Re: Columbia Water Company; Lead Service Line Replacement Program; Docket No. P-2023-_____; **Petition for Lead Service Line Replacement Program, Related Tariff Changes, Modification of Long-Term Infrastructure Improvement Plan and Waiver of Termination Regulations**

Dear Secretary Chiavetta:

Enclosed for filing on behalf of Columbia Water Company is a Petition for Lead Service Line Replacement Program, Related Tariff Changes, Modification of Long-Term Infrastructure Improvement Plan and Waiver of Termination Regulations (“Petition”). This filing includes the following exhibits and documents as required by the Commission’s Lead Service Line Replacement (“LSLR”) Regulations at 52 Pa. Code §§ 65.51, *et seq.*:

- A. Petition for Lead Service Line Replacement Program, Related Tariff Changes, Modification of Long-Term Infrastructure Improvement Plan and Waiver of Termination Regulations;
- B. Exhibit No. 1 – Lead Service Line Replacement Plan;
 - 1. Appendix A – Brochure on Health Effects of Lead;
 - 2. Appendix B – Instructions on Checking Service Line Material;
 - 3. Appendix C – LSLR Property Agreement Form;
 - 4. Appendix D – LSLR Completion Form;
 - 5. Appendix E – LSLR Routine Procedure;

6. Appendix F – LSLR Information;
 7. Appendix G – LSLR Pitcher Filter Card;
 8. Appendix H – Flushing After an LSLR;
 9. Appendix I – LSLR Sampling Procedures;
 10. Appendix J – LSLR Sample Results Form;
 11. Appendix K – LSLR Cost Form;
 12. Appendix L – Service Line Inventory Legend;
 13. Appendix M – Reimbursement Form;
 14. Appendix N – LSLR Refusal Form;
- C. Exhibit No. 2 – Service Line Inventory;
- D. Exhibit No. 3 – Pro Forma Tariff Supplement to Tariff Water Pa. P.U.C. No. 7;
- E. Exhibit No. 4 – Modified Long-Term Infrastructure Improvement Plan (“LTIIP”); and
- F. Exhibit No. 5 – Responses to 52 Pa. Code § 53.52.

In accordance with 52 Pa. Code § 65.54(a), this Petition is being served upon the Bureau of Investigation and Enforcement, the Office of Consumer Advocate, the Office of Small Business Advocate, and parties of record in the Company’s most recent base rate case at Docket No. R-2023-3040258 as set forth in the attached Certificate of Service. If any of the parties would like to receive a hard copy of the filing, one can be provided upon request.

Please contact the undersigned if you have questions related to this filing.

Very truly yours,

/s/ Whitney E. Snyder

Dated this 21st day of July, 2023

**BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION**

Petition of Columbia Water Company for :
Approval of a Lead Service Line :
Replacement Program, Related Tariff : Docket No. P-2023-_____
Changes, Modification of Long-Term :
Infrastructure Improvement Plan, and :
Waiver of Termination Regulations :

**PETITION OF COLUMBIA WATER COMPANY
FOR APPROVAL OF A LEAD SERVICE LINE REPLACEMENT PROGRAM,
RELATED TARIFF CHANGES, MODIFICATION OF
LONG-TERM INFRASTRUCTURE IMPROVEMENT PLAN,
AND WAIVER OF TERMINATION REGULATIONS**

Columbia Water Company (“CWC” or “Columbia Water” or the “Company”), by and through its undersigned counsel, Hawke McKeon & Sniscak LLP, files its Petition for Approval of a Lead Service Line Replacement Program, Related Tariff Changes, Modification of Long-Term Infrastructure Improvement Plan, and Waiver of Termination Regulations (“Petition”). Pursuant to Section 1311(b)(2) of the Public Utility Code, 66 Pa. C.S. § 1311(b)(2) and the Pennsylvania Public Utility Commission’s (“Commission” or “PUC”) Lead Service Line Replacement Regulations (“LSLR Regulations”), 52 Pa. Code § 65.51, *et seq.*, the Company seeks Commission approval of its plan to replace Company-owned and customer-owned lead service lines (“LSLs”) and to recover the associated costs related to those replacements as set forth herein and in the Company’s Lead Service Line Replacement Program (“LSLR Program”). In accordance with the LSLR Program and proposed tariff revisions, upon approval by the Commission, Columbia Water will be able to begin replacing customer-owned LSLs at its sole cost and recover a return on and of those costs pursuant to Act 120. In support thereof, Columbia Water submits the following:

I. INTRODUCTION

1. Columbia Water is a certificated Class A water distribution public utility. Columbia Water provides public water service to approximately 12,154 residential, commercial, public and industrial customers in Columbia, Marietta and Mountville Boroughs, West Hempfield, Manor, and East Donegal Townships, Lancaster County and Hellam Township, York County, Pennsylvania. Columbia serves its customers through three separate rate districts: (1) Columbia, (2) Marietta, and (3) the former East Donegal Township Municipal Authority (“EDTMA”).

2. As a Pennsylvania public utility, the Company is subject to the regulatory authority of the Commission. The Company must also comply with drinking water, environmental and other operational standards established by the Pennsylvania Department of Environmental Protection (“PADEP”) and the United States Environmental Protection Agency (“EPA”), including the Lead and Copper Rule (“LCR”). The LCR regulations promulgated by the EPA and DEP require water utilities to, among other things, test drinking water inside older homes for lead and take additional action if more than ten percent (10%) of tap water samples exceed the lead concentration limit (*i.e.*, 15 parts per billion).¹ The Company regularly monitors the drinking water in its distribution system in accordance with DEP and EPA standards.

3. Lead is a heavy metal that commonly occurs in our environment. Humans can be exposed to lead through a variety of sources, including dust, soil, or paint chips, as well as through ingestion from drinking water. The deleterious health effects of lead are now well-recognized. As stated in 40 C.F.R. § 141.85(a)(1)(ii):

Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior

¹ *Lead and Copper Rule: A Quick Reference Guide*, Pennsylvania Department of Environmental Protection (June 2020).

problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.

4. Before the adverse effects of lead in drinking water were well-studied or recognized, it was common for water service to be provided through LSLs. This changed in 1986, when Congress passed the Safe Drinking Water Act (“SDWA”).² In relevant part, the SDWA empowered the EPA to set standards for drinking water quality and supervise the States in their implementation of these standards. The SDWA also set standards limiting the concentration of lead in public water systems. Likewise, Pennsylvania passed the Plumbing System Lead Ban and Notification Act (“SLBNA”) in 1991.³ The SLBNA prohibited “the sale of certain leaded materials used in plumbing systems and” prohibited “their use in plumbing system construction, modification, and repair.”⁴

5. In October 2018, Governor Wolf signed into law Act 120 of 2018 (“Act 120”), which became effective on December 23, 2018.⁵ Act 120 amended Section 1311(b) of the public Utility Code in order to, *inter alia*, authorize water utilities to pursue comprehensive replacement of lead service lines that remain in service across Pennsylvania subject to Commission approval.⁶ Specifically, Act 120 provides that replacing a customer-owned LSL does not make the utility the owner of the new service line on the customer’s property.⁷ Act 120 also directs the Commission to establish standards to ensure a warranty on the utility’s replacement work and reimburse

² See 42 U.S.C. § 300f - § 300j-27

³ See 35 Pa. C.S. § 723.1 - §723.17

⁴ 35 Pa.C.S. § 723.2(1).

⁵ Act of October 24, 2018, P.L. 738, No. 120.

⁶ 66 Pa. C.S. § 1311(b)(2)(v)-(vi).

⁷ 66 Pa. C.S. § 1311(b)(2)(i)

customers who replaced lead service lines at their own cost.⁸ Additionally, Act 120 establishes the accounting and ratemaking treatment of lead service line replacement costs by providing that the customer-owned portion of LSLs may be included in a regulated utility’s rate base upon which it is authorized to earn a return.⁹

6. Pursuant to Act 120, the Commission promulgated its LSLR Regulations at 52 Pa. Code § 65.51, *et seq.*, which became effective on July 23, 2022. 52 Pa. Code § 65.53 states that “[a]n entity...shall remove and replace all LSLs, whether entity-owned or customer-owned, within or connected to its water distribution systems within 25 years from the effective date of this section for a Class A public utility...” Moreover, pursuant to 52 Pa. Code § 65.55(a), a Class A public utility or authority shall file a LSLR Program within 1 year of the effective date of this section, or by July 23, 2023.

7. Through this Petition, the Company is requesting approval of its LSLR Program in compliance with the Commission’s LSLR Regulations to address the removal and replacement of lead service lines in its service territory.

II. LEGAL STANDARDS

8. Section 1311(b)(2)(i) of the Code provides that the value of the property of a public utility providing water service shall include the original cost incurred by the public utility for the replacement of a customer-owned LSL, performed concurrent with a scheduled utility main replacement project or under a commission-approved program, but that the customer shall continue to own the replacement water service line. 66 Pa. C.S. § 1311(b)(2)(i). The original cost incurred is to be “deemed other related capitalized costs that are part of the public utility’s distribution

⁸ 66 Pa. C.S. § 1311(b)(2)(vii)

⁹ 66 Pa. C.S. § 1311(b)(2)(i)-(iii).

system,” 66 Pa. C.S. § 1311(b)(2)(ii), and these costs may be allocated “among each customer, classes of customers and types of service” 66 Pa. C.S. § 1311(b)(2)(iv).

9. Section 1311(b)(2) further provides that in connection with its request for Commission approval for the replacement of the customer-owned LSL, the utility must provide a new tariff supplement, which must include a cap on the maximum number of customer-owned LSLs that can be replaced annually. 66 Pa. C.S. § 1311(b)(2)(v) and (vi).

A. Time for LSL Replacements

10. The Company is a Class A water public utility. Accordingly, it has until July 23, 2047 (25 years from the effective date of the LSLR Regulations) to replace all LSLs, whether Company-owned or customer-owned. *See* 52 Pa. Code. § 65.53(b). In addition to the LSLR Regulations, the PADEP and the LCR also set forth requirements relating to the timing of LSL replacements.

B. LSLR Program Requirements

11. Pursuant to Sections 65.54 and 65.55(a) of the LSLR Regulations, a petition seeking approval of an LSLR Program must:

- a. Be served upon the Commission, the Office of Consumer Advocate, the Commission’s Bureau of Investigation & Enforcement (“I&E”), the Office of Small Business Advocate (“OSBA”) and the parties of record in the Company’s most recent base rate case;¹⁰
- b. Include a modified Long Term-Infrastructure Improvement Program (“LTIIP”) containing an LSLR plan that is a separate and distinct component thereof;¹¹
- c. Include an LSLR Program that is filed within one year of the effective date of this section¹² and includes:¹³

¹⁰ 52 Pa. Code § 65.54(a).

¹¹ *Id.*, at § 65.54(b).

¹² *See* 52 Pa. Code § 65.55(a).

¹³ *See* 52 Pa. Code § 65.55(b).

- i. A LSLR plan as described in § 65.56 (relating to LSLR plan requirements);¹⁴
- ii. A pro forma tariff or tariff supplement containing the proposed changes necessary to implement the entity’s LSLR program as described in § 65.58 (relating to pro forma tariff or tariff supplement requirements);¹⁵ and
- iii. Information required by the Commission for filings under 66 Pa. C.S. § 1308 (relating to voluntary changes in rates), including statements required by § 53.52(a) (relating to applicability; public utilities other than canal, turnpike, tunnel, bridge and wharf companies).¹⁶

C. LSLR Plan Requirements

12. The LSLR plan must contain, at a minimum:

- a. A service line inventory, which complies with the [EPA] regulation at 40 C.F.R. 141.1--143.20, as enforced by the [PADEP],¹⁷ and identifies any underlying assumptions contained therein;¹⁸
- b. A planning and replacements section,¹⁹ which includes, among other things:
 - i. The entity’s projected annual investment in LSL replacements and financing sources for same;
 - ii. The projected number of LSLs to be replaced each calendar year with explanation of how the projection was determined and a statement that the number is consistent with the entity’s annual cap on LSL replacements;
 - iii. The prioritization criteria considered by the entity when developing the LSLR schedule;
 - iv. An explanation of the entity’s processes and procedures to address emergency repairs or replacements which reveal LSLs;

¹⁴ See 52 Pa. Code § 65.55(b)(1).

¹⁵ See 52 Pa. Code § 65.55(b)(2).

¹⁶ See 52 Pa. Code § 65.55(b)(3).

¹⁷ See 52 Pa. Code § 65.56(a)(1) and (a)(3) (related to timing of inventory)

¹⁸ See 52 Pa. Code § 65.66(a)(4); *see also* 52 Pa. Code §§ 65.66(a)(5) and (a)(6) (requiring that the entity provide information to the Commission on the progress of its service line inventory in its annual LSLR program report and once complete, to incorporate the inventory into the next LSLR plan update).

¹⁹ 52 Pa. Code § 65.66(b).

- v. The entity's processes and procedures to obtain acceptance of a LSLR prior to LSLR project commencement from the customer/property owner and following acceptance;
 - vi. The entity's lead/material recycling and disposal efforts, including a description of what the entity will do with proceeds from recycling and disposal efforts;
 - vii. The industry-accepted practices that the entity plans to use to replace entity-owned and customer-owned LSLs; and
 - viii. A detailed explanation of how the entity's acquisition of water distribution systems will be integrated into the entity's efforts to complete LSLRs throughout its water distribution systems.
 - ix. The procedure for documenting a customer/property owner's refusal of, or failure to accept, the offer by the entity to replace a LSL.
- c. A communications, outreach and education section, which complies with EPA regulations at 40 C.F.R. 141.85 (regarding public education and supplemental monitoring and mitigation requirements), and which includes copies of all printed and broadcast material to be distributed under the LSLR Program and the development of a web site within twelve months of Commission approval that provides certain information to customers.²⁰

D. Minimum Requirements for Tariff Supplement

13. Section 65.58 of the LSL Regulations sets forth the proposed tariff changes that will be deemed necessary to implement the LSLR Program, addressing at a minimum:

- a. A cap on the number of LSLs that can be replaced annually;
- b. Information relating to service line demarcation, including a definition for customer-owned LSLs;
- c. Information related to partial LSL replacements;²¹
- d. Reimbursements for prior customer-owned LSL replacements, as appropriate; and
- e. A warranty for the work performed by the entity or its contractor for a term of not less than two years, and coverage information.

²⁰ 52 Pa Code § 65.56(c)(1). Class A public utilities are also required to develop an LSLR section of their website within 12 months of Commission approval of the LSLR Program. See § 65.56(c)(2).

²¹ See also 52 Pa. Code § 56.62.

E. Accounting Requirements

14. Section 65.60 of the LSL Regulations mandates that costs for LSL replacements must be recorded under separate and distinct subaccounts and permits the entity to defer income taxes related to LSL replacements under certain circumstances.

III. THE COMPANY'S LEAD SERVICE LINE REPLACEMENT PROGRAM

15. The various LSL Regulations contain differing time frames as to when LSLs must be replaced. The Commission requires replacement within a twenty-five (25) year period from the effective date of the LSLR Regulations for Class A public utilities, *i.e.*, on or before July 23, 2047.²² The Company, a Class A water public utility, will replace all LSLs within twenty-five years under the terms of its LSLR Plan, which is attached to this Petition as **Exhibit 1**.

A. Service Line Inventory

16. Columbia Water has prepared its Service Line Inventory and is attached to the LSLR Plan as **Exhibit 2**. It complies with EPA's regulations at 40 C.F.R. 141.1--143.20, as enforced by PADEP. The Service Line Inventory will be updated annually, at a minimum, or as additional information becomes available. Likewise, if Columbia Water purchases any water distribution system in the future, the Service Line Inventory will be updated to include the acquired system's information and meet the deadlines set forth by the Commission.

17. The Service Line Inventory for CWC identifies material types on both the company-owned and customer-owned sides of the service lines. All discovered lead components have been detailed.

²² 52 Pa. Code § 65.53(b).

18. CWC plans to identify, at a minimum, a cumulative average of 10.0% of the initial unknown service materials annually by means of utilizing existing records, modeling, statistical analysis, and mechanical excavation.

19. There are no assumed service line materials in the Service Line Inventory.

20. A Service Line Inventory Legend and Instructions is attached to the LSLR Plan as **Appendix L**.

B. Projected Annual Replacement

21. CWC plans to replace approximately 50 lead service lines per year. This projection was determined by estimating the total number of lead service lines to be less than 400. After all existing records have been inventoried, CWC will review this annual projection and adjust it as necessary. The projected annual investment in lead service line replacements (“LSLR”) is \$250,000. The average cost of \$5,000 per LSLR was determined by reviewing the average cost incurred by the Company when replacing service lines over the past few years.

22. The cost incurred by Columbia Water for LSLRs will be funded with a combination of commercial loans, cash from operations, and/or loans issued by the Pennsylvania Infrastructure Investment Authority (“PENNVEST”). Moreover, pursuant to Act 120, the Company intends to seek recovery of these costs in its PENNVEST Surcharge, Distribution System Improvement Charge (“DSIC”), and/or in base rates in a future base rate proceeding, where appropriate and as applicable.

C. Prioritizing Lead Service Line Replacements

23. Columbia Water will have three simultaneous procedures for replacing LSLs, including: (1) replacing LSLs in conjunction with old main replacements, (2) replacing LSLs

discovered by mechanical excavation, and (3) replacing customer-owned LSLs discovered inside a building.

24. With respect to replacing LSLs in conjunction with old main replacements:

a. Columbia Water will analyze record-reviews of old age mains within the oldest parts of the distribution system to determine which water mains in the distribution system should be replaced. Prior to choosing a target area, the Company's distribution crew will review records and/or physically inspect a portion of the service lines within a proposed area to gauge the likelihood of lead within that area. Coordination with municipalities will take place to minimize costs and minimize impacts on roads and neighborhoods.

b. Once the targeted areas are determined, the projects will be posted on the Columbia Water website at least six (6) months in advance of the work being done. Prior to the work being initiated, Columbia Water staff will reach out to the customers to determine all service line materials within the affected area, and to provide the customers with detailed information regarding the routine procedures and the potential health risks involved.

