Re: Pennsylvania Public Utility Commission v. The Pittsburgh Water and Sewer Authority; Docket Nos. R-2023-3039919 (Stormwater); R-2023-3039920 (Water); R-2023-3039921 (Wastewater)

Dear Secretary Chiavetta:

On behalf of The School District of Pittsburgh, enclosed please find the Surrebuttal Testimony and Exhibits of Michael J. McNamara and Theodore J. Dwyer, PhD, labeled School District Statement No. 1-SR, and the Surrebuttal Testimony and Exhibits of Eric M. Callocchia, labeled as School District Statement No. 2-SR in the above-referenced proceedings.

This document is being served as indicated in the attached Certificate of Service.

Very truly yours,

Alan M. Seltzer, Esquire

AMS/kas
Enclosure

TABLE OF CONTENTS

I. INTRODUCTION AND PURPOSE 3

II. PROPER ALLOCATION OF PWSA’S CUSTOMER ASSISTANCE CHARGE (“CAC”) 5

III. STORMWATER MANAGEMENT AS A COMMUNITY WIDE BENEFIT 8

IV. PWSA’S EFFORTS TO REDUCE STORMWATER COSTS FOR ALL STORMWATER CUSTOMERS 11

V. CLAIMS THAT THE CITY OF PITTSBURGH’S STREETS AND SIDEWALKS ARE PART OF PWSA’S STORMWATER SYSTEM..... 13

VI. DIFFERENCES IN THE COST AND SCOPE OF THE VARIOUS METHODS USED TO ADDRESS IMPERVIOUS SURFACES IN ESTABLISHING STORMWATER CHARGES 16

VII. PWSA’S INCONSISTENT APPROACH TO ROUNDING ERUS 17

VIII. WHY PROVIDING AN EXEMPTION OR MATERIAL DISCOUNT TO THE SCHOOL DISTRICT ON ITS STORMWATER CHARGES IS NOT AN UNREASONABLE DISCRIMINATION IN RATES 18

IX. SUPPORT FOR THE SCHOOL DISTRICT’S RECOMMENDED STORMWATER DISCOUNT 22

X. CONCLUSION..... 23

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 **I. INTRODUCTION AND PURPOSE**

2 **Q. Please state your name and business address.**

3 A. My name is Eric M. Callocchia, and my business address is 900 Bestgate Road, Suite 402,
4 Annapolis Maryland, 21403.

5

6 **Q. Have you testified previously in this proceeding?**

7 A. Yes. I previously submitted Direct Testimony on behalf of the School District of
8 Pittsburgh, which is School District Statement No. 2. Any undefined and capitalized terms
9 used in this Surrebuttal Testimony have the same definitions contained in my previously
10 submitted Direct Testimony.

11

12 **Q. What is the purpose of your Surrebuttal Testimony?**

13 A. The purpose of my Surrebuttal Testimony is to address rebuttal statements made by PWSA
14 witnesses Smith, Igwe, Pickering and Readling, Pittsburgh United Our Water Table
15 witness Geller, and the Office of Consumer Advocate (“OCA”) witness Colton on the
16 following issues:

- 17 i. The proper allocation of PWSA’s Customer Assistance Charge (“CAC”);
18 ii. Stormwater management as a community-wide benefit;
19 iii. PWSA’s efforts to reduce stormwater costs for all stormwater ratepayers;
20 iv. Claims that the City of Pittsburgh’s streets and sidewalks are part of PWSA’s
21 stormwater system;

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 v. Differences in the cost and scope of the various methods used to address
2 impervious surfaces in establishing stormwater charges;

3 vi. PWSA's inconsistent approach to rounding Equivalent Residential Units
4 ("ERU's") and suggestions that identifying impervious areas tend to understate
5 the amount of impervious area in a particular property; and

6 vii. Why providing an exemption or material discount to the School District on its
7 stormwater charges is not unreasonably discriminatory and doing so would result
8 in a public benefit;

9 I will also provide support for the School District's recommended discount on its
10 stormwater charges in this proceeding.

11
12 **Q. Should your silence with respect to any issue discussed in rebuttal testimony be**
13 **interpreted as your agreement or consent?**

14 A. No. As was the case with my Direct Testimony, my Surrebuttal Testimony is limited only
15 to the issues I discuss herein. Also, as was the case with my Direct Testimony, the charge
16 given to me by the School District was to evaluate PWSA's proposed stormwater fees and
17 determine all reasonable and just avenues of reducing or eliminating costs and charges for
18 the School District. Therefore, my conclusions and recommendations stated herein are
19 unique to this case and the School District's unique position as a PWSA stormwater
20 customer.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 **II. PROPER ALLOCATION OF PWSA’S CUSTOMER ASSISTANCE CHARGE**
2 **(“CAC”)**

3 **Q. What does Pittsburgh United witness Harry Geller say about the CAC to which you**
4 **wish to respond?**

5 A. In his rebuttal testimony, Mr. Geller explains that exempting non-residential customer
6 classes from CAC costs would ignore the important social benefit provided by assistance
7 programs that are also enjoyed by non-residential ratepayers.¹

8
9 **Q. Does Mr. Geller support his opinion based on cost of service and/or utility ratemaking**
10 **principles?**

11 A. No. This portion of Mr. Geller’s rebuttal testimony focused solely on the societal impacts
12 of not applying the CAC to all customer classes. He did not address the mechanics of
13 customer assistance programs or the application of cost of service or rate making
14 principles.

15
16 **Q. What relevant cost of service and rate making principles did Mr. Geller leave out in**
17 **addressing the allocation of CAC costs?**

18 A. Mr. Geller did not discuss the principle of aligning cost-causing activities and revenue
19 recovery within customer classes. Said another way, a customer class that causes a cost
20 should be responsible for the recovery of that cost. PWSA’s non-residential customers are
21 not eligible to participate in the CAC programs and therefore do not contribute to the costs

¹Pittsburgh United Statement 1-R, p. 22, line 20 through p. 23, line 1.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 of the CAC. Based on general cost of service and ratemaking principles, non-residential
2 customers should not be responsible for the recovery of foregone revenue caused by the
3 CAC.

4
5 **Q. Did PWSA address the application of the CAC to all customer classes?**

6 A. Yes. PWSA witness Harold J. Smith noted in his rebuttal testimony that PWSA has always
7 recovered the cost of its bad debt expense and customer assistance program costs from all
8 customers and should be allowed to continue doing so.² Additionally, he notes that
9 Philadelphia Gas Works' ("PGW") customer responsibility surcharge is assessed on all
10 customer classes.³

11
12 **Q. Do you agree with Mr. Smith's justification?**

13 A. No. The claim that PWSA has always recovered its bad debt expense and customer
14 assistance program costs across all customer classes is misleading at best. First, since
15 coming under PUC jurisdiction, PWSA has never had a separate customer assistance
16 surcharge, hence the proposal to create one in this rate case. PWSA's bad debt and
17 customer assistance costs have been recovered through base rates prior to this case. When
18 costs are recovered through base rates, the risk is on the utility to manage costs and revenue
19 appropriately between rate cases to ensure recovery. Once costs are removed from base
20 rates and included in a separate surcharge, the utility has greater assurance of the recovery
21 of those costs and has effectively shifted the risk to the customers. To say it another way,

²See PWSA Statement No. 7-R, p. 4, lines 9-10.

³See PWSA Statement No. 7-R, p. 5, lines 4-10.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 the utility no longer has the same incentive to keep costs under control. Furthermore, if
2 PWSA were to implement a CAC whose costs were recovered from *all* customer classes,
3 it would be one of only two regulated utilities in the Commonwealth to do so. Only PGW,
4 as Mr. Smith noted, has implemented a customer assistance rider that is applied to all
5 customer classes.⁴ In PGW's 2017 rate case, the Commission stated that PGW was the
6 only jurisdictional gas company that does not allocate costs of universal service programs
7 to strictly the residential class, and that PGW had followed that procedure since before it
8 was a PUC regulated utility:

9 *"...we recognize that PGW was, and will continue to be, the only Pennsylvania*
10 *jurisdictional gas distribution company that does not allocate costs of universal service*
11 *programs to strictly the residential class. As this Commission has previously determined*
12 *in prior proceedings involving PGW, this Company has followed this allocation procedure*
13 *prior to coming under our regulatory authority and our approval of this allocation for this*
14 *Company represents an exception to our general policy as applied to other jurisdictional*
15 *utilities that such costs are only allocated to the residential customer class."*⁵
16

17 This justification cannot apply to PWSA, as it does not currently have a customer assistance
18 surcharge in place, and therefore cannot rely on "past practice" as a basis to allocate all
19 CAC-related costs to all customer classes. The Commission should reject PWSA's
20 proposal to allocate all CAC-related costs to all customer classes and require it to allocate
21 the surcharge's costs to only residential customers.

22
23 **Q. How did OCA address the CAC allocation issue?**

⁴Except for firm interruptible customers.

⁵See Opinion and Order R-2017-2586783 dated 11/14/2017, pp. 73-74.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 A. OCA’s witness Roger Colton addressed the CAC allocation issue in much the same way
2 as Geller and Smith, citing that CAC costs have always been spread across all customer
3 classes and PGW always allocated universal service costs to all customers, noting that the
4 Commission has rejected proposals to allocate to only residential customers in the past.⁶
5 Mr. Colton also states that PWSA has been allocating CAP costs to all customer classes
6 since they have become regulated by the PUC.⁷

7
8 **Q. Do you agree with his argument?**

9 A. No. As stated above in my response to Mr. Smith, PWSA has always recovered its bad
10 debt expense and customer assistance program costs across all customer classes through
11 base rates. Since coming under PUC jurisdiction, PWSA has never had a separate customer
12 assistance surcharge. By pulling the costs out of base rates you are effectively shifting the
13 risk of recovery from the utility to the customers, and it should be noted that some of those
14 customers will not contribute to those costs.

15
16 **III. STORMWATER MANAGEMENT AS A COMMUNITY WIDE BENEFIT**

17 **Q. Please summarize the issues raised by PWSA witness Tony Igwe in his rebuttal**
18 **testimony, PWSA St. No. 5-R, to which you wish to respond.**

19 A. Mr. Igwe makes several statements in PWSA St. No. 5-R related to PWSA’s proposed
20 stormwater fees, including statements that:

⁶ See OCA Statement 4R, p. 2 lines 11-15, p. 3 lines 1-8.

⁷ See OCA Statement 4R, p. 3, lines 9-12.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

- 1 (a) Stormwater management provides community-wide and individual
2 customer benefits.⁸
- 3 (b) PWSA will explore CBP3 arrangements but gives no timeline for doing so.⁹
- 4 (c) Providing stormwater relief to the School District is unreasonably
5 discriminatory.¹⁰
- 6 (d) Stormwater exemptions should not be provided to the School District.¹¹
- 7 (e) As a regulated entity PWSA is subject to a variety of statutory and
8 regulatory requirements that do not apply to cities that grant exemptions
9 from stormwater charges, like Baltimore or Tacoma Park.¹²
- 10 (f) PWSA does not charge for impervious service area in public right of way,
11 claiming such facilities are integral to the “drainage infrastructure.”¹³

12

13 **Q. Please describe Mr. Igwe’s position on the community benefit of stormwater**
14 **management.**

15 A. Mr. Igwe acknowledges that stormwater management provides community-wide
16 benefits.¹⁴

17

18 **Q. Do you agree with Mr. Igwe’s statement that stormwater management provides**
19 **benefits to the community as a whole?**

20 A. Yes, I do agree. However, Mr. Igwe does not elaborate on this conclusion. There are many
21 community benefits resulting from stormwater management, such as recreation

⁸ PWSA Statement No. 5-R, p. 5, lines 4-5.

⁹ PWSA Statement No. 5-R, p. 5, lines 21-22.

¹⁰ PWSA Statement No. 5-R, p. 8, lines 4-8.

¹¹ PWSA Statement No. 5-R, p. 8, lines 15-19.

¹² PWSA Statement No. 5-R, p. 6, lines 17-24, page 7, lines 1-2.

¹³ PWSA Statement No. 5-R, p. 8, lines 23-24.

¹⁴ PWSA Statement No. 5-R, p. 5, lines 4-5.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 opportunities like retention ponds or urban wetlands, climate resilience to mitigate the
2 impacts of extreme weather events, and long-term cost savings by reducing the need for
3 emergency flood response and infrastructure repairs. These benefits are widespread and
4 not related to any particular property in an area in which stormwater is managed.

5
6 **Q. Please describe Mr. Igwe's position on the discrete, tangible benefits of stormwater
7 management for individual customers.**

8 A. Mr. Igwe states that the tangible benefit of stormwater management for individuals is that
9 PWSA manages and/or conveys stormwater runoff from properties with impervious area
10 that might otherwise cause flooding, property damage, and/or water quality issues.¹⁵

11
12 **Q. Do you agree with Mr. Igwe's statement on the discrete, tangible benefits of
13 stormwater management for individual customers?¹⁶**

14 A. Not entirely. While I agree that PWSA manages and/or conveys stormwater runoff from
15 properties with impervious area, the benefits that Mr. Igwe's states as discrete and tangible
16 to individual customers are not limited to only properties with impervious area. Each of
17 these benefits also benefit the community as a whole. When looking at community versus
18 individual benefits, it is important to recognize that communities are always comprised of
19 individuals so there is always benefit to individuals. However, since everyone living in the
20 stormwater management service area benefits from stormwater management, including
21 those that have no impervious surfaces on their property, stormwater service is not

¹⁵ PWSA Statement No. 5-R, p. 5, lines 7-9.

¹⁶ PWSA Statement No. 5-R, p. 5, lines 5-10.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 measurable or metered the way it is for other individual utility service and that much of the
2 stormwater infrastructure traditionally supports runoff from public streets and sidewalks,
3 it is more accurate to view stormwater management as publicly oriented rather than
4 individually beneficial. As noted in School District Exhibit EMC-9, Black & Veatch 2021
5 Stormwater Utility Survey Report, p. 40, public streets and roads are the most common
6 type of *exempted* properties from stormwater fees, not because they are considered part of
7 the stormwater infrastructure, but because of public policy or state enabling legislation.

8
9 **IV. PWSA'S EFFORTS TO REDUCE STORMWATER COSTS FOR ALL**
10 **STORMWATER CUSTOMERS**

11 **Q. How did Mr. Igwe address the use of Community-Based Public Private Partnerships**
12 **(“CBP3”)?**

13 A. Mr. Igwe indicates that PWSA has not yet explored the use of CBP3's in its stormwater
14 program.¹⁷ However, he stated that PWSA has included a provision in that program to
15 consider these types of partnerships¹⁸ at some time in the future. Additionally, Mr. Igwe
16 noted that there is no “specific requirement” to explore these types of relationships.¹⁹

17 In my view, the absence of a “specific requirement” to explore CBP3 is not a sufficient
18 explanation for failing to do so more aggressively and comprehensively, especially since
19 PWSA serves such a large percentage of low-income customers who need and deserve
20 every opportunity to have lower bills for services. As noted by School District witnesses
21 McNamara and Dwyer in School District Statement No. 1-SR, the School District serves

¹⁷ PWSA Statement No. 5-R, p. 5 line 19.

¹⁸ PWSA Statement No. 5-R, p. 5 lines 21-25.

¹⁹ PWSA Statement No. 5-R, p. 5 lines 19-20.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 large numbers of low-income students and families, and anything that can reduce the
2 School District's stormwater bills would allow it to use funds to offer additional
3 educational and other related benefits to its low-income students and their families. PWSA
4 has been remiss in not pursuing CBP3 relationships more aggressively, and the Commission
5 should direct PWSA to do so and report its findings to the parties in this case at least
6 annually.

7
8 **Q. When would you propose PWSA explore these partnerships?**

9 A. As noted above, I propose that PWSA commit and be directed to explore CBP3
10 relationships between now and the next rate request proceeding and report the results of its
11 efforts to the parties in this proceeding. By doing this, PWSA will show its customers, the
12 Commission, and the parties in this proceeding that it is doing all it can to help reduce
13 stormwater-related costs and mitigate large stormwater-related rate increases.

14
15 **Q. Do you agree with PWSA witness William J. Pickering's statement that PWSA has**
16 **done everything it can to reduce the impact of stormwater management costs on**
17 **customers?²⁰**

18 A. No. Mr. Pickering's statement is not consistent with PWSA witness Igwe's testimony that
19 PWSA has not considered implementing CBP3 partnerships as of this time but is willing
20 to explore CBP3 at an appropriate time.²¹ PWSA has clearly not explored all cost saving

²⁰ PWSA St. No. 1-R, p. 15.

²¹ PWSA Statement No. 5-R, p.5 lines 19-22.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 options for its stormwater management operations and should be directed to do so in this
2 proceeding.

3
4 **Q. Do you agree with PWSA witness William J. Pickering’s additional criticisms of the**
5 **exemptions from stormwater charges provided by Maryland and Florida?**²²

6 A. No. Mr. Pickering’s claim that the Maryland and Florida programs and exemptions for
7 stormwater fees are just a “different way to implement stormwater charges” is both wrong
8 and unreasonably dismissive of our point that these jurisdictions provide real world support
9 for our recommendations on better and more equitable ways to address stormwater charges
10 to a unique non-residential entity like the School District.

11
12 **V. CLAIMS THAT THE CITY OF PITTSBURGH’S STREETS AND SIDEWALKS**
13 **ARE PART OF PWSA’S STORMWATER SYSTEM**

14 **Q. Please summarize Mr. Igwe’s testimony regarding whether PWSA levies stormwater**
15 **charges on the public right of way owned by the City of Pittsburgh (“City”).**

16 A. Mr. Igwe acknowledges that PWSA does not charge for impervious service area in public
17 rights of way, such as streets, roads, and highways. He claims such facilities are integral to
18 the “drainage infrastructure.”²³

19

²² PWSA St. No. 1-R, p. 15.

²³See PWSA Statement No. 5-R, p. 8, lines 22-24 and p. 9, lines 1-2.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 **Q. In your view, has PWSA demonstrated that the City's public rights of way, such as**
2 **streets, roads, sidewalks and highways, are an integral part of PWSA's drainage**
3 **infrastructure?**

4 A. No. PWSA makes no indication that the City's public rights of way are part of PWSA's
5 system. PWSA claims no capital or operating costs related to the City's streets, roads,
6 sidewalks, or highways. PWSA makes no indication that any revenue generated from its
7 proposed stormwater fees would be used to maintain or replace the City's streets, roads,
8 sidewalks or highways. Therefore, the claim that the City's public rights of way are in some
9 way part of PWSA's stormwater system is incorrect.

10

11 **Q. Are public streets, sidewalks, and other impervious areas in the public right of way**
12 **contributors of stormwater runoff?**

13 A. Yes. Based on common sense, the City's public rights of way are likely among the largest
14 contributors to stormwater run-off within PWSA's service area. PWSA witness Pickering
15 notes that "we strongly prefer that these costs be recovered on the basis of cost causation
16 principles so that customers are paying these charges on the basis of the amount of
17 stormwater runoff that their properties require PWSA to manage."²⁴ If PWSA's claimed
18 fairness and cost causation principles are correct, the City should be paying for the cost of
19 the stormwater management service that is being directly provided to it for its streets and
20 sidewalks. And, in so doing, the claimed PWSA stormwater costs would be spread across

²⁴ PWSA St. No. 1-R, p. 15.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 and recovered from a larger number of ERU's, which will bring the cost per ERU down
2 for everyone.

3

4 **Q. Do you agree with PWSA's decision to not charge for impervious area within the**
5 **public rights of way or PWSA Igwe's defense of that position?**

6 A. No. Mr. Igwe is incorrect. The reason that storm drains and related infrastructure exist
7 along the City's streets and sidewalks is because they convey large amounts of stormwater
8 run-off, not because they are part of the actual stormwater infrastructure that PWSA is now
9 seeking to charge for.

10

11 **Q. Please describe how Mr. Pickering addresses your testimony on the recovery of**
12 **stormwater costs on a cost-of-service basis.**

13 A. Mr. Pickering states that the School District's desired outcome of this proceeding is a return
14 to PWSA's prior rate structure in which stormwater costs were not collected based on an
15 impervious area-based fee, but rather as part of PWSA's wastewater rates.²⁵

16

17 **Q. Is Mr. Pickering's position an accurate representation of your testimony?**

18 A. No. Nowhere in any testimony sponsored by the School District in this proceeding have
19 we recommended that PWSA return to its prior rate structure. The School District
20 understands that stormwater management is essential to providing various public benefits
21 and does not dispute PWSA's role in conducting stormwater management. However,

²⁵ PWSA Statement No. 1-R, p. 14, lines 18-19.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 because stormwater management provides widespread *public benefits*, the School
2 District's view is that the true customer of PWSA's stormwater service is the City.
3 Therefore, PWSA's stormwater fees should be charged to the City, and the City should be
4 responsible for recovering its stormwater costs from its citizens via a City-wide tax. Other
5 Parties have incorrectly concluded that if stormwater charges were to be classified as a tax,
6 the consequence would be to collect those costs from wastewater customers. As a public
7 benefit, those costs should be paid by the City with PWSA continuing to provide the
8 stormwater service.

9
10 **VI. DIFFERENCES IN THE COST AND SCOPE OF THE VARIOUS METHODS**
11 **USED TO ADDRESS IMPERVIOUS SURFACES IN ESTABLISHING**
12 **STORMWATER CHARGES**

13 **Q. Do you agree with PWSA witness Keith Readling's dismissal of your suggestion that**
14 **PWSA investigate the determination of stormwater recovery under the Intensity of**
15 **Development Factor ("IDF") and Equivalent Hydraulic Area ("EHA")**
16 **methodologies?²⁶**

17 **A.** No. Mr. Readling makes several statements in support of PWSA's ERU structure rather
18 than agree to evaluate the efficacy of either IDF or EHA²⁷:

- 19 (a) IDF and EHA would result in similar results when compared to ERU.
20 (b) IDF and EHA would be overly complicated and more expensive.
21 (c) ERU is more straightforward and transparent than IDF or EHA.
22 (d) ERU is the most commonly used approach in the United States

²⁶ PWSA St. No. 8-R, p. 5-6.

²⁷ PWSA Statement No. 8-R, p. 5, lines 23-25 and p. 6, lines 1-3.

21

Q. Why do the IDF and EHA methods have an advantage over PWSA’s current approach to assigning stormwater costs to parcels?

A. IDF and EHA consider both the impervious and pervious area of each parcel. Therefore, these methods may result in a more equitable distribution of costs because not all parcels with a given impervious area are the same overall size. It is possible that two parcels with the same impervious area contribute vastly different amounts of stormwater runoff into PWSA’s system under the same rainfall conditions. For example, under the same rainfall conditions, a parcel with 1,000 square feet of impervious area and a total lot size of 1,250 square feet likely contributes more stormwater to PWSA’s system than a parcel with 1,000 square feet of impervious area and a lot size of 20,000 square feet. This is because the larger parcel has more pervious area for rainwater to percolate into the ground before flowing into PWSA’s system. A method that considers both impervious and pervious area recognizes and values the difference in stormwater contribution from two seemingly similar parcels in terms of impervious area.

VII. PWSA’S INCONSISTENT APPROACH TO ROUNDING ERUs

Q. How does PWSA witness Keith Readling explain why PWSA only rounds ERUs up rather than up and down?

A. Mr. Readling claims that PWSA only rounds up because it results in more accurate bills.²⁸ He supports his claim by stating that:

²⁸ PWSA Statement No. 8-R, p. 5 line 5.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 (a) Impervious area is captured by humans who are likely to under-capture²⁹;
2 and

3 (b) Mapping of impervious area results in boundaries being clipped in a way
4 that also underestimates impervious area³⁰;

5

6 **Q. Do you agree with this characterization?**

7 A. No, I do not. Regardless of the inaccurate nature of PWSA's capturing of impervious area,
8 PWSA has a database that it relies on to develop its stormwater ERUs. Within that flawed
9 database, it is clear that a parcel with a measured impervious area of 1.5 ERUs would
10 receive a more accurate bill based on its measured impervious area than if its ERU was not
11 rounded to 2.0. Rounding up by definition creates a disconnect between a parcel's
12 measured impervious area (however inaccurate) and the ERUs assigned to that parcel.

13

14 **VIII. WHY PROVIDING AN EXEMPTION OR MATERIAL DISCOUNT TO THE**
15 **SCHOOL DISTRICT ON ITS STORMWATER CHARGES IS NOT AN**
16 **UNREASONABLE DISCRIMINATION IN RATES**

17 **Q. Do you agree with PWSA witness Igwe's claim that providing stormwater relief to**
18 **the School District would be unreasonably discriminatory?³¹**

19 A. No. And, indeed, his own testimony reflects that PWSA is already making policy and other
20 distinctions among customers that provide exemptions or deep discounts on stormwater
21 charges. For example, Mr. Igwe concedes that all entities that own property in PWSA's
22 service territory with greater than 400 square feet of impervious area must pay their fair

²⁹ PWSA Statement 8-R, p. 5, lines 5-6.

³⁰ PWSA Statement 8-R, p. 5, lines 6-9.

³¹ PWSA St. No. 5-R, p. 6.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 share for stormwater services.³² Mr. Igwe further states that PWSA's stormwater tariff does
2 not exempt any customers from the stormwater charges.³³ However, he expressly states
3 that only entities with greater than 400 square feet of impervious area pay the stormwater
4 fee. This means entities with less than 400 square feet of impervious area are exempt from
5 stormwater fees. That is a clear and conscious determination to provide some relief for
6 certain customers.

7 Further, the large 85% discount on stormwater fees for qualifying low-income customers
8 on their stormwater charges is another example of a policy choice reflecting a conscious
9 decision to provide relief to low-income customers. Because the School District is a unique,
10 non-profit governmental entity largely serving the same low-income students and families
11 that receive the 85% discount, it too should be eligible for material relief from its large and
12 growing stormwater charges.

13
14 **Q. Do you agree with Mr. Igwe's objection to your examples of jurisdictions that have**
15 **provided exemptions for stormwater charges?**

16 A. No. He claims that Tacoma Park, Maryland and Jacksonville, Florida are not relevant
17 examples of utilities that exempt certain customers from stormwater charges because they
18 are not regulated utilities.³⁴

19
20 **Q. Why do you disagree with Mr. Igwe's objection?**

³² PWSA St. 5-R, page 6, lines 11-13.

³³ PWSA St. 5-R, page 7, lines 5-6.

³⁴ See PWSA Statement No. 5-R, page 6, lines 17-22.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 A. Mr. Igwe's attempt to distinguish between PWSA's situation and those of the cities of
2 Baltimore and Tacoma Park that exempt certain customers from paying stormwater charges
3 is not supportable or supported. His claim that these cities are not regulated as public
4 utilities does not support failing to provide a discount or exemption in this proceeding given
5 the School District's unique status that I described above. He claims that as a regulated
6 entity PWSA is subject to a variety of statutory and regulatory requirements that do not
7 apply to cities like Baltimore or Tacoma Park, but never cites to any specific legal
8 requirements that would prevent some reasonable accommodation to the School District
9 given its unique circumstances and attributes. PWSA is a regulated entity, yet it provides
10 substantially discounted stormwater service to qualifying low-income customers.
11 Regulated utilities routinely develop different rate classes and rates based on a number of
12 factors relating to customers and the same can and should be done here for the School
13 District. I understand from counsel that only unreasonable discrimination is prohibited by
14 utilities, but they can and should design rates and provide relief based upon reasonable
15 differences between different types of customers.

16 Further, the Black & Veach Study I discussed in my Direct Testimony, School
17 District Exhibit EMC-9, documents a number of school districts receiving exemptions from
18 stormwater fees, including some with no statutory or regulatory policy basis for the
19 exemption. As noted previously, the School District is looking for relief from its large and
20 growing stormwater charges given its public education mission, its service to many low-
21 income students and their families, its governmental and non-proprietary status, and its
22 unique status as a nonresidential PWSA customer.

Q. Explain why you believe that providing relief to the School District on its stormwater charges would not be unreasonably discriminatory.

A. The public benefits of additional spending on childhood education are well documented. In a 2007 study, professors from various universities arrive at the following conclusion:

“Poor education leads to large public and social costs in the form of lower-income and economic growth, reduced tax revenues, and higher costs of such public services as health care, criminal justice, and public assistance. Therefore, we can view efforts to improve educational outcomes for at-risk populations as a public investment that yields benefits in excess of investment costs.”³⁵

A study performed by a professor at Penn State University found the following:

“...education also has broader social and economic benefits for individuals, families, and society at large. These benefits are received even by people whose relationship to the public school system does not extend beyond “taxpayer.” The widespread improvement of social and economic conditions is a direct outcome of an educated population that is better able to use information to make good decisions and which is collectively better trained for work.”³⁶

It is clear that each and every dollar the School District can spend on its core mission of educating students provides for larger societal benefits.

Providing significant relief to the School District on stormwater fees would not be unreasonably discriminatory because the School District has large numbers of low-income students and families, including low-income residential customers who already get large 85% stormwater discounts from PWSA. Further, the School District has no counterpart in the nonresidential class, it is not a for-profit retail business, or a manufacturer, but rather a

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 governmental entity serving an important public purpose. Establishing in this proceeding
2 a material discount on stormwater charges for the School District would not give the district
3 an unreasonable preference given the School District's unique status and attributes,
4 particularly its service to so many low-income students and their families.

5
6 **IX. SUPPORT FOR THE SCHOOL DISTRICT'S RECOMMENDED**
7 **STORMWATER DISCOUNT**

8 **Q. Please describe School District Exhibit EMC-10.**

9 A. I understand that the School District, via School District Statement 1-SR, is proposing as
10 an alternative to full exemption an 85% discount on its stormwater charges arising from
11 this proceeding to mirror the discount level available to certain low-income residential
12 customers on the PWSA system under the CAP program.

13 I prepared School District Exhibit ECM-10 to demonstrate the relatively small
14 impact on all of PWSA's customer rate classes of applying such a discount to the School
15 District's stormwater charges. This exhibit utilizes PWSA's cost of service model for its
16 proposed 2024 rates. As shown in the exhibit, and based on PWSA's rate design, an 85%
17 reduction in the School District's stormwater rates will result a maximum rate increase of
18 1.30%. For most customer rate classes, both residential and nonresidential, the actual rate
19 increase with a School District stormwater rate discount of 85%, would be less than 1.0%
20 For example, for Tier 3 Residential customers, the ERU rate would go from \$20.52/EDU
21 to \$20.73/EDU based on an 85% reduction in the School District's stormwater rate.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF ERIC M. CALLOCCHIA

1 X. **CONCLUSION**

2 Q. **Does this conclude your Surrebuttal Testimony?**

3 A. Yes, it does. However, I reserve the right to supplement my Surrebuttal Testimony should
4 additional issues and facts arise during the course of this proceeding.

**STIPULATION BETWEEN THE CITY OF PITTSBURGH AND THE SCHOOL
DISTRICT OF PITTSBURGH**

In accordance with 52 Pa. Code Section 5.234, the City of Pittsburgh (“City”) and the School District of Pittsburgh (“School District”) submit to the Administrative Law Judge for admission into the evidentiary record in full and complete resolution of the Motion to Exclude and Objection to Admission of School District of the City of Pittsburgh Testimony that Violates Due Process Rights and PUC Procedural Regulations (“Motion”) filed on September 29, 2023 in the above proceedings:

The following explanatory clarification should be deemed to be added to the Surrebuttal Testimony of School District witness Eric Callocchia on page 16, line 8 of School District Statement No. 2-SR:

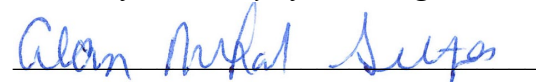

“To clarify, the School District is not proposing any cost of service, rate allocation or rate design modifications in this case that would have the City pay increased stormwater charges to PWSA for impervious surfaces that include City streets and sidewalks or have the City pay all PWSA stormwater costs through rates set in this proceeding. Rather, the School District believes that stormwater management is a public benefit that should be provided by a municipality (not a utility) and paid for via taxes imposed on all residents of the municipality.”

Respectfully submitted,

Re: Pennsylvania Public Utility Commission v. The Pittsburgh Water and Sewer Authority; Docket Nos. R-2023-3039919 (Stormwater); R-2023-3039920 (Water); R-2023-3039921 (Wastewater)

Dear Judge Chiodo:

On behalf of The School District of Pittsburgh, enclosed please find the Direct Testimony and Exhibits of Michael J. McNamara, labeled School District Statement No. 1, and the Direct Testimony and Exhibits of Eric M. Callocchia, labeled as School District Statement No. 2 in the above-referenced proceeding.

This document is being served as indicated in the attached Certificate of Service.

Very truly yours,

Alan M. Seltzer, Esquire

AMS/kas
Enclosure

DIRECT TESTIMONY OF MICHAEL J. MCNAMARA

With Regard To

**Background on the Pittsburgh School District, Stormwater Charges and Impacts of
Increases in Stormwater Charges**

August 9, 2023

TABLE OF CONTENTS

I. INTRODUCTION 3

II. PWSA BACKGROUND AND SCHOOL DISTRICT INTEREST IN PROCEEDING... 4

III. SCHOOL DISTRICT BACKGROUND.....6

IV. THE SCHOOL DISTRICT’S STORMWATER CHARGES.....11

V. CONCLUSION.....14

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF MICHAEL J. MCNAMARA

1 **I. INTRODUCTION AND PURPOSE**

2 **Q. Please state your name and business address.**

3 A. My name is Michael J. McNamara and my business address is 1305 Muriel Street,
4 Pittsburgh, PA 15203.

5

6 **Q. By whom are you employed and in what capacity?**

7 A. I am employed by the Pittsburgh School District (“School District”) as Chief Operations
8 Officer. In that capacity, I oversee the School District’s Plant Operation Department,
9 which is responsible for Energy Management. Energy Management includes billing and
10 procurement of all the School District’s utilities, including stormwater. Prior to being
11 promoted to the Chief Operation Officer, I was the Assistant Director of Construction for
12 the Facilities Department and prior to that as a Construction Project Manager for the
13 Facilities Department. I have been employed by the School District since 2009.

14

15 **Q. Briefly describe your educational and professional work experience.**

16 A. I have a Bachelor’s degree from Edinboro University and a Master’s degree from Penn
17 State University. Attached to this testimony as School District Exhibit MJM-1 is my
18 current resume.

19

20 **Q. What is the purpose of your testimony in this proceeding.**

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF MICHAEL J. MCNAMARA

1 A. The purpose of my testimony is to (i) describe the School District, (ii) explain our mission
2 and purpose, and (iii) address the Pittsburgh Water and Sewer Authority’s (“PWSA”)
3 stormwater charges and the proposed increases in those charges and their impacts on the
4 School District’s overall financial health and ability to continue to educate students in the
5 district. Given its concerns, the School District has also retained NewGen Strategies &
6 Solutions, LLC to review and submit testimony on PWSA’s proposed rate increases. Their
7 conclusions are provided in School District Statement No. 2, which is the direct testimony
8 of Eric Callocchia. Finally, the School District is also concerned that the PWSA’s
9 proposed stormwater charge is or may be an unlawfully imposed tax that the PWSA lacks
10 the authority to establish, and that the PWSA may be prohibited from charging it to any
11 customers under current law. And, if the PWSA’s stormwater charges constitute a tax, the
12 School District is tax-exempt and, as such, is not required to pay such tax. I am advised by
13 our counsel that this “legal” issue will be addressed by the School District in other
14 testimony and briefing.

15

16 **II. PWSA BACKGROUND AND SCHOOL DISTRICT INTEREST IN**
17 **PROCEEDING.**

18 **Q. What is PWSA and what prompted the School District’s interest in this proceeding?**

19 A. I understand that the PWSA is a municipal water and wastewater authority serving
20 customers in the City of Pittsburgh and surrounding communities. The PWSA provides
21 water service to approximately 80,000 residential, commercial and industrial customers in
22 portions of the City of Pittsburgh; the Borough of Millvale; and portions of Reserve,
23 O’Hara, and Blawnox Townships, Allegheny County. The PWSA also provides

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF MICHAEL J. MCNAMARA

1 wastewater conveyance service to customers located in the City of Pittsburgh, Allegheny
2 County, and also conveys wastewater for portions of 24 neighboring communities. The
3 PWSA provides stormwater service to the City of Pittsburgh. I have been advised that the
4 PWSA became subject to regulation by the Pennsylvania Public Utility Commission
5 (“Commission” or “PUC”) on April 1, 2018 and commenced a stormwater charge to
6 customers in 2022.

7 On May 9, 2023, the PWSA made rate filings with the Commission including, among other
8 things, three proposed tariffs, Tariff Water- PA. P.U.C. No.1, Supp. No. 12; Tariff
9 Wastewater- PA. P.U.C. No.1, Supp. No. 11; and Tariff Stormwater - PA. P.U.C. No. 3.
10 PWSA is requesting a multi-year total overall rate revenue increase of \$146.1 million. This
11 includes a \$46.8 million or 22.5% increase in the Fully Projected Future Test Year
12 (“FPFTY”) (Fiscal Year (“FY”) 2024, \$45.4 million or 17.8% in Fiscal Year 2025, and
13 \$53.9 million or 17.9% in Fiscal Year 2026).

14 Of particular relevance to the School District is PWSA’s proposed treatment of and
15 changes to its charges for stormwater to customers like the School District. I understand
16 that PWSA is seeking to shift \$9.5 million of its claimed stormwater cost of service to
17 wastewater customers in FY 2024 and \$8.5 million for both FY 2025 and FY 2026.
18 Further, I understand that the PWSA is proposing substantial increases in its non-residential
19 stormwater fee, which was first established in 2022, for years 2024-2026. For those years,
20 the PWSA is proposing increased charges for years 2024-2026 per Equivalent Residential
21 Unit (“ERU”) of impervious surface as follows: 2024 (\$10.26/ERU); 2025 (\$12.14/ERU);
22 and 2026 (\$14.20/ERU).

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF MICHAEL J. MCNAMARA

1 These are substantial increases that will have an adverse impact on the School District and
2 its ability to manage operating expenses in fulfilling its mission to provide high quality
3 educational services to students attending its schools. Further, the School District is a
4 governmental entity, and the stormwater charges sought to be imposed and increased by
5 the PWSA impact the public as a whole, as well as having a direct, significant and unique
6 impact on the School District, which is funded with local taxes, state subsidy payments and
7 federal funds. None of these sources of funding can be quickly or easily increased to cover
8 higher expenses.

9 Because of concerns about (i) the magnitude of the cost increase in the PWSA's stormwater
10 fees and (ii) whether the PWSA's stormwater fees are in reality an unlawful tax, the School
11 District decided to participate in this proceeding.

12
13 **III. SCHOOL DISTRICT BACKGROUND**

14 **Q. Describe the history and organization of the School District.**

15 A. The School District is organized and maintains its existence under the Act of Mach 10,
16 1949, P.L. 30, known as the Public School Code of 1949, as amended ("School Code").
17 The School District is classified by population as a first class-A school district and is fully
18 accredited by the Middles States Association for Elementary and Secondary Schools. The
19 School District is an independent government unit in Pennsylvania. It owns real property
20 comprising more than sixty-five buildings in the City of Pittsburgh and is a water,
21 wastewater and stormwater customer of the PWSA at many of the School District's
22 properties.

15

The School District, the second largest school system in the Commonwealth of Pennsylvania, provides a full range of educational services to students in grades pre-kindergarten (“Pre-K”) through grade 12 who reside in the City of Pittsburgh or Borough of Mt. Oliver. The 2010 census population of the two municipalities served was 309,107, covering a land area of 55.3 square miles.

The School District’s official 2021-22 enrollment included 20,350 students (Pre-K to 12) with 19,159 K-12 attending 57 schools. The projected enrollment for 2023-2024 is 20,352 students (Pre-K to 12). The average age of the School District’s buildings is 77 years. The School District offers programs for general education, special education, vocational education, and early childhood education.

In addition, as of December 31, 2021, 5,069 students residing in the City of Pittsburgh and Borough of Mt. Oliver attend 378 charter schools¹, including 11 approved by the School District, 16 approved by other school districts or the state, and 11 cyber schools approved by the Commonwealth of Pennsylvania. In Pennsylvania, charter schools are funded by

¹Charter schools are created under the Charter School Law, which is part of the School Code. Brick and mortar charter schools are granted charters by the school district in which they are located. Students who attend charter schools are paid for by their home district based upon the home district’s budgeted expenditures with certain exclusions. Because Pittsburgh School District’s per pupil cost is among the highest in the state, there are many charter schools in our footprint. The home district must provide transportation to the charter students, resulting in another cost for the home school district.

Cybercharter or online charters are approved by Pennsylvania Department of Education. If home school districts do not pay their charter bills timely, the state may redirect school subsidy payments to the charters upon notice of nonpayment.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF MICHAEL J. MCNAMARA

1 payments from the school district of residence. The School District’s charter school
2 expense in 2021 totaled \$122,087,479. The projected charter school costs for the School
3 District in 2023 is \$120.7 million –the second largest expense other than salaries and
4 benefits. We note that the School District is not responsible for paying stormwater charges
5 associated with the charter schools.

6 Although public education in Pittsburgh dates back to 1835, the consolidated School
7 District was founded November 1911, as a result of an educational reform movement that
8 combined the former ward schools into one system with standardized educational and
9 business policies. Initially, the School District was governed by an appointed Board of 15
10 members, but since 1976 has been governed by a 9-member Board elected by the school
11 districts of relatively equal populations. Board elections are held every two years. Board
12 members serve without pay.

13 As the policy-making body for the School District, the Board is charged with providing the
14 best education program the community can support in accordance with the School Code.
15 Board-adopted policies governing financial operations include accident and illness
16 prevention program (risk management), debt, fund balance and investments (cash
17 management). The chief administrative officer of the School District is the Superintendent
18 of the Schools, who is primarily responsible for implementing Board policy and generally
19 overseeing all School District employees.

Q. What are the School District’s vision and mission?

A. We have clearly articulated and well-developed Vision and Mission statements that guide everything we do. Those statements are as follows:

SCHOOL DISTRICT VISION

All students will graduate high school, career and life-ready prepared to complete a two- or four-year college degree or workforce certification.

SCHOOL DISTRICT MISSION

The Pittsburgh Public Schools will be one of America’s premier school districts, student focused, well managed, and innovative. We will hold ourselves accountable for preparing all children to achieve academic excellence and strength of character, so that they have the opportunity to succeed in all aspects of life.

As I will describe later, the PWSA’s current rate filing, seeking substantial increases in fees for stormwater, are particularly problematic since the funds used to pay these new charges cannot be deployed in direct support of the School District’s vision and mission.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF MICHAEL J. MCNAMARA

1 **IV. THE SCHOOL DISTRICT'S STORMWATER CHARGES**

2 **Q. Please describe the current cost to the School District for stormwater charges from**
3 **PWSA.**

4 A. As noted above, the School District is a water, wastewater and stormwater customer of
5 PWSA for most of the district's properties. We own a large number of buildings and
6 facilities and have a significant amount, about almost 6.9 million square feet, of impervious
7 surfaces within our footprint, which equates to about 4,264.5 ERUs as defined by PWSA.
8 About 45 percent of the School District total land area, according to PWSA, constitutes
9 impervious surface.

10 For reference purposes, for our last fiscal year, which ran from January 1, 2022 to
11 December 31, 2022, we paid PWSA \$935,910.26 for water service, \$523,905.28 for
12 wastewater service \$9,889.65 for fire line service and \$303,378.44 for stormwater. Our
13 total average annual payment to the PWSA (based on the last five years) for water,
14 wastewater and stormwater for all School District properties is \$1,347,892, while the total
15 paid to PWSA in 2022 was \$1,773,083.50. Payments to the PWSA comprise about 16% of
16 the School District's average annual utility budget².

17 Attached to this testimony as School District Exhibit MJM Exhibit-2 is a spreadsheet
18 showing the property location, bill class, amount of impervious surface at each location,
19 and the applicable ERUs. This spreadsheet was primarily prepared by the PWSA and edited
20 by the School District for accuracy. The obvious take-away from this exhibit is that the
21 School District owns a substantial number of properties that are being assessed a

²The School District's "utility budget" specifically refers to the total amount the School District pays in a given year for Water, Sewage, Fire Lines, Natural Gas, Electric, Steam, and Chilled Water.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF MICHAEL J. MCNAMARA

1 stormwater charge from the PWSA and any increased charges will have large impacts on
2 the district.

3

4 **Q. Can you describe in greater detail the economic and financial impact PWSA's**
5 **stormwater fees are having on the School District and its ability to provide high**
6 **quality educational services to its students?**

7 A. Yes. As I noted earlier, the School District's buildings are on average 77 years old. The
8 aging infrastructure and systems in the buildings are requiring more maintenance and
9 custodial attention. To budget for additional stormwater costs to PWSA, we will be forced
10 to cut custodial and maintenance personnel which, moving forward, is going to adversely
11 affect our ability to adequately prepare the buildings to accept students every day.

12

13 **Q. Does the School District have any equipment or facilities in place at its various**
14 **properties to collect, divert or otherwise address stormwater?**

15 A. Yes. The School District has a water efficiency plan that describes some of its initiatives
16 in this area, including those items impacting stormwater. A copy of the water efficiency
17 plan is attached to this testimony as School District Exhibit MJM-3. For example, the
18 School District has installed rain gardens at three of its properties, Conroy Academy,
19 Crescent Early Childhood Center and Lincoln PreK-5, to reduce surface water runoff. And,
20 at its Central Operations building, the School District is collecting rainwater from the
21 rooftop, depositing it into a reservoir where it is then filtered, sanitized and recycled for
22 use in the building's cooling tower mechanical system.

19
20
21

Q. To your knowledge, does the School District receive any credits to its stormwater bill from PWSA for these water efficiency efforts specifically intended to reduce stormwater run-off?

A. Not to my knowledge.

Q. To your knowledge, has PWSA installed any meters or other devices at any of the School District’s properties to measure the actual amount of stormwater run-off that occurs from time to time?

A. No.

Q. To your knowledge, has the School District ever specifically asked for “stormwater service” from the PWSA as it has for water and wastewater services?

A. No. To our knowledge, we started receiving charges for stormwater in connection with the School District’s various properties in early 2022, but never requested any such “service” from the PWSA.

Q. Please comment on the School District’s claim that the PWSA’s stormwater charge is or may be an unlawfully imposed tax that the PWSA lacks the authority to establish, and that the PWSA may be prohibited from charging it to any customers under applicable federal and state law.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF MICHAEL J. MCNAMARA

1 A. I understand this is a legal issue and, as a non-lawyer, I am not offering a legal opinion on
2 this issue. However, the School District is aware the Borough of West Chester's attempt to
3 establish a stormwater fee by ordinance and impose it on residents and businesses in that
4 municipality. We understand that West Chester University challenged that ordinance, and
5 the Commonwealth Court of Pennsylvania has ruled that the Borough of West Chester's
6 proposed stormwater fee is an unlawful tax. We understand that case is presently on appeal
7 to the Pennsylvania Supreme Court. In the interim, the Commonwealth Court's opinion is
8 instructive on how the Commission should view the stormwater charge being imposed on
9 the School District and other customers by PWSA in this proceeding, particularly given
10 the adverse financial impacts that charge has and continues to have on the School District,
11 which is a governmental entity that is exempt from taxes.

12

13 V. **CONCLUSION**

14 Q. **Does this conclude your direct testimony?**

15 A. Yes, it does. However, I reserve the right to supplement my testimony should additional
16 issues and facts arise during the course of this proceeding.

VERIFICATION

I, Michael J. McNamara, Chief Operations Officer, Pittsburgh School District, have read the foregoing document, Direct Testimony of Michael J. McNamara, and verify that the facts set forth therein are true and correct to the best of my knowledge, information and belief.

I understand that any false statements made herein are subject to the penalties of 18 Pa. C.S.A. § 4904, relating to unsworn falsification to authorities.

B.A.: INDIVIDUALIZED STUDIES

August 2003 - May 2009

PROFESSIONAL EXPERIENCE

PITTSBURGH PUBLIC SCHOOLS

Chief Operations Officer 2020 - Current

- Oversees and supervises the following departments:
 - Facilities and Maintenance
 - Plant Operations
 - Food Service
 - Transportation
 - School Safety
 - M/WBE Business

Assistant Director – Construction 2019 - 2020

- Supervises Construction Supervisors and Building Inspectors on multi-prime projects
- Develops and updates the School District's 7-year capital plan
- Provides project management guidance to staff and contractors
- Develops and updates project management standards, metrics and tools for the department

Project Manager 2015 – 2019

- Manages multi-million dollar renovation projects involving multiple contractors
- Coordinates all construction bidding and contracting
- Reviews architectural and engineering proposals and makes recommendations to the Board
- Point-of-contact for external companies under contract with PPS

Contract Manager 2010 – 2015

- Prepares contract documents for PPS's professional consultants and construction contractors
- Mediates contract disputes with project designers and contractors
- Manages the construction bid process and provides recommendations to the Board
- Implemented and manages a web-based project management database to increase efficiency

Substitute Teacher 2009 – 2010

- Responsible for delivering instruction and managing classroom activities
- Experienced with students in grades K-8 in all subject areas
- Tutored students in small groups in preparation for standardized assessments

School District Exhibit MJM-3

3.2 WATER EFFICIENCY

There are several technologies available that can help with water efficiency, such as low flow plumbing fixtures, sensors, rainwater harvesting. Water efficiency practices in the buildings can greatly reduce wastewater, yielding low sewage volumes, reduce energy use and reduce utility costs.

3.2.1 Water efficient low flow plumbing fixtures

Facilities design standards require use of water efficient low flow plumbing fixtures to help reduce wastewater.

3.2.2 Rain Gardens

Rain garden is a shallow, constructed depressions that are planted with deep-rooted native plants and grasses, strategically located to capture runoff from hard surfaces such as a driveway, parking area, sidewalks or streets. It helps to filter pollutants from runoff, recharge groundwater and conserve water.

PPS has rain gardens installed on three District properties at Conroy Academy, Crescent Early Childhood Center and Lincoln PreK-5 to contribute to water conservation, to reduce surface runoff and easing storm water problems in the community.

At Conroy Academy, the rain garden was installed as part of a new parking lot. At Crescent, the rain garden was installed in partnership with Nine Mile Run Watershed Association.

At Lincoln PreK-5, the Western Pennsylvania Conservancy, in partnership with PPS and the City of Pittsburgh, installed a large rain garden system at Lincoln and Franktown avenues in Larimer. The rain garden is accessible to the students of Lincoln PreK-5. In addition to mitigating significant stormwater runoff, the large site features beautiful blooming perennials and offers an opportunity for teaching students about water conservation, green infrastructure, plants and pollinator insects.

3.2.3 Rainwater Harvesting

Rainwater Harvesting is collection and distribution of rainwater, which rather than going to sewage is reused. At Central Operations building, the rainwater is collected from the rooftop, deposited into a reservoir, filtered, sanitized and recycled for use in the building's cooling tower mechanical system.

Dear Secretary Chiavetta:

On behalf of The School District of Pittsburgh, enclosed please find the Direct Testimony and Exhibits of Michael J. McNamara, labeled School District Statement No. 1, and the Direct Testimony and Exhibits of Eric M. Callocchia, labeled as School District Statement No. 2 in the above-referenced proceeding.

This document is being served as indicated in the attached Certificate of Service.

Very truly yours,

Alan M. Seltzer, Esquire

DIRECT TESTIMONY OF

Eric M. Callocchia

With Regard To

**Pittsburgh Water and Sewer Authority's Proposed Stormwater Revenue Requirements,
Cost of Service Allocations, Rate Design, and the Factual Basis for Stormwater Charges**

August 9, 2023

TABLE OF CONTENTS

I.	INTRODUCTION AND PURPOSE	3
II.	PWSA’S STORMWATER REVENUE REQUIREMENTS	8
III.	PWSA’S STORMWATER COST OF SERVICE ALLOCATIONS AND RATES	12
IV.	BASIS FOR A STORMWATER FEE	18
V.	CONCLUSION.....	29

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 **I. INTRODUCTION AND PURPOSE**

2 **Q. Please state your name and business address.**

3 A. My name is Eric M. Callocchia, and my business address is 911-A Commerce Road,
4 Annapolis, Maryland, 21401.

5
6 **Q. By whom are you employed and in what capacity?**

7 A. I am employed by NewGen Strategies and Solutions, LLC (“NewGen”) as a Partner of the
8 Firm’s Environmental Practice. NewGen provides management and economic consulting
9 services to water, wastewater, stormwater, energy, natural gas, and solid waste utilities.
10 My duties include managing and supervising our Annapolis, Maryland based consultants
11 and administrative staff and managing and performing client engagements.

12
13 **Q. Briefly describe your educational and professional work experience.**

14 A. I earned a Bachelor of Arts degree in Economics from Johns Hopkins University in May
15 2010. From July 2010 through June 2019, I was employed by Management and Financial
16 Services Group (“MFSG”) as a staff consultant assisting in performing cost of service and
17 rate design studies primarily for water, wastewater, and stormwater utilities. In July 2019,
18 MFSG merged with NewGen, and I became a Principal at NewGen tasked with managing
19 and performing client engagements. In January 2023, I became a Partner of NewGen’s
20 Environmental Practice. I am a member of the American Water Works Association
21 (“AWWA”) Rates and Charges Committee, and Chairman of the Cost Allocation

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 subcommittee. I am a contributing author to the Water Environment Federation (“WEF”)
2 Manual of Practice No. 27, *Financing and Charges for Wastewater Systems, Fourth*
3 *Edition*. My entire thirteen-year career thus far has focused on providing consulting
4 services to water, wastewater, and stormwater utilities around the nation. Such services
5 include, but are not limited to:

- 6 • Cost of service and rate design studies
- 7 • Revenue requirement development
- 8 • Rate case and other litigation support
- 9 • System valuations and appraisals
- 10 • Operational and organization studies
- 11 • Socioeconomic impact and affordability analysis
- 12 • Business and strategic plan development

13 School District Exhibit EMC-1 contains my resume summarizing my prior education and
14 professional experience.

15
16 **Q. What is the purpose of your testimony in this proceeding?**

17 A. The purpose of my testimony is to, on behalf of the Pittsburgh School District (“School
18 District”), provide my opinion of Pittsburgh Water and Sewer Authority’s (“PWSA”)
19 proposed stormwater revenue requirements, cost of service allocations, and rate design. I
20 will also provide the Commission with information regarding alternative approaches to
21 stormwater management, stormwater fee development, and the factual differences between
22 stormwater service and water and wastewater service.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 The School District is concerned that the stormwater fees it is now obligated to pay
2 are large, growing, have a huge impact on the School District's operations and budget, and
3 ultimately adversely impact the District's ability to achieve its vision and mission.¹ The
4 District is exploring avenues of controlling or eliminating costs particularly when it comes
5 to stormwater, including intervening and participating in this proceeding, and as described
6 further by Michael McNamara in School District Statement No. 1.

7 The charge given to me by the School District was to evaluate PWSA's proposed
8 stormwater fees and determine all reasonable and just avenues of reducing or eliminating
9 costs and charges for the School District. Therefore, my conclusions and recommendations
10 stated herein are unique to this case and the School District's unique position as a PWSA
11 stormwater ratepayer.

12
13 **Q. If you do not discuss a specific topic, does that mean you agree with PWSA on that**
14 **topic?**

15 A. No. My silence on any specific topic does not indicate my approval or agreement. My
16 testimony is limited only to the issues I discuss herein. Moreover, I am advised by School
17 District counsel that there is a legal question in this case as to whether PWSA's stormwater
18 charge is a lawful fee or an unlawful tax that cannot be imposed on tax-exempt entities
19 such as the School District. While I am not providing an opinion on the merits of this
20 Pennsylvania legal issue, I will describe several of the differences between traditional water
21 and wastewater utility service and PWSA's stormwater service. My Direct Testimony

¹ <https://www.pghschools.org/districtvision/mission>

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 regarding PWSA’s stormwater revenue requirements, cost allocation, and rate design is
2 presented under the legal assumption that the Pennsylvania Public Utility Commission
3 (“PUC” or “Commission”) may set stormwater rates for PWSA.
4

5 **Q. What is stormwater and stormwater management?**

6 A. “Stormwater,” as defined by the Clean Water Act regulations, includes “stormwater runoff,
7 snow melt runoff, and surface runoff and drainage.” 40 C.F.R. §122.26(b)(13). Stormwater
8 management refers to the control of stormwater runoff. It includes planning for runoff,
9 maintaining stormwater systems, and regulating the collection, storage, and movement of
10 stormwater. Good stormwater management controls flooding, reduces erosion, and
11 improves water quality.
12

13 **Q. Who are the beneficiaries of good stormwater management?**

14 A. The United States Environmental Protection Agency (“EPA”) highlights the following five
15 benefits of an effective stormwater management program²:

- 16 • Protection of wetlands and aquatic ecosystems;
- 17 • Improved quality of receiving waterbodies;
- 18 • Conservation of water resources;
- 19 • Protection of public health, and;
- 20 • Flood control

² <https://www.epa.gov/npdes/npdes-stormwater-program>

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 In addition, the EPA’s 2017 guide titled *Community Solutions for Stormwater Management*
2 (attached hereto as School District Exhibit EMC-2) concludes that:

3 “Long-term stormwater plans can support community efforts to prioritize
4 and implement effective stormwater management practices. Integrating
5 these plans with broader community goals such as economic development,
6 infrastructure investment and environmental compliance leverages the
7 planning effort to support resilience, economic growth and quality of life.”
8 (School District Exhibit EMC-2 at p. 14)

9 Therefore, good stormwater management provides a community-wide benefit.

10
11 **Q. Who has historically provided stormwater management services and who has paid**
12 **for it?**

13 Humans have been dealing with the issue of rainwater runoff for thousands of years, as
14 evidenced by modern discoveries of stormwater management infrastructure in Greece and
15 Rome that date to ancient times. Stormwater management has been a regulatory issue in
16 the United States since the passage of the Clean Water Act in 1972. Initial federal
17 regulations under the Clean Water Act were limited in scope and addressed only major
18 manufacturing facilities with discharges that included the potential for contaminated
19 stormwater runoff.

20 In 1990, the EPA issued a stormwater rule based on the 1987 Stormwater
21 Amendments to the Clean Water Act that defined classifications of stormwater systems
22 subject to regulation, which included combined sewer overflows (i.e., sewer systems in
23 which both sanitary sewage and industrial process wastewater are mixed with rainwater
24 and land runoff, primarily found in older urban areas); municipal separate stormwater
25 systems (i.e., storm sewer systems owned or operated by municipalities that receive only

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 stormwater runoff); separate stormwater systems (i.e., storm sewer systems that serve
2 industrial facilities and were historically subject to or part of the industry’s National
3 Pollutant Discharge Elimination System (“NPDES”)³ permit); and non-point source runoff
4 (i.e., all runoff that is not discharged to surface waters via a discrete pipe or conduit).

5 Since that time, entities that manage stormwater systems of all kinds have raised
6 revenue to fund stormwater management using various methods, including ad valorem
7 taxes, special service districts, incorporating stormwater costs into water and/or wastewater
8 rates, and stormwater specific fees.

9
10 **II. PWSA’s STORMWATER REVENUE REQUIREMENTS**

11 **Q. How does PWSA develop the revenue requirement of its stormwater system?**

12 A. PWSA’s stormwater revenue requirement was developed for a Fully Projected Future Test
13 Year (“FPFTY”) 2024 by allocating system-wide costs to the stormwater system based on
14 factors developed for specific budget categories, including factors related to Customer
15 Bills, Engineering and Construction, Existing Debt Service, and Wastewater Conveyance.
16 In addition, administrative costs are allocated to the stormwater system based on composite
17 allocators developed based on the results of the allocation of the specific budget categories.
18 PWSA Schedule HJS-2 shows the factors used to allocate system revenue requirements to
19 the stormwater system. PWSA Schedule HJS-1 shows the results of the allocation of
20 revenue requirements among the water, wastewater, and stormwater systems. The total

³ The NPDES permit program addresses water pollution by regulating point sources that discharge pollutants to waters of the United States. The NPDES program was created in 1972 by the Clean Water Act. <https://www.epa.gov/npdes>

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 stormwater revenue requirement as allocated by PWSA for the FPFTY 2024 is about \$40
2 million.

3

4 **Q. Do you challenge or have any issue with PWSA’s claimed \$40 million revenue**
5 **requirement for stormwater?**

6 A. No. I have not made any evaluation of the costs PWSA has assigned to the stormwater
7 system. Other intervenors in this case may provide recommendations regarding the
8 proposed stormwater system revenue requirement.

9

10 **Q. Does PWSA propose adopting rates to collect the full \$40 million stormwater revenue**
11 **requirement in FY 2024?**

12 A. No. PWSA includes several adjustments to the total proposed revenue requirement to
13 develop the basis for the proposed FY 2024 stormwater rates, called the “Net Costs to
14 Recover for Ratemaking.” The first adjustment is a decrease based on an allocated offset
15 of about \$689,000 for miscellaneous revenues, such as meter sales, meter test fees, lien
16 filing fees, and other miscellaneous revenues. The FY 2024 stormwater Net Costs to
17 Recover for Ratemaking also include adjustments for bad debt expense, the cost of credits
18 and incentives, the cost of PWSA’s bill discount program, and an adjustment to reflect
19 PWSA’s application of the concept of rate “gradualism.” I address each of these
20 adjustments in Section III of my testimony.

21

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 **Q. Has PWSA done everything reasonably possible and practical to reduce its**
2 **stormwater revenue requirement?**

3 A. No, not everything. Although PWSA’s witnesses speak to efforts PWSA has undertaken
4 to reduce the costs of planned stormwater capital improvements via the use of Water
5 Infrastructure Finance and Innovation Act of 2014 (“WIFIA”) and Pennsylvania
6 Infrastructure Investment Authority (“PENNVEST”) loans, PWSA’s witnesses do not
7 discuss any other efforts that PWSA could have made to investigate or implement other
8 programs that could reduce its stormwater revenue requirement and save PWSA’s
9 stormwater ratepayers money.

10

11 **Q. Are there any programs or approaches available to PWSA that would likely reduce**
12 **stormwater costs for PWSA’s ratepayers that are not discussed in PWSA’s direct**
13 **testimony?**

14 A. Yes. The EPA recommends that “communities should consider whether a Community-
15 Based Public-Private Partnerships (“CBP3”) will help achieve their goals when evaluating
16 stormwater financing and infrastructure needs.” According to the EPA, “A CBP3 is a
17 partnership between a local government and a private entity. The primary goal of CBP3
18 is to provide high quality services in a cost effective way. The partnership is designed to:

- 19 • provide flexibility;
- 20 • provide access to advanced technology;
- 21 • address dynamic community development trends and goals;

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

- 1 • encourage long-term financial and regulatory commitments for integrating
2 green infrastructure into stormwater management programs.”⁴

3 PWSA does not mention any consideration of implementing any CBP3 to reduce the cost
4 of planned stormwater capital improvements.

5
6 **Q. Have any other stormwater utilities in the Commonwealth realized cost savings using
7 a CBP3 model?**

8 **A.** Yes. In 2017, the City of Chester announced a CBP3 to plan, finance, build and maintain
9 up to \$50 million in green stormwater infrastructure over the next 20- 30 years.⁵ The City
10 created the Stormwater Authority of the City of Chester (“SAC”) and engaged a private
11 sector partner, Covias, to secure approximately \$35 million in long-term, low-interest-rate
12 loans for the SAC in addition to more than \$11 million in grants.⁶

13 Also, although not in the Commonwealth, Prince George's County, Maryland
14 entered into the "first of its kind" innovative 30-year CBP3 agreement in March 2015,
15 referred to as the Clean Water Partnership. The Clean Water Partnership was the first-ever
16 CBP3 model to address stormwater management at such a large scale. The Prince George’s
17 County's Department of the Environment is expected to benefit from the partnership by
18 reducing administrative and procurement costs of green infrastructure practices (estimated

⁴ <https://www.epa.gov/G3/financing-green-infrastructure-community-based-public-private-partnerships-cbp3-right-you>

⁵ https://www.chestercity.com/wp-content/uploads/2017/05/Chester_CCBP3_Announce_FactSheet_v5.pdf

⁶ <https://www.corvias.com/projects/stormwater-authority-city-chester>

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 reductions of 60 to 80 percent) and creating efficiencies only available through private
2 business and market forces.⁷

3 In my opinion, PWSA has a duty to investigate and, if feasible and likely to reduce
4 costs, implement a CBP3 to fund stormwater infrastructure investment.

5
6 **III. PWSA’S STORMWATER COST OF SERVICE ALLOCATIONS AND RATES**

7 **Q. How does PWSA allocate stormwater costs to customer classes?**

8 A. The basis for PWSA’s allocation of stormwater costs to customer classes is “Equivalent
9 Residential Units” or “ERUs.” PWSA Statement No. 8, p. 8 describes PWSA’s definition
10 of an ERU. One ERU is equivalent to 1,650 square feet. For Residential parcels, PWSA’s
11 methodology of assigning ERUs is as follows:

12 “PWSA decided on a structure in which the middle tier contains 70% of all
13 the SFR properties, making it by far the largest group. Properties with less
14 than 1,015 square feet of impervious area are considered the low tier and
15 are billed for the median amount of impervious area found on parcels in that
16 tier, which is about 830 square feet of impervious area, or 0.5 ERUs.
17 Properties in the middle tier are billed for 1 ERU. Those properties with
18 2,710 square feet or more of impervious area fall into the high tier and are
19 billed for the median amount of impervious area found on parcels in that
20 tier, which is about 3,355 square feet of impervious area, or 2 ERUs.”
21 (PWSA Statement No. 8 at p. 11, lines 2-9)

22 Non-Residential parcels are assigned ERUs by calculating the number of ERUs on each
23 parcel and rounding up to the nearest whole ERU (PWSA Statement No. 8 at p. 12, lines 1
24 – 18.) The calculation of Non-Residential ERUs are also based on a standard ERU of 1,650
25 square feet.

Q. How does PWSA use ERUs to allocate stormwater costs to customer classes?

A. The process by which PWSA allocates stormwater costs to customer classes is set forth in PWSA Schedules HJS-4SW and HJS-5SW. PWSA Schedule HJS-4SW allocates the total stormwater revenue requirement to customer classes based solely on each class’s total assigned ERU’s, resulting in what PWSA calls the “unadjusted” cost of service. PWSA Schedule HJS-5SW then adjusts the unadjusted cost of service for:

- Gradualism in Ratemaking
- Bad Debt Expense
- Bad Debt Expense (Stormwater Only)
- Cost of Credits and Incentives
- Bill Discount Program (“BDP”) Foregone Revenue

Each adjustment is made based on the proportion of unadjusted cost of service, as reflected in PWSA Schedule HJS-4SW, except for Bad Debt Expense (Stormwater Only), which is weighted based on the number of Stormwater Only ERUs in PWSA’s Residential and Non-Residential Classes.

Q. Does PWSA make any adjustment to its proposed stormwater rates to align class revenues with the results of the stormwater cost of service allocations?

A. No. PWSA developed its proposed stormwater fee as a system-wide fee based on ERUs. Therefore, PWSA calculates a system-wide stormwater fee per ERU and applies it to all stormwater customers. This calculation is shown in PWSA Schedule HJS-6SW. Therefore,

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 the revenue generated per customer class is driven by the calculation of Net Costs to
2 Recover for Ratemaking, i.e., the net revenue requirement plus the cost of the Bill Discount
3 Program, and two rate design decisions made by PWSA, specifically:

- 4 • The method used to assign ERUs to parcels, and
- 5 • The level of discount provided to customers that are enrolled in PWSA’s Customer
6 Assistance Program (“CAP”)⁸ who are not charged the full fee per assigned ERUs.

7
8 **Q. What justification does PWSA provide for not adjusting class stormwater rates to**
9 **align with the results of the stormwater cost of service allocations?**

10 A. In its response to School District Data Request I-7 (School District Exhibit EMC-3), PWSA
11 states:

12 “While it is true that ... Bad Debt Expense, Cost of Credit and Incentives,
13 and Cost of Bill Discount Foregone Revenue [are] being allocated to
14 customer classes based on Unadjusted COS, **it should be recognized that**
15 **that allocation has no bearing on the calculated rate** because the
16 stormwater rate is determined by dividing Net Costs to Recover for
17 Ratemaking by Stormwater ERUs as shown on Schedule HJS-6SW. **As**
18 **such, allocating these costs based on Class Contribution would have no**
19 **impact on the calculated stormwater rate.”** (emphasis added)
20

21 **Q. Do you agree with the justification provided by PWSA?**

22 A. Not entirely. PWSA’s justification highlights a key issue regarding the use of impervious
23 area based ERUs to allocate stormwater costs to customer classes. In traditional water and
24 or wastewater ratemaking, rate design choices are driven by the results of a cost-of-service

⁸ PWSA’s Customer Assistance Program allows qualified customers to be charged a reduced bill for water, wastewater, and stormwater service. Therefore, there is a cost related to foregone revenue that results from this program.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 analysis in which costs are functionalized into system functions, allocated to cost causative
2 components, and then distributed to customer classes based on their individual
3 contributions to the cost causative components. In the case of a purely ERU based
4 stormwater fee, it is the rate design that defines the costs allocated to each customer class,
5 which is the reverse of the traditional water or wastewater cost of service process.

6 Having said that, PWSA is not prohibited from adjusting the ERU assignment on a
7 class basis to align the results of the cost-of-service analysis with the revenue generated by
8 each class's stormwater fee. If PWSA were to do so, then the particular assignment of
9 adjustments to cost of service would indeed have an impact on the fee levied on each
10 customer class, resulting in different costs per ERU for different classes based on their
11 individual cost contribution.

12
13 **Q. Is there a more equitable method for adjusting the stormwater cost allocation to**
14 **customer classes?**

15 A. Yes. A more equitable allocation would be to distribute all adjustments except Gradualism
16 based on Class Contribution. Class Contribution represents the amount of a particular cost
17 that is caused by each rate class. Using Class Contribution as the basis for allocation of all
18 stormwater adjustments except Gradualism would better reflect a distribution of costs to
19 those customer classes that cause them. It should be noted that for PWSA's water and
20 wastewater cost of service allocations, Bad Debt expense is allocated to customer classes
21 based on Class Contribution.

22

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 **Q. What would the impact be on stormwater charges to customers if PWSA used a more**
2 **equitable cost allocation adjustment method and aligned the proposed ERU fees with**
3 **the more equitable cost allocation method?**

4 A. The result would be an increase in the Residential charge per ERU and a decrease in Non-
5 Residential charge per ERU. School District Exhibit EMC-4 demonstrates a more equitable
6 allocation of adjustments to customer classes. The primary differences between PWSA's
7 methodology and what I am proposing are the following:

- 8 1. Bad Debt Expense is allocated to Customer classes in a manner consistent with
9 the "Class Contribution" allocation used by PWSA in its proposed Wastewater
10 cost of service (Schedule HJS-9WW). In my suggested approach, the weighting
11 of Bad Debt Expense for Stormwater Only customers is maintained but revised
12 to be based on percentage of Class Contribution.
- 13 2. In my suggested approach, costs related to the foregone revenue resulting from
14 PWSA's Bill Discount Program are allocated 100% to the Residential class,
15 which reflects a more reasonable relationship between the customers who cause
16 those costs, i.e., Residential customers, and those who should pay them, i.e.,
17 Residential customers.

18 School District Exhibit EMC-5 demonstrates the estimated result of aligning ERU charges
19 on a class basis with the more equitable adjustments while maintaining the 85% discount
20 for Residential – CAP customers. Note that this analysis produces an estimated result
21 because PWSA's Cost of Service and Rate Design model was not provided with its full

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 capabilities.⁹ Specifically, in the model provided by PWSA, the cost of Bad Debt Expense
2 does not adjust in proportion to my suggested change in stormwater rates.

3
4 **Q. Are there any other stormwater rate design choices made by PWSA that impact rates**
5 **in FY 2025 and FY 2026?**

6 A. Yes. PWSA is proposing to adopt a Customer Assistance Charge (“CAC”) in FY 2025 and
7 FY 2026 that is intended to recover the costs incurred to administer the CAP and to recover
8 forgone revenue resulting from discounts provided to customers participating in PWSA’s
9 CAP (PWSA St. No. 7, p. 48, lines 14-16). The Stormwater CAC is calculated by dividing
10 the annual forgone revenue and allocated operations costs by the total number of
11 stormwater ERUs to arrive at a rate per ERU (PWSA St. No. 7, p. 48, lines 23-24). PWSA
12 proposes that the CAC apply to all stormwater ratepayers in all classes.

13
14 **Q. Do you agree with PWSA’s proposed application of the CAC to all stormwater**
15 **ratepayers?**

16 A. No. PWSA is proposing to adopt a Customer Assistance Charge (“CAC”) in FY 2025 and
17 FY 2026 that is intended to recover the costs incurred to administer the CAP and to recover
18 forgone revenue resulting from discounts provided to customers participating in PWSA’s

⁹ PWSA’s Cost of Service and Rate Design Model was developed by Raftelis and provided with the following disclaimer: “Note: This comprehensive Cost-of-Service and Rate Design model is being submitted to support PWSA’s 2023 Rate Case Filing. Due to the size and comprehensive nature of the model, Raftelis has taken several steps to avoid circular references. This has resulted in numerous manual steps to appropriately run rate scenarios. For this reason Raftelis and PWSA recommend that the model be used for informational purposes only. Any rate scenarios developed by users unauthorized by PWSA may not be valid and will need to be fully vetted by PWSA and Raftelis staff.”

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 CAP (PWSA St. No. 7, p. 48, lines 14-16). The Stormwater CAC is calculated by dividing
2 the annual forgone revenue and allocated operations costs by the total number of
3 stormwater ERUs to arrive at a rate per ERU (PWSA St. No. 7, p. 48, lines 23-24). PWSA
4 proposes that the CAC apply to all stormwater ratepayers in all classes. In my view, the
5 costs of the CAC should be allocated to residential customers only since that rate class is
6 responsible for the costs incurred under this program.

7
8 **Q. What is the overall impact on stormwater rates of your recommended changes to**
9 **PWSA's stormwater cost allocation and rate design?**

10 A. School District Exhibit EMC-6 shows PWSA's proposed FY 2024, FY 2025, and FY 2026
11 stormwater rates and the estimated FY 2024, FY 2025, and FY 2026 stormwater rates
12 resulting from my recommended adjustments. Under my recommended adjustments,
13 PWSA's stormwater fees per ERU for Non-residential customers will go from \$10.26 to
14 \$10.04 in 2024, from \$12.50 to \$11.88 in 2025 and from \$14.62 to \$13.89 in 2026.

15
16 **IV. BASIS FOR A STORMWATER FEE**

17 **Q. How does PWSA propose to charge customers to collect revenue to pay for its**
18 **proposed stormwater revenue requirement?**

19 PWSA proposes to charge customers based on each customer's assigned ERUs, as
20 described previously in my testimony. PWSA calculates each parcel's ERUs based on that
21 parcel's impervious area. PWSA St. No. 8, Section III describes how PWSA defines and
22 calculates impervious area.

23
24
25

Q. What data did PWSA rely upon to determine the amount of impervious area on each parcel in its service area?

A. In its response to School District Data Request I-6 (School District Exhibit EMC-7), PWSA states the three data sets relied upon by PWSA to develop calculations of impervious area:

- 2017 aerial imagery sourced from Allegheny County
- 2022 parcel outlines sourced from Allegheny County
- 2021 aerial imagery to develop impervious area calculations for each parcel.

Information gathered from each data set was combined to develop a calculation of impervious area for each parcel within PWSA’s stormwater service area.

Q. Does PWSA propose to assign ERUs in the same manner to all parcels?

A. No. PWSA proposes to assign ERUs to Residential customers in a tiered ERU structure, as described in PWSA Statement No. 8 at p. 11, lines 2-9 and previously in my testimony.

PWSA states that this tiered structure was developed because:

“The impervious area found on a residential lot in Pittsburgh varies from about 400 square feet to more than 4,000 square feet. Using tiers instead of one flat rate allows PWSA to differentiate among SFR ratepayers and maintain an equitable approach across the various types of development and homes.” (PWSA Statement No. 8, p. 11, lines 11-19.)

Q. Does PWSA propose to assign ERUs to Non-Residential customers based on actual parcel impervious area?

A. No. PWSA proposes to assign ERUs to Non-Residential parcels by rounding up to the nearest integer ERU value (PWSA St. No 8, p.12, lines 13-15). As a justification for this

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 rate design decision, PWSA states that “a flat rate or tiered rate such as used with SFR
2 properties is not equitable across such a wide range of [Non-Residential] classifications.”
3 (PWSA St. No. 8, p. 12, lines 24-25).
4

5 **Q. What is your response to PWSA’s decision to assign Residential ERUs in a tier**
6 **structure but not Non-Residential ERUs?**

7 A. I find it inconsistent that PWSA applies a value judgement to arrive at an “equitable
8 approach across various types of development” within the Residential class but not within
9 the Non-Residential classes. If a tiered ERU structure does indeed result in an “equitable
10 approach across various types of development” within the Residential class, then a tiered
11 ERU structure for Non-Residential classes may also be an equitable approach. PWSA does
12 not clearly define what it considers intra-class equity. I recommend that PWSA clearly
13 define what it considers intra-class equity and investigate whether there exists a tiered Non-
14 Residential ERU rate structure that would result in a more equitable distribution of costs
15 to non-residential customers.

16 I also find it inconsistent to assign ERUs to residential parcels using a tiered
17 structure in which some parcels are rounded down to the nearest half ERU and non-
18 residential ERUs using a structure that rounds up every parcel to a whole ERU greater than
19 its actual ERU value. I recommend PWSA adopt a more consistent approach by rounding
20 non-residential parcels up or down to the nearest half ERU. For the School District,
21 rounding ERU assignments up or down to the nearest half ERU would result in a reduction

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 of 52 ERUs, or about 1.3%. This amounts to an annual savings of \$6,402, \$7,800, and
2 \$9,123 in years FY 2024, FY 2025, and FY 2026 respectively at PWSA’s proposed rates.

3
4 **Q. Are there any other generally accepted methods to allocate stormwater costs based**
5 **on something other than just impervious area?**

6 A. Yes. There are several stormwater rate designs that are based on calculations considering
7 both impervious and pervious areas. The Pennsylvania Environmental Council (“PEC”)
8 endeavors to protect and restore the natural and built environments through innovation,
9 collaboration, education, and advocacy. Historically, PEC has worked to bring all sides on
10 environmental issues to the table to search for common ground, and has played a significant
11 role in the development, passage and implementation of landmark environmental
12 legislation and regulation in Pennsylvania.¹⁰ The PEC’s 2017 publication titled *Stormwater*
13 *Fees: Overview of Municipal Stormwater Fee Programs* (attached hereto as School District
14 Exhibit EMC-8), a publication I find to be authoritative, describes both the Intensity of
15 Development Factor (“IDF”) and Equivalent Hydraulic Area (“EHA”) methods of
16 developing stormwater fees. The IDF and EHA approaches both consider the pervious and
17 impervious area of a parcel.

18 The IDF approach assigns costs based on the relative percentage of impervious to
19 pervious area on each parcel. For example, a parcel within PWSA’s service area with an
20 impervious area of 1,650 sq. ft. and pervious area of 3,000 sq. ft. (50% impervious) would
21 be assigned more cost than a parcel with an impervious area of 1,650 sq. ft. and pervious

¹⁰ <https://pecpa.org/home/about>

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 area of 6,600 sq. ft. (25% impervious). In this manner, IDF can be more equitable than an
2 ERU based rate structure.

3 The EHA approach assigns a cost to both impervious and pervious area for each
4 parcel. Therefore, there is a separate fee for impervious and pervious area. The fee for the
5 impervious area is typically much higher than the fee for the pervious area. Because each
6 parcel is assessed a fee for both impervious and pervious area, this fee structure distributes
7 costs in a manner more detailed than the ERU approach.

8 In *Stormwater Fees: Overview of Municipal Stormwater Fee Programs* (School
9 District Exhibit EMC-8), the PEC notes that the IDF and EHA approaches may be more
10 equitable than an ERU fee calculated entirely based on parcel impervious area.

11
12 **Q. Do any entities that levy stormwater fees charge fees based on gross parcel area rather**
13 **than just impervious parcel area?**

14 A. Yes. Black & Veatch Management Consulting, LLC (“Black & Veatch” or “B&V”) is a
15 wholly owned subsidiary of Black & Veatch Holding Company that focuses exclusively
16 on the utility sector. B&V provides financial management services to the water,
17 wastewater, and stormwater utility sectors. Each year, B&V conducts a Stormwater Utility
18 Survey in which it compiles data from numerous entities providing stormwater services in
19 the United States related to stormwater financing, fees, stakeholder engagement programs,
20 and other stormwater issues. I routinely consult the B&V Stormwater Utility Survey when
21 investigating how entities providing stormwater services adopt rates.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 Black and Veatch’s 2021 Stormwater Utility Survey (attached to this testimony as
2 School District Exhibit EMC-9) indicates that in 2020, 25% of stormwater entities that
3 responded to the survey use gross parcel (property) area as the basis for their stormwater
4 user fees (School District Exhibit EMC-9 at p. 33). While the survey does not indicate the
5 particular method used, it should be noted that both the IDF and EHA approach consider
6 gross parcel area in the assignment of stormwater costs.

7
8 **Q. How would an entity typically determine which, if any, alternative approach should**
9 **be used in billing customers and/or allocating stormwater costs?**

10 A. First, an entity would clearly define what it determines to be an equitable distribution of
11 costs between classes. Then, based on that definition, the entity would calculate stormwater
12 fees using several different approaches, thereby determining the cost assigned to each
13 customer class under each approach. The entity would then determine the most appropriate
14 and equitable approach based on its judgement and application of its definition of equity.

15
16 **Q. To your knowledge, are there any entities actually measuring or metering stormwater**
17 **runoff for the purpose of billing customers for stormwater service?**

18 A. No. The direct measurement of stormwater runoff on a parcel-by-parcel basis is generally
19 considered to be too difficult, if not impossible, to achieve in any manner that would
20 produce an acceptable level of accuracy that could be used as a basis for a stormwater fee.

21

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 **Q. Did PWSA indicate that they investigated whether any alternative stormwater fee**
2 **approaches would result in a more equitable distribution of stormwater costs to**
3 **customers?**

4 A. No. Not only has PWSA not defined what it considers equitable, PWSA has not indicated
5 whether it considered any approach other than the Residential tiered ERU and Non-
6 Residential flat ERU method previously described in my testimony for the purposes of
7 assigning stormwater costs to customers.

8

9 **Q. Do any entities that levy stormwater fees exempt school districts from paying**
10 **stormwater fees?**

11 A. Yes. The Black & Veatch 2021 Stormwater Utility Survey indicates that 16% of survey
12 respondents exempt school districts (School District Exhibit EMC-9 at p. 40). Of those,
13 45% indicate that this exemption is based on a specific policy and not any enabling
14 legislation (Id.).

15

16 **Q. What is the rationale for a policy exempting school districts from paying stormwater**
17 **fees?**

18 A. Entities that levy fees routinely make policy decisions related to fee exemptions for certain
19 customers.

20 For example, Maryland law allows municipalities to exempt “property owned by
21 the State, a unit of State government, a county, a municipality, [or] a veterans’ organization
22 that is exempt from taxation” from stormwater fees (MD Code, Environment, § 4-

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 202.1(e)(2)(i) (2019). Based on this allowance, the City of Baltimore adopted a policy to
2 exempt Veterans Organizations from stormwater fees.

3 The City of Takoma Park, Maryland exempts property used for public purposes and
4 owned by the state, county, or city agency as well as volunteer fire departments.

5 The City of Jacksonville, Florida exempts charitable organizations as defined by
6 the Internal Revenue Code section 501(c)(3) and recognized by the IRS as such.

7
8 **Q. Have you seen any indication in this proceeding that PWSA considered exempting**
9 **school districts from PWSA's stormwater fees?**

10 A. No. PWSA includes no discussion in its stormwater rate proposal regarding stormwater fee
11 exemptions for any customer class or specific customer.

12 In my opinion, such an exemption for school districts would not result in undue
13 discrimination in PWSA's stormwater rates because it would be a reflection of PWSA's
14 acknowledgement that reducing costs to school districts, a unique customer that has no
15 other direct counterpart as a quasi-municipal entity focused on the education of children,
16 would result in more resources being spent on the education of students, and therefore a
17 net increase in public benefit when compared to charging school districts stormwater fees.

18
19 **Q. Are there any value judgments implied by PWSA's calculation of stormwater rates?**

20 A. Yes. There are several value judgements implied by PWSA's proposed stormwater fees.

21 First, there is a comment contained within PWSA's Cost of Service and Rate
22 Design model, tab "SW>RateDesign24", cell E63 that states the value in that cell is the

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 “Estimated credit program cost + cost of cemeteries receiving exemptions.”, which
2 indicates PWSA assigns costs related to exempting cemeteries from stormwater fees to all
3 other stormwater customers. This judgment provides some support for the School District’s
4 recommendation that it also be exempted from any stormwater fees in recognition of its
5 public education mission.

6 Second, PWSA implicitly does not charge stormwater fees to a very large
7 contributor to stormwater runoff in their service area, which is the impervious area within
8 the public right-of-way, namely City-owned streets and sidewalks. Of course, there is a
9 cost to managing the stormwater runoff resulting from the impervious area within the
10 public right-of-way. However, PWSA implicitly embeds those costs as a system-wide
11 benefit by not defining a fee related to the public right-of-way. All stormwater ratepayers
12 pay for the benefits of managing stormwater resulting from the impervious area within the
13 public right-of-way via the fees levied on them by PWSA. This implied policy is analogous
14 to municipalities not charging for Public Fire Protection within their corporate limits. In
15 many cases, municipally owned systems do not charge themselves, i.e., the owner of the
16 utility, for public fire protection, but rather build costs related to public fire protection into
17 rates charged to system users. In this manner, municipally owned water utilities recognize
18 the widespread public benefit of public fire protection and distribute those costs
19 accordingly. This rationale applies to the School District as well.

20

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 **Q. What additional credit mechanisms should PWSA be deploying in the administration**
2 **of its stormwater charge to incentivize customers to proactively address stormwater**
3 **runoff on their properties?**

4 A. Given the substantial financial impacts stormwater fees have on its customers, like the
5 School District, who traditionally have not paid for stormwater management as a discrete
6 service offering, PWSA should leave no stone unturned in identifying simple, easy to
7 understand, and easy to implement customer credit mechanisms that can mitigate the
8 economic impact of stormwater fees. PWSA's current Stormwater Credit Fee Manual only
9 includes stormwater fee credits for Non-Residential customers that require costly
10 investments to capture and detain runoff on-site to meet or exceed certain development
11 standards.

12 PWSA should offer simple, easy to understand and implement credits specific to
13 educational customers like the School District. It is common for credits ranging from 10%
14 to 20% to be offered to public and private schools that inform students on the importance
15 of stormwater management. The following entities in the Commonwealth offer such
16 credits:

- 17 1. Capital Region Water (Harrisburg)
- 18 2. Derry Township
- 19 3. Ebensburg Borough
- 20 4. City of Lancaster
- 21 5. Mt. Lebanon Township

22

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 **Q. Can you contrast PWSA's stormwater service with traditional water and wastewater**
2 **utility services?**

3 A. There are a number of factual differences between traditional water/wastewater services
4 and the relatively new PWSA stormwater service.

5 First, customers do not request and apply for stormwater service. No meters or other
6 equipment measures the amount of stormwater service provided by PWSA and PWSA's
7 stormwater infrastructure is not designed, constructed, or utilized based on customer class
8 differences such as the relative size of the facilities used for water service.

9 Second, in contrast to water and wastewater service, individual customer factors
10 that influence to what extent an individual customer could be said to cause stormwater
11 runoff such as meter size, average and peak demand, concentration of runoff pollutant
12 loadings, are neither under the control of or measurable by PWSA or its customers. It is
13 therefore not possible to calculate individual customer contribution to the costs of
14 stormwater mitigation, and benefit from stormwater facility investment. Therefore, the
15 traditional cost allocation process of Functionalization, Allocation, and Distribution
16 presented in publications such as AWWA Manual M1 – *Principles of Water Rates, Fees*
17 *and Charges* and WEF Manual of Practice 27 - *Financing and Charges for Wastewater*
18 *Systems* is not applicable when determining the allocation of stormwater system costs to
19 customers. However, the process of allocating certain other stormwater program costs,
20 such as those discussed previously in my testimony, are able to be reasonably allocated to
21 those customer classes that cause them, such as Bad Debt and the Cost of Credits and
22 Incentives.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 Third, while it is simple to identify the benefits of stormwater infrastructure for a
2 large area such as a municipality in terms of improvements in water quality and reductions
3 in flooding, connecting the costs and benefits of a stormwater system to individual
4 residential and non-residential customers is not possible with the precision one can apply
5 to water and wastewater service.

6 **V. CONCLUSION**

7 **Q. Please summarize your conclusions and recommendations.**

8 A. My conclusions based on my understanding of PWSA's proposed stormwater fees are as
9 follows:

- 10 1. There is a legal question in this case as to whether PWSA's stormwater charge
11 is a lawful fee or an unlawful tax that cannot be imposed on tax-exempt entities
12 such as the School District.
- 13 2. PWSA's proposed stormwater fees, including the addition of the CAC in FY
14 2025 and FY 2026, would result in an increase in bills of 29.1% in FY 2024,
15 21.8% in FY 2025, and 17.0% in FY 2026 for all stormwater ratepayers. (HJS-
16 13SW). These are substantial increases which, if billed to the School District
17 and not otherwise eliminated, would require the School District to divert funds
18 from other educational and operational imperatives as noted by School District
19 Witness McNamara.
- 20 3. PWSA did not investigate all available programs and approaches that could
21 reduce the cost of stormwater for its ratepayers, such as a CBP3, to reduce the
22 cost of planned stormwater capital improvements.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 4. PWSA did not consider a reasonable and justifiable exemption for school
2 districts when developing its stormwater rates.

3 5. PWSA did not consider adjusting stormwater rates to reflect reasonable
4 differences in costs incurred by customer classes.

5 6. PWSA distributed all adjustments to its cost allocation for stormwater, except
6 Gradualism, based on the unadjusted cost of service result.

7 7. PWSA did not adjust the charge per ERU on a class basis to align each class's
8 revenue with the adjusted cost developed for each class.

9 8. PWSA does not define "equity" in regard to both inter and intra-class cost
10 allocation.

11 9. PWSA uses a tiered ERU structure to assign ERUs to residential customers and
12 a flat ERU structure to non-residential customers, without a clear explanation
13 for this inconsistent treatment.

14 10. PWSA did not consider alternative stormwater fee methodologies that industry
15 experts have identified as potentially being more equitable than PWSA's
16 chosen ERU based design.

17 My recommendations are based on my understanding of PWSA's proposed stormwater
18 fees and my conclusions. Assuming the legal issue identified earlier is not resolved in a
19 manner that effectively eliminates any obligation of the School District to pay PWSA's
20 stormwater fees, I recommend that PWSA:

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

- 1 1. Establish an exemption from payment of any stormwater fees for the School
2 District given its unique educational and public/governmental status/mission in
3 PWSA's service territory.
- 4 2. Investigate and implement all available programs and approaches that could
5 reduce the cost of stormwater for its ratepayers.
- 6 3. Consider developing a reasonable and justifiable policy to exempt school
7 districts from stormwater fees.
- 8 4. Adjust PWSA's stormwater rates to reflect reasonable differences in costs
9 incurred by customer classes as described in my testimony as follows:
 - 10 a. Allocate costs related to Bad Debt Expense based on Class
11 Contribution.
 - 12 b. Allocate costs related to PWSA's BDP 100% to the Residential
13 Class.
 - 14 c. Adjust Residential and Non-Residential fees per ERU to reflect the
15 results of the above mentioned cost-of-service adjustments.
 - 16 d. Levy the proposed FY 2025 and FY 2026 CAC only on Residential
17 customers.
- 18 5. Define "equity" in regard to both inter and intra-class cost allocation.
- 19 6. Investigate whether a tiered ERU structure can be developed to assign ERUs to
20 non-residential customers that more equitably allocates costs to non-residential
21 customers.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

- 1 7. Consider alternative stormwater fee methodologies that industry experts have
2 identified as potentially being more equitable than PWSA's chosen ERU based
3 design.

4
5 **Q. What are the impacts of your recommendations on stormwater rates and the**
6 **allocation of PWSA's proposed revenue requirements?**

7 A. The estimated impacts to rates of my recommendation regarding the reduction in the Non-
8 residential stormwater fees are as follows:

- 9 1. Stormwater fees per ERU for Residential customers would go from \$10.26 to
10 \$10.69 in 2024, from \$12.50 to \$13.64 in 2025 and from \$14.62 to \$15.96 in
11 2026.
12 2. Stormwater fees per ERU for Non-residential customers would go from \$10.26
13 to \$10.04 in 2024, from \$12.50 to \$11.88 in 2025 and from \$14.62 to \$13.89 in
14 2026.

15 The estimated impacts to class revenues of my recommendation regarding the reduction in
16 the Non-residential stormwater fees are as follows:

- 17 3. Stormwater revenues from Residential customers would go from \$10.95 million
18 to \$11.71 million in 2024, from \$13.39 million to \$13.95 million in 2025 and
19 from \$15.65 million to \$16.32 million in 2026.
20 4. Stormwater revenues from Non-residential customers would go from \$18.88
21 million to \$18.11 million in 2024, from \$21.91 million to \$21.43 million in
22 2025 and from \$25.61 million to \$25.07 million in 2026.

PITTSBURGH WATER AND SEWER AUTHORITY
TESTIMONY OF ERIC M. CALLOCCHIA

1 As for my other recommendations, PWSA should be required to consider them as
2 noted and report quarterly over the period the rates set in this case are in effect to the PUC
3 and the parties to this proceeding the results of their good faith efforts to reduce costs to
4 non-residential stormwater customers, the parties should be permitted to respond to such
5 quarterly reports and all of the reports and responses should be addressed by the PUC in
6 PWSA's next base rate proceeding.

7

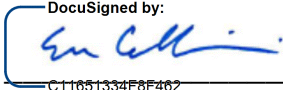

8 **Q. Does this conclude your direct testimony?**

9 A. Yes, it does. However, I reserve the right to submit additional testimony if it is necessary
10 or appropriate to do so.

