STATEMENT OF REASONS

UGI UTILITIES, INC. – GAS DIVISION
2022 Base Rate Case
Docket No. R-2021-3030218

STATEMENT OF REASONS

I. INTRODUCTION

UGI Utilities, Inc. – Gas Division ("UGI Gas" or the "Company") is filing Supplement No. 32 to UGI Gas Tariff – Pa. P.U.C. Nos. 7 and 7S ("Supplement No. 32"), with a proposed effective date of March 29, 2022. The rates set forth in Supplement No. 32, if approved by the Pennsylvania Public Utility Commission ("Commission"), would increase UGI Gas's annual jurisdictional revenues by $82.7 million, or by 7.8%. In addition, the Company proposes to complete its transition to uniform rates, which began in the 2019 base rate case at Docket No. R-2018-3006814 ("2019 Rate Case"), for Rates N/NT and Rate DS. Supplement No. 32 also proposes additional changes to tariff rates, riders, and tariff terms and conditions as described in the filing.

The following rate impact analysis applies to UGI Gas's customers. It assumes that the Company's proposals for full rate relief and for uniform rate transition are accepted.

Average Residential Heating Customer Bill Impact

		Total Monthly Bill Impact			
	Average Usage	Current	Proposed	Increase (Decrease)	Total
All Customers	73.1 Ccf	$ 98.62	$ 108.01	$ 9.39	9.5%

Average Commercial Heating Customer Bill Impact

		Total Monthly Bill Impact			
	Average Usage	Current	Proposed	Increase (Decrease)	Total
Former North	28.8 Mcf	$ 307.00	$ 330.09	$ 23.09	7.5%
All Others	28.8 Mcf	$ 317.93	$ 330.09	$ 12.16	3.8%

Average Industrial Customer Bill Impact					
		Total Monthly Bill Impact			
	Average Usage	Current	Proposed	Increase (Decrease)	Total
Former North	92.4 Mcf	$ 931.45	$ 993.83	$ 62.38	6.7%
All Others	92.4 Mcf	$ 966.55	$ 993.83	$ 27.28	2.8%

UGI Gas makes this tariff filing principally: (1) to allow it to earn a fair return on investments used and useful to serve the public safely and reliably; (2) to support ongoing Commission-approved infrastructure replacement programs designed to enhance safety and reliability; (3) to enhance information technology ("IT") systems; (4) to implement a Weather Normalization Adjustment ("WNA") tariff rider, which limits the variability of over- or under-collections of non-gas margin revenues due to weather; and (4) to recover higher levels of certain operating expenses necessary for the provision of safe and reliable gas distribution service. Each of these reasons is discussed in more detail below and in the Company's testimony. As compared to current plant and base rate levels reflected in existing rates, UGI Gas projects an increase of approximately $795 million in gross plant through the Fully Projected Future Test Year ending September 30, 2023 ("FPFTY"). Accordingly, this revenue increase is essential to attract the investments necessary to operate and maintain safe, reliable and customer-focused natural gas distribution services.

II. REASONS FOR THE REQUESTED REVENUE INCREASE

1. Fair return on investments used to serve the public

A variety of circumstances will prevent UGI Gas from earning a fair rate of return at present rate levels. As reflected in UGI Gas Exhibit A (Fully Projected), the Company's operations are projected to produce an overall return on rate base of 6.13%, which equates to a return on common equity of only 7.89% for the FPFTY. As explained by UGI Gas witness Paul R. Moul (UGI Gas

Statement No. 6), those returns are not adequate based on applicable financial analysis and the risks confronted by UGI Gas. Unless UGI Gas receives the requested rate relief, its returns will decline. This will jeopardize its ability to attract capital necessary for system reliability, safety, and customer service.

2. Support for Commission-approved infrastructure replacement programs

Significant capital investment in the distribution system is the primary driver for the requested rate relief in this proceeding. Upgrading and modernizing the distribution system facilitates the provision of safe, reliable, and reasonable service to customers. Accordingly, the Company is replacing its non-contemporary infrastructure at an accelerated pace, as described in the Company's Commission-approved Second Long Term Infrastructure Improvement Plan ("LTIIP").[1] Through the Second LTIIP, the Company will invest approximately $1.3 billion on infrastructure improvements between 2020 and 2024, which will strengthen and modernize distribution facilities, in part through its Commission-approved programmatic elimination of all cast iron and bare steel mains on its system. In addition, UGI Gas continues to make system investments to serve new and existing residential and commercial customers, convert existing residences and commercial locations to natural gas (from other fuel sources), and improve critical information systems, as discussed further in subpart 3 below and in the Company's testimony.

3. Enhanced information technology systems, business processes and personnel effectiveness

The Company has improved its technology and employee training resources over the past several years. In particular, the Company continues to implement UGI-1, an initiative designed to modernize the processes and information system tools used by its employees across its system.

[1] *See Petition of UGI Utilities, Inc. – Gas Division for Approval of its Second Long Term Infrastructure Improvement Plan*, Docket No. P-2019-3012337 (Opinion and Order entered December 19, 2019).

UGI-1 is making the Company more effective in all aspects of its business, including customer calls, billing, new construction, operations and maintenance ("O&M") activities, and emergency response. As part of this initiative, the Company also continues its UGI Next Information Technology Enterprise ("UNITE") project, creating next generation technology solutions to improve the service experience of its customers, and improve efficiency. Specifically, UGI Gas implemented a new customer information system (UNITE Phase I) in 2017 and replaced its Enterprise Resource Planning financial and supply chain systems (UNITE Phase II) in 2019. The Company is in the process of implementing Phase III of UNITE, which consists of the Enterprise Performance Management ("EPM") project and the larger Enterprise Asset Management ("EAM") project, a multi-year, multi-phase project with the end goal of enhanced asset management capabilities and supporting applications. In October 2020, the EPM project introduced new capital budgeting and forecasting capabilities, which were integrated with the Company's Enterprise Resource Planning and fixed asset and tax systems. In mid-2021, the Company kicked off the EAM's Asset Data Collection phase, which will identify and standardize the retrieval of asset data information across UGI.

4. Employee compensation and cost increases

Finally, UGI Gas adopted needed annual wage and salary increases and has made certain compensation adjustments to attract, maintain, and promote a highly qualified work force and will continue to do so, where reasonable. As part of this case, the Company has proposed to increase compensation for certain employees in order to be competitive and to maintain its skilled workforce. These changes are discussed in the testimony of UGI Gas witness Christopher R. Brown (UGI Gas Statement No. 1) and Timothy J. Angstadt (UGI Gas Statement No. 9). UGI Gas also experienced other general price increases for necessary products and services.

Through these and other efforts, UGI Gas has made major strides toward modernizing its operations and has seen stable customer growth over time. However, forecasted cost increases and changes in per customer usage, which are described in the Company's testimony, will produce an inadequate rate of return on investments at present rates.

III. TRANSITION TO FULLY UNIFORM RATES, TERMS AND CONDITIONS

On October 4, 2019, the Commission entered an Opinion and Order in the Company's 2019 Rate Case, which approved a unified rate structure for all rate classes except for Rates N/NT and Rate DS. As approved, the Company used a consolidated revenue requirement to establish uniform distribution and purchased gas cost rates, except for the former North Rate District customers on Rates N/NT and Rate DS.

In this case, the Company is proposing to take the remaining step to unify Rates N/NT and Rate DS. Doing so will achieve uniform class rates for distribution service throughout the entire service territory. The impact of these changes is discussed in the testimony of UGI Gas witness Sherry A. Epler (UGI Gas Statement No. 8).

The Company's efforts to unify its rates, rules and regulations has provided specific customer, administrative, and competitive benefits. Eliminating the Company's rate districts[2] facilitated more uniform offerings, services, and communications to customers (*e.g.* tariff administration, bill inserts, notices, and press releases), including the expansion of the Company's Energy Efficiency and Conservation ("EE&C") program to customers in the former Central Rate

[2] On September 20, 2018, the Commission approved the Joint Petition for Settlement filed in the Company's Merger proceeding at Docket Nos. A-2018-3000381, A-2018-3000382, and A-2018-3000383. As a result of the Merger, the then-existing UGI natural gas distribution companies (UGI-GD, UGI-PNG and UGI-CPG) were merged into one resulting entity, UGI Gas. Accordingly, UGI-GD became the UGI South Rate District; UGI-PNG became the UGI North Rate District; and UGI-CPG became the UGI Central Rate District. The Merger was completed on October 1, 2018, and UGI Gas commenced operations under the three rate district structure approved as part of the Merger settlement.

District. UGI Gas's customers also now receive uniform price-to-compare notifications applicable to the entire service territory.

IV. MANAGEMENT EFFECTIVENESS

UGI Gas has focused on a number of areas to enhance and improve the quality and effectiveness of its management performance. These efforts include:

Customer Service

- Finishing in first or second in the J.D. Power award for customer satisfaction among utilities in each of the last nine years, and winning the J.D. Power #1 in Customer Satisfaction award a total of eight times since UGI was first included in the survey in 2003 by J.D. Power. UGI was also named a 2021 "Customer Champion" by Escalant.

Reliability

- Modernizing the distribution system by aggressively replacing aged infrastructure with the highest percentage of contemporary materials (*i.e.*, 90%) in the Commonwealth.

- Driving significant reductions in the levels of new leaks found, including a 28.6% reduction in C Leaks, a 50.3% reduction in B Leaks and a 47.7% reduction in A Leaks since 2016.

Safety

- Developing and implementing numerous safety improvement initiatives to reduce injuries and motor vehicle accidents including a focus on fostering an enhanced safety culture across the Company.

- Winning the 2021 American Gas Association Safety Awareness Video Excellence ("SAVE") award for being an outstanding contributor to natural gas communications on safety and education.

- Avoiding accidents through the "Near Miss/Good Catch" ("NMGC") program, which aids human performance, incorporating learnings from actual incidents that had the potential to but did not result in harm, damage or injury.

COVID Response

- Mitigating hardships experienced by customers through the Emergency Relief Program ("ERP"), which assisted those economically impacted by the Pandemic from October through December 2020. The Company awarded over $198,000 in grants to approximately 1,500 residential customers and instituted 1,800 payment agreements to collect over $1.5 million.

Environmental

- Administering a voluntary service territory-wide EE&C Plan with a comprehensive portfolio of energy efficiency and conservation programs designed to assist customers in saving energy through various cost-effective measures.

- Reducing GHG emissions by successfully converting more than 100,000 coal and fuel oil customers to more environmentally-friendly natural gas over the past decade and switching qualifying customers to gas through UGI Gas's recent line extension tariff rules adopted in the 2020 Gas Rate Case.

- Fostering clean fuel adoption, as twelve percent of UGI Gas's fleet includes compressed natural gas fueled vehicles ("NGVs"). These vehicles provide significant reductions in carbon emissions and serve to demonstrate the benefits existing today for NGVs to both produce favorable operating costs as well as improve the environment.

- Incorporating renewable natural gas ("RNG") into the gas supply portfolio from Archaea Energy's Keystone Landfill, which is the largest RNG facility in the world, and facilitating opportunities for the voluntary sale of RNG credits to interested parties both in Pennsylvania and abroad, thus bolstering revenue streams for commercial and agricultural entities in the Commonwealth.

Community Engagement

- Volunteering more than 31,000 hours of work and personal time to assist the Company's communities in 2020. Combined with corporate contributions and retiree contributions, total support provided to United Way agencies serving communities in the UGI Gas service territory in 2020 totaled more than $551,000.

Diversity & Inclusion

- Developing the Belonging, Inclusion, Diversity and Equity ("BIDE") initiative, which provides the blueprint for achieving greater diversity of thought, experience, culture, gender, race, and sexual orientation throughout the Company. Focusing on four core pillars of the business: Culture, Career, Community and Commerce, BIDE provides employees with a safe, welcoming, and inclusive work environment and develops a more diverse workforce.

- Strengthening community ties by contracting with Minority, Women, and Disabled Owned Businesses and spending more than $59 million in 2021 with qualifying businesses.

The identified initiatives and efforts, as described by the Company's witnesses, demonstrate UGI Gas's commitment to providing safe, reliable, and quality distribution service to its customers. The Company believes that its management efforts, system investments, and continued provision of safe and reliable service at reasonable rates, as detailed by the witnesses' testimony submitted in this case, all support an upward adjustment to the Company's rate of return. This upward adjustment is included in the 11.20% return on common equity requested by the Company and is discussed in the Direct Testimony of Paul R. Moul (UGI Gas Statement No. 6).

V. OVERVIEW OF FILING

Included with UGI Gas's filing are all of the supporting data required by the Commission's regulations. This information provides data for an historic test year ended September 30, 2021 ("HTY"), a future test year ("FTY") ending September 30, 2022, and a FPFTY. In accordance with permitted ratemaking procedures, the Company has elected to use the FPFTY as the basis for its proposed revenue change.

UGI Gas has followed Commission ratemaking practice in preparing its claims for rate base, operating revenues and operating expenses.

Rate Base. Rate base was determined based on depreciated original cost values for projected plant in service at the end of the FTY and FPFTY, respectively. The Company's rate base claim also includes reasonable estimates for materials and supplies inventory and cash working capital, as well as standard deductions for accumulated depreciation, accumulated deferred income taxes, and customer deposits. The Company's rate base claim is shown in summary form in Schedule C-1 to Exhibit A (Fully Projected) and is principally supported by the Direct Testimony of Vivian K. Ressler (UGI Gas Statement No. 3).

Operating Revenues. UGI Gas's *pro forma* test year operating revenues were derived from its fiscal year 2023 operating budget. As explained in the testimony of Sherry A. Epler (UGI Gas Statement No. 8) and other witnesses, operating revenues were annualized, normalized, and otherwise adjusted in accordance with standard ratemaking practice, as detailed in Schedules D-5 and D-5A of Exhibit A (Fully Projected) and the exhibits attached to Ms. Epler's testimony.

Operating Expenses. UGI Gas's *pro forma* test year operating expenses were derived from its fiscal year 2023 operating budget. As explained in the testimony of Tracy A. Hazenstab (UGI Gas Statement No. 2) and other witnesses, certain operating expenses were annualized, normalized, and otherwise adjusted in accordance with standard ratemaking practice, as detailed in Section D of Exhibit A (Fully Projected). UGI Gas's claim for depreciation and amortization expense is supported by Exhibit C (Fully Projected) to the filing, and exhibits developed and supported by John F. Wiedmayer of Gannett Fleming Valuation & Rate Consultants, LLC (UGI Gas Statement No. 4). Mr. Wiedmayer's calculations are based on the straight-line, remaining life method previously approved for UGI Gas's operations by the Commission.

Income Taxes. UGI Gas's income tax expense was calculated using procedures previously accepted by the Commission. The Company's filing reflects the normalization of book-tax timing differences related to the use of accelerated depreciation for federal tax purposes and for the Company's repairs allowance deductions. As it relates to accelerated depreciation for state tax purposes, the Company uses flow-through for rate making purposes. The Company's tax claims are described and supported in the Direct Testimony of Nicole M. McKinney (UGI Gas Statement No. 7).

Revenue Allocation and Class Cost of Service. UGI Gas is proposing to allocate the revenue requirement to all customer classes based on the results of a consolidated class cost of service study. The Company also is proposing to establish uniform rates for Rates N/NT and Rate DS. The Company's proposed revenue allocation will move all rate classes substantially toward the overall system average rate of return. Additional details regarding the Company's cost of service study and revenue allocation are provided in the Direct Testimonies of Constance E. Heppenstall (UGI Gas Statement No. 10) and Sherry A. Epler (UGI Gas Statement No. 8).

Rate Design. In prior base rate proceedings, the Company has established a largely uniform rate structure and rate design across the former rate districts. As discussed above, UGI Gas adopted a single gas supply portfolio and unified rates to all customers but Rates N/NT and Rate DS customers. The Company also established a single Purchased Gas Cost ("PGC") rate and associated price to compare. As part of this proceeding, UGI Gas is proposing to complete the process of incorporating Rates N/NT and Rate DS into the uniform rate design applied to all other rate classes. Details are found in the Direct Testimony of Christopher R. Brown (UGI Gas Statement No. 1).

Other Tariff Changes. In this filing, the Company proposes relatively few changes to the terms and conditions approved by the Commission in the Company's most recent completed rate case. One such change is a proposed WNA tariff rider, which limits the variability of non-gas margin revenues due to weather variations during the heating season calendar months (e.g., October through May). A list of all proposed changes is identified in the Company's proposed tariff, Supplement No. 32 to UGI Gas Tariff – Pa. P.U.C. Nos. 7 and 7S.

VI. CONCLUSION

The proposed revenue increase is the minimum increase necessary for UGI Gas to continue providing safe and reliable service, to maintain the integrity of its financial ratings, to attract additional capital on reasonable terms, and to have a reasonable opportunity to earn a fair rate of return on property that is used and useful in providing natural gas service to the public within its service territory. The proposals contained in this filing will provide significant benefits to all stakeholders. Moreover, the Company's proposed revenue allocation and rate design are just and reasonable and non-discriminatory, as are the proposed changes made to the Company's general terms and conditions of service. Therefore, the rates, rules, and terms and conditions of service set forth in Supplement No. 32 to UGI Gas Tariff – Pa. P.U.C. Nos. 7 and 7S should be permitted to become effective as filed.

PLAIN LANGUAGE - STATEMENT OF REASONS

UGI UTILITIES, INC. – GAS DIVISION
2022 Base Rate Case
Docket No. R-2021-3030218

PLAIN LANGUAGE
STATEMENT OF REASONS

UGI Utilities, Inc. – Gas Division ("UGI Gas" or the "Company") has asked the Pennsylvania Public Utility Commission ("PUC" or the "Commission") to increase UGI Gas's annual jurisdictional revenues by $82.7 million, or by 7.8%, and finalize the transition to uniform rates, which began in the gas base rate case at Docket No. R-2018-3006814 ("2019 Base Rate Case"), for Rate N/NT and Rate DS customers. The percentage rate increase will vary by rate class. The main reasons for this proceeding are:

- UGI Gas continues to invest in gas plant needed to provide continued safe and reliable service. In the past five years, the Company has invested more than $982,000,000 in repairing and replacing its aging infrastructure.

- UGI Gas seeks to complete its transition to uniform rates, which began in the 2019 Base Rate Case, for Rate N/NT and Rate DS. Doing so will achieve uniform class rates for distribution service throughout the entire service territory.

- UGI Gas proposes a Weather Normalization Adjustment ("WNA") tariff rider, which limits the variability of over- or under-collections of non-gas margin revenues due to weather during the heating season (*i.e.*, October through May).

- Without substantial rate relief, UGI Gas will not be able to earn a fair return on its investment used to serve the public and, if not addressed, this could adversely affect the integrity of its financial ratings and its ability to provide safe and reliable service to its customers.

UGI Gas designed the proposed rates for each customer class to recover its total required revenue. In allocating the revenue increase to the residential and non-residential customer classes, UGI Gas was guided by detailed studies of each rate class's cost of service. UGI Gas also considered and balanced other principles of rate design consistent with the Commission's approach to ratemaking.

Along with its rate increase, UGI Gas has filed all of the supporting data required by the Commission's regulations, as well as the written statements of eleven witnesses and numerous exhibits prepared by those witnesses. The data, testimony, and exhibits submitted by UGI Gas comply with the Commission's filing requirements. The proposed distribution revenue increase is the minimum increase necessary for UGI Gas to continue providing safe and reliable service to the public within its service territory.

SECTION 53.52 - FILING REQUIREMENTS

UGI UTILITIES, INC. – GAS DIVISION

Proposed Changes to UGI Utilities, Inc. – Gas Division, Supplement No. 32 to Original Tariff Nos. 7 and 7S

Information furnished with the filing of rate changes under
52 Pa. Code, Section 53.52

(a) Applicable to changes in terms and conditions of service.

(a)(1) The specific reason for each change.

The Company has provided a Statement of Reasons describing the necessity for the changes proposed in this filing.

(a)(2) The total number of customers served by the utility.

671,662 customers as of September 30, 2021.

(a)(3) A calculation of the number of customers, by tariff subdivision, whose bills will be affected by the change.

R/RT	616,132
N/NT	70,125
DS	1,392
LFD	602
XD	56
IS	363

(a)(4) The effect of the change on the utility's customers.

The specific effect by class is shown in UGI Gas Exhibit E – Proof of Revenue.

(a)(5) The effect, whether direct or indirect, of the proposed change on the utility's revenue and expenses.

The Company's proposal will change revenue and expenses, as shown on UGI Gas Exhibit A (Fully Projected), Schedule A-1. Individual adjustments to revenues and expenses are described in testimony and exhibits supporting the filing.

(a)(6) The effect of the change on the service rendered by the utility.

The filing will allow the Company to continue to provide safe and reliable service to its customers while maintaining high levels of customer satisfaction.

(a)(7) A list of factors considered by the utility in its determination to make the change. The list shall include a comprehensive statement as to why these factors were chosen and the relative importance of each. This subsection does not apply to a portion of the tariff change seeking a general rate increase as defined in 66 Pa.C.S. Section 1308 (relating to voluntary changes in rates).

The Company has provided a Statement of Reasons describing the numerous factors considered in its determination to make the filing. Please also see the Direct Testimony of Christopher R. Brown (UGI Gas Statement No. 1) for a summary of those factors.

(a)(8) Studies undertaken by the utility in order to draft its proposed change. This paragraph does not apply to a portion of the tariff change seeking a general rate increase as defined in 66 Pa.C.S. Section 1308.

Not applicable.

(a)(9) Customer polls taken and other documents, which indicate customer acceptance and desire for the proposed change.

The Company has not undertaken any polls.

(a)(10) Plans the utility has for introducing or implementing the change with respect to its customers.

The Company will notify customers of the proposed changes, including the proposed Weather Normalization Adjustment alternative ratemaking mechanism by a bill insert using the form of notices specified by the Commission at 52 Pa. Code 53.45. A copy of the notice will be provided together with an affidavit of compliance with the notice requirements. Upon approval, the Company will provide notice of Weather Normalization Adjustment approval and implementation in accordance with 66 Pa. C.S. § 1330 implementation requirements.

(a)(11) F.C.C. or FERC or Commission orders or rulings applicable to the filings.

The Company has experienced both increased uncollectible accounts expenses and increased costs in certain areas due to COVID-19. The Company's filing includes related claims in accordance with the Commission's May 13, 2020 Secretarial Letter regarding COVID-19 Cost Tracking and Creation of Regulatory Asset at Docket No. M-2020-3019775. The Company's recovery of certain extraordinary, nonrecurring incremental COVID-19 costs as part of this proceeding is discussed in the Direct Testimony of Vivian K. Ressler (UGI Gas Statement No. 3).

The Company also adopted some revisions to its accounting practices in accordance with the findings made in a recent Federal Energy Regulatory Commission ("FERC") Audit at Docket No. FA20-3-000.

(b) Applicable to changes in rates.

(b)(1) Specific reason for each change.

The Company has provided a Statement of Reasons describing the necessity of this filing.

(b)(2) Utility's operating income statement ending not more than 120 days prior to filing date – historic year.

Please refer to UGI Gas Exhibit A (Historic), Schedule B-2. For future test year and fully projected future test year operating income statements, please refer to UGI Gas Exhibit A (Future), Schedule B-2, and UGI Gas Exhibit A (Fully Projected), Schedule B-2.

(b)(3) Number of customers, by tariff subdivision, whose bills will be increased.

Tariff Rate	Customers
R/RT	616,132
N/NT	70,125
DS (former North rate district)	389
LFD	602

(b)(4) Total increases, in dollars, by tariff subdivision, projected to an annual basis.

Please refer to UGI Gas Exhibit E – Proof of Revenue.

(b)(5) Number of customers, by tariff subdivision, whose bills will be decreased.

Tariff Rate	Customers
DS (former South & Central rate districts)	1,003
XD	56
IS	363

(b)(6) Total decreases, in dollars, by tariff subdivision, projected to an annual basis.

Please refer to UGI Gas Exhibit E – Proof of Revenue.

(c) Applicable to changes where increase for any tariff subdivision exceeds 3% of utility's operating revenue OR bills of more than 5% of customers will increase.

(c)(1) Rate of return for historic year and anticipated for future year.

Please refer to UGI Gas Exhibit A (Historic), Schedule A-1, UGI Gas Exhibit A (Future), Schedule A-1, and UGI Gas Exhibit A (Fully Projected), Schedule A-1.

(c)(2) Detailed balance sheet at the end of the historic year.

For the end of the historic year balance sheet, please refer to UGI Gas Exhibit A (Historic), Schedule B-1.

(c)(3) Summary, by detailed plant accounts, of book value of property of utility at end of historic year.

Please refer to UGI Gas Exhibit A (Historic), Schedule C-2, for the original cost book value of the property of the utility for the historic year.

(c)(4) Respective amount of the depreciation reserve applicable to each detailed plant account.

Please refer to UGI Gas Exhibit A (Historic), Schedule C-3, for the historic year depreciation reserve as of year-end, UGI Gas Exhibit A (Future), Schedule C-3, for the future test year depreciation reserve as of year-end, and UGI Gas Exhibit A (Fully Projected), Schedule C-3, for the fully projected future test year depreciation reserve as of year-end.

(c)(5) Statement of operating income, setting forth the operating revenues and expenses by detailed accounts – historic year.

Please refer to UGI Gas Exhibit A (Historic), Schedule B-2, for the historic year operating revenue and expenses.

(c)(6) Description of any major changes in the operating or financial condition of the utility occurring between the date of the balance sheet at end of the historic year and filing date.

None.

SECTION 53.62 - FILING REQUIREMENTS

UGI UTILITIES, INC. – GAS DIVISION

Proposed Supplement No. 32 to UGI Gas Tariff Nos. 7 and 7S

Information furnished pursuant to 52 Pa. Code, Section 53.62

§ 53.62. Additional information to be filed by gas utilities with gross annual intrastate operating revenues in excess of $40 million seeking a change in base rates.

In addition to information otherwise required to be filed by a jurisdictional natural gas distributor with gross intrastate annual operating revenues in excess of $40 million seeking a change in its base rates, each gas utility shall also file updates to the information required by § 53.64(c) (relating to filing requirements for natural gas distributors with gross intrastate annual operating revenues in excess of $40 million). In the case of a gas utility purchasing gas as defined at § 53.61(a) (relating to purpose) from an affiliated interest, it shall also file updates to the information required at § 53.65 (relating to special provisions relating to natural gas distributors with gross intrastate annual operating revenues in excess of $40 million with affiliated interests). These updates shall be made at the time the base rate case under 66 Pa.C.S. § 1308 (relating to voluntary changes in rates) is originally filed. Deficiencies in filing will be treated as set forth at § 53.51(c) (relating to general).

RESPONSE:

Please see the response to III-E-30.

SECTION 53.53 - VALUATION

I-A-1

Request:

Provide a corporate history (include the dates of original incorporation, subsequent mergers and/or acquisitions). Indicate all counties and cities and other governmental subdivisions to which service is provided (including service areas outside the state), and the total population in the area served.

Response:

UGI Utilities, Inc. began its modern corporate existence as part of a consolidation of a number of predecessor natural gas and electric public utilities into The United Gas Improvement Company, as approved by the Pennsylvania Public Utility Commission ("Commission") on June 16, 1952 at Docket No. A.78264. In 1968, The United Gas Improvement Company changed its name to UGI Corporation. In 1971, UGI Corporation's gas operations were consolidated into a gas division ("UGI Gas") located in Reading, Pennsylvania. In January 2019, UGI Gas relocated its headquarters to Denver, Pennsylvania. UGI Corporation's electric operations ("UGI Electric") operates in a separate electric division headquartered in northeastern Pennsylvania. In 1992, as part of a further corporate restructuring, UGI Corporation changed its name to UGI Utilities, and became a wholly-owned subsidiary of a new holding company which adopted the name UGI Corporation.

UGI Utilities, Inc. increased its gas operations in 2006 and 2008 with the incorporation of two subsidiary gas utilities – UGI Penn Natural Gas, Inc. ("UGI PNG") and UGI Central Penn Gas, Inc. ("UGI CPG"), respectively. UGI PNG began its operations following the close, on August 24, 2006, of UGI Corporation's purchase of the natural gas distribution assets from the former PG Energy Division of Southern Union Company, as authorized by a Commission Order entered on August 18, 2006, at Docket No. A-120011F200. UGI CPG, formerly PPL Gas Utilities Corporation ("PPL Gas"), was acquired by UGI Utilities effective October 1, 2008, as authorized by a Commission Order entered on August 21, 2008, at Docket Nos. A-2008-2034045 et al. Prior to that acquisition, PPL Gas itself was the result of several mergers and acquisitions authorized by the Commission. See, e.g., Joint application of PPL Gas Utilities Corp., North Penn Gas Company, and PFG Gas, Inc., Docket Nos. A-125127, et al. (Order entered July 12, 2004); Application of Allied Gas Company et al., Docket No. A-120650F002 (order approving merger and restructuring entered January 27, 1995).

I-A-1 (Continued)

In accordance with authority granted in a Commission Opinion and Order entered on September 20, 2018 at Docket Nos. A-2018-3000381 et seq., UGI PNG and UGI CPG merged into UGI Gas effective October 1, 2018. The former service territories of UGI PNG, UGI Gas and UGI CPG were organized into the North, South and Central Rate Districts of UGI Gas, respectively. By a Commission Opinion and Order entered on October 4, 2019 at Docket Nos. R-2018-3006814 et seq., the Commission approved UGI Gas's proposal to eliminate the Rate District structure and move most rate classes to uniform distribution rates for a single UGI Gas service territory encompassing the aggregate service territory of the former North, South, and Central Rate Districts.

The list of communities served by UGI Gas is set forth in its tariff provided in this rate filing and which is available on the Commission's website at: https://www.puc.pa.gov/filing-resources/tariffs/natural-gas-tariffs/. UGI Gas provides natural gas distribution service to approximately 672,000 residential, commercial and industrial natural gas customers located in 46 of Pennsylvania's total 67 counties and spanning more than 700 municipalities. The populations for each of the municipalities served, based on U.S. census data, is available at the Penn State Pennsylvania State Data Center website at: https://pasdc.hbg.psu.edu/Data/Census2010/tabid/1489/Default.aspx. UGI Gas also provides natural gas service to approximately 500 customers in one Maryland County under authority granted by the Maryland Public Service Commission.

UGI Electric can trace its origins to the 1925 acquisition by UGI of the American Gas Co., which owned the Luzerne County Gas and Electric Corporation. In 1953, as authorized by a Certificate of Public Convenience issued by the Commission on June 16, 1952, at Docket No. A.78264, all of UGI's Pennsylvania public utility subsidiaries, including the Luzerne County Gas and Electric Company, were merged into UGI. In 1967, UGI acquired the Harney's Lake Light Company, whose 113 square mile service territory, along with the electric service territory of the former Luzerne County Gas and Electric Corporation, comprise UGI Electric's current service territory. UGI Electric provides electric distribution service to approximately 62,000 residential, commercial, and industrial electric customers in Luzerne and Wyoming Counties and 35 municipalities.

I-A-2

Request:

Provide a schedule showing the measures of value and the rates of return at the original cost and trended original cost measures of value at the spot, three-year and five-year average price levels. All claims made on this exhibit should be cross-referenced to appropriate exhibits. Provide a schedule similar to the one listed above, reflecting respondent's final claim in its previous rate case.

Response:

The Company's claim is based on original cost measures of value. Since Pennsylvania state law mandates the use of original cost for ratemaking, a trended cost study was not prepared.

Refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), Schedule A-1.

Refer to Attachment I-A-2 for similar schedules from the previous rate case.

Prepared by or under the supervision of: Christopher R. Brown

I-A-3

Request:

Provide a description of the depreciation methods utilized in calculating annual depreciation amounts and depreciation reserves, together with a discussion of all factors which were considered in arriving at estimates of service life and dispersion by account. Provide dates of all field inspections and facilities visited.

Response:

The depreciation methods used in calculating annual and accrued depreciation and the factors considered in service life estimation are discussed in Exhibit C (Future) in "Part II. Methods Used in the Determination of Annual and Accrued Depreciation" and Part III. Service Life Considerations". There have been no changes in the survivor curve estimates nor the method of depreciation. These are the same survivor curve estimates and method of depreciation as the prior gas base rate case filing in Docket R-2019-3015162.

Field trips and facilities visited are presented in Exhibit C (Future) in Part III in the section titled "Field Trips," beginning on page III-2.

Prepared by or under the supervision of: John F. Wiedmayer

I-A-4

Request:

Set forth, in exhibit form, charts depicting the original and estimated survivor curves and a tabular presentation of the original life table plotted on the chart for each account where the retirement rate method of analysis is utilized.

a. If any utility plant was excluded from the measures of value because it was deemed not to be "used and useful" in the public service, supply a detailed description of each item of property.

b. Provide the surviving original cost at test year end by vintage by account and include applicable depreciation reserves and annuities.

   (i) These calculations should be provided for plant in service as well as other categories of plant, including, but not limited, to contributions in aid of construction, customers' advances for construction, and anticipated retirements associated with any construction work in progress claims (if applicable).

Response:

Charts depicting the original and estimated survivor curves and a tabular presentation of the original life table plotted on the chart for each account where the retirement rate method of analysis was utilized is presented in Exhibit C (Future) in Part VI of the report.

a. No utility plant recorded in Account 101, Gas plant in Service, was excluded from the measures of value. However, gas plant owned by UGI Utilities, Inc. that serve approximately 500 Maryland customers in Frederick County, Maryland near the Pennsylvania-Maryland state border were excluded from this filing. The depreciation reserve and depreciation associated with Maryland gas plant also were excluded from this filing.

b. The surviving original cost at the end of the historical year September 30, 2021, by vintage by account and the applicable depreciation reserve for gas plant are presented in Exhibit C (Historic). The tabulations are presented in Part III of the report in the section titled "Depreciation Calculations."

I-A-4 (Continued)

The surviving original cost at the end of the future test year September 30, 2022, by vintage by account and the applicable depreciation reserve for gas plant are presented in Exhibit C (Future). The tabulations are presented in Part VII of the report in the section titled "Depreciation Calculations."

The surviving original cost at the end of the fully projected future test year September 30, 2023, by vintage by account and the applicable depreciation reserve for gas plant are presented in Exhibit C (Fully Projected). The tabulations are presented in Part III of the report in the section titled "Depreciation Calculations."

Prepared by or under the supervision of: John F. Wiedmayer

I-A-5

Request:

Provide a comparison of respondent's calculated depreciation reserve v. book reserve by account at the end of the test year.

Response:

Comparisons of the calculated accrued depreciation v. the book reserve are set forth in Attachment I-A-5.

Prepared by or under the supervision of: John F. Wiedmayer

I-A-6

Request:

Supply a schedule by account and depreciable group showing the survivor curve and annual accrual rate estimated to be appropriate:

a. For the purposes of this filing.

b. For the purposes of the most recent rate increase filing prior to the current proceedings.

(i) Supply a comprehensive statement of any changes made in method of depreciation and in the selection of average service lives and dispersion.

Response:

a. Refer to Table 1 in Exhibit C (Historic), Table 1 in Exhibit C (Future) and Table 1 in Exhibit C (Fully Projected) for schedules showing the estimated survivor curves and accrual rates by account and depreciable group.

b. Refer to Attachment I-A-6 for the survivor curves and annual accrual rates estimated to be appropriate in the most recent prior rate filing. UGI's most recent prior base rate case was filed in January 2020 at Docket No. R-2019-3015162.

(i). The depreciation methods and procedures used in this filing are the same as those used in the previous filing.

The survivor curve estimates are based on a service life study as described in Part III of Exhibit C (Future). The service life study was updated to include company data through fiscal-year end 2017, i.e., September 30, 2017. The service lives and survivor curves were used to calculate depreciation rates as of September 30, 2021, September 30, 2022 and September 30, 2023. The charts and life tables supporting the updated service life study are presented in Part VI of Exhibit C (Future).

The previous rate filing for UGI Gas was submitted in January 2020 using a fully projected future test year ending September 30, 2021. The service life study in the 2020 filing was based on data through September 30, 2017 which is the same as the current 2022 base rate case filing. The

I-A-6 (Continued)

Company updates its service life study every five years and submits a report to the Pennsylvania Public Utility Commission (PA PUC) in accordance with 52 Pa. Code Chapter 73.5 and 73.6. UGI submits Annual Depreciation Reports each year in accordance with 52 Pa. Code Chapter 73.3 and 73.4.

The purpose of the regulations set forth in 52 Pa. Code Chapter 73 is to establish uniform and industry-wide reporting requirements designed to improve the Commission's ability to monitor on a regular basis the depreciation and capital planning of utilities subject to Commission jurisdiction.

Prepared by or under the supervision of: John F. Wiedmayer

I-A-7

Request:

Provide a table, showing the cumulative depreciated original cost by year of installation for utility plant in service at the end of the test year (depreciable plant only) as claimed in the measures of value, in the following form:

a. Year installed.

b. Original cost--the total surviving cost associated with each installation year from all plant accounts.

c. Calculated depreciation reserve--the calculated depreciation reserve associated with each installation year from all plant accounts.

d. Depreciated original cost--(Column B minus Column C).

e. Total--cumulation year by year of the figures from Column D.

f. Column E divided by the total of the figure in Column D.

Response:

The information is provided in Exhibit C (Fully Projected) in Part III for the fully projected future test year ended September 30, 2023; in Exhibit C (Future) in Part V for the future test year ended September 30, 2022; and in Exhibit C (Historic) in Part III for the historic test year ended September 30, 2021. The information is set forth in the section titled “Cumulative Depreciated Original Cost.”

Prepared by or under the supervision of: John F. Wiedmayer

I-A-8

Request:

Provide a description of the trending methodology which was utilized. Identify all indexes which were used (include all backup workpapers) and the reasons particular indexes were chosen. If indexes were spliced, indicate which years were utilized in any splices. If indexes were composited, show all supporting calculations. Include any analysis made to "test" the applicability of any indexes.

a. Supply a comprehensive statement of any changes made in the selection of trend factors or in the methodology used in the current rate filing compared to the most recent previous rate filing.

Response:

Trended original cost is omitted in accordance with 52 Pa. Code Section 53.51(c).

Prepared by or under the supervision of: John F. Wiedmayer

I-A-9

Request:

Provide an exhibit indicating the spot trended original cost at test year end by vintage by account and include applicable depreciation reserves. Include totals by account for all other trended measures of value.

Response:

Trended original cost is omitted in accordance with 52 Pa. Code Section 53.51(c).

Prepared by or under the supervision of: John F. Wiedmayer

I-A-10

Request:

Supply an exhibit indicating the percentages of undepreciated original cost which were trended with the following indexes:

a. Boeckh
b. Handy-Whitman
c. Indexes developed from suppliers' prices.
d. Indexes developed from company records and company price histories.
e. Construction equipment.
f. Government statistical releases.

Response:

Trended original cost is omitted in accordance with 52 Pa. Code Section 53.51(c).

Prepared by or under the supervision of: John F. Wiedmayer

I-A-11

Request:

Provide a table, showing the cumulative trended depreciated original cost (at the spot price level) by year of installation for utility plant in service at the end of the test year (depreciable plant only) as claimed in the measures of value, in the following form:

a. Year installed.

b. Trended original cost (at the spot price level)--the total surviving cost associated with each installation year from all plant accounts.

c. Trended calculated depreciation reserve--the calculated depreciation reserve associated with each installation year from all plant accounts.

d. Depreciated trended original cost--(Column B minus Column C).

e. Total--cumulation year by year of the figures from Column D.

f. Column E divided by the total of the figures in Column D.

Response:

Trended original cost is omitted in accordance with 52 Pa. Code Section 53.51(c).

Prepared by or under the supervision of: John F. Wiedmayer

I-A-12

Request:

If a claim is made for construction work in progress, include, in the form of an exhibit, the summary page from all work orders, amount expended at the end of the test year and anticipated in-service dates. Indicate if any of the construction work in progress will result in insurance recoveries, reimbursements, or retirements of existing facilities. Describe in exact detail the necessity of each project claimed if not detailed on the summary page from the work order. Include final completion date and estimated total amounts to be spent on each project.

[These exhibits should be updated at the conclusion of these proceedings.]

Response:

No claim is being made for construction work in progress.

Prepared by or under the supervision of: Vivian K. Ressler

I-A-13

Request:

If a claim is made for non-revenue producing construction work in progress, include, in the form of an exhibit, the summary page from all work orders, amount expended at the end of the test year and anticipated in-service dates. Indicate if any of the construction work in progress will result in insurance recoveries, reimbursements, or retirements of existing facilities. Describe in exact detail the necessity of each project claimed if not detailed on the summary page from the work order. Include final completion date and estimated total amounts to be spent on each project.

[These exhibits should be updated at the conclusion of these proceedings.]

Response:

No claim is being made for non-revenue producing construction work in progress.

Prepared by or under the supervision of: Vivian K. Ressler

I-A-14

Request:

If a claim is made for plant held for future use, supply the following

a. A brief description of the plant or land site and its cost.

b. Expected date of use for each item claimed.

c. Explanation as to why it is necessary to acquire each item in advance of its date of use.

d. Date when each item was acquired.

e. Date when each item was placed in plant held for future use.

Response:

No claim is being made for plant held for future use.

Prepared by or under the supervision of: Vivian K. Ressler

I-A-15

Request:

If materials and supplies comprise part of the cash working capital claim, attach an exhibit showing the actual book balances for materials and supplies by month for the thirteen months prior to the end of the test year. Explain any abrupt changes in monthly balances.

[Explain method of determining claim if other than that described above.]

Response:

Please refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected), Schedule C-8.

Prepared by or under the supervision of: Vivian K. Ressler

I-A-16

Request:

If fuel stocks comprise part of the cash working capital claim, provide an exhibit showing the actual book balances (quantity and price) for the fuel inventories by type of fuel for the thirteen months prior to the end of the test year by location, station, etc.

[Explain the method of determining claim if other than that described above.]

Response:

Please refer to Attachment SDR-RR-45. The fuel represents gas inventory stored underground.

Prepared by or under the supervision of: Vivian K. Ressler

I-A-17

Request:

Regardless of whether a claim for net negative or positive salvage is made, attach an exhibit showing gross salvage, cost of removal, and net salvage for the test year and four previous years by account.

Response:

The information related to the historic test year is presented in Part IV of Exhibit C (Historic) in the section titled “Experienced Net Salvage.” The information related to the future test year is set forth in Part VIII of Exhibit C (Future) in the section titled “Experienced and Estimated Net Salvage.” The information related to the fully projected future test year is set forth in Part IV of Exhibit C (Fully Projected) in the section titled “Experienced and Estimated Net Salvage.”

Prepared by or under the supervision of: John F. Wiedmayer

I-A-18

Request:

Explain in detail by statement or exhibit the appropriateness of claiming any additional items, not previously mentioned, in the measures of value.

Response:

All measures of value have been fully disclosed in UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected), Schedules A-1 and C-1 through C-8, as well as the Direct Testimony of Vivian K. Ressler, UGI Gas Statement No. 3.

Prepared by or under the supervision of: Vivian K. Ressler

I-C-1

Request:

Provide, with respect to the scope of operations of the utility, a description of all property, including an explanation of the system's operation, and all plans for any significant future expansion, modification, or other alteration of facilities.

This description should include, but not be limited to the following:

a. If respondent has various gas service areas, indicate if they are integrated, such that the gas supply is available to all customers.

b. Provide all pertinent data regarding company policy related to the addition of new consumers in the company's service area.

c. Explain how respondent obtains its gas supply, as follows:

    (i) Explain how respondent stores or manufactures gas; if applicable.

    (ii) State whether the company has peak shaving facilities.

    (iii) Provide details of coal-gasification programs, if any.

    (iv) Describe the potential for emergency purchases of gas.

    (v) Provide the amount of gas in MCF supplied by various suppliers in the test year (include a copy of all contracts).

    (vi) Provide the amount of gas in MCF supplied from company-owned wells during the test year.

d. Provide plans for future gas supply, as follows:

    (i) Supply details of anticipated gas supply from respondent's near-term development of gas wells, if any.

    (ii) Provide gas supply agreements and well development ventures and identify the parties thereto.

I-C-1 (Continued)

e. Indicate any anticipated curtailments and explain the reasons for the curtailments.

f. Provide current data on any Federal Power Commission action or programs that may affect, or tend to affect, the natural gas supply to the gas utility.

Response:

a. UGI's gas system consists of approximately 12,000 miles of distribution main and approximately 300 miles of transmission lines served primarily from 84 city gate stations or interconnections with interstate pipelines and one significant gathering system. The distribution system served approximately 672,000 customers as of September 30, 2021. Ninety percent of the customers are residential.

UGI Gas distributes natural gas to areas across Pennsylvania lying within the Counties of Adams, Armstrong, Bedford, Berks, Blair, Bradford, Bucks, Carbon, Centre, Chester, Clarion, Clearfield, Clinton, Columbia, Cumberland, Dauphin, Forest, Franklin, Fulton, Huntingdon, Jefferson, Juniata, Lackawanna, Lancaster, Lebanon, Lehigh, Luzerne, Lycoming, McKean, Mifflin, Monroe, Montour, Montgomery, Northampton, Northumberland, Pike, Potter, Schuylkill, Snyder, Susquehanna, Tioga, Union, Vernango, Wayne, Wyoming, and York.

UGI Gas distribution systems are fed directly by eight interstate pipelines, Tennessee Gas Pipeline Company ("Tennessee"), Columbia Gas Transmission ("Columbia"), Transcontinental Gas Pipe Line Company, LLC. ("Transco"), Texas Eastern Transmission, LP (“Texas Eastern”), UGI Sunbury, LLC (“Sunbury”), UGI Mt. Bethel Pipeline Company, LLC (“Mt. Bethel”), Eastern Gas Transmission and Storage ("EGTS"), and UGI Storage Company (“UGI Storage”). Some distribution systems are fed by multiple pipelines and others are isolated feeds. It is expected that Adelphia Gateway ("Adelphia") will also provide supply into the UGI Gas distribution system beginning in January 2022.

b. UGI Gas pursues the addition of new and expanded load in the residential, commercial, and industrial market areas. UGI Gas follows its tariff guidelines in obtaining these additions.

UGI Gas’ tariff guidelines define the rate schedule the customer can utilize, the investment UGI Gas makes to obtain the customer and all other aspects of the Company’s business.

I-C-1 (Continued)

Beyond the tariff provisions, the other controlling factors in obtaining new load would be the availability from interstate pipelines, gas supply, and capacity on the UGI Gas distribution system.

All customer additions are administered through the Marketing Department. All new customer requests are in the form of a gas application. Once the application has been reviewed for distribution system adequacy, credit and cost, an approval letter is sent to the customer. If a new meter, service or main is required, the work is also scheduled at the time of approval.

c. (i) UGI Gas does not manufacture gas. UGI Gas has no gas storage facilities.

(ii) UGI Gas has no peak shaving facilities.

(iii) UGI Gas has no coal gasification programs.

(iv) UGI Gas does not anticipate the purchase of emergency gas.

(v) Please see Attachment III-E-36 which provides the purchases made from various producers from October 2020 through September 2021. The producer names have been replaced with alphabetic letters for confidentiality reasons. The purchases are typically made under the provision of a standard GISB or NAESB contract. Most contracts have special provisions adding language that may not have been contemplated when the GISB or NAESB contracts were first deployed.

(vi) Not applicable. UGI Gas does not own any gas wells.

d. (i) UGI Gas does not anticipate any development of company-owned gas wells.

(ii) UGI Gas does not have well development ventures. UGI Gas' gas supply arrangements are detailed in its annual Purchased Gas Cost filings, the most recent of which was docketed at R-2021-3025652.

e. UGI Gas does not anticipate curtailments for the system.

f. UGI Gas monitors FERC activity and evaluates pending impacts to rate payers. The FERC proceedings in which UGI Gas intervened are provided in the 1307(f)

I-C-1 (Continued)

Purchased Gas Cost filings for 2021 in Book 1, Section 3 at Docket No. R-2021-3025652.

Prepared by or under the supervision of: Christopher R. Brown

I-C-2

Request:

Provide an overall system map, including and labeling all measuring and regulating stations, storage facilities, production facilities, transmission and distribution mains, by size, and all interconnections with other utilities and pipelines.

Response:

In light of the security concerns reflected in the Commission's Workplace Security Survey at Docket No. M-00021590, UGI Gas has not included system maps in this filing.

Prepared by or under the supervision of: Christopher R. Brown

SECTION 53.53 – RATE OF RETURN

II-A-1

Request:

Provide capitalization and capitalization ratios for the last five-year period and projected through the next two years. (With short-term debt and without short-term debt.) (Company, Parent and System (consolidated)).

a. Provide year-end interest coverages before and after taxes for the last three years and at latest date. (Indenture and SEC Bases.) (Company, Parent and System (consolidated)).

b. Provide year-end preferred stock dividend coverages for last three years and at latest date (Charter and SEC bases).

Response:

Please see Attachment II-A-1.

Prepared by or under the supervision of: Tracy A. Hazenstab

II-A-8

Request:

State amount of debt interest utilized for income tax calculations, and details of debt interest computations, under each of the following rate case bases:

a. Actual test year

b. Annualized test year-end

c. Proposed test year-end

Response:

Please refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), Schedule D-33. All external debt is held at the UGI Utilities, Inc. level. For ratemaking purposes, interest expense is synchronized to the Measure of Value funded at the claimed capital structure and cost of debt.

Prepared by or under the supervision of: Nicole M. McKinney

II-A-9

Request:

State amount of debt interest utilized for income tax calculations which has been allocated from the debt interest of an affiliate, and details of the allocation, under each of the following rate case bases:

a. Actual test year

b. Annualized test year-end

c. Proposed test year-end

Response:

Please refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), Schedule D-33. All external debt is held at the UGI Utilities, Inc. level. For ratemaking purposes, interest expense is synchronized to the Measure of Value funded at the claimed capital structure and cost of debt.

Prepared by or under the supervision of: Nicole M. McKinney

II-A-10

Request:

Under Section 1552 of the Internal Revenue Code and Regulations 1.1552-1 thereunder, if applicable, Parent Company, in filing a consolidated income tax return for the group, must choose one of four options by which it must allocate total income tax liability of the group to the participating members to determine each member's tax liability to the federal government. (If this interrogatory is not applicable, so state.)

a. State what option has been chosen by the group.

b. Provide, in summary form, the amount of tax liability that has been allocated to each of the participating members in the consolidated income tax return.

c. Provide a schedule, in summary form, of contributions, which were determined on the basis of separate tax return calculations, made by each of the participating members to the tax liability indicated in the consolidated group tax return. Provide total amounts of actual payments to the tax depository for the tax year, as computed on the basis of separate returns of members.

d. Provide annual income tax return for group, and if income tax return shows net operating loss, provide details of amount of net operating loss allocated to the income tax returns of each of the members of the consolidated group.

Response:

a. UGI Corporation has elected to allocate the tax liability of the consolidated group to the members in accordance with Regulation 1.1502-33 (d)(2)(ii). Further, the group elects to use 100 percent as the percentage specified in Regulation 1.1502-33(d)(2)(ii)(b). This method of allocation is to be applied in conjunction with the basic allocation method provided in Regulation 1.1552-1(a)(2). UGI Corporation also elected to reflect currently the investment adjustment in earnings and profits pursuant to Regulation 1.1502-33(c)(4)(iii).

b. & c. See Attachment II-A-10.

d. See SDR-RR-55 for copies of certain pages of the 9/30/20 UGI Consolidated Federal Income Tax Return.

II-A-10 (Continued)

The tax results for the year ended 9/30/20 reflect a net operating loss. See Attachment II-A-10 for the allocation of the net operating loss among the consolidated group.

Prepared by or under the supervision of: Nicole M. McKinney

II-A-11

Request:

Provide AFUDC charged by company at test year-end and latest date, and explain method by which rate was calculated.

Response:

AFUDC totaling $438,051 was recorded during the historic test year. UGI Gas follows the FERC guidance for calculation of the AFUDC rate. The calculated rate for the historic test year of 1.01% was based on average construction work in process compared to short-term borrowings on a monthly basis and on an aggregated annual basis. UGI Gas is currently using the short-term debt rate for AFUDC because the average short-term borrowing balances exceeds the average construction work in process balance.

The projected short-term debt rates for the future test year (Fiscal Year 2022) and fully projected test year (Fiscal Year 2023) are 1.01% and 1.30%, respectively.

Prepared by or under the supervision of: Vivian K. Ressler

II-A-12

Request:

Set forth provisions of Company's and Parent's charter and indentures (if applicable) which describe coverage requirements, limits on proportions of types of capital outstanding, and restrictions on dividend payouts.

Response:

UGI Utilities, Inc. entered into an unsecured revolving credit agreement in June 2019 ("Revolving Credit Agreement") with a group of banks that provides for a loan commitment of up to $350 million. UGI Utilities, Inc. may request a $150 million increase in the amount of loan commitments under the Revolving Credit Agreement to a maximum aggregate of $500 million. Under the Revolving Credit Agreement, UGI Utilities, Inc. may borrow at various prevailing interest rates, including LIBOR and the banks' prime rate, plus a margin. The margin on such borrowings ranges from 0.0% to 1.75% and is based on the credit ratings of certain indebtedness of UGI Utilities, Inc.

UGI Utilities, Inc. has various issuances of Senior Notes due at various times from June 2026 through April 2050. The Senior Notes are unsecured.

UGI Utilities, Inc. has a $125 million variable rate Term Loan, with principal payments of $1,562,500 due quarterly and the remaining principal due October 2022. Under this Note, UGI Utilities, Inc. may borrow at various prevailing market interest rates, plus an applicable margin.

The Revolving Credit Agreement, certain of the Senior Notes, and the Term Loan require UGI Utilities, Inc. not to exceed a ratio of Consolidated Debt to Consolidated Total Capital, as defined, of 0.65 to 1.00. Additionally, certain of the Senior Notes require that Consolidated Priority Debt not exceed 10% of Consolidated Total Assets.

Please refer to UGI Gas Exhibit B for a description of all other Notes which do not have defined coverage requirements, (other than that expressed above) limits on types of capital outstanding, or restrictions on dividend payouts.

Prepared by or under the supervision of: Vivian K. Ressler

II-A-13

Request:

Attach copies of the summaries of the projected 2 year's Company's budgets (revenue, expense and capital).

Response:

Please see Attachment II-A-13 for the Company's 2022 and 2023 operating budget and plan. For capital budgets, please refer to the response to II-A-5.

Prepared by or under the supervision of: Tracy A. Hazenstab

II-A-14

Request:

Describe long-term debt reacquisitions by Company and Parent as follows:

a. Reacquisitions by issue by year.

b. Total gain on reacquisitions by issue by year.

c. Accounting of gain for income tax and book purposes.

Response:

The Company and its Parent have not reacquired any debt in more than twenty years.

Prepared by or under the supervision of: Vivian K. Ressler

II-A-15

Request:

Set forth amount of compensating bank balances required under each of the following rate base bases:

a. Annualized test year operations.

b. Operations under proposed rates.

Response:

Not Applicable. UGI Utilities, Inc. has no compensating bank balance requirements.

Prepared by or under the supervision of: Vivian K. Ressler

II-A-16

Request:

Provide the following information concerning compensating bank balance requirements for actual test year:

a. Name of each bank.

b. Address of each bank.

c. Types of accounts with each bank (checking, savings, escrow, other services, etc.).

d. Average Daily Balance in each account.

e. Amount and percentage requirements for compensating bank balance at each bank.

f. Average daily compensating bank balance at each bank.

g. Documents from each bank explaining compensating bank balance requirements.

h. Interest earned on each type of account.

Response:

Not Applicable. UGI Utilities, Inc. has no compensating bank balance requirements.

Prepared by or under the supervision of: Vivian K. Ressler

II-A-17

Request:

Provide the following information concerning bank notes payable for actual test year:

a. Line of Credit at each bank.

b. Average daily balances of notes payable to each bank, by name of bank.

c. Interest rate charged on each bank note (Prime rate, formula rate or other).

d. Purpose of each bank note (e.g., construction, fuel storage, working capital, debt retirement).

e. Prospective future need for this type of financing.

Response:

a. In June 2019, the Company entered into a five-year $350 million revolving credit facility with a consortium of banks (“2019 RCF”). The 2019 RCF is currently scheduled to expire in June 2024. Please see Attachment II-A-17 for the commitment from each bank.

b. The 2019 RCF is predominantly used to meet working capital needs and is more heavily utilized in the Fall and Winter months when inventory and receivables balances peak. The borrowings from each bank are pro rata as per their respective commitments. The average daily borrowing under the Company’s 2019 RCF was $186.2 million for fiscal year 2021.

c. The interest rates for the majority of borrowings under the Company’s 2019 RCF are under the LIBOR + Applicable Margin formula. The Applicable Margin is based on public credit ratings as specified on Attachment II-A-17. The Company has two public debt ratings (Moody’s and Fitch). When there is a split rating, the Moody’s rating applies unless such ratings differ by two or more levels. If ratings differ by two or more levels, the applicable level will be deemed to be one level below the higher of such levels. Based on current ratings of the Company, the applicable margins are 0.875%.

II-A-17 (Continued)

d. The borrowings under the 2019 RCF are for working capital needs, CWIP, and general corporate purposes.

e. The 2019 RCF provides adequate liquidity for working capital needs, CWIP, and general corporate purposes and does not mature until June 2024.

Prepared by or under the supervision of: Vivian K. Ressler

n. Latest reported earnings per share at time of offering
o. Latest reported dividends at time of offering

Response:

The Company has not issued stock in the last five years.

The Parent has issued stock related to the below transaction. The below is an excerpt from the UGI Corporation ("UGI") 10-K filed 11/26/2019. The Common Units discussed in this excerpt represent AmeriGas partnership units.

"On August 21, 2019, the AmeriGas Merger was completed in accordance with the terms of the Merger Agreement entered into on April 1, 2019. Under the terms of the Merger Agreement, the Partnership was merged with and into Merger Sub, with the Partnership surviving as an indirect wholly owned subsidiary of UGI. Each outstanding Common

II-A-19 (Continued)

Unit other than the Common Units owned by UGI was automatically converted at the effective time of the AmeriGas Merger into the right to receive, at the election of each holder of such Common Units, one of the following forms of merger consideration (subject to proration designed to ensure the number of shares of UGI Common Stock issued would equal approximately 34.6 million):

(i) 0.6378 shares of UGI Common Stock (the “Share Multiplier”);

(ii) $7.63 in cash, without interest, and 0.500 shares of UGI Common Stock; or

(iii) $35.325 in cash, without interest.

Pursuant to the terms of the Merger Agreement, effective on August 21, 2019, we issued 34,612,847 shares of UGI Common Stock and paid $528.9 million in cash to the holders of Common Units other than UGI, for a total implied consideration of $2,227.7 million. In addition, the incentive distribution rights in the Partnership previously owned by the General Partner were canceled. After-tax transaction costs directly attributable to the transaction that were incurred by UGI totaling $7.7 million were recorded as a reduction to UGI stockholders’ equity. Transaction costs incurred by the Partnership totaling $6.3 million are reflected in “Operating and administrative expenses” on the 2019 Consolidated Statement of Income. The tax effects of the AmeriGas Merger resulting from the step-up in tax bases of the underlying assets resulted in the recording of a deferred tax asset in the amount of $512.3 million. This deferred tax asset is included in 'Deferred income taxes' on the September 30, 2019 Consolidated Balance Sheet.

Effective upon completion of the AmeriGas Merger, Common Units are no longer publicly traded."

Based on the above transaction, please see below:

a. Date of Prospectus: 7/12/2019
b. Date of offering: 8/21/2019
c. Record date: 8/21/2019
d. Offering period--dates and number of days: 40
e. Amount and number of shares of offering: 34,612,847
f. Offering ratio (if rights offering): N/A
g. Per cent subscribed: N/A
h. Offering price: N/A
i. Gross proceeds per share: N/A

II-A-19 (Continued)

j. Expenses per share: N/A
k. Net proceeds per share (i-j): N/A
l. Market price per share
    1. At record date: $49.08
    2. At offering date: $49.08
    3. One month after close of offering: $50.29
m. Average market price during offering
    1. Price per share: $49.80
    2. Rights per share--average value of rights: N/A
n. Latest reported earnings per share at time of offering: $1.90
    Basic EPS / GAAP / Twelve Months Ended June 30, 2019
o. Latest reported dividends at time of offering: $0.325 per share

On May 25, 2021, the Company's parent issued 2.2 million Equity Units with a total notional value of $220 million. The Equity Units are equity-linked securities and not common stock. Therefore, the Company has determined not to include the Equity Units in the answer to this request.

See accompanying Notes to Consolidated Financial Statements.

II-A-21

Request:

Provide Original Cost, Trended Original Cost and Fair Value rate base claims.

Response:

The Company's claim is based on original cost measure of value. As Pennsylvania law requires use of original cost measure of value for ratemaking, trended original cost and fair value rate base claims were not prepared.

Please refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected), Schedule C-1.

Prepared by or under the supervision of: Vivian K. Ressler

II-A-22

Request:

a. Provide Operating Income claims under:

(i) Present rates
(ii) Pro forma present rates (annualized & normalized)
(iii) Proposed rates (annualized & normalized)

b. Provide Rate of Return on Original Cost and Fair Value claims under:

(i) Present rates
(ii) Pro forma present rates
(iii) Proposed rates

Response:

Please refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), Schedules A-1, D-1, and D-2.

Prepared by or under the supervision of: Tracy A. Hazenstab

II-A-23

Request:

List details and sources of “Other Property and Investment,” “Temporary Cash Investments” and “Working Funds” on test year-end balance sheet.

Response:

Please refer to the following responses:

Other Property and Investment - III-A-2

Temporary Cash Investments - III-A-3

Working Funds other than general operating cash - III-A-3

Prepared by or under the supervision of: Vivian K. Ressler

II-A-24

Request:

Attach chart explaining Company's corporate relationship to its affiliates (System Structure).

Response:

Please see Attachment II-A-24.

Prepared by or under the supervision of: Vivian K. Ressler

II-A-25

Request:

If the utility plans to make a formal claim for a specific allowable rate of return, provide the following data in statement or exhibit form:

a. Claimed capitalization and capitalization ratios with supporting data.
b. Claimed cost of long-term debt with supporting data.
c. Claimed cost of short-term debt with supporting data.
d. Claimed cost of total debt with supporting data.
e. Claimed cost of preferred stock with supporting data.
f. Claimed cost of common equity with supporting data.

Response:

a. Please see the Direct Testimony of Paul R. Moul, UGI Gas Statement No. 6, Exhibit B, Schedule 1.

b. Please see the Direct Testimony of Paul R. Moul, UGI Gas Statement No. 6, Exhibit B, Schedule 1.

c. No claim is being made for short-term debt.

d. Please see the Direct Testimony of Paul R. Moul, UGI Gas Statement No. 6, Exhibit B, Schedule 1.

e. This subparagraph is not applicable as the Company does not have preferred stock.

f. Please see the Direct Testimony of Paul R. Moul, UGI Gas Statement No. 6, Exhibit B, Schedule 1.

Prepared by or under the supervision of: Paul R. Moul

II-A-26

Request:

Provide the following income tax data:

a. Consolidated income tax adjustments, if applicable.

b. Interest for tax purposes (basis).

Response:

a. Please see Attachment II-A-26 for a calculation of a consolidated tax adjustment.

A consolidated tax adjustment has not been flowed through as a ratemaking deduction in the calculation of UGI Gas's federal income tax expense. This adjustment has only been included to demonstrate that UGI Gas has fulfilled the requirements of Section 1301.1(b) of Act 40. Please see the Direct Testimony of Tracy A. Hazenstab, UGI Gas Statement No. 2, for a discussion on how the Company has satisfied these requirements.

b. The interest tax deduction for rate making purposes is synchronized with interest component of the capital structure.

Prepared by or under the supervision of: Nicole M. McKinney

II-C-1

Request:

Provide test year monthly balances for “Current Gas Storage” and notes financing such storage.

Response:

Refer to UGI Gas Exhibit A (Historic), Schedules B-6 and C-5, UGI Gas Exhibit A (Future), Schedules B-6 and C-5, and UGI Gas Exhibit A (Fully Projected Future), Schedules B-6 and C-5. All of our notes can be used to finance gas storage.

Prepared by or under the supervision of: Tracy A. Hazenstab

SECTION 53.53 – BALANCE SHEET AND OPERATING STATEMENT

III-A-1

Request:

Provide a comparative balance sheet for the test year and the preceding year which corresponds with the test year date.

Response:

Please refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected), Schedule B-1 for a balance sheet for each of the test years. For the preceding year which corresponds with the test year date, please refer to the response to SDR-ROR-2.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-A-2

Request:

Set forth the major items of Other Physical Property, Investments in Affiliated Companies and Other Investments.

Response:

Please see Attachment III-A-2.

Prepared by or under the supervision of: Vivian K. Ressler

UGI UTILITIES, INC. - GAS DIVISION
Other Physical Property, Investments in Affiliated Companies and Other Investments

		09/30/2021 balance
Account 121 Non-Utility Property	$	238,681
Account 123 Investment in Subsidiaries *	$	1,078,266
Account 124 Other Investments	$	75,487

* The balance in Account 123 primarily represents a residual equity investment in UGI Gas' inactive heating, ventilation and air conditioning service business ("HVAC").

III-A-3

Request:

Supply the amounts and purpose of Special Cash Accounts of all types, such as:

a. Interest and Dividend Special Deposits.

b. Working Funds other than general operating cash accounts.

c. Other special cash accounts and amounts (Temporary cash investments).

Response:

UGI Utilities, Inc. - Gas Division has no Special Cash Accounts as of September 30, 2021.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-4

Request:

Describe the nature and/or origin and amounts of notes receivable, accounts receivable from associated companies, and any other significant receivables, other than customer accounts, which appear on balance sheet.

Response:

Please see Attachment III-A-4.

Prepared by or under the supervision of: Vivian K. Ressler

UGI UTILITIES, INC. - GAS DIVISION
Schedule of Accounts Receivable

FERC Account Description	(000's) 9/30/21 Balances
Accounts Receivable from Associated Companies – consisting primarily of administrative services provided to UGI Energy Services, Inc.	$ 2,927
Claims Reimbursements	3,601
Damage Repair and Other Misc. Receivables	1,246
Off System Sales & Delivery Service Fees	504
Employee Merchandise & Tuition Reimbursement	84

III-A-5

Request:

Provide the amount of accumulated reserve for uncollectible accounts, method and rate of accrual, amounts accrued, and amounts written-off in each of last three years.

Response:

Please see Attachment III-A-5.

Prepared by or under the supervision of: Vivian K. Ressler

UGI Utilities, Inc. - Gas Division
Schedule of Reserve for Uncollectible Accounts

($ in 000's except for rate of accrual)	9/30/2019	9/30/2020	9/30/2021
Account 144 - Accumulated Provision for Uncollectible Accounts	$ 7,030	$ 13,016	$ 14,518
Method [1]	Allowance	Allowance	Allowance
Rate of Accrual [2]	1.72%	1.53%	1.51%
Amounts Accrued - Uncollectible Expense [2]	$ 14,400	$ 12,810	$ 12,810
Amounts Written Off (net of recoveries)	$ 15,115	$ 7,432	$ 12,203

[1] The allowance method recognizes that a percentage of each month's sales will eventually prove to be uncollectible. Consequently, a percentage of each month's sales is charged to uncollectible expense in that month and the reserve is increased. When specific accounts are written off, they are charged to the reserve account, thus decreasing the reserve.

[2] Fiscal years 2021 and 2020 exclude $895 and $607 of uncollectible expense, respectively, which were recorded as COVID-19 regulatory assets. See further discussion at UGI Gas Exhibit A (Fully Projected Future), Schedule D-11.

III-A-6

Request:

Provide a list of prepayments and give an explanation of special prepayments.

Response:

Please see Attachment III-A-6.

Prepared by or under the supervision of: Vivian K. Ressler

UGI UTILITIES, INC. - GAS DIVISION
Schedule of Prepayments

Account 165		(000's) 9/30/21 Balances
Insurance	$	4,370
IS Maintenance & Services		4,794
Miscellaneous		347
PUC Assessment		2,636
Property Taxes		448
Income Taxes		1,339
Total Prepayments	$	13,935

III-A-7

Request:

Explain in detail any other significant (in amount) current assets listed on balance sheet.

Response:

Refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), Schedule B-1.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-A-8

Request:

Explain in detail, including the amount and purpose, the deferred asset accounts that currently operate to effect or will at a later date effect the operating account supplying:

a. Origin of these accounts.

b. Probable changes to this account in the near future.

c. Amortization of these accounts currently charged to operations or to be charged in the near future.

d. Method of determining yearly amortization for the following accounts:

--Temporary Facilities
--Miscellaneous Deferred Debits
--Research and Development
--Property Losses
--Any other deferred accounts that effect operating results.

Response:

Please see Attachment III-A-8.

Prepared by or under the supervision of: Vivian K. Ressler

UGI UTILITIES, INC. - GAS DIVISION
SCHEDULE OF DEFERRED ASSET ACCOUNTS

Account Description	(000) 9/30/21 Balances		Footnote
Deferred Recoverable Income Taxes	$	125,102	1
Pension and OPEB Benefit		88,378	2
Environmental Costs		58,161	3
Cost of Removal		21,506	4

Energy Efficiency and Conservation (EEC)		959	9
COVID-19 Emergency Relief Program		922	8
DSIC Over/Under		535	9
Rate Case		319	10
Total Deferred Assets	$	319,043	

Footnotes for Amortization Schedule

(1) Amortized over a period of 1-65 years dependent upon the nature of the cost.
(2) Amortized over the average remaining future service lives of plan participants.
(3) Amortized based on annual environmental rate recovery. Unrecovered costs are amortized annually at $1,865.
(4) Amortized over a period of five years.
(5) Currently not amortizing.
(6) Amortized from October 2021 - September 2022.
(7) Amortized over the term of the debt instruments.
(8) Will be amortized over 10 years, in accordance with the 2020 UGI Gas rate case settlement at Docket No. R-2019-3015162.
(9) Recovery of Over/Under collection subject to annual reconciliation.
(10) Amortized from January 2021 - December 2021.

III-A-9

Request:

Explain the nature of accounts payable to associated companies, and note amounts of significant items.

Response:

Please see Attachment III-A-9.

Prepared by or under the supervision of: Vivian K. Ressler

UGI UTILITIES, INC. - GAS DIVISION
SCHEDULE OF ACCOUNTS PAYABLE TO ASSOCIATED COMPANIES

Affiliate Name	Balance in (000's) 9/30/2021	Nature of Payable Activity
UGI Energy Services	$ 9,374	Gas purchase activity
UGI Energy Services	6,900	Collateral deposits
UGI Corporation	3,663	Administrative services
UGI Corporation	1,575	Income tax payment made by UGI Corporate on behalf of Utilities
UGI Gas Control	1,516	Administrative and IT services
	$ 23,027	

III-A-10

Request:

Provide details of other deferred credits as to their origin and disposition policy (e.g.--amortization).

Response:

Please see Attachment III-A-10 for a detailed schedule of Deferred Credits.

Prepared by or under the supervision of: Vivian K. Ressler

UGI Utilities, Inc. - Gas Division
Schedule of FERC 253 – Other Deferred Credits
(in Thousands)

FERC Account Description	Balance at 9/30/21	Footnote
Deferred Revenue	$ 9,748	1
Long Term Operating Lease Obligations	1,715	2
Executive Retirement Plan	6,224	3
Executive Supplemental Savings Plan	33	3
Restricted Share Awards	960	4
Short Term Disability & COBRA - Non Current	1,339	5
Long Term Disability - Non Current	337	6
Deferred CIAC	12,225	7
Uncertain Tax Position	161	8
	$ 32,743	

Footnotes for Amortization Schedule

(1) Amortized over terms of agreements, which extend to various years through 2053.
(2) Amortized over the life of the related lease.
(3) Amortized over the average remaining future service lives of plan participants.
(4) Payout awarded at the end of the performance period.
(5) The valuation reflects the costs associated with all future disability payments, and will be relieved as disability payments are made.
(6) Adjusted quarterly based on the present value of the benefit costs to be paid over the disability term for an employee.
(7) Will be applied to projects as they are placed in service.
(8) FIN48 liabilities are released when a tax year has been audited and settled or the tax year is closed under the statute of limitations. Generally, the statute of limitations is three years from the due date of the tax return.

III-A-11

Request:

Supply basis for Injury and Damages reserve and amortization thereof.

Response:

The accrual for injuries and damages expense is designed to maintain the reserve at the proper level with respect to existing and probable claims, taking into account the insurance coverage available. UGI Gas currently has insurance coverage for commercial, general, automobile and property damages in excess of $1,000,000 per claim. Actual disbursements are charged against the reserve as expenditures are made.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-12

Request:

Provide details of any significant reserves, other than depreciation, bad debt, injury and damages, appearing on balance sheet.

Response:

Please refer to the response to SDR-RR-54 for details of significant reserves appearing on the balance sheet.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-13

Request:

Provide an analysis of unappropriated retained earnings for the test year and three preceding calendar years.

Response:

Please refer to Attachment III-A-13.

Prepared by or under the supervision of: Vivian K. Ressler

UGI Utilities, Inc. - Consolidated
Analysis of Unappropriated Retained Earnings
Twelve Months Ended September 30,
(Thousands of Dollars)

Line No.		Historic 2018	Historic 2019	Historic 2020	HTY 2021	FTY 2022	FPFTY 2023
1	Beginning Balance	$ 480,857	$ 579,778	$ 694,481	$ 780,180	$ 891,062	$ 1,101,494
2	Adjustments (a)		$ 1,525

(a) Adjustments include Cumulative effect of change in accounting principle - ASC 606 - ($3,926) and Reclassification of stranded income tax effects related to TCJA - $5,451.

III-A-14

Request:

Provide schedules and data in support of the following working capital items:

a. Prepayments--List and identify all items
b. Federal Excise Tax accrued or prepaid
c. Federal Income Tax accrued or prepaid
d. Pa. State Income Tax accrued or prepaid
e. Pa. Gross Receipts Tax accrued or prepaid
f. Pa. Capital Stock Tax accrued or prepaid
g. Pa. Public Utility Realty Tax accrued or prepaid
h. State sales tax accrued or prepaid
i. Payroll taxes accrued or prepaid
j. Any adjustment related to the above items for ratemaking purposes.

Response:

Please see UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected), Schedule C-4, and the response to III-A-6. In addition, please see the Direct Testimony of Tracy A. Hazenstab, UGI Gas Statement No. 2, and the Direct Testimony of Vivian K. Ressler, UGI Gas Statement No. 3.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-15

Request:

Supply an exhibit supporting the claim for working capital requirement based on the lead-lag method.

a. Pro forma expenses and revenues are to be used in lieu of book data for computing lead-lag days.

b. Respondent must either include sales for resale and related expenses in revenues and in expenses or exclude from revenues and expenses. Explain procedures followed (exclude telephone).

Response:

Please see UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected), Schedule C-4 and the Direct Testimony of Vivian K. Ressler, UGI Gas Statement No. 3.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-16

Request:

Provide detailed calculations showing the derivation of the tax liability offset against gross cash working capital requirements.

Response:

Refer to UGI Gas Schedule C-4 within Exhibit A (Historic), Exhibit A (Future), Exhibit A (Fully Projected).

Prepared by or under the supervision of: Nicole M. McKinney

III-A-17

Request:

Prepare a Statement of Income for the various time frames of the rate proceeding including:

Col. 1--Book recorded statement for the test year.
2--Adjustments to book record to annualize and normalize under present rates.
3--Income statement under present rates after adjustment in Col. 2
4--Adjustment to Col. 3 for revenue increase requested.
5--Income statement under requested rates.

a. Expenses may be summarized by the following expense classifications for purposes of this statement:

Operating Expenses (by category)
Depreciation
Amortization
Taxes, Other than Income Taxes
Total Operating Expense
Operating Income Before Taxes
Federal Taxes
State Taxes
Deferred Federal
Deferred State
Income Tax Credits
Other Credits
Other Credits and Charges, etc.
Total Income Taxes
Net Utility Operating Income
Other Income & Deductions
Other Income
Detailed listing of Other Income used in Tax Calculation
Other Income Deduction
Detailed Listing
Taxes Applicable to Other Income and Deductions
Listing Income Before Interest Charges
Listing of all types of Interest Charges and all amortization of Premiums and/or Discounts and Expenses on Debt issues

III-A-17 (Continued)

Total Interest
Net Income After Interest Charges

(Footnote each adjustment to the above statements with explanation in sufficient clarifying detail.)

Response:

Please refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), schedules in Section D, for the Company's presentation of the requested Statements of Income and adjustments to operating revenues and expenses.

Please refer to the Direct Testimony of Tracy A. Hazenstab, UGI Gas Statement No. 2, and the Direct Testimony of Vivian K. Ressler, UGI Gas Statement No. 3, for explanations of the Statements of Income and adjustments to operating revenues and expenses depicted in the Section D schedules of UGI Gas Exhibit A (Historic), (Future) and (Fully Projected), the underlying sources of budgeted information, and the basis for the adjustments.

Please refer to the Direct Testimony of Paul R. Moul, UGI Gas Statement No. 6, and related UGI Gas Exhibit B, Schedule 6, for the derivation of the weighted average cost of debt used in the Company's debt interest synchronization adjustment, including the treatment of debt issuance expense, premiums and discounts used in calculating the effective cost rate for each series of long-term debt.

Please refer to the Direct Testimony of Sherry A. Epler, UGI Gas Statement No. 8, for an explanation on the derivation of future test year and fully projected year sales and revenues.

Please refer to the Direct Testimony of Nicole M. McKinney, UGI Gas Statement No. 7, for an explanation of the Company's income tax adjustments.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-18

Request:

Provide comparative operating statements for the test year and the immediately preceding 12 months showing increases and decreases between the two periods. These statements should supply detailed explanation of the causes of the major variances between the test year and preceding year by detailed account number.

Response:

Please refer to Attachment III-A-18 for the exhibit of comparative operating statements.

Explanations of major variances (defined as amounts greater than $1,000 and 10%) are shown below in ($000’s):

Other Operating Revenues – Increase of $22,328 due to increases in Off System Sales (FERC 4950) ($17,300) and Late Payment Charges (FERC 4870) ($2,100).

Depreciation & Amortization – Increase of $10,953 – (FERC 4030) - The increase is due to higher capital expenditures resulting in higher additions, as well as a full year of depreciation expense on assets placed in service in 2020.

Miscellaneous Income/Expense – Decrease of $3,434 – Miscellaneous Non-operating Income/Expense (FERC 4210) decreased $2,000 due to $1,500 decrease in environmental costs and a $500 decrease in other non-operating income. Additionally, there was a one-time donation of a supplier refund of $1,000 in 2020 (FERC 4261).

Prepared by or under the supervision of: Vivian K. Ressler

III-A-19

Request:

List extraordinary property losses as a separate item, not included in operating expenses or depreciation and amortization. Sufficient supporting data must be provided.

Response:

None.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-20

Request:

Supply detailed calculations of amortization of rate case expense, including supporting data for outside services rendered. Provide the items comprising the rate case expense claim (include the actual billings or invoices in support of each kind of rate case expense), the items comprising the actual expenses of prior rate cases and the unamortized balances.

Response:

The Company's rate case expense claim is based on the normalization of projected rate case expenditures. For details, please see UGI Gas Exhibit A (Fully Projected), Schedule D-10. Historic expenditures from the Company's last rate case at Docket No. R-2019-3015162 are shown in Attachment III-A-20.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-A-21

Request:

Submit detailed computation of adjustments to operating expenses for salary, wage and fringe benefit increases (union and non-union merit, progression, promotion and general) granted during the test year and six months subsequent to the test year. Supply data showing for the test year:

a. Actual payroll expense (regular and overtime separately) by categories of operating expenses, i.e., maintenance, operating transmission, distribution, other.

b. Date, percentage increase, and annual amount of each general payroll increase during the test year.

c. Dates and annual amounts of merit increases or management salary adjustments.

d. Total annual payroll increases in the test year.

e. Proof that the actual payroll plus the increases equal the payroll expense claimed in the supporting data (by categories of expenses).

f. Detailed list of employee benefits and cost thereof for union and non-union personnel. Any specific benefits for executives and officers should also be included, and cost thereof.

g. Support the annualized pension cost figures.

    (i) State whether these figures include any unfunded pension costs. Explain.

    (ii) Provide latest actuarial study used for determining pension accrual rates.

h. Submit a schedule showing any deferred income and consultant fee to corporate officers or employees.

Response:

a – f. Refer to UGI Gas Exhibit A (Fully Projected), Schedule D-7 and the Direct Testimony of Tracy A. Hazenstab, UGI Gas Statement No. 2.

III-A-21 (Continued)

g. Refer to Attachment III-A-21 for the latest actuarial report showing pension accrual rates. Refer to UGI Gas Exhibit A (Fully Projected), Schedule D-14 and the Direct Testimony of Vivian K. Ressler, UGI Gas Statement No. 3 for discussion of the Company's pension claim.

h. There are no significant deferred income and consultant fees to corporate officers or employees.

FISCAL 2022 ASC 715-30 PENSION EXPENSE

We have calculated the fiscal 2022 ASC 715-30 pension expense / (income) for the Retirement Income Plan for Employees of UGI Utilities, Inc. (RIP) to be $(5,817,609).

ASC 715-30 PENSION EXPENSE / (INCOME)

The actual fiscal 2022 pension expense / (income) for the RIP is allocated amongst the business units as follows:

UGI Utilities	$	(5,175,258)
Holding Company		(199,302)
Enterprises		(50,730)
UGID		(206,171)
HVAC		(134,708)
CPG Propane		(131,024)
UGI Gas Control		79,584
	$	(5,817,609)

The fiscal 2022 pension expense / (income) compares to actual fiscal 2021 pension expense of $4,762,015. There are multiple factors influencing the change in expense to income for fiscal 2022. The primary reasons for the change in expense are as follows:

- The decrease in the increase in the discount rate assumption from 2.90% to 3.10% decreased fiscal 2022 expense (increased income) by approximately $1.6 million
- Expected changes (including cash contributions made to the plan) based on the prior valuation decreased fiscal 2022 expense (increased income) by approximately $3.4 million
- The return on the market-related value of plan assets was higher than expected, which decreased fiscal 2022 expense (increased income) by $4.7 million
- The change in the mortality assumption from the Pri-2012-based table with the MP-19 improvement scale to the Pri-2012-based table with the MP-20 improvement scale decreased fiscal 2022 expense (increased income) by approximately $0.9 million

The pension expense / (income) is based on the projected benefit obligation (PBO) and fair asset value measured as of September 30, 2021, as reported in UGI's fiscal 2021 year-end financial disclosure. The plan's PBO as of September 30, 2021 was estimated to be $713,473,135 and the fair value of assets were reported to be $625,947,186

The details of the pension expense calculations are shown in the following exhibits:

- Exhibit I contains the expense calculations in total
- Exhibit II contains the expense components by business unit

[redacted]
October 28, 2021

The PBO was allocated to the various business units based on the codes provided in the 2021 valuation data and confirmed through the data question process. Service cost and interest cost were allocated to each unit based on actual amounts calculated for the respective participants of each unit. The expected return on assets component and the amortization components of pension expense were allocated in proportion to the PBO's of the respective business unit.

The allocation of the projected benefit obligation as of September 30, 2021 between UGI Utilities, Holding Company, UGID, HVAC, UGI Enterprises, and CPG – Propane are shown below:

	September 30, 2021 PBO
Utilities	$ 638,708,082
Holding Company	47,158,472
Enterprises	2,578,264
UGID	10,578,188
HVAC	7,020,254
CPG Propane	6,729,186
UGI Gas Control	700,689
Total	$ 713,473,135

EMPLOYEE DEMOGRAPHICS

Census data used for the determination of fiscal 2022 pension cost is as of January 1, 2021. After discussions with UGI, obligations were projected to September 30, 2021 on a no gain/loss basis, and adjusted for changes in key actuarial assumptions. There were 710 active participants as of January 1, 2021. A breakdown of the active participants by business unit is as follows:

- UGI Utilities: 686
- Holding Company: 17
- Enterprises: 0
- UGID: 0
- UGI HVAC: 0
- CPG Propane: 0
- UGI Gas Control: 7

The number of inactive participants as of January 1, 2021 is 2,787, which includes 743 terminated vested participants and 2,044 participants currently receiving benefits.

INVESTMENT EXPERIENCE

The rate of return on the fair value of assets was approximately 13.8% for the period October 1, 2020 to September 31, 2021 compared to the assumed investment return of 7.10% for that period. The market-related value of assets used to determine pension expese phases in deviations from the assumed return on the equity portion of the portfolio. For the fixed income portion of the portfolio, the market-related value is equal to the fair value. Actual investment return during fiscal 2021 caused the fiscal 2022 pension expense to decrease (income to increase).

October 28, 2021

ASSUMPTIONS

The fiscal 2021 and 2022 ASC 715-30 pension costs were determined using the following assumptions:

ECONOMIC ASSUMPTIONS:	FISCAL 2022	FISCAL 2021
■ Discount rate	3.10%	2.90%
■ Weighted-average salary increase assumption from age 40 to expected retirement	3.25%	3.25%
■ Expected return on assets	7.10%	7.20%
■ Mortality	Pri-2012 blue collar table with rates decreased by 4.9%, projected using Scale MP-2020 from 2012	Pri-2012 blue collar table with rates decreased by 4.9%, projected using Scale MP-2019 from 2012
■ Cash contributions	2021 target normal cost prior to reflection of interest rate stabilization ($11,364,000) based on the following schedule:	2020target normal cost prior to reflection of interest rate stabilization ($12,595,446) based on the following schedule:

Date	Amount	Date	Amount
12/15/2021	2,841,000	12/15/2020	3,044,000
3/15/2022	2,841,000	3/15/2021	3,044,000
6/15/2022	2,841,000	6/15/2021	3,044,000
9/15/2022	2,841,000	9/15/2021	3,044,000

All other assumptions and methods, as well as their rationale, are unchanged from those documented in the fiscal 2021 actuarial valuation report.

PLAN PROVISONS

All plan provisions are the same as those documented in the fiscal 2021 actuarial valuation report.

PROFESSIONAL QUALIFICATIONS AND RELIANCES

The undersigned consulting actuaries are members of the Society of Actuaries and meet the "Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States" relating to pension plans. Our objectivity is not impaired by any relationship between UGI Utilities, Inc. and our employer, Willis Towers Watson US LLC.

In preparing these results Willis Towers Watson has used the information and data provided to us by UGI. We have relied on all the data and information provided, including plan provisions as being complete and accurate. We have reviewed this information for overall reasonableness and consistency but have neither audited nor independently verified this information.

The results contained in this letter are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with any certainty. Certain plan provisions may be approximated or determined to be immaterial and therefore not valued. Assumptions may be made about participant data or other factors. We have made reasonable efforts to ensure that items that are material in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

Actual future experience will differ from the assumptions used in our calculations. As these differences arise, contributions or the cost for accounting purposes will be adjusted in future valuations to take changes into account. If these adjustments become material, they may result in future adjustments to the valuation model.

As required by ASC 715, the actuarial assumptions and methods employed in the development of the pension cost have been selected by the plan sponsor. U.S. GAAP requires that each significant assumption "individually represent the best estimate of the plan's future experience solely with respect to that assumption. Willis Towers Watson has evaluated the assumptions used and believes that they do not significantly conflict with what would be reasonable.

Accumulated other comprehensive (income)/loss amounts shown in the report are shown prior to adjustment for deferred taxes. Any deferred tax effects in AOCI should be determined in consultation with UGI's tax advisors and auditors. Willis Towers Watson used information supplied by UGI regarding postretirement benefit asset, postretirement benefit liability and amounts recognized in accumulated other comprehensive income as of September 30, 2021. This data was reviewed for reasonableness and consistency, but no audit was performed.

The results contained in this letter have been developed based on actuarial assumptions that, to the extent evaluated or selected by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

The results provided in this letter have been prepared solely for the benefit of UGI to assist with its year-end financial reporting. This email should not be used for other purposes and we accept no responsibility for any such use. It should not be relied upon by, or shared with, any third parties without Willis Towers Watson's prior written consent.

This letter provides actuarial information. It does not constitute legal, accounting, tax or investment advice. We encourage UGI to consult with qualified advisors with respect to those matters.

ASOP 56 DISCLOSURE

valuation system. It is used to perform valuations of clients' benefit plans. Quantify provides the ability to process data, calculate benefits and value benefit liabilities, develop results using applicable standards, and generate client reports. Quantify parameters provide significant flexibility to model populations and plan designs. Various demographic, economic and benefit related assumptions exist for users to model multiple demographic and economic situations.

Plan liabilities are calculated based on standard actuarial techniques, developing actuarially reasonable results using the population and parameters entered. The calculation and presentation of liabilities in Quantify relies on the assumptions used and the reasonability of the assumptions selected. Quantify incorporates standard liability methodologies that are intended to reasonably reflect a variety of economic or demographic conditions. The model itself does not evaluate any assumptions entered for reasonableness, consistency or probability of occurrence.