25. With respect to replacing LSLs discovered during mechanical excavation, areas with a higher likelihood of having lead service lines will be prioritized for these projects. Columbia Water will physically excavate the service lines to determine material types. If a service line is determined to be lead, coordination will occur with the customer(s) and/or the property owner to have the service line replaced.

26. With respect to replacing customer-owned LSLs discovered inside the building, Columbia Water will reach out to customers with lead, galvanized requiring replacement, or unknown service lines. These customers will receive documentation describing the health effects related to lead. See **Appendix A** attached to the LSLR Plan for a draft copy of the documentation.

The customers will be provided with information explaining how to determine their own service line material and what to do if they believe their service line material is lead. See **Appendix B** attached to the LSLR Plan for related documentation. Columbia Water staff will also be checking and documenting service line material in conjunction with meter changes. Customers who discover a lead service line may call and schedule to have their service line replaced. Columbia Water will schedule to replace customer-owned lead service lines in accordance with the tariff. If the company side is lead, it will be replaced at the same time with the customer side. These replacements will occur as discovered.

27. Determination of LSLR projects under these three procedures will be prioritized based on targeted sensitive populations as defined by the EPA and PADEP, which includes areas with elevated levels of lead in tap water, areas with high concentrations of lead service lines, and/or areas of the distribution system which have elevated corrosion rates. These areas are more specifically found on houses built prior to 1950 with water mains older than 1970 within Columbia Borough and Marietta Borough.

28. A list of sensitive populations has also been developed to determine the service line materials. The list includes schools, nursing homes, large apartment buildings, churches, and industries. These service lines have been or will be detailed as sensitive populations in the Service Line Inventory. Homes with multiple meters and multiple family residents will also be prioritized to determine service line material.

D. Emergency Repairs and Replacements

29. If a lead service line is leaking or otherwise defective at the time it is discovered during an emergency, CWC will replace the lead service line in accordance with its tariff. Columbia Water staff will maintain the proper equipment and tools necessary for emergency

service line replacements. If a lead service line is discovered during an emergency but is not leaking, the replacement of the line will be scheduled for replacement at a later date.

30. If an emergency LSLR replacement would cause Columbia Water to exceed its annual cap, Columbia Water proposes that it be allowed to increase its current annual cap by the number and cost of the emergency replacement(s) and decrease its next annual cap by the same number and cost. This process would be akin to the process used for any reimbursements that cause the Company to exceed its annual cap. *See* Section IV.E, *infra*; *see also* 52 Pa. Code § 65.58(d)(2).

E. Processes and Procedures to Obtain Acceptance of a LSLR

31. When a lead service line is discovered at a property, CWC will contact the customer(s) and/or property owner to let them know of the discovery. Customers will be given information explaining the health effects of lead and what they should do to prevent lead in their water. *See* **Appendix A** of the LSLR Plan. Columbia Water staff will then let the customer(s) and/or property owner know the process to schedule to have their service line replaced and when the scheduled replacement is to occur.

32. Prior to replacing the property owner's portion of a lead service line, an agreement between Columbia Water and the property owner, or representative of the property-owner, must be signed ("Property Owner Agreement"). *See* **Appendix C** of the LSLR Plan. Columbia Water will keep these forms on file. As set forth in the LSLR Agreement, Ownership of the customer-side portion of a service line will not change as part of the Company's LSLR Plan. The customer or property owner will continue to be subject to the general responsibility to maintain his or her portion of the service line.

33. When the customer-owned LSL crosses one (or more than one) property to access another, the Company will attempt to obtain approval from all property owners to allow the work necessary to replace the Customer-Owned LSL and evaluate solutions available to install conforming service lines. If the Company is unable to obtain the neighboring property owner or owners' consent, and there is no other viable and economic solution (to be determined in the Company's sole discretion) such as installing conforming service lines, the Company will commence procedures to terminate service to the neighboring property owner or owners' property as set forth Section III.J, *infra*.

34. All customers and property owners with an LSLR will receive documentation prior to work being initiated explaining the health effects of lead and information on flushing their interior plumbing. See **Appendix F** of the LSLR Plan. Customers will be given a pitcher-filter prior to the LSLR. Instructions on how to use the pitcher-filter are provided. If a customer cannot be contacted prior to the LSLR, a note will be placed in an area notifying the customer to collect, or have delivered, a pitcher-filter. See **Appendix G** of the LSLR Plan. If the affected service line serves more than one residence, such as a multi-unit building or a non-residential unit, Columbia Water will provide the documentation and pitcher-filter to every unit in the building.

F. Company Practices in Replacing Lead Service Lines

35. **Appendix E** of the LSLR Plan details the Company's LSLR routine procedure for working with customers to replace lead service lines. These procedures will be publicly available at the main office and on the Columbia Water website. The Company will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for Lead Service Line Replacements. The Company will not replace any landscaping, interior

finishes, paving, seeding, or walkways. All restoration costs shall be borne by the Customer or property owner, if the Customer is not the property owner.

36. As part of its replacement efforts, Columbia Water intends to replace LSLs using existing routes through a combination of pipe splitting and/or pipe pulling. This approach removes or displaces existing pipe while simultaneously replacing it with a new pipe and is the preferred method under normal circumstances.

37. Under atypical circumstances, Columbia Water may utilize guided boring to install new pipe along a different route or using open trench excavation to remove and replace the pipe. The appropriate replacement technique will depend on a combination of many site-specific characteristics, including, but not limited to, time constraints, soil characteristics, depth to ground water or rock, depth of road foundation, condition of the service line, proximity of other utility services (e.g., electric, gas, cable, sewer, storm water), site conditions (e.g., access, parking, paving, landscaping, overhead obstructions), pipe conditions (e.g., length of pipe, pipe diameter and wall thickness, bury depth, configuration, and repair history, and conditions inside the home like a finished basement with limited access to the water meter and plumbing.

38. All lead pigtailed, goosenecks or connectors attached to a lead line will likewise be replaced and removed.

39. New service line installations will be copper or plastic material.

G. Post-Replacement Procedures

40. Columbia Water will assist customers with the flushing of the customer's interior plumbing after an LSLR. Information on flushing is in **Appendix H** of the LSLR Plan, which is provided to all customers that have an LSLR. A detailed description of how to flush will also be found on Columbia Water's website.

41. Columbia Water will be offering to collect water samples for all customers who have an LSLR. If the customer wants their water sampled, Columbia Water will collect one set of follow-up first draw and 5th liter tap samples that will be taken between three to six months after completion of the LSLR. Customers will be provided sampling instructions to collect the water samples. See **Appendix I** of the LSLR Plan.

42. If either of the follow up samples exceed 15 ppb of lead, Columbia Water will provide the results of both samples to residents as soon as practicable but no later than three calendar days after becoming aware of the results. If none of the follow up samples exceed 15 ppb of lead, Columbia Water shall provide the results of the samples to residents within 30 days after receiving the results. Accompanying information from Columbia Water includes an explanation of the effects of lead, a list of steps consumers can take to reduce exposure to lead in drinking water, contact information for Columbia Water, and the maximum contaminant level goal and the action level for lead, as well as the definitions for these two terms. The follow-up sample results, and accompanying information will be delivered to the customer through one of the following methods – electronically, mail, phone, hand delivered, or another method approved by PADEP. See **Appendix J** of the LSLR Plan. If the offer to follow-up sample is not accepted by the customer, no sample will be collected, and the decline of sampling will be documented.

43. The Company will also update the Service Line Inventory as lead service line replacements are made. Columbia Water is in the process of incorporating the Service Line Inventory into its Geographic Information System (“GIS”). Once the Service Line Inventory is on the GIS, the Service Line Inventory can be updated in real time.

44. After the replacement is completed, the Company will document the pipe-specific information required pursuant to 52 Pa. Code § 56.59 to submit to the Commission as part of its

annual asset optimization plan (“AAO Plan”) filings under 52 Pa. Code § 121.6. See **Appendix K** of the LSLR Plan.

H. Recycling and Disposal Efforts

45. Columbia Water will dispose of or recycle LSLs at an appropriate facility to ensure proper disposal of all lead. Columbia Water does not anticipate profiting from disposing of or recycling LSLs. However, any proceeds from such efforts will be reflected in Columbia Water’s Operating Revenue. The customer would not have any right to the proceeds of a recycled or disposed LSL. Columbia Water will keep scrap receipts of LSLs on file.

I. Integrating Future Acquisitions of Water Distribution Systems

46. If the Company were to acquire water distribution systems in the future, it would update its service line inventory in accordance with 52 Pa. Code § 65.56(a)(2) at the time of completing the acquisition.

47. Moreover, based upon the results of the updated inventory, the Company may seek Commission approval to revise its LSLR Plan to increase the annual cap on LSLRs if necessary.

J. LSLR Refusal

48. If a customer or property owner refuses to grant permission to CWC to replace the lead service line or refuses to have it replaced, Columbia Water will:

- a. Provide the customer and property owner, if the customer is not the property owner, with a complete disclosure of the known health hazards from the continued use of a LSL, see **Appendix A** of the LSLR Plan;
- b. Inform the customer or property owner, if the customer is not the property owner, that refusal or failure to accept will require replacement of the customer-owned LSL, at the customer or property owner’s expense, within 1 year from LSLR project

commencement for the customer or property owner, if the customer is not the property owner, to be eligible for reimbursement; and

- c. Communicate to the customer and property owner, if the customer is not the property owner, that failure to allow Columbia Water to complete the LSLR or to replace the customer-owned LSL concurrent with the replacing the Company-owned LSL will lead to termination of water service under the provisions of Columbia Water's tariff.

49. If the customer or property owner, if the customer is not the property owner, still refuses replacement of the customer-owned LSL, the Company will require the customer or property owner, if the customer is not the property owner, to sign a form documenting their refusal. *See **Appendix N*** of the LSLR Plan. If the customer or property owner refuses or fails to sign the refusal form, the Company will make a record of and document the customer's refusal.

50. The Company will then schedule to replace its portion of the Company-owned LSL and notify the customer in writing of the partial LSLR no later than ten days prior to the scheduled replacement and terminate water service at that location the day prior to replacing the Company-owned LSL.. The Company is requesting that such notice and termination shall be deemed consistent with Chapter 14 of the Public Utility Code and that the Company is not required to comply with termination procedures described in other portions of its Tariff or the Commission's regulations. *See Section VIII, infra.*

51. Columbia Water will not connect an Applicant to water service where a property owner previously refused or failed to accept the utility's offer of a LSLR until the Applicant verifies that the replacement of a customer-owned LSL by providing a paid invoice from a licensed contractor or notarized statement from a licensed contractor attesting to completion of the LSLR.

K. Publicly Accessible Website

52. CWC will add lead service line documentation to its website within one (1) year of Commission approval of its LSLR Program. A tab will be created on the website's main page, which will link a user to a specific page about lead service lines. Appendices A, B, F, H, and M will be made available on the website through links. These documents provide information about LSLR routine procedures, flushing, determining service line material, and the health effects associated with lead.

53. The website will include information about upcoming LSLR projects. Projected main replacement projects will be posted on the LSLR webpage and provide customers with specific information on when LSLR projects will occur.

54. A secure, online interactive map will be provided for customers to have the ability to determine if a lead service line may exist at their location. A method will be provided to allow a customer to request assistance in determining if their service line is a lead service line.

55. The web page will include information regarding the reimbursement requirements and instructions for customers to determine their ability for reimbursement of a previous LSLR. Columbia Water will explore options for providing an online tool for customers to determine their eligibility for reimbursement.

56. Any community outreach programs or coordination efforts will be posted on the website.

IV. RELATED TARIFF CHANGES

57. Attached as **Exhibit 3** to this Petition is a Pro Forma Tariff Supplement to Tariff Water Pa. P.U.C. No. 7 ("Pro Forma Tariff"), which sets forth the proposed tariff changes in

compliance with 52 Pa. Code § 56.58. The Pro Forma Tariff addresses the following regulatory requirements set forth by the Commission.

A. Annual Cap

58. The Company has proposed to limit LSLRs to 50 customer-owned LSLs or \$250,000 on an annual basis, whichever is less. This is consistent with the Company's annual LSLR projections. However, as discussed below, if a Customer reimbursement or an emergency LSLR causes Columbia Water to exceed its annual cap, Columbia Water will increase its current annual cap by the number and cost of emergency repairs and/or reimbursements and decrease its annual cap by same for the following year only.

B. Ownership of the Service Line

59. The Company has defined the customer-owned lead service line as the portion of the lead service line extending from the curb stop to the meter or one foot inside a building foundation, whichever is farther. The curb stop is further defined as “[a] water service shutoff valve located in a water service line near the curb or edge of street and between the water main and the building.” This is consistent with the Commission's definition at 52 Pa. Code § 65.52. The Company also proposes that if a shutoff valve is not located within 12 inches of the structure wall, the Company may install a shutoff valve during the LSLR to serve as a point of demarcation between the property's service line and the property's interior water distribution piping.

60. The Company proposes in its Promo Forma Tariff that it will use the LSLR planning process to perfect its ownership of the portion of the service line located within the then-existing right-of-way to ensure that the Company can obtain necessary permits during the planning phase of a LSLR project.

C. Prohibition on Partial LSLRs

61. The Pro Forma Tariff also sets for the following regarding the prohibition on partial LSLRs:

a. Neither a customer nor a property owner may install a partial LSLR. A partial LSLR installed after July 23, 2022, shall result in immediate termination of service until such time as the Company can replace the Company-owned LSL under 52 Pa. Code § 65.62 (relating to prohibition on partial LSLRs). The Company requests Commission approval that immediate termination shall be deemed consistent with Chapter 14 of the Public Utility Code and that the Company is not required to comply with termination procedures described in other portions of its Tariff or the Commission's regulations.

b. Where a customer or a property owner, if the customer is not the property owner, elects to replace the customer-owned LSL, the customer or property owner shall replace the customer-owned LSL concurrent with the Company replacing the Company-owned LSL, provided that the customer or property owner, if the customer is not the property owner, shall provide the public utility or authority at least 90 days' notice prior to replacing the customer-owned LSL.

c. The Company shall not connect an Applicant for water service to the Company-owned service line at a property where a customer or property owner, if the customer is not the property owner, previously refused or failed to accept the Company's offer of a LSLR until the Applicant verifies the replacement of the customer-owned LSL by providing a paid invoice from a licensed contractor where applicable or a verified statement from a licensed contractor attesting to completion of the LSLR.

D. Non-Owner Occupied Properties

62. Where Columbia Water is aware that (1) a property has a LSL, (2) is not occupied by the legal owner of the property, and (3) the property owner cannot be identified, located, or has failed to respond to multiple attempts by the Company to replace the customer-owned LSL at no direct cost to the property owner, the Company proposes that it will, in its sole discretion, replace the customer-owned LSL without obtaining authorization from the property owner to prevent termination of water service. Columbia Water believes this provision is reasonable and in the public interest to prevent extended periods of termination of service to tenants as a result of an otherwise absent property owner.

E. Reimbursements

63. Columbia Water proposes to reimburse an eligible customer or property owner, if the customer is not the property owner, who replaced their LSL within an LSLR Project Area within 1 year before or after LSLR project commencement.

64. To obtain a reimbursement, the Company has prepared a reimbursement form that will be available on the Company's website. See Appendix M of the LSLR Plan. To obtain a reimbursement the customer or property owner, if the property owner is not the customer, will be responsible for providing, among other things, proof of the existence of a lead service line at the property, a detailed estimate of work from the contractor, and a paid invoice. Instead of a detailed estimate, a verified statement from the contractor attesting to completion of a LSLR may be sufficient in the Company's discretion.

65. Eligible customers seeking reimbursement for their lead service line replacement can complete the form and either mail, e-mail, fax, or hand deliver a copy of the documents to Columbia Water.

66. A customer or property owner, if the customer is not the property owner, located within a LSLR project area is eligible for a reimbursement of LSLR expenses up to 125% of the average cost over the last twelve (12) months, on a rolling basis, the Company would have incurred to perform the replacement of a similarly-sized service line, not to exceed the actual cost. To track these costs, for every lead service line replaced, an LSLR cost form will be completed by the Company (“LSLR Cost Form”). See **Appendix K** of the LSLR Plan. CWC will use these completed forms to establish the reimbursement amount for the customers who choose to use their own contractors. All future lead line replacement costs will also be added to the spreadsheet to keep the reimbursement cost current.

67. Upon submission of the reimbursement form, the Company will review the information that was provided within ninety days of receiving the reimbursement form to determine eligibility for a reimbursement. If sufficient information has not been provided at the time of submitting the reimbursement form, the Company will contact the Customer or property owner to request the necessary information to determine eligibility. The Company will have an additional forty-five days from the time it receives the additional information to determine a customer’s eligibility for reimbursement. Reimbursements will be paid directly to the Customer or property owner, if the Customer is not the property owner, through the issuance of a check. The Company will issue a check within ninety days after verifying that the Customer or property owner is eligible for reimbursement.

68. If the reimbursement causes Columbia Water to exceed its annual cap, Columbia Water will increase its current annual cap by the amount of the reimbursement and decrease its next annual cap by this amount.

F. Warranty

69. Columbia Water proposes a two-year warranty for materials and workmanship commencing from the date the customer-owned lead service line replacement is complete.

70. This warranty shall cover repairs conducted by the Company or a contractor at the Company's request of the replaced customer service line up to \$2,500 per customer so long as the customer allows access to the property for repairs.