VERIFICATION

I, Eric M. Callocchia, Partner, NewGen Strategies and Solutions, LLC., have read the foregoing document, Direct Testimony of Eric M. Callocchia, and verify that the facts set forth therein are true and correct to the best of my knowledge, information and belief.

I understand that any false statements made herein are subject to the penalties of 18 Pa. C.S.A. § 4904, relating to unsworn falsification to authorities.

Water/Sewer/Stormwater Rate Studies

Mr. Callocchia provides water, wastewater, and stormwater industry expertise and policy guidance to NewGen's clients. His rate study approach involves the development of customized financial models that focus on the policy issues, cash needs, revenue requirements, and key performance indicators of each client. His models equip clients with the necessary information to make critical capital financing decisions and rate adjustments to fully finance their system's operation, asset maintenance, and replacement needs while maintaining fund balance policies based on industry best practices. The models also have the capability of scenario analysis and can be incorporated with operating and capital expense and revenue projects. Mr. Callocchia develops and recommends alternative rate structures and assists with implementing phased-in rate plans that address client issues and maintain the financial health of utility funds. Mr. Callocchia also provides expert guidance on managing water, sewer, and stormwater utilities, including developing policies and procedures related to customer service, organizational communication, and public outreach.

Clients that Mr. Callocchia has provided these services to include:

- Albemarle County, VA
- Anne Arundel County, MD
- Bloomington and Normal Water Reclamation District, IL
- City of Annapolis, MD
- City of Brea, CA
- City of Charlottesville, VA
- City of Concord, CA
- City of Dover, DE
- City of Falls Church, VA
- City of Frederick, MD
- City of Fredericksburg, VA
- City of Hagerstown, MD
- City of Hampton, VA
- City of Naperville, IL
- City of North Kingstown, RI
- City of Park Ridge, IL
- City of Portsmouth, VA
- City of Prospect Heights, IL
- City of Richmond, VA
- City of Rockville, MD

Stormwater Feasibility and Fee Studies

Libertyville, IL

In 2019, the Village engaged NewGen to complete a feasibility study to project the costs of implementing a Master Stormwater Management Plan (MSM) and to determine the appropriate methodology to charge Village citizens the fees for the MSM planned projects. The Village also tasked NewGen with developing credit policies and manuals, appeal procedures, and an appropriate Stormwater Ordinance. Mr. Callocchia developed a financial model that projected the twenty-year cost of the Village's MSM and the various impervious area-based cost allocation methods the Village could adopt as a funding mechanism. Mr. Callocchia's feasibility study allowed Village staff and elected officials to evaluate the various stormwater funding alternatives and implement industry best practices for the administration of its stormwater management program. Mr. Callocchia finalized the impervious area and utility billing databases and coordinated with Village staff to develop an interactive online fee lookup tool that allowed Village citizens to see their potential stormwater fee before it became effective. Mr. Callocchia also worked with Village staff to conduct two Town Hall style public information sessions before the fee became effective.

Westminster, MD

The City of Westminster serves as the County Seat. It is in the center of Carroll County, conveniently located near Maryland's largest cities, two state capitals, Annapolis and Harrisburg, and the nation's Capital. The City had historically faced challenges when funding stormwater operating and capital costs. In the past, the City had not accounted in a detailed fashion for the actual stormwater management costs, with most of the costs absorbed by the City's streets and road maintenance accounted for in the General Fund. The City engaged NewGen in 2019 to complete a feasibility study with several tasks:

- Identify and isolate the actual cost of stormwater maintenance.
- Develop and recommend a ten-year stormwater CIP given the City's asset listing and future stormwater needs.
- Recommend policies regarding stormwater fees and credits.
- Engage in a public information campaign to educate the City's citizens on the need for additional resources for stormwater management.
- Assist in implementing a Stormwater Utility that properly accounts for the City's stormwater costs.

Mr. Callocchia developed a financial model detailing the City's stormwater costs and helped the City implement a stormwater fee tied to the account information of City sewer users.

Eric **CALLOCCHIA**

PARTNER

Frederick County, MD

Frederick County, Maryland, was anticipating the issuance of a Municipal Separate Storm Sewer System (MS4) Permit from the Maryland Department of the Environment (MDE) that would place a particular cost burden on the County's 48,000 stormwater fee payers. Mr. Callocchia developed a financial model that determined the Maximum Extent Practicable (MEP) level the County could reasonably fund given current funding levels, median household income, and the County's procurement limitations. Mr. Callocchia's financial model allowed for a sensitivity analysis to determine the increase in funding that would be possible given several factors. The County used Mr. Callocchia's analysis to appeal the permit requirements and reduce the financial impact on the County's customers by reducing the mandated spending related to the permit and lengthening the required implementation timeframe.

Geneva, IL

The City of Geneva was actively involved in developing the Kane county Stormwater Management Ordinance dating back to 1998. Geneva became a "certified community" in 2001 with the adoption of the final version of the City's stormwater ordinance. The Lake County Stormwater Management Commission provided a template that was the basis of the City's Stormwater Management Program Plan (SMPP). The plan's purpose was to meet the minimum standards required by the U.S. Environmental Protection Agency (EPA) under the National Pollutant Discharge Elimination System (NPDES) Phase II program.

Mr. Callocchia led a team that conducted a financial analysis as a part of a Citywide Watershed Study. The City supported the drainage and stormwater-related costs through its General Fund. His role in the Watershed Study was to support and participate in the initial City staff meeting to establish a City Vision document. Mr. Callocchia also identified current grants and funding sources and developed funding strategies to facilitate the City's Public Works Department's capital and operational needs related to their drainage infrastructure responsibilities. He recommended funding gap strategies associated with an annual program and budget and participated in and supported a City Council strategic planning workshop topic related to the Citywide Stormwater Report and financial perspectives.

Water and Sewer Revenue Bond Feasibility Study

Mr. Callocchia developed a water and sewer rate model for the City of Annapolis, Maryland, that projected various debt scenarios, including bond coverage calculations and cash-on-hand target projections. The City was able to generate ratings of AA-, Aa3, and AA- from the three major rating agencies and issue the revenue bonds in the amount of \$30,755,000 on schedule, thanks to the feasibility report generated by Mr. Callocchia's team.

Litigation Support

Utility Billing Dispute

Silgan Plastics is the leading manufacturer of metal containers in North America and Europe and the largest manufacturer of metal food containers in North America, with a volume of approximately half the market share in the United States of America. They are also a leading worldwide manufacturer of metal, composite and plastic closures for food and beverage products. Mr. Callocchia led a team to evaluate the utility rates charges to a selection of Silgan's manufacturing plants and assist Silgan in settling rate disputes with local utility providers. Mr. Callocchia's detailed evaluations and expert analysis resulted in a settlement agreement for more than \$500,000 above the amount previously offered to Silgan before Mr. Callocchia's involvement.

Eric CALLOCCHIA

PARTNER

Water Rate Litigation

The San Diego County Water Authority (SDCWA) and The Metropolitan Water District of California (MWD) were engaged in litigation regarding the water rates charged to SDCWA by MWD. Mr. Callocchia developed a report on MWD's rate setting methodology and how it relates to the principles and industry standard practices detailed in the American Water Works Association (AWWA) Manual M1 - Principles of Water Rates, Fees, and Charges. Mr. Callocchia's evaluation assisted SDCWA in its efforts to show the illegality of MWD's rates based on their non-conformity to both AWWA standards and California Law (Proposition 26). Mr. Callocchia's work involved cost-of-service analysis and knowledgeable explanation of industry standards to the Superior Courts of California. After Mr. Callocchia's report, a judge ruled in favor of the Water Authority, saying MWD's rates for 2011-2014 were illegal, and awarded SDCWA \$235 million. Upon appeal, the appellate court ruled in favor of MWD on one of twelve issues. The California Supreme Court denied a petition by SDCWA to review the appellate court ruling. The results of the dispute in which Mr. Callocchia was involved as an expert were:

- MWD must pay the Water Authority approximately \$51 million for the so-called "Water Stewardship" charges that MWD added to the transportation rates it charged the Water Authority from 2011-2014. The decision prevents MWD from imposing more than \$20 million in illegal charges annually in the future. By 2047, those unlawful charges would have amounted to approximately \$1.1 billion.
- MWD unlawfully under-calculated the Water Authority's statutory water right to MWD's water supply.
- A contract clause MWD used to disqualify local water supply projects in San Diego County from receiving funding from MWD was unconstitutional.
- Engage in a public information campaign to educate the City's citizens on the need for additional resources for stormwater management.
- Assist in implementing a Stormwater Utility that properly accounts for the City's stormwater costs.

Benefit Assessment Dispute

The City of Westminster, Maryland, was sued by a new customer who alleged that the methodology used by the City to calculate its water and sewer benefit assessments, commonly known in the utility industry as System Development Charges, was unlawful. Mr. Callocchia served as an expert witness detailing the industry standard methodologies used to calculate these fees and provided the Court with the rationale and basis for the City's fees. The Court ultimately found that the City's fees were not illegally calculated based on the City's testimony, which included Mr. Callocchia's expert witness statements.

COMMUNITY SOLUTIONS FOR STORMWATER MANAGEMENT

A Guide for Voluntary Long-Term Planning

The purpose of this guide is to assist EPA, states and local governments in developing new or improving existing long-term stormwater plans that inform stormwater management implemented by communities on the ground. The document describes how to develop a comprehensive long-term community stormwater plan that integrates stormwater management with communities' broader plans for economic development, infrastructure investment and environmental compliance. Through this approach, communities can prioritize actions related to stormwater management as part of capital improvement plans, integrated plans, master plans or other planning efforts. Early and effective stormwater planning and management by communities as they develop will provide significant long-term cost savings while supporting resilience, economic growth and quality of life.

EPA considers this guide a draft that will be supplemented with an integrated online tool to assist communities in implementing the planning process, piloted through community-based technical assistance efforts, and updated over time with feedback from users.

Photography courtesy of Alisha Goldstein

DRAFT

I. INTRODUCTION

DRAFT

Stormwater management is a major and growing challenge nationwide, with stormwater pollution, flooding and other impacts imposing serious impacts on water quality, public health and local economies. EPA recognizes the technical and financial challenges that communities face in appropriately addressing stormwater pollution. At the same time, managing stormwater over the long term can create opportunities for communities to rediscover rainwater as a resource, invest in resilient infrastructure, revitalize urban waterways and introduce green space that makes communities more livable. The agency is introducing this voluntary guide to lay out a path forward that any community¹ can use to facilitate cost-effective, sustainable and holistic solutions that protect human health and manage stormwater as a resource. This guide offers a comprehensive approach for communities looking to achieve multiple community goals simultaneously. The agency understands that effectively managing stormwater will require long-term investments. This guide provides EPA's support for comprehensive stormwater planning for investments spanning many years. Communities using this long-term approach have the potential to identify new and broader financial resources and to get out in front of future regulatory commitments through forward-looking planning and investments. Planning and investing in this way can help to proactively address the costly and difficult water pollution problem and public health concern that urban stormwater continues to pose.

In the face of climate change, it is increasingly important that communities reevaluate how best to make use of their water resources and treat rain and stormwater as the resource they are. Communities can no longer afford to allow stormwater laden with trash, metals and pollutants to contaminate local waters. A new generation of management practices has emerged to effectively manage stormwater while simultaneously building vibrant, attractive communities. Green infrastructure (e.g., green roofs, permeable pavement, bioswales, rainwater harvesting, green streets, stormwater parks, conservation areas) can effectively address stormwater pollution and mitigate flooding, while at the same time providing open space for recreation, habitat, improved air quality, climate resiliency and aesthetic benefits. When used in conjunction with gray infrastructure, these approaches, can create an effective stormwater infrastructure network. These innovative practices also help to revitalize community economies, particularly for communities in need, by supporting sustainable local jobs, improving community assets and reducing blight.

As communities grow and develop their local economies, they're looking for sustainable and effective approaches to reduce existing and emerging sources of stormwater pollution while balancing other community priorities. Sound investments in systems to manage stormwater can complement community development initiatives and promote economic vitality.

¹ A community can include entities like cities, towns, townships, boroughs, transportation departments, universities and counties.

Many communities are rediscovering that stormwater is a valuable freshwater resource to combat drought conditions, while others are using green infrastructure to reduce localized flooding events. Cities and towns across the nation are evaluating and adopting integrated approaches to managing stormwater in order to reduce water and wastewater treatment costs, provide adequate water supplies and protect local waterbodies.

Across the country, forward-thinking communities are proving that revitalized water resources and smart green infrastructure solutions can be central drivers of economic development, community vitality and resiliency. Every community is different, but all share the ultimate goal of having clean water that is safe for people to use and enjoy. Developing a long-term plan for stormwater management can help communities find new opportunities for improvements and address these challenges. While identifying planning and management approaches that are economically and environmentally effective is a significant hurdle for many communities, well thought-out plans can help to guide smart policies and investments. These plans also can help open the door to potential new sources of funding by strategically identifying long-term community goals and better aligning activities with a comprehensive water resource management focus.

II. CONCEPTS GUIDING SMART INFRASTRUCTURE INVESTMENTS

DRAFT

EPA recognizes that each community has a set of unique circumstances that influence the planning process and the community's ability to finance and implement appropriate solutions for long-term stormwater management. Differences in regulatory status, governance, financial status, community size, geography and technical and programmatic expertise require a process that can be tailored to the needs of individual communities.

Any community may develop a long-term stormwater plan. Because of the multiple benefits of long-term stormwater plans, especially the resiliency-focused benefits of reduced flooding and augmentation of local water supplies, communities with unregulated MS4s may want to consider developing these plans to make proactive infrastructure decisions.

The approaches in this guide are built on a foundation of input from sustained engagement with key partners including states, communities, business/industry groups, academia and nongovernmental organizations. This foundation, comprised of the following concepts, undergirds the overall process:

1 By adopting a long-term approach to planning, communities can provide for plan implementation that allows for the integration of selected projects within other community development plans such as capital improvement plans and master plans.

2 Managing stormwater close to where precipitation falls, such as with retention or a similar hydrologically focused approach, has been shown to be an effective stormwater control method.

3 Innovative technologies, including green infrastructure, are important tools that can generate many benefits ranging from improved air and water quality to cost savings to more community amenities. They also may be fundamental aspects of communities' plans for integrated solutions.

4 The voluntary approach to long-term planning described in this guide can be a useful part of the larger effort to comply with any Clean Water Act (CWA) requirements (e.g., over multiple permit cycles). For example, a regulated municipal separate storm sewer system (MS4) that has developed an initial plan may work with EPA and/or the state to consider how the plan can help satisfy the requirements of their permits.^{2,3}

² EPA recognizes that states, as our partners in the implementation of the CWA stormwater management programs, have the lead for the day-to-day activities in approved NPDES states.

³ EPA understands that communities need sufficient time to implement flexible, community-integrated approaches within effective and comprehensive long-term stormwater plans.

III. COMPONENTS OF A LONG-TERM STORMWATER PLAN

DRAFT

This section sets forth the key steps in the development of a long-term plan, including elements to include in the plan and related questions to explore for laying the groundwork of the planning process.

For those communities that are regulated under the NPDES program, stormwater discharge requirements for regulated MS4s are included in permits that are effective for a maximum of five years. Regulated communities should consider how long-term stormwater planning can assist them in meeting specific permit requirements.

Long-term stormwater plans may address source water protection efforts and reduce nonpoint source pollutants through proposed trading approaches or other mechanisms. These plans may also address stormwater contributions causing localized flooding and sewer overflows.

When developing the plan, a community should determine and define the scope of the integration effort, ensure the active participation of entities that are needed to implement the plan, and identify the role each entity will have in implementing the plan.

Long-term stormwater planning does not remove obligations to comply with the CWA, nor does it change existing regulatory or permitting standards or requirements. Rather this approach recognizes the flexibilities in the CWA for the appropriate sequencing and scheduling of work to meet the requirements of the Act and implementing regulations.

STEP 1 - ASSESS WHERE YOU ARE NOW

DRAFT

ELEMENT 1

Identify the goals of the long-term stormwater planning effort, incorporating existing community objectives, such as the following:

- Stormwater runoff volume reduction, increasing infiltration, groundwater recharge and rainwater harvesting.
- Water quality.
- Capital improvements (including transportation, complete streets and public schools).
- Flooding reduction.
- Resiliency.
- Economic development to attract resources to the community.
- Social amenities for health or wellbeing of the community (including parks, urban gardens, green space, public art space, bike lanes and other transportation).
- Open space preservation.
- Natural channel, watershed, shoreline and/or natural floodplain functions protection.

STEP 1 - ASSESS WHERE YOU ARE NOW

DRAFT

ELEMENT 2

Describe any applicable water quality and human health issues to be addressed in the plan, including the following:

- Identification and characterization of the chemical, physical and biological quality of the waterbodies, including unimpaired waters, impaired waters, water quality threats and, where available, applicable wasteload allocations (WLAs) of an approved total maximum daily load (TMDL) or an equivalent analysis.
- An assessment of existing and long-term stormwater management challenges in meeting CWA requirements and projected future CWA requirements (e.g., water quality-based requirements based on a new TMDL).
- Identification and characterization of human health risks.
- Identification of sensitive areas and environmental justice concerns.
- Linkages to goals in local planning documents.

GROUNDWORK QUESTIONS

Are there applicable state requirements and planning efforts and can they incorporate state input on priority setting and other key implementation issues?

For regulated MS4s, what are water quality standards and other provisions of the CWA including existing flexibilities in the CWA and its implementing regulations, policies and guidance to consider?

How is the plan consistent with, and designed to meet the objectives of, any applicable total maximum daily loads (TMDLs)?

STEP 1 - ASSESS WHERE YOU ARE NOW

DRAFT

ELEMENT 3

Describe existing stormwater systems and their performance, including the following:

- Identification of communities and utilities that are participating in the planning effort and a characterization of their systems.
- Characterization of flows into and from the systems.
- Consideration of how current system performance may be impacted by changes in local climate (e.g., changes in precipitation and temperature).
- Assessment of new development, redevelopment and areas without adequate stormwater management that could use improvement.

STEP 2 - ANALYZE OPPORTUNITIES

DRAFT

ELEMENT 4

Institute and document how open communication with relevant stakeholders will be maintained in order to facilitate full consideration of all viewpoints in the planning and implementation of the plan. This process can be part of other on-going public involvement efforts that consider the following:

- Identify target audience groups and potential partners like watershed, industry, development and community groups (particularly those related to identified goals).
- Create opportunities for meaningful input during the identification, evaluation and selection of alternatives and other appropriate aspects of plan development.
- Make new information available to the public and any proposed modifications to the plan.
- Evaluate the implementation of the approach for communities with green infrastructure requirements in their permits or an enforcement order.

GROUNDWORK QUESTIONS

What are the community impacts and will there be disproportionate burdens resulting from current approaches as well as proposed options?

STEP 2 - ANALYZE OPPORTUNITIES

DRAFT

ELEMENT 5

Identify, evaluate and select stormwater management alternatives based on identified goals and objectives that address the following:

- Sustainable infrastructure planning approaches, such as asset management, to assist in tracking the necessary information for prioritizing investments in and renewal of major stormwater systems.
- A systematic process to consider green infrastructure and other innovative measures where they provide more sustainable solutions.
- Criteria to be used for comparing alternative projects, including those related to sustainability, and a process used for comparing alternatives and selecting priorities.
- Potential and planned non-structural and structural investments.
- Rate and document all options including: cost estimates, potential disproportionate burdens on portions of the community, projected pollutant reductions, benefits of receiving waters and other environmental and public health benefits associated with each option.
- A description of the relative priorities and optimization of the projects selected including a description of how the proposed priorities address adverse impacts on public health and water quality.

GROUNDWORK QUESTIONS

Where can effective watershed approaches and sustainable technologies, particularly green infrastructure be incorporated for stormwater control, resiliency and hazard mitigation?

Are there approaches to control stormwater in the long term from new development and redevelopment in the early planning phases and after construction ends to minimize stormwater runoff and potential sources of stormwater pollution?

Can existing stormwater discharges from already developed areas be reduced through retrofits and/or redevelopment on public and/or private land?

What projects are part of planned public works investments? Can they catalyze retrofits, promote comprehensive community-focused outcomes that address human health and water quality, and capitalize on cost efficiencies?

STEP 3 - MOVE TOWARD IMPLEMENTATION

DRAFT

ELEMENT 6

Document a process for proposing investments and implementation schedules. Include consideration of the following:

- Stakeholder groups – other communities, local groups, states, federal agencies, planning organizations and universities – in order to coordinate resources and actions.
- Life-cycle costs, including capital and operation and maintenance investments that help implement the plan.
- Proposed implementation schedules and, if applicable, alignment of implementation schedules with other existing efforts.
- A financial strategy for each entity participating in the plan to ensure investments are sufficiently funded, operated, maintained and replaced over time.

GROUNDWORK QUESTIONS

How do we provide appropriate opportunity for meaningful stakeholder input when proposing investments and implementation schedules?

Is there a financial strategy in place, including appropriate fee structures, to support capital investments and long-term operations and maintenance?

STEP 3 - MOVE TOWARD IMPLEMENTATION

DRAFT

ELEMENT 7

Document a process for evaluating the performance/success of the plan's projects. Evaluate projects as they are being implemented, which may involve evaluation of monitoring data, information developed by pilot studies and other studies and other relevant information, including the following:

- Propose performance metrics: Track metrics using modeling and monitoring results and costs to measure the success of human health and water quality objectives and the effectiveness of controls.
- Evaluate the performance of site-specific and large-scale green infrastructure and other innovative measures to inform adaptive design and management. Include identification of barriers to full implementation.
- Track cost savings gained due to long-term planning efforts.

IV. THE PLAN IS FINISHED - WHAT'S NEXT?

DRAFT

BUILD IT

Identify, evaluate and select new projects or modifications to ongoing or planned projects and implementation schedules:

- In situations where a community is seeking modification to a plan, or to the permit that is requiring implementation of the plan, the community should collect the appropriate information to support the modification and should be consistent with Elements 1 – 7 discussed above.
- This long-term stormwater planning approach can also inform the recently embraced integrated planning approach to municipal wastewater and stormwater management. Integrated planning encourages communities to take a comprehensive planning approach to clean water management by making strategic, long-term investments in their wastewater and stormwater systems.
- These planning approaches will assist communities on their critical paths to achieving the human health and water quality objectives of the CWA by identifying efficiencies in implementing requirements that arise from distinct wastewater and stormwater programs, including how best to make capital investments.

INCORPORATE IT INTO AN NPDES PERMIT

All or part of a long-term stormwater plan can inform an NPDES permit as appropriate. Permit writers can use the proposed implementation schedules included in the plan to develop clear, specific and measurable permit requirements that are consistent with applicable regulations. Identifying milestones of a long-term stormwater plan in NPDES permits can support the community's goals while simultaneously providing regulatory predictability.

Limitations and considerations for incorporating long-term stormwater plans into permits include:

- Specific activities to be implemented during the permit term.
- Measurable goals and metrics for tracking progress with the plan.
- Reopener provisions in permits consistent with section 122.62(a) may better facilitate adaptive management approaches.
- Securing funding.
- Green infrastructure approaches at site-specific and larger scales and related innovative practices that provide more sustainable solutions by managing stormwater as a resource should be considered and incorporated, where appropriate, where they provide more sustainable solutions for municipal wet weather control.
- Appropriate water quality trading may be reflected in NPDES permits.
- Annual reporting requirements.

COMMUNICATE IT

Communities may want to coordinate with their state and federal partners when getting ready to implement their long-term approaches. For example, some of these other partners may be able to help a community determine if it's eligible for certain funding to complete projects or parts of projects.

EPA recognizes the importance of and encourages early coordination between NPDES states and EPA on key implementation issues that may arise in individual plans. This will ensure that plans will not need to be revised in order for them to be implemented.

REFINE IT

Establish a process for periodically reviewing the plan to consider the results of performance metrics. Continue to identify opportunities to integrate with new community goals, public works projects and integrated planning efforts.

V. CONCLUSION

DRAFT

EPA considers this guide a draft and encourages feedback. EPA will also provide an online toolkit to assist communities in implementing the planning process, piloted through community-based technical assistance efforts, and updated over time with feedback from users. For additional information go to: www.epa.gov/npdes/stormwater-planning

Long-term stormwater plans can support community efforts to prioritize and implement effective stormwater management practices. Integrating these plans with broader community goals such as economic development, infrastructure investment and environmental compliance leverages the planning effort to support resilience, economic growth and quality of life.

With this guide, any community can lay out a path forward to cost-effective, sustainable and comprehensive solutions that protect human health and manage stormwater as a resource.

School District Exhibit EMC-3

Response of the Pittsburgh Water and Sewer Authority (“PWSA”) to the Interrogatories of The School District of Pittsburgh (“_”), Set I

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: School District -I-7 Referring to the PWSA FPFTY 2024 COS and Rate Design Model, “SW>RateDesign24”, lines 61-64: Please explain in detail why Bad Debt Expense, Cost of Credit and Incentives, and Cost of Bill Discount Foregone Revenue are allocated to customer classes based on the proportion of Unadjusted COS and not Class Contribution.

Response:

While it is true that the “SW>RateDesign24” sheet and Schedule HJS-5SW show Bad Debt Expense, Cost of Credit and Incentives, and Cost of Bill Discount Foregone Revenue being allocated to customer classes based on Unadjusted COS, it should be recognized that that allocation has no bearing on the calculated rate because the stormwater rate is determined by dividing Net Costs to Recover for Ratemaking by Stormwater ERUs as shown on Schedule HJS-6SW. As such, allocating these costs based on Class Contribution would have no impact on the calculated stormwater rate.

Response provided by: Harold J Smith

Date response provided: August 1, 2023

Response of the Pittsburgh Water and Sewer Authority (“PWSA”) to the Interrogatories of The School District of Pittsburgh (“SD”), Set I

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: School District -I-6 Referring to PWSA’s Prepared Testimony Statement No. 8 at page 8, lines 18-24 and page 9 lines 1-2: Please describe and explain in detail how, and to what extent, the data sets PWSA’s parcel impervious area information is based on. In your answer please specifically address the following data sets and any other data sets utilized as impervious surface information:

- a. 2017 Allegheny County data, as updated by PWSA; or
- b. 2022 aerial imagery; or
- c. building permits; or
- d. A combination of the above, or
- e. Some other data set.

Response:

The following three datasets or layers used for determining the billable impervious area on a parcel – aerial imagery, parcel impervious surface areas, and parcel lines – are discussed below.

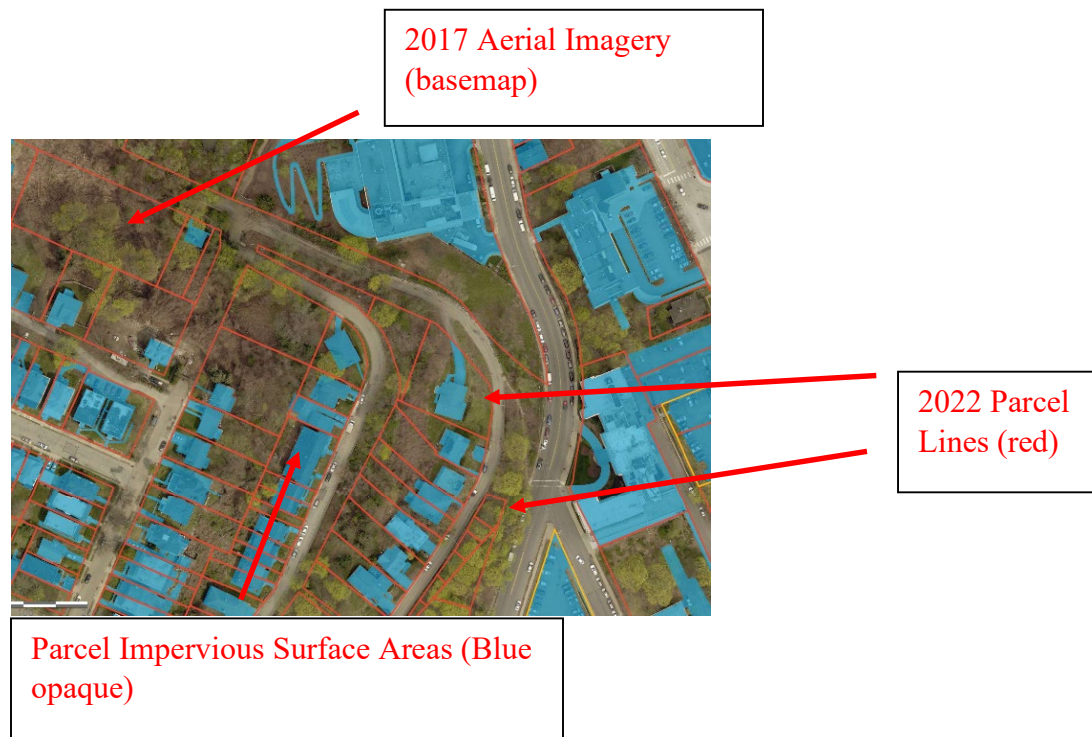

Figure 1. Types of mapping data in PWSA’s Stormwater Billing and Information System and the public Stormwater Fee Finder Map

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)
to the Interrogatories of The School District of Pittsburgh (“_”), Set I**

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Aerial Imagery - The primary aerial imagery used by Michael Baker International (MBI) to generate the Parcel Impervious Surface Area data layer for PWSA’s stormwater billing was originally from 2017. This ultra high-quality imagery is 3” Pixel data. Allegheny County is generally the source of aerial imagery data.

Parcel Impervious Surface Areas - The PWSA GIS Department references the newest version of aerial imagery, when it becomes available, to continually update the parcel impervious surface area data layer. We have been using 2021 (2” Pixels) aerial imagery to update impervious surfaces, and are currently confirming the quality and suitability of 2023 aerial imagery data, which is now available. It is anticipated that future updates of impervious surface data will take place every five years, provided that high quality imagery is available. The GIS Department is also using building permits to identify parcels where changes may have been made in terms of constructed/removed impervious features. Finally, changes to impervious area may also be made at the request of customers with documentation such as engineering drawings and photos, validated by current imagery or site visits.

PWSA will not change the impervious area on a parcel unless things have changed on the ground due to construction, demolition, or other site modifications, or to correct a mistake.

Parcel Lines - For the parcel lines, Allegheny County continuously edits parcels, and the data is made available quarterly. PWSA updates the County parcel data once per year. As of July 24, 2023, the County parcel data used in the Stormwater Fee Billing and Information System is as of August 2022. PWSA is currently in the process of updating the parcel line data, and it should be completed by the end of October 2023. A data reconciliation process is in place to ensure that bulk parcel updates from the County do not overwrite the limited number of parcel line or impervious area updates that have been made by PWSA to better align with features on the ground.

The current impervious area and data is available on PWSA’s Stormwater Fee Finder <https://www.pgh2o.com/your-water/stormwater/stormwater-fee/stormwater-fee-finder>.

Stormwater Fees:

Overview of Municipal Stormwater Fee Programs

DRAFT: March 2017

Created by the Pennsylvania Environmental Council with support from the William Penn Foundation. March, 2017.

The Pennsylvania Environmental Council (PEC) protects and restores the natural and built environments through innovation, collaboration, education, and advocacy. PEC believes in the value of partnerships with the private sector, government, communities, and individuals to improve the quality of life for all Pennsylvanians.

I. Overview

Stormwater management is a growing challenge for local governments. With the impact of past development on water quality and stream health, and federal and state permit requirements for new development and redevelopment, municipalities must implement approaches that protect and restore the water resources within their communities. To support these efforts, many municipalities are considering a dedicated funding stream to address flooding, water quality, and other concerns caused by unmanaged or poorly managed stormwater runoff.

The purpose of this handbook is to provide an overview of stormwater management fee programs. It describes how a stormwater fee program can be structured within your municipality, approaches for calculating fees, and a summary of stormwater fee development and implementation steps. For more information, please feel free to contact the Pennsylvania Environmental Council (PEC) or use the references provided in the back of this handbook.

What is stormwater?

Stormwater results from a rain storm or snow melt runoff. Higher volumes of precipitation cannot all be absorbed by plants and soils. Land covered by impervious surfaces such as roads, parking lots, and buildings also cannot absorb rain. Collectively, water that cannot be absorbed rushes to the municipality's storm water system and eventually into local creeks and streams.

Figure A illustrates typical runoff occurring during a rain event in a residential neighborhood. Take note how more runoff occurs than infiltration.

Why does it matter?

As stormwater travels to local creeks and streams, it picks up pollutants which degrade water quality. The pollutants found in the creeks and streams come from everyday items. From oil leaking from a car to pesticides used in a yard, these pollutants contribute to the degradation of water quality during storms. These impurities are referred to as non-point source pollutants, meaning pollution that results from runoff, precipitation, atmospheric deposition, drainage, seepage, or landscape modifications (U.S. EPA). High volumes of runoff also erode stream banks and deposit sediments that are damaging to aquatic life. Due to the variety of non-point sources, it is hard to pin point specific pollutants back to specific source(s).

In the case of combined sanitary and storm sewer systems, municipal water treatment facilities are unable to treat the increased flow to treatment plants. As a result the plants may have to redirect the flow of untreated waste water directly to local creeks and streams.

A stormwater fee can help a municipality address the collective impact of non-point source pollution caused by stormwater runoff.

What is a stormwater fee?

Municipalities in the past have relied on grants, loans and general funds to finance their stormwater programs. More recently, cities, townships, and boroughs are considering dedicated and stable sources of funding for stormwater programs including the formation of municipal stormwater authorities and/or the establishment of stormwater fees.

Municipalities across the country are establishing stormwater fees to fund stormwater management and associated non-point source pollution control programs. See Western Kentucky University Stormwater Utility Surveys report for summary of location and types of fee programs (<http://www.wku.edu/engineering/civil/fpm/swsurvey/>). Stormwater fees are typically levied on landowners based on the potential for their property to generate runoff (e.g. based on the size of the property and the amount of development on the property). The municipalities use money collected by fees to fund stormwater management projects and programs that reduce runoff and associated non-point source pollutants. One common stormwater management strategy is to install green infrastructure (e.g. rain gardens, naturalized basins, green roofs, and bioswales) that slow and infiltrate runoff to reduce pollution and mitigate flooding. Unlike general tax revenue, revenues generated via stormwater fees must be dedicated solely to stormwater management programs and projects.

The following information is provided to help guide your municipality's decision to assess and implement a stormwater fee program.

Pennsylvania Fee Programs

As noted in the Western Kentucky University Study, almost 1,600 stormwater utilities exist nationwide, in 39 states and in Canada. To remove stumbling blocks to fee creation, the survey recommends that states develop clear statutory authority allowing for stormwater fee programs for all categories of governing jurisdictions.

Stakeholders in Pennsylvania have recognized the need for clarifying legislation allowing for the creation of both stormwater authorities and municipal stormwater fees. In 2013 and 2014 the State's Municipal Authorities Act was amended to allow for the creation of authorities that can collect fees to perform "storm water planning, management and implementation."

Additional legislation is being pursued that specifically enables townships, boroughs, and cities to create and assess stormwater fees without the need to form an authority. In 2016, legislation was passed permitting Second Class Townships to assess reasonable and uniform fees for stormwater management activities and facilities. Similar legislation is being considered for other government entities such as Boroughs, First Class Townships, and Cities. Some municipalities with Home Rule Charters have already moved forward with stormwater fee programs.

As of March 2017, there are eight Pennsylvania municipalities with stormwater fee programs. This includes a mix of home rule communities (Philadelphia, Mount Lebanon, Radnor Township, and West Chester Borough), two third class cities (Meadville and Lancaster), one second class township (Derry Township Municipal Authority), and a first class township via their sewer authority (Hampden Township Sewer Authority). The following chapters provide some basic information to help guide your municipality's decision to create and implement a stormwater fee program.

II. Structure within Your Municipality

Setting up a stormwater fee requires a significant amount of time and resources. The following sections delve into different ways you can organize a stormwater authority or fee within your municipality.

Stormwater Authority

A stormwater authority is a separate government unit within one or more municipalities that can assess fees in order to develop and deliver stormwater management services. Pennsylvania's Municipality Authorities Act sets forth specific statutory power for municipalities to create a stormwater authority. The authority can generate fees that provide an operating revenue. The revenue from the authority is used to pay employees, operate and maintain stormwater facilities, fund green infrastructure projects and provide other related services. These dedicated stormwater authority fees cannot be diverted into the general operating budget. This can be a key selling point in setting up the authority; municipal officials can highlight flooding, erosion, and pollution problem areas and explain how the stormwater fee will be spent on programs and projects that directly address these community concerns.

It takes a great deal of thought and time to implement a stormwater authority. Many municipalities will have to restructure their water programs and hire more employees. It can be costly upfront with no initial revenue during feasibility assessment and start-up phases.

Water Department/Authority

Many municipalities in Pennsylvania already have a water department/authority within their government structure. A stormwater division can fit within the existing structure of a water department. However, additional employees may need to be hired to run the stormwater program effectively including setting up and implementing a stormwater fee program. In addition, the clarity of the revenue may become muddled within the organization. A new charge to residents will likely take some convincing. When billing to residents, it may be best to itemize the water bill showcasing the specific amount directed to stormwater management and related restoration programs. For an example of a itemized bill, visit Philadelphia Water's website (http://www.phila.gov/Revenue/waterbills/Documents/Sample_Water_Bill_John_Doe.pdf).

Multiple Departments

Another option is that a municipality can pool personnel from several departments to help administer the stormwater program. The existing or new employees should have specialized stormwater management skills. However, their allocation of time may be distorted and may be spread thin between other projects in their specific departments and their new role implementing and managing the stormwater program.

Creating a Stormwater Management Position

If you feel your municipality is able to do so, you can create a stormwater position. This person would be in charge of running the stormwater management and associated fee program. No department would exist. This structure may work for a smaller municipality, but the stormwater position can easily get overwhelmed with implementation, monitoring, and financial management tasks.

All these organizational structures depend on what works best for your community. Residents may better understand one structure versus another. To make a decision of the stormwater structure, it is important to involve the public.

III. Stormwater Fee Calculation

Stormwater fees can be calculated several different ways. The following subsections discuss each calculation's methodology and its pros/cons. A stormwater fee calculation program can be chosen based on your community's resources, land use characteristics, and population preferences. Fee calculation methods were drawn from US EPA's Funding Stormwater document. For further information regarding fee calculation, visit (<https://www.epa.gov/sites/production/files/2015-10/documents/fundingstormwater.pdf>).

Equivalent Residential Unit (ERU)

An Equivalent Residential Unit (ERU) is a unit of measure used to equate non-residential or multi-family residential properties to a specific number of single-family residences. An ERU is usually the average impervious area on a single-family residential parcel, although some communities define it as the average of all residential parcels. The definition will depend on the housing stock of your community.

Municipalities can calculate ERUs fees two different ways for residential properties. Once an average impervious area is determined, a municipality may charge all residential parcels the standard 1.0 ERU rate. This tends to be inequitable. If you are a large impervious landowner, you benefit from the standard. In contrast, smaller parcel impervious landowners will pay more in comparison to their impervious land cover. To make the ERU accounting method more equitable, municipalities can calculate each resident's impervious area within their parcel. If their property has less impervious coverage, they will have a fee lower than the 1.0 ERU average. The opposite applies for large land owners. The money generated from each accounting system will total the same.

For multi-family and non-residential properties, the municipality calculates the impervious surface of each parcel. The impervious area will be compared to the average impervious surface of a residential property, the ERU. The fee will be charged based on the ratio.

Advantages

The relationship (or nexus) between impervious area and stormwater impact is relatively easy to explain to the public – you pave, you pay. The number of billable ERUs can be determined by limiting the parcel area review to impervious area only. Because pervious area analysis is not required, this approach requires the least amount of time to determine the total number of billing units.

Disadvantages

The potential effect of stormwater runoff from the pervious area of a parcel is not reviewed. Runoff still occurs on pervious surface, especially traditional lawn grass. In addition, this method is sometimes considered to be less equitable because runoff-related expenses are recovered from a smaller area base. Vacant properties with no impervious cover do not get charged under the ERU fee system.

1 ERU = 1,000 ft.² of impervious area

The municipality will set a standard for impervious area and equate it to one equivalent residential unit. From this number, the municipality will be able to assess each parcel and determine the fee. For this example, we will assume that
1 ERU = \$1.00 stormwater utility fee.

Advantages: The relationship between impervious area and stormwater impact is relatively easy to explain to the public - you pave, you pay.

.80 ERU = 800 ft.² of impervious area
.80 cents

1.2 ERU = 1,200 ft.² of impervious area
\$1.20

2.0 ERU = 2,000 ft.² of impervious area
\$2.00

** ERU calculation includes all impervious surface (buildings, paved surfaces, etc.)*

Residential Tier System

The tier system is an alternative to the ERU. It uses the same calculation method as ERU. The fees increase in steps, depending on whether the property falls within a particular impervious size range. A typical tiered approach creates small, medium, and large categories for single-family residential properties, charging a different fee for each class. The average impervious surface ERU would be considered within the medium classification. From the average, the tier system will establish a range for the small, medium, and large impervious parcels.

Advantages

Tiered residential fee offers more equity than a flat ERU rate based only on the average. It may buy more political support for the approach. A tiered-system is easy to understand and administer. Use of ranges requires less precise impervious surface mapping – providing time and cost savings.

Disadvantages

Tiered systems may be vulnerable to legal challenges. Residences may feel like they are subsidizing large commercial users. Setting a maximum “ceiling” size for non-residential properties may keep the revenue stream relatively low.

* For non-residential and multi-family (e.g. apartment complexes), the ERU calculation is used. Properties in these categories do not use the tier system. The standard residential impervious square footage, ERU, will be divided by the larger parcel impervious cover to determine their unique fee.

Intensity Development Factor (IDF)

Intensity of Development Factor (IDF) adds a land use component to the stormwater fee calculation. The stormwater cost allocation system is based on the percentage of impervious area relative to the entire parcel's size. All parcels, including vacant/undeveloped parcels, are subject to a fee assessment. In addition to the ERU calculation, fees are based on their intensity of development, which is defined as a land use classification.

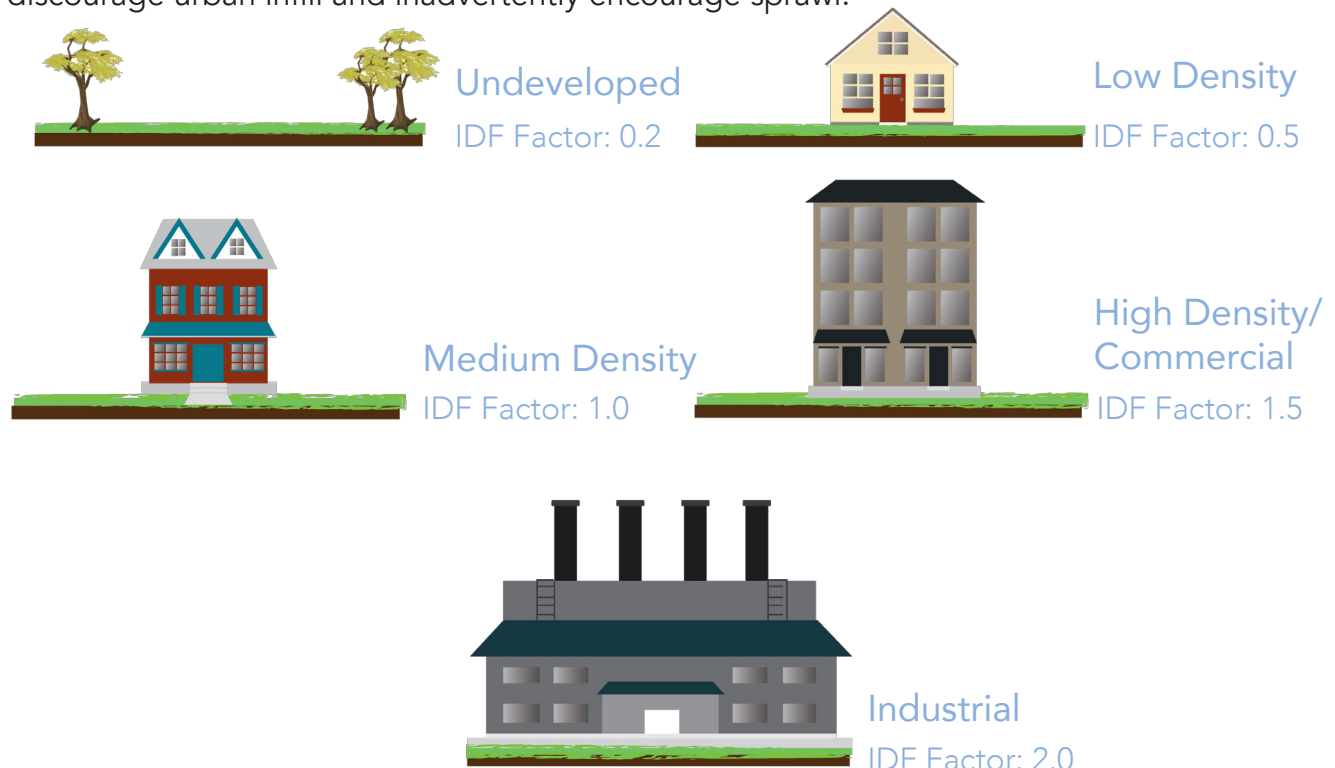

$$\text{Stormwater Fee} = (\text{ERU} * \text{Standard 1.0 ERU Rate}) + (\text{IDF} * \text{Standard 1.0 ERU Rate})$$
$$\text{ERU} = (\text{Parcel Impervious Cover} / \text{Avg. Residential Impervious Parcel})$$

Advantages

The IDF method accounts for stormwater from the pervious portion of the parcels. Therefore, it can be more equitable than the ERU method. If a parcel's impervious area is increased slightly because of minor construction modification, it probably would not be bounced into the next higher IDF category. This reduces the time required for staff to maintain the billable unit master file.

Disadvantages

The IDF categories are broad, and parcels are not billed in direct proportion to their relative stormwater discharges. This method can be more difficult to implement than the ERU method because parcel's pervious and impervious areas need to be reviewed. It is also more complicated to explain to customers than the ERU method. This method might discourage urban infill and inadvertently encourage sprawl.

Equivalent Hydraulic Area (EHA)

This fee method also accounts for pervious portions of the parcel (like the IDF fee). It is often considered fairer than the IDF method because parcels are billed on the basis of individual measurements of pervious and impervious surfaces rather than on a land use scale.

Advantages

The EHA method accounts for flow from the pervious portions of a parcel. Therefore, it might be more equitable than the ERU method. Like the IDF method, it accounts for undeveloped/vacant parcels and allows them to be billed, but it is fairer than the IDF method because parcels are billed on the basis of individual measurements of pervious and impervious areas.

Disadvantages

Since the pervious area analysis is required in addition to impervious area, this approach requires more time to determine the total number of billing units. It is more complicated to explain to customers than the ERU method.

Step 1: Measure the impervious surface of a parcel.

Step 2: Measure the pervious surface of a parcel.

Step 3: Set a fee per sq. ft. for pervious and impervious. Multiply the individual parcels measurements by the standard rates to get the total cost for the parcel's stormwater fee.

Residential Equivalent Factor (REF)

The Residential Equivalent Factor takes a scientific perspective on calculating a stormwater utility fee. The fee is based on the Natural Resources Conservation Service (NRCS) method of calculating runoff. In the equation, it calculates runoff (Q) in inches, taking into account how much the parcel can absorb and store water before and after runoff occurs. The potential for runoff (i.e. the runoff curve number [CN]) depends on the soil type and land use. The NRCS divides soil up into four hydrologic soil groups: A, B, C, and D (ranging from more water absorbent sands (Type A) to less water absorbent clays (Type D)). The runoff curve numbers range from 0-100 in theory, but in practice range from 30-98. A curve number of 98 corresponds to parking lots and streets and 30 corresponds to bushy land in type A soil. The more hard surface a parcel has, the higher its curve number and the greater the runoff. For a detailed explanation of NRCS Calculation, visit http://www.nrcs.usda.gov/Internet/FSE_DOCUMENTS/stelprdb1044171.pdf.

Advantages

The REF takes a scientific approach to stormwater fees. Due to its complexity and details, it thinks of everything that contributes to stormwater runoff. Its calculations are the most exact and most equitable to land owners within a municipality.

Disadvantages

An issue for the REF system is the rainfall amount to use. While calculating the average annual runoff is more tedious, it may be the fairest way to set up a REF system. Municipalities in Minnesota use the REF system to calculate stormwater fees. Minnesota municipalities use the 1-year (presumably 24-hour storm) to calculate runoff in a REF equation. However, you need to use the best rainfall standard for your municipality.

The REF is scientific and heavy in calculations. Due to its complexity, it may be harder to explain to the general population. In addition, the data and information required for the calculation is greater than the others. If the resources do not exist, you may want to consider using a simpler method that takes less time to calculate and implement.

IV. Development & Implementation

The stormwater utility should first evaluate and determine costs to implement and maintain its stormwater program. Some communities make the mistake of working in the other direction. They determine the fee that is politically feasible and collect as much as they can. Usually the amount is less than needed for the program. Expectations are not met and political resistance develops. This creates legal and political exposure for the utility. It is recommended to create a budget for the stormwater fee and then derive the price for each resident/landowner from the budget.

As a municipality, you need to assess the best choice based on feedback from your community. Prior to implementation, a municipality needs to develop and understand its stormwater system. Doing a feasibility assessment on a stormwater program will make for better understanding if charging a fee is appropriate for your municipality.

To better ascertain the community's choices, you must educate your municipal staff on financial options. Once employees understand and are on board with the financing mechanism, it is recommended that a steering committee of selected citizens be established. These citizens should exhibit an interest in solving stormwater pollution within your municipality. The committee and staff can collaboratively develop the fee system, create a public outreach and education program, and guide the adoption of an ordinance.

When implementing the stormwater utility fee, you can use the committee to test how well the proposed stormwater fee works for the community. By using a small sample of a municipality's population, the municipality can rule out potential errors within the fee system before a system-wide roll out.

Welcome to Our 2021 Stormwater Utility Survey Report

Dear Industry Colleagues,

Stormwater is gaining recognition as an integral component of our natural resource management agenda. This resource needs to be protected and reused to enable economic, environmental and social resilience that helps to improve the quality of life in our communities. The Water Environment Federation's Stormwater Institute* (SWI) has identified the following six key stormwater management objectives:

- Working at the Watershed Scale
- Transforming Stormwater Governance
- Supporting Innovation and Best Practices
- Managing Assets and Resources
- Closing the Funding Gap
- Engaging the Community

While municipalities have a long way to go in achieving these objectives, many continue to strive to enhance stormwater management and develop dedicated funding. Over the past two decades, Black & Veatch Management Consulting, LLC (Black & Veatch) has been a consistent voice in shaping and sharing information on enhanced stormwater management planning, best practices and funding.

This 2021 report is our thirteenth national Stormwater Utility Survey Report. This industry-leading report presents our analysis of information gathered from utility leaders on stormwater management priorities, rate structure, billing, credit program practices and average monthly residential stormwater charges. Some notable findings include the following:

- Funding adequacy and public support continue to reign as the first and second-ranked major utility challenges. Nearly 77% of the survey respondents indicate that funding is not adequate to meet all of their operations and maintenance (O&M) and capital needs.
- Aging stormwater infrastructure is also becoming a critical challenge with 75% of the respondents citing that to be an equally important concern.

Recognizing these continuing trends and emerging challenges, Black & Veatch continues to innovate with comprehensive asset management and service delivery solutions that are integrated with the "concept to launch" stormwater funding framework.

New to this year's report is an industry leadership round table discussion with a panel of three stormwater utility managers. They share their real world perspectives on the benefits of user fee funding, capital program financing, affordability, stakeholder engagement and pandemic response.

We invite you to download the new report for a window into current trends and their implications for your utility. Your questions are always welcome at managementconsulting@bv.com.

Sincerely,

Deepa Poduval | Associate Vice President

*WEF "Rainfall to Results: The Future of Stormwater," 2015

About This Report

About This Report

Company Overview

Black & Veatch Management Consulting, LLC is a wholly-owned subsidiary of Black & Veatch Holding Company and focuses exclusively on the utility sector. We provide a comprehensive suite of integrated strategic and financial, infrastructure modernization and customer technology solutions for water, wastewater, stormwater, power, oil and gas and renewables utility sectors. Our seasoned subject matter specialists and consultants combine in-depth industry expertise, advanced analytics and first-hand practical business experience with extensive technology and engineering capabilities to deliver holistic solutions that work best for utility operations, organization, assets, fiscal resilience and customers.

Survey Design

This Stormwater Utility Survey Report was conducted online within the United States, during August and September 2020. Consistent with our previous surveys, the type of questions we included in the survey reflect the following six topic areas:

SECTION 1 ORGANIZATIONAL INFORMATION

Provides a general profile of the respondents including population, size and characteristics of the service area.

SECTION 2 PLANNING

Provides respondents' perspectives on the most important stormwater management issues and stormwater infrastructure investment drivers. This section also highlights utility governance, the types of permit requirements that utilities comply with and the types of planning utilities engage in to address stormwater management. In this survey, we added a new question to understand the prevalence of public-private partnerships in the provision of stormwater management services.

SECTION 3 FINANCING AND ACCOUNTING

Includes information that respondents shared on stormwater utility revenues, expenditures, sources of funding and the adequacy of stormwater funding to meet utility obligations.

SECTION 4 STORMWATER RATE STRUCTURE AND BILLING

Presents the types of costs recovered through user fees, the fee methodology used in setting rates, the rate structures and the average monthly residential charge of each utility that participated in the survey. Information on the types of exemptions and discounts that utilities offer and insights on legal challenges are also provided. Calculated bills reflect rates in effect as of July 1, 2020. This year, we expanded the questions on rate structure to include non-residential rate structures.

SECTION 5 STORMWATER CREDITS AND INCENTIVES

Offers insights into the types of credits, criteria used in offering credits and any innovative credit programs.

SECTION 6 PUBLIC INFORMATION AND EDUCATION

Assesses the methods of education and multi-media sources used in educating and disseminating information.

Stormwater Roundtable

As part of this Stormwater Utility Survey initiative, the Black & Veatch survey team hosted a roundtable discussion with a panel of three utilities that participated in the survey. We gratefully acknowledge the participation of the City of Bremerton, Washington; City of Fort Collins, Colorado; and City of Raleigh, North Carolina.

The objective of the roundtable session was to have an in-depth discussion specifically on the funding and stakeholder support challenges that utilities have to plan for and manage. The panelists engaged in a robust discussion and shared their real-world perspectives on the following five topics:

Benefits of User Fee Funding

Capital Program Financing

Stakeholder Engagement

Customer Affordability

Covid-19 Pandemic Response

The round table discussion is presented as a feature article in this survey report in the section titled, “The Roundtable: The Practitioners’ Perspectives on Stormwater Utility Management.”

Prabha Kumar

Ms. Kumar is a Managing Director with Black & Veatch and is a national practice lead for stormwater utility consulting services. With over 21 years of experience, she specializes in providing the “concept to launch” suite of stormwater utility development and implementation services. Ms. Kumar’s comprehensive utility consulting expertise includes strategic advisory services, financial planning, cost of service and rate design studies, wholesale pricing studies and expert witness services in utility rate cases and litigation matters. Ms. Kumar served in the Environment Finance Advisory Board’s Stormwater Financing Task Force and is a member of NACWA’s Stormwater Management Committee.

Anna White

Ms. White is a Principal Consultant in Black & Veatch and has served as a Project Manager on projects involving the cost of service and rate determination, revenue bond determination and financial reviews of operations for water, wastewater and stormwater utilities in the public sector. Her economics background and experience with computer modeling and software applications have been utilized in developing financial analyses of municipal water and wastewater utilities.

Brian Merritt

Mr. Merritt, a Manager with Black & Veatch has over 18 years of experience in the engineering and consulting industry. With a background in civil engineering and extensive stormwater management expertise, Mr. Merritt understands the balance needed in communicating technical engineering topics and financial needs to the general public and building broader support for program change. Mr. Merritt has aided communities ranging in population size from 10,000 to 1.56 million in addressing their stormwater management and funding needs.

The background of the page is a dark, semi-transparent overlay of a report document. The report contains various data visualizations, including a bar chart at the top left, a line graph in the center, and a pie chart at the bottom right. The text 'Report Highlights' is overlaid in white on the left side of the report. A thin orange horizontal line is positioned below the text.

Report Highlights

Profile Of Respondents

A total of 73 participants from 20 states completed the online survey.

- Seventy-two participants fund stormwater management in whole or in part through stormwater user fees and one participant funds its stormwater program through a stormwater millage fee.
- This year's participants include 23 first time participants and 50 repeat participants.
- Ninety-seven percent (97%) of the respondents serve a city, rather than a county or a region.

In this survey, we had higher participation from smaller utilities (utilities with fewer than 25,000 customer accounts).

Figure 1 presents the distribution of the participants based on the number of accounts the utilities reported.

Figure 2 presents the general profile of the survey participants.

Figure 3 presents the number of participants by state.

Figure 4 presents the number of participants by Environmental Protection Agency (EPA) region.

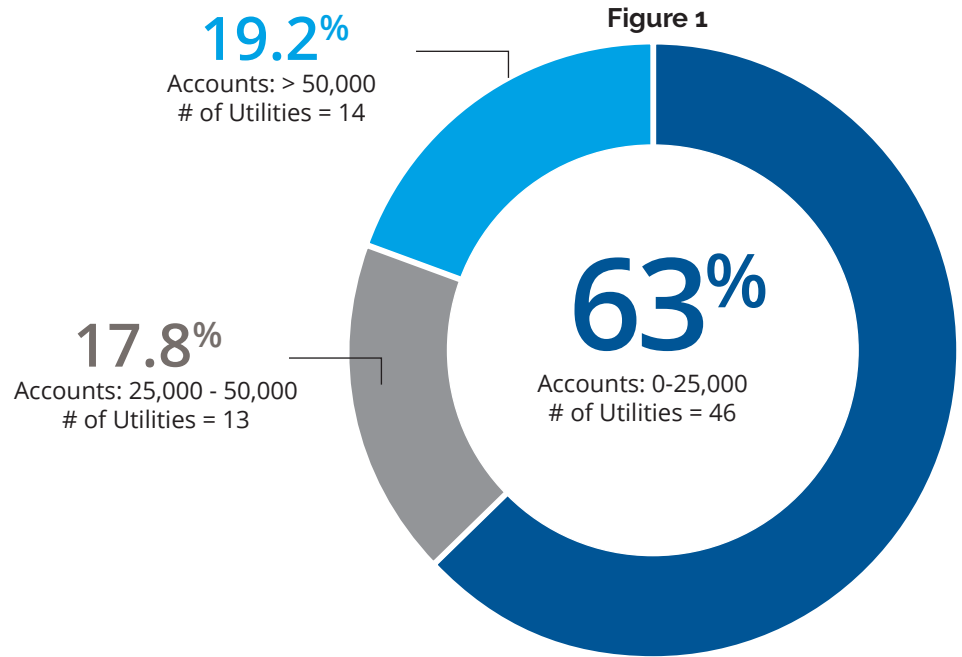

Figure 2

Characteristics	Median	Range
Population Served	46,000 people	86 – 1,584,000 people
Number of Accounts	14,000 accounts	41 – 552,400 accounts
Single Family Residential Gross Area (Lot Size)	8,599 sq ft of the total parcel area	2,074 – 22,000 sq ft of the total parcel area
Single Family Residential Impervious Area	2,629 sq ft of impervious area	910 – 13,000 sq ft of impervious area

The Roundtable: The Practitioners' Perspectives on Stormwater Utility Management

The Roundtable: The Practitioners' Perspectives on Stormwater Utility Management

Overview

Stormwater funding continues to pose a persistent challenge to communities of all sizes in the United States and it directly impacts program operations, regulatory compliance, infrastructure management, flooding resilience and overall quality of life and safety of communities. Even with funding needs increasing, many municipalities still find it hard to garner support for establishing a stormwater user fee funding program. Further, the advent of the COVID-19 pandemic in 2020 has added a stress test on most utilities in the nation. We also continue to find in our biennial surveys of municipalities, with a dedicated user fee funding mechanism, that there are differences in how those utilities plan for and manage aspects such as capital program financing, affordability concerns and stakeholder engagement.

To gain firsthand insights on these specific aspects by giving direct voice to stormwater utility practitioners, this year, the Black & Veatch Stormwater Survey Team hosted a roundtable with three Stormwater Utility Program Managers. This section presents a summary of the perspectives our panelists shared.

We express our deep appreciation to the three panelists for their interest in participating in the round table and sharing their perspectives on their stormwater utilities.

Scott Bryant, PE
**Stormwater Administrator/
Planning and Business Operations**

Engineering Services Department
City of Raleigh, North Carolina

Chance Berthiaume, CPMSM
Stormwater Permit Coordinator

Public Works and Utilities
City of Bremerton, Washington

Kenneth C. Sampley, PE
**Director, Stormwater Water
Wastewater Engineering**

Utilities
City of Fort Collins, Colorado

Editor's Note: We have edited the roundtable discussion for both length and clarity.

Panel Discussion

You all have a stormwater user fee program that has been in place for well over five years. Can each of you share some specific benefits this user fee funding mechanism has provided, to your community's stormwater management?

All three panelists confirmed that user fee funding has provided their utilities the following key benefits – (i) a dedicated and equitable source of revenues for stormwater management; (ii) their stormwater utility does not have to compete with the General Fund for funding; (iii) user fee funding has enabled them to grow their stormwater management program, with enhanced resources and implement a wide array of programs including stream rehabilitation, storm sewer maintenance, total maximum daily load (TMDL) permit requirements and state nutrient program requirements.

With respect to capital program funding, since the inception of the user fee, the utilities have been able to accomplish major capital improvements. Mr. Bryant indicated that Raleigh, North Carolina has spent over \$100 million specifically in pay-as-you-go funding for capital improvements, which was not available to them prior to establishing the user fee program. Mr. Sampley, Fort Collins, Colorado has been able to invest approximately \$120 million in the design and construction of stormwater infrastructure in the last 20 years. In Bremerton, Washington where many of the pipes are over 100 years old, Mr. Berthiaume indicated that they have been able to replace substandard mains, fund environmental restoration projects and fund a portion of the \$55 million investments in sewer separation in their combined sewer system.

Each of these three featured municipalities have user fees established.

Fort Collins, Colorado: 1980

Raleigh, North Carolina: 2004

Bremerton, Washington: 1994

On this key topic of the benefits of user fee funding, the panelists also shared some notable insights.

Mr. Bryant: “We in Raleigh have been able to focus on stormwater asset management

and are taking it to the next level in terms of managing assets and stormwater. We have also been able to develop focused programs for prioritized drainage assistance in neighborhoods where people live, work and play. One keynote, by having that utility funding, we’ve also been able to pursue external grants and other sources of outside funding with matching funds coming from the local stormwater utility.”

Mr. Berthiaume: “In our utility, I’m able to direct funding into not only the operation

and maintenance, but also environmental restoration. We are upsizing our stormwater system to meet our new design criteria, examining climate change, and transitioning to a 100-year storm event capacity for sizing our new pipes.”

Mr. Sampley: “What’s nice about our predictable user fee funding revenue source

is that we have less volatility and are more adaptable to changing work conditions. In addition to major CIP investments, we are able to spend approximately \$1.3 million on annual minor system (small) stormwater maintenance, and invest in the upgrades, maintenance and monitoring of our flood warning system.”

Black & Veatch: We have consistently found that stormwater utilities lean more heavily on cash financing of a capital program than debt financing. What practices and/or policies is your utility using with respect to capital program financing?

All three panelists indicated that their utilities do not have any specific written and approved policies on stormwater capital program financing. The utilities use different approaches and practices to effectively fund their respective capital programs.

Fort Collins, Colorado has historically used a combination of cash and debt financing for stormwater infrastructure. Typically, the utility has issued revenue bonds in a manner that supports and maintains the credit rating of the stormwater utility at AA+ rating. The debt service is part of the utility's \$18 million annual funding. In addition, the utility leverages pre-disaster mitigation Federal Emergency Management Agency grants and has received public assistance grants to respond to flooding emergencies, such as the 2013 flood. Generally, two-thirds of the capital improvement program (CIP) expenditures are on flood control and the remaining one-third is spent on inadequate public stormwater infrastructure in communities and on stream rehabilitation.

Bremerton, Washington relies primarily on cash financing for its capital investments. However, it classifies its CIP into three categories, namely, priority substandard pipe replacements that pose a risk of imminent failure, water quality retrofits to meet TMDL and permit compliance requirements and stream restoration related to fish habitat. By doing so, the utility can effectively leverage grant funding, when feasible, from the State Department of Ecology for water quality-oriented stormwater treatment/retrofit projects and Salmon Recovery Grant Funding for fish habitat restoration projects. Though it doesn't have a written financial policy, the utility strives to maintain 15% to 20% of its annual CIP budget in its capital reserve. As part of its 20-year capital program planning, the utility is looking to define some capital program financing policies.

Raleigh, North Carolina has leaned heavily on pay-as-you-go financing for its capital program, since the inception of the user fee in 2004. However, as part of its 10-year long-term capital financing program, the utility is likely to include a mix of pay-as-you-go and debt financing. Overall, the utility strives to maintain 25% of its annual stormwater budget as its fund balance. Approximately two-thirds of the capital investments go toward conveyance and related system improvements to reduce flooding hazards and the remaining one-third of the spending goes to water quality-related, stream stabilization/restoration and green infrastructure projects.

On this issue of capital program financing, the panelists also shared some additional insights.

Mr. Bryant: “With respect to capital financing, spreading some of the capital improvements costs over time in the form of debt financing would be beneficial, as the community would realize the benefits from those capital improvements over time. So, we do anticipate having some debt financing as appropriate in the future as part of our balanced CIP funding strategy.”

Mr. Berthiaume: “For a cost-effective capital program, we coordinate our water, sewer and stormwater utility upgrades with a lot of street redevelopment projects, so that everything is addressed at the same time. It complicates project execution, but we set aside a budget in our stormwater utility to support these types of capital needs whenever these projects happen in certain parts of the town.”

Mr. Sampley: “We have a 25-year CIP based on identified capital project needs and we strive to balance debt financing with cash financing to maintain modest annual rate adjustments with a realistic construction schedule. Just like water utilities do, it is important to have a debt financing component as part of the CIP funding mix. However, you have to also have enough flexibility to address emergencies and capital needs that arise and so it is important to have a percentage of your capital funding that is cash financed.”

What specific strategies have you found to be particularly effective in engaging with your citizens and decision makers?

The key takeaway from the panelists on the issue of effective engagement with rate payers and decision makers was that public and customer outreach is not an “afterthought” but an integral part of their Stormwater Management Program. The panelists indicated that direct work sessions with their respective city council leadership have helped them garner strong leadership support. Proactive, multi-channel communication through consistent and updated information channels like websites and social media are important. Direct customer communications through bill inserts and emails can also help create an effective, consistent and timely method to deliver information to seek community feedback.

The participants also shared about some of their engagement in unique outreach efforts.

Mr. Bryant: “We are very thankful for our dedicated and very engaged Stormwater

Management Advisory Committee, which was appointed by the City Council. They provide tremendous feedback to us at the staff level and also serve as a liaison for the City Council and the community. We also engage in floodplain outreach partnering and other programs. For example, we use utility bill inserts to advertise our “Raleigh Rainwater Rewards Program,” which has been extremely successful. Another way we interact with our customers is by seeking their feedback on our water quality protection programs. We also focus on addressing promptly customer “drainage requests” on water quantity and quality concerns and consider those issues in our capital project prioritization. All these efforts help lead to fostering community support for our program.”

Mr. Barthiaume: “We provide summary project reports to City Council, which they

then use to communicate with their district constituents and this serves as a wonderful way to get information out on our stormwater efforts. We also coordinate with the Stormwater Outreach Group in the Kitsap Peninsula and this way we share resources with other communities such as Seattle, Bellevue and Kirkland and send out common messages to the public on stormwater issues in Puget Sound. The online customer survey tool also enables us to interface effectively with our customers to obtain their input on issues and respond to their inquiries.”

Mr. Sampley: “We use messages with fewer words and engaging images in our outreach

through the “Bus Benches Program.” These are strategically located across the City in locations where potential flooding may occur. We find these are a key educational component for our program. The utility garnered the support of commercial customers through the Utilities’ One Planet Program where the program provides hands-on tours of facilities to foster an understanding of the City’s sustainability aspects and stormwater mitigation planning. Further, the utility also leverages schools to disseminate information to students who then raise awareness with parents. The key to fostering project support among decision makers is for them to understand what engagement initiatives have been used with their constituents.”

Affordability is often a major concern not only for residential properties but also for non-residential properties, especially in the case of impervious area-based stormwater user fees. How is your utility planning for and/or actively addressing that issue?

The panelists opined that affordability will continue to be an issue as the program needs increase. However, to balance funding needs and affordability, their utilities strive for modest gradual annual increases rather than large increases and regularly benchmark their rates with that of their neighbors. All three panelists also indicated balancing their capital program and other funding needs to keep their stormwater rates at reasonable levels.

The panelists also indicated using various approaches to address affordability:

Mr. Bryant: "Raleigh stormwater has a Drainage Assistance Program, which is 100% city-funded and it supports customers' stormwater improvement needs based on priorities. The Raleigh Rainwater Rewards Program and the stormwater fee credits program provide some additional mechanisms for offering assistance for improvements or providing fee reduction. The City also offers a utility payment assistance program."

Mr. Berthiaume: "Bremerton also has a Rain Garden Program that offers up to \$3,000 assistance per residential property for onsite stormwater management. In addition to balancing CIP, leveraging grant funding whenever feasible helps with affordability and helps take the edge off on non-residential customer impact."

Mr. Sampley: "Allowing financial metrics to drive rates helps provide predictability and understanding. Planning a balanced 25-year CIP schedule and following it along with debt financing, enables the utility to mitigate large rate increases. Other key mechanisms such as discounts for residential properties with large lot sizes and having a policy where all properties are charged for stormwater without exemptions promotes equity."

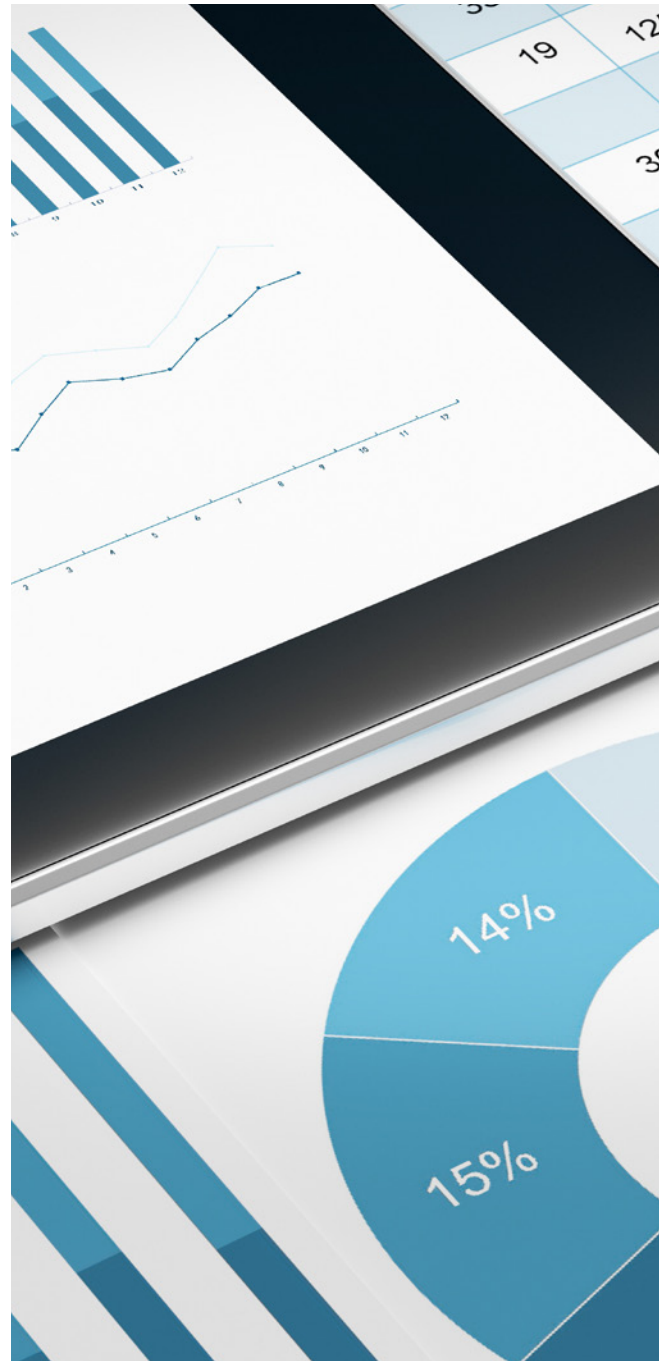

The COVID-19 pandemic continues to test the resiliency of utilities. Can you share insights on what worked well for pandemic response and what areas you feel you'd need to address to enhance pandemic response?

The participants acknowledged that they had to develop adaptive approaches in terms of policies and practices to manage the new normal of continuing service delivery during the pandemic. Another common perspective they expressed was that while the initial transition was a little difficult, once protocols and policies were defined, their utilities transitioned well to continue their operations. All three utilities experienced an increase in overall workforce productivity because of a combination of these factors:

- Effective adherence to safety protocols,
- Minimization of travel time,
- Enhanced use of technology in their day-to-day operations; and
- Virtual meetings and collaboration.

The panelists also shared about their engagement in specific actions.

Mr. Bryant: “The need to function virtually helped the team be more “intentional in communication” and learn technologies they had not used before. For instance, software tools were put to effective use in electronic contracting, project management and in gathering public input through online surveys. The City was able to garner a larger attendance online for Stormwater Management Advisory Commission meetings and was able to conduct a virtual town style meeting for floodplain management.”

Mr. Berthiaume: “Public works developed a pandemic response plan based on the City Mayor’s guidelines. With a single point of accountability in executing the plan and through effective monitoring of the plan and management of supplies, the City experienced just one incident of COVID-19. The City’s focus was on training the workforce in adapting to the pandemic plan. Virtual meetings provided the flexibility to attend regional meetings more efficiently.”

Mr. Sampley: “The City invoked an incident command structure (ICS) that is typically used for emergency response. However, the protocols defined in the ICS did not work that well in the context of the pandemic and were revised. Having a web-based work order management system with applications on tablets helped crews continue field operations. The development review team was able to continue their tasks effectively virtually. A key lesson from the pandemic is the need to reconfigure the work environment to increase efficiency and time management. Future issues and challenges include evolving work environments with a mix of office and home staffing a “blurring” of work-life balance, use of computers, communications and supplies.”

Summary

As the discussion highlights, there are differences among the three utilities concerning the capital program planning process, debt versus cash financing and the types of customer incentives and assistance the utilities provide. However, a key perspective that all three panelists shared is that garnering stakeholder support for sustaining user fee funding requires a continuously evolving proactive effort. Best practices help include prudent long-term capital program planning, proactive collaboration with and the education of decision makers and balancing of planned and modest rate increases while implementing quality stormwater services and improvements for their communities.

Section 1

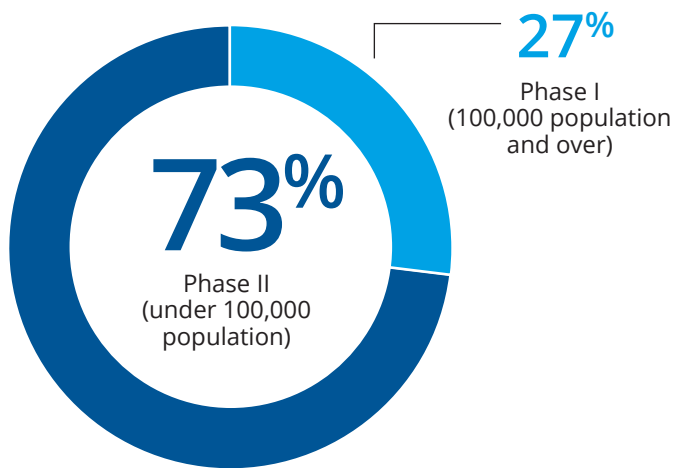

Organizational Information

Organizational Information

In the United States, according to the EPA, there are 855 Phase I MS4s and 6,695 Phase II MS4s that include numerous cities and counties subject to MS4* discharge regulations.¹

However, as validated again in this year's survey, user fee funded utilities continue to be prevalent in municipalities served by cities as opposed to counties or multi-jurisdictional authorities. Out of a total of 73 respondents, 71 had stormwater responsibilities within city jurisdiction. When compared with our previous surveys, this year a significant number of respondents (73%) were from smaller Phase II MS4 communities. Out of the 13 respondents that have a service area that included both a combined sewer system (CSS) and an MS4, nine indicated they are under a consent order for combined sewer overflows (CSOs) and four also had a consent order for MS4 requirements.

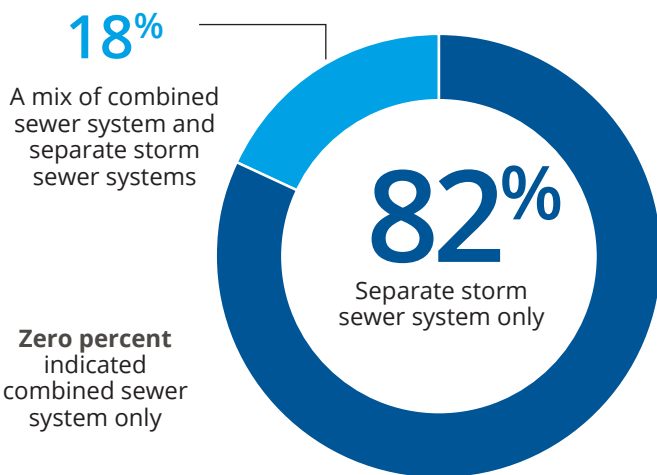

1. From an MS4 permitting perspective, are you classified as: (Select one)

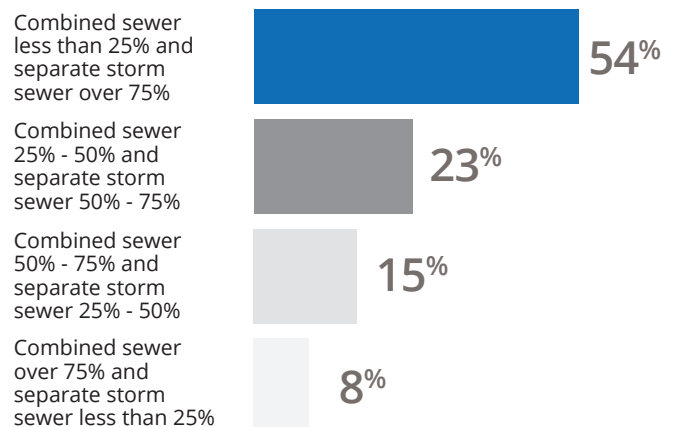

2. What jurisdictional area is your stormwater utility responsible for? (Select one)

3. What type of system is your utility served by? (Select one)

4. If you selected "Mix of combined sewer system and separate storm sewer systems" in Question 3, please indicate the percentage of combined sewer versus separate storm sewer system that exists within your jurisdiction.

* Municipal Separate Storm Sewer System
¹<https://www.epa.gov/npdes/stormwater-discharges-municipal-sources>

Percentage based on the number of utilities that selected "Mix of Combined Sewer System and Separate Storm Sewer Systems" in the previous question.

5. If you selected “Mix of combined sewer system and separate storm sewer systems” or “Combined sewer system” in question 3, which of the following best describes the wastewater treatment services within your jurisdiction?

Percentage based on the number of utilities that selected “Mix of combined sewer system and separate storm sewer systems” or “Combined sewer system” in Q3.

6. Is your utility under any type of consent order decree or agreement for combined sewer overflow (CSO) issues?

Percentage based on the number of utilities that selected “Mix of combined sewer system and separate storm sewer systems” or “Combined sewer system” in Q3.

7. Is your utility under any type of consent order decree or agreement for MS4 compliance issues?

Percentage based on the number of utilities that selected “Mix of combined sewer system and separate storm sewer systems” or “Combined sewer system” in Q3.

Section 2
Planning

Planning

Actionable plans with measurable outcomes are a catalyst to transform innovative ideas to successful realities.

Over the last eight years, our survey respondents have consistently indicated funding adequacy, aging infrastructure, public awareness, increasing regulations and nutrient/TMDL requirements as part of the top five ranked challenges. For the first time, respondents in this survey have ranked Workforce Development and Succession Planning as part of the top five ranked issues. It is an important recognition that utilities consider workforce development as vital to effective stormwater management.

In respect to planning, the survey results indicate an interesting difference between the larger MS4 Phase I group of utilities and the smaller MS4 Phase II group of utilities.

Over 73% of the respondents in each of these two groups indicated aging infrastructure as one of the two highest ranked stormwater management issues. However, while 63% of the respondents in the MS4 Phase I group indicated having a stormwater asset management plan, only 35% of the respondents in the MS4 Phase II group had a stormwater asset management plan. Similarly, only 29% of these MS4 Phase II groups indicated having an emergency response plan.

Smaller utilities must adopt standard asset management best practices to effectively manage aging infrastructure. Such an approach will not only help the utility leaders make a compelling case for increased funding but also help maximize the value of their capital investments by targeting it toward critical and prioritized capital projects. The recent pandemic further highlights the criticality of having emergency response plans to be agile and efficient in handling emergencies.

8. Please indicate how your current stormwater management operations (excluding street sweeping) are performed. (Select one)

9. What regulatory permit requirements do you currently have to comply with? (Select all that apply)

Percentage based on the number of utilities that indicated they have some type of permit.

10. What types of plans has your utility developed? (Select all that apply)

11. Please rank the issues listed below in order of importance for enhancing your utility's stormwater management. (1 = Least important; 5 = Most important)

12. Please rank how strongly the following issues drive capital program prioritization and the level of annual capital spending decisions within your stormwater utility. (1 = Very weak; 5 = Very strong)

13. Have you entered into any public-private partnership agreements for the provision of the following public utility services? (Select all that apply)

Section 3

Financing and Accounting

Financing and Accounting

Revenue certainty with dedicated user fee funding mechanisms helped utilities expand their stormwater management services, augment resources and alleviate the need to compete with other general fund supported priorities, as seen first-hand by the utility leaders that participated in the featured stormwater roundtable discussion.

While user fee funding can provide the revenue stability that utilities seek, rates need to be updated in a timely manner to fully align with a utility's forecasted revenue requirements. Funding adequacy continues to be a key challenge as nearly one-third (31%) of the respondents indicate that funding that they currently generate is inadequate to meet both their O&M and capital revenue requirements and 42% indicate that they can cover all of their O&M, but only limited levels of capital needs.

It should be noted that the mix of utilities that responded to this survey is different than our 2018 survey. However, the maximum revenue per capita reported in this survey is consistent with what we found in the 2018 survey. In this year's survey, we posed a new question to understand what activities utilities would focus on if they had adequate funding. Sixty percent (60%) of the respondents indicated proactive repair and rehabilitation, water quality improvements and developing resiliency measures to mitigate flooding as the three key potential areas of focus. The percent of utilities (22%) that reported using debt financing to fund capital improvements is higher than what we have seen in the previous three surveys.

14. What is the total annual stormwater revenue generated per capita by your stormwater utility (in dollars)?

*Indian Creek Village, with the lowest population among the respondents (86 residents), has a much higher revenue per capita than the maximum indicated.

Note: The mix of utilities is not the same for each survey.

The success of each utility's stormwater management plan is dependent upon a stable, certain and dedicated funding stream.

15. Please provide the approximate percent of revenue that your utility receives from each source listed.

	Over 75%	50% - 75%	25% - 50%	Less than 25%
Stormwater user fees	95%	3%	1%	1%
Stormwater impact fees	0%	0%	8%	92%
Miscellaneous stormwater fees	0%	0%	8%	92%
Taxes	25%	0%	25%	50%
Grants	0%	0%	0%	100%
Other	15%	0%	0%	85%

16. From the list below, please select all the stormwater management activities that you include in your annual O&M budget. (Select all that apply)

Description	Stormwater Utility Budget
1. Stream/habitat rehabilitation	91%
2. Water quality monitoring	85%
3. Public education	92%
4. Street sweeping	66%
5. Inlets/outfalls maintenance	83%
6. Combined sewer conveyance maintenance	66%
7. Separate storm sewer conveyance maintenance	90%
8. BMP inspections/maintenance (publicly owned BMPs)	92%
9. BMP Inspections/maintenance (In privately owned BMPs)	90%
10. Illicit discharge detection and elimination (IDDE) programs	96%
11. Erosion and sediment control	91%
12. Construction and/or post-construction monitoring	83%
13. Planning and engineering	83%
14. Rehabilitation and replacement	82%
15. Other	50%

Percentage based on the number of utilities that indicated the activity is included in their annual budget.

17. Please provide an approximate percentage of funding from each source used to finance your utility's stormwater capital improvement program.

	2014	2016	2018	2020
Majority cash financed	85%	88%	87%	78%
Majority debt financed	15%	12%	13%	22%

Note: The mix of utilities is not the same for each survey.

18. Please provide an approximate percentage of funding from one or more of the following sources that are used to finance your utility's stormwater capital improvement program.

Majority Financed	22%	Majority Cash Financed	78%
General obligation (GO) bonds	18%	Stormwater user fees	84%
Wastewater or stormwater revenue bonds	11%	Grants	26%
Other debt	8%	Other cash	8%
Combined stormwater/other bonds	5%	Permitting and other fees	7%
Sales tax bonds	0%	New development impact fees	7%
Benefit district bonds	0%	Ad valorem taxes	3%
		Sales taxes	1%
		Special assessments districts	1%

Percentage based on the number of utilities that responded to the question.

19. How would you rate your utility's stormwater funding to meet the utility's needs? (Select one)

20. If you had adequate funding, what types of O&M activities and/or capital projects would you pursue?

21. Does your state have enabling legislation that authorizes municipalities to charge a stormwater user fee?

Percentage based on the number of utilities that responded to the question.

22. Does your state have enabling legislation that authorizes independent public utilities such as authorities, boards, and sewerage commissions/districts to charge a stormwater user fee?

Percentage based on the number of utilities that responded to the question.

23. What is the governing authority that approves your stormwater user fee rates and/or stormwater millage fee? (Select all that apply)

Zero percent indicated public utilities commission (PUC)

Percentage based on the number of utilities that responded to the question.

Section 4

Stormwater Rate Structure and Billing

Stormwater Rate Structure and Billing

The median average monthly single-family residential charge continues to increase relative to our previous biennial surveys, with the charge increasing to \$6.08 from the \$5.71 that we reported in our 2018 stormwater survey.

Overall, the response results on many of the rate structure and billing parameters are fairly consistent with that of the previous two surveys. For instance, the median gross area and impervious area that utilities have reported over the last four surveys have remained within 7,800 to 8,600 sq ft and 2,300 to 2,700 sq ft, respectively. Similarly, a majority of the respondents (68%) indicated that they do not offer any customer assistance or discount programs. While 87% of the respondents indicate using the impervious area as the basis for determining stormwater charges, 54% of the utilities indicate they do not have any defined protocol to update and maintain the billing data that supports stormwater billing. As land use and parcel attributes are dynamic and subject to changes, it would be worthwhile for utilities to establish best practice data management for effective revenue generation and equitable billing.

As affordability is becoming an increasingly critical issue in the water and sewer sector, in this survey, we included a question on affordability. Sixty-eight percent (68%) of the respondents of the respondents indicated that their customers perceive the stormwater charges to be affordable and 17% indicated that they do not know how their customers perceive the charges.

24. Please indicate the year in which you last increased your stormwater user fee.

25. How have your stormwater user fees increased in the last five years? (Select One)

26. What type of rate increase is your utility able to obtain from the approving body? (Select One)

27. Is your stormwater user fee based on some form of parcel area such as gross and/or impervious area?

28. What is the basis for calculating your parcel area based stormwater user fees? If a combination of methods is used, please check all applicable methods.

Note: The mix of utilities is not the same for each survey.

29. If your fee is based on impervious area, what is the basis for calculating the impervious area? (Select all that apply)

30. What type of rate structure does your utility have for the family residential parcels? (Select all that apply)

31. What is your utility's average single family residential parcel square footage? (Includes attached residential up to four dwelling units)

Average Gross Area (sq ft)	2014	2016	2018	2020
Minimum	2,105	2,266	2,480	2,074
Maximum	22,500	20,000	43,560	22,000
Median	8,000	8,000	7,801	8,599

Average Impervious Area (sq ft)	2014	2016	2018	2020
Minimum	794	786	910	910
Maximum	7,500	5,000	5,700	13,000
Median	2,368	2,550	2,618	2,629

Note: The mix of utilities is not the same for each survey.

32. What is your average monthly residential stormwater fee?

33. If you have a tiered residential rate structure, please indicate the total number of tiers.

Zero percent indicated 6 or more tiers

Percentage based on the number of utilities that indicated they had tiered rates in Q31.

34. If you have a tiered residential rate structure, what is the basis of the tiers? (Select one)

Percentage based on the number of utilities that indicated they had tiered rates in Q30.

35. What type of rate structure does your utility have for the non-residential parcels? (Select all that apply)

Percentage based on the number of utilities that responded to the question.

36. If you have a tiered non-residential rate structure, please indicate the total number of tiers.

Zero percent indicated 3 tiers

Percentage based on the number of utilities that indicated they had tiered rates in Q35.

37. If you have a tiered non-residential rate structure, what is the basis of the tiers? (Select one)

Zero percent indicated gross area tiers only and tiers for impervious area and gross area

Percentage based on the number of utilities that indicated they had tiered rates in Q35.

38. Does your stormwater rate structure include a separate billing, collection or service charge?

Note: The mix of utilities is not the same for each survey.

39. In your stormwater rate structure, do you have rates that differ by service area, zone or watersheds?

40. Are one-time impact or capital recovery fees applied to new stormwater utility customers or new development?

41. How frequently does your utility update customer parcel information, such as customer classes and gross and impervious areas specific to stormwater billing? (Select one)

Zero percent indicated Semi-annual

42. Which of the following systems do you use to process and maintain gross and impervious area billing units, specific to stormwater billing? (Select all that apply)

Zero percent indicated Other

43. How are the stormwater user fees billed? (Select one)

Percentage based on the number of utilities that responded to the question.

44. From an affordability perspective, how do your residential customers perceive your stormwater fee?

Zero percent indicated Not at All Affordable

45. Does your utility offer any customer assistance for stormwater fees, such as discounts or other fee assistance? Stormwater discounts are not the same as stormwater credits, incentives, or exemptions. (Select all that apply)

Zero percent indicated Land Bank Properties and Community Gardens

46. How do you fund customer assistance programs (discounts or other assistance)?

Zero percent indicated Private funding

47. Are any of the following types or classes of properties exempt from stormwater user fees? For each item you select, please also indicate if that specific exemption is based on utility policy and/or authorized by state enabling legislation. (Select all that apply)

Percentage based on the number of utilities that responded to the question.

48. How are payments enforced? (Select all that apply)

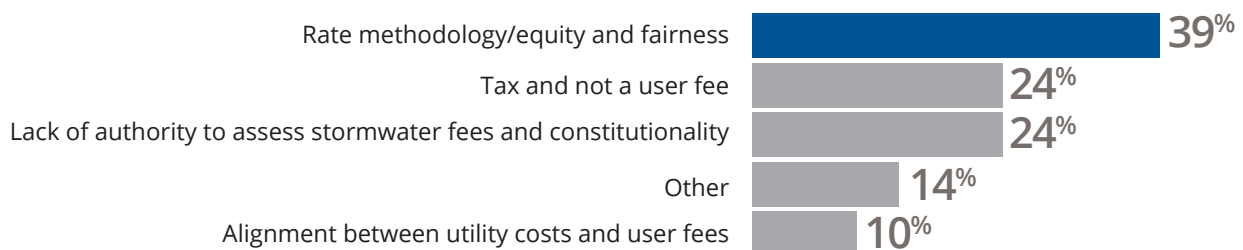

49. Has your utility's stormwater user fees ever faced a legal challenge?

50. Please indicate the customer/class that challenged your stormwater user fee (Select all that apply)

51. What was the basis of the challenge? (Select all that apply)

Section 5

Stormwater Credits and Incentives

Stormwater Credits and Incentives

The complex interplay of benefits and challenges, inherent in designing and implementing a stormwater credits and incentives program, influences the objectives, policies and technical criteria that stormwater utility leaders define when establishing the program.

Stormwater credits and incentives program can be defined to meaningfully balance diverse objectives of fostering the perception of equity, offering voluntary fee reduction options, incentivizing private stormwater management and minimizing revenue impact. As the survey results indicate, the percentage of survey respondents that offer credits has been fairly steady at just over 50% since our 2016 survey. While incentives in the form of monetary grants are less prevalent, utilities are more inclined to offer incentives in the form of cost sharing options and design consulting assistance to private property owners that are interested in pursuing onsite stormwater management practices.

52. Does your utility have a stormwater credit program?

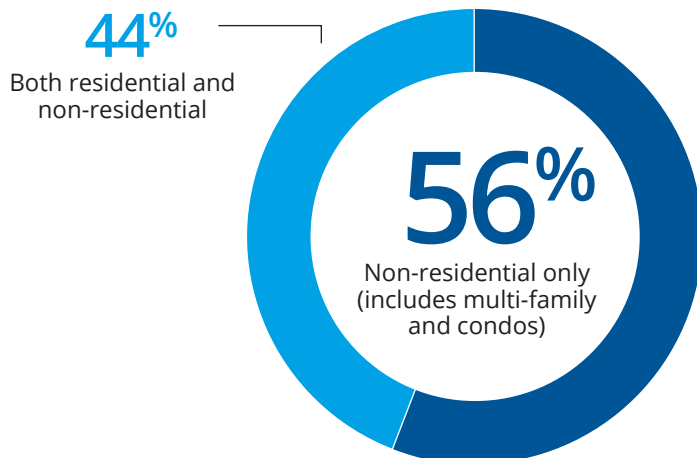

Note: The mix of utilities is not the same for each survey.

