VIA E-FILING

Rosemary Chiavetta, Secretary
Pennsylvania Public Utility Commission
Commonwealth Keystone Building
400 North Street, 2nd Floor
Harrisburg, PA 17120

**Re: Completed Restoration of Momentary and Sustained Interruptions –
Metropolitan Edison Company; Docket No. M-2021-3023564**

Dear Secretary Chiavetta:

Pursuant to 52 Pa. Code § 67.1, Metropolitan Edison Company (“Met-Ed”) submits written notification of completed restoration efforts following storm conditions that began on December 23, 2022 that caused multiple service interruptions in the Met-Ed service territory.

Attached please find the details relative to the impact of this recent outage event and the restoration activities that took place. It should be noted that the review and approval process of this outage information is still in progress at the time of filing this report and as such, all outage information contained in this report should be considered preliminary.

If you have any questions, please contact me at (610) 212-8331.

Sincerely,

Darsh Singh

ELECTRIC UTILITY REPORT OF OUTAGE TO
PENNSYLVANIA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU
P O BOX 3265
HARRISBURG, PA 17105-3265

1. Reporting Utility: Metropolitan Edison Company ("Met-Ed")
Address: 800 Cabin Hill Road
Greensburg, PA 15601

2. Name and title of person making report:
Scott Wyman President, Pennsylvania Operations
(Name) *(Title)*

3. Telephone number: (724) 838-6150
(Telephone Number)

4. Date and time report was made to Commission:
December 23, 2022 1158
(Date) *(Time)*

5. Interruption or Outage:
 - (a) Number of customers affected: 65,662 (Represents 11.4% of Met-Ed's total customers)
 - (b) Approximate number of outage cases and trouble cases for each county affected during event: See response to 5(c).
 - (c) Approximate number of outages for each county affected during the event:

County	Outages	Outage Cases	Trouble Cases
Adams	3,850	43	197
Berks	23,933	278	769
Bucks	977	43	119
Chester	1,627	13	37
Cumberland	2,314	25	78
Dauphin	472	11	37
Lancaster	579	3	15
Lebanon	3,375	35	90
Lehigh	57	6	7
Monroe	1,195	33	114
Montgomery	3,060	34	92
Northampton	14,735	70	323
Pike	773	9	55
York	8,715	134	380
Total	65,662	738	2,313

(d) Approximate number of outage cases exceeding 6 or more hours in duration: 537

(e) A listing of each outage case exceeding 6 or more hours in duration:
See Attachment A.

(d) Reason for the interruption or outages: Beginning Thursday morning, December 22, 2022, Winter Storm Elliott, producing a wintry mix of snow and ice along with high wind gusts, moved from west to east across Pennsylvania. The storm began affecting Met-Ed service territory Friday morning. Wind gusts up to 44 miles per hour were experienced on December 23, 2022 and gusts of approximately 36 miles per hour continued to affect the Met-Ed service territory on Saturday, December 24, 2022. Temperatures fell to single digits in the evening of December 23, 2022, and remained below freezing through the duration of the storm. See Attachment B for the maximum wind gusts for December 23 and 24, 2022 and 24-hour total precipitation for December 22 and 23, 2022.

Damage as a result of the storm event included downed trees, broken poles, and downed wires. The Reading, Hamburg, Boyertown, and Easton regions were the hardest hit. Approximately, 47% of the total outages that occurred were tree related. Subzero temperatures and dangerous wind chills hampered restoration efforts.

Preliminary data indicate the reliability impact of the storm was 58.7 minutes of SAIDI, 0.11 of SAIFI frequency, and an overall storm CAIDI of 514.8 minutes.

- (g) Projected time of restoration: It was estimated that the majority of customers would be restored by 2300 on December 26, 2022.

See Attachment C for the restoration curve and Attachment D for the order restoration graphs.

- (h) The number of utility workers, contract workers, and workers received as mutual aid assigned specifically to the repair work by general function:

Company	# of Workers	General Function
Met-Ed	124	Line
Penelec	37	Line
West Penn Power	39	Line
Subtotal	200	Line
AMP Utility	46	Line Contractor
Lamberts	24	Line Contractor
5Star	6	Line Contractor
Hawk Line	36	Line Contractor
Haugland Energy Group LLC	9	Line Contractor
Henkels & McCoy	3	Line Contractor
Henkels & McCoy - Eastern PA	5	Line Contractor
JW Didado	19	Line Contractor
Middle Georgia EMC	18	Line Contractor
Middle Tennessee EMC	9	Line Contractor
Miller Bros.	4	Line Contractor
NG Gilbert	16	Line Contractor
Subtotal	195	Line Contractor
Ohio Edison	2	Forestry Contractor
West Penn Power	4	Forestry Contractor
York Tree	7	Forestry Contractor
Nelson Tree	21	Forestry Contractor
Lewis Tree	64	Forestry Contractor
TreeSmiths	77	Forestry Contractor
Wright Tree	24	Forestry Contractor
NG Gilbert	9	Forestry Contractor
Davey Tree	15	Forestry Contractor

Penn Line	41	Forestry Contractor
Subtotal	264	Forestry Contractor
Met-Ed	40	Hazard Responder
FirstEnergy Service Co.	38	Hazard Responder
Penelec	8	Hazard Responder
Subtotal	86	Hazard Responder
Met-Ed	4	Support
FirstEnergy Service Co.	2	Support
Subtotal	6	Support
Grand Total	751	

- (i) The date and time of the first information of a service interruption: December 23, 2022 at 0444
- (j) The date and time that repair crews were assembled: December 23, 2022 at 0700
- (k) The actual time that service was restored to the last affected customer: December 27, 2022, at 2300
- (l) A general description of the physical damage sustained by the utility facilities as a result of the interruption/outage:

Equipment	Number
Primary Spans Down	195
Secondary Spans Down	26
Crossarms Replaced	117
Cutouts Replaced	129
Poles Replaced	94
Transformers Replaced	45
Wire & Cable Replaced (feet)	28,496

- (m) If the interruption/outage event was weather-related, the utility’s weather reports, outlooks, or scenarios for the day before and the day of the interruption/outage event:

See Attachment E for the weather forecast reports.

