phone:	**610-897-4205**	County:	**CHESTER**
Email:	**JNAGEL@EASTWHITELAND.ORG**	Consultant Name:	**PENNONI ASSOCIATES INC.**

CHAPTER 94 REPORT COMPONENTS

1. Attach to this report a line graph depicting the monthly average flows (expressed in MGD) for each month for the past 5 years and projecting the flows for the next 5 years. The graph must also include a line depicting the hydraulic design capacity per the WQM permit. (25 Pa. Code § 94.12(a)(1))

   Check the appropriate boxes:

   ☐ Line graph for flows attached (**Attachment**)
   ☐ DEP Chapter 94 Spreadsheet used (**Attachment**)
   ☒ Section 1 is not applicable (report is for a collection system).

2. Attach to this report a line graph depicting the monthly average organic loads (express as lbs BOD5/day) for each month for the past 5 years and projecting the organic loads for the next 5 years. The graph must also include a line depicting the organic design capacity of the treatment plant per the WQM permit. (25 Pa. Code § 94.12(a)(2))

   Check the appropriate boxes:

   ☐ Line graph for organic loads attached (**Attachment**)
   ☐ DEP Chapter 94 Spreadsheet used (**Attachment**)
   ☒ Section 2 is not applicable (report is for a collection system).

3. If the DEP Chapter 94 Spreadsheet was not used to determine projections, discuss the basis for the hydraulic and organic projections. In all cases, include a description of the time needed to expand the plant to meet the load projections, if necessary, and data used to support the projections should be included in an appendix to this report. (25 Pa. Code § 94.12(a)(3))

   Attachment A shows the historic and projected hydraulic demand for the service area of East Whiteland Township. The hydraulic projections were calculated based on the 2020 annual average flow and the proposed connections for the next five years.

   East Whiteland Township owns and operates a wastewater treatment plant associated with the Malvern Hunt subdivision. The WWTP consists of aerated lagoons and land application of effluent. A separate Chapter 94 report will be submitted which addresses this WWTP.

4. Attach a map showing all sewer extensions constructed within the past calendar year, sewer extensions approved or exempted in the past year in accordance with Act 537 and Chapter 71, but not yet constructed, and all known proposed projects which require public sewers but are in the preliminary planning stages. The map must be accompanied by a list summarizing each extension or project and the population to be served by the extension or project. If a sewer extension approval or proposed project includes schedules describing how the project will be completed over time, the listing should include that information and the effect this build-out-rate will have on populations served. (25 Pa. Code § 94.12(a)(4))

   Check the appropriate boxes:

   ☒ Map showing sewer extensions constructed, approved/exempted but not yet constructed, and proposed projects attached (**Attachment B**)

   ☒ List summarizing each extension or project attached (**Attachment C**)

   ☒ Schedules describing how each project will be completed over time and effects attached (**Attachment C**)

   Comments:

   Attachment B - East Whiteland Sanitary Sewer Collection System has been updated to include all sewer extensions completed in 2020.

   Attachment C provides a list of projects which were constructed in 2020, under construction currently, or will be constructed and connect to the system within the next five years.

5. Discuss the permittee's program for sewer system monitoring, maintenance, repair and rehabilitation, including routine and special activities, personnel and equipment used, sampling frequency, quality assurance, data analyses, infiltration/inflow monitoring, and, where applicable, maintenance and control of combined sewer regulators during the past year. Attach a separate sheet if necessary. (25 Pa. Code § 94.12(a)(5))

   See Attachment D

6. Discuss the condition of the sewer system including portions of the system where conveyance capacity is being exceeded or will be exceeded in the next 5 years and portions where rehabilitation or cleaning is needed or is underway to maintain the integrity of the system and prevent or eliminate bypassing, CSOs, SSOs, excessive infiltration and other system problems. Attach a separate sheet if necessary. (25 Pa. Code § 94.12(a)(6))

Check the appropriate boxes:

☐ System experienced capacity-related bypassing, SSOs or surcharging during the report year. On a separate sheet, list the date, location, and reason for each bypass, SSO or surcharge event.

☒ System did not experience capacity-related bypassing, SSOs or surcharging during the report year.

Comments:

See Attachment E

7. Attach a discussion on the condition of sewage pumping (pump) stations. Include a comparison of the maximum pumping rate with present maximum flows and the projected 2-year maximum flows for each station. (25 Pa. Code § 94.12(a)(7))

Check the appropriate boxes:

☐ The collection system does not contain pump stations

☒ The collection system does contain pump stations (Number – **12**)

☒ Discussion of condition of each pump station attached (**Attachment F**)

8. If the sewage collection system receives industrial wastes (i.e., non-sanitary wastes), attach a report with the information listed below. (25 Pa. Code § 94.12(a)(8))

a. A copy of any ordinance or regulation governing industrial waste discharges to the sewer system or a copy of amendments adopted since the initial submission of the ordinance or regulation under Chapter 94, if it has not previously been submitted.

b. A discussion of the permittee's or municipality's program for surveillance and monitoring of industrial waste discharges into the sewer system during the past year.

c. A discussion of specific problems in the sewer system or at the plant, known or suspected to be caused by industrial waste discharges and a summary of the steps being taken to alleviate or eliminate the problems. The discussion shall include a list of industries known to be discharging wastes which create problems in the plant or in the sewer system and action taken to eliminate the problem or prevent its recurrence. The report may describe pollution prevention techniques in the summary of steps taken to alleviate current problems caused by industrial waste dischargers and in actions taken to eliminate or prevent potential or recurring problems caused by industrial waste dischargers.

Check the appropriate boxes:

☒ Industrial waste report as described in 8 a., b. and c. attached (**Attachment G**)

☐ Industrial pretreatment report as required in an NPDES permit attached (**Attachment**)

DocuSign Envelope ID: 0626E1A3-5A63-4A89-91B0-9D6EE86AA83D

9. Existing or Projected Overload.

Check the appropriate boxes:

☐ This report demonstrates an existing hydraulic overload condition.
☐ This report demonstrates a projected hydraulic overload condition.
☐ This report demonstrates an existing organic overload condition.
☐ This report demonstrates a projected organic overload condition.

If one or more boxes above have been checked, attach a Corrective Action Plan (CAP) to reduce or eliminate present or projected overloaded conditions under §§ 94.21 and/or 94.22 (relating to existing overload and projected overload). (25 Pa. Code § 94.12(a)(9))

☐ Corrective Action Plan attached (**Attachment**)

10. Where required by the NPDES permit, attach a Sewage Sludge Management inventory that demonstrates a mass balance of solids coming in and leaving the facility over the previous calendar year.

☐ Sewage Sludge Management Inventory attached (**Attachment**)

11. For facilities with CSOs and where required by the NPDES permit, attach an Annual CSO Report (including satellite combined sewer systems).

☐ Annual CSO Report attached (**Attachment**)

12. For POTWs, attach a calibration report documenting that flow measuring, indicating and recording equipment has been calibrated annually. (25 Pa. Code § 94.13(b))

☐ Flow calibration report attached (**Attachment**)

RESPONSIBLE OFFICIAL CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowledge of violations. See 18 Pa. C.S. § 4904 (relating to unsworn falsification).

BUREAU OF POINT AND NON-POINT SOURCE MANAGEMENT

CHAPTER 94 MUNICIPAL WASTELOAD MANAGEMENT ANNUAL REPORT INSTRUCTIONS

This form has been developed to promote consistency in the development of annual municipal wasteload management reports ("Chapter 94 reports") required by 25 Pa. Code § 94.12. At least two copies of the complete report must be submitted to the appropriate regional office of the Department of Environmental Protection (DEP) by March 31.

Enter the calendar year that the report covers at the top of the form. Check the appropriate box to indicate whether the permittee is the owner/operator of a publicly owned treatment works (POTW) or other sewage treatment facility, or is the owner/operator of a sewage collection system that is tributary to a POTW owned/operated by a different entity.

General Information

Record the name of the permittee, the permittee's full mailing address, the permittee's contact person and this person's title, phone number and email address. Also record the permit number (NPDES or WQM), the effective date of permit coverage, the expiration date of permit coverage (if applicable), the date by which an application or NOI is due for reissuance (renewal) (if applicable), the municipality and county where the sewage treatment facility or collection system is located, and the name of the consultant (company name), if any, who assisted in the preparation of the form.

Chapter 94 Report Components

This section requests responses to 12 questions that, if applicable, must be addressed for a complete Chapter 94 report. Questions 1 – 9 and 12 come directly from the Chapter 94 regulations, i.e., 25 Pa. Code §§ 94.12(a)(1) – 94.12(a)(9) and 94.13(b). Some questions request that you check an appropriate box, attach the information requested, and specify the attachment number, while responses to other questions may be entered directly on the form.

For Questions 1 and 2, permittees may use DEP's Chapter 94 Spreadsheet to satisfy 25 Pa. Code §§ 94.12(a)(1) and 94.12(a)(2), respectively. DEP encourages use of the Chapter 94 Spreadsheet to provide consistency in the format and calculations associated with hydraulic and organic load evaluations (see www.depweb.state.pa.us/chapter94). If the Chapter 94 Spreadsheet was used, check the appropriate box(es) and attach printouts of the data and graphs to the Chapter 94 report. If this report is being used for a collection system only, these graphs are not needed.

For Question 6, if the permittee checks the box that there were capacity-related bypasses or SSOs during the report year, in general the box for existing hydraulic overload in Question 9 should be checked. If the permittee checks the box in Question 6 because surcharging occurred during the report year, in general the box for projected hydraulic overload in Question 9 should be checked.

For Question 8, if the permittee has an EPA-approved pretreatment program, attachment of an annual pretreatment report as required in an NPDES permit will satisfy the requirement for an industrial waste report.

For Question 10, if a permit requires a "Sewage Sludge Management" inventory, check the appropriate box if the inventory is attached to the Chapter 94 report.

For Question 11, if an NPDES permit (individual permit or, for satellite collection systems, PAG-06 General NPDES permit coverage) requires an Annual CSO (Status) report, attach the CSO report to the Chapter 94 report and check the appropriate box.

Certification

In accordance with 25 Pa. Code § 94.12(a), both the individual who prepared the report and (a responsible official of) the permittee must sign the report. The term "responsible official" for a municipality is a principal executive officer or ranking elected official.

Questions on the completion of Chapter 94 reports may be directed to DEP's Bureau of Point and Non-Point Source Management at (717) 787-8184 or to the appropriate DEP regional office (contact information available by visiting DEP's website, www.depweb.state.pa.us, and selecting Regional Resources).

REVISION DATE: 3/3/2020

MAP NOTES:

Mapping information was derived from various planning documents including Schoor DePalma's Sanitary Sewer Meter Location Plan, Kohli & Associates Township plan, Roy F. Weston's Master Sanitary Sewer System Plan, Chester County Recorder of Deeds Plans, and township as-built plans received by ARRO. The mapping is incomplete and will be improved as as-built and other plan information is updated into the GIS. This GIS database will provide a framework for modeling the collection system to analyze capacity issues and make recommended improvements to mitigate capacity deficiencies.

Data Sources: East Whiteland Township, Schoor DePalma, Kohli & Associates, Roy F. Weston, Chester County Recorder of Deeds and ARRO.

NOTES:

1. PLANEBROOK ROAD PUMP STATION WAS PLACED IN SERVICE IN NOVEMBER OF 2018 AND THE FRAME AVENUE PUMP STATION WAS DECOMISSIONED
2. CHURCH ROAD PUMP STATION WAS DECOMMISSIONED IN MARCH OF 2020

Program for Sanitary Sewer Monitoring, Maintenance and Repair

[25 Pa. Code § 94.12(a)(5)]

The Township monitors sewer flow leaving and entering the Township via flow meters on a daily basis. Flow Reports are compiled on a monthly basis. Any irregular patterns are investigated and corrected as soon as possible. Meter pits are checked on a routine basis to determine if the meters are functioning properly and that there is no debris accumulating within the flumes.

The Townships Public Works Department is responsible for normal daily maintenance and preventative maintenance of the sewage collection system including pump stations. The Public Works Department also is responsible for handling emergency conditions on a 24-hour basis. Ongoing visual inspections indicate the sewer is generally in good condition.

The Township Sewer Department uses video inspection equipment to inspect sewer mains for infiltration, roots and grease and locate areas of I/I. The Department is able to determine areas of concern, clean lines and make any necessary repairs as required. As an on-going practice, the Township periodically flushes the sanitary sewer lines throughout the Township.

Manhole covers are adjusted and/or watertight gaskets are being installed in low-lying areas. As part of the township's street resurfacing program, manhole covers and frames are being replaced with new gaskets covers as required and are adjusted to the new pavement grades to help eliminate inflow. Manhole inserts have been added in areas that were experiencing inflow through manhole covers.

By ordinance, all new sewer lines, laterals and building sewer must be inspected and air tested by the Township Sewer Engineer or Code Official before the lines are put into service. This procedure had allowed the Township to detect potential defective workmanship and materials, and/or in the process eliminate any potential for future I/I.

The Township is continuing the corrective measures necessary to prevent unwanted runoff from entering into the system, thus reducing the I/I in the system. The Township has created a numbering system for all manholes in its sanitary sewer system and located each manhole with GPS. A sewer system layer had been developed in its GIS data map with each manhole located and identified. The Township is beginning to televise its system again and is inputting this information onto the new GIS layer to allow the Township to better detect and remedy excessive infiltration and inflow if encountered.

ATTACHMENT E

Condition of the Sewer System

[25 Pa. Code § 94.12(a)(6)]

The Mill Lane Sewer Main Replacement Phase 1 construction project was operational as of November 2013, and the Sidley Road Sewer Main Replacement Phase 2 construction project was operational as of March 2014.the completion of the Phase 1 and 2 projects eliminated the hydraulic restriction in the East Whiteland Township sewer mains in the Mill Land and Sidley Road areas. Consequently, the connection restriction for East Whiteland has also been eliminated for the Mill Lane and Sidley Road areas.

The Improvements to the Mill Lane and Sidley Road sewer system also completed Phase 1 and 2 aspects of the Corrective Action Plan (CAP) currently on file with PaDEP. Phase 3 of the CAP related to improvements to the Lee Boulevard Pump Station are still to be implemented. The conditions of the Connection Management Plan Currently on file with PaDEP are still in effect for the contributory drainage areas from Charlestown that flows through the Mill Lane and Sidley Road Sewer Systems.

In 2016, upgrade improvements were made to the sanitary sewer within Conestoga Road. Approximately 3,780 L.F. of new 18-inch, 20-inch and 24-inch pipe were installed to replace existing deteriorating sewer.

During 2017, the following sanitary sewer system work was done.

- Wilburdale Pump Station and Force main improvements were completed,
- Planebrook Pump Station force main improvements were completed.
- Deer Run Pump Station emergency generator replacement was started and were completed in 2018

During 2018 , the following sanitary sewer system work was done.

- On August 23, 2018, a portion of a 10-inch sewer main collapsed on Warren Avenue. The repair consisted of replacing approximately 100 L.F. of the deteriorated main.
- Construction of Planebrook Pump Station was complete.
- On November 30, 2018, Frame Ave Pump Station was decommissioned and flow was diverted to the Planebrook Pump Station.

During 2019, the following sanitary sewer system work was done.

- Flat Road Pump Station was shut down on January 24, 2019 due to a sinkhole which developed at the station and jeopardized the integrity of the station. A new pump station was built and put into service in October of 2019.
- Construction of the Chester Valley Golf Course Sewer Extension began in December of 2019.

During 2020, the following sanitary sewer system work was done.

- Pump #1 at Westgate Pump Station was replaced on April 14, 2020 with a new pump.

- Church Road Pump Station was turned off on March 14, 2020 and flow was diverted through the new gravity sewer installed line through Chester Valley Golf Course.

There were no Sanitary Sewer Overflows (SSOs) in 2020.

ATTACHMENT F

Sewage Pumping Stations

[25 Pa. Code § 94.12(a)(7)]

There are currently twelve (12) pumping stations in operation that convey sanitary sewage flow within the Township. In 2018 Frame Ave Pump Station was abandoned/demolished and all flow was diverted to the newly constructed Planebrook Pump Station. The twelfth pump station is associated with the Malvern Hunt WWTP, which is covered under its own Chapter 94 Report

All pump stations, except Mill Lane, have two pumps that alternate lead-lag. The Mill Lane Pump Station has three variable speed pumps. Two pumps operate and one pump is standby.

Only the Mill Lane, Wilburdale and newly constructed Planebrook Pump Station are equipped with a magnetic flow meter to measure the pump station flows. Flow at the other eight (8) pump stations are calculated based on the monthly pump run-time data multiplied by the pump design capacity.

Township staff visits all pump stations on a regular basis to determine the condition and document the flow. If a discrepancy is noted during these visits, the Township investigates the cause and takes appropriate action. Heavy maintenance and repairs are handled by outside personnel under contract with the Township. The emergency generators are checked for readiness by exercising the units once a week.

All Township pump stations are equipped with emergency alarms. In the event of an alarm, an automatic dialer contacts Township personnel to alert them of the condition.

Industrial Waste

[25 Pa. Code § 94.12(a)(8)]

A. A copy of the Townships ordinance regulating industrial waste discharges to the sewer system is as follows

§154-107 Exclusion of industrial waste

Industrial wastes may be discharged into the sewer system only pursuant to written agreement with the Township and the Valley Forge Sewer Authority and upon obtaining an industrial waste discharge permit from Valley Forge Sewer Authority; provided that rules, regulations and acceptability standards which may from time to time be adopted by the Township and Valley Forge Sewer Authority prescribed for the pretreatment of Industrial Waste are fully complied with to the satisfaction of the Township and Valley Forge Sewer Authority. Industrial wastes to be acceptable for collection and/or treatment must not exceed the characteristics set forth in Part 2, Sewer Use, of this Chapter 154. Industrial waste surcharges will be imposed and collected by the Valley Forge Sewer Authority and will be in addition to the rentals imposed herein.

B. The Township does not sample or test the discharge from the industrial customers or the sewage leaving the Township. Industrial customers monitor their own systems and send quarterly records to the Valley Forge Sewer Authority (VFSA) to verify compliance with the Authority's effluent guidelines. VFSA and the Township have agreements in place with each industrial customer which establishes their discharge guidelines, responsibilities for maintaining effluent quality and consequences should they fail to comply with the agreement. In addition, both entities have the right to spot check the industrial effluent at any time to verify compliance. VFSA samples the Township's effluent at such time it considers it necessary to check compliance with the inter-community agreement.

C. The Township does not sample or test the discharge from the industrial customers or the sewage leaving the Township.

Re: Borough of Malvern 2020 Chapter 94 Report
EBWA Project No. 2780-16

Dear Mr. Taylor:

In accordance with the Valley Forge Sewer Authority's request, enclosed please find Malvern Borough's Chapter 94 Report for the year 2020. The report should contain the necessary information required to assist the Authority in the preparation of your Annual Report under Chapter 94 of Title 25, Section 94.12 Municipal Wasteload Management.

Also enclosed per your request are an updated Growth Projection Table and a Flow Projection Table for the Borough of Malvern as of December 31, 2020.

If you should have any questions require additional information, please do not hesitate to contact me.

Very truly yours,
EDWARD B. WALSH & ASSOCIATES, INC.
Malvern Borough Engineers

1. INTRODUCTION

Malvern Borough currently has an allocation of 543,650 GPD at the Valley Forge Sewer Authority Regional Treatment Plant. All of Malvern Borough is designated as being within the Public Sewer Service Area. Malvern Borough is the Owner and Operator of the Collection and Conveyance Systems within the Borough.

2. HYDRAULIC AND ORGANIC LOADINGS

Valley Forge Sewer Authority conducts influent sampling for BOD_5 and hydraulic loadings at the wastewater treatment plant.

Malvern Borough's average sewage flow for 2020 was 393,613 GPD, as per Valley Forge Sewage Treatment Flow Report for 2020 (supplied to the Borough on February 19, 2021).

Malvern Borough estimates their BOD_5 as follows:

The total number of pounds of BOD_5 collected each day is estimated to be 1,109.1 pounds per day, which was calculated by using a factor of 0.17 pounds per day per capita X (times) the estimated number of persons.

1,864 EDU's x 3.5 Persons = 6,524 Persons

6,524 X 0.17 = 1,109.1 Pounds

3. 5-YEAR HYDRAULIC AND ORGANIC LOADING PROJECTIONS

The 2020 Average Sewage flow of 393,613 GPD excludes:

- 2 EDU's from East Whiteland Township which flow to the Old Lincoln Highway sewage meter.
- EDU's from East Whiteland Township's portion of Erin Glen Subdivision which flows to the Warren Avenue sewage meter.

The 2020 Average Sewer flow of 393,613 includes:

- Unmetered flow from Malvern Prep (15 EDUs) and Village of Pennwyck – Vintage Subdivision (12 EDUs) to Willistown Township.

A summary of the total number of EDU's is as follows:

EQUIVALENT DWELLING UNIT (EDU) SUMMARY

	METERED EDU'S	UNMETERED EDU'S+	TOTAL EDU'S
2016	1796	27	1823
2017	1802	27	1829
2018	1805	27	1832
2019	1828	27	1855
2020	1837	27	1864

+Unmetered EDU's - Discharge into Willistown Township

Malvern Prep	15 EDUs
Village of Pennwyck - Vintage Subdivision	12 EDUs
Total	27 EDUs

ADDITIONAL EDU'S

2016	F Joseph Rubino-361 Old Lincoln Hwy. (2-4-43)	1
2017	Gables - 217 S. Warren Ave. (2-7-36)	2
	F Joseph Rubino - 361 Old Lincoln Hwy. (2-4-43)	1
	Hughes 326 Old Lincoln Hwy. (2-4-91.1)	1
	347 Old Lincoln Hwy. - Rubino Holdings (2-4-41)	2
2018	Sheet (323 Old Lincoln Hwy.-Hopkins (2-4-38)	2
	Lagrie - Building Permits (2-4-34 - Lot 1)	1
2019	400 E. King Street - Brick and Brew	8
	203 Management LLC. - 156 W. King Street	5
	Wolfe - 151 Channing Avenue	1
	Gables - 217 S. Warren Ave.	2
	Chambers - 346 E. King Street	7
2020	11 Griffith Ave Subdivision (17 Griffith Ave)	1
	Rubino (13 Lovers Ln Sub) (15 & 17)	2
	Lagrie - Building Permits (353 Old Lincoln Hwy.)	1
	51 Ruthland Ave. Subdivision (53, 55, 57 & 59)	4
	Renehan - 320 W. First Ave Permit Plan	1

During the next five (5) years, the number of EDU's is projected to increase as follows:

Year	Projected Number of EDU's to be Added in Calendar Year		Accumulative Total of the Number of EDU's *	Accumulative Total of Sewage Flow MGD
2020	---		1864	0.394
2021	13	*3575 GPD*	1877	0.397
2022	5	*1375 GPD*	1882	0.399
2023	17	*4675 GPD*	1899	0.403
2024	21	*5775 GPD*	1920	0.409
2025	15	*4125 GPD*	1935	0.413
Total:	71	19525 *GPD*		

The increase in the number of equivalent dwelling units and associated sewage flow was derived in the following manner:

1. All residential, commercial, and industrial facilities that are presently connected to the sewer system are included in the 2020 metered flow. Uncompleted developments and subdivisions and proposed developments and subdivisions under consideration have their associated sewage flow projected into each of the above referenced calendar years.

2. For each additional EDU, a sewage flow of 275 gallons per day (GPD) was used for planning purposes.

For the period of 2021 to 2025, the additional sewage flow was based upon the development of proposed and subdivisions and developments along with unanticipated projects in the manner indicated on the attached Table 1.0 entitled "Malvern Borough 2020 Growth Projection Table December 31, 2020." The location of each of the various subdivisions and developments is shown on the attached "Location Map" for Malvern Borough's 2020 Chapter 94 Report.

4. SEWER EXTENSIONS

a. No sewer main extensions were completed in 2020.

b. *A map showing sewer extensions approved or exempted in the past year in accordance with the PA Sewage Facilities Act (35 P.S. §§ 750.1—750.20) and Chapter 71 (relating to administration of the sewage facilities program), but not yet constructed.*
See Attached Map

c. *A map showing all known proposed projects which require public sewers but are in the preliminary planning stages.*
See Attached Map

d. *A list summarizing each extension or project.*
See Table 1.0

e. If a sewer extension approval or proposed project includes schedules for completing the project over time, the list should describe the projects projected build-out over time.
See Table 1.0

5. PROGRAM FOR SANITARY SEWER MONITORING, MAINTENANCE, AND REPAIR

Discussion of I & I Problems

Malvern Borough monitors the flow rates in their sewer system in order to detect sources of infiltration, and when sources of infiltration are detected, Malvern Borough takes the necessary measures to remove the cause and source of the infiltration. The balance of Malvern Borough's sanitary sewer system is in good condition. The amount of infiltration flowing into the sanitary sewer system was estimated to be at the rate of fifty (50) gallons per inch of diameter of pipe per 24 hours. Using the above described infiltration rate, the total estimated amount of infiltration into the sanitary sewer system was calculated to be as indicated below:

8" sanitary sewer 33,219 L.F. = 6.29 miles X 400 =	2,516 gallons
10" sanitary sewer 4,327 L.F. = 0.82 miles X 500 =	410 gallons
	2,926 gal/day

Measures Taken to Alleviate Infiltration Problems

The sewage flows listed in Item 1 above, Hydraulic and Organic Loading Contribution do not exceed Malvern Borough's allocated sewage flow capacity which is 0.544 MGD.

Malvern Borough will continue to take the necessary measures to eliminate infiltration problems.

Monitoring, Maintenance and Inspection of System

Twice a year a manhole inspection is performed. Once every two years or when necessary; selective video inspections of sections of the sanitary sewer system are made where infiltration problems are suspected. Low-lying manholes are

checked periodically for surface water infiltration. There are four (4) employees available for maintenance.

The Borough flow meters (installed in early 2015) were maintained / calibrated quarterly.

In 2019, the Borough replaced 2,400 linear feet of 4" forcemain from the Ruthland Avenue Pump Station to the gravity sanitary sewer manhole on Channing Avenue. The cost of this project was approximately $288,000. Also, a flow meter was installed on the Ruthland Avenue Pump Station.

Pump Station Maintenance

Stations are checked twice a day. Every week air tanks are drained in stations. Every six months pumps and motors are lubricated. There are four (4) people available for maintenance on the sanitary sewer system. In case of emergency, there is always one (1) person available on stand-by duty.

Overall Condition of Malvern Borough's Sanitary Sewer System

Malvern Borough continues to monitor and maintain their sanitary system and the overall condition of the system is good.

6. CONDITION OF THE SEWER SYSTEM

This section requires a discussion of the condition of the sewer system, including portions where conveyance capacity is exceeded or will be exceeded in the next 5 years. It should include a discussion of those portions of the system where rehabilitation or cleaning is needed or underway to maintain the integrity of the system and prevent or eliminate:

a.	*Bypassing;*	**None Known**
b.	*Combined sewer overflows;*	**None Known**
c.	*Sanitary sewer overflows;*	**None Known**
d.	*Excessive infiltration;*	**None Known**
e.	*Other system problems.*	**None Known**

Discussion of available existing and future capacity.

f. *The age of the sewer system.*

The majority of the sanitary sewer system was installed in 1975-1976.

g. *The type of material of which the system is made (i.e., brick, vitrified clay, PVC, Orangeburg, etc.).*

The existing sanitary sewer system consists of terracotta pipe. Any recent extensions or repairs to the system were made with PVC pipe.

h. *An analysis that determines whether the existing sewer lines are sized properly for the connected population.*

Based on existing flow data for the Borough as compared to the projected flow, no known capacity issues are anticipated. As re-development or new development is proposed, the capacity of the system is analyzed to ensure capacity.

i. A discussion of any portions of the system that should be repaired, replaced or rehabilitated, including a timeframe by which any proposed actions are expected to be completed.

At this time there are no portions of the system that are known to be in need of repair or replacement.

Discussion regarding any portions of the sewer system in which surcharging occurs:

j. How often does the system surcharge in each location?
There are no known areas of the system that have surcharged.

k. What size storm events create surcharging sewer lines?
Not Applicable

l. What is the cause of the surcharging?
Not Applicable

m. Sewer systems that surcharge during wet weather indicate a lack of hydraulic capacity and are considered to be in a projected hydraulic overload. For such conditions, permittees should submit a CAP and CMP with the annual report, as required by 25 Pa Code § 94.22.
Not Applicable

Provide a list of all SSOs that occurred during the calendar year, including their cause and location (a copy of the Southeast Regional Office's SSO Report Form submitted by the permittee is acceptable). SSOs related to wet weather should be discussed:

n. Explain if there is a history of SSOs at each reported location. If a trend of SSOs at specific locations during rain events is documented, this indicates a lack of hydraulic capacity and is considered a hydraulic overload condition.
There are no known areas of the system that have had an overflow.

o. *Why are SSOs occurring at each location? Has a hydraulic analysis been conducted, and if so, what were the results and recommendations for corrective action?*
Not Applicable

p. *Provide an analysis of flow metering that has been conducted.*
Not Applicable

q. *Sewer systems that experience SSOs are considered to be in an existing hydraulic overload. A CAP and CMP should be submitted with the annual report, as required by 25 Pa Code § 94.21.*
Not Applicable

The Department strongly recommends that existing capacity be documented with flow meter data. Whether flow meters are in place, or are proposed to be used throughout the system to gather data on a sub-basin approach-existing capacity should be documented with data that describes actual flow conditions during dry-weather and wet-weather conditions:

r. *Dry weather flows should be monitored to document baseline flows and for comparison purposed, to determine the extent of I/I within the collection system.*
The Borough had the five gravity flow metering stations within the Borough replaced. The meters were brought online February 21, 2015 and fully functional by the end of the First Quarter 2015.

In addition, a new meter was installed in the fall / winter of 2019 at the Ruthland Avenue Pump Station to further evaluate the Borough flows.

s. *Wet weather capacity should be determined by documenting the peak instantaneous (or peak hourly) flow rates as compared to the hydraulic carrying capacity of the sanitary sewer (i.e., Manning's equation).*

The Borough has plans to further evaluate peak flows during wet weather conditions and complete analysis related to I/I.

The Borough Engineer has begun assembling the data for the hydraulic carrying capacity of the existing sewer.

7. SEWAGE PUMPING STATIONS

Pumping Stations

There are two pump stations and two ejector stations located within Malvern Borough's sanitary sewer system.

	PUMPING STATION 1	PUMPING STATION 2	EJECTOR STATION 1	EJECTOR STATION 2
Rated Max. capacity:	500 GPM @ 120' TDH	200 GPM @ 135' TDH	50 GPM @ 35' TDH	100 GPM @ 56' TDH
Current Ave. daily flow	101.4 GPM *(1)*	43.2 GPM *(1)*	*(2)*	8 GPM *(3)*
Current peak flow	253.6 GPM *(4)*	108.1 GPM *(4)*	*(2)*	32 GPM *(3)*
Peak instantaneous flow during wet weather:	(2)	(2)	*(2)*	*(2)*
Footnotes:				
(1)	Not metered flow. Calculated on EDU basis. 781 EDU's at Station No. 1 and 333 EDU's at Station No. 2 (187 GPD_{AVG} per EDU based on Warren Avenue metered flow after deduction for Erin Glen metered flow).			
(2)	The Borough is currently working on providing information regarding these Items.			
(3)	The numbers for this Ejector Station are based on the Design Calculations			
(4)	Calculated average daily flow multiplied by a peak factor of 2.5			

8. INDUSTRIAL WASTES

If applicable, the report on industrial wastes (IW) should include:

a. *A copy of an ordinance or regulation governing IW.*
Industrial Wastes are ultimately governed by the Rules and Regulations of the Valley Forge Sewer Authority. The Rules and Regulations of Valley Forge have been adopted by Adopted by Malvern Borough via Ordinance No. 2002-2 and 2009-2, see attached.

b. *A discussion of the permittee's program for surveillance and monitoring of IW discharges to the sewer system during the past year.*
No specific program for surveillance / monitoring exists. The Borough's Public Works Department monitors the sewer system on a regular basis and if issues are observed, they are reported to the Public Works Director and the issue is investigated.

c. *A discussion of specific problems in the sewer system or at the WWTF, known or suspected to be caused by IW discharges and a summary of steps being taken to alleviate or eliminate the problems.*
No known issues within Malvern Borough's sewer system.

d. A list of any such industries known to be discharging wastes that create a problem and actions taken to prevent potential or recurring problems caused by the IW dischargers.
Not Applicable

e. *Provide documentation regarding any actions taken against IW dischargers.*
Not Applicable

9. CORRECTIVE ACTION PLAN

Malvern Borough does not have an existing or projected overload condition within their collection and or conveyance system; therefore a CAP or CMP Plan is not required.

10. CALIBRATION REPORTS

Allied Controls conducts quarterly calibrations for the flow meters within Malvern Borough. The Calibrations are done via a contract through Valley Forge Sewer Authority. The calibration reports are attached to this Chapter 94 Report.

ARTICLE III

Industrial Waste, Holding Tank Waste and Septage [Adopted 9-20-1994 by Ord. No. 94-4 (Part 11, Ch. 2, Art. B, of the 1975 Code of Ordinances)]

§ 168-11. Purpose; policy.

A. This article requires all users and use of the Borough's sewer facilities to comply with the regulations (collectively "applicable regulations" or any one individually "applicable regulation") promulgated by the Valley Forge Sewer Authority (VFSA), the United States Environmental Protection Agency (USEPA), which include, without limitation, the pretreatment standards promulgated by the USEPA as set forth in 40 Code of Federal Regulations (CFR) 403 et seq. and the Pennsylvania Department of Environmental Resources (PADER); and

B. This article establishes the means of enforcing those regulations.

§ 168-12. Amended VFSA regulations adopted. [Amended 6-18-2002 by Ord. No. 2002-2[1]; 2-17-2009 by Ord. No. 2009-2; 12-21-2010 by Ord. No. 2010-5]

The standards established by the Valley Forge Sewer Authority Rules and Regulations Governing the Acceptance of Industrial Waste, Trucked Industrial Waste, Hauling Tank Waste and Septage, dated May 31, 2002, and amended by Resolution No. 2 of 2008 of the Board of Directors of the Valley Forge Sewer Authority (VFSA) and further amended by Resolution No. 1 of 2010, are hereby adopted as the minimal standards of the Borough, applicable to all users and use of the Borough’s sewer facilities, and any user or use of the Borough facilities must comply with all of the VFSA's requirements with respect to these amended regulations, as well as all other applicable regulations.

§ 168-13. Violations.

Without limiting any other section hereof, a person (as defined by the VFSA regulations) violates this article:

A. By discharging sewage or waste into the Borough's sewage facilities when such discharge is not in compliance with this

---

1. **Editor's Note: Section 2 of this ordinance provided for the deletion of existing Appendix XXII of the 1975 Code of Ordinances and replacement with a copy of the "Valley Forge Sewer Authority Rules and Regulations Governing the Acceptance of Industrial Waste, Trucked Industrial Waste, Hauling Tank Waste and Septage dated May 31, 2002." Said document has not been codified; it is on file in the office of the Borough Secretary.**

article, any applicable industrial permit requirements or National Categorical Pretreatment Standards, any applicable regulation or any Borough order; or

B. By otherwise failing or refusing to comply in any way with the VFSA regulations, including but not limited to achieving all permits, licenses and approvals and filing all reports, when and as required.

§ 168-14. Solicitor authorized to commence action; cost of action.

The Borough Solicitor is authorized to commence actions against any violator of this article for appropriate legal and/or equitable relief from the violation. If the Borough is granted any relief in any such action, the violator shall, in addition to any fine or penalty, pay all the Borough's costs thereof, including but not limited to attorney fees.

§ 168-15. Penalties.

A. Any person (as defined by VFSA regulations) who violates any provision of this article shall, upon conviction thereof, be sentenced to pay a fine of not more than $1,000 and/or to imprisonment for a term not to exceed 90 days. Every day that any violation of this article continues shall constitute a separate offense.

B. Any person (as defined by VFSA regulations) who knowingly makes any false statement, representation or certification in any application, record, report, plan or other document filed or required to be maintained pursuant to this article or any industrial waste permit or who falsifies, tampers with or knowingly renders inaccurate any monitoring device or method required under this article shall be in violation of this article and may be prosecuted in accordance with the provisions of the Pennsylvania Crimes and Offenses Code, 18 Pa.C.S.A. § 4901 et seq. pertaining to perjury and falsification in official matters.

§ 168-16. Severability.

If any provision, paragraph, word or section of this article is invalidated by any court of competent jurisdiction, the remaining provisions, paragraphs, words and sections of this article shall not be affected and shall continue in full force and effect.

§ 168-17. Repealer.

All other ordinances or parts of other ordinances and provisions of this Code inconsistent or conflicting in any part with this article are hereby repealed to the extent of such inconsistency or conflict.

§ 168-18. Adoption of future amendments of VFSA regulations. [Added 6-18-2002 by Ord. No. 2002-2]

In the event that the Valley Forge Sewer Authority further amends its rules and regulations, or otherwise undertakes regulatory action governing wastewater treatment within the Borough of Malvern, said proposed regulations must be forwarded to and adopted by Borough Council prior to becoming effective.

* Sewage flows for the Vacant Parcels were determined by the Maximum allowable density based on current zoning.

** Potential Developments include Malvern Prep site (97 acres) and the Malvern Retreat site (106 acres). Based upon current zoning regulations, a permitted use on both parcels is a retirement community with 8 du/acre. Malvern Prep permitted density based upon zoning exceeds 440 dwelling units. Malvern Retreat permitted density based upon zoning also exceeds 440 dwelling units.

TABLE 2.0

BOROUGH OF MALVERN 30-YEAR FLOW PROJECTIONS December 2020
VALLEY FORGE SEWER AUTHORITY
2020 CHAPTER 94 REPORT

WASTEWATER FLOW PROJECTIONS

	PRESENT 2020	5-YEAR 2025	10-YEAR 2030	20-YEAR 2040	ULTIMATE 30-YEAR 2050
GPD	393,613	413,138	454,388	502,513	528,638
EDUs	1864	1935	2085	2260	2355
New EDUs	---	*71*	*150*	*175*	*95*

NOTES:

1. **Includes unmetered flow into Willistown Township** and excludes 2 EDU's from East Whiteland Twp and Erin Glen Flow from East Whiteland Twp.
   Malvern Borough has 27 EDUs that flow unmetered into Willistown Twp.
   15 EDUs - Malvern Prep= 4,125 gpd
   12 EDUs - Vintage Development = 3,300 gpd
   Total = 7,425 gpd
2. Projected flows based upon a flow of 275 gallons per day (gpd) per equivalent dwelling unit (EDU).

Tributary Municipality – Malvern Borough
Chapter 94 Report Checklist

Items marked YES are complete. Items marked NO are incomplete. Items marked NA are not applicable to this project

YES	NO	NA	Annual Report Requirements	Comments
			94.12 Annual Report	
		X	**Section (a)(1)** A line graph depicting monthly average flows (expressed in millions of gallons per day (MGD)) for each month for the past 5 years.	
		X	The graph should include projected flows for the next 5 years.	
		X	The graph shall include a line depicting the hydraulic design flow in MGD.	
		X	**Section (a)(2)** A line graph depicting monthly average organic loading (expressed in pounds per day of BOD5) for each month for the past 5 years.	
		X	The graph shall include projected loadings for the next 5 years.	
		X	The graph shall include a line depicting the organic loading design of the plant in lbs/day BOD5.	
		X	**Section (a)(3)** A discussion of the basis for the flow and organic loading projections to the plant as referred to in Sections a(1) and a(2).	
		X	A description of the time needed to expand the plant to meet the load projections, if applicable.	
		X	Data used to support the projections are included in an appendix to the report.	
		X	**Section (a)(4)** A map showing all sewer extensions constructed in the past calendar year.	
		X	The map should show sewer extensions approved or exempted in the past year in accordance with 537 but not yet constructed.	**See attached map**
X			The map should show all known proposed projects that require public sewers but that are in the preliminary planning stages.	**See attached map in report and Table 1.0**
X			A list accompanying the map summarizing each extension or project and the population to be served.	**See Table 1.0**

Tributary Municipality – Malvern Borough
Chapter 94 Report Checklist

Items marked YES are complete. Items marked NO are incomplete. Items marked NA are not applicable to this project

YES	NO	NA	Annual Report Requirements	Comments
X			The list should include any schedules describing how the project will be completed over time, and the effect that this built-out-rate will have on the populations served.	**See Table 1.0**
X			**Section (a)(5)** A discussion of the permittee's program for sewer system monitoring, maintenance, repair and rehabilitation, including routine and special activities, personnel and equipment used, sampling frequency, quality assurance, data analyses, and infiltration/inflow monitoring.	**See Item 5 of the report**
	X		A calibration report shall be included for all flow measuring, indicating and recording equipment within the collection and conveyance system. Calibrations should occur annually.	**See Item 10 of the report**
X			A discussion of the maintenance and control of combined sewer regulators during the past year.	**See Item 5 of the report**
X			**Section (a)(6)** A discussion of the condition of the sewer system, including portions of the sewer system where conveyance capacity is being exceeded or is projected to be exceeded in the next 5 years.	**See Item 6 of the report**
	X		Existing capacity should be documented with actual metering of present maximum flows. If not already existing, the permittee should consider the best placement of flow meters to document the capacity of major interceptors (greater than 10 inches in diameter) and/or where lines cross municipal borders. A discussion of present maximum flows should be documented with hourly or instantaneous peak readings taken during major storm events (greater than 1.0 inch of rain). Auto dialers may be installed to alert of high flow conditions. The Chapter 94 Report should compare the peak instantaneous flow for each major storm event to the design hydraulic conveyance capacity of the sewer in order to determine whether sufficient capacity is available. The ratio of peak (hourly or instantaneous) to annual average flows should be determined to assess the actual peaking factor for the system.	**See Item 6 of the report**

Tributary Municipality – Malvern Borough
Chapter 94 Report Checklist

Items marked YES are complete. Items marked NO are incomplete. Items marked NA are not applicable to this project

YES	NO	NA	Annual Report Requirements	Comments
X			A discussion of portions of the system where rehabilitation or cleaning is needed or underway to maintain the integrity of the system and prevent or eliminate bypassing, combined sewer overflow, sanitary sewer overflow, excessive infiltration, and other system problems.	**See Items 5 and 6 of the report – There are no known problems within the Borough's system**
X			**Section (a)(7)** A discussion of the condition of sewage pumping Stations, including: A comparison of the maximum pumping rate with present maximum flows.	**See Item 7 of the report**
	X		Present maximum flows should be documented with the peak hourly or instantaneous readings taken during major storm events (greater than 1.0 inch of rain). Auto dialers may be installed to alert of high flow conditions.	**The Borough is currently working on providing this information**
	X		A discussion of metered flow data obtained during the report's calendar year to illustrate the ratio of peak flow to annual average flow. The permittee should use these figures to determine the actual peaking factor for the pumping station.	**The Borough is currently working on providing this information**
	X		Provide documentation that the pump station can convey maximum flows with any one pump out of service.	**The Borough is currently working on providing this information**
	X		The projected two-year maximum flows for each station.	**The Borough is currently working on providing this information**
	X		The two-year projection should use the estimated new flows to the system (annual average flows), multiplied by the peaking factor derived from metered flow data.	**The Borough is currently working on providing this information**
		X	**Section (a)(8)** A report of industrial wastes discharged into the sewer system.	**Completed by VFSA**
X			The report shall include: **(i)** A copy of any ordinance or regulation governing industrial waste discharges into the sewer system, including a copy of any amendments adopted.	**Included in report**
		X	**(ii)** A discussion of the permittee's or municipality's program for surveillance and monitoring of industrial waste discharges into the sewer system during the past year.	**Completed by VFSA**

Tributary Municipality
Chapter 94 Report Checklist

Items marked YES are complete. Items marked NO are incomplete. Items marked NA are not applicable to this project

YES	NO	NA	Annual Report Requirements	Comments
		X	**(iii)** A discussion of specific problems in the sewer system or at the plant, known or suspected to be caused by industrial waste discharges, including a summary of the steps being taken to alleviate or eliminate the problems, as well as pollution prevention techniques.	**Completed by VFSA**
		X	The discussion shall include a list of industries known to be discharging wastes which create problems in the plant or in the sewer system and actions taken to eliminate the problem or prevent its recurrence.	**Completed by VFSA**
		X	**Section (a)(9)** A proposed plan to reduce or eliminate present or projected overloaded conditions under Chapters 94.21 and 94.22.	**The Borough is not projecting any overloads**
X			**Section (b)** Permittees of sewer systems which contribute sewage flows to the plant shall submit information to the permittee of the plant as required to facilitate preparation of the annual report.	
			94.13 Measuring, indicating and recording devices.	
		X	**Section (a)** A plant which receives or will receive in the next five years, monthly average flows exceeding 100,000 gallons per day (gpd) shall be equipped to continuously measure, indicate and record the flow.	
		X	The permittee shall install the necessary equipment for those measurements within 6 months after the date when such a flow becomes evident.	
		X	Section (b) A calibration report shall be included in the annual report for flow measuring, indicating and recording equipment. Calibrations should occur annually.

CHAPTER 94 MUNICIPAL WASTELOAD MANAGEMENT ANNUAL REPORT

For Calendar Year: 2020

☒ Permittee is owner and/or operator of a POTW or other sewage treatment facility
☐ Permittee is owner and/or operator of a collection system tributary to a POTW not owned/operated by permittee

GENERAL INFORMATION			
Permittee Name:	**VALLEY FORGE SEWER AUTHORITY MEMBER MUNICIPALITIES REPORT**	Permit No.:	**PA0043974**
Mailing Address:	**333 PAWLING ROAD**	Effective Date:	**1/1/20**
City, State, Zip:	**PHOENIXVILLE, PA 19460**	Expiration Date:	**12/31/24**
Contact Person:	**Mr. Martin F. Goldberg**	Renewal Due Date:	**7/4/24**
Title:	**Operations Manager**	Municipality:	**Schuylkill Township**
Phone:	**610-935-1553**	County:	**Chester**
Email:	**mgoldberg@vfsa.com**	Consultant Name:	

CHAPTER 94 REPORT COMPONENTS

1. Attach to this report a line graph depicting the monthly average flows (expressed in MGD) for each month for the past 5 years and projecting the flows for the next 5 years. The graph must also include a line depicting the hydraulic design capacity per the WQM permit. (25 Pa. Code § 94.12(a)(1))

Check the appropriate boxes:

☒ Line graph for flows attached (**Attachment 1**)
☒ DEP Chapter 94 Spreadsheet used (**Attachment 1**)
☐ Section 1 is not applicable (report is for a collection system).

2. Attach to this report a line graph depicting the monthly average organic loads (express as lbs BOD5/day) for each month for the past 5 years and projecting the organic loads for the next 5 years. The graph must also include a line depicting the organic design capacity of the treatment plant per the WQM permit. (25 Pa. Code § 94.12(a)(2))

Check the appropriate boxes:

☒ Line graph for organic loads attached (**Attachment 1**)
☒ DEP Chapter 94 Spreadsheet used (**Attachment 1**)
☐ Section 2 is not applicable (report is for a collection system).

3. If the DEP Chapter 94 Spreadsheet was not used to determine projections, discuss the basis for the hydraulic and organic projections. In all cases, include a description of the time needed to expand the plant to meet the load projections, if necessary, and data used to support the projections should be included in an appendix to this report. (25 Pa. Code § 94.12(a)(3))

Not applicable

4. Attach a map showing all sewer extensions constructed within the past calendar year, sewer extensions approved or exempted in the past year in accordance with Act 537 and Chapter 71, but not yet constructed, and all known proposed projects which require public sewers but are in the preliminary planning stages. The map must be accompanied by a list summarizing each extension or project and the population to be served by the extension or project. If a sewer extension approval or proposed project includes schedules describing how the project will be completed over time, the listing should include that information and the effect this build-out-rate will have on populations served. (25 Pa. Code § 94.12(a)(4))

Check the appropriate boxes:

☒ Map showing sewer extensions constructed, approved/exempted but not yet constructed, and proposed projects attached (**Attachment**)

☒ List summarizing each extension or project attached (**Attachment**)

☐ Schedules describing how each project will be completed over time and effects attached (**Attachment**)

Comments:

Please see report following.

5. Discuss the permittee's program for sewer system monitoring, maintenance, repair and rehabilitation, including routine and special activities, personnel and equipment used, sampling frequency, quality assurance, data analyses, infiltration/inflow monitoring, and, where applicable, maintenance and control of combined sewer regulators during the past year. Attach a separate sheet if necessary. (25 Pa. Code § 94.12(a)(5))

Please see report following.

6. Discuss the condition of the sewer system including portions of the system where conveyance capacity is being exceeded or will be exceeded in the next 5 years and portions where rehabilitation or cleaning is needed or is underway to maintain the integrity of the system and prevent or eliminate bypassing, CSOs, SSOs, excessive infiltration and other system problems. Attach a separate sheet if necessary. (25 Pa. Code § 94.12(a)(6))

Check the appropriate boxes:

☐ System experienced capacity-related bypassing, SSOs or surcharging during the report year. On a separate sheet, list the date, location, and reason for each bypass, SSO or surcharge event.

☒ System did not experience capacity-related bypassing, SSOs or surcharging during the report year.

Comments:

7. Attach a discussion on the condition of sewage pumping (pump) stations. Include a comparison of the maximum pumping rate with present maximum flows and the projected 2-year maximum flows for each station. (25 Pa. Code § 94.12(a)(7))

Check the appropriate boxes:

☐ The collection system does not contain pump stations

☐ The collection system does contain pump stations (Number –)

☒ Discussion of condition of each pump station attached (**Attachment**)

8. If the sewage collection system receives industrial wastes (i.e., non-sanitary wastes), attach a report with the information listed below. (25 Pa. Code § 94.12(a)(8))

a. A copy of any ordinance or regulation governing industrial waste discharges to the sewer system or a copy of amendments adopted since the initial submission of the ordinance or regulation under Chapter 94, if it has not previously been submitted.

b. A discussion of the permittee's or municipality's program for surveillance and monitoring of industrial waste discharges into the sewer system during the past year.

c. A discussion of specific problems in the sewer system or at the plant, known or suspected to be caused by industrial waste discharges and a summary of the steps being taken to alleviate or eliminate the problems. The discussion shall include a list of industries known to be discharging wastes which create problems in the plant or in the sewer system and action taken to eliminate the problem or prevent its recurrence. The report may describe pollution prevention techniques in the summary of steps taken to alleviate current problems caused by industrial waste dischargers and in actions taken to eliminate or prevent potential or recurring problems caused by industrial waste dischargers.

Check the appropriate boxes:

☐ Industrial waste report as described in 8 a., b. and c. attached (**Attachment**)

☒ Industrial pretreatment report as required in an NPDES permit attached (**Attachment**)

9. Existing or Projected Overload.

Check the appropriate boxes:

- ☐ This report demonstrates an existing hydraulic overload condition.
- ☒ This report demonstrates a projected hydraulic overload condition.
- ☐ This report demonstrates an existing organic overload condition.
- ☐ This report demonstrates a projected organic overload condition.

If one or more boxes above have been checked, attach a Corrective Action Plan (CAP) to reduce or eliminate present or projected overloaded conditions under §§ 94.21 and/or 94.22 (relating to existing overload and projected overload). (25 Pa. Code § 94.12(a)(9))

☐ Corrective Action Plan attached (**Attachment**)

10. Where required by the NPDES permit, attach a Sewage Sludge Management inventory that demonstrates a mass balance of solids coming in and leaving the facility over the previous calendar year.

☐ Sewage Sludge Management Inventory attached (**Attachment**)

11. For facilities with CSOs and where required by the NPDES permit, attach an Annual CSO Report (including satellite combined sewer systems).

☐ Annual CSO Report attached (**Attachment**)

12. For POTWs, attach a calibration report documenting that flow measuring, indicating and recording equipment has been calibrated annually. (25 Pa. Code § 94.13(b))

☒ Flow calibration report attached (**Attachment 2**)

RESPONSIBLE OFFICIAL CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowledge of violations. See 18 Pa. C.S. § 4904 (relating to unsworn falsification).

CHAPTER 94 MUNICIPAL WASTELOAD MANAGEMENT ANNUAL REPORT INSTRUCTIONS

This form has been developed to promote consistency in the development of annual municipal wasteload management reports ("Chapter 94 reports") required by 25 Pa. Code § 94.12. At least two copies of the complete report must be submitted to the appropriate regional office of the Department of Environmental Protection (DEP) by March 31.

Enter the calendar year that the report covers at the top of the form. Check the appropriate box to indicate whether the permittee is the owner/operator of a publicly owned treatment works (POTW) or other sewage treatment facility, or is the owner/operator of a sewage collection system that is tributary to a POTW owned/operated by a different entity.

General Information

Record the name of the permittee, the permittee's full mailing address, the permittee's contact person and this person's title, phone number and email address. Also record the permit number (NPDES or WQM), the effective date of permit coverage, the expiration date of permit coverage (if applicable), the date by which an application or NOI is due for reissuance (renewal) (if applicable), the municipality and county where the sewage treatment facility or collection system is located, and the name of the consultant (company name), if any, who assisted in the preparation of the form.

Chapter 94 Report Components

This section requests responses to 12 questions that, if applicable, must be addressed for a complete Chapter 94 report. Questions 1 – 9 and 12 come directly from the Chapter 94 regulations, i.e., 25 Pa. Code §§ 94.12(a)(1) – 94.12(a)(9) and 94.13(b). Some questions request that you check an appropriate box, attach the information requested, and specify the attachment number, while responses to other questions may be entered directly on the form.

For Questions 1 and 2, permittees may use DEP's Chapter 94 Spreadsheet to satisfy 25 Pa. Code §§ 94.12(a)(1) and 94.12(a)(2), respectively. DEP encourages use of the Chapter 94 Spreadsheet to provide consistency in the format and calculations associated with hydraulic and organic load evaluations (see www.depweb.state.pa.us/chapter94). If the Chapter 94 Spreadsheet was used, check the appropriate box(es) and attach printouts of the data and graphs to the Chapter 94 report. If this report is being used for a collection system only, these graphs are not needed.

For Question 6, if the permittee checks the box that there were capacity-related bypasses or SSOs during the report year, in general the box for existing hydraulic overload in Question 9 should be checked. If the permittee checks the box in Question 6 because surcharging occurred during the report year, in general the box for projected hydraulic overload in Question 9 should be checked.

For Question 8, if the permittee has an EPA-approved pretreatment program, attachment of an annual pretreatment report as required in an NPDES permit will satisfy the requirement for an industrial waste report.

For Question 10, if a permit requires a "Sewage Sludge Management" inventory, check the appropriate box if the inventory is attached to the Chapter 94 report.

For Question 11, if an NPDES permit (individual permit or, for satellite collection systems, PAG-06 General NPDES permit coverage) requires an Annual CSO (Status) report, attach the CSO report to the Chapter 94 report and check the appropriate box.

Certification

In accordance with 25 Pa. Code § 94.12(a), both the individual who prepared the report and (a responsible official of) the permittee must sign the report. The term "responsible official" for a municipality is a principal executive officer or ranking elected official.

Questions on the completion of Chapter 94 reports may be directed to DEP's Bureau of Point and Non-Point Source Management at (717) 787-8184 or to the appropriate DEP regional office (contact information available by visiting DEP's website, www.depweb.state.pa.us, and selecting Regional Resources).

CHAPTER 94
MUNICIPAL WASTELOAD MANAGEMENT
MEMBER MUNICIPALITIES ANNUAL REPORT
(In PADEP Format)

CALENDAR YEAR 2020

For: **THE VALLEY FORGE SEWER AUTHORITY**
MEMBER MUNICIPALITIES REPORT
CHESTER COUNTY, PENNSYLVANIA
333 PAWLING ROAD
PHOENIXVILLE, PA 19460

INTRODUCTION

Valley Forge Sewer Authority (VFSA) owns and operates an advanced secondary regional publicly owned treatment works permitted by the Pennsylvania Department of Environmental Resources (PADEP), in conjunction with the United States Environmental Protection Agency (USEPA), under Discharge Permit # PA0043974.

The VFSA provides both wastewater conveyance and treatment to its Member Municipalities consisting of Schuylkill, East Pikeland, and Charlestown Townships. The Member Municipalities allocation of the total treatment plant hydraulic and organic loading is 18.1 percent.

1. HYDRAULIC LOADING

The current permitted capacities of the VFSA treatment plant are:

	Post Expansion	**Member Municipality Allocation**
Annual Average Capacity	11.75 mgd	2.128 MGD (18.1% of total)
Hydraulic Design Capacity	11.75 mgd	2.128 MGD (18.1% of total)
Organic Design Capacity	26,700 lbs/day	4,833 lbs/day (18.1% of total)

The Annual Average (AA) flow for 2020 for the VFSA Member Municipalities was **1.671** MGD, which is seventy-eight percent of the post-expansion AA capacity of **2.128** MGD.

The 2020 VFSA Member Municipalities wastewater treatment plant flow was generated by an average of 7,462 EDUs. The number of baseline EDUs used in the projected flow calculations is 7,521, corresponding to the 2020 end-of-year EDU count.

By PADEP definition in the Chapter 94 Municipal Wasteload Management Annual Report template, a hydraulic overload condition at the WWTP exists when, during any three consecutive month period, the average flow exceeds the hydraulic design capacity of the WWTP. This condition did not occur during 2020.

2. ORGANIC LOADING

The Annual Average (AA) organic loading for 2020 for the VFSA Member Municipalities was **2,787** LB/day BOD_5, which is fifty-eight percent of the post-expansion permitted AA capacity of **4,833** LB/day BOD_5. Organic loading was estimated utilizing an average value of 200 mg/L BOD_5.

By PADEP definition in the Chapter 94 Municipal Wasteload Management Annual Report template an organic overload condition at the WWTP exists when, during any month the average organic loading exceeds the permitted organic design capacity of the WWTP. This condition did not occur during 2020.

3. NOT APPLICABLE

4. SEWER EXTENSIONS

The total number of EDUs connected at the end of 2020 was 7521. The EDU count at the end of the year was 215 EDUs.

During the next five years, the number of EDUs is projected to increase as follows:

2021	141
2022	159
2023	45
2024	25
2025	18

Please see the spreadsheet and graphs included in Appendix A at the end of this section.

Information and updates on the progress of the sewer extensions is presented in Table 1, below:

VALLEY FORGE SEWER AUTHORITY MEMBER MUNICIPALITY SEWER EXTENSIONS - 2020 CHAPTER 94 REPORT						
Development Name	**Developer**	**Municipality**	**# of new connections completed in 2020**	**Length of Sewer Cleaned and TV'd (Lineal Feet)**	**Dedication status**	**Notes**
Pickering Crossing	Southdown Homes	Charlestown Township	6	1250	Construction in progress Dedication expected in 2022	10 lots remain to be connected in 2021 & 2022 and beyond.
Spring Oak	JP Orleans	Charlestown Township	13	2850	Phases 2 & 3 dedication are completed. Phase 1 dedication is projected be completed in the fall of 2021 with recordation of ROW Agreement	19 new homes to be connected in 2021 & 2022 and beyond.
Devault Village at Spring Oak	JP Orleans	Charlestown Township	0	0	Agreements anticipated prior to star date. Expexded start fall of 2021	Received PADEP planning approval in December 2018 for 15,950 gpd.
Kimberton Glen	Toll Brothers	East Pikeland Township	55	3100	Phase 1 dedication to the Authority will be completed upon successful fulfillment of the 18-month Maintenance Warranty. Projected 2021.	81 lots remain to be connected in 2021 & 2022 and beyond. Phases 2 & 3 are currently under construction.
400 Westside	Longview	East Pikeland Township		1800	Deed of Dedication and Right-of Way agreement to Authority was completed in the fall of 2020 and recorded at Chester County.	Completed final closeout of this development project occurred in the fall of 2020 with VFSA Board approval.
Valley Forge Greene	Pulte	Schuylkill Township	8	625	Agreements are in place and sanitary sewer construction activities are in progress.	Received PADEP planning approval in February 2020 for 32 - unit townhomes totalling 8,800 gpd. To date, 24 units remain to be connected in 2021 & 2022.

5. PROGRAM for SANITARY SEWER MONITORING, MAINTENANCE, REPAIR AND REHABILITATION

In late 2019, the Authority, with their Engineer of Record, Buchart-Horn, Inc., completed a study which was documented in a report entitled, "Valley Forge Sewer Authority, French Creek Interceptor System Evaluation". The evaluation included manhole inspections and flow monitoring in various subbasins within the overall French Creek Drainage Basin. In 2020 to address items highlighted in the BH study, the Authority initiated field work to repair and improve key portions of the basin. The project activities included:

- Clearing all right-of-ways of overgrown vegetation.
- Utilizing a Global Positioning System (GPS) to locate manholes and marking all manhole locations within the study area.
- Installing portable flow meters in strategic areas to evaluate inflow and infiltration (I&I) quantities at these locations during storm events.
- Utilizing the Authority's Engineer of Record, Buchart Horn Inc., to provide manhole condition assessments according to industry-accepted methodologies.
- Utilizing a contractor to clean and televise sanitary sewers in the targeted drainage areas and to perform spot repairs.
- Installing new water proof manhole frames and covers.

In 2020, approximately 60% of the entire French Creek Pump Station sanitary sewer drainage basin including 13 miles of pipe and 302 manholes had been cleaned, televised and inspected. This work also included performing 35 spot repairs to gravity sewer pipes and manholes and installing 40 new manhole frame and covers.

Some conclusions of this work to date include the following:

- The gravity sewers and manholes appear to be in generally good condition, and while some defects were found and repaired, they were generally minor.
- An expanded maintenance program which includes identification of system defects and repair will be beneficial going forward.
- In addition to I&I related to precipitation events, there is also a relationship between groundwater level and wastewater flow in the French Creek sewer system.
- Significant additional work is needed to identify and repair I&I throughout the entire VFSA system. However, gaining significant capacity through I&I reduction may be unlikely. More important is the maintenance of system condition in order to avoid

degradation which may result in reduced capacity and increase the risk of sewer overflows. Future planning will include capacity equaling 275 gpd/edu.

In addition to continuing with the I&I activities that are described above, the additional work anticipated in the future includes the following:

- Establish and implement appropriate activities to evaluate and address potential sources of I&I from private sewer lateral connections and potentially illegal connections to the sanitary sewer system from private households. The Authority is also evaluating developing ordinances which would require, as part of the real estate transaction process, inspections of internal plumbing in customer homes to assure no illegal connections.

In 2021 the Authority intends to continue its work in the French Creek basin, as well as initiating evaluation and repair work in other parts of its overall system. A program to address manholes along stream corridors in the Pickering Creek and White Horse pumping station basins including manhole survey and inspection is planned for 2021.

In addition to the I&I Analysis and Repair activities described above, the Authority also performed two significant sanitary pipeline and manhole repairs in 2020 which are summarized below:

1. **Replacement of Gravity Sewer Line on West Pothouse Road between West Evergreen Drive and East of Potters Pond Drive from Manholes 104 to 103 (August 2020).** This gravity sewer segment, consisting of approximately 370 feet of 18" asbestos cement pipe, was identified to be partially collapsed as a result of sulfide corrosion. The Authority contracted with their on-call contractor, Blooming Glenn Construction, to perform expedited work to excavate and replace this segment with 26 SDR PVC pipe and reconnect the 2 sanitary laterals that were connected to this pipe segment. In addition, both the upstream and downstream manholes were found to be damaged as a result of hydrogen sulfide corrosion. They were rebuilt with corrosion resistant materials.

   Following this work activity, the Authority televised all of the gravity sewers on Pothouse Road between Township Line Road and the Pothouse Pumping Station. Repairs are anticipated to be performed in 2021 based on the findings of the television inspection work.

2. **Sinkhole repair at 3222 Phoenixville Pike (November 2020).** A gravity sewer segment consisting of 150 feet of 10" PVC pipe was found to be exposed as a result of significant sinkhole undermining of the pipe in an Authority right-of way. Once identified, the Authority contracted with Earth Engineering to establish the best course of action to safely stabilize the partially undermined gravity sewer line. The recommendation was to excavate and expose a significant portion of the pipe, and then stabilize the pipe with mechanical joint reinforcements and partially backfill with flow-able fill material. Once accomplished the segment was backfilled with clean soil to grade and then re-

vegetated. This work was performed for the Authority on an expedited basis by Blooming Glen Construction.

6. CONDITION OF THE SEWER SYSTEM

As indicated in Section 5 above, a conclusion of the French Creek Evaluation was that the gravity sewers and manholes in the French Creek drainage basin appear to be in generally good condition. It is the Authority's opinion that its entire system is also in a generally good state of repair, and further detailed study will occur in subsequent years.

During 2020, no bypassing occurred in the Member Municipalities sanitary sewer system. VFSA has a sanitary sewer system only, not a combined system, so no CSOs occurred. During 2020, there were three Sanitary Sewer Overflow (SSOs) which were promply reported to PADEP. These occurred on the following dates: January 25, August 4, and August 4-5. Copies of the submitted reports are in Appendix B:

In 2019 the Authority excavated to expose key locations in its force main which runs from its Pickering Pumping Station to the WWTP in order to better evaluate forcemain pipe conditions and establish recommendations for system maintenance. Results of this testing indicated a need to install a new air release valve (ARV) at a vulnerable location (which was completed in 2020). Further evaluation will be performed in 2021.

7. SEWAGE PUMPING STATIONS

Please see the table (attached) regarding VFSA member municipality pump stations. Additional flows are based on the Member Municipalities 5 year average EDU rate of 231 gpd/EDU. Data for the Maximum Day Flow has been obtained from the cloud based real time monitoring system for the pump stations from the heavy precipitation event of approximately 5.9 inches which occurred on August 4, 2020.

Overall 2020 was an above average year for precipitation with annual rainfall totals in excess of 59 inches versus average rainfall amounts of approximately 48 inches. This resulted in high maximum day flows at the pumping stations, but still below their hyrdraulic design capacities. All four of the large pump stations in VFSA's system contain three (3) pumps which enables two (2) pumps to operate simultaneously if required.

Please see the tables and graphs included as Appendices C and D which include monthly flows at the 4 major pump stations and flows at all of the Authority's pump stations in regards to rainfall events of one inch or more during 2020.

* For smaller pumping stations with limited flow recording data, Max. Day was calculated using average ratio of 4 regional stations (Pickering, White Horse, Pothouse, French Creek. Max. Day/Avg. Day= 3.69

8. INDUSTRIAL WASTES

The Industrial Pretreatment Program as approved by the United States Environmental Protection Agency (USEPA) is administered by the Valley Forge Sewer Authority on behalf of all partner municipalities. Included in the Industrial Wastes section is a comprehensive report of the activities conducted by the Authority in regards to this program. The VFSA Board of Directors has adopted by resolution a USEPA approved industrial waste pretreatment program as part of the VFSA's rules and regulations. Each Member and Partner municipality has adopted, at a minimum, the VFSA's rules and regulations regarding sewer system use as a part of their local ordinance structure. VFSA's rules and regulations and the tributary municipalities' ordinances are periodically amended to address new or revised federal, state or local rules and regulations. VFSA maintains current copies of Member and Partner municipality ordinances on file at the administrative/laboratory building adjacent to the treatment plant. Please see Section 2 of the VFSA Chapter 94 Municipal Wasteload Management Regional Treatment Plant Annual Report.

9. EXISTING OR PROJECTED OVERLOAD

Per the VFSA Member Municipalities PADEP Chapter 94 Spreadsheet hydraulic and organic historical data and projections, the VFSA member municipalities are projected to slightly exceed their hyrdraulic capacity allocation for 2022 through 2025. However, a hydraulic overload of the wastewater treatment plant is not projected for these years since the plant is only currently at 58% of its capacity and the other partner municipalities are well below their projected hydraulic capacity allocations. This situation also occurred in 2018 and 2019 and is allowed under the Wastewater Treatment Plant Rental Pool Agreement where unused allocated capacity is automatically rented to the municipalities in need. There are no projected organic overload conditions through 2025.

There are no projected hydraulic overloads at the Pumping Stations for the next 2 years or the Wastewater Treatment Plant.

10. SEWAGE SLUDGE MANAGEMENT INVENTORY – NOT APPLICABLE

11. FACILITIES WITH CSOs – NOT APPLICABLE

12. ANNUAL CALIBRATION REPORT

VFSA has a contract with Allied Control Services, Inc. to check and calibrate the meters serving the WWTP and the municipal collections systems at least annually. (As a matter of course, these meters are calibrated on a quarterly basis). Please see Attachment No. 2 of Section 1 of the 2020 VFSA Chapter 94 Municipal Wasteload Management Regional Treatment Plant Annual Report for a copy of the fourth quarter 2020 calibration reports. Meter calibration reports are available upon request.

NON-COMPLIANCE REPORTING FORM

Use this supplemental form to report all permit violations and any other non-compliance that may endanger health or the environment, in accordance with your permit. Complete all sections that apply. If you are reporting violations of permit limits, monitoring requirements or schedules that do not pose an immediate threat to health or the environment, you may attach this form to the Discharge Monitoring Report (DMR). **Title 25, Pa. Code §§ 91.33 and 91.34 (regarding incidents causing or threatening pollution and activities utilizing pollutants, respectively), in part requires immediate notification by telephone to the Department of pollution incidents, remediation, and may require an additional report on the incident or plan of pollution prevention measures.** If you are reporting other non-compliance events, and the reporting deadline does not coincide with your submission of the DMR, it should be submitted separately to the Department by the reporting deadline set forth in the permit. See instructions for more information.

Pothouse Road Sanitary Sewer Overflow (SSO) Event

1/25/20

At about 11am on Saturday 25 January 2020, during a heavy rain event, the Authority experienced a sewer system overflow (SSO) of less than 35,000 gallons to the Caines Creek near the Pothouse Pumping Station at 630 West Pothouse Road in Schuylkill Township PA. The pump station is designed with three pumps, with 2 electrical pumps and a third diesel powered self priming emergency pump. Two electric pumps may pump the design flow from the wet well. If there is a failure of an electric pump, the self priming emergency pump should engage to pump the design flow from the wet well.

On 25 January the relatively high flows from a storm would have resulted in the need to operate 2 electric pumps simultaneously. However when this occurred, the lag pump failed to start. Once the emergency pump engaged, it self-primed, and pumped down the pump station wet well. But this occurred too late to prevent an SSO. Had either the lag electric pump or the diesel powered emergency pump activated sooner, the SSO could have been avoided. It is unclear why the lag electric pump didn't start. In order to prevent a future SSO, the Authority is performing the following activities:

- Review the settings and controls on all of our pumping stations. Consider activating the emergency pump at a lower wet well level.
- Consider utilizing a device that was part of the original emergency pump design which maintains pump prime by keeping the suction pipe full at all times. Consider adding equipment to prevent freezing in the suction line which will allow for maintaining pump prime in winter weather. If successful, this will shorten the time necessary for the engaged emergency pump to pump down the wet well.
- Consider adding a third electric pump at the Pothouse pump station.

Per the requirements of the treatment plant's NPDES permit, PADEP and three potable water plants located on the Schuylkill River downstream from the entry point of the sewer overflow were notified.

The formula used to develop Table 1 measures the maximum height of the water coming out of the maintenance manhole above the rim. The formula was taken from Hydraulics and its Application by A.H. Gibson (Constable & Co. Limited).

Partially Covered Manhole

Sometimes an SSO will occur that only lifts one side of the manhole cover. This is especially true of manholes where the cover is on an incline with the cover lifting on the downward side of the manhole. To estimate the volume of an SSO under these conditions, calculate the area (in square feet) from where the wastewater is escaping and the velocity (in feet per second) that the wastewater is normally traveling in the sewer at half the pipe depth. The velocity is estimated from visual observation with 2 feet/second or less being a small velocity, 4 to 5 feet/second being a medium velocity, and 7 feet/second or higher being a large velocity. Velocities in the sewer above 7 feet/second may be strong enough to blow the manhole cover off. Higher velocities also tend to raise the manhole lid higher. Next, multiply by the duration

Phoenixville, PA 19460 [153258]

Subject: Tredyffrin Township, Paoli Drainage Basin, 2020 Municipal Wasteload Management Annual Report

Dear Mr. Taylor:

Enclosed please find two copies of the above-referenced report for the calendar year 2020. This information is submitted on behalf of Tredyffrin Township for the Valley Forge Sewer Authority's (VFSA) information and use.

Please send a copy of the VFSA Chapter 94 report to Tredyffrin Township once completed.

If you have any questions, please do not hesitate to contact me either via phone at 443.223.7308 or email: Slockhart@brwncald.com. Thank you!

Very truly yours,

Brown and Caldwell

CHAPTER 94 MUNICIPAL WASTELOAD MANAGEMENT ANNUAL REPORT

For Calendar Year: 2020

☐ Permittee is owner and/or operator of a POTW or other sewage treatment facility
☐ Permittee is owner and/or operator of a collection system tributary to a POTW not owned/operated by permittee

GENERAL INFORMATION			
Permittee Name:	**Tredyffrin Township**	Permit No.:	**PA**
Mailing Address:	**1100 Duportail Road**	Effective Date:	
City, State, Zip:	**Berwyn, PA 19312**	Expiration Date:	
Contact Person:	**Stephen Burgo, PE**	Renewal Due Date:	
Title:	**Township Engineer**	Municipality:	**Tredyffrin**
Phone:	**610-644-1400**	County:	**Chester**
Email:	**Sburgo @tredyffrin.org**	Consultant Name:	**Brown and Caldwell**

CHAPTER 94 REPORT COMPONENTS

1. Attach to this report a line graph depicting the monthly average flows (expressed in MGD) for each month for the past 5 years and projecting the flows for the next 5 years. The graph must also include a line depicting the hydraulic design capacity per the WQM permit. (25 Pa. Code § 94.12(a)(1))

   Check the appropriate boxes:
   ☐ Line graph for flows attached (**Attachment**)
   ☐ DEP Chapter 94 Spreadsheet used (**Attachment**)
   ☒ Section 1 is not applicable (report is for a collection system).

2. Attach to this report a line graph depicting the monthly average organic loads (express as lbs BOD5/day) for each month for the past 5 years and projecting the organic loads for the next 5 years. The graph must also include a line depicting the organic design capacity of the treatment plant per the WQM permit. (25 Pa. Code § 94.12(a)(2))

   Check the appropriate boxes:
   ☐ Line graph for organic loads attached (**Attachment**)
   ☐ DEP Chapter 94 Spreadsheet used (**Attachment**)
   ☒ Section 2 is not applicable (report is for a collection system).

3. If the DEP Chapter 94 Spreadsheet was not used to determine projections, discuss the basis for the hydraulic and organic projections. In all cases, include a description of the time needed to expand the plant to meet the load projections, if necessary, and data used to support the projections should be included in an appendix to this report. (25 Pa. Code § 94.12(a)(3))

   See Exhibit 1 for Hydraulic and Organic Loadings

4. Attach a map showing all sewer extensions constructed within the past calendar year, sewer extensions approved or exempted in the past year in accordance with Act 537 and Chapter 71, but not yet constructed, and all known proposed projects which require public sewers but are in the preliminary planning stages. The map must be accompanied by a list summarizing each extension or project and the population to be served by the extension or project. If a sewer extension approval or proposed project includes schedules describing how the project will be completed over time, the listing should include that information and the effect this build-out-rate will have on populations served. (25 Pa. Code § 94.12(a)(4))

Check the appropriate boxes:

☐ Map showing sewer extensions constructed, approved/exempted but not yet constructed, and proposed projects attached (**Attachment**)

☒ List summarizing each extension or project attached (**Attachment**)

☐ Schedules describing how each project will be completed over time and effects attached (**Attachment**)

Comments:

See Exhibit 2 Sewer Extensions

5. Discuss the permittee's program for sewer system monitoring, maintenance, repair and rehabilitation, including routine and special activities, personnel and equipment used, sampling frequency, quality assurance, data analyses, infiltration/inflow monitoring, and, where applicable, maintenance and control of combined sewer regulators during the past year. Attach a separate sheet if necessary. (25 Pa. Code § 94.12(a)(5))

See Exhibit 3 Program for Sewer System Monitoring, Maintenance and Repair

6. Discuss the condition of the sewer system including portions of the system where conveyance capacity is being exceeded or will be exceeded in the next 5 years and portions where rehabilitation or cleaning is needed or is underway to maintain the integrity of the system and prevent or eliminate bypassing, CSOs, SSOs, excessive infiltration and other system problems. Attach a separate sheet if necessary. (25 Pa. Code § 94.12(a)(6))

Check the appropriate boxes:

☐ System experienced capacity-related bypassing, SSOs or surcharging during the report year. On a separate sheet, list the date, location, and reason for each bypass, SSO or surcharge event.

☒ System did not experience capacity-related bypassing, SSOs or surcharging during the report year.

Comments: See Exhibit 4 - Condition of the Sewer System

7. Attach a discussion on the condition of sewage pumping (pump) stations. Include a comparison of the maximum pumping rate with present maximum flows and the projected 2-year maximum flows for each station. (25 Pa. Code § 94.12(a)(7))

Check the appropriate boxes:

☐ The collection system does not contain pump stations
☒ The collection system does contain pump stations (Number – **5**)
☒ Discussion of condition of each pump station attached (**Exhibit 5**)

8. If the sewage collection system receives industrial wastes (i.e., non-sanitary wastes), attach a report with the information listed below. (25 Pa. Code § 94.12(a)(8))

a. A copy of any ordinance or regulation governing industrial waste discharges to the sewer system or a copy of amendments adopted since the initial submission of the ordinance or regulation under Chapter 94, if it has not previously been submitted.

b. A discussion of the permittee's or municipality's program for surveillance and monitoring of industrial waste discharges into the sewer system during the past year

c. A discussion of specific problems in the sewer system or at the plant, known or suspected to be caused by industrial waste discharges and a summary of the steps being taken to alleviate or eliminate the problems. The discussion shall include a list of industries known to be discharging wastes which create problems in the plant or in the sewer system and action taken to eliminate the problem or prevent its recurrence. The report may describe pollution prevention techniques in the summary of steps taken to alleviate current problems caused by industrial waste dischargers and in actions taken to eliminate or prevent potential or recurring problems caused by industrial waste dischargers.

Check the appropriate boxes:

☐ Industrial waste report as described in 8 a., b. and c. attached (**Attachment**)
☐ Industrial pretreatment report as required in an NPDES permit attached (**Attachment**)

9. Existing or Projected Overload.

Check the appropriate boxes:

☐ This report demonstrates an existing hydraulic overload condition.
☐ This report demonstrates a projected hydraulic overload condition.
☐ This report demonstrates an existing organic overload condition.
☐ This report demonstrates a projected organic overload condition.

If one or more boxes above have been checked, attach a Corrective Action Plan (CAP) to reduce or eliminate present or projected overloaded conditions under §§ 94.21 and/or 94.22 (relating to existing overload and projected overload). (25 Pa. Code § 94.12(a)(9))

☐ Corrective Action Plan attached (**Attachment**)

10. Where required by the NPDES permit, attach a Sewage Sludge Management inventory that demonstrates a mass balance of solids coming in and leaving the facility over the previous calendar year.

☐ Sewage Sludge Management Inventory attached (**Attachment**)

11. For facilities with CSOs and where required by the NPDES permit, attach an Annual CSO Report (including satellite combined sewer systems).

☐ Annual CSO Report attached (**Attachment**)

12. For POTWs, attach a calibration report documenting that flow measuring, indicating and recording equipment has been calibrated annually. (25 Pa. Code § 94.13(b))

☒ Flow calibration report attached (**Attachment**)

RESPONSIBLE OFFICIAL CERTIFICATION

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowledge of violations. See 18 Pa. C.S. § 4904 (relating to unsworn falsification).

BUREAU OF POINT AND NON-POINT SOURCE MANAGEMENT

CHAPTER 94 MUNICIPAL WASTELOAD MANAGEMENT ANNUAL REPORT INSTRUCTIONS

This form has been developed to promote consistency in the development of annual municipal wasteload management reports ("Chapter 94 reports") required by 25 Pa. Code § 94.12. At least two copies of the complete report must be submitted to the appropriate regional office of the Department of Environmental Protection (DEP) by March 31.

Enter the calendar year that the report covers at the top of the form. Check the appropriate box to indicate whether the permittee is the owner/operator of a publicly owned treatment works (POTW) or other sewage treatment facility, or is the owner/operator of a sewage collection system that is tributary to a POTW owned/operated by a different entity.

General Information

Record the name of the permittee, the permittee's full mailing address, the permittee's contact person and this person's title, phone number and email address. Also record the permit number (NPDES or WQM), the effective date of permit coverage, the expiration date of permit coverage (if applicable), the date by which an application or NOI is due for reissuance (renewal) (if applicable), the municipality and county where the sewage treatment facility or collection system is located and the name of the consultant (company name), if any, who assisted in the preparation of the form

Chapter 94 Report Components

This section requests responses to 12 questions that, if applicable, must be addressed for a complete Chapter 94 report. Questions 1 – 9 and 12 come directly from the Chapter 94 regulations, i.e., 25 Pa. Code §§ 94.12(a)(1) – 94.12(a)(9) and 94.13(b). Some questions request that you check an appropriate box, attach the information requested, and specify the attachment number, while responses to other questions may be entered directly on the form.

For Questions 1 and 2, permittees may use DEP's Chapter 94 Spreadsheet to satisfy 25 Pa. Code §§ 94.12(a)(1) and 94 12(a)(2), respectively. DEP encourages use of the Chapter 94 Spreadsheet to provide consistency in the format and calculations associated with hydraulic and organic load evaluations (see www.depweb.state.pa.us/chapter94). If the Chapter 94 Spreadsheet was used, check the appropriate box(es) and attach printouts of the data and graphs to the Chapter 94 report. If this report is being used for a collection system only, these graphs are not needed.

For Question 6, if the permittee checks the box that there were capacity-related bypasses or SSOs during the report year, in general the box for existing hydraulic overload in Question 9 should be checked. If the permittee checks the box in Question 6 because surcharging occurred during the report year, in general the box for projected hydraulic overload in Question 9 should be checked.

For Question 8, if the permittee has an EPA-approved pretreatment program, attachment of an annual pretreatment report as required in an NPDES permit will satisfy the requirement for an industrial waste report.

For Question 10, if a permit requires a "Sewage Sludge Management" inventory, check the appropriate box if the inventory is attached to the Chapter 94 report.

For Question 11, if an NPDES permit (individual permit or, for satellite collection systems, PAG-06 General NPDES permit coverage) requires an Annual CSO (Status) report, attach the CSO report to the Chapter 94 report and check the appropriate box.

Certification

In accordance with 25 Pa. Code § 94.12(a), both the individual who prepared the report and (a responsible official of) the permittee must sign the report. The term "responsible official" for a municipality is a principal executive officer or ranking elected official.

Questions on the completion of Chapter 94 reports may be directed to DEP's Bureau of Point and Non-Point Source Management at (717) 787-8184 or to the appropriate DEP regional office (contact information available by visiting DEP's website, www.depweb.state.pa.us, and selecting Regional Resources).

List of Attachments

Attachment A Exhibit 6: Flow Meter Calibration Documentation

Exhibit 1. Hydraulic and Organic Loading

The total number of equivalent dwelling units (EDUs) connected to the Paoli sanitary sewer basin in 2020 was 7,318.6. These connected EDU's contributed 0.706 million gallons per day (MGD). The projected flows are found in Table 1-1.

Table 1-1. Valley Creek Trunk Sewer - Paoli Basin EDU Projections

Year	Additional Number of EDUs	Total Number of EDUs	Total MGD
Actual 2020[1]	389	7318.6	0.811
Projected 2021[2]	49	7367.6	0.824
Projected 2022[2]	191	7558.6	0.877
Projected 2023[2]	2	7560.6	0.877
Projected 2024[2]	0	7560.6	0.877
Projected 2025[2]	0	7560.6	0.877

1. Source is 2020 4th Quarter Flow Report from VFSA on Feb 19, 2021.

2. Estimated additional flows are based on EDUs of 275 gallons per day per EDU.

The increase in number of connections was based on Tredyffrin Township records of proposed developments.

The organic load projections are based on a 5-day biochemical oxygen demand (BOD_5) of 200 milligrams per liter (mg/L), which is used in the loading calculation of:

Total MGD per year x 200 mg/L BOD_5 x 8.34 pounds per gallon (lb/gallon) = X lbs/day

Table 1-1A. Valley Creek Trunk Sewer - Paoli Basin 5-year Hydraulic and Organic Loading Projections

YEAR	Projected Flow (MGD)	BOD_5 (mg/L)	BOD_5 (lbs/day)
2020	0.811	200	1,352
2021	0.824	200	1,375
2022	0.877	200	1,462
2023	0.877	200	1,463
2024	0.877	200	1,463
2025	0.877	200	1,463

Exhibit 2. Sanitary Sewer Extensions

Table 2-1 lists the 5-year projections for sewer connections/extensions within the Paoli drainage basin.

Table 2-1. Valley Creek Trunk Sewer - Paoli Basin Sewer Extensions

Exhibit 3. Sewer System Monitoring and Maintenance

In 2020, Tredyffrin Township Department of Public Works had five full time staff including the Public Works Director who are dedicated to the operation and maintenance of the sanitary sewer collection system. Other departments within Tredyffrin Township may assist as needed. Tredyffrin Township subcontracts with Municipal Maintenance to perform the non-routine maintenance on the sewer pumping stations. Tredyffrin Township has performed extensive closed-circuit television (CCTV) inspection of the Township's sewer piping, hundreds of manhole inspections and has a flusher truck for removing blockages and other debris.

Exhibit 4. Condition of the Sewer System

The rehabilitation of the Wilson Road Force Main was completed in December 2016. In general, the system is in good condition with consistent maintenance activities being performed.

In December 2018, the Valley Creek Trunk Sewer System was sold to Aqua Resources, Inc. The assets included in the sale are: Valley Creek Trunk Sewer, Wilson Road Force Main and Wilson Road Pumping Station, Darby Road Pumping Station and Force Main, the Glenn Avenue Force Main and the Lancaster Avenue Force Main. Glenn Avenue Pumping Station and Lancaster Avenue Pumping Station were not included in the sale.

Exhibit 5. Wastewater Pumping Stations

Within the Township's Sewer Collection System, there are five pumping stations that contribute flow to the Valley Forge Sewer Authority Pawling Road Wastewater Treatment Plant. Darby Road and Wilson Road Pumping Stations were included in the VCTS sale.

Table 5-1. Valley Creek Trunk Sewer - Paoli Basin Pumping Stations					
Pumping Station	Capacity (MGD)	2020 Average Flow (MGD)	2020 Peak Flow[1] (MGD)	Projected 2022 Average Flow[2] (MGD)	Projected 2022 Peak Flow[1] (MGD)
Lancaster Avenue	0.300	0.014	0.034	0.040	0.101
Glenn Avenue	0.313	0.036	0.090	0.063	0.157
Chesterbrook	0.909	0.088	0.220	0.115	0.287
Summerhill	0.144	0.006	0.016	0.033	0.082
Atwater/Church Road	0.274	0.023	0.059	0.050	0.125

1. Peak flow = 2.5x average daily flow.

2. Projected flow based on Table 1A 5 Year Flow Projections incorporating planned development.

3. Flow calculations are based on pump run time.

Exhibit 6. Flow Meter Calibration Documentation

The Township maintains multiple flow meters within their system. Attached is the documentation that regular calibration of these meters occurs as part of ongoing maintenance of the system.

PLANS

WASTEWATER FACILITIES PLAN

SECTION 1
INTRODUCTION

Pursuant to Pennsylvania Chapter 94 Municipal Wasteload Management regulations and requirements, Willistown Township has prepared this 2020 Municipal Wasteload Management Annual Report for the Valley Forge Sewer Authority (VFSA) service area.

The Valley Forge Sewer Authority service area covers the northern one-third of the Township adjacent to Tredyffrin Township and Malvern Borough and generally east of Sugartown Road to the Easttown Township border. In addition, there is a small portion along the East Goshen Township Boundary that straddles Paoli Pike. Wastewater in the VFSA service area is conveyed via the Valley Creek Trunk Sewer (VCTS) to VFSA for treatment. In addition to collecting and conveying wastewater in Willistown Township, flows from East Whiteland and Malvern Borough are conveyed (wheeled flow) through Willistown to the VCTS and VFSA. The Valley Forge Sewer Authority service area is shown on the Wastewater Facilities Plan.

The Valley Forge Sewer Authority service area includes approximately 20 miles of 8" through 18" gravity sewers and 9 miles of pressure sewers. There are four municipal owned and one privately owned sewage pump stations in the VFSA service area. The private pump station is part of the Dovecote development and will be dedicated to the Township.

Wastewater from the VFSA service area enters Tredyffrin and Easttown Townships at five locations identified on the Wastewater Facilities Plan:

- Flow from Tredyffrin Township Drainage Area 1 is metered at the Cedar Hollow flow meter located on Cedar Hollow Road just north of Jacqueline Drive. Approximately 97% of all Willistown Township flow to VFSA flows through the Cedar Hollow meter.

- Seven un-metered EDU's on Central Avenue in Tredyffrin Township Drainage Area 2 connect to Tredyffrin Township's sewer system.

- Fifty-six EDU's on Plank Avenue, Paoli Pike, Richmond Drive, Wistar Road and Cobblestone Drive in Tredyffrin Township Drainage Area 3 connect directly to Tredyffrin Township's sewer system.

- Flow from Easttown Township Drainage Area 1 is metered at the Pheasant Run flow meter located in Pheasant Run Drive.

- One EDU on South Valley Road in Easttown Township Drainage Area 2 connects directly to Easttown Township's sewer system.

SECTION 2
HYDRAULIC LOADING

Willistown Township is allocated 1,438,000 gallons per day (GPD) of capacity in VFSA's treatment plant. In 2020, Willistown conveyed a monthly average daily flow of 1,305,107 GPD to VFSA. Currently, Willistown is using 90.8% of their allocated capacity. Flows conveyed to VSFA is summarized in Table No. 1.

The monthly average daily flow in 2020 decreased by approximately10% (141,727 GPD). The flow reduction is attributed to the completion of sewer system repairs. Willistown's long term (January 2015 through December 2020) monthly average daily flow is 1,227,965 GPD.

In 2020, one new EDU was connected in the VFSA service area. Projected flows for the new connections for the period 2021 through 2025 are shown in Table No. 2. Flows are projected to increase by 11,000 GPD in the next 5-years.

SECTION 3
CONDITION OF THE SEWER SYSTEM

Willistown's sewer system dates to the 1970's. Older portions of the system primarily consist of vitrified clay or asbestos cement pipe (VCP & ACP). New portions are PVC pipe. In 2014, the gravity sewer system was televised by a third-party contractor. In 2015 sewer defects and needed repairs were catalogued. Construction drawings for sewer repairs are being prepared. The previously identified emergency sewer repairs were completed between August 2018 and February 2019. Eight-hundred thirty feet of sewer and 6 manholes were replaced. In 2019, an additional 555' and 5 manholes were replaced.

SECTION 4
SEWAGE PUMPING STATIONS

There are four municipal owned and one privately owned pump stations in the VFSA service area. Pump Stations Nos. 1, 2, 4, and the privately-owned Dovecote Pump Station pump flow to Pump Station No. 3. Pump Station No. 3 pumps flow to the gravity sewer system tributary to the Cedar Hollow flow meter. The pump stations are shown on the Wastewater Facilities Plan.

Pump station flows are summarized as follows:

1. PUMP STATION No. 1:

Design Capacity:	288,000 GPD
Current 5-year Maximum Flow:	98,294 GPD
Projected 2-year Maximum Flow:	98,294 GPD

2. PUMP STATION No. 2:

Design Capacity:	720,000 GPD
Current 5-year Maximum Flow:	446,209 GPD
Projected 2-year Maximum Flow:	446,209 GPD

3. PUMP STATION No. 3:

Design Capacity:	2,880,000 GPD
Current 5-year Maximum Flow:	910,313 GPD
Projected 2-year Maximum Flow:	910,863 GPD

Current and projected pump station flows include flow from Pump Station Nos. 1, 2, 4 & Dovecote.

4. PUMP STATION No. 4:

Design Capacity:	288,000 GPD
Current 5-year Maximum Flow:	65,828 GPD
Projected 2-year Maximum Flow:	65,828 GPD

5. DOVECOTE PUMP STATION:

Pump station capacity and flow data is not currently available. There will be no additional flow in the next 2-years.

SECTION 5
INDUSTRIAL WASTES

Currently, there are no industrial users in the VFSA service area, nor are any planned in the future.

Chapter 94 Municipal Wasteload Management Annual Report 2020

Table of Contents

Section **Page No**

1. Introduction 1
2. Sewer Extensions 1
3. Sewer System Monitoring, Maintenance, and Repair 1
4. Condition of the Sewer 1
5. Sewage Pumping Stations 2
6. Industrial Wastes 2
7. Corrective Action Plan 3
8. Meter Calibration Reports 3

Tables

Table 1: Pump Station Present/Projected Flows 4
Table 2: Flow Projections 5
Table 3: Pump Station Monthly Flow Data 6

Appendices

Appendix A: Flow Meter Calibration Reports 7

1. INTRODUCTION

In December 2018, Aqua Resources, Inc. (Aqua) acquired the Valley Creek Trunk Sewer (VCTS). The assets included are: Valley Creek Trunk Sewer (VCTS), Wilson Road Force Main (WRFM) and Wilson Road Pumping Station (WRPS), Darby Road Pumping Station (DRPS) and Force Main. The facilities included in this Chapter 94 document are those assets included in the 2018 system sale.

2. SEWER EXTENSIONS

There were no sewer extensions of the VCTS in 2020 and there are no proposed sewer extensions within the next five years. Partner municipalities will be submitting their own Chapter 94 reports to Valley Forge Sewer Authority (VFSA) with detailed information on their proposed sewer connections/extensions. Aqua will be requesting a copy of these Chapter 94 reports to monitor flow and connections into the VCTS. Projected flows within the VCTS are based on the 2017 Act 537 Supplement for the Wilson Road Force Main as shown in **Table 2**.

3. SEWER SYSTEM MONITORING, MAINTENANCE, AND REPAIR

Routine maintenance and monitoring of the sewer system was conducted in 2020. There were no major repairs required during the 2020 operating year. There are two flow meters that are utilized for flow monitoring. One meter is located at the DRPS and the other is located at the WRPS. The WRPS is critical because that is the final flow monitoring location within the VCTS sewer shed prior to entering the WRFM and finally the VFSA Pawling Road Plant for treatment.

In 2020, Aqua began working with Brown and Caldwell to develop a hydraulic model of the VCTS system in order to make more informed capacity evaluations. This model is currently being used for capacity evaluations for Act 537 Sewage Facility Planning Modules.

4. CONDITION OF THE SEWER

The rehabilitation of the WRFM was completed in December 2016. No SSO occurred in the VCTS system in 2020. In general, the system is in good condition with consistent maintenance activities being performed.

5. SEWAGE PUMPING STATIONS

Within the VCTS System, there are two pumping stations that contribute flow to the VFSA Pawling Road Wastewater Treatment Plant. Those two stations are Darby Road and Wilson Road Pumping Stations. **Table 1** presents the Permitted Capacity, Present Flow, and the 2-Year Projected Flow for each Pump Station. **Table 2** shows the flow projections for each pump station for the next five years. And, **Table 3** shows the monthly flow data for both pump stations for 2019 and 2020.

Wilson Road Pump Station

The Wilson Road Pump Station has three (3) pump and a design capacity of 14,000 GPM. This pump station coveys all flow from the VCTS to the VFSA WWTP. Based on the 2020 flow, the pump station is not hydraulically overloaded, and it's not projected to be overloaded within the next 2 years.