53. Currently, what percentage of your utility's total stormwater parcels receive credits?

54. Please indicate the classes of parcels that are offered stormwater credits. (Select one)

55. Please indicate the maximum allowable credit that you allow for each of the following stormwater management actions.

MAXIMUM ALLOWANCE CREDIT	Over 75%	50% - 75%	25% - 50%	Less Than 25%
Types of Credits	Percent of Respondents			
Volume reduction	28%	39%	22%	11%
Peak flow reduction	13%	13%	37%	37%
Water quality control	15%	23%	47%	15%
NPDES permit compliance	0%	17%	33%	50%
Education	0%	14%	43%	43%
Direct discharge to a surface water body (without using a municipal stormwater system)	43%	28%	0%	29%
Good housekeeping practices (sweeping, oil separation)	0%	33%	0%	67%
Undeveloped/zero discharge	80%	20%	0%	0%
Other	17%	33%	17%	33%

56. Is there a maximum total credit that is offered?

57. Do you offer credits for direct surface discharge to a water body?

58. What is the maximum stormwater fee reduction?

Maximum Stormwater Credit	Over 75%	50% - 75%	25% - 50%	Less Than 25%
Percent of respondents	27%	43%	23%	7%

59. Do you offer any of the following incentive programs? (Select all that apply)

Section 6

Public Information and Education

Public Information and Education

Enhancing the awareness of stormwater needs, community benefits and the concept of stormwater user fee funding is essential to garner and sustain rate payer support.

We continue to assess the communication trend in terms of what channels of communication utility leaders deem more effective in securing stakeholder support. For the first time, respondents have ranked the stormwater utility website as the most effective channel followed by the distribution of print media and community presentations. These top three ranked channels of communication could imply that utility leaders are beginning to find “targeted communication” through both newsletters, brochures and social media to be more effective than the more generic print, digital media, bill inserts and public meetings. These technology driven channels could also prove to be more effective as stakeholders gravitate more toward “on-demand” consumption of information and prefer ready access to information.

60. Please rank the effectiveness of the specific activities you have undertaken to secure stakeholder approval and support for stormwater user fees. (1 = Least Effective, 5 = Most Effective)

Black & Veatch's Comprehensive Stormwater Services

Black & Veatch's multi-disciplinary team of specialists provides an integrated suite of stormwater services that encompass the technical, financial, management, technology and stakeholder aspects. With our nationwide experience, innovative practices and partnerships, rigorous methods and tools, we assist municipalities large and small in establishing a stronger "nexus" among four key components – Program Needs, Reliable Cost Projections, User Fee Funding and Customer Benefits.

Program and Operations

- Program Management
- Program Visioning
- Organizational and Management Reviews
- Level of Service Evaluations
- O&M Plans
- Regulatory Compliance Support

Dear Secretary Chiavetta:

On behalf of The School District of Pittsburgh, enclosed please find the Surrebuttal Testimony and Exhibits of Michael J. McNamara and Theodore J. Dwyer, PhD, labeled School District Statement No. 1-SR, and the Surrebuttal Testimony and Exhibits of Eric M. Callocchia, labeled as School District Statement No. 2-SR in the above-referenced proceedings.

This document is being served as indicated in the attached Certificate of Service.

Very truly yours,

Alan M. Seltzer, Esquire

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 **I. INTRODUCTION AND PURPOSE**

2 **Q. Please state your name and business address.**

3 A. My name is Michael J. McNamara, and my business address is 1305 Muriel Street,
4 Pittsburgh, PA 15203.

5
6 **Q. Have you testified previously in this proceeding?**

7 A. Yes. I previously submitted Direct Testimony on behalf of the School District of
8 Pittsburgh, which is School District Statement No. 1. Any undefined and capitalized terms
9 used in this Surrebuttal Testimony have the same definitions contained in my previously
10 submitted Direct Testimony.

11
12 **Q. Please state your name and business address.**

13 A. My name is Theodore J. Dwyer, and my business address is 341 S. Bellefield Avenue,
14 Pittsburgh, PA 15213.

15
16 **Q. By whom are you employed and in what capacity?**

17 A. I am employed by the School District of Pittsburgh as the Chief Accountability Officer,
18 Data, Research, Evaluation and Assessment Division.

19
20 **Q. Have you previously submitted testimony in this proceeding?**

21 A. No, I have not done so.

Q. Dr. Dwyer, please describe your current duties and responsibilities.

A. As the Chief Accountability Officer for the School District, I am responsible for the leadership and supervision of the Data Research and Evaluation Division, which has four departments: Research and Evaluation, Charter Accountability, Assessments, and Data Entry and Accountability Reporting.

Q. Please describe your education and past work experience.

A. I have a Ph.D. in Curriculum and instruction with a focus on Measurement and Evaluation from The University of South Florida. I have over twenty years of experience in Educational research, which includes my work in the Florida School districts for Hillsborough, Polk and Pinellas Counties. I am also currently serving as a member of the Mid-Atlantic Region Regional Advisory Committee for the federal government, and I am the chair of the MidAtlantic Region’s Regional Educational Laboratory governance board. My resume is attached to this Surrebuttal Testimony as Appendix A.

Q. What is the purpose of your Surrebuttal Testimony?

A. The purpose of our Surrebuttal Testimony is to address Rebuttal Testimony statements made by PWSA witnesses Tony Igwe and William J. Pickering, OCA witness Roger Colton, and Pittsburgh United’s Our Water Table witness Harry S. Geller in the proceeding on the following issues: (i) clarification of my reference to the pending appeal before the Pennsylvania Supreme Court regarding the Borough of West

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 Chester’s attempt to establish a stormwater fee by ordinance and impose it on residents
2 and businesses in the municipality; (ii) notice to the School District about the original
3 proposal by the PWSA to institute a separate stormwater charge; (iii) whether any
4 Pennsylvania law or regulation prevents the establishment of an exemption or discount
5 for the School District in connection with PWSA’s stormwater charge; and (iv) address
6 why the low-income student population served by the School District supports its
7 request for relief from paying the large and growing PWSA stormwater charges.

8

9 **II. RESPONSE TO SURREBUTTAL TESTIMONY**

10 **Q. Mr. McNamara, please comment on concerns raised by parties in their Rebuttal**
11 **Testimony about your discussion of the pending appeal before the Pennsylvania**
12 **Supreme Court regarding the Borough of West Chester’s attempt to establish a**
13 **stormwater fee by ordinance and impose it on residents and businesses in the**
14 **municipality.**

15 A. I addressed this pending appeal in a limited context on pages 12-14 of my Direct
16 Testimony, School District Statement No. 1. After noting that I am not an attorney and am
17 not offering a legal opinion, I summarized my understanding that the Commonwealth Court
18 ruled that the Borough of West Chester’s proposed stormwater fee constituted an unlawful
19 tax. I noted that the case is “instructive on how the Commission should view the stormwater
20 charge being imposed on the School District and other customers by PWSA in this
21 proceeding, particularly given the adverse financial impacts that charge has and continues

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 to have on the School District, which is a governmental entity that is exempt from taxes.”

2 School District Statement No. 1, p. 14.

3 A few witnesses, including Pittsburgh United’s Our Water Table witness Harry S. Geller,

4 Pittsburgh United Statement 1-R, p. 17 and PWSA witness William J. Pickering, PWSA

5 St. No. 1-R p. 16, appear to take issue with the word “instructive” when describing the case

6 or attribute to me a direct linkage between that case and the financial impact on the School

7 District of currently paying PWSA’s stormwater charges. To clarify, my testimony was

8 intended to alert the Commission and the parties of the pendency of this case involving the

9 Borough of West Chester, to suggest that the case should be looked at and evaluated by the

10 Commission in this proceeding, and that the legal implications of the Commonwealth

11 Court’s decision and potential impact if applicable to PWSA would be addressed by the

12 School District’s counsel in briefing. As a non-lawyer, my comments about this case were

13 intended to be informational and not dispositive of any substantive issues. The School

14 District felt it was necessary to bring this case to the attention of the Commission because,

15 if PWSA’s stormwater charges are in fact a tax, the School District as a tax-exempt entity

16 would have no obligation to pay such taxes.

17
18 **Q. Mr. McNamara, please address PWSA witness Tony Igwe’s comment in PWSA St. 5-**
19 **R, p. 9 that, to his knowledge, the School District did not participate in any of the**

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 **numerous community meetings and other outreach before PWSA implemented its**
2 **stormwater rates.**

3 A. When addressing issues relating to “notice” to the School District of PWSA’s stormwater
4 fees, it is important to differentiate between notification *before* such fees were implemented
5 and notifications – including meetings – between the School District and PWSA *after* the
6 fees were approved and as they were being implemented. As for the former, the School
7 District was not aware of and did not participate in the various community outreach and
8 other activities held by PWSA upstream of PWSA seeking and obtaining authorization to
9 charge customers for stormwater between April and September 2021. Until stormwater
10 charges were quantified by PWSA, it was difficult for the School District to consider any
11 possible concerns with these charges.

12 The School District is a large organization and, although we do attend community meetings
13 more directly related to educating our students, we would not have participated in the kind
14 of meetings and advisory group activities PWSA was apparently doing before it sought
15 authorization to implement a stormwater fee a few years ago. The School District rarely
16 participates in utility proceedings or preliminary meetings. We typically wait until the
17 implications of a new rate or similar matter are clearly spelled out to us before deciding if
18 any action is needed. As Mr. Igwe noted in his rebuttal testimony, and which we have
19 confirmed, we did participate in a presentation made to the School District by PWSA on
20 February 8, 2022 after the new stormwater charges were approved and/or implemented.
21 While we did provide information about the School District’s properties to the PWSA, the
22 first time the School District understood the potential magnitude of bill increases to the

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 School District was on December 17, 2021 when a PWSA representative sent to the School
2 District a list of School District properties and associated stormwater charges.
3 From the School District's perspective, the fact that the School District neither participated
4 in PWSA's prior rate case in which certain charges for stormwater were approved nor in
5 the earlier pre-implementation public education meetings does not diminish the School
6 District's concerns about the lawfulness and magnitude of the current and proposed PWSA
7 stormwater charges. We are advised by counsel that the School District's participation in
8 this current proceeding and the absence of earlier participation in rate hearings, advisory
9 groups and public outreach sessions does not diminish our current right to object to
10 PWSA's stormwater charges as we have done in this proceeding.

11

12 **Q. Please comment on PWSA witness Igwe's reference to the decision by the**
13 **Commonwealth Court in *Philadelphia Gas Works v. Pa. P.U.C.*, 898 A.2d 671 (2006)**
14 **in his rebuttal testimony, PWSA St. 5-R, p. 8.**

15 A. Although not a lawyer, Mr. Igwe cites to the above referenced decision as apparent support
16 for PWSA's objection to the School District's recommendation that it be entitled to an
17 exemption or a discount from PWSA's stormwater charges. We too are not attorneys but
18 similarly represent that we have been advised by counsel that the referenced decision is
19 neither controlling nor dispositive of the School District's pursuit of an exemption or
20 discount claim in this proceeding.

21

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 **Q. Please comment on the arguments offered by Pittsburgh United’s Our Water Table**
2 **witness Harry S. Geller in Pittsburgh United Statement 1-R, p. 19 in connection with**
3 **his discussion of an exemption from PWSA’s stormwater charges for the School**
4 **District.**

5 A. Mr. Geller is concerned that Mr. McNamara’s testimony and that of Mr. Callocchia seeking
6 an exemption from PWSA’s stormwater fee will result in costs being passed on to
7 residential customers. Pittsburgh United Statement 1-R, p. 19. While Mr. Geller ultimately
8 rejects an exemption for the School District from PWSA’s stormwater charges, in contrast
9 to other states, jurisdictions and/or utilities that have done so, he nevertheless makes several
10 important points that the School District not only agrees with, but which also support why
11 some relief for the School District is so important in this proceeding. Mr. Geller notes the
12 following in his rebuttal testimony:

- 13 • He is strongly supportive of and recognizes the need for increased funding for
14 public schools, including the Pittsburgh School District. Research suggests that
15 increased spending on education can improve student outcomes, especially
16 amongst low-income students, and also narrow achievement gaps between social-
17 economic classes. Pittsburgh United Statement 1-R, p. 19.
- 18 • An equitable funding system ultimately ensures that schools can adequately meet
19 the myriad of purposes they serve – from academic, to socioemotional, to providing
20 other supportive services – including health and lunch services. Pittsburgh United
21 Statement 1-R, p. 19.
- 22 • Robust school funding is essential to the continued vitality of Pennsylvania’s
23 families and their communities. Pittsburgh United Statement 1-R, p. 19.
- 24 • Children in Pittsburgh are also struggling profoundly. The child poverty rate in
25 Allegheny County is estimated to be 15%. It is further estimated that 14.5% of
26 children in Allegheny County are experiencing child hunger; and 8.6% of children
27 in Allegheny County drop out of school. These figures underscore the profound

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 need felt amongst Pittsburgh’s low-income consumers. Pittsburgh United
2 Statement 1-R, p. 20.

- 3 • He would not necessarily oppose alternative proposals to mitigate the cost burden
4 on schools – particularly for schools serving low-income communities. Pittsburgh
5 United Statement 1-R, p. 21.

6 Mr. Geller’s depiction of the depth of poverty among children and their families served by
7 the School District is profound and is confirmed by the School District as well. Increased
8 spending on education can also substantially improve outcomes for these students and their
9 families.

10 We also note that OCA witness Roger D. Colton in OCA Statement 4R, pp. 19-22
11 acknowledges the widespread poverty within the School District. While Mr. Colton’s
12 analysis is intended to support his view that everyone in a community benefit from
13 programs designed to benefit low-income customers, it also supports the School District’s
14 position that its education mission is integrally related to the well-being and success of
15 many low-income students and their families that have eligibility for stormwater charge
16 discounts under PWSA’s Customer Assistance Programs (“CAP”). Just as Mr. Colton
17 views universal service programs as “public goods” or serving a “public purpose”, thereby
18 justifying all customers paying for those program costs, so too is the mission of the School
19 District a “public good” and “public purpose” justifying the School District’s request for
20 substantial and material relief in the payment of PWSA’s stormwater charges. This is
21 particularly the case when so many of the beneficiaries of the low-income programs the
22 OCA suggests should be paid for by all customer classes in this proceeding are being served
23 by the School District, which could benefit from having dollars otherwise spent on

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 stormwater charges from PWSA being directly deployed to address its educational mission
2 and needs.

3 In 2015, the School District opted into the Community Eligibility Program (“CEP
4 Program”), which was established by the United States Department of Agriculture to
5 decrease the bureaucratic burden on families of reporting income information each month
6 to their local school district to maintain eligibility for Free Lunches. The qualification
7 information provided to the School District is based on a family's eligibility for programs
8 like Supplemental Nutrition Assistance Program (“SNAP”)¹ and Temporary Assistance for
9 Need Families (“TANF”)². The CEP Program process provides information to the School
10 District for the students of those families who qualify for the poverty assistance processes,
11 which the School District relies on to report economically disadvantaged status.

12 The CEP Program utilizes the percentage of Economically Disadvantaged students in the
13 School District and applies federal guidance to project the poverty level of the School
14 District. This is accomplished using a multiplier to correct for the underreporting in the
15 qualification data for income-based assistance programs, because they do not represent all
16 of the students in families below the poverty line. When the School District applies the
17 federal calculation to the existing information, the depth of poverty for the students in the

¹ SNAP provides food benefits to low-income families to supplement their grocery budget so they can afford the nutritious food essential to health and well-being. <https://www.fns.usda.gov/snap/supplemental-nutrition-assistance-program>

² The TANF program provides states and territories with flexibility in operating programs designed to help low-income families with children achieve economic self-sufficiency. States use TANF to fund monthly cash assistance payments to low-income families with children, as well as a wide range of services. <https://www.acf.hhs.gov/ofa/programs/temporary-assistance-needy-families-tanf>

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 School District comes into focus. Of the School District's 54 schools, 4 schools have
2 students and their families with less than 70% poverty, 3 schools between 70% and 90%
3 poverty, and the remaining schools having over 90% poverty for students and their
4 families. While we know that not every student is below the poverty line, experience,
5 history, and research demonstrate that the persistence and prevalence of high poverty has
6 deleterious impacts on children's development, and educational attainment. The CEP
7 Program allows us to ensure that our students have the appropriate nutritional support to
8 be ready to learn without creating a bureaucratic system that has harmful or stigmatic
9 processes that single out students and families in need. The CEP Program was developed
10 to support localities and districts that have high levels of poverty, and while the majority
11 of the City of Pittsburgh does not have extremely high levels of poverty, the students whom
12 the School District serves have in the aggregate much higher levels than are seen in Census
13 reports.

14
15 Using the CEP information, the School District can unequivocally state that our schools
16 are supporting extremely high percentages of students whose families are impacted by
17 poverty. Because of the level of poverty experienced by most of the students served by the
18 School District, no students are required to pay for lunch. The following chart provides a
19 snapshot of the scope of child poverty relative to specific schools operating in the School
20 District:

Percent Of Enrollments from Low-Income Families

1

2

The key point, as observed by Mr. Geller, and supported the School District, is that every

3

penny we can save on paying stormwater bills to PWSA and redeploying those funds in an

4

effort to achieve the best academic and socio-economic outcomes for the School District's

5

students provides enormous societal benefits. It is this desire to utilize the scarce School

6

District resources in the most beneficial manner as possible for our low-income students

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 and their families that prompted our participation in this proceeding and our request for
2 substantial and material relief from the over \$400,000 (and potentially growing) in annual
3 payments being made to PWSA for stormwater at our schools.

4 **Q. Given the circumstances outlined in this Surrebuttal Testimony, does the School**
5 **District have any proposal to address its large and growing stormwater charges from**
6 **PWSA and its desire to deploy scarce funding resources in the most cost-effective**
7 **manner for its students and their families?**

8 A. Yes. Without prejudice to our legal position about stormwater charges constituting an
9 improper and unlawful tax and given the School District’s unique situation of being a non-
10 profit governmental entity serving primarily low-income students and their families, we
11 recommend and urge the Commission to provide a discount off of the School District’s
12 stormwater charges to its buildings from PWSA in the amount of 85%, which matches the
13 discount provided to low-income residential customers in PWSA’s Customer Assistance
14 Program. This discount is less than the full exemption from stormwater charges we think
15 is justified. The School District serves many of the same customers eligible for discounts
16 from PWSA on their stormwater charges and it is appropriate to provide the School District
17 the same discount. The School District will receive no “profit” from the implementation of
18 this discount. The School District will deploy the funds not spent on stormwater charges
19 due to the discount in the schools where this poverty exists to improve the educational and
20 living opportunities and outcomes for these impacted students and their families.

PITTSBURGH WATER AND SEWER AUTHORITY
SURREBUTTAL TESTIMONY OF MICHAEL J. MCNAMARA AND THEODORE J.
DWYER

1 **Q. Has the School District evaluated the customer rate impacts of its discount proposal?**

2 A. Yes. Those impacts on PWSA’s customers, which we believe will be relatively small, are
3 discussed and documented by School District witness Eric M. Callocchia in School District
4 Statement 2-SR. We believe that low-income students and their families served by the
5 School District will receive incrementally greater benefits of our proposed discount and
6 fund deployment than without it, resulting in better societal benefits and sound public
7 policy outcomes.

8 **III. CONCLUSION**

9 **Q. Does this conclude your Surrebuttal Testimony?**

10 A. Yes, it does. However, we reserve the right to supplement our Surrebuttal Testimony
11 should additional issues and facts arise during the course of this proceeding.

Education

Doctor of Philosophy Degree (Ph.D.) in Curriculum & Instruction with emphasis on Measurement and Evaluation - awarded 5/2016 from University of South Florida, Tampa, Florida

Major: Curriculum & Instruction focus on Measurement and Evaluation **Minor:** Higher Education
Dissertation: *A Comparison of Educational "Value-Added" Methodologies for Classifying Teacher Effectiveness: Value Tables vs. Covariate Regression*

Master's Degree M.A. in Psychology – awarded 05/2003 from University of South Florida, Tampa, Florida

Major: Psychology Thesis: *An assessment of Paired Similarities and Card Sorting*

Bachelor's Degree BA in Psychology – awarded 05/1998 from University of South Florida, Tampa, Florida

Major: Psychology

Associate's Degree – awarded 05/1995 from Hillsborough Community College, Tampa, Florida

Work Experience (Duties, Accomplishments, and Related Skills):

Chief Accountability Officer, over Data, Research, Assessment, and Accountability 04/2017 – Present

Acting Chief Technology Officer, 03/2020 – 11/2020 (in conjunction as Chief Accountability Officer)

Pittsburgh Public Schools, 341 South Bellefield Avenue, Pittsburgh, Pennsylvania 15213

The division of Data, Research, Assessment, and Accountability includes four departments: 1) Data and Accountability, 2) Research and Evaluation, 3) Assessment, and 4) Charter Accountability.

Leadership

- Leads the design, implementation and management of planning and performance measurement systems in the school district, including evaluating and reporting on the performance of individual schools and programs and the performance of the district as an overall system.
- Directs the functions of the assessment, evaluation, accountability, and research programs of the school district and facilitates improved student achievement through objectives measurement, analysis, evaluation and documentation.
- Directs and supervises the collection and maintenance of data used for state and federal reporting to ensure compliance with federal and state statutes including per pupil funding, accreditation, evaluation, and accountability requirements. Monitor school and district data, as well as state and federal policies to determine trends and needs; develop and implement systems and supports ensuring compliance and effective activities.
- Provides leadership in planning, developing, administering, interpreting and reporting the district's evaluation programs and procedures; design surveys and other data collection instruments; broker evaluation services between schools and external evaluators; collaborates with school systems department, community agencies, and serves as the liaison with local universities for research.
- Collaborates with Senior Leadership to develop and align the long-term and short-term strategic plans, as well as the appropriate organizational structure (e.g., people, process and technology) to deliver the expected results on any local/state/federally mandated programs.
- Collaborates closely with the Chief of Teaching and Learning and Chief of Student Support Services to ensure that assessments are aligned with the district's curriculum and instructional strategies and to ensure

Theodore James Dwyer, Ph.D.

the appropriate resources and support needed for data-driven instruction and strategies by teachers, principals, and other staff.

- Collaborates with Chief of Finance and Chief Technology Officer to ensure the district has the appropriate technology and operating systems needed to track, report, and aggregate/disaggregate student performance data (school-by-school, classroom-by-classroom).
- Serves as the primary liaison to the Pennsylvania Department of Education regarding accreditation, data collection, data integrity, and data reporting regarding Pittsburgh Public Schools accountability.

Planning

- Coordinate information and cross-functional projects to ensure compliance with state and federal statutes such as FERPA regulations regarding the protection, privacy, and appropriate use of student data District-wide. In collaboration with district legal counsel and the chief of information technology, provide direction on the resolution of FERPA violations, data privacy disputes/complaints, the approval of contracts and applications to view or utilize Pittsburgh Public Schools data externally.
- Develop a rigorous process to accept, review, and approve research requests from internal and external stakeholders to ensure the appropriate support of research activities. Plan and support the district evaluation efforts for special programs, state and federal regulations compliance and schools and/or District administrators as requested.
- Develop annual goals which are consistent with the Superintendent's goals and the District's Strategic Plan, and participate in the development, monitoring and evaluation of educational process.
- Directed and coordinated the 1-1 computer deployment across the district (March through November 2020). Designed a plan for collecting, reimaging, and distributing laptop computers to the 25,000 students served by the district. Worked with community partners to raise funds for needed devices, locate and obtain refurbished computers and leveraged CAREs funding for computers for staff and students. Implemented the Microsoft 360 systems as a Learning Management System (LMS), and based on community feedback and input to the district, pivoted to a more traditional LMS for the 2020-21 school year, which was fully deployed before the beginning of the 2020-21 school year.

Performance Measures

- Created a compelling vision and theory of action for the Research, Assessment and Accountability Department and the District's progress and performance measurement system which encompasses a culture of high-quality service to internal clients, innovation, and optimal operational efficiencies.
- Prepare and provide materials to the Superintendent for presentations to the Board of Education, principals, teachers, parents and community groups; attend regular meetings of the Board as designated; conduct staff meetings; attend other related meetings.
- Deliver state, federal and nationally normed tests through the state testing section, and district quarterly local assessments aligned to the district's curriculum. Eliminated double testing of students on the same content by using a nationally available assessment that provided standards information, longitudinal growth information and could be integrated into multiple interventions thereby decreasing the overall student testing and providing a broad screener to assist in targeting specific student needs. Evaluation and

Accountability

- Provide data analysis and reporting; design data-collection strategies; collect and/or assemble data; design basic information services to facilitate the analysis of data; identify and apply appropriate statistical analysis; produces graphical, tabular and narrative summaries of data and statistical analysis; write reports and executive summaries of findings.
- Create data dashboards and other internal and external data reporting systems to help various audiences both visualize and analyze adult capacity building and student performance data and provide actionable data to teachers and principals.
- Directed the improved data quality processes, including internal mechanisms to monitor, communicate and correct data integrity issues, and completion of mandatory state and federal reporting.

Theodore James Dwyer, Ph.D.

- Established a documented data governance processes in the district and oversight of the institutional review process for all research applications to the district.
- Providing technical assistance to the Human Resources department for the teacher, principal, and district leadership evaluations.
- Design and implement district surveys and processes directly linked to teacher growth calculations (e.g., Tripod student survey, stewarding the Pennsylvania Value-Added Assessment System verification process and providing direct assistance to the Teaching and Learning Conditions survey). Vetted internal and external reports for accuracy and consistency with published reports.
- Focus on establishing a process for the Charter Accountability department to allow parents to make
- an informed choice based on comparable information from the district and the charter schools,
- including establishing a regular monitoring process for visiting district schools, developing of a web presence with individual school results, and established a process for communicating the state and federally-mandated IDEA rights with the parents of students with disabilities.

Quality Assurance

- Coordinate the development and improvement of an enhanced quality assurance system that engages state organizations; measures program quality, effectiveness, and adherence to program standards; and promotes continuous program improvement.
- Support and provide expertise to refine the internal assessment review process, including creating an assessment tool, assessment calendar, and analyzing assessment data to help ensure that programs maintain high-quality advocacy services.
- Provide advice and technical assistance in research design, program evaluation and data analysis; provide advice on appropriate statistical analysis; provide guidance on appropriate psychometric practices and methods of displaying data; provide technical support to schools in interpreting test results.

General

- Oversee the division budget, ensuring activities are within budget, and ensures adherence to budgetary guidelines.
 - Provide technical expertise and information regarding departmental activities and participates in the formulation of policies, procedures and programs.
 - Supervise the performance of assigned personnel; assesses team and individuals' skills, identifies development needs, and provides feedback and support to improve practice, build capacity, and maximize talent.
 - Demonstrated knowledge and experience of program evaluation principles, theories, concepts, practices and using evaluation and school-based research to inform program development.
 - Demonstrated expertise in successfully designing and conducting quantitative and qualitative research and evaluation processes.
 - Demonstrated commitment to work collaboratively with all constituent groups, including staff, board members, volunteers, donors, state and local program staff, and other supporters.
 - Demonstrated strategic plan development expertise; must be able to develop and implement project plans and strategies for executing on the organization's goals and objectives.
 - Demonstrated ability to work well under pressure with deadlines and be skilled in prioritizing responsibilities; and ability to analyze challenges and identify appropriate solutions in a fast-paced environment required; and ability to operate at both the strategic and tactical level.
 - Demonstrated experience working in a richly diverse school community and environment and bilingual or multilingual skills are highly desirable.
 - Proven facilitator of change management.
-

Theodore James Dwyer, Ph.D.

External Review Team member, 02/2014 - 04/2017

AdvancED Systems Accreditation, 7665 S. Research Drive, Tempe, Arizona 85284

- Served as AdvancED Systems Accreditation External Review Team member.
- Participated in five successful accreditation visits across three states (Florida, Georgia, Wyoming). Reviewed documents related to the accreditation for the system and sites within the system, in preparation for three days of intense work that required consensus on all decisions between all teammembers. Included conducting multiple classroom observations and the creation of an initial report for the accreditation recommendation. Worked cooperatively with a wide variety of educators from across the country to reach consensus on the recommendation for accreditation for each of the systems.

Team visits included:

- o Rockdale County Public Schools, Conyers, GA Feb 9-12, 2014
 - o Monroe County School District, Key West, FL May 4-7, 2014
 - o Park County School District #6, Cody, WY October 25-29, 2015
 - o Bartow County School, Cartersville, GA Mar 8-11, 2015
 - o Pasco County School District, Land O'Lakes, FL Sept 11-14 2016
-

Manager Of Evaluation, Assessment, Accountability and Evaluation Department, 08/2009 - 04/2017

School District of Hillsborough County, 901 E Kennedy, Tampa, FL 33602

- Supervised Internal Program Evaluation Team for the 8th largest district in the nation serving 213,000 students and over 14,000 employees. Responsible for identifying and recommending to the Superintendent the primary candidate for internal evaluation positions in the district.
 - Evaluated personnel and provided differentiated guidance and assistance to individuals, including developing a plan and securing funds to build internal capacity through the creation of data coaches.
 - Secured additional funding to address the volume of program evaluations and coordinated with institutions of Higher Education to set up graduate intern positions for students interested in learning evaluation, psychometrics and data analysis.
 - Promoted an open dialogue within the evaluation department to allow the unique strengths and passions of each member to be leveraged by the team to support the district's vision of preparing students for post-secondary pursuits and advance the department's mission of providing high quality actionable evaluations to the administrators responsible for the programs and to policy makers.
 - Developed a procedure for tracking and conducting research reviews in the district, including a tracking process, building an ad-hoc committee based on the focus of the study, and members of the internal evaluation staff based on the methodological approach identified in the proposal to ensure that research was beneficial to education with a minimal impact on district operations.
 - Collaborated with the business department to develop a rolling RFP for the identification of a pool of qualified External Evaluation firms. Built a process to ensure a defensible selection of the most appropriate external evaluator. Negotiated the budget with the firm and oversaw contracting and monitoring budgets for each external evaluation to ensure the completion of all necessary criteria for federal and state evaluations.
 - Worked with multiple external partners to provide assistance with research and evaluation questions and to coordinate the needs of the district and the agendas of the external partners, including working with external partners to ensure data were provided in a manner that reinforced the continuity of services and programs providing students and teachers curricular and pedagogical services.
 - Participated in building partnerships by providing initial feedback and assistance to ensure compliance with federal law, specifically FERPA, Protection of Pupil Rights Amendment, and other privacy rules and regulations.
 - Worked with external partners to ensure they received the necessary information to comply with state and federal requirements. Worked with several IHEs to develop a process to provide them with deidentified information that allowed them to comply with reporting requirements.
-

Theodore James Dwyer, Ph.D.

Senior Coordinator, Research & Accountability, 04/2007 - 08/2009

The School Board of Polk County, 1915 South Floral Avenue, Bartow, Florida 33830

- Supervised and directed the professional and support persons assigned to Research and Evaluation section of Assessment, Accountability & Evaluation Department.
 - Responsible for design, execution and dissemination of district program evaluations for academic programs, including an impact analysis of one of the district's online reading programs that provided the reading department the leverage to develop implementation tracking procedures to ensure equitable access and consistent implementation of the reading programs.
 - Served as the chair of the Research Review Committee with the responsibility of reviewing research proposals for internal and external research for the district.
 - Provided guidance and advice to internal and external researchers concerning methodology, evaluation models, and appropriate statistical methods for research and evaluations.
 - Conducted data analyses of multiple large datasets using SPSS, SAS, HLM statistical software packages. Provided analyses of district and state data to provide predictions of state accountability system school grade rankings – allowing district policy makers, curriculum staff and accountability personnel an opportunity to build initial plans related to accountability needs.
 - Worked with external partners to provide appropriate data to support their mission. Coordinated with the district Title I evaluator to ensure access to the necessary data to provide support to schools.
 - Worked with colleagues in other districts to provide them the syntax for calculating predictions of state accountability system school grade rankings.
 - Worked closely with the Information Technology department to ensure that the data dashboard for teachers contained accurate and timely accountability and testing information.
-

Research Specialist, 06/2005 - 04/2007

Pinellas County School Board, 301 4th Street SW, Largo, Florida 33770

- Designed evaluation of the Institutional Services Division entailing customer satisfaction surveys, job analyses, document reviews, climate surveys, and process review procedures. Coordinated with the business department to generate an Invitation to Bid for an Industrial/Organizational Psychology research firm to provide external evaluation services. I supervised external firm evaluators and internal personnel throughout the data collection and analysis.
 - Worked with the Director of Evaluation to ensure there was a plan for continuity and completion of the evaluation. Provided voluntary review of the draft reports, confirmatory data analysis, review of the final report, and recommendations to ensure completion of the project.
 - Conducted data analyses of multiple large datasets using SPSS and SAS statistical software packages. Produced and refined the district and school level discipline reports for the district discipline committee to assist in identifying and addressing the disparities between schools.
 - Assisted in the review of research proposals external to the Pinellas County Schools;
 - Planned and conducted program evaluations. Conducted an evaluation of the district's computerized reading intervention which resulted in the external vendor providing direct services to the district Reading Department to improve implementation.
-

Programmer, 08/2004 - 06/2005

Pinellas County School Board, 301 4th Street SW, Largo, Florida 33770

- Performed data analyses of multiple large datasets using the SPSS and SAS statistical software packages, synthesizing and producing multiple reports for dissemination to personnel at all levels of the school system. Provided analysis of Individual Assessment Program (IAP) in order to provide individual teachers with an assessment of their students' standing in relation to the requirements of the district to allow for changes in teachers' approaches to curriculum delivery. I also conducted analyses of discipline data to provide reports and status updates to the district discipline committee and examined state graduation

Theodore James Dwyer, Ph.D.

cohort files for consistency with district data files and built data monitoring processes to improve the accuracy of the district corrections process for verification of the state graduation cohort files.

- Assisted in the review of research proposals external to the district and School Board.
-

Graduate Student Intern, 08/2002 - 08/2004

Pinellas County Schools, 301 4th Street SW, Largo, Florida 33770

- Analyzed and evaluated data provided through the PIAP in order to provide individual teachers with an assessment of their students' standing in relation to the requirements of the district to allow for changes in teachers' approaches to curriculum delivery.
- Analyzed multiple large discipline data sets, identifying schools with inconsistent or large numbers of suspensions and other discipline problems for investigation by the district discipline committee.
- Worked in conjunction with district Research Specialists to combine and analyze multiple large datasets for various external and internal data requests.

Teaching Experience

- Co-Instructor – EDF 7438: Advanced Educational Measurement II – Spring 2009
- Instructor – EDF 3430: Measurement and Evaluation of Educational Growth – Spring 2008 & 2009

**LIST OF EVIDENCE TO BE ADMITTED INTO THE EVIDENTIARY RECORD BY
THE OFFICE OF CONSUMER ADVOCATE**

The Office of Consumer Advocate (OCA) intends to submit the following evidence into the evidentiary record in the above captioned proceedings at the evidentiary hearings scheduled for October 4-6, 2023.

DIRECT TESTIMONY

OCA St. 1: Direct Testimony of Dante Mugrace consisting of 49 pages of testimony, Appendix A Resume of Dante Mugrace, and Exhibits DM-1 through DM-21 along with a signed verification of Dante Mugrace.

OCA St. 2: Direct Testimony of Karl R. Pavlovic consisting of 35 pages of testimony and Exhibits KRP-1 through KRP-7 with a signed verification of Karl R. Pavlovic.

OCA St. 3: Direct Testimony of Jerome D. Mierzwa consisting of 22 pages of testimony and Exhibits JDM-1 through JDM-4 with a signed verification of Jerome D. Mierzwa.

OCA St. 4: Direct Testimony of Roger D. Colton consisting of 89 pages of testimony and RDC-1 and RDC-2 with a signed verification of Roger D. Colton.

OCA St. 5: Direct Testimony of Barbara R. Alexander consisting of 22 pages of testimony and Exhibits BA-1 through BA-5 with a signed verification of Barbara R. Alexander.

OCA St. 6: Direct Testimony of Terry L. Fought consisting of 39 pages of testimony and Exhibits TLF- Vita and TLF-1 through TLF-25 with a signed verification of Terry L. Fought.

REBUTTAL TESTIMONY

OCA St. 2R: Rebuttal Testimony of Karl R. Pavlovic consisting of 8 pages of testimony and a signed verification of Karl R. Pavlovic.

OCA St. 3R: Rebuttal Testimony of Jerome D. Mierzwa consisting of 6 pages of testimony and a signed verification of Jerome D. Mierzwa.

OCA St. 4R: Rebuttal Testimony of Roger D. Colton consisting of 24 pages of testimony and a signed verification of Roger D. Colton.

SURREBUTTAL TESTIMONY

OCA St. 1SR: Surrebuttal Testimony of Dante Mugrace consisting of 22 pages of testimony and exhibits DM-SR 1 through DM-SR 3 with a signed verification of Dante Mugrace.

OCA St. 2SR: Surrebuttal Testimony of Karl R. Pavlovic consisting of 22 pages of testimony and exhibit KRP-SR with a signed verification of Karl R. Pavlovic.

OCA St. 3SR: Surrebuttal Testimony of Jerome D. Mierzwa consisting of 13 pages of testimony and a signed verification of Jerome D. Mierzwa.

OCA St. 4SR: Surrebuttal Testimony of Roger D. Colton consisting of 32 pages of testimony and a signed verification of Roger D. Colton.

OCA St. 5SR: Surrebuttal Testimony of Barbara R. Alexander consisting of 11 pages of testimony and exhibits BA-6 and BA-7 with a signed verification of Barbara R. Alexander.

OCA St. 6SR: Surrebuttal Testimony of Terry L. Fought consisting of 19 pages of testimony and exhibits TLF-1SR through TLF-3SR with a signed verification of Terry L. Fought.

ADDITIONAL EVIDENCE

The OCA also intends to submit responses to Interrogatories OCA-XXI-1 and OCA-XXI-2.¹

¹ These responses are anticipated be submitted in the form of a Joint Stipulation entered between PWSA and OCA, which is pending consideration of both parties.

Appendix A – Resume of Dante Mgrace	

1 **I. STATEMENT OF QUALIFICATIONS**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 **A.** My name is Dante Mugrace. My business address is 22 Brooks Avenue, Gaithersburg, MD
4 20877.

5 **Q. WHAT IS YOUR PRESENT OCCUPATION?**

6 **A.** I am a Senior Consultant with the Economic and Management Consulting Firm of PCMG
7 and Associates, LLC. (“PCMG”). In my capacity as a Senior Consultant, I am responsible
8 for evaluating and examining rate and rate related proceedings before various
9 governmental entities, preparing expert testimony recommending revenue requirement, as
10 well as, offering opinions on economic policy and policy issues and methodologies used
11 to set a value on a utility’s rate base and cost of service components of revenue requirement.

12 **Q. PLEASE SUMMARIZE YOUR PROFESSIONAL EXPERIENCE.**

13 **A.** PCMG is an association of experts in utility regulation and policy, economics, accounting,
14 and finance. PCMG’s members have over 75 years of collective experience providing
15 assistance to counsel and expert testimony regarding the regulation of electric, gas, water
16 and wastewater utilities that operate under local, state, and federal jurisdictions. PCMG
17 focuses on areas regarding revenue requirement, cost of service, rate design, cost of capital
18 and rate of return. Prior to my association with PCMG, I was employed as a Senior
19 Consultant with the consulting firm of Snavely King Majoros and Associates (“SKM”)
20 from 2013 to 2015, in the same capacity as PCMG. Prior to SKM I was employed by the
21 New Jersey Board of Public Utilities (“NJBPU”) from 1983 to my retirement in 2011.
22 During my tenure at the NJBPU, I held various Accounting, Rate Analyst, Supervisory and
23 Management Positions. My last position was Bureau Chief of Rates in the Agency’s Water
24 Division (Bureau Chief of Rates). I held this position for nearly 10 years. My resume is
25 attached as Appendix A.

26 **Q. WHAT EXPERIENCE DO YOU HAVE IN THE AREA OF UTILITY RATE**
27 **SETTING PROCEEDINGS AND OTHER UTILITY MATTERS?**

28 **A.** In my capacity as Bureau Chief of Rates at NJBPU, I was responsible for overseeing the
29 rate process regarding administrative, financial, and managerial functions of the Rates

1 Bureau. My primary duties were to ensure that the jurisdictional utilities had sufficient
2 revenues to cover their operating expenses, the ability to earn a reasonable rate of return
3 on plant investments, and to ensure that the provision of safe, adequate, and proper service
4 at reasonable rates was met. During my time at the NJBPU, I was involved in hundreds of
5 rate and rate related proceedings. In my capacity as a Senior Consultant previously with
6 SKM and now with PCMG, I have been and am currently involved in rate and rate related
7 proceedings before the Commissions in the State of Hawaii, the Commonwealth of
8 Massachusetts and Pennsylvania, and the States of Maine, Maryland, New Jersey, New
9 York, North Dakota, and Ohio. I was involved in the Generic Proceedings to Establish
10 Parameters for the Next Generation Performance Based Rate Plans before the Alberta
11 Utilities Commission. I was involved in transmission formula rate plans before the Federal
12 Energy Regulatory Commission (FERC) regarding the PECO Energy Company on behalf
13 of the Pennsylvania OCA and the Rockland Electric Company on behalf of the NJ Division
14 of Rate Counsel.

15 **Q. WHAT IS YOUR EDUCATIONAL BACKGROUND?**

16 **A.** I hold a Master of Business Administration (“MBA”) degree with a concentration in
17 Strategic Management from Pace University-Lubin School of Business in New York, New
18 York. I hold a Master of Public Administration (“MP”) degree from Kean University in
19 Union, New Jersey. I hold a Bachelor of Science (“BS”) degree in Accounting from Saint
20 Peter’s University in Jersey City, New Jersey.

21 **Q. HAVE YOU PREVIOUSLY TESTIFIED IN PROCEEDINGS BEFORE THE**
22 **PENNSYLVANIA PUBLIC UTILITY COMMISSION?**

23 **A.** Yes. I have provided testimony before the Pennsylvania Public Utility Commission with
24 respect to the PWSA’s base rate case proceeding in the 2020 base rate case (Docket Nos.
25 R-2020-3017951 (Water) and R-2020-301-7970 (Sewer) and in the 2021 base rate case
26 (Docket Nos. R-2021-3024773 (Water), R-2021-3024774 (Sewer) and R-2021-3034779
27 (Stormwater). Aside from PWSA cases, I have provided testimony in other proceedings
28 before the Commission since 2017 and my attached resume identifies those proceedings.

1 **II. PURPOSE OF TESTIMONY**

2 **Q. ON WHOSE BEHALF ARE YOU TESTIFYING?**

3 **A.** I am testifying on behalf of the Pennsylvania Office of the Consumer Advocate (“OCA”).

4 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?**

5 **A.** The purpose of my testimony is to evaluate and recommend a level of revenue requirement
6 increase for water, wastewater and stormwater service based upon the use of the Cash Flow
7 Method of setting rates for service. In my review and evaluation of the Authority’s
8 proposed System Revenue Requirement, I am relying on the testimony of all OCA
9 witnesses, and my testimony will also introduce each of those witnesses who address
10 various aspects of the Authority’s rate request.

11 **Q. WHAT IS PWSA REQUESTING IN THIS RATE CASE?**

12 **A.** On May 9, 2023, Pittsburgh Water & Sewer Authority (“PWSA” or “Authority”) filed a
13 request with the Pennsylvania Public Utility Commission (“PAPUC” or “Commission”) seeking approval of an overall increase in rates of \$146.1 million or 70.092% above current
14 rates.¹ The Authority is proposing to implement this increase over a three-year period. \$46.8
15 million (22.4%) in the Fully Projected Future Test Year (FPFTY) 2024; \$45.4 million
16 (17.8%) in FY 2025 and \$53.9 million (17.9%) in FY 2026. (Statement of Reasons at 1).

18 **Q. DID THE AUTHORITY IDENTIFY REASONS FOR ITS REQUESTED RATE**
19 **INCREASES?**

20 **A.** Yes. The Authority’s stated reasons for requesting a revenue requirement increase are to
21 recover capital costs, inflationary operating costs, costs related to the Wet Weather Consent
22 Decree with the United States Department of Environmental Protection Agency (US EPA);
23 environmental compliance, decreased consumption, and funds to meet new financial
24 obligations and improve financial metrics that impact the Authority’s bond rating
25 (Statement of Reasons at 1) (PWSA St. No. 1 at 13). Additionally, the Authority’s
26 proposed rate increase is partly predicated upon its Capital Improvements Plan (CIP) which
27 included the refurbishment and replacement of a signification portion of the Authority’s

¹ \$146.1 million divided by current revenues of \$208.483 million. (Exhibit EB-2). (PWSA St. No. 1 at 13).

1 water supply system. The Authority stated that the requested increase is needed to address
2 regulatory compliance issues and to allow it to respond to unexpected situations that arise
3 due to the age of the system. PWSA claimed that the rate increase that it is seeking is the
4 minimum amount needed to continue operations while meeting its required financial
5 metrics. (PWSA Statement of Reasons at 1).

6 **Q. PLEASE EXPLAIN PWSA’S MULTI-YEAR RATE FILING PROPOSAL.**

7 **A.** As explained on PWSA St. No. 2 at 44, PWSA is proposing a three-year rate increase
8 which would increase revenues by \$46.8 million in FY 2024, \$45.4 million in FY 2025
9 and \$53.9 million in FY 2026. Mr. Barca stated that Section 1330 of the Public Utility
10 Code, added to the Code in 2018 authorizes the Commission to approve an application by
11 a utility to establish alternative rate mechanisms in the context of a base rate case. Section
12 1330 (b) specifically states that:

13 [T]he commission may approve an application by a utility in a base rate proceeding to
14 establish alternative rates and rate mechanism, including, but not limited to, the following
15 mechanisms:

- 16 (i) Decoupling Mechanisms
- 17 (ii) Performance-Based Rates
- 18 (iii) Formula Rates
- 19 (iv) Multi-Year rate plans or
- 20 (v) Rates based on a combination of more than one of the mechanisms in
- 21 subparagraphs (i), (ii), (iii) and (iv) or other ratemaking mechanisms as provided
- 22 under this chapter.²

23 According to Mr. Barca, the Commission issued a policy statement³ in which it set out
24 issues that the Commission will consider when judging whether an alternative ratemaking
25 proposal is just, reasonable and in the public interest. Mr. Barca further explained the
26 relevant factors as identified on PWSA St. No. 2 at 45.

² 66 Pa. C.S. § 1330(b).

³ Witness Barca does not identify the Policy Statement, but OCA witness Pavlovic identifies and outlines the applicable Policy Statement in OCA Statement 2.

1 **Q. WHAT IS YOUR RESPONSE?**

2 A. My response is that the MYRP should be rejected. In concluding this, I am relying on the
3 recommendations of all OCA witnesses, including Dr. Karl Pavlovic (OCA Statement 2).
4 Dr. Pavlovic has recommended rejection of PWSA’s multi-year rate implementation for
5 the many reasons outlined in his testimony. In total, the OCA witnesses demonstrate that
6 PWSA’s MYRP should be overwhelmingly rejected.

7 **Q. WILL YOUR TESTIMONY PRESENT REVENUE RECOMMENDATIONS FOR**
8 **PWSA’S FY 2025 AND FY 2026?**

9 A. No. I am presenting revenue recommendations solely for PWSA’s FPFTY ending on
10 December 31, 2024. As I indicate below, and as supported by all OCA witnesses for this
11 case, the OCA recommends that PWSA’s MYRP be rejected for many compelling reasons
12 that demonstrate that it would produce unjust and unreasonable rates for PWSA’s
13 ratepayers. My testimony adopts that position as well; therefore, my recommendations will
14 address FY 2024 only because FY 25 and FY 26 are not appropriately supported.

15 **Q. PLEASE BRIEFLY INTRODUCE THE OCA’S WITNESSES FOR THIS CASE:**

16 A. Alongside my testimony, the OCA offers testimony for five additional witnesses whose
17 testimony supports its overall position in this case. I will introduce each witness and give
18 a brief overview of their respective testimonies below. While my testimony recognizes the
19 revenue impact of the overall OCA position, which is comprised of all the witnesses’
20 testimony, I will defer to each individual witness’s testimony on their respective positions
21 and expertise.

22 In OCA Statement 2, Dr. Karl Pavlovic addresses the deficiencies in PWSA’s
23 following proposals: (1) to implement a Multi-Year Rate Plan (MYRP); (2) to increase its
24 water and wastewater distribution system improvement charge (DSIC) cap from 5% to
25 7.5%; (3) to implement an Infrastructure Improvement Charge (IIC); (4) and to implement
26 a Customer Assistance Charge (CAC). As Dr. Pavlovic provides compelling testimony
27 warranting the rejection of each of these four proposals, my testimony incorporates the
28 rejection of each proposal.

1 In OCA Statement 3, Jermone D. Mierzwa reviews and analyzes the water, wastewater
2 conveyance, and stormwater cost of service (“COS”) studies and the rate design proposals
3 included in PWSA’s filings.

4 In OCA Statement 4, Roger Colton addresses the barriers to accessing utility that
5 PWSA’s low-income customers face. He recommends changes in PWSA’s bill discount
6 programs, and related matters to help all PWSA customers afford essential utility service.
7 As it relates to the revenue recommendations presented in my testimony, Witness Colton
8 has recommended that PWSA bill discount program be expanded, with a revenue impact
9 of \$560,915, and expansion of its Arrearage Forgiveness Program with a revenue impact
10 of \$631,461 and I have recognized his recommendation in my overall revenue
11 recommendation.

12 In OCA Statement 5, Barbara Alexander identifies PWSA’s customer service
13 performance, as well as its consumer protection policies and programs, its proposal to
14 charge residential customers a fee for paying bills by credit card/debit card, and its
15 proposal to hire a third-party debt collection service, and she makes recommendations to
16 address those issues. Relative to my testimony, Witness Alexander recommends that the
17 Commission reject PWSA’s proposal to reinstate fees for payments made by credit
18 card/debit cards, and I have recognized \$470,000⁴ of revenue in my overall revenue
19 recommendation to account for her recommendation.

20 Finally, in OCA Statement 6, Terry Fought, a water and wastewater engineer, makes
21 several recommendations about technical aspects of the Authority’s water delivery and
22 wastewater collection systems. Witness Fought also makes recommendations for PWSA
23 to pursue more equitable and cost-efficient methods of operation for the future.

⁴ This amount is based upon PWSA’s responses to OCA discovery (OCA Set IV-13 and OCA-XVII-7).

1 **Q. PLEASE DESCRIBE HOW PWSA DEVELOPS ITS RATE REQUEST AND ITS**
2 **OVERALL REVENUE REQUIREMENT IN THE SETTING OF RATES.**

3 **A.** As described in Mr. Barca’s testimony (PWSA St. No. 2 at 5) PWSA sets its rates for
4 service based upon the Cash Flow Method (CFM) of ratemaking. Given that the Authority
5 does not have any shareholders and does not pay a dividend or a rate of return to its owner,
6 the CFM is used to determine the levels of cash necessary to fund an operating budget that
7 enables PWSA to maintain the system, pay for needed capital improvements, the level of
8 debt service coverage that both meets PWSA’s bond covenant requirements, meet
9 additional bonds test and produce sufficient cash to fund all obligations and maintain access
10 to the capital markets at reasonable rates. (PWSA St. No. 2 at 5). According to Mr.
11 Pickering, the Authority became subject to the Commission’s jurisdiction in December
12 2017 under Act 65, and on March 15, 2018, a final implementation Order was entered
13 which transitioned the Authority to the Commission’s jurisdiction. (PWSA St. No. 1 at
14 22). PWSA is governed by a nine-member Board of Directors (BOD) whose members are
15 appointed by the Mayor of the City and confirmed by City Council. The BOD is
16 responsible for providing strategic direction and oversight to the Authority’s management
17 team, as well as adopting the Authority’s annual operating and capital budgets, approving
18 contracts, and setting rates. (PWSA St. No. 1 at 23).

19 **Q. BECAUSE PWSA IS A PENNSYLVANIA PUBLIC UTILITY, IS ITS BOARD OF**
20 **DIRECTORS RESPONSIBLE FOR DETERMINING PWSA’S RATES IN THIS**
21 **CASE?**

22 **A.** No. The Commission is responsible for determining PWSA’s rates.

23 **Q. WHAT ARE THE REQUIREMENTS OF THE USE OF A FPFTY PERIOD?**

24 **A.** With the enactment of Act 11 of 2012, PWSA has based its claimed revenue requirement
25 on the fully forecasted 12 months ending December 31, 2024. (PWSA St. No. 2 at 8).
26 PWSA has also proposed to include a forecasted period ending December 31, 2025, and a
27 forecasted period ending December 31, 2026 (PWSA St. No. 2 at 8).

1 **Q. HAS THE AUTHORITY RELIED UPON OTHER PROVISIONS OF ACT 11?**

2 **A.** Yes. According to Mr. Barca, the Authority is requesting consolidation of the three dockets
3 for water, wastewater and stormwater and authority to use combined water, wastewater,
4 and stormwater revenue requirements. Mr. Barca stated that this consolidation will
5 continue the prior accounting and ratemaking practice of the Authority. (PWSA St. No. 2
6 at 8).

7 **Q. HOW DID MR. BARCA DEVELOP ITS FUTURE TEST YEAR AND FULLY**
8 **PROJECTED FUTURE TEST YEAR RESULTS?**

9 **A.** Mr. Barca stated that the Future Test Year (FTY) 2023 and the FPFTY 2024 were derived
10 through a comprehensive Authority-wide budgeting process in which PWSA used a zero-
11 based budgeting method to develop annual budgets. The previous year's budgets are
12 referenced when developing the FPFTY budget, but each cost is individually considered
13 when developing the budget. (PWSA St. No. 2 at 9). This is contrary to a traditional
14 budgeting approach in which an escalation factor is applied to an anticipated increase in a
15 specific type of cost. (PWSA St. No. 2 at 9).

16 **Q. BECAUSE IT IS BASED UPON A FUTURE TEST PERIOD, DOES PWSA'S**
17 **FPFTY ALREADY RELY UPON PROJECTIONS OF WHAT COSTS AND**
18 **EXPENSES WILL BE IN THE FUTURE?**

19 **A.** Yes. Without a MYRP, using only PWSA's FPFTY, many of its claims are built upon
20 assumptions of what expenses and revenue will be in the future, for a test year that ends on
21 December 31, 2024. In that sense, PWSA is already relying upon projections simply to
22 support its revenue requirement for 2024. As the combined testimony of OCA witnesses
23 introduced above will explain, PWSA's budget projections have not always materialized,
24 and in many respects have been significantly over projected. I will defer to other OCA
25 witnesses on the issues they identified, but my analysis below identifies adjustments I am
26 recommending as necessary for the FPFTY 2024.

27 **Q. DID MR. BARCA INCLUDE THE IMPACT OF INFLATION IN THE**
28 **DEVELOPMENT OF PWSA'S RATE REQUEST?**

29 **A.** According to Mr. Barca inflation was the primary or secondary factor for all increases in
30 the revenue requirement in this case. (PWSA St. No. 2 at 12).

1 **Q. DO YOU HAVE ANY GENERAL RESPONSE TO MR. BARCA’S CLAIMS**
2 **REGARDING INFLATION?**

3 A. Yes. I address PWSA’s claims individually in my analysis below, and I recognize inflation
4 adjustments where warranted. However, while I accepted certain adjustments for inflation,
5 that should not be conflated with acceptance of any blanket inflation adjustments PWSA
6 is proposing in this case. Instead, the data, support, and basis for any projected inflation
7 rate must be carefully analyzed with respect to each claimed cost.

8 **Q. WHAT ARE PWSA’S CLAIMED OPERATING NEEDS IN THE FPFTY?**

9 A. As more fully explained by Mr. Barca, PWSA is proposing certain adjustments to its
10 operating revenue requirements related to certain direct expenses and other operating
11 expenses that sum up to \$18.4 million in the FPFTY period. Although these adjustments
12 are not PWSA’s proposed revenue requirement increase, these costs adjustments represent
13 the drivers or operating needs that are included in the total revenue requirement of
14 \$46,836,282 in the FPFTY 2024. These adjustments relate to Salaries and Benefits,
15 General and Administrative costs, Operating Expenses, and Inventory. PWSA also
16 included COVID- Related Expenses as well as Net ALCOSAN costs (Allegheny County
17 Sanitary Sewer Authority). PWSA provided a table breaking down these cost impacts.
18 (PWSA Statement No. 2 at 14-15).

19 **Q. WHAT HAS PWSA CLAIMED WITH RESPECT TO COVID-19 EXPENSES?**

20 A. Mr. Barca stated that COVID-19 expenses were not claimed in PWSA’s last rate case but
21 were deferred and included in this rate case. (PWSA St. No. 2 at 19). PWSA is claiming
22 \$263,215 of COVID-19 expenses in the FPFTY which represents expenses incurred
23 between the period March 2020 – March 2021 and are related to personal protection
24 equipment. (PWSA St. No. 2 at 19). Mr. Barca stated that no uncollectible amount is
25 being recovered through this claim. (PWSA St. No. 2 at 19).

1 **Q. WHAT HAS MR. BARCA PROPOSED WITH RESPECT TO PWSA'S**
2 **FINANCIAL METRICS (DEBT SERVICE COVERAGE RATIO (DSC) FOR 2024?**

3 **A.** As shown on PWSA St. No. 2 at 43, Mr. Barca has proposed the following DSC for the
4 FY 2024.

	<u>FY 2024</u>
6 Senior Debt Service Coverage Ratio	1.65x
7 Total Debt Service Coverage Ratio	1.21x

8 **Q. DOES YOUR ANALYSIS ADOPT MR. BARCA'S DSC RATIO FOR 2024?**

9 **A.** Yes. My Exhibit DM-19 reflects my recommendations with respect to PWSA's DSC Ratio
10 for the FPFTY 2024.

11 **Q. WHAT HAS MR. BARCA PROPOSED WITH RESPECT TO PROJECTED CASH**
12 **FLOW AND DAYS CASH ON HAND (DCOH)?**

13 **A.** As shown on PWSA Exhibit EB-2, PWSA has proposed the following DCOH?

	<u>FY 2024</u>
15 Days Cash on Hand (Days O&M)	247.6
16 Including ALCOSAN Expenses	145.0

17

18 **III. REVENUE REQUIREMENT ISSUES**

19 **A. SUMMARY**

20 **Q. WHAT ARE THE OVERALL RECOMMENDATIONS YOU ARE PROPOSING IN**
21 **THIS RATE FILING?**

22 **A.** Based upon the use of PWSA's FPFTY ending December 31, 2024, I have the following
23 recommendations:

- 24 • My recommended System Revenues for the FPFTY 2024 are \$239,067,140, which is
25 \$16,251,907 lower than the Authority's proposed FPFTY 2024 System Revenues of

1 \$255,319,046. This results in a recommended revenue requirement increase of
2 \$30,584,475.

- 3 • My recommended Direct Operating Expenses for the FPFTY 2024 are \$115,377,922
4 which is \$14,783,691 lower than the Authority’s proposed FPFTY 2024 Direct
5 Operating Expenses of \$130,161,613.
- 6 • My recommended Other Operating Expenses for the FPFTY 2024 are \$5,430,588,
7 which is \$319,070 lower than the Authority’s FPFTY 2024 Other Operating Expenses
8 of \$5,749,659.
- 9 • My recommended total Debt Service (Revenues Available for Debt Service)
10 Coverage for the FPFTY 2024 is \$116,853,909, which is \$1,960 lower than the
11 Authority’s proposed Debt Service for the FPFTY 2024 of \$116,855,869.
- 12 • My recommended Capital Expenditures/Transfers for the FPFTY 2024 are
13 \$15,778,191, which is \$6,652,296 lower than the Authority’s proposed FPFTY 2024
14 Capital Expenditures/Transfers of \$22,430,487.
- 15 • My Senior Debt Service Coverage Ratio for the FPFTY 2024 is 1.6524x, which is the
16 same as the Authority’s proposed Senior Debt Service Coverage Ratio for the FPFTY
17 2024 of 1.6524x.
- 18 • My recommended Cash Flow Projections is 279.08 days Cash on Hand (DCOH) for
19 the FPFTY 2024, as compared to the Authority’s proposed FPFTY 2024 DCOH of
20 247.59 days. My recommended Cash Flow Projection including the ALCOSAN
21 billing payments are 155.27 days Cash on Hand (DCOH) for the FPFTY 2024, as
22 compared to the Authority’s proposed FPFTY 2024 DCOH of 145.01.
- 23 • My overall recommended Revenue Requirement increase for the FPFTY 2024 is
24 \$30,584,475 (14.67%) which is \$16,251,907 lower than the Authority’s proposed
25 FPFTY 2024 increase of \$46,836,382 (22.467%)

26
27 **Q. DO YOU HAVE EXHIBITS TO REFLECT THESE RECOMMENDATIONS?**

28 **A.** Yes. Attached are Exhibits DM-1 through DM-21. The Exhibits reflect the OCA’s
29 adjustments for each of the Authority’s proposed revenue requirement increase under the
30 FPFTY 2024.

1 **B. SYSTEM REVENUE REQUIREMENT**

2 **Q. PLEASE DESCRIBE THE AUTHORITY’S SYSTEM REVENUE REQUIREMENT**
3 **UNDER THE FPFTY 2024 PERIOD.**

4 **A.** As shown on PWSA Exhibit EB-2, the Authority has prepared a Statement of Income at
5 Proposed Rates to calculate its overall proposed Rate Revenue increase under each of the
6 rate years (FPFTY 2024. The breakdown of this balance is the need to recover O&M
7 Expenses, Debt Service, and Capital Expenditures and Transfers. The System Revenue
8 Surplus is calculated at \$44,663 under the FPFTY 2024. A detailed breakdown by utility
9 operations for each of the rate years is shown on PWSA Exhibit EB-2.

10 **1. SYSTEM REVENUES**

11 **Q. WHAT HAS THE AUTHORITY PROPOSED REGARDING ITS TOTAL SYSTEM**
12 **REVENUES?**

13 **A.** As shown on PWSA Exhibit EB-2, the Authority has proposed total System Revenues for
14 FPFTY 2024 as follows:

	<u>FPFTY 2024</u>
16	
17	Water Sales \$152,352,358
18	Wastewater Sales \$ 50,124,557
19	Stormwater Sales \$ 29,833,260
20	Sales for Resale/Contract \$ 4,404,330
21	DSIC Revenues \$ 15,038,462
22	Other Revenues \$ 3,566,080
23	Penalties and Interest \$ <u>0</u>
24	Total System Revenues \$255,319,046

25 **Q. HOW DID THE AUTHORITY ALLOCATE THE REVENUE REQUIREMENT TO**
26 **THE UTILITY SERVICES ABOVE?**

27 **A.** According to PWSA witness Mr. Smith, the revenue requirements were determined based
28 upon a set of allocation factors that were assigned each to the water, wastewater, and
29 stormwater for the FPFTY period. (PWSA St. No. 7 at 15).

30 **Q. DO YOU HAVE ANY CHANGES TO THE AUTHORITY’S PROPOSED**
31 **ALLOCATION OF THE REVENUE REQUIREMENT AS BETWEEN WATER,**
32 **WASTEWATER AND STORM WATER FOR THE FPFTY 2024?**

1 A. No. I am accepting the Authority’s proposed allocation for the FPFTY. I show the scaled
2 back revenue requirement allocation as between water, wastewater, and storm water in
3 Exhibit DM-2.

4 **Q. WHAT CHANGES DO YOU HAVE WITH RESPECT TO THE AUTHORITY’S**
5 **PROPOSED SYSTEM REVENUES THE FPFTY 2024?**

6 A. My System Revenue adjustments correspond to the adjustments that I made to the
7 Authority’s Direct and Other Operating Expenses for the FPFTY 2024 period, which I
8 discuss further in my testimony. In sum, my recommended System Revenues for the
9 FPFTY 2024 is \$239,067,140. My allocation is as follows and shown on my Exhibit DM-
10 2:

11 FPFTY 2024

12	Water Sales	\$139,322,271
13	Wastewater Sales	\$ 55,095,035
14	Stormwater Sales	\$ 26,722,451
15	Sales for Resale /Contract	\$ 4,273,305
16	DSIC Revenues (5%)	\$ 9,645,034
17	Other Revenues	\$ 4,009,044
18	Penalties and Interest	\$ <u>0</u>
19	Total System Revenues	\$239,067,140

20

21 **Q. PLEASE EXPLAIN YOUR ADJUSTMENTS WITH RESPECT TO PWSA’S BILL**
22 **DISCOUNT PROGRAM FUNDING AND ARREARAGE FUNDNG?**

23 A. As more fully explained by OCA Witness Roger Colton (OCA St. 4), I am adding \$560,915
24 for the Bill Discount Program and \$631,461 for the Arrearage Funding. This is shown
25 on my Exhibit DM-4.

26 **Q. PLEASE EXPLAIN YOUR ADJUSTMENTS WITH RESPECT TO PWSA’S FEES**
27 **FOR CUSTOMER PAYMENTS BY DEBIT CARDS/CREDIT CARDS?**

28 A. As more fully explained by OCA Witness Barbara Alexander (OCA St. 5), I am adding
29 \$470,000 for debit card/credit card processing fees that are projected to apply if Witness
30 Alexander’s recommendation is adopted. This is shown on my Exhibit DM-4.

1 **2. OPERATING EXPENSES – DIRECT**

2 **Q. WHAT HAS PWSA PROPOSED REGARDING ITS OPERATING EXPENSES –**
3 **DIRECT?**

4 **A.** As shown on PWSA Exhibit EB-2, the Authority has proposed total Operating Expenses –
5 Direct for the FPFTY 2024 of \$130,161,613.

6 **Q. DID PWSA ALLOCATE THE OPERATING EXPENSES – DIRECT TO THE**
7 **WATER, WASTEWATER CONVEYANCE AND STORMWATER UTILITY**
8 **SERVICES?**

9 **A.** Yes. As stated in PWSA Mr. Smith’s testimony (PWSA St. No. 7 at 15), the Authority
10 allocated and assigned these costs to each of the water, wastewater conveyance and
11 stormwater utility services as shown on PWSA Exhibit HJS-1. Mr. Smith provided a
12 summary of factors that were used to assign costs to each of the services above, and as
13 detailed in PWSA Exhibit HJS-2.

14 **Q. HOW DID THE PWSA DEVELOP ITS OPERATING BUDGETS FOR ITS FPFTY**
15 **THAT WAS USED TO SUPPORT THE PROPOSED REVENUE**
16 **REQUIREMENT?**

17 **A.** As noted previously, Mr. Barca stated that the FTY (2023) and the FPFTY (2024) results
18 were derived through a comprehensive Authority-wide budgeting process. The Authority
19 used a zero-based budgeting method to develop annual budgets and each cost is
20 individually considered when developing the budget. (PWSA St. No. 2 at 9). Mr. Barca
21 stated that each of the fifteen departments within the PWSA prepared budget requests for
22 the upcoming fiscal year and those requests are reviewed by the Finance Department for
23 accuracy and adherence to the realistic expectations and/or projections. (PWSA St. No. 2
24 at 12). The Finance Department prepared a roll-up of initial funding and expense
25 recommendations for the Chief Executive Officer and Chief Operating Officer/Chief
26 Financial Officer, which then may make recommendations on the initial budget requests.
27 (PWSA St. No. 2 at 12). Once satisfied, the Chief Executive Officer and Chief Operating
28 Officer prepared an operating budget for review by the Board, which can accept or modify
29 the operating budget. (PWSA St. No. 2 at 12).

1 **Q. HOW DID YOU APPROACH THE DEVELOPMENT OF YOUR DIRECT**
2 **OPERATING EXPENSE ADJUSTMENTS IN THE FPFTY 2024?**

3 **A.** I reviewed the Authority’s PWSA Cost of Service Study Model 2024 (PWSA COS Model
4 2024) and, specifically, reviewed each of the Authority’s 15-line item Direct Operating
5 Expense accounts shown on PWSA Exhibit EB-2. I also reviewed the data responses
6 submitted by the Authority in OCA Set 6, Set 15 and Set 18, as well as the Authority Index
7 to Rate Filing Package Filing Requirement (Volume I). I reviewed the Bureau of
8 Investigation and Enforcement’s discovery responses from the Authority as well. I
9 analyzed and reviewed the Authority’s adjustments beginning with the HTY period (2022),
10 through the FPFTY (2024) period and noted and evaluated any adjustments that might be
11 escalation costs in nature, unusual or large variations from prior historical periods, one-
12 time expense items, and whether such costs included in the HTY and through the FPFTY
13 were abnormal adjustments, or anomalies as compared to prior years adjustments.

14 **Q. DID YOU UTILIZE TWO-YEAR NORMALIZATION IN CERTAIN AREAS OF**
15 **YOUR ANALYSIS?**

16 **A.** Yes. In my review, and in certain instances, I utilized two-year normalizations in areas
17 where the Authority had incurred no costs or expenses in prior years, cost increases and
18 projected or budgeted over what was incurred in prior years and reviewed whether those
19 cost increases were reasonable and prudent in nature. The use of a two-year normalization
20 is a reasonable approach in developing cost adjustments, on a budgeted basis prospectively.
21 Given that PWSA has filed rate cases proceeding every two years, the normalization
22 approach will allow PWSA to recovery costs between rate cases until such time PWSA
23 files another base rate case proceeding and maintain its expense recovery on a consistent
24 and constant basis. Costs incurred from prior years typically show a trend that can be
25 utilized to set costs in the future. My normalization approach increases or decreases the
26 Authority’s proposed direct operation expense balances. By not normalizing certain
27 expenses, there is a tendency to over-collect costs in future periods, which would result in
28 unjust and unreasonable rates.

29

1 **Q. HAVE YOU CONSIDERED PWSA’S HISTORICAL EXPENSES AS PART OF**
2 **YOUR ANALYSIS?**

3 A. Yes. In other areas of the Authority’s proposed operating expenses, I used my informed
4 judgment to recommend whether the costs should be disallowed or partially allowed. This
5 approach was based on whether there were any prior expenses incurred under the 2020-2022
6 period, the FY 2023 and expected to be incurred in the FPFTY 2024 periods. If no costs
7 were incurred in prior years, it is difficult to gauge or determine whether a forecasted or
8 budgeted cost proposed by the Authority was reasonable as there was nothing with which to
9 compare the forecasted or budgeted costs. While it is expected that some level of costs will
10 be incurred in these instances, there is no basis to support the specific level of costs proposed
11 by PWSA. To determine whether proposed costs are reasonable, and thus, should be allowed
12 in rates, proposed expenditures must be continuing and recurring. There is a degree of
13 interpretation involved when reviewing forecasted data, and different levels of interpretation
14 can vary among the parties to the proceeding and ultimately be determined and included by
15 the Commission. My adjustments to PWSA’s proposed expenses will all PWSA to recover
16 all reasonable costs and strike the appropriate balance between ratepayers and PWSA.

17 **Q. HAS THE AUTHORITY RELIED UPON CLAIMED ESCALATION COSTS IN ITS**
18 **FILING?**

19 A. Yes. With respect to escalation costs, the Authority stated in response to OCA-Set 6-12 that
20 it utilized escalation factors for certain expense categories in FY 2024. PWSA has provided
21 the following CPI Indexes that PWSA has utilized to develop and set rates in the FPFTY
22 2024:

<u>Item/Category/Expense</u>	<u>Assumptions</u>
Cost of Living Increases (COLA) Salaries and Wages	3.00%/
Short – Term Disability/Long-Term Disability	4.00%
AD&D	4.00%
Dental	1.00%
Vision	4.00%
Medical	13.00%
Chemical	20.00%

1	Utility	15%
2	All Other Operating Expenses	6%

3

4 **Q. SHOULD BLANKET INFLATIONS ADJUSTMENTS BE RELIED UPON TO**
5 **SUPPORT PWSA’S CLAIMS?**

6

7 A. No. I am of the opinion that inflationary costs or escalation costs should not be used for
8 ratemaking purposes or to set rates for service. Inflationary type increases do not provide a
9 good index of cost increases, but rather are overall blanket-type adjustments that are typically
10 applied to all goods and services that may not directly relate to costs incurred by the
11 Authority. It is simply a forecast or prediction of cost adjustments, and it is based upon
12 speculation. In part, inflationary type adjustments are not known and measurable and do not
13 reflect costs PWSA will incur during the period when rates are set for utility service.
14 Inflationary adjustments particularly relate to housing, clothing, food, etc. which are not
15 typically costs that are incurred by a public utility in the provision of safe and reliable
16 service. While such inflationary adjustments are used to develop economic data, they
17 typically should not be used for ratemaking purposes. As costs of goods and services
18 fluctuate over time, applying escalation factors to adjust costs is not a proper approach that
19 should be utilized in setting rates for utility service. I am advised by counsel that the
20 Commission has rejected blanket inflation adjustments in the past. Additionally, as I noted
21 earlier, the data, support, and basis for any projected inflation rate must be carefully analyzed
22 with respect to each of PWSA’s claimed costs. As more fully explained in my testimony, I
23 have utilized certain adjustments to PWSA’s expenses in the FPFTY 2024 period to reflect
24 a reasonable and prudent level of costs to be collected prospectively. More specifically, I
25 have adjusted PWSA’s certain Operating Expenses, General and Administrative Expenses,
26 Inventory, and Chemical Expenses based upon certain information I relied upon with respect
27 to cost adjustments expected to be incurred under the FPFTY 2024. I note that the Authority
28 remains responsible to substantiate all of its claims, and where the Authority did not do so,
29 I am recommending adjustments.

30 Finally, with respect to Salaries and Employee Benefits, I normalized these adjustments
31 over the three-year period (FY 2022 – FY 2024) through the use of a vacancy rate ratio (OC

1 A-Set 6-5). The Authority has indicated that the total employee count as of April 23, 2023,
2 was 393 (OCA-Set 6-25) and it is expecting to fill 33 positions in the FPFTY 2024. I
3 performed an analysis and developed a ratio of total filled employee positions to the number
4 of vacant positions for the FPFTY 2024. I compared the results to the Authority's proposed
5 Salaries and Employee Benefits as shown on the Authority's COSS Model 2021 tabs 910
6 through 930 under the Allocated Costs for each utility (water, wastewater and stormwater).
7 I then made adjustments to the Authority's FPFTY 2024 period related to Salaries and
8 Employee Benefits. I further discuss these adjustments in each of the following department
9 categories (operating expense accounts).

10 **Q. WHAT CHANGES DO YOU HAVE WITH RESPECT TO THE AUTHORITY'S**
11 **PROPOSED DIRECT OPERATING EXPENSES OF \$130,161,613 FOR THE**
12 **FPFTY 2024?**

13 **A.** I have made adjustments to each of the Authority's 15-line item Direct Operating expense
14 accounts. My total recommended Direct Operating Expenses are as follows, and as shown
15 on my Exhibits DM-3 through DM-17.

16 FYFTY 2024 \$115,377,922

17 **a. Executive Director - 910**⁵

18 **Q. WHAT DID THE AUTHORITY PROPOSE WITH RESPECT TO ITS**
19 **EXECUTIVE DIRECTOR EXPENSES FOR THE FPFTY 2024?**

20 **A.** As shown on PWSA Exhibit EB-2 (Line 9) and tab 910 of the PWSA COS Model 2024,
21 the Authority proposed a FPFTY 2024 balance of \$3,336,780. These balances were broken
22 down by utility service as shown on PWSA Exhibits HJS-1 and HJS-2. These balances are
23 comprised of Salary and Benefits, O&M Expenses, Inventory and General Administrative
24 Expenses. PWSA indexed its Salaries by cost of living adjustments for its employees
25 (COLA) in the amount of 3.00% annually in FY 2024. (OCA Set 6-12). PWSA indexed
26 its Benefits by COLA ranging from 1.00% to 13.00% for various employee benefits

⁵ Any differences between PWSA's COS Model 2024 related to Salary and Benefits and Mr. Mugrace's balances for Salary and Benefits are due to rounding issues.

coverages as shown in response to OCA-Set 6-12 in the FPFTY 2024. PWSA indexed its General and Administrative (G&A) expenses by indexing these costs by 6.00% (OCA-Set-6-12) in the FPFTY 2024.

Q. WHAT ADJUSTMENTS DO YOU HAVE WITH RESPECT TO THE AUTHORITY’S EXECUTIVE DIRECTOR ACCOUNT BALANCE RELATED TO SALARY AND BENEFITS?

A. I first reviewed the Salary and Benefits balance. The Authority proposed total Salary and Benefits of \$1,392,142 and \$303,212, respectively in the FPFTY 2024 period. (PWSA COSS Model 2024 tab 910 Column w through AA Lines 298 through 321). In response to OCA-Set-6-5, PWSA provided a vacancy rate analysis for all of its employees from FY 2020 through the projected period FY 2026. In response to OCA-Set-6-6, PWSA stated that it anticipated hiring 33 employees in the FPFTY 2024. PWSA stated that as of April 23, 2023, there were 393 employees employed at the PWSA. (OCA-Set-6-25). I am recommending the use of a vacancy rate ratio to set the employee levels under the FPFTY 2024. Using a three-year vacancy ratio for the periods of 2022-2024 to set the ratio for the FPFTY 2024 using the information shown in response to OCA Set 6-5, I arrived at a normalized vacancy level of 12.61% for the FPFTY 2024. This is calculated as follows:

Year	Total Emp.	Vacancies	Projected Emp.	3-Yr Vacancy Ratio	3-Yr-Projected Emp	Vacancy Ratio
2020	311	122	433			
2021	308	103	411			
2022	370	89	459			
2023	393	48	441			
2024	435	33	458	57	452	12.61%
3-yr total Avg. vacancies		170 / 3 years	=	57 /	452	= 12.61%
(Total Vacancies 2022-2024 - 89+48+33= 170)						

The use of a three-year normalization (2022-2024) for Salary and Benefits expenses is appropriate, given the Authority’s prior years’ level of employee count. The Authority has not appeared to have accelerated its level of employees in prior years. This analysis shows that there is a gap in filling needed staffing levels. The year by year adjustment and comparison of employee vacancies show a level of disparate and varying vacancy rates over the years (2020-2024). It is unclear whether the Authority will fill all vacancies as

1 stated under the FPFTY 2024. I note that the Authority has consistently failed to fill all
2 claimed vacancies, and its projections have failed to materialize, leading to overpayment
3 by ratepayers. Moreso, vacancies occur throughout the year and employee levels will
4 fluctuate from month to month depending on the level of retirements, voluntary and
5 involuntary leaves, lay-offs, and firing. Employee vacancies are an inherent issue in a
6 business environment. Given this disparity from year to year, I adjusted the Authority's
7 proposed Executive Salary and Benefits balance for the three-year period by the vacancy
8 rate ratios for each of the three-year period 2024-2026. I multiplied those amounts by the
9 vacancy ratio of 12.61% (FPFTY 2024) to arrive at an adjusted level of \$1,175,325 for
10 Salaries and \$264,977 for Benefits in the FPFTY 2024 period. These adjustments also
11 flow through the remaining cost categories of PWSA so my recommendations related to
12 Salary and Benefits will be consistent in all of the cost categories and all of PWSA's Direct
13 Operating Expenses (with the exception of Bonuses, which only occurred under the
14 Executive Director category).

15 **Q. WHAT OTHER ADJUSTMENTS DID YOU MAKE IN PWSA'S EXECUTIVE**
16 **DIRECTOR CATEGORY?**

17 **A.** In response to OCA Set-6-6 and Set 6-20, PWSA proposed to include bonuses for the Chief
18 Executive Officer in the amount of \$47,223 in the FPFTY 2024. I am recommending
19 disallowing these bonuses for rate making purposes as PWSA did not provide any
20 performance goals or metrics related to the receipt of money attributable to the Chief
21 Executive Officer. In response to OCA Set 6-20, PWSA stated that a nominal flat-dollar
22 amount bonus per employee per year is discretionary and not guaranteed in future years.
23 Given the lack of information and performance goals, the disallowance is appropriate as
24 there is an absence of whether the bonus is attributable to any customer service metrics or
25 identifiable goal achievement related to safety or reliability measures.

26 **Q. WHAT HAS PWSA PROPOSED WITH RESPECT TO ITS INVENTORY AND**
27 **GENERAL AND ADMINISTRATIVE EXPENSES FOR ITS EXECUTIVE**
28 **DIRECTOR?**

29 **A.** As shown on PWSA COS Model 2024, tab 910, (beginning on line 298 and columns U
30 through AA), PWSA included a 6% adjustment for each of the adjustments for Inventory
31 and General and Administrative expenses from 2023 through 2026.

1 **Q. WHAT ARE YOUR ADJUSTMENTS TO THE AUTHORITY’S EXECUTIVE**
2 **DIRECTOR ACCOUNT BALANCE RELATED TO INVENTORY AND**
3 **GENERAL ADMINISTRATIVE?**

4 **A.** I am recommending a 2.3% adjustment in the FPFTY 2024. I based my adjustments by
5 relying on the information shown on Statista⁶ which projected consumer price index as
6 being 2.3% in 2024. Using this index adjustments, I adjusted PWSA Inventory and General
7 and Administrative costs by 2.3% from 2023 to 2024.

8 **Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO THE AUTHORITY’S**
9 **EXECUTIVE DIRECTOR EXPENSES FOR EACH OF THE RATE YEARS?**

10 **A.** My total adjustments are a \$312,347 reduction in the FPFTY 2024. This is shown on my
11 Exhibit DM-3.

12 **b. Customer Service - 911**

13 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO ITS**
14 **CUSTOMER SERVICE EXPENSES FOR THE FPFTY 2024?**

15 **A.** As shown on PWSA Exhibit EB-2, Line 10 and tab 911 of the PWSA COS Model 2024,
16 the Authority proposed a FPFTY 2024 balance of \$9,577,647. These balances were broken
17 down by utility service as shown on PWSA Exhibit HJS-1 and HJS-2. These balances are
18 comprised of Salary and Benefits, O&M Expenses and General and Administrative.
19 PWSA indexed these expenses in the same manner as it did under the Executive Director
20 expense category, with respect to Salaries, Benefits, Operating Expenses, Inventory and
21 General and Administrative expenses and as I previously explained in my testimony.

22 **Q. WHAT ADJUSTMENTS DO YOU HAVE WITH RESPECT TO THE**
23 **AUTHORITY’S CUSTOMER SERVICE ACCOUNT BALANCE?**

24 **A.** My first adjustment is related to the Authority’s Salary and Benefits. For the same reasons
25 and consistent with my treatment of Salary and Benefits for all Direct Operating Expenses,
26 I utilized a three-year vacancy ratio for 2024 of 12.61% with the arguments that I explained
27 previously. I multiplied the Authority’s proposed Customer Salary and Benefits balances
28 of \$5,157,434 and \$1,815,642, respectively, by the vacancy ratio of 12.61% to arrive at an

⁶ [Projected U.S. inflation rate 2010-2028 | Statista](#)

1 adjusted level of \$4,507,082 for Salaries and \$1,586,690 for Benefits for the FPFTY 2024.
2 These are shown on my Exhibit DM-4.

3 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES**
4 **AND GENERAL ADMINSTRATIVE?**

5 **A.** I have adjustments to the Authority's Operating Expenses, Inventory and General
6 Administrative costs. As previously identified, PWSA has included a 6% adjustment for
7 each of these operating expense categories from the FPFTY 2024. (PWSA COS Model
8 2024 tab 911 (beginning on line 298 and columns U through AA). I am recommending a
9 2.3% adjustment in the FPFTY 2024. As previously stated, I based my adjustments by
10 relying on information shown on Statista which projected inflation in 2024. This reduces
11 PWSA's Operating Expense by \$8,788 in the FPFTY 2024. For the General and
12 Administrative expenses, the reduction is \$82,128 in the FPFTY 2024. These adjustments
13 are shown on my Exhibit DM-4.

14 **Q. WHAT OTHER ADJUSTMENTS HAVE YOU INCLUDED IN PWSA'S**
15 **CUSTOMER SERVICE EXPENSES?**

16 **A.** I am including costs recommended by Ms. Alexander of \$470,000 related to Credit
17 Card/Debit Card fees, as well as \$560,915 and \$631,461 related to the Expansion of Bill
18 Discount and Arrearage Forgiveness Program, respectively, as recommended by Mr.
19 Colton. Ms. Alexander and Mr. Colton discuss these adjustments in their testimonies.

20 **Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO PWSA'S CUSTOMER**
21 **SERVICE EXPENSES?**

22 **A.** My total adjustments are a reduction of \$970,221 in the FPFTY 2024. My adjustments
23 related to Ms. Alexander's and Mr. Colton's recommended adjustments as described above
24 total \$1,662,376. These are shown on my Exhibit DM-4.

25 **c. Management Information Systems - 912**

26 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO ITS**
27 **MANAGEMENT INFORMATION SYSTEMS FOR THE FPFTY 2024?**

28 **A.** As shown on PWSA Exhibit – EB-2, Line 11 and tab 912 of the PWSA COS Model 2024,
29 the Authority proposed a FPFTY 2024 balance of \$7,612,250 for its Management
30 Information Systems costs. These balances were broken down by utility service as shown

1 on PWSA HJS-1 and HJS-2. These balances are comprised of Salaries and Benefits,
2 Operating Expenses, Inventory and General and Administrative Expenses. PWSA indexed
3 these expenses in the same manner as it did under the previous addressed expense
4 categories, with respect to Salaries, Benefits, Operating Expenses, Inventory and General
5 and Administrative expenses and as I previously explained in my testimony.

6 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY'S**
7 **MANAGEMENT INFORMATION SYSTEMS ACCOUNT BALANCE?**

8 **A.** My first adjustment is related to the Authority's Salary and Benefits. The adjustment is
9 consistent with my treatment of Salary and Benefits for all PWSA's Direct Operating
10 Expenses, reflecting PWSA's vacancy rate analysis for all of its employees. In response
11 to OCA-Set-6-6, PWSA stated that it anticipated hiring 33 employees in the FPFTY 2024.
12 PWSA stated that as of April 23, 2023, there were 393 employees employed at the PWSA.
13 (OCA-Set-6-25). I am recommending the use of a vacancy rate ratio to set the employee
14 levels under the FPFTY 2024. I utilized a three-year vacancy ratio for FPFTY 2024 of
15 12.61% with the arguments that I explained previously. I then multiplied the Authority's
16 proposed MIS Salary and Benefits balances for the FPFTY 2024 period of \$2,450,094 and
17 \$653,409, respectively, by the vacancy rate ratio of 12.61% to arrive at an adjusted level
18 of \$2,141,137 for Salaries and \$571,014 for Benefits. These adjustments are shown on my
19 Exhibit DM-5.

20 **Q. WHAT OTHER ADJUSTMENTS DO YOU HAVE WITH RESPECT TO THE**
21 **AUTHORITY'S MIS EXPENSES?**

22 **A.** I reviewed the Authority's O&M Expenses, Inventory and General Administrative
23 category and have adjustments related to PWSA's 6% increase in these expense categories.
24 As previously identified, PWSA has included a 6% adjustment for each of these operating
25 expense categories for the FPFTY 2024. (PWSA COS Model 2024 tab 912 (beginning
26 on line 298 and columns U through AA). I am recommending a 2.3% adjustment in the
27 FPFTY 2024 for each of the expense categories listed above. As previously stated, I based
28 my adjustments by relying on information shown on Statista which projected inflation from
29 as being 2.3% from 2023 to 2024. This reduces the balance for Operating Expenses by
30 \$103,401 in the FPFTY 2024. For the Inventory expenses, this reduces the balance by \$38

1 in the FPPTY 2024. For the General and Administrative Expenses, this reduces the balance
2 by \$19,088 in the FPPTY 2024. This is shown on my Exhibit DM-5.⁷

3 **Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO PWSA’S MIS EXPENSES?**

4 **A.** My total adjustments are a reduction of \$513,879 in the FPPTY 2024. These are shown
5 on my Exhibit DM-5.

6 **d. Finance – 913**

7 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO ITS FINANCE**
8 **COSTS IN THE FPPTY 2024?**

9 **A.** As shown on PWSA Exhibit – EB-2, line 12 and tab 913 of the PWSA COS Model 2024,
10 the Authority has proposed a FPPTY 2024 balance of \$7,477,373. These balances were
11 broken down by utility service as shown on PWSA HJS-1 and HJS-2. These balances are
12 comprised of Salaries and Benefits, Operating Expenses, Inventory and General and
13 Administrative Expenses. PWSA indexed these expenses in the same manner as it did
14 under the previous addressed expense categories, with respect to Salaries, Benefits,
15 Operating Expenses, Inventory and General and Administrative expenses and as I
16 previously explained in my testimony.

17 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY’S**
18 **FINANCE BALANCE FOR THE FPPTY PERIOD?**

19 **A.** My first adjustment is related to the Authority’s Salary and Benefits. For the same reasons
20 and consistent with my treatment of Salary and Benefits for all PWSA’s Direct Operating
21 Expenses, I utilized a three-year vacancy ratio for FPPTY 2024 of 12.61%with the
22 arguments that I explained previously. I then multiplied the Authority’s proposed Finance
23 Salary and Benefits balances for the FPPTY 2024 period of \$2,042,753 and \$515,143,
24 respectively, by the vacancy rate ratio of 12.61% to arrive at an adjusted level of
25 \$1,785,162 for Salaries and \$450,183 for Benefits. This adjustment is shown on my Exhibit
26 DM-6.

⁷ In Account no. 7323, PWSA adjusted its expense by \$514,400 in the FPPTY 2024 and reduced this balance by \$701,556 in the FY 2025. I removed these costs from the calculation of 2.3% and 2.1% index adjustment, so as not to skew the high variability of costs from year to year.

1 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
2 **INVENTORY AND GENERAL ADMINISTRATIVE?**

3 **A.** I reviewed the Authority's O&M Expenses, Inventory and General Administrative
4 category and have adjustments related to PWSA's 6% increase in these expense categories.
5 As previously identified, PWSA has included a 6% adjustment for each of these operating
6 expense categories from the FPFTY 2024. (PWSA COS Model 2024 tab 913 (beginning
7 on line 298 and columns U through AA). I am recommending a 2.3% adjustment in the
8 FPFTY 2024 for each of the expense categories listed above. As previously stated, I based
9 my adjustments by relying on information shown on Statista which projected inflation from
10 2024 through 2026 as being 2.3% from 2023 to 2024. With respect to Operating Expenses,
11 PWSA has included Vehicle Expenses (Account 5190) in the amount of \$2,000,000 in the
12 FPFTY 2024. Prior costs (2020-2022) average out to about \$785,000. I am recommending
13 normalizing this cost over a two-year period or \$1,000,000 annually. PWSA stated that
14 this expense is to replace vehicles for the entire organization (OCA-18-8). I believe the
15 \$2,000,000 is excessive and not reflective of what PWSA has expensed in the past.
16 Therefore, I believe my recommended \$1,000,000 annual expense is appropriate. This
17 reduces the balance for Operating Expenses by \$1,142,745 in the FPFTY 2024. For the
18 Inventory expenses, this reduces the balance by \$13,691 in the FPFTY 2024. For the
19 General and Administrative Expenses, PWSA has included Pagers of \$60,000 (Account
20 7260). There were no prior costs for this expense in the 2020-2023 period; however, in
21 response to I&E RE-36, PSWA stated this account has been repurposed for the portion of
22 parking costs that is covered by employees. With that clarification, I am recommending
23 normalizing this cost over a two-year period or \$30,000 annually. Regardless of what this
24 account was used for, it is appropriate to normalize these costs, given there were no costs
25 in prior years. This reduces the balance by \$528,293 in the FPFTY 2024. These
26 adjustments are shown on my Exhibit DM-6.

27 **Q. WHAT IS YOUR TOTAL ADJUSTMENT TO THE AUTHORITY'S FINANCE**
28 **COSTS?**

29 **A.** My total adjustment is a reduction of \$2,007,280 in the FPFTY 2024 period as shown on
30 my Exhibit DM-6.

1 e. Human Resources - 915

2 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO ITS HUMAN**
3 **RESOURCES COSTS FOR THE FPFTY 2024?**

4 **A.** As shown on PWSA Exhibit EB-2, line 14, the Authority has proposed a Human Resources
5 balance of \$2,435,867 for the FPFTY 2024 period. The Authority also reflected this
6 balance in its PWSA COS Model 2024, tab 915. These balances were broken down by
7 utility service as shown on PWSA Exhibit HJS-1 and HJS-2. These balances are comprised
8 of Salaries and Benefits, Operating Expenses, Inventory and General and Administrative
9 Expenses. PWSA indexed these expenses in the same manner as it did under the previous
10 addressed expense categories, with respect to Salaries, Benefits, Operating Expenses,
11 Inventory and General and Administrative expenses and as I previously explained in my
12 testimony.

13 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY'S**
14 **HUMAN RESOURCE COSTS FOR THE FPFTY PERIOD?**

15 **A.** My first adjustment is related to the Authority's Salary and Benefits. For the same reasons
16 and consistent with my treatment of Salary and Benefits for all PWSA's Direct Operating
17 Expenses, I utilized a three-year vacancy ratio for FPFTY 2024 of 12.61% with the
18 arguments that I explained previously. I then multiplied the Authority's proposed Human
19 Resource Salary and Benefits balances for the FPFTY 2024 period of \$1,681,698 and
20 \$386,096, respectively, by the vacancy rate ratio of 12.61% to arrive at an adjusted level
21 of \$1,469,636 for Salaries and \$337,409 for Benefits. This is shown in my Exhibit DM-9.

22 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
23 **INVENTORY AND GENERAL ADMINISTRATIVE?**

24 **A.** I reviewed the Authority's O&M Expenses, Inventory and General Administrative category
25 and have adjustments related to PWSA's 6% increase in these expense categories. As
26 previously identified, PWSA has included a 6% adjustment for each of these operating
27 expense categories from the FPFTY 2024. (PWSA COS Model 2024 tab 915 (beginning on
28 line 298 and columns U through AA). I am recommending a 2.3% adjustment in the FPFTY
29 2024 for each of the expense categories listed above. As previously stated, I based my
30 adjustments by relying on information shown on Statista which projected inflation as being

1 2.3% from 2023 to 2024. This reduces the balance for Operating Expenses by \$203 in the
2 FPPTY 2024. For the Inventory expenses, this reduces the balance by \$145 in the FPPTY
3 2024. For the General and Administrative Expenses, this reduces the balance by \$12,499 in
4 the FPPTY 2024. These adjustments are shown on my Exhibit DM-7.