- (n) If the interruption/outage event caused approximate outages that exceed 10% or more of the number of customers in the utility’s entire service territory, rank the event in terms of the number and duration of outages and provide 2 comparable events, including the number and duration of outages for those comparable events.

The below chart reflects a ranking of the subject event in relation to two comparable Met-Ed events (based on the number and duration of outages).

Rank by Number of Outages	Operating Company	Date	Event Description	Duration (hours)	Customers Affected
1	Met-Ed	June 03 to 07, 2020	Derecho	101 hours 58 minutes	88,597
2	Met-Ed	December 23 to 27, 2022	Rain, Snow and High Winds	136 hours 11 minutes	65,711
3	Met-Ed	September 01 to 06, 2021	Hurricane Ida	113 hours 19 minutes	61,317

Remarks: The storm statistics contained in this report are preliminary. The review and approval of the storm statistics were still in progress as of the time this report was filed

Attachment A: A listing of each outage case exceeding six or more hours in duration, including the following information¹:

Order #	Approximate Location (County)	Total Number of Customers Affected	Duration of the Outage (minutes)	Initial Date and Time of the Outage	Restoration Date and Time

Sunday, December 18, 2022 @ 0833

New Issuance: Preliminary outlook for a strong weather event Thu evening through Sat morning in most of FirstEnergy (“FE”) footprint.

In outlined areas...

1. Moderate confidence in wind forecast – regardless of the strength of the winds with the frontal passage itself (which might be quite powerful in the west half of FE), a prolonged day-long+ duration of strong wind gusts is highly likely after the front passes. The timing of the frontal passage is still in question (may be delayed 12 hours of that depicted)
2. Low confidence in snow/ice forecast - precise path of system may shift east/west by a good 75 miles and shift heavy snow area in FE West accordingly -- and influence amounts of snow/ice in the elevations of WV/MD/southwest PA. Timing of the start/end times of the winter precipitation are not etched in stone.