Pump station influent is divided between two channels, each housing a high-flow sewage grinder. In 2020, one of the grinders failed and was subsequently replaced. During grinder down time, influent channels could be isolated, and flow was sent through a single channel. A temporary secondary backup generator and an accompanying temporary switchgear were also installed in 2020 which allowed for upgrade of the existing backup generator. A generator control panel was also installed to allow operations staff to toggle between generators and utility power. Planned future upgrades include the replacement of the temporary switchgear and generator with permanent fixtures as well as an upgraded PLC.

Darby Road Pump Station

The Darby Road Pump Station has two (2) pumps and a design capacity of 700 GPM. Based on 2020 flows, the pump station is not hydraulically overloaded, and it's not projected to be overloaded within the next 2 years. Additionally, there are no major upgrades anticipated at this time.

6. INDUSTRIAL WASTES

Industrial wastes are managed by the VFSA as part of their Industrial Pretreatment Program.

7. CORRECTIVE ACTION PLAN

No Corrective Action Plan is warranted for the collection system and pump stations.

8. METER CALIBRATION REPORTS

Aqua maintains meters at the Darby Road Pump Station and Wilson Road Pump Station. These flow meters are that regularly calibrated, and **Appendix A** contains the meter calibration reports for 2020.

Table 1: Pump Station Present/Projected Flows								
Pump Station	Pump Station Capacity[1]		Present Flows			2-Year Projected Flows		
	Design Capacity (MGD)	Design Capacity (GPM)	Annual Average Flow (MGD)	Max Month Flow (MGD)	Peak Hourly Flow (GPM)[2]	Annual Average Flow (MGD)[3]	Max Month Flow (MGD)[4]	Peak Hourly Flow (GPM)[2]
Wilson Road Pump Station	20.16	14,000	5.34	6.46	8,525	5.70	7.05	9,102
Darby Road Pump Station	1.008	700	0.307	0.382	534	0.328	0.416	570

Notes:

1. Design capacities according to WQM permit No. 1571407 T-1.
2. Peak Hourly Flow was calculated using a peaking factor of 2.3 for the Wilson Road Pump Station and 2.5 for the Darby Road Pump Station
3. See Table 2 for future flow projections.
4. See Table 3 for Max Month to Annual Average Flow Ratio calculation.

Table 2: Flow Projections				
	Wilson Road Pump Station		Darby Road Pump Station	
	Actual/Projected Flow (MGD)	Projected Increase in Flow (MDG)[2]	Actual/Projected Flow (MGD)	Projected Increase in Flow (MDG)[3]
2020 [1]	5.34		0.31	
2021	5.52	0.1807	0.32	0.010
2022	5.70	0.1807	0.33	0.010
2023	5.88	0.1807	0.34	0.010
2024	6.06	0.1807	0.35	0.010
2025	6.24	0.1807	0.36	0.010

Notes:

1. Actual flows from 2020, see table 3
2. Projected flow based on Act 537 linear projection of 0.1807 MGD per increase for the Wilson Road PS
3. Projected flow increase per year for the Darby Road PS is 5.76% of the projection for the Wilson Road PS. This percentage is the 2020 Darby Rd PS flow divided by the 2020 Wilson Rd PS flows.

Table 3: Pump Station Monthly Flow Data				
Month	Wilson Road Pump Station[1]		Darby Road Pump Station[1]	
	2019	2020	2019	2020
Jan	7,538,146	5,175,664	408,958	276,552
Feb	6,868,244	5,441,979	327,043	303,039
Mar	7,336,703	5,300,408	364,532	312,694
Apr	6,104,184	6,147,236	356,717	335,622
May	6,496,086	5,643,927	330,483	311,481
Jun	6,527,558	5,104,476	291,010	319,267
Jul	6,357,218	4,986,043	407,281	288,523
Aug	5,147,039	5,425,162	285,055	320,132
Sep	4,727,014	4,632,663	277,897	277,897
Oct	4,562,321	4,608,627	233,268	258,235
Nov	4,639,715	5,125,251	241,267	303,520
Dec	5,177,742	6,457,927	277,897	381,552
Annual Average Flow	5,956,831	5,337,447	316,784	307,376
Max Month	7,538,146	6,457,927	408,958	381,552
Avg to Max Ratio	1.27	1.21	1.29	1.24
Average Max Month to Annual Avg Flow Ratio:		1.24		1.27

Notes:

1. Monthly flow data for the Wilson Rd PS and Darby Rd PS were not provided in previous Chapter 94 Reports and Aqua does not have monthly flow records for these pump station prior to taking ownership in December 2018.

Appendix A: Flow Meter Calibration Reports

1. Flow Meter Calibration Report for Darby Road Pump Station: 3/23/2020
2. Flow Meter Calibration Report for Darby Road Pump Station: 6/11/2020
3. Flow Meter Calibration Report for Darby Road Pump Station: 9/10/2020
4. Flow Meter Calibration Report for Wilson Road Pump Station: 3/23/2020
5. Flow Meter Calibration Report for Wilson Road Pump Station: 6/11/2020
6. Flow Meter Calibration Report for Wilson Road Pump Station: 9/10/2020

2020 Chapter 94 Report for Ridley Creek Sewage Treatment Plant
East Goshen Municipal Authority
Chester County, Pennsylvania

1.0 INTRODUCTION

This report is provided to comply with the Title 25, Chapter 94 Municipal Wasteload Management regulations of the Pennsylvania Department of Environmental Protection (PADEP) concerning wastewater facilities. The subject of this report is the Ridley Creek Sewage System and Treatment Plant, owned by East Goshen Municipal Authority (Authority). The Authority assigns East Goshen Township (Township) to run the sewer system and Ridley Creek Sewage Treatment Plant (RCSTP). The Authority contracted with Big Fish Environmental Inc. to operate the RCSTP in 2020.

The Authority provides wastewater service to a majority of East Goshen Township and a limited number of residents in neighboring East Whiteland, West Goshen, West Whiteland, and Willistown Townships, Chester County. The remaining public wastewater customers have their wastewater treated by West Goshen Township (West Goshen Service Area) or Westtown Township (Westtown Service Area) through intermunicipal agreements with East Goshen.

The areas served by the Ridley Creek, West Goshen, and Westtown Sewage Treatment Plants are depicted below, with the Ridley Creek Service Area shaded:

Summary of Drainage Basins

			Ashbridge P.S. →		
WESTTOWN SERVICE AREA (Summit House and Cider Knoll condominiums) →					Westtown Township

1.1 Treatment Plant Description

The Ridley Creek Sewage Treatment Plant (RCSTP) provides wastewater treatment for the portion of East Goshen Township in the Ridley Creek Watershed, 24 homes in East Whiteland (the Ridley Creek Service Area), and 19 homes in Willistown Township (the Ridley Creek Service Area). The plant was upgraded and expanded from an extended aeration treatment system to a sequencing batch reactor (SBR) treatment system in 2010. The plant has been in continuous operation since 1985.

The permit for the RCSTP (NPDES Permit #0050504) was issued in September of 2006 as a two-phase permit. During the first phase, the planning and construction of the plant's

expansion and upgrade, the permit allowed for an annual average flow of 0.40 million gallons per day (MGD). After the completion of construction and final acceptance, which occurred in 2011, the plant's permitted annual average flow increased to 0.75 MGD. The current permit for the RCSTP (NPDES Permit #0050504) became effective on March 1, 2012. A NPDES Permit Renewal was issued on April 18, 2017.

The upgraded RCSTP is an SBR activated sludge facility consisting of an influent grinder and screen, 2,100 gpm (3.0 MGD) influent pumping station, four tank SBR system, post equalization tanks, effluent filtration, and UV disinfection. Solids treatment consists of the previously mentioned influent grinder and screen; aerobic sludge digestion; and a dewatering centrifuge with polymer addition. Screenings and dewatered sludge are hauled off-site for disposal at a properly permitted solid waste landfill. There are both influent and effluent flow meters at the treatment plant. Refer to the attached Drawing G-1 "RCSTP Upgrade & Expansion Process Flow Diagram" for a diagram of the treatment process.

1.2 Sewer System Description

The collection system in the Ridley Creek Service Area has been constructed in phases since 1985 and consists of primarily PVC gravity sewers and precast concrete manholes. The collection system was constructed in accordance with the then current Township Specifications and under the professional inspection and surveillance of the Authority's Engineer.

Two pump stations, the Hunt Country Pump Station and the Hershey's Mill Pump Station, are located within the Ridley Creek Service Area. Both pump stations have a typical duplex submersible pump arrangement. The Hunt Country Pump Station has a rated capacity of 0.025 MGD, and the Hershey's Mill Pump Station has a rated capacity of 0.083 MGD.

In addition to the flow meters at the RCSTP and on the Hershey's Mill Pump Station discharge piping, there is one permanent flow meter in the Ridley Creek Service Area gravity conveyance system between MH R-217 and R-218 located near Hibberd Lane and Boot Road that was installed in January 2021.

1.3 Engineering Studies and Sewer Diversion Plans

2007 Township Wastewater Needs Evaluation

The Township Wastewater Needs Evaluation identified wastewater needs in the Township and evaluated alternatives for future wastewater management. Existing wastewater capacity commitments currently planned and potential development and their associated wastewater management needs were identified. Multiple wastewater disposal alternatives, including the utilization of treatment capacity at facilities in other municipalities, were identified and evaluated.

The study estimated that the maximum potential wastewater generation from the Township may be as much as 1,700,000 gpd with an estimated 1,300,000 gpd in the West Goshen Service Area and approximately 400,000 gpd that would flow to the RCSTP. The study

reaffirmed the 1999 Act 537 Plan Update's conclusion to expand the RCSTP to 750,000 gpd and recommended the diversion of flows in excess of 1,000,000 gpd (the maximum flow under the East Goshen-West Goshen intermunicipal agreement) from the West Goshen Service Area to the RCSTP. Implementation of the diversion of flows is described hereafter.

2012 Closure and Diversion of the Lockwood Chase Sewage Treatment Plant (LCSTP)

The PADEP issued a draft permit amendment in 2007 for the Lockwood Chase Sewage Treatment Plant (LCSTP) requiring a significant number of upgrades. Given the potential cost of upgrading the LCSTP, the Authority elected to close and decommission the LCSTP and divert wastewater from Lockwood Chase to an existing public sewer system, abandon the aged sewage treatment plant and spray irrigation facilities, and convey wastewater for treatment at another existing sewage treatment facility. A gravity sewer diversion to convey all flows from the Lockwood Chase development to the existing sewer system tributary to the Authority's Hershey's Mill Pump Station was constructed in spring 2012 and became operational in May 2012 when Lockwood Chase wastewater was diverted into the new sewers. The LCSTP closure/ decommissioning was completed in fall 2012.

2013 Diversion of the Hershey's Mill and Reserve Pump Stations

The Hershey's Mill and Reserve Pump Stations previously discharged to the West Goshen Service Area and were diverted to the Ridley Creek Service Area in 2013. The Hershey's Mill Pump Station diversion was completed in July 2013 and was accomplished by diverting the 6-inch force main to an existing gravity sewer in the Ridley Creek collection system at Cornwallis Drive. This connection required the construction of approximately 1,000 feet of new force main through a private right-of-way and crossing a tributary of Ridley Creek.

The Reserve Pump Station diversion was completed in October 2013 and was accomplished by demolishing the pump station and constructing an approximate 700-linear foot, 8-inch PVC gravity sewer extension to an existing Ridley Creek collection system gravity sewer at Forrest Lane. The route of the new sewer runs parallel to a tributary of Ridley Creek and crosses approximately 300 feet of private property with the remainder in dedicated open space and public right-of-way. The Reserve Pump Station previously discharged into the gravity sewer system upstream of the Hershey's Mill Pump Station. Following the Reserve Pump Station diversion, the Reserve wastewater is now conveyed directly into the Ridley Creek Service Area and is no longer conveyed through the Hershey's Mill Pump Station.

2013 Diversion of the Marydell Pump Station

The Marydell Pump Station previously discharged to the West Goshen Service Area and was also diverted to the Ridley Creek Service Area in 2013. This pump station served 31 homes in the Marydell Farms development, and due to its age, required replacement. The diversion was completed in July 2013 and was accomplished by demolishing the pump

station and constructing an approximate 950-linear foot, 8-inch PVC gravity sewer extension to an existing Ridley Creek collection system gravity sewer at Saratoga Drive. The route of the gravity diversion starts at the pump station, runs east along Paoli Pike, and connects to the existing public sewer at Saratoga Drive.

Proposed Reservoir Road Pump Station Diversion

The Authority is proposing a pump station at the intersection of Reservoir Road and Strasburg Road to divert a portion of flows from the Chester Creek Interceptor (West Goshen Service Area) to the Ridley Creek Service Area. The diversion is planned to occur when the flows conveyed to West Goshen exceed 1.0 MGD which is projected to be beyond the next five years. The diversion is proposed to be accomplished by constructing an approximate 8,500-linear foot force main to convey up to 300,000 gpd. The diverted flow is proposed to be adjusted on a weekly or bi-weekly basis to maintain flows to West Goshen at 1.0 MGD.

An Act 537 Plan Update for the Reservoir Road Pump Station Diversion was approved by PADEP on January 7, 2015. The Water Quality Management (WQM) permit (WQM Permit #1516404) was issued on March 10, 2017.

2.0 HYDRAULIC AND ORGANIC LOADINGS

2.1 Hydraulic Loading

The RCSTP is permitted for an annual average flow of 0.750 MGD, a design hydraulic (maximum day) capacity of 0.750 MGD, and a peak hourly flow of 3.0 MGD.

Table 1 summarizes the RCSTP's hydraulic loading data and the current calendar year's rainfall. Refer to the attached Chart 1 for a line graph depicting the plant's average flows for the past five years.

With the exception of periods referenced below and in the Table 1 footnotes, the influent hydraulic loading prior to November 2012 was measured at the permanent influent flow meter located on the force main between the influent pump station and the SBR tanks. The permanent influent flow meter not only captured the influent flow but also side stream and backwash flows recycled to the head of the plant. The process return flows are recycled to the head of the plant downstream of the influent grinder and fine screen but upstream of the influent pump station. The flows include spray wash from the influent fine screen unit, disk filter back wash and sludge wasting cycles; decanted water from the twin aerobic sludge digesters; centrate from the centrifuge; utility sinks; utility water blow off; and the laboratory bathroom and sink. The volume of recycled water could not be reasonably estimated or excluded from the influent metered flows during this time period.

In fall 2012, the Authority installed a new permanent inflow meter upstream of the recycle feed to comply with PADEP's request to not include recycle flows in the influent hydraulic loading. The influent hydraulic loadings in Table 1 from 2016 through 2020 therefore do <u>not</u> include recycle flows unless noted otherwise in the table's footnotes. However, it should be noted that this meter has become unreliable in 2019 and 2020 and a new meter is planned to be installed soon. The meter will be placed on the influent piping in a location that is expected to provide reliable operation in accordance with metering manufacturer recommendations.

2020 Chapter 94 Report for Ridley Creek Sewage Treatment Plant
East Goshen Municipal Authority
Chester County, Pennsylvania

Table 1						
	Hydraulic Loading (MGD)					Rainfall (inches)

June	0.273	0.404	0.550	0.552	0.452	4.7
July	0.248	0.372	0.431	0.487	0.453	5.9
August	0.307	0.355	0.490	0.415	0.416	12.8
September	0.334	0.385	0.591	0.463	0.427	4.2
October	0.354	0.452	0.527	0.383	0.420	7.6
November	0.387	0.399	0.656 (1)	0.430	0.512	5.8
December	0.443	0.415	0.648 (1)	0.423	0.559	7.1
Annual Average (AA)	0.400	0.415	0.539	0.513	0.461	5.8
3 Month Max. Average	0.522	0.452	0.610	0.650	0.497	
Ratio (3 Month Max to AA Ratio)	1.305	1.089	1.132	1.269	1.078	
5-Year Average Hydraulic Ratio =					1.175	

(1) The field influent meter (prior to recycle) was offline for February and March 2018 as well as November and December 2018. Flows for this period are from the RCSTP influent pump station flow meter which includes recycle flows.

The 2020 average hydraulic load for the entire year was 0.461 MGD, which is well below the permitted capacity of 0.750 MGD. Additionally, there were no months when the monthly average flow exceeded or even approached the design hydraulic loading of 0.750 MGD. At the end of 2020, there were approximately 2,007 EDUs connected to the Ridley Creek collection system with an average flow rate of 230 gpd/EDU.

2.2 Organic Loading

The RCSTP is permitted for a design organic loading capacity of 2,098 lbs/day.

Table 2 and Table 3 summarize the RCSTP organic loading data. Refer to the attached Chart 2 for a line graph depicting the average organic loading for the past five years.

Influent organic loading (lbs/day) is calculated using the influent BOD_5 (mg/L) concentrations and the influent flow on the day sampled. The influent sampling frequency is typically once per week. Influent samples are 24-hour composite, flow-proportioned, and sampled for BOD_5 (not $CBOD_5$). The influent organic sampling location is upstream of the recycle; therefore the samples do not contain recycled flows, unless noted otherwise in the Table 2 footnotes.

The RCSTP did not receive any hauled-in septage in 2020.

10/20/2020	297	0.428	1,060	
10/27/2020	233	0.410	796	892
11/6/2020	258	0.439	944	
11/10/2020	237	0.386	762	
11/17/2020	182	0.434	659	
11/24/2020	216	0.497	896	815
12/3/2020	219	0.508	928	
12/8/2020	234	0.484	945	
12/15/2020	348	0.445	1,292	
12/22/2020	298	0.553	1,374	
12/29/2020	239	0.539	1,075	1,123

The maximum monthly average organic loading was 1,123 lbs BOD_5/day, which is less than the permitted design organic loading capacity of 2,098 lbs/day. The RCSTP is therefore not organically overloaded.

Table 3 provides the 5-year organic loading of the RCSTP.

Table 3					
Organic Loading (lbs/day)					
Month	**2016**	**2017**	**2018**	**2019**	**2020**
January	761	589	524	888	554
February	1,021	336	492	810	617
March	634	475	556	650	962
April	519	329	1,169	476	836
May	570	596	809	641	957
June	636	725	580	406	785
July	263	582	640	947	756
August	415	419	750	778	776
September	642	670	655	963	828
October	275	753	482	910	892
November	561	565	875	120	815
December	382	781	781	998	1,123
Annual Average	557	569	693	716	825
Ratio (Max. Month to Annual Average Ratio)	1.83	1.37	1.69	1.39	1.36
5-Year Average Organic Ratio =					1.48

The 2020 annual average daily organic loading at the RCSTP was 825 lbs BOD_5/day. The peak loading occurred in December 2020 with an average organic load of 1,123 lbs BOD_5/day. This one-month peaking ratio is 1.36.

At the end of 2020, there were approximately 2,007 EDUs connected, contributing an average organic load of 0.411 lbs/day/EDU.

3.0 5-YEAR HYDRAULIC AND ORGANIC LOADING PROJECTIONS

3.1 Organic Loading Projections

The 5-year organic loading projections at the RCSTP are summarized in Table 4. Historic and projected organic loadings are presented graphically on the attached Chart 2.

The RCSTP's 2020 annual average loading rate, 0.411 lbs/day/EDU, is used to calculate projected organic loadings. Refer to Appendix B for a table of "Ridley Creek STP Projected EDUs and Hydraulic Load", which details the specific EDUs anticipated to be connected in each of the next five years.

The projected annual average organic loading at the RCSTP in Table 4 is calculated using the 2020 annual average organic load, 825 lbs/day, and adding the organic loading from each projected connection and diversion in the applicable year. The projected annual average organic loading is then multiplied by the 5-year average organic ratio of 1.48 (from Table 3) to determine the maximum monthly organic load projection.

Table 4
RCSTP Organic Loading Projections

Year	Annual Average BOD_5 Loading Projections [(1)] (lbs/day)	Maximum Monthly BOD_5 Loading Projections [(2)] (lbs/day)
2021	828	1,225
2022	829	1,227
2023	830	1,228
2024	830	1,229
2025	831	1,230

[(1)] AA Projections = (Current report year's AA Loadings) + (Loadings from Proposed EDUs).

[(2)] Max Month Projections = (AA Projection) x (5-year Average Organic Ratio)

Based on the permitted design organic loading capacity of 2,098 lbs/day, the RCSTP is not projected to be organically overloaded in the next five years.

3.2 Historical and Projected Connections

There was one new connection added to the Ridley Creek Service Area in 2020 for a total of 2,007 EDUs. The annual average flow of 0.461 MGD in 2020 results in an average hydraulic loading rate of 230 gpd/EDU. Refer to Appendix A for a list of the new connections in 2020.

Table 5 lists the number of EDUs that were connected in each calendar year for the last five years. The annual gpd/EDU rate was determined by dividing the total average daily flow for the respective calendar year by the number of EDUs connected to the system that year.

Table 5

Year	# of EDUs Connected	gpd/EDU	New Flow (MGD)
2016	5	200	0.0010
2017	3	207	0.0006
2018	0	269	0.0000
2019	0	255	0.0000
2020	1	230	0.0002

The actual gpd/EDU flow rate for 2020 exceeds the Authority's 225 gpd/EDU design flow rate. However, the flow rate notably decreased from the prior two years, which experienced excessive precipitation. There was above average precipitation in 2020 also. The Township has continued an aggressive inflow and infiltration reduction program, but the actual flows indicate the ongoing presence of inflow and infiltration. This is considered the result of the excessive precipitation in 2020 and resultant inflow and infiltration (I&I). For planning purposes in this report, future new connections are projected at 225 gpd/EDU since new connections are not anticipated to contribute any I&I to the system.

Refer to Appendix B for a table of "Ridley Creek STP Projected EDUs and Hydraulic Load", which details the specific EDUs anticipated to be connected in each of the next five years.

3.3 Hydraulic Loading Projections

PADEP has requested the 5-year hydraulic loading projections be determined using a 5-year adjusted annual average flow. Per the PADEP Chapter 94 Report Template, several tables (including Table 5 above) and steps are required to calculate the 5-year adjusted annual average flow.

Table 6 determines the 5-Year Adjusted Annual Average Flow of 0.466 MGD in accordance with the Chapter 94 Template.

Table 6

Year	AA Flow (MGD)	All projects connected (provide flows approved in planning modules or exemptions in MGD-include any connected projects that did not require planning)					Adjusted AA Flow (MGD)
		2016	2017	2018	2019	2020	
2016	0.400		0.0006	0.0000	0.0000	0.0002	0.401
2017	0.415		0.0006	0.0000	0.0000	0.0002	0.415
2018	0.539				0.0000	0.0002	0.539
2019	0.513					0.0002	0.513
2020	0.461						0.461
Total	**2.327**					**Total**	**2.329**
5-Year Average	**0.465**					**5-Year Adj Average**	**0.466**

Table 7 determines the 5-Year Adjusted Hydraulic Projection in accordance with the Chapter 94 Report Template.

Table 7
Adjusted Projections

Year	Previous Year's Annual Average Flow[(1)]	New EDUs	Increased Flow[(2)] (MGD)	Projected Annual Average Flow[(3)] (MGD)	Projected Max Month Flow[(4)] (MGD)
2021	0.466	4	0.0009	0.467	0.548
2022	0.467	2	0.0002	0.467	0.548
2023	0.467	2	0.0005	0.467	0.549
2024	0.467	2	0.0005	0.468	0.549
2025	0.468	2	0.0005	0.468	0.550

(1) The 2021 Previous Year's Annual Average Flow is the 5-Year Adjusted Average Flow from Table 6.
(2) The Increased Flow is calculated by multiplying the number of New EDUs by the 225 gpd/EDU sewage planning flow rate.
(3) Projected Annual Average Flow = Previous Year's AA Flow + Increased Flow
(4) Projected Max Month = Projected Annual Avg. Flow x 5-Year Average Hydraulic Ratio

The Projected Annual Average Flow and the Projected Max Month Flow are below the RCSTP's annual average and maximum daily permit limit of 0.750 MGD.

4.0 SEWER EXTENSIONS

No public sewer extensions occurred in the Ridley Creek Service Area in 2020.

The proposed Reservoir Road Pump Station is designed and permitted to divert a portion of flows from the Chester Creek Interceptor (West Goshen Service Area) to the Ridley Creek Service Area. This diversion is not projected to occur within the next five years. No other future extensions are planned.

5.0 PROGRAM FOR SANITARY SEWER MONITORING, MAINTENANCE, AND REPAIR

The Township monitors daily meter readings at the treatment plant and pump stations during the week as well as daily rainfall with a rain gauge located at the Township building. Should daily flows increase, Township staff then inspect the system for leaks. Sewer lines are routinely cleaned and inspected by television cameras. The Township frequently reminds customers against discharging sump pumps into the sewer system via the Township newsletter.

The Township has eight people along with sundry equipment, all of which can be made available under emergency conditions. Should technical assistance be needed, the Authority Engineer,

Pennoni, an engineering consulting firm with a staff of professional engineers, provides technical assistance.

The Authority utilized the services of a contract operator, Big Fish Environmental, Inc., to operate the RCSTP in 2020. This contract included daily maintenance, recording data, laboratory analysis, and submitting all reports to the Township, Authority, and the PADEP that are required under the permits.

The treatment plant alarm systems are tied into an auto dialer that has the ability to dial five numbers in succession. It begins with the plant operator and ends with the Township maintenance staff.

Routine maintenance is performed at the treatment plant on a daily basis. Maintenance includes the following:

- Grease equipment.
- All electrical equipment is inspected and cleaned by an electrical contractor twice a year.
- Wet well is cleaned and skimmed.
- Weirs are scrubbed and cleaned.
- Ultra Violet bulbs are cleaned regularly and replaced.
- All blowers are greased daily, and filters are changed twice a year.
- All pumps are pulled apart and checked for wear. Plates are typically replaced twice a year. Depending on wear, impellers may also be replaced.
- Comminutor and screen are serviced annually.
- All meters calibrated quarterly.
- Centrifuge is run with regular maintenance.

The Township has their meters checked and calibrated on a quarterly basis. The calibration reports are included in Appendix D.

5.1 I&I Monitoring

The RCSTP does receive increased influent volume during wet weather. This is an indication of potential inflow and infiltration (I&I) from one or more sources including leaks in sewer joints and manholes, failed house connections, direct inflow into low manholes, and illegal connections from building sump pumps.

A Consent Order & Agreement (CO&A) was executed between the PADEP and the Authority in December 2008. The Authority, with direct assistance from the Township, agreed to investigate and remediate I&I in the collection system tributary to the RCSTP. Elements of the program outlined in the CO&A included:

1. Metering
2. Televising
3. System Hydraulic Characterization
4. Rehabilitation (as necessary)

5. Post Rehabilitation Metering (as necessary)
6. House Lateral Investigation Program
7. Semi-annual Reporting

The five-year CO&A period expired on March 31, 2012. However, the Authority concluded that a formalized program to meter, televise, rehabilitate, and perform post rehabilitation metering had merit so they continued with the process set forth in the CO&A. A list of the sanitary sewer cleaning and televising work performed in 2020 is included in the semi-annual sewer system report in Appendix C.

5.2 Maintenance & Repair

The Township has an ongoing program of repairing and/or replacing broken sewer laterals caps and stacks as they are identified. Repairs are typically performed by the Township's Public Works Department while specialty repairs and large projects are contracted to qualified firms.

In 2020, the Township performed miscellaneous repairs to the sewer system. In various areas of the Ridley Creek sewer system, 29 laterals were repaired, and 1 cleanout was repaired.

The contract operator is on-site at the treatment plant daily to check process controls, equipment hour-meter readings, influent, effluent, and process flow meter readings, and to perform process control testing, amongst other things. This information is maintained on-site in the form of daily operations reports and a bound log book. The contract operator is also responsible for notifying Township personnel, who are frequently on-site themselves, if any repairs are required. The Township is responsible for equipment repair and scheduled warranty and contract work at the plant as required.

Township staff visits the pump stations daily to check for operational problems and to perform required maintenance. The Township's normal practice is to change the pumps out twice a year for inspection and maintenance. Pump stations are drained and cleaned on a quarterly basis. The Township's electrical contractor, Lenni Electric, is on-site twice a year to inspect all of the electrical components.

6.0 CONDITION OF THE SEWER SYSTEM

The RCSTP is generally operating as designed and is in good condition.

The collection and conveyance system in the Ridley Creek Service Area is in fair condition. The television inspections revealed some problems with the originally installed sanitary sewer mains. This includes cracking and damaged sections of pipe. In addition, several manholes and numerous damaged laterals and cleanouts were discovered that required repair. The Township is actively identifying and repairing aged and problematic portions of the sanitary sewer collection system.

There are no bypassing conditions or combined sanitary sewer systems within the Ridley Creek Service Area. There was one sanitary sewer overflow (SSO) reported in the Township in 2020.

The SSO occurred at Greenhill Road due to Tropical Storm Isaias, which recorded approximately 7.90 inches of rain. Tropical Storm Isaias caused the Ridley Creek to flood resulting in a back up at the Hershey's Mill Pump Station and in sanitary sewer bubbling out of a manhole into Greenhill Road. The sanitary sewer overflow was cleaned, and no solids were evident within the overflow.

6.1 Ridley Creek Sewage Treatment Plant Collection System Hydraulic Characterization

The hydraulic condition of the sanitary sewer collection and conveyance system tributary to the RCSTP was analyzed in 2009 as part of the CO&A discussed in Section 5.1. A hydraulic model of the collection and conveyance system was developed to determine if any physical constraints exist that would restrict conveyance of dry weather and peak wet weather flows given existing connections at that time. The impact of flows from proposed future connections (from diverting existing flows from other collection systems into the RCSTP collection system) was also analyzed to determine if the additional flows will create any overload conditions. The flows from anticipated future connections and flow diversions into the RCSTP system (including the diversions constructed in 2013 and the future Reservoir Road Pump Station diversion) are as stated in the current Chapter 94 Report. A copy of the text from the Hydraulic Characterization report was provided as an appendix to the 2009 Chapter 94 Report. The hydraulic model projected that all sewers within the Ridley Creek Service Area had adequate capacity to convey current and future dry and wet weather flows.

7.0 SEWAGE PUMPING STATIONS

The Hershey's Mill Pump Station was diverted from the Chester Creek Collection System (West Goshen Service Area) to the Ridley Creek Service Area in 2013. The other pump stations in the Ridley Creek Service Area are the Hunt Country Pump Station and the influent pump station at the RCSTP.

The Average Annual Daily Flow at the Hershey's Mill Pump Station in 2020 was 74,610 gpd. The peak daily flow of 137,596 gpd was recorded on December 28, 2020 and equates to a daily peaking factor of 1.84. This peak day flow may not be the actual peak experienced within the system during 2020, since there are a number of days when flow was not recorded. Over the last five years the daily peak factor for this pump station has varied between 1.5 and 2.1. The area tributary to the Hershey's Mill Pump Station contains 367 EDUs. The 2-year projected maximum flow at the Hershey's Mill Pump Station is 137,972 gpd. The Hershey's Mill Pump Station flow rate decreased in 2020 compared to the prior 2-years to a flow rate that is comparable to the flow rates from 2014 to 2017. This is presumably due to decreased precipitation and I&I coupled with I&I repairs.

The area tributary to the Hunt Country Pump Station contains 67 single family homes, and no additional connections are expected. The pump station does not have a permanent meter. The Township replaced the pumps and other equipment at the Hunt Country Pump Station in 2016 with salvaged equipment from the demolished Reserve Pump Station. The annual average flow in Table 8 is estimated based on the 2020 average flowrate at the RCSTP of 230 gpd/EDU. Peak flows are

calculated with a peaking factor of 4.2, which PADEP considers a typical peaking factor for a pump station of this size. Since there are no additional connections expected, the 2-year projected maximum flow at the Hunt Country Pump Station is the same as the present peak flow.

The Township intends to install a permanent flow meter at the Hunt Country Pump Station in 2020.

Table 8

Pump Stations

Pump Station Name	Number of Pumps	Permitted Capacities		Present Flows		Projected Flows
		AA Permitted Capacity (gpd)	Hydraulic Design Capacity *(excluding capacity of backup pump) (gpm)*	Annual Average Flows (gpd)	Peak Flow (gpd)	2-Year Projected Maximum Flow (gpd) [(1)]
Hershey's Mill	2	83,000	230 gpm	74,610	137,596	137,972
Hunt Country	2	25,000		15,387	64,625	64,625

[(1)] 2-Year Projected Maximum Flow = 2-Year Projected AA flow * peaking factor
Hershey's Mill P.S. = 74,610 gpd + (1 EDUs x 225 gpd/EDU)) x 1.84 peaking factor = 137,972 gpd
Hunt Country P.S. = Maximum 2020 Daily Flow since no connections are projected.

8.0 INDUSTRIAL WASTES

Although there are presently no industrial waste contributors to the wastewater system, Chapter 188 of the Code of the Township of East Goshen addresses the strength of industrial wastes and permits only discharge of domestic strength. See Appendix E for a copy of the Township Ordinance.

9.0 CORRECTIVE ACTION PLAN

The collection/conveyance system and the treatment plant are not currently and are not projected to be, hydraulically or organically overloaded. The proposed Reservoir Road Pump Station diversion will utilize most of the remaining permitted capacity at the RCSTP as per the PADEP-approved Act 537 Plan Update for the project. Therefore, no Corrective Action Plan or Connection Management Plan is required.

10.0 CALIBRATION REPORTS

As required by 25 PA Code §94.12, flow measuring, indicating, and recording equipment should be calibrated annually, and the calibration report should be included in the annual report submitted under §94.12. Calibration reports are included in Appendix D.

11.0 TRIBUTARY MUNICIPALITY REPORTS

The tributary municipality report from Willistown Township is in Appendix F.

RE: Semi-Annual Sewer System Status Report #19
East Goshen Municipal Authority

Dear Mr. Miller:

The following Semi-Annual Sewer System Status Report is a continuation of the reports previously required under the Consent Order & Agreement (CO&A) executed between the Pennsylvania Department of Environmental Protection (PADEP) and the East Goshen Municipal Authority in December 2008. Mandatory reporting to the PADEP ended on March 31, 2012, but the reporting was requested to continue to serve as an internal reference document for the Township.

Our reports in past were formatted to describe all actions (maintenance, monitoring, etc.) taken within the previous period and those which will be taken in the subsequent monitoring period. However, this report has been reformatted to specifically address our inflow and infiltration (I & I) analysis based on the data provided by the Municipal Authority and our recommendations biased on this analysis. We have removed all action items related to televising and rehabilitation within the service areas from this report. These items are addressed in your monthly reports to the Municipal Authority and in the Annual Chapter 94 Reports. We also removed the action item related to the ongoing house lateral investigation program originally implemented in 2008. As you know this program routinely inspects properties within each service area to ensure cleanouts, vent caps, and laterals are in proper condition and any broken cleanouts, vent caps, or lateral are repaired or replaced.

This report will continue to document any suspected I & I within the service areas and provide recommendations to isolate and eliminate suspected I & I. The report is broken into three sections. Section one will address our analysis of provided portable meter data from the service areas. Section two will address an overall analysis of each service area by analyzing the permanent meter data within the service areas over a 13 month period and a five year period. Section 3 will address recommended corrective actions or investigations to implement within the service areas.

EXECUTIVE SUMMARY

Permanent meter data from 2020 indicates I & I continues to occur within both the Ridley Creek and continues Chester Creek Service Areas, particularly in the subarea CC-2, as depicted in the attached Figure 1.

In the Chester Creek Service Area, the average flow from the East Goshen portion of the Chester Creek Service Area in 2020 increased by approximately 24,700 gpd (9%) compared to the average flow from 2014 to 2016, and the 2020 average flow decreased by approximately 74,500 gpd (20%) compared to the average daily flow

from 2019. The average flow from the East Goshen portion of the Chester Creek Service Area in 2019 was significantly higher than the average flow from 2014 to 2016, possibly due significant amount of rain in 2019. The total annual rainfall has been lower in 2020 (21.59 inches) than in 2019 (62.01 inches).

Seven portable meters were installed between January 2020 to June 2020 to isolate areas of I & I within the Ridley Creek Service Area. Observations and analysis from those meters are summarized in the flowing table.

Table 1 - RCSA Portable Meter Summary Table

Portable Meter Location	Dry-Weather Infiltration	Wet-Weather Infiltration	Inflow	Comments
MH R-589	☐	☒	☒	Minimal I & I during storm events greater than one inch
MH R-568	☒	☐	☐	Approximately 12,000 gpd unaccounted flow upstream of meter location; Recommend investigation (televising)
MH R-569	☐	☒	☐	Flows increased by up to 183% 1 to 2 days follow larger storm events (greater than 0.5-inches)
MH R-625	☐	☒	☐	Flows increased by up to 200% 1 to 2 days follow larger storm events (greater than 0.5-inches)
MH R-238	☒	☒	☒	Approximately 4,000 gpd unaccounted flow upstream of meter location; Flows increased by up to 150% during larger storm events (greater than 1 inch)
MH R-265	☐	☐	☐	No suspected I & I
Ridley Creek STP	☐	☐	☐	There appears to be an error with the portable meter.

Based on the analysis we suggest the Township should focus on analysis of permanent metering in the Chester Creek Service Area and continue to install and monitor portable meters in the Ridley Creek Service Area over the next six months. Visual observation of flows within manholes during overnight hours should also continue with follow-up televising as needed.

DEFINITIONS

Base flow – Base flow is the untreated wastewater discharge from residential, commercial, and industrial facilities that enter the sanitary sewer collection system to be transported to a wastewater treatment plant. This flow value does not include wastewater from inflow or infiltration and tends to fluctuate throughout the day depending on the amount of wastewater created. Typically, the lowest base flow occurs during the early hours of the morning when most people are asleep.

Infiltration – Infiltration occurs when groundwater seeps into sewer pipes through crack, leaky pipe joint and/or deteriorated manholes. There are two types of infiltration dry weather and wet weather infiltration. Dry weather infiltration is present if the flows in the system are greater than the base water flows during periods of little to know rain. When an area is determined to have dry infiltration investigations such as televising can occur to determine the source of the infiltration. Wet weather infiltration is present if the flows in the system significantly increase and slowly decrease one to three days after a rain event.

Inflow – Inflow is stormwater that enters the sewer system through rain leaders, basement sump pumps, or foundation drains illegally connected to the sewer during a rain event. If an area is expected to have inflow investigations such as smoke testing can occur to determine the source of the inflow.

TEMPORARY METERING

Ridley Creek Service Area

Six portable meters were installed between January 2020 through June 2020. Refer to the attached Figure 1 showing a map of past and future meter locations.

- *Double Pond MH R-589 (Bow Tree)*

  A portable meter was installed within Manhole R-589 on February 8, 2019 and removed on April 16, 2019 and then re-installed in March 2020.

  In the first period, the meter appears to be functioning continuously from February 8, 2019 to April 16, 2019 recording an average flow of 20,271 gpd (14.1 gpm) and a maximum flow of 81,187 gpd (56.4 gpm) resulting in a peaking factor of 5.3. The expected base flow is estimated to be 17,688 gpd based on the 2016 sewer billing records. Therefore, when comparing the average flow to the expected base flow there is approximately 3,000 gpd of unaccounted flow. From March 19, 2019 to April 16, 2019, there appears to be no dry-weather infiltration, but there does appear to be inflow and wet-weather infiltration occurring upstream of this location.

  In the second period, the meter appears to be functioning continuously from March 2020 to mid-April 2020 recording an average flow of 14,098 gpd and a maximum flow of 24,668 gpd resulting in a peaking factor of 1.75. There does not appear to be any dry-weather infiltration occurring upstream of this location given that the average flow was less than the expected base flow. There are a few instances in the second period where the flow increases by around 160% during storm events greater than one inch, inducing inflow. **Therefore, it can be concluded that there is likely minimal inflow and wet-weather infiltration upstream of R-589 during wet weather conditions.**

- *Eldridge MH R-568 (Bow Tree)*

  A portable meter was installed within Manhole R-568 on February 8, 2019 and removed on April 16, 2019 and then re-installed in March 2020 to early April.

  In the first period, the meter appears to be functioning continuously from February 8, 2019 to April 16, 2019. recording an average flow of 13,606 gpd (9.45 gpm) and a maximum flow of 16,235 gpd (11.27 gpm) resulting in a peaking factor of 1.19. The expected base flow is estimated to be 12,261 gpd based on the 2016 sewer billing records. Therefore, when comparing the average flow to the expected base flow there is approximately 1,000 gpd of unaccounted flow.

  In the second period, the meter appears to be functioning continuously from March 2020 to mid-May 2020 recording an average flow was 28,383 gpd and a maximum flow of 37,901 gpd resulting in a peaking factor of 1.34. Therefore, when comparing the average flow to the expected base flow there is approximately 13,000 gpd of unaccounted flow. Due to the significant increase in unaccounted flow within the last year, we question whether the meter data is indicative of continuous dry-weather infiltration. There was no correlation observed between precipitation and flow at this meter to indicate wet weather I & I. **There appears to be dry-weather infiltration occurring upstream of this meter location. We recommend an investigation of the pipes and laterals upstream of this meter location.**

- *Forest Lane MH R-569 (Bow Tree)*

  A portable meter was installed within Manhole R-569 in mid-January 2020 to late-February 2020.

  The meter appears to be functioning continuously from mid-January 2020 to late-February 2020recording an average flow of 5,445 gpd and a maximum flow of 9,979 gpd resulting in a peaking factor of 1.83. The expected base flow is estimated to be 8,241 gpd based on the 2016 sewer billing records. There does not appear to be any dry-weather infiltration occurring upstream of this location given that the average flow was less than the expected base flow.

  There was a correlation observed between precipitation and flow at this meter location. There is an instance where the flow increased by around 183% approximately 1 to 2 days following a storm. **Therefore, it can be concluded that minimal wet weather infiltration is occurring upstream of R-569.**

- *Bow Tree Road MH R-625 (Bow Tree)*

  A portable meter was installed within Manhole R-589 on February 8, 2019 and removed on April 16, 2019 and then re-installed in March 2020.

  The meter appears to be functioning continuously from March 2020 to early-April 2020 recording an average flow of 5,085 gpd and a maximum flow of 22,435 gpd resulting in a peaking factor of 4.41. The expected base flow is estimated to be 4,824 gpd based on the 2016 sewer billing records. There appears to be minimal dry-weather infiltration occurring upstream of this location given that the average flow and expected base flow are virtually the same.

  There was a correlation observed between precipitation and flow at this meter location. There are a few instances where the flow increases by around 200% approximately 1 to 2 days following storm events greater than a half inch. **Therefore, it can be concluded that wet weather infiltration is occurring upstream of R-625 during wet weather conditions.**

- *Line Road MH R-238*

  It should be noted that a portable meter was installed in this manhole in August 2014 to March 2015. The flow data from that period indicated that there was little to no infiltration upstream during dry weather periods. A portable meter was installed within Manhole R-569 in mid-January 2020 to late-February 2020 which collected about 31 days of flow data during that period. The following analysis is based on the limited data set. We suggest the portable meter be re-installed for at least 4 months for more accurate analysis.

  The meter appears to be functioning continuously from mid-January 2020 to late-February 2020recording an average flow of 51,042 gpd and a maximum flow of 80,914 gpd resulting in a peaking factor of 1.59. The expected base flow is estimated to be 47,436 gpd based on the 2016 sewer billing records. Therefore, when comparing the average flow to the expected base flow there is approximately 4,000 gpd of unaccounted flow.

  Based on the limited amount of flow data during this period, there appears to be a correlation observed between precipitation and flow at this meter location. There are a few instances where the flow increases by around 120% to 150% during storm events greater than one inch. **Therefore, it can be concluded that I & I is occurring upstream of R-238 of this meter location.**

- *Sorrell Hill MH R-265*

  A portable meter was installed within Manhole R-569 in mid-January 2020 to late-February 2020.

  The meter appears to be functioning continuously from mid-January 2020 to late-February 2020recording an average flow of 11,600 gpd and a maximum flow of 18,014 gpd resulting in a peaking factor of 1.55. There is no observed unaccounted flow when comparing the average daily to the expected flow of 21,909 gpd from the 2016 sewer billing records.

  There is likely no I & I occurring upstream of this location. **Therefore, it can be concluded that no I & I is occurring upstream of R-265.**

- *RCSTP Portable Influent Meter*

  A portable meter was installed in a doghouse manhole upstream of the Ridley Creek Sewage Treatment Plant. The portable meter was installed to validate the accuracy of the permanent "Field" influent meter for flow entering the plant. However, it appears that the average flow indicated by the portable flow meter is significantly lower than the average flow indicated by the permanent "Field" influent flow meter. **The portable meter location should be revisited and/or the portable meter should be re-calibrated.**

Chester Creek Service Area

No portable meters were installed in the collection and conveyance system between January 2020 through June 2020.

PERMANENT METERING

Ridley Creek Service Area

The permanent "field" influent meter is located on the Ridley Creek Interceptor in Manhole R-001, the first manhole upstream of the Plant. It meters all flow into the Plant's influent pump station except recycled flow. We were provided average daily flows for approximately 4 to 5 days a month from January 2019 to June 2020 as taken from the "Big Fish" monthly reports included in the East Goshen Municipal Authority meeting agendas. Additionally, we were provided average daily flow for the months of May and June 2020.

The "Big Fish" reports do not have continuous data, but we do have enough data to make a general assumption. The average flow was 464,601 gpd with a maximum flow of 741,000 resulting in a peaking factor of 1.60. There appears to be some unaccounted flow when comparing the average daily to the expected flow of 402,603 gpd from the 2016 sewer billing records. This unaccounted flow appears to occur after a significant amount of precipitation either over one day or combined over several days, thus it can be concluded that the Ridley Creek Service Area experiences I & I due to wet weather conditions. This type of infiltration can be caused by an increased groundwater table or by an increase in surface water elevation.

The additional provided average daily flows for the months of May and June 2020indicated an average flow of 497,077 gpd and a maximum flow of 671,760 gpd resulting in a peaking factor of 0.74. There appears to be some unaccounted flow when comparing the average daily flow to the expected flow of 402,603 gpd from the 2016 sewer billing records. This unaccounted flow appears to occur after a significant amount of precipitation either over one day or combined over several days, but the limited amount of data makes it difficult to draw any conclusions regarding the cause of the unaccounted flow.

Chester Creek Service Area

Flow data from the eight permanent meters throughout the Chester Creek Service Area were analyzed for the previous 13 months and the previous five years; six of the meters are in gravity interceptor sewers and two are on pump station discharge pipes. Instantaneous or hourly meter data is not recorded on these meters; therefore, only a rough flow analysis can be performed because inflow and instantaneous peaks, and continuous base flows are unknown.

The Westtown Way meter records the total flow from the Chester Creek Service Area including flow from West Goshen Township. The average flow at Westtown Way in 2020 was 1,046,105 gpd with the average flow from the East Goshen portion of the Chester Creek Service Area comprising 744,905 gpd (71%). East Goshen's portion of the flow in the Chester Creek Service Area has comprised approximately 72% of the total flow to the Westtown Way meter consistently from 2013 to 2018. The flow from West Goshen in 2020 averaged 301,200 gpd.

The average flow in the Chester Creek Service Area to date in 2020 was lower than the average flows in 2019. The average from the East Goshen portion of the Chester Creek Service Area in 2019 was 774,632 gpd, which is 4% higher than the average flow in 2020. The average flow from West Goshen in 2019 was 375,694 gpd, which is 20% higher than the average flow in 2020. This decrease in the flows within the Chester Creek Service Area is mostly likely caused by the decrease in rainfall between 2019 (62.01 inches) and 2020 (21.59 inches).

When analyzing the flow within the Chester Creek Service Area over the most recent 5-year period there does not appear to be any continuous infiltration. However, continuous infiltration has been observed in previous reports when analyzing portable meters data within the Chester Creek Service Area. Therefore, although there does not appear to be continuous infiltration in the overall service area there could be isolated cases within subareas. The largest spikes in the flow rate appear to be preceded by either one day of increased precipitation or several days of increased precipitation in a row. This indicates that there is I & I occurring within the system as the result of wet weather flow.

We also analyzed East Goshen's sewer billing information from 2016 compared to the flow data from the permanent meters during 2020. This analysis consisted of using the sewer billing information from 2016 to determine how many billing units were located upstream of each permanent meter. This billing unit value was then multiplied by the Chapter 94 report gpd/EDU rate from 2019 to determine the expected flow upstream of the permanent meter. This expected flow was then compared to the actual flow data from the permanent meters during 2020 to determine if there was any unaccounted flow likely caused by I & I.

In previous reports we separated the Chester Creek Service Areas into four sub-areas, as seen in Figure #1, however during this period a meter was not installed between CC-3 and CC-1. Therefore, we were unable to analyze the isolated flow from CC-3 and CC-1. However, we were able to separate CC-3 into CC-3A and CC-3B as shown in Figure #1. We can analyze CC-4, CC-2, CC-3A and combined flow from CC-3B and CC-1. Based on this analysis, CC-4 has some unaccounted flow (16,285 gpd) and the combined flow from CC-3B and CC-1 and the flow from CC-3A has little to no unaccounted flow, and the CC-2 continues to have a significant amount of unaccounted flow (184,793 gpd), consistent with prior years' analyses. Therefore, sub-area CC-2 is considered to have the highest amount of I & I and should continue to be the focus of investigations in the service area.

RECOMMENDATIONS

The Bow Tree Development should be investigated via either televising and/or smoke testing to determine the source of the I & I observed in all four portable meters placed within the development over the previous

four months. Additionally, it should be noted that a majority of the I & I observed appears to be the result of wet weather I & I, which is the result of high groundwater table or sump pumps being connected to the sanitary sewer system.

A portable meter should be re-installed at MH R-238 on Line Road to provide a larger data set to accurately verify our analysis.

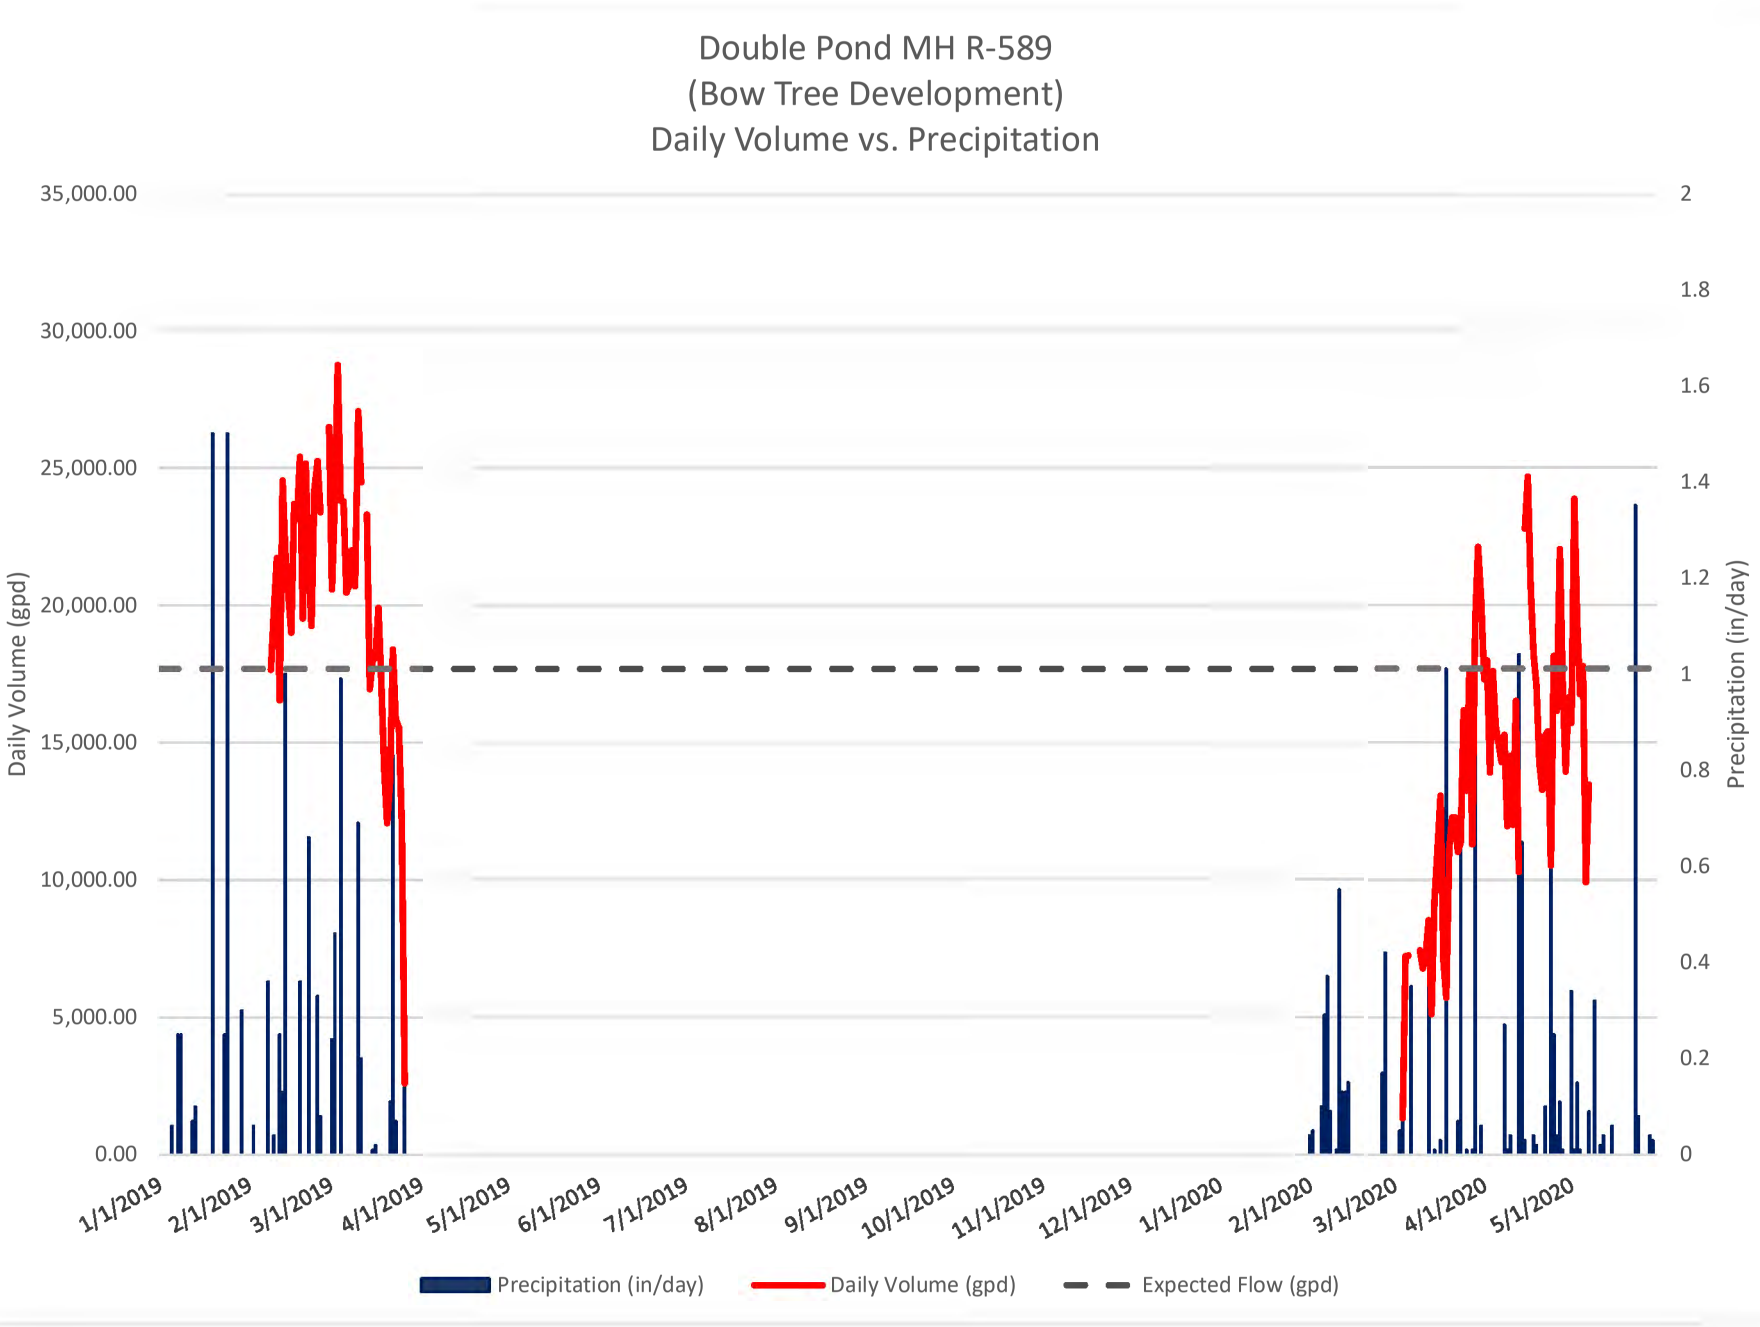
Visual observation of flows within manholes during overnight hours should also continue with follow-up televising as needed.

Over the next six months, the Township should install and monitor portable meters in the Chester Creek Service Area. Visual observation of flows within manholes during overnight hours should also continue with follow-up televising as needed. Additionally, the Chester Creek interceptor should be televised and/or smoke tested. We believe that a majority of the I & I occurring during wet weather conditions is occurring along the interceptor which runs adjacent to Chester Creek.

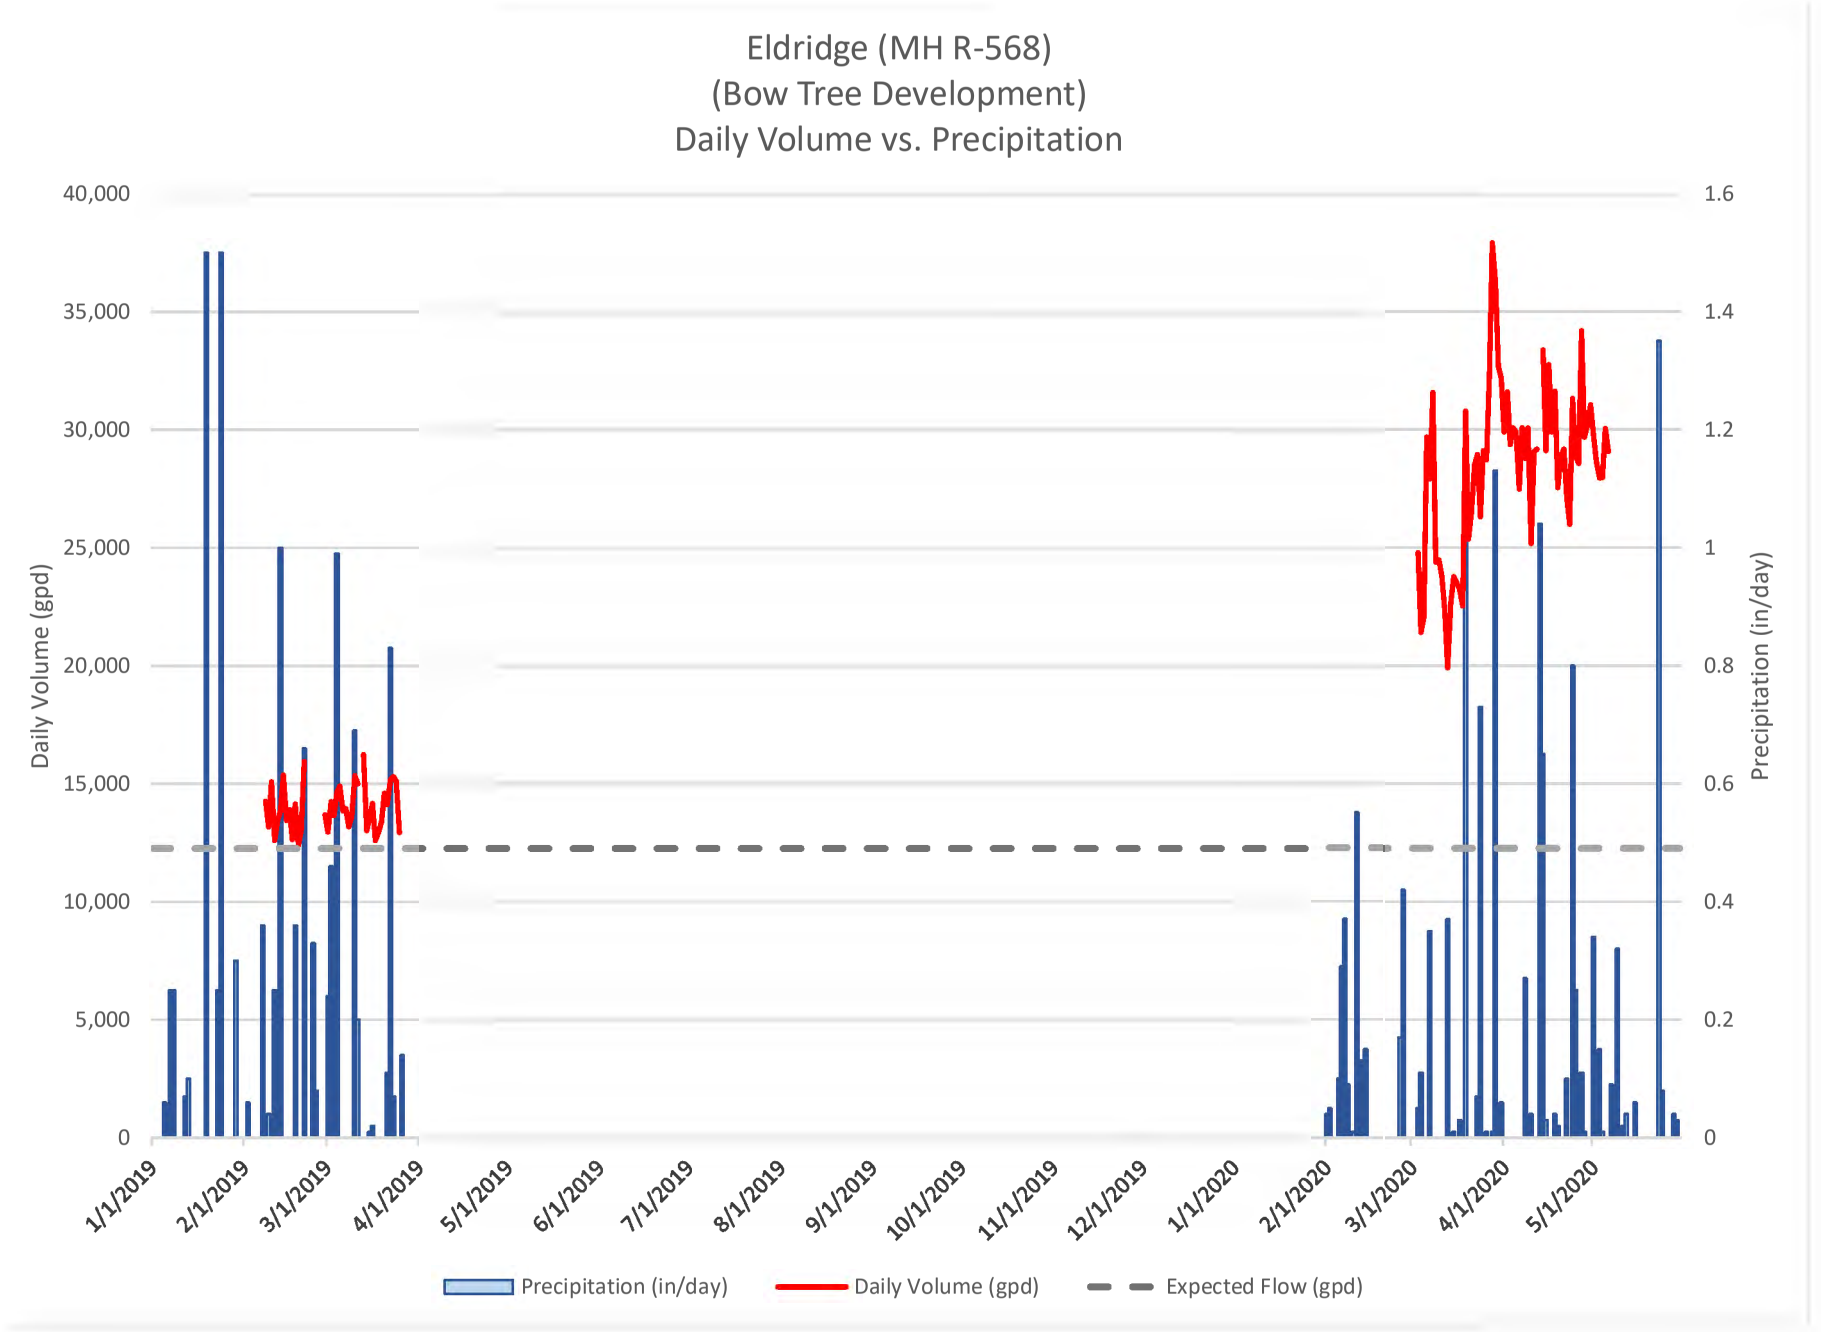
This Semi-Annual Status Reports is submitted by copy to the East Goshen Municipal Authority to describe the progress made towards achieving the previous Corrective Action milestone events. We anticipate preparation and submission of Semi-Annual Sewer System Status Report #20 by January 30, 2021.

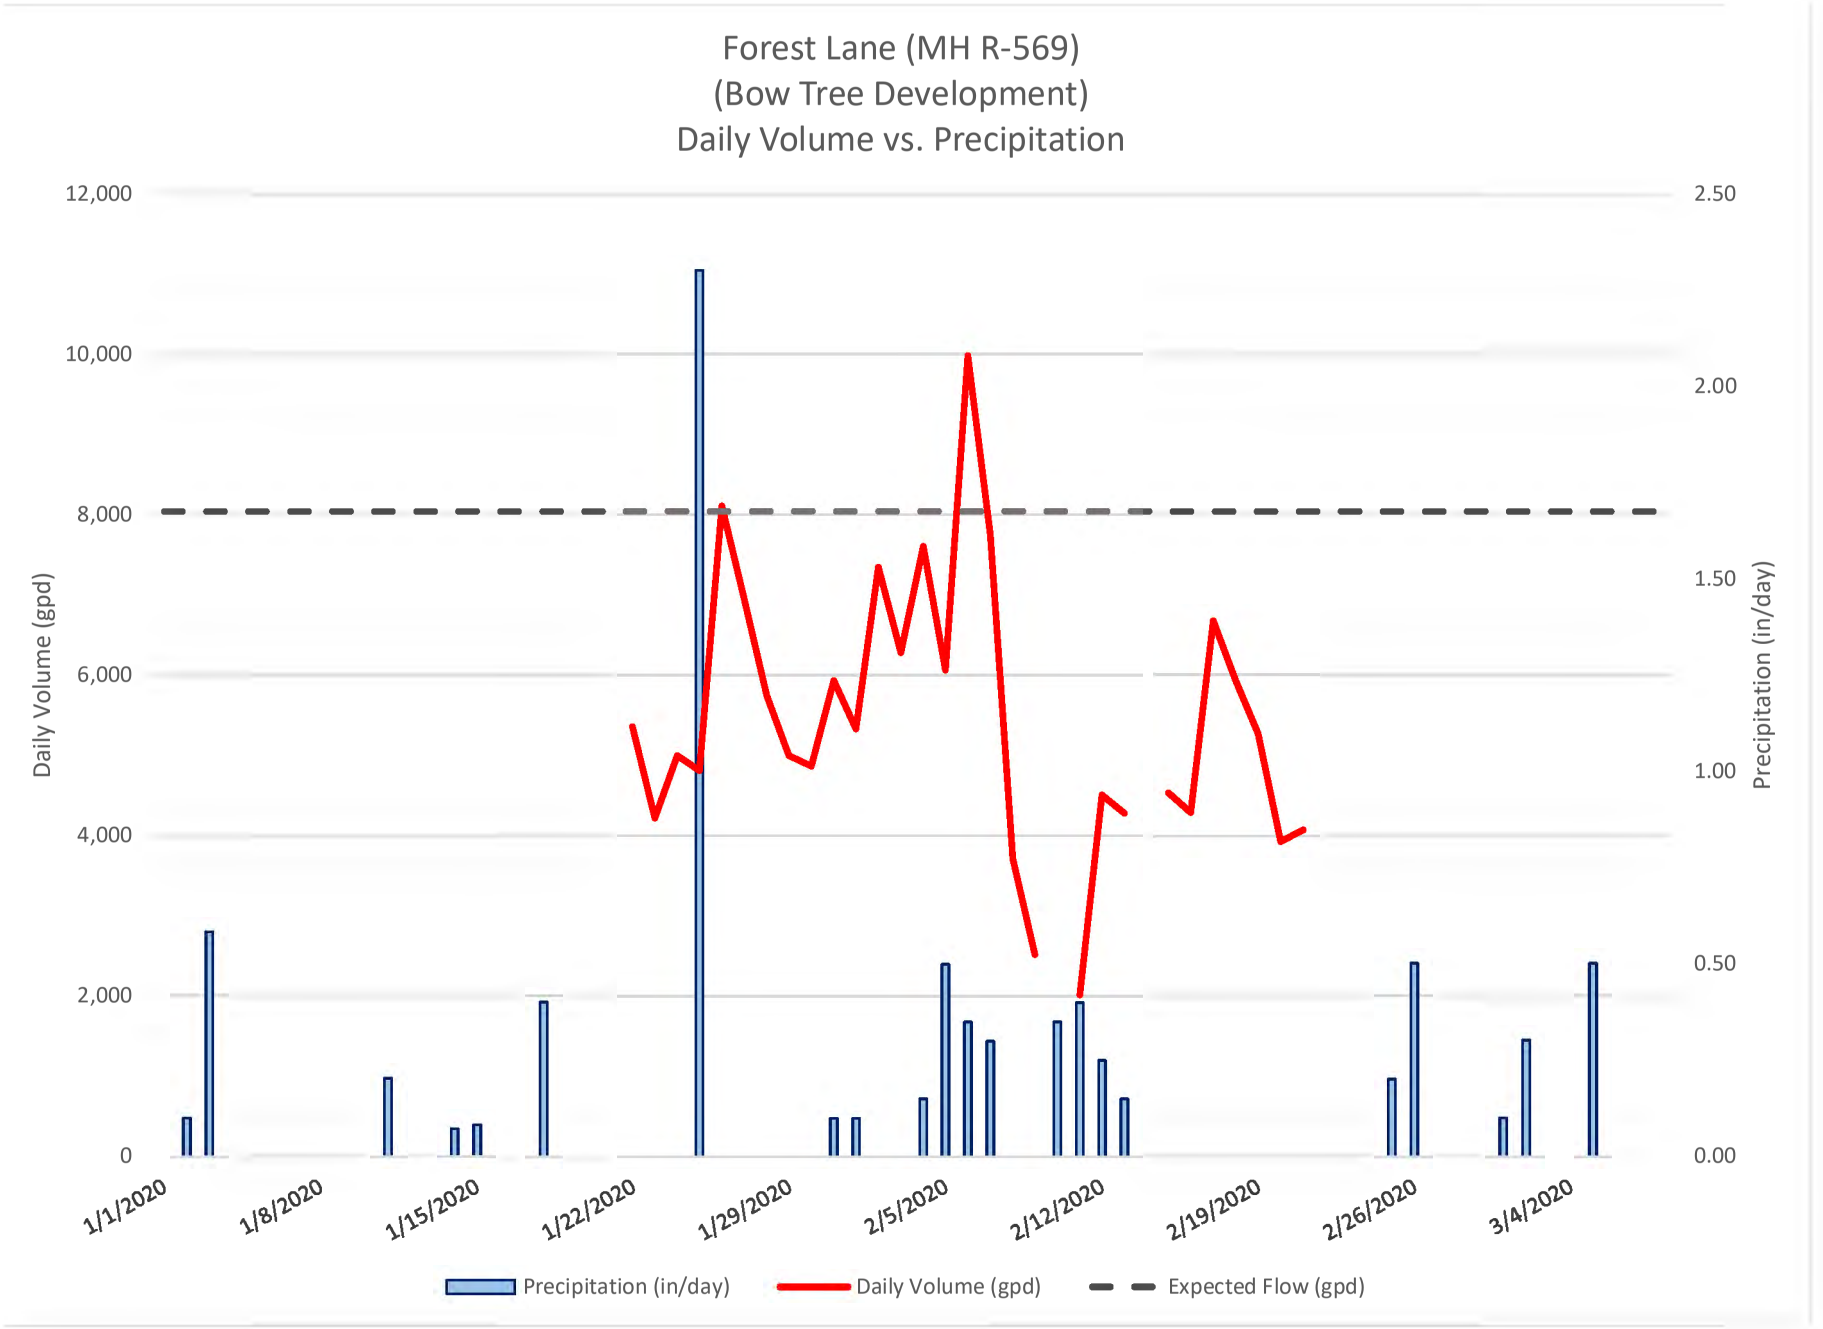
If you should have any questions, please do not hesitate to contact me.

Sincerely,



PENNONI ASSOCIATES INC.





Michael J. Ellis, PE
Authority Engineer

APPENDIX E

Township Code 188: (Regarding Industrial Waste)

Chapter 188: SEWERS

[HISTORY: Adopted by the Board of Supervisors of the Township of East Goshen as indicated in article histories. Amendments noted where applicable.]

§ 188-6. Industrial waste.

A. Industrial wastewater discharge permit. Prior to the discharge of any industrial waste or other waste not defined as sanitary sewage into the sewer system, the discharger shall first obtain an industrial wastewater discharge permit issued by the Township.

B. Exclusion of industrial waste:

(1) Permissible discharges. All wastewater discharged into the sewer system shall be of a domestic strength and composition. Any wastewater which is not of domestic origin shall be pretreated to domestic strength and composition or a level acceptable to the Authority. Discharges of nondomestic strength origin will be permissible by permit only.

(2) The Township reserves the right to refuse connection to the sewer system, to disconnect a sewer or to compel pretreatment of industrial waste in order to prevent discharge to the sewer of industrial waste deemed to be harmful to the sewage collection system or sewage plant or to have a deleterious effect on the sewage treatment or sludge-handling processes or the receiving stream or which would cause a violation of any existing sewage treatment agreement or permit of the Township.

C. Industrial waste rates. In the event that the Township consents to accept industrial waste into the sewer system, having total suspended solids (tss) in excess of 300 parts per million (ppm) and biochemical oxygen demand (BOD) in excess of 250 ppm the total charge shall be determined in accordance with the following formula:

Total charge =

Q + [(0.001 x Q) x (BOD in ppm - 250)] + [(0.001 x Q) x (tss in ppm - 300)]

Where:

Q	=	metered quantity charge
BOD	=	biochemical oxygen demand
tss	=	total suspended solids
ppm	=	parts per million

D. Surcharge for extra strength **[Added 11-16-2004 by Ord. No. 129-S-04]**

The total charge for sewage having concentrations in excess of the levels set forth in Subsection C above shall be determined in accordance with the following formula: Total charge = Q + 0.001 Q (BOD in ppm - 250) + 0.001 Q (SS in ppm - 300)

Q	=	Metered quantity charge (§ 188-6.C)
SS	=	Suspended solids.
ppm	=	Parts per million.”

§ 188-7. Exclusion of harmful waste.

No person shall discharge into the sewer system any exhaust steam or any oils, tar, grease, gas, benzene or other combustible gases or liquids, any garbage (unless treated in an approved manner), offal, insoluble solids or other dangerous or harmful substances which would adversely affect the functioning of the sewer system or the processes of sewage treatment or the receiving stream.

ARTICLE IV Pretreatment Standards and Regulations for Industrial Wastewater Discharges [Adopted 11-6-2004 by Ord. No. 129-S-04]

§ 188-35. Legislative intent.

A. East Goshen Township entered an intermunicipal agreement with West Goshen Township on February 28, 1996, titled, "Agreement Between West Goshen Township and East Goshen Township Governing Compliance with Implementation and Enforcement of Industrial Waste Pretreatment Regulations" (the "agreement") whereby West Goshen Township agreed to accept sanitary sewage from East Goshen Township into the West Goshen Township Wastewater Treatment Plant. Pursuant to the Agreement, East Goshen Township is required to develop, implement and enforce a federally mandated pretreatment program in compliance with the federal regulations (codified at 40 Code of Federal Regulations Part 403) to control wastewater discharges from all industrial users in East Goshen Township whose sewage is discharged into the West Goshen Township Sewage Collection System for treatment at the West Goshen Township Wastewater Treatment Plant.

B. The East Goshen Township Municipal Authority currently owns the Ridley Creek Sewer Treatment Plant along Towne Drive and the Lockwood Sewer Treatment Plant along Dolphin Drive (collectively, the "East Goshen Plants") which the Municipal Authority leases to the Township. As of the effective date of this article, the East Goshen Plants do not accept sewage from any industrial users. If in the future the Township and the East Goshen Township Municipal Authority agree to accept industrial waste for treatment at the East Goshen Plants, the regulations set forth in this Article IV shall apply and such industrial user(s) shall comply with all standards and regulations in this Article IV.

§ 188-36. Definitions; word usage.

A. Unless the context specifically indicates otherwise, the following terms and phrases, as used in this article, shall have the meanings hereinafter designated.

ACTS — The Federal Water Pollution Control Act, as amended, also known as the "Clean Water Act," as amended, 33 U.S.C. § 1251 et seq. (the "Act"); and the Pennsylvania Sewage Facilities Act, Act of January 24, 1966, P.L. (1965) 1535, as amended (the Sewage Facilities Act).

APPROVAL AUTHORITY — The Environmental Protection Agency (EPA), Region III.

AUTHORIZED REPRESENTATIVE OF USER — An authorized representative of a user is:

(1) A principal executive officer of at least the level of vice president if the user is a corporation.

(2) A general partner or proprietor if the user is a partnership or proprietorship, respectively.

(3) A principal executive officer or a person having responsibility for the overall operation of the user's facility if the user is a governmental agency, unincorporated organization or other similar entity.

(4) A duly authorized representative of the individual designated in Subsections (1) through (3) above if:

(a) The authorization is made in writing;

(b) The authorization specifies either an individual or a position having responsibility for the overall operation of the facility from which the industrial discharge originates, such as the position of plant manager, or a position of equivalent responsibility, or having overall responsibility for environmental matters for the company; and

(c) The written authorization is submitted to the East Goshen Township Sewer Manager.

AVERAGE DAILY FLOW — The wastewater discharge volume for the most recent calendar month

divided by the number of calendar days in that month.

BOD (denotes "biochemical oxygen demand") — The quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure for five days at 20° C., expressed in terms of weight and concentration [milligrams per liter (mg/L)]. The standard laboratory procedure shall be found in the latest edition of Standard Methods for the Examination of Water and Sewage, published by the American Public Health Association.

BYPASS — The intentional diversion of waste streams from any portion of an industrial user's facility for pretreatment.

CATEGORICAL INDUSTRY — Any industry subject to pretreatment standards as specified in 40 CFR (the "United States Code of Federal Regulations"), Chapter 1, Subchapter N, establishing quantities or concentrations of pollutants or pollutant properties which may be discharged or introduced to a treatment plant by existing or new industrial users in specific industrial subcategories.

CATEGORICAL STANDARDS — National Categorical Pretreatment Standards.

COD (denotes "chemical oxygen demand") — The quantity of oxygen, expressed in mg/L, required to chemically oxidize the organic and inorganic matter in a water or wastewater sample under the standard laboratory procedure. The standard laboratory procedure shall be that in the latest edition of Standard Methods for the Examination of Water and Sewage, published by the American Public Health Association.

COMPATIBLE POLLUTANT — BOD, COD, total suspended solids, total Kjeldahl nitrogen, total phosphorus, fecal coliform bacteria and oil and grease.

COMPOSITE SAMPLE — The sample resulting from the combination of individual wastewater samples taken at selected intervals based on an increment of either flow or time.

CONTROL AUTHORITY — The East Goshen Township Board of Supervisors.

ENGINEER — Any consulting engineer appointed by East Goshen Township or the East Goshen Municipal Authority.

EPA — The United States Environmental Protection Agency, including, where appropriate, the Administrator or other duly authorized official of said agency.

EXTRA-STRENGTH WASTEWATER — A wastewater having total suspended solids (tss) in excess of 300 parts per million (ppm) and biochemical oxygen demand (BOD) in excess of 250 ppm, which may be acceptable for discharge to the sewerage system, subject to prior approval of the Sewer Manager and the discharger's payment of a surcharge as established in this article. The concentration levels set forth in this definition may be revised from time to time by resolution of the control authority.

GARBAGE — Solid wastes from the domestic and commercial preparation, cooking and dispensing of food and from the commercial handling, storage and sale of produce.

GRAB SAMPLE — A sample which is taken from a waste stream on a one-time basis, with no regard to the flow in the waste stream, over a period of time not to exceed 15 minutes.

INDUSTRIAL USER — Any person discharging anything other than domestic waste to the sewerage system.

INDUSTRIAL WASTEWATER — Any water which, during a manufacturing or processing operation, including those regulated under Sections 307(b), (c) or (d) of the Act, comes into direct contact with or results from the production or use of any raw material, intermediate product, finished product, by-product or waste product, or any other water contaminated by an industrial and/or commercial process, and distinct from domestic wastewater.

INDUSTRIAL WASTE DISCHARGE PERMIT — A permit authorizing a person to deposit or discharge industrial wastewater into the sewerage system.

INTERFERENCE — A discharge which alone or in conjunction with a discharge or discharges from

other sources inhibits or disrupts the treatment, conveyance, processes or operations of the sewerage system or a decrease in treatment efficiency or which contributes to a violation of any requirement of an NPDES permit, or which prevents the use or disposal of sewage sludge in compliance with any of the following statutory or regulatory provisions or permits issued thereunder: Section 405 of the Act (33 U.S.C. § 1317), any criteria, guidelines or regulations developed pursuant to the Solid Waste Disposal Act (SWDA), including Title II and Title IV, commonly referred to as the "Resource Conservation and Recovery Act" (RCRA), the Clean Air Act, the Toxic Substances Control Act and the Marine Protection, Research and Sanctuaries Act.

LOCAL DISCHARGE LIMITS — Numerical limitations on the concentration, mass or other characteristics of wastewater, wastes or pollutants discharged to the sewerage system by industrial users, and which are developed by East Goshen Township in compliance with National Categorical Pretreatment Standards, National Prohibitive Discharge Standards or other applicable federal and state regulations. For users who are connected to the West Goshen Township Sewerage System, the local discharge limits shall be developed by West Goshen Township in compliance with National Categorical Pretreatment Standards, National Prohibitive Discharge Standards or other applicable federal and state regulations.

MILLIGRAMS PER LITER (mg/L) — The ratio of weight to volume expressing the concentration of a specified component in a wastewater; also known as "parts per million" (PPM).

MUNICIPAL AUTHORITY — The East Goshen Township Municipal Authority.

NATIONAL CATEGORICAL PRETREATMENT STANDARD — Any regulation containing pollutant discharge limits promulgated by the EPA in accordance with Section 307(b) and (c) of the Act (33 U.S.C. § 1317), as from time to time amended, and which are defined in 40 CFR Chapter 1, Subchapter N, Parts 405-471, as from time to time amended.

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMIT or NPDES PERMIT — A permit issued pursuant to Section 402 of the Act (33 U.S.C. § 1342), as from time to time amended.

NATIONAL PROHIBITED DISCHARGE STANDARD OR PROHIBITED DISCHARGE — Any regulation developed under the authority of Section 307(b) of the Act and 40 CFR 403.5.

NEW SOURCE — Any building, structure, facility or installation from which there is or may be a discharge of pollutants, the construction of which commenced after the publication of proposed Categorical Pretreatment Standards under Section 307(c) of the Act, which standards will be applicable to such source if such categorical standards are thereafter promulgated in accordance with that section. Determination of the applicability of new source standards shall be made as provided in the Act and 40 CFR 403.3.

NONCONTACT COOL1NG WATER — Water used for cooling purposes which does not come into direct contact with any raw material, intermediate product, waste product or finished product.

OWNER — Any person vested with ownership, legal or equitable, sole or partial, of any property, or his agent.

PASS-THROUGH — Discharge through the sewerage system which exists in quantities or concentrations, alone or with discharges from other sources, which causes a violation of any condition of an NPDES permit issued to a municipality or municipal authority, including an increase in magnitude or duration of a violation.

PENNSYLVANIA DEPARTMENT OF ENVIRONMENTAL PROTECTION (DEP) — The Department of Environmental Protection of the Commonwealth of Pennsylvania, or any department or agency of the commonwealth succeeding to the existing jurisdiction or responsibility of that Department.

PERSON — Any individual, firm, company, partnership, copartnership, corporation, association, joint-stock company, trust, estate, group, society or other legal entity whatsoever, government entity, either commonwealth or local, and their agencies, commissions, departments and instrumentalities, or the legal representatives, heirs, successors and assigns thereof.

pH — The logarithm of the reciprocal of the hydrogen-ion concentration expressed as moles per liter,

which indicates the degree of acidity or alkalinity of a substance.

POLLUTANT — Any dredged soil, solid waste, incinerator residue, sewage, sewage sludge, garbage, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand, cellar dirt or industrial, municipal and agricultural waste discharged into water.

PRETREATMENT — The reduction of the amount of pollutants, the elimination of pollutants or the alteration of the nature of pollutant properties in wastewater to a less harmful state prior to or in lieu of discharging or otherwise introducing such pollutants into the sewerage system. The reduction or alteration may be obtained by physical, chemical or biological processes, process changes or by other means, except as prohibited by the Federal Water Pollution Control Act and 40 CFR 403.6(d), as amended from time to time.

PRETREATMENT COORDINATOR — The East Goshen Township Sewer Manager or authorized designee. For users who are connected to the West Goshen Township Sewerage System, West Goshen Township or its Sewer Manager shall serve as the pretreatment coordinator.

PRETREATMENT REQUIREMENT — Any substantive or procedural requirement related to pretreatment, other than a pretreatment standard imposed on an industrial user.

PRETREATMENT STANDARD — Any regulation containing pollutant discharge limits promulgated by the control authority in accordance with Sections 307(b) and (c) of the Act, or by East Goshen Township, which applies to industrial users. This term includes National Categorical Pretreatment Standards, local discharge limits and prohibited discharge limits established by this article or other regulatory authority having jurisdiction.

QUALIFIED PROFESSIONAL — A registered professional engineer skilled in the field of wastewater treatment.

SANITARY SEWAGE, DOMESTIC SEWAGE or SEWAGE — The normal water-carried household and toilet wastes from residences, businesses, buildings, institutions and commercial and industrial establishments.

SEWERAGE SYSTEM or SEWER SYSTEM — All facilities leased by the Township from the Municipal Authority and operated by the Township for the collection, transportation, treatment or disposal of sanitary sewage. For users in East Goshen Township whose sewage is treated by West Goshen Township pursuant to an intergovernmental agreement dated February 26, 1996, such term shall include the West Goshen Township Sewerage System as defined herein.

SIGNIFICANT INDUSTRIAL USER — Any industrial user that is subject to National Categorical Pretreatment Standards: or discharges 25,000 gallons or more per day of industrial wastewater; or contributes a waste stream which makes up 5% or more of the average dry weather hydraulic or organic (compatible pollutant) capacity of the sewerage system; or any other industrial user that is designated as such by the pretreatment coordinator on the basis that the industrial user has a reasonable potential to adversely affect the sewerage system by interference, pass-through of pollutants or sludge contaminations sufficient to endanger the sewerage system or Township personnel or to violate any applicable pretreatment standard. By definition, every significant industrial user is an industrial user.

SIGNIFICANT NONCOMPLIANCE (SNC) — An industrial user is in significant noncompliance if it violates one or more of the following criteria:

(1) Chronic violations of wastewater discharge limits, defined as those in which 66% or more of all the measurements taken during a six-month period exceed (by any magnitude) the daily maximum limit or the average limit for the same pollutant.

(2) Technical review criteria (TRC) violations, defined as those violations in which 33% or more of all of the measurements for each pollutant taken during a six-month period equal or exceed the product of the daily average maximum limit or the average limit times the applicable TRC (TRC-1.4 for BOD, TSS, fats, oil and grease, and 1.2 for all other pollutants, except pH).

(3) Any other violation of a pretreatment standard or requirement (daily maximum or longer-term average) that the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, determines has caused, either alone or in combination with other discharges, an interference or pass-through in the sewerage system.

(4) Any discharge of a pollutant that has caused imminent endangerment to the health of the Township personnel, the environment or the general public; or has resulted in exercising any emergency authority to halt or prevent such a discharge.

(5) Failure to meet, within 90 days after the scheduled date, a compliance schedule date or a compliance schedule milestone contained in the user's industrial waste discharge permit or enforcement action for starting construction, completing construction or attaining final compliance.

(6) Failure to accurately and timely report incidents of noncompliance.

(7) Any one or more violations of this article not otherwise specified in this definition, any regulation promulgated pursuant to the authority herein authorized or any regulations imposed by EPA in the implementation and/or enforcement of this article, provided that prior to any enforcement action by the Township, it shall give 30 days' prior written notice to the permittee of the alleged violation and provide the permittee a period of 60 days to correct the violation, unless the violation constitutes in the Sewer Manager's reasonable discretion an emergency presenting a threat of imminent harm to the treatment plant or other municipal sewerage facilities.

(8) Failure to provide within 30 days after the due date any required reports, such as baseline monitoring reports, ninety-day compliance reports, periodic self-monitoring reports and reports on compliance with compliance schedules.

SLUG LOAD — Any discharge at a flow rate or concentration that may cause a violation of any pretreatment requirement or pretreatment standard set forth in this article.

SLUG CONTROL PLAN — A report prepared by an industrial user and provided to the Township in accordance with this article which details the existing and proposed facility plans and operating procedures to be followed by that user in the event of a slug load.

STANDARD INDUSTRIAL CLASSIFICATION (SIC) — A classification pursuant to the latest Standard Industrial Classification Manual issued by the Executive Office of the President, Office of Management and Budget.

STANDARD METHODS — The latest edition of Standard Methods for the Examination of Water and Wastewater (Standard Methods), a manual published by the American Public Health Association specifying analytical procedures for testing and analysis of wastewater.

STATE — Commonwealth of Pennsylvania.

STORMWATER — Any flow occurring during or following any form of natural precipitation and resulting exclusively therefrom.

SURCHARGE — An additional charge for the treatment of extra-strength wastewater in excess of the basic charge for the treatment of wastewater.

TOTAL SUSPENDED SOLIDS (TSS) — The total suspended matter that either floats on the surface of, or is in suspension in, water or wastewater and is removable by laboratory filtration as prescribed in Standard Methods.

TOTAL KJELDAHL NITROGEN (TKN) — The sum of the organic nitrogen and ammonia nitrogen present in wastewater, as measured by standard laboratory procedure as described in Standard Methods.

TOWNSHIP — East Goshen Township, a political subdivision of the Commonwealth of Pennsylvania.

USER — Any person who contributes wastewater into the sewerage system.

WASTEWATER — The combined flow of sanitary sewage and industrial wastewater, together with such quantities of infiltration and inflow as may be present.

WEST GOSHEN TOWNSHIP — A political subdivision of the Commonwealth of Pennsylvania who, pursuant to an intermunicipal agreement with West Goshen dated February 28, 1996, has agreed to accept sanitary sewage from East Goshen Township for treatment at the West Goshen Township Wastewater Treatment Plant.

WEST GOSHEN TOWNSHIP SEWERAGE SYSTEM — The sewage collection and treatment system of West Goshen Township and West Goshen Township Sewer Authority and any pipe, conduit or other equipment which carries wastewater to the West Goshen Township publicly owned treatment plant (POTW) or any of its component parts.

B. Words in the present tense include the future. The singular number includes the plural number. The plural number includes the singular number. The word "shall" is mandatory, while the word "may" is permissive.

§ 188-37. Prohibitions and restrictions on all users.

Except as otherwise provided in this article, no user shall discharge or cause to be discharged to the sewerage system any sewage, industrial wastewater or other matter or substance:

A. Having a temperature which will inhibit biological activity in the sewerage system resulting in interference, but in no case with a temperature at the introduction into the sewerage system which exceeds 120° F. or is less than 40° F., and in no case heat in such quantities that the temperature of the influent to the POTW exceeds 104° F.

B. Containing petroleum oils, nonbiodegradable cutting oils or other products of mineral origin, animal fats, oil, wax or grease or other similar substances (collectively called "oil and grease") in amounts that will cause pass-through or interference.

C. Containing any liquids, solids or gases at concentrations which are, or may be sufficient, either alone or by interaction with other substances, to cause fire or explosion or be injurious in any other way to the sewerage system or to the operation of the POTW. Prohibited materials include, but are not limited to, gasoline, fuel oil, kerosene, naphtha, paint products, sulfides and any substance having a closed cup flashpoint of less than 140° F. using the test methods specified in 40 CFR, Chapter 1, Subpart C, Section 261.21.

D. Containing solid or viscous substances at concentrations which will cause obstruction to the flow in a sewer or other interference, such as but not limited to ashes, cinders, spent lime, stone dust, sand, mud, straw, shavings, metals, glass, rags, grass clippings, feathers, tar, plastics, wood, whole blood, paunch manure, bentonite, lye, building materials, rubber, asphalt residues, hairs, bones, leather, porcelain, china, ceramic wastes, polishing wastes or glass grindings.

E. Having a pH, stabilized, lower than 6.0 or higher than 9.0 or having any other corrosive or scale-forming property capable of causing damage or hazard to structures, equipment, bacterial action or personnel of the sewerage system.

F. Containing pollutants, including oxygen-demanding pollutants, (BOD etc.), released in a discharge at a flow rate and/or pollutant concentration which, either singly or by interaction with other pollutants, may injure or cause either interferences or a pass-through or interference in the sewerage system, constitute a hazard to humans, animals, plants, create a toxic effect in the receiving waters of the POTW or exceed any limitation set forth in a National Categorical Pretreatment Standard.

G. Containing any noxious or malodorous liquids, gases or solids which, either singly or by interaction with other wastes, are sufficient to create a public nuisance or result in toxic gases, vapors or fumes in the sewerage system in a quantity that will cause worker health and safety problems.

H. Containing objectionable color not removed in the treatment process, such as but not limited to dye

wastes and vegetable tanning solutions.

I. Containing radioactive substances of such half-life or concentration as may exceed limits which are prohibited by applicable state or federal regulations.

J. Prohibited by any permit, statute, rule, regulation, ordinance or resolution issued or promulgated by the Township or any public agency having jurisdiction, including the state and the EPA.

K. Containing any substance which will cause the sewerage system to violate the Municipal Authority's NPDES permit, the West Goshen Township Sewer Authority's NPDES permit (for users who are connected to the West Goshen Township Sewerage System) or the receiving water quality standards.

L. Containing any substance which shall cause the sewerage system to be in noncompliance with sludge use or disposal criteria, guidelines or regulations developed under Section 405 or other applicable or amended sections of the Act, or be in noncompliance with any criteria, guidelines or regulations affecting sludge use or disposal promulgated pursuant to the Solid Waste Control Act, or State Clean Air Act, the Toxic Substances Control Act or state criteria applicable to the sludge management method being used.

M. Containing nonbiodegradable complex carbon compounds.

N. Constituting a slug load.

O. Containing stormwater, surface water, uncontaminated groundwater, roof runoff, foundation drain water or drainage from the fields.

P. Containing any garbage with particles greater than 1/2 inch in size.

Q. Containing pesticides, unless upon written request, special permission is obtained from the Township.

§ 188-38. Trucked or hauled wastewater.

A. Tank truck or hauled waste discharges to the sewerage system are prohibited, except as authorized hereinafter.

B. Tank truck or hauled wastes may only be discharged into sewerage system upon the issuance of a discharge permit by the Township.

C. Tank truck or hauled wastes authorized for discharge shall be discharged only at the location, time and at a rate fixed by the discharge permit.

D. Tank truck or hauled waste discharges shall not include any industrial wastewater except as authorized in writing by the Township.