Quantify is designed specifically for these purposes, and we know of no material limitations that would prevent the system from being suitable for these intended purposes. The actuaries signing this report have relied on the actuaries who develop, test and maintain this system, and have also performed a limited review of results to ensure that system parameters have been set appropriately and plan provisions coded correctly.

RATE:Link is a methodology to develop spot rates to be used for measurements related to employee benefit plans. The same core methodology is used to develop all RATE:Link curves. The RATE:Link process develops term structures of interest rates from corporate bond data for each covered market. The construction of RATE:Link yield curves relies on bond data collected as of the measurement date. Information regarding quoted bond prices, yields and other bond related data is from Bloomberg Finance L.P

U.S. BOND:Link is a methodology to assist with the selection of discount rates used in measurements related to employee benefit plans. Discount rates are derived by identifying a theoretical settlement portfolio of high- quality corporate bonds sufficient to provide for a plan's projected benefit payments. The single interest rate is then determined that results in a discounted value of the plan's benefit payments that equals the market value of the selected bond portfolio.

Updated BOND:Link models are developed monthly as of the last day of the month. The construction of a BOND:Link model relies on bond data collected as of the measurement date Parameters provide the user the ability to control aspects of the model. The model output allows the user to see the effect of those parameters. Information regarding quoted bond prices, yields and other bond related data is from Bloomberg Finance L.P.

III-A-22

Request:

Supply an exhibit showing an analysis, by functional accounts, of the charges by affiliates (Service Corporations, etc.) for services rendered included in the operating expenses of the filing company for the test year and for the 12-month period ended prior to the test year:

a. Supply a copy of contracts, if applicable.
b. Explain the nature of the services provided.
c. Explain basis on which charges are made.
d. If charges allocated, identify allocation factors used.
e. Supply the components and amounts comprising the expense in this account.
f. Provide details of initial source of charge and reason thereof.

Response:

Refer to Attachment III-A-22.1 for listings of applicable Gas Purchase Agreements, Asset Management Agreements and Affiliated Interest Agreements which have been previously authorized by the Commission. Refer to Attachments III-A-22.2(a) - (m) (contained on USB flash drive) for copies of the Affiliated Interest Agreements which have been previously authorized by the Commission.

See Attachment III-A-22.3 for a listing of charges from affiliates for services rendered. This listing includes the affiliate providing the service, the nature of the service, the amounts charged for Fiscal 2019 - Fiscal 2023 (Fiscal 2022 and Fiscal 2023 are planned amounts), the FERC functional account(s) where the charges are recorded, and the allocation factor (if applicable).

UGI Corporation provides administrative services to UGI Utilities, Inc. pursuant to Affiliate Interest Agreements approved by the Commission. Services provided by UGI Corporation include, but are not limited to, executive management, finance and accounting, information technology, human resources, pension fund management, internal audit, legal, shareholder relations, risk management and similar types of services.

List of Affiliated Interest Agreements

Attachment #	Affiliate	Effective Dates	Docket #	Details
III-A-22.2(a)	UGI Corporation	May 1992	G-00920296	This Agreement sets forth the terms by which Utilities may provide administrative services to or receive services from Holding Company and its unregulated subsidiaries. These services will be provided on a cost basis.
III-A-22.2(b)	UGI Corporation	July 2003	G-00031008	Arrangement between UGI Utilities, Inc. and UGI Corporation and its subsidiaries under which Utilities would provide pipeline engineering, construction, maintenance and related services to UGI Companies at the higher of market rates or cost.
III-A-22.2(c)	UGI Energy Services, LLC	April 2004	G-00041075	Affiliate Interest Agreement regarding ground to be leased by UGI Energy Services, LLC from UGI Utilities, Inc. and office space to be leased by UGI Utilities, Inc. from UGI Energy Services, LLC.
III-A-22.2(d)	UGI Energy Services, LLC	Aug. 2007	G-00970552	This is an Agreement whereby Utilities would buy gas from or sell gas to GASMARK at prevailing market rates.
III-A-22.2(e)	UGI Energy Services, LLC	March 1999	G-00980646	This is an Agreement whereby Utilities would buy electric generation from Energy Services at or below prevailing market rates, for its own use at facilities throughout its service territories.
III-A-22.2(f)	AmeriGas, Inc.	May 16, 2017 – December 31, 2020	G-2016-2557069	Affiliated Interest Agreement between UGI Utilities, Inc. and AmeriGas, Inc. to support the Gas-Beyond-the-Mains customers.
III-A-22.2(g)	UGI HVAC	Dec. 2005	G-00051142	Affiliate Interest agreement in which UGI HVAC will reimburse UGIU for allocated costs related to use of space at UGIU facilities.

Attachment #	Affiliate	Effective Dates	Docket #	Details
III-A-22.2(h)	UGI HVAC	Feb. 2007	G-00071217	Affiliated Interest Agreement of UGI Utilities, Inc. with UGI HVAC Services, Inc. and UGI HVAC Enterprises (1) natural gas distribution facility installation, maintenance, testing and repair services and associated equipment (hereafter "Natural Gas Operations Services") and (2) heating, air conditioning, ventilating, plumbing, electric contracting and/or related services and associated equipment from the UGI HVAC Companies at market prices.
III-A-22.2(i)	United Valley Insurance Co.	June 1993	G-00930344	Affiliate Interest Agreement for insurance coverage through United Valley Insurance Co. Coverage through the affiliate is not mandatory and may be purchased through other independent companies when costs or coverage are more advantageous.
III-A-22.2(j)	UGI Sunbury, LLC	June 2015	G-2015-2467129	Affiliated Interest Agreement between UGI Utilities, Inc. and UGI Sunbury, LLC regarding the Sunbury Pipeline.
III-A-22.2(k)	UGI Central Gas Control, LLC	October 1, 2020 – September 30, 2030 –	G- 2020-3021989	Application of UGI Utilities, Inc. –Gas Division (“UGI Gas”) for Approval of Services Agreement whereby UGI Gas would receive gas control services from UGI Central Gas Control, LLC (“UGI Gas Control”) and UGI Gas would provide certain IT and licensing provisions to UGI Gas Control.
III-A-22.2(l)	UGI Energy Services, LLC	April 1, 2021	G-2021-3024552 G-2021-3024804	Affiliated Interest Agreement between UGI Utilities, Inc. – Electric & Gas Divisions and UGI Energy Services, LLC to sub-lease office space.
III-A-22.2(m)	UGI Energy Services, LLC	November 10, 2021	G-2021-3028753	Affiliated Interest Agreement between UGI Utilities, Inc. and UGI Energy Services, LLC regarding the Auburn Gathering System.

N/A Not Applicable

(a) UGI HVAC was sold to an unaffiliated company effective 9/30/2020. Therefore, there are no affiliate transactions for 2021 or future.

(b) UGI Utilities, Inc. subleases building space from UGI Energy Services, LLC, as explained at Attachment III-A-22.2. This building space is used exclusively for the UNITE It development project team and is therefore capitalized as part of the project costs within 107 (while in progress) and 101 (when complete).

(c) For 2019 - 2021, all Corporate allocation amounts were allocated to FERC 923 (Outside Services). For 2022 and 2023, the amounts are assigned to various FERC accounts, based on the nature of the underlying cost.

(d) Allocation factor used for administrative services is MWF or time spent as applicable based on nature of the service.

(e) 2022 and 2023 natural gas purchases from UGI Energy Services, LLC are estimated based on 2021 actuals.

III-A-23

Request:

Describe costs relative to leasing equipment, computer rentals, and office space, including terms and conditions of the lease. State method for calculating monthly or annual payments.

Response:

Please see Attachment III-A-23.

Prepared by or under the supervision of: Vivian K. Ressler

UGI Utilities, Inc. - Gas Division
Costs Relative to Leasing Equipment, Computer Rental and Office Space
12 Months Ended 9/30/2021
(000's)

	Annual Expenses	Method of Computing Payment	Terms of Lease or Rental Agreement
Real Estate	$ 229	Monthly payments per lease or rental agreements. Percentage applied from Modified Wisconsin Formula for leases of shared properties.	2008 - 2025
Equipment	380	Monthly payments per lease or rental agreements. Percentage applied from Modified Wisconsin Formula for leases of shared assets.	2019 - 2024
Vehicles	1,602	Monthly payments per lease or rental agreements.	2018 - 2023
Total	$ 2,211		

Note: Balances above include long-term leases only (Original Terms of 12 months or more)

III-A-24

Request:

Submit detailed calculations (or best estimates) of the cost resulting from major storm damage.

Response:

No major storm damages have been recorded in the last five fiscal years. Accordingly, no damages are included in the future or fully projected future test year claims.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-25

Request:

Submit details of expenditures for advertising (National and Institutional and Local media). Provide a schedule of advertising expense by major media categories for the test year and the prior two comparable years with respect to:

a. Public health and safety
b. Conservation of energy
c. Explanation of Billing Practices, Rates, etc.
d. Provision of factual and objective data programs in educational institutions
e. Other advertising programs
f. Total advertising expense

Response:

Please see Attachment III-A-25.

III-A-31

Request:

Provide a detailed analysis of Special Services--Account 795.

Response:

Gas account 795 has no activity.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-32

Request:

Provide a detailed analysis of Miscellaneous General Expense--Account No. 801.

Response:

UGI Gas has not recorded activity to account 801 for the last five fiscal years and has no amounts allocated to this account in the FTY or FPFTY. UGI Gas does, however, capture Miscellaneous General Expense under account 930.2. For an analysis of that account's activity, please refer to the response to III-A-28.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-33

Request:

Provide a labor productivity schedule.

Response:

Please see Attachment III-A-33.

III-A-34

Request:

List and explain all non-recurring abnormal or extraordinary expenses incurred in the test year which will not be present in future years.

Response:

Test year expenses that are non-recurring, extraordinary or do not occur yearly, but over an extended period of years, are explained and adjusted in Section D of UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected).

Prepared by or under the supervision of: Tracy A. Hazenstab

III-A-35

Request:

List and explain all expenses included in the test year which do not occur yearly but are of a nature that they do occur over an extended period of years. (e.g.--Non-yearly maintenance programs, etc.)

[Responses shall be submitted and identified as exhibits.]

Response:

For adjustments to operating expenses, please see UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected), Section D and the Direct Testimony of Tracy A. Hazenstab, UGI Gas Statement No. 2, and the Direct Testimony of Vivian K. Ressler, UGI Gas Statement No. 3.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-A-36

Request:

Using the adjusted year's expenses under present rates as a base, give detail necessary for clarification of all expense adjustments. Give clarifying detail for any such adjustments that occur due to changes in accounting procedure, such as charging a particular expense to a different account than was used previously. Explain any extraordinary declines in expense due to such change of account use.

Response:

In Fiscal 2021 (HTY) and previous years, UGI Gas recorded all costs associated with services provided by UGI Corporation within FERC account 923 (Outside Services). As part of a recent FERC audit, UGI Gas was requested to record these costs based on the underlying nature of the expense. Therefore, for Fiscal 2022 and future, such allocated costs are recorded within the following FERC accounts: 920 (Administrative and general salaries); 923 (outside services employed); 925 (injuries and damages); 926 (employee pensions and benefits); and 408.1 (taxes other than income taxes). For fiscal years 2022 and 2023, this reclassification totaled $16.2 and $16.7 million respectively.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-A-37

Request:

Indicate the expenses that are recorded in the test year, which are due to the placement in operating service of major plant additions or the removal of major plant from operating service, and estimate the expense that will be incurred on a full-year's operation.

Response:

For a presentation of the major plant additions, cost of removal and plant retirements, refer to Schedules C-2 and C-3 in the UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected). For a presentation of depreciation expense, please refer to Schedule D-21.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-38

Request:

Submit a statement of past and anticipated changes, since the previous rate case, in major accounting procedures.

Response:

New Accounting Standard Adopted effective October 1, 2020:

Credit Losses. Effective October 1, 2020, the Company adopted ASU 2016-13, “Measurement of Credit Losses on Financial Instruments,” including subsequent amendments, using a modified retrospective transition approach. This ASU, as subsequently amended, requires entities to estimate lifetime expected credit losses for financial instruments not measured at fair value through net income, including trade and other receivables, net investments in leases, financial receivables, debt securities, and other financial instruments, which may result in earlier recognition of credit losses. Further, the new current expected credit loss model may affect how entities estimate their allowance for losses related to receivables that are current with respect to their payment terms. The adoption of the new guidance did not have a material impact on the Company's financial statements.

New Accounting Standard Adopted effective October 1, 2021:

Income Taxes. In December 2019, the FASB issued ASU 2019-12, “Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes.” This ASU simplifies the accounting for income taxes by eliminating certain exceptions within the existing guidance for recognizing deferred taxes for equity method investments, performing intraperiod allocations and calculating income taxes in interim periods. Further, this ASU clarifies existing guidance related to, among other things, recognizing deferred taxes for goodwill and allocated taxes to members of a consolidated group. This new guidance is effective for the Company for interim and annual periods beginning October 1, 2021 (Fiscal 2022) and is not expected to have a material impact on the Company's financial statements.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-39

Request:

Identify the specific witness for all statements and schedules of revenues, expenses, taxes, property, valuation, etc.

Response:

Please see the Direct Testimony of Christopher R. Brown, UGI Gas Statement No. 1, for a complete list of witnesses and areas of responsibility. The primary witness for each statement and schedule is identified on the specific document.

Prepared by or under the supervision of: Christopher R. Brown

III-A-40

Request:

Adjustments which are estimated shall be fully supported by basic information reasonably necessary.

Response:

Adjustments are fully supported in UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), Sections C and D, as well as the Direct Testimony of UGI Gas Statement Nos. 1 through 11.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-A-41

Request:

Submit a statement explaining the derivation of the amounts used for projecting future test year level of operations and submit appropriate schedules supporting the projected test year level of operations.

Response:

The schedules shown in UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected), Section D, reflect this information and are the supporting detail for the Fully Projected Future Test Year for the period ending September 30, 2023. Please see the Direct Testimony of Christopher R. Brown, UGI Gas Statement No. 1, the Direct Testimony of Tracy A. Hazenstab, UGI Gas Statement No. 2, The Direct Testimony of Vivian K. Ressler, UGI Gas Statement No. 3, the Direct Testimony of Vicky A. Schappell, UGI Gas Statement No. 5, and the Direct Testimony of Nicole M. McKinney, UGI Gas Statement No. 7.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-A-42

Request:

If a company has separate operating divisions, an income statement must be shown for each division, plus an income statement for company as a whole.

Response:

Please refer to Attachment III-A-42 for the requested information.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-44

Request:

Ratios, percentages, allocations and averages used in adjustments must be fully supported and identified as to source.

Response:

Ratios, percentages, allocations and averages, where utilized, are detailed in the supporting adjustments to revenue and expenses set forth in UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected), Section D. Please also refer to the Direct Testimony of UGI Gas Statement Nos. 1 through 11.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-A-45

Request:

Provide an explanation of any differences between the basis or procedure used in allocations of revenues, expenses, depreciation and taxes in the current rate case and that used in the prior rate case.

Response:

There have been no changes to the allocation methodology.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-46

Request:

Supply a copy of internal and independent audit reports of the test year and prior calendar year, noting any exceptions and recommendations and disposition thereof.

Response:

Please see Attachment III-A-46 for the list of audit reports for the historic test year and prior year. The information contained in these reports is deemed confidential. Any party to the proceeding requiring access to these reports will be afforded the opportunity upon request, subject to the provisions of a Confidentiality Agreement to be entered into between such party and the Company pursuant to a Protective Order.

Prepared by or under the supervision of: Vivian K. Ressler

III-A-47

Request:

Submit a schedule showing rate of return on facilities allocated to serve wholesale customers.

Response:

There are no facilities allocated for the provision to serve wholesale customers.

Prepared by or under the supervision of: Christopher R. Brown

III-A-48

Request:

Provide a copy of the latest capital stock tax report and the latest capital stock tax settlement.

Response:

Not applicable. The PA Capital Stock tax was eliminated for tax years beginning January 1, 2016. Last filed PA Capital Stock tax return was for tax year ending 9/30/2016.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-49

Request:

Submit details of calculations for Taxes, Other than Income where a company is assessed taxes for doing business in another state, or on its property located in another state.

Response:

Details of Taxes, Other Than Income where UGI Gas is assessed taxes for doing business in another state, or on its property in another state for the period ended September 30, 2021 are listed below:

1.	Maryland (Property, Franchise and PSC taxes):	$22,811
2.	West Virginia (Public Utility Tax):	$13,683
	Total:	$36,494

Prepared by or under the supervision of: Nicole M. McKinney

III-A-50

Request:

Provide a schedule of federal and Pennsylvania taxes, other than income taxes, calculated on the basis of test year per books, pro forma at present rates, and pro forma at proposed rates, to include the following categories:

a. social security
b. unemployment
c. capital stock
d. public utility realty
e. P.U.C. assessment
f. other property
g. any other appropriate categories

Response:

Refer to UGI Gas Exhibit A, Schedules D-31 and D-32 for the Historic, Future, and Fully Projected Future test years.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-51

Request:

Submit a schedule showing for the last five years the income tax refunds, plus interest (net of taxes), received from the federal government due to prior years' claims.

Response:

None.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-52

Request:

Provide detailed computations showing the deferred income taxes derived by using accelerated tax depreciation applicable to post-1969 utility property increases productive capacity, and ADR rates on property. (Separate between state and federal; also, rate used)

a. State whether tax depreciation is based on all rate base items claimed as of the end of the test year, and whether it is the annual tax depreciation at the end of the test year.

b. Reconcile any difference between the deferred tax balance, as shown as a reduction to measures of value (rate base), and the deferred tax balance as shown on the balance sheet.

Response:

See Schedules D-33 and D-34 in Exhibit A (Historic), Exhibit A (Future), and Exhibit A (Fully Projected) for the computation of federal and state deferred income taxes.

a. Tax depreciation subject to normalization is based on depreciable property as of the end of the test year. Further, tax depreciation is annualized as of the end of the test year period.

b. The accumulated deferred tax balance, as shown as a reduction to measures of value, represents the annualized balance based on the plant in service included in the measures of value, and then pro-rated according to the normalization rules under Treasury Regulation 1.167(l)-1(h)(6)(ii). The balance sheet represents the budgeted balance.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-53

Request:

Submit a schedule showing a breakdown of the deferred income taxes by state and federal per books, pro-forma existing rates, and under proposed rates.

Response:

Refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), Schedule D-33.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-54

Request:

Submit a schedule showing a breakdown of accumulated investment tax credits (3 percent, 4 percent, 7 percent, 10 percent and 11 percent), together with details of methods used to write-off the unamortized balances.

Response:

As of fiscal year ended September 30, 2021, the amount of UGI Gas' accumulated 3% investment tax credit was $1,676,149.

This investment credit is amortized on a straight-line basis. The annual amortization of the credit is $318,420.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-55

Request:

Submit a schedule showing the adjustments for taxable net income per books (including below-the-line items) and pro-forma under existing rates, together with an explanation of any difference between the adjustments. Indicate charitable donations and contributions in the tax calculation for rate making purposes.

Response:

Please refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Fully Projected), Schedules A-1, D-1, D-33 and D-34. For ratemaking purposes, charitable donations and contributions are not being claimed and are excluded from test year data.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-56

Request:

Submit detailed calculations supporting taxable income before state and federal income taxes where the income tax is subject to allocation due to operations in another state, or due to operation of other taxable utility or non-utility business, or by operating divisions or areas.

Response:

Please see Attachment III-A-56.

UGI Gas has established nexus for income tax purposes in other states due to having storage inventory in those states. Because of having nexus with those states, it files tax returns with income allocated to those states. Income is allocated according to the apportionment rules for each state. Attachment III-A-56 reflects that allocation of taxable income.

Prepared by or under the supervision of: Nicole M. McKinney

UGI Utilities, Inc. - Gas Division

III-A-57

Request:

Submit detailed calculations showing the derivation of deferred income taxes for amortization of repair allowance if such policy is followed.

[Note: Submit additional schedules if the company has more than one accounting area.]

Response:

Please See Exhibit A, Schedule D-33 (Historic); Exhibit A, Schedule D-33 (Future); and Exhibit A, Schedule D-33 (Fully Projected) for the repairs deferred income tax expense for each of the respective years.

Please see Exhibit A, Schedule C-6 (Historic); Exhibit A, Schedule C-6 (Future); and Exhibit A Schedule C-6 (Fully Projected) for the repairs accumulated deferred income tax balance for each of the respective years.

Also, please see the Direct Testimony of Nicole M. McKinney, UGI Gas Statement No. 7 for an explanation of the Company's regulatory treatment of the repairs tax allowance.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-58

Request:

Furnish a breakdown of major items comprising prepaid and deferred income tax charges and other deferred income tax credits and reserves by accounting areas.

Response:

See UGI Gas Exhibit A, Schedule C-6 (Historic) for deferred taxes relative to plant in service.

The net value of deferred taxes on items other than plant in service at fiscal year ended 9/30/2021 is a deferred tax liability of $40,129,243.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-59

Request:

Provide details of the Federal Surtax Credit allocated to the Pennsylvania jurisdictional area, if applicable.

Response:

Not applicable.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-60

Request:

Explain the reason for the use of cost of removal of any retired plant figures in the income tax calculations.

Response:

For income tax purposes, the cost of removal is deductible in the year incurred. For book purposes, the cost is amortized over 60 months.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-61

Request:

Submit the corresponding data applicable to Pennsylvania Corporate Income Tax deferment.

a. Show the amounts of straight line tax depreciation and accelerated tax depreciation, the difference between which gave rise to the normalizing tax charged back to the test year operating statement.

b. Show normalization for both Federal and State Income Taxes.

c. Show tax rates used to calculate tax deferment amount.

Response:

a. & b. Refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), UGI Gas Exhibit A (Fully Projected), Schedules D-33 and D-34, which provide details of the deferred income taxes from normalized depreciation separately for Federal and State.

c. The U.S. gross federal income tax rate is 21%, but net of the federal benefit for state taxes it becomes 18.90%. The state tax rate is 9.99%.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-62

Request:

Provide the accelerated tax depreciation and the book depreciation used to calculate test year deferrals in amounts segregated as follows:

For:

a. Property installed prior to 1970

b. Property installed subsequent to 1969 (indicate increasing capacity additions and nonincreasing capacity additions).

Response:

a. There is no property installed prior to 1970 for tax purposes.

b. Tax depreciation related to accelerated cost recovery system (ACRS) and modified accelerated cost recovery system (MACRS) is calculated on the full taxable basis and income taxes are normalized on the difference between ACRS/MACRS depreciation and book depreciation. For property installed subsequent to 1969, see Section D, Schedule D-34 within UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected).

Prepared by or under the supervision of: Nicole M. McKinney

III-A-63

Request:

State whether all tax savings due to accelerated depreciation on property installed prior to 1970 have been passed through to income. (If not, explain).

Response:

All tax savings have been passed through and UGI Gas has no remaining accelerated depreciation on property installed prior to 1970.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-64

Request:

Show any income tax loss/gain carryovers from previous years that may effect test year income taxes or future year income taxes. Show loss/gain carryovers by years of origin and amounts remaining by years at the end of the test year.

Response:

Not applicable.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-65

Request:

State whether the company eliminates any tax savings by the payment of actual interest on construction work in progress not in rate base claim.

If response is affirmative:

a. Set forth amount of construction claimed in this tax savings reduction. Explain the basis for this amount.

b. Explain the manner in which the debt portion of this construction is determined for purposes of the deferral calculations.

c. State the interest rate used to calculate interest on this construction debt portion, and the manner in which it is derived.

d. Provide details of calculation to determine tax saving reduction. State whether state taxes are increased to reflect the construction interest elimination.

Response:

No. Interest deduction for rate making purposes is synchronized with the interest component of the capital structure.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-66

Request:

Provide a detailed analysis of Taxes Accrued per books as of the test year date. Also supply the basis for the accrual and the amount of taxes accrued monthly.

Response:

Please see Attachments III-A-66.1 (Historic), III-A-66.2 (Future), and III-A-66.3 (Fully Projected).

Prepared by or under the supervision of: Nicole M. McKinney

UGI Utilities, Inc. - Gas Division
Schedule of Taxes Accrued per Books - Historic Test Year
Twelve Months Ended September 30, 2021
(Thousands of Dollars)

Description	Amount	Basis for Accrual of Tax	Amount of Tax Accrued Monthly
PA Public Utility Realty Tax	(280)	Tax is based on assessed valuation of the company's taxable real property.	Monthly accrual is one twelfth of total estimated tax.
PA Unemployment Tax	(104)	Tax based on employer's unemployment rate multiplied by a maximum of $10,000 per employee.	Accrual is computed monthly by applying the tax rate to taxable earnings.
PA Use Tax	(1)	Tax based on taxable purchases on which sales tax has not been charged at the rate of 6%.	Accrual computed monthly by applying the tax rate to applicable purchases.
Federal Unemployment Tax	157	Tax is based on the first $7,000 earned by an employee at a taxable rate of 6%.	Accrual is computed monthly by applying the tax rate to taxable earnings.
FICA	47	Tax for OASDI is based on the first $142,800 earned by an employee at a taxable rate of 6.2%. Tax for HI is based on all wages at a taxable rate of 1.45%	Accrual is computed monthly by applying the tax rate to taxable earnings.
PA Corporate Net Income Tax	(1,339)	Tax is based on taxable net income as defined by the Pennsylvania Department of Revenue at the current rate of 9.99%. Note, the amount reflected is negative due to cash payments exceeding accrued tax expense.	Accrual is computed monthly by applying the rate to taxable income for the month.
Federal Income Tax	(3,188)	Tax is based on taxable net income as defined by and reported to the IRS. Current rate is 21% of taxable income. Note, the amount reflected is negative due to cash payments exceeding accrued tax expense.	Accrual is computed monthly by applying the rate to taxable income for the month.

Federal Unemployment Tax	0	Tax is based on the first $7,000 earned by an employee at a taxable rate of 6%.	Accrual is computed monthly by applying the tax rate to taxable earnings.
FICA	0	Tax for OASDI is based on the first $147,000 earned by an employee at a taxable rate of 6.2%. Tax for HI is based on all wages at a taxable rate of 1.45%	Accrual is computed monthly by applying the tax rate to taxable earnings.
PA Corporate Net Income Tax	0	Tax is based on taxable net income as defined by the Pennsylvania Department of Revenue at the current rate of 9.99%	Accrual is computed monthly by applying the rate to taxable income for the month.
Federal Income Tax	0	Tax is based on taxable net income as defined by and reported to the IRS. Current rate is 21% of taxable income.	Accrual is computed monthly by applying the rate to taxable income for the month.
	$ (1)		

III-A-67

Request:

For the test year as recorded on test year operating statement:

a. Supply the amount of federal income taxes actually paid.

b. Supply the amount of the federal income tax normalizing charge to tax expense due to excess of accelerated tax depreciation over book depreciation.

c. Supply the normalizing tax charge to federal income taxes for the 10% Job Development Credit during test year.

d. Provide the amount of the credit of federal income taxes due to the amortization or normalizing yearly debit to the reserve for the 10% Job Development Credit.

e. Provide the amount of the credit to federal income taxes for the normalizing of any 3% Investment Tax Credit Reserve that may remain on the utility books.

Response:

a & b. Refer to UGI Gas Exhibit A, Schedule D-33 for the Historic, Future, and Fully Projected test years.

c & d. None.

e. $318,420.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-68

Request:

Provide the debit and credit in the test year to the Deferred Taxes due to Accelerated Depreciation for federal income tax, and provide the debit and credit for the Job Development Credits (whatever account) for test year.

Response:

The debit and credit in the test year to the Deferred Taxes due to Accelerated Depreciation for federal income tax is as follows:

A/C #	Account Description	Debit	Credit
00410XXX	Deferred Tax Expense	$XXX,XXX	
00282XXX	Accumulated Deferred Taxes		$XXX,XXX

UGI Gas has no Job Development Credits.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-69

Request:

Reconcile all data given in answers to questions on income taxes charged on the test year operating statement with regard to income taxes paid, income taxes charged because of normalization and credits due to yearly write-offs of past years' income tax deferrals, and from normalization of investment tax and development credits. (Both state and federal income taxes.)

Response:

Refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), Section D, Schedules D-33 and D-34. Also, refer to the Direct Testimony of Nicole M. McKinney, UGI Gas Statement No. 7.

UGI Gas does not have development credits.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-70

Request:

With respect to determination of income taxes, federal and state:

a. Show income tax results of the annualizing and normalizing adjustments to the test year record before any rate increase.

b. Show income taxes for the annualized and normalized test year.

c. Show income tax effect of the rate increase requested.

d. Show income taxes for the normalized and annualized test year after application of the full rate increase.

[It is imperative that continuity exists between the income tax calculations as recorded for the test year and the final income tax calculation under proposed rates. If the company has more than one accounting area, then additional separate worksheets must be provided in addition to those for total company.]

Response:

Refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), Section D, Schedules D-33 and D-34.

Prepared by or under the supervision of: Nicole M. McKinney

III-A-71

Request:

In adjusting the test year to an annualized year under present rates, explain any changes that may be due to book or tax depreciation change and to debits and credits to income tax expense due to accelerated depreciation, deferred taxes, job development credits, tax refunds or other items.

(The above refers only the adjustments going from recorded test year to annualized test year.)

Response:

Adjustments relative to the subject matter were made to recorded data to annualize the years' data and are based on property balances at the end of the test year to reflect a full year's expense of deferral. See the Direct Testimony of Nicole M. McKinney, UGI Gas Statement No. 7.

Prepared by or under the supervision of: Nicole M. McKinney

III-E-1

Request:

If Unrecovered Fuel Cost policy is implemented, provide the following:

a. State manner in which amount of Unrecovered Fuel Cost on balance sheet at the end of the test year was determined, and the month in test year in which such fuel expense was actually incurred. Provide amount of adjustment made on the rate case operating account for test year-end unrecovered fuel cost. (If different than balance sheet amount, explain.)

b. Provide amount of Unrecovered Fuel Cost that appeared on the balance sheet at the opening date of the test year, and the manner in which it was determined. State whether this amount is in the test year operating account.

Response:

Please see Attachment III-E-1.

Prepared by or under the supervision of: Christopher R. Brown

Beginning Balance as of 9/30/2019	546
Purchased Fuel Cost Adjustment	7,318
Unrecovered Purchased Fuel Cost as of 9/30/2021	$ 7,865

* For further information regarding the unrecovered purchased fuel cost, please refer to the 1307(f) filing.

III-E-2

Request:

Provide details of items and amounts comprising the accounting entries for Deferred Fuel Cost at the beginning and end of the test year.

Response:

Refer to Attachment III-E-1 for an analysis of entries made to the Deferred Fuel Cost Account during the Fully Projected Future Test Year.

Prepared by or under the supervision of: Christopher R. Brown

III-E-3

Request:

Submit a schedule showing a reconciliation of test year MCF sales and line losses. List all amounts of gas purchased, manufactured and transported.

Response:

The data is provided below for the Historic Year:

Throughput -	309,310,561 Mcf
Company Use Gas -	397,967 Mcf
Line Loss -	684,594 Mcf
Total Sendout -	310,393,123 Mcf

Prepared by or under the supervision of: Christopher R. Brown

III-E-4

Request:

Provide detailed calculations substantiating the adjustment to revenues for annualization of changes in number of customers and annualization of changes in volume sold for all customers for the test year.

a. Break down changes in number of customers by rate schedules.

b. If an annualization adjustment for changes in customers and changes in volume sold is not submitted, please explain.

Response:

a. Please see the Direct Testimony of Sherry A. Epler, UGI Gas Statement No. 8.

b. Not applicable.

Prepared by or under the supervision of: Sherry A. Epler

III-E-5

Request:

Submit a schedule showing the sources of gas supply associated with annualized MCF sales.

Response:

Please see the response to III-E-30.

Prepared by or under the supervision of: Christopher R. Brown

III-E-6

Request:

Supply, by classification, Operating Revenues--Miscellaneous for test year.

Response:

Please refer to Attachment III-E-6 for a schedule of Operating Revenues – Miscellaneous for the years ended September 30, 2021-2023.

Prepared by or under the supervision of: Tracy A. Hazenstab

UGI Utilities, Inc. - Gas Division
Operating Revenues - Miscellaneous
For the Years Ended September 30, 2021, 2022, and 2023
($ in Thousands)

Account No.		Actual 12 Months 9/30/2021	Budgeted 12 Months 9/30/2022	Budgeted 12 Months 9/30/2023
487	Forfeited Discounts	$ 4,881	$ 5,555	$ 5,603
488	Miscellaneous Service Revenues	$ 1,277	$ 923	$ 923
493	Rent from Gas Property	$ 2,283	$ 2,338	$ 2,338
495	Other Gas Revenues	$ 3,192	$ 1,075	$ 1,075
	Total	$ 11,633	$ 9,891	$ 9,939

III-E-7

Request:

Provide details of respondent's attempts to recover uncollectible and delinquent accounts.

Response:

The Company performs collections activities on all active accounts in accordance with applicable Commission requirements. When those collection activities are exhausted, UGI Gas refers bad debt placements to a collection agency for continuing collection action. When the service is closed, the customer receives a closing bill. Placements are sent to the collection agency within sixty (60) days after the service is closed. The day after the final bill is due, a Final Bill Reminder is mailed. The reminder states that their balance must be paid to avoid being turned over to a collection agency. Fourteen (14) days later the account is sent to collections.*

*Due to the financial impact many households were facing at the start of the pandemic, on March 20th, 2020, the Company advised the third party collection agencies to cease collection activities on all accounts placed. The Company advised the agencies to resume collection efforts on October 9th, 2020.

Prepared by or under the supervision of: Vivian K. Ressler

III-E-8

Request:

Describe how the net billing and gross billing is determined. For example, if the net billing is based on the rate blocks plus FCA and STA, and the gross billing is determined by a percentage increase (1, 3 or 5 percent), then state whether the percentage increase is being applied to all three items of revenue--rate blocks plus FCA and STA.

Response:

A. The total net bill is the sum of:

1. Tariff Amount – calculated as the volume of usage priced through the rate schedule tables.

2. Currently effective surcharges.

3. Sales Tax – calculated as the product of the current sales tax percentage (6%) and the sum of the above. Sales tax is not applied to residential customers when the purchase of natural gas is solely for the purchaser's own residential use and non-residential customers are exempt from sales tax if the purchaser is entitled to claim an exemption under Chapter 61 of the Pa. Code § 32.25 subsection (d). If a tax exemption certificate is on file for these non-residential customers, the tax base is adjusted in accordance with the exemption certificate.

B. The gross bill is the sum of:

1. Total net bill as described above.

2. Late payment charges on any unpaid previous balance, if any, as of the billing date.

3. Late payment charge for payment made after the due date (see III-E-9 for details on late payment charges applied).

III-E-8 (Continued)

C. The percentage increase (late payment charge) is applied to the base tariff rate and the State Tax Adjustment Surcharge. The late payment charge is not applied to Sales Tax or to previously applied late payment charges.

Prepared by or under the supervision of: Christopher R. Brown

---

III-E-9

Request:

Describe the procedures involved in determining whether forfeited discounts or penalties are applied to customer billing.

Response:

Please refer to UGI Gas Exhibit F, Rules 8.7 and 8.8 of the current tariff for UGI Utilities, Inc. – Gas Division.

Prepared by or under the supervision of: Vivian K. Ressler

III-E-10

Request:

Provide annualization of revenues as a result of rate changes occuring during the test year, at the level of operations as of end of the test year.

Response:

Please see the Direct Testimony of Sherry A. Epler, UGI Gas Statement No. 8, for detail on the annualization of revenues.

Prepared by or under the supervision of: Sherry A. Epler

III-E-11

Request:

Provide a detailed billing analysis supporting present and proposed rates by customer classification and/or tariff rate schedule.

Response:

Please see UGI Gas Exhibit E - Proof of Revenue.

Prepared by or under the supervision of: Sherry A. Epler

III-E-12

Request:

Provide a schedule showing residential and commercial heating sales by unit (MCF) per month and degree days for the test year and three preceding twelve month periods.

Response:

Please see Attachment III-E-12.

Prepared by or under the supervision of: Sherry A. Epler

III-E-13

Request:

Provide a schedule of present and proposed tariff rates showing dollar change and percent of change by block. Also, provide an explanation of any change in block structure and the reasons therefor.

Response:

Please see UGI Gas Exhibit E – Proof of Revenue and the Direct Testimony of Sherry A. Epler, UGI Gas Statement No. 8.

Prepared by or under the supervision of: Sherry A. Epler

III-E-14

Request:

Provide the following statements and schedules. The schedules and statements for the test year portion should be reconciled with the summary operating statement.

a. An operating revenues summary for the test year and the year preceding the test year showing the following (Gas MCF):

(i) For each major classification of customers

(a) MCF sales
(b) Dollar Revenues
(c) Forfeited Discounts (Total if not available by classification)
(d) Other and Miscellaneous revenues that are to be taken into the utility operating account along with their related costs and expenses.

(ii) A detailed explanation of all annualizing and normalizing adjustments showing method utilized and amounts and rates used in calculation to arrive at adjustment.

(iii) Segregate, from recorded revenues from the test year, the amount of revenues that are contained therein, by appropriate revenue categories, from:

(a) Fuel Adjustment Surcharge
(b) State Tax Surcharge
(c) Any other surcharge being used to collect revenues.
(d) Provide explanations if any of the surcharges are not applicable to respondent's operations.

[The schedule should also show number of customers and unit of sales (Mcf), and should provide number of customers by service classification at beginning and end of test year.]

b. Provide details of sales for resale, based on periods five years before and projections for five years after the test year, and for the test year. List customers, Mcf sold,

III-E-14 (Continued)

revenues received, source of Mcf sold (storage gas, pipeline gas, manufactured gas, natural or synthetic), contracted or spot sales, whether sales are to affiliated companies, and any other pertinent information.

Response:

a. (i)(a) Please see Attachment III-E-19.

(i)(b)-(d) Please see UGI Gas Exhibit A, Schedule D-5 (Historic), UGI Gas Exhibit A, Schedule D-5 (Future), and UGI Gas Exhibit A, Schedule D-5 (Fully Projected).

(ii) Please see the Direct Testimony of Sherry A. Epler, UGI Gas Statement No. 8.

(iii) Please see UGI Gas Exhibit E, Proof of Revenue.

b. None.

Prepared by or under the supervision of: Sherry A. Epler

III-E-15

Request:

State manner in which revenues are being presented for ratemaking purposes:

a. Accrued Revenues

b. Billed Revenues

c. Cash Revenues

Provide details of the method followed.

Response:

Fully Projected Test Year revenues at present and proposed rates are based upon a calculation applying present rates to projected volumes and number of customers and proposed rates to projected volumes and number of customers.

Prepared by or under the supervision of: Sherry A. Epler

III-E-16

Request:

If revenue accruing entries are made on the books at end of each fiscal period, give entries made accordingly at the end of the test year and at the beginning of the year. State whether they are reversed for ratemaking purposes.

Response:

The amount of unbilled revenue accrued at September 30, 2021 and September 30, 2020 for UGI Gas was $4,555,456 and $11,325,496, respectively. The Company annualizes revenue for ratemaking purposes eliminating the impacts of unbilled revenues.

Prepared by or under the supervision of: Vivian K. Ressler

III-E-17

Request:

State whether any adjustments have been made to expenses in order to present such expenses on a basis comparable to the manner in which revenues are presented in this proceeding (i.e.--accrued, billed or cash).

Response:

No such adjustments have been made to expenses. Expenses are presented on a basis comparable to the manner in which revenues are presented.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-E-18

Request:

If the utility has a Fuel Adjustment Clause:

a. State the base fuel cost per MCF chargeable against basic customers' rates during the test year. If there was any change in this basic fuel charge during the test year, give details and explanation thereof.

b. State the amount in which the fuel adjustment clause cost per MCF exceeds the fuel cost per MCF charged in base rates at the end of the test year.

c. If fuel cost deferment is used at the end of the test year, give

    (i) The amount of deferred fuel cost contained in the operating statement that was deferred from the 12-month operating period immediately preceding the test year.

    (ii) The amount of deferred fuel cost that was removed from the test period and deferred to the period immediately following the test year.

d. State the amount of Fuel Adjustment Clause revenues credited to the test year operating account.

e. State the amount of fuel cost charged to the operating expense account in the test year which is the basis of Fuel Adjustment Clause billings to customers in that year. Provide summary details of this charge.

f. From the recorded test year operating account, remove the Fuel Adjustment Clause Revenues. Also remove from the test year recorded operating account the excess of fuel cost over base rate fuel charges, which is the basis for the Fuel Adjustment charges. Explain any difference between FAC Revenues and excess fuel costs. [The above is intended to limit the operating account to existing customers' base rate revenues and expense deductions relative thereto].

III-E-18 (Continued)

Response:

The Company does not have a Fuel Adjustment Clause. The Company recovers its purchased gas costs through purchased gas cost rates under Section 1307(f) of the Public Utility Code.

Prepared by or under the supervision of: Christopher R. Brown

III-E-19

Request:

Provide growth patterns of usage and customer numbers per rate class, using historical and projected data.

Response:

Please see Attachment III-E-19.

Prepared by or under the supervision of: Sherry A. Epler

III-E-20

Request:

Provide, for test year only, a schedule by tariff rates and by service classifications showing proposed increase and percent of increase.

Response:

Please see UGI Gas Exhibit E - Proof of Revenue and the Direct Testimony of Sherry A. Epler, UGI Gas Statement No. 8.

Prepared by or under the supervision of: Sherry A. Epler

III-E-21

Request:

If a gas company is affiliated with another utility segment, such as a water or electric segment, explain the effects, if any, upon allocation factors used in the gas rate filing of current or recent rate increases allowed to the other utility segment (or segments) of the company.

Response:

UGI Utilities, Inc. owns both gas and electric divisions.

UGI Gas incurs costs for services provided by UGI Corp., and other affiliated companies, in accordance with affiliated interest arrangements authorized by the Commission. UGI also allocates or assigns costs between UGI Electric and UGI Gas. All costs which can be identified as pertaining exclusively to an operating unit are billed directly to that unit. Those costs which cannot be directly associated with the operation of an individual operating unit are allocated to the various companies benefiting from the service. Allocations are done by a methodology applicable to the cost (e.g., budgeted time allocations, number of employees, etc.) or, if no one methodology is specific to the cost, by a formula referred to as the Modified Wisconsin Formula ("MWF"). The MWF achieves an equitable distribution of common expenses based on the relative activity and size of each operating unit to the total of all operating units, which benefit from the respective activities. Activity is measured by total revenues and total operating expenses and size is measured by tangible net assets employed (excluding acquisition goodwill).

The proposed rates of UGI Gas are not based on any increase granted to any other affiliated utility segment.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-E-22

Request:

Provide supporting data detailing curtailment adjustments, procedures and policies.

Response:

The Company did not have any curtailment adjustments during the historic test year ending September 30, 2021, and is not claiming any curtailment adjustments in its future test year or fully projected future test year. In addition, the Company follows curtailment procedures and policies as specified in its Gas Tariffs on file with the Commission. Please refer to UGI Gas Exhibit F, Section 21, Gas Emergency Planning, of the Company's current tariff.

Prepared by or under the supervision of: Christopher R. Brown

III-E-23

Request:

Submit a schedule showing fuel cost in excess of base compared to fuel cost recovery for the period two months prior to test year and the test year.

Response:

There are no fuel costs in excess of base compared to fuel cost recovery.

All of the Company's fuel costs are recovered through its annual purchased gas cost filing made pursuant to Section 1307(f) of the Public Utility Code.

Prepared by or under the supervision of: Christopher R. Brown

---

III-E-24

Request:

Supply a detailed analysis of Purchased Gas for the test year and the twelve month period prior to the test year.

Response:

Please refer to UGI Gas Docket No. R-2021-3025652 in the most recent Annual 1307(f) Purchased Gas Cost ("PGC") filing which can be found at URL https://www.puc.pa.gov/docket/R-2021-3025652.

Prepared by or under the supervision of: Christopher R. Brown

III-E-25

Request:

Submit calculations supporting energy cost per MCF and operating ratio used to determine increase in costs other than production to serve additional load.

Response:

The energy cost per Mcf is developed as part of each annual and quarterly 1307(f) filing submitted to the Commission. Please refer to UGI Gas Docket No. R-2021-3025652 in the most recent Annual 1307(f) Purchased Gas Cost ("PGC") filing which can be found at URL https://www.puc.pa.gov/docket/R-2021-3025652.

Prepared by or under the supervision of: Christopher R. Brown

III-E-26

Request:

Submit detailed calculations for bulk gas transmission service costs under supply and/or interconnection agreements.

Response:

UGI Gas incurs no bulk gas transmission costs under supply and/or interconnection agreements.

Prepared by or under the supervision of: Christopher R. Brown

III-E-27

Request:

Submit a schedule for gas producing units retired or scheduled for retirement subsequent to the test year showing station, units, MCF capacity, hours of operation during test year, net output produced and cents/MCF of maintenance and fuel expenses.

Response:

UGI Gas did not have any gas producing units retired or scheduled for retirement subsequent to the test year.

Prepared by or under the supervision of: Vivian K. Ressler

III-E-28

Request:

Provide a statement explaining the details of firm gas purchase (long-term) contracts with affiliated and nonaffiliated utilities, including determination of costs, terms of contract, and other pertinent information.

Response:

UGI Gas does not have any firm gas purchase (long-term) contracts with affiliated and nonaffiliated utilities.

Prepared by or under the supervision of: Christopher R. Brown

III-E-29

Request:

Provide intrastate operations percentages by expense categories for two years prior to the test year.

Response:

The majority of the operations of UGI Gas are intrastate. UGI Gas has a small percentage of operations in Maryland under the jurisdiction of the Maryland Public Service Commission. The allocation factor used to assign the costs to the Maryland operation is based on test year sales. Please see Attachment III-E-29.

Prepared by or under the supervision of: Tracy A. Hazenstab

UGI Utilities, Inc. - Gas Division
Base Rate Case Expense Allocation
Sales (Mcf)

	Actual HTY (FY 21)	Budget FTY (FY 22)	Budget FPFTY (FY 23)
PA Volume	314,541,241	339,580,851	342,165,065
Maryland Volume	137,247	138,048	140,603
Maryland Allocation	0.044%	0.041%	0.041%
PA Allocation	99.956%	99.959%	99.959%

III-E-30

Request:

Provide a schedule showing suppliers, MCF purchased, cost (small purchases from independent suppliers may be grouped); emergency purchases, listing same information; curtailments during the year; gas put into and taken out of storage; line loss, and any other gas input or output not in the ordinary course of business.

Response:

Please refer to UGI Gas Docket No. R-2021-3025652 in the most recent Annual 1307(f) Purchased Gas Cost ("PGC") filings which can be found at URL https://www.puc.pa.gov/pcdocs/1705894.pdf.

Prepared by or under the supervision of: Christopher R. Brown

---

III-E-31

Request:

Provide a schedule showing the determination of the fuel costs included in the base cost of fuel.

Response:

Please refer to UGI Gas Docket No. R-2021-3025652 in the most recent Annual 1307(f) Purchased Gas Cost ("PGC") filing which can be found at URL https://www.puc.pa.gov/docket/R-2021-3025652.

Prepared by or under the supervision of: Christopher R. Brown

III-E-32

Request:

Provide a schedule showing the calculation of any deferred fuel costs shown in Account 174. Also, explain the accounting, with supporting detail, for any associated income taxes.

Response:

Please see Attachment III-E-32.

Because the tax treatment for deferred fuel costs differs from the book treatment, deferred taxes are generated on the over or under-collection of deferred fuel costs. Specifically, tax follows a cash basis as it relates to deferred fuel costs. When the Company is in an over-collected position, a deferred tax asset is generated because the Company will recognize as taxable income and pay taxes currently on the cash it collected from customers, even though this is not recognized as book revenue. Vice versa, when the Company is in an under-collected position, a deferred tax liability is generated because the Company recognizes less taxable income because it did not collect adequate cash to cover its fuel costs, but for book purposes revenue is recognized such that no margin is recognized on the purchase of gas.

Prepared by or under the supervision of: Vivian K. Ressler

III-E-33

Request:

Submit a schedule showing maintenance expenses, gross plant and the relation of maintenance expenses thereto as follows:

(i) Gas Production Maintenance Expenses per MCF production, per $1,000 MCF production, and per $1,000 of Gross Production Plant;

(ii) Transmission Maintenance Expenses per MMCF mile and per $1,000 of Gross Transmission Plant;

(iii) Distribution Maintenance Expenses per customer and per $1,000 of Gross Distribution Plant;

(iv) Storage Maintenance Expenses per MMCF of Storage Capacity and $1,000 of Gross Storage Plant. This schedule shall include three years prior to the test year, the test year and one year's projection beyond the test year.

Response:

Please see Attachment III-E-33.

III-E-35

Request:

Submit a schedule showing the Gross Receipts Tax Base used in computing Pennsylvania Gross Receipts Tax Adjustment.

Response:

Not applicable. UGI Gas is not subject to the Pennsylvania Gross Receipts Tax.

Prepared by or under the supervision of: Nicole M. McKinney

III-E-36

Request:

State the amount of gas, in mcf, obtained through various suppliers in past years.

Response:

Please see Book I, Attachment 1-A-1 of the 2021 1307(f) Purchased Gas Cost filing for UGI Gas at Docket No. R-2021-3025652 which can be found at URL https://www.puc.pa.gov/pcdocs/1702100.pdf.

Prepared by or under the supervision of: Christopher R. Brown

---

III-E-37

Request:

In determining pro forma expense, exclude cost of gas adjustments applicable to fuel adjustment clause and exclude fuel adjustment clause revenues, so that the operating statement is on the basis of base rates only.

Response:

Please refer to UGI Gas Exhibit A (Historic), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Fully Projected), Schedule D-6.

Prepared by or under the supervision of: Tracy A. Hazenstab

III-E-38

Request:

Identify company's policy with respect to replacing customers lost through attrition.

Response:

The Company actively seeks opportunities to add new customers including new construction and conversion customers and adds these customers to the extent they meet the requirements of the Company's Tariff.

Prepared by or under the supervision of: Christopher R. Brown

III-E-39

Request:

Identify procedures developed to govern relationship between the respondent and potential customers--i.e., basically expansion, alternate energy requirements, availability of supply, availability of distribution facilities, ownership of metering and related facilities.

Response:

Please refer to UGI Gas Exhibit F, Rule 5, Extension Regulation, of the current tariff for UGI Utilities, Inc. - Gas Division.

Please refer to UGI Gas Exhibit F, Rule 5, Extension Regulation, of the proposed tariff supplement for UGI Utilities, Inc. - Gas Division.

Prepared by or under the supervision of: Christopher R. Brown

SECTION 53.53 – RATE STRUCTURE

IV-B-1

Request:

Provide a Cost of Service Study showing the rate of return under the present and proposed tariffs for all customer classifications. The study should include a summary of the allocated measures of value, operating revenues, operating expenses and net return for each of the customer classifications at original cost and at the 5-year trended original cost.

a. (Reserved)

Response:

Please refer to UGI Gas Exhibit D.

Prepared by or under the supervision of: Constance E. Heppenstall

IV-B-2

Request:

Provide a statement of testimony describing the complete methodology of the cost of service study.

Response:

Please refer to the Direct Testimony of Constance E. Heppenstall, UGI Gas Statement No. 10.

Prepared by or under the supervision of: Constance E. Heppenstall

IV-B-3

Request:

Provide a complete description and back-up calculations for all allocation factors.

Response:

Please see UGI Gas Exhibit D.

Prepared by or under the supervision of: Constance E. Heppenstall

IV-B-4

Request:

Provide an exhibit for each customer classification showing the following data for the test year and the four previous years:

a. The maximum coincident peak day demand.

b. The maximum coincident 3-day peak day demand.

c. The average monthly consumption in MCF during the Primary Heating Season (November-March).

d. The average monthly consumption in MCF during the Non-heating season (April-October).

e. The average daily consumption in MCF for each 12-month period.

Response:

Please see Attachments IV-B-4 (a)-(e).

Prepared by or under the supervision of: Sherry A. Epler

IV-B-5

Request:

Submit a Bill Frequency Analysis for each rate. The analysis should include the rate schedule and block interval, the number of bills at each interval, the cumulative number of bills at each interval, the Mcf or therms at each interval, the cumulative Mcf or therms at each interval, the accumulation of Mcf or therms passing through each interval, and the revenue at each interval for both the present rate and the proposed rates. The Analysis should show only those revenues collected from the basic tariff.

Response:

Please see Attachment IV-B-5 provided on USB flash drive.

Prepared by or under the supervision of: Sherry A. Epler

IV-B-6

Request:

Supply copies of all present and proposed Gas Tariffs.

Response:

Please see UGI Gas Exhibit F - Current Tariff and UGI Gas Exhibit F - Proposed Tariff Supplement.

Prepared by or under the supervision of: Tracy A. Hazenstab

IV-B-7

Request:

Supply a graph of present and proposed base rates on hyperbolic cross section paper.

Response:

Please see Attachment IV-B-7.

Prepared by or under the supervision of: Sherry A. Epler

UGI Utilities, Inc. - Gas Division
Comparison of Present and Proposed Rates
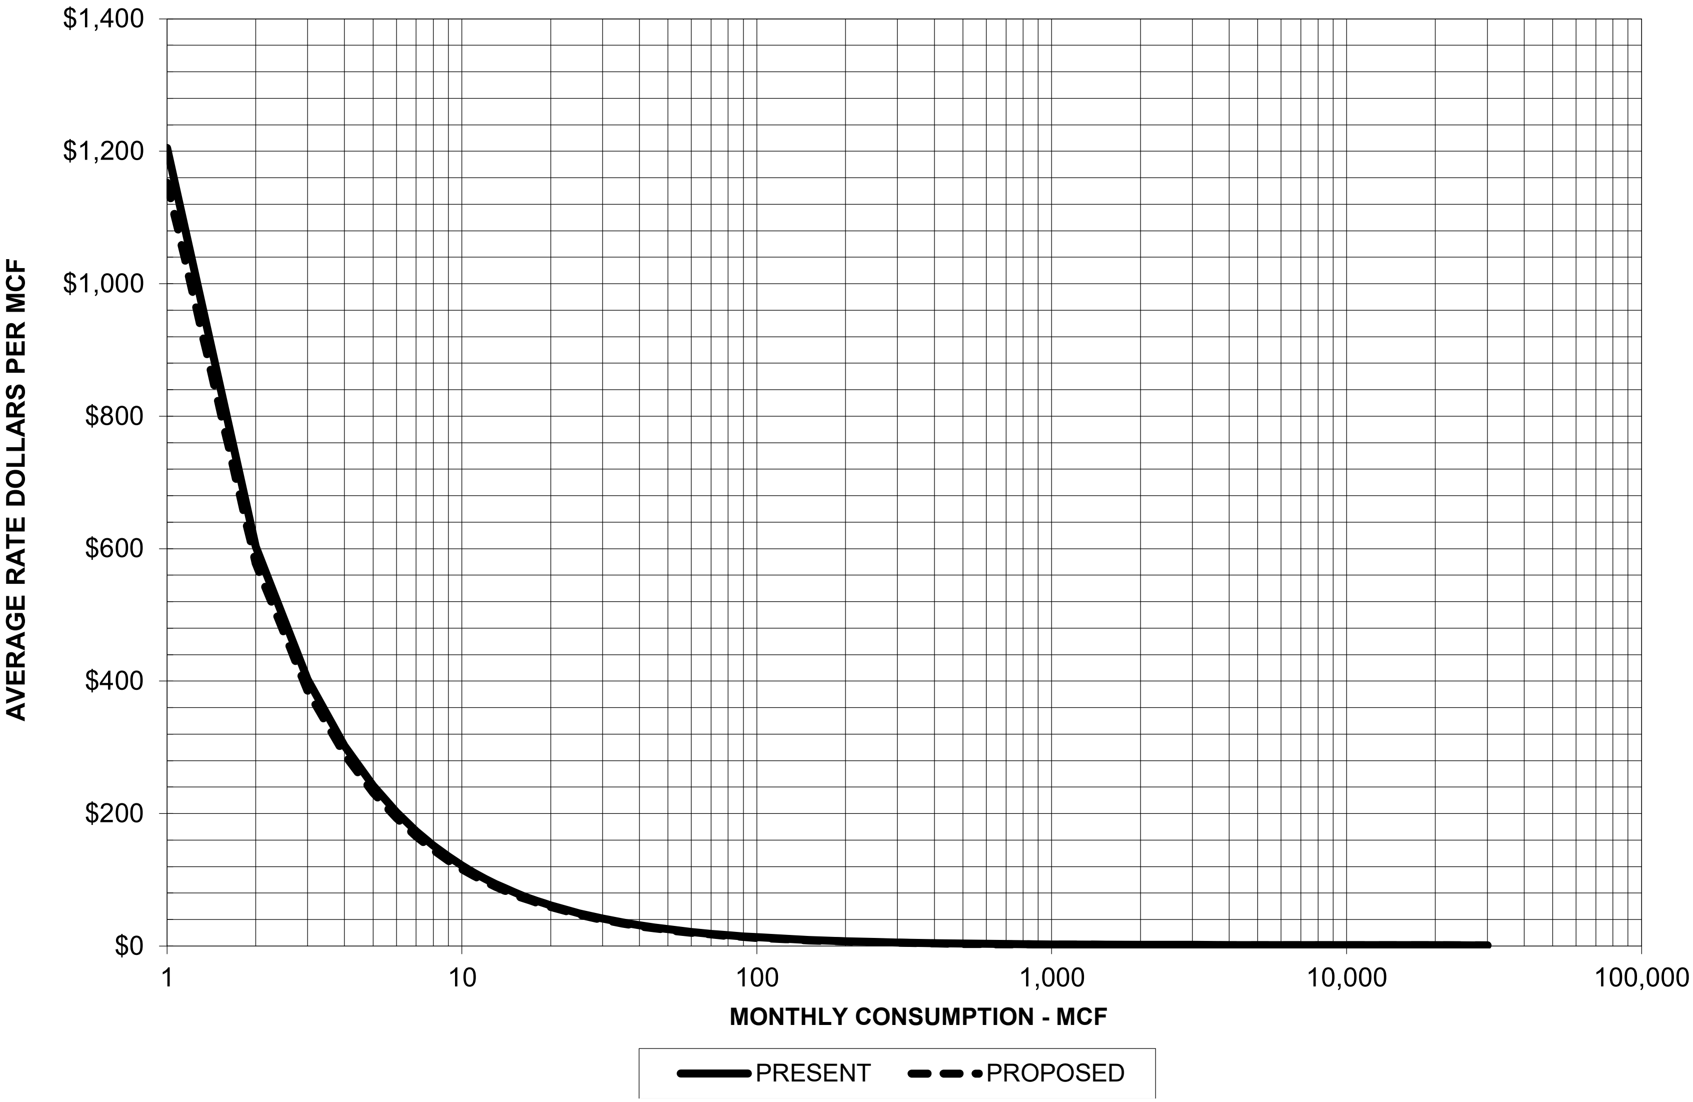
Rate Schedule IS



IV-B-8

Request:

Supply a map showing the Gas System Facilities and Gas Service Areas. The map should include transmission lines, distribution lines, other companies' lines interconnecting with the interconnecting points clearly designated, major compressor stations, gas storage areas and gas storage lines. The normal direction of gas flow within the transmission system should be indicated by arrows. Separate service areas within the system should be clearly designated.

Response:

Please see the response to I-C-2.

Prepared by or under the supervision of: Christopher R. Brown

IV-B-9

Request:

Supply a cost analysis supporting minimum charges for all rate schedules.

Response:

Please see UGI Gas Exhibit D, Schedule G.

Prepared by or under the supervision of: Constance E. Heppenstall

IV-B-10

Request:

Supply a cost analysis supporting demand charges for all tariffs which contain demand charges.

Response:

Please see UGI Gas Exhibit D, Schedule H.

Prepared by or under the supervision of: Constance E. Heppenstall

IV-B-11

Request:

Supply the net fuel clause adjustment by month for the test year.

Response:

The Company does not have a net fuel clause adjustment.

Prepared by or under the supervision of: Christopher R. Brown

IV-B-12

Request:

Supply a tabulation of base rate bills for each rate schedule comparing the existing rates to proposed rates. The tabulation should show the dollar difference and the per cent increase or decrease.

Response:

Please see the Direct Testimony of Sherry A. Epler, UGI Gas Statement No. 8, and the responses to IV-B-5 and IV-B-7.

Prepared by or under the supervision of: Sherry A. Epler

IV-B-13

Request:

Submit the projected demands for all customer classes for both purchased and produced gas for the three years following the test year filing.

Response:

Please reference Attachment 4-1 of UGI Gas Docket No. R-2021-3025652 in the most recent Annual 1307(f) Purchased Gas Cost ("PGC") filings which can be found at URL https://www.puc.pa.gov/pcdocs/1702100.pdf.

Prepared by or under the supervision of: Christopher R. Brown

IV-B-14

Request:

Supply an exhibit showing the gas deliveries to each customer class for the most recent 24 month period. The exhibit should identify the source of the gas, such as "purchased" (pipeline), "production" (includes purchases from local producers), "storage withdrawal," "propane/air," and "unaccounted for."

Response:

Please see Attachment IV-B-14.

Prepared by or under the supervision of: Sherry A. Epler

UGI UTILITIES, INC. – GAS DIVISION – PA P.U.C. NOS. 7 & 7S
SUPPLEMENT NO. 32

DOCKET NO. R-2021-3030218

Issued: January 28, 2022 Effective: March 29, 2022

SUPPLEMENTAL DATA REQUESTS – COST OF SERVICE

SDR-COS-1

Request:

Please explain the Company's policy with regard to when customer advances and contributions in aid of construction must be made.

Response:

An advance or contribution in aid of construction is required from an Extension Applicant or Customer when insufficient revenues will be derived from the Extension Applicant or Customer to warrant the investment by the company. Please see UGI Gas Exhibit F, Rule 5, Extension Regulation, of the Company's current tariff.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-COS-2

Request:

Please provide a detailed explanation describing how contributions in aid of construction and customer advances are reflected in the Company's cost of service study.

Response:

Contributions in aid of construction are reflected as a deduction to rate base and included in Exhibit D. UGI Gas does not have any customer advances and no claim is made for customer advances.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-COS-3

Request:

Please provide a breakdown of contributions in aid of construction by customer class and plant account number for the most recent year available.

Response:

Please reference Attachment SDR-COS-3.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-COS-8

Request:

Please provide the Company's rate design models and cost of service study on an IBM PC-compatible computer disk in Lotus 1-2-3 or Quattro format. If the models consist of more than one file, please include information on all files on the disk and what they contain. If not available in Lotus 1-2-3 or Quattro format, please provide in ASCII format.

Response:

Please see UGI Gas Exhibit D (Cost of Service Study - Fully Projected Future Test Year) provided in electronic format on USB flash drive.

Prepared by or under the supervision of: Constance E. Heppenstall

SDR-COS-9

Request:

Please provide a copy of the Company's current customer extension policy. Provide a representative sample of the analyses conducted by the Company when deciding whether service to a new customer qualifies under the Company's customer extension policy.

Response:

The current customer extension policy is contained in UGI Gas Exhibit F, Rule 5, Extension Regulation, of the Company’s current tariff. Rules 5.1-5.4 and 5.8 describe the methodology to evaluate whether service to a new customer qualifies under the current extension policy.

Prepared by or under the supervision of: Christopher R. Brown

SDR-COS-10

Request:

Please provide a detailed supply and requirement schedule for the Company's three most recent annual peak days and for design day. The schedules should include deliveries by source and requirements by rate schedule. Identify sources and requirements for transportation customers separately. Also include the Company's daily sendout sheet for each peak day and applicable weather data.

Response:

Please see Attachment SDR-COS-10.

Prepared by or under the supervision of: Christopher R. Brown

SDR-COS-12

Request:

Please provide a copy of the load duration curve used by the Company for capacity planning purposes. Please also identify the numerical data points shown for each day on the curve.

Response:

Please see Book I, Appendix F, Attachment 14-2, of the 2021 1307(f) Purchased Gas Cost filing for UGI Gas at Docket No. R-2021-3025652 which can be found at https://www.puc.pa.gov/pcdocs/1702100.pdf.

Prepared by or under the supervision of: Christopher R. Brown

SDR-COS-13

Request:

Please provide the following for the Company's ten largest transportation customers during peak month of the most recent heating season:

a. actual consumption

b. volume delivered to the Company on their behalf, if applicable

c. daily nomination

Response:

Please see Attachment SDR-COS-13.

Prepared by or under the supervision of: Christopher R. Brown

SDR-COS-14

Request:

Please provide a summary identifying the salient features of each of the following. Salient features include contract party, effective term and applicable contract quantities (daily, annual, seasonal, etc.).

a. All firm transportation agreements by type greater than one month in length. Indicate whether the capacity is available at the Company's citygate to meet design day requirements or is upstream capacity. Identify the downstream pipeline for each upstream arrangement.

b. All firm storage, gathering and exchange agreements. Indicate if each agreement provides design day capacity at the citygate or requires separate transportation (identify) service to effectuate delivery. Include on-system storage and peak shaving facilities used by the Company and identify all ratcheting provisions applicable to the Company's contractual and on-system storage arrangements.

Response:

Please see Attachments SDR-COS-14(a) and SDR-COS-14(b). The contracts are reflected as of 11/1/2021.

Prepared by or under the supervision of: Christopher R. Brown

SDR-COS-15

Request:

For the most recent annual period available, please identify the applicable monthly volumes and revenues under each rate schedule which were:

a. Sold under a negotiated or market-based rate

b. Transported under a negotiated or market based rate

c. Transported at full margin transportation rates

Response:

Please see Attachment SDR-COS-15.

Prepared by or under the supervision of: Sherry A. Epler

SDR-COS-16

Request:

Please provide the following for each curtailment during the last three years:

a. Dates of curtailment

b. Type of curtailment (firm service, interruptible service, both)

c. Whether curtailment was related to amount of capacity on the Company's system, other capacity or supply related

d. Rate schedule that curtailed volumes would have been billed under

e. Curtailed volumes by rate schedule

f. Actual volumes moved by rate schedule

Response:

The Company has had no curtailments of firm service during the last three years.

Prepared by or under the supervision of: Christopher R. Brown

SDR-COS-17

Request:

Please identify the Company's design day planning criteria and the probability of design day occurrence. Include any available documentation supporting the Company's claimed probability of occurrence.

Response:

Please see Book I, Section 11 of the 2021 1307(f) Purchased Gas Cost filing for UGI Gas at Docket No. R-2021-3025652 which can be found at https://www.puc.pa.gov/pcdocs/1702100.pdf.

Prepared by or under the supervision of: Christopher R. Brown

SDR-COS-18

Request:

For each customer class contained in the cost of service study, please provide monthly throughput by class.

Response:

Please see Attachment SDR-COS-18.

SDR-ROR-5

Request:

Please provide a work paper showing the derivation of the Company's current AFUDC rate.

Response:

Please see the response to II-A-11.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-ROR-6

Request:

Please supply copies of all presentations by the Company's and, if applicable, its parent's management to securities analysts during the past 2 years. This would include presentations of financial projections.

Response:

Copies of securities analysts presentations for 2020 and 2021 can be found at https://www.ugicorp.com/investors/financial-reports/events-and-presentations.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-ROR-7

Request:

Please provide a listing of all securities issuances for the Company and, if applicable, its parent projected for the next two years. The response should identify for each projected issuance the date, dollar amount, type of security, and effective cost rate.

Response:

UGI Utilities does not have publicly traded stock. UGI Corp ("the Company"), the parent company of UGI Utilities, does have publicly traded stock.

On May 25, 2021, the Company issued 2.2 million Equity Units with a total notional value of $220 million. Each Equity Unit has a stated amount of $100 and consists of (i) a 10% undivided beneficial ownership interest in one share of Convertible Preferred Stock with a liquidation preference of $1,000 per share and (ii) a 2024 Purchase Contract. The Company received approximately $213 million of proceeds from the issuance of the Equity Units, net of offering expenses and underwriting costs and commissions, and issued 220,000 shares of Convertible Preferred Stock, recording $213 million in "Preferred stock" on UGI Corporation's Consolidated Balance Sheet. The proceeds were used to pay a portion of the purchase price for the Mountaineer Acquisition and related fees and expenses, and for general corporate purposes.

Please see the Direct Testimony of Paul R. Moul, UGI Gas Statement No. 6, for discussion of expected debt issuances for UGI Utilities.

Prepared by or under the supervision of: Tracy A. Hazenstab

SDR-ROR-8

Request:

Please identify all of the Company's and, if applicable, its parent's publicly underwritten common stock issuances written in the last five years. Identify which such issuances were related to mergers or acquisitions, and which were undertaken to fund facility investments in utility plant and equipment.

Response:

The Company has not issued stock in the last five years.

The Parent has not issued any stock to fund facility investments in utility plant and equipment in the last five years. The Parent has issued stock related to the below transaction which was considered a merger. The below is an excerpt from the UGI Corporation ("UGI") 10-K filed 11/26/2019. The Common Units discussed in this excerpt represent AmeriGas partnership units.

"On August 21, 2019, the AmeriGas Merger was completed in accordance with the terms of the Merger Agreement entered into on April 1, 2019. Under the terms of the Merger Agreement, the Partnership was merged with and into Merger Sub, with the Partnership surviving as an indirect wholly owned subsidiary of UGI. Each outstanding Common Unit other than the Common Units owned by UGI was automatically converted at the effective time of the AmeriGas Merger into the right to receive, at the election of each holder of such Common Units, one of the following forms of merger consideration (subject to proration designed to ensure the number of shares of UGI Common Stock issued would equal approximately 34.6 million):

(i) 0.6378 shares of UGI Common Stock (the "Share Multiplier");

(ii) $7.63 in cash, without interest, and 0.500 shares of UGI Common Stock; or

(iii) $35.325 in cash, without interest.

Pursuant to the terms of the Merger Agreement, effective on August 21, 2019, we issued 34,612,847 shares of UGI Common Stock and paid $528.9 million in cash to the holders of Common Units other than UGI, for a total implied consideration of $2,227.7 million. In addition, the incentive distribution rights in the Partnership previously owned by the

SDR-ROR-8 (Continued)

General Partner were canceled. After-tax transaction costs directly attributable to the transaction that were incurred by UGI totaling $7.7 million were recorded as a reduction to UGI stockholders' equity. Transaction costs incurred by the Partnership totaling $6.3 million are reflected in "Operating and administrative expenses" on the 2019 Consolidated Statement of Income. The tax effects of the AmeriGas Merger resulting from the step-up in tax bases of the underlying assets resulted in the recording of a deferred tax asset in the amount of $512.3 million. This deferred tax asset is included in "Deferred income taxes" on the September 30, 2019 Consolidated Balance Sheet.

Effective upon completion of the AmeriGas Merger, Common Units are no longer publicly traded."

On May 25, 2021, the Company's parent issued 2.2 million Equity Units with a total notional value of $220 million. The Equity Units are equity-linked securities and not common stock. Therefore, the Company has determined not to include the Equity Units in the answer to this request.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-ROR-9

Request:

Please identify any plan by the Company to refinance high cost long-term debt or preferred stock.

Response:

Please see the Direct Testimony of Paul R. Moul, UGI Gas Statement No. 6, for discussion of expected long-term debt issuances from UGI Utilities.

Prepared by or under the supervision of: Tracy A. Hazenstab

SDR-ROR-10

Request:

Please provide copies of all securities analysts' reports relating to the Company and/or its parent issued within the past 2 years.

Response:

Please see the following Janney analyst reports on UGI Corporation issued in 2020 and 2021. The attachments are located on the USB flash drive:

Attachment SDR-ROR-10.1 – Janney report dated December 8, 2020

Attachment SDR-ROR-10.9 – Janney report dated May 7, 2021
Attachment SDR-ROR-10.10 – Janney report dated October 13, 2021
Attachment SDR-ROR-10.11 – Janney report dated November 19, 2021
Attachment SDR-ROR-10.12 – Janney report dated December 3, 2021

All other securities analysts' reports relating to the Company and/or its parent issued in the last two years are confidential and will be provided to those parties who execute the appropriate Protective Order.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-ROR-11

Request:

If applicable, please supply a listing of all common equity infusions from the parent to the Company over the past five years. In each case, identify date and dollar amount.

Response:

There have been no common equity infusions from UGI Corporation to UGI Utilities, Inc. over the past five years.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-ROR-12

Request:

If applicable, please identify the Company's common dividend payments to its parent for each of the last five years.

Response:

The following schedule represents common dividend payments from UGI Utilities, Inc. to UGI Corporation for each of the last five fiscal years:

	(000's)
2017	$57,700
2018	$50,000
2019	$20,000
2020	$50,000
2021	$35,000

Prepared by or under the supervision of: Vivian K. Ressler

SDR-ROR-13

Request:

Please provide the latest year-by-year financial projections for the Company for the next five years. Also, please indicate the date these projections were prepared; whether approved by management; and whether the projections have been submitted to bond rating agencies.

(Information should be treated in a confidential manner.)

Response:

UGI Gas prepares an annual Budget and three-year Plan. The Budget and Plan were approved in September 2021. These projections will be included in consolidated UGI Utilities, Inc. financial projections to be presented to bond rating agencies.

Please refer to the response to II-A-13 for a schedule of financial projections for Fiscal Years 2022 and 2023.

The projections for Fiscal Years 2024 and 2025 are confidential and will be made available to parties upon request and the entry of an acceptable Protective Order.

Prepared by or under the supervision of: Tracy A. Hazenstab

SDR-ROR-14

Request:

Please provide the Company's five-year construction budget.

Response:

The Company prepares a budget for the upcoming fiscal year and a plan for the three future years. The actual capital spending for the Fiscal Years ended September 30, 2020 and September 30, 2021 as well as the projected capital spending for the Fiscal Years ending September 30, 2022 and September 30, 2023 are provided on Attachment SDR-ROR-14.

The projection for Fiscal Year 2024 is confidential and will be made available to parties upon request and upon the entry of an acceptable Protective Order.

SDR-ROR-15

Request:

Please identify the Company's and, if applicable, its parent's capital structure targets (percentages of capital types). Provide the complete basis for the capital structure targets.

Response:

Please see the Direct Testimony of Paul R. Moul, UGI Gas Statement No. 6, and UGI Gas Exhibit B for capital structure targets.

Prepared by or under the supervision of: Tracy A. Hazenstab

SDR-ROR-16

Request:

For each month, of the most recent 24 months, please supply the Company's

a. short-term debt balance;

b. short-term debt interest rate;

c. balance of construction work in progress; and

d. balance of construction work in progress which is eligible for AFUDC accrual.

Response:

Please refer to Attachment SDR-ROR-16 for the requested information.

Prepared by or under the supervision of: Vivian K. Ressler

UGI UTILITIES, INC. - GAS DIVISION

SDR-ROR-17

Request:

If applicable, please provide the currently authorized returns on equity for each of the parent's utility subsidiaries of the same industry type as the Company. In each case identify the approximate date when the current return on equity was approved by the state commission.

Response:

UGI Utilities, Inc. – Gas Division's most recent base rate case filing was approved by the Pennsylvania Public Utility Commission on October 8, 2020, with no definitive return on equity. Mountaineer Gas Company's most recent base rate case was approved by the West Virginia Public Service Commission on December 26, 2019, with a 9.75% return on equity.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-ROR-18

Request:

Has the Utility reacquired or repurchased any debt within the last five years? If so, provide a summary of each gain or loss on reacquired debt, the date on which the utility commenced amortization of such a gain or loss, the regulatory commission decision addressing the treatment of such gain or loss on reacquired debt, if any, on interest expense.

Response:

UGI Gas has not reacquired or repurchased any debt within the last five years.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-ROR-19

Request:

Fully identify all debt (other than instruments traded in public markets) owed to all shareholders, corporate officers, or members of the board of directors, its affiliates, parent company, or subsidiaries.

Response:

UGI Gas does not owe any debt to shareholders, corporate officers, or members of the board of directors, its affiliates, parent company, or subsidiaries.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-ROR-20

Request:

Provide a summary statement of all stock dividends, splits, or par value changes during the two (2) year calendar period preceding the rate case filing.

Response:

UGI Utilities, Inc. does not have publicly traded common stock and has not issued stock as a dividend to UGI Corporation, its 100% common equity owner. There were no stock splits or par value changes in the previous two calendar years.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-ROR-21

Request:

If a claim of the filing utility is based on utilization of the capital structure or capital costs of the parent company and system--consolidated, the reasons for this claim must be fully stated and supported.

Response:

UGI Utilities, Inc. - Gas Division is not basing its filing on the parent company or system - consolidated capital structures or capital costs.

Prepared by or under the supervision of: Paul R. Moul

SDR-ROR-22

Request:

To the extent not provided in SDR III-A.13, supply projected capital requirements and sources of the filing utility, its parent and system-¬consolidated--for the test year and each of three (3) comparable future years.

Response:

Please refer to Attachment II-A-5 which discloses projected capital expenditures for Fiscal Years ending September 30, 2022, and September 30, 2023.

The projection for Fiscal Year 2024 is confidential and will be made available to parties upon request and the entry of an acceptable Protective Order.

Prepared by or under the supervision of: Tracy A. Hazenstab

SDR-ROR-23

Request:

To the extent not provided elsewhere, supply financial data of Company and/or parent for the last five (5) years.

a. Times interest earned ratio — pre and post tax basis.

b. Preferred stock dividend coverage ratio — post tax basis.

c. Times fixed charges earned ratio — pre tax basis.

d. Dividend payout ratio.

e. AFUDC as a percent of earnings available for common equity.

f. Construction work in progress as a percent of net utility plant.

g. Effective income tax rate.

h. Internal cash generations as a percent of total capital requirements.

Response:

Please refer to Attachment SDR-ROR-23 for the requested information.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-RR-4

Request:

Please provide the actual number of customers by rate schedule at the end of each month from the commencement of the historic test year through the most recent month available and update as additional data become available.

Response:

Please see Attachment SDR-RR-4.

Prepared by or under the supervision of: Sherry A. Epler

SDR-RR-5

Request:

If past weather normalized sales or sales trends are used in models or otherwise relied on in reaching sales projections, please provide actual and normalized throughput by rate schedule as of December 31 for the last three years. Where applicable, separately identify sales and transportation throughput.

Response:

Please see the Direct Testimony of Sherry A. Epler, UGI Gas Statement No. 8, as well as the responses to SDR-RR-9, SDR-RR-10, and SDR-RR-11 for a description of the UGI Gas model used for forecasting sales for the Residential Heating ("RH") and Commercial Heating ("CH") rate groups, including supporting data.

Use per customer values for rate classes and class subgroups were established pursuant to the following:

The projected RH use per customer was established on a combined Rate R/RT - Heating total basis per the UGI Gas model detailed in Attachment SDR-RR-11(a). Weather normalized sales for Rate RT - Heating customers were then utilized to derive the separate Rate RT - Heating and Rate R - Heating use per customer values from the combined Rate R/RT - Heating value. Please see Attachment SDR-RR-5(a) for the actual and normalized sales utilized for Rate RT - Heating. Please see UGI Gas Exhibit SAE-7(a) for the derivation of the Rate R - Heating use per customer value.

Actual sales were normalized for combined Residential Non-Heating – Rate R and Rate RT in order to project combined use per customer in total. Please see Attachment SDR-RR-5(b) for the actual and normalized sales utilized for the combined Rate R/RT-Non-Heating value. Weather normalized sales for Non-Heating Rate RT were then utilized to derive the separate Rate RT and Rate R – Non-Heating customer values from the combined Rate R/RT – Non-Heating value. Please see Attachment SDR-RR-5(c) for the actual and normalized sales utilized for Rate RT- Non-Heating. Please see UGI Gas Exhibit SAE-7(a) for the derivation of the Rate R – Non-Heating use per customer value.

Please see UGI Gas Exhibit SAE-7(a) for the derivation of the total Rate RT (Heating and Non-Heating) use per customer value.

SDR-RR-5 (Continued)

The projected CH use per customer was established on a combined Rate N/NT/DS - Heating total basis per the UGI Gas model detailed in Attachment SDR-RR-11(b). Weather normalized sales for Rate NT – Commercial Heating customers and budgeted sales for Rate DS – Commercial Heating were then utilized to derive the separate Rate NT – Commercial Heating, Rate N – Commercial Heating and Rate DS – Commercial Heating use per customer values from the combined Rate N/NT/DS – Commercial Heating value. Please see Attachment SDR-RR-5(d) for the actual and normalized sales utilized for Rate NT – Commercial Heating and Attachment SDR-RR-5(e) for the budget sales for Rate DS – Commercial Heating. Please see UGI Gas Exhibit SAE-7(a) for the derivation of the Rate N – Commercial Heating use per customer value.

Actual sales were normalized for combined Rate N – Commercial Non-Heating, Rate NT - Commercial Non-Heating and Rate DS – Commercial Non-Heating in order to project combined Rate N/NT/DS – Commercial Non-Heating use per customer in total. Please see Attachment SDR-RR-5(f) for the actual and normalized sales utilized for the combined Rate Commercial N/NT/DS-Non-Heating value. Weather normalized sales for Rate NT – Commercial Non-Heating and budgeted sales for Rate DS – Commercial Non-Heating were then utilized to derive the separate Rate NT – Commercial Non-Heating, Rate N – Commercial Non-Heating and Rate DS – Commercial Non-Heating use per customer values from the combined Rate N/NT/DS – Commercial Non-Heating value. Please see Attachment SDR-RR-5(g) for the actual and normalized sales utilized for Rate NT – Commercial Non-Heating and Attachment SDR-RR-5(h) for the budget sales for Rate DS - Commercial Non-Heating. Please see UGI Gas Exhibit SAE-7(a) for the derivation of the Rate N – Commercial Non-Heating use per customer value.

Please see UGI Gas Exhibit SAE-7(a) for the derivation of the total Rate NT (Heating and Non-Heating) use per customer value.

Actual sales were normalized for combined Rate N – Industrial, Rate NT - Industrial and Rate DS – Industrial in order to project combined Rate N/NT/DS – Industrial use per customer in total. Please see Attachment SDR-RR-5(i) for the actual and normalized sales utilized for the combined Rate N/NT/DS - Industrial value. Weather normalized sales for Rate NT – Industrial and budgeted sales for Rate DS – Industrial were then utilized to derive the separate Rate NT – Industrial, Rate N – Industrial and Rate DS – Industrial use per customer values from the combined Rate N/NT/DS – Industrial value. Please see Attachment SDR-RR-5(j) for the actual and normalized sales utilized for Rate NT – Industrial and Attachment SDR-RR-5(k) for the budget sales for Rate DS - Industrial. Please see UGI Gas Exhibit SAE-7(a) For the derivation of the Rate N – Industrial use per customer value.

SDR-RR-5 (Continued)

Please see UGI Gas Exhibit SAE-7(a) for the derivation of the total Rate DS (Heating and Non-Heating) use per customer value.

SDR-RR-6

Request:

If past weather normalized sales or sales trends are used in models or otherwise relied on in reaching sales projections, please provide actual and normalized throughput by month by rate schedule from the beginning of the historic test year and the future test year through the most recent month available and update as additional data become available. Separately identify sales and transportation throughput and provide the work papers which develop normalized sales.

Response:

Please see the response to SDR-RR-5.

Prepared by or under the supervision of: Sherry A. Epler

SDR-RR-7

Request:

Please provide the work paper developing the Company's FTY load growth adjustment.

Response:

Please see the Direct Testimony of Sherry A. Epler, UGI Gas Statement No. 8.

Prepared by or under the supervision of: Sherry A. Epler

SDR-RR-8

Request:

Please provide a complete copy of the computer output generated by the Company's statistical analysis package for all residential, commercial, public authority and industrial econometric models of gas demand estimated by the Company, but not presented in the filing.

Response:

None.

Prepared by or under the supervision of: Sherry A. Epler

SDR-RR-9

Request:

Identify the historical data source(s) for each dependent and independent variable utilized to develop the econometric models of gas demands for each forecasted customer group.

Response:

The variables noted below were utilized for the development of normalized and annualized usage for the Residential Heating ("RH") and Commercial Heating ("CH") customer groups, except as noted. Budgeting representing normalized and annualized usage was performed on an individual customer basis for Rate DS, Rate LFD, Rate XD and Rate IS by UGI Marketing personnel, with the exception of any new customer additions or losses for Rates LFD, XD and IS. The RH customer group is comprised of heating customers within Rates R and RT and the CH customer group is comprised of heating customers within Rates N, NT and DS.

(1) Monthly Sales – Monthly sales is a dependent variable in the econometric model. These sales are expressed in the form of use per customer which are developed from reported monthly sales and customer counts.

(2) Monthly Customers – Customers is an independent variable. Reported end of month customer counts are used in conjunction with monthly sales to develop use per customer.

(3) Monthly Heating Degree Days – Actual monthly Heating Degree Days (“HDD”) is an independent variable. HDD are calculated on a 65 degree Fahrenheit temperature base using the daily average temperature of a Gas Day and then summed by month to arrive at the Monthly Heating Degree Days. Each Gas Day is based upon the North American Standards Board definition of a Gas Day which encompasses the 24 hour period from 10:00 a.m. to 10:00 a.m. The recording locations for temperature weather data used to calculate HDD for UGI Gas are the NOAA recording stations at: Wilkes-Barre/Scranton, PA (KAVP); Allentown, PA (KABE); Reading, PA (KRDG); Lancaster, PA (KLNS); Harrisburg, PA (KMDT), Altoona, PA (KAOO), Clearfield, PA (KFIG), and Bradford, PA (KBFD). Weighting of stations is based on historical throughput within geographic delivery regions to produce a composite HDD combined value.

SDR-RR-9 (Continued)

(4) Lagged Monthly Heating Degree Days – Monthly Heating Degree Days lagged by one month.

(5) Weighted Time Trend – Weighted Time Trend is an independent variable. This variable captures trends in customer usage which include both known and unknown factors such as structural conservation related to more efficient building envelop construction, regular cycle appliance change-outs to more efficient units, upgrades to more efficient units, installation of energy conservation measures such as set-back thermostats and manual consumer behavior changes such as lowering thermostat settings in response to higher energy prices. This numeric variable represents the passage of time by assigning each monthly time period a sequential numeric value. This variable is weighted by the HDD variable in order to capture trend impacts during associated heating use periods. This variable is used for the RH group forecasting (Rates R and RT) but is excluded for the CH group forecasting (including Rates N, NT and DS).

Prepared by or under the supervision of: Sherry A. Epler

SDR-RR-10

Request:

Identify the source(s) and supporting documentation for the FTY value of each independent variable which required forecasting in the Company's gas demand models.

Response:

(1) Monthly Customers – Monthly customer counts utilized are produced by a Marketing department forecast through the Fully Projected Future Test Year. Attachment SDR-RR-11 provides the supporting data.

(2) Monthly Heating Degree Days – Normal Monthly Heating Degree Days ("HDD") are utilized for forecasting. UGI Gas utilizes a 15 year Normal HDD which is based on officially recorded daily temperatures (on a Gas Day basis) over the period January 1, 2005 to December 31, 2019. The Normal HDD are recalculated every 5 years with the most recent 15 years of HDD data. The actual system HDD is calculated using temperature data as identified in SDR-RR-9. Please see the Direct Testimony of Sherry A. Epler, UGI Gas Statement No. 8, UGI Gas Exhibit SAE-2 for HDD values.

(3) Lagged Monthly Heating Degree Days – Lagged Monthly Heating Degree Days are equal to the Monthly Heating Degree Days and are representative of the prior month's Heating Degree Days.

(4) Weighted Time Trend – The Weighted Time Trend variable is sequenced a unit value of 1 each month through the regression period and forecast based on a continuation of that same sequence for each forecast month (e.g., 100, 101, 102, etc.). A weighting of the time trend is accomplished by multiplying the trend value by the applicable monthly HDD value and dividing that product by a value of 10,000 in order to normalize to a smaller sequential value for display. This variable is used for the RH group forecasting (Rates R and RT) but is excluded for the CH group forecasting (including Rates N, NT and DS).

Prepared by or under the supervision of: Sherry A. Epler

SDR-RR-11

Request:

Please provide in hard copy and on a computer diskette in Lotus 1-2-3, QuattroPro or other spreadsheet format, the dependent and independent variable databases relied upon to produce the Company's gas demand models. For variables based on averages, include the observations which comprise the average (e.g., gas prices).

Response:

Please see Attachments SDR-RR-11(a) and SDR-RR-11(b) which have been provided in electronic (Excel) format on USB flash drive.

SDR-RR-12

Request:

In the form identical to the previous question, please provide a database for all independent variables which were analyzed by the Company, but exclude from the filed gas demand models.

Response:

None.

Prepared by or under the supervision of: Sherry A. Epler

SDR-RR-13

Request:

For each customer receiving service at less than the maximum applicable tariff rate, please provide:

a. actual consumption for the two most recent calendar years;

b. actual consumption for the HTY and the most recent twelve month period for which data is available;

c. the currently applicable rate;

d. an explanation for the rate discount.

Response:

None.

Prepared by or under the supervision of: Sherry A. Epler

SDR-RR-14

Request:

Please provide a copy of the Company's detailed capital budgets for the preceding and current calendar years which underlie the projected test year capital additions in this case.

Response:

Please see the response to SDR-ROR-14.