Two additional post-event concerns heading into Christmas weekend

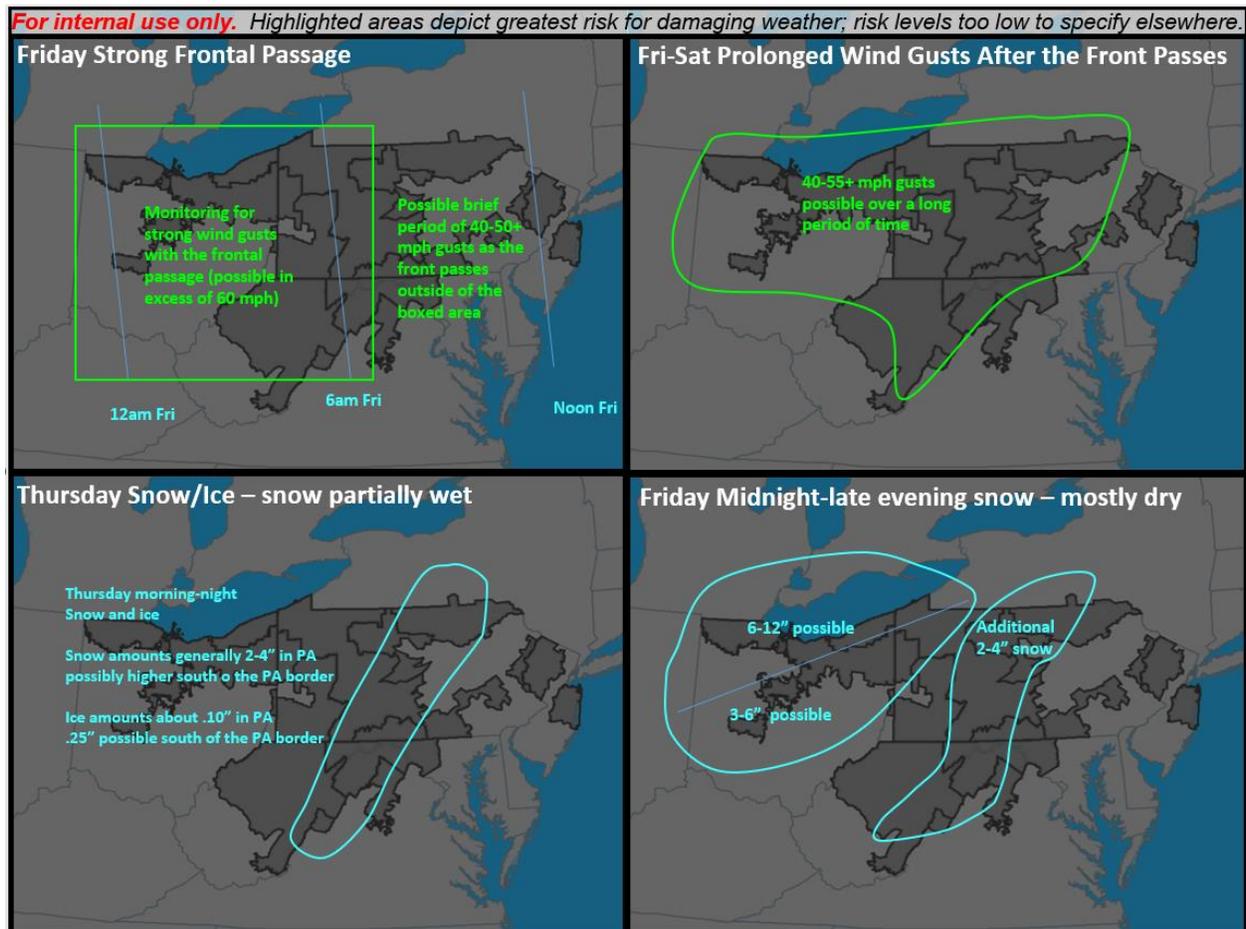

1. Extreme cold for this time of year - daytime highs in the teens and twenties with over night lows in some cases near or slightly below zero. Wind chill factors in the west half of FE easily in the 10-20 BELOW zero range
2. Persistent light snow in FE West and the typical terrain areas is possible after the main event concludes with no possible melting

We will tighten up the details of this preliminary cut at the event as we obtain new model guidance tomorrow.

Next Update – Mon 11am

Manousos – 330 396 0059

Workoff – 716 397 4430

Monday, December 19, 2022 @ 1037

Changes - added preliminary details of timing and magnitude to all threats including cold temperatures.

Confidence details

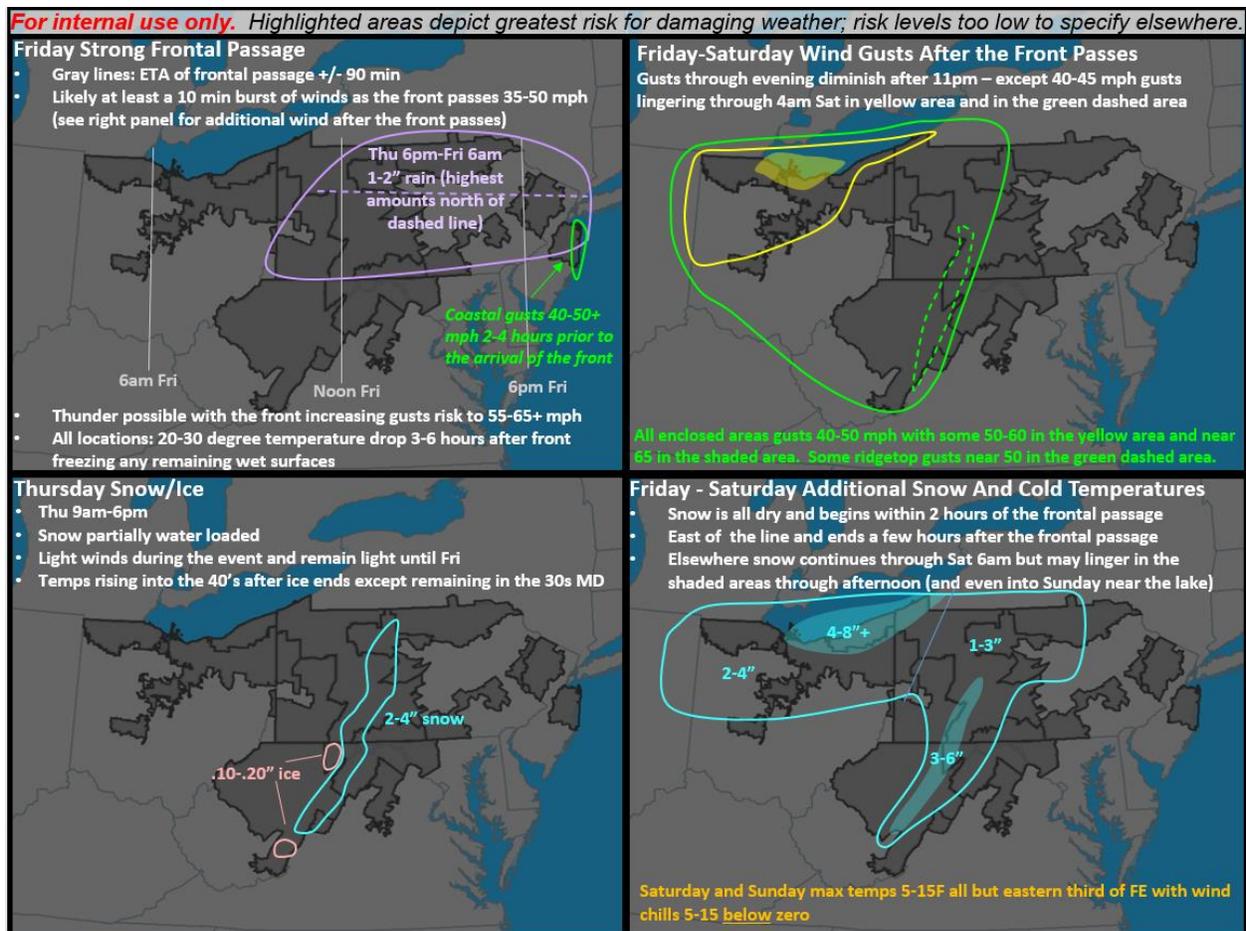

1. Wind gusts
 - a. With the front Friday – confidence is slightly below normal with strength of gusts as the front passes (monitoring for the potential of 60+ mph)
 - b. After the front passes Friday into Saturday – confidence is slightly below with the extent of yellow area (monitoring for potential to extend into east OH)
2. Snow/ice amounts
 - a. Thursday – confidence is slightly below normal with these amounts as the quick-hitting nature of the event may further limit accumulations of both snow and ice