E. Prior to discharge, the tank truck or hauled waste shall be subject to inspection and sampling by the Township.

F. Tank truck or hauled waste discharges shall be subject to rates and charges in accordance with a schedule established by the Township, as amended from time to time.

§ 188-39. Strength of waste surcharge.

A. Any user discharging wastewater to the sewerage system defined as extra-strength wastewater in this article or as revised in such resolutions as the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, shall adopt from time to time shall pay the surcharge established in this chapter or as amended by resolution of the Board of Supervisors. The effective date of any change in definitions or fees shall be stated in all such resolutions.

B. No user shall discharge into the sewerage system any extra-strength wastewater without a written permit from the Township providing for sampling and the payment of a surcharge to the Township or

West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System), in accordance with the formulas set forth in the current pretreatment chapter. The Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System) shall retain and have the right at any time to give notice to the industrial user that extra-strength discharges will no longer be accepted.

C. The surcharge computations shall be based on the wastewater sample analyses for the most recent complete calendar quarter. Surcharges shall be based on wastewater sample analyses (or, in the absence thereof, on the Township estimates) for the calendar quarter which they apply. The surcharge formulas are independent of each other and measure different characteristics of the same wastewater. Surcharges measured by each formula are cumulative.

D. The surcharge billings shall be in addition to any other quarterly sewer use charge paid by the user to the Township. Payment of a surcharge shall not relieve the user of its obligation to comply with the local loading limits promulgated by resolution in § 188-40B of this article.

§ 188-40. Prohibitions and restrictions on industrial users.

A. Permit required for discharge of industrial wastewater. Prior to the discharge of any industrial waste or other waste not defined as sanitary sewage into the sewerage system, the discharger shall first obtain an industrial wastewater discharge permit issued by the Township.

B. Local discharge limits.

(1) The Township shall, by resolution adopted by the Township's Board of Supervisors, establish and promulgate local discharge limits regulating the discharge of specific pollutants to the sewerage system by industrial users. Local discharge limits may be established for any substance which is discharged, or likely to be discharged, to the sewerage system. Such limits shall be calculated as mandated by the pretreatment coordinator and the Engineer, and may be amended from time to time by the control authority.

(2) Local discharge limits may limit concentration, mass or a combination of the two.

(3) The procedure for the calculation of local discharge limits shall be as recommended by the EPA.

(4) Local discharge limits shall be calculated to prevent interference; pass-through; the discharge of toxic materials in toxic amounts; threats to worker health and safety; physical, chemical or biological damage to the sewerage system; and noncompliance with the Municipal Authority's NPDES permit or the West Goshen Township Sewer Authority's NPDES permit (in the case where the user is connected to the West Goshen Township Sewerage System).

(5) Local discharge limits applicable to industrial users shall be adopted by resolution of the Township. Local discharge limits applicable to all industrial users shall be included in all industrial waste discharge permits.

(6) Discharging any pollutant in excess of a local discharge limit established for that pollutant shall be a violation of this article.

§ 188-41. Spills or slug loads.

A. All industrial users shall provide and maintain at their own expense facilities adequate to prevent an accidental discharge or slug load of any substance stored or used at the industrial user's facilities that, if discharged into the sewerage system, will violate any of the provisions of §§ 188-37 and 188-40 of this article. Slug control plans shall be submitted, as requested, to both the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, detailing the facility plans and operating procedures to be utilized by the industrial user for this protection. Slug control plans shall contain, at a minimum, the following information, in addition to such additional data as shall be required from time to time by the pretreatment coordinator:

(1) A description of discharge practices, including nonroutine discharges; and a complete description of stored chemicals.

(2) Procedures for immediately notifying the pretreatment coordinator and the municipality to whose sewer collection system the industrial user is connected of accidental discharges and slug loads into the sewerage system.

(3) Procedures to prevent adverse impacts from such discharges and procedures to prevent reoccurrence of all such discharges.

B. An industrial user proposing to connect to the sewerage system after the effective date of this article shall submit a copy of its slug control plan to the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, and to the pretreatment coordinator for approval, or demonstrate to the satisfaction of the pretreatment coordinator they are not needed, before connection to the sewerage system. Review of such plans and operating procedures shall not relieve the industrial user from the responsibility to modify the industrial user's facility as necessary to meet the requirements of this article.

C. In the case of an accidental discharge or slug load to the sewerage system of any pollutant, the industrial user shall immediately (within not more than 30 minutes) notify by telephone the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, and the pretreatment coordinator of the incident. The notification shall include information regarding the location of the discharge, the kind of pollutants involved, the concentration and volume of the discharge and corrective actions planned or taken.

D. Within five days following an accidental discharge or slug load, the industrial user shall submit to the the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, and to the pretreatment coordinator a detailed written report describing the cause of the discharge and the measures to be taken by the industrial user to prevent similar future occurrences. Such notification shall not relieve the industrial user of any liability on account thereof.

E. A notice shall be permanently posted by each industrial user on a bulletin board or other prominent place advising employees whom to call in the event of an accidental discharge or slug load. Employers shall inform all employees who may cause or suffer such an accidental discharge to occur of the emergency notification procedure and shall keep a log verifying the method, manner and frequency of such notification.

§ 188-42. National Categorical Pretreatment Standards.

If the National Categorical Pretreatment Standards, located in 40 CFR Chapter 1, Subchapter N, Parts 405-471, as amended from time to time, for any industrial user are more stringent than limitations imposed under this article for industrial users in that subcategory, then the pretreatment standards shall apply and are hereby incorporated in this article. The Township shall notify all affected industrial users of the applicable reporting requirements under 40 CFR 403.12. If an industrial user subject to a National Categorical Pretreatment Standard has not previously submitted an application for an industrial waste discharge permit, the industrial user shall apply for a permit within 90 days of the promulgation of the National Categorical Pretreatment Standard.

§ 188-43. Dilution prohibition.

Except where expressly authorized to do so by an applicable pretreatment standard or pretreatment requirement, no industrial user shall increase the use of process water or in any other way attempt to dilute a discharge as a partial or complete substitute for adequate treatment to achieve compliance with a pretreatment standard or requirement. The Township may impose mass limitations on industrial users in cases where the imposition of mass limitations is appropriate.

§ 188-44. State requirements.

State requirements and limitations on industrial wastewater discharges shall apply in any case where they are more stringent than federal requirements and limitations or those established and imposed in this article.

§ 188-45. Township's right of revision.

The Township reserves the right to establish more stringent limitations or requirements on discharges to the sewerage system.

§ 188-46. Industrial waste discharge permits.

A. General.

(1) No industrial users shall connect to or discharge wastewater to the sewerage system without an industrial waste discharge permit.

(2) Upon written application to the Township, but prior to discharge, the pretreatment coordinator may determine that industrial users which are not significant industrial users or do not have industrial wastewater do not require an industrial waste discharge permit and may discharge industrial wastewater to the sewerage system, but are required to comply with all other provisions of this article. If an industrial user makes changes to the processes, flow, wastewater concentration, wastewater characteristics or other operations reported in the most recent industrial waste discharge questionnaire filed by the industrial user with the Township, and those changes result in its meeting the definition of an industrial user, the industrial user shall immediately upon becoming aware that such a change has occurred, or 90 days prior to such a change if it is planned, notify in writing both the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, and, if the application and proposed discharge are in compliance with this article, obtain an industrial waste discharge permit, which shall be issued within 90 days of submission of the permit application.

(3) Where an industrial user, subject to a newly promulgated National Categorical Pretreatment Standard, has not previously submitted an application for an industrial waste discharge permit, the user shall, within 90 days after the promulgation of the applicable National Categorical Pretreatment Standard:

(a) Obtain an industrial waste discharge permit; and

(b) Provide the baseline monitoring information required by 40 CFR 403.12(b), as amended from time to time. This information shall be incorporated into the application for an industrial waste discharge permit.

B. Permit application.

(1) Industrial users shall file with the pretreatment coordinator a complete and accurate industrial waste discharge permit application in the form prescribed by the Township.

(2) The application for an industrial waste discharge permit shall be fully completed and verified in writing by the industrial user or a duly authorized and knowledgeable officer, agent or representative thereof. The application shall contain, in units and terms appropriate for evaluation, such scientific or testing data or other information as may be required by the Township, and the industrial user shall pay an application fee to and shall reimburse the Township for all expenses incurred as a result of the processing of the signed application. The Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, shall have, at their discretion, the right to inspect the premises, equipment and material and laboratory testing facilities of the applicant.

(3) Notwithstanding the above, the applicant shall provide the following minimum information to the

pretreatment coordinator:

(a) Name and address of the user; name, title and telephone number of responsible official; name, title and phone number of person to contact for information about the industrial waste discharge.

(b) Description of the industry and the manufacturing processes or operations that occur there and the types of products that are produced.

(c) Applicable standard industrial classification codes for activities conducted at the facility.

(d) Statement as to whether the industry is subject to compliance with National Categorical Pretreatment Standards, and if so, which ones apply.

(e) Indication and description of the sources of or the processes that produce industrial wastewaters.

(f) Wastewater constituents and characteristics as required by the Township and as determined by a reliable analytical laboratory; sampling and analysis shall be performed in accordance with procedures established by the EPA pursuant to Section 304(g) of the Act and contained in 40 CFR 136, as amended. If the discharge is from a proposed new discharge, wastewater characteristics shall be reliably estimated in accordance with accepted procedures.

(g) Volume of industrial wastewater to be discharged to the sewerage system and the methods of measuring the same. Flow volume information shall include the time and duration of the discharge and the average daily and thirty-minute peak wastewater flow rates, including monthly and seasonal variations, if any.

(h) Description of any wastewater treatment facilities or processes used or proposed to be used to treat the industrial wastes prior to their discharge to the sewerage system.

(i) Schematic flow diagram showing the existing and proposed sources of industrial wastewater and the on-site treatment processes.

(j) The quantity of sludges removed from the industrial user's facility system and their method and location of disposal.

(k) Description of any other wastes that are removed from the industrial user's facility system, their quantities and methods and locations of disposal.

(l) List of raw materials used or stored on the premises, their material safety data sheets, their approximate quantity of usage on a monthly basis and what they are used for.

(m) Plans and specifications for a sampling manhole.

(n) A list of any additional environmental control permits held by or for the facility, such as air quality permits, RCRA permits, stormwater management permits and all other required permits.

(o) Such additional information as the Township shall require.

(4) Review and approval.

(a) The industrial waste discharge permit application shall be reviewed by the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, and if acceptable to such municipality, shall be submitted to the pretreatment coordinator for review and approval.

(b) No industrial waste discharge permit shall be issued to an industrial user whose discharge of materials to sewers, whether shown upon the application or determined after inspection and testing conducted by the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, is not in conformance

with federal, state or the Township's ordinances and resolutions. If an application is denied, the Township shall state in writing the reason or reasons for denial, and said written communication shall be delivered to the applicant, and if applicable, to the municipality to whose sewer system the industrial user is proposing to connect.

(5) If the Township denies an application for an industrial waste discharge permit, the industrial user may, within 60 days after its receipt of the Township's denial, request review by the control authority of such denial. The request for review shall be in writing and shall specify the grounds for review, and shall be accompanied by such appropriate supporting information and documents as shall be sufficient to apprise the control authority of the substance of the industrial user's position. The control authority at a public hearing shall review the industrial waste discharge permit application, the Township's written denial and such other evidence and matters as the industrial user shall present at a public hearing. It shall also consider all evidence offered by the Township or the pretreatment coordinator and any interested party. The public hearing shall take place no later than 45 days following receipt of the industrial user's written request for the review. The control authority's written decision shall be provided to the industrial user within 20 days of the close of the public hearing or hearings and shall be final.

(6) If, based on the characteristics of the industrial user's waste discharge, additional pretreatment and/or operation and maintenance procedures are required to meet any Township, municipal, state or federal pretreatment standards, the industrial user shall submit to the Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System) prior to issuance of the industrial waste discharge permit the shortest, reasonable schedule by which the industrial user will provide such additional pretreatment. The Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System) shall include a compliance schedule acceptable to the Township and/or West Goshen Township, as the case may be, in the user's industrial waste discharge permit, which shall be conditional upon compliance with timely implementation of the additional pretreatment required. The following conditions shall apply to this schedule:

(a) The schedule shall contain increments of progress in the form of dates for the commencement and completion of major events leading to the construction and operation of additional pretreatment required for the industrial user to meet the applicable pretreatment standards (e.g., hiring an engineer, completing preliminary plans, completing final plans, executing contract for major components, commencing construction, completing construction, etc.).

(b) No increment shall exceed nine months.

(c) Not later than 14 days following each date in the schedule and the final date for compliance, the industrial user shall submit to both the pretreatment coordinator and the municipality to whose sewer system it is connected a written report, including, as a minimum, whether or not it complied with the increment of progress to be met on such date and, if not, the date on which it expects to comply with this increment of progress, the reason for delay and the steps being taken by the industrial user to return the construction and implementation to the schedule established. In no event shall more than three months elapse between such progress reports to the pretreatment coordinator and the municipality to whose sewer system it is connected.

C. Permit action. A permit issued under this section may be modified, revoked and reissued or terminated for good cause, including but not limited to the following:

(1) To incorporate any new or revised federal, state or local pretreatment standards or requirements.

(2) Material or substantial alterations or additions to the discharger's operation which were not covered in its current permit.

(3) A change in any condition that requires either a temporary or permanent reduction or elimination

of the authorized discharge.

D. Permit conditions.

(1) Industrial waste discharge permits shall be expressly subject to all provisions of this article and all other applicable regulations, resolutions, user charges and fees established by the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System. Permits shall contain the following:

(a) Limits on the average and maximum wastewater constituents and characteristics, as based on applicable general pretreatment standards in 40 CFR, Part 403, as amended from time to time, categorical standards, local limits and state and local law;

(b) Requirements for submission of technical reports or discharge reports, including the information to be contained and the signatory requirements of these reports;

(c) Requirements for maintaining and retaining plant records relating to wastewater discharge as specified by the Township and affording the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, access thereto;

(d) Requirements for notification of the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, in advance of any new introduction of wastewater constituents or any substantial change in the volume or character of the wastewater constituents being introduced into the sewerage system;

(e) Requirements for notification of slug discharges;

(f) List of prohibited discharges;

(g) Statement of duration of the permit;

(h) Notification of the rules regarding transferability, if allowed;

(i) Notification of penalties provided for noncompliance;

(j) Specifications for monitoring programs which may include sampling locations, frequency of sampling, number, types and standards for tests and reporting schedule;

(k) Right of entry requirements upon the property and within the facility for which the permit is issued by authorized representatives of the Township and the municipality to whose sewer system the user is connected; and

(l) Indemnification of the Township and such municipality from all liability resulting from or on account of any discharge.

(2) Permits may also contain other requirements, including but not limited to:

(a) Limits on the average and maximum rate and time of discharge or requirements for flow regulation and equalization;

(b) Requirements for installation and maintenance of inspection and sampling facilities and pretreatment facilities;

(c) Compliance schedules; and

(d) Other conditions as deemed appropriate by the Township or the municipality to whose sewer system the industrial user is connected to ensure compliance with this article, applicable municipal ordinances or other requirements.

(3) Issuance of an industrial waste discharge permit in no way relieves the industrial user from any liability on account of its discharge into the sewerage system, whether such discharge is permitted thereby or not.

E. Permit duration and permit fees.

(1) Industrial waste discharge permits shall be issued for an initial one-year period and shall expire at the end of that one-year period unless the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, elects to revoke the permit on or before its expiration. Upon the user's payment of the requisite permit fee to the Township, renewal permits shall be issued for a period not to exceed five years upon written application of the permittee made at least 60 days prior to the permit's expiration. Subsequent permits may be issued upon payment to the Township of the requisite fee for up to five-year periods upon prior written application made to the Township at least 90 days before the permit's scheduled expiration. The terms and conditions of the permit shall be subject to modification by the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, during the term of the permit. The industrial user shall be informed of any proposed changes in its permit at least 30 days prior to the effective date of the change. However, the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, shall use their best efforts to inform the industrial user of such change at least 60 days prior to the effective date of the change, but its/their failure to do so shall not preclude or delay implementation of the required change. In the event that such changes require major changes in pretreatment by the industrial user, and the industrial user's failure to comply with the amended discharge requirements does not itself or with other failures to comply put the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, in substantial danger of violating any agreement, permit, regulation, ordinance or law, then the pretreatment coordinator may grant the industrial user a period not to exceed six months from the date otherwise required for compliance within which to effect such changes to its pretreatment facilities as are necessary to comply with the permit's terms and conditions. Upon demonstration of justifiable cause proven by the permittee within the said six-month period, the pretreatment coordinator may extend the date otherwise required for compliance for such additional reasonable period of time as he determines necessary. No extensions shall be considered or granted unless the industrial user makes written request for a time extension and submits to the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, an implementation schedule acceptable to the Township and such municipality contemporaneously with the extension request.

(2) Permit fees and renewal fees shall be established by resolution adopted and amended from time to time by the control authority and shall include but not necessarily be limited to the following: an application review fee, an administrative fee, a sampling fee, an analytical costs fee, any surcharges and/or fines and any miscellaneous expenses incurred from the purchase or utilization of any sampling apparatus and/or activities.

F. Permit transfer. Industrial waste discharge permits are issued to a specific industrial user for a specific operation. An industrial waste discharge permit shall not be reassigned or transferred or sold to a new owner, new user, different premises, different facilities or a new or changed operation without the approval of the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System. The succeeding owner or industrial user shall file a new application and, until permit or modification thereof is issued, shall comply with the terms and conditions of the existing industrial waste discharge permit and such additional permit conditions as the Township and such municipality shall require.

G. Waste characteristic change. Any industrial user who plans or becomes aware of a change in the method of operation or in the pretreatment facilities which will increase the concentration of pollutants which are regulated by this article or the volume of wastewater discharged to the sewerage system shall notify the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, of the change at least 90 days prior to such change. If required by the Township or the municipality, the industrial user shall apply for an industrial waste discharge permit that reflects the proposed changes. The new industrial waste discharge permit will be subject to a fee to reimburse the Township and such municipality for all expenses incurred as a result of the processing of the permit and permit application. Approval or denial of a new industrial

waste discharge permit shall be regulated by the procedures established hereunder for the issuance of an original permit.

H. Files. The Township shall maintain files in which copies of all industrial waste discharge permits, revisions thereto and supporting data will be filed for reference. Files shall be maintained for a period of at least five years. This period of retention shall be extended during the course of any unresolved litigation regarding the industrial user or when requested by EPA.

§ 188-47. Reporting requirements for industrial users.

A. Compliance date report under National Categorical Pretreatment Standards. Within 90 days following the date for final compliance with applicable National Categorical Pretreatment Standards or, in the case of a new source, following commencement of the introduction of wastewater into the sewerage system, any industrial user subject to National Categorical Pretreatment Standards shall submit to the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, a written report indicating the nature and concentration of all pollutants in the discharge from the regulated process which are limited by categorical standards, and the average and maximum daily flow from these process units in the user's facility which are limited by such categorical standards. The report shall state whether the applicable categorical standards are being met on a consistent basis and, if not, what additional operations and maintenance and/or pretreatment are scheduled to bring the industrial user into compliance with the applicable categorical standards. This statement shall be signed by an authorized representative of the user and, when requested by the Township, certified by a qualified professional.

B. Periodic compliance reports.

(1) Each industrial user shall submit to the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, during the months of April, July, October and January, or by such date as otherwise specified in the industrial users industrial waste discharge permit or otherwise by the Township, a complete and accurate written report, in form and content as prescribed by the Township, indicating the nature and concentration of pollutants in the discharge during the reporting period which are regulated by the industrial waste discharge permit. All monitoring data obtained for purposes of determining compliance with the industrial waste discharge permit by certified analytical techniques must be reported by the industrial user. In addition, this report, where applicable, shall include a record of all daily flows which, during the reporting period, exceeded the maximum daily flow listed in the industrial user's industrial waste discharge permit. At the discretion of the pretreatment coordinator, and in consideration of such factors as high or low flow rates, holidays, budget cycles, etc., the Township, upon written request from the industrial user, may, but shall not be required to, agree to alter the months during which the above reports are to be submitted. The report shall also contain the following certification statement signed by the authorized representative of the user:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a procedure designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the facilities proposed to be connected to the sewerage system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations relating to unsworn falsifications."

(2) The Township may impose mass limitations where the imposition of mass limitations is appropriate. In such cases, the periodic compliance report required by Subsection B(1) shall state the mass of pollutants regulated in the industrial user's discharge permit to the sewerage system. These reports shall contain the results of sampling and analysis of the discharge, including the flow and the nature and concentration, or, where requested by the Township,

production and mass of pollutants contained therein, which are limited by the applicable pretreatment standards. The frequency of monitoring shall be prescribed in the industrial users industrial waste discharge permit. All sampling and analysis shall be performed in accordance with procedures established by the EPA pursuant to Section 304(g) of the Act and contained in 40 CFR 136, and amendments thereto, or with any other test procedures approved by the EPA.

(3) For categorical industries that have mass limits as categorical standards, the Township may specify equivalent concentrations to regulate the strength of the industrial user's discharge. If concentration limits are regulated in lieu of mass discharge limits, the industrial user must provide the Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System) with the following information as part of each written compliance report:

(a) For the reporting period, the rate of production of the process for which categorical standards have been established.

(b) The average wastewater flow rate generated by the regulated production activity for the reporting period.

(c) Thirty days' notice of any anticipated change in production.

(4) The industrial wastewater discharged into the sewerage system shall be sampled and analyzed by and at the expense of the industrial user, and copies of the original laboratory reports listing the results of the analyses and the analytical methods used shall be submitted to the pretreatment coordinator and to the municipality to whose sewer system the industrial user is connected, with the industrial user's periodic compliance report required in Subsection B(1). Frequency of sampling and analyses shall be quarterly, or as otherwise specified by the industrial waste discharge permit by the Township. Unless otherwise stated in the industrial waste discharge permit, all samples are to be time composite samples for the period of discharge or for 24 hours, whichever is less, with sampling intervals of not more than one hour. The samples shall be analyzed for the substances and characteristics required by the industrial user's industrial waste discharge permit and shall be representative of the conditions occurring during the reporting period. The industrial user shall follow the proper sample preservation and analysis techniques detailed in 40 CFR 136, as from time to time amended, or other techniques approved by the Township.

(5) All records and information resulting from the monitoring activities required by the industrial waste discharge permit shall be retained by the industrial user for at least five years. This period of retention shall be extended during the course of any unresolved litigation regarding the industrial user or the Township or when requested by either the Township or the EPA.

C. Baseline monitoring report.

(1) Where an industrial user, subject to a newly promulgated National Categorical Pretreatment Standard, has not previously submitted the baseline monitoring information required by 40 CFR 403.12(b), as from time to time amended, the industrial user shall, within 180 days after the promulgation of the applicable National Categorical Pretreatment Standard, provide this information to the Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System). The report shall include all items required by 40 CFR 403.12(b).

(2) A new source, or an industrial user proposing to discharge wastes into the sewerage system that is subject to a National Categorical Pretreatment Standard, shall submit to the Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System) the baseline monitoring report required by 40 CFR 403.12(b) at least 90 days prior to commencement of discharge from the regulated process or facility.

D. Noncompliance discharge report. If sampling performed by an industrial user indicates a violation of this article, an applicable pretreatment standard or the industrial user's industrial waste discharge permit, the industrial user shall notify the pretreatment coordinator and West Goshen Township, in the

case where the user is connected to the West Goshen Township Sewerage System, within 24 hours of becoming aware of the violation. The industrial user shall also repeat the sampling and analysis and submit the results of the repeat analysis to the pretreatment coordinator and to the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, within 30 days after becoming aware of the violation.

§ 188-48. Monitoring facilities.

A. When requested by the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, all industrial users shall provide and operate, at their own expense, monitoring facilities to allow inspection, sampling and flow measurements of its industrial waste discharge. The monitoring facility should normally be situated on the industrial user's premises, but the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, may, when such a location would be impractical or cause undue hardship on the industrial user, allow the facility to be constructed in the public street or sidewalk area, subject to the issuance of proper permits for such purpose, and located so that it will not be obstructed by landscaping or parked vehicles.

B. The monitoring facility shall be constructed in accordance with plans and specifications approved by the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System. There shall be ample room in or near such facility to allow accurate sampling and preparation of samples for analysis. The facility, sampling and measuring equipment shall be maintained at all times in a safe and proper operating condition at the expense of the industrial user. The facility shall be located as to be accessible at all times to persons authorized by the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System. By obtaining an industrial waste discharge permit, the industrial user consents to the entry upon its land and facility and agrees to facilitate such entry by representatives of the Township and such municipality, and further consents to the use of the monitoring facility for observation, sampling and measuring of the wastewater discharge at all times. Construction of the monitoring facility shall be completed within 120 days following issuance of the industrial waste discharge permit.

§ 188-49. Inspection and sampling.

The Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, may inspect the facilities of any industrial user. Persons or occupants of premises where wastewater is created or discharged shall allow the Township or its representative, or West Goshen Township in the case where the user is connected to the West Goshen Township Sewerage System or its representatives, as a condition of the permit issued by the Township authorizing any discharge to the sewerage system, ready access at all reasonable times, and in the event of emergency situations posing an immediate threat to the sewerage system, to all parts of the premises, buildings and facilities for the purpose of inspection, sampling records examination and copying, or in the performance of any of their duties. The Township, such municipality and EPA shall have the right to set up on the industrial user's property such devices as are necessary to conduct sampling, inspection, compliance monitoring and/or metering operations. Where an industrial user has security measures in force which would require proper identification and clearance before entry onto their premises, the industrial user shall make necessary arrangements with its security guards so that upon presentation of suitable identification, personnel from the Township, such municipality or EPA will be permitted to enter, without delay.

§ 188-50. Pretreatment.

A. Industrial users shall provide necessary pretreatment and flow-equalizing facilities as required to

comply with this article and shall achieve compliance with all applicable National Categorical Pretreatment Standards within the time limitations as specified by the appropriate federal regulations, or as otherwise required by the Township. Any industrial user required to pretreat or flow-equalize wastewater to a level in compliance with the provisions of this article shall be provided, operated and maintained at the industrial users sole expense. Detailed plans and other materials and documents showing the pretreatment facilities and operating procedures shall be submitted to the pretreatment coordinator and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, for review before construction of the facility. The review of such plans and operating procedures shall in no way relieve the industrial user from the responsibility of modifying the facility as necessary to produce an effluent in compliance with the provisions of this article. Any subsequent changes in the pretreatment facilities, flow-equalizing facilities or method of operation shall be reported to and be reviewed and commented on by the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, prior to the industrial user's initiation of the changes.

B. The industrial user may allow a bypass which does not cause pretreatment standards to be violated, but only for essential maintenance to assure efficient operation. If an industrial user knows in advance of the need for a bypass, it shall submit prior written notice to the pretreatment coordinator and to the municipality to whose sewer system it is connected at least 10 days before the date of the bypass. The industrial user shall give oral notice of an unanticipated bypass that exceeds applicable pretreatment standards to the pretreatment coordinator and the municipality to whose sewer system it is connected immediately after an unanticipated bypass incident is brought under control, but in no event later than four hours from the time the industrial user becomes aware of the bypass. A written report shall also be provided to the pretreatment coordinator within five working days of the time the industrial user becomes aware of the bypass. The written report shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times, and, if the bypass has not been corrected, the anticipated time it is expected to continue; and, the steps taken or planned to reduce, eliminate and prevent reoccurrence of the bypass.

C. The Township shall annually publish in the local daily newspaper of largest circulation within the Township's service area a list of industrial users serviced by the Township which were in significant noncompliance with any applicable pretreatment standards or pretreatment requirements during the preceding twelve-month period.

D. All records relating to compliance with pretreatment standards and pretreatment requirements shall be made available to the Township, West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System) and the EPA upon request.

E. The Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System) shall have access to all such pretreatment facilities and flow-equalizing facilities as required by this article at all reasonable times for purposes of inspection and testing and, in the event of an emergency posing a threat to the sewerage system, at any time.

§ 188-51. Hazardous waste discharge.

A. It shall be a violation of this article and the industrial user's discharge permit for an industrial user to discharge any quantity of waste to the sewerage system, which, if otherwise disposed of, would be a hazardous waste under 40 CFR, Chapter 1, Section 261.1 et seq., Subparts A through D, as from time to time amended. In the event of an accidental discharge, the industrial user shall provide an immediate written notification of such discharge, but in no event later than four hours from the time the user becomes aware of or in the exercise of reasonable prudence should have become aware of the discharge, to the Township, to West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, to the EPA Region III Waste Management Division Director and to DEP. Failure to provide such notice shall constitute a violation of this article.

B. The notification required by Subsection A shall include the name of the hazardous waste as in 40 CFR, Chapter 1, Section 261.1 et seq., Subparts A through D, as from time to time amended, the EPA

hazardous waste number, the type of discharge (continuous, batch or other) and a certification under penalties of perjury that the industrial user has a program in place to reduce to compliance levels the volume and toxicity of hazardous wastes illegally discharged to the sewerage system. If the industrial user's discharge to the sewerage system constitutes more than 100 kilograms of such waste, the notification shall also include an identification of the hazardous constituents contained in the waste and an estimation of the mass and concentration of such constituents.

§ 188-52. Confidential information.

A. Information and data on an industrial user obtained from reports, questionnaires, permit applications, permits, notifications, monitoring programs and inspections shall be available to the public or any governmental agency upon written request unless the industrial user specifically requests in writing and is able to demonstrate to the Township's satisfaction that the release of such information would divulge information, processes or methods of production entitled to protection as trade secrets of the industrial user.

B. When requested by the person furnishing a written report, those portions of a report that have been accepted by the Township as confidential shall not be made available for inspection by the public, but shall be made available upon written request to governmental agencies for uses related to this article, the NPDES permit, state disposal system permits and/or the state or federal pretreatment programs; provided, however, that such portions of any report shall be available for use by the state or any state agency in judicial review or enforcement proceedings involving the person or industrial user furnishing the report. Wastewater constituents and characteristics will not be recognized as confidential information.

C. When information accepted by the Township as confidential is transmitted to any governmental agency by the Township, a written notification to the industrial user shall be provided by the Township listing the confidential information transmitted and the governmental entity requesting the information.

§ 188-53. Measuring volumes of wastewater.

A. The flow volume used to determine wastewater flows and surcharges shall be specified in the industrial waste discharge permit and be based on:
   (1) Direct wastewater metering;
   (2) Metered water use; or
   (3) Such other method acceptable to the Township.

B. Both the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System may, in their discretion, require that each industrial user connected to its sewer system which has been issued an industrial waste discharge permit install, calibrate, maintain and use any meter or measuring device specified therein at the industrial user's own expense. The municipality which accepts the industrial waste shall be responsible for the reading of all meters or measuring devices. The Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, shall have the absolute right, but not the duty, of reading the meters, from time to time, at its discretion. The meters and devices shall be made available for meter reading at any reasonable time and, in the event of an emergency posing a threat to the sewerage system, at any time.

§ 188-54. Enforcement.

A. Immediate suspension of discharge presenting imminent danger.
   (1) The Township and West Goshen Township, in the case where the user is connected to the West

Goshen Township Sewerage System, shall order the immediate suspension of discharge of wastewater to the sewer system when such suspension is necessary, in the opinion of the Township or West Goshen Township, as the case may be, in order to stop or prevent an actual or threatened discharge which presents an imminent danger of harm to people, to the sewerage system or to the environment, or interference ("dangerous discharge").

(2) Any industrial user notified of an order to suspend shall comply therewith immediately. In the event of a failure of the industrial user to comply voluntarily with the suspension order, the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, shall take such steps as it deems necessary to enforce compliance with the order to effect the suspension of discharge of the industrial user's wastewater into the sewerage system, including immediate severance of the industrial user's sewer connection to the Township's or to West Goshen Township's Sewerage System. The Township or West Goshen Township shall permit reinstatement of the discharge upon satisfactory proof of the elimination of the imminent and substantial danger referred to above. The industrial user shall submit a detailed written report to the Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System) describing the causes of the actual or threatened discharge and the measures taken to prevent any future occurrence within 15 days of the date of the first such discharge or threat of discharge. The Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System) shall have the concurrent right and power to suspend discharge by such industrial user to the sewerage system and to enforce the requirements of this subsection.

(3) Nothing herein shall be construed to prohibit the Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System) from enforcing this article, or any part hereof, or from enjoining and preventing the discharge of any hazardous waste or any other discharge deemed unlawful or dangerous to the sewerage system by any legal process selected by the Township and West Goshen Township (in the case where the user is connected to the West Goshen Township Sewerage System), including but not limited to an action or actions at law or in equity for injunctive relief and damages, administrative enforcement proceedings, criminal enforcement proceedings authorized by any federal or state statute or law, or through any other authorized legal proceeding. All remedies of the Township and West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, shall be cumulative.

B. Termination of service. Any user who violates any provision of this article, any regulation promulgated by the Township pursuant to this article or any enabling legislation, any resolution promulgated by the Board of Supervisors pursuant to or related to this article, any applicable state or federal regulations or an industrial waste discharge permit or any condition thereof shall be subject, in addition to any civil or criminal penalties which may be imposed, to severance of its sewer connection to the sewerage system, termination of its sewage service and revocation of its industrial waste discharge permit.

C. Notification of violation. Whenever the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, finds that the industrial user has violated or is violating this article, an industrial waste discharge permit or any prohibition, limitation, condition or requirements contained herein, or has failed to timely provide the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, with the information needed to accurately determine compliance with any pretreatment standard or pretreatment requirement, the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, or both, may serve upon such person or industrial user who is in violation a written notice of violation. The notice may require a response in the form of a plan, explanation, compliance schedule or other appropriate response within a specified time period. Compliance with any such requirement shall be mandatory.

D. Legal action by municipalities. If any industrial user violates the provisions of this article, Township, federal or state pretreatment standards or pretreatment requirements, its industrial waste discharge

permit, any prohibition, limitation, condition or requirements contained therein or herein or any order issued by the Township or other governmental authority having jurisdiction related to the sewerage system or the sewer service of the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, either the Township or West Goshen Township, in the case where the user is connected to the West Goshen Township Sewerage System, or both, may commence an action or actions at law or in equity for appropriate legal and/or equitable relief in the Court of Common Pleas of Chester County, and may, in addition, take such other enforcement action as provided for in this section.

§ 188-55. Enabling regulations.

As a precondition to the Township's acceptance of sewage effluent containing industrial wastewater from another municipality, each such municipality connected to the sewerage system shall, within 90 days after adoption of this article, enact regulations imposing the discharge restrictions (and require compliance with industrial waste discharge permits), charges, reporting and monitoring requirements no less stringent than those set forth in this article on all users within its jurisdiction, and establishing procedures for compliance with this article. Such requirement shall be embodied in a written agreement between the Township and such municipality. All such regulations so adopted shall be amended within 60 days, as necessary, to impose the same standards and requirements as those imposed by the Township through amendment of this article. Such municipality shall, upon adoption of the required regulations, give written notice to all commercial and industrial dischargers connected to the municipality's sewerage system of all of the regulatory compliance requirements related to industrial waste discharge permits.

§ 188-56. Civil penalties for industrial users.

A. The Township may establish, by resolution adopted by the Board of Supervisors, a recommended schedule of civil penalties which may be imposed by the Township against any industrial user who violates a provision of this article or its industrial waste discharge permit that is in significant noncompliance or which fails to respond timely and adequately to any notice of violation issued by the Township in accordance with the Township's civil assessment policy. In assessing such penalties, the Township shall provide the noncomplying industrial user with the opportunity to show cause why a civil penalty pursuant to § 188-58 hereof should not be assessed. Notice shall be served upon the industrial user specifying the time and place of a hearing to be held by the Township's Board of Supervisors, or a hearing officer designated by the Board for that purpose. Notice of the hearing shall be served by the Township's administrative staff upon the industrial user and any other party in interest at least 10 days before the hearing by regular United States Mail, postage prepaid.

B. In furtherance of any such proceeding, the Board or hearing officer, as the case may be, shall have the following powers:
   (1) Issue in the name of the Township notices of hearings requesting the attendance and testimony of witnesses and the production of evidence relevant to any matter involved in such hearings;
   (2) Issue subpoenas and take the evidence; and
   (3) Make findings of fact, conclusions of law and render a decision and order, which may include the imposition of a civil penalty or such other order as the Board shall direct.

C. Testimony at the hearing shall be under oath and recorded stenographically. A transcript shall be made available to any party to the proceeding upon payment of the charges therefor. All other administrative costs of the proceedings, including but not limited to stenographer attendance fees, advertising, postage and notices and similar costs, shall be paid for by the user, who shall deposit with its request for hearing a deposit escrow fee of $1,000 from which the administrative fees shall be paid. Any balance remaining after payment of all such costs shall be returned to the user requesting the hearing.

§ 188-57. Injunctions against violations of pretreatment standards.

The Township may seek injunctive relief in a proceeding in equity for the prevention, abatement or termination of any prohibited discharge to the sewerage system, for a violation of any pretreatment standard or for violation of any other provision of this article in any of the following circumstance. In any such proceeding, the Township may seek to collect any civil penalties assessed, or unpaid, pursuant to §§ 188-56 and 188-58 hereof.

A. A discharge from an industrial user presents an imminent danger of substantial harm to the sewerage system, Township personnel, the environment or the public or imperils or results or may result in a violation of any federal or state permits held by the Township or the West Goshen Township Sewer Authority relating to the use, operation and maintenance of the sewerage system.

B. A discharge from an industrial user presents an imminent or substantial endangerment to the environment.

C. A discharge from an industrial user causes the Municipal Authority or the West Goshen Township Sewer Authority to violate any condition of their NPDES permit.

D. An industrial user has shown a lack of ability or intention to comply with a pretreatment standard.

§ 188-58. Violations and penalties.

A. Fines to be established by Township and by municipalities. As a precondition to the Township's acceptance of sewage effluent containing industrial wastewater from another municipality, each municipality that discharges or is connected to the sewerage system shall, within 90 days of the adoption of this article, enact an ordinance which provides that any industrial user who is found to have violated the ordinance specified by § 188-55 hereof shall be liable to a fine of up to $1,000, together with the costs of prosecution and the municipality's reasonable attorney's fees, for each offense in a criminal enforcement proceeding commenced before a District Justice. Each day on which a violation shall occur or continue shall be deemed a separate and distinct offense. Such requirement shall be embodied in a written agreement between the Township and such municipality. In addition to all other remedies and penalties provided for in this article, the Township may commence and prosecute an enforcement action before any District Justice for a violation of this article as provided for in this section wherein the violator shall be subject to the fine, costs and fees provided for herein; provided, however, that should any violation of this article constitute a violation of the Sewage Facilities Act, a District Justice shall be authorized to impose a fine of up to $5,000, together with the costs of prosecution and the municipality's reasonable attorney's fees, for each such offense.

B. Action to enforce municipalities' ordinances applicable to any user. Each municipality shall, at the direction of the Township, take any action permitted by law or in equity to enforce any ordinance enacted pursuant to § 188-55 or 188-58A of this article.

C. Civil penalties for violations by industrial users. To the extent that any provisions of this article are enabled by the Pennsylvania Sewage Facilities Act, Act of January 24, 1966, P.L. (1965) 1535, as amended, any industrial user who violates any substantive or procedural provision of § 188-40 et seq. hereof or any term or condition of any industrial waste discharge permit may, in addition to all other civil and criminal penalties authorized by this article, be assessed a civil penalty of up to $5,000 for each such violation, as is determined by the Township depending upon the severity of the violation, pursuant to the procedures and standards set forth in Section 13.1 of the Sewage Facilities Act, 35 P.S. § 750.13a and 13b(b). In addition, the Township may assess against and collect from such violator the cost of damages caused by such violation and the cost of correcting the violation. Each violation for each separate day shall constitute a separate and distinct violation. Notwithstanding the foregoing, a single operational upset which gives rise to simultaneous violations shall be treated as a single violation.

D. Uses of civil penalties collected by Township. Civil penalties collected pursuant to this section shall be placed in a restricted account and shall only be used for the repair of damage and any additional maintenance needed or any additional costs imposed as a result of the violation for which the penalty was imposed, to pay any penalties imposed upon the Township by the federal or state governments for violation of pretreatment standards, for the costs incurred by the Township to investigate and take enforcement action that resulted in a penalty being imposed and for the monitoring of discharges in a pretreatment program. Funds remaining in the restricted account after the foregoing uses have been met may be used for capital improvements to the Township's sewerage system.

APPENDICES

Appendix A East Goshen Township Service Area Plans

ITEM 1 - EXECUTIVE SUMMARY

Flow from Willistown Township is conveyed to the East Goshen Township sanitary sewer system at three (3) locations. This flow is ultimately treated at the Ridley Creek Wastewater Treatment Plant. The three locations are Line Road north of Paoli Pike, Willow Pond Road, and Wyllpen Place west of Dutton Mill Road. Four (4) homes are connected on Line Road; fourteen (14) homes are connected on Willow Pond Road; and two (2) homes are connected on Wyllpen Place. The maps included in Appendix A show the locations of the properties providing flow to East Goshen Township.

The total number of Equivalent Dwelling Units (EDUs) Connected at the end of 2018 was twenty (21). At 262.5 gallons per day (GPD) per EDU, the estimated average flow for the twenty-one (21) homes is 5,250 GPD.

The homes along Line Road and Wyllpen Place are connected to sanitary sewers owned and operated by East Goshen Township.

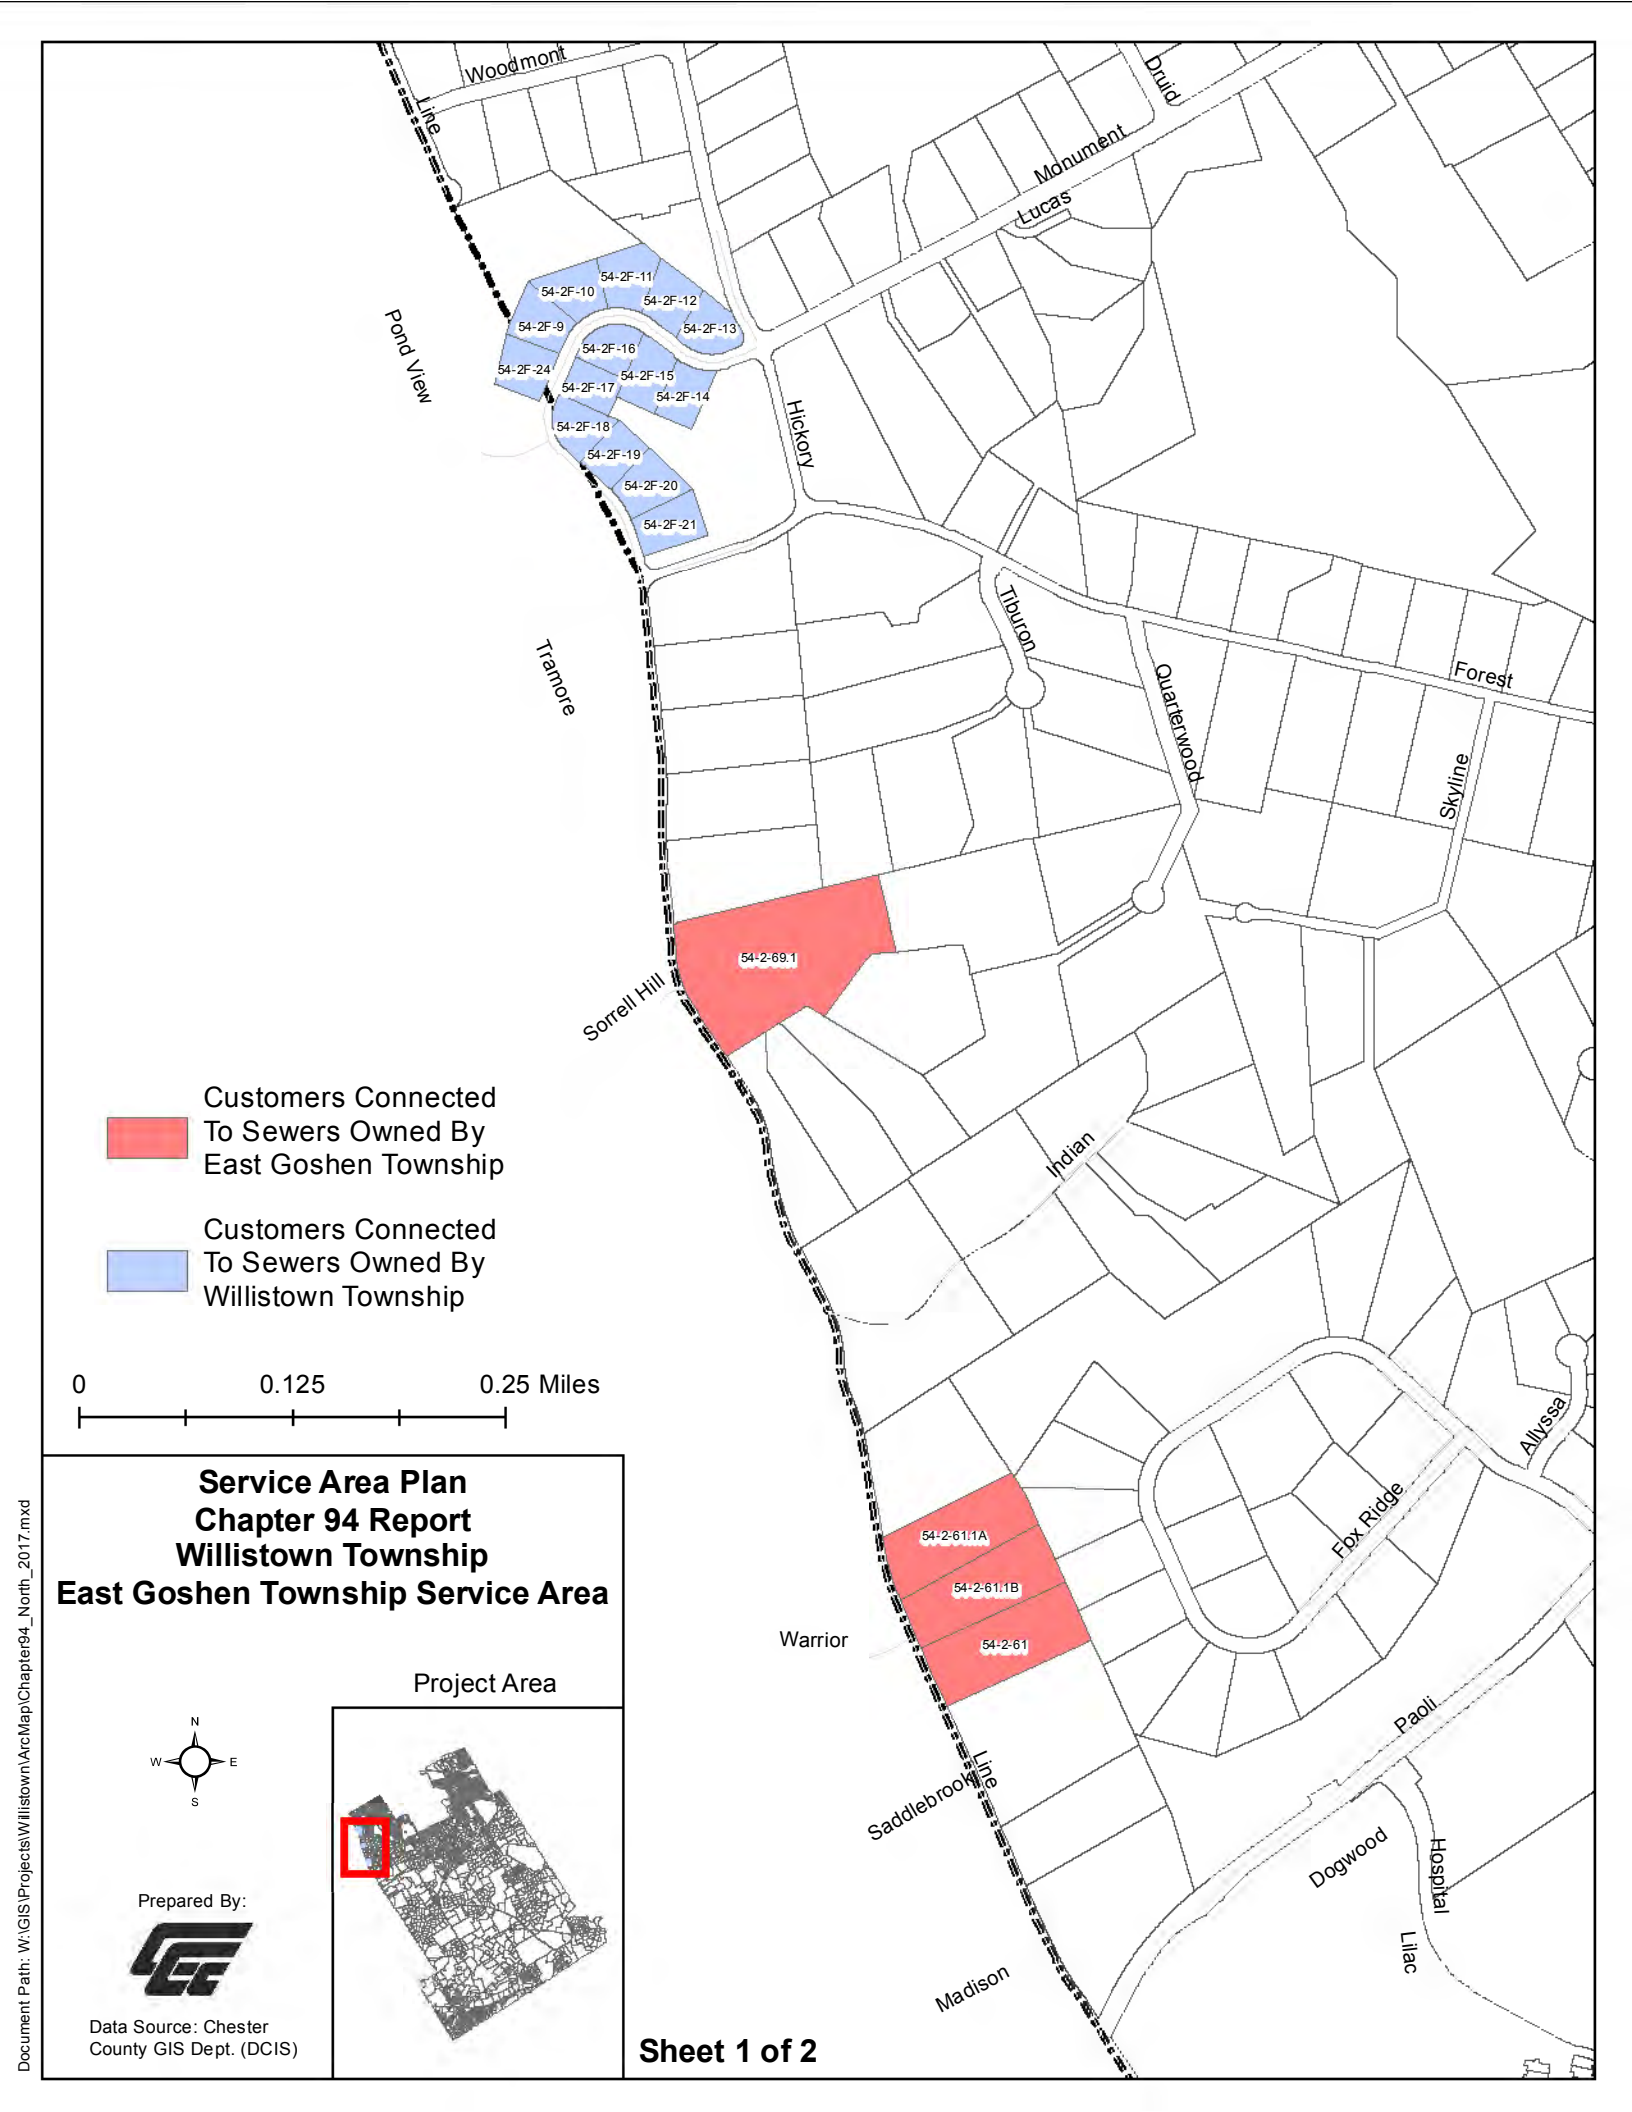
The sanitary sewer in Willow Pond Road is owned and operated by Willistown Township. The flow is conveyed to sewer in Pond View Lane, which is owned and operated by East Goshen Township.

ITEM 2 - SEWER EXTENSIONS

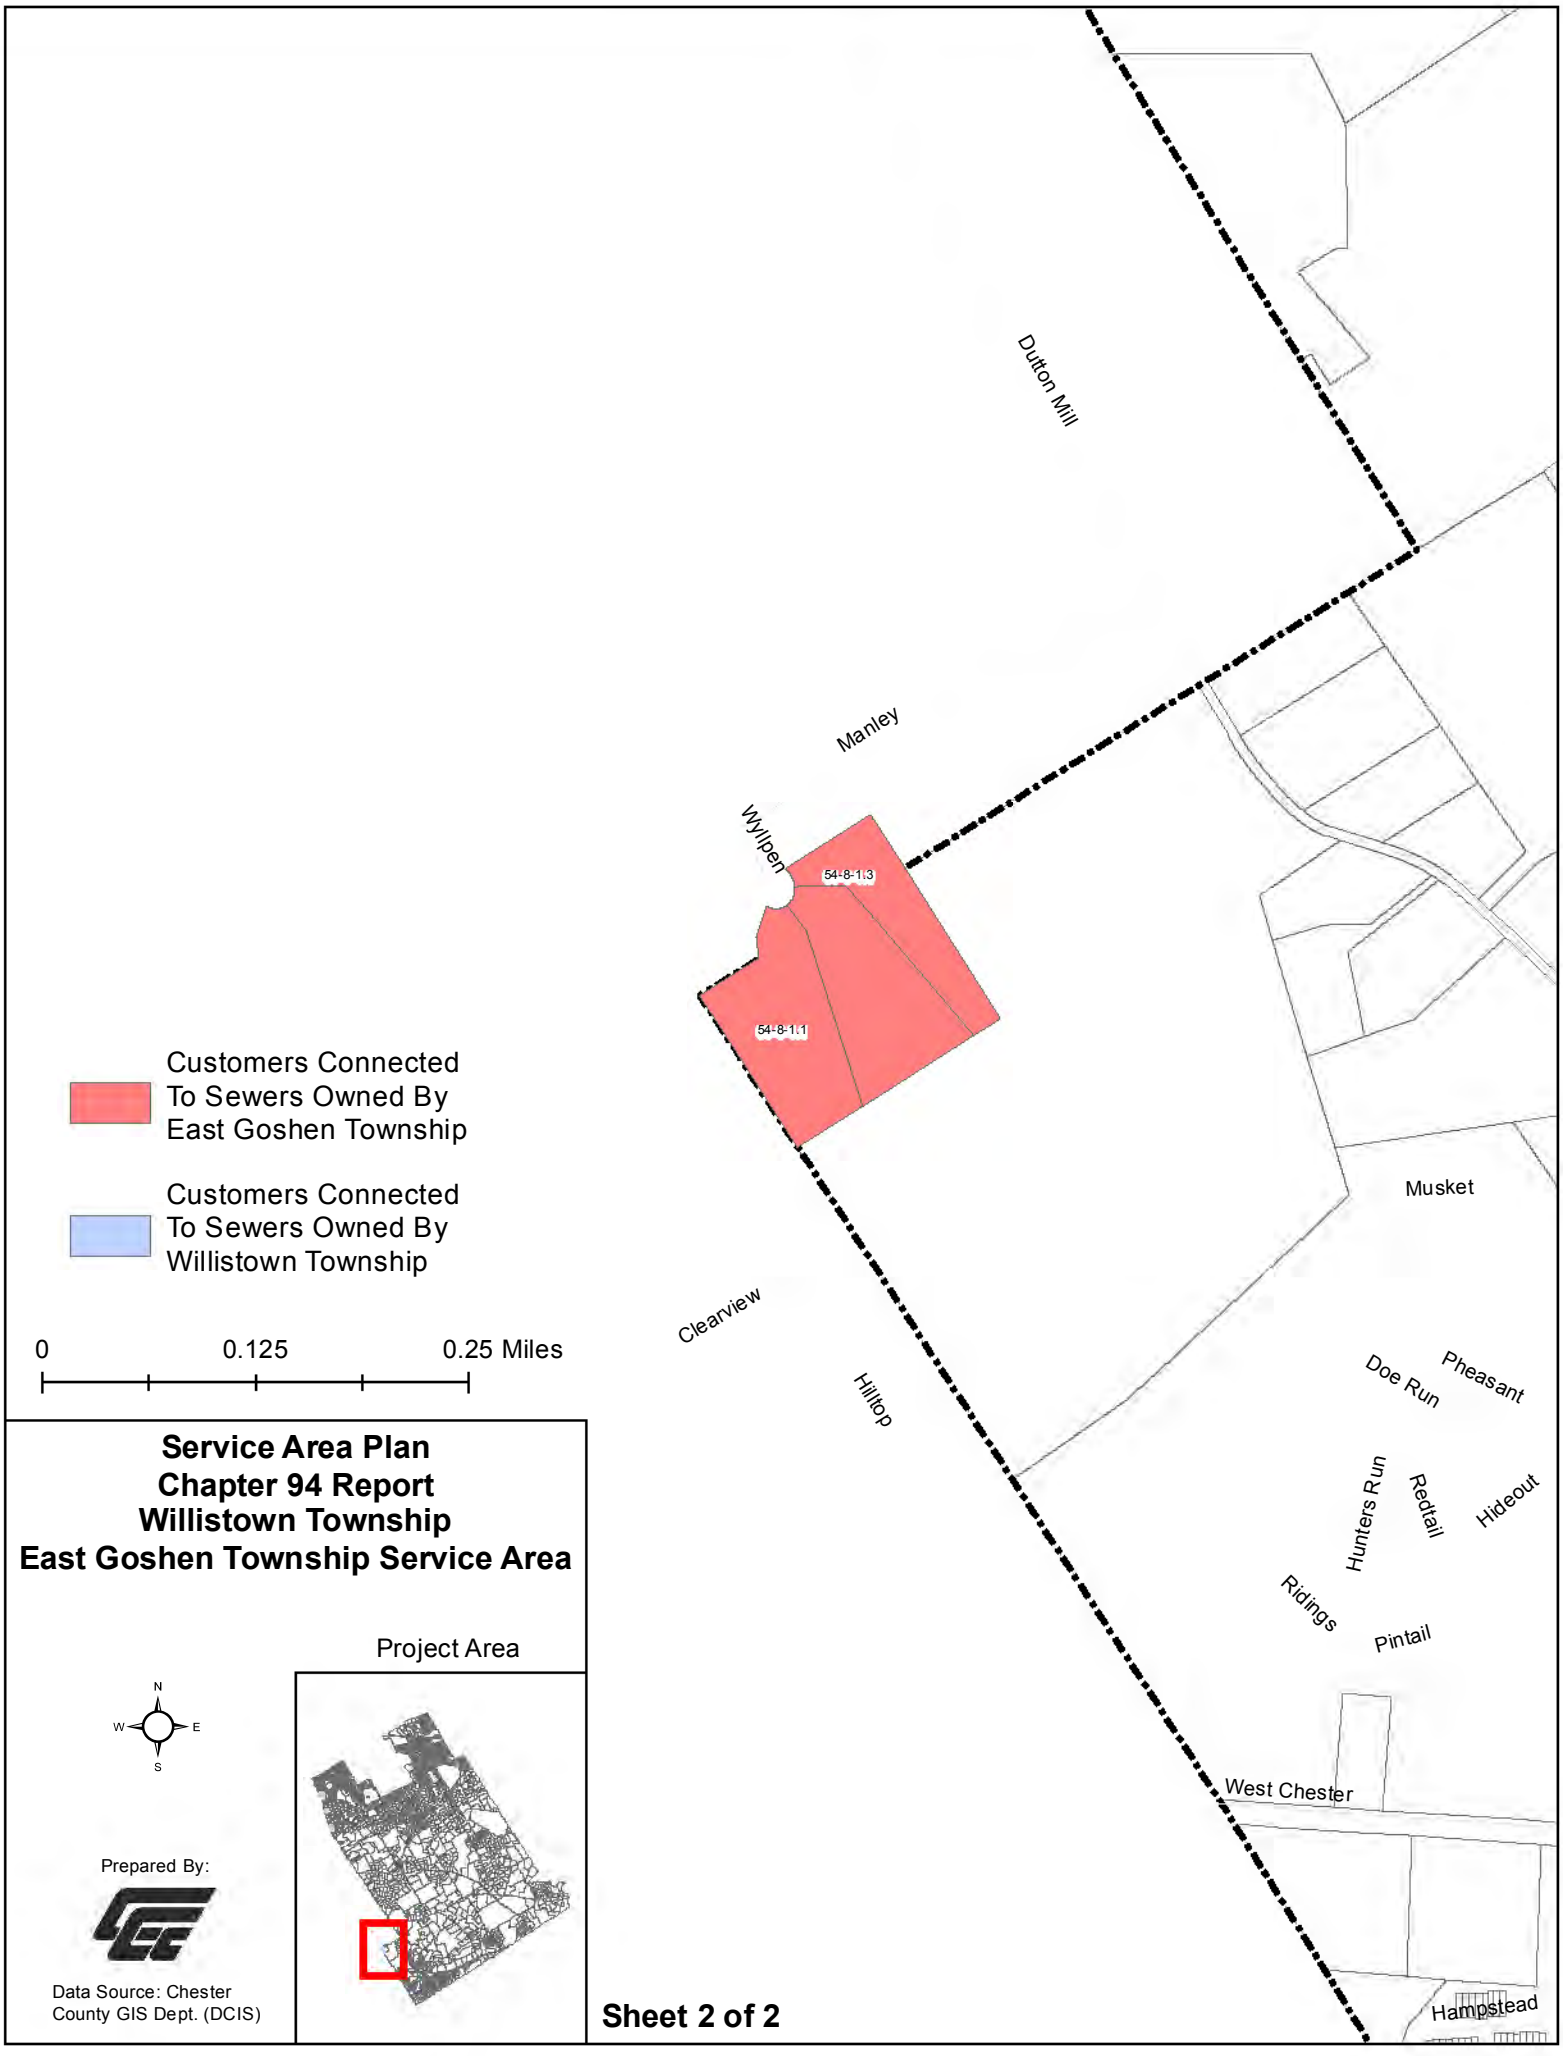
There were no sewer extensions during 2018. Willistown Township is not currently planning any further sewer connections to East Goshen Township.

ITEM 3 - SEWER SYTEM MAINTENANCE

Willistown Township performs basic monitoring and maintenance on the sewer in Willow Pond Road. This sewer is in good condition with no sign of inflow/infiltration. Due to the low number of homes connected to the system, the flows are not metered or sampled. Flows can be estimated from water meter readings.



Willistown Township is not responsible for maintenance of the sewer connections on Line Road or Wyllpen Place.



ITEM 4 - OVERALL SEWER SYSTEM CONDITION

The system is in good condition. There are no portions of the system where rehabilitation or cleaning is needed, or where conveyance capacity will be exceeded in the next five (5) years.

VALLEY FORGE SEWAGE TREATMENT PLANT AGREEMENT

THIS AGREEMENT, dated as of the first day of November, A.D. 1970, by and between VALLEY FORGE SEWER AUTHORITY, a joint municipality authority organized by the Townships of Schuylkill, East Pikeland, and Charlestown and operating under the provisions of the Municipality Authorities Act of 1945, Act of May 2, 1945, P.L. 382, its supplements and amendments (hereinafter referred to as the "Authority" and a "municipality"), the TOWNSHIPS OF SCHUYLKILL, EAST PIKELAND, CHARLESTOWN, EAST WHITELAND, TREDYFFRIN, WILLISTOWN, and EASTTOWN, second class townships (each of which is hereinafter called "Township" and "municipality"), the BOROUGH OF MALVERN (hereinafter called "Borough" and "municipality"), MALVERN MUNICIPAL AUTHORITY, EAST WHITELAND MUNICIPAL AUTHORITY, TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY, and EASTTOWN MUNICIPAL AUTHORITY (each of which is hereinafter called "municipality authority"), all of which are municipality authorities or political subdivisions within the County of Chester, Commonwealth of Pennsylvania.

WHEREAS, the parties have provided for or constructed, or are about to provide for or construct sanitary sewer collection systems; and

WHEREAS, the parties desire to dispose of sewage described hereinafter by a Treatment Plant to be located on the Schuylkill River in Schuylkill Township, Chester County, Pennsylvania; and

WHEREAS, Malvern, Tredyffrin, East Whiteland, and Easttown have each formed a municipality authority; and

WHEREAS, Willistown Township is about to form a municipality authority and all parties desire that it become a party upon its formation; and

WHEREAS, all parties desire that Valley Forge Sewer Authority shall operate said Treatment Plant but desire to exercise

control over major decisions concerning the design, construction, operation, and expansion of said Treatment Plant; and

WHEREAS, various economies will inure to the benefit of each party from the joint construction and use of the Treatment Plant.

NOW, THEREFORE, in consideration of the mutual covenants herein contained, the parties hereto, intending to be legally bound hereby, covenant and agree as follows:

ARTICLE I

JOINT BOARD AND CONSTRUCTION OF TREATMENT PLANT

1.01 Joint Board. In order to ensure that all parties hereto shall have voice and information concerning the financing, construction, and operation of the Treatment Plant, a Joint Board constituted as set forth in Exhibit "A" attached hereto is hereby created which shall have the powers and duties set forth hereinafter and in said Exhibit "A".

1.02 Engineering Services. Each party hereby approves a contract dated March 20, 1969, between Authority and Buchart-Horn, Consulting Engineers, York, Pennsylvania, for engineering services necessary to design for the use of the municipalities an eight MGD Treatment Plant to be located on the Schuylkill River in Schuylkill Township, Chester County, Pennsylvania. A copy of said contract having been delivered to each party, the municipalities and municipality authorities set forth in Exhibit "B" agree to share the cost of such engineering design in accordance with the percentages set forth in Exhibit "B" attached hereto. The parties hereto likewise agree to share the cost of surveys and test borings incident to the aforesaid design in accordance with said percentages. When payments for such engineering design, surveys, and test borings fall due from time to time, each such municipality, upon receipt of a copy of an invoice from the Consulting Engineers, shall

promptly pay or cause to be paid to Authority for delivery to the Consulting Engineers (or, upon request of Authority, directly to the Consulting Engineers) that percentage of such invoice as is set forth in said Exhibit. The Joint Board shall make arrangements for collecting said payments. Nothing herein contained shall be construed so as to make a party hereto (other than the Authority) a party to the said contract between the Authority and the Consulting Engineers. If any payment required of a party hereto under this Section 1.01 is not made within thirty (30) days of the receipt of the aforesaid copy of invoice, interest shall accrue at the rate of six per cent (6%) per annum from such date.

1.03 Design Capacity; Construction of Treatment Plant. For each municipality listed in Exhibit "C", said Treatment Plant shall provide the design capacity (reserved capacity) set forth after the name of each municipality in said Exhibit. Authority, in accordance with said contract with the Consulting Engineers, shall cause plans and specifications for said Treatment Plant to be completed. Authority, upon receipt of capital contributions as provided in Article II hereof, shall award construction contracts and cause the Treatment Plant to be constructed with reasonable dispatch, all in accordance with said plans and specifications and sound engineering principles.

1.04 Review and Inspection. Throughout the term of this Agreement, Authority shall cause the Consulting Engineers to make available at reasonable times and places any information concerning the design, construction, and operation of the Treatment Plant reasonably requested by the Joint Board. Members of the Joint Board and the consulting engineers, employees and representatives of any party shall have the right at all reasonable times during construction and thereafter to inspect the construction and operation of the Treatment Plant and all records of Authority in respect thereof. The Authority, at reasonable times, shall receive and

consider the opinions, comments and suggestions of the Joint Board, of any party's consulting engineer and of the representatives of any party.

1.05 Date of Completion of Treatment Plant. Authority and the Joint Board shall make every reasonable effort to cause the Treatment Plant to be completed with reasonable dispatch.

ARTICLE II

CAPITAL CONTRIBUTIONS

2.01 Percentages. Subject to limitations hereinafter provided, each of the municipalities or municipality authorities listed in Exhibit "D" attached hereto (hereinafter referred to in this Article II as the "municipalities") shall pay the percentage of the total project cost of constructing the Treatment Plant set forth after its name in Exhibit "D" (said percentages being referred to hereinafter as "said percentages"). The estimated total project cost of constructing the Treatment Plant is set forth in Exhibit "D". The total project cost of constructing the Treatment Plant shall include construction contract payments, land costs, engineering, surveying, boring and construction supervision fees and expenses (other than those paid for under Section 1.02 hereof), legal fees incident to the construction (including preparation and review of documents needed before construction can commence), a reasonable contingency fund and all other charges, costs and expenses incident to such construction and which are properly chargeable thereto under sound accounting practice but excluding (i) financing costs and (ii) all costs and expenses properly chargeable to the Authority for construction of its sewage collection system under sound accounting practice. Allocation of costs and expenses between the cost of constructing the Treatment Plant and the cost of constructing said collection system shall be subject to adjustment upon

audit as provided for hereinafter.

2.02 Payment of Capital Contributions. No capital contribution in respect of construction shall be due hereunder unless prior to the date of payment plans and specifications for the Treatment Plant and revisions thereof, if any, have been approved by the Joint Board. Disapproval may be based only on sound engineering reasons. Within sixty (60) days of the date on which construction bids are received by the Authority (or, in the event of increased costs requiring approval pursuant to Section 2.03 hereof, within sixty [60] days of approval pursuant thereto), time being of the essence of this Agreement, each of said municipalities listed in Exhibit "D" shall pay to Authority the total of (i) the share of the estimated total project cost of constructing the Treatment Plant set forth in dollars after its name in Exhibit "D", (ii) said percentage of the amount by which the total project cost of constructing the Treatment Plant as stated by the Consulting Engineers after the receipt of construction bids exceeds the estimate set forth in Exhibit "D", up to an increase of fifteen (15%) per cent of said estimate, and (iii) such amount as may be due pursuant to the next succeeding Section hereof.

2.03 Change in Project Cost. In the event, after receipt of construction bids, the total project cost of constructing the Treatment Plant (before deducting any federal or state grant) is increased by more than fifteen (15%) per cent of the estimate set forth in Exhibit "D", and such a revision is approved by the Joint Board (with approval being deemed to have been given if disapproval is not given in writing within thirty [30] days of the date construction bids are received by the Authority), each of the municipalities listed in Exhibit "D" shall pay said percentage of said increase to Authority by the time set forth in the preceding Section. In the event, after receipt of construction bids, the total project cost of constructing the Treatment Plant is less than the estimate set forth in Exhibit "D", the payment to be made by each such municipality

under Sections 2.01 and 2.02 hereof shall be reduced proportionately and refunds of payments made under Section 1.02 shall be made proportionately.

2.04 Grants. Each party authorizes and directs the Authority on behalf of each such municipality or municipality authority from time to time to apply for and accept any one or more grants in aid towards any Treatment Plant construction costs and any Treatment Plant operating costs of any nature to be used in accordance with this Agreement. All federal and state grants received by any such municipality properly allocable to and to be applied to the project cost of constructing the Treatment Plant shall be paid to Authority and the total payment to be made by each municipality under Sections 2.01 and 2.02 hereof shall be reduced proportionately by such grant or grants.

All federal and state grants received by the Authority which are properly allocable to the project cost of constructing the Treatment Plant shall be applied by the Authority to the payment of such project cost or in reimbursement of expenditures so made and the total payment to be made by each municipality under Sections 1.02, 2.01, and 2.02 hereof shall be reduced accordingly. If any such federal or state grants shall have been awarded to the Authority and an agreement with the appropriate federal or state agency executed on or before the date capital contributions are to be made under Section 2.02, then such total payment to be made by each municipality shall be reduced appropriately. If any such federal or state grant is awarded or the agreement with the appropriate federal or state agency executed by the Authority after the aforesaid payments have been made by the municipalities under Section 2.02, such grants shall be applied in the computation of any surplus or deficiency of capital contribution pursuant to Section 2.03 hereof.

All federal and state contributions or grants in aid

received by any of said municipalities properly allocable to and to be applied towards any cost of operation, maintenance, repair, replacement, or other expenses relating to the Treatment Plant shall be paid over to Authority and shall be deducted in determining actual annual operating expenses of the Treatment Plant in accordance with Section 4.07 hereof.

2.05 Construction Fund. Authority shall deposit all amounts delivered by all parties to it pursuant to this Article, together with Authority's share and all amounts received in payment of federal and state grants allocable to the project cost of constructing the Treatment Plant, in a special Treatment Plant Construction Fund (hereinafter called "Construction Fund"). Such Construction Fund moneys shall be held and invested by a Trustee selected by Authority subject to the approval of the Joint Board and to the extent not insured by the Federal Deposit Insurance Corporation or other federal agency, or invested as hereinafter provided, shall be continuously secured by the pledge of direct obligations of the United States of America or of the Commonwealth of Pennsylvania having an aggregate market value (exclusive of accrued interest) at all times at least equal to the amount of such moneys. Such moneys may be wholly or partially invested by said Trustee only in direct obligations of the United States of America and certificates of deposit which shall mature or shall be subject to redemption at the option of the holder not later than one year from the date of such investment. Any securities so purchased shall be a part of the Construction Fund. The interest and income received from time to time upon investments and any profit realized or loss sustained from the sale of such securities shall be added or charged to the Construction Fund and such interest, income, profit or loss shall be considered in the computation of any surplus or deficiency as provided in Section 2.08. Moneys paid pursuant to this Agreement shall at all times be segregated in books of account

from Authority moneys received for any other purpose.

2.06 Construction Fund Requisitions. Authority agrees that payments from the Treatment Plant Construction Fund shall be made only upon requisitions, copies of which shall be available to the Joint Board, duly executed by the Treasurer, Assistant Treasurer or other designated representative of the Authority stating: (a) the amount requested; (b) the obligation for or on account of which the requisition is made, showing separately the total obligation, the amount already paid, if any, and the balance remaining to be paid; (c) the person to whom the payment shall be made and his address; (d) that the item for which requisition is made has not been paid; and (e) that, with respect to such item, there are no vendors', mechanics' or other liens or secured transactions which will not be discharged by such payment.

In the case of payments under construction contracts, such requisitions shall also contain a certificate of the Consulting Engineers certifying approval of the requisition and further certifying that such obligation has been properly incurred and is then due and unpaid and that insofar as such obligation was incurred for work, materials, supplies or equipment, such work was actually performed or such materials, supplies or equipment were actually installed in or about the construction of the Treatment Plant, or delivered at the site of the work for that purpose, or delivered for fabrication at the place approved by the Consulting Engineers; and that all work done and materials, supplies or equipment furnished for which such obligation was incurred are, in the Consulting Engineers' opinion, in accordance with the plans and specifications.

2.07 Change Orders. Authority agrees to notify the Joint Board of all changes or alterations in the Treatment Plant plans and specifications. No change order concerning said plans and specifications in excess of $25,000 shall be approved by Authority unless it has previously been approved by the Joint Board;

provided, however, that if written notification of disapproval is not received by the Consulting Engineers within ten (10) days of the date request for approval of any change order is delivered to an officer of the Joint Board, such change order shall be deemed to have been approved by the Joint Board. Authority further agrees that, without the prior approval of the Joint Board, no change or alteration will be made in any of the plans and specifications of the Consulting Engineers, in respect to the Treatment Plant, which will cause the cost of construction to exceed the amount available in the Treatment Plant Construction Fund.

2.08 Distribution of Construction Fund. Upon completion of the construction of the Treatment Plant, Authority shall deliver to the Joint Board and to each party a certificate of the Consulting Engineers stating: (a) the fact of such completion and (b) in reasonably itemized form, the actual project costs of constructing the Treatment Plant (i) after deducting therefrom the unexpended contingency fund, if any, and the amount of any applicable federal or state grants paid into the Construction Fund and not previously used to reduce payments in accordance with Section 2.04 and (ii) after making appropriate adjustments in respect of net income, gain or loss from investments. If any municipality's share of the actual cost of constructing the Treatment Plant after adjustments (i) and (ii) is less than the total amount deposited by it as required by this Agreement, the excess of such deposits shall forthwith be refunded to such municipality if no municipality, within sixty (60) days of receipt of said certificate, has requested a readjustment or audit, and, in the event of such a request, shall be refunded promptly after the matter is resolved. A deficiency, if any, incurred in accordance with this Agreement shall be charged to and paid by each such municipality in said percentages and shall be due within thirty (30) days of notice to pay, and if not then paid shall be subject to interest at the rate of six per cent (6%) per annum

until paid. Prior to completion of the Treatment Plant, Authority may make one or more interim distributions on the basis of information then available, which distributions shall be subject to adjustment at the time of final distribution.

2.09 Audit of Project Cost. The said certificate of the Consulting Engineers as to the actual project cost of constructing the Treatment Plant and the records from which it is compiled shall be audited by a certified public accountant selected by the Authority with the approval of the Joint Board, and the expense of such audit shall constitute part of the project cost.

ARTICLE III

DELIVERY AND ACCEPTANCE OF SEWAGE

3.01 Delivery. Each party, at its own expense shall, during the term of this Agreement, cause all sewage emanating from its area designated by diagonal lines on the attached map marked Exhibit "E" to be delivered to the Treatment Plant and may cause so much of the sewage emanating from other areas to be delivered to the Treatment Plant as it desires from time to time. Except as permitted pursuant to Article VII hereof, no municipality or municipality authority shall at any time exceed the capacity then reserved by it.

3.02 Acceptance. Each party operating a sewage collection system shall commence delivering its sewage to the Treatment Plant as soon as practicable after (a) the Treatment Plant is sufficiently complete to provide service (as certified by the Consulting Engineers) and (b) the Valley Creek Trunk Sewer is sufficiently complete to provide service (as certified by the consulting engineers engaged by Tredyffrin Township Municipal Authority). Authority, as soon as practicable after said conditions are met, shall permit connections at the locations shown on Exhibit "E" (and at such other

locations as Authority may agree to, which agreement shall not be unreasonably withheld) and shall accept sewage for treatment and disposal subject to the terms and conditions herein set forth.

ARTICLE IV

OPERATING EXPENSES OF TREATMENT PLANT

4.01 Proportion. Authority, Borough and the Townships of East Whiteland, Tredyffrin, Willistown, and Easttown (which in this Article are referred to as "said municipalities") shall share the operating expenses of the Treatment Plant (as defined in Section 4.06) as follows: the proportion that the volume of sewage (determined as provided herein and by other agreement of the parties) emanating from each said municipality bears to the total volume of sewage received at the Treatment Plant (determined by meter as hereinafter provided) shall be used in calculating the amount that such municipality shall pay for sewage treatment services. Operating expenses of the Treatment Plant for the first two years of operation shall be paid as set forth in Section 4.13 hereof.

4.02 Estimates of Volume of Sewage. In order to provide Authority with working capital for payment of operating expenses of the Treatment Plant, at least one hundred twenty (120) days prior to the end of the first two years of operation of the Treatment Plant, and at least one hundred twenty (120) days prior to the start of each calendar year ~~thereafter~~ during the term of this Agreement, each said municipality shall supply or cause to be supplied to Authority and the Joint Board an estimate of the volume of sewage to be discharged from its sewage collection system and to be delivered to the Treatment Plant during the next succeeding calendar year (or portion of a calendar year remaining after the end of the first two years of operation).

4.03 Estimated Treatment Plant Operating Expenses.

Within sixty (60) days after receipt of the estimates provided under the preceding Section, Authority shall prepare, subject to the approval of the Consulting Engineers and the Joint Board (which may approve or disapprove [for reasonable cause] individual items of the budget), and furnish to each of the said municipalities, a budget setting forth (a) the estimated annual operating expenses of the Treatment Plant (including at least ten per cent [10%] for contingencies) and (b) the share of each said municipality of such operating expenses (the share of each said municipality being an amount which is in the same ratio to the total of such expenses as the estimated volume of sewage from such municipality is to the total estimated volume of sewage from all of the said municipalities). If at any time it appears on the basis of past or current meter readings that the estimate of a municipality is substantially inaccurate, the Authority, subject to the approval of the Joint Board, may revise said estimate and such a municipality shall promptly make payments in accordance with the revised estimate. In the event of an unusual contingency, an upward revision of the budget may be made by the Authority with the approval of the Joint Board, which approval shall not be withheld unreasonably; provided, however, that the budget may be exceeded without such prior approval of the Joint Board in an emergency directly affecting operation of the Treatment Plant and certified by the Consulting Engineers to require immediate action. Each such municipality shall make payments in accordance with the revised budget within sixty (60) days of receipt of notice thereof. In the event a municipality is not able legally to obtain funds with which to pay all of its share of the budget increase, any unpaid amount shall be paid by it in the following year together with interest at the rate of six per cent (6%) per annum until paid.

4.04 Payments on Account of Estimated Operating Expenses. On or before each January 1, April 1, July 1, and October 1 during the term of this Agreement, each such municipality shall pay to Authority (out of legally available current revenues and from sewer rentals) one-quarter (1/4) of its share of the estimated annual operating expenses of the Treatment Plant as determined in accordance with the preceding Section (prorated if the two-year period referred to in Section 4.01 ends during rather than at the start of a quarter). Amounts not paid when due shall be subject to interest in the amount of six per cent (6%) per annum of the amount due. Said interest shall be due from time to time upon the receipt of invoices from Authority. In the event of a default in payment under this Section, Authority may borrow all or part of the amount of such payment due hereunder and may use said interest to pay, or reimburse itself for paying, interest on such borrowed funds. Interest not so used shall be treated as a deduction under Section 4.07 hereof in determining actual annual operating expenses of the Treatment Plant.

Authority shall deposit all moneys delivered by all parties to it pursuant to this Article, together with Authority's share and all amounts received in payment of federal and state contributions or grants in aid to be applied towards any cost of operation, maintenance, repair, replacement or other expenses relating to the Treatment Plant, in a special Treatment Plant Operating Fund (hereinafter called "Operating Fund"). Such Operating Fund moneys shall be invested by Authority and to the extent not insured by the Federal Deposit Insurance Corporation or other federal agencies, or invested as hereinafter provided shall be continuously secured by the pledge of direct obligations of the United States of America or the Commonwealth of Pennsylvania having an aggregate market value exclusive of accrued interest at all times at least equal to the amount of such moneys. Such moneys may

be wholly or partially invested by said Authority subject to the same limitations set forth in Section 2.05. Any securities so purchased shall be a part of the Operating Fund. The interest and income received from time to time upon investments and any profit realized or loss sustained from the sale of such securities shall be added to or charged to the Operating Fund and such interest, income, profit or loss shall be considered in determining the actual annual operating expenses of the Treatment Plant pursuant to Section 4.06 hereof.

4.05 Annual Statement. Within one hundred twenty (120) days of the close of each calendar year, Authority shall cause to be prepared and submitted to the Joint Board and each of the said municipalities a detailed statement, certified by a certified public accountant engaged by Authority with the approval of the Joint Board, showing the actual annual operation expenses of the Treatment Plant (as defined in the next succeeding Section) and the apportionment of the cost among the said municipalities on the basis of Section 4.01.

4.06 Actual Annual Operating Expenses of the Treatment Plant. "Actual annual operating expenses of the Treatment Plant" shall mean the sum of the costs referred to in sub-sections (a) through (g) hereof minus the deductions referred to in Section 4.07 hereof:

(a) All the actual reasonable expenses and costs of the adequate, proper operation, maintenance and repair of the Treatment Plant as the same may be constituted from time to time, determined in accordance with sound accounting practices and shall include, without limiting the generality of the foregoing, salaries and wages of operating, supervisory and administrative personnel directly charged to the operation, maintenance and repair of the Treatment Plant (but in the event such personnel are also engaged in other activities of a municipality, shall include only that

proportion of such salaries and wages as is properly allocable to such operation, maintenance and repair on the basis of time spent or services performed; pensions; Social Security or unemployment taxes; chemicals; power; taxes (if any); insurance; administrative expenses; materials and supplies; maintenance; and repairs, improvements and betterments (including ordinary or routine repairs and replacements but not extraordinary replacements or additions of a capital nature which latter shall be treated in the manner provided for expansion in Section 7.02, except to the extent that Article VIII shall apply);

(b) The fees and expenses of the Consulting Engineers employed by Authority billed by the Consulting Engineers to the Treatment Plant concerning the operation, maintenance and repair of the Treatment Plant and in preparing reports and determinations required by this Agreement or the Joint Board;

(c) The fees and expenses of the certified public accountant engaged by the Authority with the approval of the Joint Board to prepare the annual statement;

(d) Fees of consultants of the Joint Board employed in accordance with Exhibit "A";

(e) Interest paid by Authority pursuant to Section 4.04 hereof;

(f) The cost of that portion of the bond of the Treasurer and other officers or employees of the Authority attributable to his or their duties in connection with the Treatment Plant, under sound accounting practice; and

(g) Reasonable Authority expenses incurred in providing service pursuant to this Agreement and attributable to Treatment Plant operating expenses under sound accounting practices.

4.07 Deductions. Any federal or state contribution or grant in aid received by any party which is to be applied towards any cost of operation, maintenance, repair, replacement or other expenses relating to the Treatment Plant shall be paid to Authority and shall be deducted in determining actual annual operating

expenses of the Treatment Plant. Interest properly allocable hereto pursuant to Section 4.04 and interest earned by Authority on funds deposited in the Operating Expense Fund pursuant to Section 4.03 or Section 4.13 shall be deducted in determining such actual operating expenses.

4.08 Refunds or Additional Payments. If ~~any municipality~~'s share of the actual annual operating expenses of the Treatment Plant is less than (or more than) the total amount paid by it under this Article in such calendar year, the excess shall forthwith be refunded to such municipality (or the deficiency shall forthwith be paid by it) ~~if no municipality within sixty (60) days of receipt of an annual statement has requested arbitration in accordance with Article IX, and in the event of such a request, any excess (or deficiency) shall be refunded (or paid) within thirty (30) days after the matter is resolved.~~ Amounts not paid when due shall be subject to interest ~~in the amount of six per cent (6%) per annum of the amount due and shall be subject to the provisions concerning~~ interest of Section 4.04 hereof.

4.09 Use of Funds. Authority agrees that the payments by the municipalities to the Authority on account of their shares of operating expenses of the Treatment Plant shall be applied only for the payment of actual operating expenses as defined in Section 4.06, subject to Section 4.07, and that such payments shall not be applied towards the payment of any other obligation of Authority.

4.10 Books of Account. In order that expenses of Authority which are not properly allocable to the construction or operation of the Treatment Plant shall not be charged thereto, Authority shall keep separate books of account for its collection system and for the Treatment Plant or such books of account and other records which would readily permit such allocation. Said books and records shall be available for inspection by the Joint Board at all times.

4.11 Sewer Rentals. To insure the availability of current revenues adequate to meet its obligations under this Agreement, each said municipality shall impose and collect annual sewer rentals in an aggregate amount sufficient, together with other legally available funds, to equal (a) all sums payable by it to the Authority during the then current calendar year under this Agreement and (b) all sums payable by it to any other person, firm, corporation, municipality or municipality authority during the then current calendar year for or in respect to sewer purposes.

4.12 Discharge of Sewage. Each party shall make every reasonable effort to be ready to begin discharging sewage to the Treatment Plant by the time it is ready to receive sewage.

4.13 Operating Expenses for the First Two Years. Each municipality set forth in Exhibit "F" shall pay to Authority its share of the estimated operating expenses of the Treatment Plant for the first two years of operation set forth after its name in Exhibit "F" (on the basis of reserved capacity) within thirty (30) days of receipt of the certificate of the Consulting Engineers as provided in Section 2.08. Said operating expense moneys for the first two years of operation shall be deposited in an Operating Expenses Fund in the name of the Authority separate and apart from any other fund of the Authority. Investment of such moneys by the Authority shall be made subject to the same limitations set forth in Section 2.05 hereof. Within one hundred twenty (120) days of the close of each of said first two years of operation, Authority shall cause a certified public accountant to prepare and submit to the Joint Board and each participating municipality a detailed statement showing the actual annual operating expenses of the Treatment Plant (as defined in Sections 4.06 and 4.07 hereof) and the apportionment of the cost among the said municipalities on the basis of reserved capacities as set forth in Exhibit "C" hereof. If at the end of the second year of operation the amount deposited

hereunder by any municipality differs from the amount due, refunds or additional payments shall be made pursuant to Section 4.08 hereof.

ARTICLE V

QUALITY OF SEWAGE

5.01 General. The sewage delivered to the Treatment Plant by any municipality or municipality authority shall be within the maximum limits presented below or pretreated to within the limits of Section 5.04.

5.02 Acceptability Standards. The Valley Forge Sewer Authority shall from time to time establish acceptability standards for sewage and industrial waste entering the collection system of any municipality or municipality authority which discharges sewage (directly or indirectly) to the Treatment Plant for the purpose of prohibiting materials or characteristics which would be deleterious to the Valley Forge Sewage Treatment Plant or the treatment process, which standards shall be reasonable and similar to standards imposed with regard to similar facilities. No municipality or municipality authority shall permit discharge directly or indirectly to the Treatment Plant of any sewage or waste so certified to be deleterious, but such certification shall not preclude the municipality or municipality authority from contesting the reasonableness of such determination.

Subject to the foregoing, all municipalities and municipality authorities agree to enact or adopt or cause to be enacted or adopted uniform ordinances, resolutions, rules or regulations to prohibit users of the respective collection systems serving such municipalities from discharging substances failing to meet such acceptability standards and to require all pre-treatment of sewage or other waste necessary to require the same to conform to the

acceptability standards and agree to take all necessary steps in the design and construction of the collection systems and in the subsequent maintenance and operation thereof (including the exercise of appropriate inspection of and control over building connections) to prevent infiltration of storm water and other improper substances into the collection systems.

5.03 Sampling Manholes. For the purpose of determining the characteristics of sewage or wastes, each municipality or municipality authority shall install or cause to be installed a sampling manhole at the point of discharge at the property of any user which the consulting engineer of such municipality or municipality authority considers capable of discharging sewage or wastes not meeting any of such acceptability standards.

5.04 Industrial Wastes. In order to control admission of industrial wastes, no party to this Agreement shall permit any industrial user to connect to or discharge into its collection system any waters or wastes other than sanitary waste without the prior review and approval of the Consulting Engineers. The Consulting Engineers' review (until such time as the following acceptability standards are amended in accordance with Section 5.02 hereof) shall be based on, but not limited to, the following standards:

Waste Characteristics to be Considered. Characteristics of the industrial waste shall not be in general in excess of those listed below:

(a) The 5-day 20 degree centigrade B.O.D. (bio-chemical oxygen demand) shall not exceed 250 ppm.

(b) The suspended solids content shall not exceed 300 ppm.

(c) The total solids content shall not exceed 1,100 ppm.

(d) The pH shall not be less than 6.0 nor shall it exceed 9.0.

(e) The temperature shall not exceed 150°F.

The waste shall not contain any material requiring unusual processing or expense at the Treatment Plant.

(f) The color shall not be such as to require special treatment to render the effluent acceptable for discharge into the Schuylkill River.

(g) The waste shall not contain grease and oil, inflammable material, non-biodegradable material or any oxygen scavenger, sufficient in quantity to be injurious to the Treatment Plant or interfere with any treatment process or to constitute a hazard to human or animal life.

(h) The waste shall not contain any other solid or viscous material capable of causing obstruction to the flow in the sewers or at the Treatment Plant or any material capable of causing interference with the proper operation of the Treatment Plant.

Where required, in the opinion of the Consulting Engineers, the user shall provide at his expense such preliminary treatment or handling as may be necessary to modify the objectionable characteristics or control the quantities and rates of discharge of such water or wastes as necessary.

Plans, specifications, and any other pertinent information relating to proposed preliminary treatment or handling facilities shall be submitted for review to the Authority and no construction of such facilities shall be commenced until a permit for the connection is obtained in writing from the Authority. Authority shall give a copy of each such permit to Tredyffrin Township and to the municipality in which the industrial user is located.

In order to insure quality compliance and to reduce the possibility of accidental discharges of wastes not conforming each municipality and municipality authority shall sample, test or otherwise examine industrial wastes as often as reasonably necessary to insure quality compliance.

5.05 Combined Sewage and Industrial Wastes. In order to control the sewage entering the Treatment Plant, Authority will sample the discharge from each municipality or municipality

authority periodically to insure that no characteristic is evident which would be deleterious to the Treatment Plant or the treatment process.

The characteristics of each combined sewage and industrial waste discharge shall not be in excess of those listed under Section 5.04 except that the temperature of the combined discharge shall not exceed 100 °F.

Each municipality or municipality authority shall provide facilities to prevent the occurrence of septic conditions in the sewers and the sewage delivered to the Treatment Plant.

Should Authority find either the BOD or suspended solids characteristics exceeded as determined in the tests on the periodically obtained samples, the potentially offending municipality or municipality authority shall be notified of the findings and requested to examine the conditions. If at the end of a quarter, Authority determines that the discharge from the municipality or municipality authority is in excess of the characteristics as determined by average test results by periodic sampling, the suspected offender shall be given written notice that its discharge is in excess and that a comprehensive sampling and testing program will be undertaken by Authority to verify the non-compliance and to notify that steps should be taken to rectify the problem.

If, at the end of the quarterly comprehensive test program the problem has not been rectified, a penalty charge as provided in Section 5.06 will be added to that quarter's billing and until the situation is shown to be corrected.

Should Authority find any of the additional characteristics to be in excess or to find the presence of any other untested deleterious material in the course of periodic sampling and testing, the potential offending municipality or municipality authority shall be given notice to take immediate steps to rectify the problem.

5.06 Penalty Charge for BOD and Suspended Solids Excesses. A penalty charge will be added to the Treatment Plant

operating expense charge of any municipality or municipality authority in violation as described in Section 5.05 based on deviations in excess of 250 ppm. of 5-day 20 degree centigrade B.O.D. and 300 ppm. suspended solids content. The penalty charge will consist of a multiplier factor applied to the quarterly volume.

The multiplier shall be determined as follows:

$$\text{Multiplier} = 1.00 + \frac{BOD_5 - 250}{1000} + \frac{(\text{Suspended Solids} - 300)}{1000}$$

Any member of the formula giving a negative value shall be disregarded. BOD_5 and suspended solids figures shall be the average over a quarterly period based on analyses taken five (5) per week. The method of analyses shall be as described in the most recent edition of "Standard Methods of Analyses of Water and Wastewater."

ARTICLE VI

DETERMINATION OF QUANTITY OF SEWAGE DELIVERED TO THE TREATMENT PLANT

6.01 Meters or Measuring Devices. In order to measure in gallons the quantity of sewage emanating from Valley Forge Sewer Authority, the Borough of Malvern and the Townships of Tredyffrin, East Whiteland, Willistown, and Easttown, which is delivered to the Treatment Plant (directly or indirectly), the Authority and each of said municipalities shall each, at its expense, construct or cause to be constructed, where feasible, a sewage meter or sewage flow measuring device at each point necessary to determine the volume of such sewage. The above sewage meters and related equipment such as recorders and charts shall be as mutually agreed upon by the Consulting Engineers and the consulting engineers of said municipalities. All metering stations shall provide facilities for

sampling the sewage. The quantity of sewage emanating from Tredyffrin Township shall be determined by subtracting from the metered flow at the Wilson Road Pumping Station the flows from the Borough of Malvern and the Townships of East Whiteland, Willistown and Easttown as measured by meter readings or other method pursuant to this Agreement.