Prepared by or under the supervision of: Vicky A. Schappell

SDR-RR-15

Request:

Please provide a variance or other similar report comparing actual and budgeted construction expenditures at the conclusion of each budget period for the past three years and as of the most recent date available.

Response:

Please see Attachment SDR-RR-15.

Prepared by or under the supervision of: Vicky A. Schappell

SDR-RR-20

Request:

Please state whether the future test year budgeted labor includes any increases or decreases in the number of employees during the future test year. If increases have been budgeted, please state whether the future test year includes budgeted positions which have not been filled.

Response:

The future test year ("FTY") budgeted labor as of September 30, 2022 includes an increase of 43 regular employees from September 30, 2021 or historic test year ("HTY") budgeted headcount. The fully projected future test year ("FPFTY") labor budget as of September 30, 2023 includes an increase of 27 regular employees from the September 30, 2022 budgeted headcount. While a significant number of the 43 additions during the FTY are still to be filled, the Company is pursuing certain compensation changes which are targeted at increasing retention and recruitment for these and other roles. Please see the Direct Testimony of Christopher R. Brown, UGI Gas Statement No. 1, for additional details.

In addition, please see Exhibit A for the FPFTY Schedules D-9 and D-17 for the details related to the Company's planned addition of 25 FTEs above budgeted levels.

Prepared by or under the supervision of: Christopher R. Brown

SDR-RR-21

Request:

Please explain how the Company has treated routine or normal position vacancies which occur as a result of terminations or retirements in its budgeted labor projections.

Response:

As a Company, during the budgeting process each year, all currently open positions are reviewed to determine if they should be excluded or carried forward into the upcoming budget year. In addition to reviewing individual open positions, vacancy rates are also reviewed across the various functional groups throughout the organization. An overall vacancy rate is then built into the Company labor budget, thereby reducing total budgeted headcounts and associated expenses to take these vacancies into account. This is reflected in both the Future Test Year and the Fully Projected Future Test Year labor projections.

Prepared by or under the supervision of: Tracy A. Hazenstab

SDR-RR-22

Request:

Please provide the most recent insurance premiums for each type of insurance coverage (i.e., employee benefit and those purchased by the Company) reflected in the Company's filing. If available, please provide estimated premiums for the subsequent calendar year.

Response:

Please refer to Attachment SDR-RR-22 for fiscal 2021 actual and budgeted fiscal 2022 insurance premiums.

Prepared by or under the supervision of: Tracy A. Hazenstab

UGI Utilities, Inc. – Gas Division
Benefit Program Effective Jan. 1, 2022

Employee Medical Plan

All employees and their dependents have the option to participate in a health care program that provides four options: an Aetna Point of Service II Plan, an Independence Blue Cross Preferred Provider Option Plan, Aetna High Deductible Health Plan with a Health Savings Account, and an Independence BlueCross High Deductible Plan with a Health Savings Account. Employees share in the cost of medical and prescription plans.

A brief summary of each is listed below:

MEDICAL	**Aetna Choice POS II**		**Independence Blue Cross PPO**	
	In Network	Out of Network	In Network	Out of Network
Deductible	Individual: $600 Family: $1,500	Individual: $1,200 Family: $3,000	Individual: $600 Family: $1,500	Individual: $1,200 Family: $3,000
HSA Annual Funding	N/A	N/A	N/A	N/A
Office Visit Co-Pay PCP/Specialist	$25/$40	70% after deductible	$25/$40	65% after deductible
Co-Insurance after Deductible	85%	65%	85%	65%

MEDICAL	**Aetna HAP/HSA**		**Independence Blue Cross HDP**	
	In Network	Out of Network	In Network	Out of Network
Deductible	Individual: $2,500 Family: $5,000 (imbedded individual $2,800)	Individual: $3,500 Family: $7,000	Individual: $3,000 Family: $6,000	Individual: $4,000 Family: $8,000
HSA Annual Funding by UGI	Individual: $1,000 Family: $2,000		Individual: $750 Family: $1,500	
Office Visit Co-Pay PCP/Specialist	95% after deductible	75% after deductible	85% after deductible	65% after deductible
Co-Insurance after Deductible	95%	75%	85%	65%

Prescription Drug Coverage	**Aetna Choice POS II & Independence Blue Cross PPO**		**Aetna HDHP/HSA & Independence Blue Cross HDP/HSA**	
	In Network	Out of Network	In Network	Out of Network
Deductible	Individual $175; Family $350		Subject to Medical Plan Deductible

Dental Plan

All employees have access to the following dental plans:

Benefit – In network	**Basic Dental**	**Buy Up Dental**
Annual Deductible:	$50 Individual/$150 Family	No deductible
Diagnostic and Preventive, to include cleanings, fluoride treatments, sealants, x- rays	100%; no deductible	100%; no deductible
Basic Restorative, oral surgery, endodontics	80% co-insurance after deductible	90%
Major Restorative, Prosthodontics	50% co-insurance after deductible	60%
Non-Surgical Periodontics	80% co-insurance after deductible	90%
TMJ, Dental Implants, Occlusal Guards	50% co-insurance after deductible	60%
Annual Maximum for covered services	$1,500	$2,500
Orthodontics	50% co-insurance with $1,500 lifetime maximum	50% co-insurance with $2,500 lifetime

The employee only premium for the Basic Dental coverage is paid for by UGI. UGI contributes this same amount for the employee only Buy up Plan. Employees pay full cost for dependent coverage.

Vision Plans

All employees have access to the following vision plans:

Benefit	Vision Base	Vision Buy Up
Exam for glasses	100%	100%
Clear Standard/Single Vision/Bifocal/Blended Bifocal/Trifocal	$20 copay	$20 copay
Custom Progressive Lenses	$95 - $175	$95 - $175
Standard Progressive Lenses	100%	100%
Elective contact lenses in lieu of glasses	Up to $140	Up to $150

Both Vision plans are 100% employee paid.

Flexible Spending Accounts

All employees are eligible to participate in Health Care or Dependent Day Care Spending Accounts. The annual maximum election for a Health Care Account is $2,750 and the minimum is $260. The annual maximum election for the Dependent Day Care is $5,000 and the minimum is $260. Employees who enroll in the Aetna High Deductible Health Plan are eligible for a Limited Scope Heath Care spending account per IRS regulations.

Group Life Insurance

All employees receive company paid basic life in the amount of one times their annual salary (including certain bonuses) rounded to the next highest $1,000. Part-time employees receive $10,000.

Employees may elect additional employee supplemental life insurance of 1, 2, 3, 4, or 5 times annual salary rounded to the nearest $1,000. This coverage is 100% employee paid. Employee may also elect supplemental life insurance for a spouse in amounts from $10,000 to $100,000 in increments of $10,000. Child(ren) life insurance is also optional in amounts of $5,000 or $10,000. Both spouse and child(ren) life insurance are 100% employee paid.

Accidental Death & Dismemberment (AD&D) and Business Travel Accident (BTA) Insurance

All employees are covered under AD&D insurance 24 hours per day, 365 days per year. The maximum benefit is one times annual salary to a maximum of $2 million. Employee may elect Voluntary AD&D at 1, 2, 3, 4, or 5 times salary to a maximum of $6 million. Spouse only equals

50% of employee coverage. Child(ren, only equals 15% of employee coverage; Spouse and Child(ren) equals 40% for Spouse and 10% for Child(ren) of employee coverage.

All voluntary AD&D coverage is paid 100% by employees.

All employees are covered by Business Travel Accident with a maximum benefit of 4 times annual salary to a maximum of $2 million.

Additional Voluntary Benefits – Employee paid:

- **Doctor on Demand** – Telemedicine available 7 days a week, 24 hours a day right from a mobile device or computer. Any needed prescriptions are sent to the pharmacy of your choice. Medical and mental health services are available for nominal copays based on the employee's medical plan election. Must be enrolled in one of UGI medical plans.
- **Critical Illness** provides a lump sum payment upon diagnosis of Cancer, Heart Attack, Stroke or Major Organ Transplant. Coverage available: Employee $10,000 or $20,000; Spouse $10,000 or $20,000; Children $5,000 or $10,000.
- **Accident Insurance** provides cash for covered injuries that occur on and off the job. Benefits include emergency room visits, fractures and dislocation, ambulance transportation, intensive care, surgeries, and more.
- **Identify Theft Protection** – Proactive monitoring of traditional and non-traditional credit, reimbursement insurance for up to $1 million in identity theft-related expenses, fully managed resolution services.
- **Hospital Indemnity -** Provides a daily benefit for a covered stay in a hospital, critical care unit or rehabilitation facility. The benefit amount is determined by the type of facility and the number of days the covered individual stays confined in the facility. Employees may elect the High or Low plan and coverage their spouse and/or dependent children.
- **Pet Insurance** – This coverage will reimburse eligible veterinary expenses relating to accidents, illnesses, and injuries for pets, like dogs and cats. There are two levels of coverage, one provides pets with wellness coverage.

Short Term Disability

The Company provides a self-insured pay continuation illness plan for all employees. The percentage of pay continued and the number of weeks at 100% and 50% are based on years of service. Short term disability is available for a maximum of 6 months of disability.

Long Term Disability

Employees who exhaust short term disability benefits are eligible to apply for long term disability which is an insured program. Employees who qualify receive 60% of base monthly income offset by other disability income such as Social Security. Maximum benefit is $20,000 per month. Minimum benefit is the greater of $100 or 10% of the gross disability payment per month.

Savings Plan – 401(k)

All employees are eligible to participate in the deferred savings plan which is a tax qualified 401(k) program. The Plan accepts both before-tax and after-tax contributions up to a combined total of 50% of salary subject to the IRS maximum deferral of $61,000 for 2022. The before-tax maximum is $20,500 for 2022. There is also the option to make deferrals as a Roth. Employees who are age 50 or older may contribute an additional catch up contribution of $6,500 per year. The Company matches before-tax or after-tax contributions at 50% of the first 3% and 25% of the next 3% of salary deferred for those employees who participate in the defined benefit pension plan. Participants are immediately vested in the Company match.

Employees hired on or after January 1, 2009 are eligible for an enhanced company match of 100% of 6% effective January 1, 2019 because they are not eligible for the defined benefit pension plan. Vesting is immediate.

Educational Assistance

Full-time employees with a summary performance rating of “Effective Performance” or higher on their most recent annual review may be eligible to participate in the Company’s tuition reimbursement program for courses offered by approved educational institutions. To be eligible for reimbursement studies selected must be related to some phase of the employee’s current job, or be a direct benefit to the Company’s operation, or be part of a required course for a degree (associates, bachelors or masters) or certificate related to the Company’s operation. PhD programs are excluded.

The Company will reimburse 80% of tuition costs only, excluding the cost of books, supplies and other associated fees at qualified educational institutions. The maximum reimbursement per calendar year is limited to $6,300 for undergraduate courses and $10,000 for graduate level courses. In order to receive reimbursement, the employee must provide evidence of satisfactory completion of the course. For courses with letter grades, “satisfactory completion” is defined as follows:

– a grade of “C” or better for undergraduate classes
– a grade of “B” or better for graduate level classes

UGI financially supports employees to retain certification and/or licensure that is required in their current role; or, to obtain certification/licensure which will increase their knowledge and skills as it relates to their current work responsibilities. Oftentimes a course provides valuable assistance in preparing for a certification/licensure exam. This policy enables financial support for reimbursement of approved courses that prepare those who will take an exam to have a greater opportunity for success. This policy also provides financial support for the renewal/maintenance fees for job-related certification/licensure.

This policy applies to all full-time employees and part-time employees 20 hours or more weekly, with “Effective Performance” or higher on their most recent annual review. For employees who have not yet received formal reviews, supervisor approval of application signifies confirmation of “Effective Performance” to date. The professional certification/licensure must be considered by the Company to be directly related to the employee's current job and must be of direct benefit to the Company's operation unless approved by the departmental Vice President and Human Resources.

Paid Time Off

The Company provides all employees with 10 paid holidays and 3 personal days per calendar year. Employees are provided vacation allowances based on years of service ranging from 3 weeks during the first calendar year of employment on a prorated basis up to 6 weeks after 35 years of service.

Severance Program

Exempt employees, in levels M2 – M6 and P3 – P5 are eligible for a severance allowance of two weeks of compensation for each year of service with a minimum of two months of compensation and a maximum of 12 months of compensation. Severed employees will also receive a lump sum payment equal to the COBRA cost of continued medical and dental coverage for the period of severance less the active employee contribution amount.

Exempt employees, in levels M1, P1 - P2 and non-bargaining non-exempt employees, are eligible for a severance allowance of one week of compensation for each year of service with a minimum of two weeks of compensation and a maximum of 12 months of compensation. Severed employees will also receive a lump sum payment equal to the COBRA cost of continued medical and dental coverage for the period of severance less the active employee contribution amount.

Post-Retirement Benefits

Retirement Plan – UGI Utilities, Inc. Employees Hired Prior to 1/1/2009

The Plan is a noncontributory defined benefit plan covering substantially all employees of UGI Utilities, Inc. hired prior to January 1, 2009. Effective January 1, 2009, the Plan was closed to new hires, rehires or transfers occurring on or after that date.

Substantially all employees of the UGI Employers hired prior to January 1, 2009 who complete five years of vesting service, as defined, or who reach normal retirement age, as defined, while in the employ of the UGI Employers, are entitled to benefits upon reaching normal retirement age, generally age 65.

The annual pension benefits shall generally be the greatest of:

- $600; or

- 1.9% of final average earnings, as defined, times years of credited service, as defined, (which amount cannot exceed 60% of the average monthly earnings for the highest consecutive 12-month period during the 120 consecutive month period prior to the date of retirement or termination), less (b) 1% of the primary Social Security benefit, as defined, times the years of credited service at age 65 (maximum of 35 years) and in the case of early retirement, multiplied further by the ratio of actual credited service to projected credited service at normal retirement date; or

- 25% of earnings during the last 12 months prior to retirement multiplied by the ratio (not to exceed 1.0) of years of projected credited service to normal retirement date to 15, and in the case of early retirement, multiplied further by the ratio (not to exceed 1.0) of years of credited service earned to the projected years of credited service at normal retirement date.

The Plan permits early retirement benefits at a reduced level at age 55 and completion of ten years of vesting service. Unreduced early retirement benefits are available for employees retiring from age 62 to age 65, who have completed 10 years of vesting service

Retirement Plan – UGI Utilities, Inc. Employees That Are Former Non-Union Employees of UGI Central Penn Gas, Inc. Hired Prior to 1/1/2009 or Former Union Employees of UGI Central Penn Gas, Inc. Hired Prior to 1/1/2012

The Plan is a non-contributory defined benefit plan covering employees of UGI Central Penn Gas, Inc. hired prior to January 1, 2009. Effective January 1, 2009, the Plan was closed to new hires, rehires or transfers occurring on or after that date except for employees subject to a collective bargaining agreement. The plan closed for those employees on January 1, 2012.

Substantially all CPG employees of the UGI Employers hired prior to January 1, 2009, or January 1, 2012 for those covered under a collective bargaining unit, who complete five years of vesting service, as defined, or who reach normal retirement age, as defined, while in the employ of the UGI Employers, are entitled to benefits upon reaching normal retirement age, generally age 65.

The annual pension benefits shall generally be:

- 1.08% of average monthly earnings up to covered monthly earnings times years of credited service up to 35 years

  plus

- 1.35% of average monthly earnings that are more than the covered monthly earnings times years of credited service up to 35 years

There is a group of CPG employees whose pension benefits are calculated under a grandfathered pension formula. Their annual pension benefits shall generally be:

- 1.65% of the first $833.34 of monthly earnings, plus 2% of monthly earnings in excess of $833.34 for each year of credited service.

The Plan permits early retirement benefits at a reduced level at age 55 and completion of ten years of vesting service. Unreduced early retirement benefits are available for employees retiring from age 60 to age 65, who have completed 10 years of vesting service

Retirement Plan - UGI Utilities, Inc. Employees That Are Former Employees of UGI Penn Natural Gas, Inc. Hired Prior to 1/1/2009

The Plan is a noncontributory defined benefit plan covering substantially all employees hired prior to January 1, 2009. Effective January 1, 2009, the Plan was closed to new hires, rehires or transfers occurring on or after that date.

Substantially all employees hired prior to January 1, 2009 who complete five years of vesting service, as defined, or who reach normal retirement age, as defined, are entitled to benefits upon reaching normal retirement age, generally age 65.

The annual pension benefits shall generally be:

A. (1.25% of Final Average Earnings up to the Base Amount) times (your years of Credited Service up to 30 years)

Plus

B. (1.65% of Final Average Earnings over the Base Amount) times (your years of Credited Service up to 30 years)

in no event will the benefit be less than the ratio of years of Credited Service (maximum of 30) divided by 30 and multiplied by $1,800.

The Plan permits early retirement benefits at a reduced level at age 55 and completion of 10 years of vesting service. Unreduced early retirement benefits are available for employees retiring from age 62 to age 65, who have completed 10 years of vesting service.

Retiree Life Insurance

Pension-eligible employees who retire are eligible for retiree life insurance in the amount of 25% of their pre-retirement amount with a maximum coverage amount of $50,000. There is no cost to the retiree.

Retiree Medical Insurance - UGI Utilities, Inc. Employees

An eligible employee is any full-time employee of UGI Utilities, Inc. who as of January 1, 1989, was at least 55 years of age and had completed at least 10 years of service with UGI or an affiliated corporation or whose age and years of service equaled at least 80 and who immediately following his retirement from UGI commences receipt of an early, normal or late retirement pension.

Effective January 1, 2014, retiree medical for Medicare-eligible retirees (age 65 or over) was outsourced to a third party and the benefit was changed to a health reimbursement account. In addition, the Retiree Plan covers Medicare-eligible disabled employees who are receiving long term disability benefits. Retirees and spouses who retired on or after 1/1/1986 receive $500 per calendar year and those who retired prior to 1/1/1986 receive $700 per calendar year.

Retiree Medical Insurance -UGI Utilities, Inc. Employees Previously Employed by UGI Central Penn Gas, Inc.

- Any employees who previously retired from the employment of UGI Central Penn Gas, Inc. (or a predecessor employer ("CPG") before the October 1, 2008 acquisition of CPG by UGI, an Eligible Retired Employee shall mean: any retired employee who was at least 55 years of age, had completed at least 10 years of service with CPG, had retired and commenced receipt of his retirement pension under the PPL Gas Retirement Plan immediately following his retirement from CPG and was receiving benefits under the PPL Gas Retiree Medical Plan as of October 1, 2008.

- Any full-time employees of CPG who retired from the employment of CPG on or after the October 1, 2008 acquisition of CPG by UGI, an Eligible Retired Employee shall mean: any full-time employee of CPG who is at least 55 years of age, has completed at least 10 years of service with CPG, retires and commences receipt of his retirement pension under the PPL Gas Retirement Plan immediately following his retirement from CPG and retired from CPG on or after the October 1, 2008 acquisition of CPG by the Company, but on or before January 1, 2009;

- Any full-time employee who was covered under the terms of a collective bargaining agreement between a collective bargaining representative and CPG and who is at least 55 years of age, has completed 10 years of service with CPG and retired prior to January 1, 2012.

Effective January 1, 2014, retiree medical for Medicare-eligible retirees (age 65 or over) was outsourced to a third party and the benefit was changed to a health reimbursement account. In addition, the Retiree Plan covers Medicare-eligible disabled employees who are receiving long term disability benefits. Retirees and spouses who retired on or after 1/1/1986 receive $500 per calendar year.

Retiree Medical Insurance -UGI Utilities, Inc. Employees Previously Employed by UGI Penn Natural Gas, Inc.

No employees of the former UGI Penn Natural Gas, Inc. are eligible for retiree medical.

SDR-RR-25

Request:

Please provide a description of the Company's merit and cost of living wage rate increase policies.

Response:

The Company does not provide wage adjustments based on changes in the cost of living index.

Non-Union Employees:

The Company maintains a salary structure which is comprised of salary grades and ranges. All non-union positions are assigned a salary range based on the competitive value of the job. The salary structure is reviewed periodically and adjusted, at the discretion of management, to remain externally competitive and internally equitable in order to attract, motivate, and retain quality employees.

Funds are budgeted each year for merit increases based on prevailing market rates. Performance reviews are scheduled annually with employees. Merit increase guidelines are established and individual performance ratings determine individual merit increases. Please see Attachment SDR-RR-25.

Union Employees:

Employees who are represented by bargaining units are paid according to the rates negotiated in their labor agreements.

Prepared by or under the supervision of: Vivian K. Ressler

UGI UTILITIES, INC.
MERIT INCREASE POLICY
FOR FISCAL YEAR 2022

Date: September 14, 2021

To: All Utilities Leaders

From:

Subject: **UGI Utilities, Inc. Exempt & Non-Exempt Compensation Plan**
Fiscal 2022 Salary Ranges, Merit Increase Grids & Guidelines

We have completed the annual review of compensation practices, merit, and structure trends, and general business economic indicators of our competitive marketplace, as well as current business conditions throughout UGI. The following guidelines will apply to exempt (salaried) and non-exempt (hourly paid) employees effective September 27, 2021.

Changes for Fiscal Year 2022

- Salary Ranges: Exempt and non-exempt pay ranges will shift upward by 2%
- Merit Increase Grids: For exempt and non-exempt employees, grids reflect a 3% average merit increase target

Salary Ranges

Each employee may discuss the following with his or her supervisor:

- The salary range minimum, midpoint, and maximum for his or her position
- The current position of his or her salary in their respective salary range expressed in thirds (i.e., first third, middle third, upper third)
- The date of his or her next scheduled performance appraisal and when he or she is next eligible for a merit increase
- The applicable merit increase grids

Merit Increase Period, Proration & Proration for Absence

Exempt Employees:

- The merit increase review period is the fiscal year October 1, 2021 to September 30, 2022, and the merit increase will be provided in December 2022

- For new hires or transfers to an exempt role on/after September 1, 2021, their merit increase/performance review will be deferred to the merit increase cycle for FY 2022 (provided in December 2022)
- If the employee receives promotion on/after October 1, 2021, the merit increase will be based on annual salary as of September 30, 2021
- The merit increase will be prorated based on the time period worked during the fiscal year if you are:
  - Hired after October 1, 2021
  - Transferred from Corporate, Energy Services, or AmeriGas after October 1, 2021
  - Transferred from non-exempt to exempt position after October 1, 2021
- Merit increases will be prorated if an employee is on unpaid leave of absence (excludes FMLA, workers' compensation, and military leave) for 60 or more consecutive days during the fiscal year
- Merit increase will be prorated for the time an employee is on long term disability

Non-exempt employees:

- The merit increase review period is 12 months prior to the merit increase effective date
- Employees that are on unpaid leave of absence (excludes FML, workers' compensation, and military leave) for 60 or more consecutive days will have their next review date adjusted by the number of calendar days on leave

Any employee not actively at work on the effective date of their merit increase, they will receive their earned merit increase retroactive to the effective date in the pay cycle after returning to work and completing their performance review discussion/meeting.

Merit Increase Grid

The exempt and non-exempt increase grids for Fiscal 2022 are attached. The targeted increase percentage is reflected on each grid at the "Effective Performance" level and middle third position in range. These grids comply with the Company's normal salary administration practice which provides for salary increase consideration on a 12-month review cycle.

Performance Level	First Third	Middle Third	Upper Third	At or Above Maximum
Exceptional Performance Percent of Population: 5% - 10%	5.0% - 6.0%	4.0% - 5.0%	3.0% - 4.0%	0 - 2.5% (Lump Sum)
Highly Effective Performance Percent of Population: 10% - 15%	4.0% - 5.0%	3.0% - 4.0%	2.0% - 3.0%	0 - 2.0% (Lump Sum)
Effective Performance Percent of Population: 60% - 65%	3.0% - 4.0%	2.0% - 3.0%	1.0% - 2.0%	0 - 1.0% (Lump Sum)
Not Fully Effective Performance Percent of Population: 10% - 15%	Up to 2.0%	Up to 1.0%	None	None
Unsatisfactory Performance Percent of Population: 0% - 5%	None	None	None	None

Percentage increases based on performance and position of pay within salary range

Below Minimum Guidelines

Employees that fall below the career level salary range minimum are typically eligible for an increase to the career level salary range minimum. Human Resources will review employees in this situation each year and will bring them to your attention.

Promotional Guidelines

Promotional increase guidelines will be 2 to 3 times the targeted average merit increase percentages (e.g., 6.0% to 9.0%).

There are two types of promotions:

1. Promotion: New position is an increase in career level due to change in job responsibilities (increase in scope, complexity, responsibilities, etc.). Usually results in a backfill (additional headcount) of employee's current position.
2. Progression Promotion: A progression is a promotion from one level to the next that has documented criteria which employees need to achieve. This type of promotion does not result in a backfill or additional headcount. Progressions apply to eligible roles in Business Support, Technical Support and Professional career levels. (Example: Customer Care Representative I (B1) progresses to Customer Care Representative II (B2)). Please work with your Human Resources Manager to assess the position and complete a Promotion Criteria & Assessment Document.

Lateral Move

There are two types of lateral moves:
1. Lateral move with comparable responsibility.
    a. Career Framework categories are the same
    b. Very similar team management responsibilities (includes contractors), if applicable
    c. Same complexity of work and/or process
    d. Other responsibilities align (on-call, committee participation, project leadership, geographic scope)
    e. Up to 2% increase if employee's salary falls below the new role's pay range midpoint.
        i. For pay increase, employee needs to be in current role for at least one continuous year
2. Step Change in Responsibility
    a. Career Framework categories are the same or broader
    b. Increased team management responsibilities (includes contractors), if applicable
    c. More complex work, processes, decision-making
    d. Other responsibilities increase, broaden or deepen (on-call, committee participation, project leadership, geographic scope)
    e. Up to 5% increase if employee's salary falls below the new role's pay range midpoint and the position's market midpoint
        i. For pay increase, employee needs to be in current role for at least one continuous year

Move to Lower Career Level

If an employee moves to a position at a lower career level, there will be a pay reduction if the employee's salary falls in the upper third or over the maximum of the new career level. The pay reduction will be 5% per level decrease. If the pay reduction percent does not bring the new rate down to the new career level maximum, the maximum will become the new rate of pay. For example, employee's current position is career level M3 and they are moving to a P2 role. This would be a two-level reduction (M3 -> M2 -> P2) which would result in a 10% base pay reduction if employee's current salary falls in the upper third of the P2 salary range.

Temporary Assignments

For employees that receive job changes due to temporary assignments on special projects, the compensation information on that temporary assignment's offer letter will supersede the guidelines in this memo.

At or Above Maximum Guidelines

- An employee whose pay is at or above the maximum of their career level pay range may receive an increase in a lump sum as shown in the merit grid depending on their performance rating.
- An employee can only receive an increase in base compensation up to the maximum of their career level pay range, and any remaining increase will be paid in a lump sum.

Six Month Interim Performance Appraisal

An interim appraisal every six (6) months is required to review progress for employees who receive an annual performance rating of "Not Fully Effective Performance" or "Unsatisfactory Performance".

The Interim Performance Appraisal should be completed six months after the employee's annual performance appraisal date. For example: An employee receives a "Not Fully Effective Performance" rating at his/her annual review effective December 1st; therefore, an Interim Performance Appraisal is due June 1st. **There is no change in compensation with the Interim Performance Appraisal.**

If you have any questions regarding the above, please feel free to contact me or your local HR representative.

SDR-RR-26

Request:

Please provide the following monthly labor data for the year prior to the HTY, the HTY and the FTY through the most recent date available.

a. number of actual employees broken down between type (e.g., salaried, union, non-union, temporary, etc.);

b. regular payroll broken down between expensed, capitalized and other;

c. overtime payroll broken down between expensed, capitalized and other;

d. temporary payroll broken down between expensed, capitalized and other; and

e. other payroll (specify).

Response:

a. Please see Attachment SDR-RR-26, page 1.

b-c. See Attachment SDR-RR-26, page 2.

d-e. Not available.

SDR-RR-29

Request:

Please provide an analysis (description, dates and amounts) of any gains or losses on utility property sold for the lesser of the last three years or since the Company's last rate case or anticipated during the FTY. Explain how such amounts have been treated for ratemaking purposes.

Response:

A gain of $51,660 was recorded since the last UGI Gas Base Rate Case.

The UGI Gas West Pittston Pump Station land asset was sold in March 2021. The proceeds of the land sale were $58,410 with an asset value of $6,750 at the sale date, resulting in a gain of $51,660. This gain was recorded to FERC account 421.1 – Gain on Disposition of Property.

We anticipate proceeds on sales of vehicles during the FY2022 (FTY) and FY2023 (FPFTY) of $500,000 each year. For ratemaking purposes, these proceeds are treated as net salvage.

SDR-RR-30

Request:

Please provide the level of each of the following which is included in the Company's cost of service by separate type and/or payee, which are incurred directly by the Company or are allocated or billed to the Company by affiliates or its parent company.

a. fines and penalties

b. contributions and donations

c. membership dues

d. lobbying expense

e. employee activity costs (e.g., picnics, parties, awards)

f. investor relations expenses

Response:

a. No costs for fines and penalties are included.

b. No costs for contributions and donations are included.

c. Please refer to Attachment SDR-RR-30.

d. No lobbying expenses are included.

e. The cost of service includes direct employee activity costs (e.g., picnics, parties, awards) in the amount of $588,226 for the fully projected future test year.

f. The cost of service includes allocated investor relations expenses in the amount of $131,918 for the fully projected future test year.

	$ 1,115,404	

* Of the American Gas Association expense shown for the fully projected future test year, $597,416 will be included in the claim, while $23,599 relates to lobbying activities and will be excluded.

** Of the Energy Association of Pennsylvania expense shown for the fully projected future test year, $145,058 will be included in the claim, while $9,259 relates to lobbying activities and will be excluded.

SDR-RR-31

Request:

Please provide a description and the purpose for membership for each organization listed in the previous response.

Response:

Refer to response SDR-RR-32 for the purpose of memberships in industry organizations. The purpose of the Company's membership in other organizations is to improve the welfare, educational, social and economic climate in the Company's local communities, as well as to sponsor memberships for employees whose active participation in these organizations would be in the best interests of the Company and the communities within which the Company serves.

Prepared by or under the supervision of: Tracy A. Hazenstab

SDR-RR-32

Request:

Please provide the level of payments made to industry organizations included in cost of service along with a description of each payee organization or project.

Response:

Please refer to Attachment SDR-RR-32 for the industry organization payments included in the cost of service. The description of each payee organization is provided below.

- The American Gas Association (AGA) is a trade association that represents more than 200 local energy companies that deliver clean natural gas throughout the United States.

- The Cyber Resilient Energy Delivery Consortium (CREDC) performs multidisciplinary R&D in support of the Energy Sector Control Systems Working Group's Roadmap of resilient Energy Delivery Systems (EDS) that focuses on the cybersecurity of EDS.

- The Energy Association of Pennsylvania (EAP) is a trade association whose members include the electric and natural gas utilities operating in Pennsylvania.

- The Energy Solutions Center, Inc. (ESC) is a non-profit organization of energy utilities and equipment manufacturers that promotes energy efficient natural gas solutions and systems for use by residential, commercial, and industrial energy users.

- The Natural Gas Supply Collaborative (NGSC) is a voluntary collaborative of natural gas purchasers that are promoting safe and responsible practices for natural gas supply.

- The Natural Gas Vehicles for America (NGVAmerica) is a national organization dedicated to the development of a growing, profitable, and sustainable market for vehicles powered by natural gas or biomethane.

- The Northeast Gas Association (NGA) is a regional trade association that focuses on education and training, technology research and development, operations, planning, and increasing public awareness of natural gas in the Northeast U.S.

SDR-RR-32 (Continued)

- The Society of Gas Lighting is a group of over 100 industry executives from the Northeast and Mid-Atlantic states that meet to engage fellow members, and their guests, in discussion about the issues of the day as they may affect the development, transmission or distribution of natural gas.

- The Society of Gas Operators is an Industry group focusing on the sharing of information and topics relevant to Gas Operations. Membership is predominantly from gas companies and suppliers in the Northeast United States.

- The Coalition for Renewable Natural Gas (RNG Coalition) serves as the public policy advocate and education platform for Renewable Natural Gas in North America.

Prepared by or under the supervision of: Tracy A. Hazenstab

UGI UTILITIES, INC. - GAS DIVISION
SCHEDULE OF INDUSTRY ORGANIZATION PAYMENTS
FOR THE TWELVE MONTHS ENDING SEPTEMBER 30, 2023

Organization Name	**Included in Claim**	**Excluded from Claim***	**Total Payment**
American Gas Association	$ 597,416	$ 23,599	$ 621,015

AUDIT REPORT ON THE EXPENDITURES

OF THE

AMERICAN GAS ASSOCIATION

(For the 12 month period ended December 31, 2002

March 2005

NARUC STAFF SUBCOMMITTEE
ON ACCOUNTING AND FINANCE

National Association of
Regulatory Utility Commissioners
1101 Vermont Avenue; Suite 200
Washington, D.C. 20005

N A R U C
National Association of Regulatory Utility Commissioners

March 2005

To: **The State Regulatory Commissions**

From: **The NARUC Staff Subcommittee on Accounting and Finance**

Re: **Transmittal of the 2002 Report on the Expenditures of the American Gas Association**

Dear State Regulatory Commissions:

This is the annual report on the expenditures of the American Gas Association (AGA) provided for your review and consideration. Hopefully you will find the information contained herein to be useful in helping you to decide which, if any, of the costs of the association you should approve for inclusion in utility rates. Often, state commissioners review the costs of the association charged or allocated to the utilities in their jurisdiction in accordance with the policies of their commission for treatment of costs directly incurred by the state's utilities for similar activities.

With the possible exception of expenses directly related to research and development relevant to utility operations, and a proportional amount of associated administrative overhead expense, these expense categories may be viewed by some State commissions as potential vehicles for charging ratepayers with such costs as lobbying, advocacy or promotional activities which may not be to their benefit.

The Staff Subcommittee on Accounting and Finance is pleased to provide you with the AGA report for 2002 to allow you to review the information contained therein and to utilize it in a manner consistent with your commission's regulatory policies and practices.

Sincerely,

Thomas J. Ferris

Thomas J. Ferris
Chair
Staff Subcommittee on Accounting and Finance

Calculation of Lobbying Expenses Pursuant to
Internal Revenue Code Section 162(e)

The American Gas Association incurred lobbying expenses, as defined under IRC Section 162, of 2.28% of total member dues during calendar year 2002.

IRC Section 162 Definition of Lobbying

(e) Denial of deduction for certain lobbying and political expenditures
- (1) In general no deduction shall be allowed under subsection (a) for any amount paid or incurred in connection with -
  - (A) influencing legislation,
  - (B) participation in, or intervention in, any political campaign on behalf of (or in opposition to) any candidate for public office,
  - (C) any attempt to influence the general public, or segments thereof, with respect to elections, legislative matters, or referendums, or
  - (D) any direct communication with a covered executive branch official in an attempt to influence the official actions or positions of such official.
- (2) Exception for local legislation - In the case of any legislation of any local council or similar governing body -
  - (A) paragraph (1)(A) shall not apply, and
  - (B) the deduction allowed by subsection (a) shall include all ordinary and necessary expenses (including, but not limited to, traveling expenses described in subsection (a)(2) and the cost of preparing testimony) paid or incurred during the taxable year in carrying on any trade or business -
    - (i) in direct connection with appearances before, submission of statements to, or sending communications to the committees, or individual members, of such council or body with respect to legislation or proposed legislation of direct interest to the taxpayer, or
    - (ii) in direct connection with communication of information between the taxpayer and an organization of which the taxpayer is a member with respect to any such legislation or proposed legislation which is of direct interest to the taxpayer and to such organization, and that portion of the dues so paid or incurred with respect to any organization of which the taxpayer is a member which is attributable to the expenses of the activities described in clauses (i) and (ii) carried on by such organization.
- (3) Application to dues of tax-exempt organizations - No deduction shall be allowed under subsection (a) for the portion of dues or other similar amounts paid by the taxpayer to an organization which is exempt from tax under this subtitle which the organization notifies the taxpayer under section 6033(e)(1)(A)(ii) is allocable to expenditures to which paragraph (1) applies.
- (4) Influencing legislation - For purposes of this subsection -
  - (A) In general The term "influencing legislation" means any attempt to influence any legislation through communication with any member or employee of a legislative body, or with any government official or employee who may participate in the formulation of legislation.
  - (B) Legislation - The term "legislation" has the meaning given such term by section 4911(e)(2).
- (5) Other special rules
  - (A) Exception for certain taxpayers - In the case of any taxpayer engaged in the trade or business of conducting activities described in paragraph (1), paragraph (1) shall not apply to expenditures of the taxpayer in conducting such activities directly on behalf of another person (but shall apply to payments by such other person to the taxpayer for conducting such activities).
  - (B) De minimis exception
    - (i) In general Paragraph (1) shall not apply to any in-house expenditures for any taxable year if such expenditures do not exceed $2,000. In determining whether a taxpayer exceeds the $2,000 limit under this clause, there shall not be taken into account overhead costs otherwise allocable to activities described in paragraphs (1)(A) and (D).
    - (ii) In-house expenditures for purposes of clause (i), the term "in-house expenditures" means expenditures described in paragraphs (1)(A) and (D) other than
      - (I) payments by the taxpayer to a person engaged in the trade or business of conducting activities described in paragraph (1) for the conduct of such activities on behalf of the taxpayer, or
      - (II) dues or other similar amounts paid or incurred by the taxpayer which are allocable to activities described in paragraph (1).
  - (C) Expenses incurred in connection with lobbying and political activities - Any amount paid or incurred for research for, or preparation, planning, or coordination of, any activity described in paragraph (1) shall be treated as paid or incurred in connection with such activity.
- (6) Covered executive branch official - For purposes of this subsection, the term "covered executive branch official" means -
  - (A) the President,
  - (B) the Vice President,
  - (C) any officer or employee of the White House Office of the Executive Office of the President, and the 2 most senior level officers of each of the other agencies in such Executive Office, and
  - (D) (i) any individual serving in a position in level I of the Executive Schedule under section 5312 of title 5, United States Code, (ii) any other individual designated by the President as having Cabinet level status, and (iii) any immediate deputy of an individual described in clause (i) or (ii).
- (7) Special rule for Indian tribal governments - For purposes of this subsection, an Indian tribal government shall be treated in the same manner as a local council or similar governing body.
- (8) Cross reference - For reporting requirements and alternative taxes related to this subsection, see section 6033(e).

Table of Contents

Report of American Gas Association Financial Operations
In accordance with agreement between
American Gas Association and NARUC Oversight Committee

For the Year Ended December 31, 2002

Internal Revenue Service Form 990

The American Gas Association is a non-profit and tax exempt organization required to file informational returns with the U.S. Internal Revenue Service (IRS). Public inspection of the completed American Gas Association Exempt Organization Return (IRS Form 990) may be made in accordance with IRS regulation by request directly to the Internal Revenue Service, Attention: FOI Reading Room, 1111 Constitution Avenue, N.W., Washington, D.C. 20224. The American Gas Association makes its Exempt Organization Return available for public inspection during normal business hours (9:00 a.m. - 5:00 p.m.) at the Association's principal office, 400 N. Capitol St., N.W., Washington, D.C. 20001, preferably by written request directed to Joseph L. Martin, AGA's Controller, at the same address. State public utility commissions that wish to receive a copy of AGA's Exempt Organization Return should also direct their request to Joseph Martin. Internal Revenue Service Form 4506-A may also be used to request copies of the return from the Internal Revenue Service if public inspection is not desired by the requestor. IRS may make a charge for its photocopying service.

(1) *Continued*

Revenue Recognition

Membership dues are recognized as revenue in the year to which the membership applies. Dues received in advance are deferred. Publications revenue is recognized upon the sale of the related publication and meetings revenue is recognized when the related meetings are held.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Functional Allocation of Expenses

The costs of providing the various programs and other activities have been summarized on a functional basis in the statements of activities. Accordingly, certain costs have been allocated among the programs and supporting services benefited. Salaries are charged directly to the programs and supporting services served. Fringe benefits are allocated to the programs and supporting services proportionate to salaries charged, and certain expenses benefiting all programs and supporting services are allocated based on the number of staff supporting each service.

Income Taxes

The Association is recognized as exempt from federal income tax under Section 501(c)(6) of the Internal Revenue Code, except for taxes on unrelated business income. Income tax expense on unrelated business activities totaled approximately $25,000 and $20,500 for the years ended December 31, 2002 and 2001, respectively.

The Association has elected to pay the federal proxy tax on behalf of its members on expenses related to lobbying activities. The proxy tax approximates $125,000 for both years ended December 31, 2002 and 2001.

Reclassifications

Certain reclassifications of prior year balances have been made to conform to the current year presentation.

AMERICAN GAS ASSOCIATION

Notes to Financial Statements

(2) Cash and Cash Equivalents and Marketable Securities

At December 31, 2002 and 2001, the components of cash and cash equivalents and marketable securities were as follows:

	2002	2001
Cash	$ 482,603	$ 461,013
Cash equivalents:		
Money market accounts	1,432,064	2,204,914
U.S. government agency obligations	599,760	-
Commercial paper	749,102	347,584
Total cash and cash equivalents	$ 3,263,529	$ 3,013,511
U.S. government agency obligations	$ 4,053,550	$ 4,322,497
Mortgage-backed securities	-	255,117
Corporate obligations	1,737,602	1,544,019
Other debt securities	9,128,124	9,968,957
Equity mutual funds and securities	5,757,285	6,980,682
Total marketable securities	$ 20,676,561	$ 23,071,272

(3) Property, Plant, and Equipment

Property, plant, and equipment are composed of the following as of December 31, 2002 and 2001:

	2002	2001
Leasehold improvements	$ 986,148	$ 949,311
Equipment	3,267,192	3,624,270
Furniture and fixtures	1,199,761	1,199,761
	5,453,101	5,773,342
Less accumulated depreciation and amortization	(2,844,837)	(2,557,526)
Property, plant, and equipment, net	$ 2,608,264	$ 3,215,816

(Continued)

AMERICAN GAS ASSOCIATION

Notes to Financial Statements

(4) Pension and Other Postretirement Benefits

The Association has the following noncontributory defined benefit pension plans:

- a qualified plan which covers substantially all Association employees,
- a non-qualified plan which is for employees who were determined to be eligible by the Association's Compensation Committee when the plan was created in 1985 (plan was frozen to new participants in 1986), and
- a non-qualified "excess" plan for those employees whose compensation exceeds the IRS limits for the qualified plan. This plan was approved by the Compensation Committee and is effective January 1, 2003.

These plans provide retirement benefits based on employees' years of services and compensation prior to retirement. In addition, there is an unfunded, nonqualified supplemental retirement benefit plan for the President and CEO that was approved by the Board of Directors in February 2001.

The funded plan's assets consist primarily of common stocks and U.S. government and corporate bonds.

The following provides a reconciliation of benefit obligations, plan assets, and funded status of the plans at December 31, 2002 and 2001:

	Pension Benefits		Other Postretirement Benefits	
	2002	2001	2002	2001
Benefit obligation	$ 25,592,012	$ 23,168,922	$ 8,489,792	$ 7,554,951
Fair value of plan assets	19,832,983	23,282,900	4,203,939	5,037,630
Funded status	$ (5,759,029)	$ 113,978	$ (4,285,853)	$ (2,517,321)
Accrued benefit cost recognized in the statements of financial position	$ 1,531,068	$ 1,045,369	$ 850,289	$ 854,771
Intangible asset recognized in the statements of financial position	$ 98,428	$ -	$ -	$ -

(Continued)

AMERICAN GAS ASSOCIATION

Notes to Financial Statements

(4) Continued

Weighted-average assumptions:	Pension Benefits		Other Postretirement Benefits	
	2002	2001	2002	2001
Discount rate	6.75%	7.25%	6.75%	7.25%
Expected return on plan assets	8.50%	8.50%	8.50%	8.50%
Rate of compensation increase	4.50%	4.50%	N/A	N/A

Net periodic pension and other postretirement costs for 2002 and 2001 include the following components:

	Pension Benefits		Other Postretirement Benefits	
	2002	2001	2002	2001
Pension (benefit) cost	$ 461,488	$ 139,626	$ 205,763	$ 23,285
Employer contribution	443,191	211,414	218,476	-
Plan participants' contributions	-	-	47,554	123,910
Benefits paid	1,576,467	1,341,069	545,110	594,492

In accordance with Statement of Financial Accounting Standard (SFAS) No. 87, *"Employers' Accounting for Pensions"*, the Association has recognized the required minimum liability represented by the excess of the accumulated benefit obligation over the plan assets at December 31, 2002 and 2001, which totaled $827,925 and $360,522, respectively. An intangible pension asset of $98,428, representing the unamortized prior service cost of the defined benefit plan, has been recognized within prepaid expenses and other assets in the accompanying statement of financial position as of December 31, 2002. The change in the total minimum liability of $368,975 is being recognized as a reduction to unrestricted net assets.

AMERICAN GAS ASSOCIATION
2021 and 2022 BUDGET

Expenses	$ 2021 Allocation	% 2021 Allocation	$ 2022 Allocation	% 2022 Allocation
Communications	$ 3,409,000	8.63%	$ 3,234,000	7.95%
Energy Markets, Analysis, and Standards	$ 4,840,000	12.26%	$ 4,403,000	10.82%
General and Administrative	$ 8,466,000	21.44%	$ 9,963,000	24.49%

Government Affairs and Public Policy	$ 5,428,000	13.74%	$ 5,991,000	14.73%
Industry Finance & Administrative Programs	$ 1,430,000	3.62%	$ 1,540,000	3.79%
Membership and Strategic Development	$ 4,222,000	10.69%	$ 4,323,000	10.63%
Operations and Engineering	$ 8,516,000	21.56%	$ 7,586,000	18.65%
Expense Budget *	$ 39,491,000	100.00%	$ 40,677,000	100.00%

Notes
AGA estimates that lobbying expenses, as defined under IRC Section 162, will account for 3.8% of members dues in 2021.

* Does not include certain expenses or activities not funded by annual member company dues.

AGA
American Gas Association

VISION STATEMENT

Committed to leveraging and utilizing America's abundant, domestic, affordable and clean natural gas to help meet the nation's energy and environmental needs.

MISSION STATEMENT

The American Gas Association (AGA) represents companies delivering natural gas safely, reliably, and in an environmentally responsible way to help improve the quality of life for their customers every day. AGA's mission is to provide clear value to its membership and serve as the indispensable, leading voice and facilitator on its behalf in promoting the safe, reliable, and efficient delivery of natural gas to homes and businesses across the nation.

CORE STRENGTHS

1. Conducts programs and develops standards to help enhance the safe delivery of natural gas to consumers;
2. Advocates for natural gas industry issues, regulatory constructs and business models that are priorities for the industry;
3. Promotes growth in the efficient use of natural gas by emphasizing before a variety of stakeholders the benefits of clean, abundant natural gas as part of the solution to the nation's energy and environmental goals;
4. Facilitates the exchange of information and improvement of performance metrics to help members achieve operational excellence;
5. Helps members manage and respond to the energy needs of customers, regulatory trends, natural gas or capital market issues and emerging technologies;
6. Collects, analyzes and disseminates information to opinion leaders, policy makers and consumers about the benefits provided by energy utilities and the natural gas industry;
7. Encourages the development, commercialization, and regulatory acceptance of natural gas end-use technologies; and
8. Delivers measurable value to AGA members.

Approved: October 13, 2015

AMERICAN GAS ASSOCIATION

Definitions of Functional Cost Centers
For the Year Ended December 31, 2017

Communications develops informational material for member companies and consumers and coordinates all media activity.

Corporate Affairs provides opportunities for interaction between member companies and the financial community. The focus is to promote interest in the investment opportunities in the industry.

Energy Analysis & Standards identifies the need for and conducts energy analyses and modeling efforts in the areas of gas supply and demand, economics, and the environment. It supports the development of building energy codes and standards that help enhance natural gas safety.

General and Administrative includes:

1. Office of the President provides senior management guidance for all AGA activities.
2. Human Resources develops and administers employee programs and provides office and personnel services.
3. Finance and Administration develops and administers financial accounting and treasury services and maintains computer services capability.

General Counsel & Federal Regulatory Affairs includes:

1. General Counsel provides legal counsel to the Association.
2. Federal Regulatory Affairs provides members with information on FERC and state regulatory developments; prepares testimony, comments, and filings regarding regulatory activities.

Government Relations provides members with information on legislative developments; prepares testimony, comments, and filings regarding legislative activities, lobbies on behalf of the industry.

Industry Finance and Administration develops and implements programs in such areas as accounting, human resources, and risk management for member companies.

Operations and Engineering develops and implements programs and practices to meet the operational, safety, and engineering needs of the industry.

Policy leads AGA's policy strategy development, engages key stakeholders and policy makers and develops studies and joint initiatives that support advancing the industry's advocacy priorities. It supports the growth objectives of members by advancing sustainable growth opportunities for the direct and distributed use of natural gas in the residential, commercial and industrial markets.

SDR-RR-34

Request:

Please provide a copy of the most recent FERC audit findings, the Company's response and final disposition of audit exceptions.

Response:

A copy of our most recent FERC Audit findings can be found at https://elibrary.ferc.gov/eLibrary/filelist?accession_number=20210114-3022&optimized=false.

Please see Attachment SDR-RR-34 for the Company's response to those findings.

No final disposition of the audit exceptions has occurred to date.

RE: UGI Utilities, Inc.
Docket No. FA20-3-000
Implementation Plan in Response to January 14, 2021 Audit Report

Dear Ms. Fleet:

In conjunction with UGI Utilities, Inc.'s ("UGIU's") January 8, 2021 response to the Federal Regulatory Commission (the "Commission") audit report dated January 14, 2021 ("Audit Report"), please accept UGIU's plan of implementing the audit recommendations contained in the Audit Report.

As set forth in the attached implementation plan, UGIU accepts many of the Division of Audit and Accounting's ("DAA's") audit findings and recommendations in the Audit Report and provides documented corrective action plans and timelines for each of the 50 recommendations. UGIU will make quarterly submissions to DAA describing the progress made with respect to each recommendation, beginning within 30 days after the end of the first calendar quarter, and continuing until all the corrective actions are completed. UGIU's submission of its implementation plan is without prejudice to, or waiver of its rights, including its right to contest the Commission's authority generally to make retroactive changes to, or require refunds for, rates that have been allowed to go into effect.

Should you have any questions concerning UGIU's response, please direct your questions to [redacted], or me, at [redacted].

Sincerely,

[redacted]

Controller

INTRODUCTION

UGI Utilities, Inc. ("UGIU" or "the Company") hereby submits the following Implementation Plan ("Plan") in response to the Division of Audits and Accounting ("DAA") within the Office of Enforcement ("OE") of the Federal Energy Regulatory Commission's ("FERC") audit covering the period January 1, 2017 through July 29, 2020.

The Plan is organized to address each finding and recommendation contained in the OE'S audit report dated January 14, 2021. For each finding, the Plan states the Company's response, and for each recommendation, the Plan states the action to be taken, the individual responsible, and the expected completion date.

TABLE OF CONTENTS

UGI UTILITIES, INC.
IMPLEMENTATION PLAN FOR
FEDERAL ENERGY REGULATOR COMMISSION AUDIT
OFFICE OF ENFORCEMENT DOCKET NO. FA20-3-000

1. EXCESS ACCUMULATED DEFERRED INCOME TAX

UGIU improperly recorded the excess Accumulated Deferred Income Taxes (ADIT) related to the 2017 Tax Cuts and Jobs Act in Account 282, Accumulated Deferred Income Taxes – Other Property and Account 190, Accumulated Deferred Income Taxes. In addition, UGIU improperly excluded excess and deficient ADIT, created as a result of the 2017 Tax Cuts and Jobs Act, from its wholesale transmission formula rate computation. As a result, UGIU overstated its annual transmission revenue requirement by approximately $357,476 and overbilled wholesale transmission customers in 2018.

UGIU Response

UGIU accepts this finding and the recommendations.

RECOMMENDATION NO. 1

Implement procedures to ensure that deficient and excess ADIT asset and liability amounts are included in rate base for the computation of the annual transmission revenue requirement.

Action: On May 15, 2020, UGIU submitted an Order No. 864 Compliance Filing making updates to its formula rate to encompass the impacts of the TCJA relates to such items as excess ADIT and its subsequent amortization. Further, in filing its 2019 FERC formula rate, the Company included the excess ADIT in its wholesale transmission formula rate computation. Lastly, the Company made correcting entries to reclass the deferred tax asset associated with the excess ADIT from account 190 to account 282.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: Completed

RECOMMENDATION NO. 2

Revise its accounting policies and procedures to ensure that the effect of changes in tax laws or tax rates are implemented in accordance with the Commission’s accounting guidance in Docket No. AI93-5.

Action: UGIU will internally develop and deliver training to its staff to ensure that the effect of changes in tax laws or tax rates are implemented in accordance with the Commission’s accounting guidance. In addition, UGIU will formalize future periodic training with internal and external counsel to ensure that the proper accounting individuals are knowledgeable on any FERC accounting and tax updates.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: The internal training will be conducted by May 15, 2021. The training with counsel will be conducted within 12 months of issuance of the audit report.

RECOMMENDATION NO. 3

Submit correcting journal entries, within 60 days of issuance of this audit report, with proposed accounting entries and supporting documentation to DAA that reflect corrections to recorded excess and deficient ADIT in the appropriate USofA accounts.

Action: UGIU will submit correcting journal entries reflecting corrections to recorded excess and deficient ADIT in the appropriate USofA accounts to DAA.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 4

Submit a refund analysis, within 60 days of issuance of the audit report, to DAA for review that explains and details the following: (1) calculation of refunds that include the amount of excess and deficient ADIT asset and liability amounts excluded from the transmission formula rates in 2018, plus interest; (2) determinative components of the refund; (3) refund method; and (4) period(s) refunds will be made.

Action: UGIU will complete and submit a refund analysis to DAA that explains and details all items listed in recommendation no. 4.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 5

File a refund report with the Commission after receiving DAA’s assessment of the refund analysis.

Action: UGIU will file a consolidated refund report with the Commission after receiving DAA’s assessment of the submitted refund analysis.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: Within 60 days of receiving DAA's assessment of the submitted refund analysis.

RECOMMENDATION NO. 6

Refund amounts disclosed in the refund report to wholesale transmission customers with interest calculated in accordance with section 35.19a of the Commission's regulations.

Action: UGIU will refund amounts disclosed in the refund report as specified in recommendation no. 6.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: Amounts will be refunded as a reduction of UGIU's transmission rates, reflected in its first formula rate filing following the filing of the related refund report.

2. ALLOWANCE FOR FUNDS USED DURING CONSTRUCTION

UGIU's method for computing its AFUDC rate was deficient. Specifically, UGIU improperly excluded short-term debt, as the first source of financing construction, in calculating its AFUDC rate. In addition, UGIU improperly included Account 216.1, Unappropriated Undistributed Subsidiary Earnings, and Account 219, Accumulated Other Comprehensive Income, in the equity component to compute its AFUDC rate. Also, UGIU improperly used its fiscal year-end book balance for long-term debt and common equity amounts when computing its AFUDC rate rather than the calendar year-end balances reported in its FERC Form No. 1 during the audit period. As a result, UGIU overaccrued AFUDC amounts included in utility plant accounts by approximately $436,000 from 2017 to 2019 and overbilled wholesale transmission customers.

<u>UGIU Response</u>

UGIU accepts this finding and the recommendations. The Company has calculated the overaccrued amount related to transmission customers to be approximately $58,000.

RECOMMENDATION NO. 7

Revise and implement procedures to ensure that AFUDC rate calculations are consistent with Order Nos. 561 and 561-A, EPI No. 3 (A)(17), and other applicable Commission requirements.

Action: During 2019, UGIU revised its procedures to ensure that the AFUDC rate calculations are consistent with applicable Commission requirements.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: Completed

RECOMMENDATION NO. 8

Revise its procedures to ensure that it includes short-term debt in the computation of the AFUDC rate for its electric utility business.

Action: During 2019, UGIU revised its procedures to ensure that short-term debt is included in the computation of the AFUDC rate for its electric utility business.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: Completed

RECOMMENDATION NO. 9

Revise its procedures to exclude Account 216.1 and Account 219 balances from the equity components used to derive its AFUDC rate.

Action: During 2019, UGIU revised its procedures to exclude Account 216.1 and Account 219 balances from the equity components used to derive its AFUDC rate.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: Completed

RECOMMENDATION NO. 10

Revise its procedures to ensure that it computes AFUDC rates using the calendar year-end balances reported in its FERC Form No. 1 for common equity, preferred stock, and long-term debt.

Action: UGIU will file a request for waiver to continue its practice of using its fiscal year-end balances for common equity, preferred stock and long-term debt balances in its AFUDC rate computation.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: December 31, 2021

UGI UTILITIES, INC.
IMPLEMENTATION PLAN FOR
FEDERAL ENERGY REGULATOR COMMISSION AUDIT
OFFICE OF ENFORCEMENT DOCKET NO. FA20-3-000

RECOMMENDATION NO. 11

Provide training to its staff on the revised procedures implemented under Recommendation Nos. 7, 8, 9, and 10. Provide periodic training in these areas as needed.

Action: UGIU will internally develop and deliver training to its staff on the revised procedures implemented under Recommendation Nos. 7, 8, 9, and 10. In addition, UGIU will formalize future periodic training with internal and external counsel to ensure that the proper accounting individuals are knowledgeable on any FERC accounting and tax updates.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: The internal training will be conducted by May 15, 2021. The training with counsel will be conducted within 12 months of issuance of the audit report.

RECOMMENDATION NO. 12

Recalculate its accrued AFUDC, in a manner consistent with EPI No. 3(A)(17) that corrects for the improper exclusion of short-term debt, improper inclusion of Account 216.1 and 219 balances, and improper use of fiscal year-end book balances for common equity, preferred stock, and long-term debt from 2012 through the date of issuance of the audit report.

Action: UGIU will recalculate its accrued AFUDC, as specified in recommendation no. 12.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 13

Submit proposed accounting entries and supporting documentation to DAA that reflect the correction of the CWIP, electric plant in service, accumulated depreciation, ADIT, and other accounts impacted by over-accrual of AFUDC within 60 days of issuance of the audit report.

Action: UGIU will submit proposed accounting entries and supporting documentation as specified in recommendation no. 13 to DAA.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: March 15, 2021

UGI UTILITIES, INC.
IMPLEMENTATION PLAN FOR
FEDERAL ENERGY REGULATOR COMMISSION AUDIT
OFFICE OF ENFORCEMENT DOCKET NO. FA20-3-000

RECOMMENDATION NO. 14

Submit a refund analysis, within 60 days of issuance of the audit report, to DAA for review that explains and details the following: (1) calculation of refunds that include the amount of excess AFUDC included in the transmission formula rates since 2017, plus interest; (2) determinative components of the refund; (3) refund method; and (4) period(s) refunds will be made.

Action: UGIU will complete and submit a refund analysis to DAA that explains all items listed in recommendation no. 14.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 15

Revise CWIP, electric plant in service, accumulated depreciation, ADIT, and other accounts impacted by over-accrual of AFUDC after receiving DAA's assessment of the proposed accounting entries per Recommendation No. 13 and restate and footnote the FERC Form No. 1 for current and comparative years as necessary.

Action: UGIU will revise CWIP, electric plant in service, accumulated depreciation, ADIT, and other accounts impacted by over-accrual of AFUDC and restate and footnote the FERC Form No. 1 for current and comparative years as necessary.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: FERC Form No. 1 will be updated as necessary as described in recommendation No. 15 in the Company's first FERC Form No. 1 dated after the receipt of the DAA's assessment of the submitted proposed accounting entries.

RECOMMENDATION NO. 16

File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

Action: UGIU will file a consolidated refund report with the Commission after receiving DAA's assessment of the submitted refund analysis.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: Within 60 days of receiving DAA's assessment of the submitted refund analysis.

RECOMMENDATION NO. 17

Refund the amounts disclosed in the refund report to wholesale customers, with interest calculated in accordance with section 35.19a of Commission regulations.

Action: UGIU will refund amounts disclosed in the refund report as specified in recommendation no. 17.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: Amounts will be refunded as a reduction of UGIU's transmission rates, reflected in its first formula rate filing following the filing of the related refund report.

3. POSTRETIREMENT BENEFITS OTHER THAN PENSIONS

UGIU improperly included ADIT related to SFAS 106, Employers' Accounting for Postretirement Benefits Other Than Pensions, as an input to its wholesale transmission formula rate contrary to the directives of its tariff. As a result, UGIU overstated the ADIT balances included in its wholesale transmission formula rate, which led to overstating its annual transmission revenue requirements and overbilling its wholesale transmission customers.

UGIU Response

UGIU accepts this finding and the recommendations.

RECOMMENDATION NO. 18

Revise and implement procedures, policies, and controls to track and review the transmission formula rate inputs and calculations for accuracy, completeness, and compliance with UGIU's Commission approved formula rate.

Action: UGIU corrected this inadvertent formula error in filing its 2020 FERC formula rate.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: Completed

UGI UTILITIES, INC.
IMPLEMENTATION PLAN FOR
FEDERAL ENERGY REGULATOR COMMISSION AUDIT
OFFICE OF ENFORCEMENT DOCKET NO. FA20-3-000

RECOMMENDATION NO. 19

Provide training to staff on the revised wholesale transmission formula rate procedures. Also, develop a training program that supports the provision of periodic training in this area, as needed.

Action: UGIU will internally develop and deliver training to its staff on the revised wholesale transmission formula rate procedures. In addition, UGIU will formalize future periodic training with internal and external counsel to ensure that the proper accounting individuals are knowledgeable on any FERC accounting and tax updates.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: The internal training will be conducted by May 15, 2021. The training with counsel will be conducted within 12 months of issuance of the audit report.

RECOMMENDATION NO. 20

Submit a refund analysis to DAA, within 60 days of issuance of this audit report, that explains and details the following: (1) calculation of refunds that include the amount of inappropriate recoveries during the audit period that resulted from the inclusion SFAS 106 amounts plus interest; (2) determinative components of the refund; (3) refund method; and (4) period(s) refunds will be made.

Action: UGIU will complete and submit a refund analysis to DAA that explains and details all items listed in recommendation no. 20.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 21

File a refund report with the Commission after receiving DAA's assessment of the refund analysis.
Action: UGIU will file a consolidated refund report with the Commission after receiving DAA's assessment of the submitted refund analysis.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: Within 60 days of receiving DAA's assessment of the submitted refund analysis.

RECOMMENDATION NO. 22

Refund the amounts disclosed in the refund report to wholesale transmission customers with interest calculated in accordance with section 35.19a of the Commission's regulations.

Action: UGIU will refund amounts disclosed in the refund report as specified in recommendation no. 22.

Individual Responsible: Senior Manager Natural Gas Tax Accounting

Expected Completion Date: Amounts will be refunded as a reduction of UGIU's transmission rates, reflected in its first formula rate filing following the filing of the related refund report.

4. COMMON PLANT O&M EXPENSES

UGIU improperly included common plant O&M expenses, that were also included as A&G expenses, in its wholesale transmission formula rate. As a result, UGIU double counted expenses associated with common plant, and consequently, overstated its wholesale transmission revenue requirement by approximately $423,454 during the audit period. This led UGIU to overbill its wholesale transmission customers.

<u>UGIU Response</u>

UGIU accepts this finding and the recommendations.

RECOMMENDATION NO. 23

Develop and implement procedures, policies, and controls to ensure expenses included in the transmission formula rate are not included in multiple areas.

Action: UGIU will develop and implement procedures, policies, and controls, focusing on coding of the Company's natural chart of accounts, mapping to the FERC chart of accounts, and how those amounts are inputted to the Company's formula rate. This will ensure expenses included in the transmission formula rate are not included in multiple areas.

Individual Responsible: Assistant Controller

Expected Completion Date: May 15, 2021

UGI UTILITIES, INC.
IMPLEMENTATION PLAN FOR
FEDERAL ENERGY REGULATOR COMMISSION AUDIT
OFFICE OF ENFORCEMENT DOCKET NO. FA20-3-000

RECOMMENDATION NO. 24

Provide training to staff on the revised transmission formula rate procedures. Also, develop a training program that supports the provision of periodic training in this area, as needed.

Action: UGIU will internally develop and deliver training to its staff on the revised transmission formula rate procedures. In addition, UGIU will formalize future periodic training with internal and external counsel to ensure that the proper accounting individuals are knowledgeable on any FERC accounting and tax updates.

Individual Responsible: Assistant Controller

Expected Completion Date: The internal training will be conducted by May 15, 2021. The training with counsel will be conducted within 12 months of issuance of the audit report.

RECOMMENDATION NO. 25

Submit a refund analysis, within 60 days of issuance of this audit report, to DAA for review that explains and details the following: (1) calculation of refunds to UGIU's wholesale transmission customers since 2017, plus interest; (2) determinative components of the refund; (3) refund method; and (4) period(s) for which refunds will be made.

Action: UGIU will complete and submit a refund analysis to DAA that explains and details all items listed in recommendation no. 25.

Individual Responsible: Assistant Controller

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 26

File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

Action: UGIU will file a consolidated refund report with the Commission after receiving DAA's assessment of the submitted refund analysis.

Individual Responsible: Assistant Controller

Expected Completion Date: Within 60 days of receiving DAA's assessment of the submitted refund analysis.

UGI UTILITIES, INC.
IMPLEMENTATION PLAN FOR
FEDERAL ENERGY REGULATOR COMMISSION AUDIT
OFFICE OF ENFORCEMENT DOCKET NO. FA20-3-000

RECOMMENDATION NO. 27

Refund the amounts disclosed in the refund report to wholesale transmission customers with interest calculated in accordance with section 35.19a of the Commission's regulations.
Action: UGIU will refund amounts disclosed in the refund report as specified in recommendation no. 27.

Individual Responsible: Assistant Controller

Expected Completion Date: Amounts will be refunded as a reduction of UGIU's transmission rates, reflected in its first formula rate filing following the filing of the related refund report.

5. TRANSMISSION REVENUE CREDITS

UGIU understated its revenue credits that were used to reduce the annual transmission revenue requirements calculated by its wholesale transmission formula rate by improperly excluding certain transmission- related revenues recorded in Account 454, Rent from Electric Property. Additionally, UGIU improperly accounted for rental revenue associated with third parties' usage of its utility assets by recording such revenue in Account 418, Nonoperating Rental Income. As a result, UGIU understated the revenue credits includible in its wholesale transmission formula rate, which led to an overstatement of its annual transmission revenue requirements.

UGIU Response

UGIU accepts this finding and the recommendations.

RECOMMENDATION NO. 28

Develop and implement procedures and policies to track, report, review, and account for wholesale transmission revenues consistent with Commission accounting and ratemaking requirements.

Action: UGIU will develop and implement procedures and policies to track, report, review, and account for wholesale transmission revenues consistent with Commission accounting and ratemaking requirements. This will include proper identification of wholesale transmission revenues at recognition and adjustments to the coding, as necessary, as well as review checks to ensure that all revenues are recorded to the proper FERC accounts.

Individual Responsible: Assistant Controller

Expected Completion Date: May 15, 2021

UGI UTILITIES, INC.
IMPLEMENTATION PLAN FOR
FEDERAL ENERGY REGULATOR COMMISSION AUDIT
OFFICE OF ENFORCEMENT DOCKET NO. FA20-3-000

RECOMMENDATION NO. 29

Provide training to staff on the revised accounting and wholesale transmission revenue procedures. Also, develop a training program that supports the provision of periodic training in this area, as needed.

Action: UGIU will internally develop and deliver training to its staff on the revised accounting and wholesale transmission formula rate procedures. In addition, UGIU will formalize future periodic training with internal and external counsel to ensure that the proper accounting individuals are knowledgeable on any FERC accounting and tax updates.

Individual Responsible: Assistant Controller

Expected Completion Date: The internal training will be conducted by May 15, 2021. The training with counsel will be conducted within 12 months of issuance of the audit report.

RECOMMENDATION NO. 30

Perform an analysis of rental income accounts to identify revenues that were not properly credited to wholesale transmission customers through UGIU's transmission formula rates for the audit period. Provide the results of the analysis to audit staff within 60 days of the date of issuance of the audit report.

Action: UGIU will perform and submit the results of the analysis of rental income as specified in recommendation no. 30 to audit staff.

Individual Responsible: Assistant Controller

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 31

Submit a refund analysis to DAA, within 60 days of receiving the audit report, that explains and details the following: (1) calculation of refunds that include the amount of inappropriate recoveries during the audit period that resulted from the exclusion of revenue credits plus interest; (2) determinative components of the refund; (3) refund method; (4) period(s) refunds will be made.

Action: UGIU will complete and submit a refund analysis to DAA that explains and details all items listed in recommendation no. 31.

Individual Responsible: Assistant Controller

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 32

File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

Action: UGIU will file a consolidated refund report with the Commission after receiving DAA's assessment of the submitted refund analysis.

Individual Responsible: Assistant Controller

Expected Completion Date: Within 60 days of receiving DAA's assessment of the submitted refund analysis.

RECOMMENDATION NO. 33

Refund the amounts disclosed in the refund report to wholesale transmission customers with interest calculated in accordance with section 35.19a of the Commission's regulations.
Action: UGIU will refund amounts disclosed in the refund report as specified in recommendation no. 33.

Individual Responsible: Assistant Controller

Expected Completion Date: Amounts will be refunded as a reduction of UGIU's transmission rates, reflected in its first formula rate filing following the filing of the related refund report.

6. ACCOUNTING FOR AFFILIATE TRANSACTIONS

UGIU misclassified various expenses associated with services provided by its parent company in Account 923, Outside Services Employed. Also, UGIU did not consistently apply its internally calculated, cost allocation percentages used to allocate costs between UGIU's electric utility business and its gas utility business. These allocation errors resulted in improper amounts being included in UGIU's wholesale transmission formula rate.

UGIU Response

UGIU accepts this finding and the recommendations.

RECOMMENDATION NO. 34

Revise and implement procedures and policies to track, report, review, and account for UGI Corporation allocated expenses consistent with Commission accounting requirements.

Action: UGIU will revise and implement procedures and policies to track, report, review, and account for UGI Corporation allocated expenses consistent with Commission accounting requirements. This will include getting detail of all allocated expenses and properly assigning those to respective FERC accounts.

Individual Responsible: Assistant Controller

Expected Completion Date: May 15, 2021

RECOMMENDATION NO. 35

Revise and implement procedures, policies and controls to ensure the correct allocation factors are used to calculate and allocate common expenses recorded in the A&G accounts for the electric utility business.

Action: UGIU has revised its procedures, policies and controls to ensure the correct allocation factors are used to calculate and allocate common expenses recorded in the A&G accounts for the electric utility business. With the Company's implementation of a new ERP system, SAP, in July of 2019, employees are instructed to code common A&G costs to shared cost centers, which are then systematically allocated to the electric utility business based on the Company's annual MWF allocation. No manual allocation should be completed going forward. This methodology is also documented in UGIU's updated 2020 Cost Allocation Manual. Accounting also performs periodic checks to ensure that all costs coded to the shared cost centers are properly allocated.

Individual Responsible: Assistant Controller

Expected Completion Date: Completed

RECOMMENDATION NO. 36

Train staff on the procedures and policies and provide periodic training, as needed.

Action: UGIU will internally develop and deliver training to its staff specifying how UGI Corporation allocated expenses and UGIU common expenses should be coded to ensure that they are properly allocated and consistent with the Commission accounting requirements. In addition, UGIU will formalize future periodic training with internal and external counsel to ensure that the proper accounting individuals are knowledgeable on any FERC accounting and tax updates.

Individual Responsible: Assistant Controller

Expected Completion Date: The internal training will be conducted by May 15, 2021. The training with counsel will be conducted within 12 months of issuance of the audit report.

RECOMMENDATION NO. 37

Perform an analysis of A&G expense accounts to identify common expenses that were allocated using the incorrect allocation percentages during the audit period. Provide the results of the analysis to audit staff within 60 days of the date of issuance of the audit report.

Action: In conjunction with its response to recommendation no. 43, UGIU will perform an analysis of A&G expense accounts to identify expenses that were incorrectly allocated or improperly recorded. UGIU's analysis will consist of a reasonable sample of A&G expenses during the audit period. UGIU will submit the results of the analysis of A&G expense accounts to audit staff.

Individual Responsible: Assistant Controller

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 38

Submit a refund analysis to DAA, within 60 days of receiving the audit report, that explains and details the following: (1) calculation of refunds that include the amount of inappropriate recoveries during the audit period that resulted from the improper allocation of common expenses recorded in A&G accounts as identified pursuant to the analysis performed in response to Recommendation No. 43, plus interest; (2) determinative components of the refund; (3) refund method; and (4) period(s) refunds will be made.

Action: UGIU will complete and submit a refund analysis to DAA that explains and details all items listed in recommendation no. 38.

Individual Responsible: Assistant Controller

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 39

File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

Action: UGIU will file a consolidated refund report with the Commission after receiving DAA's assessment of the submitted refund analysis.

Individual Responsible: Assistant Controller

Expected Completion Date: Within 60 days of receiving DAA's assessment of the submitted refund analysis.

RECOMMENDATION NO. 40

Refund the amounts disclosed in the refund report to wholesale transmission customers with interest calculated in accordance with section 35.19a of the Commission's regulations.
Action: UGIU will refund amounts disclosed in the refund report as specified in recommendation no. 40.

Individual Responsible: Assistant Controller

Expected Completion Date: Amounts will be refunded as a reduction of UGIU's transmission rates, reflected in its first formula rate filing following the filing of the related refund report.

7. ACCOUNTING FOR ADMINISTRATIVE AND GENERAL EXPENSES

UGIU improperly recorded various A&G expenses in a manner contrary to the Commission's accounting regulations. As a result, UGIU overbilled wholesale transmission customers.

UGIU Response

UGIU accepts this finding and the recommendations.

RECOMMENDATION NO. 41

Revise policies and procedures to ensure that UGIU properly accounts for expenditures in its books and records.

Action: UGIU will revise its policies and procedures to ensure that expenditures are properly accounted for. This will include proper coding of invoices, as well as policies to periodically review the Company's mapping from its natural chart of accounts to the FERC chart of accounts.

Individual Responsible: Assistant Controller

Expected Completion Date: May 15, 2021

RECOMMENDATION NO. 42

Provide training to its staff on the revised procedures for properly accounting for expenditures in UGIU's books and records. Also, develop a training program that supports the provision of periodic training in this area, as needed.

Action: UGIU will internally develop and deliver training to its staff on the revised procedures for properly accounting for expenditures in UGIU's books and records. In addition, UGIU will formalize future periodic training with internal and external counsel to ensure that the proper accounting individuals are knowledgeable on any FERC accounting and tax updates.

Individual Responsible: Assistant Controller

Expected Completion Date: The internal training will be conducted by May 15, 2021. The training with counsel will be conducted within 12 months of issuance of the audit report.

RECOMMENDATION NO. 43

Perform an analysis of A&G expense accounts to identify expenses that were inappropriately recovered through UGIU's transmission formula rate and the related customer billings, such as advertising, donations, lobbying, distribution O&M costs, legal costs, and asset insurance improperly charged to accounts included in the transmission formula rate during the audit period. Provide the results of the analysis to audit staff within 60 days of the date of issuance of the audit report.

Action: In conjunction with its response to recommendation no. 37, UGIU will perform an analysis of A&G expense accounts to identify expenses that were incorrectly allocated or improperly recorded. UGIU's analysis will consist of a reasonable sample of A&G expenses during the audit period. UGIU will submit the results of the analysis of A&G expense accounts to audit staff.

Individual Responsible: Assistant Controller

Expected Completion Date: March 15, 2021

UGI UTILITIES, INC.
IMPLEMENTATION PLAN FOR
FEDERAL ENERGY REGULATOR COMMISSION AUDIT
OFFICE OF ENFORCEMENT DOCKET NO. FA20-3-000

RECOMMENDATION NO. 44

Submit a refund analysis to DAA, within 60 days of receiving the audit report, that explains and details the following: (1) calculation of refunds that include the amount of inappropriate recoveries during the audit period that resulted from the improper accounting for expenses recorded in A&G accounts as identified pursuant to the analysis performed in response to Recommendation No. 43, plus interest; (2) determinative components of the refund; (3) refund method; and (4) period(s) refunds will be made.

Action: UGIU will complete and submit a refund analysis to DAA that explains and details all items listed in recommendation no. 44.

Individual Responsible: Assistant Controller

Expected Completion Date: March 15, 2021

RECOMMENDATION NO. 45

File a refund report with the Commission after receiving DAA's assessment of the refund analysis.

Action: UGIU will file a consolidated refund report with the Commission after receiving DAA's assessment of the submitted refund analysis

Individual Responsible: Assistant Controller

Expected Completion Date: Within 60 days of receiving DAA's assessment of the submitted refund analysis.

RECOMMENDATION NO. 46

Refund the amounts disclosed in the refund report to wholesale transmission customers with interest calculated in accordance with section 35.19a of the Commission's regulations.

Action: UGIU will refund amounts disclosed in the refund report as specified in recommendation no. 46.

Individual Responsible: Assistant Controller

Expected Completion Date: Amounts will be refunded as a reduction of UGIU's transmission rates, reflected in its first formula rate filing following the filing of the related refund report.

8. FILING OF DEPRECIATION RATES WITH THE COMMISSION

UGIU did not file its depreciation rate schedule with the Commission when depreciation rates were changed. This hindered the Commission's and other interested parties' ability to timely review and monitor UGIU's depreciation rates, which impact prices charged for wholesale transmission services through the formula rate.

UGIU Response

UGIU accepts this finding and the recommendations.

RECOMMENDATION NO. 47

Develop and implement processes and procedures to ensure that depreciation rates and related studies are filed with the Commission when depreciation rates are changed.

Action: UGIU will develop and implement a process to ensure that depreciation rates and related studies are filed with the Commission when depreciation rates are changed.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: May 15, 2021

RECOMMENDATION NO. 48

File current depreciation studies with the Commission relating to UGIU's current annual transmission revenue requirement within 60 days of issuance of this audit report.

Action: UGIU will file current depreciation studies with the Commission relating to UGIU's current annual transmission revenue requirement.

Individual Responsible: Senior Manager, SOX, Plant Accounting & AP

Expected Completion Date: March 15, 2021

9. FERC FORM NO. 1 REPORTING

UGIU did not properly follow the FERC Form No. 1 instructions and, therefore, did not report all required information in its FERC Form No. 1 filings.

UGIU Response

UGIU accepts this finding and the recommendations.

RECOMMENDATION NO. 49

Revise and strengthen documented policies, procedures, and practices to ensure information reported in the FERC Form No. 1 is correct, accurate, and consistent with the instructions of the form.

Action: UGIU will revise and strengthen policies, procedures, and practices to ensure information reported in the FERC Form No. 1 is correct, accurate and consistent with the instructions.

Individual Responsible: Assistant Controller

Expected Completion Date: Time of filing UGIU's December 31, 2020 FERC Form No. 1.

RECOMMENDATION NO. 50

Provide training to staff on the revised FERC Form No. 1 policies, procedures, and practices. Also, develop a training program that supports the provision of periodic training in this area, as needed.

Action: UGIU will internally develop and deliver training to its staff on the revised FERC Form No. 1 policies, procedures, and practices. In addition, UGIU will formalize future periodic training with internal and external counsel to ensure that the proper accounting individuals are knowledgeable on any FERC accounting and tax updates.

Individual Responsible: Assistant Controller

Expected Completion Date: The internal training will be conducted by May 15, 2021. The training with counsel will be conducted within 12 months of issuance of the audit report.

SDR-RR-38

Request:

Please provide a copy of the Company's most recent SFAS 106 plan actuarial study.

Response:

UGI Gas' most recent SFAS 106 plan actuarial studies were conducted at the end of Fiscal Year 2021. Please refer to Attachment SDR-RR-38 for a copy of the reports issued as a result of these studies.

ACCOUNTING VALUATION RESULTS FOR UGI UTILITIES POSTRETIREMENT WELFARE PLAN

This letter provides the fiscal 2021 valuation results under ASC 715-60 for the UGI Utilities, Inc. Postretirement Welfare Plan. The valuation results are based on participant census data collected as of January 1, 2021 and VEBA trust assets as of September 30, 2020 provided by UGI.

These valuation results are used to measure the postretirement welfare accounting expense (income) for the 2021 fiscal year (October 1, 2020 to September 30, 2021).

POSTRETIREMENT WELFARE PLAN EXPENSE (INCOME)

Below is a summary of expense (income) for fiscal 2021 by company compared to fiscal 2020.

Company	2021 Fiscal Year	2020 Fiscal Year
Holding Company	$ 22,690	$ 20,299
Utilities	(232,758)	(419,066)
Enterprises	264	319
TOTAL ACCOUNTING EXPENSE (INCOME)	**$ (209,804)**	**$ (398,448)**

The results for fiscal 2021 yield an increase in postretirement welfare expense (decrease in income) of approximately $190,000. The primary reason for this change is the expiration of approximately $225,000 in prior service credit amortizations in fiscal 2021.

The fiscal 2021 income slightly increased from the budget estimate of $(196,000) prepared for UGI in November 2020 primarily due to modest actuarial gains in service cost from demographic experience.

Details of the 2021 postretirement welfare expense results by reporting segment are provided below.

Valuation Results by Company as of October 1, 2020 (Fiscal 2021 Expense)

	Holding Company	Utilities	Enterprises	Total
Accumulated Postretirement Benefit Obligation (APBO):				
▪ Medical	$ 0	$ 179,015	$ 0	$ 179,015
▪ Life Insurance	1,108,978	9,685,875	38,153	10,833,006
▪ Total	$ 1,108,978	$ 9,864,890	$ 38,153	$ 11,012,021
Postretirement Welfare Expense				
▪ Service Cost	$ 11,094	$ 127,645	$ 0	$ 138,739
▪ Interest Cost	33,091	293,762	1,127	327,980
▪ EROA	(21,495)	(635,891)	0	(657,386)
▪ Amortization of Transition Obligation	0	0	0	0
▪ Amortization of Prior Service Cost	0	(18,274)	(863)	(19,137)
▪ Amortization of (Gains)/Losses	0	0	0	0
Net Accounting Cost	$ 22,690	$(232,758)	$ 264	$(209,804)

DEMOGRAPHICS

The total number of retirees, surviving spouses, and dependents with medical coverage dropped from 76 to 62 during 2020.

The following is the breakdown of retiree medical participants (all are post-65):

Retirees and Surviving Spouses	Dependents	Total
43	19	62

The following is the breakdown of life insurance participants:

Active	490
Retiree	547
Total	1,037

INVESTMENT EXPERIENCE

The plan's actual return on assets for the period October 1, 2019 to September 30, 2020 was approximately 11.1%.

ASSUMPTIONS

- Discount rate: 3.00%
- Weighted-average salary increase assumption from age 40 to average retirement age of 3.25%
- Mortality: Pri-2012 blue collar table with rates decreased by 4.9%, projected Scale MP-2019 on a generational basis
- The expected return on VEBA trust assets: 7.10% pre-tax and 5.00% post-tax for fiscal 2021. The medical plan sub-account is subject to UBIT taxation and uses the lower rate. This assumption reflects a portfolio diversified in equities and bonds.

Willis Towers Watson

[redacted]
September 30, 2021

- The health care trend assumption: an initial rate of 6.25% in fiscal 2021 decreasing to a 5.00% in fiscal 2026.

The following assumption changes were reflected in the determination of the postretirement welfare expense for fiscal 2021:

- The valuation discount rate was changed from 3.30% as of October 1, 2019 to 3.00% as of October 1, 2020.
- The assumption for mortality was changed from RP-2014 blue collar table with rates decreased by 5.5%, projected using Scale MP-2018 on a generational basis from 2006 to Pri-2012 blue collar table with rates decreased by 4.9%, projected Scale MP-2019 on a generational basis
- Assumptions for termination and retirement were updated to better reflect plan experience.

Other assumptions remain unchanged from fiscal 2020 and are documented in the October 1, 2019 valuation report.

A comprehensive list of actuarial assumptions including the rationale for key assumptions will be summarized in the 2021 actuarial valuation report which will be available in a few weeks.

PLAN PROVISIONS

There have been no changes in plan provisions since the most recent valuation. A summary of key plan provisions can be found in the October 1, 2019 valuation report.

EXPECTED CLAIMS AND EXPENSES

Total expected claims and expenses (net of retiree contributions) from October 1, 2020 to September 30, 2021 for the retiree welfare plans are as follows:

Expected Company Claims and Expenses for 2021	
UGI Postretirement Medical	$ 30,000
UGI Postretirement Life Insurance	409,000
Total	$439,000

Most of the claims and expenses would be paid (or reimbursed) from the VEBA trust for current and former “non-key” employees. Benefits for any current and former key employees would be paid from company assets.

****

In preparing these results Willis Towers Watson has used the information and data provided to us by UGI. We have relied on all the data and information provided, including plan provisions as being complete and accurate. We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information.

The results contained in this letter are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with any certainty. Certain plan provisions may be approximated or determined to be immaterial and therefore not valued. Assumptions may be made about participant data or other factors. We have made reasonable efforts to ensure that items that are material in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

Actual future experience will differ from the assumptions used in our calculations. As these differences arise, contributions or the cost for accounting purposes will be adjusted in future valuations to take changes into account. If these adjustments become material, they may result in future adjustments to the valuation model.

As required by ASC 715, the actuarial assumptions and methods employed in the development of the pension cost have been selected by the plan sponsor. ASC 715-30-35 requires that each significant assumption "individually represent the best estimate of a particular future event." Willis Towers Watson has concurred with these assumptions and methods.

Accumulated other comprehensive (income)/loss amounts shown in the report are shown prior to adjustment for deferred taxes. Any deferred tax effects in AOCI should be determined in consultation with UGI's tax advisors and auditors. Willis Towers Watson used information supplied by UGI regarding postretirement benefit asset, postretirement benefit liability and amounts recognized in accumulated other comprehensive income as of September 30, 2020. This data was reviewed for reasonableness and consistency, but no audit was performed.

The results contained in this letter have been developed based on actuarial assumptions that, to the extent evaluated or selected by Willis Towers Watson, we consider to be reasonable. Other actuarial assumptions could also be considered to be reasonable. Thus, reasonable results differing from those presented in this report could have been developed by selecting different reasonable assumptions.

The results provided in this letter have been prepared solely for the benefit of UGI to assist with its year-end financial reporting. This email should not be used for other purposes and we accept no responsibility for any such use. It should not be relied upon by, or shared with, any third parties without Willis Towers Watson's prior written consent.

This letter provides actuarial information. It does not constitute legal, accounting, tax or investment advice. We encourage UGI to consult with qualified advisors with respect to those matters.

ASOP 56 DISCLOSURE

Quantify is the Willis Towers Watson centrally developed, tested and maintained Global actuarial valuation system. It is used to perform valuations of clients' benefit plans. Quantify provides the ability to process data, calculate benefits and value benefit liabilities, develop results using applicable standards, and generate client reports. Quantify parameters provide significant flexibility to model populations and plan designs. Various demographic, economic and benefit related assumptions exist for users to model multiple demographic and economic situations.

Plan liabilities are calculated based on standard actuarial techniques, developing actuarially reasonable results using the population and parameters entered The calculation and presentation of liabilities in Quantify relies on the assumptions used and the reasonability of the assumptions selected. Quantify incorporates standard liability methodologies that are intended to reasonably reflect a variety of economic or demographic conditions. The model itself does not evaluate any assumptions entered for reasonableness, consistency or probability of occurrence.

Quantify is designed specifically for these purposes, and we know of no material limitations that would prevent the system from being suitable for these intended purposes. The actuaries signing this report have relied on the actuaries who develop, test and maintain this system, and have also performed a limited review of results to ensure that system parameters have been set appropriately and plan provisions coded correctly.

RATE:Link is a methodology to develop spot rates to be used for measurements related to employee benefit plans. The same core methodology is used to develop all RATE:Link curves. The RATE:Link process develops term structures of interest rates from corporate bond data for each covered market. The construction of RATE:Link yield curves relies on bond data collected as of the measurement date. Information regarding quoted bond prices, yields and other bond related data is from Bloomberg Finance L.P

U.S. BOND:Link is a methodology to assist with the selection of discount rates used in measurements related to employee benefit plans. Discount rates are derived by identifying a theoretical settlement portfolio of high- quality corporate bonds sufficient to provide for a plan’s projected benefit payments. The single interest rate is then determined that results in a discounted value of the plan’s benefit payments that equals the market value of the selected bond portfolio.

Updated BOND:Link models are developed monthly as of the last day of the month. The construction of a BOND:Link model relies on bond data collected as of the measurement date Parameters provide the user the ability to control aspects of the model. The model output allows the user to see the effect of those parameters. Information regarding quoted bond prices, yields and other bond related data is from Bloomberg Finance L.P.

ACCOUNTING VALUATION RESULTS FOR CENTRAL PENN GAS POSTRETIREMENT WELFARE PLAN

This letter contains the Central Penn Gas Postretirement Welfare Plan valuation results for fiscal year 2021 under ASC 715-60. The accounting cost for postretirement welfare benefits decreased from $10,000 in fiscal year 2020 to $(17,618) in fiscal year 2021. The primary reason for the decrease in expense was due to favorable asset experience during fiscal 2020.