- b. Friday through Saturday – confidence is below normal with amounts outside of the shaded areas (cold air may lead to more effective accumulations and increase the amounts 1.5-2x that depicted)
3. Temperatures – confidence is high with the strength of the cold air after the front
- a. Reference temperature forecasts [here](#) and wind chill charts [here](#) to see how quickly exposed skin is prone to frostbite

Next Update – Tue 11am

Manousos – 330 396 0059

Workoff – 716 397 4430

Tuesday, December 20, 2022 @ 1109

Changes

1. Frontal passage – made ETA earlier by 6 hours, increased gust threat with frontal passage, added thunder threat area, added details of how quickly temperatures will drop after the front passes, increased rain amounts ahead of front in PA/NJ ahead of the front
2. Snow/Ice
 - a. Thu - increased snow/ice area
 - b. Fri/Sat – shrunk areas but increased amounts in northwest OH and lakeshore areas of northeast OH/northwest PA, refined timing
3. Wind gusts – refined gust area and magnitudes and also added gust area in southeast PA and NJ

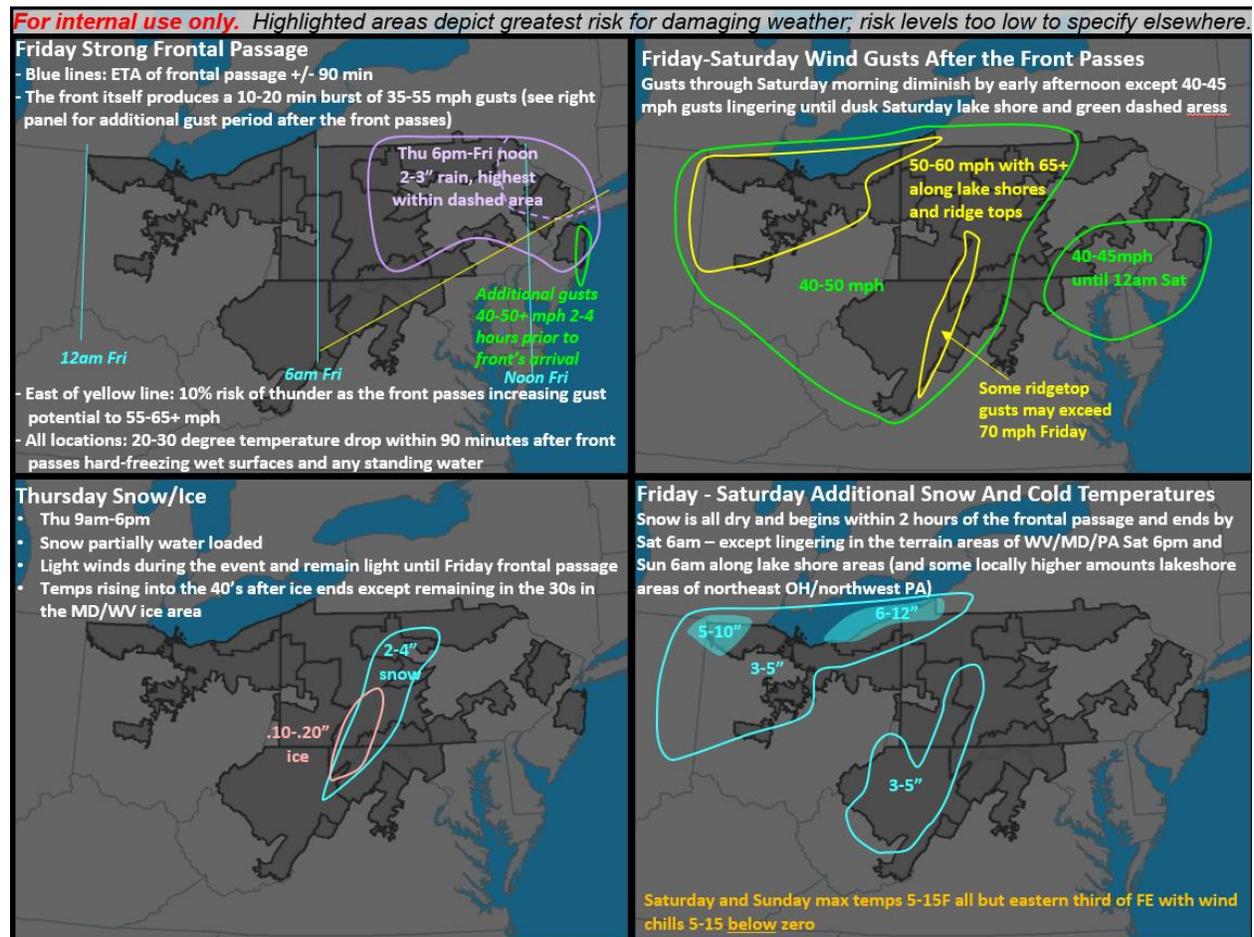

Confidence is normal for all aspects of the graphic except the following

- Snow/ice amounts Thu in WV/MD/PA - below normal for snow amounts (might be lower)
- Thunder risk on Fri – below normal (weak signal, but worth mentioning in the forecast)

Next Update – Wed 11am

Manousos – 330 396 0059

Workoff – 716 397 4430

Wednesday, December 21, 2022 @ 0920

Changes. Clarification - there are two drivers to the wind: the frontal passage itself (represents a 10-20 min burst of winds as it passes – see top left panel) then an additional long-duration period of gusts developing after the front passes (see top right panel).