71. Only material defects, and incomplete installation methods are covered by the warranty. The warranty does not cover, among other things, damage caused by natural disasters, acts of God, fires, terrorism, excavation activities, acts of sabotage, or deliberate damage. The Company shall have no liability for any damages not covered by the warranty.

72. Lastly, the warranty shall cover the restoration of surfaces, which refers to backfilling excavation and returning grade to level. However, it does not include replacing sidewalks, stone or asphalt driveways, or landscaping outside of a right-of-way.

V. MODIFIED LTIP

73. Pursuant to 52 Pa. Code § 65.54(b), the Company has attached as **Exhibit 4** a copy of a modified LTIP that incorporates the Company's LSLR plan as a separate and distinct component of its LTIP.

VI. ACCOUNTING AND RATEMAKING TREATMENT FOR CUSTOMER-OWNED LSL REPLACEMENT COSTS

74. Pursuant to Act 120, the Company will record the original cost of customer-owned LSL replacements in a separate account that is segregated from other service line accounts as required by the LSL Regulations. Further, pursuant to Act 120, the Company is entitled to record a return on and of its investment to replace customer-owned LSL replacements in future base rate cases and through its existing DSIC in between rate cases. To the extent the Company obtains any

PENNVEST loans to fund the cost of customer-owned replacements, it will seek recovery of those costs through its existing PENNVEST surcharge.

VII. COLUMBIA WATER'S LSLR PROGRAM IS IN THE PUBLIC INTEREST

75. Federal and Pennsylvania regulations impose an obligation on water systems to provide drinking water that is below the lead action level at the customer's tap regardless of whether the lead originates in the customer-owned or the Company-owned portion of the service line.²³ These requirements were developed in response to the serious health effects associated with the ingestion of lead.

76. To that end, the Company's LSLR Program seeks to replace both the company-owned and customer-owned portion of any lead service lines, including galvanized service lines requirement replacement, in accordance with the requirements set forth by the Commission in its LSLR Regulations.

77. Columbia Water's LSLR Program is a comprehensive solution to address lead service lines in its system in an expeditious manner to address the recognized health risk posed by lead in drinking water. Accordingly, it is in the public interest and should be approved by the Commission.

VIII. WAIVER OF TERMINATION REGULATIONS

78. Section 65.62(c) of the Commission's LSLR Regulations state that "[w]here a customer or property owner, if the customer is not the property owner, refuses, or fails to accept, an entity's offer to replace a customer-owned LSL, the entity shall replace the entity-owned portion of the LSL in accordance with the entity's LSLR plan and terminate service in accordance with the

²³ See 40 C.F.R. § 141.80(c)(2); 25 Pa. Code § 109.1102(a)(1).

entity's tariff."²⁴ The LSLR Regulations also provide that an entity shall terminate service where there is reasonable evidence indicating service is being provided through a partial LSLR that was installed after the effective date of the Commission's LSLR Regulations.²⁵

79. In its Final Rulemaking Order, the Commission stated that "to resolve concerns regarding terminations, [public utilities] may petition the Commission for a waiver of the termination requirements under 52 Pa. Code § 5.43."²⁶

80. The Commission may waive its regulations if waiver is in the public interest under the Commission's statutory authority to rescind or modify regulations or orders. *Duquesne Light Petition for Waiver of the Three Business Day Switching Requirements Under 52 Pa. Code § 57.174*, Docket No. P-2014-2448863, at p.8 (Order entered Dec. 4, 2014) (citing 66 Pa. C.S. § 501(a)). A petition for waiver of a Commission regulation "must set forth clearly and concisely the petitioner's interest, the relevant legal authority, the purpose of the petition, and the facts claimed to constitute the grounds requiring waiver of the regulation." *Id.* at 7. Upon review of a petition for waiver, the Commission will grant the petition if it shows "clearly articulated and supported demonstration of good cause or actual need." *Id.* at 10.

81. As part of its LSLR Plan, the Company is proposing in its Pro Forma tariff an expedited process to terminate service where (1) a customer or property owner refuses Columbia Water's offer to replace the customer-owned LSL, (2) where a neighboring property refuses to allow the Company to access their property to allow the work necessary to replace a customer-

²⁴ 52 Pa. Code § 65.62(c).

²⁵ 52 Pa. Code § 65.62(d).

²⁶ *Rulemaking to Implement Act 120 of 2018 at 52 Pa. Code Chapters 65 and 66*, Docket No. L-2020-3019521, 2022 WL 798227, at *43 (Final Rulemaking Order entered Mar. 14, 2022).

owned LSL, and (3) where the Company has reasonable evidence to indicate that a property is being served by a partial LSLR installed after July 23, 2022.

82. As set forth in Section III.J, *supra*, where a customer refuses an offer to replace the customer-owned LSL or where a neighboring property refuses to allow the Company access to the property to complete and LSLR, the Company will schedule to replace its portion of the Company-Owned LSL and notify the customer(s) and/or property owner(s) in writing of the partial LSLR no later than ten days prior to the scheduled replacement and terminate water service at that location the day prior to replacing the Company-owned LSL.

83. As set forth in Section IV.D, *supra*, where the Company has reasonable evidence indicating that a customer is being served by a partial LSLR installed after July 23, 2022, the Company shall immediately terminate service until such time as the Company can replace the Company-owned LSL.

84. Refusal to replace and installation of a partial LSLR after July 23, 2022 both constitute a tariff violation that “endanger[s] the safety of a person” and the Company should be allowed to immediately terminate service pursuant to 52 Pa. Code § 56.98(a)(4) (“A public utility may immediately terminate service for any of the following actions by the customer:... Violating tariff provisions on file with the Commission which endanger the safety of a person”). The *pro forma* tariff prohibits partial lead service lines. When a customer or property owner where the customer is not the property owner either installs a partial LSL or refuses replacement of the customer-owned LSL and thus causes a partial LSL when the Company replaced the Company-owned LSL, a tariff violation has occurred. The Commission has already concluded that service

through a partial LSL endangers the health and safety of the people that may drink water delivered through the partial LSL.²⁷

85. The Company seeks the Commission's confirmation that the Company can terminate service in these circumstances as proposed consistent with 52 Pa. Code § 56.98(a)(4). In the alternative and to the extent necessary, Columbia Water is requesting a waiver of the Commission's termination regulations solely within the context of implementing its LSLR Plan.

This includes a waiver of the following:

- a. 52 Pa. Code § 55.2 (relating to personal contact before utility service discontinued);
- b. 52 Pa. Code § 56.91 (relating to general notice provisions and contents of termination notice);
- c. 52 Pa. Code § 56.92 (relating to notice when dispute pending);
- d. 52 Pa. Code § 56.93 (relating to personal contact);
- e. 52 Pa. Code § 56.94 (relating to procedures immediately prior to termination);
- f. 52 Pa. Code § 56.95 (relating to deferred termination when no prior contact);
- g. 52 Pa. Code § 56.96 (relating to post-termination notice);
- h. 52 Pa. Code § 56.97(a)(3)-(4) and (b) (relating to procedures upon customer or occupant contact prior to termination);
- i. 52 Pa. Code § 56.100 (relating to winter termination procedures);
- j. 52 Pa. Code § 56.111 (relating to medical certificate termination procedures);

²⁷ *Rulemaking to Implement Act 120 of 2018*, Final Rulemaking Order at n.11, Docket No. L-2020-3019521 (Order entered Mar. 14, 2022) (“As stated in the NOPR, in Implementation of Chapter 32 of the Public Utility Code Regarding Pittsburgh Water and Sewer Authority – Stage 1, Docket No. M-2018-2640802 (Order entered June 18, 2020), the Commission determined that partial LSLRs are not in the public interest and are not consistent with the statutory requirements of 66 Pa.C.S. § 1501. Id. at 93-94. The Commission noted that “[t]he negative effects of partial service line replacements are well documented in scientific literature” and that “[t]he permanent negative health effects from lead exposure, especially to uniquely vulnerable populations of developing fetuses, infants and children, is explained in the un rebutted testimony of [UNITED’s expert witness] Dr. Lanphear.” Id. at 92.”).

- k. 52 Pa. Code § 56.112 (relating to postponement of termination pending receipt of certificate);
- l. 52 Pa. Code § 56.114 (relating to length of postponement; renewals);
- m. 52 Pa. Code § 56.140 (relating to follow-up response to inquiry);
- n. 52 Pa. Code § 56.141 (relating to dispute procedures);
- o. 52 Pa. Code § 56.151 (relating to general rule of dispute procedures)
- p. 52 Pa. Code § 56.331 (relating to general notice provisions and contents of termination notice);
- q. 52 Pa. Code § 56.332 (relating to notice when dispute pending);
- r. 52 Pa. Code § 56.333 (relating to personal contact);
- s. 52 Pa. Code § 56.334 (relating to procedures immediately prior to termination);
- t. 52 Pa. Code § 56.335 (relating to deferred termination when no prior contact);
- u. 52 Pa. Code § 56.336 (relating to post-termination notice);
- v. 52 Pa. Code § 56.337(a)(3)-(4) and (b) (relating to procedures upon customer or occupant contact prior to termination);
- w. 52 Pa. Code § 56.340 (relating to winter termination procedures);
- x. 52 Pa. Code § 56.351 (relating to medical certificate termination procedures);
- y. 52 Pa. Code § 56.352 (relating to postponement of termination pending receipt of certificate);
- z. 52 Pa. Code § 56.354 (relating to length of postponement; renewals);
- aa. 52 Pa. Code § 56.371 (relating to follow-up response to inquiry);
- bb. 52 Pa. Code § 56.372 (relating to dispute procedures);
- cc. 52 Pa. Code § 56.381 (relating to general rule of dispute procedures)

86. The Company's waiver of these regulations is in the public interest because the Company's expedited termination process will allow the Company to quickly and concisely

address any issues with customers or property owners preventing the Company from eliminating all LSLs currently active in the Company's service territory. This is also consistent with the Commission's LSLR Regulations which require termination of service in the event of a partial LSLR because it endangers the health and safety of the people that may drink water delivered through the partial LSL.

IX. NOTICES

87. The name, address, and contact information for Columbia Water's counsel in this matter is as follows:

Whitney E. Snyder, Esq.
Thomas J. Sniscak, Esq.
Phillip D. Demanchick, Esq.
Hawke McKeon & Sniscak LLP
100 North Tenth Street
Harrisburg, PA 17101
Phone: (717) 236-1300
wesnyder@hmslegal.com
tjsniscak@hmslegal.com
pddemanchick@hmslegal.com

All pleadings, orders, notices, correspondence, and other documentation with respect to this matter should be directed to the above counsel.

88. Notice of this Petition has been provided to the individuals and entities as required by Section 65.54(a) of the LSL Regulations and as reflected on the Certificate of Service provided herewith.

X. CONCLUSION

WHEREFORE, Columbia Water Company respectfully requests that the Commission grant its Petition and enter an Order:

- A. Approving the Company's proposed LSLR Program;
- B. Approving the Company's LSLR Plan as set forth in Section III, *supra*, and as set forth in Exhibit 1 accompanying this Petition;
- C. Approving the Company's Pro Forma Tariff as set forth in Exhibit 3 and authorizing the Company to file the Pro Forma Tariff effective on one-days' notice;
- D. Approving the Company's modified-LTIIP which incorporates its LSLR Plan as a separate and distinct component of its currently effective LTIIP, which is attached to this Petition as Exhibit 4;
- E. Approving the Company's proposal to record the costs of the customer-owned LSL replacements in a separate, segregated subaccount and to recover a return on and a return of its investment in the replacement of customer-owned LSLs, pursuant to 66 Pa. C.S. § 1311(b)(2)(iii); and
- F. Either confirming that the Company's proposed termination procedures are authorized pursuant to 52 Pa. Code § 56.98(a)(4) or granting a waiver of the Commission's termination regulations as set forth in Section VIII of this Petition and allowing the Company to implement its proposed termination procedures for LSLR refusals and partial LSLR discovery.

Respectfully submitted,

/s/Whitney E. Snyder

Counsel for Columbia Water Company

Exhibit No. 1

Lead Service Line Replacement Plan

COLUMBIA WATER COMPANY LEAD SERVICE LINE REPLACEMENT PLAN

Definitions

Refer to the tariff for definitions.

1.0 – SERVICE LINE INVENTORY

Columbia Water Company (“CWC”) has prepared its Service Line Inventory. It complies with the current United States Environmental Protection Agency (“USEPA”) and Pennsylvania Department of Environmental Protection (“PADEP”) guidelines. The Service Line Inventory will be updated at a minimum annually, or as additional information becomes available. If CWC purchases any water distribution system in the future, the Service Line Inventory will be updated to include the acquired system’s information and meet the deadlines set forth by the Public Utility Commission (“PUC”).

The Service Line Inventory will comply with the timing and direction of the USEPA regulations as enforced by the PADEP, inclusive of future changes to those regulations as may be amended from time to time. The Service Line Inventory for CWC identifies material types on both the company owned and customer owned sides of the service lines. It can be sorted by material type. All discovered lead components have been detailed.

CWC plans to identify, at a minimum, a cumulative average of 10.0% of the initial unknown service materials annually by means of utilizing existing records, modeling, statistical analysis, and mechanical excavation. There are no assumed service line materials in the Service Line Inventory.

See appendix L for the Service Line Inventory Legend and Instructions.

Incorporating the Inventory into the GIS System

CWC is in the process of incorporating the Service Line Inventory into its GIS system. Once the Service Line Inventory is on the GIS, the Service Line Inventory can be updated in real time.

2.0 – PLANNING AND REPLACEMENTS

Annual Projections

CWC plans to replace approximately 50 lead service lines per year. This projection was determined by estimating the total number of lead service lines to be less than 400. After all existing records have been inventoried, CWC will review this annual projection and adjust it as necessary. The projected annual investment in lead service line replacements (“LSLR”) is \$250,000.

Replacing Lead Service Lines in Conjunction with Old Main Replacements

These replacements will be planned. Record-reviews of old age mains within the oldest parts of the distribution system will be analyzed to determine which water mains in the distribution system should be replaced. Prior to choosing a target area, our distribution crew will review records and/or physically inspect a portion of the service lines within a proposed area to gauge the likelihood of lead within that area. Coordination with municipalities will take place to minimize costs and minimize impacts on roads and neighborhoods.

Once the targeted areas are determined, the projects will be posted on the CWC website at least 6 months in advance of the work being done. Prior to the work being initiated, CWC staff will reach out to the customers to determine all service line material within the affected area, and to provide the customers with detailed information regarding the routine procedures and the potential health risks involved.

Replacing Lead Service Lines Discovered by Mechanical Excavation

Areas with a higher likelihood of having lead service lines will be prioritized for these projects. CWC will physically excavate the service lines to determine material types. If a service line is determined to be lead, coordination will occur with the customer(s) and the property owner to have the service line replaced.

Replacing Customer-Owned Lead Service Lines Discovered Inside the Building

CWC will reach out to the customers with lead or unknown service lines. These customers will receive documentation describing the health effects related to lead. See appendix A for this information. They will be provided with information explaining how to determine their own service line material and what to do if they believe their service line material is lead; See appendix B for related documentation. CWC staff will be checking and documenting service line material in conjunction with meter changes. Customers who discover a lead service line may call and schedule to have their service line replaced. CWC will schedule to replace customer-owned lead service lines in accordance with the tariff. If the company side is lead, it will be replaced at the same time with the customer side. These replacements will occur as discovered.

Emergency Replacements

If a lead service line is leaking or otherwise defective at the time it is discovered, CWC will replace the lead service line in accordance with the tariff. The distribution staff will maintain the proper equipment and tools necessary for emergency service line replacements. If a lead service line is discovered during an emergency but isn't leaking, the replacement of the line will be scheduled for replacement at a later date.

Prioritization of Lead Service Line Replacements

Determination of LSLR projects will be prioritized based on targeted sensitive populations as defined by the USEPA and PADEP, which includes areas with elevated levels of lead in tap water, areas with high concentrations of lead service lines, and/or areas of the distribution system which

have elevated corrosion rates. These areas are more specifically found on houses built prior to 1950 with water mains older than 1970 within Columbia Borough or Marietta Borough.

A list of sensitive populations has also been developed to determine the service line materials. The list includes schools, nursing homes, large apartment buildings, churches, and industries. These service lines have been or will be detailed as sensitive populations in the Service Line Inventory. Homes with multiple meters and multiple family residents will also be prioritized to determine service line material.

Disposal of Lead

Lead removed from any project will be disposed of at an appropriate facility to ensure proper disposal of all lead. Scrap receipts will be kept on file. The proceeds from the recycling efforts will be added to our operating revenue. The customer will not have any right to the proceeds of a recycled lead service line.

Coordination with the Property Owner and Customer(s)

When a lead service line is discovered at a property, CWC will contact the customer(s) and property owner to let them know of the discovery. Customers will be given information explaining the health effects of lead and what they should do to prevent lead in their water. See appendix A for the documentation.

CWC staff will then let the customer(s) and property owner know how to schedule to have their service line replaced and when the scheduled replacement is to occur.

Prior to replacing the property-owner's portion of a lead service line, an agreement between CWC and the property-owner, or representative of the property-owner, must be signed ("Property Owner Agreement"). See appendix C. These forms will be kept on file.

When the customer-owned LSL crosses one (or more than one) property to access another, the Company will attempt to obtain approval from all property owners to allow the work necessary to replace the Customer-Owned LSL and evaluate solutions available to install conforming service lines. If the Company is unable to obtain the neighboring property owner or owners' consent, and there is no other viable and economic solution (to be determined in the Company's sole discretion) such as installing conforming service lines, the Company will commence procedures to terminate service to the neighboring property owner or owners' property as set forth in the following section of this LSLR Plan.