6.02 Treatment Plant Meters. Authority shall construct, operate and maintain a meter at the Treatment Plant for the purpose of measuring the total volume of sewage entering said Plant. In cases where the sum of the flows of each separate municipality (including flows calculated on the basis of EDU's under Section 6.05) does not equal the volume registered at the Treatment Plant, the difference shall be divided proportionately by the following equation:

$$\text{Difference} \times \frac{\text{Separate municipality or municipality authority flow}}{\text{Sum of ~~each~~ all municipality or municipality authority flow recorded by Plant meter}} = \text{Amount added to or subtracted from each municipality or municipality authority flow}$$

(Plant Influent Reading)

6.03 Calibration and Readings. All meters or measuring devices constructed or installed by Authority, the Borough and the Townships of Tredyffrin, East Whiteland, Willistown, and Easttown shall be calibrated by Authority at least once each year and, if requested by the Joint Board or Tredyffrin Township, shall be checked at other times as a cost of operating the Treatment Plant. All readings of each such municipality or municipality authority's meter or measuring device shall be performed by a representative of said municipality, of Authority, and of Tredyffrin Township, and the meters or measuring devices installed by Authority, including the meter at the Treatment Plant, shall be read by a representative

Not followed to understand

of Authority, of the Joint Board, and of Tredyffrin Township. Meters or measuring devices shall be read or examined on the date each municipality or municipality authority first connects and on the first day of each quarter of each year during the term of this Agreement to determine the quantity of sewage emanating from each municipality or area served by a municipality authority for the previous quarterly period or portion thereof. Copies of meter readings or measuring device examinations shall forthwith be delivered to each municipality, to Valley Forge Sewer Authority, and to the Joint Board.

6.04 Maintenance and Operation. All meters and measuring devices used for the purpose of determining flows into the Valley Creek Trunk Sewer and used for billing purposes will be routinely serviced and inspected by Authority as a part of the Treatment Plant operating expense. Authority shall undertake to have an inoperative or inaccurate meter or measuring device repaired as soon as practicable with the cost of such repair being charged back to the owner. Valley Forge Sewer Authority shall not be obligated to provide service to any devices other than the primary metering element, recorders, transmitters and other instruments. Each municipality or municipality authority shall at its own expense be responsible for all other maintenance and operation of its sewage metering facilities.

6.05 Missing or Inaccurate Flow Records; Use of Equivalent Dwelling Units as Measurement of Flow. In the case of missing flow records due to faulty meter registration or otherwise, an estimate of flows shall be made by the Consulting Engineers for the purpose of determining volume of sewage discharges. This estimate will be based on a valuation of past flow records as applied to the then existing conditions and as reviewed and approved by the consulting engineer of the respective municipality or municipality authority.

In the absence of meter readings during the early period of low flows, when the sewage recording meters may not register the flow, or where meters cannot practically be installed, flow quantities shall be determined on the basis of the average number of Equivalent Dwelling Units (upon the basis of a discharge rate of 275 gallons per day per Equivalent Dwelling Unit). The number of Equivalent Dwelling Units shall be determined at the beginning and end of each calendar quarter during the term of this Agreement based upon a certification by a responsible officer of the municipality or municipality authority as to the number of such Equivalent Dwelling Units so connected by the municipality or municipality authority at the beginning and end of each quarter and shall be averaged on the basis of the number of units so connected at the beginning and end of each such quarter. Where the initial connection of the collection system of any municipality or municipality authority is made to the Valley Creek Trunk Sewer after the first day of a calendar quarter, the quantity of sewage so discharged shall be based on the number of Equivalent Dwelling Units so connected at the end of such quarter prorated on the basis of the number of days in such calendar quarter that any sewage is so discharged from such municipality or municipality authority. For the purpose of determining the number of Equivalent Dwelling Units represented by schools, churches or municipal buildings, commercial or industrial establishments, etc., the factors set forth in Exhibit "G" shall be applied. The officials and representatives of Authority or Tredyffrin Township may inspect the records of any connecting municipality or municipality authority for the purpose of determining the accuracy of the number of Equivalent Dwelling Units certified by such municipality or municipality authority.

6.06 Partial Check on Faulty Meters. For the purpose of attempting to discover faulty meters, Authority shall undertake to prepare, as a Treatment Plant operating expense, a complete

distribution of the total volume of sewage received and metered at the Treatment Plant during each calendar quarter and during each calendar year, with respect to each municipality or municipality authority which discharges sewage that is treated in the Treatment Plant, such distribution to include all metered and unmetered sewage flows of each municipality or municipality authority and such adjustments as are calculated under Section 6.02.

ARTICLE VII

EXPANSION

7.01 Renting Unused Capacity. Each municipality or municipality authority (hereinafter referred to in this Article VII as "municipalities") discharging from its sewage collection system to the Treatment Plant during a calendar year a volume of sewage less than its reserved capacity, as set forth in Exhibit "C", shall be deemed to have placed its unused capacity in a rental pool. Any municipality (herein called "lessee municipality") discharging sewage to the Treatment Plant in any calendar year in excess of its reserved capacity, as set forth in Exhibit "C", shall rent from the pool for the entire calendar year capacity equal to the volume by which it exceeds its reserved capacity (with the total volume discharged by it being reduced to gallons per day by dividing the total gallons discharged by it in such calendar year by 365). The annual rental fee to be paid by the lessee municipality shall be the representative annual "debt service" (calculated at equal annual payments to amortize the "debt," including seven per cent [7%] interest per annum for a twenty-five (25) year term) for the amount obtained by multiplying the fraction of the rated capacity of the Treatment Plant rented for the current calendar year by the total of capital contributions made by all parties hereto toward the cost of providing the Treatment Plant as then being used. The capacity thus

rented by the lessee municipality shall be rented annually by it until the next expansion of the Treatment Plant, at which time the lessee municipality shall surrender the capacity rented by it and shall, at its expense, replace the capacity rented by it so that each lessor municipality will receive back its reserved capacity placed in the pool. In no event shall any contribution of capacity to the rental pool be construed to decrease the reserved capacity in the Treatment Plant of any lessor municipality.

The rental fees shall be distributed to the contributors to the rental pool in proportion to their contributions (the contribution as to each being the difference between its actual flow during the current calendar year [reduced to gallons per day] and its reserved capacity). The rental fee owed by each lessee municipality, together with the proposed distribution thereof to the lessor municipalities, shall be shown as separate items in the annual statement furnished pursuant to Section 4.05 hereof. Rental fees owed shall be paid by each lessee municipality to Authority within sixty (60) days of receipt of said annual statement unless arbitration has then been requested, and in such event shall be paid within thirty (30) days of the date the matter is resolved pursuant to the procedure set forth in Section 9.01 hereof. Distribution of the rental fees shall be made by Authority promptly thereafter as provided herein.

Although rental payments shall be paid and distributed hereunder on the basis of actual flows, the total estimates of sewage to be discharged to the Treatment Plant in a calendar year pursuant to Section 4.02 hereof shall be used to avoid exceeding the rated capacity of the Treatment Plant. In the event that the total of said estimates, pursuant to Section 4.02, exceeds ninety per cent (90%) of the rated capacity of the Treatment Plant (with the remaining ten per cent [10%] being used as a safeguard against underestimation), the Consulting Engineers shall allocate the capacity in the

pool (as estimated) among the municipalities estimating discharge in excess of their reserved capacities in proportion to their flows during the preceding calendar year; provided, however, that any municipality may continue to rent the number of gallons of capacity previously rented by it. No municipality shall permit any new connection to be made to its collection system or permit increased flow from any existing connection (due to construction and connection to the system of additional facilities) if so permitting might cause its volume of sewage discharged to the Treatment Plant at peak flows during such calendar year to exceed the total of its reserved capacity and the capacity in the pool allocated to it by the Consulting Engineers for such year.

7.02 Increased Capacity. At such times as (a) eighty per cent (80%) of the rated capacity of the Treatment Plant is used or (b) estimates of volume under Section 4.02 exceed ninety per cent (90%) of said rated capacity, or (c) in the event reconstruction, repair, replacement, enlargement or improvement of the Treatment Plant or any part thereof is required to meet standards prescribed by the Sanitary Water Board of the Pennsylvania Department of Health or any other governmental authority having jurisdiction, the Authority, after approval by the Joint Board, which may be withheld only for sound engineering reasons, shall take all measures reasonably necessary or appropriate (i) to provide for the replacement of capacity borrowed pursuant to Section 7.01 hereof and to provide increased capacity to meet the reasonably anticipated needs of the parties pursuant to Section 3.01 hereof by the enlargement of structures, the installation of additional tanks or equipment, or other improvement or (ii) to provide for such reconstruction, repair, replacement, enlargement or improvement required to meet such standards; and each municipality or municipality authority named in Exhibit "B" (including, in the event Authority is unable otherwise to obtain the necessary funds, the Townships of Schuylkill,

S.W. 2nd approval is necessary

1st conceptual approval of project
2nd detailed plans and specs

East Pikeland and Charlestown, with the Consulting Engineers determining how the Authority's share is to be apportioned among them) agrees to pay or cause to be paid to the Authority (but only from legally available current revenues, sewer rentals available and funds which can legally be borrowed) its proportionate share of the expenses thus incurred.

The necessity for and the extent of such increased capacity (with a breakdown by municipality or municipality authority on the basis of the respective proportion of the increased reserved capacity) shall be determined by the Consulting Engineers, subject to the approval of the Joint Board (which approval may be withheld only for sound engineering reasons), after consultation with the consulting engineers of each of the municipalities and municipality authorities and written notice of such determination together with the Consulting Engineers' estimate of the cost thereof (with a breakdown by municipality or municipality authority on the basis of the respective proportions of the increased design capacity to be reserved for each municipality) shall be given to each municipality, municipality authority, and Joint Board. To the extent that it is possible to segregate upgrading (to meet standards of a governmental authority) from expansion (to provide increased capacity), the expense of upgrading shall be allocated and paid on the basis of the then current reserved capacities. Adjustment shall be made so that each lessee municipality pursuant to Section 7.01 hereof bears the expense of replacing the capacity rented by it and each lessor municipality receives back its reserved capacity placed in the pool. In the event of failure of Authority and the Joint Board to agree, the Authority may submit the matter to arbitration as provided in Article IX hereof.

Time of payment and calculation of project cost shall be in the same manner as that provided in Article II hereof. Each party authorizes and directs Authority on behalf of each

municipality and municipality authority from time to time to apply for and accept any one or more grants in aid towards the aforesaid provision of increased capacity or reconstruction, repair, replacement, enlargement or improvement.

7.03 Construction Fund. Moneys paid pursuant to this Article shall be deposited, held and disbursed pursuant to the Construction Fund provisions set forth in Article II hereof.

ARTICLE VIII

INSURANCE AND DAMAGE OR DESTRUCTION

8.01 Insurance on Treatment Plant. Authority agrees that (a) during the construction of the Treatment Plant it will at all times cause to be in force builders' risk insurance (or equivalent coverage) upon any work done or materials furnished under construction contracts except foundations and any other structures not customarily covered by such insurance, such policies to be written in completed value form for one hundred per cent (100%) of the insurable value of the contracts and (b) upon completion of such construction it will at all times as a Treatment Plant operating expense cause the Treatment Plant to be insured against loss or damage by fire or other casualty in such amount and against such risks as are usually carried with respect to like properties, provided that the amount of such insurance shall be sufficient to prevent the insured from becoming a co-insurer thereunder by reason of any co-insurance clause in the policies. All such insurance policies shall (a) be written by responsible insurance companies authorized and qualified to do business in Pennsylvania, (b) be non-assessable and (c) name as the insureds the Authority and the Trustee of the trust indenture executed by Authority to secure its bonds issued to provide for the construction in whole or in part of the Treatment Plant and, in addition, during any period of repair or

construction the contractors engaged in such repair or construction, and to the extent procurable shall not be cancellable without at least fifteen (15) days' prior written notice to such named insureds. The Authority agrees to furnish to each municipality before commencing operation of the Treatment Plant and before the start of each year during the term of this Agreement a certificate of the Consulting Engineers stating the amount and kind of such insurance in effect for the ensuing year and that the same, in the opinion of the Consulting Engineers, complies with the provisions of this Section.

8.02 Repair or Reconstruction with Insurance Proceeds. In the event of any damage to the facilities covered by such insurance, the Authority, upon receipt of the necessary funds as provided for herein, shall promptly repair or replace the damaged property unless the Consulting Engineers certify that it would not be practical and advantageous to do so. It is agreed that in the absence of such a certification, the proceeds of all insurance coverage to the extent necessary shall be applied to such repair or reconstruction.

8.03 Repair or Replacement not Covered by Insurance Proceeds. In the event that it shall be necessary in order to treat and dispose of sewage in accordance with the purport and intent of this Agreement to make an extraordinary repair or replacement of the Treatment Plant because of damage or destruction by casualty or otherwise, and there are insufficient funds available from insurance proceeds to pay the costs and expenses thereof, the Authority (or in the event it cannot otherwise obtain funds, the Townships of Schuylkill, East Pikeland and Charlestown with the Authority's share being apportioned among them by the Consulting Engineers), the Borough and the Townships of East Whiteland, Willistown, Tredyffrin and Easttown shall forthwith pay over to Authority (but only from legally available current revenues, sewer rentals available and

borrowed funds) for deposit in a special construction fund such amount as is required for the purpose, in the same proportions as capital contributions toward the construction of the Treatment Plant were made by each. In the event the funds available to any municipality from the above sources are insufficient to pay the amount due from it and it is unable to borrow the same, payment shall be made at such times as shall be determined by the Joint Board.

8.04 Providing Capacity by a Means Other than Repair or Reconstruction of the Treatment Plant. In the event that proceeds of insurance resulting from damage to the Treatment Plant are not applied to the repair or replacement of the damaged property because the same is determined to be impractical and not advantageous (pursuant to Section 8.02 hereof) such proceeds shall be applied toward the provision of capacity pursuant to Section 7.02 hereof. In such event, credit for funds so applied shall be given to the municipalities in the same proportions as capital contributions toward the project cost of the Treatment Plant were made by each.

ARTICLE IX

ARBITRATION

9.01 Arbitration as to Charges under Articles II and IV. In the event any disagreement shall arise concerning the charges provided in Articles II and IV and the parties with the assistance of the Joint Board cannot otherwise promptly resolve the same, such disagreement shall be submitted within ten (10) days of the time any party requests arbitration to a certified public accountant appointed by a method agreed upon by the Authority and the Joint Board. In the event of failure to agree upon an arbitrator within ten (10) days, an arbitrator shall be appointed by the Senior Judge of the Court of Common Pleas of Chester County available at the time either Authority or the Joint Board requests appointment of an arbitrator. The decision of the accountant or arbitrator so chosen shall be binding and shall be rendered within twenty (20) days. Any request for such arbitration shall be made within sixty (60) days after receiving a certificate under Section 2.08 or a statement under Section 4.05, Section 4.13, or Section 7.01, and if no such request is made, the certificate or statement shall be considered correct and not subject to future questions. The fee of said certified public accountant or arbitrator shall be a Treatment Plant operating expense.

9.02 Other Arbitration. In the event any disagreement shall arise as to the interpretation of any provisions hereof or the rights and obligations of the parties hereunder (other than disagreements provided for in Section 9.01) and the parties with the assistance of the Joint Board cannot otherwise promptly resolve the same, such disagreement shall be submitted within ten (10) days of the time any party requests arbitration to a Board of Arbitrators whose decision shall be binding and

shall be rendered within twenty (20) days. Such Board shall consist of the Consulting Engineers, consulting engineers selected by the Joint Board and a third professional engineer licensed in Pennsylvania selected by the two consulting engineers; provided, however, that the Authority and the Joint Board may agree to select arbitrators other than engineers or may agree to submit the matter to a single arbitrator. In the event of failure of the engineers to agree upon a third engineer, the same shall be appointed in the manner set forth in Section 9.01 hereof. The fees of all arbitrators shall be a Treatment Plant operating expense.

ARTICLE X

MISCELLANEOUS PROVISIONS

10.01 Operation of Treatment Plant. The Authority agrees that it will, for and during the term of this Agreement by use of funds provided hereunder, operate and maintain the Treatment Plant and that it will keep the same in good order and repair, save where prevented from doing so by act of God or riot, rebellion, sabotage, act of the public enemy or public calamity, in which event the Authority may suspend operation of the said Treatment Plant until the cause of such suspension shall no longer exist and for such reasonable time thereafter as may be required to effect a resumption of operations. Authority shall at no time and under no circumstances be liable to any party for any damages in case of failure or inadequacies of said Treatment Plant to receive, treat or dispose of sewage.

10.02 Operation of Collection Systems. Each party agrees that during such time as it operates a sewage collection system it will continuously operate and keep and maintain its

collection system at all times in first-class repair, order and efficient operating condition and will meet the standards prescribed by the Sanitary Water Board of the Pennsylvania Department of Health or any other governmental authority having jurisdiction. Each party agrees to pay the cost of any damage to the Treatment Plant or fine imposed upon Authority resulting from discharge of improper sewage from such party's collection system in violation of this Agreement or from improper operation or maintenance of such party's collection system. Each party agrees to indemnify and save harmless all of the other parties against all costs, losses or damage on account of any injury to persons or property occurring in the performance of this Agreement due to the negligence of such party or its servants, agents or employees.

10.03 Leases. In the event that any municipality authority shall at any time lease its collection system to a municipality, any right or obligation of such authority under this Agreement may be exercised and shall be performed, as the case may be, by the municipality instead of the municipality authority to the extent that it may legally do so. When, by reason of the termination of any collection system lease, or for any other reason, any municipality authority shall be in possession of its collection system, then without any further act or agreement such municipality authority shall succeed to and become vested with all of the rights, powers, duties and obligations under this Agreement granted to or imposed upon the municipality which created such authority.

10.04 Public Utility Law. In the event that the Commonwealth of Pennsylvania should subsequently lawfully confer jurisdiction of the subject matter of this Agreement upon the Pennsylvania Public Utility Commission in whole or in part, the parties shall, if requested so to do, proceed forthwith to obtain

all necessary power, right and authority from the said Public Utility Commission or other proper agency of such Commonwealth in order to carry out the terms, provisions and intendment hereof.

10.05 Permits. In the event that it may be necessary for the proper performance of this Agreement on the part of the Authority to apply to any governmental or other agency for any permit or license to do or perform any act or thing contemplated hereby, and if such application must be made by a municipality rather than by the Authority, the municipality affected agrees that it will execute the required application upon request by the Authority, it being understood that in executing such application the municipality shall not assume any obligations beyond those for which it would have been responsible had the Authority made the said application.

10.06 No Joint Liability. With the exception of a municipality and a municipality authority organized by such municipality, no party shall be held to be jointly liable in the event of failure of any party to perform and discharge its obligations under this Agreement, it being the intent hereof that this shall constitute the separate agreement of each of the several parties named herein and default by any party in the discharge of any obligation resting upon it hereunder shall not relieve any other party from full performance of and compliance with the terms hereof.

10.07 Connections. Prior to the completion of construction of the Treatment Plant, Borough and each Township which is a party hereto will (to the extent that it has not done so prior thereto) take all action which may be legal and necessary to compel all properties located within its territorial limits and then capable or thereafter becoming capable of being served by the municipality's collection system (or

that of Authority) to be connected therewith. Sewage need be delivered to the Treatment Plant only from areas designated as service areas on the attached Exhibit "E."

10.08 Records. Each party agrees to make available at all reasonable times to the Joint Board, Authority and employees, agents and representatives of either, access to all records relating to matters covered in this Agreement and access to the physical facilities of each party in order to assure compliance with the terms and provisions of this Agreement. A copy of all ordinances, resolutions, rules and regulations adopted by each party from time to time, pursuant to this Agreement, shall be furnished to Authority and the Joint Board within thirty (30) days after enactment.

10.09 Severability. Should any one or more of the provisions of this Agreement for any reason be held illegal or invalid, such illegality or invalidity shall not affect any other provision of this Agreement; and this Agreement shall, in such circumstances, be construed and enforced as if such illegal or invalid provision had not been contained herein.

10.10 Term. This Agreement shall become effective upon its execution and delivery by all the parties hereto and shall remain in effect for forty (40) years and thereafter shall be terminated only by mutual agreement of all parties. Nov 2010

10.11 Joinder of Authority to be Formed by Willistown Township.

A municipality authority to be formed by Willistown Township may become a party hereto by duly executing this Agreement.

10.12 Definitions. The following terms and phrases shall have the following meanings whenever used herein:

(a) "Consulting Engineers" means Buchart-Horn, Consulting Engineers, York, Pennsylvania, and in the event said firm ceases to serve as the Consulting Engineers for

Authority, an engineering firm or professional engineer having a favorable repute for skill and experience in the construction and operation of sewage treatment plants, registered in Pennsylvania and chosen by the Authority with the advice and consent of the Joint Board.

(b) "Equivalent Dwelling Unit" means any room, group of rooms, house trailer or other enclosure occupied or intended for occupancy as separate living quarters by a family or other group of persons living together or by persons living alone.

(c) "Industrial User" means any improved property used, in whole or in part, for manufacturing, processing, cleaning, laundering or assembling any product, commodity or article or from which any process waste, as distinct from sanitary sewage, is discharged.

(d) "Industrial Wastes" means any and all wastes discharged from an industrial establishment or by an industrial user, other than sanitary sewage.

(e) "Sewage," "Wastewater," "Sanitary Sewage" and "Sanitary Waste" means normal water-carried household and toilet wastes from any improved property to the extent permitted by Article V and industrial wastes to the extent permitted by Article V.

(f) "Improved Property" means any property upon which there is erected a structure intended for continuous or periodic habitation, occupancy or use by human being or animals and from which structure sanitary sewage and/or industrial wastes shall be or may be discharged.

(g) "pH" means the logarithm of the reciprocal of the concentration of hydrogen ions, expressed in grams per liter of solution, indicating the degree of acidity or alkalinity of a substance.

(h) "B.O.D." means biochemical oxygen demand.

10.13 Execution. This Agreement may be executed in any number of counterparts each of which may be deemed an original.

IN WITNESS WHEREOF, each of the parties hereto has caused this Agreement to be duly executed and attested by its proper officers, pursuant to proper action of its proper governing body, as of the day and year first above written.

EXHIBIT "A"

JOINT BOARD

The Borough of Malvern and the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown and Easttown shall each appoint one member of the Joint Board for initial terms as follows:

Malvern	1 Year
Schuylkill	2 Years
East Pikeland	3 Years
Charlestown	4 Years
East Whiteland	5 Years
Tredyffrin	1 Year
Willistown	2 Years
Easttown	3 Years

and shall thereafter from time to time, as the term of its representative expires, appoint a member for a term of five (5) years. If a vacancy occurs by reason of the death or resignation of a member, the municipality that appointed him shall appoint a successor to fill his unexpired term. A member may be recalled and replaced by the appointing municipality. In the event a member cannot attend a meeting, the municipality that appointed him may send an informed representative who shall have the right to vote.

Five members shall constitute a quorum and the acts of a majority of the members present at a meeting at which a quorum is present shall be binding acts of the Joint Board. The Joint Board may from time to time adopt Rules and Regulations governing its method of operation but shall hold special meetings as may be required in order not to delay construction of the Treatment Plant. The Joint Board shall not unreasonably withhold or delay approval of any matter requiring its approval.

If the Joint Board desires legal advice in addition to that which is provided by counsel for the Authority or accounting services, it may employ such with the fees being paid as an annual operating expense of the Treatment Plant under Section 4.06(d).

No more than one person shall be at the same time a member of Valley Forge Sewer Authority and of the Joint Board.

The powers and obligations of the Joint Board shall be as set forth inter alia in the following sections of this Agreement:

1.02 (Collecting payments for engineering services)

1.04 (Reviewing, inspecting and advising)

2.02 (Plans and specifications are subject to approval of Joint Board)

2.03 (Total project cost in the event the same exceeds the estimated total project cost as set forth in Exhibit "D" hereof by more than 15% is subject to approval of Joint Board)

2.05 (Selection of Trustee for Construction Fund is subject to approval of Joint Board)

2.06 (Receiving requisitions)

2.07 (Change orders in excess of $25,000 are subject to approval of Joint Board)

2.08 (Receiving certificate as to distribution of Construction Fund with each municipality having the right to request audit)

2.09 (Selection of Certified Public Accountant to prepare said certificate is subject to approval of Joint Board)

4.03 (Budget and revisions thereof are subject to approval of Joint Board)

4.05 (Receiving annual statement with each municipality having the right to request audit)

4.06(c) (Selection of Certified Public Accountant to prepare annual statement is subject to approval of Joint Board)

4.06(d) (Payment of fees of consultants of Joint Board)

4.10 (Inspection of all Authority books of account)

4.13 (Trustee for Operating Expenses Fund is subject to approval of Joint Board)

pages out of order

7.02 (Extent of increased capacity and apportionment of payment therefor is subject to approval of Joint Board)

9.01 and 9.02 (Attempting to resolve disagreements and selecting arbitrators)

10.08 (Access to records and physical facilities)

FACTORS FOR DETERMINATION OF EQUIVALENT DWELLING UNITS

Classification	Number of E. D. U.
A. Each private dwelling or living unit	1
B. Each fire house or municipal building	1
C. Each church	1
D. Each public or private day school . . . . . Elementary, junior or senior high school Based on the daily average number of pupils enrolled on days when the school was in session during the quarter immediately preceding the date for determination of the number of connections, divided by the factor of 20. Teachers and employees shall be classified as pupils. Average enrollment shall be determined annually.	
E. Each retail gas station without car washing facilities	2
F. Each retail gas station with car washing facilities	3
G. Each commercial establishment, hospital, convalescent home, or institution . . . . . The quantity of water used shall be evidenced by meter readings of water meters installed by water suppliers for the purpose of measuring water purchased from said water supplier and such other meters or measuring devices as may be installed. The quantity of water used during the quarter immediately preceding the date for determination of the number of connections divided by 24,750 gallons shall represent the number of Equivalent Dwelling Units determined in respect of such establishment.	
H. Each motel, hotel, or rooming house . . . . . Each unit or room shall be evaluated as one-half an Equivalent Dwelling Unit. Where a restaurant or bar room is conducted in conjunction with any motel or hotel, a separate determination for such restaurant or bar room shall be made in accordance with paragraph "G" above.	
I. Industrial Establishments . . . . . The quantity of water used shall be evidenced by meter readings of water meters installed by water suppliers for the purpose of measuring	

water purchased from said water supplier and such other meters or measuring devices as may be installed. The quantity of water used during the quarter immediately preceding the date for determination of the number of connections divided by 24,750 gallons shall represent the number of Equivalent Dwelling Units determined in respect of such establishment.

275/day

Where no meter has been installed by the supplier or no other meter or measuring device has been installed, the number of Equivalent Dwelling Units shall be estimated.

J. Multiple Use. In case of a combination of one or more dwelling or living units with a similar unit or units or with one or more commercial establishments in the same or connected building with each thereof having the use of the Treatment Plant (directly or indirectly) through one sewer connection, then each such private dwelling or living unit and each such commercial establishment shall be evaluated on the basis of the applicable factors for each use thereof as if such use were conducted in a separate structure and as if each such use had a direct and separate connection to a sewer ultimately discharging to the Treatment Plant . . . . . .

subject Valley Creek Construction thru UFNHP

COMPOSITE AMENDMENT NO. 1

This Composite Amendment No. 1 dated as of December 1, 1974, to the Valley Creek Trunk Sewer Agreement dated November 1, 1970 (the "Valley Creek Agreement"), is entered between the parties to said Agreement, namely TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY (the "Tredyffrin Authority") a Pennsylvania municipality authority and the TOWNSHIP OF TREDYFFRIN ("Tredyffrin Township") parties of the first part, and the TOWNSHIPS OF SCHUYLKILL, EAST PIKELAND, CHARLESTOWN, EAST WHITELAND, WILLISTOWN and EASTTOWN (all of said Townships being second class townships in Chester County, Pennsylvania), the BOROUGH OF MALVERN, the VALLEY FORGE SEWER AUTHORITY, MALVERN MUNICIPAL AUTHORITY, EAST WHITELAND MUNICIPAL AUTHORITY and EASTTOWN MUNICIPAL AUTHORITY all being Pennsylvania municipality authorities, parties of the second part. Certain of the aforementioned parties are also parties to the East Whiteland Trunk Line Agreement dated as of February 1, 1971 (the "East Whiteland Agreement") and the Valley Forge Sewage Treatment Plant Agreement dated as of November 1, 1970 (the "Treatment Plant Agreement"), which are also being amended in certain respects hereby. All of the abovementioned Townships and the Borough of Malvern are sometimes herein referred to as the "Municipalities" and the above-named municipality authorities are sometimes referred to as the "Authorities".

BACKGROUND

The background of this Agreement is as follows:

A. The parties hereto entered into the Valley Creek Agreement to provide for sharing the cost of construction of the "Valley

Creek Trunk Sewer" as therein defined, and also in contemplation of the construction of (i) the "Valley Forge Treatment Plant" pursuant to the Treatment Plant Agreement; (ii) the East Whiteland Trunk Line, pursuant to the East Whiteland Agreement; and (iii) the sewage collection systems within each of the Municipalities designed to be served by the aforementioned facilities. All of the aforesaid construction was to have been commenced at substantially the same time because it is all interrelated, and it is herein referred to collectively as the "Project". Construction of the Project has been delayed for various reasons during which time construction costs have risen substantially.

B. It is now expected that the U. S. Government acting through the Environmental Protection Agency ("EPA") will shortly award grants to each of the Authorities in the amount of 75% of the actual eligible costs of the abovementioned collection systems, pursuant to the Federal Water Pollution Control Act Amendments of 1972. In addition, informal assurances have been received from EPA as to the likely increase of the grants for the Valley Creek Trunk Sewer and the Valley Forge Treatment Plant and other interceptors, as previously awarded conditionally, to 75% of the actual eligible costs, even though said grants were originally awarded under prior Federal law.

C. Award of the abovementioned new grants and authorization to proceed with construction under the old grants will be conditioned upon execution of a Supplement to Sewage Facility Grant Agreements, dated as of July 1, 1974 (the "EPA Agreement") between the parties hereto and EPA, which Agreement will also require the enactment of certain Ordinances by the Municipalities on or before December 31, 1974, as more fully provided in Section 2 of the EPA Agreement, substantially in the form of Exhibits A and B thereto.

D. The Valley Creek Trunk Sewer is indispensible to the transportation of sanitary sewage emanating from all the Munici-

palities to the Valley Forge Treatment Plant. The Pennsylvania Historical and Museum Commission (the "Park Commission") has informally indicated however, that it will not permit construction of the portions of the Valley Creek Trunk Sewer located within Valley Forge State Park, consisting of Contract "D" of the Tredyffrin Authority (the "Park Construction") during the years 1976 through 1978 because of the necessity to close completely an arterial road to carry out such construction. The construction will require approximately 12 months to complete.

E. In reviewing the plans for the Valley Forge Sewage Treatment Plant EPA has recently required certain changes which necessitate redesign of said Plant, and it is therefore unlikely that final approval of plans for said Plant will take place before March of 1975, which will prevent award of construction contracts for such construction until early summer of that year.

F. The Consulting Engineers for the parties have advised them that construction costs will continue to increase, and that it will be in their best interests to commence construction of all of the facilities mentioned in paragraph A as soon as possible after award of the abovementioned new grants.

G. Because work on the Park Construction must be commenced before other parts of the Project, the Tredyffrin Authority is willing to commence such construction separately, upon approval thereof by EPA, and subject to the further provisions of this Agreement.

H. The estimated project cost for the Park Construction has been estimated by the Consulting Engineers of Tredyffrin Authority at $2,500,000, approximately 75% of which will be reimbursed by Federal grants. The Tredyffrin Authority has available funds for the non-Federal portion of such costs, but because the Park Construction is intended for the joint use of all the other

parties hereto it is deemed advisable that said Authority be protected against having to bear the full loss in the unlikely event that there should be an indefinite delay in construction of the balance of the Project.

NOW, THEREFORE, the parties hereto, intending to be legally bound hereby agree as follows:

1. All terms defined in the abovementioned Agreements will have the same meaning when used herein.

2. Immediately upon execution hereof by all parties, the Tredyffrin Authority will advertise for construction bids for the Park Construction or at its option such portion thereof as the Park Commission determines must be completed before January of 1976. It will not award such contracts however, until receiving written approval from EPA for such action, including reasonable assurance that Tredyffrin Authority will receive prompt payment on account of the Federal grants for such construction as construction proceeds, at the rate of 75% of actual eligible costs incurred. In order that such approval of EPA may be received, the Municipalities agree to proceed as rapidly as possible with authorization and execution of the EPA Agreement and enactment of the related Ordinances. Tredyffrin Authority will use its best efforts to complete such construction as rapidly as possible, but if construction bids have not been received for the balance of the Project by August 30, 1975, Tredyffrin Authority may at its option suspend work on the Park Construction in order to minimize the damages which might otherwise result.

3. Tredyffrin Authority will pay the non-Federal portion of the costs of such construction from moneys it now has available, subject to reimbursement of their respective shares of the non-Federal portion thereof by the capital contributions of the other Authorities pursuant to Article II of the Valley Creek Agreement.

4. Exhibit "B" to the Valley Creek Agreement, Exhibit "D" of the Treatment Plant Agreement and Exhibit "B" of the East Whiteland Agreement are hereby amended to revise the estimated project cost to the new amounts set forth in Exhibit "A" attached hereto (which amounts have been derived from the original estimated project costs by a comparison of cost index figures in 1970 and 1974 as published in the Engineering News Record in the same manner as is described in the revised Section 2.03 below, and also adjusting for design changes in the Valley Creek Pump Station caused by the change in its location). Section 2.03 of the Valley Creek Agreement and the same numbered sections of the East Whiteland Agreement and the Treatment Plant Agreement are hereby further amended to read as follows:

> "2.03 Change in Project Cost. In the event, after receipt of Construction bids, the total project cost (before deducting any federal or state grants) of constructing the [insert applicable construction] exceeds by more than 15% the estimate as set forth in Amendment No. 1 hereto and as adjusted pursuant to the next paragraph hereof, and such revision in excess of 15% is not disapproved by the majority of said municipalities listed in Exhibit [insert appropriate Exhibit or insert 'Joint Board' in Treatment Plant Agreement] each municipality listed in such Exhibit shall pay its respective share of said increase over 15% to Authority by the time set forth in Section 2.02 hereof. However, in computing the amount to be so paid, each municipality may take credit for its appropriate share of 90% of the anticipated Federal Grants for the construction as calculated by the Consulting Engineers. In the event, after receipt of the last construction bids for the [insert applicable construction] the total project cost of such construction is less than the estimate, as set forth in said Amendment No. 1, the total payment to be made by each such municipality under Sections 2.01 and 2.02 hereof shall be proportionately reduced and refunds of payments made under Section 1.01 shall be made proportionately.
>
> The total estimated project cost of constructing the [insert applicable construction], for purposes of the preceding paragraph of this Section 2.03, shall be further adjusted from that set forth in Exhibit 'A' to Amendment No. 1, by multiplying the total project cost appearing in Amendment No. 1 by a factor obtained by dividing the most recent available Construction Cost Index factor for Philadelphia appearing in the 'Sewage Construction Cost Index in 20 Cities' table relating to sewer construction published in the Engineering News Record, projected on a straight line basis to the date of receipt of the last construction bids for such construction in a manner satisfactory to the Consulting Engineers

for the Tredyffrin Authority and the Valley Forge Authority by the October 1974 Construction Cost Index factor for Philadelphia appearing in the 'Sewage Construction Cost Index in 20 Cities' table relating to sewer construction published in the December 19, 1974 edution of Engineering News Record, at page 74."

5. To the extent that the Tredyffrin Authority pays any of the costs (as defined in the Original Agreement) for the Park Construction from its own funds, or funds it may borrow, prior to receipt of the Capital Contributions from the other Authorities under the Valley Creek Agreement, such contributions when made will include, not only reimbursement for their respective shares of such cost pursuant to Section 2 above, but also interest on such shares of the amounts advanced by the Tredyffrin Authority, from the dates the respective advances are made to the date of reimbursement, at a rate equal to the highest rate paid by any one of the three following Philadelphia Banks from time to time on 30 day certificates of deposit as determined on the 15th day of each month: Central Penn National Bank; Continental Bank; and The Philadelphia National Bank.

6. In the event that for any reason the openings of construction bids for the balance of the Valley Creek Trunk Sewer and other portions of the Project are delayed for any reason, so that no capital contributions are paid under the Valley Creek Agreement, the other Authorities and Municipalities will reimburse Tredyffrin Authority for their respective percentages of the costs incurred by Tredyffrin Authority (less Federal grant moneys received) for the Park Construction plus interest as aforesaid, said obligations to be several and not joint however, and further provided that said reimbursements will be payable only from the proceeds of the next sewer bond issue, whenever that may occur, by each Authority, by its incorporating Municipality, or by any other municipality authority created by such Municipality, concurrently with the closing in such bond issues or from any other available funds. For this purpose a bond issue by the Valley Forge Authority will be treated as a bond issue for all of its three member Municipalities. Also, independently of the preceding two sentences, the Authorities

(but not the Municipalities) separately agree to make such repayment, without any limitation upon source, not later than two years after the date of the first advance by the Tredyffrin Authority.

7. All the Authorities will proceed to advertise for construction bids for their respective portions of the Project as soon as possible after receipt of Federal grants for the collection systems, but only upon approval of EPA for such advertising, and upon advice by the Valley Forge Authority that EPA has approved or is expected to approve advertising for construction bids for the Valley Forge Treatment Plant in sufficient time that construction bids will be received on the Treatment Plant by a date not more than 60 days after the receipt of bids for all other parts of the Project.

8. Except as modified herein the Valley Creek Agreement, the Treatment Plant Agreement and the East Whiteland Agreement are hereby ratified and confirmed.

9. This Agreement may be executed in any number of counterparts each of which may be deemed an original.

10. This Agreement shall not become effective until the formal Federal grant offers (which under applicable law are required to be in amounts equal to 75% of eligible costs) for the collection system portion of the Project have been received by all the Authorities, which grants however may be conditioned upon the execution of the EPA Agreement by all parties hereto.

11. Execution of this Composite Amendment to the above-mentioned three Agreements shall not be construed as making any Municipality or Authority a party to any Agreement to which it has not previously been a party, nor as merging any of said Agreements, which shall remain separate Agreements for all purposes.

(SEAL)

TOWNSHIP OF SCHUYLKILL

IN WITNESS WHEREOF, each of the parties hereto has caused this Composite Amendment No. 1 Agreement to be executed and attested by its proper officers, pursuant to the proper action of its governing body, as of the day and year first above written.

COMPOSITE AMENDMENT NO. 1

EXHIBIT A
Revised Project Costs

Authority	Valley Creek Trunk Sewer Agreement					Valley Forge Treatment Plant Agreement		East Whiteland Trunk Line Agreement	
	Overall Project		Park Construction						
	% of Total Cost(1)	Estimated Cost (Before Grants)	% of Total Cost (1)	Estimated Cost Before Grants	After Grants	% of Total Cost	Estimated Cost (Before Grants)	% of Total Cost(1)	Estimated Cost (Before Grants)
Valley Forge Sewer Auth.	0.17%	$ 18,931	0.51%	$ 12,821	$ 3,600	26.60%	$ 2,831,432	-	
Tredyffrin Twp. Mun. Auth.	39.03%	4,346,322	31.34%	787,888	220,600	19.90%	2,118,251	-	
East Whiteland Mun. Auth.	28.65%	3,190,421	35.48%	891,967	249,800	21.20%	2,256,630	68.89%	$658,448
Malvern Mun. Auth.	7.47%	831,848	9.34%	234,808	65,700	7.05%	750,436	31.11%	297,348
Willistown Twp. Mun. Auth.	11.83%	1,317,371	14.00%	351,960	98,600	13.30%	1,415,716	-	
Easttown Mun. Auth.	12.85%	1,430,957	9.33%	234,556	65,700	11.95%	1,272,015	-	
Total	100.00%	$11,135,850(2)	100.00%	$2,514,000	$704,000	100.00%	$10,644,480(3)	100.00%	$955,796

(1) Overall percentages are the same as those shown on original Exhibits and are solely for purposes of Section 2.03. Percentages of construction cost for individual sections of line (such as the Park Construction) vary, as shown in said Exhibits, based on relative anticipated use of each section by the various parties.
(2) Estimated construction cost $7,954,180.
(3) Estimated construction cost $7,884,800.

Re: Right to Know Request dated June 18, 2021

Dear Ms. Posternock:

I acknowledge receipt of your request for information pursuant to the Pennsylvania Right to Know Act. You have requested (electronic) copies of the following documents:

1. Composite Amendment No. 1 to the Valley Creek Trunk Sewer Agreement
2. East Whiteland Truck Line Agreement
3. Valley Forge Sewage Treatment Plant Agreement dated December 1, 1974
4. Addendum to Valley Forge Sewage Treatment Plant Agreement dated October 4, 1994

Your request for documents numbered 1 and 2 above is DENIED. The Township is not in possession of these documents.

Your request for document number 3 above is GRANTED and attached; however the Agreement in our possession is dated November, 1, 1970.
Your request for document number 4 above is GRANTED and attached; however the Agreement in our possession is dated May 26, 1994.

You have a right to appeal this denial of information in writing to the Office of Open Records, Commonwealth Keystone Building, 400 North Street, 4th Floor, Harrisburg, PA 17120. If you choose to file an appeal you must do so within 15 business days of the mailing date of the agency's response, as outlined in Section 1101. Please note that a copy of your original Right-to-Know request and this denial letter must be included when filing an appeal. The law also requires that you state the reasons why the record is a public record and address the reasons the Agency denies your request. Visit the Office of Open Records website at http://openrecords.state.pa.us for further information on filing an appeal.

Sincerely,

Linda M. Csete

RE: Right-to-Know Request

Township Manager Briggs,

On behalf of Thomas Wyatt, Esquire, I am submitting this Right-to-Know request seeking copies of the following documents:

1. **Composite Amendment No. 1 to the Valley Creek Trunk Sewer Agreement, the East Whiteland Trunk Line Agreement and the Valley Forge Sewage Treatment Plant Agreement dated December 1, 1974** between Tredyffrin Township Municipal Authority, Township of Tredyffrin, Township of Schuylkill, Township of East Pikeland, Township of Charlestown, Township of East Whiteland, Township of Willistown, Township of Easttown, Borough of Malvern, Valley Forge Sewer Authority, Malvern Municipal Authority, East Whiteland Municipal Authority, and Easttown Municipal Authority, including all signature pages

2. **December XX, 1999 – Wastewater Service Agreement** between Township of Easttown, Easttown Municipal Authority, and the Township of Willistown, including all dates and signature pages

Electronic delivery is preferred, if possible. Please let me know if there are costs associated with fulfilling this request and, if so, how I can go about remitting payment. Feel free to contact me via phone at (215) 665-3007 or email at susan.posternock@obermayer.com with questions or concerns related to this request.

Regards,
Susan Posternock

File/Dr

EASTTOWN TOWNSHIP

RESOLUTION APPROVING THE FORM AND AUTHORIZING THE EXECUTION OF COMPOSITE AMENDMENT NO. 1 TO CERTAIN SEWAGE TRANSPORTATION AND TREATMENT AGREEMENTS RELATED TO THE PROPOSED VALLEY FORGE TREATMENT PLANT.

WHEREAS, Easttown Township is a party to one or more of the following Agreements with various municipalities and authorities relating to the conveyance and treatment of sewage from collector sewers existing or to be built in this municipality at a proposed regional treatment plant (said agreements being referred to collectively herein as the "Original Agreements"):

Valley Creek Trunk Sewer Agreement dated November 1, 1970;
East Whiteland Trunk Line Agreement dated as of February, 1971;
Valley Forge Sewage Treatment Plant Agreement dated as of November 1, 1970; and

WHEREAS, all of the Original Agreements must be amended to revise the estimated project costs referred to therein and also it has been determined that one portion of the construction must be commenced prior to the balance of the project, but it is necessary that reasonable protection be given to Tredyffrin Township Municipal Authority which will be financing such construction initially with its own money; and

WHEREAS, there has been presented to this meeting a proposed Composite Amendment No. 1 date as of December 1, 1974 (the "Amendment") to the Original Agreement to carry out the above purposes and revise provisions of the Original Agreement as necessary in connection therewith;

Now, Therefore, it is hereby resolved by Easttown Township as follows:

1. The form of the Amendment, as presented to this meeting is hereby approved in all respects, and the Chairman of the Easttown Township Board of Supervisors and its Secretary are hereby authorized and directed on its behalf to execute and deliver the Amendment with any changes therein which they may approve upon the advice of counsel, said approval to be conclusively evidenced by their execution of said Amendment, and provided that such execution shall occur only after receipt of an Opinion by the Township Solicitor that the Township has legal power to execute the Amendment, such execution will not violate any applicable law and the Amendment is in proper form.

2. The proper officers of Easttown Township are authorized and empowered to take such action as they deem necessary or advisable to carry out the intention of the Amendment and this Resolution.

ADOPTED by the Board of Supervisors of Easttown Township this 6th Day of January 1975.

12-18-74

VALLEY CREEK TRUNK SEWER AGREEMENT
EAST WHITELAND TRUNK LINE AGREEMENT
VALLEY FORGE SEWAGE TREATMENT PLANT AGREEMENT

COMPOSITE AMENDMENT NO. 1

This Composite Amendment No. 1 dated as of December 1, 1974, to the Valley Creek Trunk Sewer Agreement dated November 1, 1970 (the "Valley Creek Agreement"), is entered between the parties to said Agreement, namely TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY (the "Tredyffrin Authority") a Pennsylvania municipality authority and the TOWNSHIP OF TREDYFFRIN ("Tredyffrin Township") parties of the first part, and the TOWNSHIPS OF SCHUYLKILL, EAST PIKELAND, CHARLESTOWN, EAST WHITELAND, WILLISTOWN and EASTTOWN (all of said Townships being second class townships in Chester County, Pennsylvania), the BOROUGH OF MALVERN, the VALLEY FORGE SEWER AUTHORITY, MALVERN MUNICIPAL AUTHORITY, EAST WHITELAND MUNICIPAL AUTHORITY and EASTTOWN MUNICIPAL AUTHORITY all being Pennsylvania municipality authorities, parties of the second part. Certain of the aforementioned parties are also parties to the East Whiteland Trunk Line Agreement dated as of February 1, 1971 (the "East Whiteland Agreement") and the Valley Forge Sewage Treatment Plant Agreement dated as of November 1, 1970 (the "Treatment Plant Agreement"), which are also being amended in certain respects hereby. All of the abovementioned Townships and the Borough of Malvern are sometimes herein referred to as the "Municipalities" and the above-named municipality authorities are sometimes referred to as the "Authorities".

BACKGROUND

The background of this Agreement is as follows:

A. The parties hereto entered into the Valley Creek Agreement to provide for sharing the cost of construction of the "Valley

Creek Trunk Sewer" as therein defined, and also in contemplation of the construction of (i) the "Valley Forge Treatment Plant" pursuant to the Treatment Plant Agreement; (ii) the East Whiteland Trunk Line, pursuant to the East Whiteland Agreement; and (iii) the sewage collection systems within each of the Municipalities designed to be served by the aforementioned facilities. All of the aforesaid construction was to have been commenced at substantially the same time because it is all interrelated, and it is herein referred to collectively as the "Project". Construction of the Project has been delayed for various reasons during which time construction costs have risen substantially.

B. It is now expected that the U. S. Government acting through the Environmental Protection Agency ("EPA") will shortly award grants to each of the Authorities in the amount of 75% of the actual eligible costs of the abovementioned collection systems, pursuant to the Federal Water Pollution Control Act Amendments of 1972. In addition, informal assurances have been received from EPA as to the likely increase of the grants for the Valley Creek Trunk Sewer and the Valley Forge Treatment Plant and other interceptors, as previously awarded conditionally, to 75% of the actual eligible costs, even though said grants were originally awarded under prior Federal law.

C. Award of the abovementioned new grants and authorization to proceed with construction under the old grants will be conditioned upon execution of a Supplement to Sewage Facility Grant Agreements, dated as of July 1, 1974 (the "EPA Agreement") between the parties hereto and EPA, which Agreement will also require the enactment of certain Ordinances by the Municipalities on or before December 31, 1974, as more fully provided in Section 2 of the EPA Agreement, substantially in the form of Exhibits A and B thereto.

D. The Valley Creek Trunk Sewer is indispensible to the transportation of sanitary sewage emanating from all the Munici-

palities to the Valley Forge Treatment Plant. The Pennsylvania Historical and Museum Commission (the "Park Commission") has informally indicated however, that it will not permit construction of the portions of the Valley Creek Trunk Sewer located within Valley Forge State Park, consisting of Contract "D" of the Tredyffrin Authority (the "Park Construction") during the years 1976 through 1978 because of the necessity to close completely an arterial road to carry out such construction. The construction will require approximately 12 months to complete.

E. In reviewing the plans for the Valley Forge Sewage Treatment Plant EPA has recently required certain changes which necessitate redesign of said Plant, and it is therefore unlikely that final approval of plans for said Plant will take place before March of 1975, which will prevent award of construction contracts for such construction until early summer of that year.

F. The Consulting Engineers for the parties have advised them that construction costs will continue to increase, and that it will be in their best interests to commence construction of all of the facilities mentioned in paragraph A as soon as possible after award of the abovementioned new grants.

G. Because work on the Park Construction must be commenced before other parts of the Project, the Tredyffrin Authority is willing to commence such construction separately, upon approval thereof by EPA, and subject to the further provisions of this Agreement.

H. The estimated project cost for the Park Construction has been estimated by the Consulting Engineers of Tredyffrin Authority at $2,500,000, approximately 75% of which will be reimbursed by Federal grants. The Tredyffrin Authority has available funds for the non-Federal portion of such costs, but because the Park Construction is intended for the joint use of all the other

parties hereto it is deemed advisable that said Authority be protected against having to bear the full loss in the unlikely event that there should be an indefinite delay in construction of the balance of the Project.

NOW, THEREFORE, the parties hereto, intending to be legally bound hereby agree as follows:

1. All terms defined in the abovementioned Agreements will have the same meaning when used herein.

2. Immediately upon execution hereof by all parties, the Tredyffrin Authority will advertise for construction bids for the Park Construction or at its option such portion thereof as the Park Commission determines must be completed before January of 1976. It will not award such contracts however, until receiving written approval from EPA for such action, including reasonable assurance that Tredyffrin Authority will receive prompt payment on account of the Federal grants for such construction as construction proceeds, at the rate of 75% of actual eligible costs incurred. In order that such approval of EPA may be received, the Municipalities agree to proceed as rapidly as possible with authorization and execution of the EPA Agreement and enactment of the related Ordinances. Tredyffrin Authority will use its best efforts to complete such construction as rapidly as possible, but if construction bids have not been received for the balance of the Project by August 30, 1975, Tredyffrin Authority may at its option suspend work on the Park Construction in order to minimize the damages which might otherwise result.

3. Tredyffrin Authority will pay the non-Federal portion of the costs of such construction from moneys it now has available, subject to reimbursement of their respective shares of the non-Federal portion thereof by the capital contributions of the other Authorities pursuant to Article II of the Valley Creek Agreement.

4. Exhibit "B" to the Valley Creek Agreement, Exhibit "D" of the Treatment Plant Agreement and Exhibit "B" of the East Whiteland Agreement are hereby amended to revise the estimated project cost to the new amounts set forth in Exhibit "A" attached hereto (which amounts have been derived from the original estimated project costs by a comparison of cost index figures in 1970 and 1974 as published in the Engineering News Record in the same manner as is described in the revised Section 2.03 below, and also adjusting for design changes in the Valley Creek Pump Station caused by the change in its location). Section 2.03 of the Valley Creek Agreement and the same numbered sections of the East Whiteland Agreement and the Treatment Plant Agreement are hereby further amended to read as follows:

> "2.03 Change in Project Cost. In the event, after receipt of Construction bids, the total project cost (before deducting any federal or state grants) of constructing the [insert applicable construction] exceeds by more than 15% the estimate as set forth in Amendment No. 1 hereto and as adjusted pursuant to the next paragraph hereof, and such revision in excess of 15% is not disapproved by the majority of said municipalities listed in Exhibit [insert appropriate Exhibit or insert 'Joint Board' in Treatment Plant Agreement] each municipality listed in such Exhibit shall pay its respective share of said increase over 15% to Authority by the time set forth in Section 2.02 hereof. However, in computing the amount to be so paid, each municipality may take credit for its appropriate share of 90% of the anticipated Federal Grants for the construction as calculated by the Consulting Engineers. In the event, after receipt of the last construction bids for the [insert applicable construction] the total project cost of such construction is less than the estimate, as set forth in said Amendment No. 1, the total payment to be made by each such municipality under Sections 2.01 and 2.02 hereof shall be proportionately reduced and refunds of payments made under Section 1.01 shall be made proportionately.
>
> The total estimated project cost of constructing the [insert applicable construction], for purposes of the preceding paragraph of this Section 2.03, shall be further adjusted from that set forth in Exhibit 'A' to Amendment No. 1, by multiplying the total project cost appearing in Amendment No. 1 by a factor obtained by dividing the most recent available Construction Cost Index factor for Philadelphia appearing in the 'Sewage Construction Cost Index in 20 Cities' table relating to sewer construction published in the Engineering News Record, projected on a straight line basis to the date of receipt of the last construction bids for such construction in a manner satisfactory to the Consulting Engineers

for the Tredyffrin Authority and the Valley Forge Authority by the October 1974 Construction Cost Index factor for Philadelphia appearing in the 'Sewage Construction Cost Index in 20 Cities' table relating to sewer construction published in the December 19, 1974 edution of Engineering News Record, at page 74 ."

5. To the extent that the Tredyffrin Authority pays any of the costs (as defined in the Original Agreement) for the Park Construction from its own funds, or funds it may borrow, prior to receipt of the Capital Contributions from the other Authorities under the Valley Creek Agreement, such contributions when made will include, not only reimbursement for their respective shares of such cost pursuant to Section 2 above, but also interest on such shares of the amounts advanced by the Tredyffrin Authority, from the dates the respective advances are made to the date of reimbursement, at a rate equal to the highest rate paid by any one of the three following Philadelphia Banks from time to time on 30 day certificates of deposit as determined on the 15th day of each month: Central Penn National Bank; Continental Bank; and The Philadelphia National Bank.

6. In the event that for any reason the openings of construction bids for the balance of the Valley Creek Trunk Sewer and other portions of the Project are delayed for any reason, so that no capital contributions are paid under the Valley Creek Agreement, the other Authorities and Municipalities will reimburse Tredyffrin Authority for their respective percentages of the costs incurred by Tredyffrin Authority (less Federal grant moneys received) for the Park Construction plus interest as aforesaid, said obligations to be several and not joint however, and further provided that said reimbursements will be payable only from the proceeds of the next sewer bond issue, whenever that may occur, by each Authority, by its incorporating Municipality, or by any other municipality authority created by such Municipality, concurrently with the closing in such bond issues or from any other available funds. For this purpose a bond issue by the Valley Forge Authority will be treated as a bond issue for all of its three member Municipalities. Also, independently of the preceding two sentences, the Authorities

(but not the Municipalities) separately agree to make such repayment, without any limitation upon source, not later than two years after the date of the first advance by the Tredyffrin Authority.

7. All the Authorities will proceed to advertise for construction bids for their respective portions of the Project as soon as possible after receipt of Federal grants for the collection systems, but only upon approval of EPA for such advertising, and upon advice by the Valley Forge Authority that EPA has approved or is expected to approve advertising for construction bids for the Valley Forge Treatment Plant in sufficient time that construction bids will be received on the Treatment Plant by a date not more than 60 days after the receipt of bids for all other parts of the Project.

8. Except as modified herein the Valley Creek Agreement, the Treatment Plant Agreement and the East Whiteland Agreement are hereby ratified and confirmed.

9. This Agreement may be executed in any number of counterparts each of which may be deemed an original.

10. This Agreement shall not become effective until the formal Federal grant offers (which under applicable law are required to be in amounts equal to 75% of eligible costs) for the collection system portion of the Project have been received by all the Authorities, which grants however may be conditioned upon the execution of the EPA Agreement by all parties hereto.

11. Execution of this Composite Amendment to the above-mentioned three Agreements shall not be construed as making any Municipality or Authority a party to any Agreement to which it has not previously been a party, nor as merging any of said Agreements, which shall remain separate Agreements for all purposes.

IN WITNESS WHEREOF, each of the parties hereto has caused this Composite Amendment No. 1 Agreement to be executed and attested by its proper officers, pursuant to the proper action of its governing body, as of the day and year first above written.

Good afternoon Susan,

Please see the attached copy of the December 1, 1974 agreement. Unfortunately, I was unable to locate a fully signed copy, so this is the best I can do.

Please let me know if you have any questions. Thank you.

Subject: FW: Open Records request from Obermayer 6.21.21

Christopher,

I hate to revisit this but it's been brought to my attention that we do still need a copy of the December 1, 1974 agreement. I think you mentioned oddly shaped attachments that would be impossible to scan and, of course, we do not need those. Just whatever pages that you can provide easily. Do you have that available? Would you be able to send a copy? And if so, would you like me to send a new Open Records request with today's date? Please advise.

Thank you,
Susan Posternock

Subject: Open Records request from Obermayer 6.21.21

Borough Manager Bashore,

Please see the attached Open Records request. Please let me know if there are costs associated with fulfilling this request and, if so, how I can go about remitting payment. Electronic delivery of the requested documents is preferred, if possible. Feel free to contact me via phone at (215) 665-3007 or email at susan.posternock@obermayer.com with questions or concerns related to this request.

Regards,
Susan Posternock

VALLEY CREEK TRUNK SEWER AGREEMENT
EAST WHITELAND TRUNK LINE AGREEMENT
VALLEY FORGE SEWAGE TREATMENT PLANT AGREEMENT

COMPOSITE AMENDMENT NO. 1

This Composite Amendment No. 1 dated as of December 1, 1974, to the Valley Creek Trunk Sewer Agreement dated November 1, 1970 (the "Valley Creek Agreement"), is entered between the parties to said Agreement, namely TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY (the "Tredyffrin Authority") a Pennsylvania municipality authority and the TOWNSHIP OF TREDYFFRIN ("Tredyffrin Township") parties of the first part, and the TOWNSHIPS OF SCHUYLKILL, EAST PIKELAND, CHARLESTOWN, EAST WHITELAND, WILLISTOWN and EASTTOWN (all of said Townships being second class townships in Chester County, Pennsylvania), the BOROUGH OF MALVERN, the VALLEY FORGE SEWER AUTHORITY, MALVERN MUNICIPAL AUTHORITY, EAST WHITELAND MUNICIPAL AUTHORITY and EASTTOWN MUNICIPAL AUTHORITY all being Pennsylvania municipality authorities, parties of the second part. Certain of the aforementioned parties are also parties to the East Whiteland Trunk Line Agreement dated as of February 1, 1971 (the "East Whiteland Agreement") and the Valley Forge Sewage Treatment Plant Agreement dated as of November 1, 1970 (the "Treatment Plant Agreement"), which are also being amended in certain respects hereby. All of the abovementioned Townships and the Borough of Malvern are sometimes herein referred to as the "Municipalities" and the above-named municipality authorities are sometimes referred to as the "Authorities".

BACKGROUND

The background of this Agreement is as follows:

A. The parties hereto entered into the Valley Creek Agreement to provide for sharing the cost of construction of the "Valley

Creek Trunk Sewer" as therein defined, and also in contemplation of the construction of (i) the "Valley Forge Treatment Plant" pursuant to the Treatment Plant Agreement; (ii) the East Whiteland Trunk Line, pursuant to the East Whiteland Agreement; and (iii) the sewage collection systems within each of the Municipalities designed to be served by the aforementioned facilities. All of the aforesaid construction was to have been commenced at substantially the same time because it is all interrelated, and it is herein referred to collectively as the "Project". Construction of the Project has been delayed for various reasons during which time construction costs have risen substantially.

B. It is now expected that the U. S. Government acting through the Environmental Protection Agency ("EPA") will shortly award grants to each of the Authorities in the amount of 75% of the actual eligible costs of the abovementioned collection systems, pursuant to the Federal Water Pollution Control Act Amendments of 1972. In addition, informal assurances have been received from EPA as to the likely increase of the grants for the Valley Creek Trunk Sewer and the Valley Forge Treatment Plant and other interceptors, as previously awarded conditionally, to 75% of the actual eligible costs, even though said grants were originally awarded under prior Federal law.

C. Award of the abovementioned new grants and authorization to proceed with construction under the old grants will be conditioned upon execution of a Supplement to Sewage Facility Grant Agreements, dated as of July 1, 1974 (the "EPA Agreement") between the parties hereto and EPA, which Agreement will also require the enactment of certain Ordinances by the Municipalities on or before December 31, 1974, as more fully provided in Section 2 of the EPA Agreement, substantially in the form of Exhibits A and B thereto.

D. The Valley Creek Trunk Sewer is indispensible to the transportation of sanitary sewage emanating from all the Munici-

palities to the Valley Forge Treatment Plant. The Pennsylvania Historical and Museum Commission (the "Park Commission") has informally indicated however, that it will not permit construction of the portions of the Valley Creek Trunk Sewer located within Valley Forge State Park, consisting of Contract "D" of the Tredyffrin Authority (the "Park Construction") during the years 1976 through 1978 because of the necessity to close completely an arterial road to carry out such construction. The construction will require approximately 12 months to complete.

E. In reviewing the plans for the Valley Forge Sewage Treatment Plant EPA has recently required certain changes which necessitate redesign of said Plant, and it is therefore unlikely that final approval of plans for said Plant will take place before March of 1975, which will prevent award of construction contracts for such construction until early summer of that year.

F. The Consulting Engineers for the parties have advised them that construction costs will continue to increase, and that it will be in their best interests to commence construction of all of the facilities mentioned in paragraph A as soon as possible after award of the abovementioned new grants.

G. Because work on the Park Construction must be commenced before other parts of the Project, the Tredyffrin Authority is willing to commence such construction separately, upon approval thereof by EPA, and subject to the further provisions of this Agreement.

H. The estimated project cost for the Park Construction has been estimated by the Consulting Engineers of Tredyffrin Authority at $2,500,000, approximately 75% of which will be reimbursed by Federal grants. The Tredyffrin Authority has available funds for the non-Federal portion of such costs, but because the Park Construction is intended for the joint use of all the other

parties hereto it is deemed advisable that said Authority be protected against having to bear the full loss in the unlikely event that there should be an indefinite delay in construction of the balance of the Project.

NOW, THEREFORE, the parties hereto, intending to be legally bound hereby agree as follows:

1. All terms defined in the abovementioned Agreements will have the same meaning when used herein.

2. Immediately upon execution hereof by all parties, the Tredyffrin Authority will advertise for construction bids for the Park Construction or at its option such portion thereof as the Park Commission determines must be completed before January of 1976. It will not award such contracts however, until receiving written approval from EPA for such action, including reasonable assurance that Tredyffrin Authority will receive prompt payment on account of the Federal grants for such construction as construction proceeds, at the rate of 75% of actual eligible costs incurred. In order that such approval of EPA may be received, the Municipalities agree to proceed as rapidly as possible with authorization and execution of the EPA Agreement and enactment of the related Ordinances. Tredyffrin Authority will use its best efforts to complete such construction as rapidly as possible, but if construction bids have not been received for the balance of the Project by August 30, 1975, Tredyffrin Authority may at its option suspend work on the Park Construction in order to minimize the damages which might otherwise result.

3. Tredyffrin Authority will pay the non-Federal portion of the costs of such construction from moneys it now has available, subject to reimbursement of their respective shares of the non-Federal portion thereof by the capital contributions of the other Authorities pursuant to Article II of the Valley Creek Agreement.

4. Exhibit "B" to the Valley Creek Agreement, Exhibit "D" of the Treatment Plant Agreement and Exhibit "B" of the East Whiteland Agreement are hereby amended to revise the estimated project cost to the new amounts set forth in Exhibit "A" attached hereto (which amounts have been derived from the original estimated project costs by a comparison of cost index figures in 1970 and 1974 as published in the Engineering News Record in the same manner as is described in the revised Section 2.03 below, and also adjusting for design changes in the Valley Creek Pump Station caused by the change in its location). Section 2.03 of the Valley Creek Agreement and the same numbered sections of the East Whiteland Agreement and the Treatment Plant Agreement are hereby further amended to read as follows:

> "2.03 Change in Project Cost. In the event, after receipt of Construction bids, the total project cost (before deducting any federal or state grants) of constructing the [insert applicable construction] exceeds by more than 15% the estimate as set forth in Amendment No. 1 hereto and as adjusted pursuant to the next paragraph hereof, and such revision in excess of 15% is not disapproved by the majority of said municipalities listed in Exhibit [insert appropriate Exhibit or insert 'Joint Board' in Treatment Plant Agreement] each municipality listed in such Exhibit shall pay its respective share of said increase over 15% to Authority by the time set forth in Section 2.02 hereof. However, in computing the amount to be so paid, each municipality may take credit for its appropriate share of 90% of the anticipated Federal Grants for the construction as calculated by the Consulting Engineers. In the event, after receipt of the last construction bids for the [insert applicable construction] the total project cost of such construction is less than the estimate, as set forth in said Amendment No. 1, the total payment to be made by each such municipality under Sections 2.01 and 2.02 hereof shall be proportionately reduced and refunds of payments made under Section 1.01 shall be made proportionately.
>
> The total estimated project cost of constructing the [insert applicable construction], for purposes of the preceding paragraph of this Section 2.03, shall be further adjusted from that set forth in Exhibit 'A' to Amendment No. 1, by multiplying the total project cost appearing in Amendment No. 1 by a factor obtained by dividing the most recent available Construction Cost Index factor for Philadelphia appearing in the 'Sewage Construction Cost Index in 20 Cities' table relating to sewer construction published in the Engineering News Record, projected on a straight line basis to the date of receipt of the last construction bids for such construction in a manner satisfactory to the Consulting Engineers

for the Tredyffrin Authority and the Valley Forge Authority by the October 1974 Construction Cost Index factor for Philadelphia appearing in the 'Sewage Construction Cost Index in 20 Cities' table relating to sewer construction published in the December 19, 1974 edution of Engineering News Record, at page 74 ."

5. To the extent that the Tredyffrin Authority pays any of the costs (as defined in the Original Agreement) for the Park Construction from its own funds, or funds it may borrow, prior to receipt of the Capital Contributions from the other Authorities under the Valley Creek Agreement, such contributions when made will include, not only reimbursement for their respective shares of such cost pursuant to Section 2 above, but also interest on such shares of the amounts advanced by the Tredyffrin Authority, from the dates the respective advances are made to the date of reimbursement, at a rate equal to the highest rate paid by any one of the three following Philadelphia Banks from time to time on 30 day certificates of deposit as determined on the 15th day of each month: Central Penn National Bank; Continental Bank; and The Philadelphia National Bank.

6. In the event that for any reason the openings of construction bids for the balance of the Valley Creek Trunk Sewer and other portions of the Project are delayed for any reason, so that no capital contributions are paid under the Valley Creek Agreement, the other Authorities and Municipalities will reimburse Tredyffrin Authority for their respective percentages of the costs incurred by Tredyffrin Authority (less Federal grant moneys received) for the Park Construction plus interest as aforesaid, said obligations to be several and not joint however, and further provided that said reimbursements will be payable only from the proceeds of the next sewer bond issue, whenever that may occur, by each Authority, by its incorporating Municipality, or by any other municipality authority created by such Municipality, concurrently with the closing in such bond issues or from any other available funds. For this purpose a bond issue by the Valley Forge Authority will be treated as a bond issue for all of its three member Municipalities. Also, independently of the preceding two sentences, the Authorities

(but not the Municipalities) separately agree to make such repayment, without any limitation upon source, not later than two years after the date of the first advance by the Tredyffrin Authority.

7. All the Authorities will proceed to advertise for construction bids for their respective portions of the Project as soon as possible after receipt of Federal grants for the collection systems, but only upon approval of EPA for such advertising, and upon advice by the Valley Forge Authority that EPA has approved or is expected to approve advertising for construction bids for the Valley Forge Treatment Plant in sufficient time that construction bids will be received on the Treatment Plant by a date not more than 60 days after the receipt of bids for all other parts of the Project.

8. Except as modified herein the Valley Creek Agreement, the Treatment Plant Agreement and the East Whiteland Agreement are hereby ratified and confirmed.

9. This Agreement may be executed in any number of counterparts each of which may be deemed an original.

10. This Agreement shall not become effective until the formal Federal grant offers (which under applicable law are required to be in amounts equal to 75% of eligible costs) for the collection system portion of the Project have been received by all the Authorities, which grants however may be conditioned upon the execution of the EPA Agreement by all parties hereto.

11. Execution of this Composite Amendment to the above-mentioned three Agreements shall not be construed as making any Municipality or Authority a party to any Agreement to which it has not previously been a party, nor as merging any of said Agreements, which shall remain separate Agreements for all purposes.

IN WITNESS WHEREOF, each of the parties hereto has caused this Composite Amendment No. 1 Agreement to be executed and attested by its proper officers, pursuant to the proper action of its governing body, as of the day and year first above written.

RE: Right-to-Know Request Received June 21, 2021

Schuylkill Township (the "Agency") is in receipt of your request for information pursuant to the Pennsylvania Right-to-Know Law ("RTKL), 65 P.S. 67.101, *et. seq.* On January 7, 2021, you requested copies of certain amendments to the Valley Creek Trunk Sewer Agreement, the East Whiteland Trunk Line Agreement and the Valley Forge Sewer Plant Agreement. Pursuant to Section 902(a) of the Right to Know Law, the Agency's OOR requires an additional 30 days to respond because (check all that apply):

- ☐ The request for access requires redaction of a record in accordance with Section 706 of the RTKL;
- ☒ The request for access requires the retrieval of a record stored in a remote location;
- ☒ A timely response to the request for records cannot be accomplished due to bona fide and specific staffing limitations.
- ☒ A legal review is necessary to determine whether the record is a record subject to access under the RTKL;
- ☐ The requester has not complied with the Agency's policies regarding access to records;
- ☐ The requester refuses to pay applicable fees authorized by the RTKL;
- ☐ The extent or nature of the request precludes a response within the required time period.

The Agency expects to respond to your request on or before July 26, 2021. Any applicable fees related to your request will be communicated at that time.

Sincerely,

Edward M. Mentry Jr.

RE: Right-to-Know Request

Township Manager Mentry,

On behalf of Thomas Wyatt, Esquire, I am submitting this Right to Know request seeking copies of the following documents:

1. **Composite Amendment No. 1 to the Valley Creek Trunk Sewer Agreement, the East Whiteland Trunk Line Agreement and the Valley Forge Sewage Treatment Plant Agreement dated December 1, 1974** between Tredyffrin Township Municipal Authority, Township of Tredyffrin, Township of Schuylkill, Township of East Pikeland, Township of Charlestown, Township of East Whiteland, Township of Willistown, Township of Easttown, Borough of Malvern, Valley Forge Sewer Authority, Malvern Municipal Authority, East Whiteland Municipal Authority, and Easttown Municipal Authority, including all signature pages.

2. **October 4, 1994 – Addendum to Valley Forge Sewage Treatment Plant Agreement for the Purpose of Permitting and Administering the Sale of Reserved Capacity Among the Parties** between Valley Forge Sewer Authority, the Townships of Schuylkill, East Pikeland,

Charlestown, East Whiteland, Tredyffrin, Willistown, and Easttown; the Borough of Malvern; East Whiteland Township Municipal Authority; Easttown Municipal Authority; and Tredyffrin Township Municipal Authority (Addendum to Nov. 1, 1970 Agreement), including all signature pages.

Electronic delivery is preferred, if possible. Please let me know if there are costs associated with fulfilling this request and, if so, how I can go about remitting payment. Feel free to contact me via phone at (215) 665-3007 or email at susan.posternock@obermayer.com with questions or concerns related to this request.

Regards,

Susan Posternock

Copies of the records:

Copies will be provided on site only. See current fee schedule as established by the Township in compliance with the Right-To-Know Law for copy fees.

Due to restrictions imposed by the Federal Protection Copyright Act, the Township cannot make copies of building, site, or subdivision & land development plans, including sealed architectural and engineered plans. The plans may be inspected by the requester at the Township offices, but may not photocopied or photographed. This restriction also applies to Zoning Hearing Board transcripts and other documents prepared by a professional stenographer.

Records Requested:

Please specify address(es) requested for review.

-

Please provide subdivision name, if applicable.

Not answered

Please provide as much detail as possible so that Township staff may identify the specific information being requested (document type, format, time frame, etc). RTKL requests should seek records, not ask questions. Requesters are not required to explain why the records are sought or the intended use of the records unless otherwise required by law. Be clear and concise.

Good afternoon. On behalf of Thomas Wyatt, Esquire, I am submitting this Right-to-Know request seeking copies of the following documents:

1. Composite Amendment No. 1 to the Valley Creek Trunk Sewer Agreement, the East Whiteland Trunk Line Agreement and the Valley Forge Sewage Treatment Plant Agreement dated December 1, 1974 between Tredyffrin Township Municipal Authority, Township of Tredyffrin, Township of Schuylkill, Township of East Pikeland, Township of Charlestown, Township of East Whiteland, Township of Willistown, Township of Easttown, Borough of Malvern, Valley Forge Sewer Authority, Malvern Municipal Authority, East Whiteland Municipal Authority, and Easttown Municipal Authority, including all signature pages.

2. October 4, 1994 – Addendum to Valley Forge Sewage Treatment Plant Agreement for the Purpose of Permitting and Administering the Sale of Reserved Capacity Among the Parties between Valley Forge Sewer Authority, the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown, and Easttown; the Borough of Malvern; East Whiteland Township Municipal Authority; Easttown Municipal Authority; and Tredyffrin Township Municipal Authority (Addendum to Nov. 1, 1970 Agreement), including all signature pages.

Electronic delivery is preferred, if possible. Please let me know if there are costs associated with fulfilling this request and, if so, how I can go about remitting payment. Feel free to contact me via phone at (215) 665-3007 or email at susan.posternock@obermayer.com with questions or concerns related to this request.

VALLEY CREEK TRUNK SEWER AGREEMENT
EAST WHITELAND TRUNK LINE AGREEMENT
VALLEY FORGE SEWAGE TREATMENT PLANT AGREEMENT

subject Valley Creek Construction thru UFNHP

COMPOSITE AMENDMENT NO. 1

This Composite Amendment No. 1 dated as of December 1, 1974, to the Valley Creek Trunk Sewer Agreement dated November 1, 1970 (the "Valley Creek Agreement"), is entered between the parties to said Agreement, namely TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY (the "Tredyffrin Authority") a Pennsylvania municipality authority and the TOWNSHIP OF TREDYFFRIN ("Tredyffrin Township") parties of the first part, and the TOWNSHIPS OF SCHUYLKILL, EAST PIKELAND, CHARLESTOWN, EAST WHITELAND, WILLISTOWN and EASTTOWN (all of said Townships being second class townships in Chester County, Pennsylvania), the BOROUGH OF MALVERN, the VALLEY FORGE SEWER AUTHORITY, MALVERN MUNICIPAL AUTHORITY, EAST WHITELAND MUNICIPAL AUTHORITY and EASTTOWN MUNICIPAL AUTHORITY all being Pennsylvania municipality authorities, parties of the second part. Certain of the aforementioned parties are also parties to the East Whiteland Trunk Line Agreement dated as of February 1, 1971 (the "East Whiteland Agreement") and the Valley Forge Sewage Treatment Plant Agreement dated as of November 1, 1970 (the "Treatment Plant Agreement"), which are also being amended in certain respects hereby. All of the abovementioned Townships and the Borough of Malvern are sometimes herein referred to as the "Municipalities" and the above-named municipality authorities are sometimes referred to as the "Authorities".

BACKGROUND

The background of this Agreement is as follows:

A. The parties hereto entered into the Valley Creek Agreement to provide for sharing the cost of construction of the "Valley

Creek Trunk Sewer" as therein defined, and also in contemplation of the construction of (i) the "Valley Forge Treatment Plant" pursuant to the Treatment Plant Agreement; (ii) the East Whiteland Trunk Line, pursuant to the East Whiteland Agreement; and (iii) the sewage collection systems within each of the Municipalities designed to be served by the aforementioned facilities. All of the aforesaid construction was to have been commenced at substantially the same time because it is all interrelated, and it is herein referred to collectively as the "Project". Construction of the Project has been delayed for various reasons during which time construction costs have risen substantially.

B. It is now expected that the U. S. Government acting through the Environmental Protection Agency ("EPA") will shortly award grants to each of the Authorities in the amount of 75% of the actual eligible costs of the abovementioned collection systems, pursuant to the Federal Water Pollution Control Act Amendments of 1972. In addition, informal assurances have been received from EPA as to the likely increase of the grants for the Valley Creek Trunk Sewer and the Valley Forge Treatment Plant and other interceptors, as previously awarded conditionally, to 75% of the actual eligible costs, even though said grants were originally awarded under prior Federal law.

C. Award of the abovementioned new grants and authorization to proceed with construction under the old grants will be conditioned upon execution of a Supplement to Sewage Facility Grant Agreements, dated as of July 1, 1974 (the "EPA Agreement") between the parties hereto and EPA, which Agreement will also require the enactment of certain Ordinances by the Municipalities on or before December 31, 1974, as more fully provided in Section 2 of the EPA Agreement, substantially in the form of Exhibits A and B thereto.

D. The Valley Creek Trunk Sewer is indispensible to the transportation of sanitary sewage emanating from all the Munici-

palities to the Valley Forge Treatment Plant. The Pennsylvania Historical and Museum Commission (the "Park Commission") has informally indicated however, that it will not permit construction of the portions of the Valley Creek Trunk Sewer located within Valley Forge State Park, consisting of Contract "D" of the Tredyffrin Authority (the "Park Construction") during the years 1976 through 1978 because of the necessity to close completely an arterial road to carry out such construction. The construction will require approximately 12 months to complete.

E. In reviewing the plans for the Valley Forge Sewage Treatment Plant EPA has recently required certain changes which necessitate redesign of said Plant, and it is therefore unlikely that final approval of plans for said Plant will take place before March of 1975, which will prevent award of construction contracts for such construction until early summer of that year.

F. The Consulting Engineers for the parties have advised them that construction costs will continue to increase, and that it will be in their best interests to commence construction of all of the facilities mentioned in paragraph A as soon as possible after award of the abovementioned new grants.

G. Because work on the Park Construction must be commenced before other parts of the Project, the Tredyffrin Authority is willing to commence such construction separately, upon approval thereof by EPA, and subject to the further provisions of this Agreement.

H. The estimated project cost for the Park Construction has been estimated by the Consulting Engineers of Tredyffrin Authority at $2,500,000, approximately 75% of which will be reimbursed by Federal grants. The Tredyffrin Authority has available funds for the non-Federal portion of such costs, but because the Park Construction is intended for the joint use of all the other

parties hereto it is deemed advisable that said Authority be protected against having to bear the full loss in the unlikely event that there should be an indefinite delay in construction of the balance of the Project.

NOW, THEREFORE, the parties hereto, intending to be legally bound hereby agree as follows:

1. All terms defined in the abovementioned Agreements will have the same meaning when used herein.

2. Immediately upon execution hereof by all parties, the Tredyffrin Authority will advertise for construction bids for the Park Construction or at its option such portion thereof as the Park Commission determines must be completed before January of 1976. It will not award such contracts however, until receiving written approval from EPA for such action, including reasonable assurance that Tredyffrin Authority will receive prompt payment on account of the Federal grants for such construction as construction proceeds, at the rate of 75% of actual eligible costs incurred. In order that such approval of EPA may be received, the Municipalities agree to proceed as rapidly as possible with authorization and execution of the EPA Agreement and enactment of the related Ordinances. Tredyffrin Authority will use its best efforts to complete such construction as rapidly as possible, but if construction bids have not been received for the balance of the Project by August 30, 1975, Tredyffrin Authority may at its option suspend work on the Park Construction in order to minimize the damages which might otherwise result.

3. Tredyffrin Authority will pay the non-Federal portion of the costs of such construction from moneys it now has available, subject to reimbursement of their respective shares of the non-Federal portion thereof by the capital contributions of the other Authorities pursuant to Article II of the Valley Creek Agreement.

4. Exhibit "B" to the Valley Creek Agreement, Exhibit "D" of the Treatment Plant Agreement and Exhibit "B" of the East Whiteland Agreement are hereby amended to revise the estimated project cost to the new amounts set forth in Exhibit "A" attached hereto (which amounts have been derived from the original estimated project costs by a comparison of cost index figures in 1970 and 1974 as published in the Engineering News Record in the same manner as is described in the revised Section 2.03 below, and also adjusting for design changes in the Valley Creek Pump Station caused by the change in its location). Section 2.03 of the Valley Creek Agreement and the same numbered sections of the East Whiteland Agreement and the Treatment Plant Agreement are hereby further amended to read as follows:

> "2.03 Change in Project Cost. In the event, after receipt of Construction bids, the total project cost (before deducting any federal or state grants) of constructing the [insert applicable construction] exceeds by more than 15% the estimate as set forth in Amendment No. 1 hereto and as adjusted pursuant to the next paragraph hereof, and such revision in excess of 15% is not disapproved by the majority of said municipalities listed in Exhibit [insert appropriate Exhibit or insert 'Joint Board' in Treatment Plant Agreement] each municipality listed in such Exhibit shall pay its respective share of said increase over 15% to Authority by the time set forth in Section 2.02 hereof. However, in computing the amount to be so paid, each municipality may take credit for its appropriate share of 90% of the anticipated Federal Grants for the construction as calculated by the Consulting Engineers. In the event, after receipt of the last construction bids for the [insert applicable construction] the total project cost of such construction is less than the estimate, as set forth in said Amendment No. 1, the total payment to be made by each such municipality under Sections 2.01 and 2.02 hereof shall be proportionately reduced and refunds of payments made under Section 1.01 shall be made proportionately.
>
> The total estimated project cost of constructing the [insert applicable construction], for purposes of the preceding paragraph of this Section 2.03, shall be further adjusted from that set forth in Exhibit 'A' to Amendment No. 1, by multiplying the total project cost appearing in Amendment No. 1 by a factor obtained by dividing the most recent available Construction Cost Index factor for Philadelphia appearing in the 'Sewage Construction Cost Index in 20 Cities' table relating to sewer construction published in the Engineering News Record, projected on a straight line basis to the date of receipt of the last construction bids for such construction in a manner satisfactory to the Consulting Engineers

for the Tredyffrin Authority and the Valley Forge Authority by the October 1974 Construction Cost Index factor for Philadelphia appearing in the 'Sewage Construction Cost Index in 20 Cities' table relating to sewer construction published in the December 19, 1974 edution of Engineering News Record, at page 74 ."

5. To the extent that the Tredyffrin Authority pays any of the costs (as defined in the Original Agreement) for the Park Construction from its own funds, or funds it may borrow, prior to receipt of the Capital Contributions from the other Authorities under the Valley Creek Agreement, such contributions when made will include, not only reimbursement for their respective shares of such cost pursuant to Section 2 above, but also interest on such shares of the amounts advanced by the Tredyffrin Authority, from the dates the respective advances are made to the date of reimbursement, at a rate equal to the highest rate paid by any one of the three following Philadelphia Banks from time to time on 30 day certificates of deposit as determined on the 15th day of each month: Central Penn National Bank; Continental Bank; and The Philadelphia National Bank.

6. In the event that for any reason the openings of construction bids for the balance of the Valley Creek Trunk Sewer and other portions of the Project are delayed for any reason, so that no capital contributions are paid under the Valley Creek Agreement, the other Authorities and Municipalities will reimburse Tredyffrin Authority for their respective percentages of the costs incurred by Tredyffrin Authority (less Federal grant moneys received) for the Park Construction plus interest as aforesaid, said obligations to be several and not joint however, and further provided that said reimbursements will be payable only from the proceeds of the next sewer bond issue, whenever that may occur, by each Authority, by its incorporating Municipality, or by any other municipality authority created by such Municipality, concurrently with the closing in such bond issues or from any other available funds. For this purpose a bond issue by the Valley Forge Authority will be treated as a bond issue for all of its three member Municipalities. Also, independently of the preceding two sentences, the Authorities

(but not the Municipalities) separately agree to make such repayment, without any limitation upon source, not later than two years after the date of the first advance by the Tredyffrin Authority.

7. All the Authorities will proceed to advertise for construction bids for their respective portions of the Project as soon as possible after receipt of Federal grants for the collection systems, but only upon approval of EPA for such advertising, and upon advice by the Valley Forge Authority that EPA has approved or is expected to approve advertising for construction bids for the Valley Forge Treatment Plant in sufficient time that construction bids will be received on the Treatment Plant by a date not more than 60 days after the receipt of bids for all other parts of the Project.

8. Except as modified herein the Valley Creek Agreement, the Treatment Plant Agreement and the East Whiteland Agreement are hereby ratified and confirmed.

9. This Agreement may be executed in any number of counterparts each of which may be deemed an original.

10. This Agreement shall not become effective until the formal Federal grant offers (which under applicable law are required to be in amounts equal to 75% of eligible costs) for the collection system portion of the Project have been received by all the Authorities, which grants however may be conditioned upon the execution of the EPA Agreement by all parties hereto.

11. Execution of this Composite Amendment to the above-mentioned three Agreements shall not be construed as making any Municipality or Authority a party to any Agreement to which it has not previously been a party, nor as merging any of said Agreements, which shall remain separate Agreements for all purposes.

IN WITNESS WHEREOF, each of the parties hereto has caused this Composite Amendment No. 1 Agreement to be executed and attested by its proper officers, pursuant to the proper action of its governing body, as of the day and year first above written.

Estimated construction cost $7,884,800.

EXHIBIT F3

AMENDMENT TO VALLEY FORGE SEWER TREATMENT PLANT AGREEMENT, DATED JANUARY 1, 1983, BY AND BETWEEN VALLEY FORGE SEWER AUTHORITY; THE TOWNSHIPS OF SCHUYLKILL, EAST PIKELAND, CHARLESTOWN, EAST WHITELAND, TREDYFFRIN, WILLISTOWN, AND EASTTOWN; THE BOROUGH OF MALVERN; MALVERN MUNICIPAL AUTHORITY; EAST WHITELAND MUNICIPAL AUTHORITY; EASTTOWN MUNICIPAL AUTHORITY; TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY; AND WILLISTOWN TOWNSHIP MUNICIPAL AUTHORITY

Amend. #

AMENDMENT TO VALLEY FORGE
SEWER TREATMENT PLANT AGREEMENT

THIS AMENDMENT, dated as of January 1, 1983, to the Valley Forge Sewer Treatment Plant Agreement dated as of November 1, 1970, is entered into between the parties to said Agreement, namely, Valley Forge Sewer Authority, the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown and Easttown, the Borough of Malvern, Malvern Municipal Authority, East Whiteland Municipal Authority, Easttown Municipal Authority, Tredyffrin Township Municipal Authority and Willistown Township Municipal Authority.

Said Agreement, as it has previously been amended, is hereby further amended to provide that commencing January 1, 1983, all amounts not paid by any municipality or municipal authority when due shall be subject to interest at a rate equal to the prime rate charged for the loan of money by Continental Bank, or its successors, as the same may be adjusted by said Bank, or its successors, from time to time. If Continental Bank and its successors cease to exist, the Joint Board shall select another bank and its successors, which upon selection by the Joint Board shall be automatically substituted for Continental Bank and its successors.

The intent of this Amendment, commencing January 1, 1983, is merely to substitute a flexible rate as above provided wherever

said Agreement provides for a fixed rate of six percent per annum. This Amendment shall be so construed.

This Amendment may be executed in any number of counterparts, each of which may be deemed an original.

IN WITNESS WHEREOF, each of the parties hereto has caused this Amendment to be executed and attested by its proper officers, pursuant to the proper action or its governing body, as of the day and year first above written.

EXHIBIT F4

SUPPLEMENT TO VALLEY FORGE SEWAGE TREATMENT PLANT AGREEMENT FOR THE PURPOSE OF COMPLYING WITH UNITED STATES ENVIRONMENTAL PROTECTION AGENCY REGULATIONS, DATED DECEMBER 2, 1985, BY AND BETWEEN VALLEY FORGE SEWER AUTHORITY; THE TOWNSHIPS OF SCHUYLKILL, EAST PIKELAND, CHARLESTOWN, EAST WHITELAND, TREDYFFRIN, WILLISTOWN, AND EASTOWN; THE BOROUGH OF MALVERN; MALVERN MUNICIPAL AUTHORITY; EAST WHITELAND MUNICIPAL AUTHORITY; TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY; EASTTOWN TOWNSHIP MUNICIPAL AUTHORITY, AND WILLISTOWN TOWNSHIP MUNICIPAL AUTHORITY

RECEIVED

SUPPLEMENT TO VALLEY FORGE SEWAGE TREATMENT PLANT AGREEMENT FOR THE PURPOSE OF COMPLYING WITH UNITED STATES ENVIRONMENTAL PROTECTION AGENCY REGULATIONS

THIS SUPPLEMENT dated as of December 2, 1985 to the Valley Forge Sewage Treatment Plant Agreement dated as of November 1, 1970, as previously amended, (hereinafter called Agreement) is entered into between the parties to said Agreement, namely, Valley Forge Sewer Authority (hereinafter called Authority), the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown and Easttown, the Borough of Malvern, Malvern Municipal Authority, East Whiteland Municipal Authority, Easttown Municipal Authority, Tredyffrin Township Municipal Authority and Willistown Township Municipal Authority.

WHEREAS, compliance with regulations promulgated by the United States Environmental Protection Agency in 40 CFR 403 is mandatory; and

WHEREAS, reference is made to Articles 5.01, 5.02, 5.03 and 10.02 of said Agreement; and

WHEREAS, capital letters and initial capital letters indicate reference to the "Definitions" provision in 40 CFR 403.3, and such definitions are incorporated herein by reference; and

WHEREAS, all references to any municipality or municipalities shall be deemed to include references to the municipal authority of each municipality where appropriate.

NOW THEREFORE, in consideration of the mutual promises herein contained the parties hereto intending to be legally bound hereby, agree as follows:

1. Legal Authority. As required by EPA each municipality agrees to adopt and diligently enforce an ordinance conforming to the minimum legal requirements contained in the General Pretreatment Regulations at 40 CFR 403.8(f)(1). Therefore, each municipality agrees to administer pretreatment programs pursuant to legal authority enforceable in federal, state or local courts which shall enable the municipality to do the following, and each municipality agrees to do the following:

(i) Deny or condition new or increased contributions of pollutants, or changes in the nature of pollutants, to the Authority's Publicly Owned Treatment Works (hereinafter called POTW) by Industrial Users where such contributions do not meet applicable Pretreatment Standards and Requirements or where such contributions would cause the POTW to violate its NPDES permit;

(ii) Require compliance with applicable Pretreatment Standards and Requirements by Industrial Users;

(iii) Control, through permit, contract, order, or similar means, the contribution to the POTW by each Industrial User to ensure compliance with applicable Pretreatment Standards and Requirements;

(iv) Require (a) the development of a compliance schedule by each Industrial User for the installation of technology

required to meet applicable Pretreatment Standards and Requirements and (b) the submission of all notices and self-monitoring reports from Industrial Users as are necessary to assess and assure compliance by Industrial Users with Pretreatment Standards and Requirements, including but not limited to the reports required in 40 CFR 403.12;

(v) Carry out all inspection, surveillance and monitoring procedures necessary to determine, independent of information supplied by Industrial Users, compliance or noncompliance with applicable Pretreatment Standards and Requirements by Industrial Users. Representatives of each municipality and representatives of Authority shall be authorized to enter any premises of any Industrial User in which a Discharge source or treatment system is located or in which records are required to be kept under 40 CFR 403.12(m) to assure compliance with Pretreatment Standards. Such authority shall be at least as extensive as the authority provided under section 308 of the Act;

(vi) (a) Obtain remedies for noncompliance by any Industrial User with any Pretreatment Standard and Requirement. Each municipality certifies that it is able to, and agrees to, seek injunctive relief for noncompliance by Industrial Users with Pretreatment Standards and Requirements. Each municipality agrees to pass legislation to, and agrees to, seek and assess civil or criminal penalties for noncompliance by Industrial Users with Pretreatment Standards and Requirements. Each municipality agrees to require

Industrial Users to submit to the remedy of specific performance for breach of contract.

(b) Each municipality agrees to enact and enforce Pretreatment Requirements through the remedies set forth in paragraph (f)(1)(vi)(A) of 40 CFR 403.8, [the immediately preceding (vi)(a) herein] which will include, but not be limited to, the duty to carry out inspections, entry, or monitoring activities; any rules, regulations, or orders issued by the municipality or Authority; and any reporting requirements imposed by the municipality, Authority or said EPA regulations. Each municipality shall have authority and procedures (after informal notice to the discharger) immediately and effectively to halt or prevent any discharge of pollutants to the POTW which reasonably appears to present an imminent danger to the health or welfare of persons. Each municipality shall also have authority and procedures (which shall include notice to the affected Industrial Users and an opportunity to respond) to halt or prevent any discharge to the POTW which presents or may present an endangerment to the environment or which threatens to interfere with the operation of the POTW.

2. Prohibited Discharges. Each municipality agrees to develop and enforce specific limits to implement the prohibitions listed in 40 CFR 403.5(b), to prohibit introduction into the POTW of any pollutant which might pass through the POTW or interfere with the operation or performance of the works as mentioned in 40 CFR 403.5(a), and to require compliance with national standards. In addition to the

foregoing, each municipality agrees to adopt as part of its ordinance and enforce specific discharge limits at least as stringent as the specific discharge limits established in Rules and Regulations Governing the Acceptance of Industrial Wastes adopted by Authority, as the same may be amended from time to time.

3. Procedures. A. Each municipality shall develop and implement procedures to ensure compliance with the requirements of a Pretreatment Program. At a minimum these procedures shall enable each municipality to, and each municipality agrees to:

(i) Identify and locate all possible industrial users which might be subject to the Pretreatment Program as often as may be required by an appropriate entity. Any compilation, index or inventory of industrial users made under this paragraph shall be made available to the Regional Administrator or Director upon request, and shall be delivered to Authority;

(ii) Identify the character and volume of pollutants contributed to the POTW by the industrial users identified under 40 CFR 403.8(f)(2)(i). This information shall be made available to the Regional Administrator or Director upon request, and shall be delivered to Authority;

(iii) Notify industrial users identified under 40 CFR 403.8(f)(2)(i) of applicable Pretreatment Standards and any applicable requirements under section 294(b) and 405 of the Act and Subtitles C and D of the Resource Conservation and Recovery Act;

(iv) Receive and analyze self-monitoring reports and other notices submitted by industrial users in accordance with the self-monitoring requirements in 40 CFR 403.12, and deliver copies to Authority;

(v) Randomly sample and analyze the effluent from Industrial Users and conduct surveillance and inspection activities in order to identify, independent of information supplied by Industrial Users, occasional and continuing noncompliance with Pretreatment Standards. The results of these activities shall be made available to the Regional Administrator or Director upon request, and shall be delivered to Authority;

(vi) Comply with the public participation requirements of 40 CFR Part 25 in the enforcement of National Pretreatment Standards. These procedures shall include provision for at least annually providing public notification, in the largest daily newspaper published in the municipality in which the municipality is located, of Industrial Users which, during the previous 12 months, were significantly violating applicable Pretreatment Standards or other Pretreatment Requirements. For the purposes of this provision, a significant violation is a violation which remains uncorrected 45 days after notification of noncompliance; which is part of a pattern of noncompliance over a twelve-month period; which involves a failure to accurately report noncompliance; or which resulted in the POTW and the municipality exercising its emergency authority under 40 CFR 403.8(f)(1)(iv)(B).

B. Each municipality has the duties and responsibilities set forth in the Agreement and this Supplement. Nevertheless, at the insistence of EPA, the parties agree that Authority shall have, and is hereby given, the authority to do any act, and/or require any act, which any municipality has the authority to do or require pursuant to Sections 1 through 3A of this Supplement; provided, however, that Authority shall not acquire any duty, responsibility or liability by virtue of this paragraph. No action by Authority pursuant to this paragraph shall be deemed to be a pre-emption of, or an assumption of, any duty or responsibility of any municipality. In addition, or in the alternative, Authority may seek a decree requiring specific performance of any provision of this Supplement.