5 **Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO HUMAN RESOURCES?**

6 **A.** My total adjustment to Human Resources is a decrease of \$273,595 in the FPPTY 2024
7 period as shown on my Exhibit DM-7.

8 **f. Legal - 916**

9 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO ITS LEGAL**
10 **EXPENSE IN THE FPPTY 2024?**

11 **A.** As shown on PWSA Exhibit EB-2, line 15, the Authority has proposed Legal Expense of
12 \$4,215,778 for the FPPTY 2024 period. This is also shown on PWSA COS Model 2024,
13 tab 916. These balances were broken down by utility service as shown on PWSA Exhibit
14 HJS-1 and HJS-2. These balances are comprised of Salaries and Benefits, and General and
15 Administrative Expenses. PWSA indexed these expenses in the same manner as it did
16 under the previously addressed expense categories, with respect to Salaries, Benefits, and
17 General and Administrative expenses and as I previously explained in my testimony.

18 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY'S**
19 **LEGAL EXPENSE?**

20 **A.** My first adjustment is related to the Authority's Salary and Benefits. For the same reasons
21 and consistent with my treatment of Salary and Benefits for all PWSA's Direct Operating
22 Expenses, I utilized a three-year vacancy ratio for FPPTY 2024 of 12.61%. I then
23 multiplied the Authority's proposed Legal Salary and Benefits balances for the FPPTY
24 2024 period of \$992,620 and \$256,119, respectively, by the vacancy rate ratio of 12.61%
25 to arrive at an adjusted level of \$867,451 for Salaries and \$223,822 for Benefits. These
26 adjustments are shown on my Exhibit DM-8.

1 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO GENERAL**
2 **ADMINISTRATIVE?**

3 **A.** I reviewed the Authority’s General and Administrative category and I have adjustments
4 related to PWSA’s 6% increase in these expense categories. As previously identified,
5 PWSA has included a 6% adjustment for each of these operating expense categories from
6 the FPPTY 2024. (PWSA COS Model 2024 tab 916 (beginning on line 298 and columns
7 U through AA). I am recommending a 2.3% adjustment in the FPPTY 2024 for each of
8 the expense categories listed above. As previously stated, I based my adjustments by
9 relying on information shown on Statista which projected inflation through 2024. For the
10 General and Administrative Expenses, this reduces the balance by \$1,557,605 in the
11 FPPTY 2024. These adjustments are shown on my Exhibit DM-10. Included in the
12 General and Administrative Expense adjustments is a normalized expense related to Claims
13 Deductible (Account 7715). PWSA proposed a balance of \$750,000 in the FY 2023 and
14 increased this amount by \$45,000 to arrive at a balance of \$795,000 in the FPPTY 2024.
15 In response to OCA 18-9, PWSA stated that these costs are paid out by PWSA and can
16 fluctuate from year to year. PWSA was not able to anticipate the exact number of claims
17 in future years but must have funds available to pay when they occur. I am recommending
18 a two-year normalized level or \$352,500 annually, given that PWSA cannot anticipate the
19 number of claims. Prior costs averaged out to about \$685,000 (2020-2022), or an increase
20 of about 10% over FPPTY 2024 proforma balance.

21 **Q. WHAT ADJUSTMENT DID YOU MAKE WITH RESPECT TO PWSA’S RATE**
22 **CASE EXPENSES?**

23 **A.** I normalized PWSA’s rate case expenses over a two-year period. In the past PWSA has
24 filed rate cases in 2018, 2020, 2021 and 2023. Normalizing these expenses calculates to a
25 1.25 year period. (5 years divided by 4 rate cases or 1.25). I am recommending a two-year
26 period because the use of a normalized 1.25 year period will occur between rate cases, in
27 which PWSA will still be collecting and ultimately over-collect until PWSA files its next
28 base rate case. My calculation is consistent with the recommendation that the Commission
29 should not approve PWSA’s multi-year rate plan.

1 **Q. WHAT HAS PWSA INCLUDED FOR RATE CASE EXPENSES?**

2 **A.** In the PWSA COS Model 2024, tab 916 Account 7370, PWSA has included a balance of
3 \$2,865,750 in the FY 2023 and a balance of \$2,137,695 in the FPFTY 2024 which is the
4 bulk of the expenses related to rate case expenses (I&E RE-37-D). In response to OCA-
5 Set 6-14, PWSA has indicated that total rate case expenses included are \$2,577,303.
6 PWSA has not provided any information as to the differences in these amounts. PWSA
7 has not provided any further updates as to the total balance incurred related to rate case
8 expenses to date.

9 **Q. WHAT IS YOUR RECOMMENDATION TO PWSA'S RATE CASE EXPENSES?**

10 **A.** I am tentatively recommending normalizing the balance of \$2,137,695 over two years or
11 recovery of \$1,068,848 annually. This is shown on my Exhibit DM-8. However, my
12 recommendation is made with the caveat that PWSA should be required to provide an
13 update in its rejoinder testimony to substantiate its actual rate case expenditures and
14 projected expenditures through the end of the case. If PWSA does not do this, I reserve the
15 right to change my recommendation as necessary to ensure that PWSA's known and
16 identifiable costs available can be factored into my position for this evolving expense.

17 **Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO LEGAL EXPENSE?**

18 **A.** My total adjustments to Legal Expense are a reduction of \$1,715,071 in the FPFTY 2024.
19 These adjustments are shown on my Schedule DM-8.

20 **g. Safety & Security – 917**

21 **Q. WHAT HAS THE PWSA PROPOSED WITH RESPECT TO ITS SAFETY &
22 SECURITY IN THE FPFTY 2024?**

23 **A.** As shown on PWSA Exhibit EB-2, line 16, the Authority has proposed a Safety and
24 Security balance of \$2,341,028 for the FPFTY 2024 period. The Authority also reflected
25 this balance in its PWSA COS Model 2024, tab 917. These balances were broken down
26 by utility service as shown on PWSA Exhibit HJS-1 and HJS-2. These balances are
27 comprised of Salaries and Benefits, Operating Expenses, Inventory and General and
28 Administrative Expenses. PWSA indexed these expenses in the same manner as it did
29 under the previously addressed expense categories, with respect to Salaries, Benefits,

1 Operating Expenses, Inventory and General and Administrative expenses and as I
2 previously explained in my testimony.

3 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY'S**
4 **SAFETY AND SECURITY COSTS FOR THE FPFTY PERIOD?**

5 **A.** My first adjustment is related to the Authority's Salary and Benefits. For the same reasons
6 and consistent with my treatment of Salary and Benefits for all PWSA's Direct Operating
7 Expenses, I utilized a three-year vacancy ratio for FPFTY 2024 of 12.61% with the
8 arguments that I explained previously. I then multiplied the Authority's proposed Safety
9 and Security Salary and Benefits balances for the FPFTY 2024 period of \$929,122 and
10 \$333,753, respectively, by the vacancy rate ratio of 12.61% to arrive at an adjusted level
11 of \$811,960 for Salaries and \$291,667 for Benefits. These balances are shown in my
12 Exhibit DM-9.

13 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
14 **INVENTORY AND GENERAL ADMINISTRATIVE?**

15 **A.** I reviewed the Authority's O&M Expenses, Inventory and General Administrative
16 category and have adjustments related to PWSA's 6% increase in these expense categories.
17 As previously identified, PWSA has included a 6% adjustment for each of these operating
18 expense categories from the FPFTY 2024. (PWSA COS Model 2024 tab 917 (beginning
19 on line 298 and columns U through AA). I am recommending a 2.3% adjustment in the
20 FPFTY 2024. As previously stated, I based my adjustments by relying on information
21 shown on Statista which projected inflation as being 2.3% from 2023 to 2024. This
22 reduces the balance for Operating Expenses by \$393,070 in the FPFTY 2024. For the
23 Inventory expenses, this reduces the balance by \$36 in the FPFTY 2024. For the General
24 and Administrative Expenses, this reduces the balance by \$18,764 in the FPFTY 2024. In
25 addition to the adjustments above, I also normalized costs related to Account 5145 (Ground
26 Maintenance). PWSA proposed a balance to this account of \$53,250 in the FY 2023 period.
27 Prior costs were \$0 in 2020, \$0 in 2021 and \$102,089 in 2023. PWSA reduced this balance
28 by \$48,839 to arrive at the balance of \$53,250. Normalizing these expenses results in an
29 annual recovery of \$26,625 per year. PWSA also proposed a balance to Account 7440
30 (Ground Maintenance) \$27,000 in the FY 2023. Prior costs were \$0 in 2020, \$0 in 2021
31 and \$5,472 in 2022. PWSA adjusted this balance to \$21,528 to arrive at the balance of

1 \$27,000. Normalizing these expenses results in an annual recovery of \$13,500 per year.
2 Finally, PWSA proposed to recover \$690,483 related to Radionuclides (Account 5375).
3 (\$651,399 in the FY 2023 and \$651,399 in the FPFTY 2024 which include a 6.0%
4 increase). In response to OCA Set 18-11, PWSA stated that it was reclassified from Account
5 5370 (Operating Contracts Other). Prior costs were \$0 in the years 2020-2022. Under the
6 Water Treatment Tab 322, Radionuclides costs are shown with a balance of \$651,399 in
7 the FPFTY 2024. PWSA has not provided any reconciliation of these reclassified costs nor
8 provided how these costs are now allocated under Account 5375. I am recommending
9 normalizing these costs over a two-year period or \$325,700 (\$651,399/2). These
10 adjustments are shown on my Exhibit DM-9.

11 **Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO SAFETY AND SECURITY?**

12 **A.** My total adjustment to Safety and Security is a reduction of \$571,119 in the FPFTY 2024.
13 These adjustments are shown on my Exhibit DM-9.

14 **h. Public Affairs - 921**

15 **Q. WHAT HAS PWSA PROPOSED WITH RESPECT TO ITS PUBLIC AFFAIRS IN**
16 **THE FPFTY 2024?**

17 **A.** As shown on PWSA Exhibit EB-2, line 16, the Authority has proposed a Public Affairs
18 balance of \$1,902,691 in the FPFTY 2024. This balance is also shown on PWSA COS
19 Model 2024, tab 921. These balances were broken down by utility service as shown on
20 PWSA Exhibit HJS-1 and HJS-2. These balances are comprised of Salaries and Benefits,
21 Operating Expenses, and General and Administrative Expenses. PWSA indexed these
22 expenses in the same manner as it did under the previously addressed expense categories,
23 with respect to Salaries, Benefits, Operating Expenses, and General and Administrative
24 expenses and as I previously explained in my testimony.

25 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY'S**
26 **PUBLIC AFFAIRS COSTS FOR THE FPFTY PERIOD?**

27 **A.** My first adjustment is related to the Authority's Salary and Benefits. For the same reasons
28 and consistent with my treatment of Salary and Benefits for all PWSA's Direct Operating
29 Expenses, I utilized a three-year vacancy ratio for FPFTY 2024 of 12.61% with the

1 arguments that I explained previously. I then multiplied the Authority's proposed Public
2 Affairs Salary and Benefits balances for the FPFTY 2024 period of \$989,801 and
3 \$233,570, respectively, by the vacancy rate ratio of 12.61% to arrive at an adjusted level
4 of \$864,987 for Salaries and \$204,117 for Benefits. These balances are shown in my
5 Exhibit DM-10.

6 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
7 **AND GENERAL ADMINISTRATIVE?**

8 **A.** I reviewed the Authority's O&M Expenses, and General Administrative category and have
9 adjustments related to PWSA's 6% increase in these expense categories. As previously
10 identified, PWSA has included a 6% adjustment for each of these operating expense
11 categories from the FPFTY 2024. (PWSA COS Model 2024 tab 921 (beginning on line
12 298 and columns U through AA). I am recommending a 2.3% adjustment in the FPFTY
13 2024 for each of the expense categories listed above. As previously stated, I based my
14 adjustments by relying on information shown on Statista which projected inflation as being
15 2.3% from 2023 to 2024. This reduces the balance for Operating Expenses by \$85,812 in
16 the FPFTY 2024, 6. For the General and Administrative Expenses, this reduces the balance
17 by \$14,626 in the FPFTY 2024. In addition to the adjustments above, I also normalized
18 costs related to Account 5145 (Ground Maintenance). PWSA proposed a balance to this
19 account of \$150,000 in the FY 2023 period. Prior costs were \$0 in 2020, \$0 in 2021 and
20 \$0 in 2022. PWSA increased this balance by \$150,000 in the FY 2023 and added \$9,000
21 to arrive at the balance of \$159,000 in the FPFTY 2024. In response to OCA Set 18-16,
22 these costs relate to the design and creation of signs for capital projects and community
23 events, and to help educate the public (and ratepayers) on PWSA's ongoing projects. I am
24 recommending normalizing these costs over a two-year period using FY 2023 costs of
25 \$150,000 or \$75,000 annually. These adjustments are shown on my Exhibit DM-10.

26 **Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO THE AUTHORITY'S PUBLIC**
27 **AFFAIRS COSTS?**

28 **A.** My total adjustment to the Authority's Public Affairs costs is a reduction of \$254,705 in
29 the FPFTY 2024 as shown on my Exhibit DM-10.

1 i. Warehouse - 918

2 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO ITS**
3 **WAREHOUSE COSTS FOR THE FPFTY 2024?**

4 **A.** As shown on PWSA Exhibit EB-2, Line 18, the Authority has proposed a balance of
5 \$562,638 in the FPFTY 2024 (line 18). This balance is also shown on PWSA COS Model
6 2024, tab 918. These balances were broken down by utility service as shown on PWSA
7 Exhibit HJS-1 and HJS-2. These balances are comprised of Salaries and Benefits,
8 Operating Expenses, and General and Administrative Expenses. PWSA indexed these
9 expenses in the same manner as it did under the previously addressed expense categories,
10 with respect to Salaries, Benefits, Operating Expenses, and General and Administrative
11 expenses and as I previously explained in my testimony.

12 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY'S**
13 **WAREHOUSING COSTS FOR THE FPFTY PERIOD?**

14 **A.** My first adjustment is related to the Authority's Salary and Benefits. For the same reasons
15 and consistent with my treatment of Salary and Benefits for all PWSA's Direct Operating
16 Expenses that recognizes PWSA actual vacancy data, I utilized a three-year vacancy ratio
17 for FPFTY 2024 of 12.61% with the arguments that I explained previously. I then
18 multiplied the Authority's proposed Warehousing Salary and Benefits balances for the
19 FPFTY 2024 period of \$389,615 and \$140,226, respectively, by the vacancy rate ratio of
20 12.61% to arrive at an adjusted level of \$340,485 for Salaries and \$122,544 for Benefits.
21 These balances are shown in my Exhibit DM-12.

22 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
23 **AND GENERAL ADMINISTRATIVE?**

24 **A.** I reviewed the Authority's O&M Expenses, and General Administrative category and have
25 adjustments related to PWSA's 6% increase in these expense categories. As previously
26 identified, PWSA has included a 6% adjustment for each of these operating expense
27 categories from the FPFTY 2024. (PWSA COS Model 2024 tab 921, beginning on line
28 298 and columns U through AA). I am recommending a 2.3% adjustment in the FPFTY
29 2024 for each of the expense categories listed above. As previously stated, I based my
30 adjustments by relying on information shown on Statista which projected inflation as being

1 2.3% from 2023 to 2024. This increases the balance for Operating Expenses by \$331 in the
2 FPPTY 2024. For the General and Administrative Expenses, this reduces the balance by
3 \$453 in the FPPTY 2024. These adjustments are shown on my Exhibit DM-12.

4 **Q. WHAT IS YOUR TOTAL ADJUSTMENT TO THE AUTHORITY'S**
5 **WAREHOUSE EXPENSES?**

6 **A.** My total adjustment is a reduction of \$66,935 in the FPPTY 2024. These adjustments are
7 shown on my Exhibit DM-12.

8 **j. Water Quality - 321**

9 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO WATER**
10 **QUALITY FOR THE FPPTY 2024?**

11 **A.** As shown on PWSA Exhibit EB-2, Line 21, the Authority has proposed a balance of
12 \$2,676,383 for the FPPTY 2024 (line 21). This balance is also shown on PWSA COS
13 Model 2024, tab 321. These balances were broken down by utility service as shown on
14 PWSA Exhibit HJS-1 and HJS-2. These balances are comprised of Salaries and Benefits,
15 Operating Expenses, and General and Administrative Expenses. PWSA indexed these
16 expenses in the same manner as it did under the previously addressed expense categories,
17 with respect to Salaries, Benefits, Operating Expenses, and General and Administrative
18 expenses and as I previously explained in my testimony.

19 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY'S**
20 **WATER QUALITY COSTS FOR THE FPPTY PERIOD?**

21 **A.** My first adjustment is related to the Authority's Salary and Benefits. For the same reasons
22 and consistent with my treatment of Salary and Benefits for all PWSA's Direct Operating
23 Expenses, which reflects PWSA's actual vacancy data, I utilized a three-year vacancy ratio
24 for FPPTY 2024 of 12.61%, with the arguments that I explained previously. I then
25 multiplied the Authority's proposed Water Quality Salary and Benefits balances for the
26 FPPTY 2024 period of \$1,225,567 and \$350,968, respectively, by the vacancy rate ratio of
27 12.61% to arrive at an adjusted level of \$1,071,023 for Salaries and \$3,06,711 for Benefits.
28 These balances are shown in my Exhibit DM-13.

1 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
2 **AND GENERAL ADMINISTRATIVE?**

3 **A.** I reviewed the Authority’s O&M Expenses, and General Administrative category and have
4 adjustments related to PWSA’s 6% increase in these expense categories. As previously
5 identified, PWSA has included a 6% adjustment for each of these operating expense
6 categories from the FPFTY 2024. (PWSA COS Model tab 321 (beginning on line 298 and
7 columns U through AA). I am recommending a 2.3% adjustment in the FPFTY 2024 for
8 each of the expense categories listed above. As previously stated, I based my adjustments
9 by relying on information shown on Statista which projected inflation being 2.3% from
10 2023 to 2024. This reduces the balance for Operating Expenses by \$85,924 in the FPFTY
11 2024. For Inventory this reduces the balance by \$93 in the FPFTY 2024. For the General
12 and Administrative Expenses, this reduces the balance by \$17,904 in the FPFTY 2024. In
13 addition to the adjustments above, I also normalized costs related to Account 5452
14 (Machinery Repairs). PWSA proposed a balance to this account of \$128,112 in the FY
15 2023 period. Prior costs were \$0 in 2020, \$21,961 in 2021 and \$22,314 in 2023. PWSA
16 increased this balance by \$105,798 to arrive at the balance of \$128,112 in the FY 2023.
17 Normalizing these expenses results in an annual recovery of \$64,056 per year. These
18 adjustments are shown on my Exhibit DM-13.

19 **Q. WHAT IS YOUR RECOMMENDED ADJUSTMENT REGARDING THE**
20 **AUTHORITY’S WATER QUALITY COSTS?**

21 **A.** My recommended adjustments result in a reduction of \$302,722 in the FPFTY 2024 and
22 are shown on my Exhibit DM-13.

23 **k. Plant Operations – 322 Water Treatment**

24 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO ITS PLANT**
25 **OPERATIONS FOR THE FPFTY 2024?**

26 **A.** As shown on PWSA Exhibit EB-2, Line 22, the Authority has proposed a balance of
27 \$27,206,247 for the FPFTY 2024 (line 22). This balance is also shown on PWSA COS
28 Model 2024, tab 322. These balances were broken down by utility service as shown on
29 PWSA Exhibit HJS-1 and HJS-2. These balances are comprised of Salaries and Benefits,
30 Operating Expenses, and General and Administrative Expenses. PWSA indexed these

1 expenses in the same manner as it did under the previously addressed expense categories,
2 with respect to Salaries, Benefits, Operating Expenses, and General and Administrative
3 expenses and as I previously explained in my testimony. In particular PWSA indexed
4 Chemical expenses by 20% in 2024, and indexed Utility Services (electric and gas) by
5 15% in 2024. (OCA-Set VI-12).

6 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY'S**
7 **WATER TREATMENT COSTS FOR THE FPFTY PERIOD?**

8 **A.** My first adjustment is related to the Authority's Salary and Benefits. For the same reasons
9 and consistent with my treatment of Salary and Benefits for all PWSA's Direct Operating
10 Expenses to reflect PWSA's actual vacancy data, I utilized a three-year vacancy ratio for
11 FPFTY 2024 of 12.61% with the arguments that I explained previously. I then multiplied
12 the Authority's proposed Plant Operations Salary and Benefits balances for the FPFTY
13 2024 period of \$5,968,424 and \$1,921,659, respectively, by the vacancy rate ratio of
14 12.61% to arrive at an adjusted level of \$5,215,806 for Salaries and \$1,679,338 for
15 Benefits. These balances are shown in my Exhibit DM-14.

16 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
17 **CHEMICAL, INVENTORY AND GENERAL ADMINISTRATIVE?**

18 **A.** I reviewed the Authority's O&M Expenses, and General Administrative category and have
19 adjustments related to PWSA's 6% increase in these expense categories. As previously
20 identified, PWSA has included a 6% adjustment for each of these operating expense
21 categories from the FPFTY 2024. (PWSA COS Model 2024 tab 322 (beginning on line
22 298 and columns U through AA). PWSA also included a 20% increase for its Chemical
23 Costs (Account 5035) and a 15% increase for its Utility Services (Accounts 7605 and 7650)
24 (OCA Set 6 -12). It is unclear whether PWSA sought competitive bids for chemicals. In
25 response to OCA Set 6-22 certain Chemical contract costs date back to 2021. I am
26 recommending a 2.3% adjustment in the FPFTY 2024 for each of the expense categories
27 listed above except for Chemical Expenses and Utility Services. As previously stated, I
28 based my adjustments by relying on information shown on Statista which projected
29 inflation as being 2.3% from 2023 to 2024. . This reduces the balance for Operating
30 Expenses by \$1,059,087 in the FPFTY 2024. For Inventory this reduces the balance by
31 \$4,409 in the FPFTY 2024. For the General and Administrative Expenses, this reduces the

1 balance by \$981,044 in the FPFTY 2024. In addition to the adjustments above, I also
2 normalized costs related to Account 5344 (Pump & Motor Contract). PWSA proposed a
3 balance to this account of \$600,000 in the FY 2023 period. Prior costs were \$0 in 2020,
4 \$0 in 2021 and \$0 in 2023. In response to OCA Set 18-13, PWSA stated that this was
5 renamed Pump and Motor Contract in 2023 in order to track the costs more efficiently and
6 be more transparent to the public and regulating agencies. Prior costs were budgeted under
7 the Engineering & Construction department in Account 5370 (Operating Contract Other.
8 PWSA has not provided any reconciliation of these reclassified costs nor provided how these
9 costs are now allocated under Account 5344. PWSA increased this balance by \$36,000 to
10 arrive at the balance of \$636,000 in the FPFTY 2024. Normalizing these expenses results
11 in an annual recovery of \$300,000 per year (FY 2023 balance of \$600,000) along with the
12 2.3% index in the FPFTY 2024. With respect to Chemical Expenses, PWSA proposed a
13 balance of \$5,559,367 in the FY 2022 and a balance of \$5,986,200 in the FY 2023
14 (Columns S and U Lines 51 to 67 PWSA COS Model 2024, tab 322). In the FPFTY 2024
15 PWSA proposed a balance of \$7,183,440 or an increase of 20%. PWSA included a 20%
16 increase in its Chemical expenses (OCA Set 6-12). PWSA stated that the 20% for
17 Chemical increases are inflationary in that it experienced dramatic increases in its
18 Chemical expenses over the past 18-24 months with increases of more than 20%. (I&E
19 RE 28). PWSA believed that the 20% inflation factor is reasonable given the current supply
20 chain environment driven the increase.

21 **Q. WHAT IS YOUR RESPONSE TO PWSA'S CHEMICAL INCREASE PROPOSAL?**

22 **A.** I believe that the proposed 20% increase for Chemical expenses is excessive and not
23 reasonable. On the Research CMFE website⁸ the global water treatment chemicals market
24 has estimated to register a compound annual growth rate of 6.8% from 2021 to 2027. The
25 effect of the pandemic has declined the market value for chemical treatment. Based upon
26 this information I am recommending a 6.8% increase in PWSA's Chemical expense for the
27 FPFTY 2024. Using my recommended 6.8% adjustment, my recommended Chemical
28 expense reduces PWSA's balance by \$1,059,087 in the FPFTY 2024.

⁸ [Water Treatment Chemicals Market is expected to reach a \(globenewswire.com\)](https://www.globenewswire.com)

1 **Q. WHAT HAS PWSA PROPOSED WITH RESPECT TO ITS ELECTRIC AND GAS**
2 **UTILITY COSTS?**

3 **A.** In response to OCA Set 18-12, PWSA stated that it has experienced significant increases
4 to both electric and gas costs since the last base rate case because of variable rate pricing
5 and increased usage. At this time, it is unclear whether PWSA's projections rely on a
6 contract with an alternative supplier. PWSA indicates that is not aware of any pending
7 distribution rate cases for Duquesne Light (electric provider) and People's Gas (gas
8 supplier), however, the last base rate case for Duquesne Light was 2021 and the last base
9 rate case for People's Gas was 2018. In its response to OCA's discovery request OCA Set
10 XVIII-12, PWSA claimed it was reasonable to assume each company will submit a rate
11 case in the future period.

12 **Q. WHAT ADJUSTMENTS DO YOU HAVE?**

13 **A.** I am tentatively accepting PWSA's \$6,000,000 expense for its electric service and
14 \$360,000 expense for its gas service in the FY 2023, without PWSA 6% increase for each
15 of the each shown (FPFTY 2024). PWSA has already increased the electric expenses from
16 FY 2022 to the FY 2023 by 7.93%, (Account 7605) and decreased its gas expense by 2.75%
17 from the FY 2022 to the FY 2023 (Account 7650). These adjustments are shown on my
18 Exhibit DM-14. However, I reserve the right to adjust my recommendation if PWSA has a
19 contract in place for either electric and/or gas service. If so, I recommend that PWSA
20 provide any such contracts as part of its rebuttal testimony so that there is sufficient
21 information available to evaluate PWSA's claim.

22 **Q. WHAT ARE YOUR TOTAL RECOMMENDED ADJUSTMENTS TO THE**
23 **AUTHORITY'S WATER TREATMENT PLANT?**

24 **A.** My recommended adjustments to the Authority's Water Treatment Plant are a reduction of
25 \$3,039,479 in the FPFTY 2024. These adjustments are shown on my Exhibit DM-14.

1 **I. Sewer Operations – 424**

2 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO ITS SEWER**
3 **OPERATIONS EXPENSE FOR THE FPFTY 2024?**

4 **A.** As shown on PWSA Exhibit EB-2, Line 23, the Authority has proposed a balance of
5 \$11,357,094 for the FPFTY 2024 (line 23). This balance is also shown on PWSA COS
6 Model 2024, tab 424. These balances were broken down by utility service as shown on
7 PWSA Exhibit HJS-1 and HJS-2. These balances are comprised of Salaries and Benefits,
8 Operating Expenses, and General and Administrative Expenses. PWSA indexed these
9 expenses in the same manner as it did under the previously addressed expense categories,
10 with respect to Salaries, Benefits, Operating Expenses, and General and Administrative
11 expenses and as I previously explained in my testimony.

12 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY’S**
13 **SEWER OPERATIONS COSTS FOR THE FPFTY PERIOD?**

14 **A.** My first adjustment is related to the Authority’s Salary and Benefits. For the same reasons
15 and consistent with my treatment of Salary and Benefits for all PWSA’s Direct Operating
16 Expenses, I utilized a three-year vacancy ratio for FPFTY 2024 of 12.61% with the
17 arguments that I explained previously. I then multiplied the Authority’s proposed Sewer
18 Operations Salary and Benefits balances for the FPFTY 2024 period of \$1,998,926 and
19 \$503,524, respectively, by the vacancy rate ratio of 12.61% to arrive at an adjusted level
20 of \$1,746,861 for Salaries and \$440,030 for Benefits. These balances are shown in my
21 Exhibit DM-15.

22 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
23 **INVENTORY AND GENERAL ADMINISTRATIVE?**

24 **A.** I reviewed the Authority’s O&M Expenses, Inventory and General Administrative
25 category and have adjustments related to PWSA’s 6% increase in these expense categories.
26 As previously identified, PWSA has included a 6% adjustment for each of these operating
27 expense categories from the FPFTY 2024 (PWSA increased Account 5370 – Operating
28 Contract by 30%). (PWSA COS Model 2024 tab 424 (beginning on line 298 and columns
29 U through AA). I am recommending a 2.3% adjustment in the FPFTY 2024 for each of
30 the expense categories listed above. As previously stated, I based my adjustments by

1 relying on information shown on Statista which projected inflation as being 2.3% from
2 2023 to 2024. This reduces the balance for Operating Expenses by \$100,993 in the FPPTY
3 2024. For Inventory this reduces the balance by \$3,167 in the FPPTY 2024. For the
4 General and Administrative Expenses, this reduces the balance by \$3,445 in the FPPTY
5 2024. In addition to the adjustments above, I also normalized costs related to Account
6 5390 (Welding). PWSA proposed a balance to this account of \$117,927 in the FPPTY
7 2024 period. Prior costs were \$0 in 2020, \$0 in 2021 and \$0 in 2023. PWSA increased
8 this balance by \$117,927 in the FPPTY 2024. Normalizing these expenses results in an
9 annual recovery of \$58,964 per year. These adjustments are shown on my Exhibit DM-
10 15.

11 **Q. WHAT ARE YOUR TOTAL RECOMMENDED ADJUSTMENTS REGARDING**
12 **THE AUTHORITY’S SEWER OPERATIONS COSTS?**

13 **A.** My recommended adjustments are a reduction of \$423,163 in the FPPTY 2024 and is
14 shown on my Exhibit DM-15.

15 **m. Environmental Compliance – 931**

16 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO ITS**
17 **ENVIRONMENTAL COMPLIANCE EXPENSE FOR THE FPPTY 2024?**

18 **A.** As shown on PWSA Exhibit EB-2, Line 18, the Authority has proposed a balance of
19 \$4,638,633 for the FPPTY 2024 (line 18). This balance is also shown on PWSA COS
20 Model 2024, tab 931. These balances were broken down by utility service as shown on
21 PWSA Exhibit HJS-1 and HJS-2. These balances are comprised of Salaries and Benefits,
22 Operating Expenses, and General and Administrative Expenses. PWSA indexed these
23 expenses in the same manner as it did under the previously addressed expense categories,
24 with respect to Salaries, Benefits, Operating Expenses, and General and Administrative
25 expenses and as I previously explained in my testimony.

26 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY’S**
27 **ENVIRONMENTAL COMPLIANCE COSTS FOR THE FPPTY PERIOD?**

28 **A.** My first adjustment is related to the Authority’s Salary and Benefits. For the same reasons
29 and consistent with my treatment of Salary and Benefits for all PWSA’s Direct Operating
30 Expenses, I utilized a three-year vacancy ratio for FPPTY 2024 of 12.61% with the

1 arguments that I explained previously. I then multiplied the Authority's proposed
2 Environmental Compliance Salary and Benefits balances for the FPFTY 2024 period of
3 \$812,600 and \$237,043, respectively, by the vacancy rate ratio of 12.61% to arrive at an
4 adjusted level of \$710,131 for Salaries and \$207,152 for Benefits. These balances are
5 shown in my Exhibit DM-11.

6 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
7 **INVENTORY AND GENERAL ADMINISTRATIVE?**

8 **A.** I reviewed the Authority's O&M Expenses, Inventory and General Administrative
9 category and have adjustments related to PWSA's 6% increase in these expense categories.
10 As previously identified, PWSA has included a 6% adjustment for each of these operating
11 expense categories from the FPFTY 2024. (PWSA COS Model 2024 tab 931 (beginning
12 on line 298 and columns U through AA). I am recommending a 2.3% adjustment in the
13 FPFTY 2024 for each of the expense categories listed above. As previously stated, I based
14 my adjustments by relying on information shown on Statista which projected inflation as
15 being 2.3% from 2023 to 2024. This reduces the balance for Operating Expenses by
16 \$923,937 in the FPFTY 2024. For Inventory this reduces the balance by \$105 in the
17 FPFTY 2024. For the General and Administrative Expenses, this reduces the balance by
18 \$104,003 in the FPFTY 2024. In addition to the adjustments above, I also normalized
19 costs related to the following Accounts: 5145 (Ground Maintenance), 5496 (Repairs &
20 Maintenance), 5570 (Testing), 5345 (Inspection), and 7330 (Construction Management).
21 These accounts had little or no prior expenses in the FY 2020-2022. PWSA proposed a
22 balance to these accounts of \$307,990 in the FPFTY 2024 period. Normalizing these
23 expenses results in an annual recovery of \$153,995 per year. These adjustments are shown
24 on my Exhibit DM-13. With respect to PWSA's Drag Bucket (Account 5335) and Line
25 Television (Account 5348), PWSA proposed to include \$\$780,373 in FPFTY 2024 and
26 \$763,995 in FPFTY 2024, respectively. In response to OCA -18-24, PWSA stated that
27 these costs were renamed, and this was a new account and reclassified for purposes of
28 tracking these costs more efficiently and more transparently. Prior costs for these accounts
29 were \$0 in 2020 through 2022. Whether they were new accounts or not, there were no
30 prior costs to trend or gauge the level of these expenses previously. Given this, I am
31 recommending normalizing these costs over a two-year period.

1 **Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO THE AUTHORITY'S**
2 **ENVIRONMENTAL COMPLIANCE?**

3 **A.** My total adjustment is a reduction of \$1,160,405 in the FPFTY 2024 as shown on my
4 Exhibit DM-11.

5 **n. Water Distribution – 325**

6 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO ITS WATER**
7 **DISTRIBUTION EXPENSE FOR THE FPFTY 2024?**

8 **A.** As shown on PWSA Exhibit EB-2, Line 24, the Authority has proposed a balance of
9 \$17,698,299 for the FPFTY 2024 (line 24). This balance is also shown on PWSA COS
10 Model 2024, tab 325. These balances were broken down by utility service as shown on
11 PWSA Exhibit HJS-1 and HJS-2. These balances are comprised of Salaries and Benefits,
12 Operating Expenses, and General and Administrative Expenses. PWSA indexed these
13 expenses in the same manner as it did under the previously addressed expense categories,
14 with respect to Salaries, Benefits, Operating Expenses, and General and Administrative
15 expenses and as I previously explained in my testimony.

16 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY'S**
17 **WATER DISTRIBUTION EXPENSE FOR THE FPFTY PERIOD?**

18 **A.** My first adjustment is related to the Authority's Salary and Benefits. For the same reasons
19 and consistent with my treatment of Salary and Benefits for all PWSA's Direct Operating
20 Expenses, I utilized a three-year vacancy ratio for FPFTY 2024 of 12.61% with the
21 arguments that I explained previously. I then multiplied the Authority's proposed Water
22 Distribution Salary and Benefits balances for the FPFTY 2024 period of \$10,593,238 and
23 \$3,117,665, respectively, by the vacancy rate ratio of 12.61% to arrive at an adjusted level
24 of \$9,257,431 for Salaries and \$2,724,527 for Benefits. These balances are shown in my
25 Exhibit DM-16.

26 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
27 **INVENTORY AND GENERAL ADMINISTRATIVE?**

28 **A.** I reviewed the Authority's O&M Expenses, Inventory and General Administrative
29 category and have adjustments related to PWSA's 6% increase in these expense categories.
30 As previously identified, PWSA has included a 6% adjustment for each of these operating

1 expense categories in the FPFTY 2024. (PWSA COS Model 2024 tab 931 (beginning on
2 line 298 and columns U through AA). I am recommending a 2.3% adjustment in the
3 FPFTY 2024 for each of the expense categories listed above. As previously stated, I based
4 my adjustments by relying on information shown on Statista which projected inflation as
5 being 2.3% from 2023 to 2024. This reduces the balance for Operating Expenses by
6 \$466,509 in FPFTY 2024. For Inventory this reduces the balance by \$63,363 in the FPFTY
7 2024. For the General and Administrative Expenses, this reduces the balance by \$27,461
8 in the FPFTY 2024. In addition to the adjustments above, I also normalized costs related
9 to Account 5030 – Chlorine Cylinders. PWSA booked \$0 in 2020, \$0 in 2021 and \$73,048
10 in 2023. PWSA increased this balance by \$6,952 to arrive at a balance of \$80,000 in FY
11 2023 and added \$16,000 to arrive at the FPFTY 2024 of \$96,000. Normalizing this
12 expense results in an annual recovery of \$51,264 per year, which includes my
13 recommended 6.8% increase for Chemical Expenses. I also normalized costs related to
14 Meters (Account 5360). In response to OCA – 18-17, PWSA stated that this account was
15 renamed for the purpose of tracking these costs more efficiently. No other information was
16 provided. PSWA stated that this is not a new expense, but it was previously budgeted in
17 Account 5370 (Operating Contract Other). I was unable to trace prior costs (\$225,000) as
18 noted by PWSA. Therefore, I am normalizing these costs over a two-year period or
19 \$99,996 annually. Finally with respect to Fines and Penalties (Account 7730) (OCA-18-
20 20) PWSA stated that although no specific fines or penalties are anticipated between 2023-
21 2026, a budget allocation is prudent to cover any expenses that may occur. I am
22 recommending disallowance of this cost of \$18,000. Costs should be known and
23 measurable and provide a benefit to ratepayers. Given that no specific costs are expected
24 to occur, and that it is not prudent or reasonable for ratepayers to pay for PWSA’s fines or
25 penalties, it is appropriate to remove these from PWSA expenses. These adjustments are
26 shown on my Exhibit DM-16.

27 **Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO THE AUTHORITY’S WATER**
28 **DISTRIBUTION EXPENSES?**

29 **A.** My total adjustment is a reduction of \$2,286,277 in the FPFTY 2024 as shown on my
30 Exhibit DM-16.

1 o. Engineering & Construction – 930

2 **Q. WHAT HAS THE AUTHORITY PROPOSED WITH RESPECT TO**
3 **ENGINEERING AND CONSTRUCTION FOR THE FPFTY 2024**

4 **A.** As shown on PWSA Exhibit EB-2, Line 25, the Authority has proposed a balance of
5 \$27,122,903 for the FPFTY 2024. This balance is also shown on PWSA COS Model 2024,
6 tab 930. These balances were broken down by utility service as shown on PWSA Exhibit
7 HJS-1 and HJS-2. This balance is comprised of Salaries and Benefits, Operating
8 Expenses, and General and Administrative Expenses. PWSA indexed these expenses in
9 the same manner as it did under the previously addressed expense categories, with respect
10 to Salaries, Benefits, Operating Expenses, and General and Administrative expenses and
11 as I previously explained in my testimony.

12 **Q. WHAT ADJUSTMENTS DO YOU HAVE REGARDING THE AUTHORITY’S**
13 **ENGINEERING & CONSTRUCTION EXPENSE FOR THE FPFTY PERIOD**

14 **A.** My first adjustment is related to the Authority’s Salary and Benefits. For the same reasons
15 and consistent with my treatment of Salary and Benefits for all PWSA’s Direct Operating
16 Expenses, I utilized a three-year vacancy ratio for FPFTY 2024 of 12.61% with the
17 arguments that I explained previously. I then multiplied the Authority’s proposed
18 Engineering & Construction Salary and Benefits balances for the FPFTY 2024 period of
19 \$5,308,361 and \$1,592,933, respectively, by the vacancy rate ratio of 12.61% to arrive at
20 an adjusted level of \$4,638,977 for Salaries and \$1,392,064 for Benefits.

21 **Q. WHAT ARE YOUR OTHER ADJUSTMENTS RELATED TO O&M EXPENSES,**
22 **INVENTORY AND GENERAL ADMINISTRATIVE?**

23 **A.** I reviewed the Authority’s O&M Expenses, Inventory and General Administrative
24 category and have adjustments related to PWSA’s 6% increase in these expense categories.
25 As previously identified, PWSA has included a 6% adjustment for each of these operating
26 expense categories from the FPFTY 2024. (PWSA COS Model 2024 tab 930 (beginning
27 on line 298 and columns U through AA). I am recommending a 2.3% adjustment in the
28 FPFTY 2024 period for each of the expense categories listed above. As previously stated,
29 I based my adjustments by relying on information shown on Statista which projected
30 inflation as being 2.3% from 2023 to 2024. This reduces the balance for Operating

1 Expenses by \$1,799,123 in the FPFTY 2024. For Inventory this reduces the balance by
2 \$169 in the FPFTY 2024. For the General and Administrative Expenses, this reduces the
3 balance by \$248,058 in the FPFTY 2024. In addition to the adjustments above, I also
4 normalized costs related to Account 5355 – Landscaping and Grounds. PWSA booked \$0
5 in 2020, \$41,179 in 2021 and \$60,378 in 2023. PWSA increased this balance by \$92,378
6 to arrive at a balance of \$152,756 in FY 2023 and added \$9,165 to arrive at the FPFTY
7 2024 of \$161,921. Normalizing this expense results in an annual recovery of \$76,378 per
8 year. Finally, I made an adjustment to PWSA Manhole & Point Repair Contract (Account
9 5343). In response to OCA – Set 18-21, PWSA stated that these costs were renamed
10 starting in 2023. PWSA stated it is not a new expense as it was previously budgeted under
11 Account 5370 (Operating Contract Other). PWSA did not provide a breakdown of these
12 costs under Account 5370, so I am unable to ascertain what level of costs are included with
13 respect to Manhole & Point Repair Contract. Therefore, I am recommending normalizing
14 these costs over a two-year period to provide an annual recovery of \$750,000 per year.
15 These adjustments are shown on my Exhibit DM-17.

16 **Q. WHAT ARE YOUR TOTAL ADJUSTMENTS TO THE AUTHORITY'S**
17 **ENGINEERING & CONSTRUCTION EXPENSES?**

18 **A.** My total adjustment is a reduction of \$2,421,486 in the FPFTY 2024 as shown on my
19 Exhibit DM-17.

20 **p. Other Adjustments**

21 **Q. WHAT OTHER ADJUSTMENTS DO YOU HAVE THAT YOU HAVE NOT**
22 **ADDRESSED PREVIOUSLY?**

23 **A.** I am recommending disallowance of certain charitable contributions, memberships and
24 dues expenses and sponsorships as broken down in response to OCA Set 6-9. These costs
25 appear to be related to various state and county community boards, civic organizations and
26 other business related agencies that do not directly benefit ratepayers in the provision of
27 safe and reliable utility service. These types of costs do not relate to the core business of
28 utility service, nor do they appear to be related to assisting customers in retaining access to
29 utility service. These types of costs appear to be geared toward PWSA as being good a
30 corporate citizen and to enhance its image in the community. I am also recommending

1 disallowance of certain lobbying expenses as identified in response to I&E RE-14-D.
2 Lobbying expenses are geared toward providing legislative and regulatory updates which
3 I believe do not benefit ratepayers with respect to customer service or service quality. These
4 total \$29,118 for contributions, dues, and memberships /sponsorships and \$98,262 for
5 lobbying for a total disallowance of \$127,380 for the FPFTY 2024. This is shown on my
6 Exhibit DM-2.

7 **3. OPERATING EXPENSES – Other**

8 **Q. WHAT TYPES OF EXPENSES HAS THE AUTHORITY INCLUDED IN ITS**
9 **OPERATING EXPENSES – OTHER IN THE FPFTY 2024?**

10 **A.** The Authority has included the following Other Operating Expenses:

	<u>FPFTY 2024</u>
11	
12	• Loss (Gain) on ALCOSAN Billings \$2,066,814
13	• City Services \$3,419,629
14	• COVID Expenses <u>\$ 263,215</u>
15	Total <u>\$5,749,658</u>

16 This is located on PWSA Exhibit EB-2, lines 27 28 and 29. This is also located on PWSA
17 COS Model 2024, tab EB-2.1.

18 **Q. WHAT DO THESE COSTS REPRESENT?**

19 **A.** The Loss (Gain) on ALCOSAN Billings is related to the annual costs that the Authority
20 incurs to carry bad debt expense for collections related to pass-through charges of the
21 Allegheny County Sanitary Authority (ALCOSAN). (PWSA St. No. 2 at 18). The City
22 Services costs represent costs that the Authority has an obligation to provide or make
23 payments to for services currently provided by the City of Pittsburgh (City or Pittsburgh)
24 to PWSA, as well as other negotiated responsibilities that PWSA pays for on behalf of
25 Pittsburgh. (PWSA Exhibit KR-1). With respect to the COVID Expenses of \$263,215,
26 PWSA claims this as an extraordinary expense as they were not claimed in PWSA's last
27 rate case. PWSA deferred these costs and is including them in this rate case. (PWSA St.
28 No. 2 at 19).

1 **Q. WHAT CHANGES DO YOU HAVE WITH RESPECT TO THE AUTHORITY'S**
2 **PROPOSED OTHER OPERATING EXPENSES FOR THE FPFTY 2024?**

3 A. I am accepting the loss/gain on ALCOSAN billing for the years shown. I am adjusting
4 City Services increases at a 2.3% cap, in the FPFTY 2024 as I did for all other operating
5 expenses. PWSA included a 6% increase in each of the years shown as explained in
6 response to OCA-Set 6-12. With respect to the COVID expenses of \$263,215, I am
7 recommending amortizing these costs over a two-year period, in the same period of time
8 as I normalized rate case expenses. This reduces the balance by \$131,608 in the FPFTY
9 2024.

10 **Q. WHAT IS YOUR RECOMMENDED BALANCE REGARDING THE**
11 **AUTHORITY'S OTHER OPERATING EXPENSES FOR THE YEARS SHOWN?**

12 A. My recommended balance is \$5,430,588 for the FPFTY 2024 which is shown on my
13 Exhibit DM-18.

14 **4. DEBT SERVICE COVERAGE**

15 **Q. WHAT HAS THE AUTHORITY PROPOSED REGARDING ITS DEBT SERVICE**
16 **COVERAGE (DSC) FOR THE FPFTY 2024 AND WHAT ARE THE SPECIFIC**
17 **BREAKDOWNS?**

18 A. As shown on PWSA Exhibit EB-2, the Authority has proposed a total Debt Service
19 Coverage of \$96,932,625 for the FPFTY 2024. The components of these costs are broken
20 down in PWSA Exhibit EB-2. PWSA has proposed a DSC of 1.65 in the FPFTY 2024.

21 **5. CAPITAL EXPENDITURES & TRANSFERS**

22 **Q. WHAT HAS THE AUTHORITY PROPOSED REGARDING ITS CAPITAL**
23 **EXPENDITURES & TRANSFERS FOR THE FPFTY 2024?**

24 A. As shown on PWSA Exhibit EB-2, the Authority has proposed total Capital Expenditures
25 & Transfers of \$22,430,487 in the FPFTY 2024. The breakdown of these components is
26 shown on PWSA Exhibit EB-2.

1 **Q. WHAT CHANGES DO YOU HAVE WITH RESPECT TO THE AUTHORITY'S**
2 **CAPITAL EXPENDITURES & TRANSFERS BALANCE FOR THE YEARS**
3 **SHOWN?**

4 **A.** I have two flow-through adjustments. My first adjustment is related to the Authority's Bad
5 Debt Expense. Using my recommended revenue requirement proposal (Exhibit DM-2) and
6 the Authority's bad debt ratio in total of 2.0% (OCA-Set 6-13) I compute a total Bad Debt
7 Expense of \$4,636,887, which is a reduction of \$1,334,649 from the Authority's balance
8 of \$5,971,536 (FPFTY 2024).

9 **Q. WHAT IS YOUR NEXT ADJUSTMENT?**

10 **A.** My next adjustment is to the Authority's DSIC costs. PWSA has proposed a DSIC cap
11 increase from 5% to 7.5% for both water and wastewater (PWSA St. No. 1, p. 13). As per
12 the recommendation of OCA witness Pavlovic in Statement 2, I am capping the DSIC
13 recovery at 5%. This reduces the balance from the \$15,038,462 (PWSA Exhibit EB-2) to
14 \$9,720,815 in the FPFTY 2024. This is reflected on my Exhibit DM-20.

15 **Q. PLEASE SUM UP YOUR ADJUSTMENTS TO THE CAPITAL EXPENDITURES**
16 **& TRANSFERS.**

17 **A.** My total adjustment is a reduction of \$6,652,296 for the FPFTY 2024.

18 **6. PROJECTED CASH FLOW**

19 **Q. WHAT HAS THE AUTHORITY PROPOSED REGARDING ITS REQUIRED**
20 **DAYS CASH ON HAND (DCOH) AND ITS REQUIRED ENDING BALANCE FOR**
21 **THE FPFTY 2024?**

22 **A.** As shown on PWSA Exhibit EB-2, the Authority has computed an Ending Balance of
23 \$87,692,058 in the FPFTY 2024. The Authority started with a Beginning Balance of
24 \$87,147,395 and made adjustments to reflect Operating Surplus/(Deficit) of \$44,663,
25 adding in Budgeted Contributions of \$1,000,000, and subtracting Contributions to Rate
26 Stabilization Fund of \$500,000 to arrive at an Ending Balance of \$87,692,058. The
27 Authority computed its DCOH by taking its proposed total Operating Expenses minus the
28 Loss (Gain) on ALCOSAN billing to arrive at a balance of \$87,692,058 and dividing that
29 number by 365 days to arrive at daily DCOH of 247.60 days.

1 **Q. WHAT CHANGES DO YOU HAVE WITH RESPECT TO THE AUTHORITY'S**
2 **PROPOSED PROJECTED CASH FLOW BALANCES FOR THE YEARS**
3 **SHOWN?**

4 **A.** My adjustments relate to the flow-through of my recommended adjustments to the
5 Authority's Operating Expenses.

6 **Q. PLEASE WALK THROUGH YOUR CALCULATIONS AND**
7 **RECOMMENDATION WITH RESPECT TO THE AUTHORITY'S PROJECTED**
8 **CASH FLOW.**

9 **A.** As shown on my Exhibit DM-21, I utilized the same methodology as the Authority. My
10 recommended Cash Flow is 279.08 days (without ALCOSAN Costs) and 155.27 (with
11 ALCOSAN costs).

12 **Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

13 **A.** Yes, it does. I reserve my right to update my testimony in the event PWSA's provides
14 additional information that may affect my revenue requirement recommendations.

PCMG and Associates LLC

DANTE MUGRACE

Education

Master Business Administration, MBA Strategic Management, Pace University, Lubin School of Business, New York, NY, 2010

Master Public Administration, MPA, Kean University, Union, NJ, 2001

Bachelor of Science, BS. Accounting, St. Peter's University, Jersey City, NJ, 1983

Position

Senior Consultant – PCMG and Associates	2014 – present
Senior Consultant – Snavelly King Majoros and Associates	2013 – 2014
Independent Consultant	2012 – 2013
Bureau Chief/Administrative Analyst/Accountant – New Jersey Board of Public Utilities	1983 – 2011

Professional Experience

Mr. Mugrace has 35 years' experience in all aspects of regulatory accounting and policy including processing, analyzing and evaluating utility rate case petitions before Public Service Commissions. Mr. Mugrace examines and evaluates rate filings, contracts, agreements and rate matters regarding utility operations and provides recommendations as to best course of action. Additionally, Mr. Mugrace analyzes and reviews utility regulatory matters and sets forth recommendations for resolution of issues, calculates total revenue requirement needed to cover operating expenses and rate of return; researches and evaluates regulatory utility matters to assess impact on various classes of customers, regarding rates, service, compliance and cost of service provisions, as well as annual true-up and tracking mechanisms.

Prior to undertaking consulting assignments, Mr. Mugrace was the Bureau Chief Utility Rate Manager for the New Jersey Board of Public Utilities, in which role he managed and assigned tasks to a staff of 12 professionals and supervisory personal in the daily administrative, financial and managerial functions of the Division. Mr. Mugrace's primary duties were to determine whether the utility had sufficient revenues to cover its operating expenses and earn a return on its plant investment and to ensure that the utility provided safe, reliable and continuing utility service to its customers. Mr. Mugrace set rates and charges for utility companies, which had revenues of up to \$500 million, and ensured that the revenue requirement provided for recovery of all operating expenses, return on investment and depreciation. Mr. Mugrace was also responsible for reviewing and verifying that the companies' property, plant and equipment (up to \$2.5 billion) were used and useful in providing service to its customers. Mr. Mugrace coordinated and met with the New Jersey State Department of Environmental Protection to

PCMG and Associates LLC

determine whether water and wastewater utilities were complying with state regulations and were adhering to any regulatory agency directives or orders. Mr. Mugrace developed ways to minimize the rising costs of water utility services by investigating alternative rate structures, analyzing engineering mechanisms and techniques, looking into the feasibility of mergers and acquisitions within the water industry and reviewing financing, and rate alternatives to minimize the impact on ratepayers. Mr. Mugrace was responsible for ensuring that the rate-case process adhered the statutory timeframe for preparing, reviewing and recommending findings to the Board Commissioners on financial operations, costs, revenues and operating expenses, prior to the litigation proceedings. Mr. Mugrace also examined alternative rate recovery mechanisms and clauses, phase-ins of revenue requirements, deferral mechanisms and pass-through of rate charges. Mr. Mugrace assumed the role of Director during transition periods and Administrative changes. Finally, Mr. Mugrace conducted the recruitment and hiring of employees for placement within the Division and the Board.

v.	:	R-2023-3039920 (W)
Pittsburgh Water and Sewer Authority	:	R-2023-3039921 (WW)

VERIFICATION

I, Dante Mugrace, hereby state that the facts set forth in my Direct Testimony, OCA Statement 1, are true and correct (or are true and correct to the best of my knowledge, information, and belief) and that I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa.C.S. § 4904 (relating to unsworn falsification to authorities).

I. STATEMENT OF QUALIFICATIONS

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Karl Richard Pavlovic. My business address is 22 Brooks Avenue, Gaithersburg, MD 20877.

Q. BY WHOM AND IN WHAT CAPACITY ARE YOU EMPLOYED?

A. I am Managing Director of and a Senior Consultant with PCMG and Associates LLC (“PCMG”). PCMG is an association of experts in economics, accounting, finance, and utility regulation and policy, with over 75 years of collective experience providing assistance to counsel and expert testimony regarding the regulation of electric, gas, water, and wastewater utilities.

Q. HAVE YOU PREPARED A SUMMARY OF YOUR QUALIFICATIONS AND EXPERIENCE?

A. Yes. Exhibit KRP-1 to my testimony summarizes my qualifications and experience.

Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN REGULATORY PROCEEDINGS?

A. Yes. Exhibit KRP-1 also contains a complete list of my engagements as an expert and/or expert witness in matters before state and federal regulatory agencies. I have submitted testimony to the Federal Communications Commission, the Federal Energy Regulatory Commission, the Alaska Public Utilities Commission, the Alberta Utilities Commission, the California Public Utilities Commission, the Kansas Corporation Commission, the Delaware Public Service Commission, the Hawaii Public Utilities Commission, the Maryland Public Service Commission, the Massachusetts Department of Public Utilities, the Illinois Commerce Commission, the Maine Public Utilities Commission, the Missouri

1 Public Service Commission, the North Dakota Public Service Commission, the Public
2 Service Commission of the District of Columbia, and the Pennsylvania Public Utility
3 Commission.

4 **Q. PLEASE SUMMARIZE YOUR REGULATORY EXPERIENCE.**

5 **A.** For over thirty-five years, I have performed analyses and submitted testimony regarding
6 electric, gas and water utility operations, cost of service, rate design, alternative ratemaking
7 mechanisms, and regulatory policy.

8 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE PENNSYLVANIA**
9 **PUBLIC UTILITY COMMISSION REGARDING PITTSBURGH WATER AND**
10 **SEWER AUTHORITY?**

11 **A.** Yes. I testified on behalf of the Office of Consumer Advocate regarding PWSA’s Multi-
12 Year Rate Plan (MYRP) and Distribution System Improvement Charge (DSIC) proposals
13 in 2020.¹

14 **II. PURPOSE OF TESTIMONY**

15 **Q. ON WHOSE BEHALF ARE YOU TESTIFYING?**

16 **A.** I am testifying on behalf of the Pennsylvania Office of Consumer Advocate (“OCA”).

17 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?**

18 **A.** My testimony addresses in the following order PWSA’s current proposals for (1) a three-
19 year Multi-Year Rate Plan (MYRP) for years 2024, 2025 and 2026; (2) an increase in the
20 Distribution System Improvement Charge (DSIC) percentage from 5% to 7.5%; (3) a
21 reconciling surcharge denominated the Infrastructure Improvement Charge (IIC) to be
22 implemented in years 2025 and 2026; and (4) a reconciling surcharge denominated the

¹ These cases were docketed at Nos. R-2020-3019369, R-2020-3019371 and P-2020-3019019.

1 Customer Assistance Charge (CAC) to be implemented in years 2025 and 2026. These four
2 PWSA proposals are addressed seriatim in Sections III.B through III.E in my testimony
3 below.

4 III. DISCUSSION

5 A. SUMMARY

6 **Q. PLEASE SUMMARIZE THE OVERALL RECOMMENDATION YOU MAKE IN**
7 **YOUR TESTIMONY.**

8 **A.** As detailed below, I recommend that:

- 9 • The Commission deny PWSA's request for a MYRP;
- 10 • The Commission deny PWSA's Petition to increase its DSIC cap from 5% to 7.5%;
- 11 • The Commission deny PWSA's request for approval to institute an IIC; and
- 12 • The Commission deny PWSA's Petition for a CAC.

13 B. MULTI-YEAR RATE PLAN (MYRP)

14 **Q. HAVE YOU EXAMINED AND ANALYZED PWSA'S PROPOSED MYRP?**

15 **A.** Yes. The information regarding PWSA's proposed MYRP is found primarily in the
16 testimonies and exhibits of PWSA Witnesses Barca,² Smith,³ Mechling⁴ and Fay.⁵

² PWSA St. No. 2, pages 44-47; Exhibit EB-2.

³ PWSA St. No. 7, pages 4-7 and pages 47-49; Schedules HJS-21 W, HJS-22 W, HJS-20 WW, HJS-21 WW.

⁴ PWSA St. No. 6, page 24; Exhibits JAM-11 and 12 (water) and JAM-13 and 14 (wastewater).

⁵ PWSA St. No. 9, pages 37-39; Exhibits CF-4 and CF-7.

1 **Q. WHAT IS YOUR OVERALL ASSESSMENT OF PWSA’S PROPOSED MYRP?**

2 A. As I discuss in detail below, PWSA’s proposed MYRP is deficient regarding the statutory
3 and regulatory provisions governing an MYRP. Specifically, the MYRP is deficient
4 measured against most of the cost and rate design, customer impact, administrative
5 efficiency and regulatory lag, and reliability factors that the Commission considers in
6 determining whether an MYRP is just and reasonable. The MYRP is also deficient in that
7 it incorporates no mechanism for ratepayer protections, no role for the Commission to
8 ensure that ratepayers are protected from unwarranted cost and no performance metrics for
9 the Commission’s evaluation. Finally, there are several practical reasons why PWSA is not
10 well-suited for a MYRP. These reasons include that (1) PWSA’s anticipated ownership of
11 its system in 2025 may trigger changes that are not identifiable yet, (2) the potential for
12 amendments or termination of PWSA’s Cooperation Agreement with the City of Pittsburgh
13 to change and impact rates and operations significantly after January 1, 2025; and (3) the
14 risk of ratepayers overpaying if PWSA continues to fail to achieve its projected levels of
15 capital spending.

16 **Q. WHAT ARE THE PENNSYLVANIA STATUTORY PROVISIONS GOVERNING**
17 **A MULTIYEAR RATE PLAN?**

18 A. 66 Pa. C.S. §1330 Alternative Ratemaking for Utilities (Act 2018-58) sets forth the
19 statutory framework for utility MYRP as a form of alternative ratemaking⁶ that is intended
20 to further innovations in utility operations and information technology within the otherwise

⁶ **§1330 (b) Alternative rate mechanisms.**-- (1) Notwithstanding any other provision of law, including, but not limited to, sections 2806.1(k)(2) (relating to energy efficiency and conservation program) and 2807(f)(4) (relating to duties of electric distribution companies), the commission may approve an application by a utility in a base rate proceeding to establish alternative rates and rate mechanisms, including, ... (iv) multiyear rate plans ...

1 traditional regulatory requirement of just and reasonable rates and rate mechanisms.⁷
2 Specifically, §1330 (1) defines an MYRP as extending over a period of years and with a
3 rate adjustment mechanism,⁸ (2) provides for rate base/rate of return recovery under an
4 MYRP except for city natural gas distribution operation recovery under cash flow
5 ratemaking,⁹ (3) provides that capital costs and expenses recovered via an MYRP must be
6 reasonable and prudently incurred and used and useful,¹⁰ and (4) provides that nothing in
7 §1330 may be construed as limiting the Commission’s existing ratemaking authority.¹¹

8 **Q. WHAT ARE THE PENNSYLVANIA REGULATORY PROVISIONS**
9 **GOVERNING A MULTIYEAR RATE PLAN?**

10 **A.** 52 Pa. Code §69.3302 DISTRIBUTION RATES—STATEMENT OF POLICY expands
11 the §1330 policy objectives to include reducing disincentives for promoting §1330
12 objectives, additionally providing incentives to improve system economic efficiency and

⁷ **§1330 (a) Declaration of policy.**--The General Assembly finds and declares as follows:
(1) Innovations in utility operations and information technologies are creating new opportunities for all customers, and it is in the public interest for the commission to approve just and reasonable rates and rate mechanisms to facilitate customer access to these new opportunities while ensuring that utility infrastructure costs are reasonably allocated to and recovered from customers and market participants consistent with the use of the infrastructure.
(2) It is the policy of the Commonwealth that utility ratemaking should encourage and sustain investment through appropriate cost-recovery mechanisms to enhance the safety, security, reliability or availability of utility infrastructure and be consistent with the efficient consumption of utility service.

⁸ **§1330 (f) Definitions.**-- "**Multiyear rate plan.**" A rate mechanism under which the commission sets base rates and revenue requirements for a multiyear plan period and authorizes periodic changes in base rates, including, but not limited to, adjustments to account for inflation and capital investments without the necessity for base rate proceedings during the approved plan period.

⁹ **§1330 (b) Alternative rate mechanisms.**-- (2) An alternative rate mechanism established under this section may include rates under section 1307 (relating to sliding scale of rates; adjustments) or 1308 (relating to voluntary changes in rates) and may provide for recovery of returns on and return of capital investments or, in the case of city natural gas distribution operations, recovery under the cash flow ratemaking method. [I note that while PWSA is not a city natural gas distribution operation, it too utilizes cash flow ratemaking.]

¹⁰ **§1330 (b) Alternative rate mechanisms.**-- (3) Capital costs and expenses recovered through alternative rates and rate mechanisms shall be reasonable and prudently incurred and used and useful in providing service. Nothing in this paragraph shall be construed to prohibit or limit the recovery of revenue, as appropriate, under a commission-approved performance-based rate plan.

¹¹ **§1330 (e) Construction.**--Nothing in this section shall be construed as limiting the existing ratemaking authority of the commission or be construed to invalidate or void any rate mechanisms approved by the commission prior to the effective date of this section.

1 avoiding unnecessary future capital investments, while (1) ensuring adequate utility
2 revenue to maintain the safe, secure and reliable operation of its system and (2) reflecting
3 sound cost of service principles and a rate structure that is just and reasonable and considers
4 customer impacts.¹² The policy statement, 52 Pa. Code §69.3302, also provides 14 factors
5 the Commission may consider in determining just and reasonable alternative distribution
6 ratemaking mechanisms and rate designs.¹³

¹² **§69.3301. Purpose and scope.** Federal and State policy initiatives promote the efficient use of electricity, natural gas and water through technologies and information, including distributed energy resources. The purpose of this policy statement is to invite the proposal, within a utility’s base rate proceeding, of fixed utility distribution ratemaking mechanisms and rate designs that further promote these Federal and State policy objectives, the objectives of 66 Pa. C.S. § 1330 (relating to alternative ratemaking for utilities), and may include reducing disincentives for promoting these objectives, providing incentives to improve system economic efficiency, and avoiding unnecessary future capital investments while ensuring that fixed utilities receive adequate revenue to maintain the safe, secure and reliable operation of their distribution systems. At the same time, an alternative rate design methodology should reflect the sound application of cost of service principles, establish a rate structure that is just and reasonable, and consider customer impacts.

¹³ **§69.3302. Distribution rate considerations.**

(a) In determining just and reasonable alternative distribution ratemaking mechanisms and rate designs that promote the purpose and scope of this statement of policy and the objectives of 66 Pa. C.S. § 1330 (relating to alternative ratemaking for utilities), the Commission may consider, among other relevant factors, the following:

- (1) How the ratemaking mechanism and rate design align revenues with cost causation principles as to both fixed and variable costs.
- (2) How the ratemaking mechanism and rate design impact the fixed utility’s capacity utilization.
- (3) Whether the ratemaking mechanism and rate design reflect the level of demand associated with the customer’s anticipated consumption levels.
- (4) How the ratemaking mechanism and rate design limit or eliminate interclass and intraclass cost shifting.
- (5) How the ratemaking mechanism and rate design limit or eliminate disincentives for the promotion of efficiency programs.
- (6) How the ratemaking mechanism and rate design impact customer incentives to employ efficiency measures and distributed energy resources.
- (7) How the ratemaking mechanism and rate design impact low-income customers and support consumer assistance programs.
- (8) How the ratemaking mechanism and rate design impact customer rate stability principles.
- (9) How weather impacts utility revenue under the ratemaking mechanism and rate design.
- (10) How the ratemaking mechanism and rate design impact the frequency of rate case filings and affect regulatory lag.
- (11) If or how the ratemaking mechanism and rate design interact with other revenue sources, such as Section 1307 automatic adjustment surcharges, 66 Pa. C.S. § 1307 (relating to sliding scale of rates; adjustments), riders such as 66 Pa. C.S. § 2804(9) (relating to standards for restructuring of electric industry) or system improvement charges, 66 Pa. C.S. § 1353 (relating to distribution system improvement charge).
- (12) Whether the alternative ratemaking mechanism and rate design include appropriate consumer protections.
- (13) Whether the alternative ratemaking mechanism and rate design are understandable to consumers.
- (14) How the ratemaking mechanism and rate design will support improvements in utility reliability.

1 **Q. HAS THE COMMISSION PREVIOUSLY APPROVED A MULTIYEAR RATE**
2 **PLAN, AS DEFINED BY 66 Pa. C.S. §1330, FOR A PENNSYLVANIA UTILITY?**

3 **A.** To my knowledge, no. PWSA also indicates that the Commission has not approved a
4 MYRP as defined in the statute.¹⁴

5 **Q. WHAT ARE THE SPECIFICS OF PWSA’S PROPOSED MYRP?**

6 **A.** PWSA’s proposed MYRP has a plan period of three years, FY 2024, FY 2025 and FY
7 2026, and is based on projected revenue requirements for each of the three years with
8 increases of \$48.8 million (22.5%), \$45.4 million (17.8%), and \$53.9 million (17.9%),
9 respectively.¹⁵ The rates for 2024 are based on the COSS applied to the projected 2024
10 revenue requirement.¹⁶ The rates for 2025 are based on the 2024 COSS results applied to
11 the 2025 revenue requirement with adjustments to (a) eliminate the usage allowance, (b)
12 implement the IIC and (c) implement the CAC.¹⁷ The rates for 2026 are projected by
13 applying across the board the 2026 revenue requirement increase of 17.9%.¹⁸

(b) In any distribution rate filing by a fixed utility under 66 Pa. C.S. § 1308 (relating to voluntary changes in rates) that proposes an alternative ratemaking mechanism and rate design, the fixed utility shall explain how these factors impact the distribution rates for each customer class. **Source** The provisions of this § 69.3302 adopted August 23, 2019, effective August 24, 2019, 49 Pa.Bull. 4819

¹⁴ Exhibit KRP-2 (PWSA’s Response to OCA-XVIII-5).

¹⁵ PWSA St. No. 2, page 44, lines 8-9; Smith Direct, PWSA St. No. 7, page 4, lines 4-10.

¹⁶ PWSA St. No. 7, page 3, lines 16-18 and page 4, lines 20-21; see Exhibits HSJ-1, HSJ-23W (water rates), HSJ-23WW (wastewater rates) and HSJ-12SW (storm water rates).

¹⁷ PWSA St. No. 7, page 4, lines 20-23 and page 47, lines 2-22; see Exhibits HSJ-1, HSJ-23W (water rates), HSJ-23WW (wastewater rates) and HSJ-12SW (storm water rates).

¹⁸ PWSA St. No. 7, page 4, lines 24-25 and page 49, lines 2-18; see Exhibits HSJ-1, HSJ-23W (water rates), HSJ-23WW (wastewater rates) and HSJ-12SW (storm water rates).

1 **Q. DOES PWSA’S PROPOSED MYRP INCLUDE AN ANNUAL RECONCILIATION**
2 **MECHANISM FOR PERIODIC CHANGES IN BASE RATES DURING THE**
3 **THREE YEAR PLAN PERIOD OF CONSECUTIVE RATE INCREASES?**

4 **A.** No. PWSA simply proposes second and third rate increases in 2025 and 2026 based on
5 expenses, revenue, and capital debt issuances that it today projects for 2024, 2025 and
6 2026, without proposing any periodic review of its actual expenses, revenues, capital costs,
7 financing needs, quality of service, or other factors in 2024, 2025 and 2026. In other words,
8 PWSA essentially treats each of 2024, 2025 and 2026 as separate fully projected future
9 rate years. As a consequence, should actuals for any of these inputs differ significantly
10 from the projections underlying the MYRP’s rates for 2024, 2025 and 2026, the result will
11 be either under recovery or, more likely, given PWSA’s past performance discussed below,
12 over recovery of PWSA’s actual revenue requirement to the detriment of its customers.

13 **Q. PWSA WITNESS SMITH CITED HIS EXPERIENCE IN CASES BEFORE THE**
14 **RHODE ISLAND PUBLIC SERVICE COMMISSION AND HE OUTLINED THE**
15 **BASIC PROCESS USED IN THOSE CASES TO ENSURE ACCOUNTABILITY BY**
16 **IMPLEMENTING CERTAIN PROTECTIONS FOR VERIFYING COSTS. ARE**
17 **THOSE PROPOSED HERE?**

18 **A.** No. While Witness Smith describes the MYRP process in Rhode Island as consisting of
19 the following 5 steps,¹⁹ he does not support the same process for PWSA.

- 20 1. The utility submits a MYRP application for a rate increase to the Commission.

¹⁹ PWSA St. No. 7, page 5 line 21 to page 6 line 7.

- 1 2. The Commission conducts a full investigation and hearing on the MYRP.
- 2 3. The Commission approves or denies the application. If approved, the first year rates
- 3 are approved and subsequent year rates are tentatively approved.
- 4 4. Before implementing subsequent years' tentatively approved rates, the utility
- 5 submits a compliance filing with information regarding actual cost increases and
- 6 proposed rates designed to recover actual costs.
- 7 5. The Commission either approves the rates or disallows certain costs and adjusts rates.

8 As I explain below, the MYRP that Witness Smith designed for PWSA does not include
9 an adjustment mechanism of the kind he describes in steps 4 and 5 above.

10 **Q. DOES PWSA ARGUE THAT OTHER PORTIONS OF ITS FILING MUST BE**
11 **APPROVED TO SUPPORT THE MYRP?**

12 **A.** Yes. I note here that the testimony of the PWSA witnesses suggest that PWSA considers
13 the reconciling DSIC, IIC and CAC surcharges as components of its MYRP.²⁰ For ease of
14 explication, however, I address each of the three reconciling surcharges in separate sections
15 below. As I recommend that all of these proposals should be denied, it is not necessary for
16 me to evaluate whether and how they may be inextricably intertwined, but I do understand
17 that PWSA has a burden to support each of its proposals on their own merits.

²⁰ PWSA St. No. 2, page 46 lines 15-16 and Exhibit EB-2, page 1 lines 1-7; PWSA St. No. 7, page 47 line 1 to page 48 line 24 and page 49 line 1 to page 50, line and Exhibits HJS-20W, HJS-24W, HJS-19WW and HJS-23WW; PWSA St. No. 6, page 28 lines 15-17.

1 **Q. DID PWSA PROPOSE ANY MINIMAL PERFORMANCE METRICS?**

2 **A.** No. PWSA failed to propose even the basic performance metrics for an MYRP that one
3 would expect, including a process, timeline and adequate processes for reconciliation of
4 PWSA's actual expenses, actual revenues, actual capital costs and measures of system
5 reliability and quality of service. None of these are proposed by PWSA in this case.
6 Additionally, as more fully discussed by OCA Witness Barbara Alexander in OCA
7 Statement No. 5. PWSA has not provided any meaningful assurance or mechanism to meet
8 reasonable customer service and service quality performance. PWSA simply does not
9 propose any performance metrics for the Commission to gauge the accuracy and
10 effectiveness of its MYRP.

11 **Q. TO YOUR KNOWLEDGE, DOES THE PENNSYLVANIA PUBLIC UTILITY**
12 **COMMISSION HAVE A PROCESS OR ANY POLICIES FOR HOW UTILITIES**
13 **ARE OBLIGATED TO SUBSTANTIATE FUTURE RATES OVER THE COURSE**
14 **OF A MYRP?**

15 **A.** No. To my knowledge, there is no process identified that would require PWSA to
16 substantiate future rates for proposed FY 2025 and FY 2026 rates if PWSA's MYRP is
17 approved in this case. If no process exists, it does not appear that ratepayers would be
18 protected against unjust and unreasonable rates.

19 **Q. WHICH OF THE COMMISSION'S §69.3302 FACTORS ARE RELEVANT TO**
20 **THE COMMISSION'S CONSIDERATION OF PWSA'S PROPOSED MYRP?**

21 **A.** Twelve of the Commission's fourteen MYRP factors are relevant to PWSA's MYRP.
22 Factors 6 and 9 concern the operations of electric and gas utilities only. The twelve factors

1 can be grouped under the following four substantive categories of concern. For ease of
2 reference, I have retained the factor numbering in §69.3302.

3 **1. Cost and Rate Design Factors**

4 (1) How the ratemaking mechanism and rate design align revenues with cost
5 causation principles as to both fixed and variable costs.

6 (2) How the ratemaking mechanism and rate design impact the fixed utility's
7 capacity utilization.

8 (3) Whether the ratemaking mechanism and rate design reflect the level of demand
9 associated with the customer's anticipated consumption levels.

10 (4) How the ratemaking mechanism and rate design limit or eliminate interclass
11 and intraclass cost shifting.

12 (5) How the ratemaking mechanism and rate design limit or eliminate disincentives
13 for the promotion of efficiency programs.

14 (7) How the ratemaking mechanism and rate design impact low-income customers
15 and support consumer assistance programs.

16 (8) How the ratemaking mechanism and rate design impact customer rate stability
17 principles.

18 **2. Customer Impact Factors**

19 (12) Whether the alternative ratemaking mechanism and rate design include
20 appropriate consumer protections.

21 (13) Whether the alternative ratemaking mechanism and rate design are
22 understandable to consumers.

23 **3. Reliability Factor**

24 (14) How the ratemaking mechanism and rate design will support improvements in
25 utility reliability.

1 **4. Administrative Efficiency and Regulatory Lag Factor**

2 (10) How the ratemaking mechanism and rate design impact the frequency of rate
3 case filings and affect regulatory lag.

4 (11) If or how the ratemaking mechanism and rate design interact with other
5 revenue sources, such as Section 1307 automatic adjustment surcharges, 66 Pa.
6 C.S. § 1307 (relating to sliding scale of rates; adjustments), . . . or system
7 improvement charges, 66 Pa. C.S. § 1353 (relating to distribution system
8 improvement charge)

9 **Q. DID PWSA ADDRESS HOW ITS PROPOSED MYRP MEETS THESE FACTORS?**

10 **A.** PWSA addressed 10 of these factors with brief assertions that its MYRP satisfies each of
11 the 10,²¹ leaning heavily on factor 10 regarding administrative efficiency.

12 **Q. WHAT IS YOUR ASSESSMENT OF PWSA’S PROPOSED MYRP WITH**
13 **REGARD TO THE COST AND RATE DESIGN FACTORS?**

14 **A.** PWSA asserts that its MYRP (1) permits a better alignment of fixed and variable costs with
15 revenues because rates based on a single test year will diverge from the costs and revenues
16 actually experienced by the utility in subsequent years,²² (2) permits a better alignment
17 with the customers’ anticipated consumption level,²³ (3) will have no impact on its existing
18 low-income customer assistance programs,²⁴ and (4) will provide rate certainty for
19 customers to plan and facilitate investment in water efficiency measures.²⁵

20 Because PWSA’s MYRP does not include an annual reconciliation mechanism, as
21 described above, the first and second assertions are simply false. An annual reconciliation

²¹ PWSA St. No. 2, page 45 line 1 to page 46 line 35.

²² PWSA St. No. 2, page 45 lines 12-20.

²³ PWSA St. No. 2, page 45 lines 27-28.

²⁴ PWSA St. No. 2, page 45 lines 31-32.

²⁵ PWSA St. No. 2, page 46 lines 3-4.

1 mechanism would properly align rates with costs and revenues in 2024, 2025 and 2026 and
2 mitigate any over or under recovery in those years, but that has not been proposed here and
3 there is no process currently in place for the Commission’s oversight.

4 Additionally, as OCA Witness Mierzwa indicated in Statement No. 3, PWSA is currently
5 a party to several wholesale contracts that now obligate PWSA to terms that under-recover
6 it actual costs to provide such service. I understand that Witness Mierzwa recommended
7 that PWSA attempt to renegotiate those contracts as soon as it is possible, and that at least
8 one contract could be renegotiated by 2025. Approving the MYRP now would prohibit
9 PWSA from incorporating any additional contract revenue into FY 2025 or FY 2026 and
10 would continue the inequitable rate treatment even after contract terms may expire.
11 Additionally, Witness Mierzwa indicated that there may be City of Pittsburgh properties
12 that are not yet metered and for which revenue is currently foregone. The Commission’s
13 approval of PWSA’s MYRP may result in an inability to account for unquantified and
14 unknown revenue that the City properties at issue should be paying and carry that lost
15 revenue forward for several more years.

16 In addition, OCA Witness Roger Colton outlines those hardships faced by PWSA’s low-
17 income customers and their ongoing ability to afford essential utility services including
18 PWSA’s services.²⁶ These customers are particularly vulnerable to the risks of
19 overcollection inherent in PWSA’s MYRP.

²⁶ OCA St. 4.

1 **Q. WHAT IS YOUR ASSESSMENT OF PWSA'S PROPOSED MYRP WITH**
2 **REGARD TO THE CUSTOMER IMPACT FACTORS?**

3 **A.** PWSA asserts that its MYRP (1) will assure that the rates are just and reasonable by each
4 year setting the revenue requirement after an examination of PWSA's projected revenues,
5 expenses and cash needs for those years²⁷ and (2) will provide notice of the MYRP to
6 customers and notice prior to the proposed rate increases.²⁸

7 The first assertion is simply false. While PWSA Witness Smith does describe such annual
8 adjustments as part of MYRPs in Rhode Island,²⁹ nowhere in Witness Smith's explanation
9 of the setting of rates for years 2025 and 2026³⁰ is an annual examination of projected
10 revenues, expenses and cash needs even mentioned, let alone explained. I discussed the
11 lack of an annual reconciliation mechanism for PWSA's MYRP above. As regards the
12 second assertion, such notices are required for single-year rate proceedings and therefore
13 do not constitute additional customer protections with regard to PWSA's MYRP.

14 **Q. WHAT IS YOUR ASSESSMENT OF PWSA'S PROPOSED MYRP WITH**
15 **REGARD TO THE RELIABILITY FACTOR?**

16 **A.** PWSA asserts that its MYRP will assure that PWSA will have sufficient revenues to
17 engage in necessary repairs and maintenance and continue to modernize water and
18 wastewater systems, making those systems more reliable.³¹ However, I note that in OCA
19 Statement No. 6, Witness Fought's testimony, he has indicated concerns about PWSA

²⁷ PWSA St. No. 2, page 46 lines 19-23.

²⁸ PWSA St. No. 2, page 46 lines 26-28.

²⁹ PWSA St. No. 7, page 5 line 19 to page 6 line 22.

³⁰ PWSA St. No. 7, page 47 line 1 to page 50 line 2.

³¹ PWSA St. No. 2, page 46 lines 31-35.

1 expending revenue for inequitable surface restoration costs imposed by the City of
2 Pittsburgh. According to Witness Fought, the current arrangement could lead to PWSA
3 customers paying for service restoration of all City streets, and that is one of the reasons
4 that Witness Fought recommended that PWSA be required to amend its Cooperation
5 Agreement with the City when eligible to do so in 2025. The MYRP would be antithetical
6 to providing sufficient revenue for repair and maintenance in this regard, as it appears to
7 carry forward the inequitable restoration costs in each year of the plan term, negating the
8 ability to account for any additional revenue could have if PWSA were renegotiated.

9 **Q. WHAT IS YOUR ASSESSMENT OF PWSA'S PROPOSED MYRP WITH**
10 **REGARD TO THE ADMINISTRATIVE EFFICIENCY AND REGULATORY LAG**
11 **FACTORS?**

12 **A.** PWSA asserts that its MYRP (1) will dramatically reduce the frequency of rate case
13 filings, costs and regulatory lag³² and (2) will work in tandem with PWSA's existing DSIC
14 or any of the new reconcilable charges PWSA is proposing.³³

15 As regards administrative efficiency, PWSA's proposed three-year MYRP would increase
16 administrative efficiency from PWSA's perspective because PWSA would not have to file
17 anything more or do anything more to receive approval of its rates through 2026. Witness
18 Barca asserts that the MYRP's predetermined rates reduce operating uncertainty
19 inefficiency, given PWSA's policy of not placing projects in the capital expenditure budget
20 and beginning construction until rate recovery is assured.³⁴

³² PWSA St. No. 2, page 46 lines 7-8 and page 46 line 38 to page 47 line 11.

³³ PWSA St. No. 2, page 46 lines 15-16.

³⁴ PWSA St. No. 2, page 47 lines 1-11.

1 The price to be paid for this administrative efficiency is that the Commission and ratepayers
2 would be deprived of any oversight of the justness and reasonableness of PWSA's 2024,
3 2025 and 2026 rates through consideration of changing circumstances, including actual
4 expenses, actual revenues, actual capital expenditures, and other factors in 2024, 2025 and
5 2024 to the detriment of its ratepayers and the public interest. Finally, assuming that
6 PWSA would agree to some type of reconciliation process for each year of the MYRP, it
7 would cost PWSA, the Commission, and others time and expense to implement such
8 guardrails. While the resources, time, and financial costs cannot be quantified now because
9 they do not exist, they would be incurred annually for each year of the plan term and would
10 certainly have an administrative burden on all involved.

11 In terms of the question of regulatory certainty, I would also note that PWSA has elected
12 to proceed under the Fully Projected Future Test Year (FPFTY) rules and thus is already
13 getting the advantage of setting rates based on future projections more than a year out from
14 when rates will actually go into effect. With the FPFTY, all parties are asked to project
15 what the world will look like in the future based on the known present. This is difficult
16 enough one-year out, it is close to pure speculation for any period more than that and when
17 coupled with the lack of any ability to correct overcollection in the out years, it shifts all
18 of the risks of this speculation onto customers.

19 **Q. HAVE YOU IDENTIFIED ANY PRACTICAL REASONS WHY PWSA'S MYRP**
20 **SHOULD BE REJECTED?**

21 A. Yes, In addition to the multiple reasons I listed above that warrant rejection of PWSA's
22 MYRP, three other important reasons also support the rejection. The first is that while
23 PWSA's water and wastewater conveyance system is owned by the City of Pittsburgh, that

1 will change not long after the end of the FPFTY in this case. Since 1995, PWSA has
2 assumed responsibility for operating and maintaining the system under a Lease Agreement
3 with the City. Significantly, PWSA intends to purchase the system and become the official
4 owner on September 1, 2025.³⁵ At this time, it is unclear what type of impact PWSA's new
5 ownership of the system assets may have on its financial position and upon its operations,
6 and information about any impact may not be available until PWSA becomes the owner in
7 2025. Because the MYRP does not and cannot account for any such changes, the rate
8 projections it adopts cannot account for any impact.

9 Additionally, while PWSA is subject to the terms of the 2019 Cooperation Agreement with
10 the City, which has the force of law under act 70 of 2020,³⁶ I understand that the agreement
11 may be amended or terminated after January 1, 2025. I also note that in OCA Statement
12 No. 6, OCA Witness Fought has recommended that certain amendments should be made
13 to the Cooperation Agreement to more equitably distribute costs to the City. Because the
14 MYRP cannot capture the rate impact of any changes or termination of the Cooperation
15 Agreement that may be made after January 1, 2025, its projections may be skewed.

16 **Q. DO CONCERNS ABOUT PWSA'S CONSISTENT OVERPROJECTIONS OF ITS**
17 **CAPITAL BUDGET ALSO SUPPORT REJECTION OF ITS MYRP?**

18 A. Yes. PWSA has fallen short of spending its projected capital improvements budget every
19 year from FY 2019-FY 2022.³⁷ As a recent example, for 2022, PWSA projected a spend
20 of \$158,934,290 but it only spent \$111,140,185, meaning that PWSA over projected the

³⁵ PWSA St. No. 1, page 21.

³⁶ PWSA St. No. 1, page 21.

³⁷ Exhibit KRP-6 (PWSA response to I&E RS-1).

1 budget by almost \$48 million (30%). Significantly, PWSA’s capital budget comprises 55%
2 of its total revenue requirement in this case.³⁸ Additionally, PWSA’s capital improvement
3 budget seeks to double its current level of spending.³⁹ The practical reality of these facts is
4 that while PWSA has significantly underspent its capital budget since it became a public
5 utility in 2018, over half of the revenue PWSA now requests is built upon the assumption
6 that PWSA will now not only meet its spending projections but that it will actually double
7 its spending. The continued shortfalls in capital improvement expenditures indicate that
8 PWSA’s projections have been inaccurate and would likely lead to unjust and unreasonable
9 rates if relied upon to now predict rates even further into the future and built on the
10 assumption that PWSA will now double the budget it has failed to meet in the past.

11 **Q. WHAT IS YOUR RECOMMENDATION REGARDING PWSA’S PROPOSED**
12 **MYRP?**

13 **A.** Given all of the deficiencies demonstrated above and in the testimonies of other OCA
14 witnesses, PWSA’s MYRP should not be approved by the Commission. PWSA has elected
15 to proceed under the Commission’s framework for use of a fully projected future test year
16 in rate proceedings and that is the appropriate framework for analyzing rates in this
17 proceeding. Rates should be set based on the FPFTY ending December 31, 2024.

³⁸ PWSA St. No. 2, page 24.
³⁹ PWSA St. No. 2, page 24.

1 **C. DISTRIBUTION SYSTEM IMPROVEMENT CHARGE (DSIC)**

2 **Q. WHAT IS PWSA’S DSIC PROPOSAL?**

3 **A.** In both PWSA Witness Barca’s testimony and in separately filed petitions which have since
4 been consolidated in this proceeding,⁴⁰ PWSA requests that both its water and wastewater
5 DSIC cap percentages be raised from 5% to 7.5% of other applicable rates and charges
6 revenue. PWSA has also requested a blanket waiver of any requirements of Section 1358
7 and of any other requirements of the Public Utility Code that are necessary to approve its
8 requests.

9 **Q: HAS PWSA PROVIDED ADEQUATE SUPPORT THAT ITS REQUEST FOR A**
10 **7.5% DSIC SHOULD BE GRANTED?**

11 **A:** No. It is my understanding from Counsel at the OCA that to request more than 5%, PWSA
12 must make a specific waiver request. The OCA will address in briefing its position that
13 PWSA did not adequately support its request for waiver. Regardless, I do not believe that
14 there is a factual basis to support a DSIC that is more than 5%.

15 **Q. WHAT IS PWSA’S DSIC?**

16 **A.** PWSA’s DSIC is used by PWSA “to recover the reasonable and prudent costs incurred to
17 repair, Improve or replace eligible property that is part of [its] distribution system.”⁴¹
18 PWSA’s current 5% water and wastewater DSICs are the result of the settlement in
19 PSWA’s 2020 rate case⁴² and are set forth under the title of Surcharges in PWSA’s Water

⁴⁰ PWSA filed both Petitions on May 9, 2023 at Docket Nos. P-2023-3040734 and P-2023-3040735 respectively, and I will refer to these together as its DSIC Petitions.

⁴¹ 66 Pa. C.S. § 1351.

⁴² *Pa PUC v. Pittsburgh Water and Sewer Authority*, Dockets R-2020-3017951, R-2020-3017970 and P-2020-30190190

1 Tariff⁴³ and Wastewater Tariff.⁴⁴ The tariffs specify (1) by plant account number the types
2 of facilities allowed,⁴⁵ (2) calculation of the DSIC costs and DSIC rate,⁴⁶ (3) quarterly
3 updates,⁴⁷ (4) the cap percentage,⁴⁸ and (5) annual audits/reconciliations.⁴⁹ As noted in the
4 tariffs, DSIC costs are recovered from customers by applying the cap percentage to the
5 total amount billed each customer for water and wastewater service under PWSA's
6 otherwise applicable rates and charges.⁵⁰ PWSA uses the revenue recovered through the
7 DSIC for PAYGO, i.e., internally generated, funding of DSIC eligible projects.⁵¹

8 **Q. WHAT ARE THE PENNSYLVANIA STATUTORY AND REGULATORY**
9 **PROVISIONS RELEVANT TO PWSA'S DSIC PROPOSALS?**

10 **A.** 66 Pa. C.S. Chapter 32 Water and Sewer Authorities of the Second Class sets forth the
11 overall statutory requirements for the regulation of a Water and Sewer Authority such as
12 PWSA, specifically providing for (1) on request waiver of any provision⁵² and (2) the
13 establishment of a DSIC.⁵³ 66 Pa CS Chapter 13 Subchapter B Distribution Systems sets
14 forth the DSIC statutory framework. The provisions relevant to PWSA's DSIC proposals
15 define the components and frequency of the calculation of recoverable costs and the DSIC

⁵⁰ Exhibit KRP-3 Sec. 2.c and Exhibit KRP-4 Sec. 2.c.

⁵¹ PWSA St. No. 2, page 27 line 23 to page 28 line 4.

⁵² **§3202. Application of provisions of title. (a) Application.-- ... (b) Exception.--**Upon request of an authority, the commission may suspend or waive the applicability of any provision of this title to the authority, except for this section.

⁵³ **§3205. Maintenance, repair and replacement of facilities and equipment. ... (b) Petition.--**An authority may petition the commission for the establishment of a distribution system improvement charge. An authority which establishes a distribution system improvement charge shall comply with all applicable requirements of Subchapter B of Chapter 13 (relating to distribution systems).

1 charge,⁵⁴ provide for audit and annual reconciliation,⁵⁵ and set a percent cap on the amount
2 billed to customers.⁵⁶ 52 Pa. Code §121. DSIC/LTIIP conditions utility DSIC eligibility
3 on an approved LTIIP that accelerates replacement of aging infrastructure⁵⁷ and terminates
4 the DSIC upon a utility's non-compliance with its approved LTIIP.⁵⁸

⁵⁴ **§1357 Computation of charge. (a) Recovery.**--The following shall apply: ... (2) After calculation of the initial charge under paragraph (1), the distribution system improvement charge must be updated on a quarterly basis to reflect eligible property placed in service during the three-month period ending one month prior to the effective date of each distribution system improvement charge update. (3) The fixed cost of eligible property shall consist of depreciation and pretax return, except as provided for in subsection (c) for city natural gas distribution operation.

§1357 Computation of charge. (c) Recovery of costs.--Utilities may file tariffs establishing a sliding scale of rates or other method for the automatic adjustment of the rates of the utility to provide for recovery of the depreciation and pretax return fixed costs of eligible property, as approved by the commission, that are completed and placed in service between base rate proceedings. For city natural gas distribution operations, recoverable costs shall be amounts reasonably expended or incurred to purchase and install eligible property and associated financing costs, if any, including debt service, debt service coverage and issuance costs.

§1357 Computation of charge. (d) Calculation.-- (1) The distribution system improvement charge shall be expressed as a percentage carried to two decimal places and shall be applied in a manner consistent with section 1358 (relating to customer protections) to each customer under the utility's applicable rates and charges. The charge shall not be applied to amounts billed for public fire protection service by water utilities and the State tax adjustment surcharge. (2) The distribution system improvement charge shall be calculated by dividing one-fourth of the annual fixed costs associated with all eligible property under the distribution system improvement charge by the projected revenue for the quarterly period during which the distribution system will be collected. The projected revenues shall not include revenues from public fire protection service earned by water utilities and the State tax adjustment surcharge.

⁵⁵ **§1358 Customer protections. (e) Audit and reconciliation.**--The following shall apply: (1) The distribution system improvement charge shall be subject to the following: (i) Audit at intervals determined by the commission. (ii) Annual reconciliation based on a reconciliation period consisting of the 12 months ending December 31 of each year. The commission may also permit quarterly reconciliation. (2) The revenue received under the distribution system improvement charge for the reconciliation period shall be compared to the utility's eligible costs for that period. The difference between revenue and costs shall be recouped or refunded, as appropriate, in accordance with section 1307(e), over a one-year period or quarterly period commencing April 1 of each year. (3) If revenues received from the distribution system improvement charge exceed eligible costs, the over collections shall be refunded with interest. Interest on the over collections shall be calculated at the residential mortgage lending rate specified by the Secretary of Banking in accordance with the act of January 30, 1974 (P.L.13, No.6), referred to as the Loan Interest and Protection Law, and shall be refunded in the same manner as an over collection.

⁵⁶ **§1358 Customer protections. (a) Limitation.**-- ... (2) A distribution system improvement charge granted to a water utility under former section 1307(g) (relating to sliding scale of rates; adjustments) or this subchapter may not exceed 7.5% of the amount billed to customers.