The $(17,618) also compares to an estimated cost/(income) of $(17,000) provided in November 2020.

A reconciliation of the cost decrease from fiscal 2020 to fiscal 2021 is as follows:

Fiscal 2020 net periodic benefit cost/(income)	$ 10,000
Expected decrease based on prior valuation	(7,104)
Asset experience	(22,535)
Plan experience losses (gains)	(1,111)
Change in termination and retirement assumptions	(3,734)
Change in mortality	640
Change in discount rate	6,226
Fiscal 2021 net periodic benefit cost	$ (17,618)

The table on the next page below summarizes the participant counts and financial results for the current and prior accounting valuations for Central Penn Gas. Census data as of January 1, 2021 and January 1, 2020 were used for the fiscal 2021 and fiscal 2020 valuations respectively.

ASSUMPTIONS

The fiscal 2021 postretirement welfare expense determined above uses the following assumptions:

- Discount rate: 3.10%
- 3.25% weighted-average salary increase assumption from age 40 to average retirement age
- Health care inflation of 6.25% for fiscal 2021 decreasing to 5.00% in fiscal 2026
- Mortality: Pri-2012 blue collar table with rates decreased by 4.9%, projected Scale MP-2019 on a generational basis
- The expected return on VEBA trust assets: 7.10% pre-tax and 5.00% post-tax for fiscal 2021. The medical plan sub-account is subject to UBIT taxation and uses the lower rate. This assumption reflects a portfolio diversified in equities and bonds.

The following assumption changes were reflected in the determination of the postretirement welfare expense for fiscal 2021:

- The valuation discount rate was changed from 3.30% as of October 1, 2019 to 3.10% as of October 1, 2020.

Willis Towers Watson

- The assumption for mortality was changed from RP-2014 blue collar table with rates decreased by 5.5%, projected using Scale MP-2018 on a generational basis from 2006 to Pri-2012 blue collar table with rates decreased by 4.9%, projected Scale MP-2019 on a generational basis
- Assumptions for termination and retirement were updated to better reflect plan experience.

Other assumptions remain unchanged from fiscal 2020 and are documented in the October 1, 2019 valuation report.

A comprehensive list of actuarial assumptions including the rationale for key assumptions will be summarized in the 2021 actuarial valuation report which will be available in a few weeks.

PLAN PROVISIONS

There have been no changes in plan provisions since the most recent valuation. A summary of key plan provisions can be found in the October 1, 2019 valuation report.

ACCOUNTING VALUATION RESULTS FOR PENN NATURAL GAS POSTRETIREMENT WELFARE PLAN

This letter contains the Penn Natural Gas Postretirement Welfare Plan valuation results for fiscal year 2021 under ASC 715-60. The accounting cost for postretirement welfare benefits increased from $(26,767) in fiscal year 2020 to $(21,054) for fiscal year 2021. The primary reason for the increase in expense (decrease in income) from fiscal 2020 to fiscal 2021 is the decrease in the discount rate of 20 basis points and demographic experience (fewer than expected terminations and deaths).

The actual cost/(income) of $(21,054) compares to an estimated cost/(income) of $(30,000) provided in November 2020.

A reconciliation of the cost decrease from fiscal 2020 to fiscal 2021 is as follows:

Fiscal 2020 net periodic benefit cost/(income)	$ (26,767)
Expected decrease based on prior valuation	(1,174)
Asset experience	(13,390)
Plan experience losses (gains)	8,859
Change in termination and retirement assumptions	1,937
Change in mortality	2,229
Change in discount rate	7,252
Fiscal 2021 net periodic benefit cost/(income)	$ (21,054)

The table on the next page summarizes the participant counts and financial results for the current and prior accounting valuations for The Penn Natural Gas Postretirement Welfare Plan.

ASSUMPTIONS

The fiscal 2021 Postretirement Welfare expense determined above uses the following assumptions:

- Discount rate: 3.30%
- Weighted-average salary increase assumption from age 40 to average retirement age of 3.25%
- Mortality: Pri-2012 blue collar table with rates decreased by 4.9%, projected Scale MP-2019 on a generational basis
- The expected return on VEBA trust assets: 7.10% pre-tax and 5.00% post-tax for fiscal 2021. The medical plan sub-account is subject to UBIT taxation and uses the lower rate. This assumption reflects a portfolio diversified in equities and bonds.

The following assumption changes were reflected in the determination of the postretirement welfare expense for fiscal 2021:

- The valuation discount rate was changed from 3.50% as of October 1, 2019 to 3.30% as of October 1, 2020.
- The assumption for mortality was changed from RP-2014 blue collar table with rates decreased by 5.5%, projected using Scale MP-2018 on a generational basis from 2006 to Pri-2012 blue collar table with rates decreased by 4.9%, projected Scale MP-2019 on a generational basis
- Assumptions for termination and retirement were updated based on the results of an experience study conducted in 2020.

Other assumptions remain unchanged from fiscal 2020 and are documented in the October 1, 2019 valuation report.

Willis Towers Watson

A comprehensive list of actuarial assumptions including the rationale for key assumptions will be summarized in the 2021 actuarial valuation report which will be available in a few weeks.

PLAN CHANGES

There have been no changes in plan provisions since the most recent valuation. A summary of key plan provisions can be found in the October 1, 2019 valuation report.

* * * * *

In preparing these results Willis Towers Watson has used the information and data provided to us by UGI. We have relied on all the data and information provided, including plan provisions as being complete and accurate. We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information.

The results contained in this letter are estimates based on data that may be imperfect and on assumptions about future events that cannot be predicted with any certainty. Certain plan provisions may be approximated or determined to be immaterial and therefore not valued. Assumptions may be made about participant data or other factors. We have made reasonable efforts to ensure that items that are material in the context of the actuarial liabilities or costs are treated appropriately, and not excluded or included inappropriately.

Actual future experience will differ from the assumptions used in our calculations. As these differences arise, contributions or the cost for accounting purposes will be adjusted in future valuations to take changes into account. If these adjustments become material, they may result in future adjustments to the valuation model.

As required by ASC 715, the actuarial assumptions and methods employed in the development of the pension cost have been selected by the plan sponsor. ASC 715-30-35 requires that each significant assumption "individually represent the best estimate of a particular future event." Willis Towers Watson has concurred with these assumptions and methods.

Accumulated other comprehensive (income)/loss amounts shown in the report are shown prior to adjustment for deferred taxes. Quantify incorporates standard liability methodologies that are intended to reasonably reflect a variety of economic or demographic conditions. The model itself does not evaluate any assumptions entered for reasonableness, consistency or probability of occurrence.

Quantify is designed specifically for these purposes, and we know of no material limitations that would prevent the system from being suitable for these intended purposes. The actuaries signing this report have relied on the actuaries who develop, test and maintain this system, and have also performed a limited review of results to ensure that system parameters have been set appropriately and plan provisions coded correctly.

RATE:Link is a methodology to develop spot rates to be used for measurements related to employee benefit plans. The same core methodology is used to develop all RATE:Link curves. The RATE:Link process develops term structures of interest rates from corporate bond data for each covered market.
The construction of RATE:Link yield curves relies on bond data collected as of the measurement date. Information regarding quoted bond prices, yields and other bond related data is from Bloomberg Finance L.P

U.S. BOND:Link is a methodology to assist with the selection of discount rates used in measurements related to employee benefit plans. Discount rates are derived by identifying a theoretical settlement portfolio of high-quality corporate bonds sufficient to provide for a plan's projected benefit payments. The single interest rate is then determined that results in a discounted value of the plan's benefit payments that equals the market value of the selected bond portfolio.

Updated BOND:Link models are developed monthly as of the last day of the month. The construction of a BOND:Link model relies on bond data collected as of the measurement date Parameters provide the user the ability to control aspects of the model. The model output allows the user to see the effect of those parameters. Information regarding quoted bond prices, yields and other bond related data is from Bloomberg Finance L.P.

The undersigned consulting actuaries are members of the Society of Actuaries and meet the "Qualification Standard for Actuaries Issuing Statements of Actuarial Opinion in the United States" relating to pension and other postretirement benefit plans. Our objectivity is not impaired by any relationship between UGI and our employer, Willis Towers Watson.

SDR-RR-39

Request:

Please reconcile the historical and future test year SFAS No. 106 expense levels with the amount identified in the actuarial report.

Response:

Please see Attachment SDR-RR-39 for the schedule reconciling SFAS No. 106 expenses for all three test years.

Prepared by or under the supervision of: Vivian K. Ressler

UGI Utilities, Inc. - Gas Division
Schedule of SFAS No. 106 Expenses

		HTY 9/30/2021	FTY 9/30/2022	FPFTY 9/30/2023
Amortization of Regulatory Liability		$ (974,464)	$ (974,464)	$ (974,464)
Actual/Budget Year Expense/(Income)		(246,160)	(314,694)	(332,832)
Total Actual/Budget Year Expense/(Income)		$ (1,220,624)	$ (1,289,158)	$ (1,307,296)
Actuarial Expense (Income)		$ (246,160)	$ (382,712)	N/A
Difference		$ (974,464)	$ (906,447)	
Reconciling Items:				
Amortization of Regulatory Liability	(1)	$ (974,464)	$ (974,464)	
Actual/Budget Year Expense/(Income)	(2)	-	68,017	
		$ 974,464	$ 906,447	

(1) HTY and FTY expense/(income) includes $974,464 per year of amortization expense for a regulatory liability associated with the over recovery of SFAS 106 costs, which is not part of the actuarial expense (income).

(2) The $68,017 reconciling item for the FTY is the result of the annual budget being prepared (based on an estimate) before the actuarial report totals for the year were available. There is no reconciling difference in the HTY because we record a true-up entry at year end to make our expense/(income) equal to the actuarial report.

SDR-RR-40

Request:

Please identify the actual or projected amounts contributed to SFAS No. 106 funds for the historic and future test years. Identify the actual or projected dates and amounts of the contributions.

Response:

There are no actual or projected SFAS 106 contributions included in the historic, future or fully projected future test years.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-RR-41

Request:

Please explain the funding options or plans which are being used for SFAS No. 106 costs. Identify the portion of the costs which are eligible for tax preferred funding.

Response:

All of the SFAS No. 106 (post-employment plan) costs are funded assets which are held in a tax advantaged VEBA trust.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-RR-42

Request:

Is the Company studying and/or anticipating any changes to its postretirement benefits offered to employees as a result of SFAS No. 106 or for other reasons? If yes, please provide such study and/or explain the anticipated change.

Response:

The Company is not studying or anticipating any changes to its postretirement benefits offered to employees.

Prepared by or under the supervision of: Vivian K. Ressler

SDR-RR-43

Request:

Please state whether the Company has included expenses related to SFAS No. 112 in its test year claim. If so, please provide complete details and include a copy of the actuarial study.

Response:

Yes. However, in accordance with HIPAA guidelines, UGI Gas does not record or track these additional expenses separately from active employee benefit costs. For this reason, UGI Gas does not have the ability to calculate this additional post-employment benefit expense.

The Company's most recent SFAS 112 actuarial study was conducted at the end of Fiscal Year 2021. Refer to Attachment SDR-RR-43 for a copy of the report issued as a result of this study.

UGI FAS 112 VALUATION RESULTS AS OF SEPTEMBER 30, 2021

The purpose of this letter is to provide you with the estimated FAS 112 obligations for UGI Utilities and Penn Natural Gas (PNG) group as of September 30, 2021. Consistent with the September 30, 2020 results, the UGI Utilities results contain the obligations attributable to Central Penn Gas (CPG) participants as well.

Valuation Results

Below is a summary of the estimated FAS 112 obligations as of September 30, 2021 for UGI's short-term disability (STD) income benefit and COBRA continuation of health coverage (long-term disability income, medical and life insurance continuation are estimated by UGI and are not included with the results presented in this letter). In addition, the FAS 112 obligation for PNG is provided for the STD income benefit. Each of the obligations was developed according to the standards of FAS 112, 5 and 43. For comparative purposes the individual plan obligations are shown relative to September 30, 2020 results.

	Obligation as of					
	September 30, 2021			**September 30, 2020**		
Benefit	**Current**	**Non-Current**	**Total**	**Current**	**Non-Current**	**Total**
STD income (UGI+CPG+PNG)	$882,000	$1,477,000	$2,358,000	$820,000	$1,368,000	$2,188,000
COBRA	258,000	0	258,000	236,000	0	236,000
Total	1,140,000	1,477,000	2,616,000	1,056,000	1,368,000	2,424,000

Willis Towers Watson

[redacted]
October 4, 2021

Please note the following regarding this year's valuation results:

Short-term Disability Income Continuation

The UGI+CPG+PNG obligation for the STD income benefit as of September 30, 2021 is $2,358,000 using a 3.0% discount rate; this compares to $2,188,000 as of September 30, 2020 using a 3.0% discount rate.

The liability amount represents the obligation for the STD income benefit to which employees are entitled as years of active service increase. The valuation reflects the costs associated with all future disabilities expected to occur after September 30, 2021. The rates of incidence and duration of STD claims are based on a blend of standard actuarial assumptions and actual experience received from UGI, CPG and PNG.

COBRA Continuation of Health Coverage

This amount represents UGI's obligation for the additional medical expense anticipated from COBRA participants above the 102% of premium UGI collects from COBRA beneficiaries. The projected cost of health coverage is based on UGI's average 2021 cost of providing these benefits for COBRA participants.

George, if you have any questions or need further information, please call us.

Sincerely,

Marc B. Freedman, ASA

Willis Towers Watson

Information Related to Actuarial Standard of Practice No. 56

AGEDIST

AgeDist is a spreadsheet tool that applies relative cost factors by age to average per capita costs (pre and post 65) and census weights to produce age-graded plan costs for pre- and post-65 populations. The average per capita costs and census weights are provided as inputs to the tool which is then combined with a morbidity curve to produce a set of weighted average age-related costs that equal the average. The age-graded costs are used in the actuarial valuation.

The morbidity curve was developed from a broad set of claims data aggregated by age and blended and may not reflect your specific morbidity. The model does not evaluate the average per capita costs or census weights for reasonableness or consistency.

The model(s) used for this analysis is designed specifically for these purposes, and we know of no material limitations that would prevent the model(s) from being suitable for these intended purposes.

We are not aware of any material inconsistencies among assumptions used in this work. The model itself does not evaluate any assumptions entered for reasonableness, consistency or probability of occurrence. The calculation and presentation of results relies on the assumptions used and the reasonability of the assumptions selected. The output of the model(s) used in this analysis are considered reasonable based on the aggregation of assumptions used. However, a different set of results could also be considered reasonable based on a range of possible values used for each assumption.

The individuals signing or delivering this report have relied on other Willis Towers Watson employees and actuaries who develop, test and maintain each of the proprietary models used for this analysis and have also performed a basic review of assumptions and results to ensure that the models have been set up appropriately and coded correctly. We have not relied on any external experts to develop, review, or validate the model(s) used in this analysis

In preparing the results presented in this report, we have relied upon information provided to us regarding plan provisions, plan participants, participant contribution amounts and/or claims data. We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information. The accuracy of the results presented in this report is dependent upon the accuracy and completeness of the underlying information. We are aware of no errors or omissions that would have a significant effect on the results of our calculations.

Quantify

Quantify is the Willis Towers Watson centrally developed, tested and maintained Global actuarial valuation system. It is used to perform valuations of clients' benefit plans. Quantify provides the ability to process data, calculate benefits and value benefit liabilities, develop results using applicable standards, and generate client reports. Quantify parameters provide significant flexibility to model populations and plan designs. Various demographic, economic and benefit related assumptions exist for users to model multiple demographic and economic situations.

Plan liabilities are calculated based on standard actuarial techniques, developing actuarially reasonable results using the population and parameters entered the calculation and presentation of liabilities in Quantify relies on the assumptions used and the reasonability of the assumptions selected. Quantify incorporates standard liability methodologies that are intended to reasonably reflect a variety of economic or demographic conditions. The model itself does not evaluate any assumptions entered for reasonableness, consistency or probability of occurrence.

Quantify is designed specifically for these purposes, and we know of no material limitations that would prevent the system from being suitable for these intended purposes. The actuaries signing this report have relied on the actuaries who develop, test and maintain this system, and have also performed a limited review of results to ensure that system parameters have been set appropriately and plan provisions coded correctly.

RATE:Link

RATE:Link is a methodology to develop spot rates to be used for measurements related to employee benefit plans. The same core methodology is used to develop all RATE:Link curves. The RATE:Link process develops term structures of interest rates from corporate bond data for each covered market. The construction of RATE:Link yield curves relies on bond data collected as of the measurement date. Information regarding quoted bond prices, yields and other bond related data is from Bloomberg Finance L.P

Actuarial Certification

UGI retained Willis Towers Watson to perform a valuation of its postemployment benefit plans in order to determine its postemployment benefit cost in accordance with ASC 712 (formerly FAS 112). This valuation has been conducted in accordance with generally accepted actuarial principles and practices.

The consulting actuaries are members of the Society of Actuaries and other professional actuarial organizations and meet the “Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States” relating to postemployment benefit plans.

In preparing the results presented in this report, we have relied upon information provided to us regarding plan provisions, plan participants, and plan costs. We have reviewed this information for overall reasonableness and consistency, but have neither audited nor independently verified this information. The accuracy of the results presented in this report is dependent upon the accuracy and completeness of the underlying information.

The actuarial assumptions and the accounting policies and methods employed in the development of the postemployment benefit cost have been selected by the plan sponsor, with the concurrence of Willis Towers Watson. ASC 712 requires that each significant assumption “individually represent the best estimate of a particular future event.”

The results shown in this report are reasonable actuarial results. However, a different set of results could also be considered reasonable actuarial results, since the actuarial standards of practice describe a “best-estimate” range for each assumption, rather than a single best-estimate value. Thus, reasonable results differing from those presented in this report could have been developed by selecting different points within the best-estimate ranges for various assumptions.

The information contained in this report was prepared for the internal use of UGI and its auditors in connection with our actuarial valuation of the postemployment benefit plans. It is neither intended nor necessarily suitable for other purposes. UGI may also distribute this actuarial valuation report to the appropriate authorities who have the legal right to require UGI to provide them with this report, in which case UGI will use best efforts to notify Willis Towers Watson of this distribution. Further distribution to, or use by, other parties of all or part of this report is expressly prohibited without Willis Towers Watson’s prior written consent.

Bad Debt	$14,518	Adjusted by applying the three-year historical average uncollectible percentage to adjusted revenues	Schedule D-11
Workers' Compensation	$1,513	No adjustment required (3)	None
Medical	$1,300	No adjustment required (3)	None
Injuries & Damages	$1,668	Adjusted to a three-year historical average	Schedule D-15

(1) Each respective schedule is disclosed in UGI Gas Exhibit A (Historic), Exhibit A (Future) and Exhibit A (Fully Projected).
(2) Refer to the Direct Testimony of Vivian K. Ressler, UGI Gas Statement No. 3 for discussion of the environmental adjustment.
(3) There are no related ratemaking adjustments required, as expenses are budgeted on a normalized basis.

SDR-RR-55

Request:

Please provide a copy of the corporate federal tax returns and supporting schedules for the preceding three years and, if applicable, a copy of the calculation work papers for the Company's consolidated tax savings adjustment.

Response:

UGI Gas is included as part of a consolidated federal income tax return. Since the complete federal tax return is a voluminous document, only excerpts from the preceding three years' returns are provided. Please see Attachment SDR-RR-55 for these excerpts. The complete tax returns are available at UGI Corporation headquarters in King of Prussia, PA.

Please also see the response to II-A-26 for the calculation of a consolidated tax savings adjustment.

Prepared by or under the supervision of: Nicole M. McKinney

Net Income (Loss) Reconciliation for Corporations With Total Assets of $10 Million or More

▶ Attach to Form 1120 or 1120-C.
▶ Go to *www.irs.gov/Form1120* for instructions and the latest information.

OMB No. 1545-0123
2017

Name of corporation (common parent, if consolidated return): UGI Corporation
Employer identification number: 23-2668356

Check applicable box(es): (1) ☐ Non-consolidated return (2) ☐ Consolidated return (Form 1120 only)
(3) ☒ Mixed 1120/L/PC group (4) ☐ Dormant subsidiaries schedule attached

Part I Financial Information and Net Income (Loss) Reconciliation (see instructions)

1 a Did the corporation file SEC Form 10-K for its income statement period ending with or within this tax year?
☒ **Yes.** Skip lines 1b and 1c and complete lines 2a through 11 with respect to that SEC Form 10-K.
☐ **No.** Go to line 1b. See instructions if multiple non-tax-basis income statements are prepared.

b Did the corporation prepare a certified audited non-tax-basis income statement for that period?
☐ **Yes.** Skip line 1c and complete lines 2a through 11 with respect to that income statement.
☐ **No.** Go to line 1c.

c Did the corporation prepare a non-tax-basis income statement for that period?
☐ **Yes.** Complete lines 2a through 11 with respect to that income statement.
☐ **No.** Skip lines 2a through 3c and enter the corporation's net income (loss) per its books and records on line 4a.

2 a Enter the income statement period: Beginning 10/01/2017 Ending 09/30/2018

b Has the corporation's income statement been restated for the income statement period on line 2a?
☐ **Yes.** (If "Yes," attach an explanation and the amount of each item restated.)
☒ **No.**

c Has the corporation's income statement been restated for any of the five income statement periods immediately preceding the period on line 2a?
☐ **Yes.** (If "Yes," attach an explanation and the amount of each item restated.)
☒ **No.**

3 a Is any of the corporation's voting common stock publicly traded?
☒ **Yes.**
☐ **No.** If "No," go to line 4a.

b Enter the symbol of the corporation's primary U.S. publicly traded voting common stock . . . . . UGI

c Enter the nine-digit CUSIP number of the corporation's primary publicly traded voting common stock 902681105

4 a	Worldwide consolidated net income (loss) from income statement source identified in Part I, line 1	**4a**	718,711,691.

Department of the Treasury
Internal Revenue Service

Net Income (Loss) Reconciliation for Corporations With Total Assets of $10 Million or More

▶ Attach to Form 1120 or 1120-C.
▶ Go to *www.irs.gov/Form1120* for instructions and the latest information.

OMB No. 1545-0123
2018

Name of corporation (common parent, if consolidated return): UGI Corporation
Employer identification number: 23-2668356

Check applicable box(es): (1) [ ] Non-consolidated return (2) [ ] Consolidated return (Form 1120 only)
(3) [X] Mixed 1120/L/PC group (4) [ ] Dormant subsidiaries schedule attached

Part I Financial Information and Net Income (Loss) Reconciliation (see instructions)

1 a Did the corporation file SEC Form 10-K for its income statement period ending with or within this tax year?
[X] **Yes.** Skip lines 1b and 1c and complete lines 2a through 11 with respect to that SEC Form 10-K.
[ ] **No.** Go to line 1b. See instructions if multiple non-tax-basis income statements are prepared.

b Did the corporation prepare a certified audited non-tax-basis income statement for that period?
[ ] **Yes.** Skip line 1c and complete lines 2a through 11 with respect to that income statement.
[ ] **No.** Go to line 1c.

c Did the corporation prepare a non-tax-basis income statement for that period?
[ ] **Yes.** Complete lines 2a through 11 with respect to that income statement.
[ ] **No.** Skip lines 2a through 3c and enter the corporation's net income (loss) per its books and records on line 4a.

2 a Enter the income statement period: Beginning 10/01/2018 Ending 09/30/2019

b Has the corporation's income statement been restated for the income statement period on line 2a?
[ ] **Yes.** (If "Yes," attach an explanation and the amount of each item restated.)
[X] **No.**

c Has the corporation's income statement been restated for any of the five income statement periods immediately preceding the period on line 2a?
[ ] **Yes.** (If "Yes," attach an explanation and the amount of each item restated.)
[X] **No.**

3 a Is any of the corporation's voting common stock publicly traded?
[X] **Yes.**
[ ] **No.** If "No," go to line 4a.

b Enter the symbol of the corporation's primary U.S. publicly traded voting common stock: UGI

c Enter the nine-digit CUSIP number of the corporation's primary publicly traded voting common stock: 902681105

4 a	Worldwide consolidated net income (loss) from income statement source identified in Part I, line 1	4a	256,201,950.
b	Indicate accounting standard used for line 4a (see instructions): (1) [X] GAAP (2) [ ] IFRS (3) [ ] Statutory (4) [ ] Tax-basis (5) [ ] Other (specify)		
5 a	Net income from nonincludible foreign entities (attach statement) Stmt. 91.	5a	(25,674,929.
b	Net loss from nonincludible foreign entities (attach statement and enter as a positive amount) Stmt. 91.	5b	68,649,330.
6 a	Net income from nonincludible U.S. entities (attach statement)	6a	( )
b	Net loss from nonincludible U.S. entities (attach statement and enter as a positive amount)	6b	
7 a	Net income (loss) of other includible foreign disregarded entities (attach statement)	7a	
b	Net income (loss) of other includible U.S. disregarded entities (attach statement)	7b	
c	Net income (loss) of other includible entities (attach statement)	7c	
8	Adjustment to eliminations of transactions between includible entities and nonincludible entities (attach statement)	8	
9	Adjustment to reconcile income statement period to tax year (attach statement)	9	
10 a	Intercompany dividend adjustments to reconcile to line 11 (attach statement)	10a	
b	Other statutory accounting adjustments to reconcile to line 11 (attach statement)	10b	
c	Other adjustments to reconcile to amount on line 11 (attach statement) Stmt. 92.	10c	-171,824.
11	**Net income (loss) per income statement of includible corporations.** Combine lines 4 through 10	11	299,004,527.

Note: Part I, line 11, must equal Part II, line 30, column (a), or Schedule M-1, line 1 (see instructions).

12 Enter the total amount (not just the corporation's share) of the assets and liabilities of all entities included or removed on the following lines.

		Total Assets	Total Liabilities
a	Included on Part I, line 4 ▶		
b	Removed on Part I, line 5 ▶		
c	Removed on Part I, line 6 ▶		
d	Included on Part I, line 7 ▶

UGI Corporation & Subsidiaries 23-2668356

Form 1120 (2019) Page 4

Schedule K Other Information (see instructions)

		Yes	No
1	Check accounting method: a [ ] Cash b [X] Accrual c [ ] Other (specify) ▶		
2	See the instructions and enter the:		
a	Business activity code no. ▶ 551112		
b	Business activity ▶ HOLDING COMPANY		
c	Product or service ▶ N/A		
3	Is the corporation a subsidiary in an affiliated group or a parent-subsidiary controlled group? If "Yes," enter name and EIN of the parent corporation ▶		X
4	At the end of the tax year:		
a	Did any foreign or domestic corporation, partnership (including any entity treated as a partnership), trust, or tax-exempt organization own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of the corporation's stock entitled to vote? If "Yes," complete Part I of Schedule G (Form 1120) (attach Schedule G)		X
b	Did any individual or estate own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of the corporation's stock entitled to vote? If "Yes," complete Part II of Schedule G (Form 1120) (attach Schedule G)		X
5	At the end of the tax year, did the corporation:		
a	Own directly 20% or more, or own, directly or indirectly, 50% or more of the total voting power of all classes of stock entitled to vote of any foreign or domestic corporation not included on **Form 851**, Affiliations Schedule? For rules of constructive ownership, see instructions. If "Yes," complete (i) through (iv) below.	X	

(i) Name of Corporation	(ii) Employer Identification Number (if any)	(iii) Country of Incorporation	(iv) Percentage Owned in Voting Stock
See Statement 43			

		Yes	No
b	Own directly an interest of 20% or more, or own, directly or indirectly, an interest of 50% or more in any foreign or domestic partnership (including an entity treated as a partnership) or in the beneficial interest of a trust? For rules of constructive ownership, see instructions. If "Yes," complete (i) through (iv) below.	X	

(i) Name of Entity	(ii) Employer Identification Number (if any)	(iii) Country of Organization	(iv) Maximum Percentage Owned in Profit, Loss, or Capital
See Statement 45			

		Yes	No
6	During this tax year, did the corporation pay dividends (other than stock dividends and distributions in exchange for stock) in excess of the corporation's current and accumulated earnings and profits? See sections 301 and 316. If "Yes," file **Form 5452**, Corporate Report of Nondividend Distributions. See the instructions for Form 5452. If this is a consolidated return, answer here for the parent corporation and on Form 851 for each subsidiary.		X
7	At any time during the tax year, did one foreign person own, directly or indirectly, at least 25% of the total voting power of all classes of the corporation's stock entitled to vote or at least 25% of the total value of all classes of the corporation's stock? For rules of attribution, see section 318. If "Yes," enter: **(a)** Percentage owned ▶ ______ and **(b)** Owner's country ▶ ______ **(c)** The corporation may have to file **Form 5472,** Information Return of a 25% Foreign-Owned U.S. Corporation or a Foreign Corporation Engaged in a U.S. Trade or Business. Enter the number of Forms 5472 attached ▶		X
8	Check this box if the corporation issued publicly offered debt instruments with original issue discount ▶ [ ] If checked, the corporation may have to file **Form 8281,** Information Return for Publicly Offered Original Issue Discount Instruments.		
9	Enter the amount of tax-exempt interest received or accrued during the tax year ▶ $		
10	Enter the number of shareholders at the end of the tax year (if 100 or fewer) ▶		
11	If the corporation has an NOL for the tax year and is electing to forego the carryback period, check here (see instructions) ▶ [ ] If the corporation is filing a consolidated return, the statement required by Regulations section 1.1502-21(b)(3) must be attached or the election will not be valid.		
12	Enter the available NOL carryover from prior tax years (do not reduce it by any deduction reported on page 1, line 29a.) ▶ $		

UGI Corporation & Subsidiaries 23-2668356

Schedule K **Other Information** *(continued from page 4)*

		Yes	No
13	Are the corporation's total receipts (page 1, line 1a, plus lines 4 through 10) for the tax year **and** its total assets at the end of the tax year less than $250,000?		X
	If "Yes," the corporation is not required to complete Schedules L, M-1, and M-2. Instead, enter the total amount of cash distributions and the book value of property distributions (other than cash) made during the tax year ▶ $		
14	Is the corporation required to file Schedule UTP (Form 1120), Uncertain Tax Position Statement? See instructions	X	
	If "Yes," complete and attach Schedule UTP.		
15a	Did the corporation make any payments in 2019 that would require it to file Form(s) 1099?		X
b	If "Yes," did or will the corporation file required Form(s) 1099?		
16	During this tax year, did the corporation have an 80%-or-more change in ownership, including a change due to redemption of its own stock?		X
17	During or subsequent to this tax year, but before the filing of this return, did the corporation dispose of more than 65% (by value) of its assets in a taxable, non-taxable, or tax deferred transaction?		X
18	Did the corporation receive assets in a section 351 transfer in which any of the transferred assets had a fair market basis or fair market value of more than $1 million?		X
19	During the corporation's tax year, did the corporation make any payments that would require it to file Forms 1042 and 1042-S under chapter 3 (sections 1441 through 1464) or chapter 4 (sections 1471 through 1474) of the Code?		X
20	Is the corporation operating on a cooperative basis?		X
21	During the tax year, did the corporation pay or accrue any interest or royalty for which the deduction is not allowed under section 267A? See instructions		X
	If "Yes," enter the total amount of the disallowed deductions ▶ $		
22	Does the corporation have gross receipts of at least $500 million in any of the 3 preceding tax years? (See sections 59A(e)(2) and (3))	X	
	If "Yes," complete and attach Form 8991.		
23	Did the corporation have an election under section 163(j) for any real property trade or business or any farming business in effect during the tax year? See instructions		X
24	Does the corporation satisfy one or more of the following? See instructions	X	
a	The corporation owns a pass-through entity with current, or prior year carryover, excess business interest expense.		
b	The corporation's aggregate average annual gross receipts (determined under section 448(c)) for the 3 tax years preceding the current tax year are more than $26 million and the corporation has business interest expense.		
c	The corporation is a tax shelter and the corporation has business interest expense.		
	If "Yes," to any, complete and attach Form 8990.		
25	Is the corporation attaching Form 8996 to certify as a Qualified Opportunity Fund?		X
	If "Yes," enter amount from Form 8996, line 14 ▶ $

4 Add lines 1, 2, and 3	3,189,838,776.	8 Balance at end of year (line 4 less line 7)	2,909,544,820.

Form 1120 (2019)

SCHEDULE M-3 (Form 1120) (Rev. December 2019) Department of the Treasury Internal Revenue Service

Net Income (Loss) Reconciliation for Corporations With Total Assets of $10 Million or More

▶ Attach to Form 1120 or 1120-C.
▶ Go to *www.irs.gov/Form1120* for instructions and the latest information.

OMB No. 1545-0123

Name of corporation (common parent, if consolidated return): UGI Corporation
Employer identification number: 23-2668356

Check applicable box(es): (1) [ ] Non-consolidated return (2) [ ] Consolidated return (Form 1120 only)
(3) [X] Mixed 1120/L/PC group (4) [ ] Dormant subsidiaries schedule attached

Part I Financial Information and Net Income (Loss) Reconciliation (see instructions)

1 a Did the corporation file SEC Form 10-K for its income statement period ending with or within this tax year?
[X] **Yes.** Skip lines 1b and 1c and complete lines 2a through 11 with respect to that SEC Form 10-K.
[ ] **No.** Go to line 1b. See instructions if multiple non-tax-basis income statements are prepared.

b Did the corporation prepare a certified audited non-tax-basis income statement for that period?
[ ] **Yes.** Skip line 1c and complete lines 2a through 11 with respect to that income statement.
[ ] **No.** Go to line 1c.

c Did the corporation prepare a non-tax-basis income statement for that period?
[ ] **Yes.** Complete lines 2a through 11 with respect to that income statement.
[ ] **No.** Skip lines 2a through 3c and enter the corporation's net income (loss) per its books and records on line 4a.

2 a Enter the income statement period: Beginning 10/01/2019 Ending 09/30/2020

b Has the corporation's income statement been restated for the income statement period on line 2a?
[ ] **Yes.** (If "Yes," attach an explanation and the amount of each item restated.)
[X] **No.**

c Has the corporation's income statement been restated for any of the five income statement periods immediately preceding the period on line 2a?
[ ] **Yes.** (If "Yes," attach an explanation and the amount of each item restated.)
[X] **No.**

3 a Is any of the corporation's voting common stock publicly traded?
[X] **Yes.**
[ ] **No.** If "No," go to line 4a.

b Enter the symbol of the corporation's primary U.S. publicly traded voting common stock: UGI

c Enter the nine-digit CUSIP number of the corporation's primary publicly traded voting common stock: 902681105

4 a	Worldwide consolidated net income (loss) from income statement source identified in Part I, line 1	4a	532,421,711.
b	Indicate accounting standard used for line 4a (see instructions): (1) [X] GAAP (2) [ ] IFRS (3) [ ] Statutory (4) [ ] Tax-basis (5) [ ] Other (specify)		
5 a	Net income from nonincludible foreign entities (attach statement) Stmt. 91.	5a	(38,024,265.)
b	Net loss from nonincludible foreign entities (attach statement and enter as a positive amount) Stmt. 91.	5b	14,158,719.
6 a	Net income from nonincludible U.S. entities (attach statement)	6a	( )
b	Net loss from nonincludible U.S. entities (attach statement and enter as a positive amount)	6b

UGI GAS STATEMENT NO. 1

CHRISTOPHER R. BROWN

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2021-3030218

UGI Utilities, Inc. – Gas Division

Statement No. 1

Direct Testimony of
Christopher R. Brown

Topics Addressed:	**Purpose of Testimony and Rate Filing Overview** **Need for Rate Relief** **COVID-19 Relief Efforts** **Unification of Rates** **UGI-1 Initiative and UNITE** **Auburn Capacity Lease** **Salaries and Wages Adjustments** **Management Performance**

Dated: January 28, 2022

I. INTRODUCTION AND QUALIFICATIONS

Q. Please state your name and business address.

A. My name is Christopher R. Brown. My business address is 1 UGI Drive, Denver, PA 17517.

Q. By whom and in what capacity are you employed?

A. I am employed by UGI Utilities, Inc. ("UGI") as its Vice President and General Manager of Rates and Supply. UGI is a wholly-owned subsidiary of UGI Corporation ("UGI Corp."). UGI has two operating divisions, the Gas Division ("UGI Gas" or the "Company") and the Electric Division ("UGI Electric"), each of which is a public utility regulated by the Pennsylvania Public Utility Commission ("Commission" or "PUC").

Q. Please briefly describe your responsibilities in that capacity.

A. As Vice President and General Manager of Rates and Supply, I am responsible for all rate, supply, and associated regulatory compliance activities for UGI Gas and UGI Electric. For the rates component, I oversee the areas of sales and revenue forecasting, tariff administration and compliance, Choice administration and compliance, rate application, Section 1307(f) purchased gas cost ("PGC") filings, electric provider of last resort ("POLR") filings, Section 1307(e) filings, base rate cases, and UGI's energy management information technology systems. My supply responsibilities include oversight of supply procurement and contracting, gas and power scheduling, and tracking of interstate pipeline and wholesale power market activities that affect the Company's gas and power procurement costs. My regulatory compliance responsibilities cover a broad range of oversight and compliance for the state and federal jurisdictional activities of UGI. Prior to my role as Vice President and General Manager of Rates and Supply, I was Senior Director of Operations for UGI's southern operating region. In my current role, I report directly to the Chief Regulatory Officer.

Q. What is your educational and professional background?

A. Please see my resume, UGI Gas Exhibit CRB-1, which is attached to my testimony.

Q. Have you testified previously before this Commission?

A. Yes. UGI Gas Exhibit CRB-1 contains a list of those proceedings.

II. PURPOSE OF TESTIMONY AND RATE FILING OVERVIEW

Q. Please describe the purpose of your testimony in this proceeding.

A. My testimony addresses several points. First, I present an overview of the rate filing, including a brief explanation of the reasons for rate relief and an outline of the testimony of each witness in this proceeding, including the Company's proposal to implement alternative ratemaking, specifically a Weather Normalization Adjustment. Second, I discuss the Company's efforts to provide relief to customers impacted by the COVID-19 Pandemic, as well as related operational impacts. Third, I explain the Company's proposal to complete the final step in the rate unification of the former North and South/Central Rate Districts (*i.e.*, Rates N/NT and DS). Fourth, I summarize the recent successes accomplished through the UGI-1 and the UGI Next Information Technology Enterprise ("UNITE") initiatives. Fifth, I describe adjustments made to salaries and wages which are additions to the original future test year ("FTY") and fully projected test year ("FPFTY") budgets. Lastly, I summarize the evidence of UGI Gas's successful management performance and propose how it should be recognized in this case.

Q. Are you sponsoring any exhibits in this proceeding?

A. I am sponsoring UGI Gas Exhibit CRB-1. Also, I am sponsoring certain responses to the Commission's standard filing requirements, as indicated on the master list accompanying this filing.

Q. Please identify the other witnesses providing direct testimony on behalf of UGI Gas in this proceeding and the subject matter of their testimony.

A. In addition to my testimony, the following witnesses are providing testimony in support of the Company's rate request:

Tracy A. Hazenstab (UGI Gas Statement No. 2) holds the position of Principal Analyst - Rates for UGI Gas. She addresses UGI Gas's budgeting process; operating revenues and expenses; compliance with Section 1301.1 of the Public Utility Code; and the revenue requirement model supporting the Company's proposed rate increase (UGI Gas Exhibit A (Fully Projected)). Ms. Hazenstab also sponsors the revenue requirement models for the future and historic periods, UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Historic), respectively.

Vivian K. Ressler (UGI Gas Statement No. 3) holds the position of Senior Manager, Plant and Regulatory Accounting at UGI. Ms. Ressler presents UGI Gas's rate base claim for the Historic Test Year ("HTY"), FTY, and FPFTY. Ms. Ressler also addresses accounting for information technology costs and budget adjustments.

John F. Wiedmayer (UGI Gas Statement No. 4) holds the position of Project Manager at Gannett Fleming Valuation & Rate Consultants, LLC. Mr. Wiedmayer developed and supports UGI Gas's claim for annual depreciation expense, and the accumulated depreciation reserve. His studies are presented in UGI Gas Exhibit C (Fully Projected), UGI Gas Exhibit C (Future) and UGI Gas Exhibit C (Historic).

Vicky A. Schappell (UGI Gas Statement No. 5) holds the position of Principal Analyst, Capital Planning for UGI Gas. Ms. Schappell addresses capital expenditures and capital planning, including those for UNITE Phase III - Enterprise Asset Management ("EAM").

Paul R. Moul (UGI Gas Statement No. 6) holds the role of Managing Consultant of P. Moul & Associates, Inc. Mr. Moul presents expert testimony supporting the Company's claimed capital structure, cost of debt, cost of common equity, and overall fair rate of return. Schedules and workpapers supporting Mr. Moul's findings are set forth in UGI Gas Exhibit B (Rate of Return).

Nicole M. McKinney (UGI Gas Statement No. 7) holds the position of Director of Financial Planning and Analysis for UGI Corporation. Ms. McKinney addresses various tax issues, including the Company's claim for federal and state income taxes, taxes other than income taxes, the calculation of the accumulated deferred income taxes ("ADIT") offset to rate base, the repairs allowance and the calculation of a hypothetical consolidated tax savings adjustment as required by Section 1301.1 of the Public Utility Code.

Sherry A. Epler (UGI Gas Statement No. 8) holds the position of Senior Manager Tariff and Supplier Administration – Rates for UGI Gas. Ms. Epler's testimony addresses the development of the Company's HTY, FTY and FPFTY test year sales and revenues. In addition, Ms. Epler addresses proposed revenue allocation, rate design and tariff updates. Ms. Epler sponsors UGI Gas Exhibit E (Proof of Revenue) and UGI Gas Exhibit F (Current and Proposed Tariffs).

Timothy J. Angstadt (UGI Gas Statement No. 9) holds the position of Vice President of Operations. Mr. Angstadt's testimony addresses UGI Gas's operations and natural gas system, and the impacts COVID-19 had on the Company's field operations. In addition, Mr. Angstadt discusses UGI Gas's Commission-approved Long-Term Infrastructure Improvement Plan ("LTIIP"), and the impact of the LTIIP and other initiatives on system performance, safety, and reliability. Mr. Angstadt further discusses certain proposed employee additions that are necessary for UGI Gas to maintain the pace of its capital replacement program. In addition, Mr. Angstadt addresses UGI Gas's efforts and future plans to investigate and, where necessary, remediate sites in Pennsylvania where UGI Gas or corporate predecessors once owned and/or operated manufactured gas plants in connection with gas utility operations.

Constance E. Heppenstall (UGI Gas Statement No. 10) holds the role of Senior Project Manager – Rate Studies for Gannett Fleming Valuation & Rate Consultants, LLC. Ms.

Heppenstall prepared and sponsors UGI Gas's fully allocated cost of service study. This study is contained in UGI Gas Exhibit D. The Allocated Cost of Service Study ("ACOSS") allocates the Company's cost of service associated with Commission jurisdictional operations to the Company's retail customer classes.

John D. Taylor (UGI Electric Statement No. 11) is a Managing Partner of Atrium Economics LLC. Mr. Taylor's testimony addresses the rationale, design and applicability of the Company's proposed Weather Normalization Adjustment mechanism.

III. NEED FOR RATE RELIEF

Q. Please discuss UGI Gas's proposed rate relief request and provide an overview of the Company's proposals in this proceeding.

A. UGI Gas is requesting an increase in its annual base rate operating revenues of $82.7 million, or 7.8 percent on a total revenue basis, with a proposed effective date of March 29, 2022. The base rate increase requested in this filing utilizes a FPFTY ending September 30, 2023. In addition, UGI Gas proposes in this proceeding to complete the transition to uniform distribution rates for both Rates N/NT and Rate DS across the former North and South/Central Rate Districts, an effort proposed but not completed as part of the Company's 2019 and 2020 rate cases.

Q. Has the Company evaluated the impact of its proposed rate increase on average customer bills generally?

A. Yes. As shown in Table 1, below, the Company has evaluated the impact of its proposed rate increase on the average monthly bill of residential heating, commercial heating, and industrial customers.

Table 1 Average Monthly Bill Impact

Average Residential Heating Customer Bill Impact

		Total Monthly Bill Impact			
	Average Usage	Current	Proposed	Increase (Decrease)	Total
All Customers	73.1 Ccf	$ 98.62	$ 108.01	$ 9.39	9.5%

Average Commercial Heating Customer Bill Impact

		Total Monthly Bill Impact			
	Average Usage	Current	Proposed	Increase (Decrease)	Total
Former North	28.8 Mcf	$ 307.00	$ 330.09	$ 23.09	7.5%
All Others	28.8 Mcf	$ 317.93	$ 330.09	$ 12.16	3.8%

Average Industrial Customer Bill Impact

		Total Monthly Bill Impact			
	Average Usage	Current	Proposed	Increase (Decrease)	Total
Former North	92.4 Mcf	$ 931.45	$ 993.83	$ 62.38	6.7%
All Others	92.4 Mcf	$ 966.55	$ 993.83	$ 27.28	2.8%

The average customer monthly bill impacts set forth in Table 1, above, are fair and reasonable because, as described in more detail below, UGI Gas will utilize the increase in distribution rates to support its ongoing provision of safe and reliable distribution service for its customers and, even with this increase, will continue to have distribution rates that compare favorably to other Pennsylvania natural gas distribution companies (“NGDC”), and on a total bill basis, inclusive of natural gas costs. Moreover, the Company’s average customer bills are less than they were in 2008. The proposed customer charges also reasonably reflect cost-of-service principles, while considering the rate design principles of gradualism.

Q. Why is UGI Gas seeking a rate increase at this time?

A. UGI Gas continues to make substantial distribution system investments that are necessary to: continue the accelerated replacement of aging gas plant infrastructure; upgrade and improve system segments and modernize facilities; serve new residential and commercial customers; connect customers converting to natural gas; install and upgrade supporting information technology systems; and ensure the safety of the Company's employees, the communities it serves, and its distribution system. Moving forward, these system improvements and investments will require the Company to increase its efforts to attract, recruit, train, and retain those professional, technical, and field-qualified personnel and resources necessary to implement, operate, and maintain those investments. These investments are all necessary to grow and continue to maintain a safe and reliable distribution system and provide quality customer service. As compared to pre-FPFTY gross plant levels, UGI Gas is projecting an increase of approximately $445 million in gross plant through the FPFTY compared to the end of the FTY and $795 million in gross plant when compared to the end of the HTY. Based on this factor alone, UGI Gas's current rates will not provide it with a reasonable opportunity to earn its cost of capital on its increased rate base investments.

Other cost drivers adversely impact the Company's ability to earn a reasonable rate of return on its utility investments. Since its last base rate case in 2020, UGI Gas has adopted reasonable and competitive annual wage and salary adjustments, meeting industry benchmarks for wages and salaries in order to retain and attract qualified employees. UGI

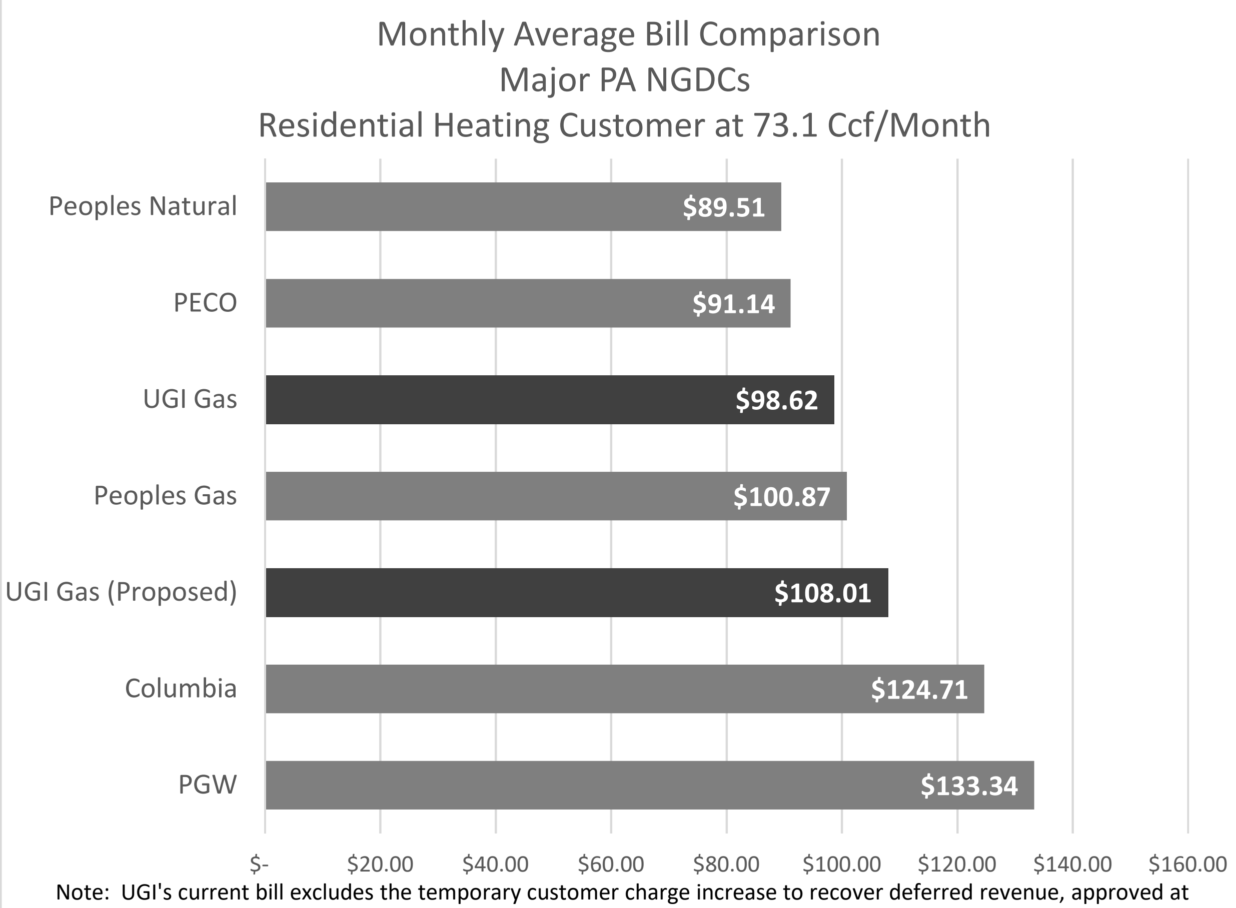
Gas will continue to do so where necessary to maintain a productive and effective workforce. The Company has also experienced other general price increases for necessary products and services. The Company is specifically planning for needed increases to staffing levels to maintain reliability, regulatory compliance, and continued improvement in several areas, most notably, information technology, operations, and training. While UGI Gas continues to focus on efficient operations and has seen stable customer growth over time, the Company's forecasted increases in operating and capital costs, along with experienced and anticipated changes in per customer usage, will prevent UGI Gas from having a reasonable opportunity to earn a fair rate of return on its investment at present rates.

Specifically, as reflected in UGI Gas Exhibit A (Fully Projected), Schedule A-1, UGI Gas's operations are projected to produce an overall return on rate base of 6.13%, which equates to a return on common equity of only 7.89% for the twelve months ending September 30, 2023. As explained by UGI Gas witness Paul R. Moul (UGI Gas Statement No. 6), those returns are not adequate based on applicable financial analysis and the risks confronted by UGI Gas. Unless UGI Gas receives the requested rate relief, those returns will continue to decline and potentially jeopardize UGI Gas's ability to attract the capital needed to make system investments that support enhancing the reach and capacity of its distribution system. Moreover, with its requested rate relief, UGI Gas will have sufficient return on investment needed to continue replacing older, more risk prone facilities, systems, and equipment, each of which is necessary to ensure continued system reliability, safety, and customer service performance. UGI Gas anticipates that it will be filing another rate case approximately a year following the filing of this base rate proceeding, as significant capital investment amounts similar to those projected for the FPFTY are projected to continue and will drive the need for additional timely rate relief.

Q. How do UGI Gas's rates compare with other Pennsylvania utilities?

A. A comparison of average residential heating bills, shown in Table 2 below, illustrates that UGI Gas's current distribution rates compare favorably to the rates of other major NGDCs in the Commonwealth, and will remain so, even at the full increase of proposed rates.

<u>Table 2 – Residential Heating Distribution Rate Comparison</u>



Note: UGI's current bill excludes the temporary customer charge increase to recover deferred revenue, approved at Docket No. R-2019-3015162 and is set to expire on September 30, 2022.

In considering UGI Gas's overall rates, it is also important to note that the Company has focused in recent years on a continued restructuring of its natural gas supply portfolio in order to maximize the benefits associated with the Commonwealth's shale gas supply resources. Also the Company has increased its focus on Environmental, Social and Governance ("ESG") activities, such as the Company's recently approved, first of its kind, pilot program designed to demonstrate the benefits of utilizing renewable natural gas ("RNG") as part of the Company's supply portfolio. RNG stands to provide numerous benefits to the natural gas industry and its consumers as related to the provision of lower-carbon solutions that can be readily integrated into existing natural gas systems. Despite recent increases in the cost of gas, customer benefits associated with these activities are readily evident. Even with the rate changes proposed in this proceeding, the average residential heating customer bill will be 21% lower than it was in 2008 when natural gas commodity prices were materially higher. In summary, UGI Gas offers excellent service to customers at reasonable rates.

IV. COVID-19 RELIEF EFFORTS

Q. Please describe how the COVID-19 pandemic has affected UGI Gas's provision of service to its customers.

A. Since March 6, 2020, when Pennsylvania Governor Wolf issued a Proclamation of Disaster Emergency,[1] followed by a March 15, 2020 Executive Order implementing widespread closures of non-life-sustaining businesses and work from home directives, UGI Gas has had to adapt its operations, accounting, and customer outreach to respond to the enduring COVID-19 Pandemic. In the intervening months, the Governor's office issued a number of subsequent orders - including, the Limited Time Mitigation Order issued December 10, 2020, which limited or suspended many indoor operations and gatherings.[2] In addition to the orders issued by the Governor's office, the Commission issued Emergency Orders on

[1] https://www.pema.pa.gov/Governor-Proclamations/Pages/default.aspx
[2] https://www.governor.pa.gov/wp-content/uploads/2020/12/20201210-TWW-Limited-Time-Mitigation-Order.pdf

March 13, 2020, March 20, 2020, and October 13, 2020, modifying the Commission's policies and procedures in response to COVID-19.

Q. How did these orders from the Governor and the Commission affect Company operations?

A. The operational impact of the COVID-19 Pandemic ("Pandemic") is discussed in more detail by UGI Gas witness Mr. Angstadt (UGI Gas Statement No. 9). However, in response to the Pandemic, the Company transitioned as much of its workforce to remote duties as possible. The Company adopted numerous practices to ensure the safety of its employees and customers. This permitted the Company to maintain the ongoing safe and reliable operation of the distribution system.

Q. Did the Company assist customers impacted by the economic effects of the Pandemic?

A. Yes. Consistent with the Commission's March 13, 2020 Emergency Order, the Company ceased service terminations and took measures to protect low-income customers affected by the Pandemic. Beginning March 18, 2020, the Company ceased removing customers from its Customer Assistance Plan ("CAP") for failure to recertify and instructed Community Based Organizations ("CBOs") to accept telephonic "signatures" for CAP program authorizations. On March 24, 2020, the Company began waiving all late payment charges. The Company subsequently resumed normal low-income activities in July 2021.

On May 21, 2020, UGI Utilities, Inc. filed a petition to modify its consolidated Universal Service and Energy Conservation Plan ("USECP") to implement a pre-pandemic proposal to reduce maximum-tiered monthly Percent-of-Income payments ("PIPs") required of its CAP customers.[3] In this PIP petition, the Company sought to update the USECP to reflect the Commission's revisions to the CAP Policy Statement at 52 Pa. Code § 69.261 et seq. On August 5, 2021, the Commission entered an Order seeking supplemental information (regarding program costs and CAP participation levels) and establishing comment and reply comment periods. While the Commission has not ruled on the petition, the Company believes energy burdens on UGI Gas's CAP customers will be reduced if the petition is approved.

The Company also made changes to its Low-Income Usage Reduction Program ("LIURP") to provide additional funding to LIURP contractors of up to $500 per LIURP job. These funds address Pandemic related costs (i.e., personal protective equipment, masks, hand sanitizer, etc.) incurred and documented by the LIURP contractors. The Company also expanded eligibility under its Operation Share grant program to 250% of the federal poverty limit ("FPL") and increased the maximum grant size from $400 to $600.

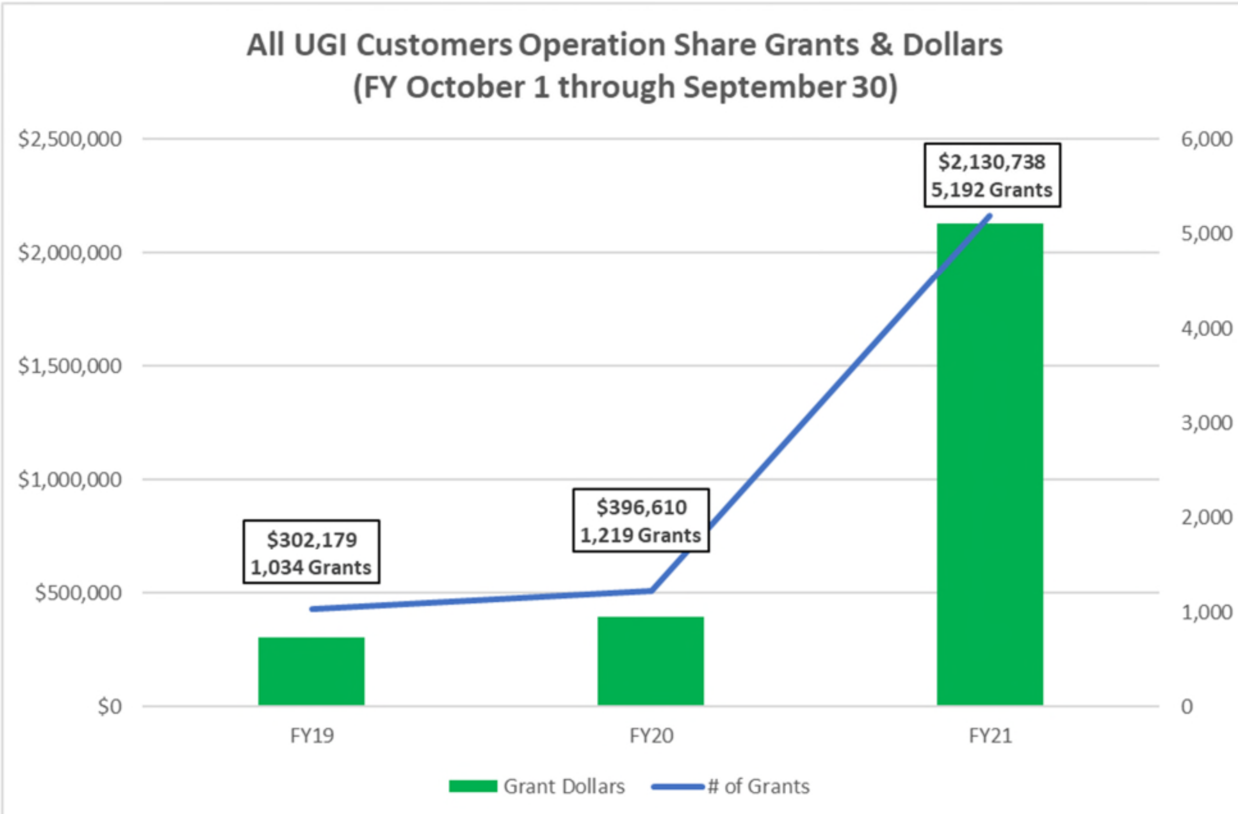
Q. Were these changes accompanied by any additional communication efforts by the Company?

A. Yes. The Company launched an extensive information and outreach campaign associated with its Pandemic response consisting of a COVID-19 Response webpage, webpages for residential and commercial customers providing additional resources, bill inserts, website-embedded customer-assistance program videos, webinars, online advertising, informational emails, and direct mail letters and postcards. The result of these efforts (in

[3] *Petition for Amendment of UGI Universal Service and Energy Conservation Plan for January 1, 2020 – December 31, 2025*, Docket Nos. M-2019-3014966 and P-2020-3019196. As of the date of this testimony, this petition remains pending before the Commission.

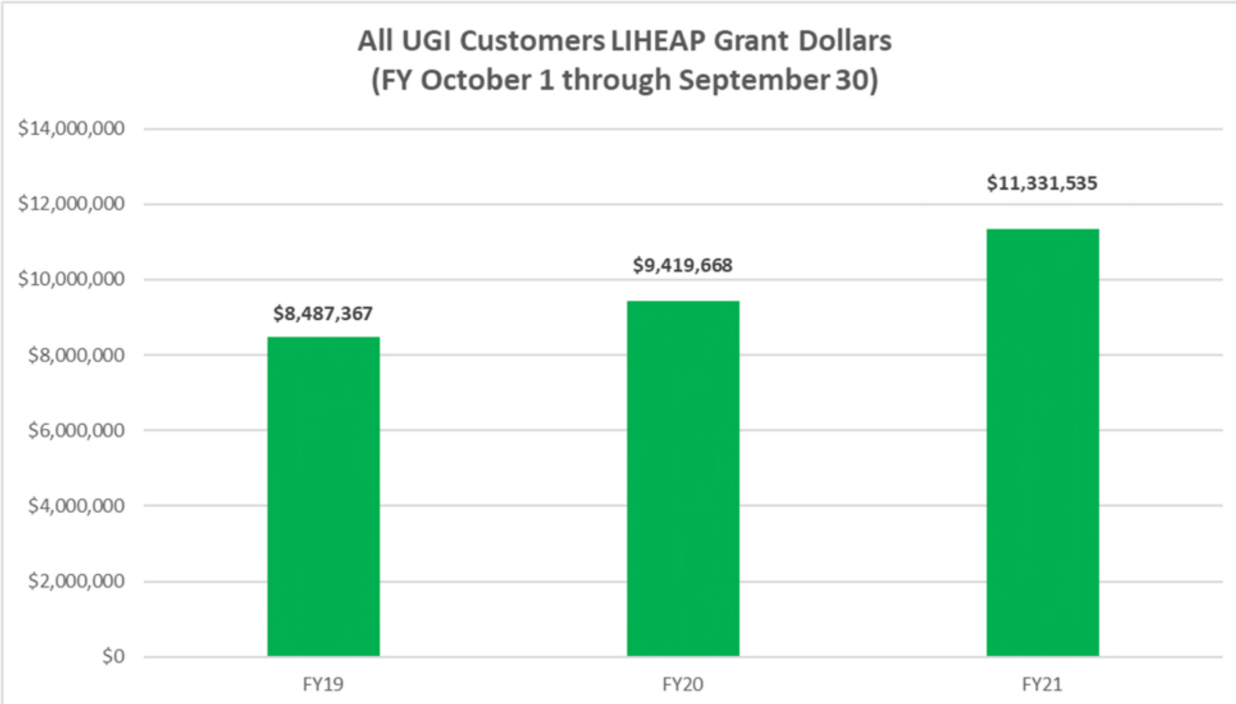
terms of Operations Share distributions and LIURP grants) are shown in Tables 3 through 4 below when comparing year-over-year results.

Table 3



Between FY 2019 and FY 2021, Operation Share grants increased by 605% (from $302,179 to $2,130,738).

Table 4



Between FY 2019 and FY 2021, LIHEAP grants increased by 34% (from $8,487,367 to $11,331,535). Additionally, the CARES Act Emergency Rental Assistance Program ("ERAP") assisted 2,377 UGI Gas and UGI Electric customers, with an average grant amount of $623 per customer. Total dollars year-to-date as of November 30, 2021 for ERAP is $1,477,366. Lastly, overall CAP enrollments increased by 16% between FY2019 to FY2021.

Q. Are there any other programs that the Company implemented to assist customers during the pandemic?

A. Yes, with Commission approval at Docket No. R-2019-3015162, the Company launched an Emergency Relief Program ("ERP") Phase I to assist natural gas customers economically impacted by the Pandemic. The program ran from October through December 2020 and provided installment payment plans for residential and business customers. It also provided an opportunity for a one-time grant of up to $400 for residential customers who either received the federal CARES Act Economic Impact Payment or filed for unemployment during the Pandemic. During the course of the program, the Company granted over $198,000 in grants to approximately 1,500 residential customers and permitted over $1.5 million in payment arrangements to approximately 1,800 customers.

On January 25, 2021, UGI Gas filed a Petition at Docket No. P-2021-3023839 to establish ERP Phase II. The Company proposed continuing the temporary, voluntary modifications to the USECP, established in ERP Phase I, in light of the ongoing COVID-19 Pandemic. Pursuant to the Commission's Order, which entered on October 28, 2021, UGI Gas was permitted to maintain the modifications to its hardship funds, which were established in ERP Phase I through the end of 2021. These modifications included expanding eligibility for hardship funds to households with income up to 250% of the FPL and increasing the maximum hardship grants from $400 to $600, to the extent funds are available.

V. UNIFICATION OF RATES AND REPORTING

Q. Has UGI Gas altered its rate structure, tariff, and rate classes in recent years?

A. Yes. Over the past few years, as a result of UGI Gas integrating three former separate NGDCs, the Company has taken many steps toward unifying its rate structure, tariff, and rate classes. This effort was undertaken to both increase efficiencies within the Company and provide the same tariffed services to customers at the same rates throughout the Company's service territory. The intra-company merger of 2018 (described below) was the first step in this process of unification.

Q. Please describe the Company's merger of its prior NGDC subsidiaries.

A. Prior to October 1, 2018, UGI Gas had two wholly-owned subsidiaries which were Commission-certificated NGDCs. Those subsidiaries were UGI Penn Natural Gas, Inc. ("UGI PNG") and UGI Central Penn Gas, Inc. ("UGI CPG"). On March 8, 2018, UGI Gas filed a petition with the Commission at Docket Nos. A-2018-3000381 *et al*. to approve the merger of UGI PNG and UGI CPG into UGI Utilities, Inc., and the subsequent operation of UGI Gas as three rate districts under the three former tariffs of UGI Gas, UGI PNG, and UGI CPG. The Commission approved a settlement of that proceeding in an Order entered on September 20, 2018. The merger was completed on October 1, 2018, and UGI Gas commenced operations under the three-rate district structure described above with (a) three sets of base rates; (b) three gas supply portfolios; (c) three PGC rates; (d) three sets of rules applicable to Natural Gas Suppliers ("NGSs") serving Choice and Non-Choice customers; and (e) three tariffs. This successful merger positioned the Company to then move forward with further harmonization of tariffs and rates.

Q. Please describe those efforts to harmonize its tariff offerings and rate schedules after the 2018 merger.

A. In January 2019, the Company filed for a base rate increase at Docket No. R-2018-3006814 ("2019 Rate Case"). In that proceeding, the Company proposed to operate under a single uniform tariff with uniform residential and commercial base rates and associated surcharges and riders across its system.

Q. Was the Company's proposal to unify rates in the 2019 Rate Case approved?

A. In very large part, yes. The Company's proposal to unify rates was approved by the Commission in an Opinion and Order entered October 4, 2019, with the exception of the unification of former North Rate District and South/Central Rate District rates for both Rates N/NT and Rate DS. This resulted in rate unification for over 97% of all UGI Gas customers and permitted the Company to propose a two-step process to address final unification for both Rates N/NT and Rate DS across all former rate districts.

Q. Please describe the two-step process to unify Rates N/NT and Rate DS that was approved by the Commission as part of the 2019 Rate Case.

A. For Step 1, upon the effective date of new rates in the 2019 Rate Case, the Commission approved a twelve (12) percent increase to Rates N/NT (North Rate District rates) and a twenty (20) percent increase to Rate DS (North Rate District rates), with Rates N/NT and Rate DS (South and Central Rate Districts) set uniformly by class to recover the remaining N/NT and DS revenue requirements, respectively. As part of Step 2, the Company was permitted to propose full uniform rates for these two rate classes in the Company's next general rate proceeding, which the Company did propose in its 2020 Rate Case at Docket No. R-2019-3015162.

Q. Was the Company able to make Rates N/NT and DS uniform in the last base rate case filed in 2020?

A. No. In paragraph 45 of the Joint Settlement Agreement of the 2020 Gas Base Rate Case ("Settlement"), the Company withdrew its proposal to fully harmonize distribution rates for Rates N/NT and DS without prejudice. Additionally, UGI Gas reserved its right to propose unification of these rates in this proceeding.

Q. What is the Company's proposal in this proceeding with respect to Rates N/NT and Rate DS?

A. The Company proposes to take the final step to merge both Rates N/NT and Rate DS across all former rate districts by merging the rates in place for the geographic footprint of the former North Rate District with those of the former Central and South Rate Districts at this time. The Company's proposal for rate design for all customers, including the final unification of DS and N/NT customers, is described in more detail in the Direct Testimony of Sherry A. Epler (UGI Gas Statement No. 8). The Company believes that this proposed final stage of rate harmonization is fully consistent with the principles of rate gradualism given the magnitude of the proposed increases to impacted customers and the extended period of time which will have lapsed since the Company's initial unification efforts began in 2019.

VI. <u>UGI-1 INITIATIVE AND UNITE</u>

Q. Please describe UGI Gas's UGI-1 initiative.

A. UGI-1 is a Company-wide improvement initiative focusing on improvements in the area of people, tools, and processes. The Company is building on its past focus on distribution system modernization by taking advantage of newer technologies, equipping employees for future success, and improving organizational communication. The centerpiece of UGI-1 is UNITE, a multi-phased series of projects to identify and address business and technology opportunities for improvement. The Company has completed multiple UNITE phases to date and is presently engaged in a current-state analysis review of the Company's asset management processes.

Q. Has the UGI-1 initiative benefitted customers?

A. Yes. UGI-1 has already established and implemented a number of common information systems, tools, equipment types, and uniform work management and performance platforms to support UGI's operations. This has allowed, and will continue to allow, UGI Gas to become more efficient and effective in performing all aspects of its business, including: taking calls from customers, performing billing and related activities, constructing new distribution facilities, operating and maintaining its gas distribution and transmission systems, and responding to and managing emergency situations.

Q. How has the UGI-1 initiative impacted infrastructure and safety?

A. Under UGI-1, UGI Gas applies a common set of initiatives in workplace safety. The Company's standardized approach to training and safety culture, and in particular, its development of a comprehensive and centralized training center and creation of a safety and health management system, ensures that all Company employees share common values regarding safety and are trained in a consistent manner throughout the Company's service territory. The Company also uses this fully consolidated approach to the work identified in its Second LTIIP and is achieving improved distribution system safety based on measurable performance criteria. During the five-year term of its current Second LTIIP (2020-2024), UGI Gas is investing approximately $1.3 billion on infrastructure improvements, building off an already-successful LTIIP that has realized material reductions to the number of hazardous and non-hazardous leaks.

Q. What is the UNITE initiative?

A. The UNITE initiative is an effort to modernize and harmonize the Company's information technology systems.

Q. Please explain the improvements that the Company has made as part of UNITE.

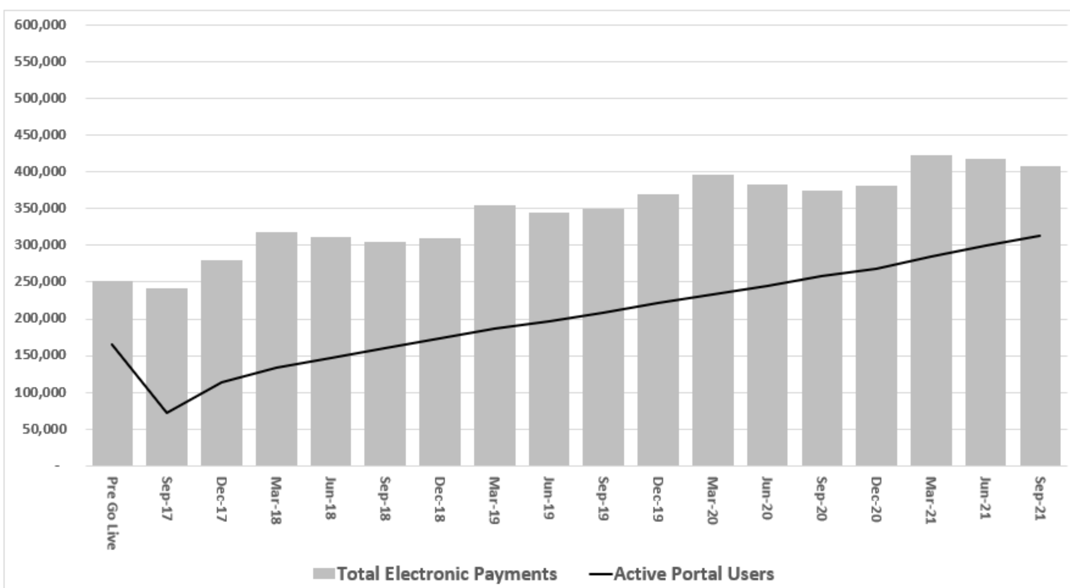
A. Phase I of UNITE replaced UGI's Customer Information Systems ("CIS") in September 2017. Since then, UGI has seen a 62% increase in electronic payments, and customers with portal profiles have increased by 88%. These statistics indicate improved customer experience and a reduction in the customer effort needed to access information and services. The upwards trend of electronic payment adoption can be seen in Figure 5. Also, as seen in Figure 6, after a brief post-implementation period, during which the Company adapted and fine-tuned its new CIS, the Company has improved its customer service with respect to certain customer service metrics, including grade of service (calls answered within 30 seconds), as compared to pre-CIS implementation. Additionally, self-service utilization rates, first call resolution, and contact center customer effort indicators have all improved over the last few years.

Phase II of UNITE, which went live in July 2019, replaced the Company's Enterprise Resource Planning ("ERP") system and introduced SAP's Fieldglass solution for contractor billing. Since the implementation in 2019, internal controls have been enhanced through the increased use of electronic purchase orders (59% increase) as well as automated wire payments, approval routings, and user access provisioning.

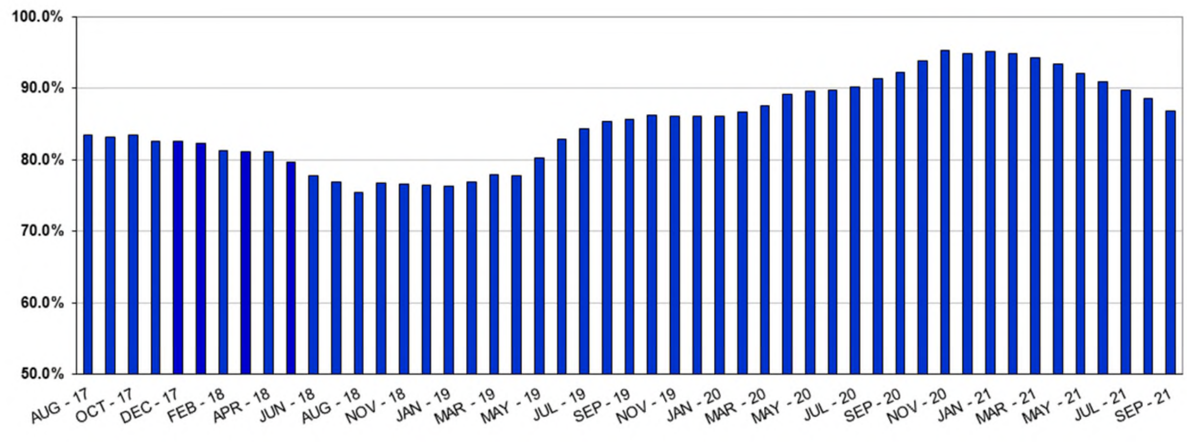
Additionally, the Company has achieved efficiency in operations by reducing invoice processing time (50% reduction in overdue invoices) and utilizing radio frequency barcode scanners in the Company's central warehouses.

Phase III of UNITE, the Enterprise Performance Management ("EPM") project, went live in October 2020 and implemented the PowerPlan Capital Budgeting and Forecasting solution integrated with the Company's ERP and PowerPlan Fixed Asset and Tax systems. PowerPlan provides embedded lifecycle governance for approving and monitoring capital projects; improved visibility of capital expenditure requests and authorized capital projects; detailed forecasting for more accurate tracking of ongoing capital projects; and improved data analytics for making timely and optimal capital decisions.

<u>Table 5 Customer Electronic Payments and Website Portal Utilization – September 2017 through September 2021</u>



<u>Table 6 Combined Customer Service Performance - Grade of Service[4]</u>
<u>Rolling 12-Month Average from August 2017 through September 2021</u>



Q. Please describe the UNITE current state analysis of the Company's asset management processes.

A. The current state analysis is a key element of UNITE's current EAM project, a multi-year, multi-phase project with the end goal of a new EAM and supporting applications. In mid-2021, the Company kicked off the EAM's asset data collection phase, which focuses on the identification and standardized capture of asset data information across UGI. The asset data collection phase is planned to go live for UGI Gas in January 2023. In the next phase, the Company will be kicking off EAM's asset management, work management, and field service management projects. The current state analysis enables UGI to understand processes and process variation across the Company, document future state recommendations from key business stakeholders, and begin setting the stage for the EAM transformation. These activities provide a critical base understanding for the UNITE team's pre-design workshops and are beneficial interactions with business stakeholders.

4 Grade of Service is the percentage of customer calls answered within 30 seconds of receiving the call and is a common measurement of call center performance and customer satisfaction.

The UNITE EAM program is described further in the direct testimony of Vicky A. Schappell (UGI Gas Statement No. 5).

Q. What processes are being evaluated in this current state analysis for UGI Gas?

A. Specific gas processes within the scope of this current state analysis include: main replacement, distribution system reinforcement, and line extension projects; service installations; as-built tracking and traceability; record corrections; new and upgraded regulator stations; inspections, maintenance and other repairs; paving and restoration; and facility locates and damage prevention.

Q. What process and system-related improvements does UGI Gas expect to derive from the current UNITE EAM initiative?

A. The current state analysis on process documentation will feed into the design for a new EAM to leverage the same tools for similar processes that occur across UGI. One goal will be eliminating obsolete IT systems and paper-based processes, while providing automation to improve reliability and streamline operations. With respect to systems, the new EAM will be integrated with a consolidated gas and electric Geographic Information System ("GIS"), and other systems, such as CIS, ERP, and EPM discussed above. The EAM will be a central repository for housing, analyzing, and accessing UGI assets and managing full asset lifecycle information. The benefits derived from the EAM implementation will include, among others, standardized business processes across the Company; improved data quality; improved IT system maintainability; better facility tracking and traceability; tools for ensuring ongoing regulatory compliance; a standard dispatching and mobility solution for field work; enhanced work management capabilities; mapping upgrades and digitized infrastructure as-builts; and improved portfolio and risk management capabilities for guiding future betterment decisions. While the Company is at the beginning phase of its multi-year EAM project, the foundational work being performed at this stage will ensure a solid platform upon which to create a comprehensive and integrated EAM framework.

Q. What will be the focus of the UNITE EAM initiative in the FPFTY?

A. The Company will be implementing the asset data collection project to the field in the FPFTY, rolling out improved data collection tools, systems, and utilizing the improved data and systems which form the foundation for the broader EAM initiative. The Company will be targeting the next portions of EAM (Asset Management, Work Management, Field Service Mobility, and GIS) with a goal of placing those programs in service in the following fiscal year.

VII. AUBURN CAPACITY LEASE

Q. Please describe the Auburn Capacity Lease.

A. On November 22, 2021, the Commission approved, via secretarial letter at Docket No. G-2021-3028753, a new Capacity Lease Agreement allowing the Company direct access to natural gas supplies for delivery from the Tennessee Gas Pipeline through the UGI Gas Auburn Gate Station into the Auburn Gathering system, a natural gas gathering system located in northeast Pennsylvania, owned by UGI Energy Services, LLC (an affiliate of the Company). This new capacity lease will expand the available sources of reliable and competitively priced supplies for the Company and its customers.

Q. When does the Company anticipate the capacity lease going into service?

A. The Company currently anticipates the capacity lease becoming available on July 1, 2022.

Q. How were the costs of the capacity lease treated in this proceeding?

A. Since the largest customer served by UGI Gas from the Auburn Gathering System is The Proctor and Gamble Paper and Products Company, a Rate XD customer, it is appropriate that the anticipated costs for the new lease be assigned to the Rate XD customer group. The direct assignment of these costs has been reflected in UGI Gas Exhibit D, the ACOSS, as it is consistent with the principle of cost causation; appropriate adjustments to Rate XD revenue have also been incorporated as explained in the direct testimony of Sherry A. Epler (UGI Gas Statement No. 8).

VIII. SALARIES AND WAGES ADJUSTMENTS

Q. Is the Company making any adjustments to Salaries and Wages not included in the FPFTY budget?

A. Yes, Schedule D-9 includes total salary and wage increase adjustments of $1.91 million. The first adjustment (Adjustment #1) in the amount of $1.32 million shown on Schedule D-9 is for unbudgeted compensation and benchmarking adjustments to salary and wages. The Company is making these adjustments as a result of recent compensation benchmarking review activities that focused on how UGI Gas may continue to remain productive in an increasingly competitive labor market. This is of critical importance as the Company continues to look to ensure its efforts to attract, recruit, train and retain those professional, technical and field-qualified personnel and resources necessary to implement, operate, and maintain a safe and reliable natural gas distribution system for all customers.

The second adjustment (Adjustment #2) shown on Schedule D-9 is in response to the Transportation Security Administration ("TSA") Cyber Security Directives 2021#1 and 2021#2 (further described below).

Q. Please describe the compensation benchmarking adjustments that the Company is making in this case.

A. The Company has reviewed current exempt and non-exempt employee compensation levels against benchmark data provided by the American Gas Association ("AGA") and has begun to implement salary adjustments based on this study. These planned adjustments affect 990 employees and will result in $1.2 million of incremental cost to be applied to the Company's operating expense for UGI Gas in the FPFTY, and accordingly is shown as an adjustment on Schedule D-9 plus incremental employee benefits.

Q. Please describe the needs which are being addressed by the compensation adjustments that you described?

A. Like many companies in the current labor market, UGI has experienced an increase in voluntary employee turnover as the available labor market has become constrained and increasingly competitive. This is particularly true for roles that require experienced employees. As a result of the current job market, more employees, including those with years of regulated utility experience, are moving on to other opportunities outside of UGI. In addition, in some instances, the Company encountered difficulties finding internal interest for certain critical exempt positions. For instance, experienced non-exempt employees (e.g., long term field employees) have declined taking operational field supervisor roles due to the lack of adequate pay differential between these roles when factoring in overtime and premiums. This has caused the Company to often look externally to fill critical positions, casting a wide geographic net in order to find suitable, experienced candidates to fill these critical roles. As this has occurred, the Company has also engaged external search agencies to assist in finding the candidates for UGI's needs, which adds considerable time and expense to the recruiting process. The purpose of implementing these adjustments is to improve UGI's ability to: (1) retain existing experienced employees; and (2) compete for qualified employees in order to fill needed roles in a very competitive job market.

Q. Can you please provide a summary of the compensation benchmarking adjustments?

A. Yes, the chart below outlines the number of employees affected by these compensation adjustments, by functional department and includes operating expense and incentive compensation adjustments based on the employees' predetermined time allocations.

Table 7: Compensation Benchmark Adjustments by Functional Department

	Count of Employee ID	Total Pay Change	Gas OPEX Total FY2023	Gas OPEX Management Incentive Total FY2023
Accounting, Acts Payable, Admin, Billing, Bldg & Grounds, Business Support Services, Finance, Fleet	89	$103,565	$67,614	$ 3,057
Capital Planning, Capital Program Mgt, Construction, Dispatch, Meter Shop, Operations, Pipeline Safety	253	$699,977	$403,594	$28,935
Engineering, GIS, Telemetry, Environmental, Safety	178	$371,087	$51,504	$ 3,290
Customer Care	158	$43,710	$307,664	$653
HR, IT	125	$440,168	$298,536	$14,798
Communications, Community Relations, Sales & Marketing	92	$17,797	$4,539	$111
Procurement, Rates, Supply	39	$78,373	$13,635	$541
Business Process Improvement, UNITE, Training	56	$7,550	$719	$72
Totals	990		$1,147,806	$51,457

Q. How did the Company arrive at the summary adjustments shown above?

A. As I stated above, the Company reviewed salary data provided by AGA by position and then compared current individual employee compensation levels to the AGA midpoint by role, or other survey data where a job match could not be identified utilizing AGA data. The use of the AGA midpoint survey data comports with the Company's goal to establish compensation at the fiftieth percentile level. Years of service was used as the guideline for employee compensation to create anticipated service requirements that link with targets that are approximate to the midpoint of the salary recommendations. Compensation targets were then identified based on years of service, in order to determine which specific employees warranted adjustments. The adjustments were made in relative increments against the midpoint compensation levels, above (over 5 years of service) or below (less than 5 years of service) accordingly. Increases are planned to be phased-in beginning in early 2022 and are expected to be completed by September 2022.

Q. Please explain the Cyber Security adjustment in Schedule D-9 (Adjustment #2)?

A. These staff additions are in direct response to the TSA cybersecurity directives, which were issued in May[5] and July 2021[6] to protect against the impact of malicious cyber intrusions affecting the nation's pipelines. The directives include approximately 90 specific required actions to be applied to information and operational technology systems. The Company has identified that five additional full-time employees are required to support these new TSA cybersecurity directive requirements – four additional cybersecurity professionals and

5 *See* https://windot.com/docs/rus/rus32wdw/PDF/TSA_security-directive-on-enhancing-pipeline-cybersecurity_(002).pdf

6 *See* https://www.dhs.gov/news/2021/07/20/dhs-announces-new-cybersecurity-requirements-critical-pipeline-owners-and-operators. UGI Gas notes that this second directive on cybersecurity is restricted from public disclosure and was sent directly to designated owners and operators.

one systems administrator. This additional cybersecurity and infrastructure staff will be needed for the administration and management of the new cybersecurity procedures and supervisory control and data acquisition system ("SCADA") environment as cyber professionals will monitor threats and protect the isolated SCADA network. Additionally, cyber analysts will be required to manage the new cybersecurity appliances (firewalls, network access control, and endpoint protection) and will be required to support vulnerability management and patching requirements. The five positions are being added at the identified median salary plus employment benefits. Based on discussions that the Company has had with other utilities and the AGA, UGI's proposed staffing aligns with other utilities that are taking the same approach to satisfy the TSA requirements.

IX. <u>MANAGEMENT EFFECTIVENESS AND PERFORMANCE</u>

Q. What actions has UGI Gas taken that reflect superior management performance?

A. UGI Gas has focused on a number of areas to enhance and improve the quality and effectiveness of its service in recent years that reflect superior management performance. These management efforts include: (1) excellent customer service; (2) infrastructure improvements made pursuant to the Company's LTIIP; (3) investments in safety; (4) IT modernization; (5) environmental initiatives; (6) community engagement; and (7) diversity and inclusion.

Q. Please describe the Company's achievements in providing superior customer service.

A. Many industry experts have recognized UGI for its excellent customer service. Including 2020, UGI finished in first or second place in the J.D. Power award for customer satisfaction among utilities in each of the last nine years and won the J.D. Power #1 in

Customer Satisfaction award a total of seven times (2003, 2004, 2005, 2006, 2007, 2013 and 2014) since UGI was first included in the survey in 2003 by J.D. Power. Most recently, UGI was among 38 utility companies nationwide that were named a 2021 "Customer Champion" based on the Cogent Syndicated Utility Trusted Brand & Customer Engagement™ Residential study from Escalent, a human behavior and analytics firm. This is the fourth consecutive year that UGI has received this award.

Q. What infrastructure improvements has the Company achieved?

A. As further explained in the testimony of Timothy J. Angstadt (UGI Gas Statement No. 9), UGI Gas has an aggressive accelerated infrastructure replacement plan focused on replacing all remaining cast-iron and bare steel mains. UGI Gas is a leader in the Commonwealth, with the highest percentage of contemporary mains among major NGDCs at almost 90%. The Company projects that it will eliminate all cast-iron mains by 2027 and all bare steel mains by 2041. The Company's infrastructure improvement statistics, exemplified by the reduction of leaks and cast iron breaks discussed in Mr. Angstadt's testimony, is a direct result of this aggressive accelerated infrastructure replacement plan.

Q. Please describe the Company's investments in Safety Culture Development and Training.

A. The Company constructed a comprehensive and centralized training center in Berks County, which now serves as the heart of the Company's training programs and provides real-life and simulated training scenarios to ensure that UGI Gas's personnel are providing customers, communities and first-responders with enhanced service in the field. The

Company has also developed and implemented numerous safety focused initiatives, as further explained in the testimony of Timothy J. Angstadt (UGI Gas Statement No. 9).

Q. Did UGI receive any industry recognition on safety initiatives in 2021?

A. Yes. UGI Gas was the winner of the 2021 American Gas Association Safety Awareness Video Excellence ("SAVE") award. The SAVE award recognizes outstanding contributors to natural gas communications on safety and education. UGI's entry, "Slips, Trips & Falls" featured many of the Company's own employees.[7]

Q. Please describe the Company's efforts at modernizing processes and Information Technology.

A. As described earlier in my testimony, Phase I and Phase II of the UNITE Project to upgrade the Company's CIS and ERP systems have been implemented and the Company is now focused on UNITE Phase III, which will begin a long-term process of upgrading the Company's capital management systems. The Company has spent the last five years dedicating significant time and resources to modernize its information systems in order to increase its operating efficiency and to provide its customers with better service.