Refusal of Lead Service Line Replacement

If a customer or property owner refuses to grant permission to CWC to replace the lead service line or refuses to have it replaced, Columbia Water will (1) provide the customer and property owner, if the customer is not the property owner, with a complete disclosure of the known health hazards from the continued use of a LSL, see Appendix A of the LSLR Plan, (2) inform the customer or property owner, if the customer is not the property owner, that refusal or failure to

accept will require replacement of the customer-owned LSL, at the customer or property owner's expense, within 1 year from LSLR project commencement for the customer or property owner, if the customer is not the property owner, to be eligible for reimbursement; and (3) communicate to the customer and property owner, if the customer is not the property owner, that failure to allow Columbia Water to complete the LSLR or to replace the customer-owned LSL concurrent with the replacing the Company-owned LSL will lead to termination of water service under the provisions of Columbia Water's tariff.

If the customer or property owner, if the customer is not the property owner, still refuses replacement of the customer-owned LSL, the Company will require the customer or property owner, if the customer is not the property owner, to sign a form documenting their refusal. See Appendix N of the LSLR Plan. If the customer or property owner refuses or fails to sign the refusal form, the Company will make a record of and document the customer's refusal.

The Company will then schedule to replace its portion of the Company-owned LSL and notify the customer in writing of the partial LSLR no later than ten days prior to the scheduled replacement and terminate water service at that location the day prior to replacing the Company-owned LSL. Columbia Water will not connect an Applicant to water service where a property owner previously refused or failed to accept the utility's offer of a LSLR until the Applicant verifies that the replacement of a customer-owned LSL by providing a paid invoice from a licensed contractor or notarized statement from a licensed contractor attesting to completion of the LSLR.

Non-Owner Occupied Premises

The Company may stand in the shoes of the property owner and is authorized to replace a Customer-Owned LSL when (1) the Company has offered to replace at no direct cost to the property owner a Customer-Owned LSL, (2) the property is not occupied by the legal owner of the property, and (3) the Company has made attempts to obtain authorization for the Customer LSLR pursuant to this Tariff and the LSLR Plan and (a) the legal owner cannot be identified, (b) the legal owner cannot be located, or (c) the Company has notified the legal owner but the owner has never responded.

In such instances, and when, in the sole discretion of the Company, replacing the customer-owned LSL and preventing the termination of water service would be reasonable and in the public interest, the Company may proceed to make the replacement without obtaining authorization from the property owner. In any such instance of replacement, the Company, and any person associated with the Company, including but not limited to employees, agents, board members and executives, are released and held harmless from any and all claims, causes of action, damages or losses, of any nature, whatsoever with respect to the work performed by the Company or its contractors, and shall not be otherwise liable for any claim asserted by any person, including the property owner, as a result of the LSLR except to the extent otherwise authorized by the Company's Tariff.

If, prior to completing the LSLR, a property owner expressly, in writing, refuses to allow the replacement of the customer-owned LSL, the Company will not proceed with the replacement and will proceed with termination procedures as specified in the above section of the LSLR Plan. The Company also retains discretion to refuse to replace a customer-owned LSL in circumstances

where the Company's employees or contractors may be placed in a dangerous situation in attempting to do the replacement.

Warranty

Upon completion of an LSLR by the Company or a contractor at the Company's request, a Completion-Agreement Form must be signed by the CWC and the property-owner, or representative of the property-owner. See appendix D. From the date of the Completion Agreement Form, the Company will provide a two-year warranty for materials and workmanship of the replaced customer-owned portion of the Service Line. This warranty shall cover repairs conducted by the Company or a contractor at the Company's request of the replaced customer-owned portion of the Service Line up to \$2,500 per customer, including restoration of surfaces consistent with this LSLR Plan, so long as the customer allows access to the property for repairs. Only material defects and incomplete installation methods are covered by the warranty. The warranty does not cover, among other things, damage caused by natural disasters, acts of God, fires, terrorism, excavation activities, acts of sabotage, or deliberate damage. The Company shall have no liability for any damages not covered by the warranty.

LSLR Routine Procedure and Restoration

Columbia Water intends to replace LSLs using existing routes through a combination of pipe splitting and/or pipe pulling. This approach removes or displaces existing pipe while simultaneously replacing it with a new pipe and is the preferred method under normal circumstances. Columbia Water may also utilize guided boring to install new pipe along a different route or using open trench excavation to remove replace the pipe. The appropriate replacement technique will depend on a combination of many site-specific characteristics, including, but not limited to, time constraints, soil characteristics, depth to ground water or rock, depth of road foundation, condition of the service line, proximity of other utility services (e.g., electric, gas, cable, sewer, storm water), site conditions (e.g., access, parking, paving, landscaping, overhead obstructions), pipe conditions (e.g., length of pipe, pipe diameter and wall thickness, bury depth, configuration, and repair history, and conditions inside the home like a finished basement with limited access to the water meter and plumbing. All new pipe installation will be copper or plastic.

See also appendix E for the LSLR Routine Procedures. These procedures will be publicly available at the main office and on the CWC website. CWC will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for Lead Service Line Replacements. The Company will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the Customer or property owner, if the Customer is not the property owner.

Risk Mitigation Measures

All customers and property owners with an LSLR will receive documentation prior to work being initiated explaining the health effects of lead and information on flushing their interior plumbing.

See appendix F for this documentation. Customers will be given a pitcher-filter prior to the LSLR. Instructions on how to use the pitcher-filter are provided. If a customer cannot be contacted prior to the LSLR, a note will be placed in an area notifying the customer to collect, or have delivered, a pitcher-filter. See appendix G for this document. If the affected service line serves more than one residence, such as a multi-unit building or a non-residential unit, CWC will provide the documentation and pitcher-filter to every unit in the building.

Flushing

CWC will assist customers with the flushing of the customer's interior plumbing after an LSLR. Information on flushing is in the LSLR Information document (appendix B), which is provided to all customers that have an LSLR. A detailed description of how to flush will also be found on the CWC website. See appendix H for the link.

Sampling

CWC will be offering to collect water samples for all customers who have an LSLR. If the customer wants their water sampled, CWC will provide the customer with sampling procedures and bottles to collect one set of follow-up first draw and 5th liter tap samples. See appendix I for the LSLR sampling procedures. The sampling will be scheduled with the customer and will be collected between three to six months after completion of the LSLR. If either of the follow up samples exceed 15 ppb of lead, CWC will provide the results of both samples to residents as soon as practicable but no later than three calendar days after becoming aware of the results. If none of the follow up samples exceed 15 ppb of lead, CWC shall provide the results of the samples to residents within 30 days after receiving the results. Accompanying information from CWC includes an explanation of the effects of lead, a list of steps consumers can take to reduce exposure to lead in drinking water, contact information for CWC, and the maximum contaminant level goal and the action level for lead, as well as the definitions for these two terms. The follow-up sample results, and accompanying information will be delivered to the customer through one of the following methods – electronically, mail, phone, hand delivered, or another method approved by PADEP. See appendix J for the documentation to be provided to the customer. If the offer to follow-up sample is not accepted by the customer, no sample will be collected, and the decline of sampling will be documented.

Reimbursement

If an eligible customer chooses to use their own contractor to replace the customer-owned service line, CWC shall reimburse the customer for the replacement cost of the customer-owned lead service line. See appendix M for the Reimbursement Form. This form will be available at the CWC Office or on the CWC Web site. Customers are to use this as a guide for determining eligibility for reimbursement, and ensuring they have the correct documentation for reimbursement. For every lead service line replaced, an LSLR Cost form will be completed. See appendix K for the LSLR Cost Form. CWC will use these completed forms to establish the reimbursement amount for the customers who choose to use their own contractors. We will reimburse the customers in a manner that is consistent with our tariff and PUC guidelines.

Financial Considerations and Funding

CWC's annual budget will include costs relating to LSLR. Budget considerations include the cost for any outreach costs, funds for customer sampling following LSLR, costs of pitchers and replacements, additional staffing, the costs of the materials, and any additional costs that may be incurred.

The cost incurred by CWC for LSLRs will be funded with a combination of commercial loans, cash from operations, and/or PennVEST loans.

Annual Reporting

When an LSLR is completed, the service address, the length of the lead removed, the pipe diameter, and the actual cost will be documented. See appendix K for this document. This information will be compiled annually for the LSLR Program Report.

Website Information, Links, and Documentation

CWC will add lead service line documentation to its website within 1 year of PUC approval. A tab will be created on the website's main page, which will link a user to a specific page about lead service lines. Appendix's A, B, F, H, and M will be made available on the website through links. These documents provide information about LSLR routine procedures, flushing, determining service line material, and the health effects associated with lead.

The website will include information about upcoming LSLR projects. Projected main replacement projects will be posted on the LSLR webpage and provide customers with specific information of when LSLR projects will occur.

A secure, online interactive map will be provided for customers to have the ability to determine if a lead service line may exist at their location. A method will be provided to allow a customer to request assistance in determining if their service line is a lead service line.

The web page will include information regarding the reimbursement requirements and instructions for customers to determine their ability for reimbursement of a previous LSLR. CWC will explore options for providing an online tool for customers to determine their eligibility for reimbursement.

Any community outreach programs or coordination efforts will be posted on the website.

Appendix A

Columbia Water Company

IMPORTANT INFORMATION ABOUT LEAD IN YOUR DRINKING WATER

Your Water Service Line may be made of lead, galvanized steel downstream of a lead service line, or is made of unknown material. Lead can cause serious health problems, especially for pregnant women and young children. Please read this information closely to see what you can do to reduce lead in your drinking water.

220 Locust Street
Columbia, PA 17512
(717) 684-2188
Columbiawaterco.com

HEALTH EFFECTS OF LEAD

Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.

SOURCES OF LEAD

Lead is a common metal found in the environment. Drinking water is also a possible source of lead exposure. The main sources of lead exposure are lead-based paint and lead-contaminated dust or soil, and some plumbing materials. Brass faucets, fittings, and valves, including those advertised as “lead-free” may contribute lead to drinking water. Until 2014, the law allowed end-use brass fixtures, such as faucets with up to 8 percent lead to be labeled as “lead-free”.

SOURCES OF LEAD (CONTINUED)

When water is in contact with pipes, and plumbing containing lead for several hours, the lead may enter drinking water. Homes built before 1988 are more likely to have lead pipes or lead solder. EPA estimates that 10 to 20 percent of a person’s potential exposure to lead may come from drinking water. Infants who consume mostly formula mixed with lead-containing water can receive 40 to 60 percent of their exposure to lead from drinking water.

Don’t forget about other sources of lead such as lead paint, lead dust, and lead in soil. Wash your children’s hands and toys often as they can come into contact with dirt and dust containing lead.

STEPS YOU CAN TAKE TO REDUCE YOUR EXPOSURE TO LEAD IN YOUR WATER

- 1. Run your water to flush out lead.** Run water for 30-60 seconds to flush lead from interior plumbing or until it becomes cold or reaches a steady temperature before using it for drinking or cooking, if it hasn’t been used for several hours.
- 2. Use cold water for cooking and preparing baby formula.** Do not cook with or drink water from the hot water tap; lead dissolves more easily into hot water. Do not use water from the hot water tap to make baby formula.

STEPS TO REDUCE EXPOSURE TO LEAD IN YOUR DRINKING WATER (CONTINUED)

3. Do not boil water to remove lead. Boiling water will not reduce lead.

4. Look for alternative sources of treatment. You may want to consider purchasing bottle water or a water filter. Read the package to be sure the filter is approved to reduce lead or contact NSF international at 800-NSF-8010 or www.nsf.org for information on performance standards for water filters. Be sure to maintain and replace a filter device in accordance with the manufacturer's instructions to protect water quality.

5. Test your water for lead. Call us at 717-684-2188 to find out how to get your water tested for lead.

6. Get your child's blood tested. Contact your local health department or health care provider to find out how you can get your child tested for lead, if you are concerned about exposure.

7. Identify and replace plumbing fixtures containing lead. New brass faucets, fittings, and valves, including those advertised as "lead-free" may contribute lead to drinking water. Until 2014, the law allowed end-use brass fixtures, such as faucets, with up to 8% lead to be labeled as "lead-free".

LEAD MONITORING REQUIREMENTS

Columbia Water Company is required by the Environmental Protection Agency to sample 30 high-risk homes/buildings within the Columbia Water distribution system to determine the levels of lead in the water. A high-risk home is determined by the service line material, the age of the home, leaded solder, or plumbing fixtures with lead. The sampling results can be found on the PADEP Website at:

<http://www.drinkingwater.state.pa.us/>

COLUMBIA WATER COMPANY'S PROGRAM TO REDUCE/REMOVE LEAD

1. Corrosion Control Treatment

Addition of a corrosion inhibitor makes it less likely that lead will dissolve into the water.

2. Lead Service Line Replacement

Columbia Water Company continues to replace company-owned and customer-owned lead service lines. Columbia Water must replace its portion of a lead service line when a customer notifies Columbia Water that they are replacing their portion of the lead service line. All lead service lines are to be replaced by 2047.

3. Public Education Program

Columbia Water Company strives to educate the public on lead in drinking water. For example, this pamphlet provides customers information on how to reduce lead in your water.

FOR MORE INFORMATION

For more information, please call us at 717-684-2188 or visit our website at Columbiawaterco.com.

If your line is made of lead or galvanized steel downstream of a lead service line, you may be eligible to have your service line replaced at no direct cost to you. For more information on how to determine your service line material, please call us at 717-684-2188 or visit our website at Columbiawaterco.com.

Appendix B

COLUMBIA WATER COMPANY

How to Check Your Water Service Line Material

Lead can also be found in older brass fixtures and valves and in old solder or epoxy, where pipes are joined.

You can test the water service line where it connects to the water meter in the basement.

Water Service Line
May be made of lead, copper, galvanized steel or plastic.

For any questions about lead in your water:

Call us at (717) 684-2188. Our staff will provide information on water testing, safety tips, and replacement options.

Possible Pipe Materials

Follow these steps:

You will need:

- Key or a coin
- Strong refrigerator magnet

1. Find the water meter in your basement. Look at the pipe that comes through the outside wall of your home and connects to your meter.
2. Carefully scratch the pipe (like you would a lottery ticket) with a key or a coin. Do not use a knife or other sharp tool. Take care not to make a hole in the pipe. If the scratch turns a shiny silver color, it could be lead or steel. **NOTE: If pipe is painted, use sandpaper to expose the metal first.**
3. Place the magnet on the pipe. If a magnet sticks, it is a steel pipe.

Other ways you can check for lead:

- Purchase a lead test kit at a hardware or home improvement store. These kits test what the pipe is made from—not the water inside. Look for an EPA recognized kit.
- A licensed and insured plumber can inspect your pipes and other plumbing for lead or steel. Replacing an older brass faucet or valve might reduce the lead in water.

Appendix C

COLUMBIA WATER COMPANY

Lead Service Line Replacement Agreement

This **LEAD SERVICE LINE REPLACEMENT AGREEMENT** is made _____, 20__ by and between **Columbia Water Company** (the "**Company**") and _____, an adult individual or individuals with an address of _____ (collectively, the "**Owner**", and referenced collectively hereafter as the singular "**I**").

In consideration of the Columbia Water Company's (the "**Company**") efforts to remove lead water services, the owner has given permission per the attached signed agreement to the Company and/or its officials, employees, or contractors to excavate, investigate, and replace non-copper water services on the property described below:

The street address for this property is: _____

The Owner shall permit temporary access and right of entry to and upon the above-referenced property to the Company and the Company's designated agent(s) and/or contractor(s) to perform investigation, inspection, construction and testing of the new private water service line and to enable any needed adjustments, maintenance, or repairs during the guarantee period.

As Owner, I hereby acknowledge that I understand that the work contemplated by this Agreement shall be performed subject to the following provisions:

1. The service line replacement is mandated by the Commonwealth of Pennsylvania "Lead and Copper Rule," adopted by the Pennsylvania Department of Environmental Protection. I understand the Company is not permitted to re-establish water service to the water main until my lead/galvanized water service is completely replaced.
2. A new copper private water service line will be constructed at the Company's expense from the curb box in the public right-of-way to the water meter on the Owner's property, including the meter setting and any necessary connections to reset the water meter. The existing service line will be disconnected and either capped off or removed.
3. The Company will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for Customer Lead Service Line replacements. The Company will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the Property Owner.
4. If a contractor is doing the work as contemplated in this Agreement on behalf of the Company, the contractor doing the work shall provide reasonably adequate insurance to protect the Owner against any loss that may result from damage caused by negligent construction operations on the Owner's property. Said contractor shall be required to provide the Company with adequate proof of such insurance coverage.
5. The Company guarantees that any work performed by the Company or its Contractor pursuant to this Agreement shall be free from defects in materials and workmanship for a period of two (2) years after completion (the "Guarantee Period").

COLUMBIA WATER COMPANY

Lead Service Line Replacement Agreement

THE PROPERTY OWNER'S/OWNERS' OBLIGATIONS.

1. I hereby confirm that I and/or we are the only owner/owners of the above referenced property and that I/we have or will provide adequate proof thereof to the Company;
2. I permit temporary access and right of entry to and upon the above-referenced property to the Company and the Company's designated contractor(s) to perform construction and testing of the new private water service line and to enable any needed adjustments, maintenance, or repairs during the Guarantee Period;
3. I assume full responsibility for the maintenance, repair, and replacement of the private part of the water service line, located on the above-referenced property, after expiration of the Guarantee Period. After the expiration of the Guarantee Period of two (2) years, the responsibility of each party (Company and the Owner) shall be as shown on the diagram below; and
4. I shall hold the Company harmless and free from any claim or liability from any lawsuits, claims, injuries or damage done in performance of the water service line replacement work.

Definitions:

LSLR Project - Lead service line replacement project - A Company scheduled lead service line replacement activity either in conjunction with main replacements or as part of a lead service line replacement program.

COLUMBIA WATER COMPANY

Lead Service Line Replacement Agreement

MISCELLANEOUS TERMS.