⁵⁷ **Section 121.1 - Purpose** To be eligible to recover the reasonable and prudently incurred costs regarding the repair, improvement and replacement of eligible property from a DSIC, a utility shall submit an LTIIP for Commission approval. See 66 Pa. C.S. § 1353 (relating to distribution system improvement charge). The LTIIP must show the acceleration of the replacement of aging infrastructure by the utility and be sufficient to ensure and maintain adequate, efficient, safe, reliable and reasonable service to customers.

⁵⁸ **Section 121.8 - Enforcement of LTIIP implementation** (c) The remedy for noncompliance with an approved LTIIP is the termination of the utility's approved DSIC mechanism.

1 **Q. TO WHAT PURPOSE DOES PWSA PROPOSE TO USE ITS PROPOSED**
2 **INCREASE IN THE DSIC CAP FROM 5% to 7.5% IN ITS MYRP?**

3 **A.** PWSA Witness Barca states that PWSA proposes to use the cap increase to (1) accelerate
4 the rate at which projects within its LTIP are completed and (2) increase its internally
5 generated funds.⁵⁹

6 **Q. WHAT IS PWSA’S JUSTIFICATION FOR THE PROPOSED INCREASE OF ITS**
7 **DSIC CAP FROM 5% TO 7.5%?**

8 **A.** Witness Barca presents five arguments purportedly supporting the DSIC cap increase to
9 7.5%.

- 10 1. PAYGO, i.e., internally generated, financing via DSIC revenue is less expensive
11 than long term debt financing. Thus increasing the DSIC Cap from 5% to 7.5%
12 percent will increase the amount of less expensive financing available to PWSA.⁶⁰
- 13 2. PWSA’s Financial Management Policy requires financial performance to be
14 evaluated on an annual basis with the goal of funding at least 10% capital
15 expenditures from PAYGO, i.e., internally generated, funding. Increasing the
16 DSIC cap from 5% to 7.5% will contribute to PWSA’s meeting that goal.
- 17 3. The rate of inflation over the past two years has resulted in the loss of purchasing
18 power at the current DSIC rate of 5%.⁶¹ Increasing the DSIC cap from 5% to 7.5%
19 will make up for that loss of purchasing power.

⁵⁹ PWSA St. No. 2, page 28 lines 5- 15.
⁶⁰ PWSA St. No. 2, page 29 lines 1-13.
⁶¹ PWSA St. No. 2, page 28 lines 7-9.

1 4. PWSA seeks to accelerate the rate at which eligible projects within the LTIP are
2 completed.⁶² Increasing the DSIC cap from 5% to 7.5% will accelerate the
3 completion of DSIC-eligible LTIP projects.

4 5. PWSA also seeks to increase its level of internally generated funds in an effort to
5 reduce its financial leverage or debt ratio.⁶³ Increasing the DSIC cap from 5% to
6 7.5% will reduce PWSA's debt ratio.

7 I will address these arguments seriatim. As explained more fully below, my response to
8 the first argument is that PAYGO funding via the DSIC is inconsistent with Section
9 1357, violating the regulatory principle of ratable recovery of the costs of capital assets.
10 My responses to the other arguments follow thereafter.

11 **Q. IN YOUR OPINION, HAS PWSA DEMONSTRATED THAT INCREASING ITS**
12 **WATER AND WASTEWATER DSICS IS NECESSARY FOR IT TO ENSURE**
13 **AND MAINTAIN ADEQUATE, EFFICIENT, SAFE, RELIABLE AND**
14 **REASONABLE SERVICE?**

15 A. No.

16 **1. DSIC PAYGO Funding**

17 **Q. WHAT IS YOUR RESPONSE TO THE ARGUMENT THAT DSIC PAYGO**
18 **REVENUE IS LESS EXPENSIVE THAN LONG TERM DEBT FINANCING?**

19 A. My response is three-fold. First, DSIC PAYGO recovery is not an option under Section
20 1357(c) and is inconsistent with the recovery options set forth in Section 1357(c). Second,
21 PAYGO DSIC recovery violates the regulatory principle of ratable recovery of the costs

⁶² PWSA St. No. 2, page 28 lines 6-7.
⁶³ PWSA St. No. 2, page 28 lines 9-11.

1 of capital assets, which violation in turn leads to the over recovery of capital costs from
2 current customers and the under recovery of capital costs from later generations of
3 customers in violation of intergenerational equity.⁶⁴ Thus, increasing PWSA’s DSIC cap
4 to 7.5% will only increase the amount of DSIC eligible capital assets the recovery of the
5 costs of which is in violation of the principle of ratable recovery, over recovering capital
6 costs from current customers and under recovering capital cost from future customers.
7 Third, as I explain below in response to PWSA’s other arguments, PWSA’s DSIC is not
8 PWSA’s only option for accessing capital asset financing that is less expensive than long
9 term debt.

10 **Q. IN WHAT WAYS IS PAYGO DSIC FUNDING INCONSISTENT WITH SECTION**
11 **1357?**

12 **A.** Section 1357(c), “Recovery of costs,” states that the costs of a utility’s DSIC eligible assets
13 are to be recovered via depreciation and return over the life of the capital asset. This is not
14 PWSA’s DSIC PAYGO recovery, where the full cost of a DSIC eligible capital asset is
15 recovered from ratepayers at the time that it is incurred.⁶⁵ Section 1357(c) provides for a
16 municipal gas utility to recover long term debt costs of DSIC eligible capital over the term
17 of the debt. This is also not PWSA’s DSIC PAYGO recovery and, in any event, PWSA is

⁶⁴ USEPA-NARUC, Consolidated Water Rates: Issues and Practices in Single-Tariff Pricing, 1999, page 22 – “Economic theory also argues for utility pricing that is *equitable* in terms of allocating costs to those responsible for those costs. In this conception, equity essentially serves efficiency goals. Three kinds of equity can be considered. Horizontal equity suggests that those who impose similar costs should pay the same rate. A related ratemaking principle is that rates should be “nondiscriminatory.” Vertical equity suggests that those who impose different costs should pay different rates that reflect those cost differences. Ratemaking allows for “due discrimination” when costs among customer groups vary substantially. Finally, intergenerational equity considers equity along a temporal dimension, suggesting that one generation of customers should not be forced to cover costs imposed by another generation of customers.”

⁶⁵ PWSA St. No. 2, page 27 lines 7-8; see Exhibit KRP 5 PWSA responses to OCA-XVI-19 and OCA-XVI-20, pages 1 and 2 for water and wastewater, respectively.

1 not a municipal gas utility. Moreover, both options in Section 1357(c) require recovery
2 over a number of years (either asset service life or the term of the debt) which is wholly
3 inconsistent with PWSA's PAYGO recovery of the costs at the time in which they are
4 incurred. From a regulatory perspective, despite the cost savings associated with PAYGO
5 funding, DSIC PAYGO funding of the capital assets listed in PWSA's DSIC tariffs and
6 PWSA's LTIP violates the regulatory principle of ratable recovery of the cost of capital
7 assets.

8 **2. PWSA's Policy goal of funding at least 10% capital expenditures**
9 **from PAYGO**

10 **Q. WHAT IS YOUR RESPONSE TO PWSA's 10% PAYGO CAPITAL**
11 **EXPENDITURE POLICY ARGUMENT?**

12 **A.** My response is that the DSIC is not the only PAYGO financing option available to PWSA.
13 Examination of Witness Barca's MYRP income statements in Exhibit's EB-1 and EB-2
14 reveals that PWSA has two PAYGO funding options for projects in PWSA's current
15 LTIP,⁶⁶ which is also confirmed in Witness Barca's testimony that "PWSA has two
16 sources of internally generated funds within this case."⁶⁷ Those two sources are (1) funds
17 generated through "[tariff] rate dollars" and (2) "DSIC funds." Assuming that there is a
18 sound basis for this PAYGO 10% policy, which Witness Barca does not provide, DSIC
19 PAYGO funding, rather than rate dollar funding, for the capital assets defined in the DSIC
20 tariffs is in clear violation of the principle of ratable recovery and should not be used in
21 pursuit of this unsupported policy.

⁶⁶ Exhibit EB-2, page 1 lines 36 and 37.

⁶⁷ PWSA St. No. 2, page 27 line 21 to page 28 line 4.

1 **3. Inflation Loss of Purchasing Power**

2 **Q. WHAT IS YOUR RESPONSE TO PWSA'S LOSS OF PURCHASING POWER**
3 **ARGUMENT?**

4 **A.** Even assuming that inflation has resulted in a loss of purchasing power, increasing the
5 DSIC cap to 7.5% to make up that loss would be inconsistent with regulatory ratemaking
6 principles. Regulatory ratemaking is on principle forward looking and therefore does not
7 take account of past losses or financial deficiencies. An increase in the DSIC cap cannot
8 be justified as a past shortfall make-up mechanism. Moreover, because the DSIC is
9 calculated by applying the cap 5% to rates, as rates increase the amount recovered by the
10 DSIC will increase as rates increase and account for whatever inflation is reflected in the
11 costs underlying PWSA's rates. Thus, increasing the cap percentage to account for
12 inflation would double dip based on a speculative impact of inflation for which PWSA has
13 not provided quantified evidentiary support.

14 **4. DISC Acceleration of the Completion Rate for LTIP projects**

15 **Q. DOES WITNESS BARCA EXPLAIN HOW INCREASING THE DSIC CAP TO**
16 **7.5% WILL ACCELERATE THE COMPLETION OF LTIP PROJECTS?**

17 **A.** Not in his discussion of the DSIC. However, in his discussion of the MYRP he refers to a
18 PWSA policy to not place projects in the capital expenditure budget and begin construction
19 until rate recovery is assured,⁶⁸ which would explain this, since the DSIC is an ongoing
20 reconcilable charge that assures rate recovery of the costs of DSIC eligible projects. Again
21 assuming that there is a sound basis for this policy, which Witness Barca does not provide,

⁶⁸ PWSA St. No. 2, page 47 lines 1-11.

1 the FPFTY already provides the rate recovery assurance, so there is no need to provide that
2 rate recovery assurance by increasing the DSIC cap from 5% to 7.5%. Additionally, I note
3 that for the last five years, with the benefit of the FPFTY and its ability to implement a full
4 5% DSIC on the first date that new rates go into effect, PWSA has consistently and
5 significantly failed to meet its construction budgets,⁶⁹ which strongly suggests that the
6 purported PWSA policy is not an actual brake on project completion rates and that
7 increasing the DSIC cap will not accelerate project completion rates.

8 **5. Impact on PWSA Debt Ratio**

9 **Q. WHAT SUPPORT DOES WITNESS BARCA PROVIDE REGARDING THE**
10 **DSIC'S IMPACT ON PWSA'S DEBT RATIO?**

11 **A.** Witness Barca states that DSIC PAYGO revenues at the 5% cap have reduced PWSA's
12 debt ratio from 112% in 2018 to 100% in 2022 and that increasing the cap to 7.5% for
13 2024-2026 will further reduce PWSA's debt ratio below 90%.⁷⁰

14 **Q. WHAT IS YOUR RESPONSE TO PWSA'S DEBT RATIO REDUCTION**
15 **ARGUMENT?**

16 **A.** My response is three-fold. First, Witness Barca provides no evidence that debt ratio
17 reduction beyond its current level of 100% is needed. Second, the DSIC is only able to
18 contribute to the reduction of the debt ratio because PWSA uses it as a source of PAYGO
19 funding in violation of the principle of ratable recovery of capital assets. Third, assuming
20 that reducing PWSA's debt ratio is an appropriate regulatory objective for PWSA, as I

⁶⁹ Exhibit KRP-6 (PWSA response to I&E RS-1).

⁷⁰ PWSA St. No. 2, page 28 lines 11 to page 29 line 1.

1 noted above, PWSA has a non-DSIC source of PAYGO funding that it can use to reduce
2 its debt ratio.

3 **Q. WHAT IS YOUR RECOMMENDATION REGARDING PWSA’S REQUEST TO**
4 **INCREASE ITS WATER AND WASTEWATER DISC CAPS TO 7.5%?**

5 **A.** As detailed above, PWSA has not demonstrated a need for the DSIC cap increase, nor has
6 it supported the need for any waivers requested. For that reason, I recommend that the
7 Commission deny PWSA’s request to increase its water and wastewater DSIC caps from
8 5% to 7.5%.

9 **C. INFRASTRUCTURE IMPROVEMENT CHARGE (IIC)**

10 **Q. WHAT IS PWSA’S PROPOSED INFRASTRUCTURE IMPROVEMENT**
11 **CHARGE?**

12 **A.** According to Witness Barca, PWSA’s Infrastructure Improvement Charge (IIC) is an
13 automatic adjustment clause (reconciling surcharge) to recover from customers the
14 principle and interest for PENNVEST loans and Water Infrastructure Finance and
15 Innovation Act (WIFIA) loans for funding significant infrastructure projects.⁷¹ The IIC (1)
16 will become effective in FY 2025, (2) will be reconciled on a semi-annual basis, (3) will
17 automatically adjusted as PWSA obtains new PENNVEST and WIFIA loans, and (4) the
18 amount of the charge to pay for fully amortized loans will be rolled into base rates in
19 subsequent base rate proceeding.⁷² The water and wastewater IIC rates per thousand

⁷¹ PWSA St. No. 2, page 47 line 23 to page 48 line 4; see also Meehling Direct, page 27 lines 15-22 and Exhibits JAM-12 water tariff pages 8B-8D, JAM-14 wastewater tariff pages 9B-9D and JAM-16 storm water tariff pages 8A-8C.

⁷² PWSA St. No. 2, page 48 line 20 to page 49 line 9.

1 gallons for MYRP years 2025 and 2026 will be calculated by calculating the PENNVEST
2 and WIFIA debt service requirement for each year and dividing that amount by projected
3 gallons for each year; the stormwater ICC rates per ERU are calculated by dividing the
4 debt service for PENNVEST and WIFIA funded stormwater projects by the total number
5 of stormwater ERUs.⁷³

6 **Q. WHY IS PWSA PROPOSING THE IIC?**

7 **A.** Witness Barca states that the IIC “will expedite PWSA’s ability to obtain additional low-
8 cost funding through PENNVEST and WIFIA by having a stable revenue source to ensure
9 the required debt covenants and additional bonds test can be met in addition to having funds
10 available to pay annual debt service.”⁷⁴

11 **Q. WHAT IS YOUR RESPONSE TO THESE REASONS?**

12 **A.** Witness Barca appears to be implying that PENNVEST and WIFIA may only lend funds
13 for capital expenditures to PWSA if PWSA can show they will have rate generated revenue
14 that will meet debt covenants and bond test and pay annual debt service. That is why the
15 IIC applies only to PENNVEST and WIFIA loans and has the provision that the IIC charge
16 will be automatically adjusted to reflect new PENNVEST and WIFIA loans as they are
17 obtained. My response is that PWSA has provided no evidence to support of its assertion
18 that the IIC is needed to expedite its obtaining PENNVEST and WIFIA loans. In fact, as
19 PWSA Witness Pickering explained, PWSA has been quite successful in obtaining
20 PENNVEST funding already.⁷⁵ Additionally, I understand that the Commission has

⁷³ PWSA St. No. 7, page 48 lines 7-12 and page 49 line 20 to 50 line 2; see Exhibit Schedules HJS-22W, HJS-21WW and HJS-11SW.

⁷⁴ PWSA St. No. 2, page 48, lines 7-12.

⁷⁵ PWSA St. No. 1, page 26.

1 typically limited any surcharge on PENNVEST recovery for smaller water and wastewater
2 companies.

3 **Q. WHAT IS THE STATUS OF RECONCILING SURCHARGES LIKE THE IIC IN**
4 **REGULATORY THEORY AND PRACTICE?**

5 **A.** The technical term for reconciling surcharges like the IIC is “cost tracker” and cost trackers
6 are viewed with disfavor in both regulatory theory and practice because they allow for the
7 automatic pass through of costs to ratepayers and thus weaken a utility’s incentive to
8 control costs.⁷⁶ A cost tracker is appropriate only under circumstances where the costs in
9 question are (1) largely outside of control of a utility, (2) unpredictable and volatile and (3)
10 substantial and recurring.⁷⁷ By PWSA’s own telling, the costs to be covered by the IIC are
11 (1) wholly under PWSA’s control because PWSA has complete control over whether it
12 enters into a loan agreement with PENNVEST and WIFIA, (2) are not unpredictable and
13 volatile precisely because PWSA has complete control over whether it enters into a loan
14 agreement with PENNVEST and WIFIA and (3) are neither substantial nor unpredictably
15 recurring, precisely again because PWSA has complete control over whether it enters into
16 a loan agreement with PENNVEST and WIFIA. I also note that PWSA has provided no
17 substantive evidence to the contrary.

⁷⁶ Exhibit KRP-7 - “How Should Regulators View Cost trackers?” National Regulatory Research Institute, September 2009, page 4-5.

⁷⁷ Exhibit KRP-7 “How Should Regulators View Cost trackers?” National Regulatory Research Institute, September 2009, page 12 of 23.

1 **Q. DOES THE COMMISSION HAVE ANY POLICY STATEMENTS THAT ARE**
2 **RELEVANT TO PWSA’S IIC PROPOSAL?**

3 **A.** Yes. The Commission has a policy statement, *Treatment of PENNVEST obligations*, at 52
4 PA. Code § 69.363. Under the Commission’s policy statement, water and wastewater
5 companies with outstanding PENNVEST obligations that have not been reflected in rates
6 of future PENNVEST obligations, may establish an automatic adjustment limited solely to
7 the recovery of PENNVEST principal and interest obligations. Rate recovery would only
8 be permitted after receipt of the applicable DEP inspection and final PENNVEST
9 amortization schedule. Finally, PENNVEST obligations should be listed on customers’
10 bills as a separate line item, and any complaints arising under the adjustment clause are to
11 be referred to the Commission’s Office of administrative Law Judge for a hearing and
12 adjudication.

13 **Q. PART OF THE POLICY STATEMENT INDICATES THAT UTILITIES SHOULD**
14 **SEPARATELY IDENTIFY PENNVEST INTEREST CHARGES ON**
15 **CUSTOMERS’ BILLS. IS PWSA PROPOSING TO SEPARATELY IDENTIFY**
16 **PENNSVEST AND WIFIA INTEREST CHARGES ON CUSTOMERS’ BILLS?**

17 **A.** No. Although PWSA Witness Mechling claims that the IIC will provide greater
18 transparency of the costs it is recovering,⁷⁸ she also admits that PWSA is not proposing to
19 separately identify the rates on customer bills.⁷⁹

⁷⁸ PWSA St. No. 6, page 30. Witness Mechling makes the same claim regarding the Customer Assistance Charge I address below.
⁷⁹ PWSA St. No. 6, page 31.

1 **Q. WHAT DO YOU CONCLUDE REGARDING THE IIC?**

2 **A.** I conclude that PWSA has provided no evidence that the IIC is necessary for it to obtain
3 PENNVEST and WIFIA loans at favorable rates, that the IIC will weaken PWSA's
4 incentive to control the costs of its capital assets, and that PWSA has not shown that the
5 IIC is consistent with the Commission's PENNVEST policy statement. Additionally,
6 PWSA's proposal to lump IIC costs into base rates on customers' bills deprives customers
7 of an opportunity to understand the components that comprise their bills and lacks
8 transparency. For these reasons, I recommend that the Commission reject PWSA's
9 proposed Infrastructure Improvement Charge.

10 **D. CUSTOMER ASSISTANCE CHARGE (CAC)**

11 **Q. WHAT IS PWSA'S PROPOSED CUSTOMER ASSISTANCE CHARGE?**

12 **A.** According to Witness Barca, PWSA's Customer Assistance Charge (CAC) is an automatic
13 adjustment clause (reconciling surcharge) to recover from customers (1) the discounts to
14 customers per the Bill Discount Program, (2) the operating costs for the PHG20 Cares
15 team, (3) the costs of PWSA's Hardship Fund and (4) past due arrearages forgiven by the
16 Arrearage Forgiveness Program.⁸⁰ The CAC (1) will become effective in FY 2025, (2) will
17 be adjusted on a semi-annual basis, (3) will be reconciled on an annual basis.⁸¹ The water
18 and wastewater CAC rates per thousand gallons for MYRP years 2025 and 2026 will be
19 calculated by calculating the revenues and costs identified above for each year and dividing
20 that amount by projected gallons for each year; the stormwater CAC rates per ERU are

⁸⁰ PWSA St. No. 2, page 49 lines 12-17.

⁸¹ PWSA St. No. 2, page 49 line 20 to page 50 line 3; see also PWSA St. No. 6, page 28 lines 8-13 and Exhibits JAM-12 water tariff pages 8E-8F, JAM-14 wastewater tariff pages 9E-9F and JAM-16 storm water tariff pages 8D-8E.

1 calculated by dividing the revenues and costs identified above by the total number of
2 stormwater ERUs.⁸²

3 **Q. WHY IS PWSA PROPOSING THE CAC?**

4 **A.** Witnesses Barca and Mechling offer various reasons for gathering the costs of the listed
5 programs together in a reconcilable surcharge. Witness Barca states that PWSA’s customer
6 assistance programs have become increasingly expensive.⁸³ Witness Mechling states that
7 (1) a reconciling surcharge will ensure that PWSA neither under recovers nor over recovers
8 the costs of the programs during the MYRP period because the costs are based on
9 projections⁸⁴ and (2) the CAC supports the MYRP because it will minimize the need to file
10 future rate cases should the actual costs differ from the projected costs.⁸⁵ I note that Witness
11 Mechling’s two reasons appear to be a distinction without a difference.

12 **Q. WHAT IS YOUR RESPONSE TO THESE REASONS?**

13 **A.** That PWSA’s customer assistance costs are growing and that actual costs might differ from
14 projected costs can easily be said of any of PWSA’s costs. That in itself provides no reason
15 to single out these particular costs and include them in a reconciling surcharge.

16 **Q. WHAT IS THE STATUS OF RECONCILING SURCHARGES LIKE THE CAC IN**
17 **REGULATORY THEORY AND PRACTICE?**

18 **A.** As I noted above, the technical term for reconciling surcharges is “cost tracker” and cost
19 trackers are viewed with disfavor in both regulatory theory and practice because they allow

⁸² PWSA St. No. 7, page 48 lines 14-24 and page 49 line 20 to 50 line 2; see Exhibit Schedules HJS-22W, HJS-21WW and HJS-11SW.

⁸³ PWSA St. No. 2, page 49, lines 13-14.

⁸⁴ PWSA St. No. 6, page 27 line 23 to page 28 line 5.

⁸⁵ PWSA St. No. 2, page 28 lines 13-17 and page 29, lines 8-19.

1 for the automatic pass through of costs to ratepayers and thus weaken a utility’s incentive
2 to control costs.⁸⁶ A cost tracker is appropriate only under circumstances where the costs
3 in question are (1) largely outside of control of a utility, (2) unpredictable and volatile and
4 (3) substantial and recurring.⁸⁷ By PWSA’s own telling, the customer assistance costs in
5 the CAC are (1) largely under PWSA’s control because PWSA’s has control over the terms
6 and administration of the customer assistance programs, (2) are not unpredictable and
7 volatile precisely because the administration of the programs is under PWSA’s control and
8 (3) are neither substantial nor unpredictably recurring, precisely again because the
9 administration of the programs is under PWSA’s control. I note that PWSA has provided
10 no substantive evidence to the contrary.

11 **Q. HAS THE COMMISSION RECENTLY REJECTED A PROPOSAL SIMILAR TO**
12 **THE CAC BECAUSE IT WAS NOT CONSISTENT WITH THE PUBLIC UTILITY**
13 **CODE?**

14 A. Yes. As acknowledged by PWSA Witness Mechling, in May of 2022, the Commission
15 rejected Aqua Pennsylvania’s proposal to implement a universal service rider.⁸⁸ The Aqua
16 Order that Ms. Mechling references indicates that the Commission views reconcilable
17 riders as exceptional and that they have been limited essentially to when legislatively

⁸⁶ Exhibit KRP-7 “How Should Regulators View Cost trackers?” National Regulatory Research Institute, September 2009, page 4-5.

⁸⁷ Exhibit KRP-7 “How Should Regulators View Cost trackers?” National Regulatory Research Institute, September 2009, page 8.

⁸⁸ PWSA St. No. 6, page 26, referencing *Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc.*, Final Order entered May 16, 2022 at Docket Nos. R-2021-3027385 and R-2021-3027286 at 302-320.

1 mandated or when directed by the Commission.⁸⁹ I note that neither of those two criteria
2 are operative for PWSA's CAC.

3 **Q. HAS PWSA REQUESTED ANY WAIVERS RELATED TO THE CAC?**

4 A. Yes. Witness Mechling indicates that PWSA is requesting suspension or waiver of the
5 applicability of the Public Utility Code necessary for PWSA to implement the CAC, citing
6 only the Commission's general authority to suspend or waive the applicability of any
7 provision to PWSA.⁹⁰

8 **Q. DO YOU SUPPORT PWSA'S WAIVER REQUEST?**

9 A. No. Witness Mechling does not specify the provisions for which PWSA requests a waiver
10 and does not provide any substantive reasons for the waiver of the unspecified provisions.
11 For these reasons I do not support PWSA's waiver request.

12 **Q. WHAT DO YOU CONCLUDE REGARDING PWSA'S PROPOSED CAC?**

13 A. I conclude that the CAC will weaken PWSA's incentive to control the costs of its customer
14 assistance programs and that PWSA has made no showing that there are exceptional
15 circumstances that support the CAC. For these reasons I recommend that the Commission
16 reject PWSA's proposed Customer Assistance Charge.

17 **Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

18 A. Yes. However, I reserve the right to supplement this testimony if further information is
19 provided by PWSA.

⁸⁹ *Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc.*, Final Order entered May 16, 2022 at Docket Nos. R-2021-3027385 and R-2021-3027286 at 314.

⁹⁰PWSA St. No. 6, page 29 line19 to page 30 line 1.

Professional Experience

Dr. Pavlovic provides clients with economic and policy analyses of commercial operations and expert testimony in support of litigation, negotiation and strategic planning. His analyses and testimony are distinguished by systematic articulation and testing of assumptions, thorough evaluation of data, innovative application of statistical tools and economic principles, and clarity and precision of presentation. Dr. Pavlovic has provided expert testimony on the operations, costs and revenues of gas and electric utilities, the impacts of restructuring wholesale and retail electric markets, effects of mergers, the operation and competitiveness of petroleum and electric markets, the market valuation of crude oil, electric and gas reliability, and the performance of energy efficiency, renewable energy, and peak reduction programs.

Major projects directed by Dr. Pavlovic have included: analytical assistance to counsel and testimony on all aspects of the restructuring of wholesale and retail electric markets in the Eastern Interconnection; technical representation of the District of Columbia People’s Counsel on the DC PSC’s Pepco Productivity Improvement Working Group and various PJM working groups; impact evaluation study of pilot energy efficiency and renewable energy programs in the District of Columbia; analysis of petroleum markets, expert testimony, and coordination of technical testimony in the Trans-Alaska Pipeline quality bank litigation; Independent Technical Review of the economic models used by the US Army Corps of Engineers for the Ohio River System Investment Plan; assistance to a major independent telephone company in the formulation and implementation of corporate strategic plans, applications for long-distance authority, and settlement negotiations with major domestic and foreign carriers.

By education and professional experience Dr. Pavlovic has expertise in formal and mathematical logic, statistics, economics, financial analysis, econometrics, and computer modeling. With 33 years’ experience as a consultant and expert witness, Dr. Pavlovic has in-depth knowledge of

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)
to the Interrogatories of the Office of Consumer Advocate (“OCA”), Set XVIII (18)**

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-XVIII-5 Has the PA Commission allowed a multi-year rate plan, as defined by 66 Pa. C.S. § 1330, for water / wastewater utilities in the past? If so, please provide the Commission Order or any documentation that the Commission used to support the implementation of a multi-year rate plan. If so, what were the criteria (formula, index or methodology) that were used to develop the rates over the forecasted periods?

Response: No.

Response provided by: Deanne O’Dell, Esq.

Date response provided: July 25, 2023

PART V: SURCHARGES

DISTRIBUTION SYSTEM IMPROVEMENT CHARGE (DSIC)

In addition to the net charges provided for in this Tariff, a charge of 5.0% will apply consistent with the Commission Order dated December 3, 2020 at Docket No. P-2020-3019019, approving the DSIC.

(I)

1. General Description

- a. Purpose: To recover the reasonable and prudent costs incurred to repair, improve, or replace eligible property which is completed and placed in service and recorded in the individual accounts, as noted below, between base rate cases and to provide the Utility with the resources to accelerate the replacement of aging infrastructure, to comply with evolving regulatory requirements and to develop and implement solutions to regional supply problems.

The costs of extending facilities to serve new customers are not recoverable through the DSIC.

- b. Eligible Property: The DSIC-eligible property will consist of the following:
- Services (account 333000), meters (account 334100) and hydrants (account 335000) installed as in-kind replacements for customers;
 - Mains and valves (account 331800) installed as replacements for existing facilities that have worn out, are in deteriorated condition, or are required to be upgraded to meet under 52 Pa Code § 65 (relating to water service);
 - Main extensions (account 331800) installed to eliminate dead ends and to implement solutions to regional water supply problems that present a significant health and safety concern for customers currently receiving service from the water utility;
 - Main cleaning and relining (account 331800) projects; and
 - Unreimbursed costs related to highway relocation projects where a water utility must relocate its facilities; and
 - Other related capitalized costs.

- c. Effective Date: The DSIC will become effective upon one (1) day notice after submission of a compliance tariff in compliance with a Commission order.

2. Computation of the DSIC

- a. Calculation: The DSIC shall be calculated to recover the fixed costs of eligible plant additions that have not previously been reflected in the Authority's rates and have been or are projected to be placed in service in the calendar year in which the DSIC is charged. The DSIC charge shall be levelized so that, on an annual basis, it will collect the recoverable costs for eligible plant additions that have been or are anticipated to be placed in service during the calendar year. DSIC charges shall be reconciled and may be adjusted on a calendar quarter basis for: 1) actual experienced sales volumes; and 2) revisions to projected DSIC eligible capital expenditures.

The dates and types of changes in the DSIC rate will occur as follows:

Effective Date of Change	Date to which DSIC-Eligible Plant Additions Reflected	
April 1	Annual levelized C-factor rate adjustments	
July 1	Optional rate adjustment for +/- 2% over/under collection	(C)
October 1	Rate adjustment for +/- 2% over/under collection	(C)
January 1	Optional rate adjustment for +/- 2% over/under collection	(C)

- b. Recoverable Costs: The recoverable costs shall be amounts reasonably expended or incurred to purchase and install eligible property and associated financing costs, if any, including debt service, debt service coverage, and issuance costs.

(C) = Change

and Sewer Authority

Tariff Supplement No. 5
Tariff Water - Pa. P.U.C. No. 1
First Revised Page No. 61
Canceling Original Page No. 61

- c. Application of DSIC: The DSIC will be expressed as a percentage carried to two decimal places and will be applied to the total amount billed to each customer for water service under the Authority's otherwise applicable rates and charges. To calculate the DSIC, one-fourth of the annual recoverable costs associated with all property eligible for cost recovery under the DSIC will be divided by the Authority's projected revenue for water services (including all applicable clauses and riders) for the quarterly period during which the charge will be collected, exclusive of revenues from public fire protection service. (C)
- d. Formula: The formula for calculation of the DSIC is as follows: (C)

$$\text{DSIC} = \frac{\text{DSI} + e}{\text{PQR}}$$

Where:

- DSI = Recoverable costs (defined in Section b. directly above)
- e = the amount calculated under the annual reconciliation feature or Commission audit, as described below.
- PQR = Projected quarterly revenues for distribution service (including all applicable clauses and riders) including any revenue from existing customers plus netted revenue from any customers which will be gained or lost by the beginning of the applicable service period.

3. Quarterly Updates: Supporting data for each quarterly update will be filed with the Commission and served upon the Commission's Bureau of Investigation and Enforcement, the Office of Consumer Advocate, and the Office of Small Business Advocate at least ten (10) days prior to the effective date of the update.

(C) = Change

4. Customer Safeguards

- a. Cap: The DSIC is capped at 5.0% of the amount billed to customers for distribution service (including all applicable clauses and riders), inclusive of amounts billed for annual reconciliation pursuant to the "e" factor set forth above, as determined on an annualized basis.
- b. Audit/Reconciliation: The DSIC is subject to audit at intervals determined by the Commission. Any cost determined by the Commission not to comply with any provision of 66 Pa C.S. §§ 1350, et seq., shall be credited to customer accounts. The DSIC is subject to annual reconciliation based on a reconciliation period consisting of the twelve months ending December 31 of each year. The revenue received under the DSIC for the reconciliation period will be compared to the Authority's eligible costs for that period. The difference between revenue and costs will be recouped or refunded, as appropriate, in accordance with Section 1307(e), over a one-year period commencing on April 1 of each year. If DSIC revenues exceed DSIC-eligible costs, such over-collections will be refunded with interest. Interest on over-collections and credits will be calculated at the residential mortgage lending specified by the Secretary of Banking in accordance with the Loan Interest and Protection Law (41 P.S. §§ 101, et seq.) and will be refunded in the same manner as an over-collection.
- c. Customer Notice: Customers shall be notified of changes in the DSIC by including appropriate information on the first bill they receive following any change. An explanatory bill insert shall also be included with the first billing.
- d. All customer classes: The DSIC shall be applied equally to all customer classes. Provided that, the DSIC will not apply to public fire protection customers.

PART V: SURCHARGES

DISTRIBUTION SYSTEM IMPROVEMENT CHARGE (DSIC)

In addition to the net charges provided for in this Tariff, a charge of 5.0% will apply consistent with the Commission Order dated December 3, 2020 at Docket No. P-2020-3019019, approving the DSIC.

(I)

1. General Description

- a. Purpose: To recover the reasonable and prudent costs incurred to repair, improve, or replace eligible property which is completed and placed in service and recorded in the individual accounts, as noted below, between base rate cases and to provide the Utility with the resources to accelerate the replacement of aging infrastructure, to comply with evolving regulatory requirements and to develop and implement solutions to regional supply problems.

The costs of extending facilities to serve new customers are not recoverable through the DSIC.

- b. Eligible Property: The DSIC-eligible property will consist of the following:
- Collection sewers, collecting mains and service laterals, including sewer taps, curb stops and lateral cleanouts installed as in-kind replacements for customers; Accounts (360, 361 and 363)
 - Collection mains and valves for gravity and pressure systems and related facilities such as manholes, grinder pumps, air and vacuum release chambers, cleanouts, main line flow meters, valve vaults and lift stations installed as replacements or upgrades for existing facilities that have worn out, are in deteriorated condition or are required to be upgraded by law, regulation or order; Accounts (360, 361, 364 and 365)

(I)= Increase

- Collection main extensions installed to implement solutions to wastewater problems that present a significant health and safety concern for customers currently receiving service from the wastewater utility; Accounts (360, 361 and 363)
 - Collection main rehabilitation including inflow and infiltration projects; Accounts (360, 361 and 363)
 - Unreimbursed costs related to highway relocation projects where a wastewater utility must relocate its facilities; and
 - Other related capitalized costs.
- c. Effective Date: The DSIC will become effective upon one (1) day notice after submission of a compliance tariff in compliance with a Commission order.

2. Computation of the DSIC

- a. Calculation: The DSIC shall be calculated to recover the fixed costs of eligible plant additions that have not previously been reflected in the Authority's rates and have been or are projected to be placed in service in the calendar year in which the DSIC is charged. The DSIC charge shall be levelized so that, on an annual basis, it will collect the recoverable costs for eligible plant additions that have been or are anticipated to be placed in service during the calendar year. DSIC charges shall be reconciled and may be adjusted on a calendar quarter basis for: 1) actual experienced sales volumes; and 2) revisions to projected DSIC eligible capital expenditures.

The dates and types of changes in the DSIC rate will occur as follows:

Executive Summary

A cost tracker allows a utility to recover its actual costs from customers for a specified function on a periodical basis outside of a rate case. This paper discusses the major issues that state public utility commissions face in evaluating the costs and benefits of these devices.

Several state commissions have approved new cost trackers for a wide array of utility functions in both the electric and natural gas sectors. State commissions have traditionally limited the use of cost trackers, partially because of the perception that they create “bad” incentives and shift risks to a utility’s customers. The recent approvals depart from past regulatory practices that sanction trackers only under highly restricted conditions.

The author asserts that state commissions have not given adequate attention to the negative features of cost trackers, which are at odds with the public interest. Specifically, cost trackers diminish the positive effects of regulatory lag and retrospective reviews in deterring utility waste and cost inefficiency. Trackers also could reduce regulatory scrutiny in evaluating cost prudence.

This paper contends that regulators should view cost recovery in a rate case as the “default” practice. A rate case assures scrutiny of a utility’s costs and provides strong motivation for the utility to control those costs between rate cases. The utility therefore bears burden to show why a cost tracker is in the public interest. The utility should demonstrate that it would suffer severe financial difficulties under “extraordinary circumstances” without the tracker.

This paper also recommends that regulators consider the advantages of replacing cost trackers (excluding fuel and purchased gas cost trackers) with a single rate-of-return tracker in the form of an earnings-sharing mechanism. This alternative can overcome some of the problems with cost trackers, namely perverse or weak incentives for cost control, the mismatching of total costs and revenues, and inadequate regulatory oversight of costs. An earnings-sharing mechanism also achieves the major objective of cost trackers, which is to prevent a utility from suffering serious financial problems between rate cases.

How Should Regulators View Cost Trackers?

This paper discusses the major issues regulators face in evaluating the costs and benefits of cost trackers.¹ This paper responds to state public utility commissions' recent actions in approving new cost trackers for a wide array of utility functions in both the electric and natural gas sectors. Historically, state commissions have limited the use of cost trackers, partially because of the perception that they create "bad" incentives and shift risks to a utility's customers. The recent approvals differ from past regulatory practices that sanctioned trackers only under highly restricted conditions.

The author contends that state commissions have not given adequate attention to the negative features of cost trackers. By conflicting with certain regulatory objectives, cost trackers thwart the public interest. Cost trackers undercut the positive effects of regulatory lag and retrospective reviews in deterring utility waste and cost inefficiency. They also could lessen regulatory scrutiny in evaluating the prudence of costs.

This paper defines cost trackers and discusses how they benefit utilities. It then provides the rationales for cost trackers and how they relate to regulatory principles for cost recovery. The paper examines two scenarios; in the first, regulators allow comprehensive cost trackers, while in the second they allow none. The paper ends by recommending a regulatory policy and identifying questions regulators should ask when investigating cost trackers.

I. The Definition and Mechanics of a Cost Tracker

A cost tracker allows a utility to recover its actual costs from customers for a specified function on a periodical basis outside of a rate case.² A tracker, in other words, involves the recovery of a utility's actual costs in the periods between rate cases. These costs could include

¹ Regulators sometimes refer to cost trackers as "riders."

² A cost tracker can either provide interim rate relief for a utility or be a permanent fixture that adjusts rates between rate cases based on upward and downward movements in those costs specified in a tracker. As an alternative to a cost tracker, a utility can file for emergency rate relief whenever it encounters a serious financial problem. The commission can specify conditions under which a utility can file an emergency or interim rate filing petitioning for immediate rate relief. This paper does not examine the different regulatory approaches to relieving utilities of any temporary or more permanent serious financial problems. Such a study could compare each approach, including cost trackers, based on its effect on different regulatory objectives.

those that deviate from some baseline or are zero-based.³ Baseline costs, for example, could include bad debt costs⁴ reflected in present rates as determined in the last rate case. A cost tracker could allow adjustments in rates when actual bad-debt costs depart from the baseline level. These adjustments would occur periodically as prescribed previously by a commission.

To benefit customers when actual cost falls below the baseline level, a cost tracker must be “symmetrical.” The unpredictability of a cost item—which, as this paper discusses later, is one underlying rationale for a cost tracker—means that test-year cost estimates can overstate or understate the actual costs. Virtually all fuel and purchased gas cost trackers are symmetrical, with customers benefiting when commodity-energy costs fall (e.g., since the autumn of 2008).

Cost trackers also could apply to all of the costs associated with a particular business function or task. Under this zero-based approach, for example, the entire cost of a gas utility’s new investments in upgrading the safety of its distribution system would be amortized and recovered later from customers in lieu of inclusion in base rates. The same cost recovery procedure can occur for a utility’s energy-efficiency initiatives.

Some cost trackers, such as fuel adjustment clauses (FAC) and purchased gas adjustments (PGAs), adjust rates in response to changes in the price of fuels used by generating facilities and purchased gas for gas utilities.⁵ Certain cost trackers approved over the last couple of years allow for rate adjustments when the cost for a particular business function, for whatever reason, changes. A tracker for bad debt, for example, does not distinguish between an increase because of a greater number of nonpaying customers or higher debt per customer.

³ “Zero-based” refers to *all* the costs associated with a specific function, rather than just increments or decrements from test-year costs.

⁴ These costs represent money owed by customers to a utility that the utility has determined to be uncollectible.

⁵ NRRI has conducted several studies on FACs and PGAs. *See*, for example, Robert E. Burns, Mark Eifert, Peter Nagler, *Current PGA and FAC Practices: Implications for Ratemaking in Competitive Markets* (Columbus, Ohio: NRRI, November 1991), NRRI 91-13; Robert E. Burns and Mark Eifert, “Designing Fuel and Purchased Gas Adjustment Clauses to Provide for Incentive Compatibility in a More Competitive Environment,” *Proceedings of the Eighth NARUC Biennial Regulatory Information Conference* (Columbus, Ohio: NRRI, September 1992); Kevin A. Kelly, Timothy Pryor, Nat Simons, *Electric Fuel Adjustment Clause Design* (Columbus, Ohio: NRRI, 1979), NRRI 79-3; and Douglas N. Jones, Russell J. Profozich, Timothy Biggs, *Electric and Gas Utility Rate and Fuel Adjustment Clause Increases, 1978 and 1979* (Columbus, Ohio: NRRI, 1981), NRRI 81-5.

II. Principles for Cost Recovery

A. “Reasonable opportunity” criterion

State commissions have applied myriad criteria for utility cost recovery. Regulators are legally bound to allow utilities the opportunity to recover prudently incurred costs. Prudent costs reflect utility management that makes rational and well-informed decisions. The word “opportunity” can refer to the utility having a good chance of earning its authorized rate of return and is distinct from an entitlement.⁶ “Earning the authorized rate of return” means that the utility recovers its prudent variable costs (e.g., operations and maintenance) and earns a return of and on prudently incurred fixed costs, including its cost of capital as determined in the last rate case.

B. Incentive effects of cost trackers

Commissions traditionally allow cost recovery only after a rate case review. Other alternatives such as a cost tracker would require that a utility show violation of the “opportunity” condition for particular cost items. A violation can occur when a certain cost is substantial, unpredictable, and generally beyond a utility’s control. Other than costs relating to fuel and purchased power and gas, few other costs fall within the confines of “special circumstances.”⁷ Parties to regulatory proceedings naturally disagree over when these circumstances exist. To clarify their positions to utilities, intervening groups, and the general public, commissions should consider issuing policy statements articulating standards for the recovery of costs through trackers.

Regulators, until recently, have taken a cautious approach to trackers, partially because they weaken the incentive of a utility to control its costs.⁸ Controlling utility costs is a primary

⁶ One interpretation is that the utility earns its authorized rate of return over a number of years, rather than each year. Regulators, investors, and utilities do not expect uniform rates of return across years. Instead, they ostensibly presume that in some years the rate of return will be below the authorized level, while in other years it would be above the authorized level. Regulators, for example, set rates based on “normal” weather. They expect that summer weather will be hotter than normal in some years and cooler than normal in others. For a typical electric utility, having a hotter-than-normal summer and a cooler-than-normal summer often means the utility earns a high rate of return and a low rate of return for those years respectively. But regulators expect normal weather over a number of years.

⁷ An exception also might include the costs associated with a major storm causing extensive damage to a utility’s infrastructure.

⁸ The cost trackers discussed in this paper assume price adjustments based on changes in the actual cost of the utility. If instead price adjustments relate to cost changes for a peer group or other factors outside the control of the utility, the incentive problems identified in this paper would mostly disappear. Some cost trackers attempt to incorporate benchmarks that reflect performance exogenous to an individual utility. Defining the appropriate benchmark is a crucial but difficult task in designing a performance-based tracker. *See*, for example, Ken Costello and

objective of regulators because it contributes to lower rates and reflects efficient utility management. Cost trackers can, in various ways, result in higher utility costs.⁹ First, they undercut the positive effects of regulatory lag on a utility's costs. "Regulatory lag" refers to the time gap between when a utility undergoes a change in cost or sales levels and when the utility can reflect these changes in new rates. Economic theory predicts that the longer the regulatory lag, the more incentive a utility has to control its costs; when a utility incurs costs, the longer it has to wait to recover those costs, the lower its earnings are in the interim. The utility, consequently, would have an incentive to minimize additional costs. Commissions rely on regulatory lag as an important tool for motivating utilities to act efficiently.¹⁰ As economist and regulator Alfred Kahn once remarked:

Freezing rates for the period of the lag imposes penalties for inefficiency, excessive conservatism, and wrong guesses, and offers rewards for their

James F. Wilson, *A Hard Look at Incentive Mechanisms for Natural Gas Procurement*, NRRI 06-15, November 2006, at <http://www.nrri.org/pubs/gas/06-15.pdf>.

⁹ Theoretical and empirical studies provide some evidence of the incentive problems associated with one kind of cost trackers, FACs. See, for example, David P. Baron and Raymond R. DeBont, "Fuel Adjustment Mechanisms and Economic Efficiency," *Journal of Industrial Economics*, Vol. 27 (1979): 243-69; David P. Baron and Raymond R. DeBont, "On the Design of Regulatory Price Adjustment Mechanisms," *Journal of Economic Theory*, Vol. 24 (1981): 70-94; David L. Kaserman and Richard C. Tepel, "The Impact of the Automatic Adjustment Clause on Fuel Purchase and Utilization Practices in the U.S. Electric Utility Industry," *Southern Economics Journal*, Vol. 48 (1982): 687-700; and Frank A. Scott, Jr., "The Effect of a Fuel Adjustment Clause on a Regulated Firm's Selection of Inputs," *The Energy Journal*, Vol. 6 (1985): 117-126. The first two studies applied a general model to show that FACs tend to cause a utility to overuse fuel relative to other inputs, pay more for fuel prices, and choose non-optimal, fuel-intensive generation technologies. The third study provided empirical support for this prediction. The fourth study showed that some types of FACs cause bias in fuel use and that FACs in general weaken the incentive of a utility to search for lower-priced fuel. It provided empirical evidence that electric utilities with an FAC pay higher fuel prices than utilities without an FAC.

¹⁰ Regulatory lag is a less-than-ideal method, however, for rewarding an efficient, and penalizing an inefficient, utility. Some of the additional costs could fall outside the control of a utility (e.g., increase in the price of materials), and any cost declines might not correlate with a more managerially efficient utility (e.g., deflationary conditions in the general economy). As discussed elsewhere in this paper, regulators are more receptive to cost trackers when: (1) regulatory lag can cause a substantial movement in a utility's rate of return between rate cases, and (2) the utility has little control over how much its actual costs will deviate from its test-year costs.

opposites; companies can for a time keep the higher profits they reap from a superior performance and have to suffer the losses from a poor one.¹¹

Rational utility management, as a general rule, would exert minimal effort in controlling costs if it has no effect on the utility's profits.¹² This condition occurs when a utility is able to pass through (with little or no regulatory scrutiny) higher costs to customers with minimal consequences for sales. Cost containment constitutes a real cost to management. Without any expected benefits, management would exert minimum effort on cost containment. The difficult problem for the regulator is to detect when management is lax. Regulators should concern themselves with this problem; lax management translates into a higher cost of service and, if undetected, higher rates to the utility's customers. Regulators should closely monitor and scrutinize costs, such as those subject to cost trackers, that utilities have little incentive to control.

When mechanisms for cost recovery differ across functional areas, perverse incentives can arise that would make it profitable for the utility not to pursue cost-minimizing activities.¹³ The result is higher rates to utility customers. A utility with a FAC might postpone maintenance of a power plant even when it would cost less than the savings in fuel costs. The utility could not immediately (or even at any time) recover additional maintenance costs, while it could pass the higher fuel costs through the FAC.

Cost trackers, in the long run, can bias a utility's technological and investment decisions. A utility recovering fuel costs through a FAC, for example, might want to adopt fuel-intensive generation technologies even if they are more expensive from a life-cycle perspective.¹⁴ The result, again, is higher rates to utility customers.

¹¹ Alfred E. Kahn, *Economics of Regulation, Vol. 2* (New York: John Wiley & Sons, 1971), 48.

¹² I assume here that reducing cost has no effect on the quality or quantity of utility service. Controlling costs, therefore, refers to eliminating or reducing "wasteful" expenses that would result in no decline in the value of utility service. The author imagines a situation in which utilities would attempt to defer maintenance costs until the commission sets new base rates that account for those costs.

¹³ In the example above, regulators could eliminate any perverse incentive by simply allowing a cost tracker for maintenance expenses.

¹⁴ See, for example, the Baron and DeBondt studies cited in footnote 9.

Cost trackers also could motivate utilities to shift more of their costs to functions subject to trackers.¹⁵ They might, for example, want to classify routine maintenance costs as a capital expense that receives tracker cost recovery. Such shifts could lead to earning an excessive rate of return. Regulators implementing trackers should carefully define applicable costs. They should also examine costs claimed under trackers to ensure that the utility recovers only appropriate costs through the tracker.¹⁶

An important incentive for cost control by regulated utilities is the threat of cost disallowance from retrospective review.¹⁷ To the extent that cost trackers dilute the frequency and quality of these reviews, further erosion of incentives for cost control occurs. With less regulatory oversight and auditing, which often accompany rate cases, a utility might have less concern over the costs it incurs. Regulators have long recognized the importance of retrospective reviews in motivating a utility to avoid cost disallowances from grossly subpar performance.

If a utility has a number of cost trackers, the regulator might want to consider staggering the timing of retrospective reviews to avoid having inadequate staff resources to review the adjustments for individual cost trackers. Some utilities have comprehensive trackers that recover a wide array of costs (e.g., purchased gas, bad debt, energy-efficiency activities, and environmental activities). For these trackers, it would be especially challenging for a regulator to conduct an adequate retrospective review of each item simultaneously.¹⁸

A contradiction seemingly exists between the criterion that trackers should apply only to those costs beyond the control of a utility and the assertion that the modified incentives caused by trackers can lead to inflated costs. One response is that a utility has at least some control over most of its costs. Except for certain taxes and some other cost items, the actions of utility

¹⁵ One example is when a tracker for new capital expenditures creates an incentive for a utility to shift labor costs from maintenance to capital projects. In this instance, the utility can schedule employees to work on the capital projects, and maintenance is delayed. The utility consequently reduces its maintenance costs and thereby keep the savings, and increase its capital expenditures, which it recovers through the tracker. I thank Michael McFadden for this example.

¹⁶ I thank Adam Pollock for this insight.

¹⁷ Many regulatory experts view retrospective reviews as dissuading a utility from poor decisions with the threat of a penalty—for example, making the utility more diligent and careful in its planning and procurement. Given asymmetric information, where a utility knows more about its operations and market supply/demand conditions than the commission, some analysts characterize retrospective views as a second-best mechanism to market-like incentives. For most gas utilities, the strong incentives for controlling purchased gas costs derive mainly from the time lag between the incurrence of a cost and its recovery from retail customers, and regulatory prudence reviews where, for example, abnormal costs attract special attention and a review.

¹⁸ I thank Joseph Rogers for this insight.

management can affect costs. Even for fuel or purchased gas, utility management's actions can affect their total costs. Although for the most part the marketplace determines the price paid for these items, utilities can negotiate prices under long-term contracts and decide on the mix and sources of different fuels and purchased gas.¹⁹

Commissions also tend to avoid cost recovery that results in radical price volatility to utility customers. Such a policy could preclude monthly price adjustments from changes in fuel costs or purchased gas costs. It also might result in a phase-in of the construction costs of a new base-load-generating facility.

III. Utilities' Perspective on Cost Trackers

Under traditional ratemaking, the utility recovers all costs after a rate case review. It requires no commission activity between rate cases. Traditional ratemaking provides base rates based on the test year. A commission relies heavily on cost-of-service studies to determine base rates. Base rates have two characteristics: (1) a commission sets them in a formal rate case, and (2) they remain fixed until the utility files a new rate case and the commission makes a subsequent decision. The costs represent those calculated for a designated test year and exclude those costs recovered in trackers and other mechanisms. No matter how much the actual utility's costs and revenues deviate from their test-year levels, rates remain fixed until the commission approves new ones in a subsequent rate case. The exception is when a commission allows for interim rate relief under highly abnormal conditions that jeopardize a utility's financial condition.

Utilities have argued that a more dynamic market environment, characterized by the increased unpredictability and volatility of certain costs, justifies the recovery of certain costs through a tracker rather than in base rates.²⁰ Utilities have also asserted that the static nature of the "test year" sometimes denies them a reasonable opportunity to earn their authorized rate of return. They contend that cost trackers advance the ratemaking goals by matching revenues to actual costs.

In contrast to base rates, cost trackers offer a utility the advantages of: (1) shortening the time lag between the incurrence of a cost and its recovery in rates (i.e., curtailing regulatory lag),

¹⁹ A utility, for example, might be lax in finding the best deals for gas supplies, in applying more resources by employing more highly qualified staff, or in acquiring superior market intelligence. See, for example, Ken Costello, *Gas Supply Planning and Procurement: A Comprehensive Regulatory Approach*, NRRI 08-07, June 2008, at http://nrri.org/pubs/gas/Gas_Supply_Planning_and_Procurement_jun08-07.pdf.

²⁰ See, for example, Russell A. Feingold, "Rethinking Natural Gas Utility Rate Design: A Framework for Change," presented at the American Gas Foundation Executive Forum, held at The Ohio State University, May 23, 2006.

(2) increasing cost-recovery certainty,²¹ and (3) lessening the regulatory scrutiny of its costs. Normally, in a rate case a regulator closely reviews the utility's costs before approving them for recovery from customers. Regulators often less rigorously scrutinize a utility's costs when recovered through a tracker.²² Overall, cost trackers lower a utility's financial risk by stabilizing its earnings and cash flow.

Utilities increasingly have asked their state public utility commissions to depart from traditional regulation by approving new cost-recovery mechanisms for different business activities. Some gas utilities want to expand the scope of their PGA clauses to include a wider array of costs. Current cost trackers in the natural gas sector, other than those for purchased gas costs, apply to functions including pipeline integrity management, pipeline replacement costs (e.g., accelerated cast iron main replacement program), bad debt, energy-efficiency costs, general infrastructure costs, manufactured gas plant remediation, stranded restructuring costs, property taxes, post-retirement employee benefits, and environmental costs.

IV. Regulatory Rationales for Cost Trackers

A. "Extraordinary circumstances"

State commissions have traditionally approved cost trackers only under "extraordinary circumstances." Commissions recognize the special treatment given to costs recovered by a tracker; they consider cost trackers an exception to the general rule for cost recovery. This view places the burden on a utility to demonstrate why certain costs require special treatment.

The "extraordinary circumstances" justifying most of the cost trackers that commissions have historically approved have been for costs that are: (1) largely outside the control of a utility, (2) unpredictable and volatile,²³ and (3) substantial and recurring. Historically, commissions required that all three conditions exist if a utility wanted to have costs recovered through a tracker. Fuel costs were a good candidate because of their influence by factors beyond

²¹ Between rate cases, for example, a utility might incur costs unanticipated by the test-year calculation and thus not recovered from its customers.

²² The regulator, for example, might have less time to review these costs or just might consider them too unimportant to warrant a separate review. Another explanation might be that rate cases are transparent and well-publicized, putting pressure on regulators to closely review all aspects of a rate case filing. These reasons are just the author's speculations. A pertinent research question is whether this hypothesis has validity.

²³ Even if the forecast of a cost item is highly accurate in the long run, it can fluctuate widely in the short run, causing possible serious cash-flow problems for the utility. The utility might then have to purchase short-term debt and other financing. The author thanks Carl Peterson for this insight.

the control of a utility, their volatility, and their large size. Commissions recently have approved cost trackers when not meeting all three conditions, especially the third (substantial and recurring costs).²⁴

The last “extraordinary circumstance,” substantial and recurring costs, greatly restricts the costs eligible for cost tracker recovery. Differences between their test year and actual cost can have a material effect on a utility’s rate of return. Legal precedent dictates that regulators must set reasonable rates that allow a prudent utility to operate successfully, maintain its financial integrity, attract capital, and compensate its investors commensurate with the risks involved.²⁵ A utility should recover revenues in excess of its operating expenses to provide a “fair return” to investors. Businesses including utilities need to earn a profit to compensate investors for business, financial, and other risks.²⁶

Some state commissions have softened or ignored the “substantial and recurring” component of the “extraordinary circumstances” standard. Bad debt, the subject of recent cost trackers, features financial effects that are typically not substantial. Utilities have contended that the unpredictability of this cost makes it difficult to incorporate it accurately into the base rate. Yet, even if this assertion is true, it is questionable whether any bad-debt cost unaccounted for in the test year would inflict substantial financial harm on a typical utility.²⁷

²⁴ Commissions’ rulings seem to reflect the view that regulators have much discretion in approving cost trackers as long as these actions reflect reasonable ratemaking given the facts and circumstances.

²⁵ The U.S. Supreme Court outlined these conditions in its 1944 order for *FPC v. Hope Natural Gas Co.*, 320 U.S. 591, 605 (1944).

²⁶ The return on equity for a utility corresponds to the term “normal profits.” Both terms involve the cost a utility incurs to attract funds from investors.²⁶ Let us assume that utility performance should replicate the performance of competitive firms where firms receive normal profits in the long run. A utility would, therefore, earn a return that is reasonable but not excessive. A reasonable return should allow the utility to maintain its credit quality and attract needed capital on reasonable terms, but do no more. Commissions usually consider a rate of return within a “zone of reasonableness” as sufficient but not excessive. They do not guarantee that the utility will earn within this zone; they merely give the utility the opportunity if it performs efficiently and economically.

²⁷ The outcome would vary across utilities and by period. Especially in bad economic times in conjunction with high energy prices, bad debt can quickly soar, making test-year estimates grossly inaccurate. “Substantial financial harm” has no definitive meaning. It can refer to a situation where a utility has difficulties in raising funds for new investments or faces severe cash flow problems. Such situations can harm customers in the long run, for example, by reducing service reliability and diminishing the utility’s credit quality, which in turn can lead to the utility having a higher cost of capital. A tracker for bad debt can also affect how the utility responds to customers who are behind in their payments. It can, for example, make the utility

B. “Severe financial consequences”

Historically, commissions have approved cost trackers to avoid the possibility of a utility suffering a serious financial problem because of cost increases unforeseen at the time of the last rate case.²⁸ Justification for cost trackers is, therefore, greater when a commission relies on a historical test year that does not recognize the volatility of certain costs or their upward trend over time. Let us assume that a certain operating cost has trended upward (e.g., 2 percent per year) over the past several years. Let us also assume that the commission allows only a historical test year. In this example the utility is likely to under-recover this particular cost. What effect this outcome would have on the utility’s overall rate of return depends on the magnitude of any cost increase relative to the utility’s earnings and whether other costs fell while rates were in effect.

Commissions do not expect utilities to earn the authorized rate of return during each future period over which new prices are in effect.²⁹ Commissions implicitly impute a risk premium in the authorized rate of return, partially to account for the earnings volatility from fluctuations in costs or revenues from the test year. Trackers affect what is called “business risk.” Business risk refers to the uncertainty linked to the operating cash flows of a business. Business risk is multi-dimensional, inclusive of sales, cost, and operating risks. In the Capital Asset Pricing Model (CAPM), for example, the lower the utility’s expected earnings volatility, the lower the measure of the utility’s risk relative to the market portfolio (i.e., “beta”). Because

more lax in its credit policies, which could result in fewer service disconnections, especially for low-income households. In the absence of a tracker, the utility presumably would intensify its efforts to collect money owed by delinquent customers. I thank Michael McFadden for this insight.

²⁸ See, for example, Paul L. Joskow, “Inflation and Environmental Concern: Structural Changes in the Process of Public Utility Regulation,” *Journal of Law and Economics*, Vol. 17 (1974): 291-327. A premise behind the wide acceptance of fuel adjustment clauses was that because electric utilities were not responsible for the escalation of fuel costs, commissions should not hold them accountable. Virtually all electric utilities in the 1970s experienced an unprecedented rise in fuel costs, for example, inferring an exogenous event beyond the control of any single utility. Prior to this time, even though FACs were common but fuel prices were much more stable, commissions generally associated changes in the utility’s rate of return between rate cases with utility-management performance. A lower rate of return reflected poor performance and a higher rate of return superior performance. (A 1974 study found that 42 out of 51 jurisdictions had some form of fuel adjustment clause. See National Economic Research Associates, “The Fuel Adjustment Clause: A Survey of Criticism, Justifications, and Its Applications in the Various Jurisdictions,” 1974.)

²⁹ This statement supports the contention that commissions do not intend the prices they set in a rate case to reflect the utility’s actual cost of service for each future year. Commissions, however, judge that the prices they set will allow the utility an opportunity (i.e., a reasonable chance) to earn its authorized rate of return or some return close to the authorized level.

trackers reduce a utility's business risk, a regulator might want to consider revising downward the risk premium of a utility with additional cost trackers or a revenue-decoupling tracker, resulting in a lower return on equity.

If a commission wants to guarantee that the utility will recover its authorized earnings, it would favor a rate design that allows the utility to recover all of its fixed costs in a monthly service charge or a customer charge.³⁰ Since generally commissions do not, they implicitly recognize the positive incentive effect from allowing a utility's actual rate of return to deviate from the authorized level. Commissions also know that if a utility is continuously earning below its authorized rate of return, the utility has the right to file a general rate increase.

The previous discussion explains why most regulators have favored adjusting rates between rate cases only when such adjustments avoid serious financial situations for utilities. If a commission wanted to assure the utility that it will always earn its authorized rate of return, it would allow the utility to recover all of its actual costs through trackers.³¹ Commissions generally do not allow the tracking of all costs because of incentive and other problems, which this paper discusses in Section II.B.

C. An illustration: FACs and PGAs

The wide popularity of FACs and PGAs among utilities and most commissions reflects the perception that these mechanisms are necessary to prevent a utility from earning a rate of return substantially below what was authorized. This perception stems from the magnitude of fuel and purchased gas costs relative to a utility's earnings. Other categories of costs, such as bad debt, are much smaller in size and therefore have smaller earnings consequences.

Until fuel costs started to fluctuate sharply in the 1970s, some energy utilities had to operate without the ability to adjust prices outside a rate case.³² These utilities shouldered the risks of events between rate cases, but they also retained any high returns from favorable happenings. Prior to around 1970, for example, many electric utilities earned rates of return that were much higher than the authorized levels because of technological improvements, high sales growth, and economies of scale, in addition to the acquiescence of commissions.³³

³⁰ Such a rate design would not guarantee the utility earning its authorized rate of return, as unexpected variable costs would cause the utility's earnings to decline.

³¹ This recovery would include fixed costs the commission found prudent in the last rate case. Guarantee of full recovery of all costs would also require a revenue tracker such as revenue decoupling, assuming that the utility recovers some of its fixed costs in the volumetric or commodity charge.

³² The genesis for these dramatic fuel-cost increases was the Oil Embargo by OPEC and the other Persian Gulf troubles of the 1970s.

³³ Although most state commissions had authority to initiate proceedings to reduce rates, few chose to exercise it.

Not surprisingly, virtually all state commissions believed that trackers for large items such as fuel costs and purchased gas costs were necessary to prevent inordinate rate-of-return fluctuations. Implicit in this belief is the view that the burden on utility shareholders would otherwise be onerous. This factor overwhelmed the arguments against trackers. The major objective of FACs and PGAs, implanted during that era, was to shield the utility's earnings from commodity price volatility. Both debt and equity investors favor these mechanisms in reducing the riskiness of a utility's earnings and cash flow.

V. Two Extreme States of the World: Several and No Cost Trackers

A. A hodgepodge of cost trackers, or a single rate-of-return tracker

If a commission wants a utility always to earn close to its authorized rate of return, it would favor rate adjustments between rate cases for both: (1) actual costs deviating from test-year costs, and (2) actual revenues deviating from test-year revenues. This outcome would require cost trackers covering all of the utility's costs in addition to a revenue decoupling mechanism. (The revenue decoupling mechanism would allow the utility to recover all fixed costs that the commission approved for recovery in the last rate case.)

Putting the utility's future on "autopilot" seems like a reasonable course of action if financial stability is the prime regulatory objective. Considering incentive problems and excessive risk-shifting to customers, this option comes across as much less appealing.

An earnings-sharing mechanism (ESM), which consolidates different cost and revenue trackers, is one ratemaking procedure for stabilizing a utility's rate of return between rate cases. Under this mechanism, the utility adjusts its rates periodically (e.g., annually) when its actual return on equity falls outside some specified band. As an illustration, if the band encompasses a 10 to 14 percent rate of return on equity (with 12 percent as the utility's authorized rate of return established in the last rate case) when the actual return is 9 percent, the utility could adjust its rates upward to increase its return to, or bring it closer to, 10 percent.³⁴

An ESM helps to stabilize a utility's rate of return without a full-scale rate case review. Earnings sharing should reduce the frequency of future rate cases and allow adjusted rates to reflect recent market developments, including those affecting a utility's costs.³⁵ Compared to

³⁴ The band implicitly reflects the range for the return on equity that the regulator deems both adequate to keep the utility from financial jeopardy and not so excessive as to be exorbitant. The interpretation of these financial conditions is subjective and open to debate.

³⁵ Under traditional ratemaking, reducing the frequency of rate cases might allow the utility to over-earn by a substantial amount because of the multi-year accumulation of higher-than-expected sales or lower-than-expected costs, or both. Commissions probably are not so concerned when the utility over-earns for a one- or two-year period, but would be when it over-earns by a "significant" amount over several consecutive years. This reaction would be more

traditional ratemaking, where rates remain fixed between rate cases, ESM weakens regulatory lag and thereby reduces the incentive of a utility to control its costs between rate cases.³⁶ A commission can lessen this problem by requiring the utility to demonstrate its prudence and offer reasons why specific cost items were higher than their test-year levels.³⁷

In sum, an ESM would trigger a price adjustment between rate cases only when the aggregation of revenue and cost departures from test-year levels cause the utility's rate of return to fall outside a specified "band" region. An ESM takes into account the overall profitability of a utility. It assumes the role of a rate-of-return tracker that, in effect, amalgamates different cost trackers into a single cost-recovery mechanism.

The ESM differs from conventional trackers, which account for specific costs or functions in isolation from the utility's overall financial position. Trackers' focus on an individual cost categories can cause utilities to delay coming in for rate cases, with the utility earning an "excessively" high rate of return in the interim. Let us assume that the commission has approved a tracker for new infrastructure expenditures. The new infrastructure expects to lower the utility's maintenance and other operating costs. If the last rate case did not recognize these lower operating costs, the utility's rate of return would be higher, yet because of the tracker, the utility suffers no interim financial losses from incurring infrastructure expenditures.

acute if the commission believes that fortuitous circumstances, rather than superior utility management, caused the high earnings.

³⁶ This incentive problem exists only when the utility is outside the "band" region and the mechanism requires sharing of "excessive" or "deficient" earnings with customers. This fact suggests a wide "band," as the utility operating within the "band" would have "high-powered" incentives to manage costs because it retains all the economic gains.

³⁷ The incentive problem would be less pronounced compared to a conventional cost tracker. As long as the utility's rate of return is within the "band" region, it has a similar incentive for cost control as it would between rate cases with fixed prices. (The word "similar" is used because if the "band region" is wide enough, it could defer the next rate case to either increase or decrease rates. This deferral would further strengthen the incentive of the utility to control costs.) Outside the "band" region, the utility's incentive depends upon whether ESM requires the sharing of high or low rates of return between the utility and its customers. Assume, for example, that the "band" region is a 10 to 14 percent rate of return on equity. During the year, the utility earns 15 percent; if the utility has to split the difference between the higher boundary of the "band" region and the actual rate of return by adjusting its prices down, in the example the utility would realize a 14.5 percent rate of return. We assume that the mechanism is symmetrical, so if the utility earns below the lower boundary of the "band" region, say, a 9 percent rate of return, it can adjust prices up to realize a rate of return closer to the lower boundary. This sharing arrangement means that if the utility allows its costs to rise, it either suffers the full consequence (when it operates within the "band" region) or the partial consequence (when it operates outside). The latter condition creates an incentive problem relative to traditional ratemaking with regulatory lag and fixed prices between rate cases.

On net, the utility benefits and its customers immediately pay for the infrastructure costs without benefiting from the lower operating costs (at least until new rates reflect the lower costs). Such an outcome would violate any common meaning of “fairness” and seriously calls into question the merits of using a single-function tracker without readjusting rates for the effect on a utility’s other functional areas.³⁸ This dynamic suggests that commissions implementing trackers should require their utilities to file rate cases on predetermined intervals.

B. No cost trackers

Under the traditional approach to ratemaking, a utility cannot adjust its rates outside a rate case. No matter what happens to a utility’s costs or revenues between rate cases, rates remain fixed. Let us assume that a utility’s costs and revenues are volatile and difficult to predict. The utility’s rate of return can then deviate substantially (on the upside or downside) from the authorized level.

It is one thing to prohibit trackers for costs that are substantial, volatile and unpredictable, and generally beyond the control of a utility; it is another to reject trackers for costs that lack one or more of these features. *Good regulatory policy rejects cost trackers that are not essential for protecting a utility from a dire financial situation.* The utility, in justifying a cost tracker, should present the regulator with credible information showing that a nontrivial probability exists that the cost item under review will rise sufficiently above the test-year level to place the utility in financial jeopardy.³⁹ This showing is more likely when the regulator uses a historical test year and the cost item recently has exhibited an upward trend or substantial volatility.⁴⁰

Another conceivable justification for a cost tracker is that it transmits better price signals to a utility’s customers. Prices would correspond closer to a utility’s actual costs and thus improve economic efficiency. For economic efficiency, customers should see costs reflected in their rates, such that they consume less when costs are higher. The validity of this argument for

³⁸ Such a non-uniform treatment of costs could also cause perverse incentives. A utility, for example, might overspend on infrastructure structures to receive the gains from lower operating or other costs that the utility retains for itself until the next rate case.

³⁹ The term “financial jeopardy” has different interpretations. This state, no matter how it is defined, has the potential to harm customers as well as the utility shareholders. It could cause the deferment of needed capital investments to maintain reliable service, lowering of the utility’s credit rating, and an increase in the utility’s cost of capital. The time period over which these effects would cause injury to utility shareholders generally would be more immediate than the injury to customers.

⁴⁰ A future test year might not improve matters much if the cost item is inherently difficult to predict with any forecast and therefore susceptible to large error.

a cost tracker also depends upon the magnitude and nature of the costs involved.⁴¹ This outcome assumes that a tracker involves a variable cost such as fuel or purchased gas costs. When a tracker relates to a fixed cost (e.g., infrastructure costs), the argument turns more to the “fairness” of a cost-recovery mechanism to the utility. Is a tracker justified because test-year cost calculations expose the utility to potentially high financial risk from unanticipated costs that fall primarily outside the control of a utility?

VI. Putting It All Together

Cost trackers have both positive and negative features that regulators must evaluate.⁴² In reaching a decision, the regulator needs to weigh these features to determine what is in the public interest based on how they shift risks, ensure cost recovery, and affect incentives. The main challenge for regulators is to evaluate whether the positives outweigh the negatives to justify a cost tracker.⁴³

A. The positive side of cost trackers

The primary benefit of cost trackers, as discussed earlier in this paper, is that they reduce the likelihood that a utility will encounter serious financial problems. If test-year costs fail to reflect accurate projections of a utility’s actual cost for future periods, then the utility’s earnings can deviate substantially from what a commission approved in the last rate case. Some cost items are difficult to project, as they exhibit high volatility and depend on different variables that by themselves are uncertain.

By reducing regulatory lag and the likelihood of prudence reviews, cost trackers can lower a utility’s risk and thus increase its access to capital. The utility could then have a higher credit rating that, in turn, could lower the cost of financing capital projects.⁴⁴

⁴¹ Distortive price signals can relate to the difference between the utility’s short-run marginal cost and the marginal price charge to customers in consuming more electricity or natural gas.

⁴² For a thorough and excellent discussion of the advantages and disadvantages of cost trackers, with a focus on fuel adjustment clauses, see Michael Schmidt, *Automatic Adjustment Clauses: Theory and Applications* (East Lansing, MI: Michigan State University Press, 1981).

⁴³ For an analysis of similar issues faced by regulators in evaluating different ratemaking mechanisms in general, see Ken Costello, *Decision-Making Strategies for Assessing Ratemaking Methods: The Case of Natural Gas*, NRRI 07-10, September 2007, at <http://nrri.org/pubs/gas/07-01.pdf>.

⁴⁴ This argument is similar to the one used to support including construction work in progress (CWIP) in rate base for electricity transmission.

Cost trackers also coincide with the regulatory objective of setting prices based on the actual cost of service. This condition transmits the right price signal to customers deciding how much of the utility's services to consume.⁴⁵

The development of infrastructure such as the smart grid or other new technology costs might warrant that commissions consider cost-recovery mechanisms such as a cost tracker to guarantee minimum cash flow for a utility. Investors might otherwise perceive excessive regulatory risks that preclude committing funding to a utility.⁴⁶ A cost tracker in this instance also might cut down on the frequency of future rate cases. Regulators in the future might want to explore less traditional ways for utilities to recover their costs for new technologies with inherently high operational and financial uncertainties.

As a final benefit, cost trackers can reduce regulatory and utility costs by reducing the number of future rate cases. Rate cases absorb substantial staff resources and time, diverting those scarce resources from other commission activities. Yet it is doubtful that many of the recently proposed trackers involving non-major cost items would have any effect on the timing of future rate cases. Another comment is that the costs associated with serious and continuing audits and the monitoring of costs recovered through a tracker could require substantial resources, either in the form of commission staff or outside consultants.

B. The negative side of cost trackers: the case for traditional ratemaking as a default policy or earnings sharing as a preferred alternative

Cost trackers can reduce utility efficiency, as described above. "Just and reasonable" rates require that customers do not pay for costs the utility could have avoided with efficient or prudent management. Regulation attempts to protect customers from excessive utility costs by scrutinizing a utility's costs in a rate case, conducting a retrospective review of costs, applying performance-based incentives, and instituting regulatory lag. Cost trackers diminish one or more of these regulatory activities. In some instances, they diminish all of them. The consequence is the increased likelihood that customers will pay for excessive utility costs.

⁴⁵ One issue that has emerged in states where trackers have become a major method for cost recovery relates to the allocation of those costs across customer classes. Cost allocation determines the actual prices that different customers pay for utility service.

⁴⁶ One alternative to reducing regulatory risk through trackers would be for a commission to articulate in a policy statement or other document that it would not apply 20-20 hindsight to determine the cost recovery of new investments. A commission can express, for example, that it will not subject specific utility decisions to prudence reviews. One method of doing so is providing pre-approval for projects before they enter service. For a more detailed discussion of pre-approval mechanisms, see Scott Hempling and Scott Strauss, *Pre-Approval Commitments: When And Under What Conditions Should Regulators Commit Ratepayer Dollars to Utility-Proposed Capital Projects?* NRRI 08-12, November 2008, at http://nrri.org/pubs/electricity/nrri_preapproval_commitments_08-12.pdf.

This paper recommends that regulators approve cost trackers only in special situations where the utility would have to show that alternate cost-recovery mechanisms could cause extreme financial problems. This showing requires utilities to provide a distribution of possible cost futures and an assessment of their likelihood. If a certain cost item has high volatility and unpredictability, represents a large component of the utility's revenue requirement and is recurring, and is generally beyond a utility's costs, it becomes a candidate for "tracker" recovery.

Even then, the regulator should consider the adverse incentive effects and how he or she can compensate for this problem.⁴⁷ Regulators should condition any approval of a cost tracker on the utility's filing information on its performance for those functional areas directly or indirectly affected by the tracker. For example, has the FAC caused a utility to spend less money on plant maintenance costs, jeopardizing reliability and inflating total utility costs because of higher avoidable fuel costs? These conditions can harm the utility's customers in the long run.

No other rationale merits departing from cost recovery through rate cases. This limited application of cost trackers provides the benefits of:

1. using the same cost-recovery mechanisms for all utility functions to prevent perverse incentives (perverse incentives can lead to a higher cost of service and utility rates);
2. balancing a utility's total costs and total revenues (without this balancing, it is conceivable that the utility could recover one cost item through a tracker and over-recover other costs set in the last rate case to result in the utility earning above its authorized rate of return); a rate case has the attractive feature of matching revenue with costs on an aggregate basis;
3. retaining sufficient regulatory lag to provide the utility with more motivation to control costs (regulatory lag is an important feature of traditional ratemaking in forcing the utility to shoulder the risk of higher costs between rate cases); and
4. scrutinizing a utility's costs and performance in different areas of operation (commissions review costs more rigorously in a rate case setting, decreasing the likelihood that customers will recover a utility's imprudent costs).⁴⁸

⁴⁷ The commission can monitor the utility's performance or include a performance-based incentive component in the tracker mechanism. *See* the NRRI study cited in footnote 8 for a description and analysis of incentive-based gas procurement mechanisms.

⁴⁸ In theory, a commission can expend the same resources and effort toward inspecting a utility's costs recovered through a tracker as it does for costs determined in a rate case. In practice, however, the author shares the widely held view that commissions and non-utility parties devote fewer resources to this task for costs recovered through a tracker. Confirmation of this view would require a systematic study that would compare, among other things, the resources expended by the commission and non-utility stakeholders per dollar recovered under trackers and in a rate case.

The earlier discussion points to the advantages of replacing cost trackers (excluding fuel and purchased gas cost trackers) with a single rate-of-return tracker in the form of an earnings-sharing mechanism. This alternative overcomes some of the problems with cost trackers, namely perverse incentives and weak incentives for cost control, the mismatching of a utility's *total* costs and revenues, and inadequate regulatory oversight of costs.⁴⁹ An earnings-sharing mechanism is also able to achieve the major objective of cost trackers, namely preventing utilities from suffering serious financial problems between rate cases.

A single rate-of-return tracker can also address the “fairness” issue of why a utility should not recover from customers a cost increase (e.g., property taxes) between rate cases that is completely beyond its control. This mechanism would, in effect, allow the utility to recover the increased costs, but only if it was already earning a “low” rate of return (i.e., a return below the “band” region discussed above). One major problem with cost trackers is that they allow a utility to increase its prices even if the utility is already earning a higher-than-authorized rate of return (or beyond the “zone of reasonableness” set in the last rate case). A commission would not allow this outcome under traditional regulation.

VII. Questions Regulators Should Ask

This paper discusses the major issues regulators face in evaluating cost trackers. Well-informed decisions require regulators to ask certain questions, for which this paper provides some introductory responses. The following is a list of the most pertinent questions:

1. Does a cost-tracker proposal meet the regulatory test of acceptability? What minimum threshold should a regulator set for consideration of a cost tracker?
2. What special circumstances exist to warrant cost recovery outside of a rate case?
3. What evidence does a utility present showing that the absence of a tracker for a particular cost could place it in financial jeopardy?
4. In addition to cost trackers, what other cost-recovery mechanisms can regulators rely on to allow a utility to recover substantial unexpected costs between rate cases? What are the public-interest effects of these mechanisms relative to cost trackers?
5. What advantages does a cost tracker offer? What are its disadvantages?

⁴⁹ Regulators can overcome some of these problems. They can, for example, require that a utility with cost trackers file a rate case no less often than every three years or however often frequency regulators consider appropriate. Regulators can also require prudence reviews of utility activities associated with trackers on a regular basis. I thank Michael McFadden for these insights.

6. How should regulators weigh the downsides of cost trackers relative to the upsides? How important are adverse incentive effects relative to the value of stabilizing a utility's rate of return?
7. How should a regulator account for the net-cost effects of a new investment (e.g., capital costs less savings in operating costs) for which the utility wants cost recovery through a tracker?
8. How would the accumulation of cost trackers for a utility motivate the utility to take risks and improve its overall cost performance?
9. If a cost tracker is justified, how can regulators structure it to mitigate potential problems such as weakened incentives for cost control?
10. What conditions should a regulator attach to the approval of a cost tracker?
 - a. Should it require the utility to report on its cost performance in functional areas directly and indirectly affected by the tracker?
 - b. Should the regulator also require that all costs recovered through trackers be subject to a thorough prudence review?
 - c. Should the regulator reduce the utility's return on equity to account for the lower risk resulting from the tracker?

VERIFICATION

I, Karl R. Pavlovic, hereby state that the facts set forth in my Direct Testimony, OCA Statement 2, are true and correct (or are true and correct to the best of my knowledge, information, and belief) and that I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa.C.S. § 4904 (relating to unsworn falsification to authorities).

1 **I. INTRODUCTION**

2 Q. WOULD YOU PLEASE STATE YOUR NAME AND BUSINESS
3 ADDRESS?

4 A. My name is Jerome D. Mierzwa. I am a Principal and Vice President of Exeter
5 Associates, Inc (“Exeter”). My business address is 10480 Little Patuxent Parkway,
6 Suite 300, Columbia, Maryland 21044. Exeter specializes in providing public utility-
7 related consulting services.

8 Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND
9 EXPERIENCE.

10 A. I graduated from Canisius College in Buffalo, New PWSA, in 1981 with a Bachelor of
11 Science Degree in Marketing. In 1985, I received a Master’s Degree in Business
12 Administration with a concentration in finance, also from Canisius College. In July
13 1986, I joined National Fuel Gas Distribution Corporation (“NFG Distribution”) as a
14 Management Trainee in the Research and Statistical Services Department (“RSS”).
15 I was promoted to Supervisor RSS in January 1987. While employed with NFG
16 Distribution, I conducted various financial and statistical analyses related to the
17 Company’s market research activity and state regulatory affairs. In April 1987, as part
18 of a corporate reorganization, I was transferred to National Fuel Gas Supply
19 Corporation’s (“NFG Supply”) rate department where my responsibilities included
20 utility cost of service and rate design analysis, expense and revenue requirement
21 forecasting and activities related to federal regulation. I was also responsible for
22 preparing NFG Supply’s Federal Energy Regulatory Commission (“FERC”) Purchase
23 Gas Adjustment (“PGA”) filings and developing interstate pipeline and spot market
24 supply gas price projections. These forecasts were utilized for internal planning

1 purposes as well as in NFG Distribution’s Section 1307(f) purchased gas cost
2 proceedings in Pennsylvania.

3 In April 1990, I accepted a position as a Utility Analyst with Exeter. In
4 December 1992, I was promoted to Senior Regulatory Analyst. Effective April 1, 1996,
5 I became a principal of Exeter. Since joining Exeter, I have specialized in utility class
6 cost of service and rate design analysis, evaluating the gas purchasing practices and
7 policies of natural gas utilities, sales and rate forecasting, performance-based incentive
8 regulation, revenue requirement analysis, the unbundling of utility services, and the
9 evaluation of customer choice natural gas transportation programs.

10 Q. HAVE YOU PREVIOUSLY TESTIFIED IN REGULATORY
11 PROCEEDINGS ON UTILITY RATES?

12 A. Yes. I have provided testimony on more than 400 occasions in proceedings before
13 FERC, utility regulatory commissions in Arkansas, Connecticut, Delaware, Georgia,
14 Illinois, Indiana, Louisiana, Maine, Maryland, Massachusetts, Montana, Nevada, New
15 Hampshire, New Jersey, Ohio, Pennsylvania, Rhode Island, South Carolina, Texas,
16 Utah, and Virginia, as well as before the Pennsylvania Public Utility Commission
17 (“Commission”). My Curriculum Vitae is attached to my testimony as Exhibit JDM-1.

18 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY?

19 A. On May 9, 2023, the Pittsburgh Water and Sewer Authority (“PWSA”) filed an
20 application to increase rates for water, wastewater conveyance, and stormwater service
21 by \$146.1 million over a three year period (multi-year rate plan, or “MYRP”). The
22 \$146.1 million proposed increase is comprised of \$46.8 million (22.5%) for Fiscal Year
23 2024 (“FY 2024”), \$45.4 million (17.8%) for FY 2025, and \$53.9 million (17.9%) for
24 FY 2026.¹ The rate increases are proposed to be effective February 15, 2024, January

¹ PWSA St. No. 2, p. 4.

1 1, 2025, and January 1, 2026 respectively. Exeter was retained by the Pennsylvania
2 Office of Consumer Advocate (“OCA”) to review and analyze the water, wastewater
3 conveyance, and stormwater cost of service (“COS”) studies and the rate design
4 proposals included in PWSA’s application. My testimony addresses the PWSA’s COS
5 studies and rate design proposals.

6 Q. DOES THE OCA SUPPORT THE ADOPTION OF A MYRP FOR PWSA IN
7 THIS PROCEEDING?

8 A. No. As explained in greater detail by OCA witness Karl Pavlovic, a MYRP for PWSA
9 should not be adopted in this proceeding. As explained by Mr. Pavlovic in OCA
10 Statement 2, and as supported by several other OCA witnesses, PWSA’s MYRP is
11 deficient regarding the statutory and regulatory provisions governing a MYRP.
12 Therefore, with the exception of the elimination of the minimum usage allowances
13 currently included in PWSA’s water and wastewater conveyance customer charges
14 which is discussed later in my testimony, I only address cost allocation and rate design
15 for FY 2024.

16 Q. HAVE YOU PREPARED EXHIBITS TO ACCOMPANY YOUR
17 TESTIMONY?

18 A. Yes, I have. As just explained, my Curriculum Vitae is attached to my testimony as
19 Exhibit JDM-1. Also attached to my testimony are Exhibits JDM-2 through JDM-4.

20 Q. PLEASE SUMMARIZE YOUR FINDINGS AND RECOMMENDATIONS.

21 A. My findings and recommendations are as follows:

- 22 • The water cost of service study presented by PWSA utilizes the base-extra
23 capacity method set forth in the American Water Works Association’s
24 (“AWWA”) *Manual M1, Principals of Water Rates Fees, and Charges*
25 (“AWWA M1 Manual”) and is reasonable;
- 26 • The water service rates proposed by PWSA for the Wholesale class are
27 significantly less than the indicated cost of service. PWSA claims that the rates
28 for each of the Wholesale customers it serves is set by a contractual agreement,

1 and PWSA is unable to increase the rates of Wholesale customers beyond what
2 is allowed by the individual agreements. I recommend that PWSA issue a notice
3 of termination for each of the Wholesale agreements, and negotiate new
4 agreements that provide for movement toward cost of service rates;

- 5 • The water service gradualism adjustment PWSA has proposed for Industrial
6 customers of \$1,030,000 should be reduced by \$226,070;
- 7 • Because PWSA has not supported its revenue requirement requests for FY 2025
8 and FY 2026, it should be required to make a tariff filing which would become
9 effective January 1, 2025 to implement a revenue neutral removal of the
10 minimum usage allowances currently included in its water and wastewater
11 conveyance service customer charges;
- 12 • The monthly water service customer charges proposed by PWSA improperly
13 include indirect administrative support expenses and a readiness-to-serve
14 component. The administrative support expenses and the readiness-to-serve
15 component are not required to connect and maintain a customer's account and,
16 therefore, should be excluded from the calculation of customer charges. For FY
17 2024, exclusion of these costs would reduce the customer charge for a typical
18 Residential water customer with a 5/8-inch meter from \$32.43 to \$26.28;
- 19 • The wastewater conveyance cost of service study presented by PWSA utilizes
20 the functional cost allocation described in *Financing and Charges for*
21 *Wastewater Systems; Manual of Practice No. 27* published by the Water
22 Environmental Federation ("Manual of Practice No. 27) and is reasonable;
- 23 • PWSA's stormwater gradualism adjustment of \$9.5 million, or 24% of the total
24 stormwater revenue requirement, which provides for the recovery of a portion
25 of the stormwater revenue requirement from wastewater conveyance customers
26 appears reasonable. However, to the extent that the Commission authorizes a
27 total stormwater revenue requirement that is less than the revenue requirement
28 requested by PWSA, that reduction should first be applied to reduce the
29 stormwater gradualism adjustment assigned to wastewater conveyance service;
- 30 • As with water service, only the direct costs required to connect and maintain a
31 customer's account should be included in the calculation of wastewater
32 conveyance customer charges. PWSA has improperly included indirect
33 administrative support expenses and a readiness-to-serve component in its
34 proposed customer charges which should be eliminated. For FY 2024,
35 exclusion of these costs would reduce the customer charge for a typical
36 Residential wastewater customer with a 5/8-inch meter from \$7.42 to \$5.90;
37 and
- 38 • To the extent that the Commission authorizes an increase in stormwater
39 revenues which is less than that requested by PWSA, the rates proposed by
40 PWSA should be proportionately scaled back.

1 Q. HOW IS THE REMAINDER OF YOUR TESTIMONY ORGANIZED?

2 A. The remainder of my testimony is divided into three additional sections. The second
3 section of my testimony describes and evaluates the PWSA's water COS study,
4 proposed revenue allocation, and rate design proposals. The next section of my
5 testimony addresses PWSA's wastewater conveyance COS study, proposed revenue
6 allocation, and rate design proposals. The final section of my testimony addresses
7 PWSA's stormwater rate design proposals.
8

9 **II. WATER SERVICE**

10 **A. Cost of Service Study**

11 Q. WHAT IS THE OBJECTIVE OF A COST OF SERVICE STUDY?

12 A. A cost of service study is conducted to assist a utility or commission in determining the
13 level of costs properly recoverable from each of the various classes of customers to
14 which the utility provides service. Allocation of recoverable costs to each class of
15 service is generally based on cost causation principles.

16 Q. WHAT ARE THE PRIMARY COST OF SERVICE STUDY
17 METHODOLOGIES UTILIZED FOR WATER UTILITIES?

18 A. The two most commonly used and widely recognized methods of allocating costs
19 to customer classes for water utilities are the base-extra capacity method and the
20 commodity-demand method. Both of these methods are set forth in the American Water
21 Works Association's ("AWWA") Manual M1, *Principles of Water Rates, Fees, and*
22 *Charges* ("AWWA Manual").

23 Q. WHAT METHODOLOGY HAS THE PWSA UTILIZED FOR ITS WATER
24 COST OF SERVICE STUDY?

25 A. PWSA has utilized the base-extra capacity method in preparing its water COS study.
26 Under the base-extra capacity method, investment and costs are first classified into four

1 primary functional cost categories: base or average capacity, extra capacity, customer,
2 and fire protection. Once investment and costs are classified to these functional
3 categories, they are allocated to the various customer classes. PWSA’s water COS
4 study is presented by Harold J. Smith of Raftelis Financial Consultants, Inc. PWSA’s
5 subsequently discussed wastewater conveyance COS study and stormwater cost
6 analysis are also presented by Mr. Smith. The water and wastewater conveyance COS
7 studies and stormwater cost analysis were prepared based on the PWSA’s fully
8 projected future test year (“FPFTY”) revenue requirement claim for FY 2024 in this
9 proceeding, exclusive of Distribution System Improvement Charge (“DSIC”) revenues.

10 Q. PLEASE DESCRIBE IN GREATER DETAIL THE FOUR PRIMARY
11 FUNCTIONAL COST CATEGORIES AND HOW THEY ARE
12 ALLOCATED TO THE VARIOUS CUSTOMER CLASSES UNDER THE
13 BASE-EXTRA CAPACITY METHOD.

14 A. **Base or Average Costs** are costs that tend to vary with the quantity of water used, plus
15 costs associated with supplying, treating, pumping, and distributing water to customers
16 under average load conditions. Base costs were allocated to customer class on the basis
17 of average daily usage in PWSA’s cost of service study.

18 **Extra Capacity Costs** are costs associated with meeting usage requirements in
19 excess of base or average usage. This includes operating and capital costs for additional
20 plant and system capacity beyond that required for average usage. Extra capacity costs
21 in the PWSA’s study have been subdivided into costs necessary to meet maximum day
22 extra demand and maximum hour extra demand. These extra capacity costs were
23 allocated to customer class on the basis of each class’s maximum day and maximum
24 hour usage in excess of average usage. Extra capacity costs related to fire protection
25 service are allocated directly to the fire protection classifications.

1 **Customer Costs** are costs associated with serving customers regardless of their
2 usage or demand characteristics. Customer costs include the operating costs related to
3 meters and services, meter reading costs, and billing and collection costs. Customer
4 costs were allocated on the basis of capital cost of meters and services and the number
5 of customer bills.

6 **Fire Protection Costs** are costs associated with providing the facilities to meet
7 the potential peak demand of fire protection service. In the PWSA's study, fire
8 protection costs have been subdivided into the costs associated with meeting Public
9 Fire Protection and Private Fire Protection demands. The extra capacity costs assigned
10 to fire protection were allocated to Public and Private Fire Protection on the basis of
11 the total relative demands of hydrants and fire service lines. In accordance with 66 Pa.
12 C.S. § 1328(b) of the Public Utility Code, public fire costs exceeding 25% of the public
13 fire cost of service were assigned to the other customer classes based on equivalent
14 meters.

15 Q. WHAT CUSTOMER CLASSES HAS THE PWSA IDENTIFIED IN ITS
16 WATER COST OF SERVICE STUDY?

17 A. The Company has separately identified the cost of serving ten customer classes in its
18 study:

- 19 • Residential
- 20 • Residential Customer Assistance Program ("CAP")
- 21 • Commercial
- 22 • Industrial
- 23 • Health or Education
- 24 • Municipal – Residential
- 25 • Municipal – Commercial
- 26 • Private Fire
- 27 • Public Fire
- 28 • Wholesale

1 Q. DO YOU GENERALLY FIND THE PWSA’S WATER COST OF SERVICE
2 STUDY TO BE REASONABLE?

3 A. Yes. I find the PWSA’s use of the base-extra capacity methodology to be reasonable.

4 **B. Water Revenue Allocation**

5 Q. EXHIBIT HJS-10W OF PWSA’S WATER COS STUDY PRESENTS BOTH
6 AN UNADJUSTED AND ADJUSTED COST OF SERVICE FOR EACH
7 CUSTOMER CLASS. PLEASE EXPLAIN THE DIFFERENCE.