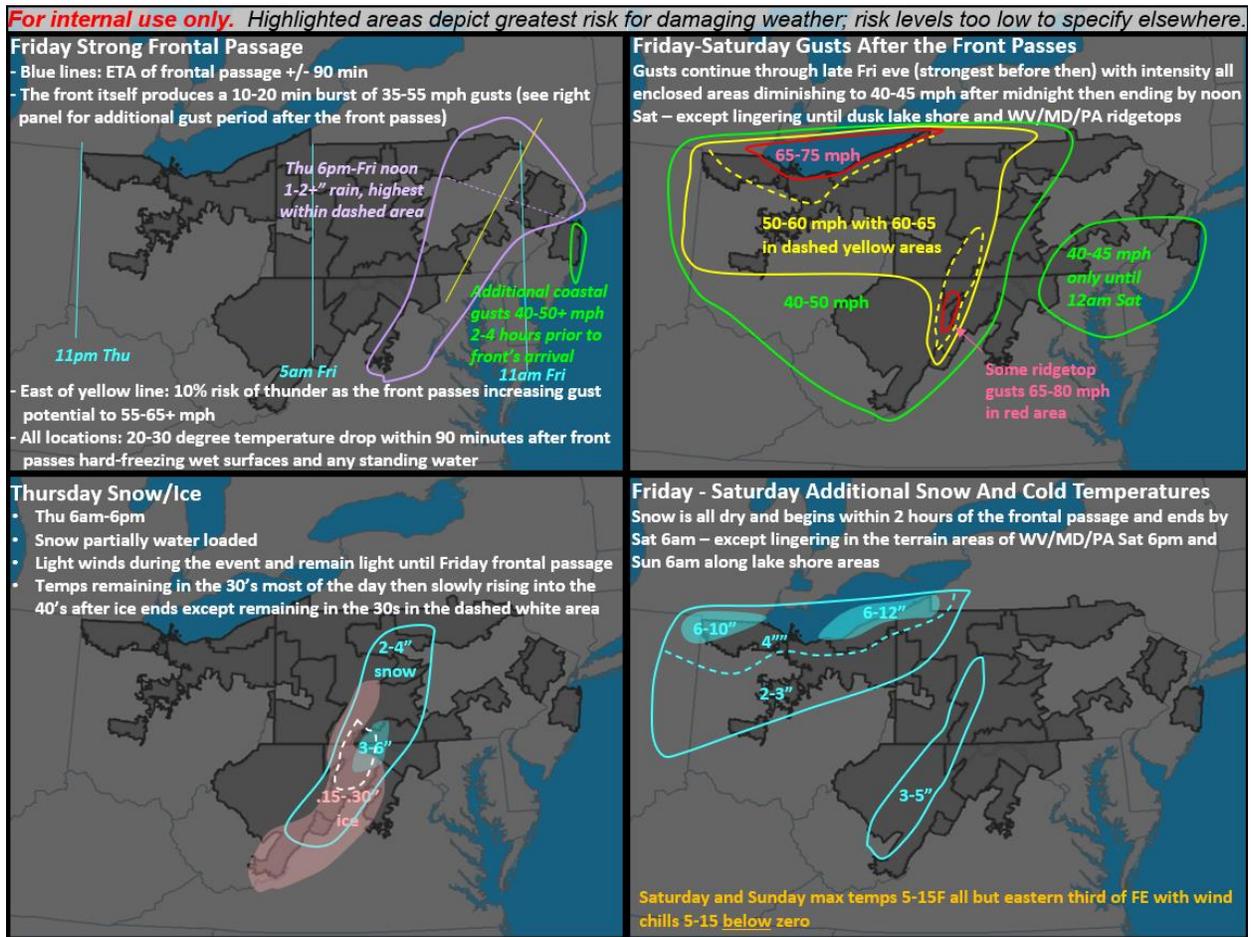

1. Frontal passage: Made ETA earlier by 1 hour, fine-tuned thunder threat area, decreased rain amounts ahead of front in PA/NJ
2. Wind gusts: Refined gust area and increased magnitudes
3. Snow/Ice: Thu – extended south snow/ice area, Fri/Sat – refined areas and limited 4"+ snow

Confidence is normal for all aspects of the graphic except for snow/ice/rain amounts Thu and thunder risk on Fri.