Q. Please describe the Company's engagement on environmental and social governance ("ESG") initiatives.

A. The Company, as well as its parent UGI Corp., are committed to environmental stewardship and social consciousness keenly focused on people and the planet. As explained below, UGI Gas continues to have ESG as a significant area of focus.

7 *See:* https://www.youtube.com/watch?v=PV4zKShr16w

Q. What actions has UGI Gas taken to address environmental stewardship?

A. UGI Gas itself encourages energy efficiency through its voluntary EE&C programs. Since 1995, the Company has successfully converted more than 115,000 customers, mostly from fuel oil, to more environmentally-friendly natural gas. UGI Gas has also connected service to new natural gas generating facilities that, in part, have enabled the Commonwealth to substantially lessen its reliance on electric generation produced by more carbon-intensive fuels such as coal and oil. UGI Gas also has encouraged the adoption of environmentally-friendly natural gas through the recent line extension tariff revisions adopted in the 2020 Gas Rate Case, which, under certain conditions, waives the contribution for customers whose properties are within 150 feet of an existing gas main. Additionally, UGI Gas has over 100 compressed natural gas fueled vehicles as part of its fleet, with plans to add nearly 100 more by the end of the FPFTY, which provide significant reductions in carbon emissions. The Company's cast iron and bare steel replacement activities also have resulted in lowering methane emissions. Finally, as mentioned previously, UGI Gas has been actively implementing options that reduce its carbon footprint, including a program that incorporates renewable natural gas into its distribution system and gas supply portfolio.

Q. What efforts has UGI Gas made toward sustainability?

A. UGI Gas increased its focus on sustainability as it pertains to the natural gas industry. To support the expansion of sustainability overall, the Company has joined and is participating in several collaboratives, councils, and associations related to improving the sustainability of its natural gas sourcing practices. These include:

- The Natural Gas Supply Collaborative, an organization of natural gas purchasers, provides technical expertise and guidance on emerging technologies and gas supply initiatives. Members include utilities and power generators committed to responsible practices for and safety of procuring natural gas supply.

- Our Nation's Energy ("ONE") Future, an industry group that focuses on the goal of reducing methane emissions across the natural gas value chain.
- The American Biogas Council, the only national trade association representing the entire U.S. biogas industry. The American Biogas Council focuses on the biogas supply chain and is dedicated to maximizing the production and use of biogas from organic waste.
- The Coalition for Renewable Gas, a public policy advocate and education platform for RNG in North America.
- NextGenGas Coalition, a collaborative effort to facilitate external engagement and educational opportunities to accelerate the successful advancement of the NextGenGas marketplace.

The Company plans to continue to enhance and expand its ESG initiatives aimed at lowering methane and greenhouse gas emissions.

Q. Please describe the Company's community engagement efforts.

A. Each year, UGI Gas invests more than $1.0 million to support education improvement programs across the Company's service territory. UGI Gas also supports: childhood literacy; enhanced "STEM" (science, technology, engineering and math) curriculum in elementary schools; funding for technical training programs for high school students; and programs that provide support and mentoring for women and minority engineering students. UGI Gas employees also commit significant personal time and resources to support community initiatives. UGI Gas's employees are eligible for 16 paid hours of volunteer time per year per the Company's volunteer policy. For example, 394 UGI Gas employees donated more than 31,000 hours combined of work and personal time to assist their communities in 2020. Company time keeping records show that 99% of this volunteer time was personal time volunteered by its employees; a strong demonstration of the community commitment UGI Gas and its employees have across the Company service territory. UGI (both Gas and Electric) employees also donated personal funds to better their communities. More than 1,000 employees contributed a total of more than $339,000 combined as part of the Company's 2021 United Way campaign. Combined with corporate contributions and retiree contributions, total support provided to United Way agencies serving communities in the UGI Gas service territory in 2020 totaled more than $551,000. UGI Corp. was recently named an honoree of the 2021 Civic 50 Greater Philadelphia by Philadelphia Foundation, in partnership with Points of Light and local partners, for its superior corporate citizenship. In addition, UGI was named the Cogent Syndicated 2021 Most Trusted Utility Brand and "2021 Easiest to do Business with" by Escalent.

Q. What actions has UGI Gas taken to address diversity and inclusion?

A. UGI Gas is committed to fostering a more diverse and inclusive work environment, which will provide a stronger and more cohesive workforce that ultimately provides improved service to our customers. As part of this focus, UGI has implemented a Belonging, Inclusion, Diversity and Equity ("BIDE") initiative. BIDE was formed in 2020 to enhance and expand UGI Gas's efforts to be "part of the solution" in addressing systemic racism and injustice in the communities in which it operates. Utilizing the Company's core values – safety, integrity, respect, responsibility, reliability, and excellence – UGI Gas has implemented steps to model inclusive leadership and provide a culture in which employees feel a sense of belonging. To effectively implement the objectives of BIDE, UGI Gas has created a council that includes senior leadership dedicated to increasing inclusivity and diversity in four core pillars of the business: Culture, Career, Community, and Commerce. The BIDE initiative seeks to provide employees with a safe, welcoming, and inclusive work environment, and shows the Company's commitment to enhancing its efforts to attract, retain, and develop a more diverse team at UGI Gas.

Q. What resources has the BIDE initiative provided to UGI employees?

A. As part of its focus on creating a culture of inclusion, UGI's BIDE initiative has developed three employee resource groups: Black Organizational Leadership and Development ("BOLD"), Women's Impact Network ("WIN"), and the Veteran Employee Team ("VET"). BOLD focusses on inclusion, equity, education, and empowerment for black employees and will assist leadership with communication, talent recruitment and retention, and promotion for black employees. BOLD drives professional development through mentoring and sponsorship opportunities, increasing exposure through networking and career development events. It also promotes cultural transformation by influencing Company policies and procedures that can improve an employee's experience at UGI, as well as the impact these policies and procedures have on customers and partners. WIN fosters an environment for women to be recruited, retained, developed, and advanced as leaders within the UGI Family of Companies. Membership in WIN offers exposure to various professional development opportunities, including speaker series events, group engagement activities, virtual group discussions, and partnerships with local organizations. VET recruits and retains veterans and fosters goodwill towards veterans. Members include

Active Duty, Reserve, and National Guard veterans of the Army, Navy, Marines, Coast Guard, and Air Force, their families, and partners committed to supporting military veteran employees. These three groups provide support, mentorship, educational opportunities, advocacy, and events to increase awareness and involvement and to grow the culture of inclusion at UGI Gas.

Q. What additional actions has UGI Gas taken as part of its BIDE initiative?

A. In addition to employee resource groups, UGI Gas has continued to refine its efforts to hire and retain diverse employees, including more senior level positions. This effort includes consideration of a diverse slate of candidates for all director level or higher roles. BIDE has also incorporated UGI's long-time focus on developing relationships with diverse suppliers and vendors. The Company has continued its efforts to contract with Minority, Women and Disabled Owned Businesses ("Diversity Spend"). Historically, UGI has acquired diverse supply partners through various methods. The Company has implemented employee education and training, utilized the support of relevant database tools, incorporated diverse vendors into its requests for proposals ("RFP"), and provided guidance on entering into agreements with diverse outfits.

In calendar year 2020, UGI Corp. began the centralization of the procurement function of its various business units. This centralization will enable development of a cohesive supplier diversity policy for UGI Gas and its affiliates, which will incorporate supplier diversity spend goals. UGI Corp. has taken the initial step of creating a supplier diversity team across all business units that will further this effort. UGI Corp. has also named a supplier diversity executive to lead the program globally.

For 2021, Total Diversity Spend by UGI was in excess of $59 million. In addition, in November 2021, UGI served as the premier sponsor of the Pennsylvania Diversity Coalition's inaugural supplier diversity summit for utilities. The event was designed to forge relationships between minority business enterprises with non-diverse companies that serve natural gas, electric and water utilities. Many of the participants agreed that matchmaking events are critical in increasing accessibility to diverse businesses.

Q. What benefits do a diverse workplace and supplier pool bring to UGI Gas customers?

A. Diversity provides a variety of benefits that impact the service UGI Gas provides to its customers. Workplaces that embrace diversity have been shown to have higher employee engagement, which leads to increased productivity, innovation, and creativity. Diverse work environments are better at bringing in top talent and retaining employees, which should reduce costs associated with recruiting, onboarding and training new employees over time. Having a diverse contingent of suppliers provides for resiliency in the supply chain and increases the competition for UGI Gas's business, which can be expected to lower prices and foster innovation. For these reasons, the Company's customers benefit from the Company's diversity efforts, which are reflective of the communities we serve.

Q. What do the Company's efforts in the above-referenced areas demonstrate?

A. UGI Gas believes that the management efforts described above, and the other improvements described by the UGI Gas witnesses in this proceeding, as well as the Company's provision of safe and reliable service at reasonable rates, demonstrate UGI Gas's commitment to safety, community partnership, and the provision of excellent customer service. In total, these efforts support an additional upward adjustment of 0.20%

to the Company's equity return in recognition of its management effectiveness, which is included in the 11.2% equity return requested in this proceeding.

Q. Does this conclude your direct testimony?

A. Yes, it does.

UGI GAS

UGI GAS STATEMENT NO. 2

TRACY A. HAZENSTAB

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2021-3030218

UGI Gas Utilities, Inc. – Gas Division

Statement No. 2

Direct Testimony of
Tracy A. Hazenstab

Topics Addressed:	**Uniform Rate Structure and Riders**
	Budget Process
	Revenue Requirement
	Operating Revenues and Expenses
	Compliance with Act 40 of 2016

Dated: January 28, 2022

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Tracy A. Hazenstab. My business address is 1 UGI Drive, Denver, Pennsylvania 17517.

Q. By whom are you employed and in what capacity?

A. I am employed by UGI Utilities, Inc. ("UGI") as Principal Analyst, Rates. UGI is a wholly-owned subsidiary of UGI Corporation ("UGI Corp."). UGI has two operating divisions, the Electric Division ("UGI Electric") and the Gas Division ("UGI Gas" or the "Company"), each of which is a public utility regulated by the Pennsylvania Public Utility Commission ("Commission" or "PUC").

Q. What are your responsibilities as Principal Analyst, Rates?

A. I am primarily responsible for various tariff filings and related computations for UGI Gas and UGI Electric rate and regulatory filings before federal and state regulatory commissions. As part of these responsibilities, I am responsible for budgeting/financial planning for UGI, which is a joint effort with the Rates Department (preparing the revenue and margin budgets) and the Financial Planning and Analysis Department (preparing the operating and capital budgets). I report directly to the Director, Rates and Regulatory Planning of UGI.

Q. What is your educational background?

A. I received an undergraduate degree in International Politics from Pennsylvania State University.

Q. Please describe your professional experience.

A. Please see my resume, UGI Gas Exhibit TAH-1, which is attached to my testimony.

Q. Have you testified previously before this Commission?

A. Yes. Attached to my direct testimony is UGI Gas Exhibit TAH-1, which contains a list of the Commission's proceedings in which I previously testified. Additional exhibits that I am sponsoring are described below.

II. PURPOSE OF TESTIMONY

Q. What is the purpose of your testimony?

A. I am providing testimony on behalf of UGI Gas in support of the Company's proposed revenue requirement. First, I explain the uniform rate structure that was achieved in the Company's "2019 Base Rate Case"[1] and "2020 Base Rate Case" (Part III).[2] Second, I provide an overview of the Company's principal accounting exhibits for the historic year ended September 30, 2021 ("HTY"), future year ending September 30, 2022 ("FTY") and the fully projected future test year ending September 30, 2023 ("FPFTY") (Part IV). Third, I explain UGI Gas's budgeting processes (Part V). Fourth, I present UGI Gas's ratemaking

---

[1] *Pennsylvania Public Utility Commission (et al.) v. UGI Utilities, Inc. – Gas Division*, Docket No. R-2018-3006814 (the "2019 Base Rate Case").

[2] *Pennsylvania Public Utility Commission (et al.) v. UGI Utilities, Inc. – Gas Division*, Docket No. R-2019-3015162 (the "2020 Base Rate Case").

presentation for the FPFTY, including its revenues and operating expenses claims, and certain pro forma adjustments (Part VI). The Company's rate proposal in this case is predicated on its FPFTY exhibit, which demonstrates the need for a revenue increase of $82.7 million. I also address the Company's compliance with Act 40 of 2016 (Part VII).

Q. Ms. Hazenstab, are you sponsoring any exhibits in this proceeding?

A. Yes. In addition to UGI Gas Exhibit TAH-1 mentioned above, I am sponsoring UGI Gas Exhibit A (Fully Projected), UGI Gas Exhibit A (Future), and UGI Gas Exhibit A (Historic). Other Company witnesses present testimony in support of various portions of these exhibits, including rate base (Vivian K. Ressler, UGI Gas Statement No. 3), operating revenue (Sherry A. Epler, UGI Gas Statement No. 8), fair rate of return (Paul R. Moul, UGI Gas Statement No. 6), depreciation expense (John F. Wiedmayer, UGI Gas Statement No. 4), salary and wage adjustments (Christopher R. Brown, UGI Gas Statement No. 1), and taxes (Nicole M. McKinney, UGI Gas Statement No. 7). I am also sponsoring certain responses to the Commission's standard filing requirements, as indicated on the master list accompanying this filing.

III. UNIFORM RATE STRUCTURE AND RIDERS

Q. Prior to the 2019 Base Rate Case, did the Company have consolidated and uniform distribution and purchased gas cost rates?

A. No.

Q. Please explain the rate structure that was approved by the Commission in the Company's 2019 Base Rate Case and 2020 Base Rate Case.

A. In the 2019 Base Rate Case proceeding, the Company proposed a consolidated revenue requirement and a uniform rate structure to reflect its common management, common practices/procedures, common financing, and common systems more accurately. The Commission's Opinion and Order (entered on October 4, 2019) in the 2019 Base Rate Case approved a settlement agreement among the major parties, which, among other things, consolidated the Company's revenue requirement and moved most rate classes to uniform distribution and purchased gas cost rates. In the Company's 2020 Base Rate Case, the remaining unconsolidated distribution rates for rate classes N, NT, and DS were moved closer to parity. In this proceeding, the Company proposes to complete the rate unification process, as further described by UGI Gas witnesses Christopher R. Brown (UGI Gas Statement No. 1) and Sherry A. Epler (UGI Gas Statement No. 8).

IV. OVERVIEW OF PRINCIPAL ACCOUNTING EXHIBITS

Q. Please describe the principal accounting exhibits used to support UGI Gas's claims in this proceeding.

A. UGI Gas Exhibit A (Fully Projected) provides the calculation of the revenue requirement for the FPFTY, including principal accounting exhibits, rate base claims, revenue at present rates, operating expense claims, taxes and certain *pro forma* adjustments. The FPFTY information is derived from UGI Gas's operating and capital budgets for the 12-month period ending September 30, 2023. UGI Gas Exhibit A (Future) is the principal accounting exhibit for the FTY, including certain *pro forma* adjustments. The FTY information is derived from UGI Gas's operating and capital budgets for the 12-month period ending

September 30, 2022. UGI Gas Exhibit A (Historic) is the principal accounting exhibit for the HTY, with appropriate ratemaking adjustments. The HTY information is derived from the book accounting data for the 12-month period ended September 30, 2021. The future and historic schedules are provided as a benchmark for comparison with the FPFTY claim, which, as explained above, is the basis for UGI Gas's proposed revenue increase of $82.7 million.

Q. Please provide an overview of UGI Gas's principal accounting exhibits.

A. As noted above, UGI Gas's claims in this case are based on UGI Gas Exhibit A (Fully Projected). This presentation is comprised of four sections:

<u>Section A</u> summarizes UGI Gas's requested *pro forma* rate base, revenues, and expenses at present rates and the calculation of its requested revenue increase.

<u>Section B</u> includes basic accounting data extracted from UGI Gas's financial, accounting, operating and capital budgets, and other records. This data includes a balance sheet, a statement of net operating income and test year revenues, a schedule of expense items by cost element, and a tax expense calculation. Also included are schedules showing UGI Gas's embedded cost of debt, year-end capital structure and overall claimed rate of return.

<u>Section C</u> provides the elements of UGI Gas's rate base claim and how each element of that claim is derived. UGI Gas's rate base includes utility plant in service, gas storage inventory, cash working capital, materials and supplies inventory, and offsets for accumulated depreciation, accumulated deferred income taxes, and customer deposits.

<u>Section D</u> presents UGI Gas's revenues and expenses on a *pro forma* ratemaking basis. Necessary adjustments to budgeted levels of expense items and revenues are summarized in Schedules D-1 through D-2 and detailed in the remaining schedules. The resulting FPFTY expense and revenue levels are shown on Schedule D-3 and were used to establish UGI Gas's *pro forma* income at present and proposed rates as set forth in Schedule A-1.

Q. What information is included in UGI Gas Exhibits A (Historic) and A (Future)?

A. UGI Gas Exhibits A (Historic) and A (Future) follow the format of UGI Gas Exhibit A (Fully Projected), but reflect data for the fiscal year ended September 30, 2021, and the fiscal year ending September 30, 2022, respectively. This information is provided to comply with the Commission's filing requirements and provides a basis for comparing the FPFTY claims with actual and projected results from the HTY and FTY.

Q. What are the data sources for the UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Historic)?

A. This data is derived from UGI Gas's books and records as well as its capital and operating budgets. UGI Gas Exhibit A (Future) is based on adjusted budgeted data for the FTY. UGI Gas Exhibit A (Historic) is based on adjusted experienced data for the HTY.

V. <u>BUDGETING PROCESS</u>

Q. Please explain UGI Gas's budgetary preparation and approval process.

A. UGI Gas's fiscal year begins on October 1 and ends on September 30 of the following year. Preparation of the UGI Gas Operating Budget for the subsequent fiscal year begins during the spring, *i.e.*, the budget process for the October 1, 2021 through September 30, 2022 fiscal year begins in the spring of 2021, with information being requested and incorporated from all departments. Internal reviews and revisions occur throughout the spring and summer before the final budget is approved by the UGI Board of Directors in September – immediately prior to implementing the budget.

The revenue portion of the budget is a joint effort between the Marketing, and Financial Planning and Analysis ("FP&A") departments. The Marketing department provides customer growth and attrition information by customer class along with specific large commercial and industrial sales and revenue budget projections. The FP&A department develops normalized usage per customer for core customer classes, annualized sales, and total revenues (as further explained in the direct testimony of UGI Gas witness Ms. Epler (UGI Gas Statement No. 8)). The number of customers by customer class is determined using a wide range of factors, including trends in usage, the level of applications and inquiries for service from existing customers, new construction, and shifts in type of residence and customer mix. Usage per customer is developed by reviewing the long-term usage trends and current and anticipated levels of operation. The budgeted number of customers and usage per customer are combined to produce monthly budgeted sales. The revenue budget is calculated by applying tariff rates for each customer class to budgeted sales, plus an adjustment for unbilled revenue. The sales and revenue budget is then reviewed with and approved by senior management.

Concurrently, the expense portion of the Operating Budget is prepared. Operating and maintenance expenses are developed by each functional manager based upon review of trends, monthly expenditure patterns, and new or changed programs. Employee levels are reviewed, and appropriate staffing levels are set for the upcoming fiscal year. The direct expense portion of the Operating Budget is submitted for review and approval by senior management. UGI Gas's direct expenses are then consolidated with allocated expenses from shared administrative and general functions within UGI and from other affiliated companies providing shared services to UGI Gas to develop the budgeted Statement of Operations. Allocated expenses in the Statement of Operations include functions such as accounting, rates, gas supply, human resources, information systems, payroll, and remittance processing, which are performed in accordance with PUC-approved methods of allocation and affiliated interest arrangements or agreements.

The final Operating Budget is then submitted to UGI's President and Board of Directors for their review and approval. Each element of the UGI Gas Operating Budget is formulated by personnel with responsibilities specific to each aspect of the operation. The first and primary use of the Operating Budget is as a working tool for the management and planning of the business.

Operating personnel in each functional area prepare a detailed list of capital projects. Each project is identified, described, and justified along with a breakdown of the costs associated with it. These projects are presented to senior management, which reviews them in terms of priority, capital availability, and strategic alignment with the operating budget. After due consideration, the Capital Budget is set and presented, along with the Operating Budget, to senior management in a series of review meetings. Additional information concerning the factors considered in establishing the UGI Gas Capital Budget is provided in the direct testimony of Vicky A. Schappell (UGI Gas Statement No. 5).

The UGI Gas Capital Budget is prepared in conjunction with the Operating Budget. With the passage of Act 11 of 2012, UGI Gas has also instituted a process for establishing an Operating Budget and Capital Budget for an additional fiscal year in the future, *i.e.*, the FPFTY. This process is the same as outlined above; however, the starting point for the additional year is the FTY budget. The FTY revenue budget is based on normalized weather conditions, per customer usage trends, and projections concerning growth in numbers of customers. Similarly, FTY budget expense amounts are adjusted for salary and personnel increases, known program changes, and expense needs. For the capital budget, known capital projects are included based on the process described above, and additional assumptions are made for emergent new business opportunities and other operating and capital expenditures based on past experience and current trends, as described in Ms. Schappell's testimony (UGI Gas Statement No. 5).

Q. Please explain how expenses from affiliated companies are treated to develop the budgeted Statement of Operations.

A. UGI Gas incurs costs for services provided by UGI Corp., and other affiliated companies, in accordance with affiliated interest arrangements authorized by the Commission. UGI also allocates or assigns costs between UGI Electric and UGI Gas. All costs that can be identified as pertaining exclusively to an operating unit are billed directly to that unit. Those costs that cannot be directly associated with the operation of an individual operating unit are allocated to the various companies benefiting from the service. Allocations are made by using a methodology applicable to the cost (*e.g.*, budgeted time allocations, number of employees, etc.) or, if no one methodology is specific to the cost, by using a formula referred to as the Modified Wisconsin Formula ("MWF") or another reasonable allocation methodology. The MWF or other allocation methodology achieve an equitable distribution of common expenses based on the relative activity and size of each operating unit to the total of all operating units, which benefit from the respective activities. Activity is measured by total revenues and total operating expenses and size is measured by tangible net assets employed (excluding acquisition goodwill).

Q. How is the budget information used to support UGI Gas's requested revenue increase?

A. This budget information is the starting point for UGI Gas's claims and is adjusted as appropriate to reflect new information gained since the completion of the budgeting process and through application of other appropriate ratemaking principles.

VI. REVENUE REQUIREMENT FOR THE FULLY PROJECTED FUTURE TEST YEAR

Q. How is your discussion of UGI Gas's FPFTY revenue requirement presentation organized?

A. In Section VI.A, I present a summary of UGI Gas's FPFTY revenue requirement. In Section VI.B., I discuss UGI Gas's proposed rate base. In Section VI.C., I explain the determination of UGI Gas's revenues and operating expenses, depreciation, taxes other than income taxes, income taxes, and the gross revenue conversion factor.

A. FPFTY REVENUE REQUIREMENT SUMMARY

Q. How were the *pro forma* revenue increase and revenues at proposed rates established?

A. This calculation is shown at a summary level on Schedule A-1, column 4, of UGI Gas Exhibit A (Fully Projected). Lines 1-9 summarize the *pro forma* measure of value (rate base). Lines 10-19 show *pro forma* revenues at present rates, *pro forma* expenses, taxes at present rates, *pro forma* net operating income at present rates, and the calculated rate of return at present rates. Lines 20-23 show the increase in net operating income required to permit UGI Gas to earn its required overall rate of return of 7.96%. Application of the Gross Revenue Conversion Factor ("GRCF") on line 24 establishes the revenue increase shown on line 25 needed to generate that net operating income. Column 4 of Schedule A-1 shows the level of the revenue increase and the increase in expenses associated with the revenue increase. Column 5 of Schedule A-1 shows the revenue, expenses, and rate base at proposed rates, as well as the resulting rate of return of 7.96%.

Q. What is the overall requested increase in revenue?

A. The overall requested increase in revenue is $82.7 million. This represents the difference between the *pro forma* FPFTY revenue requirement of $1.145 billion and the annual level of operating revenues of $1.063 billion under existing rates. These figures are shown on line 13 of Schedule A-1 of UGI Gas Exhibit A (Fully Projected).

B. FPFTY RATE BASE

Q. With reference to UGI Gas Exhibit A (Fully Projected), please discuss how the Company's specific rate base items are determined.

A. UGI Gas's rate base presentation is shown in UGI Gas Exhibit A (Fully Projected), Schedule C-1. Schedule C-1 summarizes the UGI Gas rate base values for the FPFTY. Column 1 indicates the schedule upon which the calculation of each of the rate base elements is found. Columns 3 and 5 show the amounts at present and proposed rates, respectively. UGI Gas's total FPFTY rate base claim is $3.169 billion. Please see the direct testimony of Vivian K. Ressler (UGI Gas Statement No. 3) for a discussion of the rate base components.

C. FPFTY REVENUES AND EXPENSES

Q. How were revenues at present rates determined?

A. Revenues at present rates were determined by adjusting the budgeted revenues to reflect the anticipated change in the number of customers, the projected change in existing customer usage, the roll-in of revenues from the Distribution System Improvement Charge ("DSIC"), and other *pro forma* annualizing and normalizing ratemaking adjustments. The net effect of these adjustments is shown in UGI Gas Exhibit A (Fully Projected), Schedule D-5, and is discussed in the direct testimony of Sherry A. Epler (UGI Gas Statement No. 8).

Q. Please provide an overview of UGI Gas's principal accounting exhibits relative to operating expense claims.

A. UGI Gas's principal accounting exhibit is UGI Gas Exhibit A (Fully Projected), which includes a presentation for the FPFTY ending September 30, 2023. Section D of UGI Gas Exhibit A (Fully Projected) presents UGI Gas's claims and necessary adjustments to budgeted levels of expense items and revenues. The *pro forma* adjustments related to expense are summarized in Schedules D-3 and D-6 through D-34. These expense adjustments are used, in part, to derive UGI Gas's *pro forma* income at present and proposed rates as set forth in Schedule D-1.

UGI Gas Exhibits A (Historic) and A (Future) follow the format of UGI Gas Exhibit A (Fully Projected) but reflect data for the appropriate test years ending September 30, 2021 and 2022, respectively. This information is provided in accordance with the Commission's filing requirements and provides a basis for comparing UGI Gas's FPFTY claims with prior results.

1. Summary

Q. Please describe Schedule D-1 of UGI Gas Exhibit A (Fully Projected).

A. Schedule D-1 presents a summary income statement that includes UGI Gas's claimed gas revenues, expenses, and taxes at present and proposed rate levels. The direct testimony of Sherry A. Epler (UGI Gas Statement No. 8) addresses the presentation of *pro forma* revenues, adjustments thereto, and the supporting schedules. Schedule D-1 also shows the proposed revenue increase of $82.7 million on line 4 in column 2.

Q. What is the level of net income at proposed rates?

A. As shown on column 3, line 21, this amount is $252.255 million. This represents a $57.867 million increase from the level under current rates ($194.387 million), as shown on line 21 in column 1 of Schedule D-1.

Q. Please describe Schedule D-2.

A. Schedule D-2 shows the development of the various line items found on Schedule D-1. Column 2 contains the Company's budgeted level of revenues and expenses for the 12-month period ending September 30, 2023. Column 3 shows adjustments to the column 2 figures, where applicable, to reflect various annualization and/or normalization adjustments. Column 4 is the sum of columns 2-3. The amount of the revenue increase and related expenses are shown in column 5 with the resulting revenues and expenses at proposed rates shown in column 6.

Q. Are there schedules showing the derivation of the adjustments shown in Schedule D-2, column 3?

A. Yes. The derivation of the various column 3 revenue adjustments is included in UGI Gas Exhibit A (Fully Projected) in summary fashion on Schedule D-3, page 1, lines 1-13, and then listed by individual adjustment on Schedule D-5. Customer charge and distribution rate revenue adjustments for each customer class are shown on lines 1-5 of Schedule D-3. Gas cost revenue adjustments for each customer class are shown on lines 6-10 and details of other revenue adjustments are shown on lines 11-13 of Schedule D-3. Details for each revenue adjustment are shown in Schedules D-5 (including supporting Schedule D-5A) and are discussed in the direct testimony of witness Sherry A. Epler (UGI Gas Statement No. 8). Regarding *pro forma* expenses, the derivation of the various adjustments is summarized individually on pages 1-2 of Schedule D-3, lines 16-55. The details for these adjustments are found in Schedules D-6 through D-31.

2. Operating Expense

Q. How were the claimed operating expenses for the FPFTY determined?

A. *Pro forma* FPFTY expenses are based on the budgeted level of expenses as a starting point. The budgeted data, by FERC account, was then adjusted in accordance with Commission precedent and generally accepted ratemaking principles to reflect a normal, ongoing level of operations. Schedules supporting those adjustments are found in UGI Gas Exhibit A (Fully Projected), Section D.

Q. Does UGI Gas budget its operating expenses by FERC account?

A. Yes, it does. UGI Gas budgets its operating expenses both by FERC account and by cost element, such as payroll, employee benefits, rent, etc. UGI Gas uses historic data as a basis for the distribution of expenses to each FERC account. This is shown in Schedule B-4 and is the starting point to determine the FPFTY adjusted operating expenses shown on Schedule D-3.

Q. Were each of the *pro forma* adjustments reflected on Schedule D-3 also charged to an appropriate FERC account?

A. Yes. Each *pro forma* adjustment was calculated based on the appropriate cost element and then distributed to FERC accounts directly or by using the ratio used to distribute the budgeted cost for that element.

Q. Does Schedule D-3 depict the *pro forma* expense adjustments using FERC accounts?

A. Yes. These *pro forma* expense adjustments are presented by major FERC account category. These adjustments are also shown in the Section D summary schedules.

Q. Schedule D-3 to UGI Gas Exhibit A (Fully Projected) shows an adjustment to Gas Costs in column 4. Please discuss this adjustment.

A. The detail for this adjustment is shown in Schedule D-6. This adjustment is designed to increase purchased gas cost expense by the same amount of the gas cost revenue adjustment recommended in the direct testimony of Sherry A. Epler (UGI Gas Statement No. 8) and as shown on Schedule D-5, column 4, lines 7-12. UGI Gas recovers its purchased gas costs on a dollar-for-dollar basis with no profit through an automatic adjustment clause mechanism pursuant to Section 1307(f) of the Public Utility Code. Therefore, the increase in purchased gas costs of $38.877 million equals the increase in gas cost revenue as recommended by Ms. Epler. Thus, the purchased gas cost expense has no effect on net operating income.

Q. Please discuss the revenue adjustment, i.e., operations and maintenance fees, for a renewable natural gas ("RNG") interconnection on Schedule D-5B.

A. Schedule D-5B, Column 3, shows a $348,000 increase to revenue, which represents an annual payment for operating and maintaining the RNG interconnection with Archaea Energy's Keystone Landfill in Dunmore, Pennsylvania that was not included in the budget. The interconnect is necessary for the Company to receive converted biogas (i.e., RNG) generated from Archaea's facility. These payments began in December 2021.

Q. Please discuss the Salaries and Wages adjustment shown on Schedule D-7 in the amount of $1.186 million.

A. Schedule D-7, Column 4, shows a $1.186 million increase to budgeted salaries and wages to reflect end of FPFTY operating conditions. This adjustment annualizes payroll expense and is distributed among the various cost accounts. Page 2 of Schedule D-7 shows the development of this adjustment.

Q. Please describe the annualization adjustment.

A. This adjustment annualizes the effect of wage increases for unionized, exempt, and non-exempt employees that will take place during the FPFTY. Schedule D-7, page 2, line 2 reflects the increased percentages for each classification of employee. Lines 3 through 5 indicate the percentage of the year for which the salary and wage increases are not reflected in the budget.

Q. How did you determine the split of the budgeted salaries among the various employee classifications shown on Schedule D-7?

A. The split of the budgeted salaries among the various classifications shown on Schedule D-7, page 1, was determined using the allocations of labor and headcount for Operating and Maintenance expense in the budget. These employee groupings are the same groupings utilized in developing the labor budget. These categories were used in UGI Gas's budgeting process for the operating expense portion of salaries and wages.

Q. Are there other salary and wage adjustments shown on Schedule D-7?

A. Yes. Schedule D-7, Column 2 shows a total adjustment to salaries and wages in the amount of $2,385,000, which consists of three separate adjustments. The first adjustment of $1,148,000 for salary increases and $51,000 for incremental incentive bonus compensation is presented on Schedule D-9. It aligns salaries for specific positions with relevant industry pay-scales. This adjustment is discussed in more detail in the direct testimony of Christopher R. Brown (UGI Gas Statement No. 1). The second adjustment of $643,000 on Column 2, line 4, is presented on Schedule D-17. It represents twenty (20) unbudgeted positions for field operations. These positions are needed for succession planning for field operations roles. This adjustment is discussed in more detail in the direct testimony of Timothy J. Angstadt (UGI Gas Statement No. 9). The final adjustment for $543,000 in Column 2, line 8, is also presented on Schedule D-9 (at Column 1, lines 6 plus 8). It represents the addition of five (5) new positions to implement Transportation Security Administration ("TSA") Security Directives 2021#1 and 2021#2. This adjustment is discussed in more detail in the direct testimony of Christopher R. Brown (UGI Gas Statement No. 1).

Q. What adjustments are shown on Schedule D-8?

A. Schedule D-8 represents an adjustment in the amount of $3.310 million for environmental remediation expense. The adjustments are described in further detail in the direct testimony of Vivian K. Ressler (UGI Gas Statement No. 3).

Q. Please describe the salary and wage adjustments shown in Schedule D-9.

A. The salary and wage adjustments are discussed in the direct testimony of Christopher R. Brown (UGI Gas Statement No. 1). The first adjustment, which is shown on Schedule D-9, Column 1, line 4, relates to budget modifications the Company is making as a result of a recent compensation benchmarking review that focused on how UGI Gas may continue to remain productive in an increasingly competitive labor market. The $1.32 million adjustment on Schedule D-9, Column 2, line 5, reflects an incremental increase in salary, bonus, and benefit costs. The Company calculated the Benefits component (Schedule D-9, Column 1, line 4) by applying 10% to the Compensation Benchmark Adjustment Subtotal (*i.e.*, 10% x $1,199,000 = $120,000).

The second adjustment, which is shown on Schedule D-9, Column 1, line 7, in the amount of $49,000, is related to the TSA Security Directives discussed above. In addition to the $543,000 adjustment for the five salaried positions needed to comply with the new TSA Directions shown above (Schedule D-9, Column 1, lines 6 and 8), the Company is making another adjustment to account for the employee benefits associated with the five (5) new positions (in the amount of $49,000), which is shown on Schedule D-9, line 7. These additional benefit expenses were calculated using an average per employee benefit cost of $9,702 per each of the 5 positions. Employee benefits were not included in the calculation of salaries associated with these employees in Schedule D-7.

Q. Please discuss Schedule D-10, which shows an adjustment for Rate Case Expense.

A. Lines 1 through 3 show the rate case expense that UGI Gas expects to incur in this case of $1.055 million. That amount is then normalized over a one-year period. The budgeted amount of rate case expense in the FPFTY was $1 million. The budget was increased by $55,000 as shown in Column 3, line 8 to reflect more current costs.

Q. What is the nature of the adjustments shown on Schedule D-11?

A. Schedule D-11 represents adjustments in the amount of $2.176 million for uncollectible expense. The adjustments are described in further detail in the direct testimony of Vivian K. Ressler (UGI Gas Statement No. 3).

Q. Please explain the adjustment shown on Schedule D-12.

A. Schedule D-12 represents an adjustment in the amount of $92,000 to recover costs incurred to implement the Company's Emergency Relief Program ("ERP"), which was established in Docket No. R-2019-3015162. The adjustment is explained in further detail in the direct testimony of Vivian K. Ressler (UGI Gas Statement No. 3).

Q. What is the nature of the adjustment shown on Schedule D-13?

A. Schedule D-13 represents adjustments in the amount of $1.883 million for costs to comply with OSHA/Emergency Temporary Standard ("ETS") directives related to COVID-19.[3] These adjustments are explained in further detail in the direct testimony of Vivian K. Ressler (UGI Gas Statement No. 3).

[3] OSHA, COVID–19 Vaccination and Testing; Emergency Temporary Standard, Docket No. OSHA-2021-0007 (effective November 5, 2021).

Q. Please explain the adjustment in the amount of $8.388 million shown on Schedule D-14.

A. Schedule D-14 represents an adjustment in the amount of $8.388 million for pension benefit expense. This adjustment is described in further detail in the direct testimony of Vivian K. Ressler (UGI Gas Statement No. 3).

Q. Please discuss the *pro forma* adjustment on Schedule D-15 for Injuries and Damages.

A. Schedule D-15 represents an adjustment in the amount of ($670,000) for injuries and damages. This adjustment is described in further detail in the direct testimony of Vivian K. Ressler (UGI Gas Statement No. 3).

Q. Please discuss the Customer Accounts Expense Adjustment on Schedule D-15.

A. This adjustment includes a component to recover unbudgeted interest on customer deposits. Further discussion on customer deposits can be found in the direct testimony of Vivian K. Ressler (UGI Gas Statement No. 3).

Q. The Customer Accounts Expense Adjustment on Schedule D-15 shows a $972,000 cost item for Interest on Customer Deposits at line 10. Please explain.

A. The Company is required to pay interest on Customer Deposits that it holds in accordance with its tariff requirements. As this is a typical business expense, the Company has added this amount to its expense claim that is otherwise not reflected in the operations budget. It is calculated by using the average level of customer deposits anticipated for the FPFTY (*i.e.*, $21.600 million) times the required interest rate (4.50 percent) anticipated for the

FPFTY, as published by the Pennsylvania Department of Revenue and as required under the Company's tariff.

Q. Please discuss the Rent Expense Adjustment on Schedule D-15.

A. An adjustment in the amount of $565,000 recovers unbudgeted rent expense associated with the Auburn Capacity Lease Agreement approved by Secretarial Letter issued by the Commission at Docket No. G-2021-3028753 on November 22, 2021. This amount pertains to an agreement to lease additional capacity for a Rate XD customer and will be directly assigned to the customer in the Company's cost of service study. Please see the direct testimony of Christopher R. Brown (UGI Gas Statement No. 1) for additional detail on this agreement.

Q. Please discuss the *pro forma* adjustment on Schedule D-16 for Universal Service expense.

A. This adjustment normalizes the amount of Universal Services Program ("USP") expense recovered through the Company's USP Rider based on the level of the Universal Service Rider charge effective at the time of the Company's filing in this matter. The USP Rider recovers the Company's Customer Assistance Program ("CAP") Credits, Pre-Program Arrearages, third party administrator expense, LIURP expense, and administrative costs associated with its Project Share program. The Company's claim represents the ongoing normalized level of costs based on anticipated levels of CAP program participation. This adjustment increases the Company's budgeted expense by $548,000, to align the Company's current USP Rider charge. As the USP Rider is a fully reconcilable rider, the

USP adjustment assures that expenses related to the existing rider are aligned with revenues and that no impact related to USP flows through to the revenue requirement calculation. Please see the direct testimony of Ms. Epler (UGI Gas Statement No. 8) for additional discussion of the USP Rider.

Q. Please describe the adjustment on Schedule D-17.

A. The adjustment shown on Schedule D-17, Column 2, line 2, in the amount of $124,000 is for the employee benefits for the twenty (20) new positions. These additional benefit expenses were calculated using an average per employee benefit cost of $9,702. This amount was then allocated to capital expense and operations expense.

Q. Please explain the adjustment for Energy Efficiency and Conservation ("EE&C") Programs shown on Schedule D-19.

A. As with the USP Rider adjustment discussed above, this adjustment in the amount of $3.480 million aligns the amount of EE&C expense with the EE&C Rider charge (based on the level of the EE&C Rider charges effective at the time of the Company's filing in this matter). The EE&C Rider recovers the Labor and Administrative, Prescriptive Program, Retrofit Program, New Construction Program, Custom Program, Legal and Consulting, Combined Heat and Power, and other Costs associated with the Company's Energy Efficiency and Conservation Program. This adjustment increases the Company's budgeted expense to align with the Company's current EE&C charge. As the EE&C Rider is a fully reconcilable rider, the EE&C adjustment assures that expenses related to the existing rider are aligned with revenues and that no impact related to EE&C flows through to the revenue requirement calculation. Please see the direct testimony of Ms. Epler (UGI Gas Statement No. 8) for additional discussion of the EE&C Rider.

3. Depreciation Expense

Q. How was the level of depreciation expense for the FPFTY determined?

A. UGI Gas's depreciation study is set forth in UGI Gas Exhibit A (Fully Projected) and shows the determination of *pro forma* depreciation expense. This study uses the FPFTY plant in service and the applicable depreciation rates, service lives, and procedures. A summary of the budgeted depreciation expense and adjustments thereto is found in UGI Gas Exhibit A (Fully Projected), Schedule D-21, and is further explained in the direct testimony of John F. Wiedmayer (UGI Gas Statement No. 4).

Q. Please describe the depreciation expense adjustments shown on Schedule D-21.

A. UGI Gas witness Mr. Wiedmayer (UGI Gas Statement No. 4) presents the depreciation analysis that serves as the foundation of the depreciation adjustment. The adjustment for depreciation expense of $2.099 million set forth on Schedule D-21, page 2, column 3, line 64, annualizes budgeted FPFTY depreciation expense to calculate an entire year's worth of depreciation on plant in service (as of the end of the FPFTY). This schedule also shows a decrease to the net negative salvage amortization of $39,000. The total annualized depreciation expense for the FPFTY, net of costs charged to clearing accounts and net salvage amortization, is $125.537 million (as shown on Schedule D-3, page 2, column 13, line 54).

4. Taxes other than Income Taxes

Q. Please describe the taxes other than income adjustments shown on Schedule D-31.

A. Schedule D-31 contains the details for taxes other than income adjustments. The adjustments to the payroll tax expenses on lines 4-6 are calculated by multiplying the ratio of tax expense to payroll expense included in the FPFTY budget by the amount of the payroll adjustment derived in Schedule D-7. This produces an adjustment to the amount of social security, Federal Unemployment Tax ("FUTA") and State Unemployment Tax ("SUTA") expense in the amount of $298,000. The calculation of these adjustments is shown in more detail on Schedule D-32. The other components of this schedule are supported in the testimony of Nicole M. McKinney (UGI Gas Statement No. 7).

5. Income Taxes

Q. What is the purpose of Schedules D-33 and D-34?

A. These schedules show the derivation of the Company's pro forma income tax expense claim, including the normalization of the effects of accelerated tax depreciation, as discussed in the direct testimony of Nicole M. McKinney (UGI Gas Statement No. 7).

6. Gross Revenue Conversion Factor

Q. What is the purpose of Schedule D-35?

A. Schedule D-35 shows the calculation of the Gross Revenue Conversion Factor used on Schedule A-1 to calculate the level of revenues required to achieve the net operating income required to generate the rate of return supported by the direct testimony of Paul R. Moul (UGI Gas Statement No. 6). These additional revenues are required to recognize that uncollectible accounts expense vary with the level of revenue and to recognize the additional state and federal income taxes attributable to the proposed rate increase.

VII. ACT 40 REQUIREMENTS

Q. Ms. Hazenstab, are you familiar with Section 1301.1 of the Public Utility Code, which is otherwise known as Act 40 of 2016?

A. Yes, I am. The legislation, among other things, eliminated the use of consolidated tax savings adjustments for setting rates for public utilities in Pennsylvania. It requires a utility to demonstrate that it shall use at least 50 percent of what otherwise would have been the revenue requirement associated with a consolidated tax savings adjustment to support reliability or infrastructure related to the rate-base eligible capital investment and that the other 50 percent shall be used for general corporate purposes. My understanding is predicated in part on the advice of counsel.

Q. Has the Company calculated what would have been the ratemaking level of a consolidated tax savings adjustment for UGI Gas prior to the enactment of Section 1301.1 of the Public Utility Code?

A. Yes, Company witness Nicole M. McKinney presents such a calculation in her testimony (UGI Gas Statement No. 7). The Company's three-year average of consolidated taxable income was $43.735 million. Based on Ms. McKinney's calculation of the net positive taxable income of the three merged entities, the amount of consolidated tax savings adjustment applicable to UGI Gas would have been $2.553 million.

Q. Does the Company's rate base claim in this case support the conclusion that it is using at least 50 percent of that revenue requirement amount (associated with a consolidated tax savings adjustment) to support reliability or infrastructure related capital investments?

A. Yes, as included in Schedule C-2 and as discussed in the direct testimony of Ms. Schappell (UGI Gas Statement No. 5), UGI Gas's *pro forma* capital additions for reliability or infrastructure projects in the FTY is $289 million and for the FPFTY is $311 million. This expenditure level is greater than 50% of the amount of what would have been the consolidated tax savings adjustment under prior ratemaking principles.

Q. Does the Company's rate base claim in this case support the conclusion that it is using at least 50 percent of that revenue requirement amount to support general corporate purposes?

A. Yes. The Company's general corporate purpose expense will also exceed 50% of the tax benefit resulting from elimination of the consolidated tax adjustment. Indeed, the Company anticipated an operating expense budget of more than $760 million in operating expenditures to be used to render gas distribution service; 50 percent of the consolidated tax adjustment revenue requirement would equate to only $1.825 million.

Q. Is the Company's presentation in this filing consistent with the Commission's and the Commonwealth Court's treatment of PA Act 40 of 2016?

A. Yes. The Company's presentation in this filing is consistent with the Commission's determination on PA Act 40 in the UGI Electric 2018 Base Rate Proceeding at Docket No.

R-2017-2640058, and the Commonwealth Court's order affirming the Commission's order on appeal.

Q. Does this conclude your direct testimony?

A. Yes, it does.

UGI GAS STATEMENT NO. 3

VIVIAN K. RESSLER

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2021-3030218

UGI Utilities, Inc. – Gas Division

Statement No. 3

Direct Testimony of
Vivian K. Ressler

Topics Addressed:	**Accounting Process and Historic Costs**
	Rate Base
	Operating Expense Adjustments
	Capital Treatment of Certain
	    Information Technology Costs
	COVID-19 Pandemic Costs
	Costs for Federal Mandates Regarding
	    COVID-19 Vaccination & Testing

Dated: January 28, 2022

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Vivian K. Ressler. My business address is 1 UGI Drive, Denver, Pennsylvania 17517.

Q. By whom are you employed and in what capacity?

A. I am employed by UGI Utilities, Inc. ("UGI") as Senior Manager Plant and Regulatory Accounting. UGI is a wholly-owned subsidiary of UGI Corporation ("UGI Corp."). UGI has two operating divisions, the Gas Division ("UGI Gas" or the "Company") and the Electric Division ("UGI Electric"), each of which is a public utility regulated by the Pennsylvania Public Utility Commission ("Commission" or "PUC").

Q. What are your responsibilities as Senior Manager Plant and Regulatory Accounting?

A. I have responsibility for UGI's plant accounting and regulatory accounting processes. I lead a team of accountants responsible for maintaining complete and accurate plant accounting records, and for preparing and submitting certain regulatory filings with the PUC and the Federal Energy Regulatory Commission ("FERC"). My duties also include the coordination of these functions with UGI's Controller and Chief Financial Officer as well as financial accounting and reporting personnel at UGI Corp.

Q. Please describe your educational background and work experience.

A. My full educational background and work experience are set forth in my resume attached as UGI Gas Exhibit VKR-1.

Q. Have you testified previously before this Commission?

A. Yes. I provided testimony in the 2020 Gas Base Rate Case proceeding for UGI Gas at Docket No. R-2019-3015162 and the 2021 Electric Base Rate Case proceeding for UGI Electric at Docket No. R-2021-3023618.

Q. What is the purpose of your testimony?

A. I am providing testimony on behalf of UGI Gas in support of the Company's rate case accounting methodology. First, I will explain UGI Gas's accounting processes, which were used to develop the actual book accounting results, which are the basis for the Company's historic test year ended September 30, 2021 ("HTY") (Part II).[1] Second, I will present the Company's claim for rate base in this proceeding using a fully projected future test year ("FPFTY") methodology. (Part III). Next, I will discuss certain operating expense adjustments (Part IV) and the Company's accounting for certain Information Technology ("IT") costs (Part V). Then, I will discuss the Company's COVID-19 Pandemic Costs (Part VI). Finally, I will address certain costs directly attributable to compliance with: (1) the Emergency Temporary Standard ("ETS") for COVID-19 vaccination and testing issued by the Occupational Safety and Health Department of Labor ("OSHA")[2]; and (2) President Biden's COVID-19 Action Plan per Executive Order 14042 (Part VII).

[1] The budgets for the future test year ending September 30, 2022 ("FTY") and the FPFTY ending September 30, 2023 are discussed in the direct testimony of Tracy A. Hazenstab (UGI Gas St. No. 2).
[2] See 86 Fed. Reg. 61,402, Docket No. OSHA-2021-0008 (Nov. 5, 2021).

Q. Ms. Ressler, are you sponsoring any exhibits in this proceeding?

A. Yes. I am sponsoring UGI Gas Exhibit VKR-1. In addition, I am sponsoring those portions of UGI Gas Exhibit A (Fully Projected), Exhibit A (Future) and Exhibit A (Historic), which address rate base and certain adjustments to rate base and operating expenses discussed later in my testimony. I am also sponsoring those responses to the Commission's standard filing requirements as stated on the master list accompanying this filing.

II. ACCOUNTING PROCESS AND HISTORIC COSTS

Q. How are the accounting records of UGI Gas maintained?

A. The accounting records of UGI Gas are kept in accordance with generally accepted accounting principles ("GAAP") and the FERC's Uniform System of Accounts as required under the provisions of 52 Pa. Code § 59.42. The Company also maintains a continuing property records system in accordance with the requirements of 52 Pa. Code § 59.46.

Q. Are the books and records of UGI Gas subject to audit?

A. Yes. The books and records of UGI Gas are audited by its internal auditors. In addition, UGI Gas's books and records are included in Company-wide audits of UGI, performed by its external auditor, Ernst & Young, LLP. The Company's books and records are further subject to audit by the PUC.

Q. Do the continuing property records of UGI Gas reflect the original cost value of property?

A. Yes, they do. UGI Gas's plant in service, plant additions, retirements, and book adjustments have been recorded on an original cost basis in accordance with GAAP and the Uniform System of Accounts requirements.

Q. What process does UGI Gas follow to assure that property reflected in its plant accounts is in service?

A. UGI Gas's capital project managers create records that document the costs of projects and/or asset purchases. When a capital project or asset is placed into service, the project manager records the in-service date and the retirement detail for any related assets that are taken out of service. Then, the record is provided to accounting personnel. This information is transferred through accounting entries into the appropriate UGI Gas plant property accounts, subject to review by authorized individuals who approve the entries and further review by internal and external auditors.

Q How was the Company's accounting process used in preparing the Company's filing?

A. The above-described accounting process was used to prepare the principal accounting exhibits that support UGI Gas's claim in this proceeding. As discussed in the direct testimony of Company witnesses Christopher R. Brown (UGI Gas Statement No. 1) and Tracy A. Hazenstab (UGI Gas Statement No. 2), the Company's claim is based on the FPFTY. The accounting data for the FPFTY was derived from UGI Gas's operating and capital budgets for the 12 months ending September 30, 2023, as shown in UGI Gas Exhibit

A (Fully Projected). The accounting data for the future test year ("FTY") was derived from UGI Gas's operating and capital budgets for the 12 months ending September 30, 2022, as shown in UGI Gas Exhibit A (Future). The accounting data for the HTY was derived from UGI Gas's books and records for the 12 months ending September 30, 2021, as shown in UGI Gas Exhibit A (Historic).

III. FULLY PROJECTED FUTURE TEST YEAR RATE BASE

Q. With reference to UGI Gas Exhibit A (Fully Projected), please discuss how the Company's specific rate base items are determined.

A. UGI Gas's rate base presentation is shown in UGI Gas Exhibit A (Fully Projected), Schedule C-1. It summarizes the UGI Gas rate base values for the FPFTY. Column 1 provides the schedule where the calculation of each of the rate base elements is found. Columns 3 and 5 show the amounts at present and proposed rates, respectively. UGI Gas's total FPFTY rate base claim—net of deductions for accumulated depreciation, accumulated deferred income taxes and customer deposits—is $3.169 billion. Except where otherwise noted, I will describe each of the rate base elements in greater detail below.

1. Utility Plant in Service

Q. Please explain how UGI Gas determined its FPFTY rate base value for plant in service.

A. UGI Gas's claim for utility plant in service represents the sum of the closing plant balances as of September 30, 2021, and budgeted additions placed in service for the years ending September 30, 2022 and September 30, 2023, less expected FTY and FPFTY plant retirements. The direct testimony of Company witness Vicky A. Schappell (UGI Gas Statement No. 5) discusses the capital addition planning process and the basis for the additions placed in service in the FTY and FPFTY.

Q. Please describe Schedule C-2 to UGI Gas Exhibit A (Fully Projected).

A. This schedule presents UGI Gas's FPFTY claim of $5.042 billion for used and useful gas utility plant in service on page 2, column 2, line 64. That amount is reflected on line 1 of the measure of value summary on Schedule C-1. Gas utility plant enables UGI Gas to provide safe and reliable gas service to its customers.

Q. How was the gas utility plant in service amount of $5.042 billion shown on Schedule C-2, page 2, column 2, line 64 determined?

A. As noted above, this amount is based on the *pro forma* balance as of September 30, 2023. The amount includes: (1) utility plant in service as of September 30, 2021 and (2) budgeted capital expenditures expected to be placed in service for the 12-month periods ending September 30, 2022 and 2023, less expected plant retirements during the same period. UGI Gas witness Vicky A. Schappell (UGI Gas Statement No. 5) also discusses the basis for the plant additions in the FTY and FPFTY.

Q. Please describe the information included on Schedule C-2, page 3.

A. This information provides a summary of UGI Gas's *pro forma* claim for utility plant in service by category. Column 2 shows the FPFTY ending balances based on the placed in-service budget; column 3 shows the net effect of the various plant adjustments, if any; and column 4 provides the adjusted FPFTY plant in service.

Q. What information is included on Schedule C-2, pages 4 and 5?

A. Columns 2 and 3 on these pages show the gas plant in service balances for 2022 and 2023 at the FERC account level, based on the placed in service budget. Column 5 provides the ending FPFTY plant balance at the FERC account level.

Q. Where are plant in service additions shown?

A. Pages 6 and 7 of Schedule C-2 provide actual (for the HTY) and projected (for the FTY and FPFTY) plant in service additions. The Company categorizes plant in service additions by FERC account.

Q. Where are plant retirements shown?

A. Pages 8 and 9 of Schedule C-2 provide actual (for the HTY) and projected (for the FTY and FPFTY) plant retirements. Retirements for most plant accounts were projected by plant account. The Company applied the average retirement rate, as a percent of additions, for the five fiscal years 2017 through 2021, to the FPFTY and FTY plant in service additions. For certain plant accounts subject to amortization accounting, retirements are recorded when a vintage is fully amortized. For these accounts, all units are retired when the vintage is fully amortized.

2. Accumulated Depreciation

Q. Please explain how UGI Gas determined its rate base deduction for accumulated depreciation.

A. UGI Gas started with accumulated depreciation as of September 30, 2021, added the budgeted level of depreciation expense for the FTY and FPFTY, and calculated the impact of the FTY and FPFTY plant retirements and a provision for net salvage as shown on Schedule C-3. The depreciation rates and test year expense levels are discussed in the direct testimony of John F. Wiedmayer (UGI Gas Statement No. 4), with the underlying FPFTY depreciation analysis provided in UGI Gas Exhibit A (Fully Projected).

Q. Please describe UGI Gas's accumulated depreciation claim.

A. UGI Gas's accumulated depreciation claim is shown on Schedule C-3 of UGI Gas Exhibit A (Fully Projected). This schedule presents the accumulated provision for depreciation as of September 30, 2023, distributed among the various FERC accounts. The total amount for accumulated depreciation, $1.319 billion, is summarized on page 2, column 2, line 64, of this schedule. That amount is reflected on line 2 of the measure of value summary on Schedule C-1.

Page 3 of Schedule C-3 shows the *pro forma* FPFTY level of accumulated depreciation distributed to the various plant categories. Pages 4 and 5 show the details of the accumulated depreciation by FERC account for Fiscal Years 2022 (column 2) and 2023 (column 3) based on budget plus adjustments (column 4), if any, to arrive at the FPFTY balance (column 5). Pages 6 and 7 show the cost of removal by FERC account and pages 8 and 9 show negative net salvage amortization by FERC account. Pages 10 and 11 include the salvage amounts by FERC account. These amounts are included in the FPFTY accumulated depreciation calculations. The amortization of negative net salvage was calculated using a 5-year amortization schedule in accordance with Commission precedent.

3. Cash Working Capital

Q. Please explain how UGI Gas determined its rate base value for cash working capital ("CWC").

A. CWC is the capital requirement arising from the difference between (1) the lag in the receipt of revenue for rendering service and (2) the lag in the payment of cash expenses incurred to provide that service, as shown in Schedule C-1. A detailed analysis of UGI Gas's CWC requirements is provided in Schedule C-4.

Q. Where is the CWC rate base value summarized?

A. The CWC rate base value is summarized at Schedule C-4, page 1. The various components of the working capital claim are listed on this page, along with a reference to the page where the component is further detailed within Schedule C-4.

Q. What data is shown on page 2 of Schedule C-4?

A. Page 2 summarizes the derivation of UGI Gas's revenue collection lag and overall expense payment lag. The revenue lag days of 61.18 are shown on line 1. Expense lag days include three categories of annual operating expenses: (1) payroll; (2) purchased gas costs; and (3) other expenses. The expense lag days are shown for each component on lines 3-5, which amount to 32.76 (on line 7). The net lag in the collection of revenue is 28.41 days as shown on line 8. This number is then multiplied by the average daily operating expense balance on line 9 to arrive at a base CWC amount for Operations and Maintenance ("O&M")

expense of $52.365 million on line 10. The average daily expense balance of $1.843 million shown on line 9 is determined by dividing the total *pro forma* annual operating expenses, excluding uncollectible accounts expense, of $672.711 million as shown on line 6 of column 2, by the number of days in the year, or 365. I will describe the other components of the CWC claim when I discuss the related schedules.

Q. Please describe the revenue lag calculation shown on Schedule C-4, page 3.

A. The Company's calculation for the total revenue lag days of 61.18 (line 23) consists of several steps. First, the annual revenue (line 18, column 3) is divided by the average month-end accounts receivable balances for the 13 months ended September 30, 2021 (line 17, column 2). This results in an accounts receivable turnover rate of 8.27 (line 19, column 4), which is equivalent to 44.14 lag days (line 20, column 5) (i.e., 365 divided by 8.27 accounts receivable turnover rate). As shown on lines 20-23, the payment portion of the revenue lag is added to: (1) the 1.83-day lag between the meter reading day and the day bills are sent out and recorded as revenue and accounts receivable by the Company (appearing on line 21); and (2) the 15.21-day service lag (i.e., midpoint lag factor), which is the time from the mid-point of the service period until the meter reading date (appearing on line 22). This calculation results in a total revenue lag of 61.18 days.

Q. How was the mid-point of the service period calculated?

A. The mid-point of the service period is equal to the number of days in an average service month (365 days divided by 12, or 30.4 days) divided by two (i.e., 15.21 days).

Q. How are the payroll expense lag days for the CWC claim calculated?

A. This calculation is shown on page 4 of Schedule C-4, lines 1-6. The payroll amounts shown there reflect the payroll for the FPFTY, which is shown on Schedule D-7. The lag periods for union and non-union payroll are shown separately on page 4 of Schedule C-4, lines 1-2, with the same bi-weekly pay period. The lag days are calculated based on 14 days in the pay period divided by 2 (for an average) with a 5-day payroll processing time period added, resulting in a 12-day lag period.

Q. How were the lag days associated with the purchased gas costs shown on Schedule C-4, page 4, line 8 calculated?

A. This calculation is shown on page 6 of Schedule C-4 and is based on a review of gas purchases during the 12-month period of October 2020 through September 2021. The total dollar amount of gas purchased during this period was $374.258 million (on line 13, column 2). The average payment lag was calculated by dividing the total dollar days for purchased gas costs (or $14.916 billion) by the total dollar amount of gas purchased (or $374.258 million), which equals 39.85 days (on line 14). The payment lag was determined using the midpoint of the service period for each of the payments and the payment date for each, averaged over the 12-month study period. The 39.85-day lag for purchased gas costs is then brought forward to Schedule C-4, page 4, line 8 and Schedule C-4, page 2, column 3, line 4.

Q. What are dollar days, and how were they used in the CWC calculation?

A. Dollar days are the product of a payment amount multiplied by the number of days between the invoice date or service date and the date that the payment clears the Company's bank. The dollar days calculation is used to calculate a weighted average number of lag days for both purchased gas costs (Schedule C-4, page 6) and general disbursements (Schedule C-4, page 5).

Q. How were the Other O&M Expense lag days, shown on Schedule C-4, page 4, line 22, calculated?

A. The calculation is shown on page 5 of Schedule C-4. The average payment lag for all remaining expenses was derived from data over the HTY, as shown in more detail on page 5 of Schedule C-4. A summary list of all cash disbursements, including the invoice date, the amount of the disbursement, the date the payment was made, and the type of disbursement (for capital, commodity or expense), during each of these months was used. As shown on page 5, lines 1-24, columns 1 and 2, each month's listing contained numerous cash disbursements. Once the raw payment data was assembled, the dollar days for expense purchases were determined by multiplying the amount of the disbursement by either (i) the number of days from invoice date until bank clearance for wire and Automated Clearing House ("ACH") payments, or (ii) the number of days from the invoice date until check date, plus seven days (representing mail lag) for payments made by check. Disbursements were eliminated if they were included in another calculation (*e.g.*, gas purchases) or were paid for capital items. After these adjustments, the average of the expense lag days for each month shown on Schedule C-4, page 5, column 4, line 25, resulted in a payment lag for general disbursements of 27.08 days. The 27.08- day lag for general disbursements is then brought forward to Schedule C-4, page 4, line 22 and Schedule C-4, page 2, column 3, line 5.

Q. Please explain how the interest payment amount included on line 2 of Schedule C-4, page 1 was determined.

A. The calculation of this amount is shown on Schedule C-4, page 7. This calculation measures the lag associated with the payment of interest on outstanding debt. The *pro forma* annual interest expense shown on line 4 is divided by 365 to obtain the daily interest expense of $155,000 shown on page 7, line 5. That amount is then multiplied by the net payment lag, resulting in a reduction to the working capital allowance of $4.667 million as shown on page 7, line 9 of Schedule C-4. This amount is then included on page 1, line 2 of Schedule C-4.

Q. How was the tax payment lag for the working capital requirement, shown on line 3 of Schedule C-4, page 1, determined?

A. This calculation is shown on page 8 of Schedule C-4. Separate tax payment lag calculations (for working capital) are made for federal income tax, state income tax, PA Property Tax and Public Utility Realty Tax Act ("PURTA") taxes. Each of these calculations is based on anticipated FPFTY tax payments and an April 1 mid-point of annual service. The result for each of these components is shown and summed in column 10 to derive the net working capital allowance for tax payments of $4.402 million.

Q. How was the working capital allowance for prepaid expenses, shown on line 4 of Schedule C-4, page 1, derived?

A. That amount is calculated on page 9 of Schedule C-4 and represents the 13-month average of actual pre-paid amounts for each month ended from September 2020 through September 2021. The 13-month average of total actual pre-paid amounts during that period is $10.047 million.

Q. What is the total amount of the Company's CWC claim?

A. UGI Gas's claim for CWC is $62.148 million. This amount is shown on Schedule C-4, page 1, line 5; Schedule C-1, line 4; and on Schedule A-1, line 4.

4. Gas Storage Inventory

Q. Please explain how the rate base value for gas storage inventory was determined.

A. Gas storage inventory represents gas volumes stored in facilities or in storage fields owned by interstate pipeline or storage companies with whom UGI Gas contracts for capacity. As is typical for most natural gas distribution systems, UGI Gas purchases storage gas throughout the year for use primarily during the winter heating season. Specifically, the Company pays its gas storage bills on a monthly basis once the gas is procured in the same way that its pays for gas procured from other sources. Storage inventory is a physical asset that is included in the Company's rate base claim in the same manner as materials and supplies inventory. UGI Gas's claim for gas storage inventory is based on a 13-month average book value for the period ending September 2021 as shown on Schedule C-5. The average monthly gas inventory balance for the FPFTY is $17.813 million, as shown on

Schedule C-5, line 16. This amount is also used in Schedule C-1, line 5 and Schedule A-1, line 5.

5. Accumulated Deferred Income Taxes

Q. Please explain how the rate base value for Accumulated Deferred Income Taxes ("ADIT"), including Excess Deferred Federal Income Taxes ("EDFIT"), was calculated.

A. The Company's determination of its rate base value for ADIT, including EDFIT, is shown on Schedule C-6 and is discussed in the direct testimony of Nicole M. McKinney (UGI Gas Statement No. 7).

6. Customer Deposits

Q. Please explain how the Company calculated the rate base value for customer deposits.

A. Customer deposits offset the need for UGI Gas to provide capital. UGI Gas's claimed offset for customer deposits is based on the average customer deposit balance for the 13-month period ending September 2021, as shown on Schedule C-7.

Q. What is the rate base offset for customer deposits?

A. The customer deposit offset is $21.600 million, as shown on Schedule C-7, line 16, Schedule C-1, line 7, and on Schedule A-1, line 7.

7. Materials and Supplies Inventory

Q. What is the rate base claim for materials and supplies inventory?

A. UGI Gas maintains various materials and supplies in inventory for use in its operations. The Company's claim for materials and supplies inventory is $15.707 million, as shown on Schedule C-8, line 16, Schedule C-1, line 8, and on Schedule A-1, line 8. This amount is based on the average inventory for the 13-month period ending September 30, 2021, as shown on Schedule C-8.

IV. OPERATING EXPENSE ADJUSTMENTS

Q. Please describe how the Company's claimed operating expenses were determined.

A. As discussed in the direct testimony of Tracy A. Hazenstab (UGI Gas Statement No. 2), the *pro forma* FPFTY expenses were based on the budgeted level of expenses as a starting point. This budgeted level of expenses was then adjusted to comply with Commission precedent and generally accepted ratemaking principles to reflect a normal, ongoing level of operations. The supporting schedules for those adjustments are found in UGI Gas Exhibit A (Fully Projected), Section D. Below, I will discuss the specific operating adjustments that I am sponsoring, as contained in UGI Gas Exhibit A (Fully Projected), Section D.

1. Environmental Remediation Expenses

Q. What adjustments are shown on Schedule D-8?

A. Consistent with the methodology the Company has used in past rate cases, the adjustments shown on Schedule D-8 are designed to reconcile past Environmental Remediation expense rate recoveries with actual incurred costs and to recover a projected annual level of

Environmental Remediation expense. These costs are incurred in connection with UGI Gas's obligations under a Consent Order Agreement ("COA") with the Pennsylvania Department of Environmental Protection ("DEP").[3] The Company's remediation activities under the COA are discussed in the direct testimony of Timothy J. Angstadt (UGI Gas Statement No. 9).

Q. Please describe the first Environmental Remediation expense adjustment shown on Schedule D-8.

A. The adjustment (on lines 1 – 6 of Schedule D-8) is intended to provide the Company with normalized ratemaking recovery of ongoing annual cash expenditures primarily to remediate former manufactured gas plant ("MGP") sites in accordance with the COA. Because the amount budgeted is the amount UGI Gas recovered in the most recent previous base rate case, it does not properly reflect the amount that the Company is likely to incur during the FPFTY. Therefore, as in past cases, the Company has chosen to normalize the expenditure based on its recent actual experience.

The average of the last three years of cash expenditures for remediation expenses under the COA is $5.171 million and represents the amount that the Company anticipates that it will spend in the FPFTY under the COA. The difference between this annual amount ($5.171 million) and the amount budgeted by the Company ($4.188 million), or $0.983 million, is the first adjustment.

[3] Effective October 1, 2020, DEP consolidated the Company's prior three COAs (which aligned with the Company's former rate districts) into one COA that covers the entire UGI Gas service territory.

Q. Is the Company making an Environmental Remediation expense adjustment related to under-recovered MGP expenses for Fiscal Year 2019 and prior periods?

A. No. Lines 7 – 12 of Schedule D-8 show that the Company's annual amortization of the balance of under-recovered MGP expenses for periods prior to September 30, 2019, approved in the 2020 Base Rate Case, matches the amount budgeted for that time. In the 2020 Base Rate Case, the Company was authorized to amortize $8.103 million of under-recovered MGP expenses over a 5-year period, or $1.621 million per year for under-recovered MGP expenses for periods prior to September 30, 2018. Also in the 2020 Base Rate Case, the Company was authorized to amortize an additional $1.219 million over a 5-year period, or $0.24 million per year for under-recovered MGP expenses for Fiscal Year 2019. The Company budgeted this same annual amount ($1.865 million) for expense purposes. As such, no adjustment is needed for this item.

Q. Please describe the final Environmental Remediation expense adjustment shown on Schedule D-8, lines 13 – 17 for Fiscal Years 2020 and 2021.

A. The adjustment (on lines 13 – 17 of Schedule D-8) shows the under-recovery of the Company's MGP remediation expense incurred since the last rate case by comparing the actual Fiscal Year 2020 and 2021 remediation costs with the normalized level authorized in the 2019 and 2020 Base Rate Cases, respectively. The unrecovered expenditures of $2.327 million (line 15) will be recovered over a one-year amortization period through Fiscal Year 2023.

Q. What ratemaking amount is used to determine the future years' costs subject to reconciliation in the next rate case?

A. That amount is the annual amount derived from the first adjustment on Schedule D-8, or $5.171 million, which is the normalized amount indicative of UGI Gas's experience over the past three years. Any future years' variance of actual annual expenditures from that figure will be credited to customers (in the case of an overcollection) or recovered from customers (in the case of an undercollection) in the Company's next base rate case.

2. Uncollectible Accounts Expense

Q. Please explain the two adjustments being shown on Schedule D-11 for Uncollectible Accounts Expense.

A. The first adjustment, $2.026 million, adjusts budgeted uncollectible accounts expense to reflect a three-year average rate of uncollectible accounts expense for Fiscal Years 2019, 2020, and 2021. The baseline amounts for Fiscal Years 2020 and 2021 include $0.607 million and $0.896 million, respectively, of amounts recorded as a regulatory asset (as further discussed under the second adjustment in Schedule D-11 below). This ratio is used to adjust the amount of uncollectible expense in the budget to conform to the three-year average uncollectible rate. The resulting 1.647 percent ratio shown on line 4, column 5, is applied on line 7 to the *pro forma* revenues at present rates to calculate the *pro forma* uncollectible accounts expense of $17.426 million shown on line 7, column 4. This results in an increase in the level of uncollectible accounts expense for the FPFTY from the budgeted amount of $15.400 million shown on line 5. The 1.647 uncollectible ratio is then applied to determine the level of uncollectible accounts expense at *pro forma* proposed rates through the gross revenue conversion factor, as shown in column 3, line 2 of Schedule D-35.

The second adjustment in Schedule D-11 represents the amortization of the regulatory asset balance of $1.503 million for COVID-19 Pandemic Costs over a 10-year amortization period (in accordance with Ordering Paragraph 29 in the Commission's Order entered October 8, 2020 at Docket No. R-2019-3015162). According to Ordering Paragraph 30, COVID-19 Pandemic Costs include "annual uncollectible accounts expense in excess of $12.81 million beginning with the fiscal year period ending September 30, 2020 and continuing for annual periods thereafter until the effective date of the Company's next base rate filing . . . ." The same Ordering Paragraph indicates that such COVID-19 Pandemic Costs shall be eligible for recovery for ratemaking purposes.

For the Fiscal Years ended September 30, 2020 and September 30, 2021, UGI Gas had uncollectible costs of $13.417 million and $13.706 million, respectively. For these two years, the combined excess of uncollectible expense incurred over the established threshold of $12.810 million per year was $1.503 million, which was established as a regulatory asset and is being amortized over a 10-year period effective at the beginning of the FPFTY. This results in an increase in the level of uncollectible accounts expense for the FPFTY of $150,000, as shown on line 11. The total increase (above the budgeted amount) in the uncollectible accounts expense for the FPFTY is $2.176 million, as shown on line 12.

3. Emergency Relief Program ("ERP") Adjustment

Q. Please describe the adjustment shown on Schedule D-12.

A. The adjustment shown on Schedule D-12 reflects recovery of costs associated with the temporary Emergency Relief Program ("ERP"). The Company established the ERP in response to the COVID-19 Pandemic to aid customers who were unable to fully pay their utility bills. The costs of the program include implementation expenses and direct bill credits. The ERP was approved within the settlement agreement to the Company's 2020 Gas Base Rate Case at Docket No. R-2019-3015162. The Company's costs of $0.922 million associated with the program were accumulated within a regulatory asset. The Company is proposing to amortize these costs over a 10-year period, in accordance with Ordering Paragraph 29 in the Commission's Order approving the settlement in the Company's 2020 Gas Base Rate Case.

4. Benefits Expense Adjustment

Q. Please describe the adjustment shown on Schedule D-14.

A. The adjustment shown on Schedule D-14 reflects an adjustment from budgeted pension expense to reflect cash to be contributed to the plan in the FPFTY. The Company's budget reflects pension expense based on GAAP requirements to reflect service and non-service costs based on assumptions. However, consistent with prior ratemaking practices, the Company claims pension costs within its rates on a cash basis. The adjustment is calculated as the total cash contributions (per the Company's most recent actuarial report), reduced to reflect only the portion attributable to UGI Gas, and then further reduced to reflect the portion of pension that is capitalizable. This cash pension expense of $5.501 million (line 5) is compared to the budgeted pension income of ($2.887) million (line 1), also calculated for UGI Gas only and net of the capitalizable portion, resulting in an adjustment of $8.388 million (line 6).

5. Injuries and Damages Adjustment

Q. Please discuss the adjustment for Injuries and Damages shown on Schedule D-15.

A. The amount of expense incurred for injuries and damages in any one year can vary based on the quantity and severity of the claims. The Company bases its claim for injuries and damages on a normalized amount. This is accomplished by making an adjustment on this schedule for the difference between the normalized amount and the budgeted amount. The three-year average of injuries and damages expenses of $1.353 million is calculated on lines 1 – 4 of Schedule D-15. The budgeted amount for injuries and damages, $2.023 million, is shown on line 5. The difference between these amounts, $0.670 million, was used to reduce budgeted injuries and damages expense by $0.670 million, as shown on line 6, to reflect the normalized expense.

V. CAPITAL TREATMENT OF CERTAIN INFORMATION TECHNOLOGY COSTS

Q. What is the Company's policy for capital treatment of certain information technology ("IT") costs?

A. Since 2016, UGI (including UGI Gas and UGI Electric) has received authorization to capitalize certain IT costs associated with software implementation projects within various base rate proceedings. These IT costs consist of internal labor, external consulting expenses, and other expenses related to the preparation of the vendor and system integrator requests for proposals. IT costs also include current-state assessments, reengineering business processes to adapt to the new system, data conversion, cleansing and migration (including field verification and digitization of asset attributes required for accurate data and facility capture), and pre-implementation training costs. Additionally, the Company capitalizes the above-mentioned cost items for cloud computing software implementation projects. Further, beginning in 2019, the Company began capitalizing Hypercare costs associated with large software implementation projects. Hypercare is a term for post-implementation support following the deployment of an IT project to ensure that the newly implemented system operates as planned.

Q. Is the Company planning to continue with similar methods of IT costs capitalization in this proceeding?

A. Yes. The Company continues to capitalize such costs in line with the authorizations received previously, and all such costs which are claimed in the current case are included within the Company's budgeted capital as laid out in Exhibit A (Future) and Exhibit A (Fully Projected).

VI. COVID-19 PANDEMIC COSTS

Q. Has the Company incurred COVID-19 Pandemic Costs, as defined in Ordering Paragraphs 29 and 30 of the Commission's Order pertaining to UGI Gas's 2020 Gas Base Rate Case at Docket No. R-2019-3015162?

A. Yes. However, the Company reviewed qualifying COVID-19 Pandemic Costs and determined that no such costs should be claimed in this rate case, except for the annual uncollectible accounts expense in excess of $12.81 million, which is included on Schedule

D-11, and the costs of the Emergency Relief Program, which are included on Schedule D-12.

VII. COSTS FOR FEDERAL MANDATES REGARDING COVID-19 VACCINATION & TESTING

Q. Is the Company seeking recovery of certain new and incremental costs directly attributable to businesses in complying with recently issued Federal requirements for COVID-19 vaccinations and testing?

A. The Company is prepared to comply with President Biden's COVID-19 Action Plan and the Department of Labor's OSHA Emergency Temporary Standard ("ETS") requirements relating to vaccination and testing mandates (collectively referred to herein as "Federal Mandates"). Under the Federal Mandates, the Company would be required to track and verify the vaccination status of its employees and contractors, and, for those who are unvaccinated, collect proof of weekly testing. The associated costs to comply with the Federal Mandates include, but are not limited to: (1) costs for a subscription to software to track vaccination status; (2) costs for performing required COVID-19 testing; (3) costs for legal assistance in interpreting and applying the Federal Mandates; and (4) costs for drafting the Company's corresponding policies and communicating such to its employees and contractors.

Q. Has the Company included these costs within its claim?

A. Yes. Because of the timing of the preparation of the Company's budget and ongoing legal challenges to the Federal Mandates, costs of compliance with the Federal Mandates were not included in the budget for the FTY or FPFTY. Therefore, the Company has included these costs as an adjustment to its Operating Expenses within Schedule D-13 of UGI Gas Exhibit A (Fully Projected). The ongoing annual costs of $1.692 million, which consist of a subscription to software to track vaccination status and the cost to perform required COVID-19 testing, are added to the budget. The one-time costs of $0.191 million are aggregated and proposed to be recovered over a one-year amortization period, also within Schedule D-13. The total budget adjustment for these costs is $1.883 million, as shown at Schedule D-13, line 6. While there remains uncertainty concerning the Federal Mandates' vaccination and testing requirements due to a recent decision by the U.S. Supreme Court,[4] UGI Gas believes it is appropriate to include a cost associated with vaccination and testing mandates in its revenue requirement to ensure future cost recovery in the event such mandates or similar mandates become law. Depending on the ultimate outcome of the Federal Mandates, UGI Gas can reassess to determine whether this figure should be further adjusted or if a regulatory asset should be created.

Q. Does the Company anticipate any additional costs associated with the Federal Mandates?

A. Yes. The Company believes that its contractors who perform much of its maintenance and construction work would be required to comply with the Federal Mandates due to their association with the Company. The Company expects that the contractors would also pass along their costs of complying with the Federal Mandates to the Company in the form of increased rates for performing construction and maintenance work on the Company's

[4] *See Nat'l Fed'n of Indep. Bus. v. Dep't of Labor*, 2022 U.S. LEXIS 496 (U.S. 2022).

utility system. However, because the Company is unable to specifically quantify these costs, they have not been included in the claim.

Q. Does this conclude your direct testimony?

A. Yes, it does.

DIRECT TESTIMONY OF

JOHN F. WIEDMAYER

DOCKET NO. R-2021-3030218

I. INTRODUCTION

Q. Please state your name and address.

A. My name is John F. Wiedmayer. My business address is 1010 Adams Avenue, Audubon, Pennsylvania 19403.

Q. Are you associated with any firm and in what capacity?

A. Yes. I am associated with the firm of Gannett Fleming Valuation and Rate Consultants, LLC ("Gannett Fleming") as Project Manager, Depreciation and Valuation Studies.

Q. How long have you been associated with Gannett Fleming?

A. I have been associated with the firm since I graduated from college in June 1986.

Q. What is your educational background?

A. I have an AB degree in Engineering from Lafayette College and a Master of Business Administration from the Pennsylvania State University.

Q. Do you belong to any professional societies?

A. Yes. I am a member of the National and Pennsylvania Societies of Professional Engineers and the Society of Depreciation Professionals ("SDP"). In 2005, I served as President of the SDP and was a member of the SDP's Executive Board for the years 2003 through 2007.

Q. Do you hold any special certification as a depreciation expert?

A. Yes. The SDP has established national standards for depreciation professionals. The SDP administers an examination to become certified in this field. I passed the certification exam in September 1997 and have fulfilled the requirements necessary to remain a Certified Depreciation Professional.

Q. Please outline your experience in the field of depreciation.

A. I have over 35 years of depreciation experience, which includes expert testimony in numerous cases before 14 regulatory commissions, including the Pennsylvania Public Utility Commission ("PUC" or "Commission").

In June 1986, I was employed by Gannett Fleming as a Depreciation Engineer. I held that position from June 1986 through December 1995. In January 1996, I was assigned to the position of Supervisor of Depreciation Studies. In August 2004, I was promoted to my present position as Project Manager of Depreciation Studies. I am responsible for conducting depreciation and valuation studies, including the preparation of testimony, exhibits, and responses to data requests for submission to the appropriate regulatory bodies. My additional duties include determining final life and salvage estimates, conducting field reviews, presenting recommended depreciation rates to management for its consideration, and supporting such rates before regulatory bodies.

During the course of my employment with Gannett Fleming, I have assisted in the preparation of numerous depreciation studies for utility companies across various industries. I assisted in the preparation of depreciation studies for the following telephone companies: Alberta Government Telephone, Commonwealth Telephone Company, Telus, United Telephone Company of New Jersey, and United Telephone of Pennsylvania. I assisted in the preparation of depreciation studies for the following companies in the railroad industry: CSX Transportation, Union Pacific Railroad, Burlington Northern Railroad, Burlington Northern Santa Fe Railway, Amtrak, Kansas City Southern Railroad, Norfolk & Western, Southern Railway, and Norfolk Southern Corporation.

I assisted in the preparation of depreciation studies for the following organizations in the electric industry: AmerenUE, Arizona Public Service Company, UGI Utilities, Inc. - Electric Division ("UGI Electric"), Penelec, Metropolitan Edison, the City of Red Deer, Nova Scotia Power, Newfoundland Power, Owen Electric Cooperative, Bangor Hydro Electric Company, Maine Public Service Company, Michigan Electric Transmission Company, PECO, Jackson Electric Cooperative Corporation, Houston Lighting and Power, TXU, Maritime Electric, Nolin Rural Electric Cooperative, AmerenCIPS, AmerenCILCO, AmerenIP, and the City of Calgary - Electric System.

I assisted in the preparation of depreciation studies for the following gas companies: BGE, PECO, UGI Utilities, Inc. – Gas Division, North Penn Gas, PFG Gas, UGI Central Penn Gas, Inc., Equitable Gas, Centra Gas Alberta, Questar Gas, Orange and Rockland, Con Edison, Dominion East Ohio, AmerenUE, AmerenCILCO, AmerenCIPS, and AmerenIP.

In each of the above studies, I assembled and analyzed historical and simulated data, performed field reviews, developed preliminary estimates of service lives and net salvage, calculated annual depreciation, and prepared reports for submission to state public utility commissions or federal regulatory agencies.

Q. Have you previously testified on the subject of utility plant depreciation?

A. Yes. I have submitted testimony to the Kentucky Public Service Commission, the Newfoundland and Labrador Board of Commissioners of Public Utilities, the Nova Scotia Utility and Review Board, the Federal Energy Regulatory Commission, the Utah Public Service Commission, the Arizona Corporation Commission, the Missouri Public Service Commission, the Illinois Commerce Commission, the Maine Public Utilities Commission, the Maryland Public Service Commission, the New Jersey Board of Public Utilities, the New York Public Service Commission, the Connecticut Public Utilities Regulatory Authority, and the PUC.

Q. Have you received any additional education relating to utility plant depreciation?

A. Yes. I have completed the following courses conducted by Depreciation Programs, Inc.: “Techniques of Life Analysis,” “Techniques of Salvage and Depreciation Analysis,” “Forecasting Life and Salvage,” “Modeling and Life

Analysis Using Simulation," and "Managing a Depreciation Study." In 2000, I became an instructor at the SDP's annual conference lecturing on "Salvage Concepts," "Depreciation Models," "Analyzing the Life of Real-World Utility Property – Actuarial Analysis," "Theoretical Reserve Imbalances and True-Up," and "Data Requirements for a Depreciation Study."

II. PURPOSE OF TESTIMONY

Q. What is the purpose of your testimony?

A. My testimony is in support of the depreciation studies conducted under my direction and supervision for the Pennsylvania gas plant of UGI Utilities, Inc. – Gas Division ("UGI Gas" or the "Company"). I was retained by the Company as a depreciation consultant. UGI Gas retained me to determine the book depreciation reserve as of September 30, 2023, to determine the annual depreciation expense to be included as an element of the cost of service, and to testify in support of those two determinations in this proceeding.

I am also a sponsoring witness for UGI Gas's depreciated original cost of gas plant in service included in rate base. My testimony will address my depreciation study, the appropriate depreciation reserve for ratemaking purposes, the original cost measure of value, and the appropriate annual depreciation expense to be included in the ratemaking cost of service as of September 30, 2023.

Q. Were you responsible for the preparation of any of the Company's responses to the Commission's filing regulations that were filed in support of the Company's general rate filing?

A. Yes. I am the responsible witness for the following items in UGI Gas Book I:

Item No.	Subject
I-A-3	Description of Depreciation Methods and Factors Considered in Arriving at Estimates of Service Life and Dispersion by Account
I-A-4	Survivor Curves and Surviving Original Cost Including Related Annual and Accrued Depreciation
I-A-5	Comparison of Calculated Reserve vs. Book Reserve
I-A-6	Survivor Curves and Annual Accrual Rates
I-A-7	Cumulative Depreciated Original Cost by Vintage Year
I-A-8	Trended Original Cost Methodology
I-A-9	Spot Trended Original Cost
I-A-10	Undepreciated Original Cost
I-A-11	Cumulative Trended Depreciated Original Cost
I-A-17	Net Salvage

Q. Have you previously prepared comparable studies for UGI Gas?

A. Yes. I provided testimony on depreciation matters for the Company in the prior two UGI Penn Natural Gas ("PNG") base rate cases at Docket No. R-2016-2580030 and Docket No. R-2008-2079660, the prior two UGI Central Penn Gas ("CPG") base rate cases at Docket No. R-2010-2214415 and Docket No. R-2008-2079675 and the three most recent base rate case for UGI Utilities, Inc. – Gas Division at Docket No. R-2015-2518438, Docket No. R-2018-3006814 and

Docket No. R-2019-3015162. Prior to those rate filings, I prepared exhibits for the depreciation study in UGI Gas's base rate case filed in 1995 at Docket No. R-00953297.

III. OUTLINE OF EXHIBITS C (FULLY PROJECTED), C (FUTURE) AND C (HISTORIC)

Q. Will you be sponsoring any exhibits with your direct testimony?

A. Yes, I am attaching and sponsoring the following exhibits: UGI Gas Exhibit C (Fully Projected), UGI Gas Exhibit C (Future), and UGI Gas Exhibit C (Historic). UGI Gas Exhibit C (Fully Projected) presents the summarized depreciation calculations and supporting tables related to the fully projected future test year ("FPFTY") ending September 30, 2023 for UGI Gas. UGI Gas Exhibit C (Future) presents similar summarized depreciation calculations and supporting charts and tables related to the depreciation study for the future test year ("FTY") ending September 30, 2022. UGI Gas Exhibit C (Historic) presents the summarized depreciation calculations and supporting tables related to the historic test year ("HTY") ended September 30, 2021. Each of the three exhibits is organized in a similar manner and contains information and schedules supporting the amounts applicable to each test year period. UGI Gas Exhibit C (Future) contains additional information including the supporting charts and life tables related to the service life estimates.

Q. Does UGI Gas Exhibit C (Fully Projected) accurately portray the results of your depreciation study as of September 30, 2023?

A. Yes.

Q. In preparing the depreciation study, did you follow generally accepted practices in the field of depreciation?

A. Yes.

Q. Please describe the contents of the depreciation study reports, UGI Gas Exhibit C (Future), and UGI Gas Exhibit C (Fully Projected).

A. The depreciation study report in UGI Gas Exhibit C (Future) consists of eight parts including charts and tables filed in the Company's most recent service life study report prepared by me and submitted in 2019. Part I, Introduction, includes statements related to the scope of and basis for the depreciation study. Part II, Estimation of Survivor Curves, presents detailed discussions of: (1) survivor curves; and (2) methods of life analysis, including an example of the retirement rate method. Part III, Service Life Considerations, presents the relevant factors considered for estimating service lives. Part IV, Calculation of Annual and Accrued Depreciation, sets forth a description of: (1) the group procedures used for calculating annual and accrued depreciation; and (2) an explanation of the manner in which net salvage was incorporated in the calculations. Part V, Results of Study, includes a description of the results and summaries of the detailed depreciation calculations as of September 30, 2022. Part VI, Service Life Statistics, presents the results of the retirement rate analyses prepared as the historical bases for the service life estimates. Part VII, Detailed Depreciation Calculations, sets forth the detailed depreciation calculations related to surviving original cost as of September 30, 2022. The detailed depreciation calculations present the annual and accrued depreciation amounts by account and vintage year. The remaining life annual accrual rate is also set forth in the tables of Part VII. Part VIII, Experienced and Estimated Net Salvage, contains the net salvage amortization of experienced and estimated net salvage for the years 2018 through 2022.