4. A. Ordinances. Each municipality agrees to adopt and diligently enforce an ordinance exercising all legal authority mandated by this Supplement or otherwise necessary to implement provisions of said Agreement, this Supplement and federal, state and local regulations. Each municipality shall adopt and diligently enforce an ordinance containing provisions necessary or appropriate to require compliance within such municipality with Authority's Rules and Regulations Governing the Acceptance of Industrial Wastes, as they may be amended from time to time.

B. Any authorized officer or employee of Authority may enter and inspect any part of any municipality's sewer system at any time, and may take samples. Any authorized officer or employee of

Authority may enter and inspect industrial premises that discharge to any municipality's sewer system and may take samples. Each municipality shall make all necessary arrangements for such inspections. The right of inspection shall include, without being limited to, on-site inspection of anything on or under industrial premises, observation, measurement, sampling, testing and access to (with the right to copy) all pertinent compliance records located on industrial premises. Each municipality shall enforce the reporting and sampling provisions of Authority's Rules and Regulations Governing the Acceptance of Industrial Wastes as they may be amended from time to time.

C. Each municipality's ordinance shall contain suitable provisions so that Authority shall have the authority (but not the duty) to do such monitoring, sampling, inspecting, information gathering, report-requiring and enforcement as Authority deems appropriate in furtherance of the provisions of this Supplement. Each such ordinance shall require submission to such monitoring, sampling, inspecting, information gathering and report-requiring as Authority may deem appropriate in furtherance of the objectives set forth in 40 CFR 403. Each such ordinance shall require industrial users to pay to Authority service charges to cover the cost of sampling and analysis deemed necessary by Authority. Each such ordinance shall require the installation and operation of monitoring facilities and pretreatment facilities pursuant to Authority's Rules and Regulations Governing the Acceptance of Industrial Wastes, as they may be amended from time to time.

D. Each municipality's ordinance shall contain suitable provisions so that Authority shall have authority to impose upon industrial users a surcharge (hereinafter called Surcharge) to cover such additional costs for treatment as may be incurred by Authority. Such Surcharge shall be in addition to regular sewer service charges and shall be payable to Authority as herein provided:

(i) Determination of Surcharge: The strength of any industrial waste discharge which is to be subject to Surcharge shall be determined as provided in Authority Rules and Regulations covering the acceptance of industrial waste as they may be amended from time to time.

(ii) Calculation of Surcharge: The charges determined as provided in Authority Rules and Regulations shall be a quarterly Surcharge applied in addition to the basic user charge collected through provisions of each municipality's ordinance. Such Surcharge amounts shall be due and collectible by Authority directly from industrial users on a quarterly basis. Each municipality agrees to provide Authority with quarterly industrial waste flow data expressed in million gallons for industrial users identified by Authority as subject to Surcharge provisions herein contained. Each municipality agrees to enforce such available remedies as may be necessary to collect such Surcharge amounts imposed by Authority.

(iii) The dollar amount of any Surcharge collected by Authority from an industrial user shall be deducted from the dollar amount of any penalty charge owed pursuant to Section 5.06 of the

Agreement by the municipality within which such industrial user is located. Surcharges and penalty charges shall not excuse any municipality from complying with the provisions of the Agreement and in particular the provision of Section 5.05 of the Agreement, i.e., Surcharges and penalty charges are not intended to waive the requirement that each municipality keep the characteristics of its discharge within all required limits.

(iv) Collection of Surcharges: Each municipality agrees to make good faith efforts to help Authority collect, or to collect for Authority Surcharges which are not paid to Authority when due. Because of the provisions of the first sentence of the immediately preceding iii hereof, municipalities may want to include in their ordinances such provisions as they deem appropriate to aid their collection efforts, such as requiring that delinquent Surcharges be paid to the municipalities for delivery to the Authority.

E. Each municipality's ordinance shall require that categorical pretreatment standards promulgated by the U. S. Environmental Protection Agency (EPA) [promulgated by authority of the Clean Water Act, Sections 307(b) and (c)] from time to time be automatically incorporated by reference into such municipality's ordinance. Such standards shall supersede any specific discharge limits in such ordinance which are less stringent than the categorical standards as they apply to the particular industrial subcategory. Each municipality shall notify all affected industrial users of pertinent

categorical standards and monitoring and reporting requirements contained in 40 CFR 403.12 or included as part of the categorical standard.

F. Each municipality shall incorporate into its ordinance, inter alia:

(i) A provision requiring any industrial user responsible for a significant accidental discharge to notify immediately both the Authority and such municipality (with such provision being essentially similar to a provision to be set forth in Authority's Rules and Regulations after consulting each municipality);

(ii) A prohibition on the use of dilution as a control technique for compliance with discharge limits except as allowed by Federal Pretreatment Standards (with such provision being essentially similar to a provision to be set forth in Authority's Rules and Regulations after consulting each municipality);

(iii) A grant of authority for Authority to impose mass discharge limits upon industrial users in lieu of, or in conjunction with, concentration discharge limits (with such provision being essentially similar to a provision to be set forth in Authority's Rules and Regulations after consulting each municipality);

(iv) A prohibition against and penalty for the knowing transmittal of false information by an industrial user to either the Authority or such municipality; and

(v) A provision requiring each industrial user prior to

discharging any waste to any sanitary sewer, or prior to continuing discharging any waste to any sanitary sewer ninety (90) days after the actual execution of this Supplement by all parties (unless such time is extended by Authority), to obtain from Authority an industrial discharge permit and enter into an agreement with Authority containing such provisions as Authority may require.

G. Each municipality shall adopt in its ordinance definitions for significant industrial user and industrial user which are identical to the definition of significant industrial user and industrial user adopted by the Authority. The Authority may make the final determination as to whether a particular industrial user is a significant industrial user or industrial user based on information the Authority may request from such municipality and such industrial user. The Authority may control, through industrial discharge permits, industrial waste discharges from each significant industrial user or industrial user discharging into any sewer ultimately discharging into Authority's plant. As a condition precedent to the issuance of an industrial discharge permit, the Authority may require industrial users to enter into agreements with the Authority containing such provisions as the Authority deems appropriate in furtherance of its effort to comply with regulations promulgated by the United States Environmental Protection Agency in 40 CFR 403. Each municipality's ordinance shall require each industrial user to reimburse Authority for Authority's costs (as determined by Authority) in connection with the issuance of an

industrial discharge permit (and any accompanying agreement) for such industrial user. The appropriate municipality shall be given an opportunity to join in each such agreement and add whatever additional provisions it deems necessary for its protection, provided that such additional provisions shall not be less stringent than those included by the Authority. Without the Authority's written consent no municipality shall issue an industrial discharge permit to any significant industrial user or industrial user discharging into any sewer ultimately discharging into Authority's plant. The appropriate municipality shall be given an opportunity to join in each industrial discharge permit issued by Authority and shall be given an opportunity to add whatever additional provisions it deems necessary for its protection, provided that such additional provisions shall not be less stringent than those included by the Authority. Authority agrees not to issue a permit without the consent of the appropriate municipality, but the Authority shall have the right to include any provisions it deems appropriate.

In addition to the foregoing, no municipality shall permit any significant industrial user or industrial user to discharge into any sewer directly or indirectly discharging into any portion of the Valley Creek Trunk Sewer without first obtaining written consent from Tredyffrin Township or Tredyffrin Township Municipal Authority. No municipality shall permit any significant industrial user or industrial user to discharge into any sewer directly or indirectly discharging into any portion of the East Whiteland Trunk Line without first obtaining

written consent from East Whiteland Township or East Whiteland Municipal Authority and from Tredyffrin Township or Tredyffrin Township Municipal Authority.

H. Each municipality shall promptly provide Authority with a certified copy of its ordinance and any amendments thereto, other interjurisdictional agreements, if permitted (unless they pertain to wastewater that cannot reach Authority's sewage treatment plant), and any contract entered into for the purposes of industrial waste control. Each municipality shall provide the Authority access to and copies of all industrial monitoring reports including 40 CFR 403.12 compliance reports, self-monitoring reports, baseline reports, records of violations and actions taken, any other monitoring or reporting imposed by federal, state or local regulations, and any other relevant information. Such records and other relevant information shall be maintained for at least three years.

5. Miscellaneous. A. The provisions of this Supplement are in addition to, and not in derogation of, provisions for the benefit of Authority in said Agreement.

B. Each municipality shall indemnify Authority for all damages, fines and costs incurred as a result of any one or more discharges originating in such municipality. Without limiting the generality of the foregoing, each municipality shall indemnify Authority and shall reimburse Authority for fines and costs directly or indirectly arising from, or related to injury to Authority personnel, damages to

Authority facilities, degradation of sludge quality, NPDES permit violation, and all other air, water and sludge quality violations resulting from such discharges. In addition, each municipality agrees to pay to Authority for application toward actual annual operating expenses of the Treatment Plant a sum calculated by a consulting engineer selected by Authority to be the total of (a)increased treatment costs, (b) increased costs for proper sludge use or disposal, (c) increased engineering and legal fees, and (d) sampling, testing and investigative expenses incurred as a result of any one or more industrial waste discharges originating in such municipality. The final determination as to how payments stipulated in the preceding two sentences shall be allocated shall be made by the certified public accountant who prepares the annual statement mentioned in Section 4.05 of said Agreement. Each municipality agrees to totally and absolutely protect, exonerate, defend, indemnify and save Authority harmless from and against any and all liabilities and costs which may arise out of any one or more industrial waste discharges originating in such municipality and from any and all claims by or on behalf of any person or persons, firm or firms, corporation or corporations arising directly or indirectly from such municipality's violation of any provision of said Agreement or this Supplement and from and against all costs, counsel fees, expenses and liabilities incurred in or about the defense of any claim or action resulting directly or indirectly therefrom. Each municipality agrees that it will not resist a claim by Authority for

indemnification on the grounds that the right to indemnification is not set forth herein with sufficient clarity or particularity. The provisions of this paragraph apply not only to Authority directly, but also to all members, officers, agents and employees, past, present and future of Authority. The parties recognize that whatever is not collected from a municipality pursuant to this paragraph (or from an industry), shall be an operating expense of the Treatment Plant pursuant to Section 4.06 of the Agreement.

The parties agree that the following provision in the Valley Creek Trunk Sewer Agreement: "In order to control the sewage entering Valley Creek Trunk Sewer, Valley Forge Sewer Authority will sample the discharge from each municipality or municipality authority periodically to insure that no characteristic is evident which would be deleterious to the Valley Creek Trunk Sewer or the Valley Forge Treatment Plant or the treatment process" and a similar provision in Section 5.05 of the East Whiteland Trunk Line Agreement merely mean that Authority will do sampling infrequently and does not mean that Authority has undertaken to do sampling as often as might be necessary to insure that no characteristic is evident which would be deleterious to the East Whiteland Trunk Line, or the Valley Creek Trunk Sewer or the Valley Forge Treatment Plant or the treatment process. The parties understand and agree that the Authority has not undertaken to control the sewage entering either the Valley Creek Trunk Sewer, the East Whiteland Trunk Line or the Valley Forge Treatment Plant. The parties agree not to

attempt to use the above-mentioned sentences against the Authority in any way whatsoever, including without being limited to litigation involving the Authority and/or any request by the Authority for indemnification.

The phrase "each municipality" as used in this subsection B of Section 5 shall mean each of the parties to this Supplement except Valley Forge Sewer Authority (which need not agree to indemnify itself) and the townships that have Valley Forge Sewer Authority as their operating authority, namely Charlestown, East Pikeland and Schuylkill Townships; the obligations of each of said three townships with respect to indemnification shall not be increased by this subsection B of Section 5, but shall be whatever they may be pursuant to the Valley Forge Sewer Treatment Plant Agreement dated November 1, 1970, the Valley Creek Trunk Sewer Agreement, as amended, the East Whiteland Trunk Line Agreement, as amended, and the law of Pennsylvania. With respect to discharges originating within any one of said three townships, if no industry nor township is liable, Authority, as an operator of a sewage collection system, agrees to pay to the treatment plant operating fund the amount the township in which such discharge originates would be obligated to pay pursuant to this subsection B of Section 5 if such township were included in the phrase "each municipality."

C. Authority may seek injunctive relief against any industrial user of any municipality's sewer system if such user's discharge reasonably appears to present an imminent danger to the health

or welfare of persons, or the environment, or if a discharge threatens to interfere with the operation of the waste water treatment system; provided, however, that Authority shall not be required to seek injunctive relief, because in any of such events, each municipality, upon request of Authority, agrees promptly to seek injunctive relief against any such industrial user of such municipality's sewer system. In any of such events Authority may immediately take steps to identify the source of the discharge and to halt or prevent such discharge, including, but without being limited to the right to pursue self-help remedies.

D. If there presently exists any industrial user discharging to any municipality's sewer system but located outside the jurisdictional limits of such municipality, then each such municipality shall negotiate and enter into an agreement with such outside jurisdiction. Such agreement shall be substantially equivalent to this Supplement as amended, and shall be jointly executed by such municipality, the Authority, and the outside jurisdiction. If the outside jurisdiction refuses to negotiate and execute an agreement, then such municipality shall enter into a contract with the industrial user which contains terms and conditions substantially equivalent to the Authority's industrial waste discharge agreements.

E. The Authority may review each municipality's ordinance and amendments thereto, and any interjurisdictional agreements if permitted, for conformance with 40 CFR 403 and this Supplement. The

Authority may periodically review the enforcement efforts of each municipality to ascertain whether pretreatment requirements are being diligently enforced. To the extent any municipality administers its own pretreatment program, the Authority may periodically review the pretreatment program activities and funding to ensure that such municipality is adequately administering its pretreatment program in conformance with the Federal Pretreatment Regulations (40 CFR 403) and all Authority requirements.

F. If the Authority determines that any municipality has failed or has refused to fulfill any pretreatment obligations, the Authority may develop and issue a remedial plan containing a description of the nature of the pretreatment deficiencies, an enumeration of steps to be taken by each municipality, and a time schedule for attaining compliance with all pretreatment requirements. Such plans shall be specifically enforceable in a court of competent jurisdiction. Where such municipality fails to satisfy the terms of the remedial plan, the Authority may, upon thirty days written notice, refuse to accept any industrial waste discharges from such municipality.

G. The final paragraph of subsection B of Section 5 of this Supplement shall have priority over this subsection G of Section 5. The townships that have Valley Forge Sewer Authority as their operating authority, namely, Charlestown, East Pikeland and Schuylkill Townships, desire that their obligations not be increased by this Supplement, but that their obligations shall be as they would be if said

townships had not executed this Supplement; provided, however, that with respect to each provision of this Supplement, each of said three townships agrees to do everything required by such provision whenever no Pennsylvania statute gives Valley Forge Sewer Authority the necessary legal authority to adopt, enforce (i.e., be entitled to an order of Court requiring compliance) and fine for violation of a regulation which would ensure compliance with such provision. To the extent that it is possible to segregate the issue of spending money from the issue of indemnification, which is addressed in subsection B of Section 5, said three townships and Valley Forge Sewer Authority have agreed in principle that the Authority will spend Authority funds to administer an industrial pretreatment program.

This Supplement may be executed in any number of counterparts, each of which may be deemed an original.

IN WITNESS WHEREOF, each of the parties hereto has caused this Supplement to be executed and attested by its proper officers, pursuant to the proper action of its governing body as of the day and year first above written.

EXHIBIT F5

ADDENDUM TO VALLEY FORGE SEWAGE TREATMENT PLANT AGREEMENT FOR THE PURPOSE OF PERMITTING AND ADMINISTERING THE SALE OF RESERVED CAPACITY AMONG THE PARTIES, DATED MAY 26, 1994, BY AND BETWEEN VALLEY FORGE SEWER AUTHORITY, THE TOWNSHIPS OF SCHUYLKILL, EAST PIKELAND, CHARLESTOWN, EAST WHITELAND, TREDYFFRIN, WILLISTOWN, AND EASTTOWN; THE BOROUGH OF MALVERN; EAST WHITELAND TOWNSHIP MUNICIPAL AUTHORITY; EASTTOWN MUNICIPAL AUTHORITY; AND TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY

ADDENDUM TO VALLEY FORGE SEWAGE TREATMENT PLANT AGREEMENT FOR THE PURPOSE OF PERMITTING AND ADMINISTERING THE SALE OF RESERVED CAPACITY AMONG THE PARTIES

THIS ADDENDUM dated as of this 4th day of May, 1994 to the Valley Forge Sewage Treatment Plant Agreement dated as of November 1, 1970, as previously amended and supplemented (hereinafter "Agreement") is entered into between the parties to said Agreement, namely, Valley Forge Sewer Authority (hereinafter "Authority"), the Townships of Schuylkill, East Pikeland, Charlestown, East Whiteland, Tredyffrin, Willistown and Easttown, the Borough of Malvern, East Whiteland Township Municipal Authority, Easttown Municipal Authority, and Tredyffrin Township Municipal Authority (hereinafter "Municipalities").

WHEREAS, the Agreement does not expressly permit the sale or purchase of Reserved Capacity as that term is used in the Agreement between or among the Municipalities; and

WHEREAS, in the time that has passed from the date of the Agreement to the present, it has become apparent that the pattern of development and of sewage treatment needs has not occurred entirely in keeping with the projections that formed the basis of the allocation of Reserved Capacity (namely, the allocation set forth in Exhibit "C" to the Agreement), at the time the Agreement was made, with the result that certain of the Municipalities are presently the owners of more Reserved Capacity than they can use while other Municipalities own substantially less Reserved Capacity than is necessary to accommodate their sewage treatment needs; and

WHEREAS, the present Rental Pool system described in the

Agreement as a means for temporarily reallocating Reserved Capacity among the Municipalities does not adequately address the problem of substantial, permanent disparities in the ratios of owned to needed capacities; and

WHEREAS, the parties desire to supplement the Agreement to permit the permanent sale of owned but unused Reserved Capacity among the Municipalities;

NOW THEREFORE, in consideration of the mutual promises herein contained, the parties hereto, intending to be legally bound hereby, agree as follows:

1. For purposes of this Addendum, the term "Reserve Capacity" shall mean the amount of capacity listed for each Municipality in Exhibit "C" as amended of the Agreement, as follows:

Valley Forge Sewer Authority	2.128 MGD
Tredyffrin Township	1.592 MGD
East Whiteland Township	1.696 MGD
Malvern Borough	0.564 MGD
Willistown Township	1.064 MGD
Easttown Township	0.956 MGD
Total Reserve Capacity	8.00 MGD

2. For purposes of this Addendum, the term "Excess Capacity" shall mean the amount of Reserve Capacity allocated to and now owned by a particular Municipality, minus 110% of the maximum amount of capacity projected to be used by the same Municipality as specified in the most recent Annual Report filed by the Authority

pursuant to the Municipal Wasteload Management Regulations, Title 29 Pa. Code Ch. 94, Section 94.12. (the "Chapter 94 Report").

3. No Municipality will be permitted to sell Excess Capacity unless and until it has submitted a proposal to the Authority detailing the proposed sale and said proposal has been reviewed by and approved by both the Authority and DER as being accurate and consistent with a.) the Chapter 94 Reports for the current year and for the 5 years preceeding the submission of the proposal; b.) the current approved Act 537 Plan for the Municipality; c.) the current approved Act 537 Plan for the Valley Forge Sewage Treatment Plant; d.) the current approved Act 537 Plan, if any Act 537 Plan exists, for any conveyance system, including but not limited to interceptors and pump stations that convey sewage from the Municipality to the Valley Forge Sewage Treatment Plant; and e.)it has complied with any requirement, directive or recommendation of the Pennsylvania Department of Environmental Resources ("DER") to update, amend or supplement its Act 537 Plan and said Plan has been reviewed and approved by DER.

4. Forms for the submission of a sale proposal to be used by a Municipality that wishes to sell Excess Capacity shall be developed by the administrative staff of the Authority. In addition to the information necessary to verify the amount of Excess Capacity available for sale, the format developed by the Authority will provide for the seller to state the price per unit (in either millions of gallons per day (MGD) or equivalent dwelling units (EDU)) that the seller requires as payment for Excess

Capacity.

5. Once the Authority has reviewed the proposal, and the availability of Excess Capacity has been confirmed by the Authority and by DER, the Authority shall notify the Municipalities of the offer to sell, including the price and the number of units available. Notice will be given by certified first class mail, express courier, or by receipted hand delivery to each Municipality's authorized officer or employee. Notice will be deemed to have been given on the date mailed.

6. A Municipality will be permitted to offer to purchase the available Excess Capacity in an amount that is in the same proportion of its Reserved Capacity to the total Reserved Capacity, of the other Municipalities eligible to purchase, adjusted to remove from the calculation the Reserved Capacity share of the seller.

7. Within 10 working days of the giving of notice, each Municipality must either a.) indicate by written notice to the Authority that it does not wish to purchase any amount of capacity at the stated price or, b.) that it wishes to purchase a specific amount of capacity at the stated price. The amount specified may be equal to, greater than, or less than the amount that the Municipality would be permitted to purchase if all of the eligible municipalities desire to purchase capacity. If a Municipality fails to reply to the notice within the time provided, it will be deemed to have waived its right to purchase the capacity offered. Each Municipality will provide to each other Municipality a copy of

its reply to the notice of capacity available for sale.

8. Municipalities that have indicated that they do not wish to purchase capacity at the stated price or are deemed to have waived their right to purchase will be eliminated from the pool of eligible purchasers and the remaining eligible purchasers will be entitled to purchase a greater amount of capacity by virtue of the non-purchasers potential shares being redistributed to the remaining purchasers.

9. In no event shall the amount of Excess Capacity offered for sale exceed the amount of Reserve Capacity currently being rented by the potential purchasers from the Rental Pool, unless there is no capacity being rented by any of the Municipalities that are parties to the Agreement.

10. After receipt of all of the responses from the Municipalities, the Authority shall determine the amount of capacity to be purchased by each eligible participant. Each Municipality will be permitted to purchase the amount of capacity that is equal to its share of the total capacity available, or the amount that the Municipality wishes to purchase, whichever is less.

11. Any capacity not allocated after the initial allocation will be allocated by the Authority to the Municipalities that indicated that they wished to buy more capacity at the stated price than they were initially permitted to purchase pursuant to paragraph 6 above. This step may be repeated as many times as necessary until all of the Municipalities that indicated a desire to purchase capacity have been allocated as much as they sought, or

until 100% of the capacity has been allocated, whichever first occurs.

12. The remaining excess capacity will be allocated to any of the eligible purchasers who have not yet been permitted to purchase the full amount that they originally specified in response to the offer to sell. This allocation will be made based on the relative shares of the remaining eligible purchasers. [1]

13. Any Excess Capacity that remains unsold may be retained by the seller. The seller has the option of offering the remaining capacity for sale at a different price. Any such offer will be

---

[1] By way of illustration only, the following example illustrates such a transaction:

Five municipalities are parties to the agreement. Municipality X has 1000 units of excess capacity to sell. The other four municipalities own capacity as follows:

A 4000 units
B 3000 units
C 2000 units
D 1000 units
X 2000 units

The shares owned by X are irrelevant to the calculation so the shares of the remaining municipalities are based on total capacity of 10000 units as follows: A - 40%, B - 30%, C - 20%, D - 10%. Assuming they have all submitted all necessary reports and documentation, they are each entitled to buy up to their percentage share of the units being sold by X.

Now assume that they indicate to the Authority that they wish to purchase the following amounts: A - 1000 units, B - no units, C - 100 units, D - 200 units.

A will be allocated 400 units, C will be allocated 100 units and D will be allocated 100 units, for a total of 600 units, leaving 400 un-allocated.

B and C have now received the maximum number of units that they are willing to purchase at the stated price, so their shares are removed prior to allocating the remainder. A and D originally owned a total of 5000 units, with A owning 80% and D owning 20%. A will now be permitted to purchase an additional 320 units and D may purchase the remaining 80.

treated as a new sale and all parties to the Agreement will have the opportunity to participate, regardless of whether they purchased capacity at the original sale.

14. It is the intention of the parties that, while the Rental Pool as described in the Agreement will continue to operate as a means of temporarily reallocating capacity, the contribution of capacity to the Rental Pool and the Renting of Capacity from the Pool shall henceforth be considered to be at the option of the individual Municipalities rather than as mandatory.

15. It is the intention of the parties that a Municipality that sells Excess Capacity will not be automatically entitled to or required to own Excess Capacity in the event that the Valley Forge Sewage Treatment Plant is expanded pursuant to the Agreement. Rather, the capacity following expansion will be determined based on the Municipality's actual projected need.

16. This Addendum shall become effective upon its adoption by motion and majority vote of the parties.

IN WITNESS WHEREOF, each of the parties hereto, have caused this Addendum to be duly executed as of the day and year first above written.

EXHIBIT F6

EAST WHITELAND TRUNK LINE AGREEMENT, DATED FEBRUARY 1, 1971, BY AND BETWEEN EAST WHITELAND MUNICIPAL AUTHORITY, THE TOWNSHIP OF EAST WHITELAND, MALVERN MUNICIPAL AUTHORITY, THE BOROUGH OF MALVERN, AND VALLEY FORGE SEWER AUTHORITY

Rev.
2/10/71

copy for Dr Weinstock to keep

EAST WHITELAND TRUNK LINE AGREEMENT

THIS AGREEMENT, dated as of the first day of February, 1971, by and between EAST WHITELAND MUNICIPAL AUTHORITY (East Whiteland Authority), a municipal authority organized by the Township of East Whiteland and operating under the provisions of the Municipality Authorities Act of 1945, the Act of May 2, 1945, P.L. 382, its supplements and amendments, and the TOWNSHIP OF EAST WHITELAND (East Whiteland Township), a second class township, parties of the first part, and MALVERN MUNICIPAL AUTHORITY (Malvern Authority) and the BOROUGH OF MALVERN (Malvern), parties of the second part, and VALLEY FORGE SEWER AUTHORITY, party of the third part, all of said parties being municipal authorities or political subdivisions within the County of Chester, Commonwealth of Pennsylvania.

W I T N E S S E T H :

WHEREAS, the parties hereto have constructed or provided for or are about to construct or provide for sanitary sewer collection systems; and

WHEREAS, the parties desire to dispose of sewage described hereinafter by a treatment plant (hereinafter called the "Valley Forge Treatment Plant") to be located on the Schuylkill River in Schuylkill Township, Chester County, Pennsylvania, which treatment plant is to be constructed and operated by Valley Forge Sewer Authority (a municipality authority formed by Schuylkill, East Pikeland and Charlestown Townships); and

WHEREAS, a substantial portion of the sewage emanating from within the municipalities which is to be disposed of by the aforesaid treatment plant is to be discharged into and conveyed to the aforesaid treatment plant by interceptors or trunk sewers to be constructed by Tredyffrin Township Municipal Authority (Tredyffrin Authority), which interceptors or trunk sewers, including pumping stations and appurtenances are hereinafter called, collectively, the "Valley Creek Trunk Sewer", are to be leased by Tredyffrin Authority to the Township of Tredyffrin, which will operate said Valley Creek Trunk Sewer; and

WHEREAS, all of the sewage emanating from Malvern, which is to be disposed of by the Valley Forge Treatment Plant must pass through East Whiteland to reach the Valley Creek Trunk Sewer; and

WHEREAS, East Whiteland Authority has agreed to construct an interceptor or trunk sewer which will be called the East Whiteland Trunk Line, and Malvern Authority and Malvern have indicated they will utilize said Trunk Line and share in the cost of its construction and operation for the mutual benefit of the parties.

NOW, THEREFORE, IN CONSIDERATION OF THE MUTUAL COVENANTS HEREIN CONTAINED, the parties hereto, intending to be legally bound hereby, covenant and agree as follows:

ARTICLE I

CONSTRUCTION OF EAST WHITELAND TRUNK LINE

1.01 Engineering Services.

Each party hereby approves the contract dated June 20, 1966, between East Whiteland Authority and Roy F. Weston, Inc. (hereinafter called the "Consulting Engineers"), for engineering

services in respect of the construction of sewerage facilities to serve the East Whiteland Township and interceptors or trunk sewers, and appurtenances, to be located as set forth on the attached Exhibit "A" - the East Whiteland Trunk Line. A copy of said contract having been delivered to each party, the municipalities and municipality authority set forth in Exhibit "B" (hereinafter referred in this Article I as the "municipalities") agree to share the cost of such engineering design in accordance with the percentages applicable to each section or reach of said trunk line set forth in Exhibit "B" attached hereto. The parties hereto likewise agree to share the cost of surveys and test borings incident to the aforesaid design in accordance with said percentages. When payments for such engineering design, surveys and test borings fall due from time to time, each such municipality upon receipt of a copy of an invoice from the Consulting Engineers, shall promptly pay or cause to be paid to East Whiteland Authority for delivery to the Consulting Engineers (or, upon request of East Whiteland Authority, directly to the Consulting Engineers) that percentage of such invoice as is set forth in said Exhibit. Nothing herein contained shall be construed so as to make any party hereto (other than East Whiteland Authority) a party to said contract between East Whiteland Authority and the Consulting Engineers. If any payment required of a party hereto under this Section 1.01 is not made within thirty (30) days of the receipt of the aforesaid copy of invoice, interest shall accrue at the rate of six per cent (6%) per annum from such date.

1.02 Design Capacity; Construction of East Whiteland Trunk Line.

For each such municipality listed in Exhibit B, said East Whiteland Trunk Line shall provide the design capacity (reserved capacity) for each secion or reach of the respective interceptor or trunk sewers as set forth after the name of each such municipality in said Exhibit. East Whiteland Authority, in accordance with said contract with the Consulting Engineers shall cause plans and specifications for the East Whiteland Trunk Line to be completed with all reasonable dispatch. East Whiteland Authority, upon receipt of capital contributions as provided in Article II hereof shall award construction contracts and cause the East Whiteland Trunk Line to be constructed with reasonable dispatch, all in accordance with said plans and specifications and sound engineering principles.

1.03 Review and Inspection.

Throughout the term of this Agreement, East Whiteland Authority shall cause the Consulting Engineers to make available at reasonable times and places any information concerning the design, construction and operation of the East Whiteland Trunk Line reasonably requested by Malvern Authority or Malvern. Members of the governing body of Malvern and the consulting engineers, employees and representatives of Malvern shall have the right at all reasonable times during construction and thereafter to inspect the construction and operation of the East Whiteland Trunk Line and all records of East Whiteland Authority and East Whiteland Township in respect thereof. East Whiteland Authority and East Whiteland Township, at reasonable times, shall receive and consider the opinions, comments and suggestions of Malvern or Malvern Authority and of the

consulting engineer of Malvern and Malvern Authority.

1.04 Date of completion of East Whiteland Trunk Line.

East Whiteland Authority shall make every reasonable effort to cause the East Whiteland Trunk Line to be completed with reasonable dispatch.

ARTICLE II

CAPITAL CONTRIBUTIONS

2.01 Percentages.

Subject to limitations hereinafter provided, each of the municipalities and municipality authorities listed in Exhibit B attached hereto (hereinafter referred to in this Article II as the "municipalities") shall bear the percentage of the total project cost of constructing the several sections or reaches of the respective interceptor or trunk sewers of the East Whiteland Trunk Line as set forth after its name in said Exhibit B, which lists the reserved capacity requirements of each party in each such section or reach of sewer, and are referred to hereinafter as "said percentages". The total estimated project cost of constructing the East Whiteland Trunk Line and of each section or reach thereof to be constructed as part of said Trunk Line is set forth in Exhibit B. The total project cost of constructing the East Whiteland Trunk Line shall include construction contract payments, land costs, engineering, surveying, boring and construction representation fees and expenses (other than those paid for under Section 1.01 hereof), legal fees incident to the construction (including preparation and review of

documents needed before construction can commence), a reasonable contingency fund and all other charges, costs and expenses incident to such construction and which are properly chargeable thereto under sound accounting practice but excluding (i) financing costs and (ii) all costs and expenses properly chargeable to East Whiteland Authority for construction of the balance of its own sewage collection system under sound accounting practice. Allocation of costs and expenses between the cost of constructing the East Whiteland Trunk Line and the cost of constructing of the balance of said collection system of East Whiteland Authority shall be subject to adjustment upon audit as provided for hereinafter.

2.02 Payment of Capital Contributions.

No capital contribution in respect of construction shall be due hereunder unless prior to the date of payment plans and specifications for the East Whiteland Trunk Line and revisions thereof, if any, have been approved by the municipalities. Disapprovals may be based only on sound engineering reasons. Within sixty (60) days of the date on which construction bids are received by East Whiteland Authority (or, in the event of increased costs requiring approval pursuant to Section 2.03 hereof, within sixty (60) days of approval pursuant thereto) time being of the essence of this Agreement, each of said municipalities listed in Exhibit B shall pay to East Whiteland Authority the total of (1) the share of the estimated total project cost of constructing the East Whiteland Trunk Line set forth in dollars after its name in Exhibit B, (2) said percentage of the amount by which the total project cost as stated by the Consulting Engineers after

the receipt of construction bids exceeds the estimates set forth in Exhibit B, up to an increase of 15% of said estimates, and (3) such amount as may be due pursuant to the next succeeding Section hereof.

2.03 Change in Project Cost.

In the event, after the receipt of construction bids, the total project cost (before deducting any federal or state grants) of constructing the East Whiteland Trunk Line is increased by more than 15% of the estimate set forth in Exhibit B, and such a revision is approved by Malvern Authority, each municipality listed in Exhibit B shall pay said percentage of said increase to East Whiteland Authority by the time set forth in the preceding section. In the event, after receipt of construction bids, the total project cost of constructing the East Whiteland Trunk Line is less than the estimate set forth in Exhibit B, the total payment to be made by each such municipality under Sections 2.01 and 2.02 hereof shall be proportionately reduced and refunds of payments made under Section 1.01 shall be made proportionately.

2.04 Grants.

Each party authorizes and directs East Whiteland Authority on behalf of each such muncipality or municipality authority from time to time to apply for and accept all available grants in aid towards any East Whiteland Trunk Line construction costs and any East Whiteland Trunk Line operating costs of any nature to be used in accordance with this Agreement. All Federal and State grants received by any such municipality properly

allocable to and to be applied to the project cost of constructing the East Whiteland Trunk Line shall be paid to East Whiteland Authority and the total payment to be made by each municipality under Sections 2.01 and 2.02 hereof shall be reduced proportionately by such grant or grants.

All Federal and State grants received by East Whiteland Authority which are properly allocable to the project cost of constructing the East Whiteland Trunk Line shall be applied by East Whiteland Authority to the payment of such project cost or in reimbursement of expenditures so made and the total payment to be made by each municipality under Sections 1.01, 2.01 and 2.02 hereof shall be reduced accordingly. If any such Federal or State grants shall have been awarded to East Whiteland Authority and an agreement with the appropriate Federal or State agency executed on or before the date capital contributions are to be made under Section 2.02, then such total payment to be made by each municipality shall be reduced appropriately. If any such Federal or State grant is awarded or the agreement with the appropriate Federal or State agency executed by East Whiteland Authority after the aforesaid payments have been made by the municipalities under Section 2.02, such grants shall be applied in the computation of any surplus or deficiency of capital contribution pursuant to Section 2.08 hereof.

Federal and State grants which are allocable to the project cost of constructing the East Whiteland Trunk Line and other portions of the sewer system constructed by East Whiteland Authority and used as collector sewers to serve East Whiteland Township shall be apportioned by the Consulting Engineers between the project cost of constructing the East Whiteland Trunk Line and such other portions of said sewer system and the portion of such grants thus determined to be allocable to the project cost

of constructing the East Whiteland Trunk Line shall be applied to the payment of the project cost of the East Whiteland Trunk Line or in reimbursement of expenditures so made.

All Federal and State contributions or grants in aid received by any of said municipalities properly allocable to and to be applied towards any cost of operation, maintenance, repair, replacement, or other expenses relating to the East Whiteland Trunk Line shall be paid over to East Whiteland Township and shall be deducted in determining actual annual operating expenses of the East Whiteland Trunk Line in accordance with Section 4.07 hereof.

2.05 Construction Fund.

East Whiteland Authority shall deposit all amounts delivered by all parties to it pursuant to this Article, together with East Whiteland Authority's share and all amounts received in payment of Federal and State grants allocable to the project cost of constructing the East Whiteland Trunk Line, in a special East Whiteland Trunk Line Construction Fund (hereinafter called "Construction Fund"). Such Construction Fund moneys shall be held and invested by a Trustee selected by East Whiteland Authority and to the extent not insured by the Federal Deposit Insurance Corporation or other Federal agency, or invested as hereinafter provided shall be continuously secured by the pledge of direct obligations of the United States of America or the Commonwealth of Pennsylvania having an aggregate market value (exclusive of accrued interest) at all times at least equal to the amount of such moneys. Such moneys may be wholly or partially invested by said Trustee only in direct obligations of the United States of America and certificates of deposit which

shall mature or shall be subject to redemption at the option of the holder not later than one year from the date of such investment. Any securities so purchased shall be a part of the Construction Fund. The interest and income received from time to time upon investments and any profit realized or loss sustained from the sale of such securities shall be added or charged to the Construction Fund and such interest, income, profit or loss shall be considered in the computation of any surplus or deficiency as provided in Section 2.08. Moneys paid to the East Whiteland Authority pursuant to this Agreement shall at all times be segregated in books of account from moneys received by East Whiteland Authority for any other purpose.

2.06 Construction Fund Requisitions.

East Whiteland Authority agrees that payments from the East Whiteland Trunk Line Construction Fund shall be made only upon requisitions, copies of which shall be available to any of said municipalities, duly executed by authorized representatives of East Whiteland Authority stating: (a) the amount requested; (b) the obligation for or the account for which the requisition is made, showing separately the total obligation, the amount already paid, if any, and the balance remaining to be paid; (c) the person to whom the payment shall be made and his address; (d) that the item for which requisition has been made has not been paid and (e) with respect to such item there are no vendors', mechanics' or other liens or secured transactions which will not be discharged by such payment.

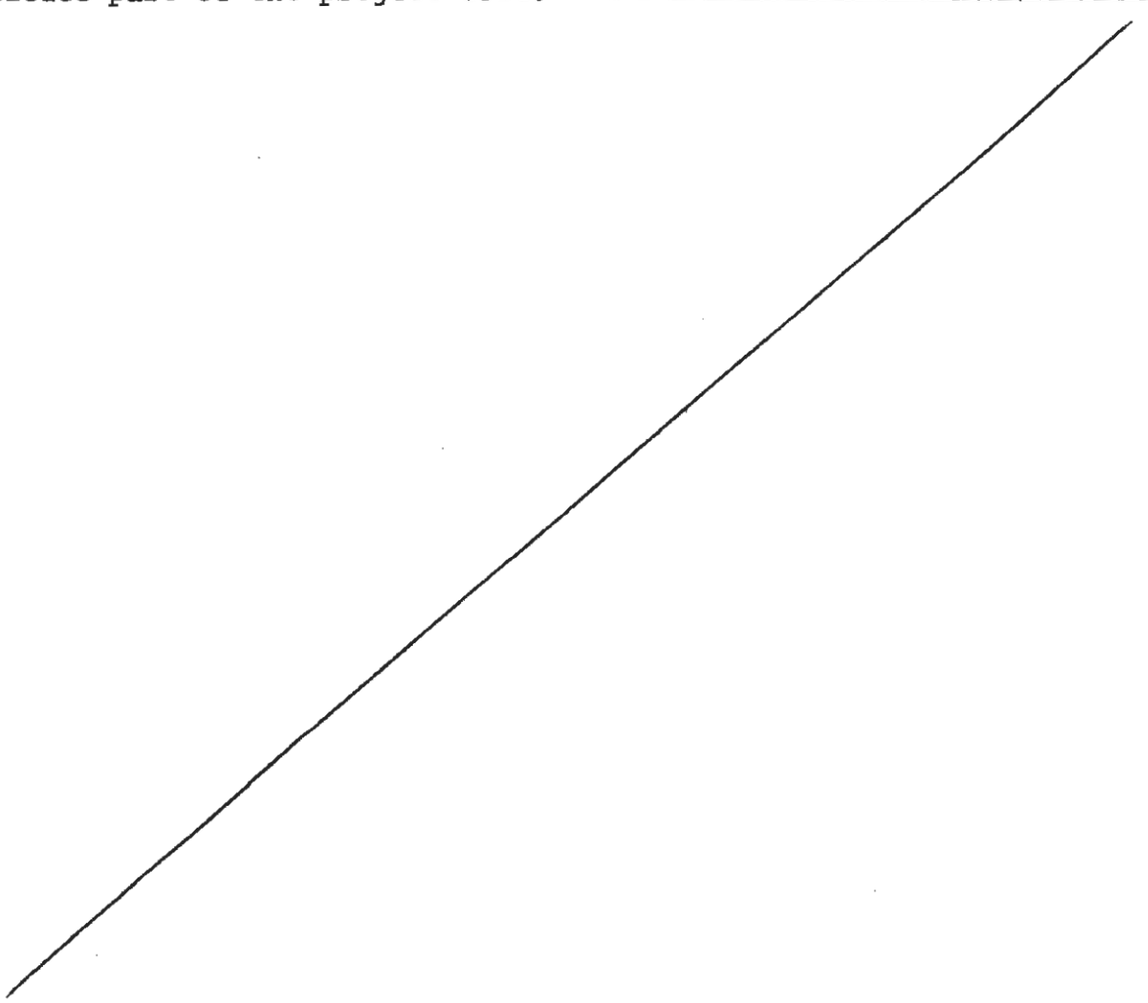
In case of payments under construction contracts, such requisitions shall also contain a certificate of the Consulting

Engineers certifying approval of the requisition and further certifying that such obligation has been properly incurred and is then due and unpaid and that insofar as such obligation was incurred for work, materials, supplies or equipment, such work was actually performed or such materials, supplies or equipment were actually installed in or about the construction of the East Whiteland Trunk Line, or delivered at the site of the work for that purpose, or delivered for fabrication at the place approved by the Consulting Engineers; and that all work done and materials, supplies or equipment for which such obligation was incurred are, in the Consulting Engineers' opinion, in accordance with the plans and specifications.

2.07 Change Orders.

East Whiteland Authority agrees to notify each of said municipalities of all changes or alterations in the East Whiteland Trunk Line plans and specifications. No change order concerning said plans and specifications in excess of $25,000. shall be approved by East Whiteland Authority unless it has previously been approved by Malvern Authority; provided, however, that if written notification of disapproval is not received by the East Whiteland Authority within ten (10) days of the date requested for approval of any change order is delivered to an officer of Malvern Authority, such change order shall be deemed to have been approved by such municipality. East Whiteland Authority further agrees that, without the prior approval of Malvern Authority, no change or alteration will be made in any of the plans and specifications of the Consulting Engineers, in respect to the

East Whiteland Trunk Line, which will cause the cost of construction to exceed the amount available in the East Whiteland Trunk Line Construction Fund.



2.08 Distribution of Construction Fund.

Upon completion of the construction of the East Whiteland Trunk Line, East Whiteland Authority shall deliver to each party a certificate of the Consulting Engineers stating (a) the fact of such completion and (b) in reasonably itemized form, the actual project cost of constructing the East Whiteland Trunk Line (i) after deducting therefrom the unexpended contingency fund, if any, and the amount of any applicable Federal or State grants paid into Construction Fund and not previously used to reduce payments in accordance with Section 2.04 and (ii) after making appropriate adjustments in respect of net income, gain or loss from investments. If any municipality's share of the actual cost of constructing the East Whiteland Trunk Line after adjustments (i) and (ii) is less than the total amount deposited by it as required by this Agreement, the excess of such deposits shall forthwith be refunded to such municipality if no municipality, within sixty (60) days of receipt of said certificate, has requested a readjustment or audit and, in the event of such a request, shall be refunded promptly after the matter is resolved. A deficiency, if any, incurred in accordance with this Agreement shall be charged to and paid by each such municipality in said percentages and shall be due within thirty (30) days of notice to pay, and if not then paid, shall be subject to interest at the rate of six per cent (6%) per annum until paid. Prior to

completion of the East Whiteland Trunk Line, East Whiteland Authority may make one or more interim distributions on the basis of information then available, which distributions shall be subject to adjustment at the time of final distribution.

2.09 Audit of Project Cost.

The said certificate of the Consulting Engineers as to the actual project cost of constructing the East Whiteland Trunk Line and the records from which it is compiled shall be audited by a certified public accountant selected by East Whiteland Authority and the expense of such audit shall constitute part of the project cost.

ARTICLE III

DELIVERY AND ACCEPTANCE OF SEWAGE

3.01 Delivery.

Malvern Authority, at its own expense, shall during the term of this Agreement cause all sewage emanating from The Borough of Malvern to be discharged into East Whiteland Trunk Line. Except as permitted pursuant to Article VII hereof, Malvern Authority shall not exceed the capacity reserved by it.

3.02 Acceptance.

Malvern shall commence delivering its sewage to the East Whiteland Trunk Line as soon as practicable after (a) the East Whiteland Trunk Line is sufficiently complete to provide service (as certified by the Consulting Engineers engaged by East Whiteland Authority) and (b) the Valley Creek Trunk Sewer is sufficiently complete to provide service (as certified by the Consulting Engineers engaged by Treddyffrin Authority) and (c) the treatment plant to be constructed by Valley Forge Sewer Authority to receive and treat the aforesaid sewage is sufficiently complete to provide service (as certified by the consulting engineers engaged by Valley Forge Sewer Authority in respect of the design and construction of said treatment plant). East Whiteland Authority, as soon as practicable after the East Whiteland Trunk Line and the Valley Creek Trunk Sewer and the aforesaid treatment plant are sufficiently complete to provide service as so certified, shall permit connections at the locations that East Whiteland Authority may agree to, which agreement may not be unreasonably withheld and shall accept sewage for conveyance to the aforesaid treatment plant subject to the terms and conditions herein set forth.

ARTICLE IV

OPERATING EXPENSES OF THE EAST WHITELAND TRUNK LINE

4.01 Proportion.

The Borough of Malvern and the Township of East Whiteland (which Borough and Township in this Article IV are referred to as "said municipalities") shall share the operating expenses of the East Whiteland Trunk Line (as defined in Section 4.06) as follows: The proportion that the volume of sewage (determined as hereinafter provided and by other agreement of the parties) emanating from each such municipality and discharged into the several sections or reaches of the interceptor or trunk sewer, constituting the East Whiteland Trunk Line bears to the total volume of sewage discharged by both of said municipalities into such sections or reaches shall be used in calculating the amount that each such municipality shall pay for sewage conveyance services. Operating expenses of the East Whiteland Trunk Line for the first two years of operation shall be paid as set forth in Section 4.13 hereof.

4.02 Estimates of Volume of Sewage.

In order to provide East Whiteland Township with working capital for payment of operating expenses of the East Whiteland Trunk Line, at least one hundred twenty (120) days prior to the end of the first two years of operation of the East Whiteland Trunk Line each said municipality shall supply or cause to be supplied to East Whiteland Authority an estimate of the volume of sewage to be discharged from its sewage collection system into the East Whiteland Trunk Line during the next succeeding calendar Year (or portion of a calendar year remaining after the end of the first two years of operation).

4.03 Estimated East Whiteland Trunk Line Operating Expenses.

Within sixty (60) days after receipt of the estimates provided under the preceding section, East Whiteland Township shall prepare, subject to the

approval of its consulting engineers, and furnish to Malvern, a budget setting forth (a) the estimated annual operating expenses of the several sections or reaches (including at least ten percent (10%) for contingencies) and (b) the share of each said municipality of such operating expenses (the share of each said municipality being an amount which is in the same ratio to the total of such expenses as the estimated volume of sewage from such municipality discharged in the several sections or reaches of the East Whiteland Trunk Line is to the total estimated volume of sewage from both of the said municipalities so discharged or served). If at any time it appears on the basis of past or current meter readings that the estimate of Malvern is substantially inaccurate, East Whiteland Township may revise said estimate based on such past or current meter readings and Malvern shall promptly make payments in accordance with the revised estimate.

In the event of an unusual contingency, an upward revision of the budget may be made by East Whiteland Township with the approval of Malvern, which approval shall not be unreasonably withheld; provided, however, that the budget may be exceeded without such prior approval in an emergency directly affecting the operation of the East Whiteland Trunk Line and certified by the consulting engineers engaged by East Whiteland Authority or East Whiteland Township to require immediate action. Each such municipality shall make payments in accordance with the revised budget within sixty (60) days of receipt of notice thereof. In the event a municipality is not able legally to obtain funds with which to pay all of its share of the budget increase, any unpaid amount shall be paid by it in the following year together with interest at the rate of six percent (6%) per annum until paid.

4.04 Payments on account of Estimated Operating Expenses.

On or before each January 1, April 1, July 1 and October 1 during the term of this Agreement, Malvern shall pay to East Whiteland Township (out of legally available current revenues and from sewer rentals) one quarter (1/4) of its share of the estimated annual operating expenses of the East Whiteland Trunk Line as determined in accordance with the preceding section (prorated if the two-year period referred to in Section 4.01 ends during rather than at the start of a quarter). Amounts not paid when due shall be subject to interest in the amount of six percent (6%) per annum of the amount due. Said interest shall be due from time to time upon the receipt of invoices from East Whiteland Township. In the event of a default in payment under this Section, East Whiteland Township may borrow all or part of the amount of such payment due hereunder and may use such interest to pay, or reimburse itself for paying, interest on such borrowed funds. Interest not so used shall be treated as a deduction under Section 4.07 hereo in determining actual annual operating expenses of the East Whiteland Trunk Line.

East Whiteland Township shall deposit all moneys delivered by all parties to it pursuant to this Article, together with the East Whiteland Township's share and all amounts received in payment of Federal and State contributions or grants in aid to be applied towards any cost of operation, maintenance, repair, replacement or other expenses relating to the East Whiteland Trunk Line, in a special East Whiteland Trunk Line Operating Fund (hereinafter called "Operating Fund"). Such Operating Fund moneys shall be invested by East Whiteland Township and to the extent not insured by the Federal Deposit Insurance Corporation or other Federal Agencies, or invested as hereinafter provided shall be continuously secured by the pledge of direct obligations of the United States of America or the Commonwealth of Pennsylvania having an aggregate market value (exclusive of accrued interest) at all times at least equal to the amount of such moneys.

Such moneys may be wholly or partially invested by said Township subject to the same limitations set forth in Section 2.05. Any securities so purchased shall be a part of the Operating Fund. The interest and income received from time to time upon investments and any profit realized or loss sustained from the sale of such securities shall be added to or charged to the Operating Fund and such interest, income, profit or loss shall be considered in determining the actual annual operating expenses of the East Whiteland Trunk Line pursuant to Section 4.06 hereof.

4.05 Annual Statement.

Within one-hundred twenty (120) days of the close of each calendar year, East Whiteland Township shall cause to be prepared and submitted to each of said municipalities a detailed statement, certified by a certified public accountant engaged by East Whiteland Township, showing the actual annual operating expenses of the East Whiteland Trunk Line (as defined in the next succeeding Section) and the apportionment of the cost among the said municipalities on the basis of Section 4.01.

4.06 Actual Annual Operating Expenses of the East Whiteland Trunk Line.

"Actual annual operating expenses of the East Whiteland Trunk Line" shall mean the sum of the costs referred to in subsections (a) through (f) hereof minus the deductions referred to in Section 4.07 hereof:

(a) All the actual reasonable expenses and costs of the adequate proper operation, maintenance and repair of the East Whiteland Trunk Line as the same may be constituted from time to time, determined in accordance with sound accounting practices and shall include, without limiting the generality of the foregoing, salaries and wages of operating, supervisory and administrative personnel directly charged to the operation, maintenance and repair of the East Whiteland Trunk Line (but in the event such personnel are also engaged in other activities of a municipality, shall include only that proportion of such salaries

and wages as is properly allocable to such operation, maintenance and repair on the basis of time spent or services performed); pensions, social security or unemployment taxes; chemicals; power; taxes (if any); insurance; administrative expenses; materials and supplies; maintenance; and repairs, improvements and betterments (including ordinary or routine repairs and replacements but not extraordinary replacements or additions of a capital nature which latter shall be treated in the manner provided for expansion in Section 7.02, except to the extent that Article VIII shall apply);

(b) The fees and expenses of the Consulting Engineers employed by East Whiteland Township concerning the operation, maintenance and repair of the East Whiteland Trunk Line and in preparing reports and determinations required by this Agreement;

(c) The fees and expenses of the certified public accountant engaged by East Whiteland Township to prepare the annual statement;

(d) Interest paid by East Whiteland Township pursuant to Section 4.04 hereof;

(e) The cost of that portion of the bond of the Treasurer and other officers or employees of East Whiteland Township attributable to his or their duties in connection with East Whiteland Trunk Line, under sound accounting practices; and

(f) Reasonable expenses of East Whiteland Township in providing service pursuant to this Agreement and attributable to the East Whiteland Trunk Line under sound accounting practices.

4.07 Deductions.

Any Federal or State contributions or grants in aid received by any party which is to be applied towards any cost of operation, maintenance, repair, replacement or other expenses relating to the East Whiteland Trunk Line shall be

paid to East Whiteland Township and shall be deducted in determining actual annual operating expenses of the East Whiteland Trunk Line. Interest properly allocable thereto pursuant to Section 4.04 and interest earned by East Whiteland Township on funds deposited in the Operating Expense Fund pursuant to Section 4.03 or Section 4.13 shall be deducted in determining such actual operating expenses.

4.08 Refunds of Additional Payments.

If any such municipality's share of the actual annual operating expenses of the East Whiteland Trunk Line is less than (or more than) the total amount paid by it under this Article in such calendar year, the excess shall forwith be refunded to such municipality (or the deficiency shall forthwith be paid by it) if no municipality within sixty (60) days of receipt of an annual statement has requested arbitration in accordance with Article IX and in the event of such a request, any excess (or deficiency) shall be refunded (or paid) within thirty (30) days after the matter is resolved. Amounts not paid when due shall be subject to interest at the rate of six percent (6%) per annum of the amount due and shall be subject to the provisions concerning interest of Section 4.04 hereof.

4.09 Use of Funds.

East Whiteland Township agrees that payments made by the said municipalities to East Whiteland Township on account of its share of operating expenses of the East Whiteland Trunk Line shall be applied only for the payment of actual operating expenses as defined in Section 4.06, subject to Section 4.07, and that such payments shall not be applied toward the payment of any other obligations or East Whiteland Township.

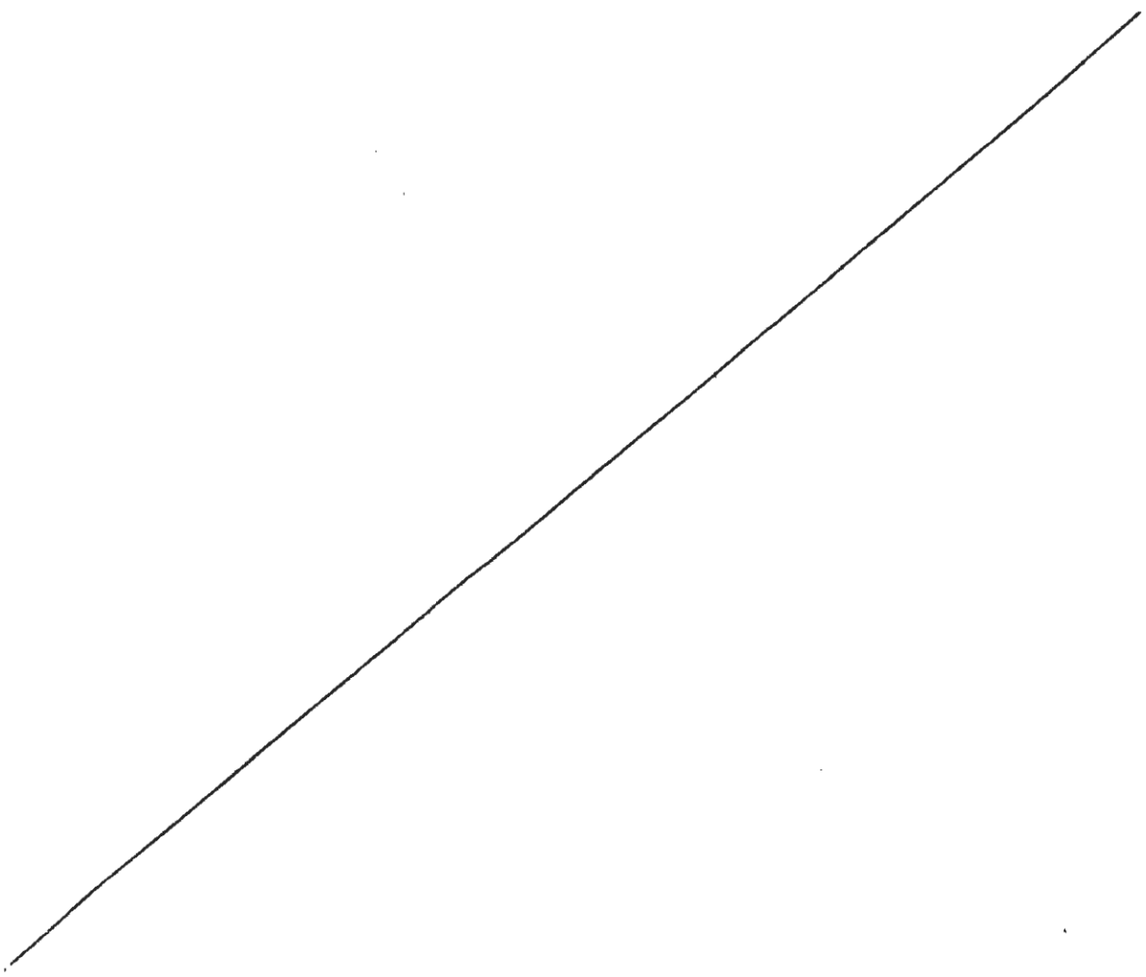
4.10 Books of Account.

In order that expenses of East Whiteland Township which are not properly allocable to the construction or operation of the East Whiteland Trunk Line shall

not be charged thereto, East Whiteland Township shall keep separate books of account for the operation of its collection system and for the East Whiteland Trunk Line or such books of account and other records which would readily permit such allocation. Said books and records shall be available for inspection by the municipalities at all times.

4.11 Sewer Rentals.

To insure the availability of current revenues adequate to meet its obligations under this Agreement, each said municipality shall impose and collect annual sewer rentals in an aggregate amount sufficient, together with other legally available funds, to equal (a) all sums payable by it to East Whiteland Township during the then current calendar year under this Agreement and (b) all sums payable by it to any other person, firm, corporation, municipality or municipality authority during the then current calendar year for or in respect to sewer purposes.



4.12 Commencement of Discharge into East Whiteland Trunk Line.

Each party shall make every reasonable effort to be ready to begin to discharge sewage into the East Whiteland Trunk Line by the time it and the Valley Creek Trunk Sewer are ready to receive sewage, and the aforesaid Valley Forge Treatment Plant is ready to treat and dispose of sewage.

4.13. Operating Expenses for the First Two Years.

Each such municipality set forth in Exhibit B shall pay to East Whiteland Township its share of the estimated operating expenses of the East Whiteland Trunk Line for the first two years of operation set forth after its name in Exhibit B (on the basis of reserved capacity) within thirty (30) days of receipt of the Certificates of the Consulting Engineers engaged by East Whiteland Authority, Tredyffrin Authority and Valley Forge Sewer Authority provided in Section 3.02. Said operating expense moneys for the first two years of operation shall be deposited in an Operating Expense Fund in the name of East Whiteland

Township separate and apart from any other fund of such Township. Investment of such moneys by East Whiteland Township shall be made subject to the same limitations set forth in Section 2.05 hereof. Within one hundred twenty (120) days of the close of said first two years of operation, East Whiteland Township shall cause a certified public accountant to prepare and submit to each participating municipality a detailed statement showing the actual annual operating expenses of the East Whiteland Trunk Line (as defined in Sections 4.06 and 4.07 hereof) and the apportionment of the cost among the said municipalities on the basis of reserved capacities as set forth in Exhibit B hereof. If at the end of the second year of operation the amount deposited hereunder by any municipality differs from the amount due, refunds or additional payments shall be made pursuant to Section 4.08 hereof.

ARTICLE V

QUALITY OF SEWAGE

5.01 General.

The sewage discharged directly or indirectly into the East Whiteland Trunk Line by any municipality or municipality authority shall be within the maximum limits presented below or pretreated to within the limits of Section 5.04.

5.02 Acceptability Standards.

After consultation with Valley Forge Sewer Authority, East Whiteland Township shall from time to time establish acceptability standards for sewage and industrial waste entering the collection system of any municipality or municipality authority and discharging directly or indirectly into the East Whiteland Trunk Line for the purpose of prohibiting materials or characteristics which would be deleterious to the East Whiteland Trunk Line, Valley Creek Trunk Sewer or to the Valley Forge Treatment Plant or the treatment process, which standards shall be reasonable and similar to standards imposed with regard to similar facilities and shall not be higher or more restrictive than those imposed by Valley Forge Sewer Authority. No municipality or municipality authority shall permit discharge directly or indirectly into the East Whiteland Trunk Line of any sewage or waste so certified to be deleterious, but such certification shall not preclude the municipality or municipality authority from contesting the reasonableness of such determination.

Subject to the foregoing, all municipalities and municipality authorities agree to enact or adopt or cause to be enacted or adopted uniform ordinances, resolutions, rules or regulations to prohibit users of the respective collection systems serving such municipalities and municipality authorities from discharging substances failing to meet such acceptability standards and to require all pre-treatment of sewage or other waste necessary to require the same to conform to the

acceptability standards and agree to take all necessary steps in the design and construction of the collection systems and in the subsequent maintenance and operation thereof (including the exercise of appropriate inspection of and control over building connections) to prevent infiltration of storm water and other improper substances into the collection systems.

5.03 Sampling Manholes.

For the purpose of determining the characteristics of sewage or wastes, each municipality or municipality authority shall install or cause to be installed a sampling manhole at the point of discharge at the property of any user which the consulting engineer of such municipality or municipality authority considers capable of discharging sewage or wastes not meeting any of such acceptability standards.

5.04 Industrial Wastes.

In order to control admission of industrial wastes, no party to this Agreement shall permit any industrial user to connect to or discharge into its collection system any waters or wastes other than sanitary waste without the prior review and approval of the consulting engineers and the consulting engineers of Valley Forge Sewer Authority. The consulting engineers' review (until such time as the following acceptability standards are amended in accordance with Section 5.02 hereof) shall be based on, but not limited to, the following standards:

Waste Characteristics to be Considered

Characteristics of the industrial waste shall not be in general in excess of those listed below:

(1) The 5-day 20 deg. centigrade B.O.D. (bio-chemical oxygen demand) shall not exceed 250 ppm.

(2) The suspended solids content shall not exceed 300 ppm.

(3) The total solids content shall not exceed 1,100 ppm.

(4) The PH shall not be less than 6.0 nor shall it exceed 9.0.

(5) The temperature shall not exceed 150° F.

(6) The color shall not be such as to require special treatment to render the effluent acceptable for discharge into the Schuylkill River.

(7) The waste shall not contain greases and oils, inflammable material, non-biodegradable materials or any oxygen scavengers, sufficient in quantity to be injurious to the treatment plant or interfere with any treatment process or to constitute a hazard to human or animal life.

(8) The waste shall not contain any solid or viscous material capable of causing obstruction to the flow in the sewers, or at the Valley Forge Treatment Plant or any material capable of causing interference with the proper operation of the East Whiteland Trunk Line, The Valley Creek Trunk Sewer or the Valley Forge Treatment Plant.

Where required, in the opinion of the consulting engineers, the user shall provide at his expense such preliminary treatment or handling as may be necessary to modify the objectionable characteristics or control the quantities and rates of discharge of such water or wastes as necessary.

Plans, specifications, and any other pertinent information relating to proposed preliminary treatment or handling facilities shall be submitted for review to Valley Forge Sewer Authority and no construction of such facilities shall be commenced until a permit for the connection is obtained in writing from Valley Forge Sewer Authority. A copy of each such permit shall be furnished to East Whiteland Township.

In order to insure quality compliance and to reduce the possibility of accidental discharges of wastes not conforming, each municipality and municipality authority shall sample, test or otherwise examine industrial wastes as often as reasonably necessary to insure quality compliance.

5.05 Combined Sewage and Industrial Wastes.

In order to control the sewage entering, Valley Forge Sewer Authority will sample the discharge from each municipality or municipality authority period-

ically to insure that no characteristic is evident which would be deleterious to the East Whiteland Trunk Line, the Valley Creek Trunk Sewer or the Valley Forge Treatment Plant or the treatment process.

The characteristic of each combined sewage and industrial waste discharge shall not be in excess of those listed under Section 5.04 except that the temperature of the combined discharge shall not exceed 100° F. Each municipality or municipality authority shall provide facilities to prevent the occurrence of septic conditions in the East Whiteland Trunk Line.

Should Valley Forge Sewer Authority find either the BOD or suspended solids characteristics exceeded as determined in the tests on the periodically obtained samples, the potentially offending municipality or municipality authority shall be notified of the findings and requested to examine the conditions. If at the end of a quarter Valley Forge Sewer Authority determines that the discharge from the municipality or municipality authority is in excess of the characteristics as determined by average test results by periodic sampling, the suspected offender shall be given written notice that its discharge is in excess and that a comprehensive sampling and testing program will be undertaken by Valley Forge Sewer Authority to verify the non-compliance and to notify that steps should be taken to rectify the problem.

If, at the end of the quarterly comprehensive test program the problem has not been rectified, a penalty charge as provided in Section 5.06 will be added to that quarter's billing and until the situation is shown to be corrected.

Should Valley Forge Sewer Authority find any of the additional characteristics to be in excess or to find the presence of any other untested deleterious material in the course of periodic sampling and testing the potential offending municipality or municipality authority shall be given notice to take immediate steps to rectify the problem.

ARTICLE VI

DETERMINATION OF QUANTITY OF SEWAGE DISCHARGED INTO THE EAST WHITELAND TRUNK LINE

6.01 Meters or Measuring Devices.

In order to measure in gallons the quantity of sewage emanating from the Borough of Malvern and the Township of East Whiteland, which is discharged into the various sections or reaches of the interceptor or trunk sewers of the East Whiteland Trank Line, each of said municipalities shall each, at its expense, construct or cause to be constructed, where feasible, a sewage meter or sewage flow measuring device at each point necessary to determine the volume of sewage emanating from the Borough of Malvern and the Township of East Whiteland, discharged into the East Whiteland Trunk Line. The above sewage meters and related equipment such as recorders and charts shall be as mutually agreed upon by the Consulting Engineers and the consulting engineers of Valley Forg Sewer Authority and of said municipalities. All metering stations shal provide facilities for sampling the sewage.

6.02 Calibration and Readings.

All meters or measuring devices constructed or installed by Valley Forge Sewer Authority, the Borough of Malvern and the Township of East Whiteland, shall be calibrated by Valley Forge Sewer Authority at least once each year and, if requested by East Whiteland Township, shall be checked at other times as a cost of operating the Valley Forge Treatment Plant. All readings of each such municipality or municipality authority's meter or measuring device shall be performed by a representative of said municipality, of Valley Froge Sewer Authority and of East Whiteland Township. Meters or measuring devices shall be read or examined on the date each municipality or municipality authority first connects and on the first day of each quarter of each year during the term of this Agreement

to determine the quantity of sewage emanating from each municipality or area served by a municipality authority for the previous quarterly period or portion thereof. Copies of meter readings or measuring device examinations shall forthwith be delivered to each municipality and to Valley Forge Sewer Authority and to East Whiteland Township.

6.03 Maintenance and Operation.

All meters and measuring devices used for the purpose of determining flows into the Valley Creek Trunk Sewer and used for billing purposes will be routinely serviced and inspected by Valley Forge Sewer Authority as a part of the treatment plant operating expense. Valley Forge Sewer Authority shall undertake to have an inoperative or inaccurate meter or measuring device repaired as soon as practicable with the cost of such repair being charged back to the owner. Valley Forge Sewer Authority shall not be obligated to provide service to any devices other than the primary metering element, recorders, transmitters and other instruments. Each municipality or municipality authority shall, at its own expense, be responsible for all other maintenance and operation of its sewage metering facilities.

6.04 Missing or Inaccurate Flow Records; Use of Equivalent Dwelling Units as Measurement of Flow.

In the case of missing flow records due to faulty meter registration or otherwise, an estimate of flows shall be made by the Consulting Engineers for the purpose of determining volume of sewage discharges. This estimate will be based on a valuation of past flow records as applied to the then existing conditions and as reviewed and approved by the Consulting Engineer of the respective municipality or municipality authority.

In the absence of meter readings during the early period of low flows, when the sewage recording meters may not register the flow, or where meters

cannot practically be installed, flow quantities shall be determined on the basis of the average number of Equivalent Dwelling Units (upon the basis of a discharge rate of 275 gallons per Equivalent Dwelling Unit per day). The number of Equivalent Dwelling Units shall be determined at the beginning and end of each calendar quarter during the term of this Agreement based upon a certification by a responsible officer of the municipality or municipality authority as to the number of such Equivalent Dwelling Units so connected by the municipality or municipality authority at the beginning and end of each quarter and shall be averaged on the basis of the number of units so connected at the beginning and end of each such quarter. Where the initial connection of the collection system of any municipality or municipality authority is made to the East Whiteland Trunk Line after the first day of a calendar quarter, the quantity of sewage so discharged shall be based on the number of Equivalent Dwelling Units so connected at the end of such quarter prorated on the basis of the number of days in such calendar quarter that any sewage is so discharged from such municipality or municipality authority. For the purpose of determining the number of Equivalent Dwelling Units represented by schools, churches or municipal buildings, commercial or industrial establishments, etc., the factors set forth in Exhibit C shall be applied. The officials and representatives of East Whiteland Township may inspect the records of any connecting municipality or municipality authority for the purpose of determining the accuracy of the number of Equivalent Dwelling Units certified by such municipality or municipality authority.

6.05 Proportion of Flows.

The quantity of sewage discharged into the several sections or reaches of the East Whiteland Trunk Line shall be determined, with respect to each such municipality or municipality authority in the ratio that the quantity of sewage emanating from each such municipality or municipality authority (determined as

above) shall bear to the total quantity of sewage discharged into such sections or reaches of the East Whiteland Trunk Line from all municipalities and any municipality authority.

Valley Forge Sewer Authority shall undertake to prepare a complete distribution of the total volume of sewage received and metered at the sewage treatment plant during each calendar quarter and during each calendar year, with respect to each such municipality or municipality authority which discharges sewage that is treated in the Valley Forge Sewer Authority sewage treatment plant, such distribution to include all metered and unmetered sewage flows of each municipality or municipality authority.

ARTICLE VII

RENTING UNUSED CAPACITY; EXTRAORDINARY REPAIRS, RENEWALS OR REPLACEMENTS OF INTERCEPTOR OR TRUNK SEWERS; ENLARGEMENTS OR ADDITIONAL INTERCEPTOR OR TRUNK SEWERS.

7.01 Renting Unused Capacity.

Each municipality discharging from its sewage collection system into the East Whiteland Trunk Line during a calendar year a volume of sewage less than its reserved capacity, as set forth in Exhibit B shall be deemed to have been placed its unused capacity in a rental pool. Any municipality (each of which is herein called "lessee municipality") discharging sewage into the East Whiteland Trunk Line in any calendar year in excess of its reserved capacity, as set forth in Exhibit B, shall rent from the pool for the entire calendar year capacity equal to the volume by which it exceeds its reserved capacity (with the total volume discharged by it being reduced to gallons per day by dividing the total gallons discharged by it in such calendar year by 365). The annual rental fee to be paid by the lessee municipality shall be the representative annual "debt service" (calculated at equal annual payments to amortize the debt, including seven per cent (7%) interest per annum for a 25-year term) for the amount obtained by multiplying the fraction of the rated capacity of the East Whiteland Trunk Line or of any section or reach thereof rented for the current calendar year by the total of capital contributions made by all parties hereto toward the cost of providing the East Whiteland Trunk Line or such section or reach thereof as then being used. The capacity thus rented by the lessee municipality shall be rented annually by it until the next expansion of the East Whiteland Trunk Line, at which time the lessee municipality

shall surrender the capacity rented by it and shall, at its expense, replace the capacity rented by it (in each such section or reach or pumping station) so that each lessor municipality will receive back its reserved capacity placed in the pool. In no event, shall any contribution of capacity to the rental pool be construed to decrease the reserved capacity in the East Whiteland Trunk Line or any section or reach thereof of any lessor municipality.

The rental fees shall be distributed to the contributors to the rental pool in proportion to their contributions (the contribution as to each being the difference between its actual flow during the current calendar year [reduced to gallons per day] and its reserved capacity) the rental fee owed by each lessee municipality, together with the proposed distribution thereof to the lessor municipalities, shall be shown as separate items in the annual statement furnished pursuant to Section 4.05 hereof. Rental fees owed shall be paid by each municipality to East Whiteland Township within sixty (60) days of receipt of said annual statement unless arbitration has then been requested, and in such event shall be paid within thirty (30) days of the date the matter is resolved pursuant to the procedure set forth in Section 9.01. Distribution of the rental fees shall be made by East Whiteland Township promptly thereafter as provided herein.

Although rental payments shall be paid and distributed hereunder on the basis of actual flows, the total estimates of sewage to be discharged into the East Whiteland Trunk Line in a calendar year pursuant to Section 4.02 hereof, shall be used to avoid exceeding the rated capacity of the East Whiteland Trunk Line or any section or reach thereof. In the event that the total of said estimates, pursuant to Section 4.02, exceeds 90% of the rated capacity of any

section or reach of the East Whiteland Trunk Line (with the remaining 10% being used as a safeguard against underestimation), the Consulting Engineers of East Whiteland Township shall allocate the capacity in the pool (as estimated) among the municipalities estimating discharge in excess of their reserved capacities in proportion to their flows during the preceding calendar year; provided, however, that any municipality may continue to rent the number of gallons of capacity previously rented by it. No municipality shall permit any new connection to be made to its collection system or permit increased flow from any existing connection (due to construction and connection to the system of additional facilities) if so permitting might cause its volume of sewage discharged into the East Whiteland Trunk Line at peak flows during such calendar year to exceed the total of its reserved capacity and the capacity in the pool allocated to it by the Consulting Engineers of East Whiteland Township for such year.

7.02 Extraordinary Repairs, Renewals or Replacements of Interceptor or Trunk Sewers and Pumping Stations; Enlargements or Additional Interceptor or Trunk Sewers.

If, during the term of this Agreement, any interceptor or trunk sewer (or any section or reach thereof) of the East Whiteland Trunk Line used in whole or in part for the conveyance of sewage emanating from any of the municipalities (in addition to sewage emanating from East Whiteland Township) to the Valley Forge Treatment Plant shall require extraordinary repairs, renewals or replacements, each municipality and municipality authority named in Exhibit B agrees to pay or to cause to pay to the East Whiteland Authority (but only from legally available current revenues, sewer rentals available and funds which can be legally borrowed) its proportionate share of the project cost of such repairs, renewals or replacements.

The necessity for and the extent of such extraordinary repairs, renewals or replacements of any such section or reach of an interceptor or trunk sewer (with a breakdown by municipality or municipality authority) shall be determined by the Consulting Engineers engaged by East Whiteland Authority subject to the approval of the municipalities affected (which approval may be withheld only for sound engineering reasons), after consultation with the consulting engineers of each of the said municipalities and municipality authorities affected and written notice of such determination together with the Consulting Engineers' estimate of the cost thereof (with a breakdown by municipality or municipality authority) shall be given to each such municipality and municipality authority affected.

Each such municipality and municipality authority affected shall pay or cause to be paid to East Whiteland Authority the proportion of the project cost of such repairs, renewals or replacements in the proportion that the reserved capacity of such municipality or municipality authority in such section or reach of interceptor or trunk sewer shall bear to the total of the reserved capacities of all such municipality or municipality authority in such sections or reaches.

At such times as (a) eighty per cent (80%) of the rated capacity of the East Whiteland Trunk Line or any section or reach thereof is used or (b) estimates of volume under Section 4.02 exceed ninety per cent (90%) of said rated capacity or (c) in the event (i) enlargement of any interceptor or trunk sewer (or any section or reach thereof) or the construction of an additional interceptor or trunk sewer within East Whiteland Township or partly within and partly without East Whiteland Township or (iii) the enlargement of

any pumping station or the construction of an additional pumping station within East Whiteland Township is required to meet the requirements or standards prescribed by the Sanitary Water Board of the Pennsylvania Department of Health or any other governmental authority having jurisdiction. East Whiteland Authority shall construct such enlargement or additional sewer or pumping station; and each municipality and municipality authority named in Exhibit B agrees to pay East Whiteland Authority (but only from legally available current revenues, sewer rentals available and funds which can be legally borrowed) its proper proportionate share of the project cost of enlargement or additional sewer or pumping station. The necessity for the extent of such enlargement or additional sewer or pumping station (with a breakdown by municipality or municipality authority) shall be determined by the Consulting Engineers engaged by East Whiteland Authority subject to the approval of such municipalities or municipality authorities (which approval may be withheld only for sound engineering reasons), after consultation with the Consulting Engineers of each municipality or municipality authority and written notice of such determination together with the Consulting Engineers' estimate of the cost thereof (with a breakdown by municipality and municipality authority) shall be given to each municipality and municipality authority affected.

Each such municipality or municipality authority affected shall pay or cause to be paid to East Whiteland Authority the proportion of the project cost of such enlargement of or additional interceptor or trunk sewer or enlargement of or additional pumping station on the basis of the proposed increases in design capacities to be reserved for each municipality or municipality authority in such

enlarged or additional reach or section of interceptor or trunk sewer or in such enlargement of or additional pumping station. The reserved capacities shall be as set forth in Exhibit B subject to any changes in such reserved capacities as may be requested by any municipality or municipality authority. Adjustment shall be made so that each lessee municipality or municipality authority pursuant to Section 7.01 hereof bears the expense of replacing the capacity rented by it and each lessor municipality receives back its reserved capacity placed in the pool.

The project cost of the aforesaid extraordinary repairs, renewals or replacements, enlargements or additions shall be determined as hereinabove provided with respect to the construction of the several sections or reaches of the respective interceptor or trunk sewers and the pumping stations of the East Whiteland Trunk Line set forth in Article II hereof and shall be paid and accounted for in the same manner as that provided in Article II hereof. Each party authorizes and directs East Whiteland Authority on behalf of each municipality and municipality authority from time to time to apply for and accept any one or more grants in aid towards the aforesaid extraordinary repairs, renewals or replacements, enlargements or additions.

7.03 Construction Fund.

Moneys paid pursuant to Section 7.02 of this Article shall be deposited, held and disbursed pursuant to the Construction Fund provisions set forth in Article II hereof.

ARTICLE VIII

INSURANCE AND DAMAGE OR DESTRUCTION

8.01 Insurance on East Whiteland Trunk Line.

East Whiteland Authority agrees that during the construction of East Whiteland Trunk Line it will at all times cause to be kept in force builder's risk insurance (or equivalent coverage) upon any work done or materials furnished under construction contracts (except foundations and any other structures not customarily covered by such insurance) said policies to be written in completed value form for 100% of the insurable value of the contracts. East Whiteland Township agrees that upon completion of such construction it will at all times as an East Whiteland Trunk Line operating expense cause the East Whiteland Trunk Line to be insured against loss or damage by fire or other casualty in such amount and against such risks as are usually carried with respect to like properties, provided that the amount of such insurance shall be sufficient to prevent the insured from becoming a co-insurer thereunder by reason of any co-insurance clause in the policies. All such insurance policies shall (a) be written by responsible insurance companies authorized and qualified to do business in Pennsylvania, (b) be non-assessable and (c) name as the insureds East Whiteland Authority, East Whiteland Township and the Trustee of the Trust Indenture executed by East Whiteland Authority to secure its bonds issued to provide for the construction in whole or in part of the East Whiteland Trunk Line and, in addition, during any period of repair or construction the contractors engaged in such repair or construction, and to the extent procurable shall not be cancellable for at least fifteen (15) days prior written notice to such named insureds. All payments made under such policies on account of loss shall be paid to the aforesaid Trustee. East Whiteland Township agrees to furnish to each municipality before commencing operation of the East Whiteland Trunk Line

and before the start of each year during the term of this Agreement a certificate of the Consulting Engineers stating the amount and kind of such insurance in effect for the ensuing year and that the same is, in the opinion of the Consulting Engineers, in compliance with the requirements of this section.

8.02 Repair or Reconstruction with Insurance Proceeds.

In the event any damage to the facilities covered by such insurance, East White Authority, upon receipt of the necessary funds as provided for herein, shall promptly repair or replace the damaged property unless the Consulting Engineers certify that it would not be practical and advantageous to do so. It is agreed that in the absence of such a certification the proceeds of all insurance coverage to the extent necessary shall be applied to such repair or reconstruction.

8.03 Repair or Replacement not covered by Insurance Proceeds.

In the event that it shall become necessary, in order to convey sewage to the Valley Forge Treatment Plant in accordance with the purport and intent of this Agreement, to make an extraordinary repair or replacement of any section or reach of any interceptor or trunk sewer or of any pumping station constituting a part of the East Whiteland Trunk Line because of damage or destruction by casualty or otherwise, and there are insufficient funds available from insurance proceeds to pay the costs and expenses thereof, East Whiteland Authority and Malvern Authority shall forthwith pay over to East Whiteland Authority (but only from legally available current revenues, sewer rentals and borrowed funds) for deposit in a special construction fund such amount as is required for the purpose, in the same proportions and in the

the same manner as that hereinabove provided under Section 7.02.

8.04 Providing Conveyance Capacity by a means other than Repair or Reconstruction of the East Whiteland Trunk Line.

In the event that proceeds of insurance resulting from damage to the East Whiteland Trunk Line are not applied to the repair or the replacement of the damaged property because the same is determined to be impractical and not advantageous (pursuant to Section 8.02 hereof) such proceeds shall be applied towards the provision of conveyance capacity pursuant to Section 7.02 hereof. In such event credit for funds so applied shall be given to the municipalities in the same proportions as capital contributions towards the project cost of the East Whiteland Trunk Line were made by each.

ARTICLE IX

ARBITRATION

9.01 Arbitration as the Charges provided in Articles II and IV.

In the event any disagreement shall arise concerning the charges provided in Articles II and IV and the parties cannot otherwise promptly resolve the same, such disagreement shall be submitted within ten (10) days of the time any party requests arbitration to a certified public accountant appointed by method agreed upon by the parties. In the event of failure to agree upon such an arbitrator within ten (10) days, an arbitrator shall be appointed by the Senior Judge of the Court of Common Pleas of Chester County available at the time when the Authority or any of the parties request appointment of an arbitrator. The decision of the accountant or arbitrator so chosen shall be binding and rendered within twenty (20) days. Any request for arbitration shall be made within sixty (60) days after receiving a certificate under Section 2.08 or a statement under Section 2.10,

Section 4.05 or Section 4.13, and if no such request is made the certificate or statement shall be considered correct and not subject to future questions. The fee of such certified public accountant or arbitrator shall be an operating expense of the East Whiteland Trunk Line.

9.02 Arbitration by Board of Arbitrators.

In the event any disagreement shall arise as to the interpretation of any provisions hereof or the rights and obligations of the parties hereunder (other than disagreements provided for in Section 9.01) and the parties cannot otherwise promptly resolve the same, such disagreement shall be submitted within ten (10) days of the time any party request arbitration to a Board of Arbitrators whose decision shall be binding and shall be rendered within twenty (20) days. Such Board shall consist of the Consulting Engineers appointed by East Whiteland Authority, a firm of consulting engineers selected by the other parties to this Agreement and a third professional engineer licensed in Pennsylvania selected by the Consulting Engineers appointed by East Whiteland Authority and by said other parties; provided, however, that East Whiteland Authority and the other parties to this Agreement may agree to select arbitrators other than engineers or may agree to submit the matter to a single arbitrator. In the event of failure of said engineers to agree upon a third engineer or arbitrator, the same shall be appointed in the manner set forth in Section 9.01 hereof. The fees of all arbitrators shall be an operating expense of the East Whiteland Trunk Line.

ARTICLE X

MISCELLANEOUS PROVISIONS

10.01 Operation of East Whiteland Trunk Line.

East Whiteland Township agrees that it will, for and during the term of this Agreement by use of funds provided hereunder, operate and maintain the East Whiteland Trunk Line and that it will keep the same in good order and repair, save where prevented from doing so by act of God or riot, rebellion, sabotage, act of the public enemy or public calamity in which event East Whiteland Township may suspend operation of the East Whiteland Trunk Line until the cause of such suspension shall no longer exist and for such reasonable time thereafter as may be required to effect a resumption of operations. Neither East Whiteland Authority nor East Whiteland Township shall at any time or under any circumstances be liable to any party for damages in case of failure or inadequacies of the East Whiteland Trunk Line or the Valley Creek Trunk Sewer, or the Valley Forge Treatment Plant to receive, convey, treat or dispose of sewage.

10.02 Operation of Collection Systems.

Each party agrees that during such time as it operates a sewage collection system it will continuously operate and keep and maintain its collection system at all time in first-class repair, order and efficient operating condition and will meet the standards prescribed by the Sanitary Water Board of the Pennsylvania Department of Health or any other governmental authority having jurisdiction. Each party agrees to pay the cost of any damage to the East Whiteland Trunk Line or fine imposed upon East Whiteland Authority or East Whiteland Township resulting from discharge of improper sewage from such party's collection system in violation of this Agreement or

from improper operation or maintenance of such party's collection system. Each party agrees to indemnify and save harmless all of the other parties against all costs, losses or damage on account of any injury to persons or property occurring in the performance of this Agreement due to the negligence of such party or its servants, agents or employees.

10.03 Leases.

In the event that any municipality authority shall at any time lease its collection system to a municipality, any right or obligation of such authority under this Agreement may be exercised and shall be performed, as the case may be, by the municipality instead of the municipality authority to the extent that it may legally do so. When, by reason of the termination of any collection system lease, or for any other reason, any municipality authority shall be in possession of its collection system, then without any further act or agreement such municipality authority shall succeed to and become vested with all of the rights, powers, duties and obligations under this Agreement granted to or imposed upon the municipalities which created such authority.

10.04 Public Utility Law.

In the event that the Commonwealth of Pennsylvania should subsequently lawfully confer jurisdiction of the subject matter of this Agreement upon the Pennsylvania Public Utility Commission in whole or in part, the parties shall, if requested so to do, proceed forthwith to obtain all necessary power, right and authority from the said Public Utility Commission or such other proper agency of such Commonwealth in order to carry out the terms, provisions and intendment hereof.

10.05 Permits.

In the event that it may be necessary for the proper performance of this Agreement on the part of the East Whiteland Authority or East Whiteland Township to apply to any governmental or other agency for any permit or license to do or perform any act or thing contemplated hereby, and if such application must be made by a municipality rather than by the East Whiteland Authority or East Whiteland Township, the municipality affected agrees that it will execute the required application upon request by the East Whiteland Authority or East Whiteland Township, it being understood that in executing such application the municipality shall not assume any obligations both those for which it would have been responsible had East Whiteland Authority or East Whiteland Township made the said application.

10.06 No Joint Liability.

With the exception of a municipality and a municipality authority organized by such municipality, no party shall be held to be jointly liable in the event of failure of any party to perform and discharge its obligations under this Agreement, it being the intent hereof that this shall constitute the separate agreement of each of the parties named herein and default by any party in the discharge of any obligation resting upon it hereunder, shall not relieve any party from full performance of and compliance with the terms hereof.

10.07 Connections.

Prior to the completion of construction of the Valley Forge Treatment Plant, the Valley Creek Trunk Sewer and the East Whiteland Trunk Line, the Borough and each Township which is a party

hereunder will (to the extent it has not done so prior thereto) take all action which may be legal and necessary to compel all properties located within its territorial limits and then capable or thereafter becoming capable of being served by the municipality's collection system to be connected therewith.

10.08 Records.

Each party agrees to make available at all reasonable times to the parties to this Agreement and their employees, agents and representatives, access to all records relating to matters covered in this Agreement and access to the physical facilities of each party in order to assure compliance with the terms and conditions of this Agreement. A copy of all ordinances, resolutions, rules and regulations adopted by each party from time to time, pursuant to this Agreement, shall be furnished to East Whiteland Authority within thirty (30) days after enactment.

10.09 Severability.

Should any one or more of the provisions of this Agreement for any reason be held illegal or invalid, such illegality or invalidity shall not affect any other provision of this Agreement; and this Agreement shall, in such circumstances, be construed and enforced as if such illegal or invalid provision had not been contained herein.

10.10 Term.

This Agreement shall become effective upon its execution and delivery by all the parties hereto and shall remain in effect for forty years and thereafter shall be terminated only by mutual agreement of all parties.

10.11 Definitions.

The following terms and phrases shall have the meanings hereinafter set forth whenever such terms and phrases are used herein:

(a) "Consulting Engineers" means Roy F. Weston, Inc., and in the event said firm ceases to serve as the Consulting Engineers for East Whiteland Authority, an engineering firm or professional engineer having a favorable repute for skill and experience in the construction and operation of sewage treatment plants, registered in Pennsylvania and chosen by East Whiteland Authority.

(b) "Equivalent Dwelling Unit" shall mean any room, group of rooms, house trailer or other enclosure occupied or intended for occupancy as separate living quarters by a family or other group of persons living together or by persons living alone.

(c) "Industrial Uses" means any improved property used, in whole or in part, for manufacturing, processing, cleaning, laundering or assembling any product, commodity or article or from which any process waste, as distinct from sanitary sewage, is discharged.

(d) "Industrial Wastes" means any and all wastes discharged from an industrial establishment or by an industrial user, other than sanitary sewage.

(e) "Sewage", "Wastewater", "Sanitary Sewage" and "Sanitary Waste" means normal water-carried household and toilet wastes from any improved property and is limited to sewage permitted by Article V hereof and industrial wastes to the

extent permitted by Article V.

(f) "Improved Property" means any property upon which there is erected a structure intended for continuous or periodic habitation, occupancy or use by human being or animals and from which structure sanitary sewage and/or industrial wastes shall be or may be discharged.

(g) "pH" means the logarithm of the reciprocal of the concentration of hydrogen ions, expressed in grams per liter of solution, indicating the degree of acidity or alkalinity of a substance.

(h) "B.O.D." means biochemical oxygen demand.

10.13 Valley Forge Sewage Treatment Plant Agreement.

Should any of the provisions of this Agreement conflict or be inconsistent with provisions contained in the Valley Forge Sewage Treatment Plant Agreement, to which the parties hereto are signatories, the provisions of the latter shall supersede the provisions of this Agreement.

10.14 Execution.

This Agreement may be executed in any number of counterparts each of which may be deemed an original.

IN WITNESS WHEREOF, each of the parties hereto has caused this Agreement to be executed and attested by its proper officers, pursuant to the proper action of its governing body, as of the day and year first above written.

FACTORS FOR DETERMINATION OF EQUIVALENT DWELLING UNITS

Classification	Number of E.D.U.
A. Each private dwelling or living unit	1
B. Each fire house or municipal building	1
C. Each church	1
D. Each public or private day school . . . . . Elementary, junior or senior high school Based on the daily average number of pupils enrolled on days when the school was in session during the quarter immediately preceding the date for determination of the number of connections, divided by the factor of 20. Teachers and employees shall be classified as pupils. Average enrollment shall be redetermined annually.	
E. Each retail gas station without car washing facilities	2
F. Each retail gas station with car washing facilities	3
G. Each commercial establishment, hospital, convalescent home, or institution . . . . . The quantity of water used shall be evidenced by meter readings of water meters installed by water suppliers for the purpose of measuring water purchased from said water supplier and such other meters or measuring devices as may be installed. The quantity of water used during the quarter immediately preceding the date for determination of the number of connections divided by 24,750 gallons shall represent the number of Equivalent Dwelling Units determined in respect of such establishment. Where no meter has been installed by the supplier or no other meter or measuring device has been installed, the number of Equivalent Dwelling Units shall be estimated.	
H. Each motel, hotel, or rooming house . . . . . Each unit or room shall be evaluated as one-half an Equivalent Dwelling Unit. Where a restaurant or bar room is conducted in conjunction with any motel or hotel, a separate determination for such restaurant or bar room shall be made in accordance with paragraph "G" above.	
I. Industrial Establishments . . . . . The quantity of water used shall be evidenced by meter readings of water meters installed by water suppliers for the purpose of measuring	

water purchased from said water supplier and such other meters or measuring devices as may be installed. The quantity of water used during the quarter immediately preceding the date for determination of the number of connections divided by 24,750 gallons shall represent the number of Equivalent Dwelling Units determined in respect of such establishment.

Where no meter has been installed by the supplier or no other meter or measuring device has been installed, the number of Equivalent Dwelling Units shall be estimated.

J. Multiple Use. In case of a combination of one or more dwelling or living units with a similar unit or units or with one or more commercial establishments in the same or connected building with each thereof having the use of the Valley Creek Trunk Sewer (directly or indirectly) through one sewer connection, then each such private dwelling or living unit and each such commercial establishment shall be evaluated on the basis of the applicable factors for each use thereof as if such use were conducted in a separate structure and as if each such use had a direct and separate connection to the Valley Creek Trunk Sewer . . . . . .

EXHIBIT F7

AMENDMENT TO EAST WHITELAND TRUNK LINE AGREEMENT, DATED DECEMBER 12, 1979, BY AND BETWEEN EAST WHITELAND MUNICIPAL AUTHORITY, THE TOWNSHIP OF EAST WHITELAND, THE BOROUGH OF MALVERN, MALVERN MUNICIPAL AUTHORITY, AND VALLEY FORGE SEWER AUTHORITY

AMENDMENT TO EAST WHITELAND TRUNK LINE AGREEMENT

This Amendment, dated as of the 12th day of December, 1979, to the East Whiteland Trunk Line Agreement dated as of February 1, 1971, as amended by Composite Amendment No. 1, dated as of December 1, 1974 (hereinafter referred to as "the Agreement"), is entered into between EAST WHITELAND MUNICIPAL AUTHORITY (East Whiteland Authority), the TOWNSHIP OF EAST WHITELAND (East Whiteland Township), parties of the first part, and the BOROUGH OF MALVERN (Malvern), and MALVERN MUNICIPAL AUTHORITY (Malvern Authority), parties of the second part, and VALLEY FORGE SEWER AUTHORITY, party of the third part.

WHEREAS, subsequent to the execution of the Agreement, Valley Forge Sewer Authority decided to seek the opportunity to transmit sewage from an area of Charlestown Township adjacent to East Whiteland Township through the East Whiteland Trunk Line (and the Valley Creek Trunk Line) to the Valley Forge Treatment Plant; and

WHEREAS, East Whiteland Authority and East Whiteland Township, at the request of Valley Forge Sewer Authority are willing to reserve for the Valley Forge Sewer Authority, the reserved capacity provided herein of the East Whiteland Trunk Line and the Mill Lane pumping station; and

NOW, THEREFORE, the parties hereto, intending to be legally bound hereby, agree as follows:

1. Valley Forge Sewer Authority shall have no rights or liabilities with respect to Section 1.01 of the Agreement.

2. Within thirty (30) days of the date of this Amendment, Valley Forge Sewer Authority shall pay to East Whiteland Authority the sum of one hundred fifteen thousand nine hundred seventy-five

dollars ($115,975). Of that sum, $114,189 shall be allocated to Valley Forge Sewer Authority's capital contribution pursuant to Sections 2.01 and 2.02 of the Agreement and $1,786 to operating expenses for the first two (2) years pursuant to Section 4.13 of the Agreement. The calculation of the above figure takes into consideration all currently applicable grants. Exhibit B of the Agreement is hereby amended in part as set forth in Exhibit A attached hereto. All references in the Agreement to Exhibit B thereof shall be deemed to refer to Exhibit B as amended by Exhibit A attached hereto.