1. The responsibility of the maintenance, repair and the replacement of the water service located in the public right-of-way will be pursuant to Columbia Water Company's tariff.
2. This Agreement is a legally binding document; Owner's signature will commit Owner to this Agreement's terms. Owner acknowledges that he/she has been advised to discuss all aspects of this Agreement with an attorney; that Owner has carefully reviewed and fully understands all the provisions of this Agreement; and that Owner is voluntarily entering this Agreement.
3. This document states the entire agreement reached between the parties hereto with respect to the construction contemplated hereby and supersedes all prior or contemporaneous agreements, understandings, representations, and warranties between the parties.
4. This Agreement may be executed in multiple counterparts, and signatures may be exchanged by facsimile or e-mail transmission, each of which shall constitute an original and all of which shall constitute one (1) Agreement. A facsimile or electronic signature on this Agreement shall be deemed an original signature and binding on the parties hereto.
5. This Agreement shall be governed by and construed in accordance with the laws of the Commonwealth of Pennsylvania without regard to conflict of law principles.
6. If any provision in this Agreement shall be found invalid, illegal, or unenforceable in any respect, the validity of the remaining provisions contained in this Agreement shall not be affected.
7. This Agreement may not be amended or modified except by a written instrument signed by the Company and Owner.

Signed by Owner(s) the _____ day of _____, 20_____.

COLUMBIA WATER COMPANY

Lead Service Line Replacement Completion Form

PROPERTY OWNER: _____

PROPERTY ADDRESS: _____

This Lead Service Line Removal Completion Form is made by and between the Columbia Water Company and the above-named property owner to document that the removal of the customer-owned lead water service by the Columbia Water Company has been completed.

Now, therefore, the parties hereby agree in and to the following:

1. Columbia Water Company has replaced the lead service line at (address) _____ as part of the Columbia Water Company's Lead Service Line Replacement Program.
2. The work to replace the lead service line was completed on (date) _____.
3. The Columbia Water Company has removed the lead service at the address above in a manner and within the time frame described and agreed to with the property owner.
4. Columbia Water Company has backfilled any trenches excavated as part of the replacement process and has filled and sealed any wall or floor penetrations in the private home.

Property Owner Signature & Date

Columbia Water Signature & Date

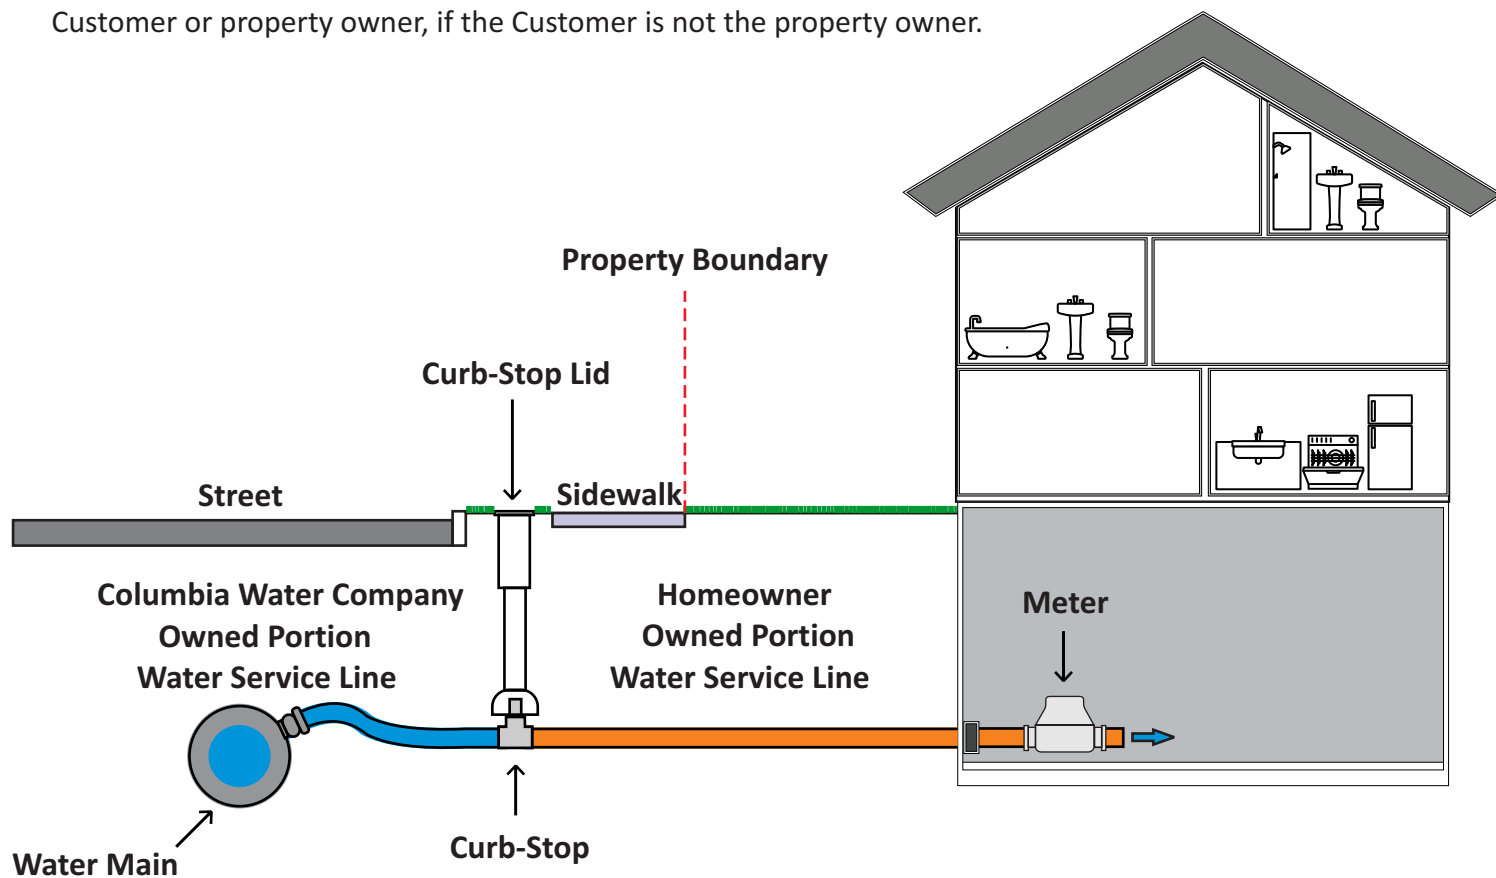

Appendix E

COLUMBIA WATER COMPANY

Lead Service Line Replacement Routine Procedure

1. Columbia Water Company's service line replacement contractors will notify you when excavations & replacements will be occurring at your property. Because the contractors need to access your home as part of this process, you or someone who is at least 18 years old must be home while the pipe replacement is taking place.
2. As part of this service line excavation & replacement, you may request that your water be tested after the service line is replaced. Water testing is by request only and residents will have to give separate permission for water testing to be done.
3. Your water will be shut off for a period of 4 to 8 hours while the line is being replaced. The contractor will make every effort to have your water restored the same day that installation begins. Please maintain a clear path to the water meter and clear material away from the water meter so work crews can run the replacement pipe to it.
4. The contractor will flush the water in your home for 15 minutes after the pipe is replaced to remove any residue or sediment from the water line. You should flush your pipes a second time for at least 15 minutes at the highest flow rate once the contractor has left. You will be provided with a water filter and/or replacement cartridges, if you do not already have them. Please continue to use your water filters for at least 6 months after service line replacement.
5. The Company will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for Lead Service Line Replacements. The Company will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the Customer or property owner, if the Customer is not the property owner.

Appendix F

COLUMBIA WATER COMPANY

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Lead Service Line Replacement Information

ESTE INFORME CONTIENE INFORMACION IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.

Columbia Water Company is replacing your lead service line. This notice provides information you need to know regarding the replacement and why it is important.

The pipe that connects your household plumbing to the water main in the street is called a service line. Columbia Water Company is replacing your service line because it either contains lead, is galvanized iron/steel and was or is currently downstream of lead, or there is a lead gooseneck, pigtail or connector on your service line. Lead from your existing pipes can leach into the water you drink. While it's important for the long term quality of your drinking water to remove these lead pipes, studies have shown that when lead service lines are disturbed, in the short-term they can release lead for weeks or months after the disturbance. There are steps you can take to protect you and your family from exposure to lead in tap water which are explained below.

What should I do?

After the service line is returned to service but before using the water for consumption, remove and clean all faucet aerators, flush your service line and all internal plumbing by opening all taps and letting the water run for at least 30 minutes, and re-install the cleaned aerators.

To conserve water instead of simply running the water for 30 minutes, other household/non-potable water usage activities such as washing clothes, showering, flushing the toilet and running the dishwasher are effective methods of flushing the pipes.

After the initial flush, run the water for 3-5 minutes before using and use cold water for cooking and drinking to reduce your exposure to lead in the water.

In addition to flushing the lines, you are being provided with a pitcher filter that is certified to remove lead and six months of replacement cartridges. This filter may be used for water that will be used for drinking and cooking.

Why should I do it?

Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risk of heart disease, high blood pressure, kidney, or nervous systems problems.

For more information, please contact Columbia Water Company at 717-684-2188.

Appendix G

COLUMBIA WATER COMPANY

Lead Service Line Replacement Pitcher Filter

Columbia Water Company has recently removed lead from your service line. It is recommended to use a Brita pitcher filter for the next 6 months for drinking water and cooking purposes. We are providing one free of charge to you, but are having trouble getting in contact with you. Please either pick your pitcher filter up at our main office of 220 Locust St, Columbia PA 17512, or call us at 717-684-2188 to schedule to have someone deliver a pitcher to you.

Appendix H

COLUMBIA WATER COMPANY

Flushing After a Lead Service Line Replacement

After your lead service line has been replaced, it is important to flush all of the pipes in your house. Flushing will remove any lead that may have entered the pipes in your house during construction. You should flush all interior plumbing the same day or before the next time you use your water. **DO NOT USE** hot water until the initial flushing is completed to prevent lead particles from settling in your hot water tank.

Columbia Water will offer to sample your water 3 to 6 months after the replacement of your lead service line.

Flushing Instructions

1. Find all the faucets that will drain, including the basement and on all floors in your house.
2. Remove aerators and screens where ever possible, including the shower heads, from all faucets you plan to flush. Include the laundry tubs, hose-bibs, bathtubs, and showers as flushing points.
3. After all the aerators are off, open the faucets running at highest rate possible, using cold water.
4. After all faucets are opened, leave the water running for at least 30 minutes.
5. After 30 minutes, turn off the faucets.
6. Clean aerators/screens at each faucet. You may need to replace screens/aerators if too old or worn.
7. Use the Brita Filter provided for your drinking water for the next six months.

Cleaning Your Aerator

1. Remove faucet aerators and clean out any particles that may have accumulated there. The aerator is usually at the tip of the faucet and can be screwed off to clean.
2. After your lead service line is replaced, clean debris from aerators and screens once a month for six months. After six months, clean debris annually.

Daily Flushing

Daily flushes should continue for six months after your lead service line is replaced. Flush cold water through the plumbing in your house for 3-5 minutes each morning (or after an extended period of no water usage) before cooking and drinking.

NOTE: Taking a shower, running the dishwasher or flushing a toilet will flush your lines.

For more information, please call Columbia Water Company at 717-684-2188

Appendix I

COLUMBIA WATER COMPANY

Lead Service Line Replacement Sampling Procedure

READ AND FOLLOW THESE SAMPLING INSTRUCTIONS CAREFULLY. THE RESULTS OF THE TESTS WILL NOT BE ACCURATE IF THE SAMPLING PROCEDURE ISN'T FOLLOWED CORRECTLY.

Lead samples need to be collected after water has sat in your service line and interior plumbing for several hours (at least 6 hours). Because of this, it is recommended to sample first thing in the morning.

1. PRIOR TO RUNNING ANY WATER (including flushing your toilet) remove the aerator from your kitchen or bathroom sink.
2. Clear ample space on your counter top. You'll need enough space to fit all five bottles.
3. Place the bottles out on the counter in order - 1 through 5.
4. Remove the caps from all five bottles.
5. While holding bottle no. 1 under the faucet, turn on the cold water and begin filling the bottle.
6. Once the bottle is filled to the black fill line, keep the water running and simultaneously remove bottle no. 1 and put bottle no. 2 under the faucet.
7. Continue this process for bottles 3, 4, and 5 until all five bottles are filled.
8. Once all five bottles are filled, turn the water off and tighten the caps on the bottles.
9. Place the bottles into the provided box and fill out the bottom of this form.
10. Once the form is complete, put the form in the provided box.
11. Put the box in the designated bottle pick-up area at your residence.

KEY THINGS TO REMEMBER THAT CAN EASILY BE FORGOTTEN

Collect the samples after not running water for 6 hours.

Remember to fill each bottle to the black fill line (not above nor below).

Let the water run continuously while filling all five bottles.

Use cold water.

Lead Service Line Replacement Sample Results

SERVICE LINE ADDRESS: _____

HEALTH EFFECTS OF LEAD

Lead can cause serious health problems if too much enters your body from drinking water or other sources. It can cause damage to the brain and kidneys, and can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones and it can be released later in life. During pregnancy, the child receives lead from the mother's bones, which may affect brain development.

STEPS YOU CAN TAKE TO REDUCE YOUR EXPOSURE TO LEAD IN YOUR WATER

- 1. Run your water to flush out lead.** Run water for 30-60 seconds to flush lead from interior plumbing or until it becomes cold or reaches a steady temperature before using it for drinking or cooking, if it hasn't been used for several hours.
- 2. Use cold water for cooking and preparing baby formula.** Do not cook with or drink water from the hot water tap; lead dissolves more easily into hot water. Do not use water from the hot water tap to make baby formula.
- 3. Do not boil water to remove lead.** Boiling water will not reduce lead.
- 4. Look for alternative sources of treatment.** You may want to consider purchasing bottle water or a water filter. Read the package to be sure the filter is approved to reduce lead or contact NSF international at 800-NSF-8010 or www.nsf.org for information on performance standards for water filters. Be sure to maintain and replace a filter device in accordance with the manufacturer's instructions to protect water quality.
- 5. Test your water for lead.** Call us at 717-684-2188 to find out how to get your water tested for lead.
- 6. Get your child's blood tested.** Contact your local health department or health care provider to find out how you can get your child tested for lead, if you are concerned about exposure.
- 7. Identify and replace plumbing fixtures containing lead.** New brass faucets, fittings, and valves, including those advertised as "lead-free" may contribute lead to drinking water. Until 2014, the law allowed end-use brass fixtures, such as faucets, with up to 8% lead to be labeled as "lead-free".

CONTACT INFORMATION

Address: 220 Locust Street, Columbia PA 17512

Phone Number: 717-684-2188

Website: www.Columbiawaterco.com

DEFINITIONS

Maximum Contaminant Level Goal or MCLG: The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety. MCLG for lead is 0.000 mg/L

Maximum Contaminant Level or MCL: The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology. MCL for lead is 0.015 mg/L

Estimated equipment: Cost: _____

Restoration: Cost: _____

Total estimated cost of LSLR: Cost: _____

Appendix L

INSTRUCTIONS FOR USE OF THE SLI_USER TEMPLATE

Introduction: The SLI_User Excel template is intended for use by water systems that already have an electronic database containing their service line inventory information, and who do not wish to re-enter their information into the service line inventory spreadsheet developed by the Department under document number 3930-FM-BSDW0042a. To use the SLI_User Excel template, the Water System must be able to save the file in *.xlsx format. Earlier versions of Excel will not work.

Use: The Water System MUST provide their service line inventory data in the EXACT format specified in the Excel template and these instructions. The acceptable responses for each field are detailed in the Column Description Table below. The Excel template can be found on the DWELR Instructions and Messages page.

- Please note that only limited error checking will be performed when uploading the SLI_User template. *It is the responsibility of the water system to provide accurate & complete service line inventory data when using the SLI_User template.*

Submission: Once the SLI_User template has been completed, it can be uploaded using the DWELR interface.

- The user is not required to have a LabID when uploading a service line inventory. Either type of DWELR account - View as PWS (“P1234567”) or Submit as Lab (“L12345”) - can be used to upload the service line inventory.
1. Log in to DWELR and at the bottom of the page select “Main Menu”, then select “Upload Service Line Inventory”.
 2. On the next screen, use Form Type dropdown menu to select “User” then click “Next”.
 3. Click “Choose File”, navigate to and select the spreadsheet, then click “Upload”.
 4. Preview the data, and if everything looks correct click “Submit”.
 5. You may be presented with an Error Report. If there are errors, your submission will not be accepted. Cancel the submission, correct the errors, then re-upload the spreadsheet. *Corrections cannot be made using the DWELR interface.*

Completion: In addition to the SLI_User Excel spreadsheet, the Water System must also submit some general information. This cannot be done through a DWELR upload.

- The water system must download & complete the cover form 3930-FM-BSDW0042b, available on e-Library. Instructions for the completion of the cover form are also available on e-Library as document number 3930-FM-BSDW0042.
- The water system’s service line inventory submission is not complete until the cover form has been submitted.

COLUMBIA WATER COMPANY

Lead Service Line Replacement Reimbursement Form

Eligible customers seeking reimbursement for their lead service line replacement need to complete this form, have the documentation requested in the checklist below, and either e-mail, fax, or hand deliver a copy of the documents to Columbia Water Company ("CWC").

Complete this Checklist

- 1. Proof of Lead Service Line - a combination of the following:
 - A photograph of the service line
 - Verified statement from contractor
 - CWC documentation
- 2. Copy of paid invoice
- 3. Detailed estimate of work from the contractor

E-mail, fax, or hand deliver a copy of this document and accompanying documents to Columbia Water Company.