Next Update – Thu 11am

Manousos – 330 396 0059

Workoff – 716 397 4430

Wednesday December 21, 2022 @ 1421

Changes

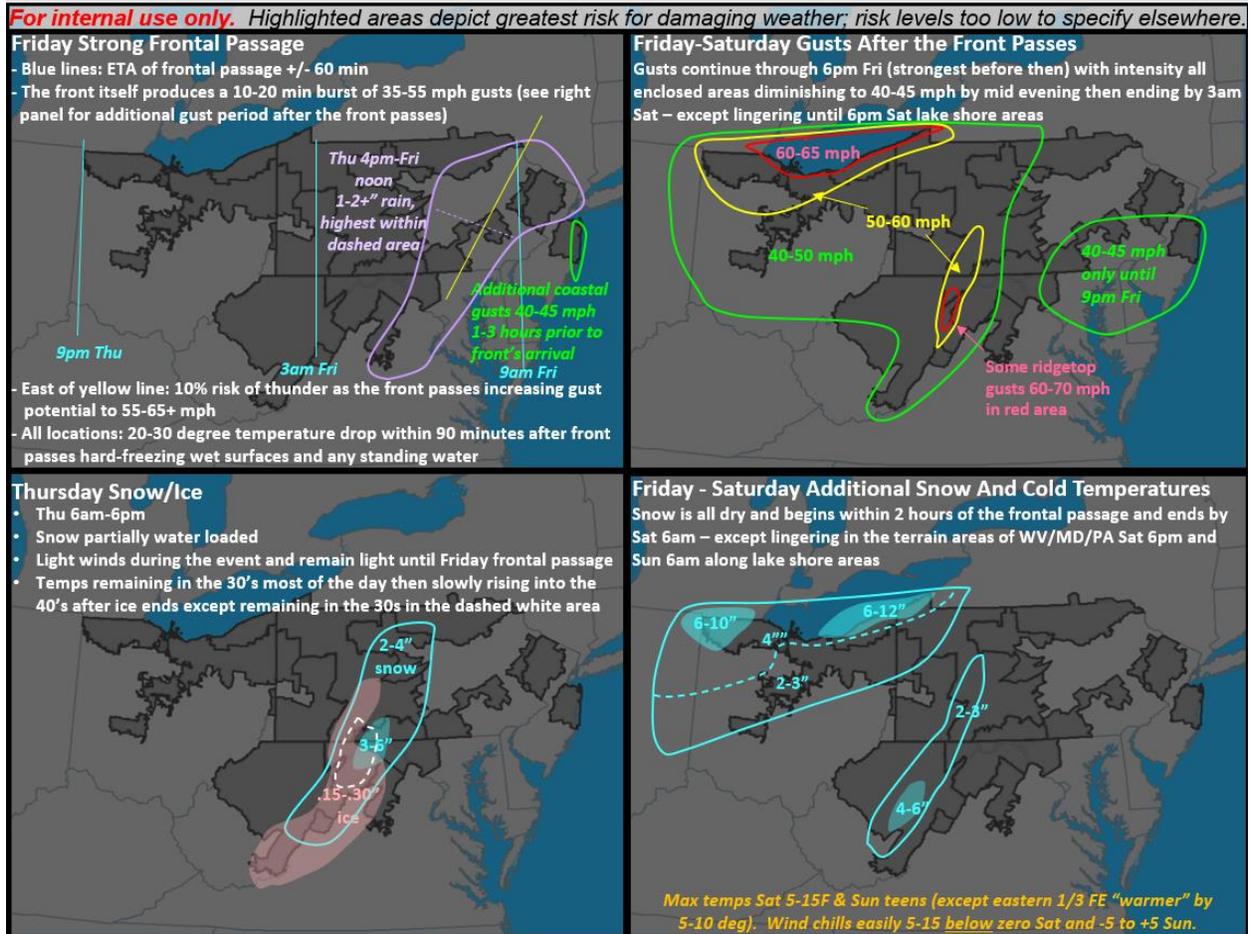

1. Wind gusts intensity: Toned down intensity of gusts by 10 mph after the front passes and decreased duration of wind event by 3-6 hours
2. Frontal passage timing: Made ETA earlier by 2 hours, fine-tuned rain area
3. Snow/Ice Amounts: Fri/Sat small changes to fine tune amounts

Confidence is normal for all aspects of the graphic except for snow/ice/rain amounts Thu and thunder risk on Fri.

Next Update – Thu 11am

Manousos – 330 396 0059

Workoff – 716 397 4430

Thursday, December 22, 2022 @ 0835

Changes (fine-tunings)

1. Wind gusts intensity: Expansion of general gust area and fine-tuned duration
2. Frontal passage timing: Made ETA earlier by 1 hour, fine-tuned rain area
3. Snow/Ice Amounts: Thu trimmed north extend of ice area, Fri/Sat increased general extent of snow area.
4. Thunder: Increased risk for embedded thunder in NJ