3. Valley Forge Sewer Authority hereby is granted rights, and assumes liabilities as if it were one of the parties referred to in the Agreement as a "Municipality" which rights and liabilities are defined in the Agreement.

4. Valley Forge Sewer Authority, at its own expense or at the expense of its users, may, during the term of the Agreement, cause sewage emanating from Charlestown Township to be discharged into sewer lines of East Whiteland Township which have been acquired from Great Valley Wastewater Company ("the Great Valley Line"). The East Whiteland Trunk Line shall thus be extended to the boundary of Charlestown Township.

5. Valley Forge Sewer Authority shall commence delivering sewage to the Great Valley Line as soon as practicable after the execution of this Agreement. East Whiteland Authority, as soon as practicable thereafter, shall permit connection at the locations that East Whiteland Authority may agree to, which agreement may not be unreasonably withheld, and shall accept sewage for conveyance to the treatment plant subject to the terms and conditions herein set forth. Valley Forge Sewer Authority may make subsequent connections at locations agreed to by East

Whiteland Authority, which shall not unreasonably withhold its agreement. Except as permitted pursuant to Article VII of the Agreement, Valley Forge Sewer Authority shall not exceed its reserved capacity as set forth in Exhibit B, as amended by this Agreement.

6. Section 4.01 of the Agreement is hereby amended to read as follows:

"The Borough of Malvern, the township of East Whiteland and Valley Forge Sewer Authority (all of which are referred to in this article IV and elsewhere in this agreement as 'said municipalities') shall share the operating expenses of the East Whiteland Trunk Line and its extension to Charlestown Township, as defined in Section 4.06, as follows: the proportion that the volume of sewage (determined as hereinafter provided and by other agreement of the parties) emanating from each such municipality and discharged into the several sections or reaches of the interceptor or trunk sewer, constituting the East Whiteland Trunk Line and its extention to Charlestown Township bears to the total volume of sewage discharged by said municipalities into such sections or reaches shall be used in calculating the amount that each such municipality shall pay for sewage conveyance services. Operating expenses of the East Whiteland Trunk Line for the first two years of operation shall be paid as set forth in Section 4.13 hereof."

All references in Article 4 of the Agreement to East Whiteland Trunk Line shall be deemed also to refer to the Great Valley Line.

7. Any sewage discharged by Valley Forge Sewer Authority into the East Whiteland Trunk Line or Great Valley Line shall conform to the standards for quality of sewage set forth in Article V of the Agreement.

3. Pursuant to an Agreement entitled "Valley Creek Trunk Sewer Agreement" dated November 1, 1970, as amended, East Whiteland Authority has made payments to Tredyffrin Township for operating expenses of the Valley Creek Trunk Line during its first two years of operation, and will, during subsequent years, continue to be obligated to make payments on account of operating expenses. Valley Forge Sewer Authority agrees hereby to, within thirty days from the execution of this Agreement, reimburse East Whiteland Authority for 7.89% of the amount paid on account of operating expenses during the first two years by East Whiteland Authority to Tredyffrin Township. Valley Forge Sewer Authority further agrees to reimburse East Whiteland Authority for Valley Forge Sewer Authority's share of any payments East Whiteland must make to Tredyffrin Township pursuant to Article 4 of the Valley Creek Trunk Sewer Agreement for operating costs during years subsequent to the first two years of operation and for payments for capital contributions paid subsequent to the date hereof. Valley Forge Sewer Authority's share of the said operating costs and additional capital contributions will be its pro-rata share, based on the proportion that the volume of sewage emanating from Charlestown Township into the East Whiteland Trunk Line and Great Valley Line bears to the total sewage emanating from East Whiteland Township into the Valley Creek Trunk Sewer Line. The payments by Valley Forge Sewer Authority shall not exceed those that would be made if said Authority had made its payments directly to the Tredyffrin Township Municipal Authority.

9. At such time as East Whiteland Authority must pay funds to the Tredyffrin Township Municipal Authority resulting from an enlargement of an intercepter or trunk sewer (or any section or reach thereof) or the construction of an additional interceptor

or trunk sewer or the enlargement of a pumping station or the construction of an additional pumping station pursuant to the Valley Creek Trunk Sewer Agreement, then Valley Forge Sewer Authority shall reimburse East Whiteland Township for its pro-rata share of said funds calculated on the basis of its pro-rata share of reserved capacity, as such reserved capacity shall be determined by Valley Forge Sewer Authority, in such section or reach of interceptor or trunk sewer. In the alternative, Valley Forge Sewer Authority may reserve capacity pursuant to Section 7.02 of the Valley Creek Trunk Sewer Agreement.

10. Valley Forge Sewer Authority hereby agrees that all sewage from Charlestown Township shall be deemed to be sewage of Valley Forge Sewer Authorty for purpose of an Agreement dated as of November 1, 1970, as amended, known as "the Valley Forge Sewage Treatment Plan Agreement".

11. Valley Forge Sewer Authority shall, at its expense, construct or cause to be constructed a sewage meter or sewage flow measuring device to determine the volume of sewage emanating from Charlestown Township to East Whiteland Township.

12. All references in Sections 4.03, 7.03 and 8.03 of the Agreement to "Malvern" shall be deemed to refer to Malvern and Valley Forge Sewer Authority. Valley Forge Sewer Authority shall make payments pursuant to Section 4.04 of the Agreement at the same time as Malvern is required to make payments. All other sections of the Agreement refer to parties or municipalities defined in Section 4.01, as amended by Paragraph 6 of this Agreement, unless otherwise stated herein.

13. Pursuant to Paragraph 7.01 of the Valley Creek Trunk Sewer Agreement, Valley Forge Sewer Authority hereby is granted the right to rent a capacity of up to 300,000 gallons per day average flow (750,000 gallons per day peak flow) in the Valley

Creek Trunk Sewer from East Whiteland Authority, with all rental fees therefore being paid to East Whiteland Authority, as provided therein.

IN WITNESS WHEREOF, each of the parties hereto has caused this Agreement to be executed and attested by its proper officers pursuant to the proper action of its governing body as of the day and year first above written.

EXHIBIT "A"

Exhibit "B" of the East Whiteland Trunk Line Agreement is amended in part to provide that if any expansion, repair, enlargement or construction to the Great Valley Line shall be required, Valley Forge Sewer Authority shall pay its pro rata share of such expansion, enlargement or construction on the basis of its reserved capacity in the expanded or repaired Great Valley Line to the total reserved capacity therein. Notwithstanding the foregoing, 300,000 gallons per day of capacity shall be reserved in the Great Valley Line for Valley Forge Sewer Authority.

EXHIBIT "B"

THIS AGREEMENT made this 27th day of December 1978, by and between EAST WHITELAND MUNICIPAL AUTHORITY and VALLEY FORGE SEWER AUTHORITY

W I T N E S S E T H:

Valley Forge Sewer Authority and East Whiteland Municipal Authority have agreed to share cost for the Sidley Road Trunk Line repairs as indicated in Schedule A presented by East Whiteland Municipal Authority (Schedule A attached hereto). Items Nos. 1, 3, 4, and 6 of the Schedule A, which are line replacements, will be deferred until additional flows coming from Charlestown Township make ~~repairs~~ Replacements & All necessary as determined by East Whiteland Municipal Authority's consulting engineers. Item No. 14 of Schedule A will be adjusted on the basis of proposed additional repairs to be required in lieu of replacement of earlier mentioned lines.

NOW THEREFORE, the parties hereto, agree that the mutual promises herein contained and previous arrangements will allow the parties to finalize the agreement to provide sewer service to the southern portion of Charlestown Township through the East Whiteland Trunk Line.

AMENDMENT TO EAST WHITELAND TRUNKLINE AGREEMENT, DATED APRIL 18, 2014, BY AND BETWEEN EAST WHITELAND TOWNSHIP, EAST WHITELAND MUNICIPAL AUTHORITY, AND VALLEY FORGE SEWER AUTHORITY

AMENDMENT TO EAST WHITELAND TRUNK LINE AGREEMENT

This Amendment to East Whiteland Trunk Line Agreement is made this 18 day of April, 2014, between EAST WHITELAND TOWNSHIP ("East Whiteland"), a township of the second class, EAST WHITELAND MUNICIPAL AUTHORITY ("East Whiteland Authority"), a municipal authority organized by East Whiteland and VALLEY FORGE SEWER AUTHORITY, a municipal authority organized by Charlestown, East Pikeland and Schuylkill Townships.

BACKGROUND

A. On December 27, 1978, East Whiteland Authority and Valley Forge Sewer Authority entered into a cost sharing agreement for the Sidley Road Trunk Line repairs as indicated on Schedule A attached thereto to provide sewer service to the southern portion of Charlestown Township through the East Whiteland Trunk Line (and the Valley Creek Trunk Line) to the Valley Forge Sewage Treatment Plant.

B. On December 12, 1979, the parties hereto among others entered in an Amendment to the East Whiteland Trunk Line Agreement dated as of February 1, 1971, as amended by Composite Amendment No. 1, dated as of December 1, 1974, to reserve for the Valley Forge Sewer Authority 300,000 gallons per day of reserved capacity in the East Whiteland Trunk Line (as extended to the boundary to Charlestown Township via the "Great Valley Line") and the Mill Lane Pumping Station, to transmit sewage from Charlestown Township through the East Whiteland Trunk Line (and the Valley Creek Trunk Line) to the Valley Forge Sewage Treatment Plant.

C. The purpose of this Agreement Amendment is to establish a new and increased reserve capacity for the Valley Forge Sewer Authority within and through the East Whiteland sewer system. This Agreement Amendment shall also serve to establish the cost sharing between East Whiteland and the Valley Forge Sewer Authority.

D. This Agreement Amendment hereby declares that Valley Forge Sewer Authority shall have a reserved capacity within and through the East Whiteland system as apportioned below.

E. This Agreement Amendment also amends Article VI Section 6.01 of the East Whiteland Trunk Line Agreement to include the use of Tele-metering devices for transmitting flow signals from certain VFSA Sewage Discharge points into the East Whiteland system.

F. For purposes of this Agreement, the various portions of the East Whiteland Township sewer system are defined as follows:

1. East Whiteland Trunk Line (A) - The Trunk Line (A) shall include the gravity line through the Mill Lane Pump Station, the Mill Lane Pump Station force main, and gravity lines from the force main through the point at which the force main turns to gravity and then south and east to the point at which the East Whiteland gravity sewer leaves East Whiteland and then enters the Tredyffrin System.

2. East Whiteland Trunk Line (B) - The Trunk Line (B) shall include the gravity line from Charlestown Township along Conestoga Road through the Hillbrook Pump Station, the Hillbrook Pump Station force main, and gravity lines from the force main to the discharge point at the Mill Lane Pump Station.

3. Great Valley Line – The Great Valley Line shall include the existing gravity line to the Mill Lane Pump Station from the East Whiteland/Charlestown Township line to the terminal manhole at the east end of the James Thomas Road cul-de-sac thence along and/or through James Thomas Road, Aston Road, Phoenixville Pike, Hayes Road, Sidley Road, Moores Road, across the Aegon property, under Rt 202 to the Mill Lane Pump Station. The portion of sewer line along Sidley Road is also known as the Sidley Road Trunk Line. The portion of Great Valley Line in Sidley Road from manhole 67-24 at Lee Boulevard to manhole 67-13 in Moores Road will be abandoned and replaced with the New Sidley Road Trunk Line described in Section F.6.

4. Lee Boulevard Force Main – The Lee Boulevard Force Main shall include the force main from the Lee Boulevard Pump Station to the force main discharge point in Sidley Road.

5. Mill Lane Trunk Line – The Mill Lane Trunk Line shall include the gravity line as detailed on design plans prepared by ARRO Consulting, Inc. entitled Mill Lane Sewer Main Replacement, Phase 1. The Mill Lane Trunk Line shall extend from Manhole ML8 in Sidley Road approximately two-hundred (200) feet north of the intersection of Sidley Road and Lapp Road, thence south in and/or along Sidley Road, Mill Lane, under Rt 202 to an existing portion of the Great Valley Line which drains to the Mill Lane Pump Station.

6. New Sidley Road Trunk Line – The New Sidley Road Trunk Line shall include the gravity line as detailed on design plans prepared by ARRO Consulting, Inc. entitled Sidley Road Sewer Main Replacement, Phase 2. The New Sidley Road Trunk Line shall extend south in Sidley Road from the intersection of Sidley Road and Lee Boulevard to Manhole ML8 in Sidley Road which is the terminal end of the Mill Lane Sewer Main Replacement, Phase 1.

7. Mill Lane Pump Station – The pump station shall include the existing/new facility located north west of the intersection of Route 401 and Mill Lane.

8. Lee Boulevard Pump Station – The pump station shall include the existing facility located adjacent to Lee Boulevard.

9. Hillbrook Pump Station – The pump station shall include the existing facility located on Conestoga Road adjacent to Hillbrook Circle.

10. In summary, the various systems described in Sections F1 through F9 include all the pipelines through which Valley Forge Sewer Authority wastewaters drain in East Whiteland Township.

G. The various portions of the sanitary sewer system noted in Section F of this Agreement are outlined in Schedule C.

H. East Whiteland and East Whiteland Authority, at the request of Valley Forge Sewer Authority, are willing to reserve additional capacity for Valley Forge Sewer Authority, for a total reserved capacity of 432,302 gallons per day Annual Average Daily Flow as provided herein.

NOW, THEREFORE, the parties hereto intending to be legally bound hereby agree as follows:

1. Sidley Road Trunk Line Cost Sharing Agreement. The December 27, 1978 Agreement between East Whiteland Authority and Valley Forge Sewer Authority establishing the cost sharing agreement for the Sidley Road Trunk Line is amended by eliminating Schedule A attached thereto and substituting therefore Schedule B attached hereto and incorporated herein. It is noted that some of the construction costs noted in Schedule B are estimates. The final cost sharing shall be based upon actual construction contract prices, subject to the prior review and approval of the Valley Forge Sewer Authority.

2. Reserved Capacity. Following the 2013 replacement and enlargement of the Mill Lane Pump Station and the construction of the Mill Lane and New Sidley Road Trunk Lines (as described in Section C of this Agreement and in the East Whiteland Special Study of 2013 prepared by ARRO Consulting, Inc.), reserved capacity for Valley Forge Sewer Authority and East Whiteland Township based on capacity needs analysis to the year 2035 in the East Whiteland Trunk Line the Annual Average Daily Flow shall be as follows:

a. The reserved capacity for the Valley Forge Sewer Authority in the East Whiteland Trunk Line (A) shall be 432,302 gallons per day. The reserve capacity for East Whiteland Township and Malvern Borough in the East Whiteland Trunk Line (A) shall be 3,882,698 gallons per day. The amount of reserve capacity for each of these municipalities is defined by separate agreement between East Whiteland Township and Malvern Borough. Since the East Whiteland Township and Malvern Borough flow enters at several locations along this trunk line the weighted average of each party's flow shall be used to calculate cost sharing for any project that may occur in the future on this trunk line. Weighted average is defined as the average of each party's percent of flow in each pipe section weighted by the length of each pipe section compared to the total length of pipe sections included in a future project.

b. The reserved capacity for the Valley Forge Sewer Authority in the New Sidley Road Trunk Line and Mill Lane Trunk Line shall be 412,302 gallons per day. The reserve capacity for East Whiteland Township in the New Sidley Road

Trunk Line and Mill Lane Trunk Line shall be 552,803 gallons per day. Since the East Whiteland Township flow enters at several locations along these two sewer line segments the weighted average for cost sharing of each shall be 57.37 % VFSA and 42.63 % EWT in New Sidley Road Trunk Line and 44.63 % VFSA and 55.37 % EWT in Mill Lane Trunk Line up to manhole MH 59.4. The cost sharing for any improvements from manhole MH 59.4 to the Mill Lane Pump Station shall be based upon the weighted average concept outlined in Section 2.a.

c. The reserved capacity for the Valley Forge Sewer Authority in the Lee Boulevard Pump Station and Lee Boulevard Force Main shall be 373,673 gallons per day. The reserve capacity for East Whiteland Township in the Lee Boulevard Pump Station and Lee Boulevard Force Main shall be 22,265 gallons per day.

d. The reserved capacity for the Valley Forge Sewer Authority in the Mill Lane Pump Station and the Mill Lane Pump Station Forcemain shall be 432,302 gallons per day. The reserve capacity for East Whiteland Township in the Mill Lane Pump Station and the Mill Lane Pump Station Forcemain shall be 1,872,503 gallons per day.

e. The reserved capacity for the Valley Forge Sewer Authority in the East Whiteland Trunk Line (B) shall be 20,000 gallons per day. The reserve capacity for East Whiteland Township in the East Whiteland Trunk Line (B) is undefined at this time due to various development possibilities and connections points to the Mill Lane Pump Station, Great Valley Line, and Trunk Line B. Since the East Whiteland Township flow enters at several locations along this trunk line the weighted average of each party's flow shall be used to calculate cost sharing for any project that may occur in the future on this trunk line.

3. Flow Meters or Measuring Devices. The Valley Forge Sewer Authority shall be responsible for all costs of the installation and maintenance of the equipment and the monthly costs for transmission of flow data to East Whiteland Township via cell phone technology from the Lee Boulevard Pump Station, the Charlestown Meadows Pump Station, and the

Charlestown Oaks metering station to the Remote Terminal Unit (RTU) located in the new Mill Lane Pump Station.

If there are future locations requiring flow monitoring of Valley Forge Sewer Authority flows into the East Whiteland System, the Valley Forge Sewer Authority will be responsible for all costs of installation and maintenance of equipment and the monthly charges for transmission of required flow data to East Whiteland system. The cell phone technology shall be updated by the Valley Forge Sewer Authority as required.

4. Rehabilitation of Manholes 67-13 (at intersection of Moores Road and Ashlawn Road) to ML-1 of the Great Valley Trunk Line. Within six (6) months following substantial completion of replacement of the New Sidley Road Trunk Line replacement, East Whiteland Township shall engage an engineer to conduct an evaluation of those portions of the Great Valley Trunk Sewer Line that will no longer carry flows from the Valley Forge Sewer Authority, (identified as Manholes 67-13 on design drawings prepared by Roy F. Weston, Inc. to Manhole ML-1 on drawings prepared by ARRO Consulting, Inc. entitled Mill Lane Sewer Main Replacement Phase 1) but will remain in service for East Whiteland Township. Cost of the evaluation shall be shared in accordance with Schedule B, attached to this Agreement Amendment. Included in the evaluation shall be a television inspection of all sections of the sewer line. Based on the results of the inspection(s) of the sewer line, a conceptual report shall be prepared by the engineer that includes concept level descriptions of all practical alternatives to repair (line, slipline, grout or spot repairs) the sections of the gravity sewer line that require repair according to the opinion of the engineer. In addition, the report shall include conceptual level total project cost estimates (plus or minus 25%) for the alternatives presented in the report. The study shall include the engineers' recommended alternative(s) for each section of sewer line that requires repair. The conclusions of the study shall be subject to the approval of the Valley Forge Sewer Authority (which approval may be withheld only for sound engineering reasons), after consultation with the consulting engineers of the Valley Forge Sewer Authority. If there shall be disagreement regarding selected alternatives, and the parties cannot otherwise promptly resolve said disagreement, the disagreement shall be submitted for arbitration in accordance with ARTICLE IX of the East Whiteland Trunk Line Agreement of 1971.

The implementation of the selected Alternative(s) shall be completed by East Whiteland Township within six (6) years of the engagement of the engineer to perform the study. Costs to implement the selected alternative(s) shall be shared in accordance with Schedule B, attached to this Agreement Amendment.

Following six years after completion of the study, the Valley Forge Sewer Authority's obligation to share in any cost associated with repair, upgrade, enlargement or replacement of any portion of the Great Valley Sewer Trunk Line shall cease to exist.

5. Future Capital Projects. Following completion of the Mill Lane Pump Station, the Mill Lane Trunk Line, and the New Sidley Road Trunk Line replacement and enlargement projects, if any additional expansion, enlargement, repair or construction of any portions of any of the sewer system entities defined in Section F of this Agreement – with the exception of the rehabilitation of the Great Valley Line from manhole 67-13 to manhole ML-1 shall be required, Valley Forge Sewer Authority shall pay its pro rata share of such expansion, enlargement, repair or construction on the basis of its reserved capacity as detailed in Section H.2 Reserved Capacity of this Agreement Amendment, and subject to all provisions of the East Whiteland Trunk Line Agreement.

6. Effective Date. This Amendment shall be effective upon the approval by the governing body of the last party to approve.

IN WITNESS WHEREOF, each of the parties hereto has caused this Agreement to be duly executed as of the day and year first above written.

SIDLEY ROAD TRUNK LINE REPAIRS AGREEMENT, DATED DECEMBER 27, 1978, BY AND BETWEEN EAST WHITELAND MUNICIPAL AUTHORITY AND VALLEY FORGE SEWER AUTHORITY

"Exhibit B"

THIS AGREEMENT made this 27th day of December 1978, by and between EAST WHITELAND MUNICIPAL AUTHORITY and VALLEY FORGE SEWER AUTHORITY

W I T N E S S E T H:

Valley Forge Sewer Authority and East Whiteland Municipal Authority have agreed to share cost for the Sidley Road Trunk Line repairs as indicated in Schedule A presented by East Whiteland Municipal Authority (Schedule A attached hereto). Items Nos. 1, 3, 4, and 6 of the Schedule A, which are line replacements, will be deferred until additional flows coming from Charlestown Township make ~~repairs~~ replacements ~~necessary~~ as determined by East Whiteland Municipal Authority's consulting engineers. Item No. 14 of Schedule A will be adjusted on the basis of proposed additional repairs to be required in lieu of replacement of earlier mentioned lines.

NOW THEREFORE, the parties hereto, agree that the mutual promises herein contained and previous arrangements will allow the parties to finalize the agreement to provide sewer service to the southern portion of Charlestown Township through the East Whiteland Trunk Line.

SEWAGE TREATMENT AGREEMENT, DATED NOVEMBER 17, 1987, BY AND BETWEEN EAST GOSHEN TOWNSHIP, EAST GOSHEN MUNICIPAL AUTHORITY, EAST WHITELAND TOWNSHIP, AND EAST WHITELAND MUNICIPAL AUTHORITY

SEWAGE TREATMENT AGREEMENT

THIS AGREEMENT, made the 17th day of November, 1987 by and among EAST GOSHEN TOWNSHIP ("East Goshen"), EAST GOSHEN MUNICIPAL AUTHORITY ("East Goshen Authority"), EAST WHITELAND TOWNSHIP ("East Whiteland") and EAST WHITELAND MUNICIPAL AUTHORITY ("East Whiteland Authority"),

WITNESSETH:

WHEREAS, the Malvern Golf Club Subdivision, also known as and hereinafter referred to as "Lockwood Chase," has been developed in both East Goshen and East Whiteland, lots 1 to 23 being located in East Whiteland, and lots 24 to 103 being located in East Goshen; and

WHEREAS, all of the lots of Lockwood Chase are served by and connected to a sewage collection system and a community spray irrigation sewage treatment facility (the "Lockwood Chase Plant") located in East Goshen on land owned by Lockwood Community Association, which land is subject to an easement and right of way agreement with East Goshen Authority; and

WHEREAS, the collection system and the Lockwood Chase Plant in East Goshen are part of the East Goshen sewage system, which is owned by East Goshen Authority and leased to and operated by East Goshen; and

WHEREAS, the collection system for Lockwood Chase which is located in East Whiteland is owned by East Whiteland Authority

and is part of the Township sewage system operated by East Whiteland; and

WHEREAS, all of the Lockwood Chase lots in East Whiteland are connected to and served by the Lockwood Chase Plant in East Goshen; and

WHEREAS, the purpose of this Agreement is to set forth the terms and conditions by which the sewage generated by the Lockwood Chase lots located in East Whiteland shall be received by the East Goshen sewage system and treated in the Lockwood Chase Plant;

NOW, THEREFORE, the parties hereto, each binding itself, its successors and assigns, and each representing that it has proper legal authority to enter into this Agreement, do mutually represent, covenant, and agree as follows:

1. Subject to payment of charges and subject also to the limitations of this Agreement, East Goshen and East Goshen Authority grant East Whiteland and East Whiteland Authority the right to discharge sewage wastes from those residences on lots 1 through 23 in Lockwood Chase into the East Goshen sewage system for treatment in the Lockwood Chase Plant. Such discharge shall be made into the Lockwood Chase sewage collection system located in East Whiteland. No other sewage waste from East Whiteland shall be discharged into the East Goshen System. East Goshen and East Goshen Authority agree to reserve sufficient treatment capacity in the Lockwood Chase Plant to serve the needs of the said lots 1 through 23.

2. East Goshen and East Goshen Authority reserve the right at any time to divert the East Whiteland sewage to any other treatment facility of the East Goshen sewage system. East Whiteland and East Whiteland Authority reserve the right at any time to divert the East Whiteland sewage to another treatment facility of its system, in which event East Goshen's and East Goshen Authority's obligation to receive East Whiteland sewage wastes pursuant to this Agreement shall terminate.

3. East Whiteland and East Whiteland Authority shall be responsible for the maintenance and repair of that portion of the Lockwood Chase collection system located in East Whiteland. East Goshen and East Goshen Authority shall maintain in good repair and operating condition the Lockwood Chase Plant and collection system located in East Goshen.

4. East Whiteland and East Whiteland Authority agree to permit no discharges into the Lockwood Chase collection system other than domestic waste and agrees to abide by all East Goshen regulations governing the discharge of waste into the East Goshen sewage system.

5. East Whiteland shall be responsible for the billing of the East Whiteland residents who own lots 1 through 23 in Lockwood Chase for sewage service. East Goshen shall bill East Whiteland on a calendar quarter basis and at the regular residential sewer rental charge, according to the East Goshen sewer rate ordinance, for treatment of the waste generated by the

owners of lots 1 through 23 in Lockwood Chase. Payment shall be made by East Whiteland within thirty (30) days of delivery of the bill.

6. Any party hereto, or its duly authorized representative, shall at all reasonable times be permitted to enter upon the properties of the other for the purpose of inspection, observation, measurement, sampling, and testing in order to carry out the purposes and intent of this Agreement.

IN WITNESS WHEREOF, the parties have caused these presents to be executed and their respective corporate seals affixed the day and year first above written.

EXHIBIT F11

AGREEMENT, DATED SEPTEMBER 14, 1993, BY AND BETWEEN WILLISTOWN TOWNSHIP, EAST WHITELAND TOWNSHIP AND EAST WHITELAND MUNICIPAL AUTHORITY

AGREEMENT

This Agreement entered into this 14TH day of SEPTEMBER, 1993, by and among Willistown Township, East Whiteland Township and East Whiteland Municipal Authority.

WHEREAS, Willistown Township owns and operates a sewage collection system within their incorporated municipal limits.

WHEREAS, East Whiteland Municipal Authority owns a sewage collection system (within the incorporated East Whiteland Township municipal limits) which is leased to and operated by the East Whiteland Township.

WHEREAS, an apartment development known as Woodview is proposed by American Communities of which 114 apartment units are to be constructed in East Whiteland Township and 150 apartment units are to be constructed in Willistown Township.

WHEREAS, the Developer will construct and maintain a gravity sanitary sewer collection system to service the apartment buildings, located in East Whiteland Township near the boundaries of the two Townships, ("Boundary Users") where the apartment buildings do not have access to the sewage collection system owned by East Whiteland Municipal Authority, and discharge the sewage flow into the development sewage pump station located in Willistown Township.

WHEREAS, in order to comply with applicable law, Boundary Users located within East Whiteland Township are to be treated as

customers solely of that township and service is to be provided hereunder solely by Willistown Township to East Whiteland Township rather than to any individual Boundary User within East Whiteland Township; and

WHEREAS, Willistown Township as owner and operator of a system is willing to provide sewer collection and conveyance services to East Whiteland Township for the sewage generated by the Boundary Users in accordance with this Agreement.

NOW THEREFORE, the parties hereto, intending to be legally bound, hereby agree as follows:

1. Willistown Township agrees to permit connection to its sewage system by Boundary Users upon compliance with the following conditions:

a. Prior to permitting any Boundary User to connect to Willistown's system, East Whiteland Municipal Authority shall notify Willistown Township of the impending connection and Willistown Township shall determine that the connection is in accordance with the Final Woodview Development Plan approved by both East Whiteland Township and Willistown Township and complies with all applicable rules and technical specifications of Willistown Township.

b. The metering chamber and telemetering equipment has been installed by the developer in compliance with the rules and specifications set forth in the Woodview Final Land Development approved by both East Whiteland Township and Willistown Township.

2. For all reporting purposes as to daily gallonage flow, the gallonage from the Boundary Users as measured by the metering equipment shall be deemed the gallonage of East Whiteland Municipal Authority and shall be subtracted from the gallonage flows of Willistown Township. This concept shall be applicable to reporting from the respective parties to both the Valley Creek Trunk Line and the Valley Forge Sewer Authority.

3. This Agreement is entered into solely by and for the benefit of the parties hereto and shall not grant any rights on behalf of any Boundary Users or other entities or persons.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their respective duly authorized officers as of the date above mentioned.

EXHIBIT F12

AGREEMENT, DATED JULY 10, 1995, BY AND BETWEEN MALVERN BOROUGH, EAST WHITELAND TOWNSHIP, AND EAST WHITELAND MUNICIPAL AUTHORITY

AGREEMENT

2/21/95
Rev. 3/23/95

This Agreement entered into this tenth day of July 1995, by and among Malvern Borough, East Whiteland Township and East Whiteland Municipal Authority.

WHEREAS, Malvern Borough owns and operates a sewage collection system within their incorporated municipal limits.

WHEREAS, East Whiteland Municipal Authority owns a sewage collection system (within the incorporated East Whiteland Township municipal limits) which is leased to and operated by the East Whiteland Township.

WHEREAS, a single family attached development known as Erin Glen is proposed by John K. and Margaret A. Mullen, of which 19 single family attached units are to be constructed in East Whiteland Township and 6 single family attached units are to be constructed in Malvern Borough.

WHEREAS, the Developer will construct and Homeowner Association will maintain a gravity sanitary sewer collection system to service the buildings, located in East Whiteland Township near the boundaries of the two Townships, ("Boundary Users") where the buildings do not have access to the sewage collection system owned by East Whiteland Municipal Authority, and discharge the sewage flow into the development sewage gravity mains located in Malvern Borough.

WHEREAS, the developer shall pay all applicable tapping and connection fees to the respective municipality for dwellings located within their municipal limits.

WHEREAS, East Whiteland Township and Malvern Borough shall bill and collect sewer rental in accordance with applicable procedures from individual dwelling owners located within their jurisdictional municipal limits.

WHEREAS, in order to comply with applicable law, Boundary Users located within East Whiteland Township are to be treated as customers solely of that township and service is to be provided whereunder solely by Malvern Borough to East Whiteland Township rather than to any individual Boundary User within East Whiteland Township; and

WHEREAS, Malvern Borough as owner and operator of a system is willing to provide sewer collection and conveyance services to East Whiteland Township for the sewage generated by the Boundary Users in accordance with this Agreement.

NOW THEREFORE, the parties hereto, intending to be legally bound, hereby agree as follows:

1. Malvern Borough agrees to permit connection to its sewage system by Boundary Users upon compliance with the following conditions:

a. Prior to permitting any Boundary User to connect to Malvern's system, East Whiteland Municipal Authority shall notify Malvern Borough of the impending connection and Malvern Borough shall determine that the connection is in accordance with the final Erin Glen Development Plan approved by both East Whiteland Township and Malvern Borough and complies with all applicable rules and technical specifications of both municipalities.

b. The metering chamber and telemetering equipment has been installed by the developer in compliance with the rules and specifications set forth in the Erin Glen Final Land Development approved by both East Whiteland Township and Malvern Borough.

2. For all reporting purposes as to daily gallonage flow, the gallonage from the Boundary Users as measured by the metering equipment shall be deemed the gallonage of East Whiteland Municipal Authority and shall be subtracted from the gallonage flows of Malvern Borough. This concept shall be applicable to reporting from the respective parties to both the Valley Creek Trunk Line and the Valley Forge Sewer Authority.

3. In consideration for Malvern Borough's agreement to allow connections to its sewage collection system as aforesaid, East Whiteland Township shall pay to Malvern Borough on each anniversary date of this agreement, an annual fee of seventeen dollars and fifty cents ($17.50) per average daily equivalent dwelling unit (E.D.U.) during each year for those boundary users utilizing Malvern Borough's facilities in the manner provided herein. The number of E.D.U.'s per day shall be calculated by dividing the total gallonage of the flow per day by 275 gallons.

4. Prior to making connections for properties located in the Township, the collection lines to which those properties will be connected, which are located within the Township, will be conveyed to the Authority by the developer, unless prior to such date the Township and the Authority have agreed to waive this requirement.

5. This Agreement is entered into solely by and for the benefit of the parties hereto and shall not grant any rights on behalf of any Boundary Users or other entities or persons.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their respective duly authorized officers as of the date above mentioned.

SEWAGE TREATMENT AGREEMENT, DATED OCTOBER 17, 2000, BY AND BETWEEN EAST GOSHEN TOWNSHIP, EAST GOSHEN MUNICIPAL AUTHORITY, EAST WHITELAND TOWNSHIP, AND EAST WHITELAND MUNICIPAL AUTHORITY

SEWAGE TREATMENT AGREEMENT

THIS AGREEMENT, made the 17th day of October, 2000, by and among **EAST GOSHEN TOWNSHIP** ("East Goshen"), **EAST GOSHEN MUNICIPAL AUTHORITY** ("East Goshen Authority"), **EAST WHITELAND TOWNSHIP** ("East Whiteland") and **EAST WHITELAND MUNICIPAL AUTHORITY** ("East Whiteland Authority"),

WITNESSETH:

WHEREAS, the Mill Valley subdivision has been developed in East Goshen, East Whiteland and West Whiteland Townships; and

WHEREAS, the sewage from the Mill Valley development will be collected and transported to the West Goshen Township Wastewater Treatment Plant through lines located in East Goshen, which are part of the East Goshen sewage system ("East Goshen System") owned by East Goshen Authority and leased to and operated by East Goshen; and

WHEREAS, West Whiteland Township and East Goshen currently have intermunicipal agreements with West Goshen Township and West Goshen Sewer Authority for the treatment of sewage in the West Goshen Township Wastewater Treatment Plant; and

WHEREAS, East Whiteland and East Whiteland Authority have no such agreement with West Goshen Township and West Goshen Sewer Authority; and

WHEREAS, lots 32, 33, 34 and 35 of the Mill Valley development ("East Whiteland Lots") are located in East Whiteland and discharge domestic waste into the East Whiteland sewage system ("East Whiteland System"); and

WHEREAS, East Goshen and East Goshen Authority currently receive sewage from 23 homes located in East Whiteland which is transported to and treated at the Lochwood Chase Wastewater Treatment Plant located in East Goshen; and

WHEREAS, all of the terms and conditions of the agreement relating to the treatment of East Whiteland's sewage by the East Goshen Lochwood Chase Wastewater Treatment Plant are set forth in an agreement entitled "Sewage Treatment Agreement", dated November 17, 1987 by and among the parties hereto; and

WHEREAS, the parties hereto intend hereby to set forth the terms and conditions upon which sewage from the East Whiteland Lots will be accepted from the East Whiteland System into the East Goshen System and transported to the West Goshen Wastewater Treatment Plant for treatment.

NOW, THEREFORE, the parties hereto, each binding itself, its successors and assigns, and each representing that it has proper legal authority to enter into this agreement, do mutually represent, covenant and agree as follows:

1. East Whiteland and East Whiteland Authority are hereby granted the right to discharge sewage from the East Whiteland System generated by the East Whiteland Lots into the East Goshen System and transported for treatment to the West Goshen Wastewater Treatment Plant. No other sewage waste from the East Whiteland System shall be discharged into the East Goshen System at that location.

2. East Goshen and East Goshen Authority agree to allocate sufficient amount of the sewage treatment capacity that is reserved for East Goshen in the West Goshen Wastewater Treatment Plant to serve the needs of the East Whiteland Lots.

3. East Whiteland and East Whiteland Authority shall be responsible for the maintenance and repair of that portion of the East Whiteland System located in Mill Valley. East Goshen and East Goshen Authority shall maintain in good repair and operating condition that portion of the East Goshen System located in Mill Valley, as well as the other portions of the East Goshen System necessary to transport sewage to the West Goshen Wastewater Treatment Plant from the East Whiteland Lots.

4. East Whiteland and East Whiteland Authority agree to permit no discharges into the East Goshen System, other than domestic waste and agrees to abide by all East Goshen and West Goshen regulations governing the discharge of waste into the East Goshen System and into the West Goshen Wastewater Treatment Plant.

5. East Whiteland shall be responsible for the billing of the East Whiteland residents who own the East Whiteland Lots for sewage service. East Goshen shall bill East Whiteland on a calendar quarter basis for transportation and treatment of the waste generated by the East Whiteland Lots at the regular residential sewer rental charge, according to the East Goshen Sewer Rate Ordinance, in the same manner that the flows from East Whiteland are billed for treatment by the Lochwood Chase Wastewater Treatment Plant. Payment shall be made by East Whiteland within 30 days of delivery of the bill.

6. Any party hereto, or its duly authorized representative, shall at all reasonable times be permitted to enter upon the properties of the other for purposes of inspection, observation, measurement, sampling and testing in order to carry out the purposes and intent of this agreement.

IN WITNESS WHEREOF, the parties have caused this agreement to be executed the day and year first above written.

RE: Trammell Crow - Sewage Capacity/Service Agreement
Our File No. 325-18

Dear Don:

Enclosed please find a fully executed Sewage Capacity/Service Agreement dated November 1, 2000 between East Whiteland Township, East Whiteland Township Municipal Authority, Tredyffrin Township, Tredyffrin Township Municipal Authority and Trammell Crow Northeast Metro Development, Inc.

Thank you for all of your assistance in getting this Agreement finalized and executed. If you have any questions, please give me a call.

Very truly yours,

Denise R. Yarnoff

SEWAGE CAPACITY/SERVICE AGREEMENT

This Sewer Capacity/Service Agreement is entered into as of the 1st day of November, 2000 between and among East Whiteland Township ("East Whiteland"), East Whiteland Township Municipal Authority, Tredyffrin Township ("Tredyffrin"), Tredyffrin Township Municipal Authority and Trammell Crow Northeast Metro Development, Inc. ("Trammell Crow").

Trammell Crow has proposed construction of an office park at the former Warner Quarry property situated at Route 29 and Yellow Springs Road and located partly in East Whiteland Township and partly in Tredyffrin Township, Chester County, Pennsylvania ("Office Park").

East Whiteland's Act 537 Plan states that the portion of the Office Park situate in East Whiteland ("East Whiteland Portion") should be serviced by the Valley Forge Sewer Authority ("VFSA").

Trammell Crow has requested that East Whiteland approve connection of the East Whiteland Portion to the East Whiteland public sewer system with effluent to be treated by VFSA. East Whiteland has advised that it currently does not have adequate reserve treatment capacity at VFSA for treatment of effluent from the East Whiteland Portion.

The East Whiteland Portion of the Office Park requires a maximum of 629 EDUs, or 125,700 gallons of daily capacity (based upon Tredyffrin's calculation of the number of EDU's necessary for approximately 2.2 million square feet of office space based on 3500 square feet per EDU) ("Sewage Capacity").

Tredyffrin (and its Municipal Authority) has reserve capacity at the VFSA treatment plant and has agreed to sell a portion of that capacity (along with the requisite capacity in the Valley Creek Trunk Line Interceptor) to Trammell Crow in accordance with this Agreement.

East Whiteland* and Tredyffrin (and their Municipal Authorities) are willing to permit connection of the East Whiteland Portion to the VFSA treatment plant through Tredyffrin since the East Whiteland Portion is adjacent to Tredyffrin Township and since that portion of the Office Park in Tredyffrin will be treated at the VFSA treatment plant. Moreover, the only connection for the entire Office Park to the existing public system off-site will be in Tredyffrin.

It is the further intention of this Agreement to set forth the terms and conditions pursuant to which: (1) Tredyffrin Township Municipal Authority shall sell the Sewage Capacity to Trammell Crow; (2) Trammell Crow will purchase the Sewage Capacity from Tredyffrin Township Municipal Authority; and (3) Trammell Crow shall pay any annual sewer rentals to East Whiteland which shall in turn pay sewer rentals to Tredyffrin.

NOW, THEREFORE, intending to be legally bound hereby, and for good and valuable consideration, receipt of which is hereby acknowledged, the parties agree as follows:

1. Tredyffrin Township Municipal Authority shall, upon request by Trammell Crow, sell the Sewage Capacity to Trammell Crow at Tredyffrin's current charge per EDU at the time of payment for capacity in the Valley Forge Sewage Treatment Plant, which shall include conveyance capacity in the Valley Creek Trunk Line Interceptor.

2. All parties acknowledge that the Sewage Capacity shall be used by Trammell Crow to service the East Whiteland Portion and for no other property.

* "East Whiteland" shall include its Sewer Authority where applicable.

3. Trammell Crow will offer for dedication and East Whiteland will accept for dedication the sewer facilities (including any pipes and pump stations) located on the East Whiteland Portion.

4. All municipal parties agree to execute and process their respective Planning Modules for the Office Park in accordance with this Agreement.

5. Trammell Crow will pay East Whiteland any sewer rental charge imposed by East Whiteland for the East Whiteland Portion in an amount equal to the sewer rental charge imposed upon other users connected to the Valley Forge Sewage Treatment Plant in East Whiteland based upon the same number of EDU's used by Tredyffrin to calculate the sewer rental charge billed to East Whiteland. East Whiteland shall pay Tredyffrin for any sewer rental charge billed to East Whiteland by Tredyffrin for the East Whiteland Portion at the same sewer rental charge rate imposed by Tredyffrin upon other users connected to the Valley Forge Sewage Treatment Plant in Tredyffrin within sixty (60) days.

6. This agreement shall not be construed as suggesting or implying that either East Whiteland or Tredyffrin Townships agree to development of the Office Park. East Whiteland and Tredyffrin shall have the right to apply their applicable zoning, subdivision and land development ordinances and the Pennsylvania Municipalities Planning Code, and to render a decision(s) in accordance therewith.

7. The Agreement has been drafted in part by all parties hereto and any ambiguity herein shall not be presumptively construed against or in favor of any party.

8. This Agreement is entered into solely by and for the benefit of the parties hereto and shall not create any rights on behalf of any other entities or persons.

9. This Agreement represents the entire agreement among the parties. Any changes or modifications hereto must be in writing and signed by the parties.

10. This Agreement shall be binding upon the successors and assigns of the parties hereto.

11. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which when taken together shall constitute one and the same Agreement.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their respective duly authorized officers as of the above date.

ADDENDUM TO SEWAGE CAPACITY/SERVICE AGREEMENT DATED NOVEMBER 1, 2000

THIS ADDENDUM ("Addendum") made this 19th day of November, 2015 between EAST WHITELAND TOWNSHIP ("East Whiteland Township") and TREDYFFRIN TOWNSHIP ("Tredyffrin Township") with the joinders of RLD ATWATER JV, LLC ("Atwater") and THE HAVEN AT ATWATER VILLAGE, LLC ("Haven").

BACKGROUND

East Whiteland Township and Tredyffrin Township executed an intermunicipal agreement entitled Sewage Capacity/Service Agreement dated November 1, 2000 ("Service Agreement"), pursuant to which Tredyffrin Township agreed to allocate and provide sewage treatment and conveyance capacity to East Whiteland Township to facilitate in the development of certain lands owned by Trammell Crow in East Whiteland Township formerly known as the Warner Quarry ("Trammell Crow Property"). The Service Agreement was also executed by the East Whiteland Township Municipal Authority, Tredyffrin Township Municipal Authority and Trammell Crow Northeast Metro Development, Inc. ("Trammell Crow"). Following the execution of the Service Agreement, East Whiteland Township succeeded to the interests of East Whiteland Township Municipal Authority and Tredyffrin Township succeeded to the interests of Tredyffrin Township Municipal Authority.

Following the execution of the Service Agreement, Trammell Crow purchased 125,800 gallons per day ("GPD") [629 EDUs] of sewage treatment and conveyance capacity from Tredyffrin Township ("Trammell Crow Capacity") in accordance with the terms of a certain Sewage Capacity Purchase Agreement dated June 30, 2005 ("Capacity Purchase Agreement") in connection with the proposed development of the Trammell Crow Property. Tredyffrin Township fees and charges for the Trammel Crow Capacity are governed by the Service Agreement.

Pursuant to the terms of an Assignment and Assumption of Sewage Capacity dated September 18, 2014 ("Assignment"), Trammell Crow, through its controlled affiliate, Atwater Land LP, a Delaware limited partnership, transferred 46,393 GPD of the Trammell Crow Capacity to Atwater in connection with the proposed development of the Atwater Project (defined below), which development will be constructed on part of the Trammell Crow Property. The Trammell Crow Capacity transferred to Atwater is referred to herein as the "Atwater Capacity". The Trammell Crow Capacity which Trammel Crow retained [79,407 GPD] will continue to be referred to herein as the "Trammell Crow Capacity".

The Atwater Capacity which Trammell Crow transferred to Atwater will not fully satisfy the sewage treatment requirements of the Atwater Project. The remaining sewage treatment capacity necessary for the full build-out of the Atwater Project, consisting of 187,907 GPD, will be provided by East Whiteland Township ("East Whiteland Capacity").

The East Whiteland Capacity (necessary to complete the development of the Atwater Project) will flow through part of the Tredyffrin Township collection system referred to as the Church Road Pump Station and Church Road Interceptor (referred to together as the "Church Road Interceptor").

The Atwater Project is a 149.40 acre parcel of land which will be developed in three separate sections consisting of a 549 unit "Residential Section", a 326 unit "Apartment Section" and an 85,111 square foot "Commercial Section". Atwater is the current record owner of the Residential Section and the Commercial Section. Haven is the current record owner of the apartment units comprising the Apartment Section.

As provided in the Service Agreement, Tredyffrin Township bills East Whiteland Township directly for the number of connected EDUs of the Trammell Crow Capacity. The number of connected EDUs is based on the number of EDUs required to be assigned to the user of sewage capacity which is calculated using Tredyffrin Township's standard of 200 GPD per EDU (each a "Connected EDU"). Tredyffrin Township's sewer rental charge to East Whiteland Township for each Connected EDU of the Trammell Crow Capacity is a flat fee which is the same sewer rental fee charged by Tredyffrin Township per EDU to other users in Tredyffrin Township that are connected to the Valley Forge Sewage Treatment Plant.

In accordance with the terms of the Service Agreement, East Whiteland Township bills Trammell Crow a sewer rental charge based upon the number of Connected EDUs of the Trammell Crow Capacity. The sewer rental fee that East Whiteland Township charges Trammel Crow for each Connected EDU is the same sewer rental fee charged by East Whiteland Township per EDU to other East Whiteland Township's users connected to the Valley Forge Sewer Treatment Plant.

The sewer rental charge paid to Tredyffrin Township pursuant to the Service Agreement with respect to the Trammell Crow Capacity (which will continue to apply to the Atwater Capacity) covers both treatment and conveyance. By contrast, at such time that the East Whiteland Capacity is used in connection with the build-out of the Atwater Project, Tredyffrin Township's charges for the East Whiteland Capacity will be limited to only a conveyance charge. Tredyffrin Township's charges to East Whiteland Township for conveyance are governed by the Valley Creek Trunk Sewer Agreement dated November 1, 1970 ("Valley Creek Agreement").

As a result of the foregoing circumstances, East Whiteland Township and Tredyffrin Township have agreed to modify the Service Agreement in order to address the conveyance charges applicable to the East Whiteland Capacity flows through the Church Road Interceptor.

Atwater and Haven have joined in this Addendum for the purpose of confirming their respective approvals of the billing arrangements set forth herein.

NOW, THEREFORE, in consideration of the mutual covenants herein contained, for other good and valuable consideration, the receipt of which is hereby acknowledged and with the intent to be legally bound, the parties hereto covenant and agree as follows:

1. ALLOCATION OF TRAMMELL CROW CAPACITY AND ATWATER CAPACITY. Tredyffrin Township and East Whiteland Township hereby acknowledge the transfer of the Atwater Capacity from Trammell Crow to Atwater pursuant to the Assignment. For billing purposes, Tredyffrin Township and East Whiteland Township agree that the first 46,393 GPD of flows [or 231.965 Connected EDUs] in the Atwater Project (based on Tredyffrin Township's method for calculating EDUs) will be considered the Atwater Capacity. Tredyffrin Township will continue to bill Easement Whiteland Township for the Connected EDUs of the Atwater Capacity based upon the Service Agreement. All sewage flows generated by the Atwater Project in excess of 46,393 GPD will be considered to be East Whiteland Capacity. Tredyffrin Township will continue to charge East Whiteland Township a sewer rental charge for the Trammell Crow Capacity in accordance with the Service Agreement. At such time that the average daily flows (on an annualized basis) generated by the Atwater Project exceed 46,393 GPD, which excess shall be deemed East Whiteland Capacity, Tredyffrin Township will be entitled to collect a conveyance fee in accordance with Paragraph 3 below.

2. AUTHORIZATION TO CONNECT. Pursuant to Section 3.02 of the Valley Creek Agreement, Tredyffrin Township hereby authorizes East Whiteland Township to use the Church Road Interceptor to connect into the Valley Creek Trunk Sewer for the purpose of conveying the East Whiteland Capacity sewage flows from the Atwater Project to the Valley Forge Sewage Treatment Plant to the extent necessary to complete the full build-out of the Atwater Project.

3. CONVEYANCE FEE FOR EAST WHITELAND CAPACITY. Atwater is required in connection with the development of the Atwater Project to install a flow meter in Manhole No. _____ ("Atwater Flow Meter"), which is located in a section of the gravity line which conveys sewage flows from the Atwater Project to the Church Road Pump Station at a point on or near the East Whiteland/Tredyffrin Township line. The Atwater Flow meter is positioned so that it will measure all sewage flows generated by the Atwater Project. The average daily sewage flows (on an annualized basis) generated by the Atwater Project in excess of 46,393 GPD based will be treated as East Whiteland Capacity sewage flows, which flow will be added to the average daily sewage flows measured at the Mathews Road Meter Pit and the total will be billed to East Whiteland Township in accordance with the Valley Creek Agreement.

4. EAST WHITELAND TOWNSHIP SEWER RENTAL CHARGES. East Whiteland Township will charge connected users within Atwater a quarterly sewer rental charge based upon the sewer rental rate applicable to the Atwater Sewer District.

5. RATIFICATION. Except as modified above, the Service Agreement is ratified and affirmed in all other respects. The parties to this Addendum acknowledge and agree that nothing contained in this Addendum is intended to modify or affect the current billing arrangements with Trammell Crow set forth in the Service Agreement and for this reason Trammell Crow's joinder or approval of this Addendum is not required.

IN WITNESS WHEREOF, the parties have executed this Addendum the day and year first above written.

RECORDER OF DEEDS

SEWAGE TREATMENT AGREEMENT

THIS SEWAGE TREATMENT AGREEMENT (the "Sewage Agreement"), is made this 2nd day of March, 2004, by and between EAST WHITELAND TOWNSHIP (hereinafter "East Whiteland"), a township of the Second Class located in Chester County, Pennsylvania, EAST GOSHEN TOWNSHIP (hereinafter "East Goshen"), a township of the Second Class located in Chester County, Pennsylvania and MALVERN INSTITUTE FOR PSYCHIATRIC & ALCOHOLIC STUDIES, with an address of 940 West King Road, Malvern, Pennsylvania 19355 ("Malvern Institute").

BACKGROUND:

WHEREAS, East Whiteland owns and operates a sanitary sewage system (the "System") which collects, treats and disposes of domestic waste from various properties in East Whiteland; and

WHEREAS, East Whiteland has undertaken a project to expand the existing System to locate a sanitary sewer line and sewer pumping station (the "Pumping Station") together with accessories and appurtenances, on land owned by Malvern Institute, which property is located at 940 West King Road in East Goshen Township, Chester County, Pennsylvania and is more particularly referred to as UPI Numbers 53-2-18 and 54-2-127 (the "Property"); and

WHEREAS, East Whiteland and Malvern Institute have entered into an Easement Agreement (the "Easement Agreement") dated September 16, 2003, which Easement Agreement was recorded in the Chester County Recorder of Deeds on January 8, 2004 in Book 6033, Page 577; and

WHEREAS, in the Easement Agreement, Malvern Institute granted and conveyed to East Whiteland a 50 foot by 50 foot permanent sewer easement across the Property to allow East Whiteland to construct the sanitary sewer line, Pumping Station and accessories and appurtenances on the Property; and

WHEREAS, East Whiteland, in consideration of the Easement Agreement, has agreed to pay all costs associated with connecting the existing main house (the "Building") on the Property to the Pumping Station and to pay any and all fees due East Goshen as a result of such connection; and

WHEREAS, Malvern Institute shall be responsible for the maintenance of the sewer lateral which leads from the Building on the Property to the Pumping Station; and

WHEREAS, the parties hereto intend to set forth the terms and conditions upon which sewage from the Property will be collected and conveyed through the East Whiteland System and transported to the Valley Forge Wastewater Treatment Plant for ultimate disposal and treatment;

NOW THEREFORE, the parties hereto, intending to be legally bound and each representing that it has proper legal authority to enter into this Sewage Agreement, do mutually represent, covenant and agree as follows:

1. Malvern Institute has granted East Whiteland a sewer easement over a portion of the Property in order to install the Pumping Station. The location of the Pumping Station is more particularly described by metes and bounds in the Easement Agreement which is incorporated herein by reference.

2. In consideration of the grant of the sewer easement across the Property, East Whiteland shall permit Malvern Institute to connect the Building on the Property to the

BUCKLEY NAGLE BRION ..
03/18/2004 03:30P
10390861
Page: 2 of 9
B-6094 P-1899

Pumping Station to be built by East Whiteland on the Property. The sewage waste emanating from the Building on the Property which shall connect to the Pumping Station shall be collected and transported through the East Whiteland System for ultimate treatment at the Valley Forge Wastewater Treatment Plant (the "Plant"). East Whiteland represents that it has sufficient capacity at the Plant in order to treat the sewage emanating from the Building.

3. East Whiteland shall pay for all costs incurred in designing, constructing, installing and testing the sanitary sewer lines, Pumping Station and accessories and appurtenances to be built on the Property. East Whiteland shall obtain all necessary permits for the construction of the sanitary sewer lines, Pumping Station, and accessories and appurtenances and extension of the System. East Goshen shall cooperate with East Whiteland in obtaining such permits as expeditiously as possible.

4. East Whiteland shall be responsible for the construction, installation, maintenance, repair and replacement of all portions of the East Whiteland System, including the sanitary sewer lines, Pumping Station and accessories and appurtenances that are installed on the Property to provide sewer service to the existing buildings on the Property, except as provided in paragraph 5 below.

5. Malvern Institute shall be responsible for the maintenance, repair and replacement of the sewer lateral that extends from the Building on the Property to the Pumping Station.

6. East Goshen Township shall have no responsibility or obligation to maintain any part of the East Whiteland System, the Pumping Station or the sewer laterals that connect the Building on the Property to the Pumping Station.

10390861
Page: 3 of 9
BUCKLEY NAGLE BRION 03/18/2004 03:30P B-6094 P-1899

7. East Goshen represents that it currently has in full force and effect sewer regulations which are codified in Chapter 188 of the East Goshen Township Code, which regulations establish quarterly sewer rates for properties in East Goshen that are connected to the East Goshen sewer system and which regulate the materials which may be discharged into the East Goshen Township sewer system. East Goshen represents that it will enforce such regulations against the owner of the Malvern Institute Property and that such regulations shall prohibit any discharge into the Pumping Station other than domestic waste. East Goshen shall enforce its regulations in accordance with the existing sewer ordinance, and any amendments that are enacted thereto. East Goshen shall at all times keep on file with East Whiteland its current and up to date resolutions, rules, regulations and ordinances relating to the content or components of domestic waste.

8. Every quarter, East Whiteland shall bill East Goshen for costs incurred by East Whiteland in providing sewer service to the Property based on the sanitary sewer rate schedule as adopted by the East Whiteland Township Board of Supervisors, as the same may be amended from time to time. East Goshen shall pay the East Whiteland bill within thirty (30) days of delivery of the bill.

9. East Goshen shall bill the owner of the Malvern Institute Property in accordance with the sanitary sewer rate schedule as adopted by the East Goshen Township Board of Supervisors, as the same may be amended from time to time.

10. Malvern Institute agrees to be bound by Chapter 188 of the East Goshen Code as the same may be amended from time to time. Malvern Institute further agrees to pay the quarterly sewer rate for industrial users (which is based on water usage as

BUCKLEY NAGLE BRION 03/18/2004 03:30P 10390861 Page: 4 of 9 B-6094 P-1899

determined by meter readings) as adopted by the East Goshen Township Board of Supervisors, as the same may be amended from time to time.

11. It is agreed that all covenants, duties, rights, obligations, benefits and advantages of the parties hereto shall be binding upon and inure to the benefit of the parties' successors and assigns.

12. Should East Whiteland at any future time transfer the East Whiteland System to a municipal authority or other governmental entity, whether by lease, deed or otherwise, or merge or join with another authority, municipal or quasi-municipal body of the Commonwealth of Pennsylvania, then this Agreement should be considered without any further act or deed by either of the parties hereto, assigned to the responsive municipal body and the respective assignee shall be subject to all of the obligations and shall be entitled to receive all of the rights and benefits of this Agreement.

13. This writing constitutes the entire agreement between the parties and there are no other representations or agreements, oral or written, other than those contained herein. All prior negotiations and agreements between the parties are merged into this Agreement and there are no promises, agreements, conditions, undertakings, warranties or representations oral or written, express or implied between them other than as set forth herein.

14. This Agreement may be modified, amended or supplemented only by the written agreement of all the parties hereto.

15. In the event that the Department of Environmental Protection or any other regulatory body or governmental agency shall fail or refuse to issue any permits which may be necessary to accomplish the intent and purpose of this Agreement, then the parties

10390861
Page 5 of 9
B-6094 P-1899
BUCKLEY NAGLE BRION 03/18/2004 03:30P

hereto shall be relieved from further compliance with the terms of this Agreement, until such time when such permit or permits shall be issued; and then this Agreement shall become fully operative and the parties hereunder shall be bound by all the terms hereof.

16. Should any one or more of the provisions of this Agreement for any reason be held illegal, invalid or unenforceable, such illegality, invalidity or unenforceability shall not affect any other provision of this Agreement and the remainder of this Agreement shall, in such circumstances, be construed and enforced as if such illegal, invalid or unenforceable provision had not been contained herein.

17. This Agreement may be executed in any number of counterparts, each of which shall be properly executed by the parties hereto and all of which shall be regarded for all purposes as one original and all of which shall constitute and be but one and the same.

18. Whenever a notice is required to be given in writing by mail, the following addresses shall be used unless a different address is specifically called for:

If to East Whiteland:
Attention: Manager
East Whiteland Township
209 Conestoga Road
Frazer, PA 19355-1699

If to East Goshen:
Attention: Manager
East Goshen Township
1580 Paoli Pike
West Chester, PA 19380

If to the Malvern Institute:
Attention: Administrator/CEO
940 West King Road
Malvern, PA 19355

19. This Agreement shall be recorded in the Office of the Recorder of Deeds for

BUCKLEY NAGLE BRION. 03/18/2004 03:30P 10390861 Page 6 of 9 B-6094 P-1899

20. In the event East Goshen extends the East Goshen Sewer System such that public sewer provided by East Goshen is within 150 feet of the Property, Malvern Institute shall connect to the East Goshen Sewer System and from thereafter the sewage waste emanating from the Building on the Property shall be collected, treated and disposed of by East Goshen, not East Whiteland.

IN WITNESS WHEREOF, the parties hereto have caused these presents to be executed and their respective corporate seals affixed the day and year first above written.

ATTEST:

WASTEWATER CONVEYANCE AGREEMENT, DATED NOVEMBER 20, 2018, BY AND BETWEEN AQUA RESOURCES, INC., TREDYFFRIN TOWNSHIP, EAST WHITELAND TOWNSHIP, WILLISTOWN TOWNSHIP, CHARLESTOWN TOWNSHIP, SCHUYLKILL TOWNSHIP, EAST PIKELAND TOWNSHIP, EASTTOWN TOWNSHIP, EASTOWN TOWNSHIP MUNICIPAL AUTHORITY, THE BOROUGH OF MALVERN, TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY, AND VALLEY FORGE SEWER AUTHORITY

Bid Execution Version

WASTEWATER CONVEYANCE AGREEMENT

AMONG

AQUA RESOURCES, INC.

AND

THE TOWNSHIPS OF TREDYFFRIN, EAST WHITELAND, WILLISTOWN, CHARLESTOWN, SCHUYLKILL, EAST PIKELAND AND EASTTOWN, EASTTOWN TOWNSHIP MUNICIPAL AUTHORITY, THE BOROUGH OF MALVERN, TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY AND VALLEY FORGE SEWER AUTHORITY.

DATED NOVEMBER 20, 2018

WASTEWATER CONVEYANCE AGREEMENT

THIS WASTEWATER CONVEYANCE AGREEMENT (the "Agreement"), dated as of November _____, 2018 by and between AQUA RESOURCES, INC., (the "Company"), and THE TREDYFFRIN TOWNSHIP MUNICIPAL AUTHORITY (the "Tredyffrin Authority"), THE TOWNSHIPS OF TREDYFFRIN, EAST WHITELAND, WILLISTOWN, CHARLESTOWN, SCHUYLKILL, EAST PIKELAND AND EASTTOWN (hereinafter referred to as "Township" or collectively "Townships"); THE BOROUGH OF MALVERN (hereinafter referred to as "Borough"); EASTTOWN TOWNSHIP MUNICIPAL AUTHORITY ("ETMA"); and VALLEY FORGE SEWER AUTHORITY ("VFSA"). Townships, Borough, ETMA and VFSA are referred to as a "Municipality" or collectively referred to as "Municipalities". Company and each of the Municipalities are referred to as a "Party" or collectively as "Parties".

RECITALS:

WHEREAS, the Tredyffrin Authority owns the Valley Creek Trunk Sewer system ("VCTS");

WHEREAS, the VCTS accepts Wastewater (defined below) emanating from the Municipalities through its interceptors or trunk sewers, including pumping stations and appurtenances, and conveys such Wastewater to the VFSA treatment plant (the "Treatment Plant");

WHEREAS, the Municipalities entered into that certain Valley Forge Sewage Treatment Plant Agreement dated November 1, 1970 (together with the 1994 Addendum thereto, the "VFSA Agreement") for the construction, operation and maintenance of the Treatment Plant and is attached hereto as Exhibit A;

WHEREAS, the Municipalities entered into that certain Valley Creek Trunk Sewer System Agreement dated November 1, 1970 (the "1970 Agreement") for the collection and conveyance of Wastewater from the Municipalities through the VCTS to the Treatment Plant;

WHEREAS, the Municipalities entered into a Settlement Agreement dated July 18, 2017 (the "Settlement Agreement") in which the Municipalities agreed to sell the VCTS subject to the terms of the Settlement Agreement and the Asset Purchase Agreement (defined below);

WHEREAS, Company, the Tredyffrin Authority and the Township of Tredyffrin have entered into an Asset Purchase Agreement on the date of this Agreement, which provides, among other things, (i) at closing, the Tredyffrin Authority agreed to sell the VCTS to Company (the "Asset Purchase Agreement") and (ii) the Parties agreed to enter this Agreement;

WHEREAS, pursuant to the Settlement Agreement, upon closing of the Asset Purchase Agreement the 1970 Agreement automatically terminates and becomes null and void (except for Article IV as set forth in the Settlement Agreement);

WHEREAS, pursuant to the Settlement Agreement and Section 2.1 hereof, upon closing of the Asset Purchase Agreement, this Agreement becomes effective;

WHEREAS, the Municipalities desire to send all of their Wastewater through the VCTS to be treated at the Treatment Plant by the VFSA in accordance with the VFSA Agreement;

WHEREAS, Company agrees to collect Wastewater from the Municipalities and convey that Wastewater to the VFSA pursuant to the terms and conditions of this Agreement and the Asset Purchase Agreement; and

WHEREAS, VFSA agrees to accept, treat, and dispose of all Wastewater delivered to it by the Company pursuant to this Agreement and the VFSA Agreement.

NOW, THEREFORE, in consideration of the mutual promises contained herein and intending to be legally bound hereby, the Parties covenant and agree to the following terms and conditions of service:

ARTICLE I. DEFINITIONS

1.1. In addition to terms defined in the Agreement, these words and phrases shall have the following meaning when used in this Agreement:

a. **Applicable Law.** All laws, statutes, regulations, directives, orders, ordinances and approvals relating to Wastewater quality and governance of sewerage collection and conveyance systems adopted or administered by the United States Environmental Protection Agency ("USEPA") or Pennsylvania Department of Environmental Protection ("DEP"), and including the rules and regulations established by the VFSA in the VFSA General Code and any standards established by permit, court order, the VFSA Agreement or this Agreement.

b. **Arbitration Act.** Shall mean the Pennsylvania Judicial Code, 42 Pa. C.S. §§ 7301-7320.

c. **Connection Point.** The location at which each of the Municipalities' Wastewater connects to the VCTS metering equipment. The facilities comprising the Connection Point are at or near where a Municipality owned Wastewater pipe and the VCTS connect. Each Connection Point will be determined by Company as soon as reasonably practicable after the Effective Date.

d. **Effective Date.** As defined in Article II of the Agreement.

e. **Industrial Users.** Shall mean the permitted industrial users with pre-treatment responsibilities imposed by the USEPA or PADEP, as supplemented from time to time by VFSA, in accordance with and as set forth in the VFSA Agreement. Schedule 1.1 sets forth the names and addresses of current, permitted Industrial

Users with pre-treatment responsibilities, their permitted flow limit, if any, and their IPP (defined below) requirements.

f. **Industrial Waste Survey**. As defined in Article VIII of the Agreement.

g. **IPP**. Shall mean the Approved Publicly Owned Treatment Works ("POTW") Pretreatment Program administered by a POTW that meets the criteria established in Sections 403.8 and 403.9 of the applicable federal regulations and which has been approved by a Regional Administrator or State Director in accordance with Section 403.11 of the applicable federal regulations. Notwithstanding anything to the contrary in this definition, nothing shall prohibit a Municipality from adopting a stricter set of standards to apply within its jurisdiction.

h. **Prohibited Discharge**. A waste, pollutant, or other substance which is prohibited to be discharged into the Treatment Plant as set forth in the VFSA General Code (as defined below), as amended and supplemented from time to time.

i. **Prudent Industry Practices**. Those methods, techniques, standards, and practices which, at the time they are employed and in light of the circumstances known or believed to exist at the time, are generally accepted as showing skill and good judgment in the wastewater treatment and collection industry as practiced in the Eastern United States for facilities of a similar nature and in a similar location as the VCTS. Prudent Industry Practices is not necessarily defined as optimal methods, techniques, standards and practices to the exclusion of others, but rather to refer to a range of methods, techniques, standards and practices that are reasonable under the circumstances. At a minimum, Prudent Industry Practices shall include those requirements set forth in the VFSA Agreement and Applicable Law.

j. **VFSA General Code**. Shall mean the VFSA General Code of Rules and Regulations including Chapter 110 thereof, found at https://www.ecode360.com/12738210 as promulgated by VFSA from time to time.

k. **Wastewater**. The water-carried wastes from residences, businesses, buildings, institutions, and industrial establishments, singularly or in combination currently conveyed by each Municipality through the VCTS.

ARTICLE II. TERM AND TERMINATION

2.1. **Effective Date**. It is agreed between the Parties that this Agreement shall become effective (hereinafter referred to as the "Effective Date") on the date of the Closing as defined in the Asset Purchase Agreement. If the Asset Purchase Agreement does not close and is terminated, the Agreement shall be null and void.

2.2. **Term.**

2.2.1. **Original Term.** The Agreement shall commence on the Effective Date. The original term of the Agreement shall continue in full force and effect for and through fifty (50) years following the Effective Date (the "Original Term").

2.2.2. **Renewal.** Following the Original Term, unless otherwise terminated by written agreement of all Parties at least three hundred and sixty five (365) days prior to the expiration of the Original Term, the Agreement shall automatically renew for an additional fifty (50) years (the "Extended Term"). Following the Extended Term, the Parties to this Agreement may renew this Agreement. Such renewal must be agreed to in writing by all Parties.

ARTICLE III. CONVEYANCE AND ACCEPTANCE OF WASTEWATER

3.1. **Conveyance of Wastewater.** Each Municipality shall convey all of its Wastewater to its Connection Point in an amount not to exceed their Flow Limit, as that term is defined in Section 3.4 of this Agreement.

3.2. **Municipalities Wastewater Systems.** The Municipalities shall be responsible for the construction, operation and maintenance of their respective sanitary sewer systems necessary to convey Wastewater to its Connection Point, including but not limited to all costs, expenses, capital, design, permitting, acquisition or any required easements or rights of way, and the installation, construction, operation, and maintenance of any necessary pumping station(s), tank(s), and pipe. The Municipalities shall own, maintain, and be responsible for all components of their respective sanitary sewer systems up to the Connection Points with the VCTS. Any enlargement, expansion, or change in collection system operations of the Municipalities' respective sanitary sewer systems that would require an increase in their Flow Limit (as defined below) must be approved by Company and VFSA and must conform with the Act 537 plan and the permit for the Treatment Plant. Nothing in this Agreement shall be construed to alter the Municipalities' jurisdiction or responsibility over sewage facilities planning and sewer service through the Act 537 planning program, or their respective zoning, subdivision and land development ordinances and comprehensive land use planning policies.

3.3. **Connection Points.** The Municipalities, at their cost and expense, shall provide Company with an appropriate easement or other mutually agreeable property rights necessary to accept the Municipalities' Wastewater flow at the Connection Points. The cost and expense for obtaining such easements or mutually agreeable property rights shall be paid proportionally by each Municipality in each Municipality's respective percentage amount set forth on Schedule 9.1. No new Connection Points may be made without first obtaining the written approval of Company. All new connections to the VCTS shall be accomplished in accordance with Company's and VFSA's requirements at the sole cost of the connecting Municipality. Meters required by Section 4.1 shall be installed at any new connection by Company at the connecting Municipality's cost. Company may charge a fee for each new connection in accordance with Applicable Law.

3.4. **Flow Limit.** The Municipalities shall convey and Company shall accept Wastewater delivered by the Municipalities to their respective Connection Points in an amount not to exceed the "Peak Flow" amounts for each Municipality set forth in Schedule 3.4 of this Agreement and as amended from time to time by agreement among the Parties (the "Flow Limit"); provided, however, Company agrees that each of the Municipalities shall be permitted to buy and sell its existing capacity (as set forth on Schedule 3.4) pursuant to Section 3C(1)(e) of the Settlement Agreement. In the event that any of the "Peak Flow" Flow Limits contained in Schedule 3.4, during any calendar year has been exceeded for any consecutive thirty (30) day period (an "Exceedance Event"), Company, in its commercially reasonable discretion may determine that it does not have adequate capacity in the VCTS to permit additional Connection Points to the Municipalities' Wastewater systems that are subject to this Agreement. If Company makes such a determination, it shall provide notice thereof pursuant to Section 12.5 of this Agreement and the Municipalities shall not add any additional flow to the VCTS nor shall they construct or cause to be constructed any expansion or enlargement of their respective systems from and after the date of such notice until approval therefor is issued by VFSA.

3.5. **Exceedance Charge.** If there is an Exceedance Event, then the Municipality(s) which are responsible for the Connection Point where the Exceedance Event was measured shall pay to Company a charge in the amount of One Thousand Dollars ($1,000) per day in the aggregate beginning on the thirty-first (31st) day and each successive day for which there is an exceedance (an "Exceedance Charge"); *provided, however*, that the charge for any responsible Municipality which has a "Peak Flow" Flow Limit less than 150,000 GPD (a "Low Flow Municipality") shall instead be $100 per day (the "Low Flow Exceedance Charge"). The Exceedance Charge shall be allocated among each responsible Municipality based upon the following formula: the Municipality's total gallons per day in excess of its "Peak Flow" Flow Limit divided by the total gallons per day of each exceedance; *provided, however*, that the allocable portion of the Exceedance Charge payable by a Low Flow Municipality as a result of such allocation process shall not exceed the daily Low Flow Exceedance Charge and any balance allocated to the Low Flow Municipality(s) over that amount shall be waived by Company. Company may increase the amount of the Exceedance Charge on the fifth (5th) anniversary of the Effective Date by the amount representing the increase in the Consumer Price Index ("CPI") since the Effective Date, and may increase the Exceedance Charge amount annually thereafter by annual CPI increases. If it cannot be determined from which Municipality the Exceedance Event originated, Company shall bill any charge, fine, or other penalty resulting from such Exceedance Event to all Municipalities based on their flow proportion which shall be calculated by comparing each Municipality's total flow for the previous calendar year to the total aggregate flow for the previous calendar year. The remedies stated herein are exclusive in relation to Exceedance Charge.

3.6. **Acceptance of Wastewater.** In accordance with the VFSA Agreement and this Agreement, Company shall accept all Wastewater from each Municipality and convey all of the Wastewater from the Municipalities to the Treatment Plant. In accordance with the VFSA Agreement and this Agreement, VFSA shall accept all Wastewater conveyed through the VCTS from Company.

ARTICLE IV. METERING

4.1. **Meters.** All Wastewater flows from the Municipalities conveyed to the Connection Points shall be metered by metering equipment. Company shall assume ownership of and inspect all meters existing at the beginning of this Agreement, if any, at each Connection Point and determine, in Company's sole discretion, whether the existing meter shall be replaced. In accordance with the Asset Purchase Agreement and Section 3.3 hereof, the Municipalities shall convey to Company all property rights that are necessary for Company to access, operate, and maintain the meters existing at the beginning of this Agreement and at all Connection Points. If new or replacement meters are necessary at any Connection Point, in Company's sole judgment, such meters shall be procured and installed by Company at its sole cost and expense. All flow that is pumped or flow that is under pressure in a pipeline shall utilize a magnetic flow meter. All flow that is conveyed by gravity shall utilize an area-velocity flow meter with a standard flume (Palmer Bowlus, Parshall or other non-clog design).

4.2. **Operation and Maintenance of Meters.** Company shall own and operate the metering equipment for the purposes of measuring the volume of Wastewater delivered to the Connection Points for conveyance through the VCTS to the Treatment Plant, and shall be responsible for the designing, installing, daily operation, calibration, updating, and replacement, as necessary and in accordance with Article X hereof, of metering devices. The Company shall provide VFSA and the Municipalities with readings of meters on the first day of each quarter for the prior quarterly period.

4.3. **Calibration and Testing.**

4.3.1 Meter equipment and remote readouts shall be tested, calibrated, maintained, and repaired at least annually by Company at Company's cost. The results of all testing and calibration undertaken by the Company shall be provided to each Municipality no later than seven (7) business days from completion of such bi-annual testing and calibration. If any Municipality requests additional testing, calibration, maintenance and repair, such expenses associated shall be at the cost of the Municipality.

4.3.2 If a Municipality and Company cannot agree as to the inaccuracy of any meter, such Municipality may request that the meter be tested by an independent testing facility mutually agreed to by the Municipality and Company and such independent testing facility's determination of accuracy shall be conclusive. The cost of the testing shall be borne fifty percent (50%) by the Municipality and fifty percent (50%) by Company.

4.3.3 If upon any test, the percentage of inaccuracy of any metering equipment is found to be in excess of three percent (3%), the calibration thereof shall be corrected, and any billing shall be adjusted, for a period extending back to the time when such inaccuracy began, if such time is ascertainable, and if such time is not ascertainable, then for a period extending back one-half (1/2) of the time elapsed since the most recent date of calibration, but in no event further back than a period of six (6) months. If for any reason any meters appear to be malfunctioning such that the amount of Wastewater conveyed cannot be ascertained or computed from the reading thereof, the Wastewater conveyed through the period such meters are out of service or

out of service shall be estimated and agreed upon by the Parties hereto upon the basis of the best data available. The amount of Wastewater conveyed during such period may be estimated (i) by correcting the error if the percentage of the error is ascertainable by calibration tests or mathematical calculation, or (ii) estimating the quantity of delivery by deliveries during the preceding periods under similar conditions when the meter or meters were registering accurately.

4.3.4 Company shall provide notice pursuant to Section 12.5 of this Agreement to each Municipality that has exceeded its Flow Limit for seven (7) consecutive days. Such notice shall be provided to each Municipality promptly after such determination.

ARTICLE V. QUALITY OF WASTEWATER

5.1. **Sewer Use Ordinances.** The Municipalities shall maintain and administer uniform ordinances, resolutions, rules or regulations to: (1) prohibit users of their respective collection systems from making Prohibited Discharges and to prevent the infiltration of stormwater into the collection systems, and (2) maintain and/or otherwise comply with the IPP. The IPP shall include measures to cause the Municipalities to periodically survey their respective sanitary sewer systems to ensure, among other things, that all dischargers of high strength waste or other Prohibited Discharges are included in the IPP, and measures to periodically check any self-reporting done by the Industrial Users of the Municipality to confirm that accurate information is reported.

5.2. During the term of this Agreement, the Municipalities shall provide Company, on a semi-annual basis, a list of all Industrial Users discharging to the Municipalities' wastewater systems and whose Wastewater is conveyed at the Connection Point. The Company shall provide VFSA with a copy of such list within seven (7) days of receipt.

5.3 At least once every six (6) months, the Municipalities shall provide, or cause to be provided, to the Company copies of all reports and Wastewater analysis results of Industrial Users discharging to the Municipalities' wastewater systems and whose Wastewater is conveyed at the Connection Point to Company. These reports and analysis results will be provided to Company within thirty (30) days of receipt by the Municipalities, but in no case be longer than six months from the last report. The Company shall provide VFSA with a copy of such list upon the request of VFSA. The Municipalities shall take prompt enforcement action against any Industrial User which does not comply with the requirements of this Article V.

ARTICLE VI. PROHIBITED DISCHARGES

6.1 **Prohibited Discharges.** Company shall not be responsible for any fines, charges or fees arising from or related to Prohibited Discharges by any Municipality. If a Municipality chooses to take pretreatment enforcement action independent of VFSA, such Municipality shall comply in all material respects with the VFSA's approved Enforcement Response Program (the "ERP") which includes a matrix of escalating enforcement responses, up to and including termination of service. Upon discovery that a Prohibited Discharge is being conveyed by a Municipality's Wastewater system to Company:

6.1.1. The Municipality shall provide verbal notification to the Company and verbal communication to VFSA in accordance with the VFSA Agreement, the VFSA General Code and the ERP, and provide confirmation thereof in writing to Company, within twenty-four (24) hours.

6.2 If the Municipality fails to cease a Prohibited Discharge in accordance with the ERP, in addition to penalties available to VFSA under the VFSA Agreement, VFSA General Code and the ERP, the Company may, at its option, without liability and at the Municipality's cost, charge the Municipality a penalty of One Thousand Dollars ($1,000) per day (the "Prohibited Discharge Charge") until such time as that Municipality returns to compliance with the ERP. The Prohibited Discharge Charge may be increased in the same manner set forth in Section 3.6 above for the Exceedance Charge.

6.1.1. The remedies stated herein are the Company's exclusive remedies in relation to Prohibited Discharges.

ARTICLE VII. SAMPLING AND MONITORING OF QUALITY

7.1. **Sampling and Monitoring Equipment.** Company shall install the sampling and monitoring equipment at every Connection Point. Company shall own and operate the sampling and monitoring equipment for the purpose of sampling and analyzing the Wastewater delivered at the Connection Points consistent with Section 7.4 below, and shall be responsible for designing, installing, operating, updating and replacing, in accordanee with Prudent Industry Practices, of such sampling and monitoring equipment. The costs of the sampling and monitoring equipment, installation of the sampling and monitoring equipment and installed components at all Connections Points shall be paid by Company. Sampling and monitoring equipment shall include but not be limited to electric and mechanical provisions for twenty-four (24) hour composite sampling. Nothing in this Section 7.1 shall be construed to modify VFSA's rights or remedies under Article V of the VFSA Agreement.

7.2. **Access to Sampling and Monitoring Facilities.** Company shall own and operate the sampling and monitoring facilities and equipment. The Municipalities shall have full and complete access to the sampling and monitoring facilities and equipment upon twenty-four (24) hours' notice to Company for the purpose of observing the proper operations of the facilities.

7.3. **Testing and Calibration.** Company shall test, calibrate, maintain, and repair the sampling and monitoring equipment annually, the costs of which shall be paid by Company. The results of such testing and calibration shall be provided to each Municipality no later than seven (7) business days from completion.

7.4. **Collection of Samples.** Company shall collect all samples, and:

7.4.1. Company shall collect and arrange for testing of all samples at intervals determined at Company's discretion, and in compliance with NPDES permit requirements.

7.4.2. Company shall determine the parameters for all such sampling and testing.

7.4.3. Company will provide the results of any sampling to the Municipalities at such Municipality's request. All analytical results will be obtained utilizing approved sample collection procedures and analytical procedures listed in the most current version of 40 CFR Part 136. All sample analysis will be performed by a laboratory accredited by PADEP for the approved method. Sample collection and preservation will be documented on all chain of custody forms, a copy of which will become part of the data package included with the analytical report. Company shall provide VFSA with copies of all analytical data within seven (7) days of receipt.

7.4.4. A Municipality may request a portion of samples taken by Company if a Municipality wants to conduct its own analyses. Samples may be split between Company and a Municipality for laboratory analysis if requested by the Municipality a minimum of forty-eight (48) hours in advance. If such a request is made, the Municipality shall be responsible for sample pick-up and delivery to the selected laboratory and shall be responsible for all costs.

7.4.5. A Municipality may request additional sampling and analysis at the Municipality's cost.

7.4.6. If a Municipality and Company cannot agree as to the results of any sampling or testing by the other, samples shall be sent to and tested by an independent laboratory mutually agreed to by the Municipality and Company and such independent laboratory's determination of sampling or testing shall be conclusive. The cost of these samples shall be borne fifty percent (50%) by the Municipality and fifty percent (50%) by Company.

ARTICLE VIII. INSPECTION AND ENFORCEMENT

8.1. **Industrial Waste Survey.** The Municipalities shall maintain a current Industrial Waste Survey list in accordance with the following:

8.1.1. The Industrial Waste Survey list shall include the facility name and address of all commercial and Industrial Users whose Wastewater passes through each of the Connection Points to the VCTS, the nature of each Industrial User's business and the name and contact information of a responsible person to be contacted at each Industrial User.

8.1.2. An updated list shall be provided to Company and VFSA within thirty (30) days of the Effective Date of this Agreement. The list shall include Industrial User that have been added as well as those that have been removed or where site operations have changed.

8.1.3. The Municipalities shall provide to Company results of its updated Industrial Waste Survey lists annually.

ARTICLE IX. BILLING, PAYMENT, AND RATES

9.1. **Billing and Rates.**

9.1.1. Subject to Sections 9.1.2-.4, Company shall bill each Municipality the effective rate applicable to each Municipality as set forth on Schedule 9.1. Billing shall occur on a monthly basis. After the third (3rd) anniversary of the Effective Date, billings from Company shall be based on metered flows measured at the Connection Points.

9.1.2. Opener Process. No sooner than two hundred ten (210) days and no later than one hundred eighty (180) days prior to the (i) eighth (8th) anniversary of the Effective Date or (ii) any subsequent five (5) year anniversary of the Effective Date (e.g., no sooner than two hundred ten (210) days and no later than one hundred eighty (180) days prior to year thirteen (13), eighteen (18), twenty-three (23), etc.) (each, an "Opener Period"), any Party may send written notice to the other Parties that it desires to open negotiations (each such notice, an "Opener Notice") among the Parties in order to set a percentage escalator solely with respect to a capital expenditure escalator (a "Capex Escalator") to be used to increase the annual revenue requirement/rate as set forth on Schedule 9.1 and such Capex Escalator shall go into effect, if agreed upon by the Parties pursuant to this Section 9.1.2 or as determined by Section 9.1.3, beginning on the one hundred eightieth (180th) day after the delivery of any Opener Notice and such Capex Escalator shall continue in effect until a new Capex Escalator is agreed upon, if any, by the Parties pursuant to this Section 9.1.2 or as determined by Section 9.1.3. The Parties shall negotiate the Capex Escalator in good faith. If the Parties are unable to agree in writing to a Capex Escalator within twenty (20) business days of an Opener Notice, the Parties agree to the procedures set forth in Section 9.1.3 below. If no Opener Notice is delivered during any Opener Period, the revenue requirement/rate shall only be increased annually by the CPI until a Capex Escalator is determined in accordance with Section 9.1.

9.1.3. Arbitration Process. If the procedures described in Section 9.1.2 do not result in resolution of a Capex Escalator within twenty (20) business days following receipt of the Parties of a Opener Notice (unless otherwise extended by written agreement of all Parties) the dispute shall be resolved by arbitration in accordance with the AAA Rules then in effect. Any Party may initiate the arbitration, as provided in the AAA Rules. Any arbitration conducted pursuant to this Section 9.1.3 shall be governed by the statutory arbitration provisions of the Arbitration Act. The place of arbitration shall be Tredyffrin Township, Pennsylvania unless the Parties agree otherwise. The arbitral panel shall determine the rights and obligations of the Parties in accordance with the substantive laws of the Commonwealth of Pennsylvania and without regard to conflicts of laws principles thereof. Except as agreed by the Parties, the arbitral panel shall have no power to alter or modify any terms or provisions of this Agreement, or to render any award that, by its terms or effects, would alter or modify any term or provision of this Agreement other than to set a Capex Escalator. The Parties shall be entitled to reasonable production of relevant, non-privileged documents, carried out expeditiously in order to disclose capital expenditures and capital plans. If the Parties are unable to agree upon such document production, the arbitral panel shall have the power, upon application of any Party, to make all appropriate orders for production of documents by any Party. At the request of any Party, the arbitral panel shall have the discretion to order the examination by deposition of any witness to the extent the arbitral tribunal deems such examination appropriate or necessary. The arbitral panel shall be composed of three (3) arbitrators, one (1) to be selected by the Municipalities (by majority vote), one (1) to be selected by the Company and the third (3rd), who shall act as chairman of the panel, to be selected by the two (2) previously-selected arbitrators. If, within ten (10) business days, the two (2) previously-selected

arbitrators cannot agree on the selection of the third (3rd) arbitrator, then the third (3rd) arbitrator shall be selected by the AAA pursuant to the AAA Rules. Once the arbitral panel has been composed, the arbitrators shall act as neutrals and not as party arbitrators, and no Party shall engage in any ex parte communication with any member of the arbitral panel. Each Party shall bear its own attorney fees, expenses, and costs for the arbitration. Some or all of the Municipalities may agree to engage one (1) attorney to represent them as a group and share attorney fees, expenses, and costs. Company shall pay one-half (1/2) of the expenses and costs associated with engaging the arbitral panel. Each Municipality shall pay its proportional share (based upon each Municipality's percentage share of Wastewater flow in the twelve (12) month period immediately preceding an Opener Notice) of the remaining one-half (1/2) of the expenses and costs associated with engaging the arbitral panel. Any future increase in the Capex Escalator determined by the arbitral panel shall be in effect for a five (5) year period and shall be in writing, stating the reasons upon which it is based. The determination of the Capex Escalator must be determined by arbitral panel prior to the one hundred eightieth (180th) day after the delivery of any Opener Notice and such determination shall be final and binding on the Parties, subject only to such review and other proceedings as provided by the Arbitration Act. Judgment on the award may be entered by any court with competent jurisdiction in accordance with the Arbitration Act.

9.1.4. The Parties acknowledge that the VCTS, including all VCTS operations and utility services to be provided by Company under this Agreement and the imposition of the rates set forth on Schedule 9.1 may become subject to the jurisdiction of the Pennsylvania Public Utility Commission (the "PaPUC") and the applicable provisions of the Public Utility Code of Pennsylvania, Title 66 of the Pennsylvania Consolidated Statutes. If the PaPUC exercises jurisdiction over any matter that is the subject of this Agreement, then the Parties acknowledge and agree to the jurisdiction of the PaPUC and to be bound by its oversight, regulations, and rate-making procedures; *provided, however*, if the PaPUC exercises jurisdiction over the imposition of the rates or rate-making procedures, Company shall not seek to implement rates other than those set forth on Schedule 9.1 until after the third anniversary of the Effective Date.

9.2. **Estimated Billing**. If a dispute over the inaccuracy of a meter at a Connection Point or a meter at a Connection Point is agreed to have been reading inaccurately, an estimated billing shall be issued based on the procedure set forth in Article IV hereof.

9.3. **Payment.** The Municipalities shall pay each monthly bill in full within thirty (30) days after the bill date. Amounts not paid when due shall be subject to interest in the amount of six percent (6%) per annum of the amount due.

ARTICLE X. COMPLIANCE WITH RULES, REGULATIONS, STANDARDS, AND LAWS

10.1. **Compliance.**

10.1.1. Company will be solely responsible for the proper conveyance of Wastewater received from the Municipalities in accordance with Applicable Law. Company and the Municipalities shall be responsible for the proper conveyance of Wastewater received from the Municipalities to the Treatment Plant in accordance with the VFSA Agreement. The

Municipalities acknowledge that Company has no ability or obligation to affect the quality or flow of Wastewater prior to the Connection Points.

10.1.2. The Municipalities shall be solely responsible for the delivery of the Wastewater to the Connection Point in a manner compliant with all the laws, regulations, requirements, and standards of the DEP, the USEPA, and the VFSA Agreement.

10.1.3. The Parties to this Agreement shall comply with all local, state, and federal regulations, standards, and laws currently in effect and as amended, adopted, or enacted regarding their respective obligations hereunder for the collection and treatment of Wastewater, the operation of their respective systems and any additional services provided according to the terms and provisions of this Agreement.

10.1.4. On the Effective Date, Company will obtain sole ownership and control of Wastewater conveyance facilities comprising the VCTS. During the Original Term and the Extended Term (if applicable) of the Agreement, Company shall operate, maintain, repair, and improve the VCTS using Prudent Industry Practices for facilities comparable to the VCTS and, at a minimum: (1) in a manner that would be required by the PaPUC if the Agreement and the VCTS were subject to its jurisdiction and (2) in a manner necessary for the Municipalities to comply with the VFSA Agreement. Company retains the sole exclusive right to make all managerial and other decisions regarding the VCTS, including, but not limited to, those decisions regarding operation, maintenance, upkeep, expansion, abandonment, or replacement of all or a portion of the VCTS in accordance with Prudent Industry Practices and while abiding by the effective rate then applicable to each Municipality.

ARTICLE XI. INDEMNIFICATION AND ENFORCEMENT

11.1 **Indemnification by Municipalities.** To the extent permitted by law, the Municipalities agree to defend, indemnify, and hold harmless Company from and against all claims, actions, suits, demands, losses, interest, penalties, and liabilities ("Losses") arising from performance of the terms and conditions of this Agreement (*except* for any Losses that are caused by Company) by reason of:

11.1.1. Injury (including death) to persons and damages to property resulting from operation under this Agreement to convey the Municipalities' Wastewater through the VCTS, where such injury (including death) is due to the negligence of a Municipality or the Municipalities or their employees, agents or the inherent nature of their operation;

11.1.2. An action of any kind whatsoever by USEPA, DEP, or VFSA, as a result of any action or inaction by a Municipality with respect to its wastewater system and for any work undertaken by the Municipalities, their contractors or consultants, to the Municipalities' respective wastewater systems necessary and required by the USEPA or DEP;

11.1.3. Any breach by any Municipality of their obligations under this Agreement.

11.2. **Indemnification by Company.** Company shall defend, indemnify, and hold harmless the Municipalities from and against all Losses (i) arising from Company's failure in the operation of the VCTS in accordance with Prudent Industry Practices and (ii) any breach by Company of its obligations under this Agreement and the VFSA Agreement.

ARTICLE XII. MISCELLANEOUS

12.1. **Inspection and Audit.** Company and the Municipalities agree to maintain complete and accurate records and accounts concerning their responsibilities under this Agreement. All Parties shall, at all times, have the right to examine and inspect said records and accounts upon thirty (30) days' written notice, unless such examination is deemed an emergency in which case the right shall be provided as soon as practicable. If required by law or regulation, Company and the Municipalities shall make said records and accounts immediately available to federal and state authorities.

12.2. **Successors and Assignment.** This Agreement is binding on any successors of each Party. Company may assign this Agreement to a parent, subsidiary or affiliate of Company, or an entity that acquires all, or substantially all of the assets or shares of Company or any of Company's parents. In the event that an entity seeks to acquire Company's rights pursuant to this Agreement, the acquiring entity shall obtain the prior written consent of the Municipalities, which consent shall not be unreasonably withheld or delayed. The Municipalities shall not confer, transfer, convey, assign, or license to any third party any rights obtained under this Agreement including, but not limited to, assignment of Wastewater conveyance capacity without the prior express written consent of Company, which consent shall not be unreasonably withheld, conditioned or delayed.

12.3. **Severability.** Each provision of this Agreement is severable from the whole, and if one provision is declared invalid, the other provisions shall remain in effect.

12.4. **No Waiver.** Failure by a Party to enforce any provision of this Agreement, or the waiver thereof in any instance shall not be construed as a general waiver of rights.

12.5. **Notices.** Any notice given or made pursuant to this Agreement will be effective only if in writing and delivered in person, by messenger, by overnight delivery, or by certified mail, return receipt to a Party at the address below:

12.6. **Complete Agreement.** The terms of this Agreement constitute the entire agreement among the Parties concerning the subject matter hereof, and this Agreement may be modified only in a writing signed by all Parties. This Agreement and the schedules incorporated herein shall be modified and/or amended only by writing signed by all Parties.

12.7. **Titles and Headings.** Titles and headings to sections or paragraphs herein are inserted merely for convenience of reference and are not intended to be a part of or to affect the meaning or interpretation of this Agreement.

12.8. **Counterparts.** This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

12.9. **Applicable Law**. This Agreement shall be construed and enforced in accordance with, and governed by, the laws of the Commonwealth of Pennsylvania (without giving effect to the principles of conflicts of laws thereof). The Parties hereto irrevocably agree and consent to the jurisdiction of the United States District Court for the Eastern District of Pennsylvania and the Court of Common Pleas of Chester County, Pennsylvania, for the adjudication of any matters arising under or in connection with this Agreement. Any action initiated in court shall be filed and litigated (including all discovery proceedings) exclusively in the United States District Court for the Eastern District of Pennsylvania and the Court of Common Pleas of Chester County, Pennsylvania, and each Party irrevocably submits to the exclusive jurisdiction of such courts in any such suit, action or proceeding. Service of process, summons, notice or other document by mail to such Party's address set forth herein shall be effective service of process for any suit, action or other proceeding brought in any such court.

[1] After the third anniversary of the Effective Date, billings from the Company will be based on metered flows measured at the Connecton Points.

[2] The rates that will be effective on the fifth and sixth anniversaries, respectively, of the Effective Date, will be the rate in the prior year plus 3.00%.

[3] The rates that will be effective on the seventh anniversary of the Effective Date will be set at $4,013,000.

[4] Beginning 180 days prior to the eighth anniversary of the Effective Date, rates shall be set in accordance with Section 9.1 of the Agreement.