8 A. The unadjusted cost of service reflects the direct results of the PWSA’s water COS
9 study. As indicated on Exhibit HJS-10W, PWSA subsequently adjusted the direct
10 results of its water COS study to reflect:

- 11 • A reallocation of public fire costs in excess of 25% of the indicated cost of
12 service pursuant to 66 § Pa 1328(b) of the Public Utility Code as previously
13 discussed;
- 14 • A reallocation of the revenue deficiency of the Wholesale customer class, which
15 is discussed later in my testimony;
- 16 • The addition of bad debt expense, which was not included in the COS study;
- 17 • The forgone revenue resulting from discounts given to participants in PWSA’s
18 Customer Assistance Program; and
- 19 • A reallocation of the revenue increase assigned to the Industrial class to provide
20 for gradualism, which is also discussed later in my testimony.

21 Q. PLEASE PROVIDE A COMPARISON OF THE UNADJUSTED COST OF
22 SERVICE FOR EACH CUSTOMER CLASS, INCLUSIVE OF BAD DEBT
23 EXPENSE, AND PRESENT AND PROPOSED FY 2024 RATES FOR
24 EACH CUSTOMER CLASS.

25 A. The unadjusted cost of service for each customer class indicated by PWSA’s water
26 COS study, inclusive of bad debt expense, and the revenues at present and proposed
27 FY 2024 rates are summarized in Table 1.

1

Table 1. Comparison of Present and Proposed FY 2024 Rates, and the Unadjusted Cost of Service

Class	Present Rates	Proposed Rates (1)	INCREASE		Unadjusted Cost of Service (2)	INDICATED INCREASE	
			Amount	Percent		Amount	Percent
Residential	\$51,476,654	\$58,174,270	\$6,697,616	13.0%	\$50,762,253	(\$714,401)	-1.4%
Residential-CAP	1,866,823	2,079,105	212,282	11.4%	\$3,553,693	1,686,870	90.4%
Commercial	47,167,815	57,058,794	9,890,979	21.0%	\$50,985,433	3,817,618	8.1%
Industrial	2,378,242	3,073,423	695,181	29.2%	\$3,762,953	1,384,711	58.2%
Health or Education	18,874,998	23,984,749	5,109,751	27.1%	\$21,669,964	2,794,966	14.8%
Municipal-Residential	36,096	40,317	4,221	11.7%	\$31,537	(4,559)	-12.6%
Municipal-Commercial	4,002,156	5,002,575	1,000,419	25.0%	\$4,386,334	384,178	9.6%
Private Fire System	723,982	975,033	251,051	34.7%	\$742,480	18,498	2.6%
Public Fire Protection	1,322,609	1,964,093	641,484	48.5%	\$7,855,146	6,532,537	493.9%
Wholesale	3,661,855	4,339,251	677,396	18.5%	\$12,906,162	9,244,307	252.4%
Total:	\$131,511,230	\$156,691,609	\$25,180,381	19.1%	\$156,655,955	\$25,144,726	19.1%

Note: (1) Exclusive of DSIC revenues

(2) Includes bad debt expense.

2

3 Q. ARE THERE ANY PARTICULAR AREAS OF CONCERN REVEALED
4 BY TABLE 1 WITH RESPECT TO THE INDICATED CLASS COST OF
5 SERVICE FOR EACH CUSTOMER CLASS AND THE PRESENT AND
6 PROPOSED FY 2024 RATES FOR EACH CUSTOMER CLASS?

7 A. Yes. The distribution of the revenue increase that PWSA is requesting in this
8 proceeding, or the difference between present and proposed FY 2024 rate revenues,
9 and the indicated cost of service for the Wholesale class is a significant concern. As
10 shown in Table 1, the proposed rate revenues for the Wholesale class are significantly
11 less than the indicated cost of service. As previously indicated, the difference between
12 Wholesale revenues at proposed FY2024 rates, and the indicated cost of service of the
13 Wholesale class, which exceeds \$9 million, has been allocated to the other customer
14 classes. PWSA claims that the rates for each Wholesale customer are set by a

1 contractual agreement, and PWSA is unable to increase the rates of Wholesale
2 customers beyond what is allowed by the individual agreements.

3 Q. WHAT IS YOUR RESPONSE TO PWSA'S CLAIM THAT IT CANNOT
4 INCREASE RATES TO WHOLESALE CUSTOMERS BEYOND WHAT IS
5 PROVIDED IN EACH CUSTOMER'S CONTRACTUAL AGREEMENT?

6 A. PWSA serves three Wholesale customers: Fox Chapel, Aspinwall, and Reserve
7 Township. I agree with PWSA that the rates for each Wholesale customer are currently
8 set by contractual agreement, and PWSA is unable to increase rates beyond what is
9 allowed by the individual agreements. PWSA's contractual agreements with Fox
10 Chapel, Aspinwall, and Reserve Township were filed with the Commission at Docket
11 No. U-2020-3020772 in conformance with the March 26, 2020 Compliance Plan Stage
12 1 Order at Docket Nos. M-2018-2640802, M-2018-2640803.² Under the agreement
13 with Aspinwall, PWSA is authorized to terminate the agreement with one year's notice,
14 and the agreements with Fox Chapel and Reserve Township may be terminated upon
15 five year's notice. Therefore, I recommend that PWSA provide notice of termination
16 for each agreement and negotiate alternative agreements that provide for movement
17 toward cost of service rates over the course of the contract. Renegotiation of the current
18 agreements is likely to result in additional revenues for PWSA. In addition to the
19 reasons presented by additional OCA witnesses, this is another reason the MYRP
20 should not be approved as these additional Wholesale revenues are currently unknown
21 and could not be reflected in PWSA's MYRP revenues.

² See <https://www.puc.pa.gov/pcdocs/1669573.pdf>

1 Q. DO YOU HAVE OTHER CONCERNS WITH RESPECT TO PWSA'S
2 PROPOSED REVENUE DISTRIBUTION?

3 A. Yes. To provide for gradualism, PWSA is limiting the increase to the Industrial class
4 to 1.5 times the system average increase, rather than increasing Industrial customer
5 class rates to be consistent with the results indicated by its water COS study. I agree
6 that gradualism should be a rate design consideration. While there is no hard and fast
7 rule as to what constitutes gradualism, it is my experience that an increase of 1.5 to 2.0
8 times the system average increase would be consistent with the concept of gradualism.
9 As shown on Exhibit HJS-10W, PWSA has reallocated \$1,030,000 of the Industrial
10 customer class cost of service to the other customer classes to provide for gradualism.
11 Based on the information presented on Exhibit HJS-15W, inclusive of DSIC revenues,
12 the increase proposed for the Industrial class, and the overall system increase compare
13 are presented in Table 2. The increase proposed by PWSA for the Industrial customer
14 class is 1.40 times the system average increase. I recommend that, to provide for
15 gradualism, the increase to the Industrial class be limited to 1.75 times the system
16 average increase. This would increase the revenues assigned to the Industrial class by
17 an additional \$226,070 at PWSA's requested revenue requirement for the FPPTY. I
18 recommend that the gradualism adjustment for the Industrial class reflected on Exhibit
19 HJS-10 be reduced by \$226,070, and revenue increase assigned to each customer class
20 to account for the Industrial gradualism adjustment being proportionately reduced. I
21 recommend that my proposed revenue allocation be proportionately scaled-back to
22 account for any difference between PWSA's requested revenue increase and the
23 increase authorized by the Commission in this proceeding.

Table 2. Comparison of Present and Proposed Rates for the Industrial Class and Overall System Increase

	Proposed Rates	Increase	Percent
<u>PWSA Proposed</u>			
Industrial	\$3,303,930	\$925,688	38.9%
Overall System	\$167,970,729	\$36,459,499	27.7%
<u>OCA Proposed</u>			
Industrial	\$3,530,000	\$1,151,758	48.4%
Difference		\$226,070	9.5%

1 Q. DO YOU HAVE ANY CONCERNS WITH RESPECT TO THE REVENUE
2 PROJECTIONS REFLECTED IN PWSA’S APPLICATION?

3 A. Yes. There are currently two City of Pittsburgh properties which are unmetered. In the
4 response to discovery request OCA-2-5, attached to my testimony as Exhibit JDM-2,
5 PWSA indicated that it is ordering the materials necessary to complete meter
6 installations for these properties. PWSA claims it does not have estimates of the actual
7 water usage for the unmetered properties. In its rebuttal testimony, PWSA should be
8 required to provide a timeline for metering the two properties. PWSA should also
9 identify and describe the services provided by each property, and identify the estimated
10 revenue impact of metering these properties. The revenues to be provided by these
11 properties may be substantial, and are not being reflected in PWSA’s MYRP revenue
12 requirement claim. If these revenues are substantial, failing to reflect these revenues in
13 PWSA’s revenue requirement claim is another reason the MYRP should not be
14 approved.

1 **C. Rate Design**

2 Q. IS PWSA PROPOSING ANY CHANGES TO ITS EXISTING RATE
3 STRUCTURE?

4 A. Yes. While PWSA is not proposing any changes to the existing rate structure for FY
5 2024, for FY 2025, PWSA is proposing to eliminate the minimum usage allowances
6 currently included in the fixed monthly customer charge.³ The minimum allowance
7 varies by meter size. For example, for the typical Residential customer served by a 5/8-
8 inch meter, the current minimum allowance is 1,000 gallons per month.

9 Q. DO YOU AGREE WITH PWSA'S PROPOSAL CONCERNING THE
10 ELIMINATION OF THE USAGE ALLOWANCE FROM THE FIXED
11 MONTHLY CUSTOMER CHARGE?

12 A. Only in part. I do agree that PWSA should eliminate the minimum allowance from its
13 fixed monthly customer charges, because it is inequitable and it disincentivizes
14 conservation efforts. However, I do not agree that PWSA's should be able to condition
15 the removal of the minimum usage allowances on approval of its MYRP and its
16 proposals for an Infrastructure Improvement Charge and a Customer Assistance
17 Charge, as its filing suggests.⁴

18 Q. WHAT IS YOUR RECOMMENDATION REGARDING ELIMINATION
19 OF PWSA'S MINIMUM ALLOWANCE?

20 A. The Commission should reject the notion that PWSA can only remove its minimum
21 usage allowances if the full suite of its rate requests and surcharges are granted. PWSA
22 is required to support each proposal on its merits, and it should not be permitted to
23 condition elimination of the minimum allowances on the approval of other proposals.
24 It is my understanding that in each of its rate case settlements since PWSA became a

³ PWSA St. No. 2, p. 50.

⁴ PWSA St. No. 2, pp. 49-50; PWSA St. No. 6, p. 26.

1 regulated public utility, PWSA has agreed to develop a plan to remove the minimum
2 allowances, and I recommend that it be required to make a tariff filing effective January
3 1, 2025 to implement removal of the minimum allowances in a revenue neutral manner.

4 Q. HOW DID PWSA DEVELOP ITS PROPOSED FIXED MONTHLY
5 CHARGES?

6 A. The development of the components of the proposed fixed monthly customer charges
7 for FY 2024 is presented on Exhibits HJS-8W and HJS-12W, page 6. The monthly
8 customer charge for each meter size consists of meter/services costs, billing costs, a
9 minimum allowance usage charge, a public fire charge, and a readiness-to-serve
10 component.

11 Q. DO YOU HAVE ANY CONCERNS WITH PWSA'S PROPOSED DESIGN
12 OF FIXED MONTHLY CUSTOMER CHARGES?

13 A. Yes. Only the direct costs required to connect and maintain a customer's account
14 should be included in the calculation of a customer charge. In addition, it is reasonable
15 to include 75% of the Public Fire cost of service through customer charges. As
16 indicated on Exhibit HJS-8W, PWSA has improperly included indirect administrative
17 support expenses in its calculation of customer charges. These costs are not direct costs
18 that are required to connect and maintain a customer's account and, therefore, should
19 not be recovered through customer charges. In addition, PWSA has included a
20 readiness-to-serve component in its proposed customer charges.⁵ While PWSA does
21 not define this component, page 97 of the AWWA M1 Manual describes it as "related
22 to charges that aim at capturing the costs of having a system in place to provide water
23 to the customer regardless of whether the customer consumes any water in a given

⁵ PWSA St. 7, p. 29

1 service period.”⁶ In PWSA’s water COS study, this readiness-to-serve component
2 reflects an additional allocation of debt service costs. There is no basis for this
3 allocation and no precedent in Pennsylvania for the inclusion of a readiness-to-serve
4 component in customer charges. As shown on Exhibit HJS-2W, the meters/services
5 component of PWSA’s proposed customer charges has already been assigned a portion
6 of debt service costs. It is inappropriate to include a readiness-to-serve charge in
7 PWSA’s fixed monthly customer charge, and this component should be eliminated.

8 Q. HAVE YOU REVISED PWSA’S CALCULATION OF CUSTOMER
9 CHARGES TO REMOVE THE INDIRECT ADMINISTRATIVE COSTS
10 AND THE READINESS-TO-SERVE COST COMPONENT WHICH PWSA
11 HAS IMPROPERLY INCLUDED IN IT MONTHLY CUSTOMER
12 CHARGE RATE CALCULATIONS?

13 A. Yes. A revised calculation of monthly customer charges for FY 2024 is presented in
14 Exhibit JDM-3. As shown on Exhibit JDM-3, for FY 2024, my revised calculation
15 reduces the monthly customer charge for a typical Residential water customer served
16 by a 5/8-inch meter to \$26.38 from the \$32.43 shown on HJS-12W, page 1. I note that
17 the \$26.38 charge is less than the existing charge of \$26.52 which became effective
18 January 1, 2023.⁷ To the extent the Commission authorizes an increase in this
19 proceeding which is less than PWSA’s requested increase for FY 2024, I recommend
20 that the customer charges I have proposed for FY 2024 be proportionately scaled back
21 to reflect the reduced revenue increase.

⁶ AWWA Manual M1, Principles of Water Rates, Fees, and Charges, Seventh Edition, 2017, American Water Works Association

⁷ Supplement No. 9, Tariff Water – Pa. P.U.C. No. 1, Second Revised Page No. 8.

1 **III. WASTEWATER CONVEYANCE SERVICE**

2 **A. Cost of Service Study**

3 Q. WHAT METHODOLOGY DID PWSA UTILIZE IN PREPARING ITS
4 WASTEWATER CONVEYANCE COST OF SERVICE STUDY?

5 A. PWSA used the functional cost allocation methodology described in *Financing and*
6 *Charges for Wastewater Systems; Manual of Practice No. 27* published by the Water
7 Environment Federation (“Manual of Practice No. 27”). This method allocates the cost
8 of providing wastewater service to customer classifications in proportion to each
9 classification’s use of the service provider’s facilities and services. Costs are assigned
10 to cost components using predominant operational purposes as cost-causative factors.
11 The functional cost allocation method is generally accepted as a sound method for
12 allocating the cost of wastewater service.

13 Q. PLEASE IDENTIFY THE CUSTOMER CLASSES INCLUDED IN
14 PWSA’S WASTEWATER CONVEYANCE STUDY.

15 A. With the exception of the fire protection service classes, the same customer classes
16 included in PWSA’s water COS study are included in PWSA’s wastewater conveyance
17 COS study.

18 Q. DO YOU GENERALLY FIND PWSA’S WASTEWATER CONVEYANCE
19 COST OF SERVICE STUDY TO BE REASONABLE?

20 A. Yes. I find PWSA’s wastewater conveyance cost of service study to be reasonable.

1 **B. Wastewater Revenue Allocation**

2 Q. LIKE THE WATER COS STUDY, PWSA ALSO PRESENTS
3 UNADJUSTED AND ADJUSTED WASTEWATER COSTS OF SERVICE
4 FOR EACH CUSTOMER CLASS. PLEASE IDENTIFY THE
5 ADJUSTMENTS MADE BY PWSA TO THE UNADJUSTED
6 WASTEWATER CONVEYANCE COST OF SERVICE STUDY.

7 A. As shown on Exhibit HJS-9WW, PWSA is proposing several adjustments to the
8 unadjusted cost of service for wastewater conveyance service. Similar to the water cost
9 of service adjustments, PWSA is proposing a bad debt expense adjustment, a
10 Wholesale customer revenue deficiency adjustment, a gradualism adjustment for the
11 Industrial class, and a Customer Assistance Program adjustment. PWSA is also
12 proposing a gradualism adjustment for stormwater service.

13 Q. IS THE WHOLESALE WASTEWATER REVENUE DEFICIENCY
14 ADJUSTMENT A CONCERN IN THIS PROCEEDING AS WAS THE
15 WATER WHOLESALE REVENUE DEFICIENCY ADJUSTMENT?

16 A. No. The amount of the adjustment is *de minimis* (\$4,465).

17 Q. WHAT ABOUT THE INDUSTRIAL GRADUALISM ADJUSTMENT?

18 A. No. That adjustment is also *de minimis* (\$3,000).

19 Q. PLEASE DESCRIBE THE STORMWATER GRADUALISM
20 ADJUSTMENT.

21 A. For FY 2024, PWSA is proposing to recover \$9.5 million of its stormwater revenue
22 requirement from wastewater conveyance customers.

1 Q. DID PWSA PROPOSE A STORMWATER GRADUALISM ADJUSTMENT
2 IN ITS MOST RECENT PRIOR RATE PROCEEDING AT DOCKET NOS.
3 R-20213024774 (WASTEWATER) AND R-2021-3024779
4 (STORMWATER)?

5 A. Yes. PWSA proposed a stormwater gradualism adjustment of \$12.4 million which
6 reflected 33.8% of total wastewater conveyance costs. The settlement approved in that
7 proceeding provided for a gradualism adjustment of \$10.6 million which reflected
8 30.5% of total wastewater conveyance costs.

9 Q. WHAT PERCENTAGE OF TOTAL WASTEWATER CONVEYANCE
10 COSTS DOES THE \$9.5 STORMWATER GRADUALISM ADJUSTMENT
11 REPRESENT IN THIS PROCEEDING?

12 A. For FY 2024, the \$9.5 million stormwater gradualism adjustment proposed by PWSA
13 in this proceeding represents 19% of total wastewater conveyance costs.

14 Q. HOW DO THE PROPOSED INCREASES IN WASTEWATER
15 CONVEYANCE AND STORM WATER RATES INITIALLY COMPARE
16 FOR FY 2024 IN THIS PROCEEDING?

17 A. Inclusive of the stormwater gradualism adjustment, the overall wastewater conveyance
18 rate increase proposed by PWSA in this proceeding for FY 2024 is 4%. The overall
19 stormwater rate increase proposed by PWSA for FY 2024 is 29%.

20 Q. IS IT YOUR RECOMMENDATION THAT THE STORMWATER
21 GRADUALISM PROPOSED BY PWSA BE APPROVED BY THE
22 COMMISSION?

23 A. Yes. The stormwater gradualism adjustment proposed by PWSA reflects a reduction to
24 both the total amount of the adjustment and on a percentage basis from that approve in
25 the settlement of PWSA's most recent prior proceeding. However, to the extent the

1 Commission authorizes a total stormwater revenue requirement that is less than the
2 revenue requirement requested by PWSA, I recommend that the reduction first be
3 applied to reduce the stormwater gradualism adjustment assigned to wastewater
4 conveyance customers, and only if there is an amount remaining should it then be
5 proportionately applied to reduce the stormwater revenue requirement not assigned to
6 wastewater customers. I also recommend that the class revenues and rates proposed by
7 PWSA for FY 2024 be proportionately scaled-back to reflect the final wastewater
8 conveyance revenue requirement for each fiscal year as determined by the Commission
9 in this proceeding.

10 **C. Rate Design**

11 Q. IS PWSA PROPOSING TO MAKE ANY CHANGES TO THE EXISTING
12 WASTEWATER CONVEYANCE RATE STRUCTURE?

13 A. No. PWSA is not proposing to make any changes to the wastewater conveyance rate
14 structure for the rates proposed for FY 2024. However, similar to what it proposed for
15 water service, PWSA is proposing to eliminate the minimum allowances included in
16 its monthly customer charges in FY 2025.

17 Q. SINCE THE OCA IS RECOMMENDING THAT PWSA'S MRYP FOR FY
18 2025 AND FY 2026 NOT BE APPROVED, ARE YOU RECOMMENDING
19 THAT PWSA BE REQUIRED TO FILE TO REFLECT ELIMINATION OF
20 THE MINIMUM USAGE ALLOWANCES CURRENTLY INCLUDED IN
21 ITS WASTEWATER CONVEYANCE MONTHLY CUSTOMER
22 CHARGES EFFECTIVE JANUARY 1, 2025 THROUGH A REVENUE
23 NEUTRAL FILING?

24 A. Yes. For the same reasons I am recommending that PWSA file to eliminate its water
25 service minimum allowances effective January 1, 2025, PWSA should be required to

1 file to eliminate its wastewater conveyance minimum allowances effective January 1,
2 2025 through a revenue neutral filing.

3 Q. ARE THE FIXED MONTHLY CUSTOMER CHARGES FOR
4 WASTEWATER CONVEYANCE SERVICE DEVELOPED USING THE
5 SAME APPROACH PWSA USED FOR THE WATER SERVICE FIXED
6 MONTHLY CUSTOMER CHARGES?

7 A. Generally, yes. However, there is no Public Fire cost of service under recovery
8 component. Similar to what is proposed for water service, PWSA is proposing to
9 include a readiness-to-serve component in the charge. The proposed customer charges
10 for FY 2024 are developed on Exhibits HJS-7WW and HJS-11WW, page 1.

11 Q. DO YOU HAVE ANY CONCERNS WITH PWSA'S PROPOSED DESIGN
12 OF THE FIXED MONTHLY CUSTOMER CHARGES FOR
13 WASTEWATER CONVEYANCE SERVICE?

14 A. As with the water service, only the direct costs required to connect and maintain a
15 customer's account should be included in the calculation of wastewater conveyance
16 customer charges. As indicated on Exhibit HJS-7WW, PWSA has improperly included
17 indirect administrative support expense in its calculation of customer charges. In
18 addition, as with water service, PWSA has included a readiness-to-serve component in
19 its proposed customer charges. For the same reasons previously discussed for water
20 service, it is inappropriate to include a readiness-to-serve component in the calculation
21 of wastewater conveyance customer charges.

1 Q. HAVE YOU REVISED PWSA’S CALCULATION OF WASTEWATER
2 CONVEYANCE CUSTOMER CHARGES TO REMOVE THE INDIRECT
3 ADMINISTRATIVE COSTS AND THE READINESS-TO-SERVE COST
4 COMPONENT WHICH PWSA HAS IMPROPERLY INCLUDED IN IT
5 MONTHLY CUSTOMER CHARGE RATE CALCULATIONS?

6 A. Yes. A revised calculation of monthly customer charges for FY 2024 is presented in
7 Exhibit JDM-4. As shown on Exhibit JDM-4, for FY 2024, my revised calculation
8 reduces the monthly customer charge for a typical Residential wastewater customer
9 served by a 5/8-inch meter to \$5.90 from the \$7.42 shown on HJS-11WW, page 1. To
10 the extent the Commission authorizes an increase in this proceeding which is less than
11 PWSA’s requested increase for FY 2024, I recommend that the customer charges I
12 have proposed for FY 2024 be proportionately scaled-back to reflect the reduced
13 revenue increase.

14 **IV. STORMWATER SERVICE**

15 Q. DID PWSA PERFORM A STORMWATER CLASS COST OF SERVICE
16 STUDY?

17 A. No. Stormwater rates for all customers are assessed based on equivalent Residential
18 units (“ERU”), and PWSA calculated stormwater rates based on ERU. PWSA
19 developed an analysis showing the cost of serving each ERU. PWSA’s rates for
20 stormwater service for Residential customers are based on a three-tier rate structure,
21 with rates that vary based on the impervious area of a customer’s property. All other
22 customers are assessed rates for stormwater service based on the ERU of the customer’s
23 property.

1 Q. DID PWSA ALSO PREPARE AN UNADJUSTED AND ADJUSTED
2 STORMWATER COST OF SERVICE AS IT DID FOR WATER AND
3 WASTEWATER CONVEYANCE SERVICE?

4 A. Yes, it did. As it did for water and wastewater conveyance service, as shown on Exhibit
5 HJS-5SW, PWSA made adjustments for bad debt expense and the Customer Assistance
6 Program. PWSA also adjusted the unadjusted cost of service by \$9.5 million to reflect
7 the stormwater costs to be recovered from wastewater customers, and the costs
8 associated with a stormwater credit program. Under this credit program, customers can
9 reduce their stormwater charges fee by taking specific actions to reduce their demand
10 for stormwater service.

11 Q. ARE YOU PROPOSING ANY ADJUSTMENTS TO PWSA'S
12 STORMWATER RATE DESIGN?

13 A. No. To the extent that the Commission authorizes an increase in stormwater revenues
14 for FY 2024 which is less than that requested by PWSA, the rates proposed by PWSA
15 should be proportionately scaled back.

16 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?

17 A. Yes, it does; however, I reserve the right to update this testimony as may be necessary.

ON BEHALF OF THE
PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE

AUGUST 9, 2023

EXHIBIT JDM-1

Curriculum Vitae

of

Jerome D. Mierzwa

JEROME D. MIERZWA

Mr. Mierzwa is a Principal of Exeter Associates, Inc., with over 35 years of public utility regulatory experience. At Exeter, Mr. Mierzwa has been involved in purchased gas cost allocation analysis and rate design analysis, conducting management audits and similar investigations of the natural gas supply and procurement policies and practices of local distribution companies (LDCs), and has provided assistance in proceedings before the Federal Energy Regulatory Commission (FERC). Mr. Mierzwa has participated in the planning of natural gas procurements for major federal installations located in various regions of the country. Mr. Mierzwa has been involved in evaluating performance-based incentive regulation for LDC purchased gas costs and the unbundling of LDC services. Mr. Mierzwa has also participated in developing utility class cost-of-service studies, has presented testimony sponsoring gas, water and wastewater utility cost-of-service studies, least-cost gas procurement and incentive regulation, in addition to presenting testimony addressing utility rate base and revenues.

Education

M.B.A. (Finance), 1985
Canisius College
Buffalo, New York

B.S. (Marketing), 1981
Canisius College
Buffalo, New York

Gas Rates Fundamental Course, 1987
University of Wisconsin
Madison, Wisconsin
Sponsored by the American Gas Association

Previous Employment

1986-1990 Rate Analyst
 National Fuel Gas Company
 Buffalo, New York

Previous Experience

Prior to joining Exeter in 1990, Mr. Mierzwa served as a rate analyst at National Fuel Gas Supply Corporation, an interstate pipeline. In that position, he was involved in preparing purchased gas adjustment filings and reviewing the rate filings of interstate pipeline suppliers. Mr. Mierzwa was also involved in preparing supplier rate, gas sales, and gas purchase price forecasts; examining the rate implications of storage activity; and analyzing rate of return, cash working capital, and potential merger and acquisition candidates.

Presentations

The NASUCA annual meetings in Reno, Nevada, November 1994 (presentation concerning spot market gas incentive procurement programs).

The NASUCA annual meetings in San Antonio, Texas, November 1991 (presentation

concerning the Federal Energy Regulatory Commission (FERC) Mega-NOPR proceeding which led to the adoption of FERC Order No. 636).

Expert Testimony

(*Recurring*) Northern Indiana Public Service Company (Indiana Utility Regulatory Commission). Presented testimony addressing gas procurement activity, reported costs, and the gas performance-based incentive mechanism on behalf of the Indiana Office of Utility Consumer Counselor.

The Pittsburgh Water and Sewer Authority – Bureau of Water (Pennsylvania Public Utility Commission Docket Nos. R-2023-3039920, R-2023-3039921 and R-2023-3039919), August 2023. Presented testimony addressing water, wastewater and stormwater cost allocation and rate design on behalf of the Pennsylvania Office of Consumer Advocate.

Washington Gas Light Company (Maryland Public Service Commission Case No. 9704), August 2023. Presented testimony addressing utility class cost of service and rate design on behalf of the Maryland Office of People’s Counsel.

Columbia Water Company – Bureau of Water (Pennsylvania Public Utility Commission Docket No. R-2023-3040258), August 2023. Presented testimony addressing water utility class cost of service and rate design on behalf of the Pennsylvania Office of Consumer Advocate.

Columbia Gas of Maryland, Inc. (Maryland Public Service Commission Case No. 9701), July 2023. Presented testimony addressing class cost of service and rate design on behalf of the Maryland Office of People's Counsel.

Northern Utilities, Inc. d/b/a Unitil (Maine Public Utilities Commission Docket No. 2023-00051), July 2023. Presented testimony addressing class cost of service and rate design on behalf of the Maine Office of the Public Advocate.

Indiana-American Water Company, Inc. (Indiana Utility Regulatory Commission Cause No. 45870), July 2023. Presented testimony addressing water and wastewater utility class cost of service and rate design on behalf of the Indiana Office of Utility Consumer Counselor.

Chattanooga Gas Company (Tennessee Public Utility Commission Docket No. 07-00224), July 2023. Authored report reviewing performance based ratemaking mechanism on behalf of the Utility Division of the Tennessee Public Utility Commission and Consumer Advocate Unit in the Financial Division of the Tennessee Attorney General's Office.

Fitchburg Gas and Electric Light Company d/b/a Unitil (Massachusetts Department of Public Utilities D.P.U. 23-25), June 2023. Presented testimony addressing gas procurement practices and policies on behalf of the Massachusetts Attorney General's Office.

Columbia Gas of Pennsylvania, Inc. (Pennsylvania Public Utility Commission Docket No. R-2023-3038630), May 2023. Presented testimony addressing class cost of service and rate design on behalf of the Pennsylvania Office of Consumer Advocate.

Philadelphia Water Department (Philadelphia Water Commissioner, Fiscal Years 2024-2025), April 2023. Presented testimony addressing the utility class cost of service and rate design on behalf of the Public Advocate.

Aqua America, Inc.; Aqua Pennsylvania, Inc.; Aqua Pennsylvania Wastewater, Inc.; Peoples Natural Gas Company, LLC; and Peoples Gas Company, LLC (Pennsylvania Public Utility Commission Docket No. R-2022-3037141, March 2023. Presented testimony addressing proposed merger application on behalf of the Pennsylvania Office of Consumer Advocate.

Boston Gas Company d/b/a National Grid (Massachusetts Department of Public Utilities D.P.U. 22-149), March 2023. Presented testimony addressing gas procurement practices and policies on behalf the Massachusetts Attorney General's Office.

Chesapeake Utilities Corporation (Delaware Public Service Commission Docket No. 22-0737), March 2023. Presented testimony addressing gas procurement practices and policies on behalf of the Staff of the Delaware Service Commission and the Delaware Division of the Public Advocate.

Delmarva Power & Light Company (Delaware Public Service Commission Docket No. 22-0726), February 2023. Presented testimony addressing gas procurement practices and policies on behalf of the Staff of the Delaware Service Commission and the Delaware Division of the Public Advocate.

National Fuel Gas Distribution Corporation (Pennsylvania Public Utility Commission Docket No. R-2022-3035730), January 2023. Presented testimony addressing the allocation of purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

Aquarion Water Company of Connecticut (The Office of Consumer Counsel Docket No. 22-07-01), October 2022. Presented testimony addressing class cost of service and rate design on behalf of the Office of Consumer Counsel.

Narragansett Electric Company d/b/a Rhode Island Energy 2022 Gas Cost Recovery Filing (Public Utilities Commission of the State of Rhode Island Docket No. 22-20-NG), September 2022. Presented testimony addressing petition for gas cost recovery on behalf of the Rhode Island Division of Public Utilities and Carriers.

Leatherstocking Gas Company LLC (Pennsylvania Public Utility Commission Docket No. R-2022-3032764), September 2022. Presented testimony addressing class cost of service and rate design on behalf of the Pennsylvania Office of Consumer Advocate.

The York Water Company (Pennsylvania Public Utility Commission Docket Nos. R-2022-3031340 and -3032806), August 2022. Presented testimony addressing water and wastewater class cost of service and rate design on behalf of the Pennsylvania Office of Consumer Advocate.

Pennsylvania American Water Company (Pennsylvania Public Utility Commission Docket Nos. R-2022-3031672 and -3031673), July 2022. Presented testimony addressing water and wastewater class cost of service and rate design on behalf of the Pennsylvania Office of Consumer Advocate.

Columbia Gas of Maryland, Inc. (Maryland Public Service Commission Case No. 9680), July 2022. Presented testimony addressing class cost of service and rate design on behalf of the Maryland Office of People's Counsel.

UGI Utilities, Inc. – Gas Division (Pennsylvania Public Utility Commission Docket No. R-2022-3032242), June 2022. Presented testimony addressing the allocation of purchased gas costs on behalf the Pennsylvania Office of Consumer Advocate.

Columbia Gas of Pennsylvania, Inc. (Pennsylvania Public Utility Commission Docket No. R-2022-3031211), June 2022. Presented testimony addressing class cost of service and rate design on behalf of the Pennsylvania Office of Consumer Advocate.

Columbia Gas of Pennsylvania, Inc. (Pennsylvania Public Utility Commission Docket No. R-2022-3031172), May 2022. Presented testimony addressing the allocation of purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

Peoples Natural Gas Company, LLC (Pennsylvania Public Utility Commission Docket No. R-2022-3030661), April 2022. Presented testimony addressing the allocation of purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

Peoples Gas Company, LLC (Pennsylvania Public Utility Commission Docket No. R-2022-3030664), April 2022. Presented testimony addressing the allocation of purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

Philadelphia Gas Works (Pennsylvania Public Utility Commission Docket No. R-2022-303686), April 2022. Presented testimony addressing purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

UGI Utilities, Inc. – Gas Division (Pennsylvania Public Utility Commission Docket No. R-2021-3030218), April 2022. Presented testimony addressing class cost of service and rate design on behalf the Pennsylvania Office of Consumer Advocate.

Peoples Natural Gas Company, LLC and Peoples Gas Company, LLC (Pennsylvania Public Utility Commission Docket Nos. A-2022-3029831 and -3020833), March 2022. Presented testimony addressing proposed merger application on behalf of the Pennsylvania Office of Consumer Advocate.

National Fuel Gas Distribution Corporation (Pennsylvania Public Utility Commission Docket No. R-2022-3030235), March 2022. Presented testimony addressing the allocation of purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

Eversource Gas of Massachusetts (Massachusetts Department of Public Utilities D.P.U. 21-118), March 2022. Presented testimony addressing storage-related Asset Management Agreements on behalf of the Massachusetts Attorney General's Office.

East Chicago Sanitary District Industrial Group (Indiana Utility Regulatory Commission Cause No. 45632), March 2022. Presented testimony addressing water utility cost of service and rate design on behalf of the Indiana Office of Utility Consumer Counselor.

Chesapeake Utilities Corporation (Delaware Public Service Commission Docket No. 21-0677), January 2022. Presented testimony addressing gas procurement practices and policies on behalf of the Staff of the Delaware Service Commission and the Delaware Division of the Public Advocate.

Delmarva Power & Light Company (Delaware Public Service Commission Docket No. 21-0672), January 2022. Presented testimony addressing gas procurement practices and policies on behalf of the Staff of the Delaware Service Commission and the Delaware Division of the Public Advocate.

City of Lancaster – Bureau of Water (Pennsylvania Public Utility Commission Docket No. R-2021-3026682), December 2021. Presented testimony addressing water utility class cost of service and rate design on behalf of the Pennsylvania Office of Consumer Advocate.

Maryland Water Service, Inc. (Maryland Public Service Commission Case No. 9671), December 2021. Presented testimony addressing water utility class cost of service and rate design on behalf of the Maryland Office of People's Counsel.

Narragansett Electric Company d/b/a National Grid 2021 Gas Cost Recovery Filing (Public Utilities Commission of the State of Rhode Island Docket No. 5180), September 2021. Presented testimony addressing petition for gas cost recovery on behalf of the Rhode Island Division of Public Utilities and Carriers.

The Borough of Hanover Municipal Waterworks (Pennsylvania Public Utility Commission Docket No. R-2021-3026116), September 2021. Presented testimony addressing water utility class cost of service and rate design on behalf of the Pennsylvania Office of Consumer Advocate.

Columbia Gas of Maryland, Inc. (Maryland Public Service Commission Case No. 9664), July 2021. Presented testimony addressing allocated cost of service and rate design on behalf of the Maryland Office of People's Counsel.

Presented testimony addressing the allocation of purchased gas costs, and the computation of off-system sales margins and margin sharing procedures on behalf of the Pennsylvania Office of Consumer Advocate.

Kent County Water Authority (Rhode Island Public Utilities Commission Docket No. 2555), June 1997. Presented testimony addressing class cost of service on behalf of the Rhode Island Division of Public Utilities and Carriers.

Southwest Gas Corporation (Public Utilities Commission of Nevada Docket No. 97-2005), June 1997. Presented testimony addressing the allocation of purchased gas costs and gas procurement practices and policies on behalf of the Nevada Office of Consumer Advocate.

Equitable Gas Company, LLC (Pennsylvania Public Utility Commission Docket No. R-00973895), May 1997. Presented testimony addressing the allocation of purchased gas costs and gas procurement practices and policies on behalf of the Pennsylvania Office of Consumer Advocate.

National Fuel Gas Distribution Corporation (Pennsylvania Public Utility Commission Docket No. R-00963779), March 1997. Presented testimony addressing the allocation of purchased gas costs and gas procurement practices and policies on behalf of the Pennsylvania Office of Consumer Advocate.

Northern Illinois Gas Company (Illinois Commerce Commission Docket No. 96-0386), November 1996. Presented testimony addressing performance-based rate programs for purchased gas costs on behalf of the Citizens Utility Board.

West Ohio Gas Company (Public Utilities Commission of Ohio Case No. 96-221-GA-GCR), November 1996. Co-authored report on audit of management and performance of gas purchasing on behalf of the Public Utilities Commission of Ohio.

Dayton Power & Light Company (Public Utilities Commission of Ohio Case No. 96-220-GA-GCR), September 1996. Co-authored report on audit of management and performance of gas purchasing on behalf of the Public Utilities Commission of Ohio.

North Penn Gas Company and PFG Gas, Inc. (Pennsylvania Public Utility Commission Docket No. R-00963636), July 1996. Presented testimony addressing the recovery of excess interstate pipeline capacity costs on behalf of the Pennsylvania Office of Consumer Advocate.

Peoples Natural Gas Company (Pennsylvania Public Utility Commission Docket No. R-00963563), May 1996. Presented testimony addressing the allocation and the projection of purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

National Fuel Gas Distribution Corporation (Pennsylvania Public Utility Commission Docket No. R-00953487), March 1996. Presented testimony addressing incentive rate mechanisms, the allocation of purchased gas costs, and unauthorized service on behalf of the Pennsylvania Office of Consumer Advocate.

North Shore Gas Company/The Peoples Gas Light and Coke Company (Illinois Commerce Commission Docket Nos. 95-0490 and -0491), January 1996. Presented testimony addressing performance-based rate programs for purchased gas costs on behalf of the Citizens Utility Board.

Tennessee Gas Pipeline Company (Federal Energy Regulatory Commission Docket No. RP95-112-000), September 1995. Presented testimony addressing rate design determinants and revenues associated with long-term firm, short-term firm and interruptible services on behalf of the Pennsylvania Office of Consumer Advocate.

Eastern and Pike Natural Gas Companies (Public Utilities Commission of Ohio Case Nos. 95-215-GA-GCR and 95-216-GA-GCR), September 1995. Co-authored report on audit of management and performance of gas procurement activity on behalf of the Public Utilities Commission of Ohio.

United Cities Gas Company (Georgia Public Service Commission Docket No. 5651-U), August 1995. Presented testimony addressing the allocation of purchased gas costs on behalf of the Georgia Consumers' Utility Counsel.

Atlanta Gas Light Company (Georgia Public Service Commission Docket No. 5650-U), August 1995. Presented testimony addressing the purchased gas adjustment mechanism and gas procurement practices and policies on behalf of the Georgia Consumers' Utility Counsel.

National Fuel Gas Distribution Corporation (Pennsylvania Public Utility Commission Docket No. R-00953299), June 1995. Presented testimony addressing storage working capital requirements, heating degree days to be utilized for weather normalization purposes, and sponsored a class cost of service study on behalf of the Pennsylvania Office of Consumer Advocate.

Peoples Natural Gas Company (Pennsylvania Public Utility Commission Docket No. R-00953318), May 1995. Presented testimony addressing the acquisition of capacity resources, transportation balancing charges, performance-based incentive programs and lost-and-unaccounted-for and company-use gas on behalf of the Pennsylvania Office of Consumer Advocate.

UGI Utilities, Inc. – Gas Division (Pennsylvania Public Utility Commission Docket No. R-00953297), May 1995. Presented testimony addressing the allocation of purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

NorAm Gas Transmission Company (Federal Energy Regulatory Commission Docket No. RP94-343-000), March 1995. Presented testimony addressing rate design billing determinants and the treatment of revenues associated with short-term firm, interruptible and other services on behalf of the Staff of the Arkansas and Louisiana Public Service Commissions.

Trans Louisiana Gas Company (Louisiana Public Service Commission Docket No. U-19997), November 1994. Presented testimony addressing the results of a Commission-ordered investigation into the purchased gas adjustment clause on behalf of the Staff of the Louisiana Public Service Commission.

National Gas & Oil Corporation (Public Utilities Commission of Ohio Case No. 94-221-GA-GCR), October 1994. Co-authored report on audit of management and performance of gas procurement activity on behalf of the Public Utilities Commission of Ohio.

UGI Utilities, Inc. – Gas Division (Pennsylvania Public Utility Commission Docket No. R-00943064), July 1994. Presented testimony addressing the allocation of purchased gas costs and incentive rate mechanisms on behalf of the Pennsylvania Office of Consumer Advocate.

Citizens Gas & Coke Utility (Indiana Utility Regulatory Commission Cause No. 37399-GCA41), May 1994. Presented testimony addressing the allocation and recovery of FERC Order No. 636 transition costs on behalf of the Indiana Office of Utility Consumer Counselor.

Peoples Natural Gas Company (Pennsylvania Public Utility Commission Docket No. R-00943028), April 1994. Presented testimony addressing the allocation of purchased gas costs, FERC Order No. 636 transition costs, take-or-pay costs, incentive rate mechanisms and the projection of purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

National Fuel Gas Distribution Corporation (Pennsylvania Public Utility Commission Docket No. R-00932885), April 1994. Presented testimony addressing the allocation of purchased gas costs, FERC Order No. 636 transition costs, incentive rate mechanisms, and the projection of purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

UGI Utilities, Inc. – Gas Division (Pennsylvania Public Utility Commission Docket No. R-00932927), March 1994. Presented testimony addressing transportation service balancing requirement modifications and service enhancements in response to FERC Order No. 636 on behalf of the Pennsylvania Office of Consumer Advocate.

Ohio Gas Company (Public Utilities Commission of Ohio Case No. 93-14-GA-GCR), October 1993. Co-authored report on audit of management and performance of gas purchasing on behalf of the Public Utilities Commission of Ohio.

Sierra Pacific Power Company, Gas Operations (Public Utilities Commission of Nevada Docket No. 93-4087), September 1993. Presented testimony addressing the allocation of purchased gas costs to electric and gas operations on behalf of the Nevada Office of Consumer Advocate.

UGI Utilities, Inc. – Gas Division (Pennsylvania Public Utility Commission Docket No. R-00932674), July 1993. Presented testimony addressing the allocation of purchased gas costs, FERC Order No. 636 transition costs, and least-cost gas procurement on behalf of the Pennsylvania Office of Consumer Advocate.

National Fuel Gas Supply Corporation (Federal Energy Regulatory Commission Docket No. RP93-73-000), July 1993. Presented testimony addressing test year throughput and rate design on behalf of the Pennsylvania Office of Consumer Advocate.

National Fuel Gas Distribution Corporation (Pennsylvania Public Utility Commission Docket No. R-00932548), July 1993. Presented testimony addressing test year revenues and FERC Order No. 636 transition costs on behalf of the Pennsylvania Office of Consumer Advocate.

Dauphin Consolidated Water Supply Company and General Waterworks of Pennsylvania, Inc. (Pennsylvania Public Utility Commission Docket No. R-00932604), June 1993. Presented testimony addressing test year net operating income on behalf of the Pennsylvania Office of Consumer Advocate.

Peoples Natural Gas Company (Pennsylvania Public Utility Commission Docket No. R-00932598), May 1993. Presented testimony addressing the allocation of purchased gas costs, FERC Order No. 636 transition costs, and least-cost gas procurement on behalf of the Pennsylvania Office of Consumer Advocate.

Philadelphia Suburban Water Company (Pennsylvania Public Utility Commission Docket No. R-00922476), March 1993. Presented testimony addressing test year revenues and expenses on behalf of the Pennsylvania Office of Consumer Advocate.

National Fuel Gas Distribution Corporation (Pennsylvania Public Utility Commission Docket No. R-00922499), March 1993. Presented testimony addressing the allocation of purchased gas costs, FERC Order No. 636 transition costs, and the projection of purchased gas costs on behalf of the Pennsylvania Office of Consumer Advocate.

Columbia Gas of Ohio, Inc. (Public Utilities Commission of Ohio Case No. 92-18-GA-GCR), January 1993. Co-authored report on audit of management and performance of gas purchasing on behalf of the Public Utilities Commission of Ohio.

Dallas, Harvey's Lake, Noxen and Shavertown Water Companies (Pennsylvania Public Utility Commission Docket Nos. R-922326, R-922327, R-922328 and R-922329), September 1992. Presented testimony addressing rate base and net operating income issues on behalf of the Pennsylvania Office of Consumer Advocate.

Providence Water Supply Board (Rhode Island Public Utilities Commission Docket No. 2048), August 1992. Presented testimony sponsoring a class cost of service study, cash working capital, and revenues on behalf of the Rhode Island Division of Public Utilities and Carriers.

Peoples Natural Gas Company (Pennsylvania Public Utility Commission Docket Nos. R-00922180 and R-00922206), May 1992. Presented testimony sponsoring a revised forecast of purchased gas costs and least-cost gas procurement on behalf of the Pennsylvania Office of Consumer Advocate.

Equitable Gas Company, LLC and Jefferson Gas Company (Pennsylvania Public Utility Commission Docket No. R-00912164), April 1992. Presented testimony sponsoring a revised forecast of test year sales and revenues on behalf of the Pennsylvania Office of Consumer Advocate.

Louisiana Gas Service Company (Louisiana Public Service Commission Docket No. U-19237), December 1991. Presented testimony addressing rate base including cash working capital, cost allocation and rate design on behalf of the Staff of the Louisiana Public Service Commission.

Cincinnati Gas & Electric Company (Public Utilities Commission of Ohio Case No. 91-16-GA-GCR), October 1991. Co-authored report on audit of management and performance of gas purchasing on behalf of the Public Utilities Commission of Ohio. (Findings and recommendations were stipulated to without cross-examination.)

City of Great Falls Water Utility (Montana Public Service Commission Docket No. 90.10.67), March 1991. Presented a cost of service study on behalf of the U.S. Air Force.

City of Great Falls Wastewater Utility (Montana Public Service Commission Docket No. 90.10.66), March 1991. Presented a cost of service study on behalf of the U.S. Air Force.

Columbia Gas of Ohio, Inc. (Public Utilities Commission of Ohio Case No. 90-17-GA-GCR), November 1990. Co-authored report on audit of management and performance of gas purchasing on behalf of the Public Utilities Commission of Ohio. (Findings and recommendations were stipulated to without cross-examination.)

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)
to the Interrogatories of the Office of Consumer Advocate (“OCA”), Set II**

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-II-5 With respect to unmetered City of Pittsburgh properties:

- a. Please provide the most recent schedule (by year) for metering unmetered City properties; and
- b. Please provide the estimated annual water usage (by year) for the unmetered City properties.

Response:

- a. Currently there are 2 properties owned by the city which still require a meter. The PWSA is ordering the materials to complete these but lead time for materials is a standing issue.
- b. PWSA does not have an estimate for the annual water usage for the unmetered properties.

Response Provided by: William J. Pickering, Chief Executive Officer
Jennifer Presutti, Chief Operating Officer and Chief Financial Officer
The Pittsburgh Water and Sewer Authority

Colton Exhibits	90

1 **Q. PLEASE STATE YOUR NAME AND ADDRESS.**

2 A. My name is Roger D. Colton. My business address is 34 Warwick Road, Belmont, MA.

3 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT POSITION?**

4 A. I am owner of the firm of Fisher Sheehan & Colton, Public Finance and General
5 Economics of Belmont, Massachusetts. In that capacity, I provide technical assistance to
6 a variety of federal, state and municipal agencies, consumer organizations and public
7 utilities on rate and customer service issues involving water/sewer, natural gas and
8 electric utilities.

9 **Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?**

10 A. I am testifying on behalf of the Office of Consumer Advocate.

11 **Q. PLEASE DESCRIBE YOUR PROFESSIONAL BACKGROUND.**

12 A. I work primarily on low-income utility issues. This involves regulatory work on rate and
13 customer service issues, as well as research into low-income usage, payment patterns,
14 and affordability programs. At present, I am working on various projects in the states of
15 New Hampshire, Connecticut, Maryland, Pennsylvania, Ohio, Michigan, Wisconsin and
16 Illinois. My clients include state agencies (e.g., Pennsylvania Office of Consumer
17 Advocate, Maryland Office of People's Counsel, Connecticut Office of Consumers
18 Counsel), federal agencies (e.g., the U.S. Department of Health and Human Services),
19 community-based organizations (e.g., Cleveland Legal Aid Society, Legal Action of
20 Chicago, Sierra Club), and private utilities (e.g., Toledo Water). In addition to state-
21 specific and utility-specific work, I engage in national work throughout the United States.
22 For example, in 2020, I represented a coalition of major national consumer organizations

1 to comment on the Environmental Protection Agency’s proposed framework by which to
2 judge community financial capability. I recently completed a project with the Natural
3 Resources Defense Council to develop a tool by which to assess the financial impact of
4 differing types of low-income bill assistance. In 2020, I completed a study of water
5 affordability in twelve U.S. cities for the London-based newspaper, The Guardian. In
6 2021, I authored a Water Affordability Plan for the City of Toledo (OH) under contract
7 with the City. I continue to be of counsel to the National Coalition for Legislation on
8 Affordable Water (NCLA-Water). A brief description of my professional background is
9 provided in Exhibit RDC-1.

10 **Q. PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND.**

11 A. After receiving my undergraduate degree in 1975 (Iowa State University), I obtained
12 further training in both law and economics. I received my law degree in 1981 (University
13 of Florida). I received my Master’s Degree (Regulatory Economics) from the MacGregor
14 School in 1993.

15 **Q. HAVE YOU EVER PUBLISHED ON PUBLIC UTILITY REGULATORY ISSUES?**

16 A. Yes. I have published three books and more than 80 articles in scholarly and trade
17 journals, primarily on low-income utility and housing issues. I have published an equal
18 number of technical reports for various clients on energy, water, telecommunications and
19 other associated low-income utility issues. A summary of my publications is included in
20 Exhibit RDC-1.

1 **Q. HAVE YOU EVER TESTIFIED BEFORE THIS OR OTHER UTILITY**
2 **COMMISSIONS?**

3 A. Yes. I have testified before the Pennsylvania Public Utility Commission (“PUC” or
4 “Commission”) on numerous occasions regarding utility issues affecting low-income
5 customers and customer service. My testimony has specifically included testimony in
6 various proceedings involving low-income issues relating to Pennsylvania American
7 Water Company (PAWC), Pittsburgh Water and Sewer Authority (PWSA), and Aqua PA.
8 In addition to this PUC testimony, I have testified on issues related to customer service
9 and low-income bill affordability for the City of Philadelphia’s Public Advocate in each
10 rate case involving the Philadelphia Water Department since 1990. I have also testified in
11 regulatory proceedings in 43 states and various Canadian provinces on a wide range of
12 utility issues. A list of the jurisdictions in which I have testified is listed in Exhibit RDC-
13 1.

14 **Q. PLEASE EXPLAIN THE PURPOSE OF YOUR DIRECT TESTIMONY.**

15 A. The purpose of my Direct Testimony is to review the reasonableness of the design and
16 proposed implementation of the low-income bill payment assistance programs offered by
17 the Pittsburgh Water and Sewer Authority (PWSA). More specifically, I will examine the
18 reasonableness of PWSA’s proposed policies and design elements regarding:

- 19 ➤ The enrollment of customers into PWSA’s Bill Discount Program (BDP);
20 ➤ The design and structure of PWSA’s BDP;
21 ➤ The design and structure of PWD’s Arrearage Forgiveness Program (AFP);
22 ➤ The rate recovery of BDP/AFP costs; and

1 ➤ Certain customer service issues that disproportionately adversely affect low-
 2 income customers.

3 I finally review the consistency of my testimony with the testimony provided at the
 4 Public Input Hearings.

5 **Q. PLEASE SUMMARIZE THE RECOMMENDATIONS YOU MAKE FOR PWSA.**

6 A. Based on the data and discussion presented throughout my Direct Testimony, I
 7 recommend:

8 ➤ That PWSA be directed to engage in geo-targeted outreach. Such outreach
 9 should include outbound phone calling, outbound e-mails, and outbound
 10 mailings specifically directed toward geographic areas identified as having
 11 high concentrations of PWSA’s lowest income customers. In addition to this
 12 geo-targeted outbound outreach, PWSA should be directed to identify specific
 13 customers in these geo-targeted areas that exhibit payment difficulties that
 14 could reasonably be associated with an inability-to-pay.

15 ➤ That PWSA be directed to adopt a performance-based incentive program for
 16 community-based organizations to identify the lowest income customers and
 17 to facilitate the enrollment of such customers in the (BDP).

18 ➤ That PWSA be directed to contact the City of Pittsburgh to negotiate
 19 mechanisms through which it can cross-enroll customers through other
 20 municipal offices serving the City of Pittsburgh.

21 ➤ That PWSA be directed to submit to its Low Income Affordability Advisory
 22 Committee (LIAAC) the question of how enhanced technology could increase
 23 the enrollment and retention of low-income customers in BDP.

24 ➤ That PWSA’s proposal to expand the BDP maximum income eligibility to
 25 200% FPL be approved.

26 ➤ PWSA be directed to submit to its LIAAC the question of how to encourage
 27 low-income tenants to transfer service into their own name.

28 ➤ That PWSA be directed to adopt a modest increase in the monthly bills credits
 29 proposed by PWSA to achieve PWSA’s own-stated objective of “minimizing
 30 31 32 33 34

1 customer impacts as PWSA transitions away from rate structures that include
2 minimum allowances.”

- 3
- 4 ➤ That PWSA be directed to incorporate a new income tier into its BDP, with
5 this tier incorporating customers with income greater than 50% FPL and at or
6 below 100% FPL. I recommend further that a discount of 30% (rather than
7 the Tier 1 discount of 50%) be provided to this income tier.
- 8
- 9 ➤ That the volumetric discount for customers with annual income at or below
10 50% FPL be increased from 50% to 60%.
- 11
- 12 ➤ That PWSA be directed to automatically enroll any customer who newly
13 enrolls in the BDP into the Arrearage Forgiveness Program (AFP) as well. In
14 addition, I recommend that the PUC direct PWSA to retroactively enroll
15 customers who have previously enrolled in BDP, and who currently have
16 arrears, into AFP. Such enrollment of existing BDP participants with arrears
17 would subject the BDP participant arrears to the rules of the AFP for all
18 arrears on the account at the time of AFP enrollment.
- 19
- 20 ➤ That the PUC adopt the same policy for PWSA that it has adopted for the
21 arrearage forgiveness programs for the state’s natural gas and electricity
22 distribution companies. PWSA should *begin* by providing arrearage
23 forgiveness credits for each payment made in-full and on-time. *In addition*,
24 PWSA should provide retroactive credits for payments that fully pay a bill,
25 even if those payments are made after the bill payment “due date.”
- 26
- 27 ➤ That PWSA be directed to modify its AFP so that it reflects the policies that
28 the PUC has adopted with respect to arrearage forgiveness for Pennsylvania’s
29 electricity and natural gas distribution utilities. Rather than providing a flat
30 monthly \$30 credit, PWSA should structure its program so that it would
31 completely forgive an AFP participant’s pre-existing arrears over a 24-month
32 period at the rate of 1/24th of the pre-existing arrears for each full payment
33 received.
- 34
- 35 ➤ That Mr. Barca’s “benefit-cost analysis” presented in PWSA Exhibit EB-9 be
36 found to be fatally flawed and deemed an insufficient basis to determine the
37 costs and benefits of moving to alternative arrearage forgiveness procedures
38 as I have recommended in my testimony.
- 39

- That PWSA be directed to place a collection hold on all accounts for which bills and/or disconnection notices are returned Undeliverable as Addressed. Moreover, that PWSA be directed to adopt a procedure which would create an exception if multiple pieces of mail are returned as undeliverable within a certain time period for a customer service representative to follow up with the customer to update their contact information; enable reports on undeliverable mail; generate an email (if an email address is attached to the account), phone call or text to advise of undelivered mail and encourage the customer to log in online to verify and update their information or if they do not have an online account, ask that they contact the Customer Service Center. And, finally, that this same procedure be applied to notices regarding requirements to maintain participation in PWSA’s BDP and/or AFP (e.g., the need to periodically recertify).

Part 1. The Foundation for Offering Bill Assistance to PWSA Low-Income Customers.

Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR TESTIMONY?

A. In this section of my testimony, I consider the basis for offering low-income assistance to PWSA’s low-income customers. In Pennsylvania, the offer of low-income assistance is not an end unto itself, but rather a means to an end. That policy has been long-established for Pennsylvania’s natural gas and electric industries. Pennsylvania’s natural gas and electric distribution utilities operate what are known as “universal service programs.” The PUC’s Bureau of Consumer Services (BCS) explains “universal service programs” by noting that in the Electricity Generation Customer Choice and competition Act and the Natural Gas Choice and Competition Act:

the General Assembly wanted to ensure that electric and natural gas service remain universally available to all customers in the state. Consequently, both Acts contain provisions relating to universal electric and gas service, and require the Commission to maintain, at a minimum, the protections, policies and services that assist low-income customers with affording electric and gas service. The Acts also require the Commission to ensure that universal

1 service and energy conservation policies are appropriately funded and
2 available in each electric and natural gas distribution territory.¹

3 BCS goes on to explain the objective of universal service programs.

4 Universal Service is a collective name applied to the policies, protections and
5 services that help low-income customers maintain electric and natural gas
6 service and includes payment assistance programs, termination of service
7 protections, energy reduction programs and consumer education. The
8 Commission has made the Bureau of Consumer Services (BCS) responsible
9 for monitoring and evaluating public utilities' universal service programs.
10 The goal in monitoring these programs is to ensure they increase the
11 effectiveness of EDC and NGDC collections while protecting the public's
12 health and safety.²

13 While PWSA does not operate pursuant to the same statutory directive, that policy should
14 also be brought forward to Pennsylvania's water and wastewater utilities such as PWSA
15 as well. Based on this discussion, the question posed throughout my testimony below is
16 whether modifications to PWSA's BDP and AFP are needed in order to: (1) assist low-
17 income customers with affording service; (2) help low-income customers maintain
18 service; and (3) increase the effectiveness of PWSA collections. I conclude that such
19 modifications are needed in order to achieve these objectives.

20 **Q. PLEASE EXPLAIN WHY PAYING PARTICULAR ATTENTION TO THE**
21 **AFFORDABILITY OF PWSA SERVICE IS IMPORTANT IN THIS RATE**
22 **PROCEEDING.**

23 A. While Pennsylvania statutes do not impose the same universal service obligations on
24 PWSA that they impose on the state's energy utilities, low-income customers are the

¹ BCS (December 2022). Universal Service Programs and Collections Performance, 2021, at 1 (internal citations omitted). Available at: <https://www.puc.pa.gov/filing-resources/reports/universal-service-programs-and-collections-performance-reports/>

² Id., at 2 (internal citations omitted).

1 households who are financially least capable of responding to the harms arising from the
2 unaffordability of water service. This is important given that water service in today’s
3 world is an essential human need. Water is needed not only for drinking, but also for
4 cooking and sewer needs. A 2022 White Paper by the U.S. Water Alliance states that “for
5 every community in our country, the availability of safe drinking water and wastewater
6 services is a precondition for public health and prosperity.”³ Water is vital to maintaining
7 hygiene and health. The lack of water has particularly negative impacts on children, the
8 elderly, women, and persons suffering from an illness or chronic health concern. As one
9 recent study noted:

10 Dehydration can create threatening chemical imbalances for elderly people.
11 Women who are menstruating need water to properly cleanse themselves, and
12 mothers who are nursing need water to maintain their milk supply and their
13 health. Some people with chronic illness need clean water in order to run and
14 wash personal medical equipment.⁴

15 A recent study published in the American Journal of Preventative Medicine concluded
16 that “Water shutoffs pose a real threat to human health because the lack of adequate
17 sanitation can cause diseases to spread and allow people to become sick.”⁵ A 2010 report
18 for the Water Research Foundation (the research arm of the American Water Works

The Invisible Crisis: Water Unaffordability in the United States, at 11, Unitarian Universalist Service Committee, Cambridge: MA, available at <https://www.uusc.org/the-invisible-crisis/>; see also, Bipartisan Policy Center (September 2017). Safeguarding Water Affordability, at 7. Available at <https://bipartisanpolicy.org/report/safeguarding-water-affordability/>

⁵ Zhang et al (2021). Water Shutoff Moratoria Lowered COVID-19 Infection and Death Across U.S. States, 2021 American Journal of Preventative Medicine. Available at <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC8433038/>

1 Association, AWWA) concluded that “A final consideration of importance to water
 2 utilities is the relationship of payment problems to health issues. . . Potential impacts
 3 relate to many of the same public health endpoints targeted by Safe Drinking Water Act
 4 standards such as effects on children and the unborn.”⁶

5 The fundamental need for affordable water is recognized not only by laws relating to the
 6 protection of children, but also by laws relating to the habitability of homes. In 21 states,
 7 a parent’s inability to provide running water in the home can be considered “child
 8 neglect.”⁷ The lack of running water and sanitation is generally considered by public
 9 health inspectors to make a home uninhabitable.⁸

10 **Q. WHAT IS THE FIRST STEP IN REVIEWING THE DESIGN AND OPERATION**
 11 **OF PWSA’S LOW-INCOME PROGRAMS?**

12 A. The first step in reviewing the design and operation of PWSA’s low-income programs
 13 involves assessing the extent of PWSA’s low-income population. As a large urban area,
 14 PWSA’s service territory (the City of Pittsburgh) not surprisingly has a high percentage
 15 of low-income customers. PWSA estimates that it serves 25,793 customers with annual
 16 household income at or below 150% FPL. (OCA-III-13).⁹ Overall, PWSA’s estimate is

⁶ Cromwell, et al. (2010). Best Practices in Customer Payment Assistance Programs, at xxii, Water Research Foundation: Washington D.C. Available at <https://www.waterrf.org/research/projects/best-practices-customer-payment-assistance-programs>

⁷ Id., at 34.

⁸ Id., at 32 – 33.

⁹ This estimate provided by PWSA in OCA-III-13 is contrary to the response PWSA provided to Pittsburgh United, wherein it stated that “PWSA continues to operate under the assumption that there are approximately 20,000 customers eligible for its assistance programs per the Household Affordability Analysis released in December 2019.” (United I-7).

1 that 26% of its customer base is “low-income.” (25,793 low-income / 96,887 residential
2 customers = 0.255).¹⁰ This estimate is based on a reasonable methodology, which
3 multiplies the number of customers in each PWSA Census Tract times the percentage of
4 population that the Census Bureau’s 2021 American Community Survey (ACS) reports as
5 having income in that FPL tier.

6 Using the same methodology, PWSA estimates that it serves 34,198 customers with
7 income at or below 200% FPL. (OCA-III-13). For the reasons I discuss in more detail
8 below, I recommend approval of PWSA’s proposal to expand the maximum income
9 eligibility for its BDP and AFP to 200% FPL. .

10 **Q. DOES CONSIDERING SYSTEMWIDE POVERTY DATA PROVIDE ADEQUATE**
11 **INSIGHT INTO THE EXTENT OF POVERTY IN THE PWSA SERVICE**
12 **TERRITORY?**

13 A. No. As PWSA did in its 2019 affordability study, in order to obtain a more complete
14 insight into the problems of low-income customers in the PWSA service territory, it is
15 necessary to examine those instances of concentrated poverty as well. In 2019, PWSA
16 ranked 21 Census Tracts that had a high number of estimated “potential bill discount
17 customers.”¹¹ I examined those same Census Tracts using the 2021 Census data provided
18 by PWSA. These same 21 Census Tracts continued to have both a high *percentage* of
19 PWSA customers with income at or below 150% FPL and a high *number* (with the
20 exception of Census Tract 1304) of estimated customers with income at or below 150%

¹⁰ Id.

¹¹ Exh. JAQ-5, Raftelis 2019, at Table 8, page 24.

1 FPL. While the 21 Census Tracts represent 13% of PWSA's total number of Census
2 Tracts (n=157), they represent more than 28% of PWSA's estimated number of customers
3 with income at or below 150% FPL. Overall, of PWSA's 157 Census Tracts, 21 had
4 more than 50% of their respective populations living with income at or below 150%
5 FPL.¹²

6 **Q. HAVE YOU FOUND ANY TREND IN THE NUMBER OF LOW-INCOME**
7 **CUSTOMERS SERVED BY PWSA?**

8 A. Yes. There has been a sharp increase in the number of low-income customers served by
9 PWSA. In the low-income affordability analysis submitted to the PUC in its 2019 rate
10 case at Docket Nos. R-2018-3002645 (w) and R-2018-3002647 (ww) -, based on 2017
11 ACS data, PWSA estimated that it served 20,190 low-income customers.¹³ In the four
12 years between that estimate and the estimate presented in this rate case, in other words,
13 PWSA's estimate of the number of low-income customers has increased by 22% ($25,793$
14 $- 20,196 = 5,603 / 20,196 = 0.22$). PWSA did not previously submit an estimate of the
15 number of customers it serves with income below 200% FPL. Accordingly, I have no
16 basis upon which to ground any observation about the extent of the increase, if any in that
17 figure since 2017.

¹² 16 of those 21 Census Tracts overlapped with the 21 Census Tracts which PWSA had identified as areas with high numbers of potential BDP participants in 2019.

¹³Exh. JAQ-5, supra, at 23.

1 **Q. DO YOU FIND ANY RELATIONSHIP BETWEEN LOW-INCOME STATUS ON A**
2 **GEOGRAPHIC BASIS AND PAYMENT DIFFICULTIES?**

3 A. Yes. PWSA reports its collection data on a zip code basis rather than on a Census Tract
4 basis, so the comparison between PWSA's poverty data and collection data is not exact.
5 Nonetheless, it is possible to examine PWSA zip code data and to draw conclusions.
6 PWSA provided collection data for the zip codes which comprise its service territory.
7 (OCA-III-56, OCA-III-57). I examined data for the 14 zip codes served by PWSA that
8 had a penetration of customers with income at or below 150% FPL that was higher than
9 the average for the PWSA service territory as a whole. Those 14 low-income zip codes,
10 standing alone, had:

- 11 ➤ 58% of the number of PWSA accounts in arrears;
- 12 ➤ 72% of the dollars of arrears;
- 13 ➤ 65% of the PWSA nonpayment disconnections;
- 14 ➤ An average arrears 75% higher than the average arrears for the non-low-
15 income zip codes (\$521 for low-income zip code; \$298 for non-low-income
16 zip codes);
- 17 ➤ A rate of disconnections (i.e., disconnections per 100 accounts in arrears) 36%
18 higher than the rate of disconnections per 100 accounts in arrears for the non-
19 low-income zip codes;
- 20 ➤ A reconnection rate (reconnection after a nonpayment disconnection) for the
21 low-income zip codes 15% lower than the reconnection rate for the non-low-
22 income zip codes.

1 (OCA-III-57). I conclude that the low-income status of PWSA residential customers, and
2 payment difficulties experienced by low-income customers, are frequently closely related
3 in the PWSA service territory.

4 For purposes of my discussion below, the significance of this conclusion is that
5 developing an appropriately designed, targeted, and funded low-income assistance
6 program such as the Bill Discount Program (BDP) and/or Arrearage Forgiveness Program
7 (AFP) not only addresses the social problems faced by PWSA's low-income customers,
8 but also addresses the business problems faced by PWSA when it finds that it cannot
9 collect in a complete, regular, and timely fashion the bills which it renders to customers
10 who cannot afford to pay them.

11 **Part 2. Enrollment in PWSA's Bill Discount Program.**

12 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
13 **TESTIMONY.**

14 A. In this section of my testimony, I examine the adequacy of PWSA's efforts to enroll low-
15 income customers in its BDP. The efforts to enroll low-income customers in BDP
16 include not merely the actual enrollment, but include, also, the actions taken to identify
17 low-income customers who would benefit from enrollment. PWSA has available to it
18 specific actions available to it, that it does not take, that would improve the identification
19 and enrollment of low-income customers in the BDP.

1 **A. The Extent to which the BDP Adequately Serves its Lowest-Income Population.**

2 **Q. DOES PWSA ADEQUATELY SERVE ITS LOWEST INCOME CUSTOMER**
3 **POPULATION?**

4 A. No. PWSA estimates that it serves 8,260 customers in its service territory with income at
5 or below 50% FPL. (OCA-III-13). It further estimates that it serves 25,793 customers
6 with income at or below 150% FPL. (OCA-III-13). Accordingly, according to PWSA's
7 own estimates, nearly one-third of its low-income customers (32%) in fact live with
8 income in the lowest income bracket. Those customers are not served proportionately by
9 the Company's BDP. The Table below shows the percentage of BDP participants by FPL
10 range. Since May 2021, the percentage of BDP participants comprised of customers with
11 income at or below 50% FPL has only slightly exceeded 20%. Since September 2022,
12 the participation of customers in the lowest FPL tier (0% to 50% FPL) has remained
13 steady at 23%.

14 PWSA's failure to reach its lowest income population presents a substantive failure to
15 adequately pursue bill affordability within its service territory. By definition, PWSA
16 customers in the lowest FPL tier will have the highest bill burdens (i.e., bills as a
17 percentage of income). As these high burdens are experienced, customers in this lowest
18 FPL tier will experience the highest rate of unpaid bills, as well as the highest rate of both
19 disconnect notices and actual nonpayment disconnections. Moreover, customers in this
20 lowest FPL tier will make the greatest personal (and family) sacrifices in response to their
21 inability to pay. The research documenting these impacts has primarily, but not
22 exclusively, been performed in the energy industry.

Table 1. Number and Percent of BDP Participants by FPL Tier (OCA-III-1(a))			
Month	Number of BDP participants 50.1-150%	Number of BDP participants 0-50%	Pct BDP 0-50% FPL (Col. 2 / (Col 1 + Col 2))

Mar-2023	5,253	1,564	23%
Apr-2023	4,856	1,441	23%
May-2023	5,006	1,491	23%

- 1 The National Energy Assistance Directors Association (“NEADA”), for example,
- 2 periodically conducts a Congressionally-funded survey of low-income households who

1 receive benefits through LIHEAP. The most recent NEADA survey was published in
2 December 2018.¹⁴ NEADA provides three results that are important from the perspective
3 of how inability-to-pay and low-income status fit together. It is not merely the presence
4 of the sacrifices which low-income households make which is important for PWSA. It is
5 the extent to which the sacrifices expand in the lowest FPL tier which is important here.

6 First, not only do a significant number of low-income households skip paying, or pay less
7 than, their full home energy bill due to not having enough money for their energy bill, but
8 the percentage reporting to take such actions increases as incomes decline. Table 2
9 presents data which shows that one-in-nine LIHEAP recipients either skipped paying
10 their home energy bills every month, or paid less than their full bill. Nearly three times
11 as many LIHEAP recipients with income *less than* 50% of Poverty, and 1.5 times as
12 many recipients with income between 51 and 100% of Poverty, did so than did LIHEAP
13 recipients with income *greater than* 150% of Poverty. Fewer than half of LIHEAP
14 recipients said that they “never” skipped paying a bill, or paid less than their full bill.
15 While roughly three-in-five (57%) recipients with income *greater than* 150% of Poverty
16 reported never missing a payment, or paying less than their full payment, only two-in-
17 five (40%) recipients with income below 50% of Poverty reported never skipping a
18 payment.

¹⁴ NEADA (December 2018). 2018 National Energy Assistance Survey, Final Report, available at <http://www.appriseinc.org/resource-library/selected-reports/energy-survey-research-and-policy-analysis/>.

	Total	Poverty Level			
		0 - 50%	51 – 100%	101 – 150%	>150%
Almost every month	11%	17%	9%	11%	6%
Some Months	21%	34%	17%	20%	15%
1 or 2 Months	17%	8%	24%	12%	20%
Never / No	49%	40%	47%	56%	57%
Don't Know/Refused	2%	2%	3%	1%	2%

1 Second, one impact of skipping payments, or making less than full payments, is that
 2 LIHEAP recipients also report having received shutoff notices. The data is set forth in
 3 Table 3. Fewer than half reported having “never” received a shutoff notice, while nearly
 4 one-third report having received a shutoff notice either “almost every month” (11%) or
 5 “some months” (21%). Again, there is a noticeable difference between households at the
 6 lowest income levels and households at the highest income level. While more than one-
 7 quarter (27%) of LIHEAP recipients with income less than 50% of Poverty report having
 8 received a disconnect notice either “almost every month” (10%) or “some months”
 9 (17%), only 4% of households with income *greater than* 150% of Poverty reported
 10 receiving disconnect notices that frequently (0% almost every month; 4% some months).
 11 More than four-fifths (84%) of LIHEAP recipients with income greater than 150% of
 12 Poverty report never having received a shutoff notice, while only one-half (50%) of
 13 LIHEAP recipients with income less than 50% of Poverty did so.

Table 3. Received Notice or Threat to Disconnect or Discontinue Electricity or Home Heating Fuel Due to Not Having Enough Money for the Energy Bill During the Past Year
2018 NEA Survey Final Report (at 26 – 27)

	Total	Poverty Level			
		0 - 50%	51 – 100%	101 – 150%	>150%
Almost every month	4%	10%	3%	4%	0%
Some Months	13%	17%	15%	9%	4%
1 or 2 Months	17%	20%	18%	15%	12%
Never / No	64%	50%	62%	70%	84%
Don't Know/Refused	2%	4%	2%	2%	0%

1 Third, the NEADA survey of LIHEAP recipients reports that nearly one-in-six (15%)
 2 recipients experienced either an electricity shutoff or a natural gas shutoff due to
 3 nonpayment during the past year. When utility fuels are examined individually, the
 4 NEADA data shows that 13% of all LIHEAP recipients had their electricity disconnected
 5 for nonpayment, and 7% of LIHEAP recipients had their natural gas service disconnected
 6 for nonpayment. The data is presented in Table 4. The lowest income recipients had
 7 service disconnected far more frequently than did higher income recipients—five times
 8 more frequently for electricity (24% vs. 5%), and nearly six times more frequently for
 9 natural gas (12% vs. 2%).

	Total	Poverty Level			
		0 - 50%	51 – 100%	101 – 150%	>150%
Electricity	13%	24%	12%	9%	5%
Gas	7%	12%	6%	8%	2%
Electricity or Gas	15%	26%	14%	13%	7%

1 Based on the data and discussion above, two conclusions have been convincingly
 2 established. First, substantial numbers of low-income households either skip payments or
 3 make less than their full utility bill in any given month because they lack the household
 4 resources to make such payments. Second, as a result of these actions, utilities respond by
 5 engaging in collection activity that frequently leads to the threatened or actual
 6 disconnection of service. The failure to pay, and the utility collection activity which
 7 results from that failure to pay, is clearly related to low-income status. Problems are
 8 more prevalent in the lowest income tier of poverty (0 – 50%).

9 While the discussion above refers to data developed in the energy industry, those same
 10 results would appertain in the water industry as well. A recent statewide study of water
 11 affordability in the State of Michigan, for example, reported:

12 During interviews, we heard stories of people juggling and often skipping or
 13 making risky trade-offs of key expenses such as medicines, electricity, water,
 14 and taxes in order to provide for their families when their income is limited.
 15 Associated late payment penalties with most of these expenses only make the
 16 problem worse. When individuals prioritize the water bill, it is often at the
 17 expense of necessary medication or healthy food choices. Over time, the
 18 mental health impact from the stress and shame of struggling to support a
 19 family accumulates and impacts capacity to work and support the household.
 20 The impact of making hard decisions every month becomes a severe mental

1 health challenge that requires resolution beyond merely examining the
 2 household budget.¹⁵

3 These are the same results that have been reported above with respect to home energy.

4 **Q. HAS THE COMMISSION PREVIOUSLY EXPRESSED ANY PARTICULAR**
 5 **CONCERN ABOUT PROVIDING ADEQUATE OUTREACH TO THE**
 6 **POPULATION OF UTILITY CUSTOMERS WITH INCOME BELOW 50% FPL?**

7 A. Yes. The PUC has expressed its concern with respect to outreach for the low-income
 8 Customer Assistance Programs (CAPs) for electric and natural gas utilities. According to
 9 the Commission, utilities should take particular efforts to engage in adequate outreach to
 10 enroll their lowest income customers into their bill discount programs. In its Final Order
 11 adopting the Revised CAP Policy Statement in 2019 (for energy utilities), the PUC stated
 12 quite explicitly that:

13 While utilities have flexibility as to the contents of their plans, the plans
 14 should reflect focused consumer education and outreach efforts, tailored to
 15 the demographics of their individual service territories, spanning the duration
 16 of the universal service plan period. *In particular, these plans should identify*
 17 *efforts to educate and enroll eligible and interested customers at or below*
 18 *50% of the FPIG.*¹⁶

19 While the CAP Policy Statement addresses electric and natural gas utilities, there is no
 20 reason to believe the Commission would have less concern for these extreme poverty
 21 customers in the water and wastewater industries.

22

¹⁶ Final Order, at 79, Docket No. M-2019-3012599 (emphasis added).

B. Recommended Steps to Address Lagging Enrollment.**Q. WHAT DO YOU RECOMMEND?**

A. PWSA should be commended for the extent to which it uses its Low-Income Assistance Advisory Committee (LIAAC). (PWSA St. 6, at 35 – 36). According to PWSA witness Mechling, since March 2019, PWSA has held 18 meetings of its LIAAC. (PWSA St. 6, at 35). One impact of that collaboration has been to increase *total* BDP enrollment by more than 20%. (Id., at 36). Despite this overall success, however, enrollment by PWSA’s lowest income customers continues to lag. Fewer than one-in-four of all BDP participants have income at or below 50% FPL, even though one-in-three of all PWSA customers with income at or below 150% FPL in fact have income below 50% FPL.

PWSA should be directed to engage in the following specific outreach strategies directed toward its lowest income customers. First, PWSA should be directed to engage in geo-targeted outreach. Such outreach should include outbound phone calling, outbound e-mails, and outbound mailings specifically directed toward geographic areas identified as having high concentrations of PWSA’s lowest income customers. In addition to this geo-targeted outbound outreach, PWSA should be directed to identify specific customers in these geo-targeted areas that exhibit payment difficulties that could reasonably be associated with an inability-to-pay. These payment difficulties might include large arrearages, older arrearages, nonpayment disconnections, and deferred payment arrangements that result in defaults. This geo-targeted outbound outreach should include individualized messaging rather than generic messaging through platforms such as media and social-media.

1 Second, PWSA should be directed to adopt a performance-based incentive program for
2 community-based organizations to identify the lowest income customers and to facilitate
3 the enrollment of such customers in the BDP. In Connecticut, for example, the state’s
4 electric utilities pay Community Action Agencies (CAA) for each low-income customer
5 the CAA identifies and enrolls in one of the state’s low-income programs. PWSA should
6 take advantage of the grassroots connections which community organizations have with
7 their respective constituencies. One of the fundamental lessons learned through outreach
8 for Affordable Care Act (ACA) enrollment was that the most effective outreach was that
9 which involved grassroots “trusted messengers” taking steps to reach their constituencies
10 where they “live, work, play and pray.” As I discuss in more detail below, the benefits of
11 grassroots outreach was discussed numerous times in the Public Input Hearings.

12 Third, while PWSA has spoken of its efforts to cross-enroll customers through the
13 corresponding CAPs operated by the natural gas and electric utilities serving the PWSA
14 service territory, PWSA has lagged in its efforts to cross-enroll customers through other
15 municipal offices serving the City of Pittsburgh. In this regard, lessons can be learned
16 from other municipal water utilities in Pennsylvania. For example, PWSA might take
17 actions akin to the Philadelphia Water Department’s use of data from the Philadelphia
18 Department of Revenue (DOR). DOR administers Philadelphia’s Owner-Occupied
19 Payment Arrangement (OOPA) program for past-due property tax bills. In administering
20 OOPA, DOR collects both household income and household size in order to administer
21 the OOPA “tiers.”¹⁷ In 2020, DOR reported that it entered into OOPA agreements with

¹⁷ 2020 Annual Report on Owner-Occupied Payment Agreement (OOPA), at 4, available at <https://www.phila.gov/media/20210806140957/Owner-Occupied-Payment-Agreement-report-OOPA-2020.pdf>

1 8,260 “Tier 4” households (income at or below 30% of the Area Median Income) and
2 1,736 “Tier 5” households (income at or below 15% of Area Median Income. These two
3 OOPA tiers would income-qualify customers for a program with maximum income
4 eligibility at or below 150% FPL. The City of Pittsburgh has similar programs. For
5 example, the City reports that it operates a Senior Citizen Tax Relief program. This
6 program is directed toward qualified senior citizen homeowners and provides a flat 30%
7 discount on the real estate tax on their primary residence. In addition to being age-
8 qualified, a homeowner must have gross household income of less than \$30,000 per year.
9 Determining whether Pittsburgh has additional programs *identical* to those that are found
10 in Philadelphia is not the point here. The point is that as a publicly-owned water
11 authority, PWSA can, and should, take advantage of its association with municipal
12 government. I recommend that PWSA work with the City of Pittsburgh to identify and
13 utilize those municipal programs that would assist PWSA in identifying its lowest income
14 customers and enrolling those customers in its BDP.

15 Fourth, PWSA should be directed to submit to its LIAAC the question of how enhanced
16 technology could increase the enrollment and retention of low-income customers in BDP.
17 For example, PWSA reports that it “does not currently offer a text-based process for
18 customer assistance program applications or recertifications.” (OCA-III-24). The use of a
19 “text-based process” for the enrollment process, including the submission of documents,
20 has been found to address barriers to enrollment in the Medicaid program. Barriers that
21 are addressed include, but are not necessarily limited to:

- Clients that do not provide required verification documents with their
application must then send them through the mail. Frequently, applications

1 are thus denied because documents are never submitted or are lost.
2 Underlying issues include clients who don't know what documents are
3 required, clients who cannot electronically submit documents (or must have
4 access to a scanner to do so), and agencies that have a backlog in processing
5 mailed applications.

- 6 ➤ Agencies that have a low rate of completion at renewal because clients fail to
7 complete the renewal form properly or fail to submit the form, the result being
8 that their benefits are terminated (and they must reapply to have benefits
9 reinstated).

10 A recent publication by the Center on Budget and Policy Priorities (CBPP) identified
11 technological tools that help to address these challenges. I have attached this publication,
12 “Improving Customer Service in Health and Human Services through Technology,” to
13 this testimony as Exhibit RDC-2. According to the CBPP publication:

14 Improving client-facing processes – systems that applicants and recipients
15 use directly for actions like applying, submitting documents, or getting
16 information about their case – allow clients to better obtain information
17 and receive benefits more quickly. They also help agencies get the
18 information they need to conduct eligibility determinations and improve
19 performance and outcomes.

20 (Improving Customer Service, Exhibit RDC-2, at 1). The publication “outlines common
21 challenges agencies face while administering these benefits and gives examples of how
22 the technologies profiled. . .can streamline processes.” CBPP notes that “the technologies
23 discussed here are not theoretical; rather they are applicable to real-world issues clients
24 and agencies face each day.” (Id.). It provides best practices in using web-based tools,
25 mobile-based technology, and call center tools. (Id.)

26 Existing application portals could perhaps be enhanced. For example, PWSA reports that
27 customers may enroll in BDP, including the submission of documents (unlike its text-
28 based communications), through a PWSA on-line portal. (OCA-III-26). Indeed, through

1 May 2023, 308 of PWSA's 1,265 BDP enrollments and recertifications in 2023 used the
2 on-line portal. (OCA-III-27). One recent technology enhancement to web-based tools
3 that would enhance this ability even further includes providing opportunities for
4 customers to partially complete a form, and then "saving" it, thus allowing the user to
5 complete the form, including the submission of documents, at a later date. Another
6 enhancement is to provide pre-completed forms to users needed to re-certify (or re-enroll)
7 with the need of the customer simply to change that information which is no longer
8 correct.

9 For each of the actions recommended above, PWSA should maintain detailed outcomes
10 records that it should present for review by its LIAAC. The outreach reporting should
11 include data not merely on what PWSA is *doing* with respect to these two recommended
12 outreach strategies, but what PWSA has *achieved* in improving the identification of
13 PWSA's lowest income customers and the enrollment of such customers in BDP and AFP.
14 For example, while PWSA states that customers may use e-mail to enroll in BDP (OCA-
15 III-25), in 2022, of its 2,482 BDP enrollments and recertifications, only nine (9) occurred
16 through e-mail. (OCA-III-27). In 2023, PWSA stopped tracking BDP enrollments
17 received through e-mail. (OCA-III-27).

1 **Part 3. The Design of PWSA’s Bill Discount Program.**

2 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
3 **TESTIMONY.**

4 A. In this section of my testimony, I will examine the design and operation of PWSA’s Bill
5 Discount Program to determine whether it is reasonably serving the function of providing
6 affordable service to low-income PWSA customers. I first consider PWSA’s
7 recommendation to expand its low-income discount to customers with income greater
8 than 150% FPL but at or below 200% FPL. I next examine whether BDP might improve
9 the extent to which the BDP serves low-income tenants. I finally examine PWSA’s
10 recommended expansion of BDP credits to offset the impact of PWSA’s proposed
11 elimination of its minimum charge.

12 **A. Expanding BDP Eligibility to 200% of FPL.**

13 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
14 **TESTIMONY.**

15 A. In this section of my testimony, I review the reasonableness of PWSA’s proposal to
16 expand the maximum income eligibility for its BDP from 150% FPL to 200% FPL.
17 (PWSA St. 6, at 37). PWSA does not propose to create an additional tier for customers at
18 150% to 200% FPL. Instead, it proposes simply to expand its second tier to cover the
19 entire population between 50% FPL and 200% FPL. I recommend that the expansion of
20 income eligibility be approved.¹⁸

¹⁸ I explain elsewhere my recommendation for a new BDP Tier to service customers with income at more than 50% FPL but at or below 100% FPL.

1 My discussion above focuses the affordability discussion exclusively on the *level* of
2 income (e.g., whether someone has an annual income between 50% and 100% of FPL or
3 between 100% and 150% of Poverty). This focus on the level of income is driven by my
4 focus above on water/wastewater burdens (i.e., bills as a percentage of income) as the
5 means by which to measure affordability.

6 One attribute of the income of households considered to be “low-income,” however, is
7 not merely the *level* of income, but is also what is known as the *fragility* of income.

8 Low-income workers can have their ability to pay utility bills threatened due to
9 unavoidable disruptions in their economic lives. A personal illness requiring time off or
10 the illness of a child requiring time off generally represents a permanent loss of income.

11 The jobs of low-wage workers simply do not provide the paid leave required to respond
12 to such circumstances.¹⁹ The Chart below, for example, shows the percentage of workers
13 with paid sick leave by wage level as reported by the U.S. Census Bureau.

¹⁹ Claxton and Levitt, Paid Sick Leave is Much Less Common for Lower-Wage Workers in Private Industry, Kaiser Family Foundation (Mar. 2020), <https://www.kff.org/coronavirus-covid-19/issue-brief/paid-sick-leave-is-much-less-common-for-lower-wage-workers-in-private-industry/>.

Figure 1

Share of Private Industry Workers with Paid Sick Leave, by Wage Level, 2019

Source: Bureau of Labor Statistics. Employee Benefits in the United States, March 2019.
<https://www.bls.gov/nchs/ebs/benefits/2019/ownership/private/table31a.pdf>

1

2

The vulnerabilities faced by low wage workers to economic disruptions due to the lack of

3

paid leave have been well-documented.²⁰ The difference is particularly evident for

4

women. The Kaiser Family Foundation reports that “across the board, low-income

5

women and those with part-time employment are less likely to be offered any of these

6

benefits compared to their higher income and full-time counterparts.”²¹ The KFF data is

²⁰ *Id.* (“Among the 25% of private industry occupations with the lowest wages (\$13.25 per hour or less) 47% have access to paid sick leave; for the 10% of private industry occupations with the lowest wages (\$10.48 per hour or less), the percentage with access to paid sick leave falls to 30%. Workers in higher-wage occupations are much more likely to have access to this benefit. For example, 77% of private industry workers with occupations in the second wage quartile (\$13.25 to \$19.00 per hour) have access to paid sick leave, with the percentage rising up to 90% of private industry workers with occupations in the top wage quartile.”) See also Usha Ranji, et al., *Coronavirus Puts A Spotlight On Paid Leave Policies*, Kaiser Family Foundation (Dec. 14, 2020), <https://www.kff.org/coronavirus-covid-19/issue-brief/coronavirus-puts-a-spotlight-on-paid-leave-policies/>; Chantel Boyens, et al., *Access to Paid Leave is Lowest Among Workers With the Greatest Needs*, Urban Inst. (July 2022), <https://www.urban.org/sites/default/files/2022-07/Access%20to%20Paid%20Leave%20Is%20Lowest%20among%20Workers%20with%20the%20Greatest%20Needs.pdf>.

²¹ Usha Ranji, et al., *Difficulty Tradeoffs: Key Findings on Workplace Benefits and Family Health Care Responsibilities from the 2020 KFF Women’s Health Survey*, Kaiser Family Foundation (Apr. 21, 2021),

1 set forth in the Table below. KFF reports that “low-income mothers who must miss work
 2 when their child is sick are far more likely to lose pay (75%) compared to higher income
 3 mothers (33%).”

Table 5. Working Women who are low-income or in part-time jobs are less likely to be offered employer benefits such as paid sick leave and parental leave				
	Paid Vacation	Paid Sick Leave	Paid Parental Leave	Paid Family and Medical Leave
Income				
<200% FPL	51%	46%	27%	28%
=>200% FPL	74%	73%	48%	45%
Work Status				
Part-time	37%	35%	20%	19%
Full-time	78%	75%	50%	48%

4 It is not, however, simply the lack of paid leave that presents situations leading to a
 5 potential inability to pay utility bills at a particular time. It is the lack of flexible work
 6 arrangements as well. One study reports that:

7 many lower-wage workers are caring for multiple children, generally in
 8 homes where both parents are working or in single parent homes. Many also
 9 are providing care to elderly relatives or other family members with
 10 significant health conditions. Yet others have acute or chronic medical
 11 conditions themselves that often require medical treatment or time away from
 12 work. Thus, like higher-wage workers, many lower-wage workers need
 13 flexible scheduling, alternative start and end times, compressed workweeks,
 14 and the ability to work some hours at home (providing the job can be done at
 15 home).”²²

<https://www.kff.org/womens-health-policy/issue-brief/difficult-tradeoffs-key-findings-on-workplace-benefits-and-family-health-care-responsibilities-from-the-2020-kff-womens-health-survey/>.

²² Anna Danziger and Shelley Waters Boots, Urban Inst., Georgetown University Law Center, *Lower-Wage Workers and Flexible Work Arrangements*, at 3 (2008). Available at <https://scholarship.law.georgetown.edu/legal/5/>

1 Nonetheless, “lower wage and lower-income workers have fewer options and less access
2 to flexible work arrangements than higher-wage and higher-income workers.”²³

3 The point where the vulnerability to these income disruptions may routinely occur can be
4 set at what is known as the Self-Sufficiency Standard, or, the “income working families
5 need to meet their basic necessities without public or private assistance.”²⁴ In
6 Pennsylvania, the Self-Sufficiency Standard generally falls between 200% and 300% of
7 FPL.²⁵ While households at this income range may not always require a discount to
8 reduce their bills to an affordable burden as a percentage of income, a minimum level of
9 assistance *is* appropriate to reflect the affordability needs of these households as reflected
10 in their income fragility.

11 **Q. HAVE YOU HAD AN OPPORTUNITY TO EXAMINE THE DIFFICULTY**
12 **WHICH HOUSEHOLDS HAVE IN PAYING THEIR BILLS?**

13 A. Yes. The U.S. Census Bureau continues to undertake its “PULSE Survey” on a periodic
14 basis. While it does not report data for the City of Pittsburgh in particular, it does report
15 data for the State of Pennsylvania. As of the date of this testimony, the most recent
16 PULSE Survey data is for the period June 28 through July 10, 2023.²⁶ The PULSE
17 Survey results for Pennsylvania show that a substantial number of Pennsylvania residents
18 continue to report difficulties in paying their “usual household expenses” within “the last

²³ *Id.*

²⁴ Center for Women’s Welfare, Univ. of Washington, “Overview”, <https://selfsufficiencystandard.org/the-standard/overview/>.

²⁵ Center for Women’s Welfare, Univ. of Washington, “Pennsylvania”, <https://selfsufficiencystandard.org/Pennsylvania/>.

²⁶ <https://www.census.gov/data/tables/2023/demo/hhp/hhp59.html>

1 seven days.” The data shows that even for households with income of up to \$50,000,
 2 45% report having had either a “somewhat difficult” or a “very difficult” time in paying
 3 for their usual household expenses in the last seven days (as of early July 2023).

4 The Pennsylvania PULSE Survey results report that it was not until incomes exceeded
 5 \$50,000 did the percentage of households reporting that they found it “not at all difficult”
 6 to pay for their usual household expenses exceed the percentage of households reporting
 7 that they found it “very difficult” to do so. It was not until annual income exceeded
 8 \$75,000 that the percentage of households reporting that it was “not at all difficult” to pay
 9 for their usual household expenses was three or more times higher than the percentage
 10 reporting that they found it “very difficult.”