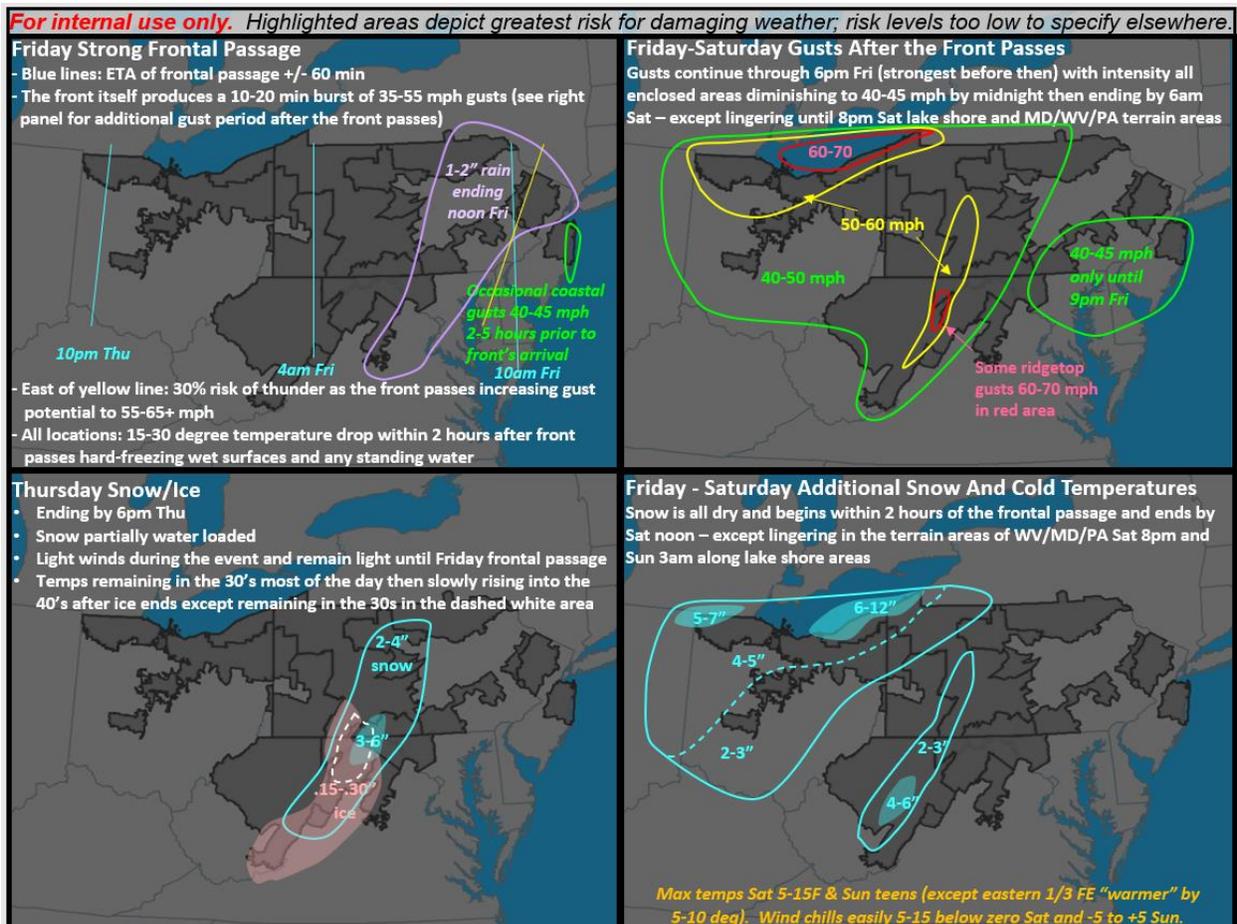

Confidence is above normal for all aspects of the graphics.

As a final warning

- Friday many roads across FE will experience spotty flash freezes within 2 hours of the frontal passage -- which will be exacerbated in areas expecting snow with reduced visibilities due to wind gusts.

- Wind chills through the weekend will be well below zero. Friday frostbite potential is the highest with cold temperatures and high winds (exposed skin will experience frostbite within 30 minutes - reference temperature forecasts [here](#) and wind chill charts [here](#))

Next Update – Fri 11am
 Manousos – 330 396 0059
 Workoff – 716 397 4430

Friday, December 23, 2022 @ 0814

Changes (fine-tunings)