Email Address: Columbiawater@Columbiawater.net
Fax Number: 717-684-4566
Street Address: 220 Locust St, Columbia PA 17512

Please Print Clearly

COLUMBIA WATER COMPANY

Lead Service Line Replacement Refusal Form

DECLINE PRIVATE LEAD SERVICE LINE REPLACEMENT

I DECLINE to have Columbia Water Company (the "Company") address my privately owned lead service line. I understand that lead is a toxic metal that can be harmful to human health even at low exposure levels. Lead is persistent, and it can accumulate in the human body over time. All persons, especially pregnant women, children, and infants, are vulnerable to the dangerous effects of lead in drinking water. For more information on the harmful effects of lead in drinking water, please visit the following website maintained by the United States Environmental Protection Agency:
<https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water>.

I understand that my refusal or failure to accept the Company's offer to replace my privately owned lead service line will require replacement of my Private LSL at my expense within one (1) year from the date when the commencement of the work on my Property would have begun in order for me to be eligible for reimbursement for the replacement of my Private LSL by the Company.

I further understand that my refusal or failure to allow the Company or its representative to replace my Private LSL, or my failure to replace my Private LSL concurrently with the Company's replacement of its portion of its service line if applicable, may lead to termination of my water service under the applicable provisions of the Company's currently-effective tariff.

28. Lead Service Line (LSLR) Program

(C)

(1) Supersession

This section of the Company’s Tariff supersedes all other conflicting provisions of this Tariff for purposes of implementing the Company’s Lead Service Line Replacement Program.

(2) Definitions

Curb Stop: A water service shutoff valve located in a water service line near the curb or edge of the street and between the water main and the building.

Company-Owned LSL – Company-Owned Lead Service Line: The portion of the lead service line extending from the Company’s main to the Curb Stop.

Customer-Owned LSL – Customer-Owned Lead Service Line: The portion of the lead service line extending from the Curb Stop to the meter or one foot inside a building foundation, whichever is farther.

Galvanized Service Line: Iron or steel piping that has been dipped in zinc to prevent corrosion and rusting.

Company: Columbia Water Company.

Customer: A person or entity who is an owner or occupant and who contracts with the Company for water service.

Independent Legal Restrictions: Commission Regulations or Orders which otherwise prevent termination of water service at a property including but not limited to winter moratorium, medical certifications, or Commission directed moratoriums or suspensions.

LSL - Lead Service Line: A service line made of lead that connects the water main to a building inlet and a lead pigtail, gooseneck or other fitting that is connected to the lead line. A galvanized service line is considered a lead service line if it ever was or is currently downstream of any lead service line or service line of unknown material.

LSLR – Lead Service Line Replacement: A service line, whether Company-owned or customer-owned, installed to replace a lead service line.

LSLR Plan – Lead Service Line Replacement Plan: A plan and supporting documents submitted to and approved by the Commission that specify how the Company intends to implement its lead service line replacement program.

LSLR Project – Lead Service Line Replacement Project: A Company-scheduled lead service line replacement activity either in conjunction with main replacements or as part of a lead service line replacement plan.

(C) Indicates Change

28. Lead Service Line (LSLR) Program (Cont'd)

(2) Definitions (Cont'd)

LSLR Project Area – Lead Service Line Replacement Project Area: The area encompassing a Company’s scheduled lead service line replacement activities, which includes the area within a 1-mile radius of a lead service line replacement project if served by the Company.

LSLR Project Commencement – Lead Service Line Replacement Project Commencement: Installation of the first lead service line replacement within a lead service line replacement project area.

Partial LSLR – Partial Lead Service Line Replacement: A lead service line replacement that does not replace both the Company-owned and customer-owned portions of a lead service line.

Property Owner Agreement: An agreement between the Company and a property owner for the replacement of a Customer-Owned LSL that allows the Company’s employees and contractors to gain access to their private property in order to replace their customer-owned LSL prior to the initiation of any work by the Company to replace the customer-owned LSL

Service Line: The pipe and appurtenances which connect any main to the Company’s water meter or, if the Company’s water meter is located outside of the structure or the connection is not metered by the Company, at the first shutoff valve located within the interior of the structure.

Service Line Inventory: The process of identifying each service line under the timing and direction of United States Environmental Protection Agency regulation at 40 CFR 141.1—143.20 as enforced by the Department of Environmental Protection, inclusive of future changes as those regulations may be amended.

Water Distribution System: The equipment and facilities owned or operated by the Company for diverting, developing, pumping, impounding, distributing or furnishing water to or for the public for compensation.

(3) LSLR Plan

Notwithstanding Rules in this Tariff relating to customer responsibility for customer service lines, the Company will replace Customer-Owned LSLs pursuant to its LSLR Plan (as approved at Docket No. P-2023-_____) and set forth in Section 9.0 to the Company’s 5-Year Long-Term Infrastructure Improvement Plan approved at Docket No P-2023-_____, subject to an annual cap described below. The Company may modify its annual cap for Lead Service Line Replacements with Commission approval. The costs incurred by the Company to undertake remediation efforts pursuant to its Lead Service Line Replacement Plan shall be recoverable in the Company’s Distribution System Improvement Charge, PENNVEST Surcharge, and in base rates, as applicable.

(C)

(C) Indicates Change

COLUMBIA WATER COMPANY

28. Lead Service Line (LSLR) Program (Cont'd)

(C)

(3) LSLR Plan (Cont'd)

The Company's Lead Service Line Replacement Plan is in effect until September 2028 and applies to any Lead Service Line (1) serving any customers of Columbia Water Company; (2) of which the Company is aware; (3) the replacement of which is operationally feasible; and (4) the Property Owner authorizes the replacement or replaces the line in accordance with Company policy or, the Company is otherwise authorized to replace the line in accordance with this Tariff.

(4) LSLR Annual Cap

The Company will cap LSLR Projects at 50 Customer-Owned LSLRs or \$250,000, whichever is less, on an annual basis. If a Customer reimbursement provided pursuant to this Tariff or an emergency LSLR causes Columbia Water to exceed its annual cap, Columbia Water will increase its current annual cap by the number and cost of emergency repairs and/or reimbursements and decrease its annual cap by same for the following year only.

(5) LSLR Replacements

The Company will offer to replace Customer-Owned LSLs at no direct cost to the Customer or property owner, if the Customer is not the property owner: (i) at any residential or non-residential property where the Company replaces a Company-owned main connected to a Customer-Owned LSL; (ii) at any property where the Company replaces a Company-Owned LSL connected to a Customer-Owned LSL; and (iii) at any property with a private-side only LSL located within a LSLR Project Area where LSLRs are performed; and (iv) when the Company's operations crew replaces a Company-owned facility regardless of material, in emergencies, including line breaks, leaks, or other unplanned emergency replacements, that is or is connected to a LSL.

Except in the case of non-owner occupied properties at which the Company has exercised "stand in the shoes" rights, the Company shall enter into a Property Owner Agreement with the property owner for replacement of a Customer-Owned LSL that allows the Company's employees and contractors to gain access to their private property in order to replace their customer-owned LSL prior to the initiation of any work by the Company to replace the customer-owned LSL. The Property Owner Agreement shall be in a form provided by the Company and shall include provisions that require the Property Owner(s) to release and hold harmless the Company from any and all claims, causes of action, damages or losses, of any nature, whatsoever with respect to the work performed by the Company or its contractors.

(C) Indicates Change

28. Lead Service Line (LSLR) Program (Cont'd)

(6) Customer Refusal

Except as set forth below, if after being notified of the Company’s offer to replace at no cost a Customer-Owned LSL, the property owner has not provided an executed Property Owner Agreement authorizing the replacement of the customer service line or has refused replacement, the Company will (1) provide the Customer and property owner, if the Customer is not the property owner, with a complete disclosure of the known health hazards from the continued use of a LSL, (2) inform the Customer or property owner, if the Customer is not the property owner, that refusal or failure to accept will require replacement of the Customer-Owned LSL, at the Customer or property owner’s expense, within 1 year from LSLR Project commencement for the Customer or property owner, if the Customer is not the property owner, to be eligible for reimbursement and (3) communicate to the Customer and property owner, if the Customer is not the property owner, that failure to allow Columbia Water to complete the LSLR or to replace the Customer-Owned LSL concurrent with the replacing the Company-Owned LSL will lead to termination of water service prior to the Company replacing the Company-Owned LSL.

If the Customer or property owner, if the Customer is not the property owner, does not sign the Property Owner Agreement or still refuses replacement of the Customer-Owned LSL within ten days after Columbia undertakes the aforementioned steps, the Company will require the Customer or property owner, if the Customer is not the property owner, to sign a form documenting their refusal. If the Customer or property owner refuses or fails to sign the refusal form, the Company will make a record of and document the customer’s refusal. The Company will then schedule to replace its portion of the Company-Owned LSL and notify the customer in writing of the partial LSLR no later than ten days prior to the scheduled replacement and terminate water service at that location the day prior to replacing the Company-Owned LSL. The Company will proceed with termination of water service to a location irrespective of whether Independent Legal Restrictions would otherwise delay or prohibit termination. Such notice and termination shall be deemed consistent with Chapter 14 of the Public Utility Code. Moreover, in these instances, the Company is not required to comply with termination procedures described in other portions of its tariff or the Commission’s regulations.

At any time prior to completing termination, or, within ten days after termination, the property owner executes the Property Owner Agreement, water service will be restored to the property, provided that service will not be restored until either both the Company-Owned LSL and the Customer-Owned LSL have been replaced or, in the Company’s sole discretion, an alternative, non-lead temporary bypass is installed.

Columbia Water will not connect an Applicant to water service where a property owner previously refused or failed to accept the utility’s offer of a LSLR until the Applicant verifies that the replacement of a Customer-Owned LSL by providing a paid invoice from a licensed contractor or notarized statement from a licensed contractor attesting to completion of the LSLR.

(C)

(C) Indicates Change

28. Lead Service Line (LSLR) Program (Cont'd)

(C)

(7) Customer Lead Service Line on Multiple Properties

When the Company is undertaking an LSLR Project and the Customer-Owned LSL crosses one (or more than one) property to access another, the Company will attempt to obtain approval from all property owners to allow the work necessary to replace the Customer-Owned LSL and evaluate solutions available to install conforming service lines.

If the Company is unable to obtain the neighboring property owner or owners' consent, and there is no other viable and economic solution (to be determined in the Company's sole discretion) such as installing conforming service lines, the Company will commence procedures to terminate service to the neighboring property owner or owners' property. The Company will complete or suspend the termination of the neighboring property owner's water service as set forth in section (6) above.

(8) Non-Owner Occupied Properties

The Company may stand in the shoes of the property owner and is authorized to replace a Customer-Owned LSL when:

- i. The Company has offered pursuant to its Tariff to replace at no direct cost to the property owner a Customer-Owned LSL;
- ii. The property is not occupied by the legal owner of the property; and
- iii. The Company has made attempts to obtain authorization for the Customer LSLR pursuant to this Tariff and the LSLR Plan and (a) the legal owner cannot be identified; (b) the legal owner cannot be located; or (c) the Company has notified the legal owner but the owner has never responded.

In such instances, and when, in the sole discretion of the Company, replacing the Customer-Owned LSL and preventing the termination of water service would be reasonable and in the public interest, the Company may provide the Customer with the option to execute a consent form for the LSL replacement and, upon execution of the Customer consent form, is authorized by this Tariff, which has the force and effect of law, to proceed to make the replacement without obtaining authorization from the property owner. The Company's replacement in this circumstance without the property owner's consent is in furtherance of the Company's duty pursuant to the Public Utility Code to provide safe and reasonable service and shall not constitute a violation of law or constitute any tort or other criminal or civil liability.

In any such instance of replacement, the Company, and any person associated with the Company, including but not limited to employees, agents, board members and executives, are released and held harmless from any and all claims, causes of action, damages or losses, of any nature, whatsoever with respect to the work performed by the Company or its contractors, and shall not be otherwise liable for any claim asserted by any person, including the property owner, as a result of the LSLR.

(C) Indicates Change

28. Lead Service Line (LSLR) Program (Cont'd)

(C)

(8) Non-Owner Occupied Properties (Cont'd)

If a property owner expressly, in writing, refuses to allow the replacement of the Customer-Owned LSL, the Company will not proceed with the replacement and will proceed with termination procedures as specified in section (6) above. The Company also retains discretion to refuse to replace a Customer-Owned LSL in circumstances where the Company's employees or contractors may be placed in a dangerous situation in attempting to do the replacement.

(7) Service Line Demarcation

If a shutoff valve is not located within 12 inches of the structure wall of the property, the Company may install a shutoff valve during the LSLR to serve as a point of demarcation between the property's service line and the property's interior water distribution piping.

The Company shall perfect its ownership of the portion of the service line located within the then-existing right-of-way in conformance with its Tariff to ensure that the Company can obtain necessary permits during the planning phase of a LSLR Project

(8) Prohibition on Partial LSLRs and Notice Requirements

Neither a Customer nor a property owner may install a Partial LSLR. A Partial LSLR installed after July 23, 2022, shall result in immediate termination of service until both the Company-Owned LSL and Customer-Owned LSL have been replaced. The Company will proceed with immediate termination of water service to a location being served by a partial LSLR installed after July 23, 2022, irrespective of whether Independent Legal Restrictions would otherwise delay or prohibit termination. Such termination shall be deemed consistent with Chapter 14 of the Public Utility Code. Moreover, in these instances, the Company is not required to comply with termination procedures described in other portions of its tariff or the Commission's regulations.

Where a Customer or a property owner, if the Customer is not the property owner, elects to replace the Customer-Owned LSL, the Customer or property owner shall replace the Customer-Owned LSL concurrent with the Company replacing the Company-Owned LSL, provided that the Customer or property owner, if the Customer is not the property owner, shall provide the Company at least 90 days' notice prior to replacing the Customer-Owned LSL.

The Company shall not connect an Applicant for water service to the Company-Owned service line at a property where a Customer or property owner, if the Customer is not the property owner, previously refused or failed to accept the Company's offer of a LSLR until the Applicant verifies the replacement of the Customer-Owned LSL by providing a paid invoice from a licensed contractor or a verified statement from a licensed contractor attesting to completion of the LSLR.

(C) Indicates Change

28. Lead Service Line (LSLR) Program (Cont'd)

(C)

(9) Reimbursement

Where a Customer or property owner, if the Customer is not the property owner, has replaced its own Customer-Owned LSL, the Customer or property owner shall submit to the Company a reimbursement form located on the Company’s website by mail, e-mail, fax, or hand delivery, which contains, at a minimum, a detailed estimate and paid invoice from a licensed contractor verifying the replacement of the Customer-Owned LSL. Instead of a detailed estimate, a verified statement from the contractor attesting to completion of a LSLR may be sufficient in the Company’s discretion. A paid invoice must be submitted.

Upon submission of the reimbursement form, the Company will review the information that was provided within ninety days of receiving the reimbursement form to determine eligibility for a reimbursement. If sufficient information has not been provided at the time of submitting the reimbursement form, the Company will contact the Customer or property owner to request the necessary information to determine eligibility. The Company will have an additional forty-five days from the time it receives the additional information to determine a customer’s eligibility for reimbursement.

A Customer or property owner, if the Customer is not the property owner, is eligible to receive a reimbursement if the Customer or property owner is located within a LSLR Project Area and replaced the Customer-Owned LSL within one year of LSLR Project Commencement. A Customer or property owner, if the Customer is not the property owner, located within a LSLR Project Area is eligible for a reimbursement of LSLR expenses up to 125% of the average cost over the last twelve months, on a rolling basis, the Company would have incurred to perform the replacement of a similarly-sized service line, not to exceed the actual cost to the Customer or property owner.

Reimbursements will be paid directly to the Customer or property owner, if the Customer is not the property owner, through the issuance of a check. The Company will issue a check within ninety days after verifying that the Customer or property owner is eligible for reimbursement.

(C) Indicates Change

COLUMBIA WATER COMPANY

28. Lead Service Line (LSLR) Program (Cont'd)

(C)

(10) Warranty

For Customer-Owned LSLs replaced directly by the Company or by a contractor at the Company's request, the Company will provide a two-year warranty for materials and workmanship of the replaced customer-owned portion of the Service Line commencing from the date the LSLR is complete. This warranty shall cover repairs conducted by the Company or a contractor at the Company's request of the replaced customer-owned portion of the Service Line up to \$2,500 per customer, including restoration of surfaces consistent with this Tariff, so long as the customer allows access to the property for repairs.

Only material defects and incomplete installation methods are covered by the warranty. The warranty does not cover, among other things, damage caused by natural disasters, acts of God, fires, terrorism, excavation activities, acts of sabotage, or deliberate damage. The Company shall have no liability for any damages not covered by the warranty.

(11) Limitation of Liability

The Company's liability relating to Lead Service Line Replacement efforts is limited as set forth in Rule 15 of this Tariff.

(12) Restoration

The Company will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for Lead Service Line Replacements. The Company will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the Customer or property owner, if the Customer is not the property owner.

(13) Ownership and Responsibility for Replacement Line

After a Customer-Owned LSL is replaced by the Company, the Customer shall continue to own the customer portion of the Service Line and shall have full responsibility for the repair, replacement and maintenance of the new customer portion of the Service Line.

Introduction

In accordance with the requirements of 66 Pa. C.S. §§ 1350 - 1360 and the Public Utility Commission's Final Order for the Implementation of Act 11 of 2012 (Public Meeting of August 2, 2012, Docket No. M-2012-2293611), Columbia Water Company (CWC) is submitting this Long-Term Infrastructure Improvement Plan (LTIIIP). CWC's LTIIIP addresses infrastructure investment through its long-established and cost-effective Distribution System Improvement Charge (DSIC)^{1,2}. This LTIIIP incorporates the Marietta rate district and adjusts future spending projections to account for changes in available capital and the regulatory environment.