UGI Gas Exhibit C (Fully Projected) includes: a description of the scope, basis, and results of the studies; summaries of the depreciation calculations; and the detailed depreciation calculations as of September 30, 2023. The descriptions and explanations presented in UGI Gas Exhibit C (Future) are also applicable to the depreciation calculations presented in UGI Gas Exhibit C (Fully Projected). The graphs and tables related to service life presented in UGI Gas Exhibit C (Future) also support the service life estimates used in UGI Gas Exhibit C (Fully Projected) inasmuch as the estimates are the same for all three test years, i.e., HTY, FTY, and FPFTY. The service life estimates set forth in UGI Gas Exhibit C (Historic) are the same estimates as those approved in the Company's Annual Depreciation Report ("ADR") submitted to the PUC in March 2021. The pro forma depreciation expense for UGI Gas at the end of the HTY, September 30, 2021, is the sum of the three former rate districts, UGI South, UGI North, and UGI Central.

The results of the study are set forth in Part II in UGI Gas Exhibit C (Fully Projected). Table 1, pages II-3 through II-5 of UGI Gas Exhibit C (Fully

Projected), presents the estimated survivor curve, the original cost and depreciation reserve as of September 30, 2023, and the calculated annual depreciation rate and amount for each account or subaccount of Gas Plant in Service. Table 2, pages II-6 and II-7 of UGI Gas Exhibit C (Fully Projected), presents the bring-forward to September 30, 2023, of the depreciation reserve as of September 30, 2021. Table 3, pages II-8 through II-10 of UGI Gas Exhibit C (Fully Projected), presents the calculation of the book depreciation amounts for the FPFTY. Table 4, pages II-11 and II-12 of UGI Gas Exhibit C (Fully Projected), presents the experienced and estimated net salvage for fiscal years 2019 through 2023. The amortization of net salvage is based on experienced and estimated net salvage during the period October 1, 2018 through September 30, 2023. The summary tables and detailed depreciation calculations set forth in UGI Gas Exhibit C (Fully Projected) as of September 30, 2023, are organized and presented in the same manner as those presented in UGI Gas Exhibit C (Future) as of September 30, 2022.

Q. Please outline the contents of Exhibit C (Historic).

A. UGI Gas Exhibit C (Historic) is organized similarly to UGI Gas Exhibit C (Fully Projected). UGI Gas Exhibit C (Historic) includes: a description of the scope, basis, and results of the studies; summaries of the depreciation calculations; and the detailed depreciation calculations as of September 30, 2021. The service life estimates used in the HTY period were based on the survivor curve estimates set forth in the ADR submitted to the PUC in March 2021. The same survivor curve estimates were used in each of the three respective test year periods and were based on a service life study submitted in 2019 using plant accounting data through fiscal year-end 2017. The summary tables and detailed depreciation calculations as of September 30, 2021, are organized and presented in the same manner as those as of September 30, 2023, with two exceptions. Tables 2 and 3 presented in UGI Gas Exhibit C (Fully Projected) are not necessary and, therefore, are not presented in UGI Gas Exhibit C (Historic).

IV. THE DEPRECIATION STUDY - OVERVIEW

Q. Please describe what you mean by the term "depreciation".

A. My use of the term "depreciation" is in accord with the definition set forth in the Uniform System of Accounts prescribed for Class A and Class B Natural Gas Companies. "Depreciation" refers to the loss in service value not restored by current maintenance, incurred in connection with the consumption or prospective retirement of gas plant in the course of service from causes which are known to be in current operation, against which the company is not protected by insurance. Among the causes to be given consideration are wear and tear, decay, action of the elements, inadequacy, obsolescence, changes in the art, changes in demand, requirements of public authorities, and the exhaustion of natural resources.

In the study that I performed, which is the basis for my testimony, I used the straight line remaining life method of depreciation, with the average service life and equal life group procedures. The annual depreciation is based on a system of depreciation accounting that aims to distribute the unrecovered cost of fixed capital assets over the estimated remaining useful life of the unit, or group of assets, in a systematic and rational manner. For clarity of presentation, the detailed depreciation calculations are presented by account, vintage year and former rate district, the sum of which totals to the consolidated PA-jurisdictional UGI Gas company which excludes a small portion of the UGI gas system located in Maryland. The depreciation summary tables present the results on a total PA-jurisdictional UGI Gas basis.

Q. Is the Company's claim for annual depreciation in the current proceeding based on the same methods of depreciation that were used in the Company's March 2021 ADR?

A. Yes, it is. For most plant accounts, the current claim for annual depreciation is based on the straight line remaining life method of depreciation, which has been used by the Company for over thirty years. The depreciation methods and procedures are described further in Part II of UGI Gas Exhibit C (Future).

For General Plant Accounts 391, 393, 394, 395, 397, and 398, I used the straight line remaining life method of amortization. The annual amortization is based on amortization accounting, which distributes the unrecovered cost of fixed capital assets over the remaining amortization period selected for each account.

V. ORIGINAL COST MEASURE OF VALUE

Q. What is the original cost of gas plant to be included in rate base in this proceeding?

A. As of September 30, 2023, the original cost of gas plant in service is $5,042,025,320 as shown in column 4 of Table 1 on pages II-3 through II-5 of UGI Gas Exhibit C (Fully Projected). This amount includes $4,751,865,847 of Gas Plant and $290,159,473 of Other Utility Plant allocated to UGI Gas. Other Utility Plant is primarily comprised of plant assets included in Common Plant and Information Services ("IS"). The assets included in Common Plant and IS are assets that are shared and jointly used between UGI Gas and UGI Electric. The costs related to Common Plant and IS are allocated to UGI Gas at 88.97 percent and 91.68 percent, respectively. Also, the full cost of the buildings at the Empire Service Center ("Empire") in Wilkes Barre, PA were included in Gas Division. However, personnel of UGI Electric share portions of the buildings at that location and therefore a portion of the cost related to Empire was deducted from UGI Gas and allocated to UGI Electric.

VI. THE ACCRUED DEPRECIATION CLAIM

Q. Have you determined UGI Gas's accrued depreciation for ratemaking purposes as of September 30, 2023?

A. Yes. I have determined the allocated book depreciation reserve as of September 30, 2023, to be $1,318,560,331.

Q. Is the Company's claim for accrued depreciation in the current proceeding made on the same basis as has been used for over thirty years?

A. Yes. The current claim for accrued depreciation is the book reserve brought forward from the book reserve set forth in the Company's financial statements and approved annually in connection with the Company's submission of its annual depreciation report each March to the Commission.

Q. How did you determine UGI Gas's allocated book depreciation reserve as of September 30, 2022?

A. The book depreciation reserve attributable to UGI Gas as of September 30, 2022, is set forth in column 5 of Table 1 of UGI Gas Exhibit C (Future). Table 2 of UGI Gas Exhibit C (Future) is an annual bring-forward of the book depreciation reserve as of September 30, 2021, using estimated accruals, retirements, salvage, and cost of removal for the twelve months from October 2021 through September 2022. The table sets forth, by plant account, the beginning book reserve balance as of September 30, 2021, the estimated reserve activity, and the ending reserve balance as of September 30, 2022. The estimated reserve activity consists of depreciation accruals (column 3), amortization of net salvage (column 4), projected retirements (column 5), projected salvage (column 6), and projected cost of removal (column 7). Table 3 of UGI Gas Exhibit C (Future) sets forth the calculation of the estimated depreciation accruals by plant account, which is carried forward to column 3 of Table 2. The book reserve as of September 30, 2021, by plant account, shown in column 2 of Table 2, was obtained from UGI Gas's books and records and are the same amounts set forth in Table 1 of Exhibit C (Historic).

Q. Please explain the manner in which you projected the depreciation accruals for the twelve months ended September 30, 2022.

A. The depreciation accruals for the twelve months ended September 30, 2022, by plant account, were estimated by applying the annual depreciation accrual rates calculated as of September 30, 2021, to the projected average 2022 plant balance. The average balance for the twelve months ended September 30, 2022, is computed in columns 2 through 7 of Table 3 and is based on the projected additions, retirements, and transfers in columns 3 through 5.

Q. With reference to Table 2, column 4, please explain what you mean by "the amortization of net salvage" and explain the manner in which you projected it.

A. The amortization of net salvage is the annual provision for recovering experienced negative net salvage. This process for recognizing net salvage in the cost of service is in accordance with Pennsylvania ratemaking practice. The amortization of net salvage is based on experienced net salvage during the preceding five-year period, October 1, 2016 through September 30, 2021.

Q. Please explain the manner in which you projected the retirements, salvage, and removal costs that are shown in columns 5, 6, and 7 of Table 2.

A. Retirements were projected by plant account by applying the average retirement ratio, expressed as a percent of additions, for the five years 2017 through 2021, to FTY and FPFTY additions for most plant accounts. For certain General Plant accounts subject to amortization accounting, retirements are recorded when a vintage is fully amortized. All units are retired per books when the age of the vintage reaches the amortization period. Therefore, all vintages that reached or exceeded the amortization period were retired during the FTY for certain General Plant accounts subject to amortization accounting. Salvage and removal costs were projected by plant account by applying the average salvage and cost of removal ratios, expressed as a percent of retirement amounts, for the five years 2017 through 2021, to the projected retirement amounts.

Q. Was the book reserve as of September 30, 2023, estimated using the same methodology?

A. Yes, it was essentially the same methodology with one minor exception. The book depreciation accruals calculated for fiscal year 2023 were based on applying the depreciation rate to average monthly plant balances for purposes of calculating the book reserve as of September 30, 2023.

VII. THE ANNUAL DEPRECIATION EXPENSE CLAIM

Q. Have you determined UGI Gas's annual depreciation expense to be included as an element in the cost of service for purposes of this proceeding?

A. Yes, I have. The annual depreciation expense is $133,907,352 and consists of $127,823,602 of annual accruals to recover original cost and $6,083,750 of net salvage amortization. These amounts are set forth in column 8 of Table 1 in UGI Gas Exhibit C (Fully Projected).

Q. How did you determine the annual accruals of $133,907,352?

A. The determination of annual depreciation accruals consists of two phases. In the first phase, survivor curves are estimated for each plant account or subaccount. In the second phase, the composite remaining lives and annual depreciation accruals are calculated based on the service life estimates determined in the first phase.

The determination of annual amortization amounts consists of the selection of amortization periods and the calculation of amortization amounts based on the remaining amortization period and the unrecovered cost for each vintage.

Q. Please describe the manner in which you estimated the service life characteristics for each depreciable group in the first phase of the study.

A. The service life study consisted of compiling historical data from records related to UGI Gas's gas plant; analyzing these data to obtain historical trends of survivor characteristics; obtaining supplementary information from engineering management and operating personnel concerning UGI Gas's practices and plans as they relate to plant operations; and interpreting the above data to form judgments of average service life characteristics.

Q. What historical data did you analyze for the purpose of estimating the service life characteristics of UGI Gas's gas plant?

A. The data consisted of the entries made by UGI Gas to record gas plant transactions during the period 1951 through 2017. The transactions included additions, retirements, transfers, acquisitions, and the related balances. I classified the data by depreciable group, type of transaction, the year in which the transaction took place, and the year in which the plant was installed.

Q. What method did you use to analyze these service life data?

A. I used the retirement rate method of life analysis. The retirement rate method is the most appropriate method when aged retirement data are available because it develops the average rates of retirement actually experienced during the period of study. Other methods of life analysis infer the rates of retirement based on a selected type survivor curve and were not used.

Q. Please describe the results of your use of the retirement rate method.

A. Each retirement rate analysis resulted in a life table, which, when plotted, formed an original survivor curve. Each original survivor curve, as plotted from the life table, represents the average survivor pattern experienced by the several vintage groups during the experience band studied. Inasmuch as this survivor pattern does not necessarily describe the life characteristics of the property group, interpretation of the original curves is required in order to use them as valid considerations in service life estimation. Iowa type survivor curves were used in these interpretations. The results of the retirement rate analyses are presented in Part VI of UGI Gas Exhibit C (Future).

Q. Please explain briefly what an "Iowa type survivor curve" is and how you use it in estimating service life characteristics for each depreciable group.

A. The range of survivor characteristics usually experienced by utility and industrial properties is encompassed by a system of generalized survivor curves known as the Iowa type survivor curves ("Iowa curves"). The Iowa curves were developed at the Iowa State College Engineering Experiment Station through an extensive process of observation and classification of the ages at which industrial property had been retired. Iowa curves are the accepted survivor curves for Pennsylvania, as well as the remaining 49 states, and have been for many years.

Iowa curves are used to smooth and extrapolate original survivor curves determined by the retirement rate method. The Iowa curves were used in this study to describe the forecasted rates of retirement based on the observed rates of retirement and the qualitative outlook for future retirements.

The estimated survivor curve designations for each depreciable group indicate the average service life, the family within the Iowa system, and the relative height of the mode. For example, the Iowa 35-R2 curve indicates an average service life of thirty-five years; and a Right-skewed, or R, type curve (the mode or highest frequency of retirements occurs after average life for right modal curves). It also provides a relatively low height, 2, for the mode (possible modes for R type curves range from 0.5 to 5).

Q. Did you physically observe plant and equipment in the field?

A. Yes. Field trips are conducted periodically in order to be familiar with the operation of the Company and observe representative portions of the plant. Field trips are conducted each time a service life study is performed. Service life study reports are submitted to the Commission every five years, at a minimum. UGI Gas's most recent service life study report was performed in 2018 and submitted in 2019 in connection with the 2019 base rate case filing at Docket No. R-2018-3006814, Exhibit C (Future). Facilities visited during field trips generally include representative city gate stations, district regulating stations, service centers, etc. The specific dates and locations visited during recent field trips are listed in Exhibit C (Future) in Part III. A general understanding of the function of the plant and information with respect to the reasons for past retirements and expected causes of retirements are obtained during these field trips. This knowledge and information was incorporated in the interpretation and extrapolation of the statistical analyses.

Q. Please describe the second phase of the process that you used in order to determine annual depreciation for ratemaking purposes.

A. After I estimated the service life characteristics for each depreciable group, I calculated annual depreciation accruals for each group in accordance with the straight line remaining life method, using remaining lives consistent with the average service life procedure for plant installed prior to 1982 and remaining lives consistent with the equal life group procedure for plant installed in 1982 and subsequent years. Summary tabulations of the survivor curve estimates and the annual accrual rates and amounts are set forth on Table 1 of UGI Gas Exhibit C (Historic), UGI Gas Exhibit C (Future), and UGI Gas Exhibit C (Fully Projected). The detailed tabulations of the depreciation calculations are presented in Part III of UGI Gas Exhibit C (Historic) and UGI Gas Exhibit C (Fully Projected) and in Part VII of UGI Gas Exhibit C (Future).

Q. Please briefly describe the straight line remaining life method of depreciation that you used for depreciable property.

A. The straight line remaining life method of depreciation allocates the original cost less accumulated depreciation in equal amounts to each year of remaining service life.

Q. Please briefly describe the average service life procedure that you used in conjunction with the straight line remaining life method for plant installed prior to 1982.

A. In the average service life procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the average remaining life of the vintage. The average remaining life is a directly weighted average derived from the estimated survivor curve.

Q. Please briefly describe the equal life group procedure that you used in conjunction with the straight line remaining life method for plant installed in 1982 and in later years.

A. In the equal life group procedure, the remaining life annual accrual for each vintage is determined by dividing future book accruals (original cost less book reserve) by the composite remaining life for the surviving original cost of that vintage. The composite remaining life for the vintage is derived by weighting the individual equal life group remaining lives. In the equal life group procedure, the property group is subdivided according to service life. That is, each equal life group includes the portion of the property that experiences the life of that specific group. The relative size of each equal life group is determined from the property's life dispersion curve.

Q. Please briefly describe the amortization of certain General Plant accounts.

A. General Plant Accounts 391, 393, 394, 395, 397, and 398 include a very large number of units but represent a very small percent of depreciable gas plant.

Depreciation accounting is difficult for these assets, inasmuch as periodic inventories are required to properly reflect plant in service. Many utilities have changed to amortization accounting for general plant as a practical and reasonable solution that avoids significant accounting expenditures for such a small percent of plant.

In amortization accounting, units of property are capitalized in the same manner as they are in depreciation accounting. However, retirements are recorded when a vintage is fully amortized, rather than as the units are removed from service. That is, there is no dispersion of retirement. All units are retired per books when the age of the vintage reaches the amortization period.

VIII. ILLUSTRATION OF DEPRECIATION STUDY PROCEDURE

Q. Please illustrate the procedure followed in your depreciation study and the manner in which it is presented in UGI Gas Exhibit C (Future) using an account as an example.

A. I will use Account 376.1, Mains – Primarily Steel, to illustrate the manner in which the study was conducted. Account 376.1 represents 15 percent of the total depreciable gas plant. As the initial step of the service life study phase, aged plant accounting data were compiled for the years 1951 through 2017. These data have been coded in the course of UGI Gas's normal recordkeeping according to account or property group, type of transaction, year in which the transaction took place, and year in which the gas plant was placed in service. The plant additions, retirements, and other plant transactions were analyzed by the retirement rate method of life analysis.

This account includes primarily cathodically-protected, steel mains, although some bare steel mains are still in service. As detailed in UGI Gas Exhibit C, the Iowa 73-R2.5 survivor curve was judged most appropriate for this account and is the survivor curve used for this filing. The 73-R2.5 is a very good fit of the company's historical plant accounting data, consistent with engineering outlook and within the typical range of service lives used by other gas companies for steel mains. The original life table for the 1960-2017 experience band is set forth on pages VI-41 through VI-46.

The calculation of annual depreciation, the second phase, for the original cost of steel mains in service as of September 30, 2022, is presented by vintage in Part VII on pages VII-55 through VII-63 of UGI Gas Exhibit C (Future) for Gas Plant in Service. The detailed depreciation calculations as of September 30, 2023, are presented in Part III of Exhibit C (Fully Projected). The tabular presentations of the detailed depreciation calculations in Part VII of Exhibit C (Future) are similar in kind to those set forth in Part III of Exhibit C (Fully Projected). The expectancy and average life derived from the estimated survivor curve for each vintage were used to calculate the accrued depreciation by the average service life procedure for 1981 and prior vintages.

The accrued depreciation for vintages subsequent to 1981 was calculated by the equal life group procedure using the Iowa 73-R2.5 survivor curve. In the calculation, the surviving cost in each vintage was further subdivided, through the use of a computer program, into depreciable groups according to the expected service lives as defined by the Iowa 73-R2.5 survivor curve. The accrued depreciation was derived for each equal life group, based on its service life, and the totals shown for the vintages are the summations of the individually derived amounts.

The book reserve was allocated to vintages based on the calculated accrued depreciation. The remaining lives of the vintages were based on the Iowa 73-R2.5 survivor curve, the attained age, and the same group procedures as were used to calculate accrued depreciation. The future book accruals (original cost less allocated book reserve) were divided by the remaining lives to derive the annual depreciation accruals by vintage.

The total depreciation accrual on page VII-63 of UGI Gas Exhibit C (Future) was brought forward to column 8 of Table 1 on page V-4 of the exhibit and divided by the total original cost in column 4 in order to calculate the annual depreciation accrual rate in column 7. A similar process was used for the FPFTY.

Q. Is the procedure you described for Account 376.1 typical of that followed for most of the plant investment?

A. Yes, it is, inasmuch as the straight line method, the average service life, and the equal life group procedures were used for most of the depreciable plant.

Q. Please illustrate the procedure followed for the amortization of certain General Plant accounts and the manner in which it is presented in UGI Gas Exhibit C (Future) using an account as an example.

A. I will use Account 394, Tools, Shop and Garage Equipment, to illustrate the amortization procedure. As the initial step of the amortization procedure, an amortization period of 20 years was selected based on the period during which such equipment renders most of its service, the amortization periods used by other utilities, and the service life estimate previously used for depreciation accounting.

The calculation of the annual amortization as of September 30, 2022, is presented by vintage in Part VII on pages VII-162 and VII-163 of UGI Gas Exhibit C (Future). The calculated accrued amortization is based on the ratio of the vintage's age to the amortization period. The book reserve for vintages older than the amortization period was set equal to the original cost. The remaining book reserve was allocated to vintages based on the calculated accrued depreciation. The future book accruals or amortizations (original cost less assigned or allocated book reserve) were divided by the remaining amortization period to derive the annual amortizations by vintage.

The total amortization on page VII-163 of UGI Gas Exhibit C (Future) was brought forward to column 8 of Table 1 on page V-5 of UGI Gas Exhibit C (Future). A similar process was performed for UGI Gas Exhibit C (Fully Projected) and UGI Gas Exhibit C (Historic). That is, the calculation of the annual amortization related to the original cost of Tools, Shop and Garage Equipment in service as of September 30, 2023, is presented by vintage on pages III-161 and III-162 of UGI Gas Exhibit C (Fully Projected) and summarized in Table 1 on page II-4.

Q. Briefly explain the methods used for the remaining portion of the depreciable plant.

A. The life span procedure was applied to major structures in Account 390. The life span procedure was used for groups such as buildings in which concurrent retirement of all property in the group is expected. The life span of both the original installation and subsequent additions is the number of years between installation and final retirement of the group. The complete details, by vintage, of the accrued depreciation and remaining life accrual calculations are set forth for each structure in Part III of UGI Gas Exhibit C (Historic) and UGI Gas Exhibit C (Fully Projected) and in Part VII of UGI Gas Exhibit C (Future).

IX. THE NET SALVAGE AMORTIZATION CLAIM

Q. Please briefly describe the accounting treatment regarding net salvage for public utilities operating in Pennsylvania.

A. In accordance with the Uniform System of Accounts and the rules for recovery of net salvage established by the Pennsylvania Superior Court in *Penn Sheraton Hotel v. Pa. P.U.C.*, 198 Pa. Super. 618, 184 A.2d 324 (1962), net salvage is charged to the depreciation reserve and is amortized over a five-year period beginning with the year after net salvage is actually incurred. These accounting procedures were affirmed by the Commission in CPG's (formerly PPL Gas Utilities Corporation ("PPL Gas")) 2006 rate filing (Docket No. R-00061398) and have been utilized by UGI Gas in their rate cases ever since. This procedure is consistent with how other Pennsylvania public utilities account for net salvage and is the method used in preparing the Company's ADR submitted each year to the Commission.

Q. Earlier in your testimony you indicated that UGI Gas's annual depreciation expense consists, in part, of $6,083,750 of net salvage amortization. How did you determine that amount?

A. The $6,083,750 is the result of determining the five-year average of net salvage experienced and estimated during the period of October 1, 2018 through September 30, 2023. Net salvage is defined in the Uniform System of Accounts as gross salvage less cost of removal. For most gas utilities, including UGI Gas, cost of removal exceeds gross salvage resulting in negative net salvage. Negative net salvage is recorded to the depreciation reserve as a debit, which reduces the depreciation reserve. Charges related to the negative net salvage amortization are recorded to the depreciation reserve as a credit in the five years subsequent to the initial recording of the negative net salvage amount. Therefore, the negative net salvage amount will have been fully amortized after five years and the net effect on the depreciation reserve is zero. Detailed data related to the experienced and estimated cost of removal and salvage are presented in Part VIII of UGI Gas Exhibit C (Future) and Part IV of UGI Gas Exhibit C (Fully Projected).

Q. Do you have any other comments on the other items which you are sponsoring in this proceeding?

A. Yes. The above testimony does not describe the responses to filing requirements set forth in Items I-A-5, I-A-6, and I-A-7. In general, these responses are self-explanatory. The response to I-A-5 is a comparison of the actual and projected book depreciation reserve with the calculated accrued depreciation as of the end of the HTY, FTY, and FPFTY, respectively. The response to I-A-6 presents the survivor curves used in the most recent general rate proceeding and the annual accrual rates that resulted from the use of these curves. The response to I-A-7 is the cumulative depreciated original cost by installation year as of the end of the test years. The amounts requested in response to I-A-7 are set forth in UGI Gas Exhibit C (Historic) and UGI Gas Exhibit C (Future) in the section titled "Cumulative Depreciated Original Cost."

Q. Does this conclude your direct testimony?

A. Yes, it does.

UGI GAS STATEMENT NO. 5

VICKY A. SCHAPPELL

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2021-3030218

UGI Utilities, Inc. – Gas Division

Statement No. 5

Direct Testimony of
Vicky A. Schappell

Topics Addressed: **Capital Planning**

Dated: January 28, 2022

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Vicky A. Schappell. My business address is 1 UGI Drive, Denver, Pennsylvania 17517.

Q. By whom are you employed and in what capacity?

A. I am employed as a Principal Analyst, Capital Planning by UGI Utilities, Inc. ("UGI"). UGI is a wholly-owned subsidiary of UGI Corporation ("UGI Corp."). UGI has two operating divisions, the Electric Division ("UGI Electric") and the Gas Division ("UGI Gas" or the "Company"), each of which is a public utility regulated by the Pennsylvania Public Utility Commission ("Commission" or "PUC").

Q. Please describe your educational background and work experience.

A. They are set forth in my resume attached as UGI Gas Exhibit VAS-1 to my testimony.

Q. What are your responsibilities as Principal Analyst?

A. As Principal Analyst, I supervise a team of Analysts in preparing the annual capital budgets for UGI Gas and UGI Electric. I am responsible for obtaining budget inputs from various departments including Engineering, Operations, Corrosion, Marketing, Information Services, and the Building and Grounds Departments. I collaborate with the Vice President of Engineering, the Vice President of Operations, the Director of Engineering Design, the Senior Director Marketing and Community Relations, the Director of Pipeline System Planning and Optimization, the Senior Director Financial Planning and Analysis and Senior Engineering Managers to monitor annual capital budget performance and develop strategies to limit variances in capital installations and spending. I also work closely with the President of UGI in developing the overall capital spend strategy. I have prepared schedules and discovery requests for past rate cases. Also, I am responsible for preparing UGI Gas's Annual Asset Optimization Plan. Additionally, I had an integral role in developing an expanded capital spending monitoring process (as a result of the Company's recent accelerated capital investments programs). This involved upgrading the Company's capital planning, forecasting and budgeting tool, which was implemented in UNITE Phase III-Enterprise Performance Management ("EPM"), which went live in October 2020.

Q. Have you previously presented testimony in proceedings before a regulatory agency?

A. Yes. I previously presented testimony in the 2020 UGI Gas Base Rate Case at Docket No. R-2019-3015162.

Q. What is the purpose of your testimony?

A. I am providing testimony on behalf of UGI Gas. In my testimony, I will address the Company's capital planning process for this proceeding.

Q. Are you sponsoring any exhibits in this proceeding?

A. Yes, in addition to UGI Gas Exhibit VAS-1, I am sponsoring UGI Gas Exhibit VAS-2. I am also sponsoring certain responses to the Commission's standard filing requirements as indicated on the master list accompanying this filing.

II. CAPITAL PLANNING

Q. Please describe the categories of projects included in the capital budget for UGI Gas.

A. The principal categories for which UGI Gas develops capital budgets are: (1) replacement and betterment infrastructure; (2) new business; (3) information technology; (4) other capital spending; and (5) removal and salvage. The budgeting process is further described in the direct testimony of Tracy A. Hazenstab (UGI Gas Statement No. 2).

Q. What are replacement and betterment projects?

A. Replacement and betterment ("R&B") projects improve or replace existing infrastructure and include, but are not limited to, leak remediation, pipe relocations, material upgrades, service renewals, reliability improvements, and metering and regulation upgrades.

Q. How does UGI Gas determine which R&B projects are included in the capital budget for a given year?

A. UGI Gas enters R&B projects into its capital budget according to a risk-based prioritization process.

Q. Please describe this risk-based prioritization process.

A. This process prioritizes the replacement of cast iron and bare steel pipe, which are more susceptible to failure from corrosion, cracks, and leakage (as compared to other pipe materials). Risk evaluations for mains are based on numerous factors, including condition, age, coating, type of ground cover, geographical proximity to structures and prior leak and/or break history. UGI Gas reviews these factors annually to identify the highest risk pipe segments and prioritize them for replacement.[1] Specifically, commercial risk evaluation software is used in concert with a team of Subject Matter Experts to evaluate, prioritize, and bundle replacement projects. Furthermore, UGI Gas's Distribution Integrity Management Plan ("DIMP") and Transmission Integrity Management Program ("TIMP") provide a detailed listing of factors considered in the risk-based evaluation, which may cause specific projects to be reprioritized for replacement on a more accelerated basis. This hybrid approach targets the highest risk mains first, while also balancing the need to maximize the efficient deployment of capital and resources.

UGI Gas's prioritization of projects for its capital budgets also is consistent with its Long-Term Infrastructure Improvement Plan ("LTIIP"), which is described in more detail in the direct testimony of UGI Gas witness, Timothy J. Angstadt (UGI Gas Statement No. 9). LTIIP replacement investments are in turn identified and prioritized on a risk basis in accordance with UGI Gas's DIMP.

Q. What are new business projects?

A. New business projects provide new or upgraded gas service to customers and may involve the installation of new gas mains and services or conversions to natural gas service (from other heating sources).

[1] When replacing mains, the Company also replaces associated distribution equipment, including service lines, as well as installing or replacing safety and monitoring devices (excess flow valves), meters, risers, and meter bars. Additionally, indoor meters are relocated to an outside location, except in certain circumstances. Similarly, regulator stations and service regulators are reviewed and prioritized for replacement based on nearby main replacement projects or required upgrades due to the updated equipment installed as part of the main replacement program.

Q. Please describe how the new business infrastructure projects are selected for inclusion in the capital budget.

A. These projects are selected for inclusion in the capital budget according to forecasts of new business opportunities, projections of customer conversions, and plans for new construction and development projects. New business main extensions under the Company's Growth Extension Tariff ("GET") are planned, prioritized, and included in the budget based on: (1) the guidelines outlined in the Company's Tariff; and (2) projections of customer demand (as measured by new service inquiry responses).

Q. What are information technology projects?

A. Information technology ("IT") projects enhance the Company's IT systems. These projects improve the Company's methods (including computerized systems and hardware/software applications) for managing capital projects in a safe and reliable manner. Further, these projects facilitate the Company's ability to enter, store, retrieve, and send data/information related to such projects.

Q. Please describe the prioritization process used to evaluate information services projects.

A. IT projects are prioritized (for inclusion in the budget) based on the need for new systems and hardware to continue performing capital projects in a safe and reliable fashion. Budget determinations are prioritized by the Company's IT Prioritization Committee, based on overall business impact, availability of system support, and resource availability.

Q. What are other capital projects?

A. Other capital projects include building-related projects, corrosion control projects, capital tool purchases, and fleet purchases. Building-related projects consist of building and land purchases, building improvements/renovations, and the purchase of furniture. Corrosion control projects include upgrades and replacements of cathodic protection systems for mains. Capital tool projects encompass new tool purchases for field use during capital projects. These tools include tapping and stopping equipment, safety tools, and leak detection equipment. Fleet purchases are needed to maintain a reliable mode of transportation for field employees to perform their daily functions. These acquisitions include SUVs, pickup trucks, cargo vans, service body trucks, compressor crew trucks, vacuum trucks, aerial lift trucks, dump trucks, backhoes, excavators, forklifts, and equipment trailers for backhoes and excavators.

Q. Please describe the prioritization process used to evaluate other capital projects.

A. Building-related projects are prioritized (for budget inclusion) based on safety/security, regulatory, or financial and strategic needs. Regulatory driven projects originate from audit observations. Physical security audits may prompt the installation of fencing, gates and access controls. Corrosion control projects (involving coated steel main replacements) are prioritized (for budget inclusion) according to requirements set forth in the Federal Gas Safety Regulations (49 C.F.R. Part 192).[2] Corrosion control projects also may depend on

[2] Transmission lines may be replaced due to corrosion that affects wall thickness pursuant to 49 C.F.R. § 192.485. Additionally, portions of transmission lines (with localized corrosion pitting) may be replaced pursuant to 49 C.F.R. § 192.485. Similarly, distribution lines with corrosion (or portions thereof with localized pitting corrosion) may be replaced pursuant to 49 C.F.R. § 192.487. Lines also may need to be replaced if they lack cathodic protection systems, as detailed in 49 C.F.R. § 192.463.

unrepairable leakages or emerging main issues. Capital tool projects are prioritized (for budget inclusion) according to the useful life of the existing assets. Fleet purchases are prioritized (for budget inclusion) based on age, condition, maintenance costs, and mileage of the existing asset.

Q. What are removal and salvage projects?

A. Removal and salvage projects include main and service retirements where assets are not replaced. Additionally, this category of spend includes the environmental projects performed at UGI Gas (including mercury regulator remediation and waste disposal).

Q. Please describe the prioritization process used to evaluate removal and salvage projects.

A. These projects are identified and prioritized (for budget inclusion) through the same risk-based prioritization process used for the R&B projects. Environmental projects are entered into the budget as they are identified in the field. These kinds of capital projects are budgeted on a project level and are rolled up to UGI Gas and UGI Electric (as appropriate). Capital projects of general application to UGI are budgeted by UGI and costs are allocated to the divisions in accordance with the Modified Wisconsin Formula ("MWF").

Q. How have UGI Gas's actual capital additions compared to budgeted capital additions (in relation to the above-described categories)?

A. Over the past five years, the Company's total budgeted capital additions (including all of the above-described categories) was $1,700,335,000, while the total actual capital additions was $1,666,254,000; there was a $34,081,000 variance. More specifically, during this period, the Company's plant additions were 98.0% of its budget. (See UGI Gas Exhibit VAS-2). This close correlation between budgeted and actual plant placed in service over the past five years further supports the Company's claimed level of plant in service in this case, which is discussed in the testimony of UGI Gas witness Vivian K. Ressler (UGI Gas Statement No. 3).

III. UNITE PHASE III-ENTERPRISE ASSET MANAGEMENT ("EAM")

Q. Please describe the asset data collection tool that will be implemented in UNITE Phase III-EAM.

A. UNITE's current EAM project is a multi-phase project that will develop a new database to manage Company assets, including supporting applications. In 2021, the Company started the EAM's asset data collection phase, which focuses on the identification, standardization and capture of asset data information across UGI. It will cost UGI (the Electric and Gas Divisions) approximately $43,000,000 to replace its existing system and leverage the same tools for similar process that will occur across UGI by the end of the FPFTY. One goal will be eliminating paper-based processes and providing automation to improve reliability and streamline operations. With respect to systems, the new EAM will be integrated with a consolidated gas and electric Geographic Information System ("GIS"), and other systems. The asset data collection phase is laying the groundwork for the future phases of UNITE, including a new GIS system.

The new EAM project will result in many positive impacts and benefits to the Company's teams. The new system will reduce redundancies in field crew workflows and forms associated with the installation of Company assets to serve customers. Less back-office work will be required to document asset installations, as more complete and accurate asset data will be gathered and uploaded in the field upon installation.

Some of the benefits will include real-time asset data updates, reduced mapping delays, more accurate asset detail and location cataloguing, and barcode scanning capability. These capabilities will reduce data entry time and potential asset location errors. The Company will be able to easily track and locate its assets in the event of recalls, markouts, maintenance, or other necessary rework. More specifically, field personnel will utilize handheld devices that scan material attributes as contained in asset barcodes from the manufacturer (for storage in the information system). These devices will capture and utilize real world accurate locations for each installed asset (by way of actual coordinates obtained from satellite technology in the field).

One key change will be that the data for newly installed assets will be immediately visible/accessible in digital form (*i.e.*, system maps). Updates also will undergo a final review and approval by the Mapping Department after the new asset data is uploaded to the system. This will avoid line hits and improve the accuracy of facility mark outs. Improving UGI's spatial data is one of several data cleansing and enhancement initiatives to support UGI's future EAM data-centric business model. Based on a split of plant in service between UGI Gas and UGI Electric, $41,200,001 (of the total $43,000,000 amount) is being included in the gas capital budget for the fully projected future test year ("FPFTY") in this case.

IV. CONCLUSION

Q. Does this conclude your direct testimony?

A. Yes, it does.

DIRECT TESTIMONY OF PAUL R. MOUL

INTRODUCTION AND SUMMARY OF RECOMMENDATIONS

Q. Please state your name, occupation and business address.

A. My name is Paul Ronald Moul. My business address is 251 Hopkins Road, Haddonfield, New Jersey 08033-3062. I am Managing Consultant at the firm P. Moul & Associates, an independent financial and regulatory consulting firm. My educational background, business experience and qualifications are provided in Appendix A, which follows my direct testimony.

Q. What is the purpose of your testimony?

A. My testimony presents evidence, analysis, and a recommendation concerning the appropriate cost of common equity and overall rate of return that the Pennsylvania Public Utility Commission ("PUC" or the "Commission") should recognize in determining the revenues UGI Utilities, Inc. – Gas Division ("UGI Gas" or the "Company") should be authorized to recover as a result of this proceeding. My analysis and recommendation are supported by the detailed financial data contained in Exhibit B, which is a multi-page document consisting of Schedules one (1) through fourteen (14).

Q. Based upon your analysis, what is your conclusion concerning the appropriate rate of return for the Company?

A. My conclusion is that the Company should be afforded an opportunity to earn a 7.96% overall rate of return, which includes an 11.20% rate of return on common equity. My 11.20% rate of return on common equity includes recognition of the exemplary performance of the Company's management and is established using capital market and financial data relied upon by investors when assessing the relative risk, and hence cost of capital for the Company.

My overall rate of return recommendation is determined by using the weighted average cost of capital approach. This approach provides a means to apportion the return to each class of investor. The calculation of the weighted average cost of capital requires the selection of appropriate capital structure ratios and a determination of the cost rate for each capital component. The resulting overall cost of capital when applied to the Company's rate base will provide a level of return which will compensate investors for the use of their capital. My overall cost of capital recommendation is set forth below and is shown on page 1 of Schedule 1.

Type of Capital	Ratios	Cost Rate	Weighted Cost Rate
Total Debt	44.88%	3.98%	1.79%
Common Equity	55.12%	11.20%	6.17%
Total	100.00%		7.96%

This overall rate of return is applicable to the September 30, 2023, fully projected future test year ("FPFTY") and the initial period that the Company's proposed rates will be effective.

Q. Is the market impact of the COVID-19 Pandemic reflected in your analysis of the cost of equity for the Company?

A. Yes. My cost of equity analysis reflects the impact of the COVID-19 Pandemic ("Pandemic"). These events have had a significant impact on the stock and bond markets beginning in the February-March 2020 time frame. During this period, we saw abrupt reaction to the Pandemic. These events led to the end of the record-setting 128-month economic expansion. As we entered a recession in February 2020, extraordinary actions were taken by the Federal Open Market Committee

("FOMC") to address these disruptions. Over the course of the Pandemic, stock prices have rebounded and have reached new highs. Economic growth has rebounded and has produced renewed inflation to levels not seen in three (3) decades. Supply shortages have also significantly impacted the consumer sector of the economy. Energy prices have increased as well, with the commodity cost of natural gas spiking upward. While short-term interest rates remain at historically low levels, longer term interest rates began to rise in February 2021. At this point, short-term interest rates are poised to increase when the FOMC ends its bond buying program. The FOMC has indicated that several increases in the Fed Funds rate will likely occur in 2022. Stock market performance has reacted to renewed economic growth by reaching new highs. I have considered these events as they impact the inputs that I used in the various models of the cost of equity.

Q. What factors have you considered in the determination of the Company's cost of equity in this proceeding?

A. UGI Gas is a division of UGI Utilities, Inc. ("UGI Utilities"), a wholly-owned subsidiary of UGI Corporation ("UGI" or the "Parent Company"). The Company provides natural gas distribution service to more than 672,000 customers in forty-five (45) eastern and central Pennsylvania counties. The Company's service territory contains several production centers for basic industries involved in steel and aluminum manufacturing and fabrication, chemicals, and food processing. Throughput to on-system customers in fiscal year 2020 was represented by approximately 19% to sales customers and approximately 81% to transportation customers. The significant portion of the Company's throughput to industrial customers (68% of total throughput) makes the Company a much higher risk utility as compared to the Gas Group. The Company obtains its natural gas supplies from producers and marketers and has transportation arrangements through connections to several interstate pipelines and storage facilities. The Company has storage arrangements for natural gas inventory. UGI Utilities also provides electric delivery service, through UGI Electric, to more than 62,500 customers in portions of Luzerne and Wyoming Counties.

Q. How have you determined the cost of common equity in this case?

A. The cost of common equity is established using capital market and financial data relied upon by investors to assess the relative risk, and hence, the cost of equity for a natural gas utility, such as UGI Gas. In this regard, I have considered four (4) well-recognized models. These methods include: the Discounted Cash Flow ("DCF") model, the Risk Premium ("RP") analysis, the Capital Asset Pricing Model ("CAPM"), and the Comparable Earnings ("CE") approach. The results of a variety of approaches indicate that the Company's rate of return on common equity is 11.20%, including 0.20% in recognition of the Company's exemplary management performance.

Q. In your opinion, what factors should the Commission consider when determining the Company's cost of capital in this proceeding?

A. The Commission's rate of return allowance must be set to cover the Company's interest and dividend payments, provide a reasonable level of earnings retention, produce an adequate level of internally generated funds to meet capital requirements, be commensurate with the risk to which the Company's capital is exposed, assure confidence in the financial integrity of the Company, support reasonable credit quality, and allow the Company to raise capital on reasonable terms. The return that I propose fulfills these established standards of a fair rate of return set forth by the landmark Bluefield and Hope cases.[1] That is to say, my proposed rate of return is commensurate with returns available on investments having corresponding risks.

Q. How have you measured the cost of equity in this case?

A. The models that I used to measure the cost of common equity for the Company were applied with market and financial data developed from a group of companies engaged in the distribution of natural gas. I will refer to these companies as the "Gas Group" throughout my testimony. I began with all of the gas utilities contained in The Value Line Investment Survey, which consists of ten (10) companies. Value Line is an investment advisory service that is a widely used source in public utility rate cases. However, I eliminated one (1) company from the Value Line group. UGI Corporation was removed due to its diversified businesses consisting of six (6) reportable segments, including propane, two (2) international LPG segments, natural gas utility, energy services, and electric generation. The remaining nine (9) companies in the Gas Group are identified on page 2 of Schedule 3. These are the same companies that were used to apply the cost of equity models in the recent Quarterly Earnings Report approved by the Commission on October 9, 2021.

Q. How have you performed your cost of equity analysis with the market data for the Gas Group?

A. I have applied the methods/models for estimating the cost of equity using the average data for the Gas Group. I have not measured separately the cost of equity for the individual companies within the Gas Group, because the determination of

[1] Bluefield Water Works & Improvement Co. v. P.S.C. of West Virginia, 262 U.S. 679 (1923) and F.P.C. v. Hope Natural Gas Co., 320 U.S. 591 (1944).

the cost of equity for an individual company can be problematic. The use of group average data will reduce the effect of potentially anomalous results for an individual company if a company-by-company approach were utilized.

Q. Please summarize your cost of equity analysis.

A. My cost of equity determination was derived from the results of the methods/models identified above. In general, the use of more than one method provides a superior foundation to arrive at the cost of equity. At any point in time, a single method can provide an incomplete measure of the cost of equity. The specific application of these methods/models will be described later in my testimony. The following table provides a summary of the indicated costs of equity using each of these approaches.

DCF	11.21%
Risk Premium	10.50%
CAPM	13.55%
Comparable Earnings	12.70%

From these measures, I recommend a cost of equity of 11.00%, to which 0.20% should be added in recognition of the Company's exemplary management performance. My recommendation is on the conservative side for UGI Gas because it is based on the Gas Group that does not have the Company's high-risk attributes related to its high level of industrial throughput. My determination of the cost of equity focuses on the DCF and Risk Premium approaches that provide a return of 10.86% (11.21% + 10.50% = 21.71% ÷ 2 = 10.86%) and on all of the market-based models, i.e., DCF, Risk Premium and CAPM, that provide a return of 11.75% (11.21% + 10.50% + 13.55% = 35.26% ÷ 3 = 11.75%). My 11.20% cost of equity recommendation includes 20 basis points or 0.20% recognition for the exemplary performance of the Company's management and falls within the range of 10.86% to 11.75% indicated above. Mr. Brown's testimony in UGI Gas Statement No. 1 demonstrates that the Company ranks high in customer service and management effectiveness. To obtain new capital to support an expanded construction program and retain existing capital, the rate of return on common equity must be high enough to satisfy investors' requirements. Along these lines, the Company is spending considerable amounts of new capital, which are large by historical standards, which will put a strain on financial performance in the short run. In recognition of its performance, the Company should be granted an opportunity to earn an 11.20% rate of return on common equity.

NATURAL GAS RISK FACTORS

Q. What factors currently affect the business risk of natural gas utilities?

A. Natural gas utilities face risks arising from competition, economic regulation, the business cycle, and customer usage patterns. Today, they operate in a complex environment with time frames for decision-making considerably shortened. Their business profile is influenced by market-oriented pricing for the commodity distributed to customers and open access for the transportation of natural gas for customers. The gas distribution industry also faces the risk associated with increased availability of renewable energy sources, expanded emphasis on energy efficiency, and potential initiatives directed toward decarbonization as a national energy policy.

Natural gas utilities have focused increased attention on safety and reliability issues and on conservation. In order to address these issues and to comply with new and pending pipeline safety regulations, natural gas companies are now allocating more of their resources to addressing aging infrastructure issues. The testimony of Company witnesses discusses the investments that the Company has made and will continue to make to address these issues and expansion requests, which have led to increased external capital requirements.

Q. Does the Company face competition in its natural gas business?

A. Yes. The Company's service territory is within or in close proximity to the Marcellus Shale production area, which provides additional risk for it compared to many companies in the Gas Group. Natural gas utilities generally face significant competition from alternative energy sources. The Company faces direct competition from electricity, fuel oil, and propane in its service territory, and there is now an increased emphasis on electricity as an energy source. Propane and fuel oil have an advantage because they are not inhibited by regulatory constraints when conducting marketing and pricing their services. This situation is unlike that of UGI Gas, where specific thresholds must be satisfied for system expansions, where promotional activities are constrained and prices are regulated. The Company also faces the risk associated with throughput to interruptible customers whose deliveries are influenced by global oil prices. Further, the Company has identified seventeen (17) customers that could potentially bypass its system.

Q. What are the risks associated with the Company's large volume customers?

A. The Company's risk profile is strongly influenced by throughput delivered to large competitive market customers. Industrial customers represent 68% of throughput, but these customers represent about one-half of one percent of total customers. Moreover, the Company's top ten (10) customers represent 185.8 million Mcf of total throughput or about 64% of the total. Electric generation, manufacturing, and food processing are among these customers. Steel and aluminum manufacturing and fabrication face a number of challenges including international competition, increased costs, and fluctuating demand for their products. Industrial sales are generally higher in risk than sales to other classes of customers. Success in this segment of the Company's market is subject to the business cycle and the price of alternative energy sources. Moreover, external factors can also influence the Company's sales to these customers, which face competitive pressures on their own operations from other facilities outside the Company's service territory.

Q. Please detail the regulatory risks faced by the Company?

A. Among other factors, regulatory risks faced by the Company are elevated when it comes to permits and approvals necessary for the siting of projects that assure reliable supply of natural gas. Obtaining these permits and approvals has become a time consuming and increasingly risky process that adds delay and costs to the projects that will assure adequate gas supply for the Company.

Q. Please discuss some of the operational risks faced by the Company?

A. Risks that affect the Company's operations relate to adequate delivery capability, counterparty risk, and risks related to cyber-security. The Company is also faced with counterparty risk should suppliers fail to perform their obligations, especially with regard to hedging obligations. In addition, the handling of natural gas is inherently risky. Finally, cyber-security has created increased risk when systems that deliver gas to customers are vulnerable to attack from foreign enemies and domestic terrorists.

Q. What risks are associated with the Company's infrastructure?

A. The Company's infrastructure is aging and is in the process of rehabilitation and replacement. Investments that address these issues cause costs to increase without any corresponding increase in throughput that would add to revenues.

This places pressure on the price paid by customers that may prompt them to seek alternative energy sources.

Q. Please indicate how the Company's risk profile is affected by its construction program.

A. With customer demand for the Company's service at high levels, the Company is faced with the requirement to invest in new facilities to meet growth and to maintain and upgrade existing facilities in its service territory. To maintain safe and reliable service to existing customers, the Company must invest to upgrade its existing facilities. The Company had 1,070 miles of its distribution mains constructed of unprotected steel and cast iron pipe as of year-end 2020. The Company also has 26,744 of its services constructed of unprotected steel. The Company is also under a regulatory mandate to relocate all of its meters outside, with certain exceptions, by September 13, 2034. The continuing costs for upgrading the Company's pipe system will elevate the level of construction expenditures. In the situation where additional capital investment is required to replace existing facilities and also to serve new customers, supportive regulation is a necessary prerequisite for the Company to actually achieve a fair rate of return and attract new capital on reasonable terms.

For the future, the Company estimates that its total construction expenditures will be:

Year	Capital Expenditures
2022	$ 475,000,000
2023	$ 499,000,000
2024	$ 493,000,000
2025	$ 493,484,000
Total	$ 1,960,484,000

Of these amounts, $1,862,535,675 are attributed to the Gas Division. During the 2022-2025 period, gross construction expenditures will represent an approximate 59% increase ($1,960,484,000 ÷ $3,331,998,000) in net utility plant, including construction work in progress, from the level at September 30, 2021.

Q. Are there other features of the Company's business that should be considered when assessing the Company's risk?

A. Yes. Most of the Company's residential and commercial customers use natural gas for space heating purposes. Therefore, a large proportion of the Company's residential and commercial customers present a low load factor profile and their energy demands are significantly influenced by temperature conditions, over which the Company has absolutely no control. To help deal with this issue, UGI Gas is proposing a weather normalization adjustment ("WNA") mechanism as part of its tariff.

Q. Does your cost of equity analysis and recommendation take into account the revenue decoupling mechanism?

A. Yes. The Company is proposing a weather normalization mechanism in this case as described in the prefiled direct testimony of Company witness Mr. John D. Taylor (UGI Gas Statement No. 9). This is intended to reconcile actual weather-adjusted sales margins with those approved in the Company's most recent rate case. My cost of equity analysis takes into account the Company's WNA mechanism.

Q. How have you addressed this issue?

A. My analysis reflects the impact of the WNA on investor expectations through the use of market-determined models. All of the companies in my Gas Group have some form of WNA mechanism that is intended to accomplish the same result as the Company's proposal in this case. As a group, the market prices of these companies' common equity reflect the expectations of investors that the companies' revenues are stabilized to some extent by a WNA. Therefore, my analysis reflects the impacts of decoupling on investor expectations through the use of market-determined models.

As such, the market prices of these companies' common stocks reflect the expectations of investors related to a regulatory mechanism that adjusts revenues for conservation, abnormal weather, and other items. The trend in the industry is to stabilize the recovery of fixed costs, which are unaffected by usage. Indeed, there has been a proliferation of these mechanisms in the LDC business. Because the Gas Group that I use to measure the cost of equity has the risk attributes related to the revenue decoupling mechanism "baked in" to their stock prices, the absence of the benefit of the WNA would increase the cost of equity as determined by the models that are applied with the Gas Group data.

Q. Is the Company's risk also affected by the substantial decline in usage per customer?

A. Yes. Despite adding new customers, usage per residential heating customer continues to decline over time as is shown in UGI Gas Exhibit SAE-3 and discussed in the testimony of Ms. Sherry Epler (UGI Gas Statement No. 8).

Company analysis indicates that this decline will continue, particularly with the implementation of its successful energy efficiency and conservation plan. This plan provides many benefits to customers and to the public, but can be expected to further reduce customer usage and consequently Company revenues and return.

Q. Are you aware that there is a DSIC available to natural gas utilities in Pennsylvania, and does the DSIC affect the Company's cost of capital?

A. I am aware that the Company has utilized the Distribution System Improvement Charge ("DSIC") in the past. The cost of capital for UGI Gas, however, is not affected by the DSIC. I say this because most of the proxy group companies (i.e., eight (8) of nine (9) companies) whose data has been used to develop the cost of equity for UGI Gas in this proceeding have a DSIC or similar infrastructure rehabilitation mechanisms. Indeed, Atmos Energy, Chesapeake, New Jersey Resources, NiSource, Northwest Natural Gas, South Jersey Industries, Southwest Gas, and Spire make use of a DSIC or similar infrastructure rehabilitation mechanisms. Hence, whatever the benefit of a DSIC, or other regulatory mechanisms, that impact is already reflected in the market evidence of the cost of equity for the proxy group.

Q. How should the Commission respond to the issues facing the natural gas business and in particular UGI Gas?

A. The Commission should recognize the issues listed above when deciding the rate of return issue in this case. In particular, the Company has higher risks associated with its large throughput to industrial customers. Another risk is declining usage per customer discussed in the testimony of Company witness Ms. Sherry Epler

(UGI Gas Statement No. 8). Moreover, the Company requires regulatory support at a time of increased infrastructure spending now underway for the Company.

FUNDAMENTAL RISK ANALYSIS

Q. Is it necessary to conduct a fundamental risk analysis to provide a framework for a determination of a utility's cost of equity?

A. Yes, it is. It is necessary to establish a company's relative risk position within its industry through a fundamental analysis of various quantitative and qualitative factors that bear upon investors' assessment of overall risk. The qualitative factors that bear upon Company risk have already been discussed. The quantitative risk analysis follows. The items that influence investors' evaluation of risk and their required returns were described above. For this purpose, I compared the Company to the S&P Public Utilities, an industry-wide proxy consisting of various regulated businesses, and to the Gas Group.

Q. What are the components of the S&P Public Utilities?

A. The S&P Public Utilities is a widely recognized index that is comprised of electric power and natural gas companies. These companies are identified on page 3 of Schedule 4.

Q. What companies comprise the Gas Group?

A. My Gas Group consists of the following companies: Atmos Energy Corp., Chesapeake Utilities Corporation, New Jersey Resources Corp., NiSource, Inc., Northwest Natural Holding Co., ONE Gas, Inc., South Jersey Industries, Inc., Southwest Gas Holdings, and Spire, Inc.

Q. Is knowledge of a utility's bond rating an important factor in assessing its risk and cost of capital?

A. Yes. Knowledge of a company's credit quality rating is important because the cost of each type of capital is directly related to the associated risk of the firm. So, while a company's credit quality risk is shown directly by the rating and yield on its bonds, these relative risk assessments also bear upon the cost of equity. This is because a firm's cost of equity is represented by its borrowing cost plus compensation to recognize the higher risk of an equity investment compared to debt.

Q. How do the credit quality ratings compare for the Company, the Gas Group, and the S&P Public Utilities?

A. Presently, the Company's Long Term ("LT") issuer credit quality rating is A2 from Moody's Investors Service ("Moody's") and A- from Fitch. The rating represents the LT issuer rating by Moody's, which focuses upon the credit quality of the issuer of the debt rather than upon the debt obligation itself. For the Gas Group, the average LT issuer rating is A3 by Moody's and A- by Standard & Poor's, as displayed on page 2 of Schedule 3. For the S&P Public Utilities, the average credit quality rating is A3 by Moody's and BBB+ by Standard & Poor's, as displayed on page 3 of Schedule 4. Many of the financial indicators that I will subsequently discuss are considered during the rating process.

Q. How do the financial data compare for the Company, the Gas Group, and the S&P Public Utilities?

A. The broad categories of financial data that I will discuss are shown on Schedules 2, 3, and 4. The data cover the five-year period 2016-2020. The important categories of relative risk may be summarized as follows:

Size. In terms of capitalization, the Company is smaller than the average size of the Gas Group, and smaller still than the average size of the S&P Public Utilities. All other things being equal, a smaller company is riskier than a larger company because a given change in revenue and expense has a proportionately greater impact on a small firm. As I will demonstrate later, the size of a firm can impact its cost of equity. This is the case for UGI Gas as compared to the Gas Group and the S&P Public Utilities.

Market Ratios. Market-based financial ratios, such as earnings/price ratios and dividend yields, provide a partial measure of the investor-required cost of equity. If all other factors are equal, investors will require a higher rate of return for companies that exhibit greater risk. That is to say, a firm that investors perceive to have higher risks will experience a lower price per share in relation to expected earnings.[2]

There are no market ratios available for the Company because its stock is owned by UGI Corporation. The five-year average price-earnings multiple was somewhat higher for the Gas Group compared to the S&P Public Utilities. The five-year average dividend yield was lower for the Gas Group as compared to the S&P Public Utilities. The five-year average market-to-book ratio was slightly lower for the Gas Group as compared to the S&P Public Utilities.

Common Equity Ratio. The level of financial risk is measured by the proportion of long-term debt and other senior capital that is contained in a company's capitalization. Financial risk is also analyzed by comparing common

[2]For example, two otherwise similarly situated firms each reporting $1.00 in earnings per share would have different market prices at varying levels of risk (i.e., the firm with a higher level of risk will have a lower share value, while the firm with a lower risk profile will have a higher share value).

equity ratios (the complement of the ratio of debt and other senior capital). A firm with a higher common equity ratio has lower financial risk, while a firm with a lower common equity ratio has higher financial risk. The five-year average common equity ratios, based on permanent capital, were 56.6% for UGI Gas, 51.5% for the Gas Group, and 41.3% for the S&P Public Utilities. The Company's common equity ratio was higher than the Gas Group, thereby indicating somewhat lower financial risk. However, for the purpose of this case, the Company's common equity ratio is within the range of other gas distribution utilities.

Return on Book Equity. Greater variability (i.e., uncertainty) of a firm's earned returns signifies relatively greater levels of risk, as shown by the coefficient of variation (standard deviation ÷ mean) of the rate of return on book common equity. The higher the coefficients of variation, the greater degree of variability. For the five-year period, the coefficients of variation were 0.120 (1.4% ÷ 11.7%) for the Company, 0.079 (0.7% ÷ 8.9%) for the Gas Group, and 0.039 (0.4% ÷ 10.3%) for the S&P Public Utilities. The variability of the Company's rates of return was considerably higher than the Gas Group and the S&P Public Utilities, thereby signifying higher risk for the Company.

Operating Ratios. I have also compared operating ratios (the percentage of revenues consumed by operating expense, depreciation, and taxes other than income).[3] The five-year average operating ratios were 76.7% for the Company, 83.6% for the Gas Group, and 78.8% for the S&P Public Utilities. The Company's operating ratios were somewhat lower than the Gas Group, thereby indicating slightly lower risk.

[3]The complement of the operating ratio is the operating margin which provides a measure of profitability. The higher the operating ratio, the lower the operating margin.

Coverage. The level of fixed charge coverage (i.e., the multiple by which available earnings cover fixed charges, such as interest expense) provides an indication of the earnings protection for creditors. Higher levels of coverage, and hence earnings protection for fixed charges, are usually associated with superior grades of creditworthiness. Excluding Allowance for Funds Used During Construction ("AFUDC"), the five-year average pre-tax interest coverage was 5.07 times for the Company, 4.05 times for the Gas Group, and 3.02 times for the S&P Public Utilities. The interest coverages were higher for the Company as compared to the Gas Group, thereby indicating lower credit risk.

Quality of Earnings. Measures of earnings quality usually are revealed by the percentage of AFUDC related to income available for common equity, the effective income tax rate, and other cost deferrals. These measures of earnings quality usually influence a firm's internally generated funds because poor quality of earnings would not generate high levels of cash flow. During the Pandemic, there was further pressure on cash flows due to the suspension of collection activities and the moratorium against shut off service due to nonpayment. Moreover, the Company has created a regulatory asset consisting of Pandemic related costs that the Commission has allowed to be deferred, such as excess uncollectible accounts expense and costs for an approved Emergency Relief Program. Such actions have a negative impact on the Company's cash flow. Quality of earnings has not been a significant concern for the Company, the Gas Group, and the S&P Public Utilities.

Internally Generated Funds. Internally generated funds ("IGF") provide an important source of new investment capital for a utility and represent a key measure of credit strength. Historically, the five-year average percentage of IGF to capital expenditures was 72.4% for the Company, 56.0% for the Gas Group, and 69.5% for the S&P Public Utilities. The Company's IGF to construction expenditures dropped in 2019 and 2020 after the reduction in the provision for deferred taxes due to the elimination of bonus depreciation.

Betas. The financial data that I have been discussing relate primarily to company-specific risks. Market risk for firms with publicly-traded stock is measured by beta coefficients. Beta coefficients attempt to identify systematic risk, i.e., the risk associated with changes in the overall market for common equities.[4] Value Line publishes such a statistical measure of a stock's relative historical volatility to the rest of the market. A comparison of market risk is shown by the Value Line beta of 0.88 as the average for the Gas Group (see page 2 of Schedule 3) and 0.91 as the average for the S&P Public Utilities (see page 3 of Schedule 4). The systematic risk for the Gas Group as measured by the Value Line beta is fairly similar to the S&P Public Utilities.

Q. Please summarize your risk evaluation.

A. The investment risk of UGI Utilities parallels that of the Gas Group in certain respects. In certain regards, principally related to its small size, large throughput to industrial customers, and more variable earned returns, UGI Utilities has somewhat higher risk traits. UGI Utilities has lower risk as shown by its historic higher common equity ratio, its lower operating ratio, and higher interest

[4]Beta is a relative measure of the historical sensitivity of the stock's price to overall fluctuations in the New York Stock Exchange Composite Index. The ''Beta coefficient'' is derived from a regression analysis of the relationship between weekly percentage changes in the price of a stock and weekly percentage changes in the NYSE Index over a period of five years. The betas are adjusted for their long-term tendency to converge toward 1.00. A common stock that has a beta less than 1.0 is considered to have less systematic risk than the market as a whole and would be expected to rise and fall more slowly than the rest of the market. A stock with a beta above 1.0 would have more systematic risk.

coverages. On balance, the cost of equity measured with the Gas Group data will provide a reasonable, albeit conservative, representation of the Company's cost of equity.

CAPITAL STRUCTURE RATIOS

Q. Please explain the selection of capital structure ratios for UGI Utilities in this case.

A. In the situation where the operating public utility raises its own long-term debt directly in the capital markets, as is the case for UGI Utilities, it is proper to employ the capital structure ratios and senior capital cost rates of the regulated public utility for rate of return purposes. In that case, the property and earnings of the operating public utility forms the basis of the capital employed, and the capital cost rates are directly identifiable. I have employed the consolidated capital structure ratios of UGI Utilities to calculate the rate of return for this case because it finances all its operations on a consolidated basis. The circumstances of UGI Gas indicate that the capital structure ratios of UGI Utilities should be used for rate of return purposes for both its utility divisions.

Q. Does Schedule 5 provide the capitalization and capital structure ratios you have considered?

A. Yes. Schedule 5 presents UGI Utilities' capitalization and related capital structure at September 30, 2021, the end of the historic test year ("HTY"). Also shown on Schedule 5 is the UGI Utilities' capital structure estimated at September 30, 2022, the end of the future test year ("FTY"), and at September 30, 2023, the end of the FPFTY. The changes in UGI Utilities' capital structure consist of: (i) debt maturities and principal payments of $107.813 million in both the FTY and FPFTY, (ii) the issuance in three (3) series of $300 million debt issues in both the FTY and FPFTY,

(iii) the receipt of $35 million of capital contributions in the FTY, and (iv) the Company's projection of retained earnings at the end of the FTY and FPFTY.

Q. Have you made adjustments to the Company's capitalization for rate-setting purposes?

A. Yes. I have removed accumulated other comprehensive income ("OCI") from the Company's common equity account.

Q. Please explain the justification for removing the accumulated OCI?

A. The accumulated OCI must be eliminated from the capital structure for rate setting purposes. OCI arises from a variety of sources, including: minimum pension liability ("MPL"), foreign currency hedges, unrealized gains and losses on securities available for sale, interest rate swaps, and other cash flow hedges. The accumulated OCI for the Company has its roots in the MPL and interest rate hedges associated with derivative instruments. An MPL entry must be recorded on the balance sheet when the present value of the pension benefit earned by employees exceeds the market value of trust fund assets. It should be noted that the Company records the change related to prior service cost and actuarial valuations as a regulatory asset for the portion of pension attributable to its retirees and employees that are part of its regulated utility operations. The amount in the accumulated OCI is related to the portion attributable to employees of UGI Corporation and non-utility subsidiaries. That is to say, the accumulated OCI associated with MPL is not related to utility operations.

Q. What capital structure ratios do you recommend be adopted for rate of return purposes in this proceeding?

A. I will adopt the UGI Utilities' capital structure ratios at the end of the FPFTY, which consists of 44.88% long-term debt and 55.12% common equity, on a rounded basis. These ratios are within the ranges indicated for the Gas Group. These capital structure ratios are the best approximation of the mix of capital the Company will employ to finance its rate base during the period new rates are in effect.

Q. Have you included short-term debt as a component of the Company's capital structure in the case?

A. No. I have considered the issue of short-term debt, but I have rejected its use here. The Company uses short-term debt to finance non-rate base items. In reaching this conclusion, I have analyzed the 12-month average balances of short-term debt for the HTY, the FTY, and the FPFTY and compared those amounts to the Company's construction work in progress ("CWIP"). I have done this because the Company follows the FERC formula to calculate its AFUDC ("Allowance of Funds Used During Construction rate"). That formula assigns short-term debt first to CWIP, with any excess balance of CWIP receiving the Company's overall rate of return. In order to avoid double-counting the amount of short-term debt that finances CWIP, those amounts must be removed from the average short-term debt amounts for rate case purposes. That is to say, the use of short-term debt for AFUDC decreases the overall cost of construction that ultimately goes into rate base so ratepayers ultimately receive the benefit for this lower cost capital. Moreover, the Company has other assets on its balance sheet that require short-term financing such as its unrecovered environmental expenditures that are regulatory assets. The unrecovered balance of the environment remediation costs is expected to be $3.796 million at the end of the FPFTY. It is reasonable to assume that short-term debt represents the source of funds used to finance these costs that are not in the rate base. As a consequence, no amount of short-term debt can be assumed to finance the rate base in this case. In the FPFTY, the CWIP balance exceeds the average amount of short-term debt. Hence, all short-term debt is excluded from the capital structure in the FPFTY.

COST OF SENIOR CAPITAL

Q. What cost rate have you assigned to the long-term debt portion of the capital structure?

A. Consistency requires that the embedded senior capital cost rates of UGI Utilities must be used for developing a fair rate of return for the Company. It is essential that the cost rate of long-term debt is related to the same proportion of senior capital employed to arrive at the capital structure ratios. The determination of the long-term debt cost rate is essentially an arithmetic exercise. This is due to the fact that UGI Utilities has contracted for the use of this capital for a specific period of time at a specified cost rate. As shown on page 1 of Schedule 6, I have computed the actual embedded cost rate of long-term debt at September 30, 2021. On page 2 of Schedule 6, I have shown the estimated embedded cost rate of long-term debt at September 30, 2022. And on page 3 of Schedule 6, the embedded cost of long-term debt is shown for the FPFTY. The development of the individual effective cost rates for each series of long-term debt, using the cost rate to maturity technique, is shown on page 4 of Schedule 6. The cost rate, or yield to maturity, is the rate of discount that equates the present value of all future interest and principal payments with the net proceeds of the bond.

The interest rates for the three (3) new issues of debt in the FTY and FPFTY are 3.687% for the 30-year issue in May 2022, 1.410% for the 5-year issue in July 2022, and 3.791% for the 30-year issue in October 2022. With these rates, I calculate a 3.98% forecast embedded long-term debt cost rate at September 30, 2023, as shown on page 3 of Schedule 6. This rate is related to the amount of long-term debt shown on Schedule 5, which provides the basis for the 44.88% long-term debt ratio.

COST OF EQUITY – GENERAL APPROACH

Q. Please describe how you determined the cost of equity for the Company.

A. Although my fundamental financial analysis provides the required framework to establish the risk relationships among UGI Gas, the Gas Group, and the S&P Public Utilities, the cost of equity must be measured by standard financial models that I identified above. Differences in risk traits, such as size, business diversification, geographical diversity, regulatory policy, financial leverage, and bond ratings must be considered when analyzing the cost of equity.

It is also important to reiterate that no one method or model of the cost of equity can be applied in an isolated manner. Rather, informed judgment must be used to take into consideration the relative risk traits of the firm. It is for this reason that I have used more than one method to measure the Company's cost of equity. As I describe below, each of the methods used to measure the cost of equity contains certain incomplete and/or overly restrictive assumptions and constraints that are not optimal. Therefore, I favor considering the results from a variety of methods. In this regard, I applied each of the methods with data taken from the Gas Group and arrived at a cost of equity of 11.20%, including a provision for recognition of exemplary management performance.

DISCOUNTED CASH FLOW

Q. Please describe the DCF model.

A. The DCF model seeks to explain the value of an asset as the present value of future expected cash flows discounted at the appropriate risk-adjusted rate of return. In its simplest form, the DCF-determined return on common stock consists of a current cash (dividend) yield and future price appreciation (growth) of the investment. The dividend discount equation is the familiar DCF valuation model, which assumes that future dividends are systematically related to one another by a constant growth rate. The DCF formula is derived from the standard valuation model: P = D/(k-g), where P = price, D = dividend, k = the cost of equity, and g = growth in cash flows. By rearranging the terms, we obtain the familiar DCF equation: k= D/P + g. All of the terms in the DCF equation represent investors' assessment of expected future cash flows that they will receive in relation to the value that they set for a share of stock (P). The DCF equation is sometimes referred to as the "Gordon" model.[5] My DCF results are provided on Schedule 1, page 2, for the Gas Group. The DCF return is 11.21% with the leverage adjustment and 10.26% without the leverage adjustment for the Gas Group. The leverage adjustment is discussed more fully below.

Among the limitations of the model, there is a certain element of circularity in the DCF method when applied in rate cases. This is because investors' expectations for the future depend upon regulatory decisions. In turn, when regulators depend upon the DCF model to set the cost of equity, they rely upon investor expectations that include an assessment of how regulators will decide rate cases. Due to this circularity, the DCF model may not fully reflect the true risk of a utility. Other limitations of the DCF include the constant price-earnings multiple assertion that does not conform with actual stock market performance. And,

[5] Although the popular application of the DCF model is often attributed to the work of Myron J. Gordon in the mid-1950's, J. B. Williams exposited the DCF model in its present form nearly two decades earlier.

indeed, the FERC has moved to using multiple methods for measuring the cost of equity close due to the limitations of the DCF.

Q. What is the dividend yield component of a DCF analysis?

A. The dividend yield reveals the portion of investors' cash flow that is generated by the return provided by the dividends an investor receives. It is measured by the dividends per share relative to the price per share. The DCF methodology requires the use of an expected dividend yield to establish the investor-required cost of equity. For the twelve (12) months ended September 2021, the monthly dividend yields are shown on Schedule 7. The month-end prices were adjusted to reflect the buildup of the dividend in the price that has occurred since the last ex-dividend date (i.e., the date by which a shareholder must own the shares to be entitled to the dividend payment – usually about two (2) to three (3) weeks prior to the actual payment).

For the twelve (12) months ended September 2021, the average dividend yield was 3.49% for the Gas Group based upon a calculation using annualized dividend payments and adjusted month-end stock prices. The dividend yields for the more recent six-month and three-month periods were 3.39% and 3.51%, respectively. For applying the DCF model, I have used the six-month average dividend yield of 3.39% for the Gas Group. The use of this dividend yield will reflect current capital costs, while avoiding spot yields. For the purpose of a DCF calculation, the average dividend yield must be adjusted to reflect the prospective nature of the dividend payments, i.e., the higher expected dividends for the future. Recall that the DCF is an expectational model that must reflect investors' anticipated cash flows. I have adjusted the six-month average dividend yield in three (3) different, but generally accepted, manners and used the average of the three (3) adjusted values as calculated in the lower panel of data presented on Schedule 7. This adjustment adds twelve (12) basis points to the six-month average historical yield, thus producing the 3.51% adjusted dividend yield for the Gas Group.

Q. What factors influence investors' growth expectations?

A. As noted previously, investors are interested principally in the dividend yield and future growth of their investment (i.e., the price per share of the stock). Future growth in earnings per share is the DCF model's primary focus because, under the model's assumption that the price-earnings multiple remains constant, the price per share of stock will grow at the same rate as earnings per share. A growth rate analysis considers a variety of variables to reach a consensus of prospective growth, including historical data and widely available analysts' forecasts of earnings, dividends, book value, and cash flow (all stated on a per-share basis). A fundamental growth rate analysis is frequently based upon internal growth ("b x r"), where "r" is the expected rate of return on common equity and "b" is the retention rate (a fraction representing the proportion of earnings not paid out as dividends). To be complete, the internal growth rate should be modified to account for sales of new common stock (external growth), which is represented by the formula s x v, where "s" is the number of new common shares the firm expects to issue and "v" is the value that accrues to existing shareholders from selling stock at a price above book value. Fundamental growth, which combines internal and external growth, encompasses the factors that cause book value per share to grow over time.

Growth also can be expressed in multiple stages. This expression of growth consists of an initial "growth" stage where a firm enjoys rapidly expanding markets, high profit margins, and abnormally high growth in earnings per share. Thereafter, a firm enters a “transition” stage where fewer technological advances and increased product saturation begin to reduce the growth rate and profit margins come under pressure. During the “transition” stage, investment opportunities begin to mature, capital requirements decline, and a firm begins to pay out a larger percentage of earnings to shareholders. Finally, the mature or “steady-state” stage is reached when a firm’s earnings growth, payout ratio, and return on equity stabilize at levels where they remain for the life of a firm. The three (3) stages of growth assume a step-down of high initial growth to lower sustainable growth. Even if these three (3) stages of growth can be envisioned for a firm, the third “steady-state” growth stage, which is assumed to remain fixed in perpetuity, represents an unrealistic expectation because the three (3) stages of growth can be repeated. That is to say, the stages can be repeated where growth for a firm ramps-up and ramps-down in cycles over time. For these reasons, there is no need to analyze growth rates individually for each cycle, but rather to rely upon analysts’ growth forecasts, which are those used by investors when pricing common stocks.

Q. How did you determine an appropriate growth rate?

A. The growth rate used in a DCF calculation should measure investor expectations. Investors consider both company-specific variables and overall market sentiment (i.e., level of inflation rates, interest rates, economic conditions, etc.) when balancing their capital gains expectations with their dividend yield requirements. Investors are not influenced solely by a single set of company-specific variables weighted in a formulaic manner. Therefore, all relevant growth rate indicators should be evaluated using a variety of techniques when formulating a judgment of investor-expected growth.

Q. What data for the Gas Group have you considered in your growth rate analysis?

A. I considered the growth in the financial variables shown on Schedules 8 and 9, which reflect historical (Schedule 8) and projected (Schedule 9) rates of growth in earnings per share, dividends per share, book value per share, and cash flow per share for the Gas Group. While analysts will review all measures of growth, as I have done, earnings per share growth directly influences the expectations of investors for the future performance of utility stocks. Forecasts of earnings growth are required because the DCF model is forward-looking, and, with the constant price-earnings multiple and constant payout ratio that the DCF model assumes, all other measures of growth will mirror earnings growth. The historical growth rates were obtained from the Value Line publication that provides this data. While historical data cannot be ignored, it is much less significant in applying the DCF model than projections of future growth. Investors cannot purchase the past earnings of a utility. To the contrary, they are only entitled to future earnings, which are the focus of growth projections. Furthermore, if significant weight is assigned to historical performance, the historical data are double counted because they are already factored into analysts' forecasts of earnings growth.

Q. Is a five-year investment horizon associated with the analysts' forecasts consistent with the traditional DCF model?

A. Yes, it is. Although the constant form of the DCF model assumes an infinite stream of cash flows, investors do not expect to hold an investment indefinitely. Rather than viewing the DCF in the context of an endless stream of growing dividends (e.g., a century of cash flows), the growth in the share value (i.e., capital appreciation, or capital gains yield) is most relevant to investors' total return expectations. Hence, the sale price of a stock can be viewed as a liquidating dividend that can be discounted along with the annual dividend receipts during the investment-holding period to arrive at the investors' expected return. The growth in the price per share will equal the growth in earnings per share if, as the DCF model assumes, there is no change in the price-earnings ("P-E") multiple. As such, my company-specific growth analysis, which focuses principally upon five-year forecasts of earnings per share growth, conforms with the type of analysis that influences investors' expectations of their actual total return. Moreover, academic research focuses also on five-year growth rates specifically because market outcomes occurring over that investment horizon are what influence stock prices. Indeed, if investors required forecasts beyond five (5) years in order to properly value common stocks, then it would be reasonable to expect that some investment advisory service would begin publishing that information for individual stocks in order to meet the demands of the marketplace. The absence of such a publication suggests that there is no market for this information because investors do not require forecasts for an infinite series of future data points in order to make informed decisions to purchase and sell stocks.

Q. What are the analysts' forecasts of future growth that you considered?

A. Schedule 9 provides projected earnings per share growth rates taken from analysts' five-year forecasts compiled by IBES/First Call, Zacks, and Value Line. These are all reliable authorities of projected growth that investors use to make buy, sell, and hold decisions. The IBES/First Call and Zacks estimates are obtained from the Internet and are widely available to investors. The growth rates reported by IBES/First Call and Zacks are consensus forecasts taken from a survey of analysts that make growth projections for these companies. Notably, First Call's earnings forecasts are frequently quoted in the financial press. The Value Line forecasts also are widely available to investors and can be obtained by subscription or free-of-charge at most public and collegiate libraries. The IBES/First Call and Zacks forecasts are limited to earnings per share growth, while Value Line makes projections of other financial variables. The Value Line forecasts of dividends per share, book value per share, and cash flow per share for the Gas Group are also included on Schedule 9.

Q. What are the projected growth rates published by the sources you discussed?

A. Schedule 9 shows the prospective five-year earnings per share growth rates projected for the Gas Group by IBES/First Call (5.41%), Zacks (5.88%), and Value Line (7.61%).

Q. Are certain growth rate forecasts entitled to greater weight in developing a growth rate for use in the DCF model?

A. Yes. While a variety of factors should be examined to reach a reasonable conclusion on the DCF growth rate, growth in earnings per share should receive the greatest emphasis. Growth in earnings per share is the primary determinant of investors' expectations of the total returns they will obtain from stocks because the capital gains yield (i.e., price appreciation) will track earnings growth if the P-E multiple remains constant, as the DCF model assumes. Moreover, earnings per share (derived from net income) are the source of dividend payments and are the primary driver of retention growth and its surrogate, i.e., book value per share growth. As such, under these circumstances, greater emphasis must be placed upon projected earnings per share growth. In fact, Professor Myron Gordon, the foremost proponent of the use of the DCF model in setting utility rates, concluded that the best measure of growth for use in the DCF model is a forecast of earnings per-share growth.[6] Consistent with Professor Gordon's findings, projections of earnings per share growth, such as those published by IBES/First Call, Zacks, and Value Line, provide the best indication of investor expectations.

Q. What growth rate do you use in your DCF model?

A. The forecasts shown on Schedule 9 for the Gas Group exhibit a range of average earnings per share growth rates from 5.41% to 7.61%. DCF growth rates should not be established by mathematical formulation, and I have not done so. In my opinion, a growth rate of 6.75% is a reasonable estimate of investor-expected growth for the Gas Group. This value is within the array of analysts' forecasts of five-year earnings per share growth rates and is below the midpoint of that data set. The reasonableness of this growth rate is also supported by the expected continuation of gas utility infrastructure spending.

Q. Are the dividend yield and growth components of the DCF adequate to accurately depict the rate of return on common equity when it is used to calculate a utility's weighted average overall cost of capital?

A. The components of the DCF model are adequate for that purpose only if the capital structure ratios are measured by the market value of debt and equity. In the case of the Gas Group, average capital structure ratios are 43.49% long-term debt, 0.46% preferred stock, and 56.06% common equity, as shown on Schedule 10. If

[6] Gordon, Gordon & Gould, "Choice Among Methods of Estimating Share Yield," The Journal of Portfolio Management (Spring 1989).

book values are used to compute the capital structure ratios, then a leverage adjustment is required.

Q. What is a leverage adjustment?

A. If a firm's capitalization, as measured by its stock price, diverges from its capitalization, measured at book value, the potential exists for a financial risk difference. Such a risk difference arises because a market-valued capitalization contains more equity and less debt than a book-value capitalization and, therefore, has less risk than the book-value capitalization. A leverage adjustment properly accounts for the risk differential between market-value and book-value capital structures.

Q. Why is a leverage adjustment necessary?

A. In order to make the DCF results relevant to the capitalization measured at book value (as is done for rate setting purposes), the market-derived cost rate must be adjusted to account for this difference in financial risk. The only perspective that is important to investors is the return that they can realize on the market value of their investment. As I have measured the DCF, the simple yield (D/P) plus growth (g) provides a return applicable strictly to the price (P) that an investor is willing to pay for a share of stock. The need for the leverage adjustment arises when the results of the DCF model (k) are to be applied to a capital structure that is different from the capital structure indicated by the market price (P). From the market perspective, the financial risk of the Gas Group is accurately measured by the capital structure ratios calculated from the market-valued capitalization of a firm. If the ratemaking process utilized the market capitalization ratios, then no additional analysis or adjustment would be required, and the simple yield (D/P) plus growth (g) components of the DCF would satisfy the financial risk associated with the market value of the equity capitalization. Because the ratemaking process uses ratios calculated from a firm's book value capitalization, further analysis is required to synchronize the financial risk of the book capitalization with the required return on the book value of the firm's equity. This adjustment is developed through precise mathematical calculations, using well recognized analytical procedures that are widely accepted in the financial literature. To arrive at that return, the rate of return on common equity is the unleveraged cost of capital (or equity return at 100% equity) plus one or more terms reflecting the increase in financial risk resulting from the use of leverage in the capital structure. The calculations presented in the lower panel of data shown on Schedule 10, under the heading "M&M,"[7] provides a return of 7.52% when applicable to a capital structure with 100% common equity.

Q. Are there specific factors that influence market-to-book ratios that determine whether the leverage adjustment should be made?

A. No. The leverage adjustment is not intended, nor was it designed, to address the reasons that stock prices vary from book value. Hence, any observations concerning market prices relative to book are not on point. The leverage adjustment deals with the issue of financial risk and does not transform the DCF result to a book value return through a market-to-book adjustment. Again, the leverage adjustment that I propose is based on the fundamental financial precept that the cost of equity is equal to the rate of return for an unleveraged firm (i.e., where the overall rate of return equates to the cost of equity with a capital structure

[7] Franco Modigliani and Merton H. Miller, The Cost of Capital, Corporation Finance, and the Theory of Investments, American Economic Review, June 1958, at 261-297. Franco Modigliani and Merton H. Miller, Taxes and the Cost of Capital: A Correction, American Economic Review, June 1963, at 433-443.

that contains 100% equity) plus the additional return required for introducing debt and/or preferred stock leverage into the capital structure.

Further, as noted previously, the relatively high market prices of utility stocks cannot be attributed solely to the notion that these companies are expected to earn a return on the book value of equity that differs from their cost of equity determined from stock market prices. Stock prices above book value are common for utility stocks, and indeed the stock prices of non-regulated companies exceed book values by even greater margins. It is difficult to accept that the vast majority of all firms operating in our economy are generating returns far in excess of their cost of capital. Certainly, in our free-market economy, competition should contain such "excesses" if they actually existed.

Finally, the leverage adjustment adds stability to the final DCF cost rate. That is to say, as the market capitalization increases relative to its book value, the leverage adjustment increases while the simple yield (D/P) plus growth (g) result declines. The reverse is also true: when the market capitalization declines, the leverage adjustment also declines as the simple yield (D/P) plus growth (g) result increases.

Q. Is the leverage adjustment that you propose designed to transform the market return into one that is designed to produce a particular market-to-book ratio?

A. No, it is not. What I label a "leverage adjustment" is merely a convenient way of showing the amount that must be added to (or subtracted from) the result of the simple DCF model (i.e., D/P + g) when the DCF return applies to a capital structure used for ratemaking that is computed with book-value weighting rather than market-value weighting. Although I specify a separate factor, which I call the leverage adjustment, there is no need to do so other than to identify this factor. If I expressed my return solely in the context of the book value weighting that we use to calculate the weighted average cost of capital and ignore the familiar D/P + g expression entirely, then a separate element in the DCF cost of equity determination would not be needed to reflect the differential in financial leverage between a market-value and book-value capitalization. As shown in the bottom panel of data on Schedule 10, the equity return applicable to the book value common equity ratio is equal to 7.52%, which is the return for the Gas Group appropriate for a capital structure with no debt (i.e., a 100% equity ratio) plus 3.67% to compensate investors for the risk of a 51.07% debt ratio and 0.02% for a 0.54% preferred stock ratio. These are the book-value ratios that differ markedly from the market-value based ratios I discussed previously. Under this approach, the parts sum to 11.21% (7.52% + 3.67% + 0.02%), and there is no need to even address the cost of equity in terms of D/P + g. To express this same return in the context of the familiar DCF model, I summed the 3.51% dividend yield, the 6.75% growth rate, and 0.95% for the leverage adjustment in order to arrive at the same 11.21% (3.51% + 6.75% + 0.95%) return. I know of no means to mathematically solve for the 0.95% leverage adjustment by expressing it in the terms of any particular relationship of market price to book value. The 0.95% adjustment is merely a convenient way to compare the 11.21% return computed using the Modigliani & Miller formulas to the 10.26% return generated by the DCF model (i.e., D_1/P_0 + g, or the traditional form of the DCF shown on Schedule 7, page 1) based on a market-value capital structure. An 11.21% return assigned to anything other than the market value of equity cannot equate to a reasonable return on book value that has higher financial risk. My point is that when we use a market-determined cost of equity developed from the DCF model, it reflects a level of financial risk that is different (in this case, lower) from the capital structure stated at book value. This process has nothing to do with targeting any particular market-to-book ratio.

Q. Please provide the DCF return based upon your preceding discussion of dividend yield, growth, and leverage.

A. As explained previously, I have utilized a six-month average dividend yield (D_{1}/P_{0}) adjusted in a forward-looking manner for my DCF calculation. This dividend yield is used in conjunction with the growth rate (g) previously developed. The DCF also includes the leverage modification (lev.) required when the book value equity ratio is used in determining the weighted average cost of capital in the ratemaking process rather than the market value equity ratio related to the price of stock. The resulting DCF cost rate is 11.21%, computed as follows:

	D_1/P_0	+	*g*	+	*lev.*	=	*k*
Gas Group	3.51%	+	6.75%	+	0.95%	=	11.21%

The DCF result shown above represents the simplified (i.e., Gordon) form of the model that contains a constant-growth assumption. I should reiterate, however, that the DCF-indicated cost rate provides an explanation of the rate of return on common stock market prices without regard to the prospect of a change in the price-earnings multiple. An assumption that there will be no change in the price-earnings multiple is not supported by the realities of the equity market because price-earnings multiples do not remain constant. This is one of the constraints of this model that makes it important to consider the results of other models when determining a company's cost of equity.

RISK PREMIUM ANALYSIS

Q. Please describe your use of the Risk Premium approach to determine the cost of equity.

A. With the Risk Premium approach, the cost of equity capital is determined by corporate bond yields plus a premium to account for the fact that common equity is exposed to greater investment risk than debt capital. The result of my Risk Premium study is shown on Schedule 1, page 2. That result is 10.50%.

Q. What long-term public utility debt cost rate did you use in your Risk Premium analysis?

A. In my opinion, and as I will explain in more detail further in my testimony, a 3.75% yield represents a reasonable estimate of the prospective yield on long-term A-rated public utility bonds.

Q. What historical data are shown by the Moody's data?

A. I have analyzed the historical yields on the Moody's index of long-term public utility debt as shown on Schedule 11, page 1. For the twelve (12) months ended September 2021, the average monthly yield on Moody's index of A-rated public utility bonds was 3.06%. For the six- and three-month periods ended December 2020, the yields were 3.11% and 2.95%, respectively. During the twelve (12) months ended September 2021, the range of the yields on A-rated public utility bonds was 2.77% to 3.44%. Page 2 of Schedule 11 shows the long-run spread in yields between A-rated public utility bonds and long-term Treasury bonds. As shown on page 3 of Schedule 11, the yields on A-rated public utility bonds have exceeded those on Treasury bonds by 1.09% on a twelve-month average basis, 1.01% on a six-month average basis, and 1.02% on a three-month average basis. Giving greater emphasis to the six-month average spread, 1.00% represents a reasonable spread for the yield on A-rated public utility bonds over Treasury bonds.

Q. What forecasts of interest rates have you considered in your analysis?

A. I have determined the prospective yield on A-rated public utility debt by using the Blue Chip Financial Forecasts ("Blue Chip") along with the spread in the yields that I describe below. Blue Chip is a reliable authority and contains consensus forecasts of a variety of interest rates compiled from a panel of banking, brokerage, and investment advisory services. In early 1999, Blue Chip stopped publishing forecasts of yields on A-rated public utility bonds because the Federal Reserve deleted these yields from its Statistical Release H.15. To independently project a forecast of the yields on A-rated public utility bonds, I have combined the forecast yields on long-term Treasury bonds published on October 1, 2021, and a yield spread of 1.00%, derived from historical data.