EXHIBIT F18

AGREEMENT WITH PUBLIC UTILITY OR MUNICIPALITY FOR CROSSING UNDER RAILROAD PRIVATE PROPERTY, DATED MARCH 21, 1972, BY AND BETWEEN READING COMPANY AND EAST WHITELAND MUNICIPAL AUTHORITY

Form 298—4-R 5-68—1M 8½x14

AGREEMENT WITH PUBLIC UTILITY OR MUNICIPALITY FOR CROSSING UNDER RAILROAD PRIVATE PROPERTY

This Agreement, made this 21st day of March A. D. 19 72, between READING COMPANY (Debtor in possession under Sec. 77 of the Bankruptcy Act)

, party of the first part, hereinafter called "Licensor," and EAST WHITELAND MUNICIPAL AUTHORITY, a body corporate and politic, organized and existing under the laws of the Commonwealth of Pennsylvania and established by the Board of Supervisors of East Whiteland Township, Chester County, Pennsylvania, pursuant to resolution or ordinance duly adopted by aforesaid Board of Supervisors,

~~a corporation of the State of~~ , party of the second part, hereinafter called the "Licensee":

WHEREAS, Licensee has applied to Licensor for license and permission to lay, maintain and use for sewage disposal purposes (a) one (1) pipe not exceeding eight (8) inches in diameter, encased in a steel casing pipe not exceeding thirty-six (36) inches in diameter, and (b) one steel pipe not exceeding twenty-four (24) inches in diameter encased in a steel casing pipe not exceeding forty-two (42) inches in diameter, and

all hereinafter called "facilities," across and underneath the tracks, right of way and property owned or operated by Licensor at a point approximately (a) 1,660 feet west of Valley Store Station and (b) 511 feet west of Valley Store Station, both crossings hereinafter referred to in the singular and situate in the Township of East Whiteland,

County of Chester and State of Pennsylvania, in substantially the location and position shown on the hereto attached plan numbered R-1 and R-2, and dated 11-2-71; and

WHEREAS, Licensor is willing to accord to Licensee the license and permission so applied for, but only upon and subject to the terms, conditions and limitations regulative and restrictive thereof, as hereinafter set forth:

NOW, THEREFORE, THIS AGREEMENT WITNESSETH:

That Licensor, in so far as its present title may enable it so to do and upon and subject to the terms and conditions hereinafter contained, hereby licenses and permits Licensee to lay, maintain and use said above mentioned and described facilities, across and underneath said tracks, right of way and property at the location aforesaid, and as shown in detail on said plan, which said plan is hereby made a part hereof.

FIRST: Said facilities shall be of the material, size and shall be used solely for the purposes above recited, and shall be so laid and maintained that the top thereof shall not at any time be less than 5 feet, 6 inches below the base of the rails of said tracks. There shall be no joints in that portion of any service pipe underneath said tracks when not enclosed within a casing pipe and no joints in that portion of any casing pipe underneath said tracks.

SECOND: The time and manner of placing the said facilities and appurtenances at the point of crossing and of the maintenance thereof, as well as any addition thereto, change in location, alteration, renewal, or subsequent removal thereof, shall be subject to the direction, supervision, and approval of the duly authorized representative of Licensor.

Licensee shall furnish, or shall have its Contractor constructing said facilities furnish to the Chief Engineer of Licensor at Room 505, Reading Terminal, Philadelphia, Pa., 19107, certificates declaring that Licensee or Contractor is protected by Contractual Liability Insurance, with an Insurer and in amounts and form satisfactory to Licensor. All such certificates furnished shall be endorsed to provide ten (10) days' advance written notice to Licensor by the Insurer before effecting any material change in or cancellation of the policies covered by the certificates furnished to Licensor.

If, during the progress of any work of construction, maintenance, repair, renewal, alteration, adjustment or removal of said facilities and appurtenances of Licensee, Licensor deems it advisable or is requested by Licensee, or any of its agents, licensees or contractors, including any sub-contractors, to provide watchmen, flagmen, inspectors or supervisors for the protection of persons or property, Licensor shall have the right to do so, and if any such watchmen, flagmen, inspectors or supervisors are provided, Licensee shall, upon bills being rendered, promptly pay or cause to be paid the cost and expense thereof incurred by Licensor and shown on said bills.

THIRD: Said facilities and appurtenances shall be laid in a prudent and workmanlike manner and in conformity with all orders, rules, regulations and specifications of any public body having jurisdiction thereof, and thereafter maintained during the continuance of this agreement and until removed, in good and safe order, condition, and repair all by and at the sole cost and expense of the Licensee and to the satisfaction of said duly authorized representative of Licensor. If Licensee fails to make repairs after written notice has been given by Licensor so to do, Licensor may do such work and the cost thereof shall be promptly paid by Licensee upon bills being rendered.

In the event of an emergency in which said facilities of Licensee shall endanger the safety of the property, traffic, patrons or employes of Licensor, and Licensee fails promptly to remedy the dangerous condition, Licensor shall have the right to take such action as may be reasonably necessary to insure safe railroad operation, but shall immediately give notice thereof to Licensee, and the cost of all such work performed by Licensor, upon bills being rendered, shall be promptly paid by Licensee.

FOURTH: Licensor may at its option do all the work, within its right of way, necessary to support and sustain its tracks and roadbed, during the laying, repairing and removing of said facilities and in case Licensee should fail or refuse to make necessary repairs or to restore the tracks and roadbed as hereinbefore provided, Licensor may do such work. The cost of all work done by Licensor as herein provided shall be paid by Licensee promptly upon the rendering of bills therefor.

Licensee agrees that it will at its own sole cost and expense at all times during the work of laying, repairing or removing said facilities, support and sustain the tracks and roadbed of Licensor to the end that traffic thereon shall not be hindered or delayed, and upon the completion of said work will restore said tracks and roadbed to the same or as good condition as before said work was commenced.

FIFTH: No facilities additional to those now to be constructed hereunder shall be constructed or maintained by Licensee across and underneath said tracks, right of way and property in the above named location, except only upon the written consent of Licensor first having been obtained therefor, and any additional facilities which may be constructed shall be governed by the provisions hereof relative to those now constructed or to be constructed hereunder provided, however, that if such additional facilities are constructed, the annual payment to be made by Licensee under the provisions of Article Eighth hereof shall be increased by an amount equal to Licensor's charge for such additional facilities.

SIXTH: If Licensor should at any time or times in the future deem it desirable or necessary in its judgment, which shall be conclusive, that the said facilities and appurtenances, or the location thereof, should be changed or altered, Licensee shall make the required changes or alterations and restore the premises affected to their present good condition within thirty (30) days after, and in accordance with the requirements of written notice from Licensor so to do, all of said changes or alterations and restoration of premises to be so made by, and at the sole cost and expense of, Licensee and to the satisfaction of Licensor. If Licensee shall fail to make such changes, or alterations and restoration of the premises as above provided, Licensor may do such work and the cost thereof, upon bills being rendered, shall be promptly paid by Licensee.

SEVENTH: Licensee further covenants and agrees that upon the cessation of use or abandonment of said facilities or appurtenances, it will remove the same and restore the premises affected to their present good condition within thirty (30) days after receipt of written notice from Licensor so to do. If Licensee fails to remove the facilities or appurtenances as herein provided, Licensor may do such work and the cost thereof, upon bills being rendered, shall be promptly paid by Licensee.

EIGHTH: For and in consideration of the license and permission herein and hereby accorded to Licensee to locate and maintain said facilities within the limits of said right of way and property, Licensee hereby covenants and agrees to pay or cause to be paid to Licensor, the sum of One Hundred and Thirty-Five Dollars ($135.00) to be due as of the 1st day of January, A.D. 1972, and on the same day of each and every year thereafter until cancellation hereof, an annual charge in the sum of Forty Dollars ($40.00), said annual charge to be subject to adjustment in accord with the provisions of Article THIRTEENTH hereof.

NINTH: In addition to the aforesaid annual payment, Licensee shall pay all taxes assessed upon said facilities, or on account of the existence of said facilities and shall indemnify Licensor from the payment of such taxes.

TENTH: In the event Licensee shall fail to make the payments provided for in Article Eighth, or shall fail to perform any of the other terms or conditions of this agreement, and shall fail to remedy such breach in accordance with the requirements of written notice from Licensor so to do, then and in that event Licensor may at its option forthwith terminate the license and permission herein and hereby accorded. Licensee agrees,

upon any such termination, promptly to remove said facilities and restore the premises affected to their present good condition, all at its own sole cost and expense. If Licensee shall fail to remove said facilities as herein provided, Licensor may remove the same at the sole cost and expense of Licensee, which cost and expense Licensee agrees to pay to Licensor promptly upon the rendering of bills therefor.

ELEVENTH: (a) It is understood between the parties hereto that the operations of Licensor at or near said crossing involve some risk, and Licensee as part of the consideration for the aforesaid privilege, hereby releases and waives any right to ask for or demand damages for or on account of any loss of or damage to the said facilities and appurtenances of Licensee that are in, upon, over, or under the property and facilities of Licensor, including the loss of, or interference with service thereof, and whether attributable to the fault, failure, or negligence of Licensor, or otherwise.

(b) And Licensee also agrees to indemnify, protect and save harmless Licensor and its successors and assigns, from and against all costs or expenses resulting from any and all loss of life, or property, or injury or damage to the person or property of any person, firm, or corporation other than Licensee (but including the officers, agents and employes of either party hereto,) and from and against any and all claims, demands, liabilities or actions for such loss, injury or damage, caused by or growing out of the presence or use, or the construction, maintenance, renewal, change or relocation and subsequent removal of said facilities and appurtenances of Licensee, when not attributable solely to the fault, failure or negligence of Licensor, except that if such loss, injury or damage shall be caused by the joint or concurring negligence of both parties hereto, the same shall be borne by them equally. It is understood and agreed that the failure of Licensor to exercise its right under Article Second to furnish watchmen, flagmen, inspectors or supervisors, or the fault, failure or negligence of any such watchmen, flagmen, inspectors or supervisors as are furnished by Licensor, shall not be deemed to be the fault, failure or negligence of Licensor.

(c) The provisions of this article shall inure to the benefit of the Philadelphia, Reading and Pottsville Telegraph Company, a subsidiary of Licensor, which has been granted certain rights by Licensor to place, maintain and use its facilities upon and along the right of way and property of Licensor, and in the event Licensor is in possession of the tracks, right of way and property, crossed by the facilities hereinbefore described, pursuant to any operating or lease agreement, then this Article shall also inure to the benefit of the company whose property is so operated or leased by Licensor.

TWELFTH: This agreement shall take effect at the expiration of thirty (30) days from the date when a copy thereof shall be filed in the Office of the Secretary of the Pennsylvania Public Utility Commission, Harrisburg, Pennsylvania; provided that if the said Commission shall, prior to the expiration of such period, institute a proceeding affecting its validity under the provisions of Section 911, Article IX of the Public Utility Law, this agreement shall become effective only upon the approval thereof by the said Commission.

THIRTEENTH: It is further agreed that the Licensee shall pay to the Licensor each year an amount in dollars equivalent to the purchasing power of $40.00 on January 1, 1972 and that the rental sum of $40.00 will be adjusted every fifth year commencing January 1, 1977, and every fifth year thereafter, for changes in the purchasing power as measured by changes in the "Consumer's Price Index--U.S.--All Items" compiled by the U.S. Department of Labor, Bureau of Labor Statistics, Washington, D. C., or its successor index. Adjustment will be made by the dividing of the sum of $40.00 by the index figure for January 1, 1972, and multiplying the result by the corresponding index figure for January 1st of the year in which adjustment is made. Provided, however, in no event shall the annual amount payable to Licensor be less than the annual charge as of the effective date of this Agreement.

FOURTEENTH: It is understood and agreed that the facilities herein described will be permitted to remain in place after the dissolution or other termination of the Authority herein named only upon the transfer to and the acceptance by the Board of Supervisors of East Whiteland Township of this agreement prior to such dissolution or other termination of said Authority.

Attention: Chairman

Gentlemen:

Attached, for your records, is a fully executed copy of an agreement between your Authority and our Company dated July 11, 1975, covering one (1) 8-inch cast iron sanitary sewage main at Valuation Station 2284+49±, located at a point west of the Station of Knickerbocker, Pennsylvania.

Copy of Pennsylvania Public Utility Commission Certificate of Filing P.U.M.C. 8297 attached.

Very truly yours,

J. T. Sullivan, P. E.
Chief Engineer

Encl.

PENNSYLVANIA PUBLIC UTILITY COMMISSION

CERTIFICATE OF FILING
P.U.M.C. 8297

Agreement dated July 11, 1975 between Penn Central Transportation Company, Debtor, and East Whiteland Municipal Authority whereby the former grants to the latter permission to construct and maintain one 8-inch sewer pipeline under and across the tracks, right-of-way and property of said company at Railroad Bridge No. 2.73, including the placement of 2 manholes, in East Whiteland Township, Chester County.

BY THE COMMISSION:

NOW, October 29, 1975, the Public Utility Commission certifies that the above contract or indenture dated July 11, 1975, has been on file with the Commission since September 29, 1975, and that no proceedings have been instituted by the Commission in connection with it under Section 911 of the Public Utility Law.

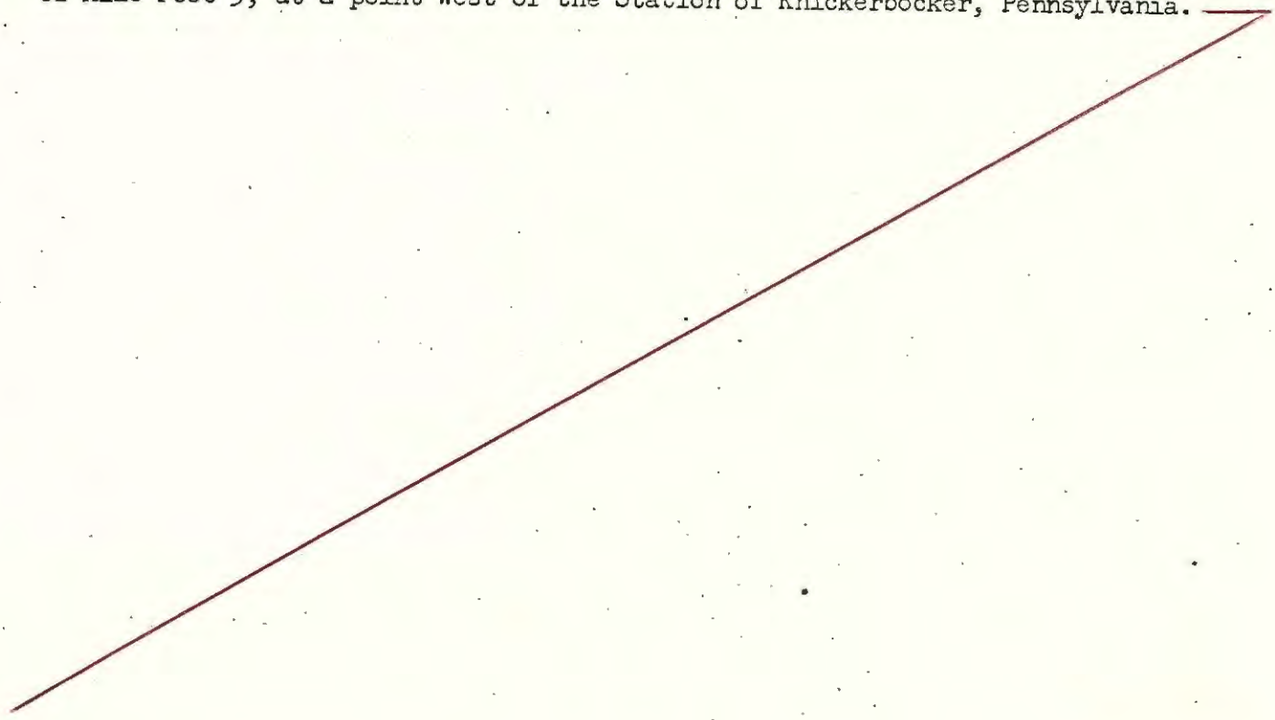
LICENSE AGREEMENT FOR WIRE, PIPE AND CABLE TRANSVERSE CROSSINGS AND LONGITUDINAL OCCUPATIONS



THIS AGREEMENT, made this 11th day of July , 19 75 ,

between Robert W. Blanchette, Richard C. Bond and John H. McArthur, Trustees of the Property of PENN CENTRAL TRANSPORTATION COMPANY, DEBTOR, in Reorganization under Section 77 of the Bankruptcy Act,

parties of the first part (hereinafter called "Railroad") and EAST WHITELAND MUNICIPAL AUTHORITY, a Political Sub-Division of the Commonwealth of Pennsylvania

, as party of the second part (hereinafter called "Licensee").

WITNESSETH, that the said Railroad (which when used herein shall include any lessor, successor or assignee of or operator over its railroad) insofar as it has the legal right and its present title permits, and in consideration of the covenants and conditions hereinafter stated on the part of the Licensee to be kept and performed, hereby permits, as a temporary license, the Licensee to construct, maintain, repair, alter, renew, relocate and ultimately remove one (1) 8-inch cast iron sanitary sewage main, encased in concrete under Railroad Bridge No. 2.73 and also two (2) manholes at Valuation Station 2284+49±, located 1399 feet west of Mile Post 3, at a point west of the Station of Knickerbocker, Pennsylvania.

in accordance with construction plans PC-2
submitted by Licensee to and approved by the Chief Engineer of Railroad, incorporated herein by reference; also in accordance with current issues of Railroad Specifications Nos. CE 4 and/or CE 8; and shown on Plan No.File: E-104-2 , dated November 17, 1972 , marked Exhibit "A", attached hereto and made a part of this Agreement, all and any part thereof being hereafter referred to as the "FACILITIES"; said license, however, shall be under and subject to the following terms, covenants, and conditions as hereinafter recited, which are hereby accepted and agreed to, by the Licensee, to wit:

1. The Licensee shall pay to the Railroad upon the execution hereof, the sum of One Hundred Twenty Dollars ($ 120.00) as reimbursement for the costs and expenses incident to the preparation of this Agreement, together with the further sum of Eleven Hundred Dollars ($ 1100.00) as reimbursement for the rights granted in this Agreement.

2. (a) The FACILITIES shall be located, constructed and maintained in exact accordance with said construction plans and for the purpose as outlined on Page 1. No departure shall be made at any time therefrom except upon permission in writing granted by the Chief Engineer of Railroad, or his designee, provided, however, that if any commission or other regulatory body duly constituted and appointed in compliance with the laws of the State in which the crossing or occupancy herein provided is situate, and having jurisdiction in the premises, has by ruling or other general order determined and fixed the manner and means of construction, maintenance, repair, alteration, renewal, relocation or removal thereof, then said ruling or general order shall prevail for the crossing or occupancy herein mentioned.

(b) The work of constructing, maintaining, repairing, altering, renewing, relocating or removing the said FACILITIES shall be done under such general conditions as will be satisfactory to and approved by the Chief Engineer of Railroad, or his designee, and as will not interfere with the proper and safe use, operation and enjoyment of the property of the Railroad. Licensee, at its own cost and expense, shall, when performing any work in connection with the FACILITIES, furnish any necessary watchmen to see that men, equipment and materials are kept a safe distance away from the tracks of the Railroad.

(c) In addition to, but not in limitation of any of the foregoing provisions, if at any time the Railroad should deem flagmen or watchmen desirable or necessary to protect its operations or property, or its employees, patrons or Licensees during the work of construction, maintenance, repair, alteration, renewal, relocation or removal of said FACILITIES of Licensee, the Railroad shall have the right to place such flagmen or watchmen at the sole risk, cost and expense of Licensee, which covenants and agrees to bear the full cost and expense therof and to promptly reimburse the Railroad upon demand. The furnishing or failure to furnish flagmen or watchmen by the Railroad, however, shall not release the Licensee from any and all other liabilities assumed by the Licensee under the terms of this Agreement.

3. If the Licensee desires or is required, as herein provided, to revise, renew, add to or alter in any manner whatsoever the aforementioned FACILITIES, it shall submit plans to Railroad and obtain the written approval of the Chief Engineer of Railroad thereto before any work or alteration of the structure is performed and the terms and conditions of this Agreement with respect to the original construction shall apply thereto. In that event, Railroad reserves the right to assess additional charges.

4. (a) The Licensee shall at all times be obligated to promptly maintain, repair and renew said FACILITIES; and shall, upon notice in writing from Railroad and requiring it so to do, promptly make such repairs and renewals thereto as may be required by Railroad; or the Railroad, for the purpose of protecting and safeguarding its property, traffic, patrons or employees from damage or injury, may with or without notice to the Licensee at any time make such repairs and renewals thereto and furnish such material therefor as it deems adequate and necessary, all at the sole cost and expense of Licensee.

(b) In the event of an emergency, Licensee will take immediate steps to perform any necessary repairs, and in the event Licensee fails so to do, Railroad will perform said necessary repairs at the sole cost and expense of Licensee.

5. (a) The supervision over the location of the construction work and inspection of the FACILITIES and the approval of the material used in construction, maintenance, repair, alteration, renewal, relocation and removal of the aforesaid FACILITIES covered by this Agreement shall be within the jurisdictional rights of the Railroad.

(b) The right of supervision over the location of the construction work and inspection of the FACILITIES from time to time thereafter by the Railroad, shall extend for an appropriate distance on each side of the property of the Railroad as the method of construction and materials used may have an important bearing upon the strength and stability of the FACILITIES over, under, upon, or in the property of the Railroad.

6. Licensee shall comply with all Federal, State and local laws, and assume all cost and expense and responsibility in connection therewith, without any liability whatsoever on the part of the Railroad.

7. (a) It is understood between the parties hereto that the operations of the Railroad at or near said FACILITIES involve some risk, and the Licensee as part of the consideration for this license hereby releases and waives any right to ask for or demand damages for or account of loss of or injury to the FACILITIES (and contents thereof) of the Licensee that are over, under, upon, or in the property and facilities of the Railroad including the loss of or interference with service or use thereof and whether attributable to the fault, failure or negligence of the Railroad or otherwise.

(b) And the Licensee also covenants and agrees to and shall at all times indemnify, protect and save harmless the Railroad from and against all cost or expense resulting from any and all losses, damages, detriments, suits, claims, demands, costs and charges which the said Railroad may directly or indirectly suffer, sustain or be subjected to by reason or on account of the construction, placement, attachment, presence, use, maintenance, repair, alteration, renewal, relocation or removal of said FACILITIES in, on, about or from the premises of Railroad whether such losses and damages be suffered or sustained by the Railroad directly or by its employees, patrons, or licensees, or be suffered or sustained by other persons or corporations, including the Licensee, its employees and agents who may seek to hold the Railroad liable therefor, and whether attributable to the fault, failure or negligence of the Railroad or otherwise, except when proved by Licensee to be due directly to the sole negligence of the Railroad.

(c) If a claim or action is made or brought against either party and for which the other party may be responsible hereunder in whole or in part, such other party shall be notified and permitted to participate in the handling or defense of such matter.

8. All cost and expenses in connection with the construction, maintenance, repair, alteration, renewal, relocation and removal of said FACILITIES shall be borne by the Licensee, and in the event of work being performed or material furnished by Railroad under the stipulated right to perform such work of construction, maintenance, repair, alteration, renewal, relocation or removal under any section hereof, Licensee agrees to pay to the Railroad the actual cost of material plus the current applicable overhead percentages for storage, handling, transportation, purchasing and other related material management expenses and the actual cost of labor plus the current applicable overhead percentages as developed and published by the accounting department of Railroad for fringe benefits, payroll taxes, administration, supervision, use of tools, machinery and other equipment, supplies, employers liability insurance, public liability insurance, and other insurance, taxes and all other indirect expenses. It is to be understood that the aforementioned material and labor overhead charges are to be applied at the rates which are effective at the time of the performance of any work by employees of the Railroad on the said FACILITIES. Licensee agrees to pay such bills within thirty (30) days of the presentation thereof by Railroad.

9. The Licensee shall, at its sole cost and expense, upon request in writing of the Railroad, promptly change the location of said FACILITIES covered by this Agreement, where located over, upon or in the property and facilities of the Railroad, to another location, to permit and accommodate changes of grade or alignment and improvement in or additions to the facilities of the Railroad upon land now or hereafter owned or used by the Railroad to the intent that said construction shall at all times comply with the terms and conditions of this Agreement with respect to the

original construction; or in the event of the lease, sale or disposal of the premises or any part thereof encumbered by this license, then the said Licensee shall make such adjustments or relocations in its facilities as are over, upon or in the property and facilities of the Railroad as may be required by the said Railroad or its grantee; and if the Licensee shall fail or refuse to comply therewith, then the duly authorized agents of the Railroad may make such repairs or adjustments or changes in location and provide necessary material therefor.

10. Upon termination of this Agreement or upon the removal or abandonment of the FACILITIES covered hereby, all the rights, title and interest of the Licensee hereunder shall cease and determine, and this instrument shall thereupon become and be null and void, without any liability on the part of either party to the other party except only as to any liability accrued prior thereto, and the Licensee shall remove its said FACILITIES and appurtenances from Railroad property and right-of-way, and all property of the Railroad shall be restored in good condition and to the satisfaction of the Railroad. If the Licensee fails or refuses to remove its FACILITIES and appurtenances under the foregoing conditions, the Railroad shall be privileged to do so at the cost and expense of the Licensee, and the Railroad shall not be liable in any manner to the Licensee for said removal.

11. In the event the FACILITIES consist of an underground occupation, Licensee will be responsible for any settlement caused to the roadbed, right of way and/or tracks, facilities, and appurtenances of the Railroad arising from or as a result of the installation of the said FACILITIES for a period of one (1) year subsequent to the date of completion of the installation, and Licensee agrees to pay to Railroad on demand the full cost and expense therefor.

12. In the event the said FACILITIES consist of electrical power or communication wires and/or appurtenances, the Licensee shall at all times be obligated promptly to remedy any inductive interference growing out of or resulting from the presence of its FACILITIES; and if the Licensee should fail so to do, then Railroad may do so, and the Licensee agrees to pay to Railroad on demand the full cost and expense therefor.

13. As part of the consideration of the within Agreement, Licensee covenants and agrees that no assessments, taxes or charges of any kind shall be made against Railroad or its property by reason of the construction of said FACILITIES of Licensee, and Licensee further covenants and agrees to pay to Railroad promptly upon bills rendered therefor the full amount of any assessments, taxes or charges of any kind which may be levied, charged, assessed or imposed against the Railroad or its property by reason of the construction and maintenance of said FACILITIES of Licensee.

14. The rights conferred hereby shall be the privilege of the Licensee only, and no assignment or transfer hereof shall be made, or other use be permitted than for the purpose stated on page one without the consent and agreement in writing of the Railroad being first had and obtained.

15. This Agreement shall be terminable upon mutual consent of the parties hereto, provided that this Agreement may be terminated by the Railroad upon the violation of any of the terms, covenants and conditions of this Agreement on the part of the Licensee.

16. This Agreement shall take effect as of the First day of July A.D. 19 75.

17. Anything herein contained to the contrary notwithstanding, there shall be no obligation on the part of the Railroad to continue operation of the line of railroad in the vicinity of the FACILITIES to prevent the termination of the Licensee's occupation rights at any crossing or occupation covered hereunder on account of an abandonment of line or service by the Railroad; nor shall there be any obligation upon the Railroad to perfect its title in order to continue in existence the said occupation rights after such abandonment of line or service; nor shall the Railroad be responsible for preserving the Licensee's occupation rights at any crossing or occupation covered hereunder after any transfer, conveyance or abandonment of the rail properties in the vicinity of the FACILITIES pursuant to any provision of the Regional Rail Reorganization Act of 1973.

18. This Agreement is authorized to be entered into by Resolution, or Ordinance No. Adopted May 21, 19 75, By The Authority, a Certified copy of which is attached hereto. / to be

19. This Agreement shall take effect at the expiration of thirty (30) days from the date when a copy thereof shall be filed in the Office of the Secretary of the Pennsylvania Public Utility Commission, Harrisburg, Pa., provided that, if the said Commission shall, prior to the expiration of such period, institute a proceeding affecting its validity under the provisions of Section 911 of the Public Utility Law this Agreement shall only become effective upon its approval by the said Commission.

It is agreed and understood that the provisions of Paragraph 16 are not applicable.

The terms of this Agreement shall be binding and effective upon all the parties hereto, and unless and until terminated, as hereinbefore provided, this Agreement shall inure to the benefit of and be binding upon the parties hereto, their successors and assigns, subject, however, to the provisions of Article 14 of this Agreement.

IN WITNESS WHEREOF, the said parties hereto have caused this Agreement to be duly executed and delivered as of the day and year first above written.

EAST WHITELAND MUNICIPAL AUTHORITY

BY John J. Finn

Its Vice Chairman

EAST WHITELAND MUNICIPAL AUTHORITY

RESOLUTION AUTHORIZING ENTRY INTO AGREEMENT

WITH PENN CENTRAL TRANSPORTATION COMPANY

WHEREAS, the Authority has received a proposed Agreement between the Penn Central Transportation Company and the Authority permitting the Authority to place an eight-inch sewage pipe under the railroad tracks near the station of Knickerbocker, Pennsylvania, and

WHEREAS, the Township engineers have reviewed the proposed contract and indicated that it is necessary to enter into such an Agreement in order to complete the on-going sewer project, and

WHEREAS, the Solicitor has approved the Agreement in form.

NOW, THEREFORE, BE IT RESOLVED that the Authority enter into a contract with the Penn Central Transportation Company permitting the installation of an eight-inch sewage pipe under the Pennsylvania Railroad tracks and to pay, pursuant to the Agreement, $1,220.00, copy of said agreement having been submitted at the time of the adoption of this Resolution, and

IT IS FURTHER RESOLVED that the proper officers of The East Whiteland Municipal Authority are authorized and empowered to take such action and execute such documents in order to carry out the intention of this Resolution.

ADOPTED by the Board of the East Whiteland Municipal Authority this 21st day of May, 1975.

(SEAL)

Vice Chairman

LICENSE AGREEMENT, DATED NOVEMBER 18, 1993, BY AND BETWEEN NATIONAL RAILROAD PASSENGER CORPORATION AND EAST WHITELAND TOWNSHIP MUNICIPAL AUTHORITY

Southridge 37-05-558

NATIONAL RAILROAD PASSENGER CORPORATION
LICENSE AGREEMENT

THIS AGREEMENT, made this 18th day of November 1993 between NATIONAL RAILROAD PASSENGER CORPORATION, a corporation of the District of Columbia, with offices at 60 Massachusetts Avenue, N.E., Washington, D.C. 20002, party of the first part (hereinafter called "Railroad") and East Whiteland Township Municipal Authority a public authority with principal offices at 209 Conestoga Road, Frazer, PA. as party of the second part (hereinafter called "Licensee").

WITNESSETH, that the said Railroad (which when used herein shall include any lessor, successor or assignee of or operator over its railroad) insofar as it has the legal right and its present title permits, and in consideration of the covenants and conditions hereinafter stated on the part of the Licensee to be kept and performed, hereby permits, as a temporary exclusive License, the Licensee and Licensee only to construct, maintain, repair, alter, renew, relocate and ultimately remove:

A. Description of Facility: Installation of a 8" diameter ductile iron sewer pipe within 24" steel casing pipe for a distance of approximately 250 feet under Railroad's right-of-way.

B. Purpose: To convey sanitary sewage from Southridge Subdivision to East Whiteland Township system.

C. Location:

(1) Milepost: 23.6

(2) Nearest Station: Malvern

(3) Town: East Whiteland Township

(4) County: Chester

(5) State: Pennsylvania

all as delineated and in strict accordance with Drawing No. S-14 dated April 30, 1990 revised May 6, 1993 submitted by Licensee to and approved as to concept by the Chief Engineer of the Railroad, marked "Exhibit A", attached hereto and made a part hereof, also in strict compliance with current issues of Railroad Specifications No. USA, ENG 1604 and Requirements and Specifications for Wire, Conduit and Cable occupations all as applicable to the herein described work and incorporated herein by reference, all and any part thereof being hereafter referred to as the "FACILITIES"; said License, however, shall be under and subject to the following

terms, covenants, and conditions as hereinafter recited, which are hereby accepted and agreed to, by the Licensee, to wit: (0.1)

1. This License shall commence on the November 1, 1993 and terminate on the 31st day of October 2018, or before as hereinafter provided according to the terms, conditions and covenants herein contained. (1)

2. The Licensee shall pay to the Railroad upon the execution hereof, the sum of Five Hundred ($500.00) as reimbursement for the costs and expenses incident to the preparation of this License, together with the further sum of Thirteen Thousand One Hundred Twenty Dollars ($13,120.00) as lump sum compensation, for the rights granted in this License for the Twenty-Five (25) year term, which sum shall be payable in advance, upon execution of this agreement. Notwithstanding the foregoing, payment of any additional charges and sums other than as compensation for Licensee's occupancy as hereinafter set forth shall be mailed to P.O. Box 18266F, Group No. 5, St. Louis, Missouri 63150, or at such other place as Railroad may from time to time designate. (2.1)

3. Licensee shall and will pay all License Fees and any additional payments when due, without any setoff or deduction whatsoever, and any payment or receipt thereof by Railroad or its agent of any amount less than the full amount to which Railroad deems it is entitled shall not operate or be deemed to operate, constitute or be construed, as a settlement or satisfaction of said License Fees or other amounts due, notwithstanding any statement or endorsement on the check or other paper accompanying the payment, but Railroad shall be deemed to have accepted said payment without prejudice and subject to its right to collect the balance actually due, as well as subject to any and all other rights available to Railroad by law and under this License Agreement.

If, (i) default shall be made in Licensee's covenants herein to pay License Fees or additional payments on each due date as described herein; or (ii) if default shall be made in any other covenants and agreements herein contained on the part of Licensee to be kept or performed, and if any such default shall not be cured within thirty (30) days after Licensee has been given written notice by Railroad to do so, or (iii) if Licensee shall file or suffer to be filed against it a petition in bankruptcy, or (iv) if Licensee shall be declared insolvent according to law, or if a receiver or trustee be appointed for the property of Licensee, or (v) if Licensee shall make any general assignment for the benefit of creditors, or any bulk sale however denominated, (vi) if Licensee shall assign, sublet or sub-license its rights, duties or obligations hereunder without first obtaining the prior written consent of Railroad, then, in any of such cases, Railroad may by written notice to Licensee immediately declare this License terminated, and in such event, in addition to any other action or

remedy which Railroad may have at law or in equity to recover damages or otherwise by reason of a breach by Licensee of provisions of this License, Railroad, acting as attorney in fact for Licensee, shall have the right to remove Licensee's FACILITY by summary proceedings, without being liable to any prosecution, action or damages therefor, and have and enjoy the Railroad's property as of its former estate free, clear and discharged of this License and of all rights of Licensee hereunder; and all FACILITIES owned or placed upon the Railroad's property by or for Licensee, shall be filled and abandoned in place or removed by Railroad at the sole cost and expense of Licensee, which cost and expense Licensee shall pay to Railroad upon demand; and Licensee also shall pay to Railroad upon demand all fees and expenses, including reasonable attorney and/or collection agency fees, incurred in connection with the aforesaid actions.

The receipt by or on behalf of Railroad of any License Fee or additional payments with or without knowledge of any breach of any of the terms, covenants or conditions of this License, shall not be deemed a waiver of such breach, nor shall such receipt be deemed a withdrawal of any notice given to Licensee under the terms of this License, nor shall such receipt be deemed a reinstatement or reestablishment of this License or any portion thereof after termination or cancellation, nor shall the termination or other cancellation of this License or any portion thereof waive the obligation of Licensee to pay or discharge any License Fee, additional payments or other obligations accruing under this License.

Licensee hereby waives and relinquishes unto and in favor of Railroad the operation of all laws which do now or hereafter may exempt any FACILITY on Railroad's property from levy and sale upon distress for rent or upon execution of any judgment obtained in an action brought for nonpayment of any License Fees or additional payments hereunder or for breach of any other provisions hereof. The parties hereto shall and do hereby waive trial by jury in any action, proceeding or counterclaim brought by either party against the other on any matter whatsoever arising out of or in any way connected with this License or Licensee's use of the FACILITY and occupancy of Railroad's property or arising out of or in any way connected with any claim of injury or damage arising out of or in connection with this License or such use or occupancy. Licensee hereby expressly waives any and all rights of redemption granted by or under any present or future laws in the event of Licensee's being dispossessed for any cause or in the event of Railroad's obtaining possession or for removal of the FACILITY by reason of the violation by Licensee of any of the covenants and conditions of this Lease or otherwise.

Licensor shall have the right to require rent payments to be made in cash, money order or certified check. A service charge of Ten Dollars ($10.00) will be charged for each instance in which

a check is returned unpaid by the Licensee's bank for any reason.

If Licensee does not pay License Fees or any additional payments hereunder on the day when the same shall become due and payable and such failure to pay License Fees or any additional payments shall continue for a period of ten (10) days, Licensee shall pay to Railroad a service charge at the rate of twelve percent (12%) per annum, or the highest rate allowed by law, which ever is the greater of the amount of such License Fee or any additional payment or all of them for each year or portion of a year that the same shall remain unpaid; provided, however, that such service charge shall in no event, be less than Fifty Dollars ($50.00) for any year or portion of a year that the License Fee and any additional payment shall remain unpaid. Railroad reserves the right to institute legal proceedings and/or collection agency action for the payment of License Fees due and payable, and any legal and collection fees incurred shall be the responsibility of the Licensee; and immediate payment to be made to Railroad by Licensee upon written notice. The provision of this paragraph shall not preclude Railroad from exercising its options as set forth in any other Article of this License.

The actions and remedies provided in this License in event of default shall not be deemed exclusive but shall be in addition to all other actions and remedies at law or in equity in event of any such default; and no action or remedy taken or omitted by Railroad in event of default shall be deemed a waiver of such default and waiver of a particular default shall not be deemed a waiver of any other default or a waiver of the same default again occurring, nor shall any failure on the part of Railroad to compel a fulfillment of any one or more of the covenants, terms and conditions herein contained be held to be a waiver of its right to enforce the same at any time thereafter during the term of this License. (3)

4. The FACILITIES shall be located, constructed and maintained in exact accordance with said construction plans and for the sole purpose as outlined on Page 1 hereof. No departure that would result in a modification, change, amendment or sub-licensing to this License shall be made at any time therefrom except upon permission in writing granted by the Vice President of Real Estate and Operations Development of Railroad, or his designee, provided, however, that if any commission or other regulatory body duly constituted and appointed in compliance with the laws of the State in which the crossing or occupancy herein provided is situate, and having jurisdiction over the property, has by final ruling or order determined and fixed the manner and means of construction, maintenance, repair, alteration, renewal, relocation or removal thereof, then said final ruling or order shall prevail for the crossing or occupancy herein mentioned. The work of constructing, maintaining, repairing, altering, renewing, relocating or removing the said FACILITIES shall be done under such general conditions as

will be satisfactory to and approved by the Chief Engineer of Railroad, or his designee, and as will not interfere with the proper and safe use, operation and enjoyment of the property of the Railroad. Licensee, at its own cost and expense, shall, when performing any work in connection with the FACILITIES, furnish any necessary watchmen to see that men, equipment and materials are kept a safe distance away from the tracks of the Railroad. Any notification required or desired to be given to Railroad's Chief Engineer shall be sent to the address on first page here to the attention of the Chief Engineer. (4)

5. FACILITIES conveying gas (natural or artificial), oil, gasoline or other flammable matter shall not be installed or relocated under bridges or culverts, except in cases especially provided for. No FACILITIES shall be installed or relocated under bridges or culverts where there is likelihood of restricting the area required for the purposes for which the bridges or culverts were built, or endangering foundations of structures. (5)

6. No attachment of wires, cables, pipe lines, and appurtenances shall be made to any bridge (or its supports) of the Railroad unless specifically provided for in this License, and then only in accordance with the Railroad's plans and specifications. No poles, towers, anchors or supports of any kind for the wires, cables, and appurtenances or sub-licensed facilities shall be located on the right-of-way or property of the Railroad unless specifically provided for in this License. A penalty charge will be assessed against Licensee for knowingly permitting such other uses without Railroad's written permission. (6)

7. In addition to, but not in limitation of any of the foregoing provisions, if at any time the Railroad should deem flagmen or watchmen desirable or necessary to protect its operations or property, or its employees, patrons or licensees during the work of construction, maintenance, repair, alteration, renewal, relocation or removal of said FACILITIES of Licensee, the Railroad shall have the right to place such flagmen or watchmen at the sole risk, cost and expense of Licensee, who covenants and agrees to bear the full risk, cost and expense thereof and to reimburse promptly the Railroad upon demand. The furnishing or failure to furnish flagmen or watchmen by the Railroad, however shall not release the Licensee from any and all other liabilities assumed by the Licensee under the terms of this License. (7)

8. The Licensee shall at all times be obligated promptly to maintain, repair and renew said FACILITIES; and shall, upon notice in writing from Railroad requiring it so to do, promptly make such repairs and renewals thereto as may be required by Railroad. For the purpose of protecting and safeguarding its property, traffic, patrons or employees from damage or injury, Railroad may with or without notice to the Licensee at any time make such repairs and renewals thereto and furnish such material therefor as it deems

adequate and necessary, all at the sole cost and expense of Licensee. (8)

9. In the event of an emergency, Licensee will take immediate steps to perform any necessary repairs, and in the event Licensee fails so to do, Railroad will perform said necessary repairs at the sole cost and expense of Licensee. (9)

10. That in consideration of the exclusive rights granted hereunder to Licensee by Railroad, Licensee hereby agrees that as to any structure placed upon Railroad's property or any structure presently existing which structure is subject to renovation, repairs and subsequent use by Licensee, such structure shall be continuously maintained by Licensee from and after the effective date of this License. All costs of maintenance, repair and upkeep shall be borne by Licensee. Licensee shall be liable for and does indemnify and agree to hold Railroad harmless from any and all risks of liability for injuries to or death of persons or damage to or destruction of property resulting from said use, maintenance, repair and/or upkeep or lack thereof of said structure without regard to negligence. (10)

11. If the Licensee desires or is required, as herein provided, to revise, renew, add to or alter in any manner whatsoever the aforementioned FACILITIES, it shall submit plans and specifications to Railroad and obtain the written approval thereof by the Chief Engineer of Railroad before any work or alteration of the structure is performed and the terms and conditions of this License with respect to the original construction shall apply thereto. Railroad reserves the right to make adjustments in the annual compensation or assess additional charges. A penalty charge will be assessed against Licensee for unauthorized uses under this License Agreement. (11)

12. The Railroad shall have the right to verify by inspection that the location of the work and the materials used in construction, maintenance, repair, alteration, renewal and removal of the aforesaid FACILITIES covered by this License are in compliance with the plans and specifications. The right to verify the location of the construction work and inspect the FACILITIES from time to time thereafter by the Railroad, shall extend for an appropriate distance on each side of the property of the Railroad as the method of construction and materials used may have an important bearing upon the strength and stability of the FACILITIES over, under, upon, or in the property of the Railroad. (12)

13. Licensee shall comply with all Federal, State, and municipal laws, orders, rules, regulations now or hereafter enacted and assume all cost and expense and responsibility in connection therewith, without any liability whatsoever on the part of the Railroad. (13)

14. It is understood between the parties hereto that the operations of the Railroad at or near said FACILITIES involve some risk, and the Licensee as part of the consideration for this License hereby releases and waives any right to ask for or demand damages for or on account of loss of or injury to the FACILITIES (and contents thereof) of the Licensee and/or employees, agents, servants, contractors and invitees of the Licensee that are over, under, upon or in the property and facilities (of the Railroad) including the loss of or interference with service or use thereof and without respect to the fault, failure or negligence of the Railroad, its employees, agents, servants, contractors, invitees or otherwise. (14)

15. Licensee covenants and agrees to and shall at all times indemnify, protect, defend and save harmless Railroad from and against any and all losses, damages, liabilities, suits, claims, demands, judgments, costs, interest and expenses (collectively "losses and damages") which Railroad may directly or indirectly suffer, sustain or be subjected to by reason of, on account of, or arising out of a) the construction, placement, attachment, presence, use, misuse, maintenance, repair, alteration, renewal, relocation, failure, or removal of the FACILITIES, or b) the violation of, or compliance or noncompliance with, any Environmental Law relating in any way to the FACILITIES, including any disposal, discharge, or release of any wastes, pollutants, or hazardous substances from or in connection with the FACILITIES; whether such losses and damages be suffered or sustained by Railroad directly or by its employees, agents, servants, contractors, officers, or licensees, or by any other person or entity, including Licensee, who may seek to hold Railroad liable therefor, and whether attributable to the fault, failure, or negligence of Railroad, its employees, agents, servants, contractors, officers, licensees, or any other person acting for or on Railroad's behalf.

It is further agreed that in the event Railroad shall, at its option, make any expenditures or incur any obligations for the payment of money in connection with this Article including, but not limited to, attorneys' fees in instituting, prosecuting or defending any action or proceeding, such sums paid, obligations incurred and costs, all with interest at the rate of twelve percent (12%) per annum or the highest rate allowable by law, whichever is the lesser, shall be deemed to be additional compensation due hereunder and shall be paid by Licensee to Railroad within five (5) days of the rendering of a bill or statement to Licensee therefor.

For the purpose of this Article, "Environmental Law" shall mean all laws, statutes, codes, acts, ordinances, orders, judgments, decrees, injunctions, rules, regulations, permits, licenses, authorizations, directions and requirements of all governments, departments, commissions, boards, bureaus, courts, authorities, agencies, officials and officers, relating in any

manner or way to the control and/or abatement of environmental pollution and environmental hazards, which now or at any time hereafter may be applicable, or claimed to be applicable, whether or not the claim is or is determined to be well founded.

The provisions of this Article shall survive the expiration or other termination of this License. (15)

16. If a claim or action is made or brought against either party, such party shall notify and permit the other party to participate in the handling or defense of such matter, if such other party may be responsible hereunder, in whole or in part. (16)

17. Prior to any entry for any purpose provided for in this License, Licensee shall provide to Railroad the name or names of the agents or employees to be present physically at the FACILITIES and responsible for any work in process or liability therefor. Said notice shall be in writing, to the Chief Engineer of Railroad, delivered at least twenty-one (21) days prior to entry. (17)

18. All costs and expenses in connection with the construction, maintenance, repair, alteration, renewal, relocation, and removal of said FACILITIES shall be borne by the Licensee, and in the event of work being performed or materials furnished by Railroad under the stipulated right to perform such work of construction, maintenance, repair, alteration, renewal, relocation, or removal under any section hereof, Licensee agrees to pay to the Railroad the actual cost of materials plus the current applicable overhead percentages for storage, handling, transportation, purchasing and other related material, management expenses and the actual cost of labor plus the current applicable overhead percentages as developed and published by the accounting department of Railroad for fringe benefits, payroll taxes, administration, supervision, use of tools, machinery and other equipment, supplies, employers' liability insurance, public liability insurance, and other insurance, taxes and all other direct expenses. It is to be understood that the aforementioned material and labor overhead charges are to be applied at the rates which are effective at the time of the performance of any work by employees of the Railroad on the said FACILITIES. Licensee agrees to pay such bills within thirty (30) days of the rendition thereof by Railroad. (18)

19. The Licensee shall, at its sole cost and expense, upon request in writing from the Railroad, promptly change the location of said FACILITIES covered by this License, where located over, upon or in the property and facilities of the Railroad, to another location, to permit and accommodate changes of grade or alignment and improvement in or additions to the facilities of the Railroad upon land now or hereafter owned or used by the Railroad with the intent that said construction shall at all times comply with the terms and conditions of this License with respect to the original

construction; or in the event of the lease, sale or disposal of the property or any part thereof encumbered by this License, then the said Licensee shall make such adjustments or relocations in its FACILITIES as are over, upon or in the property and facilities of the Railroad as may be required by the said Railroad or its grantee; and if the Licensee shall fail or refuse to comply therewith, then the duly authorized agents of the Railroad may make such repairs or adjustments or changes in location and provide necessary materials therefor, at the sole cost and expense of the Licensee. (19)

20. In the event that FACILITIES consist of an underground occupation, Licensee will be responsible for any settlement caused to the roadbed, right-of-way and/or tracks, facilities, and appurtenances of the Railroad arising from or as a result of the installation of the said FACILITIES and Railroad shall have the right to repair, replace, restore or correct any such damage caused by said occupation at the sole cost and expense of the Licensee. The provisions of this clause shall survive the expiration or other termination of this License. (20)

21. In the event the said FACILITIES consist of electrical power or communication wires and/or appurtenances, the Licensee shall at all times be obligated promptly to remedy any inductive interferences growing out of or resulting from the presence of its FACILITIES; and if the Licensee should fail so to do, then Railroad has the right to do so, and the Licensee agrees to pay to Railroad on demand the full cost and expense therefor. (21)

22. As part of the consideration for granting this License, Licensee covenants and agrees that no assessments, taxes or charges of any kind, general, special or otherwise shall be made against Railroad or its property by reason of the construction and use of said FACILITIES by Licensee, and Licensee further covenants and agrees to pay to Railroad promptly upon bills rendered therefor the full amount of any assessments, taxes and/or charges of any kind or nature which may be levied, charged, assessed or imposed against the Railroad or its property by reason of the construction, existence, use, and maintenance of said FACILITIES of Licensee. (22)

23. Licensee hereby designates the Chairman, East Whiteland Township its agent(s) for the service of any notice desired or required by this License, and/or of process in any action growing out of, connected with, or based upon this License, or the activities undertaken hereunder, and agrees that service upon one of the above named person(s) shall constitute due and proper service of any such notice or any such process. Any notification or service required or desired to be given to the Railroad under this Article shall be sent, postage prepaid, by certified or

registered mail to the address on page first hereof to the attention of the Vice President of Real Estate and Operations Development. (23)

24. The rights conferred hereby shall be the sole privilege of the Licensee only, and no assignment, sub-licensing or transfer hereof shall be made, or other use be permitted than for the specific purpose stated on page first hereof without the consent and agreement in writing of the Railroad being first had and obtained. (24)

25. This License with the rights granted may be terminated at any time by either party upon giving not less than thirty (30) days' prior written notice to the other; and upon the expiration of the said thirty (30) days from date of mailing by certified or registered U.S. Mail, this License and the permission and privilege hereby granted shall absolutely cease and terminate. This License is subject to termination by Licensor upon giving thirty (30) days notice to Licensee for unauthorized uses or sub-licensing Licensees sole right to occupy Railroad's right-of-way. (25)

Railroad shall not terminate this agreement unless required to do so for its corporate purposes, in which instance it shall use reasonable efforts to provide a mutually acceptable alternative location for Licensee's facilities. (25.1)

26. Upon termination of this License or upon the removal or abandonment of the FACILITIES covered hereby, all the rights, title and interest of the Licensee hereunder shall cease, and this instrument shall thereupon become and be null and void, without any liability on the part of either party to the other party except where expressly provided to the contrary and any liability accrued prior thereto, and the Licensee shall, with the prior written approval of the Railroad, remove or cause to be removed its said FACILITIES and appurtenances from Railroad property and right-of-way, and all property of the Railroad shall be restored in good condition and to the satisfaction of the Railroad. If the Licensee fails or refuses to remove its FACILITIES and appurtenances under the foregoing conditions, the Railroad shall have the right to do so at the sole cost and expense of the Licensee, and the Railroad shall not be liable in any manner to the Licensee for said removal. The provisions for this paragraph shall survive the expiration or other termination of this License. (26)

27. Before this License shall be effective, the Licensee shall at its sole cost and expense procure, provide, and deliver to the Railroad and thereafter maintain in effect during the term of this License, general liability insurance covering all liabilities assumed by the Licensee under Article "15" of this License, without exception or restriction of any kind. Products-completed operations, independent contractors and contractual liability coverages are to be included, with all Railroad exclusions deleted.

Railroad is to be named as an additional insured and said insurance shall be in limits of not less than Two Million ($2,000,000) combined single limit, bodily injury, death and/or property damage whether of the Licensee, the Railroad, or others, and shall contain a waiver of subrogation against Railroad, and said insurance shall be with such companies and in such form as shall be acceptable to the Railroad. Said insurance shall be endorsed to provide that the Railroad will be notified in writing by the insurance carrier at least thirty (30) days in advance of any cancellation or changes which modify the coverage provided thereunder. The providing of such insurance shall not be deemed a limitation on the liability of Licensee as provided in this License, but shall be additional security therefor. In the event the term of this License exceeds ten (10) years, The Railroad reserves the right to modify the conditions/limits of said insurance listed in this Article. (27)

Licensee may be permitted to self insure its obligation under this Article, in lieu of procuring and maintaining the above mentioned insurance policies, provided the Licensee notifies the Railroad of their intention to do so and receives written approval from the Railroad. (27.1)

28. The covenants, conditions and agreements contained in this License shall bind and inure to the benefit of Licensee and Railroad and their respective heirs, distributors, executors, administrators, successors, and, except as otherwise provided in this License, their assigns. (28)

29. The obligations of the Railroad hereunder shall be subject to Force Majeure which shall include, but not be limited to labor disputes. (29)

30. No change or modification of any of the covenants, terms or provisions hereof shall be valid unless in writing and signed by the parties hereto.

There are no understandings or agreements of any kind between the parties hereto, verbal or otherwise, other than as set forth in this License.

All additions, changes or deletions herein were made prior to execution by either party, except that additions, changes or deletions made after execution by one party and before execution by the other shall be marginally initialed by both parties. (30)

31. This License shall be construed according to the laws of the District of Columbia. (31)

32. The provisions of this License are severable and it is the intention of the parties hereto that if this License cannot take effect in its entirety because of the final judgment of any court of competent jurisdiction holding invalid any part or parts

thereof, the remaining provisions of the License shall be given full force and effect as completely as if the part of parts held invalid had not been included therein. (32)

33. It is understood and agreed between the parties hereto that execution of this agreement by Licensee, and negotiation of any check or other negotiable instrument by Railroad, prior to the date of execution of this agreement by Railroad, shall in no way be deemed or construed by Licensee to be acceptance of this agreement by Railroad. In the event that this agreement is not executed by Railroad for any reason whatsoever, then and in that event the amount set forth in any such check or other negotiable instrument shall be refunded to Licensee within a reasonable period of time after written notification that this agreement will not be executed by Railroad; provided, however, that the payment by Licensee of a preparation fee, if any, to Railroad shall be nonrefundable and made as full payment for the Railroad's preparation of this document without regard to whether or not same is ever executed. (33)

34. In connection with the construction of the FACILITIES, the Licensee, its contractors and subcontractors shall carry insurance as follows:

The contractor shall procure and maintain, at its own cost and expense, during the entire period of performance of the Project, the types of insurance specified below. The contractor shall submit a certificate of insurance giving evidence of the required coverages, prior to commencing work. All insurance shall be procured from insurers authorized to do business in the jurisdiction where operations are to be performed. The contractor shall require all subcontractors to carry the insurance required herein, and contractor may, at his option, provide the coverage for any or all subcontractors, and if so, the evidence of insurance submitted shall so stipulate. In no event shall work be performed until the required certificate(s) of insurance have been furnished. If the insurance provided is not in compliance with the requirements listed below, Railroad maintains the right to stop work until proper evidence is provided. The insurance shall provide the 30 days prior written notice to be given to Railroad in the event coverage is substantially changed, cancelled or non-renewed.

A. WORKERS' COMPENSATION INSURANCE: A policy complying with the requirements of the statutes of the jurisdiction(s) in which work will be performed, covering all employees of the contractor. Employer's Liability coverage with limits of liability of not less than $500,000 each accident or illness shall be included.

B. GENERAL LIABILITY INSURANCE: A policy issued to

and covering liability imposed upon the contractor with respect to all work to be performed and all obligations assumed by the contractor, under the terms of this permit. Products-completed operations, independent contractors, and contractual liability coverages are to be included, and all Railroad exclusions are to be deleted. Railroad is to be named as an additional insured with respect to operations to be performed and the policy shall contain a waiver of subrogation against Railroad, its employees or agents. Coverage under this policy, or policies, shall have limits of liability of not less than $2 million per occurrence, combined single limit for bodily injury (including disease or death), personal injury and property damage (including loss of use) liability.

C. AUTOMOBILE LIABILITY INSURANCE: A policy issued to and covering the liability of the contractor arising out of the use of all owned, non-owned, hired, rented or leased vehicles which bear, or are required to bear, license plates according to the laws of the jurisdiction in which they are to be operated, and which are not covered under the contractor's General Liability Insurance. The policy shall name Railroad as an additional insured with respect to operations to be performed in connection with this permit, and shall contain a waiver of subrogation against Railroad, its employees or agents. Coverage under this policy shall have limits of liability of not less than $1 million per occurrence, combined single limit, for bodily injury, and property damage liability.

D. RAILROAD PROTECTIVE LIABILITY INSURANCE: The Contractor shall provide, with respect to the operations he or any of his subcontractors perform within 50 feet vertically or horizontally of Railroad's tracks, Railroad Protective Liability Insurance, AAR-AASHTO (ISO/RIMA) Form, in the name of National Railroad Passenger Corporation. The policy shall have limits of liability of not less than $2 million per occurrence, combined single limit, for Coverages A and B, for losses arising out of injury to or death of all persons, and for physical loss or damage to or destruction of property, including the loss of use thereof. A $6 million annual aggregate may apply.

If coverage is provided on the London claims-made form, the following provisions shall apply:

1. The limits of liability shall be not less than $3 million per occurrence, combined single limit. A $9 million annual aggregate may apply.

2. Declarations Item 6, Extended Claims Made Date, shall allow an Extended Claims Made Period no shorter than the length of the original policy period plus one year.

3. If equivalent, or better, wording is not contained in the policy form, the following endorsement must be included:

   It is agreed that "Physical Damage to Property" means direct and accidental loss of or damage to rolling stock and their contents, mechanical construction equipment or motive power equipment, railroad tracks, roadbed, catenaries, signals, bridges or buildings.

E. CLAIMS-MADE INSURANCE: If any insurance specified above shall be provided on a claims-made basis, then in addition to coverage requirements above, such policy shall provide that:

1. Policy retroactive date coincides with or precedes the contractor's start of work (including subsequent policies purchased as renewals or replacements).

2. Contractor will make every effort to maintain similar insurance for at least two years following project completion, including the requirement of adding Railroad as an additional insured.

3. If insurance is terminated for any reason, contractor agrees to purchase an extended reporting provision of at least two years to report claims arising from work performed in connection with this permit/license.

4. Policy allows for reporting of circumstances or incidents that might give rise to future claims.

All insurance specified above shall remain in force until all work to be performed is satisfactorily completed, all contractor personnel and equipment have been removed from railroad property,

and the work has been formally accepted. Failure to carry or keep such insurance in force as stipulated shall constitute a violation of the Agreement.

The Contractor shall furnish to Railroad's Engineering Department the original of the policy for Railroad Protective Liability Insurance and Certificate of Insurance for all other coverages, fifteen days prior to commencing work. The fifteen day advance notice of coverage may be waived in situations where such waiver will benefit Railroad, but under no circumstances will the contractor be permitted to work on Railroad property until evidence of all insurance requirements has been provided to Railroad. Evidence of insurance coverage shall be provided to:

National Railroad Passenger Corporation
Assistant Chief Engineer
M of W and Structures
3rd Floor, South Tower
30th Street Station
Philadelphia, Pennsylvania 19104

Work may not proceed on Railroad property until all insurance requirements have been met to the satisfaction of Railroad's Assistant Chief Engineer, M of W and Structures, or his duly authorized representative.

Except for Railroad Protective Liability Insurance which is mandatory, the Licensee may be permitted to self insure its obligation under this Article, in lieu of procuring and maintaining the other above mentioned insurance policies, provided the Licensee notifies the Railroad of their intention to do so and receives written approval from the Railroad. Permission to self insure under this Article shall not extend to any contractor and subcontractor of the Licensee. (34)

35. Licensee agrees that the terms, conditions and provisions of this agreement constitute confidential and proprietary information regarding Railroad and agrees not to disclose any term, condition or provision of this agreement without the prior written consent of Railroad or by order of a court of competent jurisdiction. (36)

IN WITNESS WHEREOF, the said parties hereto have caused this License to be duly executed and delivered as of the day and year first above written.

EXHIBIT F21

AMENDMENT TO LICENSE AGREEMENT, DATED MAY 6, 2002, BY AND BETWEEN NATIONAL RAILROAD PASSENGER CORPORATION AND EAST WHITELAND TOWNSHIP MUNICIPAL AUTHORITY

NATIONAL RAILROAD PASSENGER CORPORATION
AMENDMENT TO LICENSE AGREEMENT
RENT ACCOUNT NUMBER 37-05-558

THIS AMENDMENT made this 6th day of May, 2002 by and between **NATIONAL RAILROAD PASSENGER CORPORATION**, a District of Columbia corporation with principal offices at 60 Massachusetts Avenue, N. E., Washington, D. C. 20002, and **EAST WHITELAND TOWNSHIP MUNICIPAL AUTHORITY**, a public authority with principal offices at 209 Conestoga Road, Frazer, PA 19355;

WHEREAS, the National Railroad Passenger Corporation (Licensor) and the East Whiteland Township Municipal Authority (Licensee), entered into a License Agreement dated the 18TH day of November 1993 (the "License Agreement"), to construct, operate and maintain the installation of an 8" diameter ductile iron sewer pipe within a 24" steel casing pipe for a distance of approximately 250 feet under and across Licensee's railroad right-of-way (hereinafter referred to as the "Facility"); and

WHEREAS, in accordance with the terms and conditions of the License Agreement, the Licensee has notified Licensor of its desire to revise the above mentioned Facility and License Agreement; and

WHEREAS, Licensor agrees and grants permission to the Licensee to revise the above-mentioned Facility and License Agreement.

NOW, THEREFORE, WITNESSETH, that the License Agreement shall hereby be amended as follows:

1. Under Section A of the License Agreement, Description of Facility: Amend the existing description to include the additional installation of an 18" diameter steel casing pipe with an 8" diameter iron ductile carrier pipe beginning at its connection to the existing Facility at V.S. 1251+40 and continuing East within Licensor's right-of-way approximately 550 linear feet to a point exiting Licensor's right-of-way; and installation of an 18" diameter steel casing pipe with an 8" diameter iron ductile carrier pipe under and across the Licensor's right-of-way at approximately V.S. 1231+81 (hereinafter the "Additional Facilities").

2. Under Section C of the License Agreement, Location:

   (1) Milepost: 23.61±, 23.61± to 23.51±, and 23.24±

   All as delineated on and in strict accordance with drawing No. S-14 dated April 30, 1990, revised May 6, 1993, and marked Exhibit "A" to the License Agreement, and as delineated and in strict accordance with plans prepared by Kohli and Associates titled "EAST WHITELAND TOWNSHIP - CHESTER COUNTY - PA, PROPOSED SANITARY SEWER SYSTEM", dated 11-15-01, Job No. 2000-0233, consisting of 5 sheets, and marked "Exhibit B", attached hereto.

3. Installation of the Additional Facilities shall be under and subject to all of the terms of the License Agreement.

4. Under Section 2 of the License Agreement, the additional lump sum rent, with respect to the Additional Facilities, over the remainder of the current 25-year term, which expires October 31, 2018, shall be Sixteen Thousand Three Hundred and Fifteen Dollars ($16,315.00). The fee for preparation of this amendment and other incidental expenses shall be $250.00.

5. Except as expressly amended hereby, all other terms and conditions of the License Agreement shall remain in full force and effect.

IN WITNESS WHEREOF, the parties hereto have caused these presents to be executed by their proper officers, hereunder duly authorized, day and year first above written.

EXHIBIT F22

LICENSE AGREEMENT, DATED SEPTEMBER 10, 1999, BY AND BETWEEN NATIONAL RAILROAD PASSENGER CORPORATION AND EAST WHITELAND TOWNSHIP

Sugartown Ridge

NATIONAL RAILROAD PASSENGER CORPORATION
LICENSE AGREEMENT

THIS AGREEMENT, made this 10th day of September 1999, between the NATIONAL RAILROAD PASSENGER CORPORATION, a corporation of the District of Columbia, with offices at 30th and Market Streets Philadelphia, PA. 19104 party of the first part (hereinafter called "Railroad") and **EAST WHITELAND TOWNSHIP**, a municipality operating under the laws of the State of Pennsylvania with principal offices at 209 Conestoga Road, Frazer, Pennsylvania 19355, as party of the second part (hereinafter called "Licensee").

WITNESSETH, that the said Railroad (which when used herein shall include any lessor, successor or assignee of or operator over its railroad) insofar as it has the legal right and its present title permits, and in consideration of the covenants and conditions hereinafter stated on the part of the Licensee to be kept and performed, hereby permits, as a temporary exclusive License, the Licensee and Licensee only (except as otherwise herein provided to construct, maintain, repair, alter, renew, relocate and ultimately remove:

A. **DESCRIPTION OF FACILITY:** Underground installation of one (1) 30" diameter steel casing and 8" diameter ductile iron carrier pipe inside casing for a distance of approximately 267 linear feet near Sugartown Road.

B. **PURPOSE:** To convey sanitary sewage from proposed "Sugartown Ridge" Subdivision to East Whiteland Township System.

C. **LOCATION:**

(1)	Milepost:	23 +/-
(2)	Nearest Station:	Malvern
(3)	Town:	Malvern
(4)	County:	Chester
(5)	State:	Pennsylvania

all as delineated and in strict accordance with plans titled " "Land Development Plan "Sugartown Ridge" for Sugartown Ridge Associates Project No. 14704, Sheet 5 titled,"Grading and Utilities Plan", dated August 31, 1998, last revised July 12, 1999, Sheet 14, titled, "Off Site Sanitary Sewer Plan", dated August 31, 1998, last revised July 12, 1999, Sheet 15, titled, "Off Site Sanitary Sewer

Profile", dated October 30, 1998, last revised February 16, 1999, and Sheet 23, titled, "Final Erosion Control and Construction Notes and Details", dated August 31, 1998, last revised July 12, 1999, (all aforesaid drawings prepared by Chester Valley Engineers, Inc.) and submitted by Licensee to and approved as to concept by the Chief Engineer of the Railroad, marked "Exhibit A", attached hereto and made a part hereof, also in strict compliance with current issues of Railroad Specifications No. USA, ENG 1604 and Requirements and Specifications for Wire, Conduit and Cable occupations all as applicable to the herein described work and incorporated herein by reference, all and any part thereof being hereafter referred to as the "FACILITIES"; said License, however, shall be under and subject to the following terms, covenants, and conditions as hereinafter recited, which are hereby accepted and agreed to, by the Licensee, to wit: (0.1)

1. This License shall commence on the 15th day of July 1999, and terminate on the 14th day of July 2024, or before as hereinafter provided according to the terms, conditions and covenants herein contained. (1)

Provided, however that if Licensee has performed all its obligations and is not then in default hereunder, then Licensee shall have the right to renew this agreement for an additional term of TWENTY-FIVE (25) years upon service of written notice of intent to renew not less than 90 days prior to the expiration of the current term and subject to payment of a mutually acceptable fee then agree to. (1.2)

2. The Licensee shall pay to the Railroad upon the execution hereof, the sum of Five Hundred Dollars ($500.00) as reimbursement for the costs and expenses incident to the preparation of this License, together with the further sum of Nineteen Thousand and Six Hundred Dollars ($19,600.00) as lump sum compensation, for the rights granted in this License for the TWENTY-FIVE (25) year term, which sum shall be payable in advance, upon execution of this agreement. Notwithstanding the foregoing, payments of any additional charges and sums other than as compensation for Licensee's occupancy as hereinafter set forth shall be mailed to P.O. Box 18266F, Group No. 5, St. Louis, Missouri 63150, or at such other place as the Railroad may from time to time designate. (2)

3. Licensee shall and will pay all License Fees and any additional payments when due, without any setoff of deduction whatsoever, and any payment or receipt thereof by Railroad or its agent of any amount less than the full amount to which Railroad deems it is entitled shall not operate or be deemed to operate, constitute or be construed, as a settlement or satisfaction of said License Fees or other amounts due, notwithstanding any statement or endorsement on the check or other paper accompanying the payment, but Railroad shall be deemed to have accepted said payment without prejudice and subject to its right to collect the balance actually

due, as well as subject to any and all other rights available to Railroad by law and under this License Agreement.

If, (i) default shall be made in Licensee's covenants herein to pay License Fees or additional payments on each due date as described herein; or (ii) if default shall be made in any other covenants and agreements herein contained on the part of Licensee to be kept or performed, and if any such default shall not be cured within thirty (30) days after Licensee has been given written notice by Railroad to do so, or (iii) if Licensee shall file or suffer to be filed against it a petition in bankruptcy, or (iv) if Licensee shall be declared insolvent according to law, or if a receiver or trustee be appointed for the property of Licensee, or (v) if Licensee shall make any general assignment for the benefit of creditors, or any bulk sale however denominated, (vi) if Licensee shall assign, sublet, or sub-license its rights, duties or obligations hereunder without first obtaining the prior written consent of Railroad, then, in any of such cases, Railroad may by written notice to Licensee immediately declare this License terminated, and in such event, in addition to any other action or remedy which Railroad may have at law or in equity to recover damages or otherwise by reason of a breach by Licensee of provisions of this License, Railroad, acting as attorney in fact for Licensee, shall have the right to remove Licensee's FACILITY by summary proceedings, without being liable to any prosecution, action or damages therefor, and have and enjoy the Railroad's property as of its former estate free, clear and discharged of this License and of all rights of Licensee hereunder; and all FACILITIES owned or placed upon the Railroad's property by or for Licensee, shall be filled and abandoned in place or removed by Railroad at the sole cost and expense of Licensee, which cost and expense Licensee shall pay to Railroad upon demand; and Licensee also shall pay to Railroad upon demand all fees and expenses, including reasonable attorney and/or collection agency fees, incurred in connection with the aforesaid actions.

The receipt by or on behalf of Railroad of any License Fee or additional payments with or without knowledge of any breach of any of the terms, covenants or conditions of this License, shall not be deemed a waiver of such breach, nor shall such receipt be deemed a withdrawal of any notice given to Licensee under the terms of this License, nor shall such receipt be deemed a reinstatement or reestablishment of this License or any portion thereof after termination or cancellation, nor shall the termination or other cancellation of this License or any portion thereof waive the obligation of Licensee to pay or discharge any License Fee, additional payments or other obligations accruing under this License.

Licensee hereby waives and relinquishes unto and in favor of Railroad the operation of all laws which do now or hereafter may exempt any FACILITY on Railroad's property from levy and sale upon

BK4666PG0116

distress for rent or upon execution of any judgment obtained in an action brought for nonpayment of any License Fees or additional payments hereunder or for breach of any other provisions hereof. The parties hereto shall and do hereby waive trial by jury in any action, proceeding or counterclaim brought by either party against the other on any matter whatsoever arising out of or in any way connected with this License or Licensee's use of the FACILITY and occupancy of Railroad's property or arising out of or in any way connected with any claim of injury or damage arising out of or in connection with this License or such use or occupancy. Licensee hereby expressly waives any and all rights of redemption granted by or under any present or future laws in the event of Licensee's being dispossessed for any cause or in the event of Railroad's obtaining possession or for removal of the FACILITY by reason of the violation by Licensee of any of the covenants and conditions of this Lease or otherwise.

Licensor shall have the right to require rent payments to be made in cash, money order or certified check. A service charge of Ten Dollars ($10.00) will be charged for each instance in which a check is returned unpaid by the Licensee's bank for any reason.

If Licensee does not pay License Fees or any additional payments hereunder on the day when the same shall become due and payable and such failure to pay License Fees or any additional payments shall continue for a period of ten (10) days, Licensee shall pay to Railroad a service charge at the rate of twelve percent (12%) per annum, or the highest rate allowed by law, which ever is the greater of the amount of such License Fee or any additional payment or all of them for each year or portion of a year that the same shall remain unpaid; provided, however, that such service charge shall in no event, be less than Fifty Dollars ($50.00) for any year or portion of a year that the License Fee and any additional payment shall remain unpaid. Railroad reserves the right to institute legal proceedings and/or collection agency action for the payment of License Fees due and payable, and any legal and collection fees incurred shall be the responsibility of the Licensee; and immediate payment to be made to Railroad by Licensee upon written notice. The provision of this paragraph shall not preclude Railroad from exercising its options as set forth in any other Article of this License.

The actions and remedies provided in this License in event of default shall not be deemed exclusive but shall be in addition to all other actions and remedies at law or in equity in event of any such default; and no action or remedy taken or omitted by Railroad in event of default shall be deemed a waiver of such default and waiver of a particular default shall not be deemed a waiver of any other default or a waiver of the same default again occurring, nor shall any failure on the part of Railroad to compel a fulfillment of any one or more of the covenants, terms and conditions herein contained be held to be a waiver of its right to

BK4666PG0117

enforce the same at any time thereafter during the term of this License. (3)

4. The FACILITIES shall be located, constructed and maintained in exact accordance with said construction plans and for the sole purpose as outlined on Page 1 hereof. No departure that would result in a modification, change, amendment or sub-licensing to this License shall be made at any time therefrom except upon permission in writing granted by the Counsel to the President-NEC, Vice President Commercial Development of Railroad, or designee, provided, however, that if any commission or other regulatory body duly constituted and appointed in compliance with the laws of the State in which the crossing or occupancy herein provided is situate, and having jurisdiction over the property, has by final ruling or order determined and fixed the manner and means of construction, maintenance, repair, alteration, renewal, relocation or removal thereof, then said final ruling or order shall prevail for the crossing or occupancy herein mentioned. The work of constructing, maintaining, repairing, altering, renewing, relocating or removing the said FACILITIES shall be done under such general conditions as will be satisfactory to and approved by the Chief Engineer of Railroad, or his designee, and as will not interfere with the proper and safe use, operation and enjoyment of the property of the Railroad. Licensee, at its own cost and expense, shall, when performing any work in connection with the FACILITIES, furnish any necessary watchmen to see that men, equipment and materials are kept a safe distance away from the tracks of the Railroad. Any notification required or desired to be given to Railroad's Chief Engineer shall be sent to the address on first page here to the attention of the Chief Engineer. (4)

5. FACILITIES conveying gas (natural or artificial), oil, gasoline or other flammable matter shall not be installed or relocated under bridges or culverts, except in cases especially provided for. No FACILITIES shall be installed or relocated under bridges or culverts where there is likelihood of restricting the area required for the purposes for which the bridges or culverts were built, or endangering foundations of structures. (5)

6. No attachment of wires, cables, pipe lines, and appurtenances shall be made to any bridge (or its supports) of the Railroad unless specifically provided for in this License, and then only in accordance with the Railroad's plans and specifications. No poles, towers, anchors or supports of any kind for the wires, cables, and appurtenances or sub-licensed facilities shall be located on the right-of-way or property of the Railroad unless specifically provided for in this License. A penalty charge will be assessed against Licensee for knowingly permitting such other uses without Railroad's written permission. (6)

7. In addition to, but not in limitation of any of the foregoing provisions, if at any time the Railroad should deem

BK4666PG0118

flagmen or watchmen desirable or necessary to protect its operations or property, or its employees, patrons or licensees during the work of construction, maintenance, repair, alteration, renewal, relocation or removal of said FACILITIES of Licensee, the Railroad shall have the right to place such flagmen or watchmen at the sole risk, cost and expense of Licensee, who covenants and agrees to bear the full risk, cost and expense thereof and to reimburse promptly the Railroad upon demand. The furnishing or failure to furnish flagmen or watchmen by the Railroad, however shall not release the Licensee from any and all other liabilities assumed by the Licensee under the terms of this License. (7)

8. The Licensee shall at all times be obligated promptly to maintain, repair and renew said FACILITIES; and shall, upon notice in writing from Railroad requiring it so to do, promptly make such repairs and renewals thereto as may be required by Railroad. For the purpose of protecting and safeguarding its property, traffic, patrons or employees from damage or injury, Railroad may with or without notice to the Licensee at any time make such repairs and renewals thereto and furnish such material therefor as it deems adequate and necessary, all at the sole cost and expense of Licensee. Railroad will make reasonable efforts to give notice to Licensee at the same time any such repairs or renewals are made (8)

9. In the event of an emergency, Licensee will take immediate steps to perform any necessary repairs, and in the event Licensee fails so to do, Railroad will perform said necessary repairs at the sole cost and expense of Licensee. (9)

10. That in consideration of the exclusive rights granted hereunder to Licensee by Railroad, Licensee hereby agrees that as to any structure placed upon Railroad's property or any structure presently existing which structure is subject to renovation, repairs and subsequent use by Licensee, such structure shall be continuously maintained by Licensee from and after the effective date of this License. All costs of maintenance, repair and upkeep shall be borne by Licensee. Licensee shall be liable for and does indemnify and agree to hold Railroad harmless from any and all risks of liability for injuries to or death of persons or damage to or destruction of property resulting from said use, maintenance, repair and/or upkeep or lack thereof of said structure without regard to negligence. (10)

11. If the Licensee desires or is required, as herein provided, to revise, renew, add to or alter in any manner whatsoever the aforementioned FACILITIES, it shall submit plans and specifications to Railroad and obtain the written approval thereof by the Chief Engineer of Railroad before any work or alteration of the structure is performed and the terms and conditions of this License with respect to the original construction shall apply thereto. Railroad reserves the right to make adjustments in the

BK4666PG0119

annual or total compensation or assess additional charges. A penalty charge will be assessed against Licensee for unauthorized uses under this License Agreement. (11)

12. The Railroad shall have the right to verify by inspection that the location of the work and the materials used in construction, maintenance, repair, alteration, renewal and removal of the aforesaid FACILITIES covered by this License are in compliance with the plans and specifications. The right to verify the location of the construction work and inspect the FACILITIES from time to time thereafter by the Railroad, shall extend for an appropriate distance on each side of the property of the Railroad as the method of construction and materials used may have an important bearing upon the strength and stability of the FACILITIES over, under, upon, or in the property of the Railroad. (12)

13. Licensee shall comply with all Federal, State, local and municipal statutes, laws, orders, ordinances, rules and regulations now or hereafter enacted and assume all costs, expenses and responsibility in connection therewith, without any liability whatsoever on the part of the Railroad. Licensee shall also be responsible for notification to the Public Utility Commission or other similar public utility agency or commission in those states or jurisdictions requiring notice regarding installation of fiber optic cables at or near public crossings. Licensee's failure to so notify the appropriate commission or agency shall constitute grounds for termination of this License Agreement. Licensee shall assume all liability and costs arising out of such failure to notify the proper agency/commission. (13)

14. It is understood between the parties hereto that the operations of the Railroad at or near said FACILITIES involve some risk, and the Licensee as part of the consideration for this License hereby releases and waives any right to ask for or demand damages for or on account of loss of or injury to the FACILITIES (and contents thereof) of the Licensee and/or employees, agents, servants, contractors and invitees of the Licensee that are over, under, upon or in the property and facilities (of the Railroad) including the loss of or interference with service or use thereof and without respect to the fault, failure or negligence of the Railroad, its employees, agents, servants, contractors, invitees or otherwise. (14)

15. Licensee covenants and agrees to and shall at all times indemnify, protect, defend and save harmless Railroad from and against any and all losses, damages, liabilities, suits, claims, demands, judgments, costs, interest and expenses (collectively "losses and damages") which Railroad may directly or indirectly suffer, sustain or be subjected to by reason of, on account of, or arising out of a) the construction, placement, attachment, presence, use, misuse, maintenance, repair, alteration, renewal, relocation, failure, or removal of the FACILITIES, or b) the

BK4666PG0120

violation of, or compliance or noncompliance with, any Environmental Law relating in any way to the FACILITIES, including any disposal, discharge, or release of any wastes, pollutants, or hazardous substances from or in connection with the FACILITIES; whether such losses and damages be suffered or sustained by Railroad directly or by its employees, agents, servants, contractors, officers, or licensees, or by any other person or entity, including Licensee, who may seek to hold Railroad liable therefor, and whether attributable to the fault, failure, or negligence of Railroad, its employees, agents, servants, contractors, officers, licensees, or any other person acting for or on Railroad's behalf.

It is further agreed that in the event Railroad shall, at its option, make any expenditures or incur any obligations for the payment of money in connection with this Article including, but not limited to, attorneys' fees in instituting, prosecuting or defending any action or proceeding, such sums paid, obligations incurred and costs, all with interest at the rate of twelve percent (12%) per annum or the highest rate allowable by law, whichever is the lesser, shall be deemed to be additional compensation due hereunder and shall be paid by Licensee to Railroad within five (5) days of the rendering of a bill or statement to Licensee therefor.

For the purpose of this Article, "Environmental Law" shall mean all laws, statutes, codes, acts, ordinances, orders, judgments, decrees, injunctions, rules, regulations, permits, licenses, authorizations, directions and requirements of all governments, departments, commissions, boards, bureaus, courts, authorities, agencies, officials and officers, relating in any manner or way to the control and/or abatement of environmental pollution and environmental hazards, which now or at any time hereafter may be applicable, or claimed to be applicable, whether or not the claim is or is determined to be well founded.

The provisions of this Article shall survive the expiration or other termination of this License. (15)

16. If a claim or action is made or brought against either party, such party shall notify and permit the other party to participate in the handling or defense of such matter, if such other party may be responsible hereunder, in whole or in part. (16)

17. Prior to any entry for any purpose provided for in this License, Licensee shall provide to Railroad the name or names of the agents or employees to be present physically at the FACILITIES and responsible for any work in process or liability therefor. Said notice shall be in writing, to the Chief Engineer of Railroad, delivered at least twenty-one (21) days prior to entry. (17)

18. All costs and expenses in connection with the

BK4666PG0121

construction, maintenance, repair, alteration, renewal, relocation, and removal of said FACILITIES shall be borne by the Licensee, and in the event of work being performed or materials furnished by Railroad under the stipulated right to perform such work of construction, maintenance, repair, alteration, renewal, relocation, or removal under any section hereof, Licensee agrees to pay to the Railroad the actual cost of materials plus the current applicable overhead percentages for storage, handling, transportation, purchasing and other related material, management expenses and the actual cost of labor plus the current applicable overhead percentages as developed and published by the accounting department of Railroad for fringe benefits, payroll taxes, administration, supervision, use of tools, machinery and other equipment, supplies, employers' liability insurance, public liability insurance, and other insurance, taxes and all other direct expenses. It is to be understood that the aforementioned material and labor overhead charges are to be applied at the rates which are effective at the time of the performance of any work by employees of the Railroad on the said FACILITIES. Licensee agrees to pay such bills within thirty (30) days of the rendition thereof by Railroad. (18)

19. The Licensee shall, at its sole cost and expense, upon request in writing from the Railroad, promptly change the location of said FACILITIES covered by this License, where located over, upon or in the property and facilities of the Railroad, to another location, to permit and accommodate changes of grade or alignment and improvement in or additions to the facilities of the Railroad upon land now or hereafter owned or used by the Railroad with the intent that said construction shall at all times comply with the terms and conditions of this License with respect to the original construction; or in the event of the lease, sale or disposal of the property or any part thereof encumbered by this License, then the said Licensee shall make such adjustments or relocations in its FACILITIES as are over, upon or in the property and facilities of the Railroad as may be required by the said Railroad or its grantee; and if the Licensee shall fail or refuse to comply therewith, then the duly authorized agents of the Railroad may make such repairs or adjustments or changes in location and provide necessary materials therefor, at the sole cost and expense of the Licensee. (19)

20. In the event that FACILITIES consist of an underground occupation, Licensee will be responsible for any settlement caused to the roadbed, right-of-way and/or tracks, facilities, and appurtenances of the Railroad arising from or as a result of the installation of the said FACILITIES and Railroad shall have the right to repair, replace, restore or correct any such damage caused by said occupation at the sole cost and expense of the Licensee. The provisions of this clause shall survive the expiration or other termination of this License. (20)

21. In the event the said FACILITIES consist of electrical

BK4666PG0122

power or communication wires and/or appurtenances, the Licensee shall at all times be obligated promptly to remedy any inductive interferences growing out of or resulting from the presence of its FACILITIES; and if the Licensee should fail so to do, then Railroad has the right to do so, and the Licensee agrees to pay to Railroad on demand the full cost and expense therefor. (21)

22. As part of the consideration for granting this License, Licensee covenants and agrees that no assessments, taxes or charges of any kind, general, special or otherwise shall be made against Railroad or its property by reason of the construction and use of said FACILITIES by Licensee, and Licensee further covenants and agrees to pay to Railroad promptly upon bills rendered therefor the full amount of any assessments, taxes and/or charges of any kind or nature which may be levied, charged, assessed or imposed against the Railroad or its property by reason of the construction, existence, use, and maintenance of said FACILITIES of Licensee. (22)

23. Licensee hereby designates the Manager of the Township, as its agent(s) for the service of any notice desired or required by this License, and/or of process in any action growing out of, connected with, or based upon this License, or the activities undertaken hereunder, and agrees that service upon one of the above named person(s) shall constitute due and proper service of any such notice or any such process. Any notification or service required or desired to be given to the Railroad under this License shall be sent, postage prepaid, by certified or registered mail to the address on page first hereof to the attention of the Counsel to the President-NEC, Vice President Commercial Development. (23)

24. The rights conferred hereby shall be the sole privilege of the Licensee only, and no assignment, sub-licensing or transfer hereof shall be made, or other use be permitted than for the specific purpose stated on page first hereof without the consent and agreement in writing of the Railroad being first had and obtained. Railroad hereby acknowledges and agrees that Licensee is not currently the record titleholder of either the Facilities or the land to be benefitted by the construction of the Facilities, and that the Facilities and the land to be benefitted by the construction of the Facilities will be owned by the record titleholder(s) of the property within Sugartown Ridge until such time, if ever, as the Facilities and the land to be benefitted by the construction of the Facilities or any portion thereof, if any, are dedicated to and accepted by Licensee. Additionally, Railroad hereby acknowledges and agrees that the Facilities will be used by the record titleholders and residents of the property in Sugartown Ridge and adjacent owners. Furthermore, Railroad hereby acknowledges and agrees that the Facilities will not be constructed by Licensee. Railroad hereby agrees that the foregoing construction, ownership and use of the Facilities is permitted under the terms of this License Agreement and does not constitute

BK4666PG0123

a prohibited assignment, sub-license or transfer or any other breach hereof, anything in this License Agreement to the contrary notwithstanding. (24)

25. This License with the rights granted may be terminated at any time by either party upon giving not less than thirty (30) days' prior written notice to the other; and upon the expiration of the said thirty (30) days from date of mailing by certified or registered U.S. Mail, this License and the permission and privilege hereby granted shall absolutely cease and terminate. This License is subject to termination by Licensor upon giving thirty (30) days notice to Licensee for unauthorized uses or sub-licensing Licensee's sole right to occupy Railroad's right-of-way. (25)

Railroad shall not terminate this agreement unless required to do so for its corporate purposes, in which instance it shall use reasonable efforts to provide a mutually acceptable alternative location for Licensee's facilities. (25.1)

If Railroad should terminate this License prior to the expiration of the term specified in Article "1", it shall use reasonable efforts to provide a mutually acceptable alternative location for Licensee's facilities. If no such alternative location can be provided, then Railroad shall refund a prorated portion of the lump-sum payment as would be applicable to the unexpired period. Licensee shall not be entitled to any refund if Licensee should terminate this License. (25.2)

26. Upon termination of this License or upon the removal or abandonment of the FACILITIES covered hereby, all the rights, title and interest of the Licensee hereunder shall cease, and this instrument shall thereupon become and be null and void, without any liability on the part of either party to the other party except where expressly provided to the contrary and any liability accrued prior thereto, and the Licensee shall, with the prior written approval of the Railroad, remove or cause to be removed its said FACILITIES and appurtenances from Railroad property and right-of-way, and all property of the Railroad shall be restored in good condition and to the satisfaction of the Railroad. If the Licensee fails or refuses to remove its FACILITIES and appurtenances under the foregoing conditions, the Railroad shall have the right to do so at the sole cost and expense of the Licensee, and the Railroad shall not be liable in any manner to the Licensee for said removal. The provisions for this paragraph shall survive the expiration or other termination of this License. (26)

27. Before this License shall be effective, the Licensee shall at its sole cost and expense procure, provide, and deliver to the Railroad and thereafter maintain in effect during the term of this License, general liability insurance covering all liabilities assumed by the Licensee under Article "15" of this License, without exception or restriction of any kind. Products-completed

BK4666PG0124

operations, independent contractors and contractual liability coverages are to be included, with all Railroad exclusions deleted. Railroad is to be named as an additional insured and said insurance shall be in limits of not less than Two Million Dollars ($2,000,000.00) combined single limit, bodily injury, death and/or property damage whether of the Licensee, the Railroad, or others, and shall contain a waiver of subrogation against Railroad, and said insurance shall be with such companies and in such form as shall be acceptable to the Railroad. Said insurance shall be endorsed to provide that the Railroad will be notified in writing by the insurance carrier at least thirty (30) days in advance of any cancellation or changes which modify the coverage provided thereunder. The providing of such insurance shall not be deemed a limitation on the liability of Licensee as provided in this License, but shall be additional security therefor. In the event the term of this License exceeds ten (10) years, The Railroad reserves the right to modify the conditions/limits of said insurance listed in this Article. (27)

Licensee may be permitted to self insure its obligation under this Article, in lieu of procuring and maintaining the above mentioned insurance policies, provided the Licensee notifies the Railroad of their intention to do so and receives written approval from the Railroad. (27.1)

28. The covenants, conditions and agreements contained in this License shall bind and inure to the benefit of Licensee and Railroad and their respective heirs, distributors, executors, administrators, successors, and, except as otherwise provided in this License, their assigns. (28)

29. The obligations of the Railroad hereunder shall be subject to Force Majeure which shall include, but not be limited to labor disputes. (29)

30. No change or modification of any of the covenants, terms or provisions hereof shall be valid unless in writing and signed by the parties hereto.

There are no understandings or agreements of any kind between the parties hereto, verbal or otherwise, other than as set forth in this License.

All additions, changes or deletions herein were made prior to execution by either party, except that additions, changes or deletions made after execution by one party and before execution by the other shall be marginally initialed by both parties. (30)

31. This License shall be construed according to the laws of the District of Columbia. (31)

32. The provisions of this License are severable and it is

BK4666PG0125

the intention of the parties hereto that if this License cannot take effect in its entirety because of the final judgment of any court of competent jurisdiction holding invalid any part or parts thereof, the remaining provisions of the License shall be given full force and effect as completely as if the part of parts held invalid had not been included therein. (32)

33. It is understood and agreed between the parties hereto that execution of this agreement by Licensee, and negotiation of any check or other negotiable instrument by Railroad, prior to the date of execution of this agreement by Railroad, shall in no way be deemed or construed by Licensee to be acceptance of this agreement by Railroad. In the event that this agreement is not executed by Railroad for any reason whatsoever, then and in that event the amount set forth in any such check or other negotiable instrument shall be refunded to Licensee within a reasonable period of time after written notification that this agreement will not be executed by Railroad; provided, however, that the payment by Licensee of a preparation fee, if any, to Railroad shall be nonrefundable and made as full payment for the Railroad's preparation of this document without regard to whether or not same is ever executed. (33)

34. In connection with the construction of the FACILITIES, the Licensee, its contractors and subcontractors shall carry insurance as follows:

The contractor shall procure and maintain, at its own cost and expense, during the entire period of performance of the Project, the types of insurance specified below. The contractor shall submit a certificate of insurance giving evidence of the required coverages, prior to commencing work. All insurance shall be procured from insurers authorized to do business in the jurisdiction where operations are to be performed. The contractor shall require all subcontractors to carry the insurance required herein, and contractor may, at his option, provide the coverage for any or all subcontractors, and if so, the evidence of insurance submitted shall so stipulate. In no event shall work be performed until the required certificate(s) of insurance have been furnished. If the insurance provided is not in compliance with the requirements listed below, Railroad maintains the right to stop work until proper evidence is provided. The insurance shall provide the 30 days prior written notice to be given to Railroad in the event coverage is substantially changed, canceled or non-renewed.

A. WORKERS' COMPENSATION INSURANCE: A policy complying with the requirements of the statutes of the jurisdiction(s) in which work will be performed, covering all employees of the contractor. Employer's Liability coverage with limits of liability of not less than $1,000,000

BK4666PG0126

each accident or illness shall be included.

B. GENERAL LIABILITY INSURANCE: A policy issued to and covering liability imposed upon the contractor with respect to all work to be performed and all obligations assumed by the contractor, under the terms of this permit. Products-completed operations, independent contractors, and contractual liability coverages are to be included, and all Railroad exclusions are to be deleted. Railroad is to be named as an additional insured with respect to operations to be performed and the policy shall contain a waiver of subrogation against Railroad, its employees or agents. Coverage under this policy, or policies, shall have limits of liability of not less than $2 million per occurrence, combined single limit for bodily injury (including disease or death), personal injury and property damage (including loss of use) liability.

C. AUTOMOBILE LIABILITY INSURANCE: A policy issued to and covering the liability of the contractor arising out of the use of all owned, non-owned, hired, rented or leased vehicles which bear, or are required to bear, license plates according to the laws of the jurisdiction in which they are to be operated, and which are not covered under the contractor's General Liability Insurance. The policy shall name Railroad as an additional insured with respect to operations to be performed in connection with this permit, and shall contain a waiver of subrogation against Railroad, its employees or agents. Coverage under this policy shall have limits of liability of not less than $1 million per occurrence, combined single limit, for bodily injury, and property damage liability.

D. RAILROAD PROTECTIVE LIABILITY INSURANCE: The Contractor shall provide, with respect to the operations it or any of its subcontractors perform within 50 feet vertically or horizontally of Railroad's tracks, Railroad Protective Liability Insurance, AAR-AASHTO (ISO/RIMA) Form, in the name of National Railroad Passenger Corporation. The policy shall have limits of liability of not less than $2 million per occurrence, combined single limit, for Coverages A and B, for losses arising out of injury to or death of all persons, and for physical loss or damage to or destruction of property, including the loss of use thereof. A $6 million annual aggregate may apply.

BK4666PG0127

If coverage is provided on the London claims-made form, the following provisions shall apply:

1. The limits of liability shall be not less than $3 million per occurrence, combined single limit. A $9 million annual aggregate may apply.

2. Declarations Item 6, Extended Claims Made Date, shall allow an Extended Claims Made Period no shorter than the length of the original policy period plus one year.

3. If equivalent, or better, wording is not contained in the policy form, the following endorsement must be included:

   It is agreed that "Physical Damage to Property" means direct and accidental loss of or damage to rolling stock and their contents, mechanical construction equipment or motive power equipment, railroad tracks, roadbed, catenaries, signals, bridges or buildings.

E. CLAIMS-MADE INSURANCE: If any insurance specified above shall be provided on a claims-made basis, then in addition to coverage requirements above, such policy shall provide that:

1. Policy retroactive date coincides with or precedes the contractor's start of work (including subsequent policies purchased as renewals or replacements).

2. Contractor will maintain similar insurance for at least two years following project completion, including the requirement of adding Railroad as an additional insured.

4. If insurance is terminated for any reason, contractor agrees to purchase an extended reporting provision of at least two years to to report claims arising from work performed in connection with this permit/license.

5. Policy allows for reporting of circumstances or incidents that might give rise to future claims.

All insurance specified above shall remain in force until all work to be performed is satisfactorily completed, all contractor personnel and equipment have been removed from railroad property,

BK4666PG0128

and the work has been formally accepted. Failure to carry or keep such insurance in force as stipulated shall constitute a violation of the Agreement.

The Contractor shall furnish to Railroad's Engineering Department the original of the policy for Railroad Protective Liability Insurance and Certificate of Insurance for all other coverages, fifteen days prior to commencing work. The fifteen day advance notice of coverage may be waived in situations where such waiver will benefit Railroad, but under no circumstances will the contractor be permitted to work on Railroad property until evidence of all insurance requirements has been provided to Railroad. Evidence of insurance coverage shall be provided to:

National Railroad Passenger Corporation
Assistant Chief Engineer
M of W and Structures
3rd Floor, South Tower
30th Street Station
Philadelphia, Pennsylvania 19104

Work may not proceed on Railroad property until all insurance requirements have been met to the satisfaction of Railroad's Assistant Chief Engineer, M of W and Structures, or his duly authorized representative.