Since its establishment of a DSIC in April of 2003, CWC has replaced over 27,400 feet of pipe. This represents about 3.8% of its distribution system pipe that has been renewed through the DSIC program. In addition to pipe, CWC has replaced 940 service lines which is approximately 9% of the total service lines and 5,330 old age meters which is over 51% of the Company's meters. This has allowed CWC to continue to provide safe and reliable service to its customers. In addition, the DSIC has allowed the Company to manage infrastructure replacement costs in an effective manner by directly targeting those costs without the need for additional rate case filings, the reasonable costs of which are borne by the ratepayers.

Prior to Commission approval of the Company's last rate filing on March 1, 2018 at Docket No. R-2017-2598203, the Company operated two districts known as the Columbia District and the Marietta District. For purposes of the DSIC, the March 1, 2018 Commission Order combined the rate districts and made the Marietta Rate District DSIC eligible. Prior to the March 1, 2018 Commission Order, only the Columbia Rate District was DSIC eligible. This LTIIIP is for CWC's distribution system which is located the Columbia and Marietta rate districts. It does not include the East Donegal rate district.

CWC provides public water service to residential, commercial, public and industrial customers in Columbia, Marietta and Mountville Boroughs, West Hempfield, Manor, and East Donegal Townships, Lancaster County and Hellam Township, York County, Pennsylvania. CWC served approximately 10,400 customers at the end of year 2021. Figure 1 shows the CWC service area covered by this LTIIIP.

¹ The Pennsylvania Public Utility Commission authorized CWC to establish a DSIC through Final Order dated April 17, 2003 at Docket No. P-00021979.

² The Pennsylvania Public Utility Commission authorized CWC to include the Marietta Rate District into its DSIC program through Final Order dated March 1, 2018 at Docket No. R-2017-2598203.

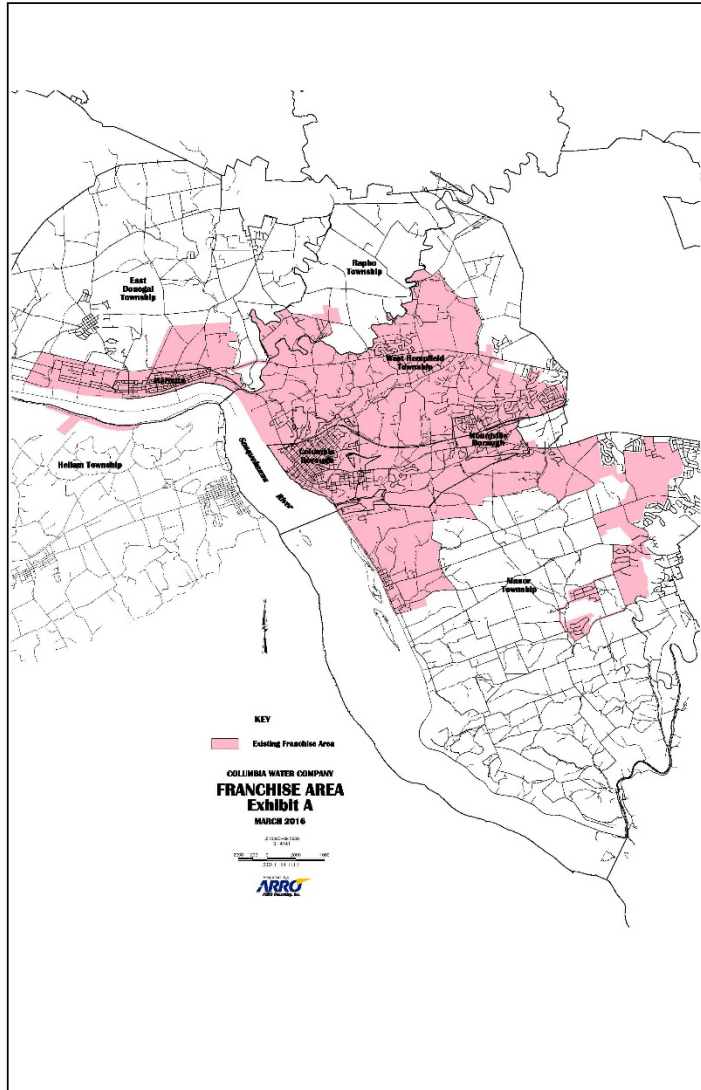

Figure 1 – Columbia Water Company Service Area

The CWC distribution system is comprised of water mains that vary in size from 4-inch through 36-inch with the material type being mainly cast iron and ductile iron. The age of the water mains range from the 1870s through 2021. The condition of the pipes vary throughout the system and age is not always the best indicator of pipe condition. Other factors like the original quality of the pipe, installation and geology impact the pipe condition and reliability.

This LTIP identifies how CWC will use the DSIC to replace aging infrastructure at an accelerated pace. This LTIP will identify the types and ages of infrastructure eligible for DSIC recovery; schedule for the planned replacements; location of the eligible property; estimates of the quantity to be replaced; projected annual expenditures; manner in which the replacement will be accelerated; workforce management plan to ensure work is completed safely and cost effectively; and description of outreach to other utilities to minimize disruption to customers; as well as the benefit to customers of accelerated infrastructure rehabilitation and replacement.

Section 1 – Types and Age of Eligible Property

A listing of all eligible property, as defined in 66 Pa. C.S. §1351 (3), is provided in this section. CWC developed and integrated a Geographic Information Systems (GIS) to map and manage its water system assets. The water system assets such as water mains, valves, hydrants, tanks, and service lines are spatially located and attributed with information about the distribution system. This information is supplemented with paper mapping and files as necessary. This process provides the means for CWC to document data and provides the Company with an efficient means to identify DSIC eligible facilities for replacement. These efficiencies translate into direct savings to the customers by specifically targeting the appropriate facilities to be replaced.

CWC owns the following water system components:

Water mains – In a water distribution system the water mains form the network necessary to distribute water to the customers. Larger water mains are used to move large volumes of water to pressure zones and key demand areas. Smaller mains fill in the network and are normally located beneath the streets and roads in the front of homes, businesses, schools and factories. Water gets delivered from the water main to the customer through a service line. CWC owns approximately 722,890 LF of water mains. The material type of the water main generally depends on the installation date and the installing party. Newer mains are normally ductile iron cement lined (DICL) pipe with the older mains being mainly unlined cast iron pipe. Very limited pockets of polyvinyl chloride (PVC) exist within the system.

Company-Owned Service lines - Water gets delivered from the water main to the customer's curb stop through a Company-owned, pressurized service line. CWC owns the service line between the water main and the curb stop ("Company-owned service line"). The service line from the curb stop to the customer's building ("Customer-owned service line") is owned by the customer and any replacement of the customer's portion of the service line is the responsibility of the customer and thus Customer-owned service lines are not included in this LTIP. The Company-owned service lines vary in size from 6-inch down to ¾-inch with a majority of CWC's service lines being constructed of copper. Only copper is used when Company-owned service lines are replaced.

Valves – Valves are used to control the volume and direction of flow in the distribution system. They are also used to isolate sections of water main for replacements or repairs. Almost all valves are buried and are opened or closed through a valve box that extends from the valve to the ground surface. The valves vary in size from 4-inch through 16-inch. CWC owns approximately 3,535 valves in its system.

Hydrants – Hydrants are typically located along roadways and right-of-ways. Hydrants are used to flush water from the water system and to assist in fighting fires. Generally, a hydrant can be isolated from the distribution system by opening or closing a dedicated hydrant valve. Hydrants play a critical role in system maintenance and community fire protection. CWC owns approximately 978 hydrants in its system.

Meters – Meters are used to measure the amount of water used by a customer. Meters are sized based upon the amount of water a customer uses. Typically residential customers have a 5/8-inch

or 3/4-inch meter. Commercial customers have meters that range from 3/4-inch through 2-inch meters. Industrial customers normally have meters in the 2-inch through 6-inch range. CWC owns approximately 10,407 meters in its system.

Table 1 provides a breakdown of eligible property by type. Table 2 provides a breakdown of the water main by size.

Table 1 – Types and Age of Eligible Property

Property Type	Quantity	Age (Year)
Water mains **	722,890 LF	1875 - 2021
Company-owned service lines	10,407 EA	1875 - 2021
Valves	3,535 EA	1875 - 2021
Hydrants	978 EA	1875 - 2021
Meters	10,407 EA	1990 - 2021

** - less than 1% of all water mains were installed prior to 1900.

Table 2 – Quantity of Water Mains by Size

Water Main Diameter (inches)	Quantity (Linear Feet)
4	7,550
6	143,650
8	311,050
10	52,200
12	195,000
16	13,100
36	340
TOTAL	722,890

Section 2 – Schedule for Planned Replacement of Eligible Property

CWC understands the importance and benefits of continuous renewal of aging infrastructure to continue to provide safe and reliable service to our customers. This section provides an overview of the planning process for replacing aging water distribution system infrastructure. This section does not discuss the planning process for new water main extensions or for improvements to treatment, storage and pumping facilities since they are not DSIC eligible.

Many components must be evaluated and weighted when determining which infrastructure to replace in a given year. In general the following components, in order of priority, are used to select infrastructure to replace each year:

- Planned state highway improvements;
- Planned municipal street improvements;
- Planned large scale improvements by other utilities;
- Water main break frequency;
- Age;
- Material quality; and
- Installation quality.

The first three items are given the highest priority since CWC has little to no influence on the scheduling of work by outside entities. CWC understands the significant benefit to the customers and municipalities when infrastructure is replaced and/or improved concurrently with other public infrastructure work. CWC meets at least annually with the municipalities in which it serves public water to coordinate the replacement of water system infrastructure with planned street upgrades. This directly reduces the cost to the Company and thus, to customers, by providing for less construction work and expense to replace these lines.

Water main replacement – Work normally entails full replacement of the water main (as opposed to rehabilitate) since this option eliminates long-term structural and integrity deficiencies that remain when a water main is simply rehabilitated. Further, this option is also considerably less disruptive to the customer since the new main can be installed, tested and placed into service before moving service lines from the old main to the new main. Disruption of water service is minimal since the customer is without service during their service line switch over only. In areas where considerable construction or restoration costs would be incurred to replace a water main, rehabilitation of the existing main is pursued.

Valve and hydrant replacement – Work normally involves the full replacement of the valve and hydrant. Occasionally a relatively new valve or hydrant will be rebuilt and/or reused but only in those situations where the reliability and integrity are well known. Valves and hydrants normally get replaced at the same time a water main is being replaced or rehabilitated. There are times when critical valves and hydrants are replaced independently of a full scale water replacement project. Properly operating valves greatly benefit the customers since it minimizes the geographic area impacted by a main repair and minimizes the amount of time needed to make a repair. A schedule of valve and hydrant replacements is provided in Table 1.

Company-Owned Service line replacement – Work normally involves the full replacement of the company-owned service line between the water main and the curb stop. The work will include replacement of the curb stop and curb box. Company-owned service lines get replaced during full scale water replacement projects or if the Company determines they otherwise need to be replaced due to conditions including but not limited to leaks or malfunction.

Meter replacement or repair– Residential and commercial meters normally involve full replacement. Some commercial and industrial meters can be rehabilitated. Meter replacement is typically based upon meter age. CWC replaces its meters in compliance with the schedule in the Commission’s regulation at 52 Pa. Code § 65.8. Accelerated replacement of meters will benefit customers directly through more accurate meter readings.

Section 3 – Location of Eligible Property

All of the CWC’s eligible property is located in Lancaster and York Counties, Pennsylvania. More specifically, the property is located in the boroughs of Columbia, Marietta and Mountville and in portions of the townships of West Hempfield, East Donegal, Hellam and Manor. See Figure 1 for additional details.

Section 4 – Estimate of the Quantity of Eligible Property to be Replaced

Table 3 identifies eligible property that is projected to be replaced in the next five years. These quantities were prepared based upon the best available information (planned municipal and utility projects, main break data, pipe age, etc.) at the time this plan was prepared. Actual quantities may vary depending on conditions that could change in the distribution system or changes made by the municipalities to their street projects.

Table 3 – Projected Quantities of Eligible Property to be Replaced for 2023 - 2027

Year	Water Main (LF)	Service lines (ea.)	Valves	Hydrants	Meters
2023	1,200	30	5	3	140
2024	1,200	30	5	3	140
2025	1,200	30	5	3	140
2026	1,200	30	5	3	140
2027	1,200	30	5	3	140

Section 5 – Projected Annual Expenditures

The projected annual expenditures for the 2023 to 2027 period are listed in Table 4 below. These estimates are based upon the quantities listed in Table 3 and recent construction costs. A break down by category is provided in Table 5.

Table 4 – Projected Annual Expenditures for 2023 - 2027

Year	Projected Annual Expenditures
2023	\$280,000
2024	\$280,000
2025	\$280,000
2026	\$280,000
2027	\$280,000

Table 5 – Projected Annual Expenditures by Category for 2023 - 2027

Year	Water Main	Service lines	Valves	Hydrants	Meters	Total
2023	\$160,000	\$45,000	\$15,000	\$10,000	\$50,000	\$280,000
2024	\$160,000	\$45,000	\$15,000	\$10,000	\$50,000	\$280,000
2025	\$160,000	\$45,000	\$15,000	\$10,000	\$50,000	\$280,000
2026	\$160,000	\$45,000	\$15,000	\$10,000	\$50,000	\$280,000
2027	\$160,000	\$45,000	\$15,000	\$10,000	\$50,000	\$280,000

For all projects, the most prudent, cost-effective methods will be used to complete the project. Almost all eligible property is abandoned in place after the replacement infrastructure is installed and therefore is not salvageable. Meters can be salvaged and are sold at local salvage yards.

Section 6 – Acceleration of Infrastructure Replacement

CWC has a track record of investing in its infrastructure to maintain safe and reliable service to all of its customers including infrastructure not eligible for DSIC. Over the past 5 years considerable investment has occurred in major upgrades of its water system including a system-wide security system, four (4) emergency generators, repainted two tanks, and installing a new intake in the Susquehanna River. In addition CWC purchased an adjacent water system that was being operated by part-time contractors.

In addition to the capital expenditures listed above, CWC, through the use of its DSIC, continued to replace water mains, Company-owned service lines, valves, hydrants and meters. Figure 2 graphs the projected and historical DSIC eligible capital expenditures. With the completion of the large projects listed above, additional capital will be directed towards expediting infrastructure replacement.

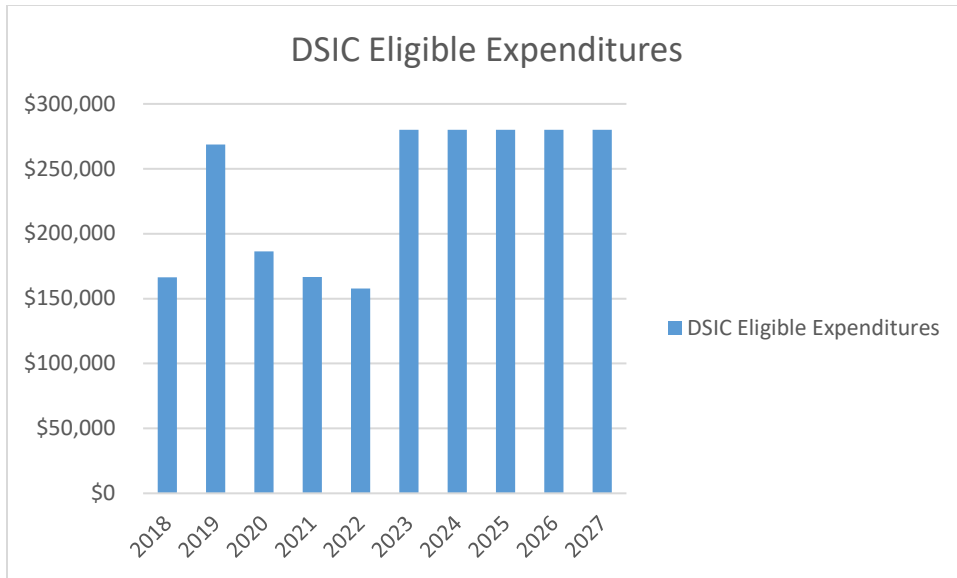

Figure 2 – Projected and Historic DSIC Eligible Expenditures

The projected DSIC eligible expenditures will accelerate the replacement of infrastructure by approximately 80 percent.

Section 7 – Workforce Management Plan and Training

To ensure system reliability, public safety, quality installation and cost-effectiveness, all DSIC eligible projects will be constructed by qualified personnel. CWC uses a competitive bidding process for the purchase of piping, valves and hydrants. A list of materials is prepared for the project and sent to the four (4) major pipe suppliers for price quotes. CWC utilizes its own staff and equipment for the installation of water mains, company-owned service lines, valves, hydrants and meters. Company employees utilized for this type of work have extensive training in the use of heavy equipment, pipe laying procedures, disinfection procedures and safety training. For water mains greater than 12-inches in diameter, stream crossings or expedited Pa DOT projects, CWC uses qualified local contractors for water main, valves and hydrant installations. These local contractors are prequalified based upon experience with similar projects, safety record, and qualifications of personnel. All project sites are inspected regularly throughout the construction process by Company personnel.

Section 8 – Outreach and Coordination with other Utilities

CWC meets annually, and often times more frequently, with the municipalities where it provides public water service to coordinate the replacement of water main with the reconstruction and/or repaving of streets and roadways. These meetings often times include the other utilities serving the same areas. CWC coordinates its replacement projects to coincide with other planned roadway

and utility work. PaDOT is very effective at notifying utilities well ahead of planned state highway projects making coordination of the work an easy process. In each of the municipalities where CWC provides public water service, public officials have a strong record of planning street projects far enough in advance to allow each of the major utilities to upgrade facilities as necessary.