U.S. Census PULSE Survey (June 28 – July 10, 2023) (Pennsylvania) Difficulty paying for usual household expenses in the last 7 days				
Household Income	Not at all difficult	A little difficult	Somewhat difficult	Very difficult
Less than \$25,000	9%	19%	26%	46%
\$25,000 - \$34,999	23%	26%	15%	36%
\$35,000 - \$49,999	18%	37%	23%	22%
\$50,000 - \$74,999	26%	31%	23%	20%
\$75,000 - \$99,999	32%	32%	26%	10%
\$100,000 - \$149,999	40%	34%	12%	15%
\$150,000 - \$199,999	66%	23%	5%	5%
\$200,000 and above	78%	17%	3%	2%

11 This PULSE Survey data supports the need to provide additional assistance to households
 12 with income up to 200% FPL. In 2023, 200% of FPL was: (1) \$29,160 for a 1-person

1 household; (2) \$37,440 for a 2-person household; and (3) \$49,720 for a 3-person
2 household. In Pittsburgh, 89% of all households have three or fewer persons.²⁷

3 **Q. WHAT DO YOU CONCLUDE?**

4 A. Based on the data and discussion above, I find that it is reasonable and appropriate to
5 expand the BDP maximum income eligibility to 200% FPL.

6 **Q. PLEASE EXPLAIN WHY YOU APPROVE OF EXPANDING THE DEFINITION**
7 **OF “LOW-INCOME” TO 200% FPL WHEN THE PUC HAS PREVIOUSLY**
8 **DEFINED “LOW-INCOME” AT A LOWER FPL RANGE?**

9 A. The Commission need not change or expand its definition of “low-income” in order to
10 approve PWSA’s proposal to expand its BDP to customers with income up to 200% FPL.
11 Notwithstanding the definition of “low-income” set forth in its regulations, the
12 Commission has allowed expanded services to somewhat higher incomes in other
13 circumstances. The question for the Commission is whether PWSA has customers who,
14 in the absence of assistance, will be at risk despite having income moderately in excess of
15 the definition of “low-income.” I explain in detail why PWSA is correct in identifying
16 customers with income in the range of 150% to 200% FPL who will be at risk and thus
17 need assistance. The Commission need not create a label for those customers in order to
18 conclude, as I have, that it is reasonable for PWSA to extend its BDP to customers falling
19 in this somewhat expanded income range.

²⁷ American Community Survey, Table B08202. In 2021, out of a total of 136,747 households, 57,752 had one-person; 47,320 had 2-persons; 16,035 had three-persons; and 15,590 had four or more persons.

1 **B. The Extent to which BDP Adequately Serves Tenants.**

2 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
3 **TESTIMONY.**

4 A. In this section of my testimony, I examine the extent to which PWSA has adequately
5 extended its low-income BDP to low-income tenants in its service territory. As I discuss
6 in more detail below, PWSA’s BDP underserves its tenant population. While 67% of all
7 Pittsburgh residents with income less than \$20,000 are tenants, 72% of all households
8 with annual income less than \$35,000 are. Despite the prevalence of tenant status
9 amongst the households in these low-income tiers, PWSA serves very few low-income
10 tenants as evidenced by its BDP. According to PWSA, as of May 2023, only 27% of its
11 BDP population were tenant customers. (OCA-III-8).

12 **Q. WHAT IS YOUR CONCERN ABOUT THE AFFORDABILITY OF WATER TO**
13 **NON-CUSTOMER TENANTS?**

14 A. Water costs contribute substantially to the overall rent burden of tenants in Pittsburgh. As
15 with utility costs, the affordability of overall rent burdens is measured by reference to
16 rents as a percentage of income. If households have a rent burden exceeding 30% of
17 income, they are considered to be over-burdened.²⁸ If they have a rent burden exceeding
18 50% of income, they are considered to be “severely” over-burdened.²⁹ For purposes of
19 calculating “rent burdens,” the “rent” is defined to include not merely the dollars paid to

²⁸ HUD User, Rental Burdens: Rethinking Affordability Measures, available at https://www.huduser.gov/portal/pdredge/pdr_edge_featd_article_092214.html

²⁹ Id.

1 the property owner,³⁰ but all other shelter costs as well. These include contract rents,
 2 insurance, and all utilities.³¹ Whether as a direct bill from PWSA or as a cost included in
 3 rent, water costs charged for the consumption of tenants will be reflected in the rent
 4 burdens which Pittsburgh tenants are forced to shoulder.

5 The U.S. Census Bureau’s American Community Survey (5-year data) reports data on
 6 rental burdens by income for the City of Pittsburgh.³² According to the ACS, Pittsburgh
 7 has:

- 8 ➤ 10,785 housing units occupied by tenants with income of \$10,000 or less. Of
 9 those, 66% have rent burdens of 30% or more, while 59% have rent burdens
 10 of 50% or more.
- 11 ➤ 11,151 housing units occupied by tenants with income of between \$10,000
 12 and \$20,000. Of those, 78% have rent burdens of 30% or more, while 57%
 13 have rent burdens of 50% or more.
- 14 ➤ 12,293 housing units occupied by tenants with income of between \$20,000
 15 and \$35,000. Of those, 72% have rent burdens of 30% or more, while 26%
 16 have burdens of 50% or more.

17 It is not until tenant income falls into the range of \$35,000 to \$50,000 that the percentage
 18 of “severely burdened” tenants falls substantially (to only 7% of the 8,552 tenants with
 19 income in this range).

20 BDP is not available to tenants that are not direct customers of PWSA. Property owners
 21 who do not live in the property served by PWSA do not qualify for PWSA’s BDP. In
 22 addition, a tenant “must be listed on the account or submit an Application for Service –

³⁰ The dollars paid to the property owner are known by a term-of-art, called “contract rents.”

³¹ Telephone and internet service are not considered to be “utilities.”

³² U.S. Census Bureau, American Community Survey (5-year data), Table B25074).

1 Tenants to meet one of the eligibility criteria.” (OCA-III-37). Even if a tenant is low-
 2 income, in other words, unless the PWSA service is in the tenant’s own name, the usage
 3 will be charged at standard residential rates. The PWSA bill will thus contribute to the
 4 overwhelming number of tenants “severely burdened” by their total shelter costs.

5 **Q. WHAT IS THE RELATIONSHIP BETWEEN INCOME AND TENANT STATUS**
 6 **IN PITTSBURGH?**

7 A. Tenant households in Pittsburgh are disproportionately low-income. In the City as a
 8 whole, while 32.2% of tenants have annual income less than \$20,000, only 12.0% of
 9 homeowners do. Looked at a different way, fully two-of-three households with income
 10 less than \$20,000 in Pittsburgh (66.8%) are tenants (22,563 of 33,752). Similarly, 71.6%
 11 of all households with annual income less than \$35,000 are tenants.

12 Despite the prevalence of tenant status amongst the households in these low-income tiers,
 13 PWSA serves very few low-income tenants as evidenced by its BDP. According to
 14 PWSA, as of May 2023, 4,644 of its BDP participants were homeowners, while only
 15 1,727 (27%) were tenants ($1,727 / (1,727 + 4,644) = 0.271$). (OCA-III-8).³³ The lack of
 16 tenant BDP participants is likely largely due to the fact that low-income households are

³³ PWSA does not seek to explain the discrepancy between the data provided in response to OCA-III-8 and the data provided in response to OCA-III-36. The data requested in OCA-III-8 was for a disaggregation of BDP participants by homeowner and tenant status for the most recent month. The data requested in OCA-III-36 was for a disaggregation of BDP participants by homeowner and tenant status by month for the most recent 24 months available. The most recent data provided in response to OCA-III-36 reports that there were 201 homeowners and 136 tenants in May 2023. Assuming that this is a reference to new BDP enrollees, not participants, which it appears to be, the sum of new enrollees for the 24 months of data provided indicates that there were 4,013 homeowner enrollees and 1,900 tenant enrollees. The similarity in numbers (4,013 vs. 4,644 homeowners; 1,727 vs. 1,900 tenants) leads me to conclude that the data provided in response to OCA-III-38 is what I concluded it was. While the data is similar, however, it is not identical.

1 tenants paying for water service through their rent rather than having a direct customer
2 relationship with PWSA.

3 **Q. DO YOU RECOMMEND THAT PWSA OFFER AN “AFFORDABILITY**
4 **PROGRAM” TO TENANTS WHO ARE NOT DIRECT CUSTOMERS OF PWSA?**

5 A. I do not recommend at this time that PWSA offer an affordability program to non-
6 customer tenants of PWSA. I do recommend, however, that PWSA submit to its Low-
7 Income Affordability Advisory Committee (LIAAC) the question of how to encourage
8 low-income tenants to move service into their own name.³⁴ By doing so, income-
9 qualified tenants will be able to receive the benefits of the discounts offered through
10 PWSA’s BDP, along with the forgiveness of all arrears currently existing on the account
11 for the premises occupied by the tenant. I recommend that PWSA submit regular reports
12 to its LIAAC on tenant participation in both BDP and AFP.

13 **C. Additional Credits to Offset Elimination of Minimum Charge.**

14 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
15 **TESTIMONY.**

16 A. In this section of my testimony, I review the reasonableness of the credits which PWSA
17 proposes to provide to BDP customers to offset the impacts of eliminating its rate
18 structure that includes a minimum allowance. PWSA states that “the bill credits were
19 derived by PWSA with the goal of minimizing customer impacts as PWSA transitions
20 away from rate structures that include minimum allowances.” (OCA-VIII-1). The

³⁴ My reference here is to individually-metered customers. In making this comment, I do not suggest that there is a need to determine a mechanism by which master-metered customers can become individually-metered or sub-metered for purposes of becoming direct customers of PWSA.

1 objective, PWSA said, is “to achieve continuity in impacts and avoid large spikes in bills
2 that could confuse or surprise customers.” (Id.) PWSA proposes to provide Tier 1
3 customers (at or below 50% FPL) a monthly water bill credit of \$10 in 2025 and \$12 in
4 2026, and to provide Tier 2 (above 50% FPL) customers a monthly water bill credit of
5 \$17 in 2025 and \$20 in 2026. The monthly Tier 1 wastewater credits proposed by PWSA
6 are \$3 in 2025 and \$4 in 2026, with the Tier 2 wastewater credits proposed to be \$5 in
7 2025 and \$6 in 2026. (PWSA St. 6, at 38).³⁵

8 **Q. DID PWSA ACHIEVE THE OBJECTIVE OF AVOIDING SPIKES IN BILLS?**

9 A. No. Even after applying the proposed bill credits, bills to PWSA Tier 1 BDP customers
10 will increase by 37.4% in 2025 (relative to 2023), and by 59.5% in 2026 (relative to
11 2023). After applying the proposed bill credits, bills to PWSA Tier 2 BDP customers will
12 increase by 37.8% in 2025 (relative to 2023) and by 63.5% in 2026 (relative to 2023).
13 (OCA-VIII-8). To the extent that PWSA asserts that its objective is “to achieve
14 continuity in impacts and avoid large spikes in bills,” the level of bill credits which it
15 proposes to provide to BDP participants fails to achieve that purpose. In fact, even after
16 applying PWSA’s proposed bill credits, its year-over-year percentage increase in bills for
17 both Tier 1 and Tier 2 BDP participants is nearly the same as its year-over-year increase
18 to residential customers as a whole. (OCA-VIII-8).

19 **Q. IS THE FAILURE TO ACHIEVE ITS OBJECTIVE EVEN GREATER THAN**
20 **THAT WHICH YOU IDENTIFY IMMEDIATELY ABOVE?**

³⁵ Throughout my testimony, any reference to 2025 rates as proposed by PWSA should not be construed as an endorsement, or acceptance, of PWSA’s proposed Multi-Year Rate Plan. Through other witnesses, OCA has opposed PWSA’s MYRP proposal.

1 A. Yes. In assessing the impacts of its proposed credits, PWSA assumes an average BDP
 2 consumption of 3,000 gallons per month. (OCA-VIII-8). As I discuss in more detail
 3 below, however, PWSA has previously acknowledged that this 3,000 gallon per month
 4 figure is the average usage for customers with income *exceeding* 150% FPL. According
 5 to PWSA, itself, the average consumption for customers with income *less* than 150% FPL
 6 is 4,000 gallons per month.³⁶ Moreover, PWSA does not increase the assumed water
 7 usage as household size increases. (OCA-VIII-5). The Table below shows the difference
 8 in bill increases given usage at 3,000 gallons per month versus usage at 4,000 gallons per
 9 month.

Table 6. BDP Bill Increases at 3,000 Gallons/Month vs. BDP Bill Increases at 4,000 Gallons/Month (by BDP Tier) (OCA-VIII-8)				
	2023	2024	2025	2026
BDP Customer				
Usage at 3 kgal	\$44.15	\$51.85	\$60.83	\$72.17
Usage at 4 kgal	\$65.62	\$77.01	\$88.38	\$104.84
BDP Customer –50% FPL				
Usage at 3 kgal	\$22.67	\$26.70	\$31.16	\$36.16
Usage at 4 kgal	\$33.41	\$39.27	\$45.59	\$53.24

10 As can be seen, actual bill increases given the average usage for customers with income
 11 at or below 150% FPL (4 kgal) are much higher than the bill increases used by PWSA (3
 12 kgal) to assess the impact of its proposed bill credits.

³⁶ PUC vs. PWSA, Docket No. R-2020-3017951 (water), Docket No. R-2020-3017970 (wastewater) (cons.), PWSA St. 8, at Table 3, page 11).

1 **Q. WHAT DO YOU RECOMMEND?**

2 A. I recommend a modest increase in the monthly bills credits proposed by PWSA to
3 achieve PWSA’s own-stated objective of “minimizing customer impacts as PWSA
4 transitions away from rate structures that include minimum allowances.” (OCA-VIII-8).
5 The monthly credits I recommend, compared to the monthly credits proposed by PWSA,
6 are set forth in the Table below.

Table 7. Monthly Credits to Minimize Transition Away from Minimum Allowance Rate Structure (PWSA Proposal vs. Recommended Modification)				
	PWSA Proposal		Proposed Modifications	
	2025	2026	2025	2026
W Bill Credit CAP	\$17.00	\$20.00	\$22.00	\$25.00
W Bill Credit CAP50	\$10.00	\$12.00	\$15.00	\$17.00
WW Bill Credit CAP	\$5.00	\$6.00	\$8.00	\$9.00
WW Bill Credit CAP50	\$3.00	\$4.00	\$6.00	\$7.00

7 The modifications which I recommend have both a policy basis and an empirical basis.
8 The policy basis is the same as that which was articulated by PWSA: “to achieve
9 continuity in impacts and avoid large spikes in bills.” (OCA-VIII-8). Adoption of the
10 recommended modifications helps to achieve this objective, while PWSA’s recommended
11 credits do not. The total percentage increase in PWSA bills for 2025 (the year in which
12 the transition away from a minimum allowance rate structure begins) and 2026,
13 compared to the present year, is presented below for residential customers as a whole, for
14 Tier 2 BDP customers (i.e., those with income above 50% FPL), and for Tier 1 BDP
15 customers (those with income at or below 50% FPL).

1

Table 8. Percentage Increase in Bills Relative to 2023 (Existing) Given PWSA Proposed Bill Credits and Recommended Modification to PWSA Bills Credits						
	PWSA Proposal			Proposed Modifications		
	2024	2025	2026	2024	2025	2026
Residential	19.6%	43.0%	69.1%	19.6%	43.0%	69.1%
BDP (Tier 2)	17.5%	37.8%	63.5%	17.5%	17.6%	43.2%
BDP (Tier 1)	17.7%	37.4%	59.5%	17.7%	(1.2%)	20.8%

2 The data clearly shows that while PWSA’s proposed bill credits do not achieve the
 3 objective which PWSA, itself, articulated for the credits, the recommended modifications
 4 to those credits do. The recommended modifications should be adopted.

D. Creating An Additional Income Tier in the BDP.

6 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
 7 **TESTIMONY.**

8 A. In this section of my testimony, I explain why PWSA should add a third tier to its BDP.
 9 That sub-divided tier should reflect two separate income ranges between 50% and 150%
 10 FPL. PWSA’s current BDP provides one discount to customers with annual income at or
 11 below 50% of FPL. The BDP then provides a separate (and lower) discount to customers
 12 with annual income above 50% FPL.³⁷ I recommend that PWSA adopt a three-tiered
 13 program using the following tiers: (1) Tier 1: at or below 50% FPL; (2) Tier 2: above
 14 50% FPL to 100% FPL; and (3) Tier 3: above 100% FPL.

³⁷ PWSA has recommended in this proceeding to expand its maximum income eligibility to 200% FPL. In a separate section of my testimony, I endorse this proposal. In speaking of Tier 3 incorporating households with annual income of 100% to 200% FPL here, I work under the assumption that that proposal is adopted. If that proposal is *not* adopted, my recommendation here would simply be to have Tier 3 limited to customers with income above 100% FPL up to 150% FPL.

1 **Q. PLEASE EXPLAIN WHY YOU RECOMMEND THAT HOUSEHOLDS WITH AN**
2 **ANNUAL INCOME EXCEEDING 50% FPL SHOULD BE DIVIDED INTO TWO**
3 **SEPARATE TIERS.**

4 A. There is a dramatic difference in the dollar amount of income between the “bottom” and
5 the “top” of the second income range now used by PWSA. The difference in that income
6 can be seen by looking at the income for customers at 50% FPL (2023) (to represent the
7 bottom of the second tier)³⁸ and for customers at 200% FPL (to represent the top of the
8 second tier). I compare those two incomes for households with one, two, and three
9 persons in the Table below.³⁹As can be seen, the difference in income between a PWSA
10 customer at 50% FPL and a PWSA customer at 200% FPL for a one-person household
11 would be nearly \$22,000, even though these two households would be in the same
12 discount tier for PWSA’s tiered discount program. Similarly, the difference in income
13 between a PWSA customer at 50% FPL and a PWSA customer at 200% FPL for a three-
14 person household would be more than \$37,000

³⁸ The bottom of the second tier would be an income greater than 50% FPL (e.g., 50.1% FPL). Accordingly, I use 50% FPL to represent this bottom breakpoint.

³⁹ As I discuss elsewhere, households with from one- and two-persons represent 77% of all Pittsburgh households. Households with one-, two- and three-persons represent 91% of all Pittsburgh households.

Poverty Level	1-person HH	2-person HH	3-person HH
50% FPL	\$7,250	\$9,860	\$12,430
150% FPL	\$21,750	\$29,580	\$37,290
200% FPL	\$29,000	\$39,440	\$49,720
Difference between 50% and 200%	\$21,750	\$29,580	\$37,290

1 These dollar differences in annual income substantially affect the affordability of bills to
 2 PWSA’s low-income customers. Using the existing discounts as proposed by PWSA, and
 3 assuming that usage does not increase as household size increases,⁴⁰ the bill burdens
 4 resulting from the rates as proposed by PWSA for 2025 and 2026⁴¹ are those set forth in
 5 the Table below. The Table shows that holding household size constant in 2025:

- 6 ➤ For a 1-person household, the PWSA 2025 burden ranges from 2.5% of
 7 income (at 200% FPL) up to 5.2% of income (at 50% FPL).
- 8 ➤ For a 2-person household, the PWSA 2025 burden ranges from 1.9% of
 9 income (at 200% FPL) up to 3.8% of income (at 50% FPL);
- 10 ➤ For a 3-person household, the PWSA 2025 burden ranges from 1.5% (at 200%
 11 FPL) up to 3.0% (at 50% FPL).

12 The Table shows that similar results occur in 2026. Despite these dramatic differences in
 13 burdens, under PWSA’s current proposal, all of these households would fall in the same
 14 discount tier for purposes of its BDP.

⁴⁰ While this assumption of a uniform usage for different household sizes is clearly in error, I use it here because it is the assumption that PWSA makes in calculating bill burdens at different rates. (PWSA St. 6, at 49; see also, OCA-VIII-5).

⁴¹ These are the bills used by PWSA to compare bill burdens in PWSA’s direct testimony. (PWSA St. 6, page 49).

1

Table 10. Bill Burdens with PWSA “Tier 2” at Discounts Proposed by PWSA							
FY 2025 (proposed rates)				FY 2026 (proposed rates)			
Annual Income				Annual Income			
FPL Range	1-person HH	2-person HH	3-person HH	FPL Range	1-person HH	2-person HH	3-person HH
50% FPL	\$7,250	\$9,860	\$12,430	50% FPL	\$7,250	\$9,860	\$12,430
150% FPL	\$21,750	\$29,580	\$37,290	150% FPL	\$21,750	\$29,580	\$37,290
200% FPL	\$29,000	\$39,440	\$49,720	200% FPL	\$29,000	\$39,440	\$49,720
PWSA Bill				PWSA Bill			
50% FPL	\$373.88	\$373.88	\$373.88	50% FPL	\$433.91	\$433.91	\$433.91
150% FPL	\$729.92	\$729.92	\$729.92	150% FPL	\$866.06	\$866.06	\$866.06
200% FPL	\$729.92	\$729.92	\$729.92	200% FPL	\$866.06	\$866.06	\$866.06
Bill as Percent of Income				Bill as Percent of Income			
50% FPL	5.2%	3.8%	3.0%	50% FPL	6.0%	4.4%	3.5%
150% FPL	3.4%	2.5%	2.0%	150% FPL	4.0%	2.9%	2.3%
200% FPL	2.5%	1.9%	1.5%	200% FPL	3.0%	2.2%	1.7%

2 **Q. PLEASE EXPLAIN YOUR RECOMMENDATION FOR A THIRD INCOME**
 3 **TIER.**

4 A. I recommend that PWSA introduce a new tier for customers with income greater than
 5 50% FPL but at or below 100% FPL. I recommend that this income tier should receive a
 6 volumetric discount in the same fashion as the income tier for customers with income at
 7 or below 50% FPL receives a volumetric discount. However, I recommend that this tier,

1 with somewhat higher incomes, have a somewhat lower volumetric discount. A discount
2 of 30% is appropriate.

3 A 30% discount for this new middle tier of low-income customers would result in
4 progress toward achieving an affordable bill. Similar to my discussion above, I calculate
5 the bill burden for the top of this income tier. Bills, along with bill discounts, are
6 calculated in the identical fashion by which PWSA calculated the bills in its discussion of
7 bill burdens. (see, OCA-VIII-2). The bill burdens resulting from this recommended
8 income tier and discount level are set forth in the Table below. As can be seen, while the
9 bill burdens remain somewhat high for this middle tier of PWSA's low-income
10 population, the inability to obtain precisely affordable bills is inherent in not having a
11 percentage of income program.⁴²

⁴² My agreement to the continuation of the PWSA Bill Discount Program in this proceeding should not be construed as an agreement that PWSA's BDP, even as I recommend that it be modified, adequately addresses the affordability needs of its low-income customers. I would reserve the right to address what modifications PWSA would need to make to its BDP to adequately address affordability, including the modification of the BDP to become a Percentage of Income Plan (PIP). My lack of a recommendation for PWSA to pursue a PIP in this proceeding should not be construed as an acknowledgement that a PIP is either, administratively or substantively, inadvisable.

1 **Q. WILL PWSA’S BDP, WITH A 50% VOLUMETRIC DISCOUNT FOR**
 2 **CUSTOMERS AT 0 TO 50% FPL, MAKE BILLS AFFORDABLE FOR THOSE**
 3 **CUSTOMERS?**

4 A. No. PWSA’s existing discount tiers fail to address the affordability needs of PWSA’s
 5 lowest income customers. Consider PWSA bill burdens as a percentage of income at
 6 differing household sizes in the PWSA service territory as set forth in the Table
 7 immediately below. Using the discounted BDP bill at the rates as proposed by PWSA in
 8 this proceeding, bill burdens can be calculated at the top of the income tier at or below
 9 50% FPL. As can be seen, even given the BDP bill with a 50% volumetric discount, bills
 10 remain unaffordable for households in this income tier. As PWSA’s bills continue to
 11 increase in 2026, as proposed in this proceeding, the burdens become ever more
 12 unaffordable. In FY 2025, the 50% volumetric discount results in a burden of 5.2% for a
 13 1-person household, expanding to 6.0% in FY2026. Even for a 2-person household, the
 14 existing 50% discount results in burdens approaching 4% in FY2025 and noticeably
 15 exceeding 4% in FY2026.⁴³

Table 12. PWSA Bill Burdens at for Households with Income at or Below 50% FPL Given Existing 50% Volumetric Discount							
		FY 2025			FY 2026		
HH Size	1	2 ⁴⁴	3	HH Size	1	2	3
Monthly Bill	\$31.16	\$31.16	\$31.16	Monthly Bill	\$36.16	\$36.16	\$36.16
Annual Bill	\$373.92	\$373.92	\$373.92	Annual Bill	\$433.92	\$433.92	\$433.92
Income	\$7,250	\$9,860	\$12,430	Income	\$7,250	\$9,860	\$12,430
Burden	5.2%	3.8%	3.0%	Burden	6.0%	4.4%	3.5%

⁴³ Again, as I discuss above, households with from one- and two-persons represent 77% of all Pittsburgh households. Households with one-, two- and three-persons represent 91% of all Pittsburgh households.

⁴⁴ The burdens included here for 2-person households are provided in PWSA’s response to OCA-VIII-4. Burdens for 1-person and 3-person households are calculated using the identical methodology.

1 Irrespective of whether the 50% volumetric discount is reasonably adequate at rates
2 approved in PWSA's last rate case, that level of discount has clearly become inadequate
3 (and unreasonable) as rates have escalated since that time. An adjustment now needs to
4 be made.

5 **Q. HAVE YOU EXAMINED THE REASONABLENESS OF THE 50%**
6 **VOLUMETRIC DISCOUNT FOR THIS LOWEST INCOME TIER IN ANY**
7 **OTHER WAY?**

8 A. Yes. I have examined households with income less than \$20,000 in the PWSA service
9 territory. In doing so, I use the income ranges reported by the Census Bureau (less than
10 \$10,000; \$10,000 - \$15,000; and \$15,000 - \$20,000). To calculate PWSA burdens, I use
11 the mid-point of each income range.⁴⁵ Continuing to use the FY2025 and FY2026 bills
12 (as PWSA used [PWSA St. 6, at 49]), I find that in FY2025, bill burdens for households
13 with income less than \$10,000 will be 7.5% of income, increasing to 8.7% of income in
14 FY2026. Bill Burdens for households at \$15,000 to \$20,000 will be 2.1% of income,
15 increasing to 2.5% in FY2026.

16 These burdens are significant because, as the Chart below demonstrates, the PWSA
17 service territory has substantial numbers of households living at the lowest ranges of
18 income within these income ranges. Of the more than 30,500 households with annual
19 income below \$20,000, by far the largest percentage of households in this population
20 (45.1%) have income below \$10,000. Combined, the population with income at or below

⁴⁵ Using these incomes, along with their mid-points, reasonably reflects 50% FPL for households with from one to three-persons. In 2023, 50% FPL was \$7,290 for a one-person household; \$9,860 for a two-person household; and \$12,430 for a three-person household.

1 \$15,000 represents more than three-quarters (76.6%) of the total population with income
 2 less than \$20,000. Even given the 50% volumetric discount provided by PWSA, in other
 3 words, PWSA bills remain unaffordable to a substantial segment of PWSA’s low-income
 4 population.

5

6 **Q. ARE THE UNAFFORDABLE BURDENS YOU IDENTIFY ABOVE**
 7 **ARTIFICIALLY LOW?**

8 A. Yes. As I indicate above, in making my calculations above, I accept all of the
 9 assumptions that PWSA incorporated into its calculations of low-income bills and
 10 burdens. One of those assumptions is that average low-income consumption is 3,000
 11 gallons (3 kgal) a month. (OCA-VIII-2, OCA-VIII-5). In its Direct Testimony filed in its
 12 2020 rate case, however, PWSA reported that the 3,000 gallon usage applied to

1 households with income *in excess of 150% FPL*. In contrast, PWSA said that the median
 2 usage for customers with income *at or below 150% FPL* was 4,000 gallons per month.⁴⁶

3 This difference in usage, as it affects the calculation of water burdens, is substantial.
 4 Using PWSA’s report of low-income median usage (4,000 gallons), even after applying
 5 the proposed PWSA discount, bills yield burdens that are considerably more problematic
 6 to low-income customers than using the lower consumption (3,000 gallons). At a usage
 7 of 4,000 gallons, PWSA’s discounted bill to customers at or below 50% FPL would be
 8 \$45.59 (not \$31.16) in FY2025. At a usage of 4,000 gallons, PWSA’s discounted bill to
 9 customers at or below 50% FPL would be \$53.24 (not \$36.16) in FY2026.

Table 13. Bill Burdens (given PWSA proposed rates and 50% volumetric discount (for 50% FPL tier) At Usage of 3,000 and 4,000 Gallons per Month				
	At \$5,000	At \$10,000	At \$15,000	At \$20,000
FY2025				
3,000 gallons	7.5%	3.7%	2.5%	1.9%
4,000 gallons	10.9%	5.5%	3.6%	2.7%
FY2026				
3,000 gallons	8.7%	4.3%	2.9%	2.2%
4,000 gallons	12.8%	6.4%	4.3%	3.2%

10 **Q. DO YOU RECOMMEND MODIFICATIONS TO THE BILL DISCOUNT**
 11 **PROPOSED BY PWSA IN THIS PROCEEDING?**

12 A. Yes. I recommend that the volumetric discount for customers with annual income at or
 13 below 50% FPL be increased from 50% to 60%. Doing so would, as demonstrated in the

⁴⁶ PUC vs. PWSA, Docket No. R-2020-3017951 (water), Docket No. R-2020-3017970 (wastewater) (cons.), PWSA St. 8, at Table 3, page 11); see also, OCA-III-59.

1 Table below, more closely align actual bill burdens for this lowest income tier with
2 affordable bill burdens than does the existing 50% volumetric discount.

Table 14. PWSA Bill Burdens at for Households with Income at or Below 50% FPL Given Recommended 60% Volumetric Discount							
FY 2025				FY 2026			
HH Size	1	2	3	HH Size	1	2	3
Monthly Bill	\$23.30	\$23.30	\$23.30	Monthly Bill	\$26.82	\$26.82	\$26.82
Annual Bill	\$279.60	\$279.60	\$279.60	Annual Bill	\$321.84	\$321.84	\$321.84
Income	\$7,250	\$9,860	\$12,430	Income	\$7,250	\$9,860	\$12,430
Burden	3.9%	2.8%	2.2%	Burden	4.4%	3.3%	2.6%

3 As can be seen, this modest increase in the Tier 1 discount results in a dramatic
4 improvement in the bill affordability to Tier 1 customers. This increased Tier 1 discount
5 should be adopted.

6 **Part 4. The Design and Operation of PWSA’s Arrearage Forgiveness Program.**

7 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
8 **TESTIMONY.**

9 A. In this section of my testimony, I review the design and operation of PWSA’s Arrearage
10 Forgiveness Program (AFP). I find that the AFP is not effectively operating to address
11 the pre-existing arrears of low-income customers. For this discussion, a “pre-existing
12 arrearage” is an arrearage that appears on the low-income customer’s bill at the time the
13 customer enrolls in the AFP. It is critical to provide a reasonable opportunity for PWSA’s
14 low-income customers to get out from under the burden of arrearages that they may have
15 accrued during the time in which their bills presented unaffordable burdens. It makes

1 little sense to seek to make future bills for current service more affordable if the low-
2 income BDP participants will simply face unaffordable *total* bills because of their
3 obligation to retire pre-existing arrears. Low-income customers do not make two
4 separate, independent, payments, one toward their bill for current service and another
5 toward their pre-existing arrears. Instead, there is one monthly asked-to-pay amount that
6 combines the obligation to pay for current service and for pre-existing arrears into one
7 amount. Nonpayment of that single asked-to-pay amount will result in PWSA placing the
8 customer into its collection process. (OCA-III-35).

9 **A. Automatic Enrollment of BDP Participants with Arrears into AFP.**

10 **Q. HAVE YOU HAD OCCASION TO REVIEW THE LEVEL OF ARREARAGES**
11 **FOR PWSA'S BDP ENROLLEES?**

12 A. Yes. I have examined the extent to which low-income customers are entering PWSA's
13 BDP with pre-existing arrears. I compare the total number of PWSA customers enrolling
14 in the BDP (OCA-III-47) to the number of low-income customers enrolling in BDP with
15 pre-existing arrears. As the data in the Table below shows, over the period May 2021
16 through May 2023, more than 71% of the customers who enrolled in BDP entered the
17 program with a pre-existing arrears. The average arrears of those having arrears was
18 \$1,226.⁴⁷ With some notable exceptions in a limited number of months, both the
19 percentage of new BDP enrollees with arrears and the average arrears (of those having

⁴⁷ PWSA provided the average arrears of new BDP enrollees. (OCA-III-47(c)). However, the average PWSA provided included those customers with \$0 in arrears in the calculation. A better metric is the average arrears of those having arrears.

1 arrears) have remained relatively constant over the 25 months of reported data (May 2021
2 through May 2023).

3 The data shows the importance of a low-income customer's access to arrearage
4 forgiveness in being able to obtain an affordable bill. Using the arrears reported for new
5 BDP enrollees as an illustration, let me assume that the average pre-existing arrears
6 would be retired in equal installments over a three-year period. With no downpayment,
7 the low-income customer would be required to pay \$409 each year simply toward retiring
8 that pre-existing arrears ($\$1,226 / 3 = \408.67). At 100% FPL, therefore, the payment
9 needed *exclusively to retire the arrears* would be: (1) 2.6% of income for a 1-person
10 household; (2) 2.1% of income for a 2-person household; or (3) 1.6% of income for a 3-
11 person household.⁴⁸ At 50% FPL, the maximum income level for PWSA's BDP Tier 1,
12 the burdens *simply to retire arrears* would be two times that level: (1) 5.2% of income for
13 a 1-person household; (2) 4.2% of income for a 2-person household; or 3.2% of income
14 for a 3-person household. Given that the reason for the prevalence and depth of the
15 arrears with which to begin is the unaffordability of bills, adding these arrearage
16 retirement installments is unreasonable.

⁴⁸ 2023 Federal Poverty Guidelines are: 1-person household: \$14,580; 2-person household: \$19,720; and 3-person household: \$24,860. Available at <https://aspe.hhs.gov/topics/poverty-economic-mobility/poverty-guidelines>

1 **Q. HAVE YOU EXAMINED THE EXTENT TO WHICH THE ARREARAGE**
2 **FORGIVENESS AND BILL DISCOUNT PROGRAMS OVERLAP?**

3 A. Given the extent to which low-income PWSA customers newly enrolled in BDP between
4 May 2021 and May 2023 had pre-existing arrears, I examined the overlap between
5 participation in the BDP and AFP programs. The data is presented in the Table below.

6 The data shows the extent to which PWSA's AFP under-serves the low-income
7 population with arrearages. According to PWSA's data, in May 2023, while there were
8 6,497 low-income customers participating in BDP, there were only 1,956 low-income
9 customers who were participating in *both* the BDP *and* the AFP. Only 30% of BDP
10 participants, in other words, were also participating in the Arrearage Forgiveness
11 Program.

12

Table 16. Number of BDP Participants, and Number of Participants in BDP + AFP (May 2021 through May 2023) (shading simply to improve readability)

Feb-23	1,426	4,846	6,272	452	1,343	1,795	29%
Mar-23	1,564	5,253	6,817	468	1,400	1,868	27%
Apr-23	1,441	4,856	6,297	478	1,405	1,883	30%
May-23	1,491	5,006	6,497	500	1,456	1,956	30%

1 **Q. HAVE YOU EXAMINED THE NUMBER OF AFP PARTICIPANTS WHO HAVE**
2 **ACTUALLY RECEIVED ARREARAGE CREDITS PURSUANT TO THE PWSA**
3 **PROGRAM?**

4 A. Yes. I examined data that PWSA provided on the number of AFP participants who had
5 AFP credits successfully posted to their accounts over the period May 2022 through April
6 2023. (OCA-VIII-27). This data is consistent with the data provided by PWSA indicating
7 that it successfully posted arrearage forgiveness credits to 640 accounts in May 2023.
8 (OCA-III-54(c)).⁵⁰ As documented above, however, PWSA had 1,956 AFP participants
9 in May 2023. The Table below compares the number of AFP participants each month to
10 the number of AFP participants who received arrearage credits after making a full and
11 timely payment.

⁴⁹ PWSA did not explain the substantial difference between the number of customers it reports as being AFP participants by month (OCA-III-4) and the number of bills it issued to AFP participants by month (OCA-III-48(f)).

⁵⁰ While the PWSA response to OCA-III-54 was marked as “confidential,” by agreement with PWSA, only the personally identifiable information in the reports was considered “confidential.” This discussion does not reveal any personally identifiable information, but instead only provides compiled data.

Table 17. AFP Participants and AFP Credits Granted (Most Recent 12 months) (shading simply to improve readability)			
	AFP Participants	AFP Credits (OCA-VIII-27)	Ratio Credits to Participants (Col. 2 / Col. 1)
May-22	743	807	1.09
Jun-22	795	846	1.06
Jul-22	710	725	1.02
Aug-22	1,174	891	0.76
Sep-22	1,484	585	0.39
Oct-22	1,547	731	0.47
Nov-22	1,591	542	0.34
Dec-22	1,693	513	0.30
Jan-23	1,767	519	0.29
Feb-23	1,795	712	0.40
Mar-23	1,868	746	0.40
Apr-23	1,883	696	0.37
Sep 2022 - April 2023 (avg)	1,704	631	0.37

1 The data demonstrates that few AFP participants successfully meet PWSA’s requirement
 2 that they make a full and timely payment not only of their bill for current service but of
 3 the installment payment toward their pre-existing arrearage. Beginning in the Fall of
 4 2022 and continuing to the present, with one exception (October 2022), 40% or less of
 5 PWSA’s AFP participants successfully earned their matching arrearage forgiveness credit.
 6 Indeed, from December 2022, when the federal government’s COVID emergency water
 7 assistance grant program went away, through April 2023, PWSA would have issued
 8 10,597 AFP bills but made only 3,728 AFP arrearage forgiveness credits.

9 **Q. WHAT DO YOU FIND?**

10 A. What we know from the discussion above, therefore, is the following: (1) in May 2023,
 11 PWSA had 6,497 BDP participants; (2) from May 2021 through May 2023, more than
 12 71% of low-income customers enrolling in BDP had pre-existing arrears at the time of

1 enrollment; (3) in May 2023, of the 6,497 BDP participants, 1,956 (30%) were enrolled
2 in the AFP; and (4) of those enrolled in AFP, in May 2023, PWSA posted arrearage
3 forgiveness credits to 640 accounts (33%). Even within the limited population of BDP
4 participants enrolled in the AFP, consistently fewer than 40% of those AFP participants
5 received an AFP credit toward their pre-existing arrears. I conclude that the number of
6 BDP participants who are actually receiving credits toward their pre-existing arrears falls
7 well short of the number of BDP participants who have pre-existing arrearages on their
8 accounts.

9 **Q. WHAT DO YOU RECOMMEND?**

10 A. While PWSA agreed to minimize the steps that BDP participants must take in order to
11 also enroll in the AFP, the data shows that a substantial number of BDP participants with
12 arrears do not enter the AFP. To have low-income customers receiving a discount toward
13 their bill for current service, but to also continue to bear responsibility for arrears that
14 were incurred during the time prior to receiving the discount, is unreasonable. I
15 recommend that the PUC direct PWSA to automatically enroll any customer who newly
16 enrolls in the BDP into the AFP as well. In addition, I recommend that the PUC direct
17 PWSA to retroactively enroll customers who have previously enrolled in BDP, and who
18 currently have arrears, into AFP as well. Such enrollment of existing BDP participants
19 with arrears would subject the BDP participant arrears to the rules of the AFP for all
20 arrears on the account at the time of AFP enrollment.

1 **B. Granting Retroactive AFP Credits for “Cured” Missed Payments.**

2 **Q. UNDER WHAT CIRCUMSTANCES DOES PWSA PROVIDE AN ARREARAGE**
3 **FORGIVENESS CREDIT TO AFP PARTICIPANTS?**

4 A. Pursuant to PWSA’s AFP, a low-income program participant may earn a \$30 credit for
5 each bill that is paid in-full and on-time. PWSA defines an “on-time” payment as a
6 payment that is made before the Company’s tariffed late payment charge is imposed. In
7 my discussion below, I document how this limitation on the grant of arrearage
8 forgiveness severely limits arrearage credits that are provided to low-income customers
9 who make complete payments toward their PWSA bills. I recommend that the PUC adopt
10 the same policy for PWSA that it has adopted for the arrearage forgiveness programs for
11 the state’s natural gas and electricity distribution companies. PWSA should *begin* by
12 providing arrearage forgiveness credits for each payment made in-full and on-time. *In*
13 *addition*, PWSA should provide retroactive credits for payments that fully pay a bill, even
14 if those payments are made after the bill payment “due date.”

15 **Q. WAS PWSA ABLE TO PROVIDE DATA ON THE COLLECTABILITY OF BILLS**
16 **ISSUED TO AFP OR BDP PARTICIPANT?**

17 A. No. While PWSA considers the rate at which it translates billings into revenues
18 (sometimes referred to as receipts) for customer classes, it does not do so for its specific
19 low-income programs. (OCA-III-10; see also, OCA-III-50, OCA-III-52)). Moreover,
20 when asked for information on payments for AFP participants (OCA-III-48(i) – (j)),
21 PWSA could not provide that data. For purposes here, it is important to distinguish
22 between “billings” and “receipts.” In contrast to the dollars included on bills to
23 customers, “receipts” are recorded revenues actually received. (OCA-III-51; see also,

1 OCA-VIII-16). Since PWSA does not track the collectability of the bills which it issues
2 to AFP customers in particular, it cannot assess the extent to which AFP participants do or
3 do not miss payments (and thus do not earn AFP credits).

4 **Q. IS THERE ANY WAY TO GAIN INSIGHTS INTO THE EXTENT TO WHICH**
5 **BDP AND/OR AFP PARTICIPANTS PAY THEIR BILLS IN A COMPLETE**
6 **FASHION?**

7 A. Yes. While PWSA specifically states that it cannot track the number of accounts on
8 which a payment has been made to reduce the account balance to \$0. (OCA-III-57(f)), it
9 is possible to gain some insights into the payment patterns for the BDP by looking at the
10 aging reports for arrears carried by BDP participants. An “aging report” presents the
11 dollars of arrears by the age of arrears (e.g., 1 – 30 days, 31 – 60 days, 61-90 days).
12 PWSA provided the aging of arrears for individual BDP participants for each month
13 September 2021 through May 2023. (OCA-III-58).⁵¹

14 PWSA’s aging reports for its BDP population provide important insights into the
15 operation of the AFP as well.⁵² The data is set forth in the Table below.

⁵¹ While the aging reports were marked as “confidential,” by agreement with PWSA, only the personally identifiable information in the reports was considered “confidential.” This discussion does not reveal any personally identifiable information, but instead only provides compiled data.

⁵² As established above, even though only 30% of BDP participants have also been enrolled in the AFP, more than 70% of BDP participants entered the discount program with pre-existing arrears.

Table 18. PWSA Aging of Arrears (BDP) May 2022 – May 2023

	No. BDP Accounts ⁵³	Accounts 1-30 Days in arrears	Accounts 31-60 Days in Arrears	Pct Total Accounts 31-60 days in Arrears	Accounts 61-90 days in arrears
May-22	1,559	1,536	898	58%	743
Jun-22	1,537	1,516	881	57%	694
Jul-22	1,486	1,462	875	59%	676
Aug-22	2,557	1,864	1,129	44%	1,013
Sep- 22 ⁵⁴	Not available	Not available	Not available	Not available	Not available
Oct-22	4,672	4,556	2,764	59%	2,531
Nov-22	4,386	3,993	2,663	61%	2,285
Dec-22	4,822	4,619	2,786	58%	2,300
Jan-23	4,675	4,333	2,883	62%	2,375
Feb-23	4,897	4,721	2,642	54%	2,436
Mar-23	5,038	4,907	2,662	53%	2,385
Apr-23	4,914	4,724	2,701	55%	2,319
May-23	5,225	5,051	2,845	54%	2,283

1 The data in the Table above shows why not allowing AFP participants to earn arrearage
2 forgiveness credits by completing a full payment, even if not on-time, is unreasonably
3 restrictive. While PWSA reports that, as a general rule, between 50% and 60% of its
4 BDP participants have an arrearage that is 31 to 60 days old,⁵⁵ significant numbers of
5 BDP participants reduce their arrearage to \$0 in each subsequent month. In March 2023,

⁵³ PWSA did not explain the difference in its count of BDP participants by month in its aging reports and its count of BDP participants provided elsewhere.

⁵⁴ PWSA reported that data for September 2022 was not available.

⁵⁵ Having an arrearage in each aging bucket necessarily implies that the account has an arrearage in each “younger” aging bucket. If, for example, an account has an arrears that is 61 to 90 days old, that account will also have an arrears that is 31 to 60 days old. For this reason, the numbers in the columns above are not additive. The younger buckets are subsets of the older buckets.

1 for example, while PWSA had 4,907 BDP participants with arrears aged 1 to 30 days, by
2 the next month (April), there were only 2,701 of those accounts that still had an unpaid
3 balance (and thus had an arrears in the 31 – 60 day old bucket). By the next month
4 (May), it had only 2,283 in the 61 – 90 aging bucket. Between Day 31 and Day 90, in
5 other words, more than half (52%) of the BDP accounts with arrears at Day 30 had retired
6 their arrears completely. Nonetheless, these customers had not received arrearage
7 forgiveness for making those complete payments.

8 Similar results are seen in other months. In December 2022, 4,619 BDP participants had
9 arrears in the 1 to 30 day aging bucket. By the next month (January), however, the
10 number of BDP participants continuing to have arrears was reduced to 2,883 (a reduction
11 of 48%), while by the next month (February), the number of BDP participants continuing
12 to have arrears had been reduced to 2,436. Despite having paid their bills such that they
13 did not have arrears falling into the *next* aging bucket, the 1,736 low-income customers
14 (of the 4,619 in December 2022) having retired their arrears in January would not have
15 received any arrearage forgiveness credits. Despite having paid their bills such they did
16 not have arrears falling into the 61 to 90 day aging bucket, the 2,183 low-income
17 customers having made complete payments toward their December bills (4,619 – 2,436)
18 would not have received any arrearage forgiveness credit.

19 **Q. UPON WHAT DID PWSA GROUND ITS OPPOSITION TO PROVIDING MORE**
20 **EXTENSIVE ARREARAGE FORGIVENESS?**

21 A. PWSA witness Edward Barca explained PWSA's opposition as follows:

22 we still do not support restructuring the program at this time due to the
23 successful Low Income Household Water Assistance Program (LIHWAP).

1 Pennsylvania’s program awarded more than \$43 million last year, with the
2 funds paid directly to water and wastewater providers. It is anticipated that a
3 second round of funding will occur. The funding for the second round will
4 come from the states that did not spend the first round of federal funding by
5 the government’s deadline. Therefore, in PWSA’s view, there will be
6 additional funding to assist low income customers with paying their bills. . .

7 (PWSA St. 2, at 52). In fact, however, when Congress adopted its legislation increasing
8 the federal debt ceiling, it rescinded all unspent LIHWAP funding. The funding that
9 PWSA “anticipated” would come from states that did not spend their first round of
10 federal funding no longer exists.⁵⁶ The number of PWSA BDP participants who received
11 a LIHWAP grant from November 2022 through May 2023 is set forth in the Table below.
12 The federal LIHWAP funding that PWSA “anticipated” would be available is *not*
13 available. From January 2023 through May 2023, nine (9) PWSA customers received
14 LIHWAP grants. From March 2023 through May 2023, three (3) PWSA customers
15 received LIHWAP. While acknowledging in discovery that its “anticipated” additional
16 funding has been rescinded by Congressional action (OCA-VIII-19), PWSA chooses not
17 to modify its opposition to changes in its AFP that it originally had justified on the basis
18 of the existence of such funding. (OCA-VIII-20, OCA-VIII-21, OCA-VIII-22, OCA-
19 VIII-23, OCA-VIII-24).

⁵⁶ Any final residual LIHWAP funding that the State of Pennsylvania may have made will not be available after August 11, 2023. There was one brief open application period starting July 10, 2023 and ending August 11, 2023. <https://www.dhs.pa.gov/Services/Assistance/Pages/LIHWAP.aspx>

1 month period at the rate of 1/24th of the pre-existing arrears for each full payment
2 received.

3 **Q. WHAT IS THE PRACTICAL SIGNIFICANCE OF HAVING PWSA ADOPT THE**
4 **SAME ARREARAGE FORGIVENESS STRUCTURE THAT HAS BEEN**
5 **ADOPTED BY THE PUC FOR PENNSYLVANIA’S ELECTRICITY AND**
6 **NATURAL GAS DISTRIBUTION UTILITIES?**

7 A. The immediate significance of adopting this arrearage forgiveness structure is that PWSA
8 would eliminate its requirement that AFP participants enter into deferred payment
9 arrangements for their pre-existing arrears and receive matching credit only if they pay
10 their entire bill for current service *plus* the required payment arrangement installment
11 payment against their arrears. My recommendation is that AFP participants receive a
12 credit equal to 1/24th of their entire pre-existing arrears in exchange for complete
13 payments of their bill for current service.

14 Imposing an obligation to make an installment payment toward their pre-existing arrears
15 in addition to paying their bill for current service would impose unreasonable burdens on
16 PWSA’s low-income customers, particularly those in the lowest tier of FPL. As the Table
17 below documents, customers with income falling in the lowest FPL tier will frequently
18 have extremely high pre-existing arrears. In six of the 16 months examined (January
19 2022 – May 2023), including four of the most recent six months (December 2022 – May
20 2023), those months when federal emergency assistance grants were no longer available,
21 the average arrears of BDP participants with income less than 50% FPL exceeded \$900.
22 In four of those six months, the average arrears of the lowest income BDP participants at
23 the time of enrollment exceeded \$1,000.

**Table 20. Average Arrears at Time of BDP Enrollment by Month and Tier of FPL
(January 2022 – May 2023) (OCA-III-54)⁵⁷**

	0 - 50% PL		50-100% FPL		100-150% FPL	
	Number Accts	Avg Arrears	Number Accts	Avg Arrears	Number Accts	Avg Arrears
Jan-22	38	\$811	64	\$760	55	
Feb-22	35	\$796	45	\$969	55	\$317
Mar-22	31	\$813	54	\$879	63	\$570
Apr-22	22	\$1,449	63	\$343	62	\$298
May-22	19	\$804	36	\$1,152	37	\$834
Jun-22	21	\$691	38	\$390	29	\$705
Jul-22	50	\$418	52	\$560	45	\$564
Aug-22	23	\$1,618	27	\$921	44	\$547
Sep-22	Data not available					
Oct-22	20	\$802	45	\$596	37	\$1,069
Nov-22	19	\$666	23	\$745	30	\$423
Dec-22	40	\$1,026	72	\$1,316	74	\$827
Jan-23	34	\$557	50	\$921	59	\$505
Feb-23	29	\$918	38	\$797	42	\$755
Mar-23	45	\$990	52	\$2,380	74	\$1,432
Apr-23	29	\$1,276	39	\$1,054	61	\$1,054
May-23	52	\$827	74	\$803	71	\$754

1 Adding the installment payment to bills at rates proposed by PWSA (including PWSA’s
 2 proposed discounts) will yield unaffordable bill burdens at the lowest FPL tier. PWSA
 3 Witness Mechling reported that PWSA’s bills would, for a 2-person household, yield
 4 burdens at 50% FPL of 2.8% in 2023, 3.2% in 2024, 3.8% in 2025 and 4.4% in 2026.

⁵⁷ Similar to my use of data from PWSA “aging reports” above, PWSA’s response to OCA-III-54 contained individually-identifiable data for specific PWSA customers. By agreement with PWSA, only the personally identifiable information in this data request response was considered “confidential.” This discussion does not reveal any personally identifiable information, but instead only provides compiled data not deemed to be confidential.

1 (PWSA St. 6, at 49).⁵⁸ For a 1-person household (which represents 42% of Pittsburgh's
2 total household population, PWSA's bills would yield bill burdens of 3.8% in 2023, 4.4%
3 in 2024, 5.2% in 2025, and 6.0% in 2026 without the added financial obligation of an
4 installment payment required for a pre-existing arrearage. For a 3-person household,
5 which represents an additional 12% of the Pittsburgh population, PWSA's bills would
6 yield bill burdens of 2.2% in 2023, 2.6% in 2024, 3.0% in 2024, and 3.5% in 2025
7 without the additional obligation of an installment payment to help retire a pre-existing
8 arrearage. Even these burdens understate the PWSA burdens imposed by PWSA bills.
9 These burdens are calculated using the maximum income allowed in PWSA's lowest
10 income tier. Customers would not, however, live at the maximum income level. They
11 would live with average incomes within that FPL tier. In fact, therefore, their burdens
12 will be even higher than I note. Adding an arrearage installment payment drives these
13 burdens substantially higher.

14 **Q. WHAT DO YOU CONCLUDE?**

15 A. I conclude that PWSA's requirement that AFP participants enter into a deferred payment
16 arrangement based on their pre-existing arrears, and that AFP participants be required to
17 pay their installment payment in addition to their bill for current service, is unreasonable.
18 Rather than requiring such payment arrangements, and the associated copayments toward
19 pre-existing arrears, PWSA should modify its program to allow 1/24th of the complete

⁵⁸ Ms. Mechling also calculated burdens for 4-person and 6-person households. However, as I demonstrated earlier in my testimony, few of Pittsburgh's households have four or more persons in the household. I noted above that in 2021, out of a total of 136,747 households, 57,752 had one-person; 47,320 had 2-persons; 16,035 had three-persons; and 15,590 had four or more persons. A more meaningful comparison, therefore, would have been to examine 50% FPL for a 1-person and 3-person household.

1 pre-existing arrears to be forgiven for each complete payment that a program participant
2 makes.

3 **Q. DOES PWSA CONTINUE TO HAVE THE INFORMATION TECHNOLOGY**
4 **LIMITATIONS IT HAS HAD IN THE PAST WHICH WOULD IMPEDE**
5 **ADOPTING YOUR RECOMMENDED ARREARAGE FORGIVENESS**
6 **STRUCTURE?**

7 A. No. While PWSA witness Julie Mechling asserts that PWSA continues to oppose a
8 restructuring of PWSA's AFP as a matter of policy, there are no longer limitations
9 imposed by the PWSA billing system. She specifically testified that: "I do want to be
10 clear that while PWSA does not believe the costs of implementing a change to the AFP as
11 suggested by the last rate case settlement are reasonable, we did ensure that the
12 functionality was included in our current system to be able to accommodate the revised
13 structure contemplated by the settlement if PWSA elects to implement it in the future."
14 (PWSA St. 6, at 47).

15 **D. Responding to PWSA's "Benefit-Cost Analysis" of AFP Changes.**

16 **Q. PLEASE RESPOND TO PWSA'S "BENEFIT-COST ANALYSIS" OF MAKING**
17 **CHANGES TO ITS ARREARAGE FORGIVENESS PROGRAM.**

18 A. As PWSA witness Barca testified about the Settlement of its last base rate case:

19 PWSA agreed to undertake a cost-benefit analysis regarding a restructuring
20 of its current program that would have included: (1) reducing the customer's
21 account balance by 1/36th of the original pre-program balance account; (2) at
22 the time of enrollment, separating (or "freezing") the customer's total arrears
23 from their current and future bills; (3) forgiving the frozen arrearage at a rate
24 of 1/36th per month for each month the customer timely and fully pays the
25 bill; (4) retroactively forgive arrearages for customers who miss a monthly
26 bill payment but make catch-up payments

1 (PWSA St. 2, at 51). PWSA provided its Exhibit EB-9 in fulfillment of that
2 commitment. (PWSA St. 2, at 51 – 52). The benefit-cost analysis that PWSA presents is
3 so flawed it should not be used as a basis for decision-making.

4 **Q. WHAT FLAWS DID YOU FIND IN MR. BARCA’S BENEFIT-COST RATIO?**

5 A. There are multiple flaws in Mr. Barca’s benefit-cost analysis. They include the
6 following:

7 First, Mr. Barca assumes that 100% of payments are made by AFP participants and,
8 therefore, that 100% of arrearage forgiveness credits are granted under either the existing
9 procedures or the alternative procedures. He specifically acknowledges that his analysis
10 “shows the cost of forgiving existing arrearages assuming all customers within the BDP
11 who have an arrearage balance make on-time payments every month over a 3-year
12 period.” (OCA-VIII-31). In making this assessment, Mr. Barca does not compare the
13 number, or percent, or dollar amount, of arrears that would be forgiven under the current
14 PWSA procedures to the number, or percent, or dollar amount, of arrears that would be
15 forgiven under the alternative procedures. (OCA-VIII-31, OCA-VIII-32, OCA-VIII-33).
16 He does not attempt to determine the portion of arrears eligible for forgiveness that would
17 remain unpaid, or unforgiven, at the end of the three-year period under either procedure.
18 (OCA-VIII-33).

19 Second, as a result of Mr. Barca’s assumption of a 100% collectability rate (OCA-VIII-
20 34), he does not compare the difference in costs associated with the payment rate under
21 the existing procedures compared to the payment rate under the recommended
22 procedures. In Mr. Barca’s flawed analysis, he assumes that the rate of uncollectibles is

1 identical, the rate of collection activity is identical, the magnitude of arrears carried is
 2 identical, and the number of customers continuing to carry arrears is identical, whether
 3 under the current PWSA procedures or under the alternative procedures.

4 This assumption does not reflect reality. The number of AFP participants making
 5 complete and on-time payments, and thus earning arrearage credits, is a small fraction of
 6 the total number of AFP participants. (OCA-VIII-27). The Table below, for example,
 7 compares the number of AFP accounts receiving an AFP credit to the number of AFP
 8 participants for the months reported through April 2023. (OCA-VIII-27). By not
 9 allowing AFP participants to retire their pre-existing arrears through the existing AFP,
 10 PWSA faces substantial costs in terms of carrying costs, bad debt, and collections costs.
 11 None of that was considered by Mr. Barca.

Table 21. Number of AFP Participants vs. Number of AFP Credits Granted by Month (2023)		
	AFP Participants	AFP Credits
Jan-23	1,767	519
Feb-23	1,795	712
Mar-23	1,868	746
Apr-23	1,883	696

12 Third, Mr. Barca’s “benefit-cost analysis” is flawed in that he makes no effort to identify
 13 any “benefits” at all arising from the alternative procedures he purportedly was assessing.
 14 (OCA-VIII-36). Even when he asserts that PWSA would benefit if “more in current
 15 charges were recovered,” he then turns around and merely assumes, contrary to fact, that
 16 PWSA would collect 100% of its current charges under either procedure. It is thus no
 17 surprise that Mr. Barca failed to identify any “benefits.” In fact, Mr. Barca did not seek
 18 to determine “costs” and “benefits.” He concedes that his analysis was, from the

1 beginning, designed only as follows: “The purpose of the cost-benefit analysis included
2 as Exh. EB-9 was *to quantify the cost (if any) of forgiving arrearages*, assuming
3 customers with an arrearage stayed current on their PWSA bills.” (OCA-VIII-29)
4 (emphasis added). Since Mr. Barca did not set out to determine whether, or to what
5 extent, “benefits” might arise from using the alternative arrearage forgiveness procedures,
6 he assigned no dollar value to any benefits in his “benefit-cost analysis.” (OCA-VIII-30).

7 **Q. HOW DID MR. BARCA’S BENEFIT-COST ANALYSIS ASSESS ANY**
8 **IMPROVEMENT IN THE FORGIVENESS OF ARREARS THAT WOULD ARISE**
9 **FROM ADOPTING THE ALTERNATIVE ARREARAGE FORGIVENESS**
10 **PROCEDURES?**

11 A. Mr. Barca made no effort to assess the extent of changes in the extent to which pre-
12 existing arrears would be forgiven under the alternative arrearage forgiveness procedures
13 rather than under PWSA’s existing procedures. He stated that doing so would not be
14 possible “given the unknowns of customers missing payments, making infrequent
15 payments, or customers not making payments at all.” (OCA-VIII-27). He declined to use
16 the historical data on actual, known, historic, payment patterns of AFP participants to
17 determine what the difference in forgiveness would have been under the existing
18 procedures versus the alternative procedures. (OCA-VIII-27). Instead, he asserts that “it
19 is impossible to factor in assumptions based on customers missing payments or those that
20 completely stop making payments.” (OCA-VIII-31). He refused to acknowledge that he
21 did not need to “make assumptions.” He could have easily used known, historic, data on
22 the bills and payments of actual AFP participants to determine what arrears would have
23 been forgiven under the existing procedures relative to the alternative procedures.

1 **Q. IS MR. BARCA’S ARREARAGE FORGIVENESS ANALYSIS CONSISTENT**
 2 **WITH PWSA’S REMAINING FILING IN THIS PROCEEDING?**

3 A. No. The fallacy of Mr. Barca’s analysis is seen by the complete disconnect between Mr.
 4 Barca’s numbers and PWSA’s filing in this proceeding. The Table below compares Mr.
 5 Barca’s assumed cost of arrearage forgiveness (Exh. EB-9) to the projected actual cost of
 6 arrears forgiveness that PWSA used to request rates in this proceeding. PWSA’s own
 7 requested cost recovery for arrearage forgiveness, in other words, demonstrates how
 8 disconnected from reality Mr. Barca’s analysis is.

Table 22. Arrearage Forgiveness Costs Assumed in EB-9 (“cost-benefit analysis”) Compared to Requested Arrearage Forgiveness Cost Recovery			
	2024	2025	2026
Cost-benefit AF cost (EB-9)	\$1,231,722	\$1,231,722	\$1,231,722
Requested Cost Recovery (OCA-VIII-13)	\$240,000	\$240,000	\$240,000

9 Based on the data and discussion above, I find that Mr. Barca’s “benefit-cost
 10 analysis” presented in EB-9 is fatally flawed. It cannot reasonably be used to
 11 determine the costs and benefits of moving to alternative arrearage forgiveness
 12 procedures as I have recommended in my testimony. Accordingly, I recommend
 13 adoption of the modifications to the PWSA arrearage forgiveness program that I
 14 have presented in detail above.

1 **Part 5. Recovery of Universal Service Costs.**

2 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
3 **TESTIMONY.**

4 A. In this section of my testimony, I present the projected costs of modifying PWSA's BDP
5 in the ways I recommend above. In addition, I review the rate recovery of PWSA's BDP
6 and arrearage forgiveness costs. I do not address the reasonableness of the proposed CAC
7 Rider as a cost recovery mechanism. That discussion is instead presented in the
8 testimony of OCA witness Karl Pavlovic.

9 **A. The Cost of Modifying PWSA's Bill Discount Program.**

10 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
11 **TESTIMONY.**

12 A. In this part of my testimony, I explain the level of increased costs associated with the
13 modifications I recommend for the PWSA Bill Discount Program (BDP). These costs
14 should be included in base rates.

15 **Q. WHAT LEVEL OF INCREASED COSTS RESULT FROM YOUR**
16 **RECOMMENDED MODIFICATIONS TO THE BDP?**

17 A. I recommend three changes to the BDP that will have cost impacts: (1) adding an
18 additional tier with a 30% discount; (2) increasing the Tier 1 (below 50% FPL) discount
19 from 50% to 60%; and (3) making modest changes in the fixed monthly credit to offset
20 the changes in the minimum bill.

- 21 ➤ The foregone revenue from Tier 1 (below 50% FPL) at a 50% discount is
22 \$224,877 in 2024 and is \$332,027 in 2025. (OCA-VIII-10). The foregone
23 revenue from Tier 1 at a 60% discount is \$269,852 in 2024 and \$398,433 in

1 2025. The cost of increasing the discount is thus \$44,975 in 2024 and is
2 \$66,406 in 2025.

3 ➤ The monthly bill for a Tier 2 customer (50% to 100% FPL) would be \$51.85
4 with no volumetric discount in 2024 and \$36.76 with a 30% discount. (OCA-
5 VIII-8), a monthly difference of \$15.09. The monthly bill for a Tier 2
6 customer would be \$70.41 with no volumetric discount in 2025 and \$46.87
7 with a 30% discount (Id.), a monthly difference of \$23.54. Given PWSA's
8 report of 1,359 BDP participants with annual income at 50% to 150% FPL in
9 June 2023 (United-I-11.b), the total cost of the 30% discount would thus be
10 \$246,088 in 2024 ($[\$51.85 - \$36.76] = \$15.09/\text{month} \times [1,359 \text{ participants} \times$
11 12 monthly bills]). PWSA estimates the same number of CAP bills in 2025 as
12 in prior years. The total cost of the 30% discount in 2025 would thus be
13 \$383,890 in 2025 ($[\$70.41 - \$46.87] = \$23.54/\text{month} \times [1,359 \times 12]$ monthly
14 bills).

15 ➤ The cost of increasing the fixed monthly credit would be \$0 in 2024 (since it
16 would not go into effect until the rate design change in 2025). The cost in
17 2025 would be \$5 per month for all CAP participants taking water service. It
18 would be \$3 per month for all CAP participants taking wastewater service.
19 Given PWSA's estimate of 55,028 CAP water bills (50 – 150% PL) and of
20 11,141 CAP50 water bills (below 50% FPL), the 2025 water cost would be
21 \$330,845 ($[55,028 + 11,141] \times \$5/\text{month}$). Given PWSA's estimate of 78,870
22 CAP wastewater bills (50 – 150% FPL) and of 16,524 CAP50 wastewater

1 bills (below 50% FPL), the 2025 wastewater cost would be \$286,182 ([78,870
2 + 16,524] x \$3 per month).

3 The dollars to be placed into rates in 2024 would be \$560,915 (\$44,975 + \$269,852 +
4 \$246,088).

5 **B. The Cost of Modifying PWSA's Arrearage Forgiveness Program**

6 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
7 **TESTIMONY.**

8 A. In this section of my testimony, I explain the level of increased costs associated with the
9 modifications I recommend for the PWSA Arrearage Forgiveness Program (AFP). These
10 costs should be included in base rates.

11 **Q. WHAT LEVEL OF INCREASED COSTS RESULT FROM YOUR**
12 **RECOMMENDED MODIFICATIONS TO THE AFP?**

13 A. I recommend a series of modifications to the AFP that will increase the rate at which
14 program participants will earn arrearage forgiveness. According to PWSA, in the 12
15 months ending May 2023, 68.7% of BDP participants made payments toward their
16 monthly bills. (OCA-III-47(f), 47(i)). This is consistent with the experience of
17 participants in Pennsylvania's EDC CAPs (66.8% in 2021), and somewhat higher than
18 the participants in Pennsylvania's NGDC CAPS (57.0% in 2021). Using the number of
19 customers who enrolled in BDP each month with a pre-program arrearage, using the
20 average arrearage of those customers, (United-I-12), and assuming 100% of the BDP
21 customers with pre-program arrears will also enroll in the AFP to obtain forgiveness of
22 those arrears, I determined that the cumulative pre-program arrears of BDP customers
23 enrolled since January 2021 was \$2,673.193 in May 2023. Forgiving those arrears over a

1 24-month period for each full payment made would yield an annual cost of \$871,461.
2 Given that PWSA has already included \$240,000 of arrearage forgiveness costs in rates
3 (OCA-III-12), the total incremental costs of making the enhancements I recommend
4 would be \$631,461. Allocating those costs between water and wastewater in the same
5 way that PWSA proposed to allocate arrearage forgiveness costs between water and
6 wastewater (OCA-III-12), the costs of my recommendation would be \$275,815 for water
7 and \$373,646 for wastewater.

8 **Part 6. Treatment of Mail “Undeliverable as Addressed.”**

9 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
10 **TESTIMONY.**

11 A. In this section of my testimony, I address how PWSA handles situations where it mails a
12 PWSA bill, or notice of a potential nonpayment disconnection, or a BDP recertification
13 notice, which mailing is returned to PWSA as undeliverable as addressed (UAA). When
14 asked for a detailed explanation of what response PWSA makes when it receives returned
15 mail, PWSA referenced its dunning process, and stated that “the process continues even if
16 an invoice or mailed notice is returned.” (OCA-III-35). PWSA stated, however, that it
17 would continue with its established process to post a 3-day pre-termination notice, or to
18 make personal contact at the time of a disconnection, to encourage customers to “halt the
19 termination by entering into payment arrangements, enrolling in one or more [of] PWSA
20 customer assistance programs, submitting a medical [form], or submitting a Protection
21 From Abuse order or some other court order.” (Id.)

22 PWSA tracks very little data about the extent of hardships imposed by mail that is
23 returned UAA. However, the data does show that the extent of residential bills that are

1 returned as undeliverable is substantial in the PWSA service territory. PWSA first began
2 to track such returned mail in March of 2023. In the first three months, PWSA found that
3 it had: (1) 1,556 returned bills in March 2023; (2) 1,119 returned bills in April 2023; and
4 (3) 1,771 returned bills in May 2021. (OCA-III-33).

5 PWSA does not track what occurs when a customer does not make a bill payment
6 because that customer never received their bill. For example, PWSA does not track either
7 (1) the number of accounts for which bills were returned to PWSA as undeliverable as
8 addressed who were subsequently sent a notice of disconnection for nonpayment; or (2)
9 the number of mailed notices of disconnection for nonpayment that were returned to
10 PWSA as undeliverable as addressed. (OCA-III-33). It certainly does not track
11 information geographically. For example, it does not track zip code data on: (1) the
12 number of monthly bills that have been returned to PWSA as undeliverable as addressed;
13 (2) the number of accounts for which bills were returned to PWSA as undeliverable as
14 addressed who were subsequently sent a notice of disconnection for nonpayment; or (3)
15 the number of mailed notices of disconnection for nonpayment that were returned to
16 PWSA as undeliverable as addressed. (OCA-III-34).

17 **Q. IS IT REASONABLE FOR PWSA TO ATTRIBUTE MAIL THAT IS RETURNED**
18 **AS UNDELIVERABLE TO CUSTOMERS FAILING TO GIVE PWSA A**
19 **CORRECT ADDRESS?**

20 A. No. While PWSA has just begun to track mail returned to it as undeliverable, the U.S.
21 Postal Service (USPS) has kept detailed statistics for a considerable time. Returned mail
22 to the USPS is referred to by the technical term “Undeliverable As Addressed” (UAA).
23 According to the USPS procedures manual, there are nearly 20 reasons why mail may be

1 UAA. The USPS publishes monthly statistics on UAA mail. Having an “insufficient
 2 address” is a relatively small portion of UAA mail each month. Other reasons, having
 3 little or nothing to do with what information a customer provides PWSA, make
 4 substantive contributions to UAA. Selected data on reasons for UAA shows some of the
 5 primary reasons for mail being UAA in the most recent five months (February, March,
 6 April, May, June) of 2023.

Table 23. Undeliverable As Addressed (UAA) Class Volume (selected UAA Reasons)⁵⁹

UAA Reason Description	February 2023	March 2023	April 2023	May 2023	June 2023
Insufficient address	8.14%	8.21%	8.22%	8.35%	8.99%
Illegible	0.08%	0.07%	0.07%	0.07%	0.06%
No mail receptacle	2.56%	2.83%	2.87%	2.79%	2.97%
No such number	2.69%	2.86%	2.81%	2.80%	2.89%
No such street	1.07%	1.06%	1.07%	1.08%	1.11%

7 The reasons identified above may have nothing to do with factors within the control of a
 8 PWSA customer. Having no mail receptacle, for example, often occurs at rental units
 9 where the property owner, not the occupant, has failed to maintain a usable mailbox. An
 10 “insufficient address” often occurs when an apartment or unit number is placed in the
 11 “primary” address line (along with the street address) rather than in the “secondary”
 12 address line of the mailing address. Particularly in urban areas, cities rename streets
 13 and/or renumber housing units resulting in UAA errors of “no such number” or “no such
 14 street.” The UAA error “attempted not known” often occurs when numbers in the
 15 address get inadvertently transposed, a circumstance also often yielding an “insufficient

⁵⁹ <https://postalpro.usps.com/address-quality-solutions/undeliverable-addressed-uaa-mail> (data files: Monthly UAA Statistics by UAA Reason)

1 address” UAA error. Indeed, a 2015 “Management Advisory Report” by the Office of the
 2 Inspector General for the USPS reported that “the Postal Service itself is responsible for
 3 about 23 percent due to sorting errors or failed deliveries.”⁶⁰

4 In addition to the monthly reporting of *total* UAA volume (by reason for the UAA mail),
 5 the USPS also publishes quarterly statistical reports of UAA volume by industry type.
 6 Since the utility industry is a major mass mailer, utilities are one of the industries for
 7 which data is separately reported.

UAA Reason Description	Utilities			
	FY22 QTR4	FY23 QTR1	FY23 QTR2	FY23 QTR3
Attempted not known	12.19%	12.39%	13.47%	13.80%
Insufficient address	8.98%	9.58%	9.93%	9.92%
Illegible	0.05%	0.06%	0.08%	0.07%
No mail receptacle	4.06%	4.06%	3.80%	3.99%
No such number	2.97%	3.02%	2.93%	2.99%
No such street	1.02%	1.07%	1.04%	1.08%

8 Under PWSA’s policy with respect to UAA mail (i.e., “the dunning process continues”
 9 [OCA-III-35]), a customer would have no indication that the City of Pittsburgh may have
 10 renumbered some housing units, or that PWSA may have transposed some digits in their
 11 address or zip code, or that placing their apartment unit number in the same address line

⁶⁰ Office of Inspector General, United States Postal Service, Strategies for Reducing Undeliverable As Addressed Mail, Management Advisory Report, at 1, Report Number MS-MA-15-006 (May 1, 2015), <https://www.uspsog.gov/reports/audit-reports/management-advisory-strategies-reducing-undeliverable-addressed-mail>

⁶¹ <https://postalpro.usps.com/address-quality-solutions/undeliverable-addressed-uaa-mail> (data files: Quarterly UAA Statistics by Mailing Industry)

1 as their street address, might result in undeliverable mail, until their service is
2 disconnected for nonpayment, or they possibly receive a short-term notice of termination.
3 When a customer goes without receiving a bill, they would have no reason to wonder
4 why they did not receive a disconnection notice. The only party to the transaction who
5 would know that something is awry would be PWSA, who receives the returned UAA
6 mail returned to it.

7 **Q. DO OTHER PENNSYLVANIA UTILITIES HAVE A SPECIFIC POLICY**
8 **REGARDING UAA MAIL?**

9 A. Yes. In the natural gas industry, Columbia Gas sends returned bills to an outside service
10 provider who specializes in Returned Mail processing, Redsson. If Redsson finds a
11 correct or alternative address for the customer, the updated information is passed to
12 CGPA's system in an electronic transmission file. If an update is not available, that will
13 also be passed to CGPA in the transmission file and trigger an exception on the account
14 for manual review and follow-up with the customer. Returned disconnection notices are
15 then sent to the Company's internal Revenue Recovery department. The Revenue
16 Recovery department will contact the customer to validate or obtain appropriate mailing
17 address. If the address is unable to be validated with the customer, Columbia will contact
18 the property owner if applicable. If Columbia receives three returned termination notices
19 on the account, Columbia will pursue termination of the premise following regulatory
20 guidelines.

21 Similarly, in the water industry, Pennsylvania American Water Company is working on a
22 system enhancement to create a Business Performance Exception Management (BPEM)
23 if multiple pieces of mail are returned as undeliverable within a certain time period for a

1 customer service representative to follow up with the customer to update their contact
2 information; enable reports on undeliverable mail; generate an email (if an email address
3 is attached to the account), phone call or text to advise of undelivered mail and encourage
4 the customer to log in online to verify and update their information or if they do not have
5 an online account, ask that they contact the Customer Service Center.

6 Either of these approaches would be a reasonable response for PWSA to undertake in
7 response to bills and/or disconnect notices that are returned as undeliverable as addressed
8 (UAA). It would be reasonable for PWSA to create a process to respond to UAA mail
9 that is returned to the utility.

10 **Q. IS THERE OTHER PRECEDENT REQUIRING THE ADOPTION OF SPECIFIC**
11 **RESPONSES TO MAIL RETURNED AS UAA?**

12 A. Yes. Under federal law, states must take all reasonable measures to ensure that
13 individuals who are eligible for both Medicaid and the federal Children's Health
14 Insurance Program (CHIP) remain enrolled as long as they meet eligibility criteria. This
15 includes both (1) maintaining regular communication with beneficiaries, and (2)
16 attempting to locate beneficiaries when mail is returned. The COVID-19 public health
17 emergency has disrupted state eligibility and enrollment operations and beneficiary
18 communications, and the resulting economic recession has amplified housing instability.
19 Accordingly, there was an increased risk that states would inappropriately terminate
20 eligible beneficiaries as states restored routine operations when the health emergency
21 ended. On December 29, 2022, the Consolidated Appropriations Act, 2023 (P.L. 117-

1 328) (CAA, 2023) was enacted.⁶² Pursuant to the new law, Section 5131 added a new
2 subsection (f) to section 6008 of the Families First Coronavirus Response Act (FFCRA).
3 States seeking additional federal Medicaid funding must, among other things, meet
4 certain new conditions under section 6008(f) of the FFCRA. Those “new conditions”
5 include “undertak[ing] a good-faith effort to contact an individual *using more than one*
6 *modality prior to terminating their enrollment on the basis of returned mail.*” (emphasis
7 added)⁶³

8 **Q. WHAT DO YOU CONCLUDE AND RECOMMEND?**

9 A. The clear policy of the State of Pennsylvania is that utility customers should not have
10 essential utility service disconnected for nonpayment without first receiving timely and
11 adequate pre-termination notice. I recommend that PWSA be directed to place a
12 collection hold on all accounts for which bills and/or disconnection notices are returned
13 UAA.

14 I further recommend that PWSA be directed to adopt a procedure which would create an
15 exception if multiple pieces of mail are returned as undeliverable within a certain time
16 period for a customer service representative to follow up with the customer to update
17 their contact information; enable reports on undeliverable mail; generate an email (if an
18 email address is attached to the account), phone call or text to advise of undelivered mail
19 and encourage the customer to log in online to verify and update their information or, if
20 they do not have an online account, ask that they contact the Customer Service Center. I

⁶² <https://www.congress.gov/117/bills/hr2617/BILLS-117hr2617enr.pdf>

⁶³ Id., at section 6008(f)(2)(C).

1 finally recommend that this same procedure be applied to notices regarding requirements
2 to maintain participation in PWSA’s BDP and/or AFP (e.g., the need to periodically
3 recertify).

4 **Part 7. Response to Public Input Hearing Testimony (PIH).**

5 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
6 **TESTIMONY.**

7 A. In this section of my testimony, I respond to certain testimony provided at the public
8 input hearings of July 25, 2023 (afternoon and evening) and July 27, 2023 (afternoon and
9 evening). My understanding of the public input that was provided at those hearings
10 derives from my review of the written transcripts of those hearings. Virtually every
11 aspect of my testimony presented above finds support in the real life experiences
12 articulated to the PUC through the public input hearing testimony I respond to.⁶⁴

13 **Q. WHAT IS THE FIRST ISSUE YOU WISH TO ADDRESS?**

14 A. The PIH process elicited testimony that profoundly supports my discussion of the need to
15 address affordability through PWSA’s Bill Discount Program. Simply offering “some”
16 assistance is not sufficient. The testimony of Dan Gladis, chief of staff to State
17 Representative Jessica Benham is one example. He stated that the Representative’s office
18 “hear[s] stories of the significant hardship that people face every day. People who are
19 making difficult choices between medicine, paying bills, and the quality or quantity of
20 food that they buy. . .It’s great to have infrastructure that works. But if you can’t afford to

⁶⁴ Since the public input hearing transcripts were sequentially paginated (i.e., the page numbering did not start over for each hearing), my citations to public input testimony will be to Public Input Hearing (PIH) transcript page numbers, but not to the date and time of the hearing.

1 turn on the tap, then it's really of no benefit to you in the long run." (PIH Tr., at 74 –
 2 75).⁶⁵ The Commission should heed the insights, too, of Ms. MJ Samson, a committee
 3 woman for the 11th Ward, Fourth District. Ms. Samson noted that the Commission may
 4 seldom hear from those "individuals who are hurting worse. . .[T]hey're reluctant to
 5 come forward because they don't really know what to say other than that they're in pain."
 6 (PIH Tr., at 134, 135).

7 My testimony offers a remedy. This repeated PIH testimony supports my
 8 recommendation for PWSA to divide Tier 2 of its existing discount structure into two
 9 tiers, and offering additional assistance to customers with annual income exceeding 50%
 10 but not to exceed 100% PL.

11 **Q. WHAT IS THE SECOND ISSUE TO WHICH YOU WISH TO RESPOND?**

12 A. The PIH testimony supports the conclusion that there are customers who may be
 13 somewhat above the traditional income eligibility definition of 150% FPL who,
 14 nonetheless, have substantial difficulties in paying their PWSA bills. Patrice McNeely,
 15 for example, testified "I can't go to my – my employer and ask for a raise to pay my
 16 water. I can't do that." (PIH Tr., at 127). She was like Myra Taylor, who testified "This
 17 year, I received a 2.5 percent increase in my pay. I call myself a middle income family,
 18 and that pay raise was just over \$1 per hour. . .With having that barely –just over that \$1

⁶⁵ See also, the PIH testimony of Benjamin Chiszar, a "disabled veteran" who testified to the "serious choices" that will be forced on low-income customers by PWSA's proposed rate hike. (PIH Tr., at 77). In addition, Mr. Richard Marini, testified to "older people that live paycheck to paycheck" that are "going to have to decide between food, medicine, and a water bill." (PIH Tr., at 79 – 80). In contrast, DeWitt Walton, a PWSA customer and an Allegheny County Councilman, spoke not merely of the immediate adverse impacts, but the long term impacts as well ("this proposed rate increase will make it impossible for them to survive *or even think about flourishing*." (PIH Tr., at 116, 117) (emphasis added).

1 increase an hour, it's not sustainable for us to have our utilities, such as water, which is
 2 mandatory to live, to go up so high so fast." (PIH Tr., at 267, 268). Ms. Taylor testified
 3 that "many people that I know, like my neighbors, we just don't qualify for any assistance
 4 programs. . ." (PIH Tr., at 268).⁶⁶ As PIH witness Rita Porterfield testified, PWSA's rate
 5 increases "come on the backs of not only the lower class and lower income, but the
 6 working class, those who are just barely making it, and those who would not even
 7 otherwise qualify, but still find it as struggle." (PIH Tr., at 192, 193).

8 This testimony provides strong support for the PWSA proposal to expand the maximum
 9 income eligibility of its BDP program, which I recommend be approved, from 150% to
 10 200% FPL.

11 **Q. WHAT IS THE THIRD ISSUE YOU WISH TO ADDRESS?**

12 A. Participants in the PIH process noted that the impact of PWSA rate hikes need to be
 13 assessed not only from the perspective of the immediate impact, but also from the
 14 perspective of what impacts arise over time. Mr. Walton, for example, noted that he
 15 "understand[s] that PWSA is suggesting that they have assistance programs for low
 16 income individuals." (PIH Tr., at 117). However, he noted that "at the levels they are
 17 suggesting, that assistance will not cover the rate increases themselves. It is – it's
 18 untenable. It's unrealistic. It's impracticable at best." (Id.) His testimony was supported

⁶⁶ See also, the PIH testimony of Candice Herriott, who stated that "I'm more of a lower middle class customer, so I make obviously more money to be able to get assistance. But sometimes I have to rob Peter to pay Paul when it comes time to pay bills." (PIH Tr., at 274). These customer in need may not be amongst those traditionally considered to be "low-income." Rita Porterfield, for example, testified that "I am 35 and a millennial and my story is not atypical as PWSA ratepayer. I work for a public entity. I work for a local government. I work full time. . . I do not clear \$60,000 a year." She has a 4-person household. Ms. Porterfield testified the PWSA rates, as proposed would that would do to me would push me from middle class to need. And a water bill shouldn't do that. A necessity shouldn't do that." (PIH Tr. At 278, 279).

1 by the PIH testimony of Ms. Becky Boyle, presented on behalf of Senator Lindsey
2 Williams. Ms. Boyle correctly noted: “[T]his rate increase request comes directly on the
3 heels of several years of rate increases, including the 13.9 percent increase as a result of
4 the 2018 rate increase case, and an 8.9 percent increase as a result of the 2021 rate
5 increase case. Simply put, PWSA customers have faced soaring water and wastewater
6 costs over the past five years.” (PIH Tr., at 182, 183).

7 This testimony presents strong support for my conclusion that the Tier 1 discount (i.e., for
8 those with annual income less than 50% FPL) should be adjusted upward to take into
9 account the decreased affordability attributable to the current proposed rate hike. It is
10 support for my recommendation to increase the Tier 1 volumetric discount from 50% to
11 60%.

12 **Q. WHAT IS THE FOURTH ISSUE YOU WISH TO ADDRESS?**

13 A. The PIH testimony provides strong support for my recommendations regarding the need
14 to improve the outreach, particularly to PWSA’s low-income communities. Sonia
15 Rucpic, for example, testified about the BDP that “it is clear right now a great many
16 residents who do qualify don’t know about the program and are not enrolled in it. . .So
17 PWSA could do a better job of letting residents know about this program in addition to
18 expanding it.” (PIH Tr., at 188 – 189). Leslie Centola testified on behalf of Upstream
19 Pittsburgh, a local nonprofit focused on clean water, stormwater management, and
20 climate justice. She noted the potential benefits of having specific PWSA “community
21 outreach staff.” (PIH Tr., at 211 – 212). Just as importantly, however, was her testimony
22 that “we’re always happy to work with PWSA.” (Id., at 212). This notion of the
23 importance of grassroots outreach was emphasized time and again. Ms. Nyota Robinson

1 said, “I knew nothing about this meeting except for someone calling me and telling me.”
2 (PIH Tr., at 219 – 220).⁶⁷

3 Mr. Curtis Davon, who spoke on behalf of Clean Water Action, another local nonprofit,
4 stated that “PWSA can do a better job of reaching out to those that they serve.” (PIH Tr.,
5 at 249). He, too, noted the benefits of a grassroots approach, listing examples such as
6 “things like door hangers, reaching out to the council, coming to community meetings
7 and centers, and working with organizations like Clean Water. . .” (Id.) Allison McLeod,
8 the founder of Building Briges Parent Support Group, provided additional support for this
9 need for grassroots outreach. “With all the community events that took place all across
10 the City of Pittsburgh in the last few months, festivals, things like that, where are the
11 people who are on foot and on ground advertising these events?” (PIH Tr., at 263). Ms.
12 Williams testimony was similar. “We have committee people from Allegheny County,
13 Democratic Committee, that could spread the word. We have very popular people that
14 can spread the word.” (PIH Tr., at 292).

15 The PIH testimony provides strong support for the recommendations in my testimony
16 regarding not merely the need to improve outreach, but also the ways in which PWSA
17 can engage in such improved outreach.

⁶⁷ See also, the testimony of Kim Williams, who said “I found out today through a friend that this meeting was taking place.” (PIH Tr., at 288).

1 **Q. IS THERE A FIFTH ISSUE RAISED IN THE PIH PROCESS TO WHICH YOU**
2 **WISH TO RESPOND?**

3 A. Yes. The PIH testimony supported the need to modify the PWSA arrearage forgiveness
4 program to allow that program to provide meaningful relief from pre-existing arrears.
5 Candice Herriott testified as to how, because of a dispute over whether or not she had a
6 leak, she incurred (“And now, I’m still stuck with a very sky high water bill that I’m
7 trying to pay down. And it’s become impossible sometimes to get myself caught up.”)
8 (PIH Tr., at 274, 275). With a lack of any relief, the PWSA rate hike compounds her
9 problem. She states, “So a bill increase is not only going to hurt me for future bills, but
10 it’s also just going to add more insult to injury to the high bill that I have [and] to the leak
11 that I’m paying for right now, that I’m still paying for months and months, almost a year
12 later, trying to take care of the leak.” (PIH Tr., at 275).

13 Ms. Herriott’s testimony supports the recommendations I made to modify the PWSA
14 Arrearage Forgiveness Program in order for the AFP to provide meaningful assistance.

15 **Q. IS THERE A FINAL ISSUED RAISED IN THE PIH PROCESS TO WHICH YOU**
16 **WISH TO RESPOND?**

17 A. Yes. The PIH testimony was strongly supportive of my recommendations that PWSA
18 undertake greater effort to serve the needs of its low-income tenants. Caroline West, an
19 officer of the Apartment Association of Metropolitan Pittsburgh (and chair of its
20 government and law committee) addressed the needs of low-income tenants. “Those who
21 rent their homes,” she said, “often do not qualify for these programs, as they, by
22 definition, are not PWSA customers.” (PIH Tr., at 254). She continued on to testify:

1 So, in short, even though renters comprise more than half of Pittsburgh’s
2 residential population, renters are excluded from obtaining financial
3 assistance and effectively shut out of this administrative process, as they are
4 not PWSA customers. And even though multifamily building owners are
5 PWSA customers and the multifamily industry in Pittsburgh is an
6 increasingly critical stakeholders, PWSA has failed to proactively engage
7 with us to discuss or brainstorm alternative solutions to mitigate the
8 detrimental impact of this exorbitant rate increase on the majority of the City
9 citizens. . .

10 (PIH Tr., at 255). My testimony addresses the needs of Pittsburgh tenants, and offers
11 recommendations on how to address the needs of tenants. Ms. West’s testimony provides
12 additional support for adopting my recommendations.

13 **Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

14 A. Yes. However, I reserve the right to supplement this testimony if additional relevant
15 information is received.

Colton Exhibits

**Exhibit RDC-1: Summary Vitae
Roger Colton
Fisher, Sheehan & Colton
Public Finance and General Economics
Belmont, MA**

* * * * *

EDUCATION:

- J.D. (Order of the Coif), University of Florida (1981)
- M.A. (Regulatory Economics), McGregor School, Antioch University (1993)
- B.A. Iowa State University (1975) (journalism, political science, speech)

PROFESSIONAL EXPERIENCE:

Fisher, Sheehan and Colton, Public Finance and General Economics: 1985 – present.

As a co-founder of this economics consulting partnership, Colton provides services in a variety of areas, including: regulatory economics, poverty law and economics, public benefits, fair housing, community development, energy efficiency, utility law and economics (energy, telecommunications, water/sewer), government budgeting, and planning and zoning.

Colton has testified in state and federal courts in the United States and Canada, as well as before regulatory and legislative bodies in more than forty (40) states. He is particularly noted for creative program design and implementation within tight budget constraints.

PROFESSIONAL AFFILIATIONS:

- Past Chair: Belmont Zoning By-law Review Working Committee (climate change)
- Member: Board of Directors, Massachusetts Rivers Alliance
- Columnist: Belmont Citizen-Herald
- Producer: Belmont Media Center: BMC Podcast Network
- Host: Belmont Media Center: Belmont Journal
- Member: Belmont Town Meeting
- Vice-chair: Belmont Light General Manager Screening Committee
- Past Chair: Belmont Goes Solar
- Coordinator: BelmontBudget.org (Belmont’s Community Budget Forum)
- Coordinator: Belmont Affordable Shelter Fund (BASf)
- Past Chair: Belmont Solar Initiative Oversight Committee
- Past Member: City of Detroit Blue Ribbon Panel on Water Affordability
- Past Chair: Belmont Energy Committee

- Member: Massachusetts Municipal Energy Group (Mass Municipal Association)
- Past Chair: Housing Work Group, Belmont (MA) Comprehensive Planning Process
- Past Chair: Board of Directors, Belmont Housing Trust, Inc.
- Past Chair: Waverley Square Fire Station Re-use Study Committee (Belmont MA)
- Past Member: Belmont (MA) Energy and Facilities Work Group
- Past Member: Belmont (MA) Uplands Advisory Committee
- Past Member: Advisory Board: Fair Housing Center of Greater Boston.
- Past Chair: Fair Housing Committee, Town of Belmont (MA)
- Past Member: Aggregation Advisory Committee, New York State Energy Research and Development Authority.
- Past Member: Board of Directors, Vermont Energy Investment Corporation.
- Past Member: Board of Directors, National Fuel Funds Network
- Past Member: Board of Directors, Affordable Comfort, Inc.
- Past Member: National Advisory Committee, U.S. Department of Health and Human Services, Administration for Children and Families, Performance Goals for Low-Income Home Energy Assistance.
- Past Member: Editorial Advisory Board, International Library, *Public Utility Law Anthology*.
- Past Member: ASHRAE Guidelines Committee, GPC-8, *Energy Cost Allocation of Comfort HVAC Systems for Multiple Occupancy Buildings*
- Past Member: National Advisory Committee, U.S. Department of Housing and Urban Development, Calculation of Utility Allowances for Public Housing.
- Past Member: National Advisory Board: Energy Financing Alternatives for Subsidized Housing, New York State Energy Research and Development Authority.

PROFESSIONAL ASSOCIATIONS:

- National Association of Housing and Redevelopment Officials (NAHRO)

Over the past decade, most state and local agencies that administer programs supporting low-income families — such as Medicaid, the Supplemental Nutrition Assistance Program (SNAP, formerly food stamps), and Temporary Assistance for Needy Families (TANF) — have taken steps to streamline eligibility determinations. Spurred by new requirements and funding connected with the Affordable Care Act, states have deployed new eligibility and enrollment systems, online applications, and electronic case files. These modernizations have, in most cases, simplified processes for families and improved accuracy and efficiency.

As agencies continue the modernization process, this paper looks at the next phase in efforts to improve government's interactions with those it serves through technology. Improved client-facing processes — systems that applicants and recipients use directly for actions like applying, submitting documents, or getting information about their case — allow clients to better obtain information and receive benefits more quickly. They also can help agencies get the information they need to conduct eligibility determinations and improve performance and outcomes.

The first section of this paper, **Technology in Action**, outlines common challenges agencies face while administering these benefits and gives examples of how the technologies profiled in this paper can streamline processes. The technologies discussed here are not theoretical; rather, they are applicable to real-world issues clients and agencies face each day.

The second section, **Best Practices by Technology**, provides a brief overview of each technology, how it can be used in the public benefits arena, and best practices for implementing it. It covers:

- Web-based tools – including advances in online web portals and electronic notices;
- Mobile-based technology – including texting, mobile apps, and instant messaging; and
- Call center tools – including interactive voice response and telephonic signatures.

