**PPL Electric Utilities Corporation
Response to Data Request of the
Bureau of Technical Utility Services
Dated July 13, 2023
Docket No. A-2019-3008816**

Q.1 Please provide the current status of the subject PPL Electric transmission project and submit a breakdown of the project costs to date.

A.1 PPL Electric has completed most of the construction and installation on the 115kV Face Rock–Five Forks Transmission Line with the exception of an approximately 1-mile section crossing the Susquehanna River.

All right-of way has been restored and all environmental permits have been closed on the approximately 7.5 miles of transmission line construction that has been completed.

The outage and final installation of approximately 1-mile river crossing was delayed until fall of 2023 due to unplanned system limitations during the previously scheduled outage periods. Site access construction for the remaining section starts in August and the outage is planned to be completed in December 2023. Final restoration on the 1-mile final section and permit are scheduled to be completed in 2024.

PPL Electric has spent \$13,664,600 to date for all associated work with the 115kV Face-Rock - Five Forks Transmission Line rebuild.

VERIFICATION

I, JOSEPH B. LOOKUP, being the Director of Asset Management at PPL Services Corporation, hereby state that the facts above set forth are true and correct to the best of my knowledge, information and belief and that I expect PPL Electric Utilities Corporation to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa.C.S. § 4904 relating to unsworn falsification to authorities.