Except for Railroad Protective Liability Insurance which is mandatory, the Licensee may be permitted to self insure its obligation under this Article, in lieu of procuring and maintaining the other above mentioned insurance policies, provided the Licensee notifies the Railroad of their intention to do so and receives written approval from the Railroad. Permission to self insure under this Article shall not extend to any contractor and subcontractor of the Licensee. (34)

35. Licensee agrees that the terms, conditions and provisions of this agreement constitute confidential and proprietary information regarding Railroad and agrees not to disclose any term, condition or provision of this agreement without the prior written consent of Railroad or by order of a court of competent jurisdiction. (35)

BK4666PG0129

IN WITNESS WHEREOF, the said parties hereto have caused this License to be duly executed and delivered as of the day and year first above written.

NOTICE

THIS TARIFF ESTABLISHES THE WASTEWATER RATES FOR THE CUSTOMERS OF EAST WHITELAND TOWNSHIP SITUATED WITHIN CHESTER COUNTY, PENNSYLVANIA.

LIST OF CHANGES MADE BY THIS TARIFF

Changes: This tariff makes changes to reflect the acquisition of the wastewater assets of East Whiteland, located within East Whiteland Township, Chester County, Pennsylvania. Closing on the acquisition took place on XX/XX/202X, with the effective date of ownership occurring at 12:01AM on XX/XX/202X. (See pages 7 and 8.13.1, 8.13.2, and 8.13.3)

This tariff is made pursuant to the Commission's Order adopted and entered XX/XX/202X at Docket No. A-2021-3026132, which authorizes the issuance of the Certificate of Public Convenience.

RATE ZONE 12		
Lower Makefield Township Division	Lower Makefield	Bucks

(C) RATE ZONE 13

East Whiteland Township Division — East Whiteland — Chester

Sewer District A: that part of East Whiteland Township not included within Districts B, C, D, and E

Sewer District B: properties served by the western extension of the Route 30 sewer main

Sewer District C: residential dwellings located in the Lockwood Chase subdivision

Sewer District D: all properties that flow into and whose effluent is treated at the sanitary sewage facility that serves the dwellings in the Malvern Hunt development

Sewer District E: all commercial and residential properties located in the Atwater development south of the quarry

SCHEDULE OF RATES

RATE ZONE 13 – METERED AND UNMETERED

The rates under this schedule apply to all customer classes in the territories served subject to Rate Zone 13 rates as noted in the Description of Territories Served section under this tariff unless otherwise specifically identified below.

QUARTERLY SERVICE CHARGE ($)

Customer Charge ($)		Rate Zone 13	
Fixed (per EDU)			
District A	$	100.00	per EDU per quarter
District B	$	100.00	per EDU per quarter
District C	$	135.50	per EDU per quarter
District D	$	150.00	per EDU per quarter
District E	$	120.00	per EDU per quarter

Commercial and industrial Users: Each commercial and industrial user, whose total quarterly sewage discharge or water consumption is greater than 100,000 gallons, “High Volume Users”, shall pay a sewer rate per thousand gallons as opposed to the Fixed Per EDU Service Charge.

QUARTERLY CONSUMPTION CHARGE ($)
(Based on Water Usage or Sewage Flows, determined at the Company’s discretion)

High Volume Users Commercial and Industrial Consumption Charge:			
Districts A through E	$	6.20	per 1,000 gallons

1. Wastewater customers in East Whiteland Township are required to comply with the wastewater control regulations adopted by East Whiteland Township and included in Exhibit H to the Application filed at Docket No. A-2021-3026132.

RATE ZONE 13 – CONTINUED

2. Unit Schedule

For customers in the East Whiteland Township service area, the number of equivalent dwelling units is determined as follows. The minimum EDU allocation is one EDU. Fractional EDU values shall be rounded to the next highest whole value.

Category			**Number of EDU**
(1)		Each private dwelling unit or living unit	1
(2)		Each individual commercial establishment or business, having 10 or less of its own employees, attached to or forming a part of owner's residence, unless otherwise specified herein	1
(3)		Each additional 5 of its own employees or fraction thereof	1/2
(4)		Each individual commercial establishment or business, having 10 or less of its own employees, not attached to or forming a part of owner's residence, unless otherwise specified herein	1
(5)		Each additional 5 of its own employees or fraction thereof	1/2
(6)		(i) Hotel guest room/suite, motel guest room/ suite and conference center guest room/suite with kitchenette - 2.5 bedrooms	1
		(ii) Hotel guest room/suite, motel guest room/ suite and conference center guest room/suite without kitchenette - 3.0 bedrooms	1
		(iii) Kitchenette shall include any one or more of the following facilities or combination thereof: (i) sink and refrigerator; (ii) sink and stove; (iii) sink and dishwasher; (iv) sink and disposal	
(7)		Each restaurant (without liquor license) per 25 seats	1
(8)		Each restaurant (with liquor license) per 10 seats	1
(9)		Each service station garage and automobile repair shop, without carwash facilities:	
		2 bays or less	2
		Each additional bay over 2	1
(10)		Each barber or beauty shop, not attached to owner's residence:	
		2 chairs or less	1 1/2
		Each additional two chairs or fraction thereof	1/2
(11)		Each firehouse	1 1/2
(12)		Each church or chapel	1
(13)		Each public swimming pool or private swimming club	3
(14)		Each school, public or private, having:	
		Toilet facilities only, per 25 pupils and staff or fraction thereof	1
		Toilet facilities and kitchen, per 20 pupils and staff or fraction thereof	1

		Toilet facilities and gymnasium, per 15 pupils and staff or fraction thereof	1
		Toilet facilities, kitchen and gymnasium, per 12 pupils and staff or fraction thereof	1
(15)		Each property having a commercial garbage grinder of 3/4 horsepower or greater per grinder	1
(16)		Each business providing showers for employees:	
		7 or less employees	1
		Each additional 7 employees or fraction thereof	
(17)		Each funeral home	2
(18)		Each nursing home, per bed	3/4

The DSIC surcharge shall not be applied to bills of wastewater customers in East Whiteland Township; this will remain effective until an amended Long-Term Infrastructure Improvement Plan (LTIIP) is filed and approved which includes East Whiteland. Following the approval of an amended LTIIP, the DSIC surcharge shall be applicable to wastewater customers in East Whiteland Township.

EAST WHITELAN TOWNSHIP
CURRENTLY EFFECTIVE RATES AND RULES

EAST WHITELAND TOWNSHIP
CHESTER COUNTY, PA
RESOLUTION NO. 2019- 23

A RESOLUTION OF THE BOARD OF SUPERVISORS OF EAST WHITELAND TOWNSHIP REESTABLISHING THE 2019 SEWER RATES FOR EAST WHITELAND TOWNSHIP

RECITALS:

A. East Whiteland Township ("Township") owns certain public sewer facilities (the "System") which provide public sewer service to the residents of East Whiteland Township.

B. The Township Code Book of Ordinances specifies that the rates and charges for the Township customers utilizing the System, which rates and charges must be set at an amount sufficient to cover the costs of operating, maintaining and expanding the System, as well as for treatment costs associated with the Valley Forge Sewer Authority treatment plant, must be established by resolution.

C. In the past, the Township, through consultants, conducted a rate review process on the sewer rates being charged by the Township and the review indicated that the Township should raise the rates to cover the operation and maintenance costs of the System.

D. Accordingly, the sewer rates for Sewer Districts A through E were raised pursuant to Resolution 40-2016, which rates remain unchanged below. Additionally, the sewer rates for high volume commercial and industrial users were raised on December 12, 2018, which rates remain unchanged below.

E. This Resolution is intended to clarify and reestablish the existing sewer rates, payment discounts, and volume measurement methods within the Township and does not establish any new rates or other similar terms.

NOW, THEREFORE, BE IT RESOLVED, and it is hereby resolved by the Board of Supervisors of East Whiteland Township as follows:

1. The 2019 sewer rates for East Whiteland Township are established as follows:

   Sewer District A: $400 per EDU per year.

   Sewer District B: $400 per EDU per year.

   Sewer District C: $542 per EDU per year.

   Sewer District D: $600 per EDU per year.

   Sewer District E: $480 per EDU per year.

2. Commercial and Industrial users whose quarterly sewer discharge or water consumption is in excess of 100,000 gallons shall pay a quarterly charge of $6.20 per 1,000 gallons.

3. Single-family residential users in Sewer Districts A, B, C, D, and E shall be entitled to a discount of 2% the annual rates set forth herein upon payment of the full amount of the annual sewer bill not later than 30 days after the date of the first bill issued by the Township for that calendar year.

4. The Board of Supervisors reserves the right to amend the sewer rates in any and all districts at any time the Board of Supervisors deems appropriate.

5. The rates established herein shall remain in full force and effect until such time as the Board of Supervisors amends the rates.

6. All resolutions inconsistent herewith are hereby repealed.

RESOLVED AND ADOPTED, this 13th day of March, 2019.

Part 1
Holding Tanks

[Adopted 5-11-1987 By Ord. No. 85-87]

ARTICLE I
Use Regulations

§ 154-1. Purposes.

The purpose of this Part 1 is to establish procedures for the installation, use and maintenance of holding tanks designed to receive and retain sewage whether from residential or commercial uses when an alternate method to on-site disposal is deemed necessary and it is hereby declared that the enactment of this part is necessary for the protection, benefit and preservation of the health, safety and welfare of the inhabitants of this municipality.

§ 154-2. Definitions.

As used herein, the following terms shall have the meanings herein described unless otherwise provided:

BOARD — The Board of Supervisors of East Whiteland Township.

CCHD — The office of the Chester County Health Department administering the issuance of permits and promulgating the regulations governing holding tanks in the various municipalities of Chester County.

DEP — The bureau or office of the Department of Environmental Protection of the Commonwealth of Pennsylvania which is responsible for administering the issuance of permits and promulgating the regulations governing the issuance of permits for holding tanks.**[Amended 11-21-2000 by Ord. No. 132-2000]**

DESIGN STANDARDS — Design standards for holding tanks as established by DEP (25 Pa. Code § 73.61 et seq.) as well as all relevant installation standards and relevant locational standards established by such regulations are incorporated herein by reference as fully as though set forth at length. As used herein, the term "design standards" shall be deemed to include "installation standards" and "locational standards."

HOLDING TANK — A watertight receptacle which receives and retains sewage and is designed and constructed to facilitate ultimate disposal of the sewage at another site. Holding tanks include, but are not limited to, the following:

A. CHEMICAL TOILET — A toilet using chemicals that discharge to a holding tank.

B. RETENTION TANK — A holding tank to which sewage is conveyed by a water carrying system.

C. PRIVY — A holding tank designed to receive sewage where water under pressure is not available.

HOLDING TANK CLEANER — The entity, agency or person, including a holding tank owner, who being duly licensed by the Chester County Health Department, removes the contents of a holding tank for purposes of transporting and/or disposing of the sewage at another site.

IMPROVED PROPERTY — Any property within the Township upon which there is erected a structure intended for continuous or periodic habitation, occupancy or use by human beings or animals and from which structure sewage shall or may be discharged.

MUNICIPALITY — East Whiteland Township, Chester County, Pennsylvania.

OWNER — Any person vested with legal ownership, sole or partial, of any property located in the Township.

PERSON — Any individual, partnership, company, association, corporation or other group or entity.

SEWAGE — Any substance that contains any of the waste products or excrement or other discharge from the bodies of human beings or animals and any noxious or deleterious substance being harmful or inimical to the public health, or to animal or aquatic life or to the use of water for domestic water supply or for recreation.

§ 154-3. Rights and privileges granted.

The Board is hereby authorized and empowered to undertake within the Township the control and methods of holding tank sewage disposal and the collection and transportation thereof. Any permit or permission for the use of holding tanks pursuant to this Part 1 is intended to provide for an interim or temporary method of disposal under circumstances where a sanitary sewer extension has been approved for connection to the public sewer system operated by the municipality and the Board has authorized the design and/or construction contracts and awaiting the completion of design and construction of the sewer system. Any such permit or permission shall be limited to a maximum of three years or such other time as the Board may deem proper under the circumstances.

§ 154-4. Permit required.

No landowner shall erect, own, operate or maintain, or suffer to be erected, owned, operated or maintained, any holding tank on his lands, nor shall any person own, operate, erect or maintain any holding tank on lands of another unless a permit therefor has been issued by CCHD and DEP and security has been posted with the Board, which permit and security shall remain unexpired, unsuspended and unrevoked. In any other areas of the Township where the DEP and CCHD has allowed holding tank installation after the adoption of this Part 1, the applicant shall post all securities and assurances, as noted herein.

§ 154-5. Conditions for issuance of permit.

Before any permit to construct, own, operate or maintain a holding tank is issued to any owner or other person in East Whiteland Township, all of the following conditions precedent shall have occurred:

A. The Official Sewage Facilities Plan of East Whiteland Township or the revision thereto indicates the use of holding tanks for the lot and provides for replacement by adequate public sewerage service, as approved by DEP and CCHD. The plan for replacement by adequate sewerage service shall include appropriate assurance of the project's implementations, such as public financing, bonding or other security of sufficient present value to assure completion, or any other assurances, either singularly or in combination, or such other provisions for the discontinuance of holding tank authorization as the DEP, CCHD or the Board deems necessary.

B. The owner has filed with the Board copies of plans, contracts or other assurances enforceable according to their terms for the maintaining and removal of such holding tanks and connection to public facilities when available, adequate security to guarantee the performance of and payment for the same, and the assignment to the municipality of the right to enforce all such contracts, assurances and securities.

C. The holding tank meets the design standards.

§ 154-6. Installation.

Holding tanks may be installed if and only if:

A. They meet the design standards;

B. A permit has been issued therefor;

C. All fees in connection with the permit have been paid.

D. Adequate security, as mandated under § 154-8 hereof has been posted; and

E. Adequate land has been set aside for alternate on-site disposal systems and such land is shown on the site development plans submitted for the holding tank.

§ 154-7. Inspection; maintenance and operation.

Upon installation of the holding tank, but prior to its maintenance and operation, the same shall be inspected by the Chester County Health Department and the Township Engineer. The Township Engineer shall certify that the same is installed in and only in accordance with the design standards and that all conditions precedent have been complied with and adequate security, as required under § 154-8 hereof has been posted. Said holding tank may be maintained and operated only during the time such permit and security remains in force. The holding tank shall be installed,

operated and maintained in accordance with applicable DEP and CCHD regulations, including but not limited to 25 Pa. Code § 73.61 et seq.

§ 154-8. Posting of security.

The applicant shall post with the Board a letter of credit or other similar undertaking from a reputable financial institution or insurance carrier authorized to conduct such business in the Commonwealth of Pennsylvania or (at the applicant's election) an amount in cash guaranteeing:

A. That the applicant will install and maintain the holding tank in accordance with DEP, CCHD and Township regulations as the same exist at the time of application.

B. That the applicant will cause a holding tank cleaner, duly licensed by the CCHD, to pump out such holding tank at regular intervals and at times of malfunction or emergency and at such other times as may be necessary to avoid overflow or other hazard and will remove the said effluent and deposit the same at and only at an authorized disposal facility, as approved by CCHD and DEP.

C. That, within 30 days after public sewage facilities are available to the lot, the owner will dismantle such holding tank and connect to the public sewage facility and pay all costs and fees therefor. The method of the holding tank dismantling shall be approved by the Township Engineer and shall include, but not be limited to, complete removal or the destruction and backfilling in place of said tank.

D. That, in the event that public facilities are not available within the time period stated in § 154-3, the applicant will construct alternate facilities on the site and disconnect said holding tank and pay all costs therefor. Security shall be in an amount equal to 110% of the contract prices and (in absence of such contract prices) the estimated cost of all of the foregoing, plus an additional 10% of such costs and contracts for each year beyond the first year for the duration of the permit.

E. The security agreement shall provide that the applicant may draw from the security so posted pumpout costs to and only to the extent provided in accordance with the terms of the contracts and estimates for and only for completed work. The maximum of any draw shall be limited to the proportion of the contract completed, materials furnished or work done. The security agreement shall provide that, in default by the permittee and during the period such default continues, the Board or its authorized representative may draw upon said security for necessary payments for expenses incurred on the Board's sole demand without the necessity of approval or concurrence by the landowner. The amount and adequacy of the security shall be determined by the applicant, subject to the approval of the Township Engineer, which approval shall not be unreasonably withheld.

§ 154-9. Application procedures.

Any person desiring to own, construct, operate or maintain a holding tank on lands within East Whiteland Township shall file an application therefor on a form supplied by, or satisfactory to, the Board, together with all plans and other materials necessary to demonstrate compliance with all of the requirements of this part. The Board shall establish by resolution, and may from time to time by resolution amend, a schedule of fees for the application for such holding tanks and the administration of this part. Upon approval by the Board of Supervisors, the same shall be forwarded to the CCHD, which shall, if it finds the application, plans and approvals to be in accordance with this part, process the application in accordance with the regulations administered by CCHD and upon approval issue such permits.

§ 154-10. Appeals.

Any person aggrieved by the action of CCHD and DEP with respect to such permit application, whether the same be based upon alleged noncompliance with the regulations of CCHD and DEP or noncompliance with the provisions of this Part 1 shall appeal from the denial of such permit in accordance with the rules and regulations established by CCHD and DEP.

§ 154-11. Violations and penalties.[1]

Any person who violates or permits the violation of any provision of this Part 1 shall, upon conviction thereof in a summary proceeding brought before a District Justice under the Pennsylvania Rules of Criminal Procedure, be guilty of a summary offense, and shall be subject to the payment of a fine of not less than $100 and not more than $1,000, plus the costs of prosecution. In default of payment thereof, the defendant may be sentenced to imprisonment in the county prison for a term of not more than 30 days. Each provision of this Part 1 that is violated shall constitute a separate offense, each of which violations shall be punishable by a separate fine imposed by the District Justice of not less than $100 and not more than $1,000, plus the costs of prosecution, or upon default of payment thereof, the defendant may be sentenced to imprisonment in the county prison for a term of not more than 30 days. All fines and penalties collected for the violation of this Part 1 shall be paid to the Township Treasurer. The penalties hereby imposed are for violations of this Part 1. Violations of the Chester County Health Department regulations shall be punishable in accordance with the rules and regulations applicable thereto and shall be deemed in addition to any violation of the provisions hereof.

§ 154-12. Remedies.

In addition to the penalties provided in § 154-11 above, the Board is authorized to file appropriate actions at law or in equity in the Court of Common Pleas in and for Chester County or before any other body having

1. **Editor's Note: Amended at time of adoption of Code (see Ch. 1, General Provisions, Art. I).**

jurisdiction over the persons and activities herein regulated to abate any violations and remove any holding tank not owned, operated, maintained or constructed in accordance with the provisions of this part. Violations of this Part 1 are declared to be public nuisances, abatable as such.

Part 2
Sewer Use

[Adopted 11-19-1987 By Ord. No. 86-87]

ARTICLE II
General Provisions

§ 154-13. Title.

This Part 2 shall be known as the "Revised Sewer Code of East Whiteland Township, 1987."

§ 154-14. Definitions; word usage.

A. Unless the context specifically and clearly indicates otherwise, the meaning of terms used in this Part 2 shall be as follows:

AUTHORITY — East Whiteland Municipal Authority.

BOD (denoting "biochemical oxygen demand") — The quantity of oxygen expressed in milligrams per liter (mg/l), utilized in the biochemical oxidation of the organic matter in sanitary sewer or industrial waste under standard laboratory procedure in five days at 20º C. It shall be determined by one of the acceptable methods described in the latest edition of "Standard Methods for the Examination of Water and Wastewater" published jointly by American Public Health Association, and the Water Pollution Control Federation, or the latest edition of "Methods for Chemical Analysis of Water and Wastes" published by the U.S. Environmental Protection Agency.

BUILDING SEWER — The extension from the sewage drainage system of any structure to the service lateral of a collection sewer.

CAPPED SEWER — A complete sanitary sewage system installed on any improved property for future connection to the collection sewer system.

CHLORINE REQUIREMENT — The amount of chlorine, in parts per million by weight, which must be added to sewage or other liquid to produce a residual of 0.1 parts per million after 15 minutes of content, or to meet the requirements of some other objective, in accordance with procedures set forth in "Standard Methods."

COLLECTION SEWER — The Township's sanitary sewers located under highways, roads, streets and right-of-way with branch service laterals that collects and conveys sanitary sewage or industrial wastes or a combination of both and into which storm, surface, and ground waters or unpolluted industrial wastes are not intentionally admitted.

COLOR OF AN INDUSTRIAL WASTE — The color of the light transmitted by the waste solution after removing the suspended material, including the pseudocolloidal particles.

COMMERCIAL USER — A property which is intended to be used for the purpose of carrying on a trade, business or profession, or for social, religious, educational, charitable or public uses.

COMPOSITE SAMPLE — A sample consisting of a combination of individual samples that are either time or flow proportioned or both, obtained at regular intervals over a period of time and shall reasonably reflect the actual wastewater discharge conditions for that period of time.

CONNECTION UNIT — Each individual building or house whether constructed as a detached unit or as one of a pair or row which is designed or adaptable to separate ownership for use as a family dwelling unit or for commercial or industrial purposes. A school, factory, apartment house, cooperative or condominium apartment house, office building or other multiple-unit structure whose individual apartments or units are connected to a common internal sewage system and which are not commonly subject to separate ownership shall be considered as one connection unit.

CONSULTING ENGINEER — A duly qualified engineer designated by the Township or the Authority as its consulting engineer.

COOLING WATER — The water discharged from any system of condensation, including but not limited to air conditioning, cooling, or refrigeration.

DEPARTMENT OF ENVIRONMENTAL PROTECTION (DEP) — The Department of Environmental Protection of the Commonwealth of Pennsylvania, or any department or agency of the Commonwealth succeeding to the existing jurisdiction or responsibility of the Department of Environmental Protection.

DISSOLVED SOLIDS — That concentration of matter in the sewage consisting of colloidal particulate matter one micron in diameter or less, and both organic and inorganic molecules and ions present in solution.

DOMESTIC USER — A property which is intended to be used for continuous or periodic habitation by human beings.

ENVIRONMENTAL PROTECTION AGENCY (EPA) — The Environmental Protection Agency of the United States, or any agency or department of the United States succeeding to the existing jurisdiction or responsibility of the Environmental Protection Agency.

FLOATABLE OIL — Oil, fat or grease in a physical state such that it will separate by gravity from wastewater by treatment in a pretreatment facility approved by the Authority.

GARBAGE — Solid wastes from the domestic and commercial preparation, cooking and dispensing of food, and from the commercial handling, storage and sale of food products and produce.

GRAB SAMPLE — A sample taken from a waste stream on a one time basis with no regard to the flow in the waste stream and collected over a period of time not exceeding 15 minutes but shall reasonably reflect actual discharge conditions for that instant.

GROUND GARBAGE — Garbage that has been shredded to such a degree that all its particles will be carried freely under normal sewer flow conditions, with no particle greater than 1/2 inch in any dimension.

GROUND WATER — Water which is standing in or passing through the ground.

HOLDING TANK WASTE — Any waste from holding tanks such as vessels, chemical toilets, campers, trailers, septic tanks, and vacuum-pump tank trucks.

IMPROVED PROPERTY — Any property within the sewered area upon which there is erected a structure intended for continuous or periodic habitation, occupancy or use by human beings or animals and from which structure sanitary sewage and/or industrial wastes shall be or may be discharged. The property may or may not have public water or private water.

INDUSTRIAL USER — Any property discharging wastewater to the sanitary sewer system, and which is intended to be used in whole or in part for manufacturing, processing, cleaning, laundering or assembling any product, commodity or article; or from which any process waste, as distinct from domestic waste, is discharged.

INDUSTRIAL WASTE — Any liquid or gaseous substance, whether or not solids are contained therein, discharged from any industrial establishment during the course of any industrial, manufacturing, trade, or business process or in the course of the development, recovery, or processing of natural resources, as distinct from sanitary sewage.

INDUSTRIAL WASTE PERMIT — A permit to deposit or discharge liquid industrial wastes into any sanitary sewer discharging to the wastewater treatment plant owned by the Valley Forge Sewer Authority.

INFILTRATION — The groundwater unintentionally entering the public sewer system, including building foundation drains and sewers, from the ground through such means as, but not limited to, defective pipes, pipe joints, connections or manhole walls. Infiltration does not include, and is distinguished from, inflow.

INFILTRATION/INFLOW — The total quantity of water from both infiltration and inflow without distinguishing the source.

INFLOW — The water discharge into a sanitary sewer system, including building drains and sewers, from such sources as, but not limited to: roof leaders, cellar, yard and area drains; foundation drains; unpolluted cooling water discharges; drains from springs and swampy areas; manhole covers; cross connections from storm sewer and/or combined sewers; catch basins; storm waters; surface runoff; street wash waters; or drainage. Inflow does not include, and is distinguishable from, infiltration.

MANHOLE — A shaft or chamber leading from the surface of the ground to a sewer, large enough to enable a man to gain access to the latter.

mg/l — Milligrams per liter and is equivalent to parts per million by weight.

NATIONAL CATEGORICAL PRETREATMENT STANDARD or PRETREATMENT STANDARD — Any regulation containing pollutant discharge limits promulgated by the EPA in accordance with Section 307(b) and (c) of the Act (33 U.S.C. § 1347) which applies to a specific category of industrial users.

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMIT — A permit issued under the National Pollutant Discharge Elimination System (NPDES) for discharge of wastewaters to the navigable waters of the United States pursuant to Section 402 of Public Law 92-500, as amended.

NATIONAL PROHIBITIVE DISCHARGE STANDARD or PROHIBITIVE DISCHARGE STANDARD — Any regulation developed under the authority of 307(b) of the Act and 40 CFR 403.5.

NITROGEN, TOTAL KJELDAHL (TKN) — The sum of the organic nitrogen and ammonia nitrogen, expressed in milligrams per liter.

NONFILTERABLE RESIDUE — Solids that either float to the surface or are in suspension in water, sewage, industrial waste or other liquids, and which are removable by laboratory filtration. The quantity of nonfilterable residue shall be determined by one of the acceptable methods described in the latest edition of "Standard Methods for the Examination of Water and Wastewater" or "Methods for Chemical Analysis of Water and Wastes," cited above.

NORMAL DOMESTIC STRENGTH SEWAGE — Wastewater or sewage having an average daily suspended solids (SS) concentration of not more than 250 milligrams per liter and an average daily BOD of not more than 250 milligrams per liter and excluding toxic and/or inflammable wastes.

OBJECTIONABLE WASTE — Any wastes that can in the Authority's judgment harm either the sewers or sewage treatment process or equipment; can have an adverse effect upon the receiving stream; can otherwise endanger life, health or property; or which constitutes a public nuisance.

OWNER — Any person vested with ownership, legal or equitable, sole or partial, of any property located in the sewered area.

PARTS PER MILLION (PPM) — A weight-to-weight ratio; the parts-per-million value multiplied by the factor 8.345 shall be equivalent to pounds per million gallons of water.

PERSON — An individual, a partnership, an association, a corporation, a joint-stock company, a trust, an unincorporated association, a

governmental body, a political subdivision, a municipality, a municipality authority or any other group or legally recognized entity. The masculine gender shall include the feminine, and the singular shall include the plural where indicated by the context.

pH — The logarithm of the reciprocal of the weight of hydrogen ions in grams per liter of solution, indicating the degree of acidity or alkalinity of a substance. A "stabilized pH" will be considered as a "pH" which does not change beyond the specific limits when the waste is subject to aeration. It shall be determined by one of the accepted methods described in the latest edition of "Standard Methods for Examination of Water and Wastewater," published by the American Public Health Association.

PHOSPHORUS (P) — The sum of the orthophosphate, polyphosphate, and organic phosphate form of phosphorus expressed in milligrams per liter.

POLLUTANTS — Any material that, when added to water, shall render that water (either because of the nature of quantity of the material) unacceptable for its original intended use; including, but not limited to, dredged spoil, solid waste, incinerator residue, sewage, garbage, sewage sludge, chemical wastes, biological materials, radioactive materials, heat, sand, cellar dirt, and industrial, municipal, and agricultural wastes.

POLLUTION — The man-made or man-induced alteration of the chemical, physical, biological, and/or radiological integrity of water.

PRETREATMENT or TREATMENT — The reduction of the amount of pollutants, the elimination of pollutants, or the alteration of the nature of pollutant properties in wastewater to a less harmful state prior to or in lieu of discharging or otherwise introducing such pollutants into the sanitary sewer system. The reduction or alteration can be obtained by physical, chemical or biological processes, or process changes by other means.

RESPONSIBLE INDIVIDUAL —

(1) The chief executive officer or the chief operating officer of the user facility if the industrial user is a corporation;

(2) A partner or the general manager of the user facility if the industrial user is a partnership;

(3) The owner or the general manager of the user facility if the industrial user is a proprietorship; or

(4) The person duly designated as the responsible individual by a corporation, partnership or proprietorship, provided that such person shall be actually responsible for overall operation of the user facilities.

SANITARY SEWAGE (also referred to herein as "sewage") — Wastewater originating from residential users containing human and customary household wastes, or such wastes from commercial or industrial establishments, but excluding industrial wastes.

SANITARY SEWER — A sewer that conveys sewage or industrial wastes or a combination of both, and into which storm-, surface, and ground waters or unpolluted industrial wastes are not intentionally admitted.

SERVICE LATERAL — Part of the sewer system from the collection sewer to the curb line or right-of-way line.

SEWAGE TREATMENT PLANT — The Valley Forge Treatment Plant and facilities operated for such purpose by the Valley Forge Authority to which the sewer system is to be connected.

SEWER — Any pipe or conduit constituting a part of the sanitary sewer system used or usable for sewage collection purposes and to which ground-, surface and storm water is not intentionally admitted.

SEWERED AREA — That portion of the Township of East Whiteland in which there shall be constructed a sewage collection system of the Authority in accordance with the plans of the Authority's designated consulting engineer, as from time to time constructed and extended.

SEWER SYSTEM — All facilities, as of any particular time for collecting, pumping, treating and disposing of sanitary sewage and industrial wastes, situated in the sewered area and owned and/or operated by the Authority.

SIGNIFICANT INDUSTRIAL USER — Any industrial user of the Valley Forge Wastewater Treatment Facility who has a discharge flow of 25,000 gallons or more per average work day or is found by the Authority, EPA or DER to have significant impact, either potential or realized, either singly or in combination with other contributing industries, on the sanitary sewer system and/or the wastewater treatment facility (either its operational efficiency, effluent quality or quality of the sludge produced by said facility).

SLUG — Any discharge of water, sewage or industrial waste which, in concentration of any given constituent or in quantity of flow, exceeds for any period of longer duration than 15 minutes, more than five times its average hourly concentration or flow during a normal working day.

STANDARD INDUSTRIAL CLASSIFICATION (SIC) — A classification pursuant to the latest Standard Industrial Classification Manual issued by the Executive Office of the President, Office of Management and Budget.

STANDARD METHODS — The laboratory procedures set forth in the following sources: Standard Methods for the Examination of Water and Wastewater, Latest Edition, as amended, prepared and published jointly by the American Public Health Association, American Water Works Association, and Water Pollution Control Federation; Methods for Chemical Analysis for Water and Wastes, prepared and published

by the Analytical Quality Control Laboratory, U.S. Environmental Protection Agency; "Guidelines Establishing Test Procedures for the Analysis of Pollutants," enumerated in 40 CFR 436.1 et seq. (1975), as amended; and/or any other procedures recognized by the U.S. Environmental Protection Agency and the Commonwealth of Pennsylvania.

STORM SEWER — A sewer that carries storm-, surface and ground water drainage but excludes sewage and industrial wastes.

STREET — Any street, highway, road, lane, court, alley and public square.

SUSPENDED SOLIDS (SS) or TOTAL SUSPENDED SOLIDS (TSS) — Solids that either float on the surface of or are in suspension in water, sewage or other liquids and which are removable by laboratory filtration. The standard laboratory procedure shall be that found in the latest edition of "Standard Methods."

TOTAL SOLIDS — The sum of suspended and dissolved solids.

TOWNSHIP — East Whiteland Township or its authorized representatives, including the East Whiteland Municipal Authority where appropriate.

TOXIC POLLUTANT — Any pollutant or combination of pollutants listed as toxic in regulations promulgated by the Administrator of the Environmental Protection Agency under the provision of CWA 307(a) or other Acts.

UNPOLLUTED WATER OR WASTE — Water that has not had its pollutant level raised by the user, or any water or waste containing none of the following: free or emulsified grease or oil; pH less than 6.0 or greater than 9.0; phenols or other substances imparting taste and odor to receiving waters; toxic or poisonous substances in suspension, colloidal state or solution; obnoxious or odorous gases. It shall contain not more than 1,000 milligrams per liter by weight of dissolved solids of which not more than 250 milligrams per liter shall be as chloride and not more than 10 milligrams per liter each of nonfilterable residue and BOD. The color shall not exceed 50 color units. Analysis of the above-mentioned substances shall be made in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater" or "Methods of Chemical Analysis of Water and Wastes," cited above.

USER — Any person who contributes, causes or permits the contribution of wastewater into the sanitary sewer system.

WASTEWATER — The liquid and water-carried industrial or domestic wastes from dwellings, commercial buildings, industrial facilities, and institutions, together with any groundwater, surface water and stormwater that may be present, whether treated or untreated, which is contributed into or permitted to enter the treatment plant.

B. "May" is permissible; "shall" is mandatory.

§ 154-15. Unsanitary deposits.

It shall be unlawful for any person to place, deposit, or permit to be deposited in any unsanitary manner upon public or private property within the Township of East Whiteland, or in any area under the jurisdiction of said Township, any human or animal excrement, garbage, or other objectionable waste.

§ 154-16. Discharges to natural outlets.

It shall be unlawful to discharge to any creek, stream or other area which may continuously or from time to time carry a natural flow or surface or subsurface water within the Township of East Whiteland or in any area under the jurisdiction of said Township, any sanitary sewage, industrial wastes, or other polluted waters, except where suitable treatment has been provided in accordance with subsequent provisions of this Part 2 and any applicable laws of the Commonwealth of Pennsylvania relating to sewage and industrial waste.

§ 154-17. Duty to connect to public sewer.

A. Notice.

(1) Whenever any sewer constituting a branch or extension of the Township sanitary sewer system has been completed and is ready for public use, it shall be the duty of the Authority to cause a printed or written notice of the completion of such sewer, together with a copy of this Part 2, to be served in the manner hereinafter provided on the owner as defined in Subsection B(3).

(2) If the Authority shall so elect, notice of such completion may also be advertised in one newspaper circulated in the Township.

(3) Such notice in each instance to state that it is the duty of such owners to cause buildings erected on their premises requiring sewage drainage to be connected therewith at their own expense and subject to the payment of the tapping fee required by § 154-66.

B. Duty to connect.

(1) It shall be the duty of every owner, as defined in Subsection B(3) hereof, of the existing premises to cause each old or new building erected thereon requiring sewage drainage to be separately connected to the Township sewer within 60 days from the time of the receipt of the aforesaid notice.

(2) If a new building is erected on any premises the duty to connect shall arise upon completion of said building and must be completed within 60 days of said completion.

(3) "Owner" for the purpose of this § 154-17 shall mean the owner or owners of any type of building or structure which contains sewage

facilities where some point of the structure is within 150 feet of a Township collection sewer.

(4) Special exceptions to this requirement may be granted by the Authority upon the showing of unusual hardship or circumstance.

(5) If at any time the Authority shall deem it necessary for the public health to require that any building erected on premises abutting on, adjoining, or adjacent to any Township sewer, wheresoever any such building may be located on such premises, shall be connected with such sewer, it shall cause to be served upon the owner or owners of any such building, in the manner hereafter provided, a copy of this Part 2 and a printed or written notice directing that the necessary connections be made within 60 days from the date of its service.

C. Failure to connect. If any owner of premises situated along the line of a Township sewer shall fail to heed the notice, the Authority shall cause the necessary connections to be made, and, upon completion of the work for the same shall render a bill covering the cost of said work to the owner of such premises. All such bills shall contain a notice that, if bills be not paid within 60 days after date thereof, the same shall be collected in the manner provided by law.

D. Obtaining permit to connect.

(1) No person shall uncover, connect with, make any opening into or use, alter or disturb, in any manner, any sewer or sewer system without first obtaining written permission from the Authority. Such permission will be issued to owners required to connect to a Township collection sewer by this Part 2. The improved property owner shall apply to the Authority for the required permit, stating his desire and intention to connect to the sewer system and noting the type of existing facilities to be abandoned. At least 48 hours' notice prior to the connection shall be given the Authority so arrangements can be made to inspect and test the connection works. (See also §§ 154-60, 154-62, 154-67, 154-68 and 154-77.)

(2) Before commencing any phase of the construction for building sewer connection, the plumbing contractor shall locate and expose the existing wye or stub provided to connect to the Township sewer. No cap, stopper or plug shall be removed or punctured until permission has been granted by an authorized Municipal Authority Engineer. If no connection is provided, the contractor shall locate and expose the Township sewer main at the point where the connection is to be made.

(3) A 1/4 inch per foot gradient is required from point of entry at the building to sewer main. A check shall be made to verify that there is a 1/4 inch per foot gradient by obtaining the differential elevation using approved methods. If the elevations are such that the connection cannot be made at 1/4 inch per foot gradient, he shall

contact the Municipal Authority Engineer for permission to install the line at a minimum grade of 1/8 inch per foot. Under no circumstances shall the trench between connections be excavated before it is ascertained that the minimum can be obtained.

§ 154-18. Liability for costs of violations.

Any person violating any of the provisions of this Part 2 shall become liable to the Authority for any expense, loss, or damage occasioned to the Authority by reason of such violation.

§ 154-19. Notice of change of ownership.

Each property owner shall give the Authority written notice of any change of ownership of any improved property.

§ 154-20. Notice of vacating possession.

When the premises are vacated, the owner of improved property shall give written notice to the Authority, and the owner will be responsible for all sewer charges and fees until such notice is given.

§ 154-21. Disposition of private sewage treatment plants.

A. In addition to the requirements of § 154-17, where there exists on the premises abutting, adjoining, or adjacent to a Township sanitary sewer a privately owned, operated, or maintained sewage treatment plant or other process designed and maintained for the purpose of processing or packaging sanitary sewage, the Authority shall submit to the Board of Township Supervisors proposals as to the disposition of such privately owned, operated, or maintained sanitary sewage packaging plant or processing plant.

B. The aforementioned proposals may include, but are not limited to, one or more of the following:

(1) That the sewage treatment plant or similar sewage processing system be condemned according to law and closed down.

(2) That the sewage treatment plant or similar processing system be converted into a sanitary sewage pretreatment plant, designed for the purpose of treating and processing sewage or industrial effluence so as to conform such sewage or effluence to the requirements of this Part 2 regarding the permissible content of matter permitted to enter the Township's sanitary sewage system.

(3) That the sewage treatment plant or similar processing system be condemned according to law and be purchased by the Authority for use by the Authority in any manner consistent with a design for promoting the public health and welfare, and consistent with the provisions of this Part 2.

§ 154-22. Responsibility for costs of system design beyond minimum required.

Where pursuant to the provisions of this Part 2, the owner of improved property is required by the Authority to install sewage facilities in quantities, sizes and/or capacities in excess of the minimum requirements as provided in this Part 2, the owner of said improved property shall be responsible for all costs incident to the construction, installation and connection of such facilities; provided that the Authority shall be responsible for, but only for, that portion of the costs of such construction, installation and connection which would not have been incurred by the owner had the owner not been required to install sewage facilities in quantities, sizes and/or capacities in excess of the minimum requirements as provided for in this Part 2; but provided further, that the Authority shall not be responsible for costs incident to any requirements for sewage facilities in excess of the minimum requirements, where such excess was necessary in order to accommodate the larger sewage disposal needs of a building or buildings erected on a particular property.

§ 154-23. Failure to comply with notice.

If any person shall fail or refuse, upon receipt of written notice of the Authority, to remedy any unsatisfactory conditions or violations of this Part 2 within 60 days of receipt of such notice, the Authority may refuse to permit such person to discharge sanitary sewage and industrial wastes into the sewer system until such unsatisfactory condition shall have been remedied to the satisfaction of the Authority or consulting engineer.

§ 154-24. Right to refuse service upon harmful discharges.

In order to prevent discharge into the sewer system of wastes, the discharge of which is in violation of the provisions of this Part 2 or which may be deemed by the Authority to be harmful to the sewer system or to have a deleterious effect on sewage treatment process, or to have a deleterious effect on the public health, welfare or safety, the Authority shall refuse to any person the privilege of connection of any improved property to a sewer, or to compel discontinuance of use of a sewer by any person, or to compel the pretreatment of industrial and harmful wastes.

§ 154-25. Disclaimer of liability of Authority.

A. The Authority shall not be liable for any damages, expenses, costs, or other injury resulting from leaks, stoppages or defective plumbing, or from any other cause occurring to any premises or within any house or building.

B. The Authority shall not be liable for damages, expenses, costs, or other injury caused by the breakage or stoppage of, or any damage or expense to, any lateral or house connection when the cause thereof is found to be in the lateral or house connection.

C. The Authority shall not be liable for any breaking, stoppage or any damage or expense to any service lateral or building sewer, where the cause thereof is found to be in the building sewer.

D. The Authority shall not be liable for any costs, damages, expenses or other injury caused or occasioned by or in connection with a deficiency or failure of service when occasioned by an emergency, required repairs, or failure from any cause beyond control.

§ 154-26. Conditions of service.

A. The Authority will furnish sewage service only in accordance with the prevailing, and as hereafter revised, rates, rules and regulations of the Authority, which rates, rules and regulations are made a part of every application, permit and contract entered into between the property owner or customer and the Authority.

B. The Authority hereby reserves the right, so often as it may deem necessary, to alter, amend and/or repeal the rates, rules and regulations in part or in whole, to substitute new rates, rules and regulations which altered and/or amended new rates, rules and regulations shall forthwith, after due notice, become and thereafter be a part of every application, permit and contract for sewage service in effect at the time of such alteration, amendment and/or adoption.

ARTICLE III
Building Sewers and Service Laterals

§ 154-27. Size of pipe.

Unless a larger size is required in pursuance of this Part 2, no building sewer shall be less than four inches in diameter.

§ 154-28. Type of pipes.

All building sewers and service laterals shall be constructed by use of one of the following types of pipe:

A. Service weight (SV) cast iron soil pipe at least four inches in internal diameter conforming to "Cast Iron Soil Pipe and Fitting," ASTM A-74-69, latest revision.

B. Polyvinylchloride (PVC) pipe at least four inches in internal diameter gasket type conforming to ASTM D-3034-74SDR35 or equal or Schedule 80 PVC, using solvent cement. The rubber rings to comply with ASTM D-3212.

C. Jointing materials for the various types of pipe shall be as follows:

(1) Cast iron pipe shall have push-on joints consisting of rubber gaskets conforming to the requirements of "Rubber Gaskets for Cast Iron Soil Pipe," ASTM 564-74.

(2) Polyvinylchloride (PVC), four-inch and six-inch pipe shall be joined with separate fluid-tite twin gasket couplings. Each coupling shall consist of a body of extruded stock, internally machined and furnished with two rubber gaskets. Eight-inch diameter and larger diameter pipe shall be joined with bell and spigot type of rubber gasketed joint. Each joint shall consist of a formed bell complete with a single rubber gasket. All fittings shall utilize rubber gasket joints. Rubber gaskets shall comply with the requirements specified in ASTM D-1869, C-361 or C-443.

§ 154-29. Beddings.

Uniform bedding shall be provided along the entire length of a building sewer, and all joints of a building sewer shall be watertight and rustproof. No cement mortar joints shall be used.

A. Trenches (both earth and rock trenches). "First Class Bedding" shall be provided as a foundation for all pipe. The bedding material shall consist of crushed stone conforming to the Commonwealth of Pennsylvania Department of Transportation grading and quality requirements for No. 2B coarse aggregate. The crushed stone shall be placed in the bottom of the trench within six inches of the bottom of pipe, minimum depth of six inches over the pipe.

B. Concrete joints shall be used when tieing new pipe to existing pipe. Proper adopting fittings (i.e., Johns-Manville Duplex couplings for AC to pipe of other material) along with concrete encasement.

§ 154-30. Method of transfer to Authority system.

Where a building or buildings on an improved property, at the time of securing a permit under § 154-17 to connect to a sewer, shall be served by its own sewage disposal system, device, or other form of private sewage disposal, and where such building or buildings are required, pursuant to this Part 2, to be connected to a collection sewer, the existing house sewer or building sewer shall be broken on the structure side of such existing sewage disposal system or device and an attachment shall be made, with proper fittings, to continue such house or building sewer line, as a building sewer undiminished in inside diameter, but not less than four inches, to the service lateral.

§ 154-31. Common trench permitted for building sewers to adjoining property.

A building sewer which serves one improved property may occupy the same trench as a building sewer to serve the next adjoining improved property; and provided that such joint occupancy is by mutual agreement of the owners concerned.

§ 154-32. Responsibility for proper material and connection.

It shall be the duty of every person constructing or owning any building sewer, house drain, soil pipe, waste pipe, vent pipe, plumbing fixtures, or any other passage or connection between a sewer and any grounds, buildings, erections, and in like manner it shall be the duty of the owners of all grounds, buildings, erections, and all parties interested therein or thereof, to cause and require that such building sewer, house drain, soil pipe, waste pipe, vent pipe, plumbing fixtures and every other passage or connection shall be adequate for its purpose, and at all times allow to pass freely all material that enters or should enter the same.

§ 154-33. Notice and approval for changes in connections.

In order to change, alter or modify any building sewer, house drain, service lateral, vent pipe, waste pipe, soil pipe, plumbing fixtures or any other sewer passage or connection, written notice of such must be served on the Authority which must give its written approval before any changes, alterations or modifications shall be made.

§ 154-34. Fittings.

Fittings in a building sewer shall conform to the type of pipe used in construction of such sewer.

§ 154-35. Directional changes in building sewers.

Change in direction in a building sewer must be made by use of "Y" branches or of 1/8, 1/16, 11 1/4 or 1/6 bends.

§ 154-36. Nonpermissible fittings.

Fittings or connections in a building sewer which have an enlargement, chamber or recess with a ledge, shoulder reduction of pipe area that shall offer any obstruction to flow, shall not be allowed.

§ 154-37. Preparation, packing and caulking of joints.

A. Lead joints in cast iron soil pipe in a building sewer shall be packed with oakum in the bell and spigot terminations and thereafter shall be filled with molten lead to a depth of at least one inch for pipes four-inch and six-inch diameter pipe and 1.25 inches for eight-inch and twelve-inch diameter pipe and not to be depressed more than 1/8 inch below the rim of the hub. The lead then must be caulked in place. No paint, varnish or other coating shall be permitted on the jointing material until after the building sewer has been tested and approved as provided in §§ 154-44 and 154-45.

B. Material for hot-poured joints shall not soften sufficiently to destroy the effectiveness of the joint when subjected to a temperature of 160º F., nor be soluble in any of the wastes carried by the drainage system. The joint shall first be caulked tight with jute, hemp, or similar approved material.

§ 154-38. Use of floor drains.

A. Floor drains shall be permitted to be connected to the Building Sewer only where it can be shown to the satisfaction of the Township that their connection is absolutely necessary. Where such drains are permitted, arrangements shall be made to maintain a permanent water-seal in the traps, and such drains shall be provided with check or backwater valves where warranted.

B. A permit shall be obtained from the Authority before any floor drain may be attached to the house drain.

C. No permit for a basement floor drain shall be granted until the owner of the building or his agent has executed, signed and filed a written agreement upon a form furnished by the Township releasing the Township from any damage that may result from the basement being flooded by the stoppage of sewers.

D. Sump pumps shall not be connected to, nor the discharge therefrom flow into, any drain pipe which is connected to a building sewer.

E. See § 154-80 for waters not permitted.

§ 154-39. Cleanouts required.

A. Cleanouts shall be provided in each building sewer at maximum intervals of 75 feet and each change of direction to permit rodding with an auger or tape. Cleanouts shall be constructed by using a "T" or "Y" fitting in the run of pipe with a forty-five-degree bend and riser to the ground surface. The cast iron riser pipes shall be provided with brass screw plug. PVC riser pipes may use brass or PVC screw plug. Risers shall be at a level equal to the finished grade level.

B. Refer to the Typical Building Sewer Sheet, Sketch Number 213A.[2]

§ 154-40. Interceptor traps required.

A. A building sewer shall be provided with horizontal single vented trap, known as an interceptor trap, of not less than four inches inside diameter. The trap shall be provided with a cast iron mushroom vent. The trap shall be cast iron or polyvinylchloride (PVC). Fabricated PVC traps shall be as shown on Sketch 213A or as may be approved by the Authorities Engineer. All materials shall comply with § 154-28.

B. The vented trap shall be constructed at the lower end of the building sewer. The 10 feet dimension shown on the sketch is approximate and may be revised according to conditions encountered in the field. Where the distance from the main sewer to the building is less than 75 feet, the vented trap may be used as the cleanout in lieu of the cleanout located approximately 10 feet from the building as shown on Sketch 213A.

§ 154-41. Location of interceptor traps.

The interceptor trap described under § 154-40 shall be located at a point to be determined and approved by the Authority and in accordance with rules and regulations applicable thereto as adopted by Authority. Such trap and its vent shall be on the property side of the curbline or right-of-way line.

§ 154-42. Special conditions.

Wherever in the opinion of the Authority the trenching conditions require either a specific type of pipe, jointing material or encasement in concrete, such materials as it may direct shall be installed to protect the property owner and/or the Township for special conditions as follows:

A. Where the trench is less than four feet deep in a traveled roadway, special bedding, consisting of crushed stone or concrete cradle, as directed by the Township shall be used.

B. Service laterals and building sewer for all service stations, garages, or other establishments storing, using, or dispensing gasoline, kerosene, benzine, naphtha, fuel oil or other flammable or explosive liquid, solid

---

2. Editor's Note: Said sketch is included at the end of this chapter.

or gas, or similar solvents shall be constructed of cast iron pipe with leaded joints.

C. Where lines are laid in fill or within 18 inches of potable water lines, cast iron soil pipe with caulked and lead gasket joints shall be used.

D. Where water, excessive amounts of wet backfill or marshy ground exists the use of cast iron pipe will be required.

E. Where foundation conditions are poor due to ground water, or subsurface materials, the building sewer shall be laid on a base of Pennsylvania Department of Transportation No. 2B crushed stone at least six inches in depth.

F. Backfilling of pipe trenches on Township roads and right-of-ways shall be made with loose earth, free of rock and stones, and carefully tamped about and over the pipe in six-inch layer for a depth of two feet above the pipe, when coarser materials may be backfilled and the trench brought to its original condition. Backfilling of pipe trenches on state roads and right-of-way shall conform to the Pennsylvania Department of Transportation Specifications, Form 408-1970 and Form 945B REV.

§ 154-43. Slope and grading.

The slope or grade of a building sewer shall be no less than 1/4 inch per foot of length and shall be sloped downward in the direction of flow. If elevations are such that the connection cannot be made at 1/4 inch per foot the Municipal Authority may grant permission to install the line at some gradient less than 1/4 inch per foot but in no case less than 1/8 inch per foot.

§ 154-44. Testing, approval and observation.

A. The Authority or the consulting engineer shall observe all testing of a building sewer. All equipment and material required for testing shall be furnished by the owner of the improved property to be connected to a sewer.

B. In the event a building sewer is not approved by the Authority further test or tests shall be made following completion of necessary corrections. A fee as set from time to time by resolution of the Board of Supervisors or the Authority will be charged by the Authority for observation of each test subsequent to the initial test. **[Amended 11-21-2000 by Ord. No. 132-2000]**

§ 154-45. Approval required prior to covering building sewers.

No building sewer shall be covered until it has been inspected, tested, as provided in § 154-44, and approved. If any part of a building sewer is covered before being inspected, tested and accepted, it shall be uncovered for inspection and testing at the cost and expense of the owner of the improved property.

§ 154-46. Safe and sanitary operation.

Every building sewer of any improved property shall be maintained in a sanitary and safe operating condition by the owner.

§ 154-47. Excavations.

Every excavation for a building sewer or service lateral shall be guarded adequately with barricades and lights to protect all persons from damage and injury. Streets, sidewalks and other public property disturbed in the course of installation of a building sewer or service lateral shall be restored, at the cost and expense of the owner of the improved property being connected, in a manner satisfactory to the Township.

§ 154-48. Restoration of excavations; permits and standards.

Wherever the surface of any public street, sidewalk or cartway is disturbed by construction of the service laterals, the surfacing material must be restored in kind and maintained to the satisfaction of the Authority and Township. Any and all construction in a public street of the Township shall be in compliance with the ordinances of the Township and any and all construction in a state highway shall be in compliance with Pennsylvania Department of Transportation requirements and specifications. All permits shall be obtained before construction is commenced, including the permits required for opening, or disturbing the surface of streets controlled by the Township and state. All Pennsylvania Department of Transportation permits will be obtained by the Township. All permits issued for construction will require that streets or roads under construction remain passable for vehicular traffic during the period of construction.

§ 154-49. Supervision of construction by Authority.

The construction of service laterals and building sewers shall at all times, be subject to supervision and inspection by the Authority or its representative and shall conform to the Authority specifications. The service laterals and building sewer shall not be covered until permitted by the Authority and all backfilling or trenches shall be under its supervision and shall be compacted according to § 154-42.

§ 154-50. Sewers through private land.

Connections with sewers where same are run through private property shall in all respects be governed by this Part 2.

§ 154-51. Capped sewer and lateral; private disposal.

A. In all cases where collection sewers are not available either in the street or in easements accessible to any property for which subdivision is requested or intended, the developer shall be responsible to install collection sewers, sewer service laterals, and building sewers to connect with each dwelling unit, but such sewers shall be capped at the

appropriate points (which is designated and approved by Authority) until the Authority sewers become available. In such event the owner shall install on-site disposal units or an on-site temporary treatment facility, in each case, in accordance with the regulations of the Chester County Health Department.

B. All capped sewers shall be designed, installed, accepted and dedicated to the Authority in accordance with this Part 2.

§ 154-52. Use of old building sewers.

A. Old building sewers may be used in connection with new buildings only when they are found, on examination and test by the Authority, to meet all requirements of this Part 2.

B. All asphalt-paper pipe, such as Orangeburg, shall be replaced with pipe material used for making the lateral connection except in unusual conditions permitted by the Authority's engineer.

§ 154-53. Depth and positioning.

No building sewer shall be laid parallel to or within three feet of any bearing wall, which might thereby be weakened. The depth shall be sufficient to afford protection from frost.

§ 154-54. Use of power other than gravity.

In all buildings in which any building drain is too low to permit gravity flow to the collection sewer, sanitary sewage carried by such drain shall be lifted by artificial means approved by the Authority and discharged to the building sewer.

§ 154-55. Open trench work required.

All excavations required for the installation of a building sewer shall be open trench work unless otherwise approved by the Authority in writing.

§ 154-56. Testing, approval and tapping.

A. Every building sewer shall be tested by filling the same with water, completely, so that every section shall be tested with not less than a ten-foot head of water. Water shall be kept in the building sewer for 15 minutes before inspection starts and no leakage shall be observable at the time of inspection.

B. Upon approval of the test of a building sewer by the Authority, a certificate of approval will be issued to the owner of the improved property.

C. The applicant for the building sewer connection permit shall notify the Authority when the building sewer is ready for inspection and connection to the public sewer. The removal of the stopper in or tapping

of the public sewer shall be made under the supervision of the Authority or its representatives.

D. Air testing.

(1) Low pressure air testing of building sewers may be used as an alternative for water exfiltration tests. All building sewer connection pipes shall be tested whether the line is under water or not.

(2) The test section of the building sewer shall be plugged at each end. One of the plugs used must be tapped and equipped for the air inlet connection for filling the line from the air compressor. All pipe outlets shall be properly capped or plugged, and carefully braced against the internal pressure to prevent air leakage by slippage and blowout.

(3) The air control equipment shall have a monitoring pressure gage having a pressure range from zero to 15 psi. The gage shall have minimum divisions of 0.10 psi and an accuracy of pms0.5 psi. The air control equipment shall be Cherne Air-Loc equipment as manufactured by Cherne Industrial of Hopkins, Minnesota, or approved equal.

(4) If the time, in minutes and seconds, for the air pressure to drop from 3.5 to 2.5 psig is less than that shown in the table below for the designated pipe size, the section of the pipe undergoing the test shall not have passed the test; therefore, adequate repairs must be made and the line restored.

(5) As a safety precaution, all pneumatic plugs shall be seal tested before being used in the actual test installations.

Time Requirements for Air Testing

Pipe Size (inches)	Time (minutes)
4	2.0
6	3.0
8	4.0
10	5.0

(6) Adjustment and procedures for making air pressure correction for groundwater. An air pressure correction is required when the prevailing ground water is above the sewer line being tested. Under this condition, the air pressure must be increased 0.433 psi for each foot the groundwater level is above the invert of the pipe.

§ 154-57. Building demolition; severance from sewer.

In the event of the demolition of any building, the owner of the building shall be responsible for plugging the existing building sanitary sewer connection at the property line. Any reuse of such connection shall require a building sewer connection permit and connection fee.

§ 154-58. Approval of service laterals; supervision of construction.

No service lateral shall be constructed, laid and connected except in a manner and type approved by the Authority which shall supervise and control the construction of the same.

ARTICLE IV
Connections of Building Sewers

§ 154-59. Separate connections required for each unit.

Each connection unit on each improved property shall be connected separately to a service lateral through a building sewer. Special written permission must be obtained from the Authority to group more than one connection unit on one building sewer.

§ 154-60. Costs to be borne by owner; indemnity of Township.

All costs and expenses of construction of a building sewer and all costs and expenses of connection of a building sewer to the collection sewer or service lateral shall be borne by the owner of the improved property to be connected; and such owner shall indemnify and save harmless this Township and Authority from all loss or damage that may be occasioned, directly or indirectly, as a result of construction of a building sewer or of connection of a building sewer to the sewer lateral and/or collection sewer.

§ 154-61. Materials to be used.

Materials for a building sewer, jointing materials and methods of installation shall be in accordance with requirements of this Part 2, and shall be subject to approval of this Authority.

§ 154-62. Display of permit.

The permit required by § 154-17 shall be displayed prominently upon the improved property to be connected to a sewer at all times during construction of the building sewer and connection of the building sewer to the service lateral and/or collection sewer.

§ 154-63. Permissible types and places of joints and connections.

A. A building sewer shall be connected to a collection sewer at the service lateral or at the place where the wye (Y) in the collection sewer is located. No person shall make a connection directly to or tamper with a collection sewer in any manner, except as herein provided.

B. All work of making connections to any of the Township sewers shall be done under the personal supervision of an authorized representative of the Authority or its consulting engineer and shall conform to the following requirements:

   (1) The location of existing service wye (Y) or house laterals will be secured by the property owner from the Authority records before construction is undertaken so that the house sewer may be properly located. If the existing service wye or service lateral location is not suitable for building sewer connecting alignment or a service wye or service lateral does not exist, the connection to the

collection system shall be made with an approved saddle fitting properly installed and encased in a minimum of six inches of concrete on all sides of fitting. All associated costs shall be paid by the property owner.

(2) Connections to the collection sewer where no branch or wye (Y) fitting has been previously provided shall be made with an approved saddle type fitting properly installed and encased in an envelope of concrete extending completely around the barrel of the collection sewer pipe, and a minimum of six inches either side of fitting; the cost thereof shall be paid by the property owner.

(3) All joints shall be sealed and made watertight, and shall be made smooth and clean inside, with all sewers in proper alignment and of proper grade, so as to provide free flow of sewage matter without any obstructions, and to be made in accordance with the Authority specifications for its sanitary sewers. All work pertaining to the connection with the Authority's sewers shall be, financially and otherwise, the responsibility of the owner of the property with which connection is made, subject to the right of supervision hereby reserved by the Authority.

§ 154-64. Size of connecting pipes.

Connections to the service laterals shall be made of the same pipe diameter (size), properly joined. When the building sewer is made with a pipe of larger diameter than the existing service lateral, the building sewer shall be extended to the collection sewer and connected with a saddle fitting.

§ 154-65. Connections required to comply.

All connections shall be made pursuant to §§ 154-36 and 154-51 and the other provisions of this Part 2.

§ 154-66. Connection fees.

There will be charged and imposed upon the owner of each connection unit a connection fee as set forth in the appropriate resolutions adopted by the Authority from time to time. Such connection fee shall be due and payable to the Authority at the time the connection is made by the owners required to connect to the sewer by Authority ordinance. If the owner fails to connect in the allotted time covered by the ordinance, then the connection fee shall be due and payable 60 days, including the allotted time under the ordinance, after written notice to connect is given to the owner by the Authority. Owners not required to connect but who desire to do so shall pay the connection fee at the time of permit application approval. Refer to Ordinance 5375, latest revision, for tabulation of user charges.

§ 154-67. Authorized plumbers; permit; insurance required.

A. Any individual desiring to do plumbing installation or other plumbing work upon the building sewer and its connection with the service lateral connected with any improved property which is connected to or which is to be connected to a sewer shall obtain from the Authority a permit authorizing such individual to engage in such plumbing work. Such permits shall be issued on a calendar year basis. A fee as set from time to time by resolution of the Board of Supervisors or the Authority shall be charged for issuance of each permit. Such permits shall be issued to such individuals who have demonstrated to the satisfaction of the Authority that they are qualified and capable of performing plumbing work in accordance with good plumbing practice and shall be revocable by this Authority for negligent or willful failure to comply with rules and regulations to be adopted by resolution by the Authority. Any individual who is performing plumbing work must file the following insurance certificates at the time he applies for his permit: **[Amended 11-21-2000 by Ord. No. 132-2000]**

   (1) Property damage.

      (a) Minimum: $50,000.

   (2) Personal injury.

      (a) Injury to any one person minimum: $300,000.

      (b) Injuries in any one incident minimum: $300,000.

B. Such permits shall be reissued from calendar year to calendar year by appropriate endorsement of this Authority or by issuance of a new permit, at the discretion of this Authority upon payment of the required fee. Owners, their agents, employees or independent contractors may do trench preparation work independently of the plumbing work involved upon receipt of a permit from the Authority and subject to compliance with its regulations and inspection requirements.

C. The Township shall be responsible for administering the permits for the licensing of plumbers and collection of all fees.

§ 154-68. Permit required.

Any improved property upon which plumbing work is performed by an individual not possessing a permit as required under § 154-67 will not be approved for connection to a sewer.

ARTICLE V
Private Sanitary Sewage Disposal

§ 154-69. Private disposal prohibited.

Except as hereinafter provided, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool, or other facility intended or used for the disposal of sewage.

§ 154-70. Exceptions.

Where a public sanitary sewer is not available under the provisions of this Part 2, the building sewer shall be connected to a private sewage disposal system complying with the provisions of this article.

§ 154-71. Permit required.

Before commencement of construction of a private sewage disposal system, the owner or his agent shall first obtain a written permit from the County Health Department and file a copy of the permit with the Township.

§ 154-72. Effective date of permit.

The permit for a private sewage disposal system shall not become effective for operation until the installation is completed and inspected by the County Health Department and a copy of the inspection report is filed with the Township.

§ 154-73. Permissible types, locations and discharges.

A. The type, capacities, location, and layout of a private sewage disposal system shall comply with all regulations and ordinances of the County Health Department.

B. If a cesspool is hereinafter constructed on or near a property line, the same shall be backfilled and the system moved to a proper location to comply with the County Health Department regulations.

C. No septic tank or cesspool shall be permitted to discharge into any public sewer or natural outlet.

§ 154-74. Safe and sanitary maintenance.

The owner of premises utilizing private sewage disposal facilities shall operate and maintain the same in a safe and sanitary manner at all times, at no expense to the Authority.

§ 154-75. Declaration of private facilities required.

Pursuant to § 154-17, an application for a permit to connect to a public sanitary sewer must state the type and location of all existing private sewage disposal facilities.

§ 154-76. Effect of availability of public sewerage.

At such time as a public sanitary sewer becomes available for use, as set out in this Part 2, a direct connection shall be made to the public sanitary sewer in compliance with this Part 2, and any cesspools, septic tanks and similar private sewage disposal facilities shall be pumped out of all sewage. Metal tanks shall be collapsed and filled with earth. Concrete tanks are recommended to be filled but it is not mandatory.

§ 154-77. Abandonment and filling of private systems.

A. All abandoned cesspools, septic tanks, privy vaults, seepage pits or similar sanitary waste receptacles shall be pumped out and dirt filled within 60 days after abandonment, under the direction of the Authority. Metal tanks shall be collapsed and filled with earth. Concrete tanks are recommended to be filled but it is not mandatory.

B. An Authority permit shall be required prior to the abandonment of existing facilities.

C. Where a plumber, contractor, employee, or any other agent or independent contractor of the owner of the property is delegated and assumes the responsibility for all service lateral and building sewer work to be performed, the permit shall require the pumping and filling of the abandoned private sewage disposal facility shall be performed by the aforementioned person or persons.

D. Where the particular property owner assumes the responsibility of pumping and filling the facilities to be abandoned, he shall be required to secure a permit from the Authority for this work.

§ 154-78. Public health rules to apply.

No statement contained in this article shall be construed to interfere with any additional requirements that may be imposed by any state or county department, agency or similar entity.

§ 154-79. Unlawful maintenance of private facility; public nuisance; remedy.

The maintenance of a private sewage disposal facility in violation of the provisions of this Part 2 is deemed to be a public nuisance, and all rights and remedies are available to the Authority for the abatement of such a nuisance. Additionally, the person violating the provisions of this article shall be liable for all costs incident to the said abatement.

ARTICLE VI
Permissible Discharges

§ 154-80. Waters not permitted.

A. No roof drainage, cellar, surface water, waste from hydrants or ground water from underground drainage fields shall be admitted or be permitted to drain into the sewer system. The sewer system is intended to convey sanitary sewage and permitted wastes only.

B. No person shall discharge or cause to discharge any stormwater, surface water, foundation drain water, groundwater, roof runoff, subsurface drainage drainage cooling water or unpolluted industrial or unpolluted commercial process water into any sewer. All connections which would result in the discharge of infiltration or inflow are hereby specifically prohibited.

§ 154-81. Industrial discharge.

Except as otherwise provided in this Part 2, all industrial users shall comply with the requirements of Article VII.

§ 154-82. Other prohibited wastes and waters.

Except as otherwise provided in these rules and regulations, no person shall discharge or cause to be discharged any of the following described wastes or waters into the sewer system:

A. Any liquid or vapor having a temperature higher than 150º F.

B. Any water or waste containing more than 100 ppm by weight of fats, oils, or greases.

C. Any liquids, solids or gases which by reason of their nature or quantity are, or may be, sufficient either along or by interaction with other substances to cause fire or explosion or be injurious in any other way to the sanitary sewer system or the treatment plant or to the operation of same. At no time shall two successive readings on an explosion hazard meter, at the point of discharge into the system (or at any point in the system) be more than 5%, nor any single reading over 10%, of the lower explosive limit (LEL) of the meter. Prohibited materials include, but are not limited to, gasoline, kerosene, naphtha, benzene, toluene, xylene, ethers, alcohols, ketones, aldehydes, peroxides, chlorates, perchlorates, bromates, carbides, hydrides and sulfides and any other substances which the Township, the Authority, the Commonwealth of Pennsylvania or EPA has notified the User is a fire hazard or a hazard to the system.

D. Any noxious or malodorous gas or substance which, either singly or by interaction with other wastes, shall be capable of creating a public nuisance or hazard to life or of preventing entry into any sewer or the sewage treatment plant for maintenance and repair.

E. Any ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, bones, feathers, tar, plastic, wood, paunch manure, butcher's offal, whole blood, bentonite, lye, building materials, rubber, hair, leather, porcelain, china, ceramic wastes, asphalt, paint, waxes or any other solid or viscous substance which shall be capable of causing obstruction to the flow in any sewer or other interference with the proper operation of the sewer system or the sewage treatment plant.

F. Any water or waste having a pH lower than 6.0 or higher than 9.0 or having any corrosive property capable of causing damage or hazard to structures or equipment of the sewer system or the sewage treatment plant or to personnel engaged in operation and maintenance thereof.

G. Any water or waste containing any toxic substance in quantity sufficient to constitute a hazard to humans or animals or to interfere with the biochemical processes of the sewage treatment plant or that will pass through the sewage treatment plant in such condition so that it will exceed state, federal or other existing valid requirements for the receiving stream.

H. Any water or waste containing suspended solids of such character and quantity that unusual attention or expense shall be required to handle such water or waste at the sewage treatment plant.

I. Any toxic radioactive isotopes, except by special permission of this Township.

J. Any drainage from building construction.

K. Any garbage that has not been ground to such a degree that all particles will be carried freely in suspension under flow conditions normally prevailing in the sanitary sewers, with no particles under any circumstance, greater than 1/2 inch in any dimension.

L. Containing color from any source that when diluted with distilled water 1:10 will have a luminescence of 10% or better and a purity of 90% or less, at its dominant wave length by the tristimulus method.

M. Having a chlorine demand in excess of 12 mg/l.

N. Prohibited by any permit issued by the Commonwealth of Pennsylvania, or by the U.S. Environmental Protection Agency or any other federal agency.

O. Containing wastes which are not amenable to biological treatment or reduction in existing treatment facilities, specifically nonbiodegradable complex carbon compounds.

P. Quantities of flow or concentrations, or both, which constitute a "slug" as defined in this Part 2.

Q. Any waters which are used for the purpose of diluting wastes which would otherwise exceed applicable maximum concentration limitations.

R. Ammonia nitrogen in such an amount that would cause the Authority to be in noncompliance with regulations of the Commonwealth of Pennsylvania.

S. Wastes containing more than 10 milligrams per liter of hydrogen sulfide, sulfur dioxide, nitrous oxide, or any of the halogens.

§ 154-83. Traps and interceptors required for certain users.

A. Gas stations and garages are required to provide oil interceptor approved by the Authority, in the proper location, where the dangerous liquids are to be intercepted.

B. Restaurants are required by the Authority to provide grease interceptors of the type Series J of the Josam Manufacturing Company or equivalent.

C. Grease, oil, and sand interceptors, and oil reclaimers shall be provided when, in the opinion of the Authority, they are necessary for the proper handling of liquid wastes, sand, and other harmful ingredients; hair traps shall be provided for all barbershops and beauty parlors; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Authority, and shall be located as to be readily and easily accessible for cleaning and inspection. User shall submit certified quarterly report for grease and/or oil interceptors cleanup operation and shall include the location where the material is being disposed of.

§ 154-84. Stormwater drainage.

Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as storm sewers, or to a natural outlet approved by the Authority.

§ 154-85. Authority's right to waive requirements.

Nothing contained in this article shall be construed as prohibiting any special agreement or arrangement between this Authority and any person whereby wastes of unusual strength or character may be admitted into the sewer system by this Authority, either before or after preliminary treatment.

ARTICLE VII
Discharging into Public Sanitary Sewage System
[Amended 12-12-1994; 8-20-2002 by Ord. No. 138-2002]

§ 154-86. Purpose and policy; word usage and definitions.

A. Purpose and policy.

(1) This article sets forth uniform requirements for connected and nonconnected users discharging into the public sanitary sewage system and treatment plant of the Valley Forge Sewer Authority and enables the Authority to comply with all applicable state and federal laws required by the Clean Water Act of 1977 and the General Pretreatment Regulations (40 CFR Part 403).

(2) The objectives of this article are to:

(a) Prevent the introduction of pollutants into the public sanitary sewage system and treatment plant which will interfere with the operation of the sewer system or contaminate the resulting biosolids or otherwise be incompatible to the sewer system;

(b) Prevent the introduction of pollutants into the treatment plant which will pass through the treatment system, inadequately treated, into receiving waters or the atmosphere;

(c) Improve the opportunity to recycle and reclaim wastes and biosolids from the sewer system;

(d) Provide for equitable distribution of the cost of the treatment plant operation and maintenance.

(3) This article provides for the regulation of contributors to the public sanitary sewage system through the execution of agreements, the issuance of permits to certain nondomestic users, the issuance of licenses to waste haulers and through enforcement of general requirements for other users, authorizes monitoring and enforcement activities, requires user reporting, assumes that existing customers' approved and authorized capacity will not be preempted, and provides for the setting of fees for the equitable distribution of costs resulting from the program established herein.

B. Word usage and definitions. Unless the context specifically indicates otherwise, the following terms and phrases, as used in this article, shall have the meanings hereinafter designated. Words in the present tense include the future. The singular number includes the plural number. The plural number includes the singular number. "Shall" is mandatory; "may" is permissive.

AUTHORITY — The Valley Forge Sewer Authority or its authorized representatives.

BASELINE MONITORING REPORT — The report required in 40 CFR Part 403.12, to be submitted by all industrial users or waste generators subject to national categorical pretreatment standards.

BEST MANAGEMENT PRACTICES (BMPs) — Schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to implement the prohibitions listed in 40 CFR Part 403.5(a)(1) and (b). BMPs also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw materials storage.**[Added 2-11-2009 by Ord. No. 216-2009]**

BIOSOLIDS — The primarily solid organic material recovered from a sewage treatment process and recycled especially as a fertilizer.

BOD (biochemical oxygen demand) — The quantity of dissolved oxygen consumed in the biochemical oxidation of the organic matter in waste under standard laboratory procedure in five days at 20º C., expressed in milligrams per liter (mg/L). It shall be determined by one of the acceptable methods described in 40 CFR Part 136 and amendments thereto, or by any other methods approved by the Environmental Protection Agency (EPA).

CATEGORICAL INDUSTRIAL USER — Any industrial user subject to a national categorical pretreatment standard.

CATEGORICAL WASTE GENERATOR — Any waste generator subject to a national categorical pretreatment standard.

CLEAN WATER ACT (CWA) — Public Law 92-500, October 18, 1972, 33 U.S.C. § 1251 et seq.; as amended by PL 95-2 17, December 28, 1977; PL 97-177, December 29, 1981; PL 97-440, January 8, 1983, and PL 100-04, February 4, 1987, and any subsequent amendments or reauthorizations thereto.

COLOR — The color of the light transmitted by the waste solution after removing the suspended material, including the pseudocolloidal particles.

COMMERCIAL DISCHARGE PERMIT — A permit issued to those industrial users that the Authority does not classify as significant industrial users, but are considered to have an impact, either potential or realized, either singly or in combination with other contributing commercial or industrial establishments, on the public sanitary sewage system and/or the treatment plant (either its operational efficiency, effluent quality or quality of the biosolids produced by such facility).

COMMERCIAL USER or COMMERCIAL ESTABLISHMENT — A property which is intended to be used for the purpose of carrying on a trade, business or profession, or for social, religious, educational, charitable or public uses, or a person discharging waste generated by the trade, business, profession, social, religious, educational, charitable or public use of the property.

COMPOSITE SAMPLE — A sample consisting of a combination of individual samples that are either time- or flow-proportioned or both, obtained at regular intervals over a period of time and shall reasonably reflect the actual wastewater or waste discharge conditions for that period of time.

CONNECTED USER — A user located in the Authority service area that discharges into the public sanitary sewage system through a direct connection point that has been approved by the Authority.

COOLING WATER — The water discharged from any system of condensation, including but not limited to air conditioning, cooling or refrigeration.

DAILY COMPOSITE SAMPLE — A sample consisting of a combination of individual samples, regardless of flow, collected at regular intervals over a period of time; the sampling duration shall be not less than 20 hours, but shall not exceed 28 hours, or as specified in an industrial waste discharge permit or commercial discharge permit.

DEPARTMENT OF ENVIRONMENTAL PROTECTION (DEP) — The Department of Environmental Protection of the Commonwealth of Pennsylvania, or any department or agency of the commonwealth succeeding to the existing jurisdiction or responsibility of the Department of Environmental Protection.

DISSOLVED SOLIDS — That concentration of matter in a waste consisting of colloidal particulate matter, and both organic and inorganic molecules and ions present in solution that pass through a standard filter according to the approved procedures outlined in 40 CFR Part 136 or amendments thereto, or outlined in any other procedure approved by the EPA.

DOMESTIC USER — Any connected user discharging only sanitary sewage. This discharge shall not exceed an average daily total suspended solids concentration of 250 milligrams per liter (mg/L) and an avenge daily BOD concentration of 250 milligrams per liter (mg/L).

ENVIRONMENTAL PROTECTION AGENCY (EPA) — The Environmental Protection Agency of the United States, or any agency or department of the United States succeeding to the existing jurisdiction or responsibility of the Environmental Protection Agency.

GARBAGE — Solid wastes from the domestic and commercial preparation, cooking and dispensing of food, and from the commercial handling, storage and sale of produce.

GRAB SAMPLE or INSTANTANEOUS GRAB SAMPLE — A sample taken from a wastewater or waste with no regard to flow in the wastewater or waste and collected over a period of time not exceeding 15 minutes but shall reasonably reflect actual discharge conditions for that period.

GROUND GARBAGE — Garbage that has been shredded to such a degree that all its particles will be carried freely under normal sewer flow conditions, with no particle greater than 1/2 inch in any dimension.

GROUNDWATER — Water which is standing in or passing through the ground.

HOLDING TANK — A watertight receptacle designed to receive and retain wastes and is constructed to facilitate the ultimate disposal of the wastes at another site.

HOLDING TANK WASTE — The wastes originating from normal household activities containing human and customary household wastes, or such wastes from commercial or industrial establishments, but excluding industrial wastes. The waste must be certified by a waste hauler licensed by the Authority as sanitary sewage, and must be stored in such a way as not to concentrate said waste to a level of total suspended solids exceeding 1,000 milligrams per liter (mg/L).

HOUSEHOLD WASTE — The water-carried waste originating from normal household functions such as waste from kitchens, toilets, lavatories and laundries, or such waste from industrial or commercial establishments, but excluding industrial waste.

INDIRECT DISCHARGE or DISCHARGE — The introduction of pollutants into the Authority's public sanitary sewage system from any nondomestic source regulated under Section 307(b), (c) or (d) of the Clean Water Act.**[Added 2-11-2009 by Ord. No. 216-2009]**

INDUSTRIAL USER — Any connected user which is not a domestic user.

INDUSTRIAL WASTE — Any liquid, solid or gaseous substance, whether or not solids are contained therein, discharged from any user during the course of any industrial, manufacturing, trade, or business process or in the course of development, recovery or processing of natural resources, or any wastes having any of the characteristics described under § 154-87A of this article (General discharge prohibitions), as distinct from sanitary sewage.

INDUSTRIAL WASTE DISCHARGE PERMIT — A permit issued to a significant industrial user in accordance with § 154-89 of this article.

INFILTRATION — The groundwater unintentionally entering the public sanitary sewage system, including building foundation drains and sewers, from the ground through such means as, but not limited to, defective pipes, pipe joints, connection or manhole walls. Infiltration does not include, and is distinguishable from, inflow.

INFILTRATION/INFLOW — The total quantity of water from both infiltration and inflow without distinguishing the source.

INFLOW — The water discharged into a public sanitary sewage system, including building drains and sewers, from such sources as, but not limited to: roof leaders, cellar, yard and area drains; foundation drains; unpolluted cooling water discharges; drains from springs and swampy areas; manhole covers; cross connection from storm sewer and/or combined sewers; catch basins; stormwater; surface runoff; street wash water; or drainage. Inflow does not include, and is distinguishable from, infiltration.

INTERCEPTOR — A device designed and installed so as to separate and retain for removal by automatic or manual means, deleterious, hazardous or objectionable waste, including but not limited to grease, oil or sand, while permitting sanitary sewage or industrial waste to discharge by gravity into a public sanitary sewage or on-site drainage system.

INTERFERENCE — A discharge which, alone or in conjunction with a discharge or discharges from other sources, inhibits or disrupts the POTW, it's treatment processes or operations and results in a violation of any requirement of the treatment plant's NPDES permit or prevents biosolids use or disposal in compliance with applicable federal or state statutes or regulations. The term includes those discharges that cause a prevention of biosolids use or disposal by the treatment plant in accordance with 405 of the Act (33 U.S.C. § 1345) or any criteria, guidelines, or regulations developed pursuant to the Solid Waste Disposal Act (SWDA), the Clean Air Act, the Toxic Substances Control Act, 40 CFR Part 503, or more stringent state criteria, including those contained in any state biosolids management plan prepared pursuant to Title IV of SWDA or any more stringent DEP criteria, guidelines or regulations pursuant to the Solid Waste Management Act (SWMA),[3] the Clean Streams Law (CSL),[4] or the Air Pollution Control Act (APCA)[5] applicable to the method of disposal or use employed by the treatment plant, and those discharges that cause a pass through or disrupt operations at the treatment plant or in the public sanitary sewage system.

MANHOLE — A shaft or chamber leading from the surface of the ground to a sewer, large enough to enable a man to gain access to the latter.

Mg/L or mg/L — Milligrams per liter.

NATIONAL CATEGORICAL PRETREATMENT STANDARD — Any regulation containing pollutant discharge limits promulgated by the EPA in accordance with 40 CFR Chapter I, Subchapter N, Parts 405-471 and Section 307 (b) and (c) of the Act (33 U.S.C. § 1317) which applies to a specific category of industrial user or waste generator.

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMIT (NPDES permit) — A permit issued under the National Pollutant Discharge Elimination System (NPDES) for discharge of wastewater to the navigable waters of the United States pursuant to Section 402 of the Clean Water Act, as amended.

NEW SOURCE — Any building, structure, facility or installation from which there is or may be a discharge of pollutants, the construction of which commenced after the publication of proposed pretreatment standards under Section 307 (c) of the Clean Water Act which will be

---

3. **Editor's Note: See 35 P.S. § 6018.101 et seq.**
4. **Editor's Note: See 35 P.S. § 691.1 et seq.**
5. **Editor's Note: See 35 P.S. § 4001 et seq.**

applicable to such source if such standards are thereafter promulgated in accordance with that section, provided that the building, structure, facility or installation is constructed at a site at which no other source is located; or the building, structure, facility or installation totally replaces the process or production equipment that causes the discharge of pollutants at an existing source; or the production or wastewater generating processes of the building structure, facility or installation are substantially independent of an existing source at the same site. In determining whether these are substantially independent, factors such as the extent to which the new facility is integrated with the existing plant, and the extent to which the new facility is engaged in the same general type of activity as the existing source should be considered. Determination of "new source" status shall be consistent with the provisions of 40 CFR Part 403.3 (k)(1), (2) and (3).

NONCONNECTED USER — Any user who contributes waste (including trucked industrial waste, domestic holding tank waste or septage) to the treatment plant by transporting or allowing the transport of such waste by vehicle and allows or causes the discharge of said trucked waste into the treatment plant at such a discharge point and under such conditions as may be approved by the Authority.

NORMAL DOMESTIC STRENGTH SEWAGE — Wastewater or sewage having an average daily total suspended solids concentration of not more than 250 milligrams per liter (mg/l) and an avenge daily BOD of not more than 250 milligrams per liter (mg/L) and excluding toxic and/or flammable wastes.

OBJECTIONABLE WASTE — Any wastes that can, in the Authority's judgment, harm either the sewer system or treatment plant process or equipment, have an adverse effect on the receiving stream; endanger life, health or property; or which constitutes a public nuisance.

OWNER — Any person vested with ownership, legal or equitable, sole or partial, of any property, or his authorized representative.

PASS THROUGH — A discharge which exits the treatment plant into waters of the United States in quantities or concentrations which, alone or in conjunction with other discharges, is a cause of a violation of the treatment plant's NPDES permit or of any applicable local, state or federal water quality criteria (including an increase in the magnitude or duration of a violation).

PERSON — Includes an individual, a partnership, an association, a corporation, a joint-stock company, a trust, an unincorporated association, a governmental body, a political subdivision, a municipality, a municipality authority or any other group or legally recognized entity. The masculine gender shall include the feminine, and the singular shall include the plural where indicated by the context.

pH — The logarithm of the reciprocal of the concentration of hydrogen ions in grams per liter of solution indicating the degree of acidity or alkalinity of a substance. pH shall be determined by one of the accepted

methods described in 40 CFR Part 136 and amendments thereto, or by any other method approved by the EPA.

POLLUTANTS — Any material that, when added to water, shall render that water (either because of the nature or quantity of the material) unacceptable for its original intended use, including, but not limited to dredged spoil; solid waste; incinerator residue; sewage; garbage; biosolids; chemical wastes; biological materials; radioactive materials; heat; sand; cellar dirt; and/or industrial, municipal, and agricultural wastes.

POLLUTION — The man-made or man-induced alteration of the chemical, physical, biological, and/or radiological integrity of water.

PRETREATMENT — The reduction of the amount of pollutants, the elimination of pollutants, or the alteration of the nature of pollutant properties in a waste to a less harmful state prior to or in lieu of discharging (either by a connected user or nonconnected user through a licensed waste hauler) or otherwise introducing such pollutants into the public sanitary sewage system. The reduction or alteration can be obtained by physical, chemical or biological processes, or by process changes by other means.

PRETREATMENT REQUIREMENT — Any substantive or procedural requirement related to pretreatment, other than a pretreatment standard, imposed on an industrial user or waste generator.

PRETREATMENT STANDARD — Any regulation containing pollutant discharge limits promulgated by the EPA in accordance with Section 307 (b) and (c) of the Act (33 U.S.C. § 1317), which applies to industrial users and including prohibitive discharge limits established pursuant to 40 CFR 403.5.

PROCESS STREAM OF THE TREATMENT PLANT — The forward flow of waste through various treatment units of the treatment plant, including primary clarifiers, aeration tanks, secondary (final) clarifiers and chlorine contact tanks, and including holding tank waste or trucked industrial waste discharged directly into one of those treatment units.

PROCESS WASTE — Any water which, during manufacturing or processing, comes into direct contact with, or results from the production or use of any raw material, intermediate product, finished product, by-product or waste product, excluding noncontact cooling water and boiler blowdown.

PUBLIC SANITARY SEWAGE SYSTEM (sometimes called the sewer system) — All sanitary sewers, all pumping stations, all force mains, all sewage treatment works, and all other sewage facilities owned or leased and operated by the Authority for the collection, transportation and treatment of sanitary sewage and industrial wastes and septage, together with their appurtenances, and any additions, extensions or improvements thereto. It shall also include sewers within the Authority's service area which serve one or more persons and discharge into the public sanitary sewage system, even though those sewers

may not have been constructed by the Authority and are not owned or maintained by the Authority. It does not include separate storm sewers or culverts which have been constructed for the sole purpose of carrying stormwater or surface runoff, the discharge from which is not and does not become tributary to the treatment plant.

REPORT ON COMPLIANCE WITH NATIONAL CATEGORICAL PRETREATMENT STANDARDS or NINETY-DAY COMPLIANCE REPORT — The report required by 40 CFR Part 403.12 (d), to be submitted by all industrial users or waste generators subject to national categorical pretreatment standards.

RESPONSIBLE INDIVIDUALS —

(1) A president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy- or decision-making functions for the corporation.

(2) The manager of one or more manufacturing, production, or operation facilities employing more than 250 persons or having gross annual sales or expenditures exceeding $25,000,000 (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.

(3) A general partner or proprietor if the industrial user submitting the reports required by paragraphs (b), (d) and (e) of 40 CFR Part 403.12 is a partnership or sole proprietorship respectively.

(4) A duly authorized representative of the individual designated in Subsection (1) or (2) if:

(a) The authorization is made in writing by the individual described in Subsection (1) or (2);

(b) The authorization specifies either an individual or a position having responsibility for the overall operation of the facility from which the industrial discharge originates, such as the position of plant manager, operator of a well, or well field superintendent, or a position of equivalent responsibility, or having overall responsibility for environmental matters for the company; and

(c) The written authorization is submitted to the control authority.

(5) If an authorization under Subsection (3) is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, or overall responsibility for environmental matters for the company, a new authorization satisfying the requirements of Subsection (3) must be submitted to the control authority prior to or together with any reports to be signed by an authorized representative.

SANITARY SEWAGE — Wastes originating from domestic users containing human and customary household wastes, or such wastes from commercial or industrial establishments, but excluding industrial wastes.

SANITARY SEWER — Any pipe or conduit constituting a part of the sewer system, or usable for sewage collection purposes, which carries wastewater and to which stormwater, surface and groundwater are not admitted and which discharges to the treatment plant owned by the Valley Forge Sewer Authority.

SEPTAGE — Household waste from normal household functions, or such waste from commercial or industrial establishments, concentrated or treated in such a manner so as to concentrate the total suspended solids in such waste to a level at which it is treatable through the septage discharge station at the treatment plant.

SEPTAGE DISCHARGE STATION — One of the locations at the treatment plant designated by the Authority to receive septage, holding tank waste or trucked industrial waste which is not discharged directly into the process stream of the treatment plant.

SEWAGE (also referred to as wastewater) — Any sanitary sewage or industrial waste, carried either separately or in combination, that are discharged into the public sanitary sewage system by a connected user, or any trucked industrial waste or holding tank waste generated by a waste generator and transported to the treatment plant by a licensed waste hauler and discharged into the process stream of the treatment plant as a Tier I Waste.

SIGNIFICANT INDUSTRIAL USER —

(1) Except as provided in Subsection (2) of this definition, shall mean:

   (a) All industrial users subject to categorical pretreatment standards under 40 CFR 403.6 and 40 CFR Chapter I, Subchapter N; and

   (b) Any other industrial user that: discharges an average of 25,000 gallons per day or more of process waste to the POTW (excluding sanitary, noncontact cooling and boiler blowdown wastewater); contributes a process wastestream which makes up 5% or more of the average dry weather hydraulic or organic capacity of the POTW treatment plant; or is designated as such by the Authority on the basis that the industrial user has a reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement [in accordance with 40 CFR 403.8 (f) (6)].

(2) Upon a finding that an industrial user meeting the criteria in Subsection (1)(b) of this definition has no reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement, the Authority may at any

time, on its own initiative or in response to a petition received from an industrial user or POTW, and in accordance with 40 CFR 403.8 (f) (6), determine that such industrial user is not a significant industrial user.

SIGNIFICANT NONCOMPLIANCE (SNC) — A violation by an industrial user meeting one or more of the following criteria [40 CFR 403.8 (f) (2)(vii)]:**[Amended 2-11-2009 by Ord. No. 216-2009]**

(1) Chronic violations of waste discharge limits, defined here as those in which 66% or more of all of the measurements taken during a six-month period exceed, by any magnitude, the daily maximum, average or instantaneous limit for the same pollutant parameter;

(2) Technical review criteria (TRC) violations, defined here as those in which 33% or more of all of the measurements for each pollutant parameter taken during a six-month period equal or exceed the product of the daily maximum, average or instantaneous limit multiplied by the applicable TRC (TRC = 1.4 for BOD, TSS, fats, oil, and grease, and 1.2 for all other pollutants except pH).

(3) Any other violation of a pretreatment effluent limit (daily maximum, instantaneous limit or longer-term average) that the control authority determines has caused, alone or in combination with other discharges, interference or pass through (including endangering the health of POTW personnel or the general public);

(4) Any discharge of a pollutant that has caused imminent endangerment to human health, welfare or to the environment or has resulted in the POTW's exercise of its emergency authority [40 CFR 403.8 (f) (1) (vi) (B)] to halt or prevent such a discharge;

(5) Failure to meet, within 90 days after the schedule date, a compliance schedule milestone contained in a local control mechanism or enforcement order for starting construction, completing construction or attaining final compliance;

(6) Failure to provide, within 45 days after the due date, required reports such as baseline monitoring reports, ninety-day compliance reports, periodic self monitoring reports, and reports on compliance with compliance schedules;

(7) Failure to accurately report noncompliance;

(8) Any other violation or group of violations, including a violation of best management practices, which the control authority determines will adversely affect the operation or implementation of the local pretreatment program.

SIGNIFICANT WASTE GENERATOR —

(1) Any categorical waste generator;

(2) Any other waste generator which:

(a) Discharges a flow of 10,000 gallons or more process waste per day to the treatment plant;

(b) Contributes a process waste which makes up 5% or more of the average dry weather hydraulic flow or 5% or more of the organic (BOD) capacity of the treatment plant; or

(c) Is designated by the Authority, EPA or DEP to have a reasonable potential, either singly or in combination with other users, for adversely affecting the operation of the public sanitary sewer system and/or the treatment plant (either its operational efficiency, effluent quality or quality of the biosolids produced by said facility), or for violating any pretreatment standard or requirement.

SLUDGE — Any solid material containing large amounts of entrained water collected during water or wastewater treatment which may be recycled.

SLUG — Any discharge of a nonroutine, episodic nature, or at a flow rate or concentration which would cause a violation of the prohibited discharge standards in § 154-87 of the article.

STANDARD INDUSTRIAL CLASSIFICATION (SIC) — A classification pursuant to the latest Standard Industrial Classification Manual issued by the Executive Office of the President, Office of Management and Budget.

STORMWATER — That portion of the precipitation that runs off over the surface during a storm and for a short period following a storm and enters the sewer system, and causes the flow at the treatment plant to exceed the normal or ordinary flow.

TIER I WASTE — A waste generated by any user that is required, by the Authority, to be discharged directly into the process stream of the treatment plant. The Authority's determination is based on waste characteristics including, but not limited to total suspended solids and BOD concentration. This category of waste may include, but is not limited to most holding tank wastes, industrial wastes and sanitary landfill leachates.

TIER II WASTE — A waste generated by any user that is transported to the treatment plant by a licensed waste hauler and is required, by the Authority, to be discharged into the septage discharge station at the treatment plant. The Authority's determination is based on waste characteristics including, but not limited to total suspended solids and BOD concentration. This category of waste may include, but is not limited to most septages, biosolids and sludges.

TOTAL SOLIDS — The sum of the total suspended solids in milligrams per liter (mg/l) and dissolved solids in milligrams per liter (mg/L), as determined by one of the acceptable methods described in 40 CFR Part

136 and amendments thereto, or by any other method approved by the EPA.

TOTAL SUSPENDED SOLIDS — Solids that either float to the surface or are in suspension in water, sewage, industrial waste or other liquids, and which are removable by laboratory filtration. The quantity of total suspended solids shall be determined by one of the acceptable methods described in 40 CFR Part 136 and amendments thereto, or by any other method approved by the EPA.

TOXIC POLLUTANT — Any pollutant or combination of pollutants listed as toxic in regulations promulgated by the administrator of the EPA under the provision of CWA 307 (a) or other acts.

TREATMENT PLANT — The structures, equipment and processes owned by the Valley Forge Sewer Authority and required to collect, transport and treat domestic and industrial waste and to treat trucked industrial waste, holding tank waste and septage and to dispose of the effluent and accumulated residual solids.

TRUCKED INDUSTRIAL WASTE — Any liquid, solid or gaseous substance, whether or not solids are contained therein, produced by any user during the course of any industrial, manufacturing, trade, or business process or in the course of development, recovery or processing of natural resources, as distinct from sanitary sewage, that is permitted in accordance with § 154-89B of this article and. that is transported by vehicle and discharged to the treatment plant by a waste hauler licensed in accordance with § 154-89 of this article. Leachates from sanitary landfills shall be considered trucked industrial waste.

USER — Any person who contributes, causes or permits the contribution of wastewater or waste into the Authority's treatment plant.

WASTE — Any sewage (or wastewater), trucked industrial waste, holding tank waste or septage.

WASTE GENERATOR — Any nonconnected user of the treatment plant.

WASTE HAULER — A person licensed by the Authority under § 154-89B of this article to transport and discharge trucked industrial waste (generated by a permitted waste generator), or holding tank waste or septage at the treatment plant.

WASTE HAULER LICENSE — The license issued by the Authority pursuant to § 154-89B of this article which allows the discharge of domestic holding tank waste, septage or trucked industrial waste transported to the treatment plant in an over-the-road vehicle.

WASTE PERMIT — The permit issued by the Authority to a significant waste generator for a particular trucked industrial waste pursuant to § 154-89B of this article.

§ 154-87. Regulations.

A. General discharge prohibitions.
