PECO Exhibit No. 2 6/2/22

June 4, 2021

Dear Customer:

At PECO, we are committed to providing safe and reliable energy for our customers and the communities we serve. As part of our work, we will be upgrading and installing new equipment to modernize and enhance the local electric grid.

This project is part of PECO's Reliability & Resiliency Plan to invest \$1.36 billion through 2025 on targeted reliability-focused infrastructure investments. These accelerated investments will help strengthen the local electric infrastructure to better withstand more frequent and damaging storms, deliver enhanced reliability for our customers, and enable the adoption of clean energy resources. This plan is part of the company's overall system investment of approximately \$6 billion during the next five years across our electric and natural gas systems to inspect equipment, complete targeted system enhancements and corrective maintenance, invest in new equipment, and perform vegetation management.

About the Project:

- We are investing more than \$700,000 to enhance the local electric infrastructure in your area.
- Existing lower voltage electric circuits will be upgraded to higher voltages to better meet customer needs.
- A machine referred to as a directional bore machine will be used to install new conduit as well as new underground electrical cable throughout your neighborhood.
- New equipment, including pad-mount transformers could be installed or replaced as necessary.
- This work will help to improve reliability – reducing the frequency of outages and minimizing the duration of outages that do occur and will increase the ability for customers to install clean energy resources, like solar generation.
- Work will occur along Basilica Circle, Belfry Drive, Campanile Road, Cathedral Circle, Cathedral Road, Cloister Circle, Harner Street, Hagys Mill Road, Prelate Circle, Steeple Drive, and Vestry Circle.
- Construction will begin in June 21, 2021. The project is expected to be completed by August 31, 2021.
- Work will be performed by PECO crews and qualified PECO contractors.

Crews may need to temporarily interrupt service to safely complete some of this work. We will work with local residents to ensure they are informed in advance of our activities and any planned interruptions. To ensure you receive all outage updates, please confirm that your phone number is accurate in our system through MyAccount at peco.com/myaccount or by calling PECO at 1-800-494-4000.

We will also work closely with local officials to minimize the impact on traffic and pedestrians whenever possible. Access for services such as trash removal, student transportation and emergency vehicles will be maintained during construction.

If you have any questions regarding the details of this project and how it may impact you, please contact Russ Jirik, Customer Service Liaison, at Russell.Jirik@exeloncorp.com. or 484-685-7603.

Sincerely,

Jennifer Hanna,
Director, Regional Electrical Operations, PECO

Project: Roxborough 136 URD Replacement at Belfry Drive.