Q. How have you used these data to project the yield on A-rated public utility bonds for the purpose of your Risk Premium analyses?

A. Shown below is my calculation of the prospective yield on A-rated public utility bonds using the building blocks discussed above, i.e., the Blue Chip forecast of Treasury bond yields and the public utility bond yield spread. For comparative purposes, I also have shown the Blue Chip forecasts of Aaa-rated and Baa-rated corporate bonds. These forecasts are:

		Blue Chip Financial Forecasts				
		Corporate		30-Year	A-rated Public Utility	
Year	Quarter	Aaa-rated	Baa-rated	Treasury	Spread	Yield
2021	Fourth	2.9%	3.6%	2.2%	1.25%	3.45%
2022	First	3.0%	3.8%	2.3%	1.25%	3.55%
2022	Second	3.1%	4.0%	2.4%	1.25%	3.65%
2022	Third	3.2%	4.1%	2.5%	1.25%	3.75%
2022	Fourth	3.3%	4.2%	2.6%	1.25%	3.85%
2023	First	3.4%	4.3%	2.7%	1.25%	3.95%

Q. Are there additional forecasts of interest rates that extend beyond those shown above?

A. Yes. Twice yearly, Blue Chip provides long-term forecasts of interest rates. In its June 1, 2021 publication, Blue Chip published longer-term forecasts of interest rates, which were reported to be:

	Blue Chip Financial Forecasts		
	Corporate		30-Year
Averages	Aaa-rated	Baa-rated	Treasury
2023-2027	4.3%	5.3%	3.5%
2028-2032	4.8%	5.8%	3.9%

The longer-term forecasts by Blue Chip suggest that interest rates will move up from the levels revealed by the near-term forecasts. A 3.75% yield on A-rated public utility bonds represents a reasonable benchmark for measuring the cost of equity in this case. All the data I used to formulate my conclusion as to a prospective yield on A-rated public utility debt are available to investors, who regularly rely upon such data to make investment decisions. Later FOMC pronouncements have moved the forecasts of interest rates to higher levels.

Q. What equity risk premium have you determined for public utilities?

A. To develop an appropriate equity risk premium, I analyzed the results from 2021 SBBI Yearbook, Stocks, Bonds, Bills and Inflation. My investigation reveals that the equity risk premium varies according to the level of interest rates. That is to say, the equity risk premium increases as interest rates decline, and it declines as interest rates increase. This inverse relationship is revealed by the summary data presented below and shown on Attachment 12, page 1.

Common Equity Risk Premiums	
Low Interest Rates	6.63%
Average Across All Interest Rates	5.67%
High Interest Rates	4.69%

Based on my analysis of the historical data, the equity risk premium was 6.63% when the marginal cost of long-term government bonds was low (i.e., 2.85%, which was the average yield during periods of low rates). Conversely, when the yield on long-term government bonds was high (i.e., 7.09% on average during periods of high interest rates), the spread narrowed to 4.69%. Over the entire spectrum of interest rates, the equity risk premium was 5.67% when the average government bond yield was 4.95%. I have utilized a 6.75% equity risk premium. The equity risk premium of 6.75% that I employed is near the risk premiums associated with low interest rates.

Q. What common equity cost rate did you determine based on your Risk Premium analysis?

A. The cost of equity (i.e., "k") is represented by the sum of the prospective yield for long-term public utility debt (i.e., "i") and the equity risk premium (i.e., "RP"). The Risk Premium approach provides a cost of equity of:

	i	**+**	***RP***	**=**	***k***
Gas Group	3.75%	+	6.75%	=	10.50%

CAPITAL ASSET PRICING MODEL

Q. How is the CAPM used to measure the cost of equity?

A. The CAPM uses the yield on a risk-free interest-bearing obligation plus a rate of return premium that is proportional to the systematic risk of an investment. As shown on page 2 of Schedule 1, the result of the CAPM is 13.55% for the Gas Group with the leverage adjustment. Without the leverage adjustment, the CAPM result is 12.38% (13.55% - (0.12 x 9.78%)). To compute the cost of equity with the CAPM, three (3) components are necessary: a risk-free rate of return ("Rf"), the beta measure of systematic risk ("β"), and the market risk premium ("Rm-Rf") derived from the total return on the market of equities reduced by the risk-free rate of return. The CAPM specifically accounts for differences in systematic risk (i.e., market risk as measured by the beta) between an individual firm or group of firms and the entire market of equities.

Q. What betas have you considered in the CAPM?

A. For my CAPM analysis, I initially considered the Value Line betas. As shown on page 2 of Schedule 3, the average beta is 0.88 for the Gas Group.

Q. Did you use the Value Line betas in the CAPM determined cost of equity?

A. I used the Value Line betas as a foundation for the leverage adjusted betas that I used in the CAPM. The betas must be reflective of the financial risk associated with the ratemaking capital structure that is measured at book value. Therefore, Value Line betas cannot be used directly in the CAPM, unless the cost rate developed using those betas is applied to a capital structure measured with market values. To develop a CAPM cost rate applicable to a book-value capital structure, the Value Line (market value) betas have been unleveraged and re-leveraged for the book value common equity ratios using the Hamada formula,[8] as follows:

$$\beta l = \beta u \, [1 + (1 - t) \, D/E + P/E]$$

ßl = the leveraged beta, ßu = the unleveraged beta, t = income tax rate, D = debt ratio, P = preferred stock ratio, and E = common equity ratio. The betas published by Value Line have been calculated with the market price of stock and are related to the market value capitalization. By using the formula shown above and the capital structure ratios measured at market value, the beta would become 0.54 for the Gas Group if it employed no leverage and was 100% equity financed. Those calculations are shown on Schedule 10 under the section labeled "Hamada," who is credited with developing those formulas. With the unleveraged beta as a base, I calculated the leveraged beta of 1.00 for the book value capital structure of the Gas Group.

Q. What risk-free rate have you used in the CAPM?

A. As shown on page 1 of Schedule 13, I provided the historical yields on Treasury notes and bonds. For the twelve (12) months ended September 2021, the average yield on 30-year Treasury bonds was 1.97%. For the six- and three-months ended September 2021, the yields on 30-year Treasury bonds were 2.10% and 1.93%, respectively. During the twelve (12) months ended September 2021, the range of the yields on 30-year Treasury bonds was 1.57% to 2.34%. The low yields that existed during recent periods can be traced to weakness in business fixed investment and exports due in part to the trade dispute between the United States

[8] Robert S. Hamada, "The Effects of the Firm's Capital Structure on the Systematic Risk of Common Stocks;" *The Journal of Finance* Vol. 27, No. 2, Papers and Proceedings of the Thirtieth Annual Meeting of the American Finance Association, New Orleans, Louisiana, December 27-29, 1971. (May 1972), pp. 435-452.

and China. Thereafter, extraordinary events associated with the Pandemic induced significant turmoil that jolted the capital markets in the February-May 2020 time frame. During this period, we saw abrupt reaction to the Pandemic. These events led to the end of the record-setting 128-month economic expansion. As the recession unfolded in February 2020, the FOMC acted to address these disruptions. The FOMC continues to support the money and capital markets during the recovery from the COVID-19 Pandemic. Presently, the Fed Funds rate is near zero. It is expected that a transition in FOMC policy will prospectively produce higher interest rates as the Pandemic nears its end. A forward-looking assessment of the capital markets is especially relevant now because the Company's rates will be based on financial conditions in 2022 and beyond. Higher inflation expectations are a contributing factor that points to higher interest rates. Indeed, higher inflation today is revealed by a 5.9% increase in social security payments announced on October 13, 2021, which is the largest one-year increase in nearly four (4) decades. FOMC has signaled that it plans to taper its bond buying program (i.e., quantitative easing) in November 2021 and to end it completely by March 2022. The Fed Funds rate is also likely to increase from very low levels that existed during the Pandemic. Higher interest rates clearly point to higher capital costs prospectively. I will describe the forecasts of interest below, including the end of quantitative easing by the FOMC and indications prospectively of several increases in the Fed Funds rate in 2022.

As shown on page 2 of Schedule 13, forecasts published by Blue Chip on October 1, 2021indicate that the yields on long-term Treasury bonds are expected to be in the range of 2.2% to 2.7% during the next six (6) quarters. The longer-term forecasts described previously show that the yields on 30-year Treasury bonds will average 3.5% from 2023 through 2027 and 3.9% from 2028 to 2032. For the reasons explained previously, forecasts of interest rates should be emphasized at this time in selecting the risk-free rate of return in CAPM. Hence, I have used a 2.75% risk-free rate of return for CAPM purposes, which considers the Blue Chip forecasts.

Q. What market premium have you used in the CAPM?

A. As shown in the lower panel of data presented on Schedule 13, page 2, the market premium is derived from historical data and the forecast returns. For the historically based market premium, I have used the arithmetic mean obtained from the data presented on Schedule 12, page 1. On that schedule, the market return was 12.06% on large stocks during periods of low interest rates. During those periods, the yield on long-term government bonds was 2.85% when interest rates were low. As such, I carried over to Schedule 13, page 2, the average large common stock returns of 12.06% and the average yield on long-term government bonds of 2.85%. The resulting market premium is 9.21% (12.06% - 2.85%) based on historical data, as shown on Schedule 13, page 2. As also shown on Schedule 13, page 2, I calculated the forecast returns, which show a 13.10% total market return. With this forecast, I calculated a market premium of 10.35% (13.10% - 2.75%) using forecast data. The resulting market premium applicable to the CAPM derived from these sources equals 9.78% (10.35% + 9.21% = 19.56% ÷ 2).

Q. Are there adjustments to the CAPM that are necessary to fully reflect the rate of return on common equity?

A. Yes. The technical literature supports an adjustment relating to the size of the company or portfolio for which the calculation is performed. As the size of a firm decreases, its risk and required return increases. Moreover, in his discussion of the cost of capital, Professor Brigham has indicated that smaller firms have higher capital costs than otherwise similar larger firms. Also, the Fama/French study (see "The Cross-Section of Expected Stock Returns;" The Journal of Finance, June 1992) established that the size of a firm helps explain stock returns. In an October 15, 1995 article in Public Utility Fortnightly, entitled “Equity and the Small-Stock Effect,” it was demonstrated that the CAPM could understate the cost of equity significantly according to a company’s size. Indeed, it was demonstrated in the SBBI Yearbook that the returns for stocks in lower deciles (i.e., smaller stocks) had returns in excess of those shown by the simple CAPM. As noted previously, UGI Gas is relatively smaller than the Gas Group. To recognize this fact, I used the mid-cap adjustment of 1.02%, as revealed on page 3 of Schedule 13, for the CAPM calculation.

Q. What does your CAPM analysis show?

A. Using the 2.75% risk-free rate of return, the leverage adjusted beta of 1.00 for the Gas Group, the 9.78% market premium, and the 1.02% size adjustment, the following result is indicated.

	Rf	**+**	***ß***	***x (***	***Rm-Rf***	***) +***	***size***	**=**	***k***
Gas Group	2.75%	+	1.00	x (	9.78%	) +	1.02%	=	13.55%

<u>COMPARABLE EARNINGS APPROACH</u>

Q. What is the Comparable Earnings approach?

A. The Comparable Earnings approach estimates a fair return on equity by comparing returns realized by non-regulated companies to returns that a public utility with similar risks characteristics would need to realize in order to compete for capital. Because regulation is a substitute for competitively determined prices, the returns realized by non-regulated firms with comparable risks to a public utility provide useful insight into investor expectations for public utility returns. The firms selected for the Comparable Earnings approach should be companies whose prices are not subject to cost-based price ceilings (i.e., non-regulated firms) so that circularity is avoided.

There are two (2) avenues available to implement the Comparable Earnings approach. One method involves the selection of another industry (or industries) with comparable risks to the public utility in question, and the results for all companies within that industry serve as a benchmark. The second approach requires the selection of parameters that represent similar risk traits for the public utility and the comparable risk companies. Using this approach, the business lines of the comparable companies become unimportant. The latter approach is preferable with the further qualification that the comparable risk companies exclude regulated firms in order to avoid the circular reasoning implicit in the use of the achieved earnings/book ratios of other regulated firms. The United States Supreme Court has held that:

> A public utility is entitled to such rates as will permit it to earn a return on the value of the property which it employs for the convenience of the public equal to that generally being made at the same time and in the same general part of the country on investments in other business undertakings which are attended by corresponding risks and uncertainties. The return should be reasonably sufficient to assure confidence in the financial soundness of the utility and should be adequate, under efficient and economical management, to maintain and support its credit and enable it to raise the money necessary for the proper discharge of its public duties. Bluefield Water Works vs. Public Service Commission, 262 U.S. 668 (1923).

It is important to identify the returns earned by firms that compete for capital with a public utility. This can be accomplished by analyzing the returns of non-regulated firms that are subject to the competitive forces of the marketplace.

Q. Did you compare the results of your DCF and CAPM analyses to the results indicated by a Comparable Earnings approach?

A. Yes. I selected companies from The Value Line Investment Survey for Windows that have six (6) categories of comparability designed to reflect the risk of the Gas Group. These screening criteria were based upon the range as defined by the rankings of the companies in the Gas Group. The items considered were: Timeliness Rank, Safety Rank, Financial Strength, Price Stability, Value Line betas, and Technical Rank. The definition for these parameters is provided on Schedule 14, page 3. The identities of the companies comprising the Comparable Earnings group and their associated rankings within the ranges are identified on Schedule 14, page 1.

I relied upon Value Line data because it provides a comprehensive basis for evaluating the risks of the comparable firms. As to the returns calculated by Value Line for these companies, there is some downward bias in the figures shown on Schedule 14, page 2, because Value Line computes the returns on year-end rather than average book value. If average book values had been employed, the rates of return would have been slightly higher. Nevertheless, these are the returns considered by investors when taking positions in these stocks. Because many of the comparability factors, as well as the published returns, are used by investors in selecting stocks, and the fact that investors rely on the Value Line service to gauge returns, it is an appropriate database for measuring comparable return opportunities.

Q. What data did you consider in your Comparable Earnings analysis?

A. I used both historical realized returns and forecasted returns for non-utility companies. As noted previously, I have not used returns for utility companies in order to avoid the circularity that arises from using regulatory-influenced returns to determine a regulated return. It is appropriate to consider a relatively long measurement period in the Comparable Earnings approach in order to cover conditions over an entire business cycle. A ten-year period (five (5) historical years and five (5) projected years) is sufficient to cover an average business cycle. Unlike the DCF and CAPM, the results of the Comparable Earnings method can be applied directly to the book value capitalization. In other words, the Comparable Earnings approach does not contain the potential misspecification contained in market models when the market capitalization and book value capitalization diverge significantly. A point of demarcation was chosen to eliminate the results of highly profitable enterprises, which the Bluefield case stated were not the type of returns that a utility was entitled to earn. For this purpose, I used 20% as the point where those returns could be viewed as highly profitable and should be excluded from the Comparable Earnings approach. The average historical rate of return on book common equity was 12.5% using only the returns that were less than 20%, as shown on Schedule 14, page 2. The average forecasted rate of return as published by Value Line is 12.9% also using values less than 20%, as provided on Schedule 14, page 2. Using the average of these data, my Comparable Earnings result is 12.70%, as shown on Schedule 1, page 2.

CONCLUSION ON COST OF EQUITY

Q. What is your conclusion regarding the Company's cost of common equity?

A. Based upon the application of a variety of methods and models described previously, it is my opinion that a reasonable rate of return on common equity is 11.20% for UGI Gas, which includes 20 basis points or 0.20% for recognition of the Company's strong management performance. My cost of equity recommendation is within the range of results and should be considered in the context of the Company's greater risk characteristics relative to the barometer group companies. It is essential that the Commission employ a variety of techniques to measure the Company's cost of equity because of the limitations/infirmities that are inherent in each method. In summary, the Company should be provided an opportunity to realize an 11.20% rate of return on common equity so that it can compete in the capital markets, attain reasonable credit quality, sustain its cash flow in the context of its high levels of capital expenditures, and receive recognition of the significant accomplishments that management has achieved.

Q. Does this complete your direct testimony?

A. Yes. However, I reserve the right to supplement my testimony, if necessary, and to respond to witnesses presented by other parties.

APPENDIX A TO DIRECT TESTIMONY OF PAUL R. MOUL

EDUCATIONAL BACKGROUND, BUSINESS EXPERIENCE AND QUALIFICATIONS

I was awarded a degree of Bachelor of Science in Business Administration by Drexel University in 1971. While at Drexel, I participated in the Cooperative Education Program which included employment, for one year, with American Water Works Service Company, Inc., as an internal auditor, where I was involved in the audits of several operating water companies of the American Water Works System and participated in the preparation of annual reports to regulatory agencies and assisted in other general accounting matters.

Upon graduation from Drexel University, I was employed by American Water Works Service Company, Inc., in the Eastern Regional Treasury Department where my duties included preparation of rate case exhibits for submission to regulatory agencies, as well as responsibility for various treasury functions of the thirteen New England operating subsidiaries.

In 1973, I joined the Municipal Financial Services Department of Betz Environmental Engineers, a consulting engineering firm, where I specialized in financial studies for municipal water and wastewater systems.

In 1974, I joined Associated Utility Services, Inc., now known as AUS Consultants. I held various positions with the Utility Services Group of AUS Consultants, concluding my employment there as a Senior Vice President.

In 1994, I formed P. Moul & Associates, an independent financial and regulatory consulting firm. In my capacity as Managing Consultant and for the past forty-one years, I have continuously studied the rate of return requirements for cost of service-regulated firms. In this regard, I have supervised the preparation of rate of return studies, which were employed, in connection with my testimony and in the past for other individuals. I have presented direct testimony on the subject of fair rate of return, evaluated rate of return testimony of other witnesses, and presented rebuttal testimony.

APPENDIX A TO DIRECT TESTIMONY OF PAUL R. MOUL

My studies and prepared direct testimony have been presented before thirty-seven (37) federal, state and municipal regulatory commissions, consisting of: the Federal Energy Regulatory Commission; state public utility commissions in Alabama, Alaska, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Virginia, West Virginia, Wisconsin, and the Philadelphia Gas Commission, and the Texas Commission on Environmental Quality. My testimony has been offered in over 300 rate cases involving electric power, natural gas distribution and transmission, resource recovery, solid waste collection and disposal, telephone, wastewater, and water service utility companies. While my testimony has involved principally fair rate of return and financial matters, I have also testified on capital allocations, capital recovery, cash working capital, income taxes, factoring of accounts receivable, and take-or-pay expense recovery. My testimony has been offered on behalf of municipal and investor-owned public utilities and for the staff of a regulatory commission. I have also testified at an Executive Session of the State of New Jersey Commission of Investigation concerning the BPU regulation of solid waste collection and disposal.

I was a co-author of a verified statement submitted to the Interstate Commerce Commission concerning the 1983 Railroad Cost of Capital (Ex Parte No. 452). I was also co-author of comments submitted to the Federal Energy Regulatory Commission regarding the Generic Determination of Rate of Return on Common Equity for Public Utilities in 1985, 1986 and 1987 (Docket Nos. RM85-19-000, RM86-12-000, RM87-35-000 and RM88-25-000). Further, I have been the consultant to the New York Chapter of the National Association of Water Companies, which represented the water utility group in the Proceeding on Motion of the Commission to Consider Financial Regulatory Policies for New York Utilities (Case 91-M-0509). I have also submitted comments to the Federal Energy Regulatory Commission in its Notice of

Proposed Rulemaking (Docket No. RM99-2-000) concerning Regional Transmission Organizations and on behalf of the Edison Electric Institute in its intervention in the case of Southern California Edison Company (Docket No. ER97-2355-000). Also, I was a member of the panel of participants at the Technical Conference in Docket No. PL07-2 on the Composition of Proxy Groups for Determining Gas and Oil Pipeline Return on Equity.

In late 1978, I arranged for the private placement of bonds on behalf of an investor-owned public utility. I have assisted in the preparation of a report to the Delaware Public Service Commission relative to the operations of the Lincoln and Ellendale Electric Company. I was also engaged by the Delaware P.S.C. to review and report on the proposed financing and disposition of certain assets of Sussex Shores Water Company (P.S.C. Docket Nos. 24-79 and 47-79). I was a co-author of a Report on Proposed Mandatory Solid Waste Collection Ordinance prepared for the Commission of County Commissioners of Collier County, Florida.

I have been a consultant to the Bucks County Water and Sewer Authority concerning rates and charges for wholesale contract service with the City of Philadelphia. My municipal consulting experience also included an assignment for Baltimore County, Maryland, regarding the City/County Water Agreement for Metropolitan District customers (Circuit Court for Baltimore County in Case 34/153/87-CSP-2636).

UGI GAS STATEMENT NO. 7

NICOLE M. MCKINNEY

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2021-3030218

UGI Utilities, Inc. – Gas Division

Statement No. 7

Direct Testimony of
Nicole M. McKinney

Topics Addressed: **Taxes and Tax Adjustments**
Employee Retention Credit ("ERC")

Dated: January 28, 2022

I. INTRODUCTION AND QUALIFICATIONS

Q. Please state your full name and business address.

A. My name is Nicole M. McKinney. My business address is One UGI Drive, Denver, Pennsylvania 17517.

Q. By whom are you employed and in what capacity?

A. Through December 6, 2021, I was employed by UGI Utilities, Inc. ("UGI") as Senior Manager Natural Gas Tax Accounting. UGI is a subsidiary of UGI Corporation ("UGI Corp."). UGI's Gas Division ("UGI Gas" or the "Company") and Electric Division ("UGI Electric") are regulated by the Pennsylvania Public Utility Commission ("Commission" or "PUC"). On December 6, 2021, I transitioned to the role of Director of Financial Planning and Analysis at UGI Corp. For purposes of this rate case proceeding, I continued my former duties as Senior Manager Natural Gas Tax Accounting.

Q. What were your principal duties and responsibilities as Senior Manager of Natural Gas Tax Accounting?

A. My primary duties as Senior Manager Natural Gas Tax Accounting included the preparation of tax data to be reported in UGI's various United States Securities and Exchange Commission and regulatory filings, as well as its various federal and state income and non-income tax return related filings. Additionally, I maintained the current and deferred income tax accruals and expense accounts, performed tax research, and assisted UGI with tax matters as they arose. Additionally, I managed the reporting of the Company's various tax filings with its local, state, and federal jurisdictions.

Q. What are your current principal duties and responsibilities as Director of Financial Planning and Analysis?

A. In this role, I provide strategic and operational direction for UGI's processes and functions related to financial planning and analysis. My budget supervision responsibilities include the: 1) coordination and review of financial inputs from various departments; 2) development of financial forecasts; and 3) preparation and distribution of this information to UGI executive management, investor relations, and the UGI Board of Directors. Additionally, I oversee capital investment processes, manage corporate finance projects, and report directly to the Chief Finance Officer.

Q. Please describe your educational background and professional experience.

A. They are set forth in my resume attached as UGI Gas Exhibit NMM-1.

Q. Please describe the purpose of your testimony.

A. I am providing testimony on behalf of UGI Gas. I will explain the Company's *pro forma* tax adjustments to its principal accounting exhibits for the fully projected future test year ending September 30, 2023 ("FPFTY"). I will also explain the tax adjustments made to the results of UGI Gas's historic test year ended September 30, 2021 ("HTY") and future test year ending September 30, 2022 ("FTY").

Q. Have you testified previously before this Commission?

A. Yes. UGI Gas Exhibit NMM-1 contains a list of those proceedings.

Q. Ms. McKinney, are you sponsoring any exhibits in this proceeding?

A. Yes. I am sponsoring the UGI Gas Exhibits: NMM-1, NMM-2, NMM-3 and NMM-4. Together with other Company witnesses, I am sponsoring portions of UGI Gas Exhibit A (Fully Projected), UGI Gas Exhibit A (Future) and UGI Gas Exhibit A (Historic) that pertain to tax-related issues. These exhibits comprise UGI Gas's principal accounting exhibits for the HTY, FTY, and FPFTY. I am also sponsoring certain responses to the Commission's filing requirements and standard data requests. Each response identifies the witness sponsoring it.

II. TAX ADJUSTMENTS

Q. Please provide an overview of UGI Gas's principal accounting exhibits relative to the proposed tax adjustments.

A. As explained in the direct testimony of Ms. Tracy A. Hazenstab (UGI Gas Statement No. 2), UGI Gas's principal accounting exhibit is UGI Gas Exhibit A (Fully Projected), which includes a presentation for the FPFTY ending September 30, 2023. Section D of UGI Gas Exhibit A (Fully Projected) presents necessary adjustments to budgeted levels of expense items and revenues. The *pro forma* adjustments related to taxes are summarized in Schedules D-31 through D-34. These tax adjustments are used to derive UGI Gas's *pro forma* income at present and proposed rates as set forth in Schedule A-1 of the same exhibit.

UGI Gas Exhibit A (Historic) and UGI Gas Exhibit A (Future) follow the format of UGI Gas Exhibit A (Fully Projected) but reflect data for the HTY ended September 30, 2021 and the FTY ending September 30, 2022. This information is provided to comply with the Commission's filing requirements and provides a basis for comparing UGI Gas's FPFTY claims with actual book results from the HTY and adjusted FTY results. Section

D to UGI Gas Exhibit A (Historic), Schedule D-31, and UGI Gas Exhibit A (Future), Schedule D-31, include adjustments that share the same methodology as used in Schedule D-31 of UGI Gas Exhibit A (Fully Projected).

A. TAXES OTHER THAN INCOME TAXES

Q. How was the provision for taxes-other-than-income taxes ("TOTI") determined for the FPFTY?

A. TOTI consists of the Pennsylvania Utility Realty Tax ("PURTA"), Pennsylvania and Local Property taxes, Social Security taxes, Federal Unemployment tax ("FUTA"), State Unemployment tax ("SUTA") and the Company's assessed contribution to the Commission, Office of Consumer Advocate and Office of Small Business Advocate. TOTI amounts were based on the plan year budget, as adjusted for reasonably known and measurable changes to various payroll taxes as supported by the direct testimony of Ms. Tracy A. Hazenstab (UGI Gas Statement No. 2). These adjustments are shown on UGI Gas Exhibit A (Fully Projected), Schedule D-31. The net adjustment of $298,000 is brought forward to Schedule D-3, page 2.

B. INCOME TAXES

Q. Please discuss the Company's claim for income taxes.

A. Income tax expense for the FPFTY at present and proposed rates is set forth in UGI Gas Exhibit A (Fully Projected), Schedule D-33. Income taxes are calculated using the procedures normally followed by the Commission, including the use of debt interest synchronization, the normalization method for accelerated depreciation used in the calculation of federal income taxes, and the flow-through of accelerated depreciation benefits for state tax purposes. UGI Gas is continuing its practice of normalizing the tax repairs expense deduction for federal tax purposes. For state tax purposes, UGI Gas continues to flow through the repairs tax benefit over the tax useful lives of the asset that generated the benefit, which is generally 20 years. The fully adjusted claim for the FPFTY income tax expense is shown on UGI Gas Exhibit A (Fully Projected), Schedule D-1.

Q. Please describe the claim for income taxes shown on Schedule D-1, lines 19 and 20.

A. The calculation of federal and state income taxes can be found on Schedule D-33, lines 13 and 19. Schedule D-33 shows the calculation of *pro forma* income taxes for the FPFTY at present and proposed rates. Line 1 shows revenue at present and proposed rates, while line 2 shows operating expenses at present and proposed rates from Schedule D-1. Line 3 reflects operating income before debt interest is deducted, by netting line 1 from line 2. Debt interest expense is synchronized using the rate base claim from Schedule C-1, with the cost of debt and the debt component of UGI Gas's capital structure recommended in the direct testimony of Paul R. Moul (UGI Gas Statement No. 6) and shown on Schedule B-7. The resulting interest expense on line 6 is subtracted from net income before debt interest to calculate base taxable income on line 7.

In accordance with established Commission practice, lines 8 through 11 of Schedule D-33 reduce the base taxable income, for state tax purposes, by the total difference between accelerated tax depreciation shown on line 8 and the *pro forma* book depreciation shown on line 9. The statutory state corporate net income tax rate (9.99%) was then applied to determine the *pro forma* state income tax expense shown on line 13. Lines 14 through 19 show the federal income tax expense calculation at current and proposed rates, while line 20 sums the state and federal tax expense amounts before application of Deferred Federal and State Income Taxes. At lines 21 through 28, Deferred Federal and State Income Taxes are used to increase the *pro forma* income tax expense at present and proposed rates with the total calculated amount for income taxes before the application of other adjustments shown on line 29. The amounts of accelerated depreciation, cost of removal, repairs tax deduction, tax basis adjustments to plant, straight line depreciation and book depreciation used in the determination of income taxes are summarized on Schedule D-34.

Q. What is the total FPFTY income tax expense for UGI Gas?

A. As shown on Schedule D-33 at line 31, the *pro forma* tax expense at present rates is $39.8 million and the *pro forma* tax expense at proposed rates for the FPFTY is $63.3 million. As explained below in Section G, this figure is not reduced by a consolidated income tax adjustment.

Q. Has the Company reflected the amortization of Excess Deferred Federal Income Taxes ("EDFIT"), as a result of the 2017 Tax Cuts and Jobs Act ("TCJA"), on its income tax expense claim?

A. Yes, the Company has calculated the amount of the EDFIT that would be amortized and flowed back to ratepayers in its FPFTY. This amount is included in the overall federal deferred tax expense calculated on Line 25 of Schedule D-33. The total amortization was approximately $4.3 million, calculated using the Average Rate Assumption Method ("ARAM") as required by tax normalization rules.

C. ACCUMULATED DEFERRED INCOME TAXES

Q. How are Accumulated Deferred Income Taxes ("ADIT") calculated?

A. Schedule C-6 shows the FPFTY ending balance for federal ADIT as of September 30, 2023. This amount is deducted from rate base. The total shown on line 8 reflects the difference in income tax expense for book and tax purposes attributable to the difference between the accelerated tax depreciation and straight-line book depreciation on test year plant balances, net of offsets associated with contributions in aid of construction. Rate base was further reduced by the state regulatory liability associated with UGI Gas's repairs tax method shown on line 6. As the state tax consequence of accelerated depreciation is flowed through, there is no associated state ADIT balance.

Q. What is the amount of the ADIT offset to rate base?

A. As shown on line 8 of Schedule C-6 and on line 6 of Schedule A-1, the ADIT offset is $628.5 million, which includes the amount related to EDFIT.

Q. Does the Company's reduction to rate base include EDFIT?

A. Yes, the Company has reduced its rate base by the unamortized EDFIT, which is incorporated in the ADIT balance on Line 8 of Schedule C-6.

Q. Has the Company's ADIT rate base deduction been calculated in compliance with the normalization requirements of the Internal Revenue Code?

A. Yes. The Company's calculation properly reflects the pro-rationing concept in accordance with Treasury Regulation 1.167(l)-1(h)(6)(ii) that it must follow for ratemaking purposes to comply with IRS normalization requirements. To qualify for normalization, the IRS requires utilities to pro-rate rate base deductions for ADIT to account for the fact that the Company accrues ADIT for plant additions throughout the year. See UGI Gas Exhibit NMM-2 for the calculation of the pro-rata adjustment.

D. REPAIRS TAX METHOD

Q. Please explain UGI Gas's accounting treatment of the Repairs Tax Method.

A. In its tax return for the year ended September 30, 2009, UGI Gas adopted a tax accounting method to expense as repairs certain items capitalized for book purposes in accordance with federal tax regulations. As it did in the Company's previous base rate case at Docket No. R-2019-3015162, UGI Gas has chosen to normalize its federal income tax expense claim, inclusive of the repairs tax deduction. The difference between accelerated tax depreciation versus book depreciation in the calculation of federal tax expense creates ADIT. For state income tax purposes, solely with respect to the repairs tax deduction, UGI Gas has chosen to flow through the repairs tax benefit over the tax useful lives of the assets generating the tax deduction. The state ADIT balance associated with the repairs tax deduction is classified as a regulatory liability, as it represents the repairs tax benefit that ratepayers have not yet received. In both the federal and state instances, the ADIT balance amortizes or unwinds over the remaining life of the asset.

As noted previously, the Company reduces rate base by the sum of the federal ADIT balance and the state repair regulatory liability.

E. CONSOLIDATED TAX BENEFITS

Q. Does the Company's proposed revenue requirement reflect a federal consolidated tax expense adjustment?

A. No. The Company's revenue requirement is established based on its stand-alone federal income tax attributes. It is my understanding that Act 40 of 2016, which added 66 Pa. C.S § 1301.1 to the Public Utility Code, eliminates the need to show a consolidated tax adjustment for ratemaking purposes. However, Section 1301.1(b) requires a public utility to demonstrate that it shall use at least 50 percent of what would have been a consolidated tax expense adjustment under the law prior to Act 40 for reliability or infrastructure related capital investment and the other 50 percent shall be used for general corporate purposes.

A calculation of the consolidated tax adjustment for that purpose, using the modified effective tax rate methodology traditionally used by the Commission prior to the enactment of Act 40, is included in the Company's filing as Attachment II-A-26 and UGI Gas Exhibit NMM-3. Company witness Ms. Tracy A. Hazenstab (UGI Gas Statement No. 2) discusses how the Company has satisfied the requirements of Act 40.

F. EMPLOYEE RETENTION CREDIT

Q. Are you familiar with the settlement of the Company's last Natural Gas Base Rate Case at Docket No. R-2019-3015162, et al. and its requirement that UGI Gas report tax credits related to the Coronavirus Aid, Relief, and Economic Security ("CARES") Act?

A. Yes. Ordering Paragraph 32 in the Commission's Order approving the Settlement (entered October 8, 2020) stated:

That the Company shall provide a report as part of the Company's next base rate case detailing: (1) its efforts to maximize its utilization of and track any government benefits, whether direct grant, tax credits, or other, to minimize costs to be deferred; (2) any amounts obtained as part of these efforts and their intended use; and, (3) if denied, the reason for such denial.

Q. Did UGI Gas receive any tax credit as a result the CARES Act?

A. Yes. Pursuant to Section 2301 of the CARES Act, UGI Gas received approximately $1.5 million in Employee Retention Credits ("ERC"), which it applied against the payroll tax deferral allowed under Section 2302 of the CARES Act. See UGI Gas Exhibit NMM-4 for a report containing further details on all tax benefits obtained from the CARES Act and other initiatives the Company pursued per Ordering Paragraph 32 in the settlement of the 2019 UGI Gas Base Rate Case at Docket No. R-2019-3015162.

Q Does the Company intend to return any of the ERC tax benefits to customers?

A. No. The Company does not intend to return the ERC tax benefits to customers since the tax credits relate to costs, primarily payroll, that were incurred outside of the test year periods. Specifically, the ERC relates to payroll costs incurred after March 12, 2020 and before January 1, 2021.

Q. Does this conclude your direct testimony?

A. Yes, it does.

UGI GAS

EXHIBIT NMM-1

Nicole M. McKinney, CPA

PROFESSIONAL EXPERIENCE:

UGI Corporation. King of Prussia, PA
Director – FP&A. December 2021 – Present
- Supervise 2 reports
- Manage the monthly forecast cycle and annual budget cycle
- Monitor and review various management financial reports
- Support analysis of business development opportunities
- Oversee UGI's investment policy

UGI Utilities, Inc. Denver, PA
Sr. Manager of Natural Gas Tax Accounting. March 2015 – Present
- Supervise 2 reports
- Manage the accounting for income taxes in accordance with ASC 740 for Natural Gas business segment
- Provide technical accounting guidance and expertise on tax accounting, planning and compliance matters
- Oversee and review the preparation of various tax related filings

DENTSPLY International. York, PA
Manager. August 2012 –April 2014
- Supervised staff of 3
- Responsible for identifying deficiencies and areas of improvement for current tax and accounting processes
- Managed completion of domestic federal tax returns and income tax provision
- Performed periodic presentations to senior management regarding tax implications of various business transactions and changes in tax law
- Supervised special tax projects such as research & development tax credit study, domestic production activities deduction, and accounting method changes

ParenteBeard, LLC. Lancaster, PA
Manager. December 2010 – July 2012.
- Supervised staff of 5
- Managed client relationships for middle-market businesses to ensure satisfaction of tax and accounting needs
- Assisted in the standardization of accounting processes and working papers
- Served as the liaison between external auditors and clients to achieve efficiency and successful results in year- end audits
- Reviewed complex individual, partnership, corporate, and international federal and state tax returns
- Served as manager on the strategic tax initiative team

WTAS, LLC. Philadelphia, PA
Manager. August 2006 – November 2010.
- Supervised staff of 3+
- Managed successful consulting engagements resulting in substantial cash savings

- Developed various complex financial models for client budgetary and forecasting needs
- Prepared and reviewed various international, domestic, and state corporate and partnership tax returns

EDUCATION:
Villanova University, Villanova, PA
Master of Accountancy - May 2007
Bachelor of Science - International Business/Management & Accounting - May 2006
Summa cum Laude
Bartley Medallion of Honor

UGI GAS

EXHIBIT NMM-4

Report of Amounts Obtained from Government Benefits per Ordering Paragraph 32 in the Commission's Order on the Settlement of the 2019 UGI Gas Base Rate Case at Docket No. R-2019-3015162

1. **<u>Employee Retention Credit ("ERC")</u>**
   Section 2301 of the CARES Act allowed qualifying employers to claim a credit against the employer portion of applicable employment taxes for wages paid after March 12, 2020 and before January 1, 2021 for each calendar quarter in an amount equal to 50-percent of qualified wages, including allocable qualified health expenses, with respect to each employee. For the time period claimed by the Company, the ERC could not exceed $5,000 per employee. UGI Gas claimed an approximate ERC tax benefit of $1.5 million. The Company utilized an outside accounting firm to assist it in determining its eligibility for the tax credit as well as in reviewing its process and calculation for quantifying the credit. UGI Gas worked with its third-party payroll processor to file the applicable IRS forms (i.e. 941 and 941X) to claim the ERC tax benefits.

2. **<u>Payroll Tax Deferral</u>**
   Section 2302 of the CARES Act allowed employers to defer the deposit and payment of the employer's portion of Social Security taxes and certain railroad retirement taxes for the period March 27, 2020 through December 31, 2020. The Company chose to defer the payments allowed under the CARES Act. The first payment of 50% of the total deferred amount was due by December 31, 2021, and the Company timely made this payment. The other 50% payment is due by December 31, 2022. UGI Gas is working with its third-party payroll processor to quantify and remit the deferred amounts. Further, in discussions with its payroll processor, the Company was advised that the IRS would apply any ERC benefit claimed against the deferred amounts.

3. **<u>Families First Coronavirus Response Act ("FFCRA")</u>**
   The FFCRA provided small and midsize employers refundable tax credits which reimbursed them, dollar-for-dollar, for the cost of providing paid sick and family leave wages to employees for leave related to COVID-19. Only employers with fewer than 500 employees were eligible for these tax credits. Due to exceeding the allowable number of employees, UGI Gas did not qualify for these tax credits. As such, the Company did not claim any FFCRA tax credits.

UGI GAS STATEMENT NO. 8

SHERRY A. EPLER

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2021-3030218

UGI Utilities, Inc. – Gas Division

Statement No. 8

Direct Testimony of
Sherry A. Epler

Topics Addressed:	**Test Year Sales and Revenues** **Revenue Allocation and Rate Design** **Tariff Changes**

Dated: January 28, 2022

I. INTRODUCTION AND QUALIFICATIONS

Q. Please state your name and business address.

A. My name is Sherry A. Epler. My business address is 1 UGI Drive, Denver, PA 17517.

Q. By whom and in what capacity are you employed?

A. I am employed as Senior Manager, Tariff & Supplier Administration, by UGI Utilities, Inc. ("UGI"). UGI has both a Gas Division ("UGI Gas"), which is a certificated natural gas distribution company ("NGDC"), and an Electric Division ("UGI Electric"), a certificated electric distribution company ("EDC").

Q. What are your responsibilities as Senior Manager, Tariff & Supplier Administration with respect to UGI Gas?

A. My current responsibilities related to UGI Gas include: (1) all aspects of tariff and rate administration for UGI Gas, including interactions with natural gas suppliers under UGI Gas's supplier tariff; and (2) revenue analysis.

Q. Please provide your educational background.

A. Please see my resume, UGI Gas Exhibit SAE-1, which is attached to my testimony.

Q. Please provide your professional experience.

A. I have worked for UGI since 1986, supporting the Accounting and Rates groups in varying capacities. Please see my resume, UGI Gas Exhibit SAE-1, for my full employment history.

Q. Please describe the purpose of your testimony.

A. I will address: (1) the development of sales and revenue for the historic test year ended September 30, 2021 ("HTY"), future test year ending September 30, 2022 ("FTY"), and fully projected future test year ending September 30, 2023 ("FPFTY"); (2) revenue allocation and rate design; and (3) certain proposed tariff modifications.

Q. Are any other witnesses providing testimony on the areas you identified above?

A. Yes. Company witness Constance E. Heppenstall, who is employed as Senior Project Manager, Rate Studies by Gannett Fleming Valuation and Rate Consultants, LLC (UGI Gas Statement No. 10), is sponsoring UGI Gas Exhibit D – Cost of Service, from which revenue allocations were derived. Ms. Heppenstall also utilizes the projected sales and revenue figures discussed in my testimony.

Q. Are you sponsoring any exhibits or filing requirements in this proceeding?

A. Yes, I am sponsoring the following Exhibits: UGI Gas Exhibit SAE-1 (Resume), UGI Gas Exhibit SAE-2 (15 year Normal Heating Degree Days), UGI Gas Exhibit SAE-3 (Normalized Multi-Year and 12-Month Ending Trends of Use Per Customer for Residential and Commercial Heating), UGI Gas Exhibit SAE-4 (Fully Projected Future Test Year Sales and Revenue Adjustments), UGI Gas Exhibit SAE-5 (Future Test Year Sales and Revenue Adjustments), UGI Gas Exhibit SAE-6 (Historic Test Year Sales and Revenue Adjustments), UGI Gas Exhibit SAE-7 (Fully Projected Future Test Year Usage Per Customer Detail by Class), UGI Gas Exhibit SAE-8 (No Notice Service (NNS) Rate Calculation), UGI Gas Exhibit SAE-9 (Monthly Balancing Service (MBS) Rate Calculation), UGI Gas Exhibit SAE-10 (Rider D-Merchant Function Charge (MFC)

Calculation), certain portions of UGI Gas Exhibit F (Proposed Tariff), and UGI Gas Exhibit E (Proof of Revenue). I am also sponsoring certain responses to the Commission's standard filing requirements, as indicated on the mater list accompanying this filing, that were prepared by me or under my direction.

II. TEST YEAR SALES AND REVENUE

Q. Please explain the process for developing the Company's Fiscal Year 2023 sales and revenue budgets.

A. The sales and revenue budgets were a joint effort of the marketing and financial planning and analysis ("FP&A") departments, with the marketing department providing customer growth and attrition information by customer class along with specific large commercial and industrial sales and revenue budget projections. The FP&A department developed projections for budgeted usage per customer for core customer classes, total calculated sales and total calculated revenues. In developing sales and revenues, the Vice President, Marketing and Customer Relations, with input and assistance from other marketing employees, budgets the number of customers by class. Various factors are considered in developing customer budgets, including: (1) projected conversions to and from other energy sources; (2) the level of applications and inquiries for service; (3) other customer attritions; (4) new construction activity; (5) current and projected economic factors; and (6) the costs of competing fuels. The usage per customer reflected in the 2023 budget was the same as that used for the 2022 budget and specifically does not incorporate use per customer conservation trends related to the Company's core residential and commercial class customers. Budget use per customer values were developed based on a simple regression of 24 months of actual use per customer data and then normalized based on normal heating degree days. Planned budgeted numbers of customers and usage per customer for these customer classes are then combined to produce planned budgeted sales. Sales are allocated by month, and appropriate rates are applied to derive budgeted revenues. Sales and revenues related to large contract customer classes are developed by the marketing department on a customer specific basis using customer input where appropriate. As discussed in the testimony of Tracy A. Hazenstab (UGI Gas Statement No. 2), the derivation of the 2023 planned budget reflects a forecast that will subsequently be updated during calendar year 2022 as part of the normal annual budget process. This process is conducted several months prior to the start of the new fiscal year and finalized prior to the beginning of the new fiscal year.

Q. Please explain how the Company's FPFTY sales and revenues were developed.

A. FPFTY sales and revenues were developed by annualizing and normalizing the Company's 2023 fiscal year planned sales and revenue budgets. Where similar adjustments are made across rate class groups, the methodology applied to develop normalized use per customer adjustments (for the FPFTY, FTY, and HTY) to budget values is the same for all three periods in order to present sales and revenue on a ratemaking basis. A summary of projected use per customer by class group for the FPFTY, FTY, and HTY are included in UGI Gas Exhibit SAE-7. The projected Residential Heating use per customer was established for Rate R/RT-Heating per the UGI Gas model detailed in SDR-RR-11. Since, over time, switching occurs on a regular basis between Rates R (retail service) and RT (transportation service), the regression analysis was performed on a total Rate R/RT basis in order to eliminate potential switching impacts which could distort use per customer analyses. More detail on this regression analysis is provided below as part of the discussion related to the Company's "Adjustment for Normalized & Annualized Use/Customer." Weather normalized sales for Rate RT-Heating customers for the 12 months ended September 30, 2021, were then utilized to derive the separate Rate RT-Heating and Rate R-Heating use per customer values (from the combined Rate R/RT-Heating use per customer value).

Actual sales were normalized for Rate R-General and Rate RT-General, in total, to reflect the 12 months ended September 30, 2021. These data were used to project combined Rate R/RT-General use per customer in total. Weather normalized sales for Rate RT-General customers for the 12 months ended September 30, 2021, were then utilized to derive the separate Rate RT-General and Rate R-General customer values (from the combined Rate R/RT-General use per customer value).

The projected Commercial Heating use per customer was established on a combined total basis for Rates N/NT/DS-Heating per the UGI Gas model regression techniques detailed in SDR-RR-11. Given that, over time, switching occurs on a regular basis between Rates N (retail service), NT (transportation service) and DS (transportation service), the regression analysis was performed on a total Rates N/NT/DS basis in order to eliminate potential switching impacts that could distort use per customer analyses. More detail on this regression analysis is provided below as part of the discussion related to the Company's "Adjustment for Normalized & Annualized Use/Customer." In order to then separate the combined Rate N/NT/DS – Commercial Heating value into respective Rate N, Rate NT and Rate DS values, Rate NT – Commercial Heating use per customer was established on the basis of weather normalized sales for Rate NT-Commercial Heating customers, for the 12 months ended September 30, 2021 as this class in much smaller in number than the Rate N – Commercial Heating class. Rate DS – Commercial Heating use per customer was then established based on budgeted 2023 sales for Rate DS-Commercial Heating, as Rate DS budgeting was performed on a detailed per-customer level. These Rate NT and Rate DS commercial heating values were then utilized to mathematically derive the Rate N-Commercial Heating use per customer values (from the combined Rates N/NT/DS-Commercial Heating use per customer value).

Actual sales were normalized for Rate N-Commercial General, Rate NT-Commercial General and Rate DS-Commercial General, in total, to reflect the 12 months ended September 30, 2021, in order to project combined Rates N/NT/DS-Commercial General use per customer in total. In order to then separate the combined Rate N/NT/DS – Commercial General value into respective Rate N, Rate NT and Rate DS values, Rate NT – Commercial General was based on weather normalized sales for Rate NT-Commercial General, for the 12 months ended September 30, 2021, and Rate DS – Commercial General was based on budgeted 2023 sales for Rate DS-Commercial General, which were done on a per-customer level. These Rate NT and Rate DS values, were then utilized to mathematically derive the Rate N-Commercial General use per customer values (from the combined Rates N/NT/DS-Commercial General use per customer value).

Actual sales were normalized for Rate N-Industrial, Rate NT-Industrial, and Rate DS-Industrial to reflect the 12 months ended September 30, 2021, in order to project combined Rates N/NT/DS-Industrial use per customer in total. In order to then separate the combined Rate N/NT/DS – Industrial value into respective Rate N, Rate NT and Rate DS values, Rate NT – Industrial was based on weather normalized sales for Rate NT-Industrial for the 12 months ended September 30, 2021. Rate DS – Industrial was based on budgeted 2023 sales for Rate DS-Industrial, which were done on a per-customer level. These Rate NT and Rate DS values were then utilized to mathematically derive the Rate

N-Industrial use per customer value (from the combined Rates N/NT/DS-Industrial use per customer value).

Q. How was temperature accounted for in developing sales and revenue forecasts?

A. The Company's FPFTY sales and revenue forecasts reflect annual normal heating degree days of 5,568. This annual normal heating degree day calculation is derived from a composite sales weighted value (by system demand) of each of the Company's four delivery regions, and the respective normal heating degree values. Normal heating degree days are defined based upon an average over a 15-year period and are updated every five years; the most recent update was for the 15-year period ending December 31, 2019. UGI Gas Exhibit SAE-2 provides supporting detail by year for the 15-year normal heating degree days.

Q. Is the use of average temperature data for a 15-year period consistent with the methodology used for calculating normal heating degree days in previous UGI Gas base rate cases?

A. Yes. The Company has consistently used a 15-year period methodology in the past seven gas base rate cases that the Company or its former subsidiaries have filed (as listed below).

- UGI Central Penn Gas ("CPG") 2009 Base Rate Case, Docket No. R-2008-2079675
- UGI Penn Natural Gas ("PNG") 2009 Base Rate Case, Docket No. R-2008-2079660
- UGI CPG 2011 Base Rate Case, Docket No. R-2010-2214415
- UGI Gas 2016 Base Rate Case, Docket No. R-2015-2518438
- UGI PNG 2017 Base Rate Case, Docket R-2016-2580030
- UGI Gas 2019 Base Rate Case, Docket No. R-2018-3006814
- UGI Gas 2020 Base Rate Case, Docket No. R-2019-3015162

Q. Please describe the adjustments made to the budget for the 12 months ending September 30, 2023, to develop FPFTY sales and revenues.

A. A summary of all adjustments made to the 2023 budget in order to develop FPFTY sales and revenue is shown on UGI Gas Exhibit SAE-4(a). Detail for each of these adjustments is provided on subsequent worksheets labeled 4(b) through 4(m). In total, these adjustments reflect a decrease to sales of 1,781 MMcf and an increase to revenue of $65.690 million, inclusive of Purchased Gas Cost ("PGC") revenues.

Q. Please explain the "Adjustment for Customer/Contract Changes" shown on UGI Gas Exhibit SAE-4(a).

A. The "Adjustment for Customer/Contract Changes" annualizes customer counts to anticipated end-of-test-year levels based on the Company's most recent forecast for the FPFTY; it is inclusive of any large transportation contract customer changes related to customers served under Rates LFD, XD, and IS. In particular, among other adjustments, this adjustment includes a net increase of 411 residential heating customers (Rate R) from budgeted levels to anticipated end-of-test-year levels and a net decrease of 28 commercial heating customers (Rate N) from budgeted levels to anticipated end-of-FPFTY levels on September 30, 2023.

Q. How were these adjustments calculated?

A. UGI Gas Exhibit SAE-4(b) provides the calculation of the associated sales and revenue adjustments for the stated customer counts. In total, this adjustment decreases sales by 194 MMcf and increases projected revenues by $0.278 million, inclusive of PGC revenues. Additional detail for column (9) of UGI Gas Exhibit SAE-4(b) can be found on UGI Gas

Exhibit SAE-4(b)(1), which provides a breakout of customer data for large transportation customer classes.

Q. Please explain the adjustment titled "Adjustment for Customer/Contract Changes – Large Transport and Interruptible Detail" as shown on UGI Gas Exhibit SAE-4(b)(1).

A. The adjustments for large transportation customers were developed by UGI Gas's marketing personnel following their review of individual large customer accounts and market segments. It reflects annualizing anticipated increases or reductions from original fiscal adjustments and includes the addition of $308,000 in anticipated revenue related to the Auburn Capacity Lease, as discussed in the direct testimony of Christopher R. Brown (UGI Gas Statement No. 1).

Q. Please explain your next adjustment, "Adjustment for Normalized & Annualized Use/Customer" shown on UGI Gas Exhibit SAE-4(a).

A. The "Adjustment for Normalized & Annualized Use/Customer" normalizes and annualizes usage per customer to projected end-of-test-year levels. Specifically, in developing usage per customer projections for the Company's core Residential Heating rate groups (Rates R and RT), the Company utilized an econometric regression model that incorporates four independent variables: (1) use per customer; (2) heating degree days; (3) lagged heating degree days; and (4) weighted time trend. While use per customer, heating degree days, and lagged heating degree days capture weather related usage factors, which can then be used to project normalized and annualized customer usage under normal weather conditions, the weighted time trend variable of this regression captures non-weather trends that underlie changes in usage per customer over time (*e.g.*, conservation). These trends can vary, but as a comprehensive variable, "trend" will capture the impacts of conservation, including but not limited to: (1) regular appliance replacements; (2) accelerated appliance replacements; (3) high-efficiency appliance installations; (4) setback thermostat installations; (5) modifications to new and existing buildings that are designed to decrease energy consumption; and (6) changes in consumer usage behavior due to other economic influences. Given the number of variables that can influence customer usage over time, and the difficulty in identifying, quantifying, and tracking all variables over time, a trend variable is used to provide a comprehensive indicator of usage trends, which can then be used to forecast for a future period. Additionally, the trend variable is weighted by heating degree days to reflect a "weighted trend," which more accurately reflects that the impacts of these trends are directly related to usage during heating time periods.

For the Residential Heating groups of Rates R and RT, the multi-year period regression methodology is the same base method that the Company has utilized in prior rate cases, updated for the use of a common data set period of October 2003 through September 2021. October 2003 is the earliest common data set available for the entire service territory, given the timing and data availability of historic service and former rate district level details for UGI Gas and its former subsidiaries, UGI PNG and UGI CPG.

For the Company's core Commercial Heating rate groups (inclusive of Rates N, NT, and DS), the Company utilized the same regression method as presented in UGI Gas's 2019 and 2020 Gas Rate Cases. Specifically, to forecast the Commercial Heating rate group use per customer, the Company utilized three variables: (1) use per customer; (2) heating degree days; and (3) lagged heating degree days. For the Commercial Heating group, the Company used the period of October 2012 through September 2021 for regression modeling, or the period during which common non-residential rate structures existed for UGI Gas and its former subsidiaries.

The forecasts for end-of-FPFTY use per customer are generated using the regression results along with a projection of regression variable inputs including normal annual heating degree days and, where applicable, a weighted trend variable. The results are presented in summary on UGI Gas Exhibit SAE-4(a) and in detail on UGI Gas Exhibit SAE-4(c). In total, the result is a net sales decrease, from the fiscal 2023 budget, of 1,348 MMcf, and a net revenue decrease, from the fiscal 2023 budget, of $15.863 million, inclusive of PGC revenues.

Q. Why did UGI Gas utilize a multi-year regression period?

A. The Company decided to use the multi-year period because it provides a larger sample set of data to smooth out short-term variations and capture the underlying long-term use per customer trends to more accurately project usage per customer during the period rates are likely to be in effect. This methodology is consistent with that utilized in the last seven base rate cases of UGI Gas and its predecessor entities.

Q. Has UGI Gas compared the results of the multi-year regression method to develop normalized usage for Residential Heating and Commercial Heating customer groups with any other normalization method?

A. Yes. Please see UGI Gas Exhibits SAE-3(a) and SAE-3(b), which contain use per customer graphs that illustrate both the results of the multi-year normalized regression method I have explained above ("Normalized Multi-year") and a short-term normalized ("Normalized 12 Months ended") value for the same groups of Residential Heating and Commercial Heating customers. The short-term normalized values are computed via a simple determination of temperature sensitive load each month. As can be seen from these graphs, short-term trend fluctuations of the "Normalized 12 months ended" line occur in certain periods, but consistently revert to the long-term "Normalized Multi-year" trend which has been used to forecast FPFTY use per customer values, demonstrating the ongoing base trend in declining use per customer.

Q. Please explain the "Adjustment for PGC" shown on UGI Gas Exhibit SAE-4(a).

A. The "Adjustment for PGC" shown in summary on UGI Gas Exhibit SAE-4(a) annualizes FPFTY PGC revenues using the PGC rate in effect as of December 1, 2021. UGI Gas Exhibit SAE-4(d) provides the calculations for these adjustments. This adjustment increases PGC revenues for the FPFTY by $49.4 million.

Q. Please explain the following three adjustments shown in summary on UGI Gas Exhibit SAE-4(a): "Adjustment for MFC," "Adjustment for USP," and "Adjustment for GPC."

A. The Adjustment for MFC annualizes the Company's Merchant Function Charge ("MFC") revenues for the FPFTY based on the MFC surcharge rates in effect as of December 1, 2021. The MFC Adjustment increases projected revenues by $0.814 million.

The Adjustment for USP annualizes the Company's Universal Service Program ("USP") surcharge revenues for the FPFTY based on the USP Rider rate in effect as of December 1, 2021. The Adjustment for USP also updates the sales volume for Customer Assistance Program ("CAP") customers in the USP Revenue calculation with end of Fiscal Year 2021 data in comparison to the budgeted sales volume for CAP customers, which was calculated using end of Fiscal Year 2020 data. The USP adjustment increases revenues by $1.119 million.

The Adjustment for GPC annualizes the Gas Procurement Cost ("GPC") revenues to reflect the impact of all volume adjustments to the original Fiscal Year 2023 planned budget. The GPC adjustment decreases revenues by $0.111 million. Additional details for these three adjustments are provided on UGI Gas Exhibit SAE-4(e), UGI Gas Exhibit SAE-4(f), and UGI Gas Exhibit SAE-4(g), respectively.

Q. Please explain "Adjustment for Excess Take Revenues" as shown on UGI Gas Exhibit SAE-4(a).

A. The "Adjustment for Excess Take" detailed in UGI Gas Exhibit SAE-4(h) reflects the assumption that large transportation customers will evaluate new service elections and will make the necessary adjustments to avoid Excess Take penalties in the FPFTY. The Excess Take adjustment reduces revenue by $1.7 million.

Q. Please explain the "Adjustment for EEC Rider" on UGI Gas Exhibit SAE-4(a).

A. The "Adjustment for EEC Rider" annualizes the revenue from the Energy Efficiency and Conservation ("EE&C") Rider ("EEC Rider") for the FPFTY based on the EEC Rider rate in effect as of December 1, 2021. This adjustment increases revenues by $3.809 million and is shown on UGI Exhibit SAE-4(i).

Q. Please explain the "Adjustment for EEC Conservation Impact" on UGI Gas Exhibit SAE-4(a).

A. The "Adjustment for EEC Conservation Impact" annualizes the impact to revenues from

UGI Gas's ongoing EE&C programs and associated reduced energy consumption as a result of measures implemented as part of the EE&C programs. This adjustment decreases FPFTY sales by 239 MMcf and decreases revenues by $2.405 million and can be seen on UGI Gas Exhibit SAE-4(j).

Q. Please explain the "Adjustment for GET Gas" on UGI Gas Exhibit SAE-4(a).

A. The "Adjustment for GET Gas" annualizes GET Gas residential revenues to reflect end of year conditions. The revised residential revenues were developed by annualizing the projected GET Gas surcharge payments at the end of the FPFTY. The adjustment also adds anticipated GET Gas revenues related to commercial customers, which were inadvertently omitted from the original FPFTY budget. In total this adjustment decreases revenues by $0.016 million, as shown on UGI Gas Exhibit SAE-4(k).

Q. Please explain the "Adjustment for GDE" on UGI Gas Exhibit SAE-4(a).

A. The "Adjustment for GDE" annualizes Gas Delivery Enhancement ("GDE") Rider revenue based on the current rate as of December 1, 2021. This adjustment increases revenues by $0.020 million and is shown on UGI Gas Exhibit SAE-4(l).

Q. Please explain the "Adjustment for DSIC" on UGI Gas Exhibit SAE-4(a).

A. The "Adjustment for DSIC" annualizes Distribution System Improvement Charge ("DSIC") revenue based on the application of the 5% DSIC charge cap to FPFTY revenues. The FPFTY budget incorrectly excluded the projected DSIC rate revenues. This adjustment continues applying the 5% DSIC rate, projected at the end of the FTY, to the end of the FPFTY period. This allows the Company to properly quantify DSIC revenues, which will be rolled into the new base rates established in this proceeding as a result of re-setting the DSIC rate to zero. This adjustment increases revenues by $30.327 million and is shown on UGI Gas Exhibit SAE-4(m).

Q. Do the adjusted FPFTY revenues exclude revenues related to off-system sales and non-jurisdictional revenue?

A. Yes.

III. DEVELOPMENT OF SALES AND REVENUE FOR THE FTY AND HTY

Q. How were normalized and annualized sales and revenue determined for the FTY?

A. Budgeted sales and revenues serve as the starting point for the development of the normalized and annualized FTY sales and revenues, as shown in UGI Gas Exhibit SAE-5. All of the adjustments that were made in the development of the FPFTY sales and revenues were also made in the development of the FTY sales and revenues, with the exception of the adjustments for the EEC Conservation Impact and DSIC that are contained in the FPFTY, but not the FTY.

Q. How were normalized and annualized sales and revenue determined for the HTY?

A. Historic sales and revenues serve as the starting point for the development of the normalized and annualized HTY sales and revenues shown in UGI Gas Exhibit SAE-6. All of the adjustments that were made in the development of the FPFTY were also made in the development of the HTY, with the exception of the adjustments for the EEC Conservation Impact, GDE Rider, and DSIC.

IV. REVENUE ALLOCATION AND RATE DESIGN

Q. What is UGI Gas's ratemaking philosophy for revenue allocation and rate design?

A. The Company's ratemaking goal is to implement reasonable rates that recover its cost of doing business. Revenue allocation and rate design are generally developed to reflect reasonable movement toward class cost of service and to be competitive with prices of alternate energy sources, including bypass options. UGI Gas's rates and rate design seek to promote and achieve efficient utilization of the Company's facilities and natural gas supplies.

Q. What factors has the Company considered in establishing its proposed rate structure?

A. The Company considered class cost of service, rate of return and relative rate of return compared to the system average rate of return as the primary factors in determining revenue allocation and rate design. In measuring cost of service, the Company relied on the cost of service study prepared by Company witness Constance E. Heppenstall (UGI Gas Statement No. 10).

Q. What is the Company's proposed revenue allocation in this case?

A. Below is a summary of the proposed allocation of the $82.7 million increase proposed in this case, shown by rate class:

Rates R/RT	$68.1 million
Rates N/NT	$14.4 million
Rate DS	$0.7 million
Rate LFD	$1.5 million
Rate XD	($1.0 million)
Rate IS	($1.0 million)

Q. What were the Company's goals in deriving its proposed revenue allocation?

A. The Company's goals for revenue allocation were two-fold. First, the Company wanted to materially move all classes towards the system average rate of return. Second, the Company wanted to complete the unification of the DS and N/NT rate classes for the former North and South/Central Rate Districts.

UGI Gas's proposed revenue allocation accomplishes both of these two goals. The revenue allocation moves all customer classes toward system average rate of return, while also completing the unification of the Rate DS and N/NT classes.

Q. How does the Company's proposed revenue allocation move all customer classes toward system average rate of return?

A. Table 1 below shows the percentage increase in distribution revenue, excluding gas costs, and summarizes the changes in relative rates of return by rate class. The percentage movement towards the system average rate of return is also included in the table data.

Table 1. – Percent Increase, Relative Rate of Return ("ROR") and Change in Relative ROR

Rate	Percent increase (without gas costs)	Relative ROR-present rates	Relative ROR-proposed rates	Change in relative ROR	Percent movement in relative ROR toward unity ROR
R/RT	18.1%	0.70	0.87	0.17	56%
N/NT	10.4%	1.18	1.08	0.10	-56%
DS	1.9%	1.40	1.10	0.30	-75%
LFD	3.4%	1.54	1.24	0.30	-56%
XD	-2.6%	2.28	1.64	0.64	-50%
IS	-4.4%	2.19	1.54	0.65	-55%
Total	12.4%	1.0	1.0	1.0	

Q. Could you please explain how you developed the proposed revenue allocation and achieved rate uniformity for both the Rates N/NT and Rate DS customer classes?

A. For Rate R/RT, Rate N/NT, and Rate LFD, UGI Gas allocated a portion of the total proposed increase to those classes by determining an amount that moves each class by an equivalent percentage towards the system average rate of return. Moving an equivalent percentage toward the system average rate of return achieves a just and reasonable revenue allocation. As part of this process, the Company also unified the former North Rate District's Rate N/NT class rates with the former South and Central Rate Districts' Rate N/NT class rates as a rate design element.

In addition, the Company looked at unifying the Rate DS classes in the former North Rate District with those from the former South and Central Rate Districts. Since the Company first began moving its customers to uniform rates in 2019, the resulting impact to the Rate DS class in the former North Rate District has served as a limiting factor for consideration for the overall revenue allocation. Completing unification in this case is reasonable in terms of the level of impact to these customers. As the total system average increase in distribution rates (non-gas costs rates) proposed in this case is 12.4%, the increase to this Rate DS group was limited to two times (2x) the system average increase, or 24.8%. Limiting the increase by a maximum of two times the overall increase in distribution rates is consistent with the methodology utilized in the Company's proposals in past rate cases in order to limit the overall impact to any one particular customer group affected by the overall rate increase.

Furthermore, the distribution rates for the former South and Central Rate DS class were adjusted in order to achieve uniformity across the entire Rate DS class. This resulted in an overall decrease to the former South and Central Rate DS class of 4.1% and an overall

Rate DS class increase of 1.9% (in terms of non-gas cost rates). These collective changes to Rate DS resulted in a total revenue allocation of $653,946 of the total requested $82.7 million increase.[1]

Additionally, UGI Gas recognized that its competitive negotiated rate classes of Rate XD and Rate IS (Interruptible) have relative rates of return at present rates that are all well above system average (more than 2x system average). As such, the Company is proposing no incremental revenue allocation to these rate classes. These classes are subject to competitive limitations on an ongoing basis, and rates charged are routinely reviewed and established on a competitive alternative basis to assure overall benefits to all customers are maximized.

Q. Please describe the impacts related to revenue allocation and rate design for the residential Rate R customer group.

A. As evidenced by the cost of service study presented by Ms. Heppenstall, under present rates, the residential Rate R customer group (Rates R and RT) is producing a return of 4.33%, as compared to a system average return of 6.14%. This translates to a relative rate of return of 0.70 compared to the system average. In allocating revenues, the Company proposes to allocate $68.1 million of the revenue increase to the Rate R customer group in order to move it closer toward cost of service. This increase will result in an overall return

[1] Moreover, it should be noted that the Company has considered gradualism in the context of the increase to the former North Rate District Rate DS class. Despite the Company's proposal to unify Rate DS rates for all customers in the 2019 and 2020 Gas Rate Cases, only modest movement has been achieved in settlement. Thus, former North Rate District Rate DS customers have now continued to pay below system average Rate DS rates for a period of three years. These lower rates have accrued benefits over the three-year period to the former North Rate District Rate DS customers and further support the movement to the full proposed rates in this proceeding, which, as explained above, were limited to an increase equal to two times the system average. Based on these reasonableness checks for gradualism, the Company believes uniform rates for Rate DS are an appropriate outcome of this proceeding.

of 6.94% for the Rate R customer group, compared to the proposed system average of 7.97%, and a relative rate of return of 0.87; thus, moving the Rate R customer group more than halfway toward system average rate of return.

As to rate design, the Company is proposing a Rate R customer charge of $19.95 per month, as compared to the current charge of $14.60 per month, to better reflect the direct customer costs per bill of $27.47, as identified within the cost of service study presented in UGI Gas Exhibit D. This partial movement toward the direct customer cost per bill reflects the Company's application of the ratemaking principle of gradualism.

Q. Please describe the impacts related to revenue allocation and rate design for the small commercial Rate N customer group.

A. For the small commercial Rate N customer group (Rates N and NT), current rates are producing a return of 7.28% with a relative rate of return 1.18. UGI Gas proposes to allocate $14.4 million of the revenue increase to the Rate N customer group. This increase will result in an overall return of 8.62% or a relative rate of return of 1.08; thus, moving the Rate N customer group more than halfway toward system average rate of return.

As to rate design, the Company is proposing a Rate N customer group customer charge of $30.00 per month, as compared to the current charge of $23.50 per month, to better reflect the direct customer costs per bill of $45.87 as identified within the cost of service study presented in UGI Gas Exhibit D. This partial movement toward the direct customer cost per bill reflects the Company's application of the ratemaking principle of gradualism.

Q. Please describe the impact of the revenue allocation and rate design for Rate DS.

A. For Rate DS, current rates are producing a return of 8.61%, with a relative rate of return of

1.40. The Company proposes to allocate $653,946 of the revenue increase to the Rate DS customers in order to increase their rates in the former North Rate District and decrease rates for the former South and Central Rate District customers to achieve unity in this customer group. These adjustments in rates will result in an overall class return of 8.79% or a relative rate of return of 1.10.

As to rate design, the Company is proposing to maintain the current Rate DS customer charge of $260.00 per month. The $260.00 per month charge is fully supported by the direct customer costs per bill for Rate DS of $370.12 as identified within the cost of service study presented in UGI Gas Exhibit D.

Q. Is the Company proposing any change to the rate assessed under Rate NNS (No Notice Service)?

A. Yes. Rate NNS is a daily balancing service offered by the Company. It provides an alternate election of a daily balancing tolerance for transportation customers, allowing a customer to optionally elect a balancing tolerance greater than the standard basic balancing provided by the Company. A customer is able to make an election under Rate NNS up to its DFR (Daily Firm Requirement) contract demand level and pay only for the level chosen. The Company is proposing to update the tariffed NNS rate to reflect current cost elements, using the methodology from the Company's 2019 Gas Rate Case.

Q. How was the proposed NNS rate developed?

A. The charge for providing service under Rate NNS is a monthly charge established using the Company's cost of interstate storage that can be utilized for balancing excess or shortfall requirements on the Company system. UGI Gas Exhibit SAE-8 shows the calculation of the Rate NNS charge. This charge was developed based on the same methodology used in the Company's 2019 Gas Rate Case. As seen on UGI Gas Exhibit SAE-8, the proposed NNS rate is $0.1860 per Mcf/d of an elected daily no notice allowance ("NNA") tolerance quantity. This compares to a current NNS rate of $0.4880 per Mcf/d of elected NNA, which was established in the Company's 2020 Gas Rate Case (See Ordering Paragraph 22 in the Commission's Order issued on October 8, 2020 at Docket Nos. R-2019-3015162, *et al.*).

Q. Will the Company continue to credit the revenues received from Rate NNS to PGC Rates?

A. Yes, revenues from Rate NNS will continue to be credited to the PGC Rates as part of the Company's annual 1307(f) proceeding.

Q. Please describe Rate MBS (Monthly Balancing Service).

A. Rate MBS is a monthly balancing service offered by the Company. Service under Rate MBS allows transportation imbalances of up to 10% for the month to be carried forward in the customer's MBS account for delivery of excess volumes, or receipt of shortfalls, in subsequent months.

Q. Has the Company proposed any changes to the Rate MBS rates?

A. Yes. UGI Gas Exhibit SAE-9 provides the basis for the MBS rate calculation. As a result of the settlement in the Company's 2019 Gas Rate Case, storage demand charges were included in the calculation of Rate MBS on a 100% load factor basis and the Company is continuing that inclusion in the proposed rates presented. The MBS rate is updated annually on December 1st each year, using 12 months of data ending in September, for the average monthly imbalance utilized in development of the rate. The MBS rates most recently updated for December 1, 2021, are: \$0.0277/Mcf for Rates DS and IS; \$0.0160/Mcf for Rate LFD; and \$0.0165/Mcf for Rate XD. As seen on UGI Gas Exhibit SAE-9, the proposed, MBS rates will be: \$0.0437/Mcf for Rates DS and IS; \$0.0263/Mcf for Rate LFD; and \$0.0221/Mcf for Rate XD; in particular, these Rate MBS increases are principally driven by recent increases to the Company's applicable storage demand charges.

Q. Will the Company continue to credit the revenues received from Rate MBS to PGC Rates?

A. Yes, revenues from Rate MBS will continue to be credited to the PGC as part of the Company's annual 1307(f) proceeding.

Q. Please describe the GPC.

A. The GPC recovers costs associated with gas procurement that were unbundled from base rates.

Q. Is the Company proposing to update its GPC in this proceeding?

A. No. The Company proposes to continue the \$0.0660/Mcf blended rate that was approved in the Company's 2020 Gas Rate Case (see Joint Petition for Approval of Unopposed Settlement of All Issues, Appx. A, p. 12, filed on August 3, 2020, at Docket Nos. R-2019-3015162, *et al.*, which was approved by the Commission's Opinion and Order entered on October 8, 2020, in that proceeding).

Q. Please describe the MFC.

A. The MFC is equal to the fixed percentage of purchased gas costs that are expected to be uncollectible.

Q. Is the Company proposing to update its MFC in this proceeding?

A. Yes. The Company is updating the percentages for the MFC rates to reflect the actual uncollectible expense for the last three years. Based on this updated data, the residential MFC will be 2.27%, and the MFC for the commercial class will be 0.44%. Please see UGI Gas Exhibit SAE-10 for additional details.

Q. Please describe the USP Rider.

A. The USP Rider recovers those costs associated with the provision of universal service offerings approved by the Commission in the Company's Universal Service and Energy Conservation Plan.

Q. Is the Company proposing any changes to the USP Rider?

A. Yes. The Company is proposing changes to the annual reconciliation provisions of Rider F – Universal Service Program "USP" to update the threshold number of customers enrolled in the Customer Assistance Program ("CAP") that is used in the calculation of the offset applied to recoverable CAP costs. This offset reduces the Company's recovery of CAP spending above projected enrollment to account for write-offs of bad debt that would arguably have occurred if not for CAP. The Company proposes to set the CAP enrollee threshold equal to the number of CAP participants as of September 30, 2022, to provide an enrollee figure that reflect the actual ongoing impacts on CAP enrollment. This proposal is consistent with the establishment of the CAP enrollee figure in the last UGI Gas 2020 Rate Case at Docket No. R-2019-3015162.

V. TARIFF CHANGES

Q. What tariff changes are being proposed in this case?

A. The Company is revising references to the Supplement number, Notice language, Issue and Effective dates, and page numbers as necessary per this case. Apart from the proposed rate schedule changes, a complete list of tariff modifications can be found in the List of Changes Made by the Supplement section in UGI Gas Exhibit F – Proposed Supplement No. 32 to UGI Gas Tariff No. 7 and Proposed Supplement No. 32 to UGI Gas Tariff No. 7S. As previously stated, the Company is proposing to complete the unification of the DS and N/NT rate classes for the former North and South/Central Rate Districts. To that end, UGI Gas is proposing to fully consolidate the listings of counties served in the Description of Territories Served, which are currently apportioned by the three former Rate Districts. More significant proposed changes to the tariffs include:

- Rider C - The current Extended Tax Cuts and Job Act ("TCJA") Temporary Surcharge Rider C has been removed as the surcharge has ended. In replacement, the Company proposes to add a new Rider C, Weather Normalization Adjustment ("WNA") Rider C, which is detailed in the direct testimony of John D. Taylor (UGI Gas Statement No. 11).
- References to the expired Rider C, TCJA Temporary Surcharge have been deleted from the following rate schedules: Rate R, RT, GL, N, NT, DS, LFD, XD, R/S, and IS.

- The State Tax Adjustment Surcharge, Rider A, has been rolled into rates and reset to 0.00%.
- The reference to Rate Gas Beyond the Main ("GBM") in Rider A has been removed, as that rate has now been eliminated.
- Rider D - MFC has been set to 2.27% for PGC Residential Customers and 0.44% for Non-Residential PGC Customers, as described above.
- Section 15. Price to Compare ("PTC") has been updated to reflect changes to the MFC.
- Rider F – Universal Service Program has been revised so that the CAP credit bad debt offset will be associated with the participants in excess of the number of CAP enrollees as of September 30, 2022, in place of the existing September 30, 2020 date.
- Rider I – DSIC has been reset to 0.00% in accordance with 66 Pa. C.S. § 1358(b).
- Rate NNS – The existing NNS election volumetric option, specific to the former rate districts for customers not having daily metering, have been removed, as the Company now has daily metering on all applicable customers.
- Rate NNS and MBS have been revised to remove outdated language that was applicable for service prior to November 1, 2020.

Q. Does this conclude your direct testimony?

A. Yes, it does.

UGI GAS STATEMENT NO. 9

TIMOTHY J. ANGSTADT

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2021-3030218

UGI Utilities, Inc. - Gas Division

Statement No. 9

Direct Testimony of
Timothy J. Angstadt

Topics Addressed:	**System Operations** **Operational Response to COVID-19** **System Reliability** **Leak Reductions & Emergency Response** **Employee Additions** **Safety Initiatives** **Environmental Remediation & Programs**

Dated: January 28, 2022

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Timothy J. Angstadt. My current business address is 1 UGI Drive, Denver, Pennsylvania 17517.

Q. By whom are you employed and in what capacity?

A. I am employed as the Vice President of Operations by UGI Utilities, Inc. ("UGI"). UGI is a wholly-owned subsidiary of UGI Corporation ("UGI Corp."). UGI has two (2) operating divisions, the Gas Division ("UGI Gas" or the "Company) and the Electric Division ("UGI Electric"), each of which is a public utility regulated by the Pennsylvania Public Utility Commission ("Commission" or "PUC").

Q. Please describe your educational background and work experience.

A. They are set forth in my resume attached as UGI Gas Exhibit TJA-1 to my testimony.

Q. What are your responsibilities as Vice President of Operations?

A. As Vice President – Operations, I am UGI's senior executive accountable for over 850 individuals including management, engineering, clerical, and field technicians to operate and maintain the Company's transmission and distribution systems. I am also responsible for overseeing activities and personnel involved with the Company's integrity programs (e.g., leak survey, corrosion control, Geographic Information System ("GIS") mapping, network analysis, safety, Distribution Integrity Management Program ("DIMP"), Transmission Integrity Management Program ("TIMP"), and technical training).

Additionally, I am an executive sponsor of UGI's Safety Culture Initiative and oversee accelerated infrastructure replacement initiatives, customer growth opportunities, capacity constraint improvements, and major installation projects.

Q. Have you presented testimony in proceedings before the Commission?

A. Yes. UGI Gas Exhibit TJA-1 identifies my prior testimony.

Q. What is the purpose of your testimony?

A. I am providing testimony on behalf of UGI Gas. In my testimony, I will address the following topics: (1) natural gas system operations; (2) response to the COVID-19 Pandemic; (3) system safety and reliability; (4) leak reductions and emergency response; (5) employee additions; and (6) safety initiatives and environmental remediation.

Q. Are you sponsoring any exhibits in this proceeding?

A. Yes. Please see UGI Gas Exhibit TJA-1.

II. <u>NATURAL GAS SYSTEM OPERATIONS</u>

Q. Please provide an overview of the Company's distribution system.

A. UGI Gas provides service to approximately 672,000 residential, commercial, and industrial customers located in forty-five (45) of Pennsylvania's sixty-seven (67) counties and spanning more than 700 municipalities. As of December 31, 2021, the Company operates more than 12,000 miles of gas distribution mains and 300 miles of natural gas transmission mains in the Commonwealth of Pennsylvania.

Q. Please describe UGI Gas's operations centers and support facilities.

A. UGI Gas has operations centers and support facilities throughout its service territory. Additionally, a stand-alone centralized training facility in Reading includes a "safety town" for real-life outdoor training inclusive of leak pinpointing and investigation, a separate welding and tapping center, a safety lab, a service lab, a measurement and regulation lab, and a computer lab. Classrooms and laboratories provide four primary training deliverables: (1) safety; (2) construction and maintenance; (3) measurement and regulation; and (4) utility service.

Q. How does UGI Gas staff its operations?

A. UGI Gas relies upon a mix of employees and contractor resources for its capital, operations, and maintenance programs in order to accomplish many of its initiatives, including gas main and service replacement and installation, mechanical tee remediation, mercury regulator removal, roadway and landscape restoration, leak repairs, meter reading, and general system operation and maintenance. Further, UGI Gas's parent company, UGI Corp., provides management, administrative and support services (*e.g.*, executive management, human resources, legal, finance, accounting, procurement, treasury, IT, and corporate governance).

III. <u>COVID-19 OPERATIONAL IMPACTS AND UGI GAS'S RESPONSE</u>

Q. Please describe the operational impacts of the COVID-19 Pandemic on UGI Gas's operations and the Company's response to those challenges.

A. The Company's experience responding to the COVID-19 Pandemic, and specifically the programs and policies it adopted to assist customers, is detailed in the testimony of

Christopher R. Brown (UGI Gas Statement No. 1). From an operational perspective, COVID-19 impacted the Company's approach to project planning, including the availability of personnel to complete fieldwork. The economic impacts resulting from COVD-19 increased costs, presented challenges in securing necessary supplies, and created issues in the labor market that UGI Gas must respond to in order to maintain its workforce.

Specifically, UGI Gas stopped all non-emergency work that required personnel to be outside their homes for a six-week period beginning in mid-March 2020 and ending on May 4, 2020. The Company then began a ramp up process to restart its construction program, focusing on work that did not involve customer contact. During this ramp up period, the Company initiated Measurement and Regulation ("M&R") station work, as well as direct bury main replacements. By June 2020, and in reliance on the Governor's return to work plan, UGI Gas began to conduct planned customer contact work in areas that had progressed to and maintained a "yellow status" for at least a two-week period. This allowed the Company to undertake certain main insert projects, which resulted in planned customer outages that required relights. UGI Gas also began conducting service renewals during his period. By mid-July 2020, the Company resumed high customer contact activities throughout the service territory.

Q. How has COVID-19 impacted the availability of personnel?

A. Throughout the Pandemic, COVID-19 significantly impacted the availability of personnel and caused project delays. UGI Gas also experienced employee and contractor absences due to illness or quarantine. The result of active COVID-19 cases and contact tracing made staffing challenges a regular factor in the Company's efforts to cover normal operational needs and keep construction projects moving. While COVID-19 impacts persist today, the Company is anticipating that such impacts will be minimal to ongoing operations on a going forward basis.

Another significant and lasting impact resulted from the temporary curtailment in hiring for the Capital Project Management and Capital Construction teams.[1] These new teams were designed to improve UGI Gas's ability to undertake replacement and betterment projects on a more efficient and expeditious basis, which was validated by an independent third-party study. The director roles for the new teams were hired just before the Pandemic began. However, UGI Gas temporarily halted its efforts to staff those teams when the Pandemic started. While the Company began the process of planning for and filling those roles in April 2020, securing candidates was challenging, due to the extremely competitive construction market. In 2021, candidates with flexible skills – particularly those in project management – were in high demand across many industries, including public utilities. Therefore, it has taken longer than initially anticipated to staff the new teams. While staffing challenges persist, the Company continues to make progress on this front, including the expanded use of outside support to meet its needs.

[1] From mid-March 2020 through the end of April 2020, the Company temporarily initiated a new employee hiring freeze until the impacts of COVID-19 on the Company's operations for the remainder of 2020 were clear. This temporary hiring freeze prevented the Company from reaching the headcount level projected by the end of the FY2021.

Q. Has UGI Gas experienced any other COVID-19 impacts that altered its normal project planning process?

A. Yes. The Company experienced delays in obtaining permits and state and local approvals that are needed prior to construction. Some local government offices remained closed after UGI Gas restarted its construction programs. Further, as a result of the need to avoid projects where the Company would be in close proximity to customers, Engineering and Operations modified their planned projects, which also created delays. For instance, some projects that were originally designed (and in some cases permitted) as insert main projects were redesigned as direct bury main replacement projects, which delayed service renewals and tie-overs. Although these actions allowed prioritized work to occur, they still impacted the pace of project completions. These Pandemic-related permit challenges have largely been minimized or eliminated in recent months.

In addition, as work resumed that involved customer contact, the Company addressed a backlog of service renewals, meter relocations, and service tie-overs (associated with work completed during the period that did not involve customer contact). There was also a modest delay of regulatory compliance work that was addressed upon restart of customer contact work streams. The Company addressed this backlog and is now maintaining a pace of ongoing projects commensurate with the Company's pre-COVID-19 work. Finally, the Company experienced and continues to experience supply chain challenges. For example, procurement lead times are much longer for many of the components required for natural gas system maintenance and construction, including pipe, tap fittings, valves, regulator station heaters, and regulator station components. Many of these supply procurement delays surfaced while projects were underway, delaying plant in service timing, extending project spend into additional fiscal periods, and adding resource demobilization and remobilization challenges. While supply chain issues continue to linger in part, the Company has adjusted its procurement activities to help minimize associated impacts.

Q. What actions has UGI Gas taken to reduce its vulnerability to prospective Pandemic-related impacts?

A. The Company has undertaken a number of steps based on its recent experiences responding to the rapidly changing operational landscape created by COVID-19. One important initiative was to diversify its supplier and contractor lists. UGI Gas has actively sought out new parties and new contractors to expand its bidder list for future projects. Doing so will improve the Company's resiliency by providing it with a wider pool of resources. Pandemic-mitigating employee policies, field procedure changes, and expanded inventories of pandemic-related personal protective equipment have positioned UGI Gas to continue typical operations and construction activities through anticipated public health challenges associated with the ongoing Pandemic.

IV. SYSTEM RELIABILITY AND SAFETY

Q. Please describe the physical composition of UGI Gas's distribution system.

A. Due to its long-term operation, the Company's distribution system includes a mixture of pipeline materials indicative of the industry's technological advancement over time. Cast iron mains can be found in the oldest parts of the system. The industry then transitioned to bare steel and wrought iron piping, which were prevalent until the 1960s. The first generation of plastic piping was introduced in the early 1970s. Materials installed since the 1970s include polyethylene (“PE”) and coated steel piping. Overall, approximately ninety percent (90%) of UGI Gas’s distribution mains consist of contemporary materials, which UGI Gas defines as cathodically-protected steel and plastic. UGI Gas’s natural gas distribution system has the highest percentage of contemporary mains among major natural gas distribution companies in Pennsylvania.

Q. Please discuss the Company’s action to improve and enhance its distribution system.

A. UGI Gas has been identifying and repairing, improving, or replacing its distribution infrastructure on an accelerated basis through Commission-approved Long Term Infrastructure Improvement Plans (“LTIIP”). The Company’s Initial LTIIP[2] and Second LTIIP[3] have resulted in UGI Gas successfully removing more than 463 miles of main over the seven (7) year period from 2014 to 2020, including sixty-six percent (66%) of its total cast iron mains and twenty-two percent (22%) of its total bare steel/wrought iron mains. As of December 31, 2021, the Company has removed an additional seventy-six (76) miles of main. Accordingly, UGI Gas has removed a total of seventy-two percent (72%) of its cast iron mains and twenty-six percent (26%) of its total bare steel/wrought iron mains from the system.

---

[2] On December 12, 2013, each of UGI Gas’s three predecessor natural gas distribution companies filed Petitions, and received Commission approval, for LTIIPs at Docket Nos. P-2013-2398833, P-2013-2397056, and P-2013-2398835 (collectively referred to as the “Initial LTIIP”). In the Initial LTIIP, the Company identified its plan to replace all of its cast iron main over the 13-year period ending in February 2027 and all of its bare steel and wrought iron main over the 28-year period ending September 2041. The Initial LTIIP period ended on December 31, 2019.

[3] *See Petition of UGI Utilities, Inc. – Gas Division for Approval of its Second Long Term Infrastructure Improvement Plan*, Docket No. P-2019-3012337 (Petition filed on August 21, 2019) (the “Second LTIIP”). The Second LTIIP builds off of the significant acceleration in the rate of infrastructure repairs, improvements and replacements (including the accelerated replacement of cast iron and bare steel pipe) that was achieved by the Initial LTIIP and reflects even further acceleration.

UGI Gas will continue to invest in strengthening and modernizing its distribution facilities serving customers throughout the Company's service territory. This includes the replacement of another 210 total miles of cast iron, bare steel, and wrought iron main during the remaining years of the Second LTIIP. In addition to main replacements in the Second LTIIP, the Company has pursued other infrastructure initiatives through the Second LTIIP, including replacing service lines, meter sets, valves, farm taps, as well as addressing safety concerns relating to measurement and regulation facilities (e.g., making improvements to over-pressure protection equipment) and mechanical tees. These initiatives will make UGI Gas's system safer, more reliable, and easier to operate. Continuing UGI Gas's infrastructure replacement program will allow the Company to provide safe and reliable service both now and into the future.

Q. How does UGI Gas prioritize its pipeline replacement projects?

A. In 2019, UGI Gas began using the Data-Driven Risk Model ("DDRM"). The DDRM is a quantitative model incorporating leak repair data, incident data, and asset population data to calculate a risk index score for facility groupings referred to as Asset Threat Groups ("ATGs"). The Subject Matter Expert ("SME") driven Risk Model is still utilized to supplement risk evaluation to the DDRM and validates DDRM results by incorporating SME input. Optimain also continues to be utilized as a tool to evaluate risk on an individualized segment level and validates DDRM outputs for cast iron and steel mains.