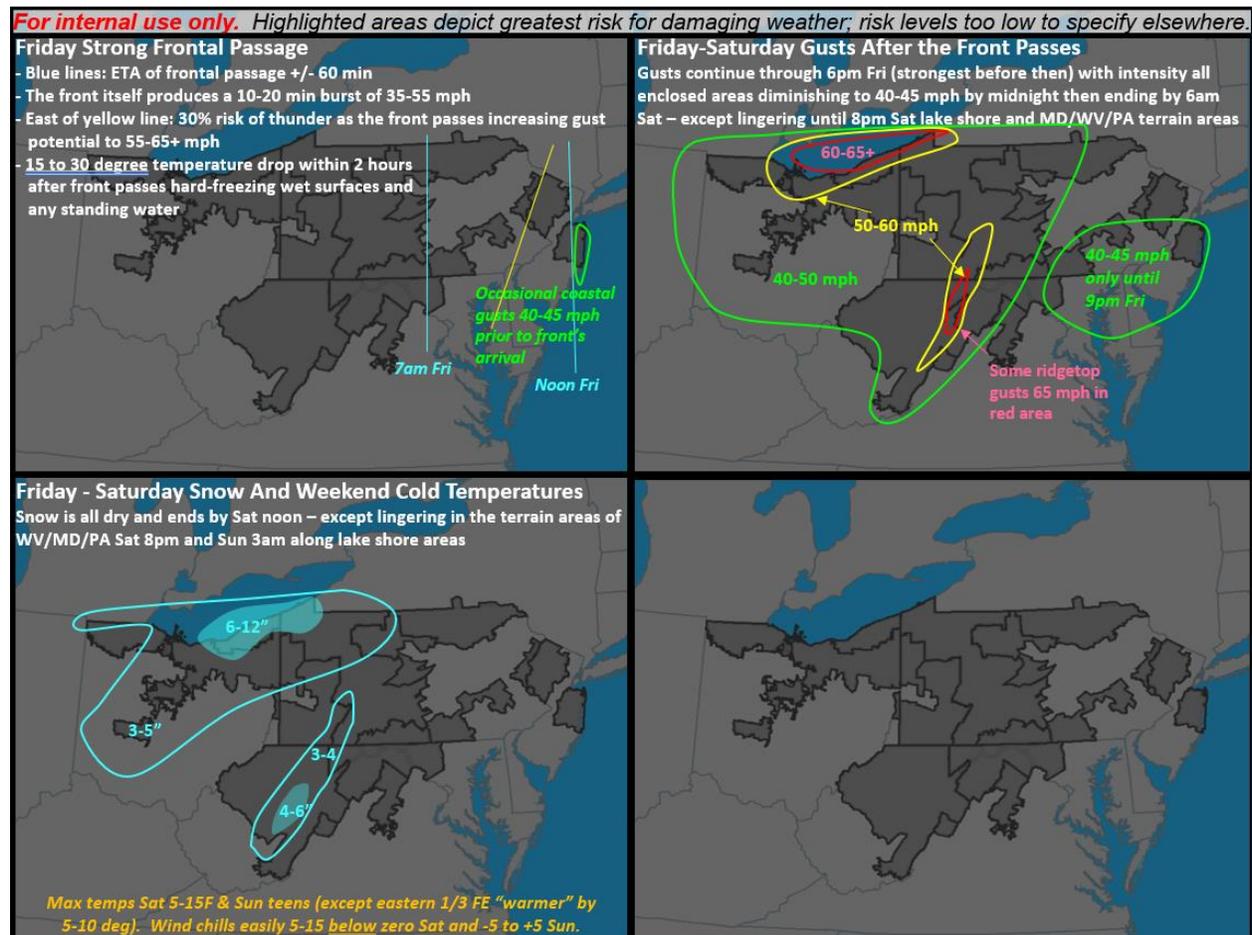

1. Wind gusts intensity: Decrease in max areas by 5 mph
2. Snow Amounts: Removed significant snow amounts in extreme west OH and fine-tuned areas

Confidence is above normal for all aspects of the graphics.

Next Update – Sat 11am

Manousos – 330 396 0059

Workoff – 716 397 4430

Friday, December 23, 2022 @ 1125

Updated to show remainder of event starting noon Fri (some areas have seen most of the snow anticipated and also some of the higher gusts associated with the frontal passage have already occurred).

Confidence is normal for all aspects of the graphics.

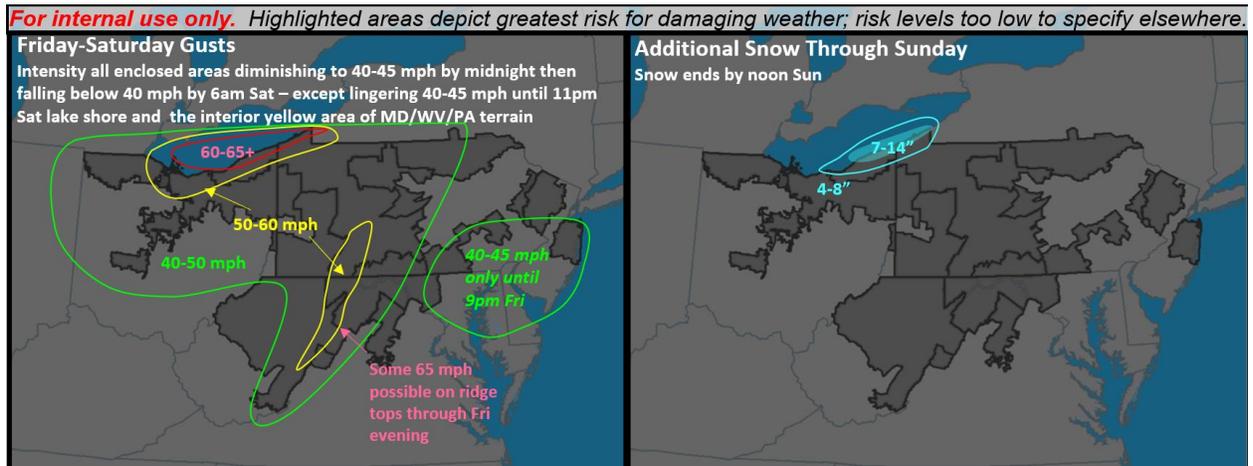

Temperature forecast [here](#) compared to the wind chill chart [here](#) shows exposed skin in areas with -5F to +5F temperatures and gusts 35-50 mph will experience frostbite in about 20 minutes.

A final update will be issued tomorrow morning.

Next Update – Sat 9am

Manousos – 330 396 0059

Workoff – 716 397 4430

Saturday, December 24, 2022 @ 0754

Final updated to show remainder of threats and timing. Confidence is normal for all aspects of the graphics.

1. Today temperatures will rise no higher than 10F except into the teens NJ, east PA, east MD, extreme northwest OH, and west WV
 - a. Wind chills will still be dangerous today. Temperature forecast [here](#) compared to the wind chill chart [here](#) shows exposed skin in areas with 5F to 15F temperatures and gusts 35-45 mph will experience frostbite in about 30 minutes
 - b. This issue is largely alleviated tomorrow as temperatures will be about 10 degrees warmer with lighter winds in all locations
2. Also and not depicted, a final round of light snow may produce a coating in the entire west half of FE Monday between noon and dusk – although not expected to exceed an inch may cause slippery driving conditions that afternoon

Final Update

Manousos – 330 396 0059