For each project, CWC coordinates all work with the state or local municipality through planning meetings and the permitting process. In addition, CWC utilizes the PA One Call system to minimize utility conflicts and notifies customers of proposed work with door hangers throughout the construction process.

Section 9 – Lead Service Line Replacement Plan

In accordance with the requirements of 66 Pa. C.S. § 1311 and the Public Utility Commission’s Final Rulemaking Order for the Implementation of Act 120 of 2018 (Public Meeting of February 24, 2022, Docket No. L-2020-3019521), CWC is submitting this Lead Service Line Replacement Plan (LSLR Plan). CWC’s LSLR Plan addresses the Company’s efforts to replace company-owned and customer-owned Lead Service Lines as approved at Docket No. P-2023-_____.

Lead is a heavy metal that commonly occurs in our environment. Humans can be exposed to lead through a variety of sources, including dust, soil, or paint chips, as well as through ingestion from drinking water. The deleterious health effects of lead are now well-recognized. Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.

In October 2018, Governor Wolf signed into law Act 120 of 2018 (“Act 120”), which became effective on December 23, 2018. Act 120 amended Section 1311(b) of the public Utility Code in order to, *inter alia*, authorize water utilities to pursue comprehensive replacement of lead service lines that remain in service across Pennsylvania subject to Commission approval.

Pursuant to Act 120, the Commission promulgated its LSLR Regulations at 52 Pa. Code § 65.51, *et seq.*, which became effective on July 23, 2022. 52 Pa. Code § 65.53 states that “[a]n entity...shall remove and replace all LSLs, whether entity-owned or customer-owned, within or connected to its water distribution systems within 25 years from the effective date of this section for a Class A public utility...” 52 Pa. Code § 65.54(a) and 65.55(a) further states that a Class A public utility or authority shall file a Petition for an LSLR Program within 1 year of the effective date of this section, or by July 23, 2023. Moreover, 52 Pa. Code § 65.54(b) requires that the utility shall include with its LSLR Program a modified LTIP containing a LSLR plan as a separate and distinct component of the entity’s LTIP.

Accordingly, Columbia Water has begun efforts to replace lead service lines in its system, including galvanized materials downstream of a lead service line, as well as any lead pigtail, gooseneck, or other fitting that is connected to a lead service line. This section of the LTIP will identify how CWC will incorporate its LSLR Plan into its LTIP to continue replacing aging infrastructure in combination with the replacement of lead service lines.

(1) Identification of types and age of eligible property owned and operated by the utility for which it is seeking DSIC recovery.

A listing of the eligible property, as defined in 66 Pa. C.S. §1351(3), is provided in this section. CWC developed a lead service line inventory to locate, track, and replace company-owned and customer-owned service lines that contain lead, galvanized steel downstream of a lead service line, and lead pigtails, goosenecks, or other fittings connected to lead service lines. Columbia Water is

currently working to incorporate the service line Inventory into its GIS to map and manage these assets. This information is supplemented with paper mapping and files as necessary.

CWC owns the following water system components:

Company-Owned Service Lines - Water gets delivered from the water main to the customer’s curb stop through a Company-owned, pressurized service line. CWC owns the service line between the water main and the curb stop (“Company-Owned Service Line”). The Company-Owned Service Lines vary in size from 6-inch down to ¾-inch with a majority of CWC’s service lines being constructed of copper. Only copper is used when Company-owned service lines are replaced.

The customer owns the following water system components:

Customer-Owned Service lines - The portion of the lead service line extending from the Curb Stop to the meter or one foot inside a building foundation, whichever is farther (“Customer-Owned Service Line”). Generally, any replacement of the Customer-Owned Service Line is the responsibility of the customer. However, Customer-Owned Service Lines are included in this LTIP only for purposes of the LSLR Plan. The Customer-Owned Service Lines vary in size from 6-inch down to ¾-inch with a majority of Customer-Owned Service Lines being constructed of copper. Copper or plastic is used when Customer-Owned service lines are replaced pursuant to the LSLR Plan.

Table 6 provides a breakdown of the company side materials and customer side materials by type. Table 7 provides a breakdown of the service lines by type and size.

Table 6 – Company Side and Customer Side Materials by Type

Company Side Material		Customer Side Material	
Lead	3	Lead	0
Copper	2921	Copper	712
Unlikely Lead	5921	Unlikely Lead	6477
Unknown	3267	Unknown	4923
Likely Lead	0	Likely Lead	0
Other	16	Other	3
TOTAL	12125	TOTAL	12115

Table 7 – Service Lines by Size and Type

Full Line Classification										
	3/4	1	1 1/2	2	3	4	6	8	Unknown	Total
Lead	3	0	0	0	0	0	0	0	0	3
Non-Lead	3,251	41	35	48	5	3	0	0	1,078	4,461
Lead Status Unknown	7,062	137	31	113	5	25	50	13	229	7,665
Galvanized Requiring Replacement	0	0	0	0	0	0	0	0	0	0
TOTAL	10,316	178	66	161	10	28	50	13	1,307	12,129

Based on the initial inventory, the Company has identified three (3) lead service lines on the company-owned portion of the service line. The Company estimates the total number of lead service lines that will need to be replaced to be less than 400. CWC plans to identify, at a minimum, a cumulative average of 10.0% of the initial unknown service materials annually by means of utilizing existing records, modeling, statistical analysis, and mechanical excavation.

(2) An initial schedule for planned repair and replacement of eligible property.

As part of its broader LTIP efforts, Columbia Water will analyze record-reviews of old age mains within the oldest parts of the distribution system to determine which water mains in the distribution system should be replaced. Prior to choosing a target area, the Company’s distribution crew will review records and/or physically inspect a portion of the service lines within a proposed area to gauge the likelihood of lead within that area. Coordination with municipalities will take place to minimize costs and minimize impacts on roads and neighborhoods. Once the targeted areas are determined, the projects will be posted on the Columbia Water website at least six (6) months in advance of the work being done. Prior to the work being initiated, Columbia Water staff will reach out to the customers to determine all service line materials within the affected area, and to provide the customers with detailed information regarding the routine procedures and the potential health risks involved.

With respect to replacing LSLs discovered during mechanical excavation, areas with a higher likelihood of having lead service lines will be prioritized for these projects. Columbia Water will physically excavate the service lines to determine material types. If a service line is determined to be lead, coordination will occur with the customer(s) and the property owner to have the service line replaced.

With respect to replacing customer-owned LSLs discovered inside the building, Columbia Water will reach out to the customers with lead, galvanized requiring replacement, or unknown service lines. Customers who discover a lead service line may call and schedule to have their service line replaced. CWC will schedule to replace customer-owned lead service lines. If the company side is lead, it will be replaced at the same time with the customer side. These replacements will occur as discovered.

If a lead service line is leaking or otherwise defective at the time it is discovered, CWC will replace the lead service line in accordance with its tariff. Columbia Water staff will maintain the proper equipment and tools necessary for emergency service line replacements. If a lead service line is discovered during an emergency but is not leaking, the replacement of the line will be scheduled for replacement at a later date.

Determination of LSLR projects under these three procedures will be prioritized based on targeted sensitive populations as defined by the EPA and PADEP, which includes areas with elevated levels of lead in tap water, areas with high concentrations of lead service lines, and/or areas of the distribution system which have elevated corrosion rates. A list of sensitive populations has also been developed to determine the service line materials. The list includes schools, nursing homes, large apartment buildings, churches, and industries. These service lines have been or will be detailed as sensitive populations in the Service Line Inventory. Homes with multiple meters and multiple family residents will also be prioritized to determine service line material.

Columbia Water intends to replace LSLs using existing routes through a combination of pipe splitting and/or pipe pulling. This approach removes or displaces existing pipe while simultaneously replacing it with a new pipe and is the preferred method under normal circumstances. Columbia Water may also utilize guided boring to install new pipe along a different route or using open trench excavation to remove replace the pipe. The appropriate replacement technique will depend on a combination of many site-specific characteristics, including, but not limited to, time constraints, soil characteristics, depth to ground water or rock, depth of road foundation, condition of the service line, proximity of other utility services (e.g., electric, gas, cable, sewer, storm water), site conditions (e.g., access, parking, paving, landscaping, overhead obstructions), pipe conditions (e.g., length of pipe, pipe diameter and wall thickness, bury depth, configuration, and repair history, and conditions inside the home like a finished basement with limited access to the water meter and plumbing. All new pipe installation will be copper or plastic.

(3) A general description of location of eligible property.

The areas with lead service lines are more specifically found on houses built prior to 1950 with water mains older than 1970 within Columbia Borough and Marietta Borough. Though lead service line materials may be found in Mountville Borough and in portions of the townships of West Hempfield, East Donegal, Hellam and Manor. See Figure 1 for additional details.

(4) A reasonable estimate of quantity of eligible property to be improved or repaired.

CWC plans to replace approximately 50 lead service lines per year. This projection was determined by estimating the total number of lead service lines to be less than 400. After all existing records have been inventoried, CWC will review this annual projection and adjust it as necessary.

(5) Projected annual expenditures and means to finance the expenditures.

The projected annual investment in lead service line replacements (“LSLR”) is approximately \$250,000. Table 8 identifies the number and cost of lead service lines that are projected to be replaced in the next five years.

Table 8 – Projected Number and Cost Associated with Lead Service Line Replacements

Year	Projected Number of Lead Service Line Replacements	Projected Annual Expenditures
2024	50	\$250,000
2025	50	\$250,000
2026	50	\$250,000
2027	50	\$250,000
2028	50	\$250,000

The cost incurred by Columbia Water for LSLRs will be funded with a combination of commercial loans, cash from operations, and/or loans issued by the Pennsylvania Infrastructure Investment Authority.

(6) A description of the manner in which infrastructure replacement will be accelerated and how repair, improvement or replacement will ensure and maintain adequate, efficient, safe, reliable and reasonable service to customers.

Through the Company’s LSLR Plan, the Company will make a concerted effort to replace existing lead service lines in a timely manner within the time frame set forth in 52 Pa. Code § 65.53(a). The LSLR Plan will take place in conjunction with Columbia Water’s other infrastructure investments.

(7) A workforce management and training program designed to ensure that the utility will have access to a qualified workforce to perform work in a cost-effective, safe and reliable manner.

As with its other DSIC-eligible projects, lead service line replacements will be completed by qualified personnel. Columbia Water will use a competitive bidding process for the purchase of the necessary materials. A list of the materials will be prepared and sent to the four (4) major pipe suppliers for price quotes. CWC will then utilize its own staff and equipment for the installation of company-owned and customer-owned service lines. Company employees utilized for this work will have extensive training in the use of heavy equipment, pipe laying procedures, disinfection procedures and safety training. Qualified local contractors may be used for some projects depending on the level of work involved. Local contractors are prequalified based upon experience with similar projects, safety record, and qualifications of personnel. All project sites will be inspected regularly throughout the construction process by Company personnel.

(8) A description of a utility's outreach and coordination activities with other utilities, Department of Transportation and local governments regarding the planned maintenance/construction projects and roadways that may be impacted by the LTIP.

With its other DSIC-eligible projects, CWC meets annually, and often times more frequently, with the municipalities where it provides public water service to coordinate the replacement of water main with the reconstruction and/or repaving of streets and roadways. These meetings often times include the other utilities serving the same areas. CWC also coordinates its replacement projects to coincide with other planned roadway and utility work. The Pennsylvania Department of Transportation is very effective at notifying utilities well ahead of planned state highway projects making coordination of the work an easy process. In each of the municipalities where CWC provides public water service, public officials have a strong record of planning street projects far enough in advance to allow each of the major utilities to upgrade facilities as necessary. CWC will use these meetings and processes as an opportunity to identify lead service lines replacements that can be done in conjunction with other DSIC-eligible projects.

For each project, CWC coordinates all work with the state or local municipality through planning meetings and the permitting process. In addition, CWC utilizes the PA One Call system to minimize utility conflicts and notifies customers of proposed work with door hangers throughout the construction process.

Exhibit No. 5

Data Responses to 52 Pa. Code Section 53.52

Columbia Water Company

LSLR Program Filing Docket No. P-2023-_____

Data Responses to 52 Pa. Code Sections 53.52

Part (a) Whenever a public utility, other than a canal, turnpike, tunnel, bridge or wharf company files a tariff, revision or supplement effecting changes in the terms and conditions of service rendered or to be rendered, it shall submit to the Commission, with the tariff, revision or supplement, statements showing all of the following:

(1) The specific reasons for each change.

Response: Columbia Water Company seeks Commission approval of its plan to replace Company-owned and customer-owned lead service lines (“LSLs”) and to recover the associated costs related to those replacements as set forth in the Company’s Lead Service Line Replacement Program (“LSLR Program”).

Lead is a heavy metal that commonly occurs in our environment. Humans can be exposed to lead through a variety of sources, including dust, soil, or paint chips, as well as through ingestion from drinking water. The deleterious health effects of lead are now well-recognized. In October 2018, Governor Wolf signed into law Act 120 of 2018 (“Act 120”), which became effective on December 23, 2018. Act 120 amended Section 1311(b) of the public Utility Code in order to, inter alia, authorize water utilities to pursue comprehensive replacement of lead service lines that remain in service across Pennsylvania subject to Commission approval. Specifically, Act 120 provides that replacing a customer-owned LSL does not make the utility the owner of the new service line on the customer’s property. Act 120 also directs the Commission to establish standards to ensure a warranty on the utility’s replacement work and reimburse customers who replaced lead service lines at their own cost. Additionally, Act 120 establishes the accounting and ratemaking treatment of lead service line replacement costs by providing that the customer-owned portion of LSLs may be included in a regulated utility’s rate base upon which it is authorized to earn a return.

Pursuant to Section 1311(b)(2) of the Public Utility Code, 66 Pa. C.S. § 1311(b)(2) and the Pennsylvania Public Utility Commission’s (“Commission” or “PUC”) Lead Service Line Replacement Regulations (“LSLR Regulations”), 52 Pa. Code § 65.51, *et seq.*, the Company seeks Commission approval of its LSLR Program and associated tariff changes. Together, the Petition and Pro Forma Tariff represent a comprehensive solution to address lead service lines in Columbia Water’s system in an expeditious manner to address the recognized health risk posed by lead in drinking water in accordance with the law.

(2) The total number of customers served by the utility.

Response: Columbia Water Company currently serves approximately 12,154 water customers.

(3) A calculation of the number of customers, by tariff subdivision, whose bills will be affected by the change.

Response: No customer bills will be affected as a result of this change at this time. While the Company is seeking approval to record the costs of the customer-owned LSL replacements in a separate, segregated subaccount to ultimately recover a return on and a return of its investment in

Data Responses to 52 Pa. Code Sections 53.52

the replacement of customer-owned LSLs, pursuant to 66 Pa. C.S.A. § 1311(b)(2)(iii), such costs will be recovered in between rate cases through the distribution system improvement charge (“DSIC”) and in the Company’s next base rate case as investments are made pursuant to the LSLR Program. To the extent the Company obtains any PENNVEST loans to fund the cost of customer-owned replacements, it will seek recovery of those costs through its existing PENNVEST surcharge.

(4) The effect of the change on the utility’s customers.

Response: See response to (3) above.

(5) The direct or indirect effect of the proposed change on the utility’s revenue and expenses.

Response: Pursuant to 52 Pa. Code § 56.58(a), the Company is proposing to cap annual lead service line replacements at 50 customer-owned lead service lines or \$250,000 on an annual basis, whichever is less. The Company is also proposing that any proceeds from disposing of or recycling of lead service lines will be reflected in Columbia Water’s Operating Revenue. Columbia Water will keep copies of all scrap receipts of LSLs on file.

(6) The effect of the change on the service rendered by the utility.

Response: Service levels will not change.

(7) A list of factors considered by the utility in its determination to make the change.

Response: See response to (1) above.

(8) Studies undertaken by the utility in order to draft its proposed change.

Response: N/A

(9) Customer polls taken and other documents which indicate customer acceptance and desire for the proposed change. If the poll or other documents reveal discernible public opposition, an explanation of why the change is in the public interest shall be provided.

Response: N/A

(10) Plans the utility has for introducing or implementing the changes with respect to its ratepayers.

Columbia Water Company

LSLR Program Filing Docket No. P-2023-_____

Data Responses to 52 Pa. Code Sections 53.52

Response: As set forth in the LSLR Plan attached to the Company’s Petition, Columbia Water will undertake comprehensive efforts to begin removing and replacing Company-owned and customer-owned Lead Service Lines. These efforts involve implementing three simultaneous procedures for replacing LSLs, including: (1) replacing LSLs in conjunction with old main replacements, (2) replacing LSLs discovered by mechanical excavation, and (3) replacing customer-owned LSLs discovered inside the building. Additionally, Columbia Water will provide customers with documentation describing the health effects of lead, provide them with information explaining how to determine their own service line material and what to do if they believe their service line material is lead. Columbia Water staff has also prepared a service line inventory to track lead service lines in its system and will be checking and documenting service line material in conjunction with meter changes.

Columbia Water also has proposed extensive procedures upon identifying a lead service line, working with the customer to provide them with information and certain assistance pending the replacement, and post-replacement closeout procedures.

(11) Commission orders or rulings applicable to the filing.

Response: *Rulemaking to Implement Act 120 of 2018 at 52 Pa. Code Chapters 65 and 66, 2022 WL 798227, Docket No. L-2020-3019521 (Final Rulemaking Order entered Mar. 14, 2022).*

VERIFICATION

I, Taz Keyser, certify that I am the Information Technology Supervisor for Columbia Water Company and that in this capacity I am authorized to and do make this Verification on their behalf, that the facts set forth in the foregoing document are true and correct to the best of my knowledge, information and belief, and that I expect to be able to prove the same at any hearing that may be held in this matter. I understand that false statements made therein are made subject to the penalties of 18 Pa. C.S. §4904, relating to unsworn falsifications to authorities.