The DDRM provides a quantitative basis for evaluating risk and creates a more stable foundation for comparing year-over-year changes, because of the consistent quantitative underpinning it utilizes. This quantitative underpinning largely resolves the effect of bias toward more recent events (often expressed by qualitative SME models, which tend to weight more heavily recent issues and concerns). Finally, the use of the DDRM helps UGI Gas better evaluate other effective approaches for addressing risk, including effective operations and maintenance programs, additional leak survey activities and damage prevention measures.

Q. **What are the Company's current goals for main replacement?**

A. UGI Gas is on track to replace all of its cast iron main no later than February 2027. Further, the Company plans to complete its bare steel and wrought iron main replacement no later than September 2041. Given the Company's accelerated pace of bare steel replacement reflected in the Second LTIIP, and continued into the future with necessary regulatory approvals, the Company currently is on pace to replace all bare steel mains a few years early, or by 2038.[4] Specifically, in order to achieve these objectives, the Company's Second LTIIP established the objective of replacing sixty-eight (68) miles of main in calendar year 2021, and seventy (70) miles of main in calendar years 2022 through 2024.

Q. Did UGI Gas achieve its mileage objective in 2021?

A. Yes, the Company achieved and exceeded its mileage objective, by replacing or retiring over seventy-six (76) miles of main in 2021.

[4] For any given intermediate period, the sequence of projects and the amount of specific facilities to be addressed may be adjusted in response to changing conditions. A variety of factors intrinsic to the natural gas distribution business may cause these changes to occur. These factors include, but are not limited to, state and municipal relocation projects, other private construction projects, system upgrades due to pressure requirements, regulatory changes, and legislative changes.

Q. What is UGI Gas's projection of its replacement and betterment plant in service for the future test year ("FTY") and the fully projected future test year ("FPFTY")?

A. For Fiscal Year ("FY") 2022, the replacement and betterment budget reflects $281.4 million plant in service. FY 2023 plant placed in service for replacement and betterment is budgeted to be $305.8 million. For more detail on the Company's budgeting process, please refer to the direct testimony of Vicky A. Schappell (UGI Gas Statement No. 5).

Q. What is the Company's basis for showing a further increase in plant placed in service in the FTY and FPFTY?

A. Foremost, the Company's annual plant additions over the period 2017-2021 have increased nearly $85 million over the time period, from $296 million in 2017 to $381 million in 2021. The Company anticipates that the cost of its replacement and betterment work will continue to increase through the FPFTY due to a number of different elements. First, the Company is further accelerating the number of miles it will accomplish in the FTY and FPFTY. In addition, these miles of main include large portions of the remaining cast iron main replacement projects, which must be completed by 2027, and are comprised of projects featuring increased complexity, challenging locations, and larger diameter pipes. For these reasons, UGI Gas's budget for the FTY and the FPFTY reflects increased plant additions beyond that amount that the Company had accomplished during the HTY.

Q. What other system reliability improvements has the Company performed recently?

A. In addition to pipeline replacement, the Company's Second LTIIP includes several projects related to natural gas system over pressure protection ("OPP"). Following recent overpressurization guidance issued by the National Transportation Safety Board ("NTSB") in 2019, UGI Gas evaluated the OPP utilized on its low-pressure systems. A total of seventy-three (73) regulator stations serving over 80,000 customers required supplemental OPP to comply with the NTSB's recommendations on OPP. UGI Gas implemented a plan to address supplemental OPP at all seventy-three (73) stations by the end of FY2023. As of September 30, 2021, forty-three (43) of the seventy-three (73) stations have been addressed through the installation of supplemental OPP, station abandonment, or station replacement. These projects were prioritized on a risk reduction basis seeking to maximize the customers served by NTSB-compliant systems meeting the NTSB recommendations. In this regard, over 71,000 of the 80,000 customers within the program are served by NTSB-recommended regulator stations as of September 30, 2021.

Concurrently, UGI Gas also implemented a plan to add remote pressure monitoring capabilities to its low-pressure systems. These capabilities include real-time alarm notifications to allow expedited system pressure correction and adjustment. As of September 30, 2021, remote pressure monitoring was deployed extensively with nearly 95% of all customers served by low-pressure systems having remote pressure monitoring capabilities. 100% customer coverage is planned in FY2022 on UGI Gas's low-pressure systems.

V. LEAK REDUCTIONS AND EMERGENCY RESPONSE

Q. Please discuss UGI Gas's efforts to reduce system leaks.

A. UGI Gas monitors safety and reliability indicators for its natural gas distribution system over time to evaluate corrosion and leak resolution performance, track emergency response, and pursue damage prevention – all of which will drive improvements in employee and public safety. As a part of its DIMP,[5] UGI Gas regularly re-assesses system risks and leak trends to determine if additional or accelerated actions are required to further reduce system leaks.

Leak surveys are an important tool for discovering, monitoring, and remediating leaks. To enhance its leak identification capabilities, UGI Gas initiated a "Mobile Guard" pilot program in June 2021. Pursuant to the pilot, the Company is testing the use of mobile gas leak detection equipment. The leak detection equipment is attached to a Company vehicle and can detect, map, and quantify methane emissions while driving up to 55 miles per hour. The equipment is being used to discover leaks on mains and adjacent service lines. This technology is a more efficient method that may be used to identify methane and ethane emission sources over a greater number of miles than traditional survey methods.

Additionally, the main replacement and modernization work identified by UGI Gas will provide customers with significant improvements in safety and reliability (*e.g.*, reduced leaks). The Company's replacement plans have been identified and prioritized on a risk basis in accordance with UGI Gas's DIMP and TIMP plans.[6] Risk-based prioritization helps ensure that the projects that deliver the most significant risk reductions are addressed first. As the investment plan progresses, customer benefits will manifest over time in terms of reduced leakage rates, fewer main breaks, and fewer unplanned customer interruptions. Furthermore, UGI Gas expects that the amount of lost and unaccounted for gas due to system leakage and measurement inaccuracy will be reduced as leaks are eliminated and meters are replaced.

[5] 49 C.F.R. § 192.1007.

[6] 49 C.F.R. §§ 195.450 and 195.452.

Q. How does UGI Gas classify leaks?

A. UGI Gas uses a standardized leak classification system consistent with general industry protocols. Specifically, underground leaks are classified as 'A,' 'B,' and 'C.' Class 'C' leaks are deemed hazardous and repaired immediately. Class 'B' leaks may become hazardous if otherwise not repaired, and they are scheduled for repairs within twelve (12) months and not to exceed fifteen (15) months. Class 'A' leaks are deemed non-hazardous and are monitored for changes in severity.

Q. How have UGI Gas's system leaks improved since 2016?

A. UGI Gas has seen a significant reduction in the number of leaks found on its system. This is directly attributable to its prioritization and aggressive replacement of leak-prone mains, services, and other assets. As Table 1 below demonstrates, since 2016, C Leak repairs have decreased by 27.2%, B Leak inventories have decreased by 52.5%, and A Leak inventories have decreased by 21.3%.

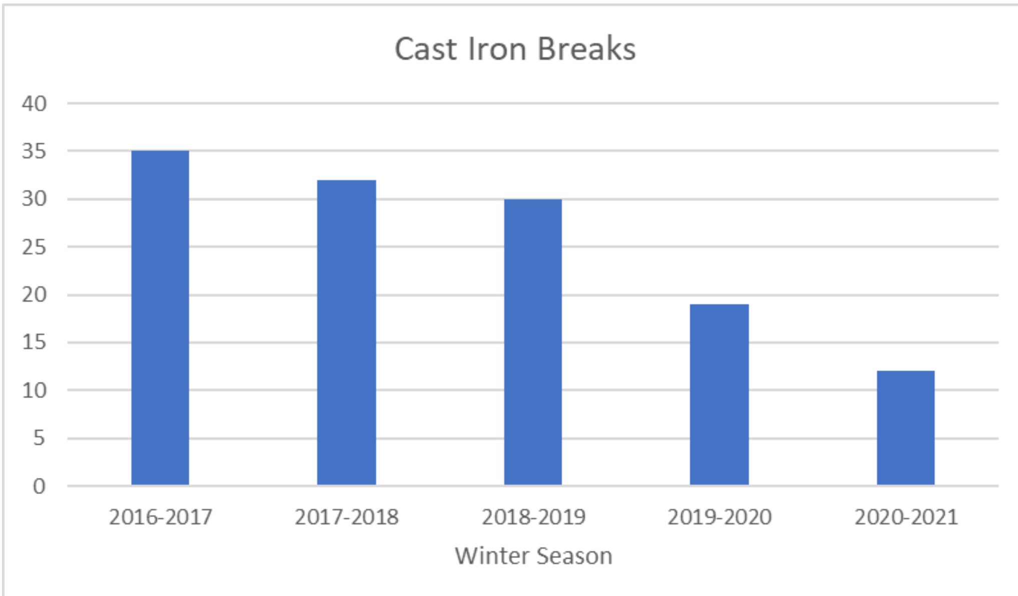
Table 1. Leak Inventories & Repairs

	Calendar Year 2016	**Calendar Year 2021**	**Percent Change**
C Leak Repairs	1,496	1,089	27.2% decrease
B Leak Inventory	556	264	52.5% decrease
A Leak Inventory	4,930	3,882	21.3% decrease

Figure 1 below shows the reduction in the number of cast iron breaks each winter season since the 2016-2017 season. There has been an overall sixty-six percent (66%)

reduction in break frequency since the 2016-2017 season. The reduction helps demonstrate effectiveness of cast iron replacement activities.

Figure 1. Cast Iron Main Breaks (2016-2021)



Q. How is UGI Gas's performance in the area of emergency response rate?

A. UGI Gas performs very well in the timely response to emergency notifications/calls. For the Fiscal Year ended September 30, 2021, 98.4% of the time, a first responder arrived on the premises within forty-five (45) minutes of receipt of an emergency call. UGI Gas utilizes a combination of shift coverage and on-call schedules to leverage internal field and supervisory resources to provide emergency response coverage 24-hours per day, 365 days per year. I also note that UGI Gas sets performance goals on a forty-five (45) minute response, which is more stringent than the acceptable odor response time as defined by the

Commission's Safety Division.[7] Moreover, for FY2021, 99.8% of the time a UGI Gas first responder arrived onsite within one hour of the emergency call. This compares favorably to the industry average.

VI. EMPLOYEE ADDITIONS

Q. Does the Company's budget include additional employees for operational purposes in this case?

A. Yes, the Company's budget reflects an increase of twenty-three (23) operations employees. Fifteen (15) of these positions will be added in 2022 and eight (8) will be added in 2023. In addition to these budgeted positions, the Company is preparing to add twenty (20) more employees in 2023 to address staffing needs analysis updates that were completed after the budget process.

Q. What is the driver for these additional staffing needs?

A. The Company faces two significant employee challenges: forecasted retirements and attrition of newer employees. These challenges require an aggressive and multifaceted approach so the Company can continue to accomplish fieldwork critical to safety and reliability, including meeting planned replacement goals pursuant to the Company's LTIIP.

---

[7] The Commission's Bureau of Audits issued a Management and Operations Audit Report of the Company in October 2019 (at Docket Nos. D-2018-3002234, D-2018-3002235 and D-2018-3002236), which stated:

> The PUC Gas Safety Division defines acceptable emergency dispatch and response times as 15 minutes and 60 minutes, respectively. However, UGI has established a more stringent 45-minute emergency response key performance indicator of 97.8%. (Audit Report, p. 41).

Q. Please identify the types of employees that are considered operational employees.

A. Operational employees encompass several roles including gas mechanics/field technicians, equipment operators, laborers, meter readers, and contractor inspectors, as well as clerical, supervisory, and leadership staff to support these roles. The majority of UGI's operational employees are union employees who directly perform, or inspect contractors who perform, operation, maintenance, construction, or replacement activities. Most operational employees also perform emergency response activities both during and after business hours. Typically, union employees are hired into apprentice programs as specified in the applicable collective bargaining agreement. Though UGI Gas provides formal and on the job training to new hires, it takes a number of years before these employees can progress to general gas mechanic functions, including emergency response, facility locating and markouts, and leak repair. Employees may then progress to more advanced functions, including contractor inspection or supervisory roles.

Q. Please describe the challenge stemming from forecasted retirements.

A. UGI Gas actively monitors and plans for the anticipated retirement of many experienced utility workers. Table 2 shows the anticipated number of operational employees that are or will be eligible for retirement over the five-year period from FY2022 through FY2026. Of the twenty-eight (28) employees listed for FY2022, twenty-one (21) employees reached retirement age prior to September 30, 2021, but have not retired as of the beginning of FY2022.

Table 2. UGI Gas Operations Employees Aged 65 or Older Per Year

	FY22	FY23	FY24	FY25	FY26
Retirement Count	28	10	12	17	24
Average Tenure (years)	38.0	33.4	36.8	28.9	28.6

On a collective basis, these employees represent decades of operational experience. The Company seeks to increase its total number of operational employees in order to provide an opportunity for both formal training and the on-the-job learning, which normally takes place over time and is necessary to ensure the continuity of the workforce. This is particularly critical for employees who can conduct quality and safety inspections. It takes five (5) years on the job for an employee to become fully qualified to perform gas operations tasks, including contractor inspection work, general tapping and stopping, plastic pipe fusing, regulator station maintenance and troubleshooting, emergency first response on call, and internal crew leadership.

Q. What additional needs are related to employee resource requirements in support of the Company's replacement activities?

A. UGI Gas relies on contractor resources to perform most of its replacement and betterment activity. This limits the overall staffing and equipment UGI Gas is required to maintain, while providing cost effective resource scalability and geographical flexibility not easily achieved with internal resources. UGI Gas utilizes internal resources to coordinate and inspect contractor work performance to ensure quality construction, confirm procedural compliance, and validate contractor payments. These experienced employees are critical to UGI Gas's continued ability to complete projects in a safe, reliable, and fiscally responsible manner. Expanding the number of employees who can conduct capital-related activities will ensure that as the Company's capital activities accelerate, UGI Gas will be able to safely complete its additional infrastructure replacement projects on time in order to achieve its goals of removing all cast iron main from its system by 2027 and all bare steel and wrought iron main by 2041.

Q. What are the challenges posed by the attrition of newer employees?

A. UGI Gas has seen significant turnover of apprentice level employees who remain at the Company for less than five (5) years. Over the last five (5) years, UGI Gas has seen the voluntary departure of one hundred (100) employees with five (5) years of experience or less with the Company. During that same time period, only twenty-seven (27) employees with more than five (5) years of experience (excluding retirements) voluntarily left the Company. While the Company has consistently replaced these apprentice level employees, the ongoing loss of apprentice level employees has created a growing gap of experience between the number of apprentice employees and those that have five (5) or more years of experience.

As I previously described, the loss of experienced employees becomes an impediment when UGI Gas cannot transition enough employees from the apprentice level to the point where they can conduct more complex and technically challenging work. The first step to overcome this attrition is to bring in a greater number of new hires. This is particularly true in light of current market conditions, where UGI Gas also faces competition from many other entities located within its service territory. As a result, UGI Gas must be more aggressive in bringing in more candidates, in order to keep its workforce fully staffed in support of replacement activities in particular.

Q. Is the Company taking any other steps to address the attrition of apprentice level employees?

A. UGI Gas is taking a two-step approach: First, it is seeking to increase the number of apprentice level employees that come in the door. Even if the extremely competitive construction market continues into the future, the Company will continue to work to retain enough employees to ensure a sufficient number of experienced employees capable of undertaking complex projects. However, the Company invests a significant amount of time and resources when hiring, onboarding, and training new employees. Losing relatively new employees puts a strain on many Company resources and results in increased costs. Therefore, a second step is needed to retain more employees. As described in the testimony of Mr. Brown (UGI Gas Statement No. 1), UGI Gas plans to reduce the overall attrition by using a more comprehensive market-based approach to establishing wages and salaries. This will give recent hires an incentive to stay with the Company and move to more senior or supervisory positions. The Company believes these steps can address the combined threat posed by the high rates of both retirement and attrition, while continuing its accelerated capital replacement work.

VII. SAFETY INITIATIVES

Q. What programs does UGI Gas have in place regarding employee, customer, and system safety?

A. Safety performance is a core value to UGI Gas. The Company's success depends on its employees' commitment and dedication to safety. Therefore, UGI Gas maintains a culture that drives employees to perform their day to day responsibilities with a high degree of safety. Moreover, UGI Gas is advancing several initiatives to further develop its safety culture and drive sustainable improvements in safety performance. One such program is the UGI "Making a Difference by Living Our Values" Incentive Program. It rewards employees who demonstrate positive safety behaviors, including but not limited to, leading safety meetings, reporting safety issues, or participating in safety education. Employees can nominate individuals who demonstrate/exhibit safety values, impact/promote safe workplace practices, or significantly impact or improve safety in the Company's operations. Winners are recognized by receiving points, which are redeemable for merchandise, gift cards, etc.

Additionally, the Company is building a new Safety and Health Management System ("SHMS"), which will assist the Company in recognizing and fixing workplace hazards before they cause injury or illness. The program focuses on: Management Leadership, Worker Participation, Hazard Identification & Assessment, Hazard Prevention & Control, Education & Training, and Program Evaluation & Improvement.

Finally, UGI Gas's SHMS incorporates the American Petroleum Institute ("API") Recommended Practice 1173 ("API RP 1173"), which establishes a pipeline safety management systems ("PSMS") framework for corporations that operate hazardous liquids and gas pipelines under the U.S. Department of Transportation's jurisdiction. It provides a framework to reveal and manage risk, promotes a learning environment, and continuously improves pipeline safety and integrity. This continuous improvement effort and framework reduces hazards and prevents incidents.

Q. What other ongoing safety programs does the Company have?

A. Other ongoing safety measures and tools include Smith System driver training; the twenty-four- (24-) hour Triage Nurse Hotline; a fleet management tool that generates a driver safety score utilizing GPS technology; and selective driver monitoring technology. The Company has also adopted multiple programs to enhance its safety protocols. Programs include the "Near Miss/Good Catch" program, which seeks to proactively prevent safety incidents by learning from issues that had the potential for, but did not result in, damage or harm. In addition, the Company uses EcoOnline safety incident software, which facilitates incident management and data collection for various types of incidents and also tracks those incidents through the investigation process. The Company also utilizes ISNetworld vendor safety software to qualify contractors and monitor their performance trends. ISNetworld collects safety information from these contractors and compares them against UGI Gas's established safety standards to make sure they are qualified to perform work for the Company. ISNetworld conducts ongoing monitoring of the contractor's safety information and alerts UGI Gas if a contractor falls below the Company's minimum safety standards – either in UGI Gas's service territory or anywhere else in the country. This helps ensure that UGI Gas's contractors provide safe and reliable service to the Company's community and customers.

Q. What training initiatives is the Company undertaking?

A. The Company recently opened its centralized training facility (the "Training Center"). The Training Center is being used for all new hire and employee progression field training. Initial training for employees acquiring new skills and operator qualifications occur at the

Training Center. It is also being used for ongoing training and operator re-qualification for employees and contractors.

The Company's technical training team has nearly completed aligning UGI Gas's operator qualification program with the American Society of Mechanical Engineers ("ASME") B31Q Standard. Conversion to this standard is expected to be completed in FY2022 and will result in training improvements, including Gas Technical Institute training modules that will be customized to meet UGI Gas's processes and procedures. This work was started in FY2021 and is expected to take several years to complete.

VIII. ENVIRONMENTAL

A. ENVIRONMENTAL REMEDIATION PROGRAM

Q. Please discuss environmental management at UGI Gas.

A. The environmental group at UGI Gas is focused on three (3) main activities: (1) the investigation and remediation of environmental impacts related to historical operations; (2) environmental compliance activities, such as permitting and operational improvements; and (3) sustainability and methane reduction activities.

Q. Please describe the Company's investigation and remediation of environmental impacts related to historical operations.

A. From the late 1800s through the mid-1900s, UGI Gas and its predecessors owned and operated a number of manufactured gas plants ("MGPs") that, prior to the general availability of natural gas, generated gas from other fuel stocks for residential, commercial, and industrial customer use. In Pennsylvania, this process generally used coal as a fuel stock. Some byproducts of this manufacturing process, including coal tars and other residues of the manufactured gas process, are today considered hazardous substances under state and federal environmental laws.

Historically, UGI Gas operated its environmental remediation programs under three (3) consent orders and agreements ("COA") with the Pennsylvania Department of Environmental Protection ("PADEP"). UGI Gas's former utility companies, UGI Penn Natural Gas, Inc. ("UGI PNG") and UGI Central Penn Gas, Inc. ("UGI CPG"), were each parties to separate COAs with PADEP, and a UGI Gas COA was executed in 2016. Following UGI CPG and UGI PNG's merger into UGI Gas, on October 1, 2020, the UGI COA was amended to incorporate the UGI CPG and UGI PNG COAs into a single UGI Gas COA that will terminate on October 1, 2031. This COA obligates the Company to either meet an annual minimum environmental spend commitment or complete a sufficient number of environmental activities to achieve a minimum annual point total. The minimum annual spend for the UGI Gas COA is $5.35 million.

Q. What types of costs does UGI Gas incur with respect to addressing MGP site conditions?

A. UGI Gas incurs costs attributed to site investigations, remediation, and site restoration as well as related PADEP oversight costs. Costs may also be incurred to obtain an environmental covenant at the site to prevent certain uses of the site, and costs associated with transferring the site to a third party (such as with a dedication for public use) once the site has been restored. Costs may also be incurred to purchase a property to secure access to investigate and remediate. Additionally, expert and legal costs are sometimes incurred in interactions with insurance carriers or other potentially responsible parties to ensure that UGI Gas's customers are only paying their equitable share of investigation and remediation costs. Costs may be incurred to implement PADEP workplans if the Company faces opposition to the investigation or remediation of the site. Costs may also be incurred to recover compensation under historical insurance policies to offset the costs that would otherwise be recovered from customers.

Q. What is UGI Gas's projected spending on the MGP program?

A. UGI Gas holds the COA annual minimum spend of $5.35 million as the target projected spend for each year to meet the COA objectives, if minimum annual points cannot be achieved. UGI Gas's average aggregate annual spending over the past three fiscal years is $5.171 million, as shown below in Table 3.

Table 3. Environmental Spent per Fiscal Year

Fiscal Year	**Total**
2019	$4,810,983
2020	$4,243,130
2021	$6,459,545
Total	$15,513,658
Average	$5,171,219

The average amount is used in the calculation of the environmental adjustment shown in UGI Gas Exhibit A, Schedule D-8, as discussed in the direct testimony of Ms. Tracy A. Hazenstab (UGI Gas Statement. No. 2).

Q. Why does environmental spend vary from the minimum environmental spend set by the COA?

A. While the Company uses the environmental minimum spend as a benchmark for budgeting, actual costs may exceed the minimum in certain years due to PADEP requirements, changing environmental standards, and site-specific issues such as sensitive habitat and concentration of contaminants. The 2020 spend was also influenced by the Pandemic, which constrained field activities for a considerable portion of the year. To catch-up for the 2020 target spend differential, additional funds beyond the target of $5.35 million were spent in 2021. In years when the Company is unable to make its minimum spend commitments, it can avail itself of an alternative compliance pathway under each COA that permits the Company to use banked points for remedial work completed in past years.

Q. What is UGI Gas's goal for restoration of the MGP sites?

A. UGI Gas strives to restore each site for beneficial reuse that becomes an asset to the Company or the community. Because these MGP sites are located within the Company's existing service territory, restoration of the sites for beneficial reuse, whether in the form of urban redevelopment or the creation of a new public space, directly benefits UGI Gas's customers.

B. EMISSIONS REDUCTIONS PROGRAMS

Q. How does UGI Gas quantify the environmental impact of its operations?

A. In addition to the ESG program areas discussed in Mr. Brown's testimony (*e.g.*, oil to gas conversion, EE&C, etc.) (UGI Gas Statement No. 1) that reduce emissions, UGI Gas has been a partner in the United States Environmental Protection Agency's ("EPA") voluntary

Natural Gas STAR program since its inception. Natural Gas STAR provides a framework to encourage partner companies to implement methane emissions reducing technologies and practices and document their voluntary emission reduction activities. On March 30, 2016, UGI Gas joined with thirty-two (32) other natural gas utilities to launch the EPA's Natural Gas STAR Methane Challenge Program. As a founding member of the STAR Methane Challenge, UGI Gas has committed to making and tracking emissions reductions. Participation in this voluntary program includes a commitment to replace infrastructure to achieve a reduction in fugitive methane emissions. UGI Gas reduced fugitive methane emissions by 5.6% in 2019-2020 (at the time of this filing, the EPA Methane Challenge STAR Program report for 2020-2021 has not yet been published).

UGI Gas continues to add Compressed Natural Gas ("CNG") vehicles to its fleet. Currently, the fleet is made up of twelve percent (12%) CNG-powered vehicles, with plans to increase the number to twenty percent (20%) by the end of 2023. Three (3) of the Company's operations locations have CNG filling stations (Archbald, Wilkes-Barre, and Bethlehem) with plans to add another station near its Middletown office. Utilizing nearby commercial CNG fueling stations makes it feasible to convert fleets to CNG in smaller operations centers.

Q. Does that conclude your testimony?

A. Yes, it does.

UGI GAS

EXHIBIT TJA-1

TIMOTHY J. ANGSTADT

UGI UTILITIES, INC.
VICE PRESIDENT – OPERATIONS

Summary

Engineering and Operations executive with over 22 years of broad experience in natural gas transmission and distribution activities, including operations and maintenance, engineering, regulatory compliance, capital budgeting and construction, project management, technology implementation, and business process transformation. As Vice President – Operations:

- Leads a team of over 850 individuals including management, engineering, clerical, and field technicians to operate and maintain over 12,000 miles of natural gas transmission and distribution pipelines and related assets, serving over 672,000 customers in Pennsylvania and Maryland.
- Champion/executive sponsor of UGI's Safety Culture Initiative; member of executive steering team responsible for the ongoing improvement of safety culture, performance, and leadership throughout the company.

Prior Positions with UGI Utilities, Inc.

Vice President – Operations (Denver, Pa.)	February 2019 - Present
Program Director – UNITE (UGI's Next Info. Technology Enterprise) (Reading, Pa.)	February 2016 – February 2019
Director – Operations, South Region (Reading, Pa.)	June 2012 – February 2016
Operations Manager – West Region (Harrisburg/Middletown, Pa.)	July 2008 – June 2012
Manager – Operational Support (Reading, Pa.)	December 2007 – July 2008
Manager – UGI/Penn Natural Gas Integration (Wilkes-Barre/Reading, Pa.)	November 2006 – December 2007
Engineer – Customer Service and Performance Systems (Reading, Pa.)	June 2005 – November 2006
Operations/Construction and Maintenance Superintendent (Reading, Pa.)	September 2003 – June 2005
Engineer II – Gas Utility Headquarters (Reading, Pa.)	January 2003 – September 2003
Engineer I/II – Reading Area (Reading, Pa.)	January 2000-January 2003
Engineering Assistant – Reading Area (Reading, Pa.)	June 1999 – August 1999

Education

MiF, The Pennsylvania State University, Malvern, Pa.
MBA, The Pennsylvania State University, Malvern, Pa.
BS, Mechanical Engineering, The Pennsylvania State University, State College, Pa.

Prior testimony provided to the Pennsylvania Public Utility Commission:

Docket No. R-2019-3015162 UGI Utilities, Inc. Gas Division - Base Rate Case Proceeding

UGI GAS STATEMENT NO. 10

CONSTANCE E. HEPPENSTALL

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2021-3030218

UGI Utilities, Inc. – Gas Division

Statement No. 10

Direct Testimony of
Constance E. Heppenstall

Topics Addressed: **Cost of Service Allocation**

Date: January 28, 2022

I. INTRODUCTION

Q. Please state your name and business address.

A. My name is Constance E. Heppenstall. My business address is 1010 Adams Avenue, Audubon, Pennsylvania.

Q. By whom are you employed?

A. I am employed by Gannett Fleming Valuation and Rate Consultants, LLC.

Q. Please describe your position with Gannett Fleming Valuation and Rate Consultants, LLC., and briefly state your general duties and responsibilities.

A. My title is Senior Project Manager, Rate Studies. My duties and responsibilities include the preparation of accounting and financial data for revenue requirement and cash working capital claims, the allocation of cost of service to customer classifications, and the design of customer rates in support of public utility rate filings.

Q. Have you presented testimony in rate proceedings before a regulatory agency?

A. Yes. I have testified before the Pennsylvania Public Utility Commission ("PA PUC" or the "Commission"), the Arizona Corporation Commission, the Kentucky Public Service Commission, the Virginia State Corporation Commission, the Missouri Public Service Commission, the Hawaii Public Utilities Commission, the West Virginia Public Service Commission, the Indiana Utility Regulatory Commission, the California Public Utilities Commission, the Public Utilities Commission of Ohio, and the New Jersey Board of Public Utilities concerning revenue requirements, cost of service allocation, and rate design. A list of cases in which I have testified is attached to my testimony.

Q. What involvement have you had in preparing past cost of service studies for UGI Gas?

A. Since 2006, I have assisted with the preparation of all of UGI Gas's allocated cost of service studies, except for the one utilized in the Company's 2020 Gas Base Rate Case at Docket No. R-2019-3015162.

Q. What is your educational background?

A. I have a Bachelor of Arts in Economics from the University of Virginia, Charlottesville, Virginia and a Master of Science in Industrial Administration from the Tepper School of Business at Carnegie Mellon University, Pittsburgh, Pennsylvania.

Q. Would you please describe your professional affiliations?

A. I am a member of the American Water Works Association, the National Association of Water Companies, and the Pennsylvania Municipal Authorities Association.

Q. Briefly describe your work experience.

A. I joined the Valuation and Rate Division of Gannett Fleming, Inc. in August 2006, as a Rate Analyst and was promoted to my current position in 2012. Prior to my employment at Gannett Fleming, Inc., I was a Vice President of PriMuni, LLP where I developed financial analyses to test proprietary software in order to ensure its pricing accuracy in accordance with securities industry's conventions. From 1987 to 2001, I was employed by Commonwealth Securities and Investments, Inc. as a public finance professional where I created and implemented financial models for public finance clients in order to create debt structures to meet clients' needs. From 1986 to 1987, I was a public finance associate with Mellon Capital Markets.

Q. What is the purpose of your testimony?

A. I am providing testimony on behalf of UGI Utilities, Inc. – Gas Division ("UGI Gas" or the "Company"). I will explain the cost of service allocation study, which is included with the filing as UGI Gas Exhibit D.

II. COST OF SERVICE ALLOCATION STUDY

Q. What is the purpose of the cost of service allocation study?

A. The purpose of the study is to allocate the total cost of service to the appropriate service classifications.

Q. What method of cost allocation was used in the studies?

A. I used the Average and Extra Demand Method (Average/Excess), which is described in UGI Gas Exhibit D and in the text, "Gas Rate Fundamentals," published by the American Gas Association's Rate Committee.

Q. Please describe UGI Gas Exhibit D.

A. UGI Gas Exhibit D titled, "Cost of Service Allocation Study as of September 30, 2023," is the cost of service allocation study prepared for UGI Gas in support of its claims in this proceeding. It sets forth the results of the study based on the projected costs and conditions for the fully projected future test year for the 12 months ending September

30, 2023 ("FPFTY"). The data in the exhibit include a description of the methods and procedures used in the study, the allocations of cost of service and measure of value, the factors on which the allocations were based, and an analysis of customer costs.

Q. Please outline the procedure that you followed in the first cost allocation study.

A. The detailed allocation of costs to cost functions and service classifications is presented in Schedule E of UGI Gas Exhibit D. Gas costs are excluded from the amounts in Schedule E in order to develop costs by function and classification related to the delivery of gas.

In the detailed allocation, the items of cost, which include operating expenses, depreciation expense, taxes, and income available for return, are identified in column 1 of Schedule E. The cost of each item, shown in column 3, is allocated to the appropriate service classifications: Residential (R and RT), Non-Residential (N and NT), Delivery Service (DS), Large Firm Delivery Service (LFD), Extended Large Firm Delivery Service (XD-Firm), and Interruptible Service (IS).

The allocation factor codes entered in column 2 enable one to determine the specific basis for the allocation of each item. The factor codes refer to the information presented in Schedule F of the exhibit.

Q. Please explain the allocation of some of the large cost items in the study.

A. Referring to some of the larger delivery cost items, the costs associated with natural gas production expenses were allocated based on purchased gas cost volumes for Rate R and Rate N customers, as shown in the development of Factor 1.

The costs related to distribution mains were first directly assigned to Rate XD-Firm and XD-I (a portion of IS-interruptible) customers based on an analysis of the mains and the proportion thereof serving each individual Rate XD customer. The methods and procedures used to determine the portion of mains directly assigned to Rate XD customers were provided by Company personnel. The remaining cost of mains was separated into small mains (2-inch and smaller) and large mains (over 2-inch). The allocation of costs related to these mains is based on Factor 4, which weights the factors related to average daily throughput volumes and from maximum day extra capacity demand.

Customers under Rate XD-Firm and XD-I were excluded from the allocation of small and large distribution mains since Rate XD customers were directly assigned the cost of mains serving them, as explained above. Interruptible volumes were removed from the extra capacity calculations as these volumes can be curtailed during periods of peak demand. In addition, certain Interruptible volumes that are 100% interruptible were excluded from Factor 4.

Q. How did you weight the average and excess portions for Allocation Factor 4?

A. The weighting of the factors was based on the system-wide load factor for firm service. This results in 39.9% allocated based on average daily usage and 60.1% on excess above average day usage. See Factor 3 for the calculation of the firm service load factor.

Q. Please discuss the allocation of costs related to Load Dispatching, Measuring and Regulation ("M&R") Station Equipment, and operational costs related to large mains.

A. The costs related to Load Dispatching and M&R Station Equipment are allocated based on Factor 4A. This factor is similar to the allocation in Factor 4, but it includes average daily throughput volumes related to XD Firm customers as these customers benefit from this equipment. Operational costs related to large mains are allocated based the allocation of rate base for large and directly assigned mains, Factor 17.

Q. Please explain the allocation of meters and service line costs.

A. Costs related to service lines in Account 380 were allocated to classes, based on an analysis of service line investment by size and Rate Class as presented in the response to Standard Data Request SDR-COS-6, as developed in Factor 6C. Costs related to meters in Accounts 381, 382, and 385 were allocated to the classes based on an analysis of meter investment by size and Rate Class as presented in response to Standard Data Request SDR-COS-7, as developed in Factor 6. The costs related to House Regulators are allocated to Rate R and N classes based the weighted number of regulators, or Factor 6A. Finally, the costs associated with Industrial Measuring and Regulating Equipment are allocated based on the costs of meters and measuring and regulating equipment for the Rate DS, LFD, XD-Firm, and Interruptible classes.

Q. Please explain the allocation of Distribution Operation and Maintenance Other Expenses.

A. These expenses were allocated based on Factors 10 and 11. These factors are based on costs previously allocated as described above.

Q. Please explain the allocation of uncollectible accounts and customer assistance expenses.

A**.** Uncollectible accounts associated with the gas cost portion are allocated consistent with the recovery of such costs through the Merchant Function Charge (Rider D) for Rates R and N. The remaining uncollectible account cost is recovered based on an analysis of write-offs, as shown in the development of Factor 19. Costs associated with customer assistance programs are allocated directly to the residential class.

Q. Please describe the allocation of customer accounting, customer service, sales costs, and the remaining cost of service elements.

A. Customer accounting and certain customer service costs were allocated to service classifications on the basis of the number of customers, using Factor 7. Costs related to customer assistance programs were directly allocated to the Rate R class. The Energy Efficiency and Conservation program costs were allocated based on the revenue from the EEC Rider. Sales expenses, except for costs related to Service Representatives, were allocated to the Rate R and N classes based on number of customers, Factor 8. The costs related to Service Representatives, who serve the larger customers, were allocated to the large customer classes of DS, LFG, XD-Firm, and Interruptible based on number of customers in these classes, Factor 7A. Administrative and general costs were allocated on the basis of the allocated direct operation and maintenance costs, excluding gas production expenses, using Factor 12. Labor related pension and benefits are allocated based on an operation and maintenance direct labor expense, as shown in Factor 13.

Annual depreciation accruals were allocated on the basis of the function of the facilities represented by the depreciation expense for each depreciable plant account. Similarly, certain taxes other than income taxes, income taxes, and income available for return were allocated on the basis of allocated rate base, including the original cost less accrued depreciation of utility plant in service and other rate base elements.

Q. **What are the results of the cost of service allocation study?**

A. The results of the cost of service allocation set forth in Schedule E are brought forward and summarized in Schedule D. The total cost of service by classification in Schedule D is then brought forward to Schedule A (without gas costs), columns 2 and 3, where these results are compared to the *pro forma* revenues under present rates (columns 4 and 5) and proposed rates (columns 6 and 7). The proposed change in revenue under proposed rates and the percent change are shown in columns 8 and 9 of Schedule A. Please refer to the direct testimony of Company witness Sherry A. Epler (UGI Gas Statement No. 8) for an explanation of the proposed rate design and revenue distribution.

Q. Did you prepare a schedule showing the rate of return by classification?

A. Yes. Schedule B sets forth the rate of return by classification under present rates, and Schedule C shows the rate of return by classification under proposed rates.

Q. Did you prepare an analysis of customer costs?

A. Yes. I prepared a fully allocated customer cost analysis and a direct customer cost analysis. Both analyses of customer costs are presented in Schedule G of UGI Gas Exhibit D.

Q. Please explain the analysis of customer costs as set forth in UGI Gas Exhibit D.

A. In UGI Gas Exhibit D, all costs are first allocated to either volumetric costs or customer costs, as shown in Schedule E. The customer costs are allocated to the classes based on an analysis of meter and service line costs and the number of customers. The customer costs were further allocated to the R, N, DS, LFD, XD, and Interruptible Service classifications in the same schedule. The factors that were the bases for the allocation to cost functions and the allocation of customer costs to classifications are presented in Schedule F. A summary of the customer costs and the development of the costs per customer per month are presented in Schedule G.

Q. Did you prepare an analysis of costs related to the demand charge for Rate LFD and Rate XD-Firm Service?

A. Yes. The analysis of costs related to the demand charges for Rate LFD and Rate XD-Firm Service is presented in Schedule H of UGI Gas Exhibit D.

Q. Please explain the analysis of the Rate LFD and Rate XD-Firm Service costs related to demand charges as set forth in UGI Gas Exhibit D.

A. The costs related to Rate LFD and Rate XD-Firm Service demand charges were determined by the allocation of certain fixed costs, depreciation, taxes and return to these classifications. The allocation was performed in Schedule E. A summary of the allocated costs and the development of the unit demand costs are presented in Schedule H.

Q. Does that conclude your direct testimony?

A. Yes, it does.

UGI GAS STATEMENT NO. 11

JOHN D. TAYLOR

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Docket No. R-2021-3030218

UGI Utilities, Inc. – Gas Division

Statement No. 11

Direct Testimony

of

John D. Taylor, Managing Partner
Atrium Economics, LLC

Topics Addressed: **Weather Normalization Rider**

Dated: January 28, 2022

TABLE OF CONTENTS

Direct Testimony of John D. Taylor

I. INTRODUCTION

Q. Please state your name, affiliation, and business address.

A. My name is John D. Taylor, and I am employed by Atrium Economics, LLC ("Atrium Economics" or "Atrium") as a Managing Partner. My business address is 10 Hospital Center Commons, Suite 400, Hilton Head Island, SC 29926.

Q. On whose behalf are you testifying?

A. I am testifying on behalf of UGI Utilities, Inc. – Gas Division ("UGI Gas" or the "Company").

Q. Please describe your professional background and education.

A. As a utility pricing and policy expert, I support a variety of energy and utility related projects regarding matters pertaining to economics, finance, and public policy. In the public utility space, I have assisted with asset divestitures, allocated class cost of service studies, rate of return calculations, cash working capital impacts, tax litigation, revenue allocation, rate design, auction analysis, and affiliate cost allocation. I have reviewed and analyzed these subject matters considering the accounting treatment for, the financial investment in, and the operational configuration of a company's assets. For utility rate cases, I have performed: allocated class cost of service studies; revenue allocation; rate design; valuation modeling; affiliate cost allocation; and various cost of service analyses. Also, I have filed testimony on class cost of service studies, return on equity, and statistical audit sampling. Specifically, I have presented expert testimony in Indiana, Maine, Massachusetts, Minnesota, New Hampshire, North Carolina, Illinois, Delaware, Pennsylvania, Washington, West Virginia, British Columbia, and the Federal Energy Regulatory Commission ("FERC"). Regarding my educational background and professional background, I studied electrical and mechanical engineering and worked for an industrial inspection company, which provided hands-on experience with electric utility assets and equipment. I received an undergraduate degree in Environmental Economics, with an emphasis in econometrics and regulatory policy. I also earned a Masters in Economics from American University in Washington, DC. A copy of my resume is provided as UGI Gas Exhibit JDT-1.

Q. Mr. Taylor, have you previously testified before the Pennsylvania Public Utility Commission ("Commission") or any other regulatory authority?

A. Yes. I have presented expert testimony before FERC and numerous state and provincial regulatory commissions, including the Commission.

Q. What is your assignment in this proceeding?

A. UGI Gas requested that Atrium Economics assist with the development of a Weather Normalization Adjustment ("WNA") mechanism that could be applied to the monthly billings of certain UGI Gas's Residential (Rates R and RT) and Non-Residential (Rates N and NT) customer classes. UGI Gas's proposed WNA Rider is presented in UGI Gas Exhibit F – Proposed Tariff, Rider K "WNA", Weather Normalization Adjustment Rider.

Q. Please summarize the content of your testimony.

A. I will present the Company's proposed WNA mechanism, which is designed to stabilize distribution revenues for certain heating sensitive rate classes from experienced weather variability. My testimony consists of (a) support and rationale for a WNA mechanism, (b) a summary of UGI Gas's proposed WNA, (c) detailed components of UGI Gas's proposed WNA, and (d) a summary of weather normalization adjustments used in Pennsylvania and across the U.S.

II. <u>LIST OF EXHIBITS SPONSORED IN TESTIMONY</u>

Q. What Exhibits are you sponsoring in this proceeding?

A. I am sponsoring the following Exhibits:

- UGI Gas Exhibit JDT – 1, Resume;
- UGI Gas Exhibit JDT – 2, Survey of WNA Mechanisms; and
- UGI Gas Exhibit Exhibit F – Proposed Tariff, Rider K "WNA", Weather Normalization Adjustment Rider.

III. <u>SUPPORT & RATIONALE FOR A WNA MECHANISM</u>

Q. How are weather-normalized gas volumes used to derive a gas utility's base rates?

A. Typically, as part of the rate design in a base rate proceeding, a utility's volumetric unit rates for gas service are derived by dividing the appropriate costs, to be recovered through volumetric based rates, by the anticipated weather-normalized gas sales volumes. These rates are designed to provide the utility with an opportunity to recover the costs it incurs to provide utility service, at the levels determined in the utility's rate case under normal weather conditions. To the extent any costs are subject to recovery in a volumetric charge, the recovery of such amounts is entirely dependent upon the volumes of gas usage experienced by the utility. Therefore, the recovery of costs in a volumetric component of rates will always lead to a difference in recovery of actual costs because actual weather conditions will by and large never match the normalized weather conditions used to set rates.

Q. Please explain how weather influences the recovery of costs for a gas utility and costs to customers.

A. As a result of the volumetric rates described above, if actual temperatures are normal (as described in Section V below), the utility has a reasonable opportunity to fully recover its fixed costs of service at established sales levels, and the customers' payment for service reflects the costs of the utility. Unfortunately, normal temperatures seldom, if ever, occur. Therefore, because of abnormal weather and a rate design that is based, in substantial part, on customer usage, the amount of distribution revenue (i.e., non-gas sales revenues and non-reconcilable surcharge revenues) collected from customers can vary widely from the revenue requirement level authorized by the regulator. In the case of warmer weather, the utility may under recover its costs and need to pursue cost management efforts that help stabilize and support the overall financial health and performance of the company. In the case of colder weather, customers experience higher bill cost burdens which may negatively impact customer abilities to manage utility costs.

Q. What portion of UGI Gas's fixed costs is recovered through its current volumetric distribution charges?

A. As shown on UGI Gas Exhibit E – Proof of Revenue, at proposed rates, approximately 64% of distribution revenues for Rates R and RT is recovered through the volumetric distribution charge. For UGI Gas's small commercial customers receiving service under Rates N and NT, approximately 83% of distribution revenue is recovered through the volumetric distribution charge.

Q. Please explain how fluctuations in weather over time impact a gas utility's temperature-sensitive customers and the utility's financial performance.

A. Since the bills of gas customers are largely based on the level of gas usage, temperature-sensitive customers' monthly bills can vary widely due to changing weather conditions. Under traditional ratemaking methods, if actual temperatures were colder than normal, the typical gas customer would use more gas, pay more for service (through volumetric charges), and potentially overpay its share of fixed costs. This occurs because the unit rates used to recover fixed costs are not reduced to recognize the higher gas volumes used by customers during colder weather. Since the gas utility's level of fixed costs does not change, the higher gas volumes applied against the same unit rate would generate comparatively higher distribution revenues than the level of fixed costs established for ratemaking purposes. Conversely, in warmer than normal weather, the reverse situation would occur. Customers' gas usage decreases with warmer temperatures, thus generating comparatively lower distribution revenues than required to recover the gas utility's total fixed costs that do not decrease due to warm weather.

IV. PROPOSED WNA MECHANISM

Q. Please define and describe the concept of a WNA mechanism.

A. The utility's distribution rates, which are set to allow the utility to recover its authorized level of distribution revenues, are based on expected throughput during normal weather. When actual weather deviates from normal weather, there will be a difference between actual and projected distribution revenues. A WNA mechanism adjusts a customer's bill due to these variations from normal weather (i.e., temperature variations or heating degree day variations) in order to have the bill reflect normal weather conditions. For billing periods that are colder than normal, a credit will be applied to the bill. For billing periods that are warmer than normal, a surcharge is applied to the bill. WNA mechanisms are typically effective for usage during the heating season calendar months (e.g., October through May). WNAs reduce the amount of variation in both customer bills and utility revenues by making a compensating adjustment for the difference between actual weather and normal weather.

Q. Are WNA mechanisms different from Revenue Decoupling?

A. Revenue Decoupling is a regulatory mechanism that separates a utility's distribution revenues from its level of sales, thereby "breaking the link" so that the utility may recover an established amount of revenues (regardless of weather, customer conservation, etc.), even as sales fluctuate. WNA mechanisms only account for the changes in sales that occur due to the difference between actual weather and normal weather. In the case of the Company's specific proposal, the WNA will only address weather related impacts and will only do so for certain of the Company's customer classes; thus, while providing a level of revenue stability related to weather changes, it does not completely decouple revenues from all sales related variances as full revenue decoupling would provide.

Q. Do WNA mechanisms differ in their design?

A. Yes. Gas utilities typically use two types of WNA mechanisms: (1) a mechanism that adjusts current billings on a monthly billing basis as the bill is being calculated and issued; and (2) a mechanism that adjusts billings on a lagged basis where the adjustment appears on the customer's bill(s) from a few to several months after a variation from normal weather is experienced.

Q. Which type of WNA mechanism is the Company proposing to implement?

A. The Company proposes to implement a WNA mechanism that adjusts billings on a monthly billing basis as the bill is being calculated and issued.

Q. Why has the Company chosen to adopt a WNA mechanism of this type?

UGI Gas has chosen this type of WNA mechanism because, by adjusting current billings on a monthly billing basis, the customer can more readily link the resulting billing adjustment with the weather causing the adjustment. In a cold winter with high gas bills, customers will receive the benefits of WNA bill reductions more quickly. The monthly bills will reflect the specific period in which the colder weather occurs. In addition, the utility's financial statements will reflect the cash flow effect of the monthly billing WNA mechanism sooner than a lagged WNA mechanism.

Q. Please describe the Company's proposed WNA.

A. The key elements of the Company's proposed WNA mechanism are as follows:

- It applies to UGI Gas's Residential customers receiving service under Rates R and RT and UGI Gas's Non-Residential customers served under Rates N and NT.
- It adjusts billings on a current monthly basis and uses adjustment factors which are representative of each customer's consumption characteristics.
- It is effective for the billing months of October through May.
- It adjusts the amount billed to each customer to offset the impact of actual heating degree days ("AHDD") variations from normal heating degree days ("NHDD").

Q. What are the benefits of the weather normalization adjustment mechanism for UGI Gas and its customers?

A. For an applicable customer, a WNA is advantageous because:

1. It reduces bill variability due to weather in the month when the variation occurs and provides bill relief in severely cold months.
2. The WNA will improve customer satisfaction by providing more stable annual bill amounts and mitigating volatility in monthly gas bills. This will help customers budget for and pay their bills.
3. Customers will continue to benefit from their energy conservation efforts, as the actual usage on each customer's bill is utilized to calculate the WNA adjustment, and that usage level will reflect the conservation behaviors of each customer.

For UGI Gas, a WNA is a fair and equitable rate mechanism because:

1. UGI Gas's volumetric delivery service rates are based on the volumes of gas it expects to sell under normal weather conditions. The WNA mechanism will improve the ability to match the level of distribution revenues, established to recover fixed costs, with the amount reflected in the monthly customer billings.
2. Deviations from normal weather can result in differences in actual and projected recovery of the Company's annual non-gas distribution costs when actual weather experienced is colder or warmer than normal, respectively. Therefore, such deviations can produce erratic financial results for the Company.

Q. Is UGI Gas's proposed WNA similar to other WNA mechanisms in place for gas distribution utilities in Pennsylvania?

A. Yes. UGI Gas's proposed WNA shares similarities with both Columbia Gas of Pennsylvania's ("Columbia") WNA rider,[1] and Philadelphia Gas Works' ("PGW") WNA clause.[2] The WNA applies to Residential heating customers for all three utilities, and Non-Residential heating customers for UGI Gas and PGW. The specific calculation of UGI Gas's proposed WNA rate is most similar to the calculation of Columbia's WNA rider.[3] Finally, like Columbia and PGC, UGI Gas is proposing annual reporting for the WNA to the Commission and only applies only during the heating season months.

[1] Columbia Gas of Pennsylvania, Inc., "Rider WNA – Weather Normalization Adjustment", Rates and Rules for furnishing gas service, https://www.columbiagaspa.com/docs/librariesprovider14/rates-and-tariffs/pennsylvania-tariff.pdf?sfvrsn=41, pdf at page 187.

[2] Philadelphia Gas Works, "Weather Normalization Adjustment Clause", Gas Service Tariff, https://www.pgworks.com/uploads/pdfs/PGW_Gas_Service_Tariff_Through_Supplement_145.pdf, pdf at page 150.

[3] There are a few differences in function. Columbia uses a November through May heating season and applies a 3% deadband, whereas PGW uses a heating season of October through May and applies a 1% deadband.

V. <u>COMPONENTS OF UGI GAS'S PROPOSED WNA MECHANISM</u>

Q. Please explain how UGI Gas's proposed WNA mechanism will operate.

A. UGI Gas's proposed WNA mechanism will adjust the amount billed to each customer served under Rates R, RT, N, and NT to effectively weather normalize distribution revenues recovered from these two rate schedules during the cold weather heating season. It is a customer bill specific calculation applied to monthly billing cycles during the months of October through May.

Q. What is the Company's basis for determining normal weather for its Pennsylvania gas distribution system?

A. Since 2009, UGI Gas has defined normal weather as the average annual heating degree days ("HDD") calculated for a 15-year period, with the most recent period ending December 31, 2019. It is updated every 5 years with the next recalculation due for the period ending December 31, 2024. This is further discussed in the direct testimony of Company witness Sherry A. Epler (UGI Gas Statement No. 8).

Q. Would the adjustment to customers' bills be calculated on a calendar month or on a billing cycle month basis?

A. The customer adjustments would be made on a billing cycle basis. This approach allows the adjustments to be calculated at the end of each customer's meter reading billing cycle and incorporated into the original bill sent to each customer. This approach provides for an accurate and timely adjustment for the customer. There is no additional time lag between when the customer experiences the bill variability and when the weather normalizing adjustment is made.

Q. In the context of WNA riders, what are deadbands?

A. A deadband applies to WNA riders such that the adjustment is not triggered if AHDDs are within a certain threshold of the NHDDs. Thus, no adjustment applies to the bill if weather falls within that threshold and some weather variability flows to customer bills and is seen in the associated utility distribution revenues. Columbia's WNA mechanism utilizes a 3% deadband, and PGW's WNA mechanism utilizes a 1% deadband.

Q. Does UGI Gas's proposal include a deadband?

A. No. The UGI Gas proposal does not include a deadband. The Company believes the application of a deadband adds unnecessary complexity to the rider, which is a concern for customer communication and education. Also, in principle, the WNA's intended goal is to stabilize billings and distribution revenues from readily identified weather related variances, not just "some" element of weather variance that may be arbitrarily established.

Q. Please provide a formulaic representation of the WNA mechanism that you just described.

A. The Company's proposed WNA formula that is applied to bills of Residential and Non-Residential customers under Rate Schedules R/RT and N/NT for the heating season of October through May is shown below:[4]

$$\mathrm{WNBC} = \mathrm{BLMC} + \left[\frac{\mathrm{NHDD}}{\mathrm{AHDD}} \mathrm{x}\ (\mathrm{AMC} - \mathrm{BLMC})\right]$$

$$\mathrm{WNAC} = \mathrm{WNBC} - \mathrm{AMC}$$

$$\mathrm{WNA} = \mathrm{WNAC}\ \mathrm{x}\ \mathrm{Distribution\ Charge}$$

- <u>WNA</u> = Weather Normalization Adjustment will be applied to bills of Residential and Non-Residential customers under Rate Schedules R/RT and N/NT, for any billing period during the heating season October through May. WNA will not be applicable for the billing period if AMC is less than the BLMC.

- <u>WNBC</u> = Weather Normalized Billing Ccfs ("WNBC") will be calculated as the Base Load Monthly Ccfs ("BLMC") added to the product of (1) the Normal Heating Degree Days ("NHDD") divided by the Actual Heating Degree Days ("AHDD") and (2) the Actual Monthly Ccfs ("AMC") less the BLMC. Weather Normalized Billing Ccfs (WNBC) will only be calculated if the AMC exceeds the BLMC.

- <u>BLMC</u> = Base Load Monthly Ccfs for each customer shall be established for each customer using the customer's actual average daily consumption from the billing system, measured in Ccfs, using bills with read dates of June 21st thru September 20th over a 36-month period multiplied by the number of days in the billing period. The average daily base load is recalculated monthly using the most recent 36 months of bill history. If less than 12 months of bill history is available for the customer, an average base load for the related customer class will be applied.

- <u>NHDD</u> = Normal Heating Degree Days shall be applied on a Delivery Region specific basis as determined by the customer's geographical location and, for any given day within a billing period, shall be based upon the Delivery Region's 15-year average for the given day. NHDD shall be updated every 5 years using the methodology established in the Company's general rate case proceeding at R-2021-3030218 with the next scheduled update of the NHDD to be effective on October 1, 2025, and thereafter every 5 years.

[4] The full proposed tariff language is provided as UGI Gas Exhibit F – Current Tariffs, Rate Schedule "WNA", Weather Normalization Adjustment Rider.

- AHDD = Actual Heating Degree Days shall be the actual experienced heating degree days during the billing cycle for the customer's assigned Delivery Region, as determined by the customer's geographical location. A Delivery Region's AHDD shall be based upon experienced actual Gas Day temperatures as reported by the National Oceanic and Atmospheric Administration (NOAA) for weather stations located within that Delivery Region pursuant to the application of the Company's established Delivery Region calculation methodology.

- The period for which both NHDD and AHDD will be measured for each billing period used for the WNA calculation will be based on the starting day of the customer's billing cycle minus one day through last day of customer's billing cycle minus one day. If AHDD is unavailable for any day(s) during that period, the respective NHDD for the same day(s) will also be excluded from the calculation, thereby excluding any days missing AHDD from the WNBC calculation.

- AMC = Actual Monthly Ccfs will be subtracted from the WNBC to compute the Weather Normalized Adjustment Ccfs ("WNAC").

- The WNAC shall then be multiplied by the applicable Rate Schedule Distribution Charge based on service rendered to compute the WNA amount that will be charged or credited to each Residential and Non-Residential customer served under Rate Schedules R, RT, N and NT.

Q. Please explain the process the Company will follow to calculate the WNA.

A. For each billing cycle, the Company will adjust the heat sensitive load to account for the ratio of normal weather to actual weather and then recalculate the bill. The process works as follows:

- For each billing cycle and each applicable customer, the Company will calculate the weather normalized billing Ccfs by multiplying the heat sensitive load (actual Ccfs less base load Ccfs) times the ratio of the normal HDDs for the billing cycle to the actual HDDs; i.e., $\left[\frac{\text{NHDD}}{\text{AHDD}} \text{x} (\text{AMC} - \text{BLMC})\right]$. This adjusted heat sensitive load will then be added to the base load Ccfs to calculate the Weather Normalized Billing Ccfs (WNBC); i.e., $\text{WNBC} = \text{BLMC} + \left[\frac{\text{NHDD}}{\text{AHDD}} \text{x} (\text{AMC} - \text{BLMC})\right]$.

- The Company will then determine the Weather Normalized Adjustment Ccfs ("WNAC") of each applicable customer for each billing cycle by subtracting the actual monthly Ccfs from the Weather Normalized Billing Ccfs; i.e., WNAC = WNBC-AMC.

- This Weather Normalized Adjustment Ccfs is then multiplied by the applicable rate class's volumetric distribution charge to develop the Weather Normalization Adjustment that will be applied on the customer's bill. WNA=WNAC x Distribution Charge.

Q. Have tariff pages been developed that reflect the computational details and process of the proposed WNA mechanism?

A. Yes. The appropriate tariff pages to implement the proposed WNA mechanism are presented in UGI Gas Exhibit F (Proposed Tariff), Rider C - "WNA", Weather Normalization Adjustment Rider.

Q. When does the Company propose to implement the WNA?

A. Although intended to apply for bills during the months of October through May on a forward basis, assuming the effective date of new rates is in October 2022 in this proceeding, UGI Gas is proposing the WNA will initially be implemented beginning with bills rendered on and after November 1, 2022. Thereafter in subsequent years, the WNA will apply for billings during each October through May period.

Q. What additional filing(s) would occur related to the Weather Normalization Adjustment Rider?

A. The Company will file weather normalization information with the Commission annually on or before December 1st for WNA data related to the 12-month period ending September of that same year. The filing will contain the following information on the WNA mechanism: (a) monthly WNA billed revenue; and (b) monthly actual and normal HDD data.

Q. How does the proposed WNA align with the Statements of Policy as outlined by the Commission in the alternative rate making Docket No. M-2015-2518883?

A. Each rate consideration identified in the Statement of Policy is listed below along with the relevant effect the proposed WNA has on each rate consideration:

1. Please explain how the ratemaking mechanism and rate design align revenues with cost causation principles as to both fixed and variable costs.

- UGI Gas's proposed WNA is designed to recover distribution revenues needed to satisfy the cost-of-service requirement determined in this proceeding, while mitigating the variance between actual and projected distribution revenues due to weather. UGI Gas recovers a significant portion of fixed costs through volumetric rates. These fixed costs do not vary with the amount of gas delivered to customers and are composed of fixed operation and maintenance ("O&M") expenses, administrative and general expenses, depreciation, certain taxes, a portion of working capital requirements, and return on investment. These costs also do not vary in the short-term with changes in temperature. In the absence of Straight Fixed Variable ("SFV") rate design; where all fixed costs are recovered in a fixed monthly charge, a WNA mechanism will better align distribution revenues with cost causation principles; appropriately accounting for variation in usage due to weather.

2. Please explain how the ratemaking mechanism and rate design impact the fixed utility's capacity utilization.

- UGI Gas's WNA proposal has no identifiable impact on capacity utilization.

3. Please explain whether the ratemaking mechanism and rate design reflect the level of demand associated with the customer's anticipated consumption levels.

- Customer specific usage factors corresponding to their individual demand (the BLMC for each customer) is continually updated and reflects the level of demand associated with the customer's anticipated consumption levels.

4. *<u>How the ratemaking mechanism and rate design limit or eliminate interclass and intraclass cost shifting</u>.*

- Since the proposed WNA mechanism is applying rates which are based upon the specific revenue allocation and rate design approved by the Commission, it will mitigate the potential for interclass or intraclass cost shifting related to weather driven usage variances from those weather assumptions used in establishing rates.

5. *<u>Please explain how the WNA limits or eliminates disincentives for the promotion of efficiency programs</u>.*

- The proposed WNA only addresses variations due to weather. The WNA does not negatively impact energy efficiency programs. Moreover, UGI Gas maintains a robust Energy Efficiency & Conservation ("EE&C") program, which it has voluntarily implemented for its customers and will use to continue promoting energy efficiency measures.

6. *<u>Please explain how the WNA impacts customer incentives to employ efficiency measures and distributed energy resources</u>.*

- Customers will continue to have an incentive to employ energy efficiency measures and distributed energy resources because a reduction in usage still reduces their overall bill and the portion of their bill that is subject to the WNA mechanism.

7. *<u>Please explain how the WNA impacts low-income customers and support consumer assistance programs</u>.*

- Under the WNA mechanism, certain customers enrolled in the Customer Assistance Program ("CAP") who pay an "average bill" amount will see lower bill variability for distribution costs during colder than average periods, while CAP customers who are paying on a percent-of-income basis will see little to no impact.

8. *<u>Please explain how the WNA impacts customer rate stability principles</u>.*

- The WNA mechanism will provide customers more stable annual bills and directly mitigate volatility in their monthly costs.

9. *<u>Please explain how weather impacts utility revenue under the WNA</u>.*

- The proposed WNA adjusts a customer's bill due to variations from normal weather and is employed for usage during the heating season months (October – May). It only applies to certain of the Company's customer classes (Rates R, RT, N and NT) and it does not ensure the utility will recover 100% of its authorized distribution revenues, but it does reduce the amount of weather-related variation in both customer bills and associated utility distribution revenues.

10. *Please explain how the WNA impacts the frequency of rate case filings and affects regulatory lag*.

- The WNA is not anticipated to impact the frequency of rate cases or have an impact on regulatory lag.

11. *Please explain if the WNA interacts with other revenue sources, such as Section 1307 automatic adjustment surcharges, 66 Pa.C.S. § 1307 (relating to sliding scale of rates; adjustments), riders such as 66 Pa.C.S. § 2804(9) (relating to standards for restructuring of electric industry) or system improvement charges, 66 Pa.C.S. § 1353 (relating to distribution system improvement charge)*.

- The Company's proposed WNA (appearing as Rider C – WNA in the Tariff) only applies to distribution related charges that are recovering the base distribution revenue requirement from applicable WNA customer classes for the heating season of October through May. Specifically, the billing for the Company's Riders, including Rider F – USP, Rider G – EE&C, and Rider B – PGC, will continue to be based on actual monthly usage.

12. *Please explain whether the WNA includes appropriate consumer protections*.

- The WNA mechanism will result in an adjusted bill that reflects the revenues that would be recovered under normal weather, i.e., the same normal weather used to set rates. UGI Gas will not recover additional distribution revenues due to colder than average temperatures that result in higher-than-normal usage from customers.

13. *Please explain whether the WNA is understandable to customers*.

- UGI Gas's WNA is not a new concept to the regulated utility industry. Similar versions have been successfully implemented by other Pennsylvania natural gas distribution companies. UGI Gas has proposed a WNA tariff that provides detailed information to the customer of how the mechanism works based on successful working versions found in the tariffs of other Pennsylvania natural gas distribution companies that have implemented a WNA tariff. Further, educational materials and customer service training will be developed upon approval of the mechanism, as well as appropriate notice being provided to customers related to the WNA being approved pursuant to the Commission's alternative ratemaking notice requirements.

14. *Please explain how the WNA will support improvements in utility reliability*.

- UGI Gas's cost of service is inclusive of investments and costs to continue to enhance the safety and reliability of its system. The proposed WNA will help minimize the volatility of the recovery of these costs.

VI. WIDESPREAD INDUSTRY USE OF WNA MECHANISMS

Q. Are WNA mechanisms like the one the Company proposes widely accepted in the natural gas industry?

Yes. UGI Gas Exhibit JDT – 2 presents a survey conducted by Atrium Economics, with input from an American Gas Association survey,[5] which shows that many U.S. gas utilities, across a wide geographic area, have implemented WNA mechanisms. Specifically, the survey results (provided in Figure 1 below) show there are 27 states that have approved WNAs for gas companies serving 66 different service territories. Currently, As of November 2021, Atrium's research indicates that two additional gas utilities, Duke Energy in Kentucky and New Mexico Gas, have pending WNA proposals before their respective regulatory commissions. While four other gas utilities in Kentucky already have WNA mechanisms in operation, New Mexico would be added to the list of states if New Mexico Gas's WNA proposal is approved.

[5] American Gas Association "Innovative Rates, Non-Volumetric Rates, and Tracking Mechanisms: Current List" site: https://www.aga.org/sites/default/files/aga_innovative_rates_december_2016.pptx

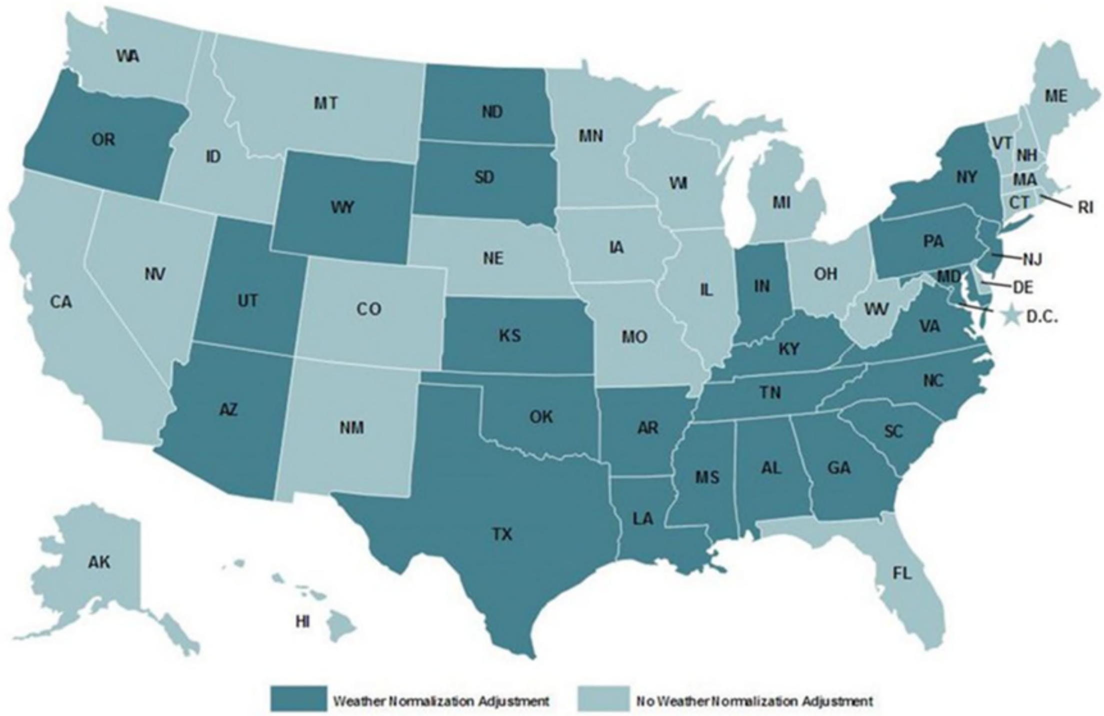

Figure 1 – Map of US States with WNA Mechanisms

Q. Are decoupling mechanisms common across the industry?

A. Yes, decoupling mechanisms are an increasingly common ratemaking tool throughout the natural gas industry. Table 1 below summarizes various approved and proposed decoupling mechanisms for 40 states in the U.S. and the District of Columbia. Along with WNAs, Revenue Normalization Adjustments ("RNA") and Straight Fixed Variable ("SFV") rate design make up the other decoupling mechanisms noted.

Table 1 – RNA, SFV, and WNA Mechanisms across the U.S.

	Decoupling Mechanism				Decoupling Mechanism		
State Name	**RNA**	**SFV**	**WNA**	**State Name**	**RNA**	**SFV**	**WNA**
Alabama			WNA	Nevada	RNA

Mississippi			WNA	Wyoming	RNA		WNA
Nebraska		SFV		Washington, D.C.	Proposed		

Q. Do any members of the peer group used to inform the recommended return on equity for UGI Gas in this proceeding have similar mechanisms?

A. Yes, as indicated above WNA mechanisms and decoupling mechanisms are common ratemaking mechanisms across the industry. As indicated in the testimony of Company witness Paul R. Moul (UGI Gas Statement No. 6), the utilities included in his Gas Group (the peer group) already have tariff mechanisms for stabilization of revenues due to variation in weather, either through similar WNA mechanisms as that proposed by UGI

Gas or through full revenue decoupling mechanisms. The implementation of UGI Gas's proposed WNA mechanism would place UGI Gas on a more comparable footing to the benchmark proxy group that Paul R. Moul uses in his direct testimony to establish the proposed return on equity.

Q. Have WNA proposals recently been authorized by the Commission?

A. Yes. In a December 6, 2018 Order, the Commission authorized the continuation of Columbia's WNA mechanism that had earlier been implemented on a pilot basis. Chairperson Gladys Brown Dutrieuille, provided the following statement in the Order supporting the continuation of the WNA mechanism:

> "I commend the parties for their commitment to this mechanism. … The Weather Normalization Adjustment works bi-directionally to insulate customers from high bills during the extremely cold months, while also limiting the decline in revenue for Columbia during unseasonably warm heating months. This…stabilizes Columbia's cash flow, and in turn, allows Columbia to more acutely focus on operational items within its control; namely infrastructure upgrades and repairs. Further, since this decoupling mechanism is only applied to the distribution component of the bill, and not the natural gas commodity charge, incentives for efficient consumption are maintained." [6]

Q. Do you believe UGI Gas's proposed WNA mechanism is fair to both the Company and its customers?

A. Yes. The proposed WNA mechanism strikes an appropriate balance between the interests of both the Customer and the Company. UGI Gas would be simply billing its customers in a manner to reflect the normal weather conditions that underlie its Commission-

[6] Pennsylvania Public Service Commission Docket No. R-2018-2647577.

authorized base rates on a monthly billing basis. Moreover, the WNA mechanism provides the Company a reasonable opportunity to earn its allowed rate of return on its investment and removes bill variability due a factor outside of customer's control, variations in weather.

VII. CONCLUSION

Q. Please summarize how implementing the proposed WNA mechanism results in fair and equitable ratemaking.

A. The Company's proposed WNA mechanism results in fair and equitable ratemaking due to the following:

- The WNA helps to break the link between the gas consumption of the Company's customers and its distribution revenue recovery, and better aligns the interests of UGI Gas and its customers. The fixed costs embedded in UGI Gas's volumetric rates for distribution service do not vary in the short-term with changes in temperature.

- The WNA addresses a factor beyond the Company's and customers' control, weather variability. This variability contributes to increased volatility in customers' bills, and increased volatility in the Company's recovery of costs.

- Customers receive greater stability in the non-gas portion of their utility bills, a benefit during the winter months when gas prices tend to be at their highest, and a particular benefit for low-income customers with high bills during the lengthy heating seasons in UGI Gas's service areas.

For these reasons, I urge the Commission to approve the Company's proposed WNA mechanism.

Q. Does this conclude your direct testimony?

A. Yes, it does.

UGI GAS

EXHIBIT JDT-1

ATRIUM ECONOMICS
CENTERED ON ENERGY

John D. Taylor

Managing Partner

Mr. Taylor is a utility pricing expert with experience developing cost of service studies for both electric and gas utilities and transmission companies. He has deep experience with developing residential and commercial rates, analyzing midstream transportation and storage capacity resources, and assessing the relationship between price signals and the adoption of distributed generation assets.

He has filed testimony as an expert witness on class cost of service studies for both electric and natural gas utilities, return on equity, and on the appropriate use of statistical analysis during audit testing. Mr. Taylor has supported projects involving financial analysis, regulatory support and strategy, market assessment, litigation support, and organizational and operations reviews. He has an expert knowledge of cost allocation principles for utility cost of service studies and for affiliate transaction and service agreements. Mr. Taylor's work often involves providing support for regulatory proceedings by conducting various studies and analyses related to revenue requirements, affiliate transactions, class cost of service, and cash working capital studies. He has also been involved in the sale of generating assets as sell side advisors, supporting due diligence efforts, financial analyses, and regulatory approval processes.

REPRESENTATIVE EXPERIENCE

Rate Design and Regulatory Proceedings

Mr. Taylor has worked on dozens of electric and gas rate cases including the development of revenue requirements, class cost of service studies, and projects related to utility rate design issues. Specifically, he has:

- Lead expert and witness for class costs of service studies across North America and worked on dozens of other class cost of service and rate design projects for other lead witnesses.
- Developed WNA mechanism for a gas utility including back casting results and supporting expert witness testimony and exhibits.
- Developed revenue requirement model to comply with a new performance-based formula ratemaking process for a Midwest electric utility.
- Supported the developed of time of use rates, demand rates, economic development rates, load retention rates, and line extension policies.
- Analyzed and summarized allocation methodology for a shared services company.
- Assessed the reasonableness of costs through various benchmarking efforts.
- Led the effort to collect and organize plant addition documentation for six Midwest utilities associated with the state commission’s audit of rate base.
- Supported lead-lag analyses and testimonies.
- Analyzed customer usage profiles to support reclassification of rate classes for a gas utility.
- Helped conduct a marginal cost analysis to support rate design testimony.

Litigation Support and Expert Testimony

Mr. Taylor has testified in several cases on class cost of service studies and statistical audit methods. He has also supported numerous other expert testimonies. Specifically, he has:

- Filed testimony as an expert witness on allocated class cost of service studies for both electric and gas utilities.
- Filed testimony as an expert witness on the application of statistical analysis.
- Filed testimony before FERC on the rate of return for an Annual Transmission Revenue Requirement and participated in FERC settlement conferences.
- Part of two-person expert witness team that provided an expert report to the British Columbia Utilities Commission on the use of facilities for transportation balancing services for Fortis BC.
- Part of two-person expert witness team that provided an expert report on affiliate transactions and capitalized overhead allocations for Hydro One on three separate occasions.
- Sole expert for expert report on affiliate allocations for Alectra utilities, the second largest publicly owned electric utility in North America. This was conducted shortly after the merger of four distinct utilities.
- Sole expert for expert report on the allocation of overhead costs between transmission and distribution businesses for EPCOR.

Transaction Experience

Mr. Taylor has been involved with several generating asset transactions supporting both buy side and sell side analysis and due diligence. His work has included:

- Worked as buy side advisor for a large water utility in the mid-Atlantic region including supporting the review of revenue requirements, rates, and forecasts.
- Helped facilitate and manage processes for a nuclear plant auction by processing Q&A, collecting relevant documentation and managing the virtual data room for auction participants.
- Supported the auction process for steam and chilled water distribution and generation assets in the Midwest.
- Supported the development of a financial model to ascertain the net present value of several competing wholesale power purchase agreements and guided the client with a decision matrix for the qualitative aspects of the offers.
- Provided research on comparable transactions, previous mergers and acquisitions, and potential transaction opportunities for several clients.

Financial Analysis and Market Research

Other financial analysis and market research Mr. Taylor has conducted include:

- Estimated the rate impact and costs associated with moving California energy market to 100% renewable.
- Assessed the consequences of a divestiture on the cost of service model for a New England gas distribution company.
- Developed distributed CNG/LNG market studies for two separate utilities and two separate competitive market participants.
- Modeling alternative mechanisms for the allocation of overhead costs to a nuclear plant.

Summary of Measure of Value and Revenue Increase

		[1]	[2]	[3]	[4]	[5]
				Pro Forma Test Year Ended September 30, 2023 At		
Line #	Description	Function	Reference Section	Present Rates	Increase	Proposed Rates
	RATE BASE					
1	Utility Plant		C-2	$ 5,042,025		$ 5,042,025
2	Accumulated Depreciation		C-3	(1,318,560)		(1,318,560)
3	Net Plant in service	L 1 + L 2		3,723,465	-	3,723,465
4	Working Capital		C-4	62,148		62,148
5	Gas Inventory		C-5	17,813		17,813
6	Accumulated Deferred Income Taxes		C-6	(628,510)		(628,510)
7	Customer Deposits		C-7	(21,600)		(21,600)
8	Materials & Supplies		C-8	15,707		15,707
9	TOTAL RATE BASE	Sum L 3 to L 8		$ 3,169,023	$ -	$ 3,169,023
	OPERATING REVENUES AND EXPENSES					
	Operating Revenues					
10	Base Customer Charges		D-5	$ 655,274	$ 82,742	$ 738,016
11	Gas Cost Revenue		D-5	397,163		397,163
12	Other Operating Revenues		D-5	10,287		10,287
13	Total Revenues	Sum L 10 to L 12		1,062,724	82,742	1,145,466
14	Operating Expenses		D-1	(828,501)	(1,363)	(829,864)
15	OIBIT	L 13 + L 14		234,223	81,379	315,602
16	Pro Forma Income Tax at Present Rates		D-33	(39,836)		
17	Pro Forma Income Tax on Revenue Increase		D-33		(23,512)	(63,347)
18	NET OPERATING INCOME	Sum L 15 to L 17		$ 194,387	$ 57,867	$ 252,255
19	RATE OF RETURN	L 18 / L 9		6.1340%		7.9600%
	REVENUE INCREASE REQUIRED					
20	Rate of Return at Present Rates	L 19, Col 3		6.1340%		
21	Rate of Return Required		B-7	7.9600%		
22	Change in ROR	L 21 - L 20		1.8260%		
23	Change in Operating Income	L 22 * L 9		$ 57,867		
24	Gross Revenue Conversion Factor		D-35	1.429864		
25	Change in Revenues	L 23 * L 24		$ 82,742		
26	Percent Increase -- Delivery Revenues	L 25 / L 10, C 4			12.63%	
27	Percent Increase -- Total Revenues	L 25 / L 13, C 4			7.79%

UGI GAS

EXHIBIT B – RATE OF RETURN

UGI Utilities, Inc. – Gas Division

Exhibit to Accompany the

Direct Testimony

of

Paul R. Moul, Managing Consultant
P. Moul & Associates, Inc.

Concerning

Fair Rate of Return

UGI Utilities, Inc. – Gas Division

Index of Schedules

UGI Utilities, Inc.
Proposed Rate of Return
Estimated at September 30, 2023

Type of Capital	Ratios	Cost Rate	Weighted Cost Rate
Long-Term Debt	44.88%	3.98%	1.79%
Common Equity	55.12%	11.20%	6.17%
Total	100.00%		7.96%

Indicated levels of fixed charge coverage assuming that
the Company could actually achieve its proposed rate of return:

Pre-tax coverage of interest expense based upon a
28.8921% composite federal and state income tax rate
(10.47% ÷ 1.79%) 5.85 x

Post-tax coverage of interest expense
(7.96% ÷ 1.79%) 4.45 x

UGI Utilities, Inc.
Cost of Equity

UGI Utilities, Inc.
Capitalization and Financial Statistics
2016-2020, Inclusive

Notes:

(1) Excluding Accumulated Other Comprehensive Income ("OCI") from the equity account.

(2) Total operating expenses, maintenance, depreciation and taxes other than income as a percentage of operating revenues.

(3) Coverage calculations represent the number of times available earnings, both including and excluding AFUDC (allowance for funds used during construction) as reported in its entirety, cover fixed charges.

(4) Internal cash generation/gross construction is the percentage of gross construction expenditures provided by internally-generated funds from operations after payment of all cash dividends divided by gross construction expenditures.

(5) Gross Cash Flow (sum of net income, depreciation, amortization, net deferred income taxes and investment tax credits, less AFUDC) as a percentage of average total debt.

(6) Gross Cash Flow (sum of net income, depreciation, amortization, net deferred income taxes and investment tax credits, less total AFUDC) plus interest charges, divided by interest charges.

(7) Common dividend coverage is the relationship of internally generated funds from operations after payment of preferred stock dividends to common dividends paid.

Standard & Poor's Public Utilities
Capitalization and Financial Statistics
2016-2020, Inclusive

Notes:

(1) All capitalization and financial statistics for the group are the arithmetic average of the achieved results for each individual company in the group.
(2) Excluding Accumulated Other Comprehensive Income ("OCI") from the equity account
(3) Total operating expenses, maintenance, depreciation and taxes other than income taxes as a percent of operating revenues.
(4) Coverage calculations represent the number of times available earnings, both including and excluding AFUDC (allowance for funds used during construction) as reported in its entirety, cover fixed charges.
(5) Internal cash generation/gross construction is the percentage of gross construction expenditures provided by internally-generated funds from operations after payment of all cash dividends divided by gross construction expenditures.
(6) Gross Cash Flow (sum of net income, depreciation, amortization, net deferred income taxes and investment tax credits, less total AFUDC) as a percentage of average total debt.
(7) Gross Cash Flow (sum of net income, depreciation, amortization, net deferred income taxes and investment tax credits, less total AFUDC) plus interest charges, divided by interest charges.
(8) Common dividend coverage is the relationship of internally-generated funds from operations after payment of preferred stock dividends to common dividends paid.

Betas are estimated from monthly returns in excess of the 30-day U.S. Treasury bill total return, January 1926–December 2016. Historical riskless rate measured by the 91-year arithmetic mean income return component of 20-year government bonds (5.02%). Calculated in the context of the CAPM by multiplying the equity risk premium by beta. The equity risk premium is estimated by the arithmetic mean total return of the S&P 500 (11.95%) minus the arithmetic mean income return component of 20-year government bonds (5.02%) from 1926–2016. Comparable Earnings Approach
Screening Parameters

Timeliness Rank

The rank for a stock's probable relative market performance in the year ahead. Stocks ranked 1 (Highest) or 2 (Above Average) are likely to outpace the year-ahead market. Those ranked 4 (Below Average) or 5 (Lowest) are not expected to outperform most stocks over the next 12 months. Stocks ranked 3 (Average) will probably advance or decline with the market in the year ahead. Investors should try to limit purchases to stocks ranked 1 (Highest) or 2 (Above Average) for Timeliness.

Safety Rank

A measure of potential risk associated with individual common stocks rather than large diversified portfolios (for which Beta is good risk measure). Safety is based on the stability of price, which includes sensitivity to the market (see Beta) as well as the stock's inherent volatility, adjusted for trend and other factors including company size, the penetration of its markets, product market volatility, the degree of financial leverage, the earnings quality, and the overall condition of the balance sheet. Safety Ranks range from 1 (Highest) to 5 (Lowest). Conservative investors should try to limit purchases to equities ranked 1 (Highest) or 2 (Above Average) for Safety.

Financial Strength

The financial strength of each of the more than 1,600 companies in the VS II data base is rated relative to all the others. The ratings range from A++ to C in nine steps. (For screening purposes, think of an A rating as "greater than" a B). Companies that have the best relative financial strength are given an A++ rating, indicating ability to weather hard times better than the vast majority of other companies. Those who don't quite merit the top rating are given an A+ grade, and so on. A rating as low as C++ is considered satisfactory. A rating of C+ is well below average, and C is reserved for companies with very serious financial problems. The ratings are based upon a computer analysis of a number of key variables that determine (a) financial leverage, (b) business risk, and (c) company size, plus the judgment of Value Line's analysts and senior editors regarding factors that cannot be quantified across-the-board for companies. The primary variables that are indexed and studied include equity coverage of debt, equity coverage of intangibles, "quick ratio", accounting methods, variability of return, fixed charge coverage, stock price stability, and company size.

Price Stability Index

An index based upon a ranking of the weekly percent changes in the price of the stock over the last five years. The lower the standard deviation of the changes, the more stable the stock. Stocks ranking in the top 5% (lowest standard deviations) carry a Price Stability Index of 100; the next 5%, 95; and so on down to 5. One standard deviation is the range around the average weekly percent change in the price that encompasses about two thirds of all the weekly percent change figures over the last five years. When the range is wide, the standard deviation is high and the stock's Price Stability Index is low.

Beta

A measure of the sensitivity of the stock's price to overall fluctuations in the New York Stock Exchange Composite Average. A Beta of 1.50 indicates that a stock tends to rise (or fall) 50% more than the New York Stock Exchange Composite Average. Use Beta to measure the stock market risk inherent in any diversified portfolio of, say, 15 or more companies. Otherwise, use the Safety Rank, which measures total risk inherent in an equity, including that portion attributable to market fluctuations. Beta is derived from a least squares regression analysis between weekly percent changes in the price of a stock and weekly percent changes in the NYSE Average over a period of five years. In the case of shorter price histories, a smaller time period is used, but two years is the minimum. The Betas are periodically adjusted for their long-term tendency to regress toward 1.00.

Technical Rank

A prediction of relative price movement, primarily over the next three to six months. It is a function of price action relative to all stocks followed by Value Line. Stocks ranked 1 (Highest) or 2 (Above Average) are likely to outpace the market. Those ranked 4 (Below Average) or 5 (Lowest) are not expected to outperform most stocks over the next six months. Stocks ranked 3 (Average) will probably advance or decline with the market. Investors should use the Technical and Timeliness Ranks as complements to one another.

Mr. Anton R. Hummer
Controller and Principal Accounting Officer
UGI Utilities, Inc. – Gas Division
1 UGI Drive
Denver, PA 17517

Ladies and Gentlemen:

Pursuant to your request, we have determined the annual depreciation accruals applicable to gas plant at September 30, 2023 for the consolidated UGI gas company. Summaries of the original cost, annual accruals and the book depreciation reserve are presented in Tables 1 through 4 of the attached report.

A description of the methods and procedures upon which the study was based is set forth in a companion report, UGI Gas Exhibit C (Future), “Depreciation Study - Calculated Annual Depreciation Accruals Related to Gas Plant at September 30, 2022”.

Respectfully submitted,

GANNETT FLEMING VALUATION

TABLE OF CONTENTS

PART I. INTRODUCTION

UGI UTILITIES, INC. – GAS DIVISION
DEPRECIATION STUDY

PART I. INTRODUCTION

SCOPE

This report sets forth the results of the depreciation study for UGI Utilities, Inc. – Gas Division to determine the annual depreciation accrual rates and amounts for ratemaking purposes applicable to the original cost of gas plant at September 30, 2023.

BASIS OF STUDY

Depreciation

The annual depreciation accruals and accrued depreciation were calculated using the straight line method, the remaining life basis, the average service life (ASL) procedure for plant installed prior to 1982 and the equal life group procedure (ELG) for 1982 and subsequent vintages. The calculations were based on the attained ages and estimated service life characteristics for each depreciable group of gas property.

Service Life Estimates

The service life and survivor curve estimates used for the calculation of depreciation at September 30, 2023, are set forth in Table 1 and are based on company data through 2017. The service life estimates are the same estimates as submitted to the Pennsylvania Public Utility Commission (PA PUC) in the most recent service life study report in January 2019 as part of the gas rate filing.

Remaining Life Annual Accruals

For the purpose of calculating remaining life accruals at September 30, 2023, the book reserve for each plant account is allocated among vintages in proportion to the calculated accrued depreciation for the account. Explanations of remaining life accruals and calculated accrued depreciation for the average service life procedure are presented in Exhibit C (Future). The detailed calculations at September 30, 2023, are set forth in Part III of this report.

Amortization of Net Salvage

In accordance with Pennsylvania rate regulation practice, under which experienced costs of negative net salvage are amortized after their occurrence, no adjustments for expected net salvage were made to either the annual depreciation accrual or the calculated accrued depreciation for the individual accounts. The annual provision for recovering negative net salvage is based on the amortization of experienced net salvage over a five-year period.

PART II. RESULTS OF STUDY

PART II. RESULTS OF STUDY

DESCRIPTION OF SUMMARY TABULATIONS

Tables 1 through 4 presented on pages II-3 through II-12 summarize the results of the depreciation study as of September 30, 2023 for the consolidated UGI gas company. Table 1 sets forth, by depreciable group, the estimated survivor curve, original cost, book depreciation reserve at September 30, 2023, future book accruals, and calculated annual accrual amount and rate. Table 2 presents the bringforward of the book reserve to September 30, 2023. Table 3 sets forth the calculation of the depreciation accruals for the twelve months ended September 30, 2023. Table 4 presents the annual amortization of experienced and estimated net salvage based on the period 2019 through 2023.

DETAILED TABULATIONS OF DEPRECIATION CALCULATIONS

Supporting data for the original cost depreciation calculations in account sequence are presented in Part III of this report. The tables indicate the estimated survivor curves used in the calculations and set forth, for each installation year, the original cost, calculated accrued depreciation, allocated book reserve, future book accruals, remaining life, and calculated remaining life accrual.

Detailed tabulations setting forth the experienced and estimated cost of removal and salvage amounts by year and account are presented in Part IV of this report. The net salvage amounts are carried forward to Table 4 which presents the five-year amortization.