The next section, **Considerations When Implementing Technology**, discusses the importance of user-centered design, explains why technology is just one piece of the puzzle and must be considered in conjunction with policy and operations, and outlines the role of advocates.

The final section discusses what is **On the Horizon in** this field and developing technology that may eventually play a role in public benefits administration.

For technology to be effective, it must focus on the user — both clients seeking critical benefits to support their families and eligibility workers handling overwhelming caseloads with inadequate resources. Technology must also be considered as part of the broader eligibility and enrollment process, in conjunction with policies and operations. Technology alone isn't the solution to the

challenges outlined in this report, but can be a critical part of a solution when combined with changes to other parts of the process.

Further, technology like online portals, texting, and electronic notices must be an addition, not a replacement. Health and human services programs serve a wide variety of clients with varying levels of Internet access, computer literacy, and comfort with technology. These tools can provide convenient and efficient ways for some clients to conduct business, but more traditional access points like phone and in-person assistance should remain available for those who need them.

This work isn't easy. It often requires wrestling with funding, staffing, procurements, vendors, and a wide variety of state and federal rules about what can and can't be done. But the solutions profiled in this paper can significantly enhance the experience of clients and staff. Many of these technologies are commonly used across various other industries; users in government should also have access to these ways of conducting business.

Information and examples in this paper are based on the latest research and interviews with a wide range of local and state agencies that have implemented new client-facing technology. This paper provides practical, hands-on advice to make client interactions more understandable, workable, and successful for all stakeholders. Government agencies and advocates can use this paper to learn about implementing client-facing technology to improve the application, renewal, and case management processes for Medicaid, SNAP, TANF, and other human service programs. Local and state agencies may be able to use these innovations to improve customer service, increase participation, and achieve administrative efficiencies.

Part 2 Technology in Action

Agencies face a myriad of challenges in assisting clients in the eligibility and enrollment process. No one technology product can fix all problems, but once the underlying problems are identified, agencies can use a combination of the technologies discussed in the following sections to address common obstacles and improve customer service, as the examples below show.

Problem #1: An agency has a low completion rate for SNAP interviews at initial application and renewal. Clients are missing their interview appointments, leading to calls to reschedule missed interviews, denials and cancellations, and re-applications.

Underlying Issues:

- Clients don't receive timely notice of the scheduled interview.
- Clients are unable to complete the interview at the scheduled time due to transportation issues and work or school schedules.
- Clients are unable to reach agency staff to reschedule their appointment.

Potential Technology Solutions:

- Accept *telephonic signatures* for applications and renewals completed over the phone. Conduct the interview in conjunction with the application or renewal or allow clients to call in to complete the interview.
- Allow clients to use a *mobile app* or *online portal* to select an interview time that works with their schedule.
- Send clients an *e-notice* with interview appointment information.
- *Text* clients a reminder before the scheduled interview.

Problem #2: An agency has long application processing times because clients don't provide required verification documents with the application and must send them through the mail. Frequently, the documents are never submitted or are lost and applications are denied.

Underlying Issues:

- Clients don't know what documents are required.
- Clients can't electronically submit documents, or must have access to a scanner to do so.
- The agency loses documents that are mailed in or has a backlog in processing mailed documents.

Potential Technology Solutions:

- Send clients an *e-notice* to inform them of what documents are required.
- *Text* clients a reminder that documents are due.
- Allow clients to submit documents through an *online portal*.
- Allow clients to take a picture of documents with their phone and upload it to their case file through an *online portal* or *mobile app*.

Problem #3: An agency has a low rate of completion at renewal. Clients fail to complete the renewal form properly or fail to submit the form and their benefits are terminated. They must reapply to reinstate their benefits.

Underlying Issues:

- Clients are unaware their renewal form is due.
- Clients don't receive the paper renewal form.
- Clients don't provide information on the renewal form they had previously provided the agency and don't realize they are sending in an incomplete form.
- The agency frequently loses paper renewal forms or has a backlog in processing mailed documents.

Potential Technology Solutions:

- Send clients an *e-notice* notifying them that their renewal is due and listing the steps they must take to renew their benefits.
- *Text* clients a reminder that their renewal is due and provide links to the *online portal* and a phone number to call to complete the renewal.
- Use a *telephonic signature* to accept renewals by phone.
- Allow clients to complete their renewal and submit it electronically through the *online portal* or *mobile app*.
- *Pre-fill* client information that the agency has on file on the paper renewal form and through the online renewal application.
- Send a reminder *text* if the renewal hasn't been completed by the due date.

Problem #4: An agency's call center volume is high, leading to long wait times, dropped calls, and customer complaints. Clients frequently must go to offices in person to ask questions and address basic issues, leaving less time for staff to process cases. This further increases call volume as clients call in to find the status of their cases.

Underlying Issues:

- The only way for clients to get information is to talk to someone in the call center.
- The increased volume of callers requires the agency to adjust staffing, which affects other work.
- Wait times are increasing due to the volume of callers and types of questions asked.

Potential Technology Solutions:

- Provide an *instant messaging (IM)* tool for simple questions.
- Use an online *chatbot* that can help answer frequently asked questions.
- Notify callers of expected wait times and offer a callback through the *IVR phone system*.
- Expand functionality of the *online portal* so clients can report changes and check benefit status themselves, freeing up eligibility workers to process cases.

Part 3 Best Practices by Technology

This section summarizes specific types of technology that agencies are using to help clients receive and provide information during the application and renewal processes. Each profile includes details on how the technology generally functions, key features, and considerations to keep in mind based on interviews with agency staff who have implemented the technology.

In the profiles that follow, certain features, functions, or technology may be referred to as Version 1.0 or Version 2.0. For purposes of this guide, Version 1.0 includes client-facing technologies that were commonly used prior to and during implementation of the Affordable Care Act in 2013-2014, such as online applications. Version 2.0 includes newer technologies as well as enhancements to prior technologies.

Checklist of Basic Technology Functions

Individuals use technology for an increasing number of functions and expect it to work in certain ways. Consider how you use technology to shop, send e-mails, text, use social media, or check your bank account balance. Keep these user expectations and industry standards in mind when designing new client-facing technology.

- Don't make clients reset their password every month.
- Any online service should work on all available browsers — Chrome, Firefox, Safari, and Internet Explorer.
- After an action is completed (e.g., document uploaded), provide the client with a confirmation on screen and/or by e-mail.
- Collect email addresses and mobile phone numbers for texting as part of the normal demographic and contact information process rather than asking for that information separately.
- Set appropriate client expectations about new features or tools. Framing a tool as in “beta” (still being tested) and thanking clients for their patience will help until the tool is fully functional.
- Make it easy for a user to find the agency's contact information. Use commonly used icons — such as a picture of a phone to call the agency — to provide visual clues. Create an online form for users to submit questions or comments.
- Allow your solution to use the native (built-in) features of a computer, tablet, or phone, such as using its calendar feature to schedule an appointment or using its camera to upload a document or picture.
- Use navigation signals and progress bars to move through multiple screens.

Section A: Web-Based Tools

Online Portals 2.0

Online portals allow clients to create an account and apply for benefits or perform other case maintenance functions. Most agency websites include an online portal that allows clients to apply for benefits. Many agencies have expanded the services offered through the online portal to provide additional functionality, including a way to report changes, complete and submit a renewal form, or track the status of an application after submission. Investing in a more user-friendly and robust web portal can improve customer service.

Below is a summary of the functions, features, and technical capabilities of the next generation of online portals as compared to the first generation.

Original Functionality		Today's Functionality
Clients may be able to download a blank change report form and submit in person, by mail, or by fax.	Change Reporting	Clients can electronically report changes through the online portal.
Clients may be able to download a blank renewal form and submit in person, by mail, or by fax.	Renewal	Clients can access a pre-populated renewal form that they can electronically sign and submit through the online portal.
Clients must wait for a mailed notice or must call or visit the agency in person to find out their case status.	Case Status	Clients can view case status and updates 24/7 via the online account.
Agency mails paper notices.	Notices	Agency uploads electronic notices to clients' online account and sends clients an email when a new notice is available.
Clients have limited ability to directly upload verification documents with an application or must submit in person, by mail, or by fax.	Documentation	Clients can upload verification documents in a range of file formats from a computer, cloud, or mobile device through the online portal.
Portal can only send application data to the eligibility system.	Back-End Interface	Portal can display case information (e.g., benefit amount) and interface with multiple systems (e.g., can display EBT account balances and transaction data).
Portal's layout, graphics, and font are designed only for viewing from a desktop computer.	Design and Display	Portal's display and features can adapt to multiple devices and screen sizes.
Portal can't work with native features on clients' devices.	Additional Tools and Features	Portal can work with native features on clients' devices, such as calendar and auto-dial.

Key Features of an Online Portal

Today, online portals can do more than simply allow clients to apply for benefits or find basic information. Below is a list of features that could be included in a social services agency's online portal or mobile app. The most commonly asked questions from clients could help identify which of these features would be most useful to clients and best reduce demand on agency staff.

All programs

- Multi-benefit application
- Case status, including upcoming deadlines
- Report changes
- Upload/Manage/View documents
- Renew benefits
- Secure messages
- Preferences to opt in to alerts
- Contact agency
- Office locator and phone numbers
- Schedule or view scheduled appointments
- Frequently asked questions (FAQs)
- Register to vote
- Screening/referrals for other benefits (school lunch, child care, WIC, etc.)

Medicaid Specific

- Display Medicaid card
- Healthcare provider directory
- Select/Change health plan
- List of covered benefits

SNAP Specific

- EBT SNAP balance
- Transaction history
- Retail store locator and map
- Farmers' market locator

Other Programs

- TANF cash balance
- Free ATM locator (TANF)
- Summer meals site finder

Don't forget:

- Agencies can accept electronic signatures for applications, renewals, and other forms.
- Online applications or renewal forms should use dynamic questioning or skip logic to eliminate unnecessary or irrelevant questions (for example, they should only ask applicants who indicate they are female if they are pregnant).

Electronic Notices

Electronic notices (e-notices) are notices of case actions and other notices that are uploaded to a client's online account. E-notices allow clients to quickly access important notices online even if they have difficulty accessing a secure mailbox, move frequently, or are homeless. E-notices also benefit states by increasing the likelihood that clients receive and act on notices to submit documents or complete a renewal. In addition, clients who receive timely information are less likely to call to inquire about case status. While sending both the paper notice and e-notices increases the likelihood of the information reaching clients, agencies may offer individuals the opportunity to “Go green” and receive only e-notices, reducing postage costs.

How it works: Clients who opt in to receive e-notices will receive an email notifying them that they have a new notice. They then must log in to their online account and view their notice.

Requirements: E-notices must be uploaded to clients' online account on the agency's web portal to ensure security and protect privacy. Clients then receive an email notifying them that a new notice is available to view in their online account. E-notices can't be sent directly to clients' email accounts. E-notices are mandatory for Medicaid and are now a state option for SNAP (a waiver was previously required).

Advice from the Ground

- Require clients to create an online account before opting in to e-notices. This will ensure that clients can view the e-notices.
- Ask clients to affirmatively opt in for e-notices. Clients may provide an e-mail address on the application for purposes of their contact information but may not want to receive e-notices.
- Clearly explain to clients what will happen if they opt in for e-notices. Inform them how they will be able to view their notices and if they will continue to get notices by mail.
- Ask clients to confirm, when they opt in for electronic communications, the e-mail address to which they want notices to be sent.
- Explain what other software/hardware may be needed to view e-notices (e.g., Acrobat Reader).
- Allow for opt out at any time and make it easy for clients to do so. For example, allow clients to change communication preferences via their online account.
- Resume mailing notices if electronic communication fails (e.g., undeliverable email address).
- Measure effectiveness by evaluating the percentage of e-notices that clients access via the online portal and the time between receiving an e-mail and accessing the notice.
- Resume mailing notices if clients don't open their e-notices after a set period of time.
- Ensure eligibility workers can see whether clients have opened their e-notices. If clients aren't accessing their e-notices, eligibility workers can remind clients how to access e-notices and how to opt out if they want to receive paper notices.
- Consider adding information to e-notices that paper notices can't provide, like hyperlinks to sites where clients can obtain further information or complete an action.

Readability and Accessibility Still Matter!

To make client-facing technology user-friendly, make the information provided to clients easy to understand and accessible. The literacy and readability standards with which agencies must comply for written and verbal client communications also apply to electronic communications — such as content on online portals or electronic notices. For example:

- Aim for a 6th grade reading level in written content.
- Use commonly used words in place of terms of art, acronyms, or legal language.
- Use less text and more white space.
- Break down complex instructions or processes into steps rather than presenting a long paragraph of text.
- Use simple graphics or icons with only a few different colors.

Client communication using technology must also comply with existing legal requirements to ensure information is accessible. For example, government agencies must ensure their website designs and features are ADA-compliant, such as compatibility with a screen reader for clients who are visually impaired.

Digital content should also be translated into commonly used languages for clients who are Limited English Proficient (LEP). For example, text messages should be sent in the client's preferred language as identified on the application.

Remember to seek user feedback specifically from persons with disabilities and LEP clients to help design, test, and improve the solution.

Section B: Mobile Tools

Text Messaging

Text messaging is a low-cost and effective means of communicating with clients by sending reminders and other information to a client's mobile phone. Text messaging has become the preferred way to communicate – especially for younger adults. While it's convenient for clients to receive messages via text, texting is a personal activity individuals primarily use to communicate with friends and family and shouldn't be overused.

How it works: Agencies may use a contracted service or capabilities within their own systems to send clients text messages at key points during their application or renewal process. Agencies might send a text message reminding clients that their interview date is approaching, that verification documents are due, or that it is time to complete a renewal.

Advice from the Ground

- Comply with opt-in requirements for text messaging.
- To avoid suspicion or being viewed as spam, the first text message an agency sends to a client should include the agency's name. It should also explain how the client can opt out of receiving any further messages.
- Make text messages concise. Messages exceeding 140 characters become more than one text.
- Use plain text instead of rich text or HTML text so clients without smartphones or those with limited data plans can receive texts.
- Where possible, include a telephone number or website for next steps when action is needed.
- Don't use text messaging to send information that isn't time-sensitive or doesn't require action.
- Be prepared to respond to any reply texts. If no staff are assigned to monitor and respond to text messages, reply texts should generate a standard, automatic response referring the client to a customer service number.
- Evaluate privacy and security considerations if collecting clients' personal information via two-way text messaging.

Opt-In Strategies

Clients must opt in, or affirmatively agree to receive electronic communications, before an agency can send electronic communications, but agencies can make it easier for them to do so. For example, the agency could ask individuals to provide their e-mail address or cell number in the first section of an application or renewal process – along with their name and other contact information – rather than in a separate section for electronic communications at the end of the form. A check box would enable them to opt in.

Email: xxxxxxx@xxx.com *I would like to receive information and notices at this email*
Cell number: XXX-XXX-XXXX *OK to receive text messages? (costs may apply)*

Additional tips to remember:

- Provide multiple opportunities to opt in (not just on the application).
- Create an electronic communications policy outlining when the agency will use electronic communications, specifying that clients must affirmatively opt in, and describing the opt-out process. It may also be helpful to explain the benefits to clients (e.g., “to get reminders so you won’t lose your benefits”).
- At the time clients opt in, explain the opt-out process for receiving electronic communications. For example, inform clients in the initial text message that they can opt out through their online account or by replying with a text saying “Stop.”
- Incorporate into existing language of clients’ rights and responsibilities short explanations of the electronics communication policy, how to opt out, and when to expect the first message (e.g., before or after the application has been processed).

Incorporating the “Nudge”

Behavioral economics studies the psychology of individuals to help identify how best to influence, persuade, or encourage individuals to act. When implementing client-facing technology, agencies can benefit from this growing research and design the product to help “nudge” clients to act on a request or to take action. Health and human service agencies can apply behavioral economics by:

- Encouraging action by reminding clients of what they might lose if they don’t act rather than just providing a due date. For example, a SNAP renewal form could include the actual benefit amount the client will lose if they fail to renew.
- Sending notices requiring action with sufficient time for clients to act. Send reminders/notices about completing a renewal before benefits are about to end. Clients may be overwhelmed and mentally unable to prioritize submitting paperwork at the deadline.

For more information, see the Resources page.

Adapting for Mobile Devices

Agency websites can be adapted to make them function well on mobile devices while taking advantage of native features and Application Programming Interfaces (APIs). The next generation of websites must consider the growing number of electronic devices that individuals use to access the Internet. A website display and functionality must be flexible enough to adapt to many different devices – from netbooks to tablets with different screen sizes to a huge variety of smartphones. In addition, agencies can enhance the effectiveness of their systems by using native features of mobile devices and taking advantage of APIs.

Adapt Content and Design

Websites can be designed to be “mobile-friendly,” or easily viewable on the smaller screen common on mobile devices. Agencies must make an affirmative design decision to ensure their online portals are mobile friendly; it is not an automatic feature when creating a website.

A mobile app cannot substitute for a mobile-friendly website; not everyone will download an agency’s mobile app, but many will attempt to view the agency’s online portal using their mobile device. By making the existing web portal mobile friendly, an agency can lay the groundwork for developing a mobile app in the future.

As the use of mobile devices has proliferated, website developers have adopted multiple design approaches to adapting content and design to smaller screens. Three different approaches that agencies could consider adopting for their online portals are discussed below:

	Mobile Friendly	Mobile Optimized	Responsive Website
Description	Single design that considers size of screen for mobile devices. Baseline for mobile website development.	Two separate designs created — one for desktop and one for mobile devices (e.g., www.agency.gov and www.m.agency.gov).	Single design whose layout, content, and orientation can change based on the type of screen or device.
Design Process	Website layout design includes minor adjustments to enable viewing on a mobile device.	<ul style="list-style-type: none"> • Each design is influenced by the features and likely use of the website from different devices. • Mobile website design layout feels similar to a mobile app and includes icons to help navigate (e.g., menu icon vs. text indicating “menu”). Frequently used links and features are prominently displayed on home page. • Content on the desktop version is more robust than the mobile version. Mobile version provides a link to desktop version to access additional content or features. 	<ul style="list-style-type: none"> • Only one design is needed because the layout and content adapt to the size of the mobile device. • All the website information is available via mobile devices. • Links and icons are scaled to be more touch screen and finger friendly.
Cost	Lowest-cost option.	<ul style="list-style-type: none"> • Moderate upfront costs to build the additional website. • Maintenance costs are higher because content and any changes must be updated twice. 	<ul style="list-style-type: none"> • Highest upfront costs to design and develop. • Minimal maintenance costs because only one design needs to be changed or updated.
Limitations	<ul style="list-style-type: none"> • Design meets minimum usability standards. • Content and features may not be easily viewable or usable on mobile devices due to the need to scroll and zoom. • Links and icons are intended for a computer mouse and not easily selected via touch screen. 	<ul style="list-style-type: none"> • User may still need to visit the desktop site to find information or conduct activities. • Requires design and maintenance of two different websites. • Mobile version may still not be as user-friendly to clients as needed. 	Certain content, such as tables and lists, may still require scrolling and zooming to view.

Take Advantage of Native Features

Agencies should ensure the client-facing technology solution can use the built-in capabilities of a mobile device, or its native features. This capability must be affirmatively set out in the design phase.

Below are native features that could help make an agency's technology solution client friendly:

Native Feature	How to Use
Phone Click to Dial	Client can click on the number (or phone icon) to automatically dial.
Camera	Client can click a camera icon (when asked to upload documents) to directly photograph a document.
Media/Storage	Client can select documents from a photo library to upload.
GPS/Location	Client can click on an office address and view a map and/or directions.
Calendar	Client can schedule an appointment and click a calendar icon to automatically enter the date, time, and address in the device's calendar.
Voice Dictation	Client can fill out form fields by speaking.
Security/Biometrics	Client can quickly log in to an app using a fingerprint.

Note on security: Remind clients and assisters to either delete personal information used on a mobile device (including tablets) if it is a shared device or to enable the device's security features.

Take Advantage of APIs

Agencies can further improve mobile apps and online portals by directly providing clients information or services maintained by a different entity. Agencies can take advantage of external partners that have created an API to add more functionality and features to client-facing solutions without requiring the client to go to a different app or website.

For example, an agency's online portal can directly connect with the EBT vendor's database to display clients' current EBT card balance. Or, if another agency maintains a directory of SNAP retailers or Medicaid providers, the agency's system may have an API that an online portal or mobile app can connect to. This allows clients to find this information directly from the agency's product rather than having to search for that information on their own, adding value to the product with minimal additional development costs.

Mobile Apps

Mobile apps are programs that can be downloaded on a client's mobile device. They can include the same features as the online portal, such as reporting changes, renewing benefits, checking case status or benefit amount, or scheduling appointments. Mobile apps are uniquely suited to facilitating document submission by allowing clients to photograph verification documents with their smartphone and easily send them to the agency.

Advice from the Ground

- Create mobile apps that can provide more than one activity or service. Most clients only need to contact the agency a few times per year. More features give clients more reasons to regularly use the app and keep it on their phone.
- Remember the “real estate” for a mobile app is smaller than the online portal. Consider what information clients likely will need when using a mobile app; for all other information, make sure the existing online portal is accessible from a mobile device (see “Adapting for Mobile Devices” for more information). For example, rather than trying to create a duplicate online application that can fit on a mobile app, create a button on the mobile indicating “Apply Here” that can seamlessly link to the existing mobile-friendly application portal.
- Although content may differ slightly between a mobile app and online portal, functions that clients can use should not differ. For example, uploading images should be available via the app as well as the online portal. This allows clients to conduct activities using either the mobile app or the online portal rather than having to use both to complete certain actions.
- With the feature that allows clients to take a picture of verification documents and upload them to their account, integrate software that enhances the quality of the photo by squaring the edges of the picture and making sure there is sufficient light. Allow them to view the image and re-take the picture if needed prior to upload. This will ensure the document is legible and useable for the eligibility worker.
- Since apps use data and data is expensive, simplify where possible when designing the functionality.
- Develop an app re-engagement strategy, including notifications when new features and new program information become available.
- Monitor the reviews clients leave in the App Store or on Google Play for ongoing user feedback and to quickly identify technical problems.
 - Have a standard response for customer service complaints (unrelated to the mobile app) and provide a number for clients to call to address questions on their case.
 - Get email addresses for people struggling with the mobile app and follow up to help them resolve issues.
 - Invite people to rate the app after they used the system once or twice.
- Consider whether to join agencies that are moving away from mobile apps in favor of mobile-friendly online portals. They are generally more accessible (since a client doesn't have to download a separate app and they can be used on multiple devices) and they tend to be cheaper and easier to maintain. Agencies should consider which solution, or combination of solutions, best fits their needs.

Instant Messaging

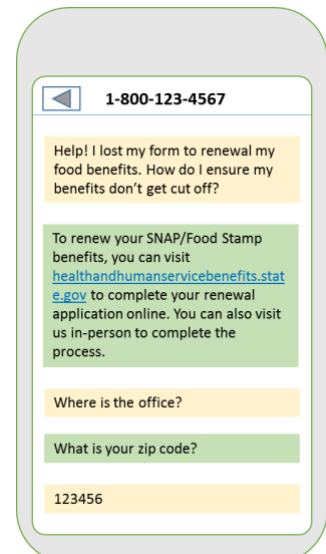

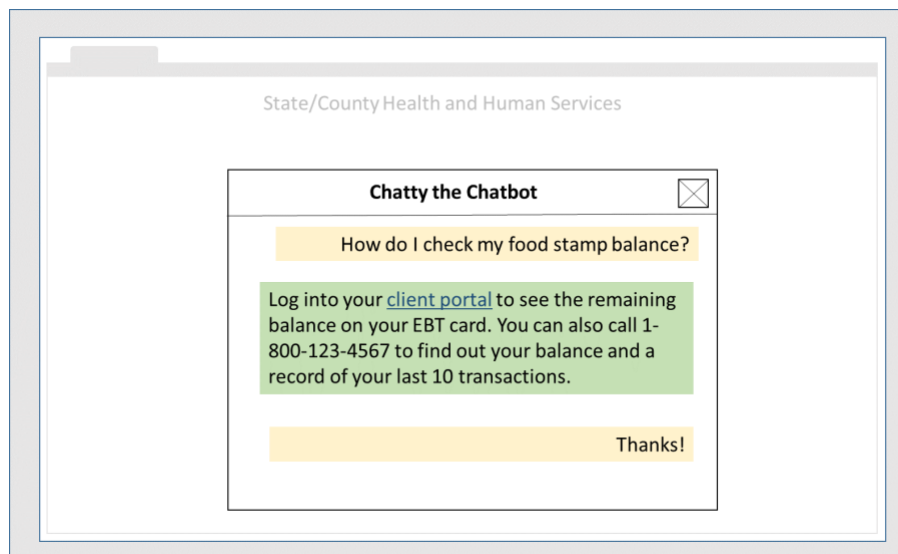

Instant messaging (IM) allows clients to quickly communicate with an agency when they have a simple question or need basic information. This technology should complement rather than replace existing communication platforms or interactive voice response systems.

How it works: Through a mobile app or the agency’s website, clients can click on a “chat now” icon to open a dialogue box where they can type their question. An agency can choose to have dedicated staff who respond in real time to the messages (“live chat”) or can create an automated response system to reply to common questions with pre-programmed responses (“chatbots”). Through either approach, agencies can use IM to provide basic case information (e.g., benefit amounts), answer commonly asked questions (e.g., hours of operation, where to mail an application), or resolve simple problems. For more complex problems, the agency can decide how to refer or hand off an individual to the appropriate contact.

Chatbots

Chatbots – a new form of automated instant messaging technology – can help agencies offer more client-friendly services without additional staffing. One key advantage of chatbots is that the technology is available 24/7, making it convenient for clients. Initial programming of chatbots may take staff time but can help reduce the number of repetitive questions or tasks that staff must handle on an ongoing basis. This helps staff focus on more complex questions.

Chatbots are gaining popularity because they can be used through various technology platforms including text, websites, and mobile instant messaging apps; users need not download a specific mobile app to use chatbots. If personal information is shared via chatbots, make sure the chatbot service provider complies with all security requirements.

Special Considerations for Chatbots

Start small, evaluate the language, and pivot as needed.

Evaluate the wording of the information or database that a chatbot uses to answer questions, including existing FAQ language, so that it includes keywords that clients use when asking a question. For example, clients don't use jargon or legal language to ask a question, but if the chatbot's database does, it will be harder for the chatbot to answer the question.

Take into account commonly misspelled words.

Unlike humans, chatbots rely on clear search queries and can't immediately handle misspelled or vague requests without "training" or "learning" over time. These need to be built into the system and continually expanded through implementation.

Plan for how to handle questions that need a human response.

Clients may ask detailed or complex questions that a chatbot can't answer and require individualized assistance from staff. When clients request detailed case information or ask questions not in the chatbot's database, the chatbot should provide a phone number and inform clients that they will need to speak to someone during business hours for assistance. Chatbots can also be programmed to capture the client's question in the chat and forward the information via email to a staff member. The staff member can research the client's question and call the client back with an answer.

Help the technology learn and improve.

It is important to have an internal process to continually add answers to the chatbot's database. This includes questions that staff initially had to address because the chatbot didn't know the answer. If the chatbot can answer that same question the next time, this frees staff to help clients with issues not easily resolvable by a chatbot.

Advice from the Ground

- Start using an IM platform for easy-to-answer questions or technology support rather than more complex, individualized questions.
- Use IM to help triage a problem and recommend clients call or visit the office to resolve more complex issues.
- Ensure that response times are much shorter for answering an instant message than answering a phone. Individuals are prepared to wait on hold when they reach a call center, but expect an immediate response to an instant message.
- Monitor the type of questions being asked via IM. Update the scripts and automatic responses to reflect new questions. To reduce wait times and frustration, direct individuals with specific types of questions early in the process to the website or call center or recommend that they schedule an appointment.

Section C: Call Center Tools

Interactive Voice Response (IVR) 2.0

Interactive Voice Response (IVR) systems provide automated information and route calls. While agencies have used IVR systems for years, they can upgrade their systems to better answer basic questions and more seamlessly assist clients. Effective IVR systems can save staff time by helping to identify a caller and using a phone tree to route the caller to the appropriate staff or unit.

Original Functionality

Today's Functionality

Able to provide callers basic information, such as hours of operation, where to apply, and an office locator.	Available Information	Able to provide individualized information based on the caller's response or prior interactions with the IVR system.
Limited triage of incoming calls that are routed to customer service staff, who may not have access to the client's case information.	Triage/Routing	Can triage incoming calls based on the caller providing a case number, client ID, or Social Security number and route calls to specialists who can best answer the questions and have access to the client's current information.
Can't contact callers or affirmatively provide individualized information.	Robocalls	Can autodial clients with individualized reminders based on the client's case, or call clients due for an interview and transfer them to workers if they are able to complete their interview.
Clients must wait on hold until an eligibility worker or triage specialist can assist them.	Callbacks	Clients are informed of the expected wait time and can choose to receive a callback instead of waiting.

Telephonic Signatures

Telephonic signatures allow clients to complete the application or renewal process over the phone by capturing their signature via a voice recording. Telephonic signatures allow clients to immediately complete their application or renewal without having to mail in a signed document or visit an office. Agencies must have the ability to record the client verbally affirming identifying information, and link that recording to the case file. Federal regulations require agencies to accept telephonic signatures for Medicaid applications, but agencies can expand the technology to serve SNAP clients applying for or renewing their benefits.

Telephone Interviews: Agencies can offer a telephone interview in conjunction with a SNAP application or renewal taken over the phone to streamline and expedite service. This is more convenient for the client and reduces future in-office and phone traffic related to rescheduling and missed interviews. Agencies can complete more applications and renewals with “one touch” if they also change policies and procedures to rely more on electronic verification or provide easy ways for clients to electronically submit documents. This may allow clients to complete the application, interview, and verification process in one phone call and have their case processed before hanging up.

Call-In Interview: Agencies can also leverage call center infrastructure to further streamline the SNAP interview process by allowing clients who have submitted an application or renewal to complete the interview by phone at a time convenient for them. Agencies may still send clients an appointment date and time but may also inform the client that they can call in for their interview any time before the scheduled appointment. This doesn't require an On-Demand Interview waiver since the client still receives an appointment time. Allowing clients to call in at their convenience can increase interview completion rates and reduce procedural denials.

Advice from the Ground

- Call centers can be a single physical location or can be “virtual,” staffed by workers in offices throughout the state. Virtual call centers may make it easier to staff up and down depending on call volume allowing an agency to meet demand during peak times while allocating staff to other work during non-peak times.
- Where possible, staff call centers with eligibility workers who can act on requests coming in. Immediately conducting an interview, addressing a client's change of information, or processing another request is more efficient than taking a message to pass on to an eligibility worker.
- When monitoring call center performance, focus on call resolution, not just wait times. Clients may be willing to wait a little longer if it means that their needs will be addressed.
- If making outbound calls to clients, work with phone companies to be sure your agency name appears on caller ID, rather than an unfamiliar number clients may not answer.
- Consider how call centers fit into the broader system. While expanded functionality (like allowing for on-demand interviews) may require reallocating staff to the call center, it will relieve pressure on local offices and reduce procedural denials for missed interviews.

Part 4 Considerations When Implementing Technology

Client-facing technology solutions have great potential to improve customer service and streamline processes for agency staff. Implementing these solutions is generally a smaller project than a large eligibility system overhaul, allowing for greater flexibility and freedom to try different approaches. Issues will always arise when making changes and using new technology and processes, but the following basic principles can make modernizing human services more successful.

Embrace innovation.

As technology continues to rapidly advance, it's important for agencies to embrace new options – to improve both efficiency and communication with clients. Change is hard, though, and agencies may be hesitant to take up the challenge of implementing or improving client-facing technologies due to perceived hurdles as well as naysayers. It's important to fight the impulse to keep the status quo and a culture of “this is how we have always done it.” Agencies need to challenge assumptions about what's allowable and encourage the testing of new approaches while working with legal and procurement officials to ensure compliance with federal and state laws. Leadership and external support are essential to overcoming obstacles, so be prepared to help staff understand the value the project brings to the organization.

Focus on the root causes of the problems you are seeking to solve.

The eligibility, enrollment, and retention process is complex; many barriers may hinder accurate and timely determinations and strong customer service. Before implementing any new technology, clearly identify what specific part of the process you are trying to fix and analyze the likely reasons clients or staff face challenges. Pinpointing the root causes – there are often more than one – of a barrier or challenge may take time in the planning process but will ultimately save resources and lead to faster resolution. Ask questions like:

- Where do clients most often drop off in the application or renewal process?
- What leads clients to come into eligibility offices or call eligibility workers?
- Which part of the process is the most time intensive for eligibility workers?

Look at the system as a whole, including current policies and work flows. Perhaps a policy change could resolve the problems faced by a portion of the clients or staff. For example, if cases are frequently terminated for failure to provide documentation, examine where policies could be revised to reduce the need for verifications or if electronic data sources could replace paper documentation from the client.

Upgrade the procurement process and approach to vendor management.

Most state procurement processes and vendor management strategies for creating and implementing technology products could be greatly improved to facilitate flexibility, nimbleness, and innovation. Some government agencies are attempting to make changes through open source code, hack-a-thons, and an agile development process.

Agile Development

Agile software development focuses heavily on iterative development and quick “sprints” of work to continuously improve and flexibly respond to feedback.

To improve the chances of successful implementation, agencies should consider the following questions prior to purchasing a solution:

- What other agencies have implemented a similar solution? What parts of their solution can be used for this project to avoid starting from scratch?
- How will the solution work with other systems inside and outside the agency? Vendors may use terms such as interfaces, modularity, or configurability to describe this important feature.
- Can the solution handle an increased volume of users? Is it scalable?
- Can the agency make required changes and maintain the solution in house once implemented? What level of expertise is needed to make changes?
- When new versions of online browsers, operating systems, or devices such as mobile phones are released, how will the vendor ensure the solution still works?
- How will the vendor provide continuous improvement to the solution once implemented?
- Will the solution be open source and available to share with other agencies to make it easier for them to implement a similar solution?

Seek user feedback before, during, and after implementation.

There are many opportunities to make a new technology solution “user-friendly” – for both clients and eligibility workers using the system. Including user testing before implementing new technology solutions is important for any government modernization efforts, but considering the user experience is not a one-time effort.

Creating a good user experience starts when you identify the need for a technology solution and while you’re designing the solution, before any coding begins. It’s often too late and very costly to change a technology solution based on user feedback after implementation.

The Human Centered Design approach provides a framework for creating a technology solution through initial understanding of the problem and context of when the solution would be used, as well as continual feedback and improvement. Through the development cycle, the primary driving factors of the design are end-users' ability to easily use the solution and to see how it adds value to their lives.

Obtaining user input doesn't require costly focus-group testing or detailed user surveys. Consider:

- Conducting “field work” by simply observing and interviewing users while they're interacting with the current systems. This can help identify users' pain points, barriers to using technology or understanding a process, and even ideas for solutions that users themselves provide.
- Conducting a survey of applicants and enrollees who are waiting in the lobby for their interview. Staff can informally show hand-written designs of a website or mobile app to a group of clients and ask them to walk through the pages to see if they could easily “use” the solution.
- Seeking user input during the design process on demos, storyboards, or prototypes.
- Asking clients directly for feedback rather than relying exclusively on proxies, such as staff at community-based organizations who do application assistance. These external partners can help identify pain points and offer helpful solutions. But they shouldn't substitute for feedback from actual clients, who may be less familiar with certain technologies and are less likely to understand agency jargon or the underlying process.
- Creating a testing environment — or “sandbox” — before and during implementation, where staff and clients try to use the solution without guidance. This can help identify areas of confusion and make it easier for agency staff to help clients by making them more familiar with how clients experience the solution.
- Building into the solution itself, or creating mechanisms outside the solution, to explicitly or implicitly seek users' feedback after deployment. For example, measure client satisfaction with the solution by providing a link to a short survey after an individual submits an application. Or provide a simple mechanism — by email or online — for clients and community partners to suggest improvements.

Inform and educate all stakeholders on the technology.

Engage all stakeholders, including clients, staff, and community partners, before implementing a new solution.

Inform clients of the intended benefits and uses of the new solution rather than assuming they will know. Create an easy-to-read “how-to guide” that agency staff can distribute or send to clients.

Agency staff also need to know how to use and speak about the solution because clients will seek their help if they have questions or problems. Staff should promote the new technology to clients and know where to send clients if they are having technical problems. Staff must also know how the solution fits into the agency's overall operations. For example, staff should know where documents uploaded from a mobile app are sent.

Community organizations are important partners when implementing new technology. They can provide valuable input about user pain points and client needs at all stages of design and implementation. Clearly communicating information about the new technology and issues that arise will help get buy-in from community partners and client communities.

Make improvements as part of implementation.

Technology isn't fool-proof; users expect initial versions of a new solution to have a few errors. Newer technology is often implemented in a "beta" phase to help signal users that the current version has undergone testing, but there may be issues that only a user can identify.

Consider implementing client-facing solutions initially through a pilot or as multiple versions rather than as a finished product that is difficult to change once implemented. Build the solution in bite-size phases so that adjustments can be made along the way, rather than at the end. Make it clear to all stakeholders, including clients, that tweaking, improving, and adjusting are part of the process.

Create an environment focused on continuous improvement. The critical component is to respond to users' reported issues with the solution and quickly address problems. For example, when developers release a new mobile app, they actively monitor the user comments in the App Store or on Google Play to identify issues and then notify users when something has been fixed. Individuals will expect the same from agencies that implement client-facing solutions: imperfection at the start, but clear efforts to seek user feedback and continual improvements as a normal part of the implementation process.

Consider the development and implementation of technology as a continuous circle rather than a straight line from conception to completion. If you aren't continually improving your technology solution based on user feedback, it could quickly become outdated and cause clients to stop using it altogether.

Identify from the start what success looks like and measure it.

A carefully crafted evaluation is essential to determine whether the technology solution successfully addresses the problem identified in the planning phase. Multiple data points and other factors can be measured to evaluate if the technology project was successful.

There are immediate outcomes of technology projects that can easily be measured, such as the number of clients using the technology, the number of problems reported or fixed, or the response

rate to text or mobile app reminders. The effects of a technology solution can also be measured by its impact on operations, such as call volume. In addition, agencies can measure the success of a technology solution based on actual outcomes for clients, for example, if a higher rate of interview completion leads to greater program participation.

Just as important as identifying the desired outcomes for a technology solution is building in, prior to implementation, the right mechanisms to measure progress. Create a plan for what data will be collected, at what intervals, and who will be responsible for analyzing the results. Make sure there is a baseline from which to measure progress.

A wide variety of data is automatically collected by some technology solutions and can be used to monitor performance and measure progress. For example, Google Analytics can be used to determine what parts of an online web portal are most visited to help identify what information users are searching. As part of the planning process, inquire what information is automatically captured by the technology solution as part of its built-in functionality and how non-technical agency staff will be able to collect and review it.

Collecting metrics and feedback is only useful if that information is fed back into the planning and design process to further tweak and improve the solution. Establish mechanisms to use the data to improve operations. For example, one state agency analyzed call center volume over several years to determine seasonal patterns and then applied that information to help create schedules for call center staff so they could handle the call volume. This not only reduced clients' wait times but also improved staff morale by enabling them to assist clients more quickly.

Tips for Advocates

As technology plays an increasingly important role in public benefit administration, it's essential that advocates get involved, early and often. Although advocates may not know the technical details of the systems, they can play a critical role in asking questions and providing input. In addition to the considerations outlined above, advocates can:

- Get a seat at the table. Use existing advisory groups, legislators, or other leverage points to have regular meetings with the state or local agency to identify issues, discuss solutions, get updates, and provide input.
- Ask questions! Don't be intimidated by technical jargon. Push agencies to explain the plan for rolling out new technology and make sure they've considered possible unintended consequences.
- Help make the case for a new technology product. The costs of implementing new technology may be less than the cost of keeping the status quo. Help agencies quantify the real cost of the status quo to clients who can't get the services they need. If the change requires approval or funding from the legislature, support the agency's request.
- Recommend that new technology projects include user-centered design and robust user testing early in the process. Ask agencies to include both as requirements for future procurements of technology projects.
- Engage with the state or county agency early on in developing technology. Work with the agency to address specific concerns about a technology solution at the planning and design phases rather than after implementation.
- Encourage and support the agency in piloting a solution for a subset of clients to improve the solution for others in the long run. Assist the agency in developing and committing to a plan for testing future iterations of the solution with different groups of clients in incremental phases.
- Advocate for the creation of a dedicated position in the agency that's responsible for ensuring technology projects prioritize the client and user experience.
- Research what other states are doing to improve customer service. Bring ideas of effective solutions and encourage the agency to connect with other counties or states.

Ongoing advances in technology may have innovative applications in health and human services. It's important for agencies to look forward and be aware of how these new solutions can improve administration and customer service. Below are four technology trends that may affect client-facing solutions and government services in the future.

Artificial Intelligence (AI)

Most people think of AI in terms of life-like robots that can think and act like a human. Yet AI is also part of the excitement around Big Data or machine learning, where vast amounts of data can be analyzed to improve understanding of changes in populations, traffic patterns, or humans' processing of information. Amazon's ability to provide product recommendations based on your and thousands of others' shopping activity is a simple example of AI in action today.

In the human services sphere, AI may reduce the need for staff to do routine tasks, freeing them for more complex tasks or innovating. AI can also help analyze unstructured data, such as eligibility workers' notes, to help identify patterns that can inform changes to policy or procedures.

Biometrics

Biometrics provides additional ways to use your identity to protect the security of your data through fingerprint imaging, facial recognition, and voice recognition. Smartphones use fingerprint imaging as an alternative to a pin code to unlock the phone. In addition, some mobile apps can integrate with the phone's security settings and allow the fingerprint image to be used to log in into the app. Facial recognition is also available on the latest version of the iPhone.

Voice Responsive Services

Voice responsive tools, such as Alexa and Siri, are gaining popularity and will likely become standard features of consumer-facing technology solutions soon. The data collected and algorithms being perfected by these tools can support users in multiple languages and will be able to account for regional accents and word choice variation. For example, rather than calling a call center to find out the status of an application, clients could ask their mobile device – in their primary language – to seek out this information and verbally respond with the answer, also in their primary language, even though the information maintained by the agency is in English.

Blockchain

Blockchain technology can help make data more secure by breaking data into multiple parts, encrypting each part, and physically storing the data across multiple computers informally connected in a network. Beyond Bitcoin, potential uses of Blockchain include storing health records or financial data so that the data isn't easy to change, delete, or gain access to. Illinois is piloting use of Blockchain to convert and store existing birth certificate records. While there's considerable hype about blockchain technology, its use in the public benefit arena remains uncertain.

DIRECT TESTIMONY

**BARBARA R. ALEXANDER
BARBARA ALEXANDER CONSULTING LLC**

ON BEHALF OF

OFFICE OF CONSUMER ADVOCATE

August 9, 2023

1 Q. PLEASE STATE YOUR NAME, ADDRESS AND OCCUPATION.

2 A. My name is Barbara R. Alexander. I am the sole member manager of Barbara Alexander
3 Consulting LLC. My address is 44 Beech St., Hallowell, ME 04347. I appear in this case
4 as a witness on behalf of the Pennsylvania Office of Consumer Advocate (OCA).

5 Q. WHAT IS YOUR BACKGROUND AND EXPERIENCE WITH RESPECT TO THE
6 ISSUES ON WHICH YOU ARE PROVIDING TESTIMONY IN THIS PROCEEDING?

7 A. I opened my consulting practice in March 1996, after nearly ten years as the Director of
8 the Consumer Assistance Division of the Maine Public Utilities Commission. While there,
9 I testified as an expert witness on consumer protection, customer service and low-income
10 issues in rate cases and other investigations before the Commission. My consulting practice
11 is directed to consumer protection, customer service and low-income programs and policies
12 relating to the regulation of the telephone, electric and gas industries. My practice has
13 included policy issues relating to the adoption of retail energy markets and the regulation
14 of public utility distribution service, particularly relating to reliability of service, rate
15 programs, customer service performance, as well as default service programs and policies.
16 I have appeared in over 30 U.S. and Canadian jurisdictions as an expert witness on behalf
17 of state utility consumer advocates and national and state non-profit consumer
18 organizations.

19 I am a graduate of the University of Michigan (B.A. 1968) and the University of Maine
20 School of Law (J.D. 1976).

21 I have appeared before the Pennsylvania Public Utility Commission (PUC or Commission)
22 many times on behalf of the OCA. I filed testimony on consumer education, consumer
23 protection, supplier licensing, customer enrollment, default service, and Code of Conduct

1 issues for the OCA in the Commission’s electric restructuring proceedings in 1997 and
2 1998, as well in all in the natural gas restructuring cases beginning in 1999. With respect
3 to issues relating to retail market competition policies, I have filed testimony on behalf of
4 the OCA on policies that should govern the planning and acquisition of Default Service for
5 residential customers and on proposals to adopt Purchase of Receivables (POR) programs,
6 Customer Referral Programs, and other “retail market enhancement” programs for electric
7 and natural gas utilities, including FirstEnergy distribution companies. I have provided
8 testimony submitted on behalf of the OCA on service quality and low-income program
9 issues associated with recent electric and natural gas distribution company mergers and base
10 rate cases for electric utilities, water and sewer utilities, and natural gas utilities as
11 documented in my CV with the specific identification of relevant proceedings attached as
12 Exhibit BA-1. In particular, I have testified on behalf of the OCA in the many proceedings
13 relating to the Commission’s assumption of jurisdiction over the Pittsburgh Water and
14 Sewer Authority to address recent compliance plan proceedings and base rate cases.

15
16 Q. DO YOU HAVE ADDITIONAL EXHIBITS ATTACHED TO THIS TESTIMONY?

17 A. Yes. In addition to my CV, I attach the following Exhibits:

18 Exhibit BA-2: PWSA Response to OCA-IV-2.

19 Exhibit BA-3: PWSA Response to OCA-IV-19.

20 Exhibit BA-4: PWSA Response to OCA-XVII-16.

21 Exhibit BA-5: PWSA Response to OCA-XVII-17 and attachment.

22

1 Q. PLEASE SUMMARIZE PITTSBURGH WATER AND SEWER AUTHORITY'S
2 PROPOSAL TO INCREASE RATES IN THIS PROCEEDING.

3 A. On May 9, 2023, the Pittsburgh Water and Sewer Authority (PWSA or the Authority) filed
4 a multi-year base rate increase request for water, wastewater conveyance, and stormwater
5 service over three years. PWSA is requesting a total increase of \$46.8 million or 22.5% to
6 be recovered in 2024; \$45.4 million or 17.8% to be recovered in 2025; and \$53.9 million
7 or 17.9% to be recovered in 2026. PWSA is also requesting approval of claimed
8 enhancements to its low income customer assistance programs, and a phase-out of the
9 minimum water and wastewater charges. Under the Authority's proposal, a typical bill of
10 a residential water, wastewater conveyance, and stormwater service customer using 3,000
11 gallons per month will increase from \$86.43 to \$103.41 per month or by 19.6% in 2024,
12 increase from \$103.41 to \$123.55 or by 19.5% in 2025, and increase from \$123.55 to
13 \$146.11 or by 18.3% in 2026.

14 Q. HOW DOES PWSA JUSTIFY ITS RATE INCREASE IN THIS PROCEEDING?

15 A. PWSA's justifications for these rate increases are based on funding for mandated
16 infrastructure improvements, the obligation to meet more stringent environmental and
17 regulatory requirements, and the need to reflect increasing operating costs related to
18 inflation in rates.

19 Q. WHAT ISSUES WILL YOU ADDRESS IN YOUR TESTIMONY?

20 A. I will address the following issues in this proceeding:
21 • Customer service, including the performance of the call center, billing, meter
22 reading, complaint handling, customer satisfaction survey results, and other metrics
23 tracked by the Commission.

1 • Consumer protection policies and programs, particularly those relating to Chapter
2 56 of the Commission’s regulations.

3 • PWSA’s proposal to charge residential customers a fee for paying the bill using a
4 credit card for PWSA’s service.

5 • PWSA’s proposal to contract for a third-party debt collection service for certain of
6 its overdue bills.

7 Q. IS YOUR TESTIMONY EXCLUSIVE ON THESE ISSUES?

8 A. No. While I am the primary witness on customer service and consumer protection policies
9 and programs, my testimony supplements and contributes to the overall recommendations
10 of the other OCA witnesses.

11 Q. WILL YOU PROPOSE CHANGES TO THE REVENUE REQUIREMENT OR RATES
12 PROPOSED BY PWSA?

13 A. Not directly. My testimony concerning customer service and reliability of service
14 performance is intended to provide context on the reasonableness of PWSA’s proposed
15 revenue requirement, as well as the adjustments made by other OCA witnesses.

16 Q. WHAT IS THE CONNECTION BETWEEN YOUR DISCUSSION OF SERVICE
17 QUALITY AND CUSTOMER SERVICE PERFORMANCE AND THE RATE
18 INCREASE PROPOSED BY PWSA?

19 A. Any public utility must justify its rates in part based on its ability to perform its essential
20 quality of service and customer service functions at a reasonable performance level. It is
21 appropriate to compare the performance of the utility seeking a significant rate increase to
22 other Pennsylvania utilities, particularly where, as here, the Authority has only recently
23 come under the Commission’s jurisdiction and a lengthy proceeding has been held that sets

1 forth PWSA’s obligations to conform to that authority. Finally, PWSA is not a typical
2 public utility regulated by the Commission. Unlike the vast majority of the electric, gas,
3 and water utilities regulated by the Commission, PWSA has no shareholders and there is
4 no “return on equity” as that aspect of rate regulation is applicable to investor-owned
5 utilities who are allowed an opportunity for a reasonable profit on their investments.

6 Q. HOW SHOULD THE COMMISSION CONSIDER PWSA’S QUALITY OF SERVICE
7 AND CUSTOMER SERVICE PERFORMANCE IN LIGHT OF THIS DISTINCTION?

8 A. The consideration of quality of service and customer service performance performs a
9 somewhat different function for PWSA compared to most other public utilities owned by
10 private investors and shareholders. First, my analysis and findings should inform the
11 Commission on the reasonableness of PWSA’s significant rate increase proposals. In other
12 words, if PWSA seeks a rate increase but there are deficiencies in its customer service
13 performance, the Commission should order improvements in specific areas as a condition
14 of any rate increase or consider reducing the rate increase until reforms have been adopted.
15 This approach is mandated by the statutory guidelines governing public utility rate cases
16 in which the Commission must evaluate the “efficiency, effectiveness, and adequacy of
17 service.”¹ Even more important here, PWSA has proposed a multi-year rate increase
18 without any proposals to meet essential customer service performance requirements.

19 Q. PLEASE SUMMARIZE YOUR OVERALL CONCLUSION AND
20 RECOMMENDATION.

21 A. My primary recommendation is that PWSA’s proposal for a multi-year rate increase not be

¹ 66 Pa. C.S. 523.

1 approved. While other OCA witnesses identify many reasons for their comparable
2 conclusion, the basis for my recommendation is that PWSA has not provided any
3 meaningful assurance or mechanism to meet reasonable customer service and service
4 quality performance. A three-year rate adjustment would set in motion the potential for
5 deterioration in service quality and customer service during a period with rate increases
6 that reflect certain costs and expenses but does not include any evaluation of service quality
7 or customer service performance. While the Authority states that this rate increase and
8 multi-year rate increases will support improved performance, there is no actual mechanism
9 in place to assure customers that increased rates will result in improved service quality and
10 customer service. According to PWSA's primary witness, William Pickering, Chief
11 Executive Officer:

12 Provided that PWSA's obtains approval for the necessary rate relief, PWSA will be
13 in a solid position to continue making progress toward enhancing the quality and
14 effectiveness of customer service, providing responsible and responsive operations
15 service, improving infrastructure reliability, and maintaining regulatory
16 compliance. While PWSA has completed a number of construction projects that
17 are designed to provide more reliable service to customers, meet stricter water
18 quality standards and improve stormwater management, we need to continue these
19 efforts so that we are a utility of the future that delivers the highest possible quality
20 of services to our customers.²
21

22 When asked to identify any performance standards associated with its proposal for a multi-
23 year rate plan, the Authority responded that "PWSA does not propose any additional
24 performance standards tied to the current rate case due to having the following, robust
25 standards in place:

- 26 • Headwaters Metrics
- 27 • PUC Compliance Plan Stage 1 Commitments
- 28 • PUC Compliance Plan Stage 2 Commitments

² PWSA St. No. 1, page 27.

1 • _PUC Management and Operational Audit Implementation Plan”³
2

3 PWSA’s response did not identify the specific content of these documents or any
4 “performance standards” that are applicable to PWSA’s commitments. The documents
5 listed in PWSA’s response reference reporting requirements, updated internal PWSA
6 policies to comply with Chapter 56, PWSA internal training materials, call center
7 performance, low income customer billing metrics, and operating metrics. Most of these
8 obligations are reflected in PWSA’s Compliance Plan Quarterly Update Reports, the most
9 recent was filed on April 27, 2023, for the 1st Quarter 2023.⁴ However, my main concern
10 is that none of these listed “metrics” or “commitments” link any specific level of
11 performance to the multi-year rate increases proposed in this proceeding. In fact, the only
12 consequence for not meeting any of these internal standards is “a recognition that PWSA
13 is not meeting its internal goal and potential negative impact on the public’s trust of
14 PWSA.”⁵ The lack of any commitment to maintain or improve customer service while rates
15 are increasing based on investments and expenses alleged to be required to provide
16 adequate service is not a reasonable bargain for customers.

17 Q. PLEASE SUMMARIZE YOUR OTHER RECOMMENDATIONS:

18 A. As stated above, my primary recommendation is to reject PWSA’s proposal for a multi-
19 year rate increase due, in part, to the lack of any specific performance standards or
20 consequences for the failure to meet reasonable performance standards. Merely reporting

³ PWSA Response to OCA-IV-1.

⁴ These quarterly reports are filed in Pittsburgh Water and Sewer Authority Quarterly Compliance Plan Progress Report Consolidated Docket Numbers: M-2018-2640802 (water), M-2018-2640803 (wastewater), P-2018-3005039 (wastewater)

⁵ PWSA Response to OCA-XVII-1.

1 performance without any consequence for deterioration in performance or the failure to
2 meet PWSA's own internal objectives is not a reasonable bargain for consumers. In
3 addition, any decision to increase base rates in this proceeding should be accompanied by
4 requirements that PWSA meet its own specific performance standards. Based on my
5 evaluation of certain other PWSA proposals and service quality performance, I recommend
6 the following requirements that should be imposed if any rates are increased:

7 • PWSA's Call Center should meet its internal standards of an average answer time
8 of 1 minute and an abandonment rate of 3% or less for all its customer queues each quarter.

9 • PWSA's "root cause" analysis of customer complaints failed to meet the
10 requirements of its prior commitment due to the failure to include informal and formal BCS
11 complaints. PWSA's should be required to conduct the required complaint analysis at no
12 additional cost to customers or ratepayers and report the results within 6 months.

13 • PWSA's proposal to impose a transaction fee for payment by credit and/or debit
14 cards by residential customers should be rejected.

15 • PWSA's intent to hire a third party debt collection agency should not be approved
16 at this time or prior to a demonstration that any such proposal will be cost effective
17 compared to internal debt collection and lien authority or that any such proposal will ensure
18 a reduction in collection costs or debt collection efficiency.

19 Q. PLEASE SUMMARIZE THE CUSTOMER SERVICE PERFORMANCE METRICS
20 MONITORED BY THE COMMISSION.

21 A. The Commission publishes annual reports on customer service performance for the call
22 center, meter reading, billing timeliness, customer satisfaction survey responses, and

1 response to customer disputes.⁶ These reports compare the performance of Pennsylvania's
2 largest electric and natural gas distribution companies but do not include performance for
3 water and sewer utilities. Therefore, I obtained PWSA's historical and recent results via
4 discovery in this proceeding, including PWSA's Quarterly Compliance Plan Reports. In
5 addition, the Commission publishes a quarterly UCARE report (Utility Customer
6 Activities Report and Evaluation) that presents data on complaints and payment
7 arrangements handled by the Commission's Bureau of Consumer Services for electric,
8 natural gas, and water and sewer utilities, including PWSA. The most recent reports reflect
9 four quarters of 2022 activities and the First Quarter of 2023.⁷

10 Q. PLEASE DISCUSS PWSA'S CALL CENTER PERFORMANCE.

11 A. PWSA relies on a customer call center as the main method by which customers can
12 communicate individually with PWSA. While PWSA has one office in downtown
13 Pittsburgh, that office is not intended to provide a widely accessible means of allowing its
14 approximately 110,000 customers to report an outage, talk about their bill, file a complaint,
15 ask for a payment plan, or respond to a termination notice. PWSA tracks the standard
16 performance metrics for a large call center, including the average speed of answering a call
17 that is transferred to a live customer service representative and the abandonment rate, the
18 percentage of calls in which customers hang up or abandon their call due to a long wait
19 time. PWSA's call center exceeded the Authority's internal target goals of 1 minute
20 average speed of answer and 3% abandonment rate from August 2022 through February

The updated information through early June 2023⁹ reflects improvement compared to 2022 in several areas but documents a relatively high abandonment rate of 3% or more for calls that reflect the most common call purposes, including billing and metering and stormwater issues. For example, as reflected below, the abandonment rate exceeds 3% for the period of January 1, 2023 through early June 2023 for customer calls directed to the following queues: general, dispatch, billing and metering, permits, and stormwater

2

3 Q. AS A RESULT OF THIS PERFORMANCE, WHAT DO YOU RECOMMEND?

4 A. As documented in the charts above and in PWSA’s Quarterly Compliance Plan Reports,
5 PWSA has an internal performance objective for its call center to answer customer calls
6 with a representative within 60 seconds (1 minute) and to meet a call abandonment rate of
7 3% or less. I do not object to these performance objectives. However, PWSA does not
8 link meeting these internal standards to its request for a significant rate increase in this
9 proceeding. I recommend that as a condition of any rate increase adopted by the
10 Commission, that PWSA be required to conform to its own internal quarterly call center
11 performance standards of a call answering rate of 1 minute (60 seconds) or less and an
12 abandonment rate of 3% or less for each of its call center queues, particularly those queues
13 that relate to billing, metering, collection, and stormwater issues. Furthermore, the lack of
14 any recommendation for linking customer service and call center performance to the
15 implementation of its multi-year rate plan is a serious defect. The fact that PWSA has
16 internal performance standard goals is insufficient to justify any rate increase because there
17 is no consequence for the Authority’s failure to achieve these objectives.

1 Q. TURNING TO THE BCS REPORTS CONCERNING COMPLAINTS AND PAYMENT
2 ARRANGEMENT DISPUTES THAT REQUIRE FURTHER INVESTIGATION, WHAT
3 IS PWSA’S RECENT PERFORMANCE?

4 A. Every Pennsylvania public utility is required to educate customers about how to register
5 informal and formal complaints, the former resolved by the Commission’s Bureau of
6 Consumer Services because of a customer’s dissatisfaction with the utility’s response and
7 the latter handled as a formal matter by the Commission because of a formal filing by the
8 customer or group of customers. Utilities also receive “disputes” directly from customers
9 and are obligated to investigate and respond to those issues or indications of dissatisfaction.
10 Customer complaints typically form a hierarchy or pyramid from a large volume of
11 disputes to a smaller group of informal complaints to the BCS and a relatively small
12 number of formal complaints filed with the Commission. Tracking and evaluating disputes
13 and informal or formal complaints are key to ensuring ongoing improvements in customer
14 service because that evaluation is likely to spot the “red flag” that indicates a systemic issue
15 or concern that requires management’s attention and, in some cases, a change in policy or
16 procedure. In addition, of course, this type of evaluation may also identify violations of
17 the Commission’s regulations.

18 BCS reports on the frequency and trends associated with informal complaints filed
19 by residential customers who are dissatisfied with their initial resolution by the public
20 utility. In addition, BCS reports identify complaints “needing further investigation,”
21 meaning that the informal customer complaint requires BCS to further investigate the
22 complaint and that it is not summarily dismissed due to lack of jurisdiction or that the
23 customer failed to first contact the utility prior to filing their complaint with BCS.

1 Comparing 2021 to 2022, PWSA had a 3% decrease in informal residential water consumer
2 complaints and a 30% increase in residential sewer consumer complaints that “need further
3 investigation” (NFI) and a 26% increase in residential water payment arrangement
4 disputes. The January through March 2023 data indicates significant increases in
5 residential water (88%) and sewer (20%) complaints that “need further investigation,” but
6 an overall 8% decrease in residential payment arrangement requests. The BCS data also
7 reflects a significant reduction (74%) in “first contact resolution” complaints in 2023
8 compared to 2022. BCS does not include “justified”¹⁰ complaints or “verified
9 infractions”¹¹ for PWSA in its public reports, an omission that should be corrected in the
10 future due to the Commission’s jurisdiction over PWSA for Chapter 56 and 52 related
11 complaints.

12 Q. PLEASE PROVIDE YOUR ANALYSIS OF HOW PWSA CONDUCTS ANY
13 ANALYSIS OF ITS CUSTOMER COMPLAINTS.

14 A. In the last base rate case PWSA agreed to conduct a root cause analysis of its customer
15 complaints and identify the causes and reforms to respond to that analysis. PWSA’s
16 consultant submitted their report in March 2022.¹² The report focused on PWSA’s internal
17 complaint handling processes and did not review or evaluate complaints filed with BCS or
18 any BCS findings with regard to infractions or potential rule violations. According to
19 PWSA, “The purpose of that analysis was to decrease the overall number of disputes and

¹⁰ Defined by BCS as: A consumer complaint case where, prior to BCS intervention, the company did not comply with Commission Orders, policies, regulations, reports, Secretarial Letters, tariffs, or guidelines when the consumer brought the complaint to the company’s attention.

¹¹ Defined by BCS as: A misapplication or infringement of a Commission regulation, particularly the standards and billing practices for residential utility service.

¹² PWSA Response to OCA-IV-4.

1 complaints received, and details related to infractions identified after a complaint had
2 already been initiated were not pertinent information to the consultant’s analysis.”¹³ The
3 consultant’s recommendations are in the process of being implemented so it is not clear
4 what impact these changes will have on customer satisfaction with the initial interaction
5 with PWSA.¹⁴ However, my major concern is the lack of any analysis and underlying
6 causes associated with the increase in residential customer complaints needing further
7 investigation as noted above in the 1st Quarter 2023 UCARE Report and BCS’s
8 notifications to PWSA about infractions identified in customer complaints filed with BCS.

9 Q. PLEASE EXPLAIN PWSA’S RESPONSE TO COMPLAINTS NEEDING FURTHER
10 INVESTIGATION AS REPORTED IN THE UCARE REPORT.

11 A. When asked to respond to the significant increases in customer complaints needing further
12 investigation by BCS, PWSA identified several factors, including the implementation of
13 their new SAP system, the issuance of friendly reminder notices began in November 2022,
14 and the issuance of 10-day termination notices began in February 2023, lingering COVID-
15 19 protocols, and consumption related disputes that were higher in 2023 compared to
16 2022.¹⁵ According to this same Response, PWSA has taken steps to mitigate the complaint
17 volume, but these “steps” are not reflective of any affirmative action by PWSA to evaluate
18 these findings and adopt affirmative reforms (SAP stabilization, resumption of collection
19 activities and lifting all COVID-19 protocols) with the exception of more training related
20 to meter testing that occurred in March and April 2023. The subsequent 2023 UCARE

¹³ PWSA Response to OCA-XVII-15.

¹⁴ PWSA St. No. 6, page 39-45.

¹⁵ PWSA Response to OCA-IV-19.

1 quarterly reports will provide more information on the trends in these complaint statistics,
2 and I will update this aspect of my testimony during the pendency of this proceeding.

3 Q. PLEASE EXPLAIN PWSA'S RESPONSE TO POTENTIAL INFRACTIONS AS
4 DETERMINED BY BCS IN REVIEWING CERTAIN CUSTOMER COMPLAINTS
5 AFTER THEY ARE CLOSED.

6 A. These infractions are identified to PWSA and provided in a Confidential Attachment.¹⁶
7 This Attachment identifies BCS findings as "investigator's infractions," and "informally
8 verified infractions." When asked about the meaning of these terms, PWSA stated that
9 "investigator's infractions" are those identified by BCS at the closing of the complaint
10 investigation and reflect "infractions or violations that they believe were present" and that
11 "informally verified infractions" are "justified infractions that the PUC Policy Division of
12 BCS identifies during their review."¹⁷ PWSA has not conducted an analysis of trends or
13 causes of the infractions as recorded. Rather, PWSA response is to handle each of these
14 infractions on a case-by-case basis and treat each of these instances as a failure of an
15 individual employee.¹⁸ This approach is not reasonable and fails to identify themes and
16 root causes of these more serious complaint findings. I conclude that PWSA's evaluation
17 of its customer complaints has failed to include or evaluate the root cause of complaints
18 filed with BCS and resulting infractions.

¹⁶ PWSA Response to OCA-IV-20, CONFIDENTIAL attachment.

¹⁷ PWSA Response to OCA-XVII-14.

¹⁸ PWSA Response to OCA-XVII-16.

1 Q. WAS PWSA REQUIRED TO “UNDERTAKE A ROOT CAUSE ANALYSIS OF
2 INFORMAL AND FORMAL COMPLAINTS AND IDENTIFY AND ADOPT
3 REFORMS TO REDUCE FORMAL COMPLAINTS, VERIFIED COMPLAINTS AND
4 JUSTIFIED COMPLAINTS?”

5 A. Yes.¹⁹ As a result, PWSA’s implementation of this directive focused solely on internal
6 disputes from its customers and the report did not evaluate or identify the root cause(s) of
7 informal complaints, formal complaints or verified infractions as determined by BCS.

8 Q. WHAT IS YOUR RECOMMENDATION IN LIGHT OF PWSA’S FAILURE TO
9 IMPLEMENT THE REQUIRED ROOT CAUSE REPORT?

10 A. I recommend that PWSA be required to conduct the required root cause analysis of all
11 customer complaints, including those informally or informally appealed to the Commission
12 and BCS findings about potential infractions within 6 months at no additional cost to
13 customers. This revised and corrected root cause analysis should be reviewed with
14 stakeholders and possible reforms implemented promptly.

15 Q. TURNING TO PWSA’S PROPOSAL TO CHANGE ITS PRIOR AGREEMENT TO
16 ELIMINATE CREDIT CARD FEES AND RESUME CHARGING SUCH FEES TO
17 RESIDENTIAL CUSTOMERS, DO YOU AGREE WITH THIS RECOMMENDATION?

18 A. No. As a part of the Settlement of its 2021 base rate proceeding, PWSA agreed to eliminate
19 merchant fees for residential customers to make Interactive Voice Response and on-line
20 payments as part of its 2020 rate case settlement.²⁰ Beginning in January 2022, PWSA

¹⁹ *Pennsylvania Public Utility Commission v. Pittsburgh Water and Sewer Authority, Docket Nos. R-2021-3024773 (water), R-2021-3024774 (wastewater), and R-2021-3024779 (stormwater), Final Order entered November 18, 2021 adopting Recommended Decision dated October 6, 2021 at p. 27 Section 9, E,8,c.*

²⁰ *Pennsylvania Public Utility Commission v. Pittsburgh Water and Sewer Authority, Docket Nos. R-2020-3017951 (water) and R-2020-3017970 (wastewater) Final Order entered December 3, 2020 (approving*

1 eliminated these payment fees for residential customers. Now, however, PWSA is
2 proposing to reverse that agreement and charge residential customers \$1.95 per transaction
3 for paying their PWSA bill via credit or debit card, stating:

4 As a cash flow municipal authority, PWSA's agreement to change historical
5 practices resulted in other ratepayers paying the cost. The cost impact of this is
6 discussed more fully by Mr. Barca. By returning the payment responsibility solely
7 to the customer electing the option, PWSA is mitigating the cost impact of this
8 decision for other ratepayers. Given the relaxing of the COVID-19 pandemic and
9 the overall rate request here, as well as the build out of options available to our
10 customers to make payments to us, the return to a requirement that customers
11 incurring a third party fee fully pay that fee is a reasonable approach.²¹
12

13 Q. HAS THE VOLUME OF CUSTOMER USE OF THE CREDIT CARD FORM OF
14 PAYMENT INCREASED AS A RESULT OF ELIMINATING FEES IN 2022?

15 A. No. The historical percentage of customers who make use of the credit/debit card to pay
16 their PWSA bill has remained constant at approximately 32%-33% throughout 2022, a
17 level that was in effect prior to eliminating the fee.²² As a result, there is no indication that
18 the costs associated with eliminating credit/debit card fees has increased compared to the
19 level in effect at the time PWSA agreed to make this change. PWSA understood at the
20 time of this agreement to change its fee policy that the costs of handling credit card
21 payments would be included in the revenue requirement for all customers, similar to the
22 costs associated with other payment options available to its residential customers.

Settlement Section III.G.2).

²¹ PWSA St. No. 6, page

²² PWSA Response to OCA-XVII-11.

1 Q. IS THERE EVIDENCE THAT THE IMPOSITION OF THIS FEE WILL ADVERSELY
2 IMPACT CUSTOMERS WHO ARE FACING TERMINATION OF SERVICE?

3 A. Yes. While PWSA has not done an analysis of the timing in the collection or billing cycle
4 to determine how or when customers use the one-time credit/debit card payment²³, the
5 Authority did examine the payments by credit/debit card for customers facing termination
6 of service in April 2023. Of those 788 accounts, 230 set up an installment payment plan,
7 103 accounts (13%) made one or more credit/debit card payments, and 67 accounts made
8 an ACH (checking account) web-based one-time payment.²⁴ This information, while only
9 a reflection of one month, indicates that customers who face termination of service make
10 use of the credit/debit card payment option to avoid further or more serious collection
11 penalties. Imposing a fee on these vulnerable customers after agreeing to eliminate these
12 fees only one year ago is unreasonable. Furthermore, the reversal of this agreed upon
13 policy is likely to adversely impact lower income and fixed income customers who will
14 see the higher bills and payment difficulties if this significant rate increase is approved.

15 Q. WHAT IS YOUR RECOMMENDATION WITH REGARD TO PWSA'S PROPOSAL
16 TO REINSTATE FEES FOR PAYMENT BY CREDIT/DEBIT CARD FOR
17 RESIDENTIAL CUSTOMERS?

18 A. I recommend that the Commission reject this change that was only recently agreed to in
19 PWSA's prior rate case settlement on the grounds that the proposal is unjustified and
20 harmful to vulnerable customers who seek to avoid termination of service and other
21 nonpayment scenarios. Customers using a credit or debit card for payment of essential

²³ PWSA Response to OCA-IV-15.

²⁴ PWSA Response to OCA-IV-16.

1 water, sewer, and stormwater charges should be provided with the same expectation as
2 using their card to pay for food, medical services, and other consumer goods where extra
3 fees to use a credit/debit card are not imposed.

4 Q. PWSA DISCUSSES ITS ONGOING EFFORT TO DEVELOP AND IMPLEMENT A
5 CONTRACT FOR A THIRD-PARTY DEBT COLLECTOR IN ITS TESTIMONY.
6 PLEASE DISCUSS YOUR RESPONSE.

7 A. PWSA seeks to develop an RFP that would solicit bids to provide debt collection services:

8 PWSA's goal in partnering with potentially more than one debt collector is to
9 increase PWSA's monthly collection rate by 10%. The scope includes debt
10 collection services for unpaid water, wastewater, and stormwater charges that are:

- 11 • Over \$1,000
 - 12 • Past due for ≥ 180 days
 - 13 • Final bills past due ≥ 30 days
 - 14 • Active accounts where 1) a tenant payment is received, or 2) a curb stop
15 is unable to be located and/or operated
 - 16 • Inactive accounts where 1) PWSA has ceased to provide service, or 2) a
17 previous customer has moved out.²⁵
- 18

19 The reference to the development of an RFP has not yet resulted in a formal submission in
20 this proceeding. Any such proposal raises serious concerns about the application and
21 implementation of essential Chapter 56 rights that are not the typical qualifications for
22 private debt collection agencies and many of these criteria listed above will include
23 customers and situations in which Chapter 56 will be applicable. I note that there is no
24 obligation for PWSA to implement a third-party debt collection program based on prior
25 Compliance Plan commitments. The Authority has also failed to document how any such
26 private agency could achieve a 10% increase in its monthly collection rate compared to the

²⁵ PWSA St. No. 6, page _____.

1 ongoing collection activities that could or should be implemented by PWSA employees or
2 more targeted outreach and collection activities by individuals working under PWSA direct
3 supervision. This concern is particularly relevant to PWSA since the Authority can initiate
4 a lien on a nonpaying customer's property to collect overdue bills, an option that, coupled
5 with its Chapter 56 rights, provides a greater flexibility to collect overdue bills compared
6 to other investor-owned water, gas, and electric utilities in Pennsylvania.

7 Q. DOES PWSA ROUTINELY MAKE USE OF ITS LIEN AUTHORITY TO COLLECT
8 OVERDUE BILLS?

9 A. Yes. In 2022 PWSA issued 1,904 "intent to lien" notices and filed 1,083 liens against
10 residential customers. This debt collection tool has resulted in significant payments from
11 residential customer as well as other customers.²⁶

12 Q. WHAT IS YOUR CURRENT RECOMMENDATION WITH REGARD TO PWSA'S
13 INTENT TO SOLICIT THE SERVICES OF A THIRD-PARTY DEBT COLLECTION
14 AGENCY?

15 A. I reserve the right to file supplemental direct testimony when PWSA submits the finalized
16 RFP and scope of services.

²⁶ PWSA Response to OCA-XVII-17 identifies residential revenue associated with issuing lien notices as \$7,398,803.

1 Q. DOES THIS CONCLUDE YOUR TESTIMONY AT THIS TIME?

2 A. Yes. However, I reserve the right to supplement this testimony if additional relevant

3 information is received.

Direct and Surrebuttal Testimony on behalf of the Pennsylvania Office of Consumer Advocate before the Pennsylvania Public Utilities Commission, FirstEnergy Pennsylvania Electric Distribution Companies Application for Merger, Docket No. A-2023-3038771 et.al (June and August 2023) [analysis of implication of proposed merger for customer service performance and low income programs]

Presentations and Training Programs:

- Presentation on Consumer Protection Policies for Solar Providers, New Mexico Public Regulatory Commission, Santa Fe, NM, January 2017
- Presentation on Residential Rate Design Policies, National Energy Affordability and Energy Conference, Denver, CO., June 2016
- Presentation on “Regulatory-Market Arbitrage: From Rate Base to Market and Back Again,” before the Harvard Electricity Policy Group, Washington, D.C., March 2016.
- Presentation on Residential Rate Design and Demand Charges, NASUCA, November 2015.
- Alexander, Barbara, “Residential Demand Charges: A Consumer Perspective,” presentation for Harvard Electricity Policy Group, Washington, D.C., June 2015.
- Presentation on “Future Utility Models: A Consumer Perspective,” for Kleinman Center for Energy Policy, U. of Pennsylvania, August 2015.
- Presentation, EUCI Workshop on Demand Rates for Residential Customers, Denver, CO [May 2015]
- Presentation, Smart Grid Future, Brookings Institute, Washington, DC [July 2010]
- Participant, Fair Pricing Conference, Rutgers Business School, New Jersey [April 2010]
- Presentation on Smart Metering, National Regulatory Conference, Williamsburg, VA [May 2010]
- Presentation on Smart Metering, Energy Bar Association Annual Meeting, Washington, DC [November 2009]
- Presentation at Workshop on Smart Grid policies, California PUC [July 2009]
- National Energy Affordability and Energy Conference (NEAUC) Annual Conference
- NARUC annual and regional meetings
- NASUCA annual and regional meetings
- National Community Action Foundation’s Annual Energy and Community Economic Development Partnerships Conference
- Testimony and Presentations to State Legislatures: Virginia, New Jersey, Texas, Kentucky, Illinois, and Maine

- Training Programs for State Regulatory Commissions: Pennsylvania, Georgia, Kentucky, Illinois, New Jersey
- DOE-NARUC National Electricity Forum
- AIC Conference on Reliability of Electric Service
- Institute of Public Utilities, MSU (Camp NARUC) [Instructor 1996-2006]
- Training Programs on customer service and service quality regulation for international regulators (India and Brazil) on behalf of Regulatory Assistance Project
- Georgia Natural Gas Deregulation Task Force [December 2001]
- Mid Atlantic Assoc. of Regulatory Utility Commissioners [July 2003]
- Illinois Commerce Commission's Post 2006 Initiative [April 2004]
- Delaware Public Service Commission's Workshop on Standard Offer Service [August 2004]

Exhibit BA-2

Request: OCA-IV-2 Please provide the monthly and annual average results for the call center for the calendar year 2022 and 2023 to date:

- a. The wait time between when the customer selects the option to speak to a representative and the call being answered;
- b. Abandonment Rate
- c. Busy Out rate
- d. Percentage of calls answered within 30 seconds; 60 seconds; 90 seconds; more than 90 seconds.

Response:

a.

57,610 calls answered within 120 seconds

Response provided by: Julie A. Mechling, Director of Customer Service

Date response provided: June 14, 2023

Exhibit BA-3

Request: OCA-IV-19 Please explain the reasons for the significant increases in residential customer complaints needing further investigation as set forth in the UCARE 1st Quarter 2023 report. In your response, please provide any analysis of the trend reflected in this report compared to 2022 and what steps PWSA has taken in response to this information.

Response: Based on PWSA’s analysis, the following factors influenced the increased complaint volume:

1. SAP Implementation
 - a. Increased billing/portal complaints
 - b. Friendly reminder notices began November 2022
 - c. 10-Day termination of service notices began February 2023
2. Lingering Covid-19 Protocols
 - a. Restarting of payment arrangements
 - b. Extensions were still being granted
3. Consumption related disputes
 - a. Higher percentage of consumption related complaints in 2023 as compared to in 2022

Municipal Water & Sewer Utilities

**Consumer Complaint, PAR (Payment Arrangement Request)
and FCR (First Contact Resolution) Statistics for Major Companies**

January through March 2022/2023

Company	Residential Consumer Complaints (NFIs*)			Residential PARs (NFIs*)			FCRs (Residential & Commercial)		
	2022	2023	Percent Change	2022	2023	Percent Change	2022	2023	Percent Change
PWSA-Water**	34	64	88%	8	8	0%	20	5	-75%
PWSA-Sewer**	5	6	20%	4	3	-25%	3	1	-67%
Total	39	70	79%	12	11	-8%	23	6	-74%

*Consumer complaints and PARs are classified as NFIs (Need Further Investigation) because they are cases that require further investigation.
**PWSA informal complaint data is designated as PWSA-Water or PWSA-Sewer based upon the nature of the complaint.

Steps taken by PWSA to mitigate complaint volume:

1. Billing and portal issues have stabilized.
2. Collection activity has resumed.
3. All Covid-19 protocols have been lifted.
4. Training related to meter testing were completed in late March 2023, and scripting training was completed as of April 2023.

Results:

After reviewing consumption-related disputes, which are driven by meter test requests, below is evidence of a noticeable decrease since March 2023.

Consumption-related dispute percentages by month in 2023:

January - 66%

February - 68%

March - 70%

April - 54%

May - 58%

Exhibit BA-4

Request: OCA-XVII-16 Has PWSA conducted any analysis of trends or underlying causes of the 2022 and 2023 data provided in response to OCA-IV-20? If so, provide any internal document that discusses analyzes, or responds to the BCS findings in this attachment (other than the information provided in the confidential attachment) and any internal action undertaken that made changes in training, compliance monitoring, or policy changes.

Response: PWSA has not conducted any analysis of trends or causes of the infractions as recorded. All infractions are addressed on a case by case basis with the employee(s) involved, and there is no documentation created in response to the BCS' findings, with the exception of coaching and/or disciplinary materials that are shared between PWSA Customer Service management, the employee(s), and PWSA Human Resources.

1 **INTRODUCTION**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS FOR THE RECORD.**

3 A. Terry L. Fought, 780 Cardinal Drive, Harrisburg, Pennsylvania, 17111.

4

5 **Q BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

6 A. I am a self-employed consulting engineer retained by the Office of Consumer
7 Advocate (OCA) for the purposes of providing testimony in this proceeding.

8

9 **Q. PLEASE DESCRIBE YOUR BACKGROUND AND QUALIFICATIONS.**

10 A. Exhibit TLF-Vita which is attached to this testimony, describes my educational
11 background and applicable experience.

12

13 **Q. DID YOU PROVIDE TESTIMONY IN PREVIOUS PITTSBURGH WATER AND
14 SEWER AUTHORITY (PWSA) BASE RATE CASES?**

15 A. Yes. I provided testimony in PWSA's 2018, 2020 and 2021 base rate cases.¹

16

17 **Q. DID YOU PROVIDE TESTIMONY IN THE IMPLEMENTATION OF CHAPTER 32
18 OF THE PUBLIC UTILITY CODE PWSA – STAGE 1 PROCEEDING, DOCKET
19 NO. M-2018-2640802 (WATER) AND DOCKET NO. M-2018-2640803
20 (WASTEWATER)?**

¹ Docket Nos. R-2018-3002645 (Water), R-2018-3002647 (Wastewater); Docket Nos. R-2020-3017951 (Water), R-2020-3017970 (Wastewater); Docket Nos. R-2021-3024773 (Water), R-2021-3024774 (Wastewater) and R-2021-3024779 (Stormwater).

1 A. Yes.

2

3 **Q. WHAT ISSUES HAVE YOU BEEN ASKED TO INVESTIGATE REGARDING THE**
4 **PWSA RATE CASES?**

5 A. The OCA requested that: (1) I investigate quality of service related to PWSA's
6 water, wastewater and stormwater service and (2) comment on concerns of
7 applicable engineering issues.

8

9 **Q. WHAT DID YOUR INVESTIGATION CONSIST OF?**

10 A. In addition to reviewing portions of the last base rate case, my investigation
11 included: (1) reviewing portions of PWSA's filing applicable to Quality of Service;
12 (2) reviewing other customer complaints received by PWSA and OCA; (3)
13 reviewing applicable portions of the Direct Testimony of PWSA witnesses William
14 J. Pickering, PWSA St. No. 1, Edward Barca, PWSA St. No. 2, William J.
15 McFaddin, PWSA St. 3, Barry King, PE., PWSA St. No. 4, Tony Igwe, PWSA St.
16 No. 5, Julie A. Mechling, PWSA St. 6, and Keith Reading, PWSA St. No. 8; (4)
17 reviewing PWSA's responses to the OCA's Interrogatories regarding quality of
18 service issues; (5) an inspection of some facilities on July 25, 2023 and (6)
19 reviewing the available transcripts from and/or attending telephonically the four
20 Public Input Hearings held in this proceeding on July 25 and July 27, 2023 at 1
21 p.m. and 6 p.m. each day.

22

1 **Q. BEFORE THIS CASE, HAVE YOU PREVIOUSLY INSPECTED PWSA'S**
2 **FACILITIES?**

3 A. Yes. During the 2018 Rate Cases, I met with PWSA and inspected some of its
4 facilities on April 19, 2018 and June 22, 2018, and reviewed applicable DEP files
5 on June 23, 2018. The Covid-19 Pandemic prevented additional inspections until
6 a site inspection on July 25, 2023.

7
8 **WATER SYSTEM**

9 **Q. PLEASE PROVIDE A BRIEF DESCRIPTION OF PWSA'S WATER SYSTEM.**

10 A. PWSA operates the largest combined water and sewer authority in Pennsylvania
11 producing an average of 70 million gallons of treated water daily and providing
12 service to more than 300,000 residents as well as up to 520,000 people during
13 working hours in total throughout the City of Pittsburgh and surrounding
14 communities.²

15 The water supply and distribution system consists of a 117 million gallon per day
16 conventional flocculation, sedimentation and rapid sand process treatment plant
17 which was placed in service in 1969, 964 miles of water mains plus more than
18 81,000 service lines, more than 25,900³ line valves, more than 7,300 fire hydrants,
19 one raw water pump station, ten finished water pump stations, one microfiltration
20 plant, four reservoirs, and ten storage tanks. The total storage capacity of the
21 reservoirs and tanks is approximately 455 million gallons. With consideration given
22 to the pressure requirements of the distribution system, and storage capacities in

² PWSA St. No. 1, pp. 18-19.

³ Revised to 19,371 PWSA valves & 4,163 Private valves, PWSA Response to OCA Set V-12.

1 each of the 15 pressure zones, PWSA stores enough finished water to provide
2 (with water use restrictions) a 3-day uninterrupted supply to all customers should
3 it temporarily be unable to treat additional water from the Allegheny River.⁴
4

5 **Q. IS PWSA UNDER ANY ORDERS FROM DEP OR USEPA TO MAKE**
6 **IMPROVEMENTS TO ITS WATER AND WASTEWATER SYSTEMS?**

7 A. Yes. According to PWSA's Filing Requirement, IX., Quality of Service⁵, PWSA is
8 currently under the following Consent Orders and Agreements (COAs). Note that
9 the MS 4 listing applies to PWSA's Wastewater System:

- 10 • November 17, 2017 – Corrosion Control and Lead Service Lines
- 11 • September 6, 2019 – Clearwell and Related Projects and Cross-
12 Connections
- 13 • May 7, 2021 – First Amendment to September 6, 2019 COA
- 14 • January 20, 2021 – NPDES MS 4 Compliance (USEPA)
- 15 • May 7, 2021 – Construction Prior to Authorization, Valve Pits, and Ferric
16 Chloride
- 17 • August 3, 2022 – Above Ground Storage Tanks at Three Chlorine Booster
18 Stations
- 19 • August 4, 2022 – Second Amendment to September 6, 2019 COA
20

21 For details on the above COAs, see Exhibit TLF-1.
22

23 **QUALITY OF SERVICE ISSUES - WATER SYSTEM**

24 **Q. WHAT QUALITY OF SERVICE ISSUES ARE INCLUDED IN YOUR TESTIMONY**
25 **CONCERNING PWSA'S WATER SYSTEM?**

26 A. In this section, I address (1) unaccounted for water (UFW); (2) pressure and
27 pressure surveys; (3) maintenance of isolation valves; (4) testing and replacing

⁴ PWSA St. No. 1, p. 19.

⁵ PWSA Rate Filing, Volume I, Filing Requirement, Tab 12, Filing Requirement IX, Quality of Service, IX.1.

1 customer meters (Meter Age); (5) flushing the distribution system; (6) minimum fire
2 hydrant flows; (7); and customer complaints logs.

3 4 **UNACCOUNTED FOR WATER**

5 **Q. WHAT IS MEANT BY THE TERM “UNACCOUNTED FOR WATER”?**

6 A. According to the PUC procedure, UFW is equal to “Total Water Delivered for
7 Distribution & Sale” minus “Total Sales” minus “Non-Revenue Usage and
8 Allowance.” “Non-Revenue Usage and Allowance” includes “Main Flushing,”
9 “Blow-off Use,” “Unavoidable Leakage,” “Located & Repaired Breaks in Mains &
10 Services” and “Other”. There are several different procedures for calculating
11 Unaccounted for Water. The PUC Method is shown on Section 500 of the PUC
12 Annual Report Form for Public Water Utilities.

13 14 **Q. WHY IS UFW IMPORTANT?**

15 A. Calculating the amount of UFW is a method of estimating the amount of non-
16 revenue water in a water distribution system due to leaks and inaccurate meter
17 readings. Reducing the non-revenue water saves money in chemical and power
18 costs and provides for important water conservation in areas that have limited
19 water supply sources. The accuracy of the UFW estimate depends on reliable
20 estimates of unavoidable non-metered water uses such as flushing the distribution
21 system, firefighting, normal pipe leakage, repaired main breaks, etc. Keeping track
22 of UFW gives a water utility an indication of the extent of unknown leaks in the
23 distribution system so that informed decisions can be made on the necessity of
24 finding and repairing leaks. The Water Audit methodology established by the

1 International Water Association (IWA) and the American Water Works Association
2 (AWWA) is generally becoming a more accepted method of identifying the
3 amounts of wasted water – Non-Revenue Water (NRW). Both the PUC and
4 AWWA Methods, if properly utilized, provide water utilities with information needed
5 to improve operational efficiency. According to 52 Pa. Code § 65.20(4), “Levels of
6 unaccounted-for water should be kept within reasonable amounts. Levels of UFW
7 above 20% have been considered by the Commission to be excessive.” The
8 Commission has not set similar standards for levels of NRW.

9
10 **Q. HAS PWSA PROVIDED INFORMATION ON HOW IT CALCULATES UFW?**

11 A. Yes. In response to OCA-V-3, the PWSA submitted PUC Section 500 Forms for
12 the calendar years 2021 and 2022. See Exhibit TLF-2. As shown on Exhibit TLF-
13 2, the UFW for 2021 and 2022 was 42.4 % and 53.6%, respectively. PWSA also
14 submitted AWWA Audits for 2021 and 2022. See Exhibits TLF-3 & 4 for worksheet
15 summaries. As shown on Exhibits TLF-3 & 4, the estimated NRW was 15,258,255
16 million gallons per year (MG/Yr) and 15,388,000 MG/Yr for 2021 and 2022,
17 respectively. This results in an NRW percentage for 2021 and 2022 equal to 68.6%
18 $[100 \times 15,258,255 / 22,239,025]$ and 68.2% $[100 \times 15,388,000 / 22,579,370]$,
19 respectively. For both the PUC Section 500 and AWWA Audit methods, PWSA
20 estimated volumes of water used for blow-offs, main flushing and firefighting were
21 based on AWWA’s Water Audit default values while the volume used for street
22 sweeping was metered and the volumes used for main breaks, reservoir and

1 pipeline draining and inspection and emergency filter backwash were estimated
2 specifically for PWSA's system.

3
4 **Q. DO YOU HAVE ANY COMMENTS ON THE UFW INFORMATION PROVIDED**
5 **BY PWSA?**

6 A. Yes. The PUC Bureau of Audits performed a Management and Operations Audit
7 on PWSA systems dated March 2023 and tabulated NRW estimates for the years
8 2017 through 2021. See Exhibit TLF-5. Comparing the NRW shown on Exhibit
9 TLF-6 with the AWWA Audit for 2022, it appears that the NRW has stabilized
10 during the past three years and is beginning to fluctuate with the amount of water
11 delivered to the distribution system. It should be noted that the volume of water
12 delivered to the distribution system was not totally based on meter readings as the
13 Rising Main 1 and 2 flow meters needed to be rehabilitated. As PWSA continues
14 to meter unmetered customers, test/replace existing meters, repair leaks and
15 replace old water lines, the estimated NRW should become more accurate and
16 also decrease.

17 Eventually, PWSA will have to reduce its reliance on AWWA Audit defaults and
18 estimate volumes of water used for blow-offs, main flushing and firefighting based
19 on the operation of its water system.

20
21 **PRESSURES AND PRESSURE SURVEYS**

22
23 **Q. WHAT ARE THE PUC'S REQUIREMENTS FOR PRESSURES AND PRESSURE**
24 **SURVEYS?**

1 A. According to 52 Pa. Code § 65.6. Pressures:

2 (a) *Variations in pressure.* The utility shall maintain normal operating pressures of
3 not less than 25 p.s.i.g. nor more than 125 p.s.i.g. at the main, except that during
4 periods of peak seasonal loads the pressures at the time of hourly maximum
5 demand may be not less than 20 p.s.i.g. nor more than 150 p.s.i.g. and that during
6 periods of hourly minimum demand the pressure may be not more than 150 p.s.i.g.
7 A utility may undertake to furnish a service which does not comply with the
8 foregoing specifications where compliance with such specifications would prevent
9 it from furnishing adequate service to any customer or where called for by good
10 engineering practices. The authority of the Commission to require service
11 improvements incorporating standards other than those set forth in this subsection
12 when, after investigation, it determines that such improvements are necessary is
13 not hereby restricted.

14 (b) *Pressure gauges.* Within 2 years after the effective date of this section, each
15 utility shall obtain one or more recording pressure gauges for each separately
16 operated pressure zone for the purpose of making pressure surveys as required
17 by this section. These gauges shall be able to record the pressure experienced on
18 the zones and shall be able to record a continuous 24-hour test. Each utility serving
19 1,000 or more customers or 1,000 or more customers in any separately operated
20 zone of a multi-zone utility shall maintain one or more of these recording pressure
21 gauges in service at some representative point or points in each of the pressure
22 zones of the utility.

23 (c) *Telemetry.* An utility may make the pressure surveys required by this
24 section by means of telemetered information electronically transferred to printed
25 copy instead of using recording pressure gauges.

26 (d) *Pressure surveys.* At regular intervals, but not less than once each year, each
27 utility shall make a survey of pressures in its distribution system of sufficient
28 magnitude to indicate the pressures maintained at representative points on its
29 system. The surveys should be made at or near periods of maximum and minimum
30 usage. Records of these surveys shall show the date and time of beginning and
31 end of the test and the location at which the test was made. Records of these
32 pressure surveys shall be maintained by the utility for a period of at least three
33 years and shall be made available to representatives, agents, or employees of the
34 Commission upon request.

35 **Notes of Decisions**

36 *Adequate Pressure*

37 The 25 p.s.i.g. minimum expressed in subsection (a) is not intended to restrict the
38 authority of the PUC to order improvements where service is inadequate;
39 therefore, the PUC has the power to order needed improvements notwithstanding

1 that the pressure in a utility's main meets the standard of the regulation. *Barone v.*
2 *Pennsylvania Public Utility Commission*, 485 A.2d 519 (Pa. Cmwlth. 1984).
3

4 **Q. WHAT ARE DEP'S REQUIREMENTS FOR SYSTEM PRESSURES?**

5 A. According to DEP's Public Water Supply Manual, Part II, Community System
6 Design Standards:

7 1. Pressure

8 All water mains, including those not designed to provide fire protection, shall be
9 sized after a hydraulic analysis based on flow demands and pressure
10 requirements. The pipe system and its appurtenances shall be designed to
11 maintain a minimum pressure of 20 pounds per square inch, gauge (psig) at
12 ground level at all points in the distribution system under all conditions of flow. The
13 normal working pressure in the distribution system should be approximately 60
14 psig.⁶
15
16

17 **Q. WHAT ARE THE DIFFERENCES BETWEEN THE PUC AND DEP PRESSURE**
18 **REQUIREMENTS?**

19 A. The PUC has a maximum and minimum pressure criterion while DEP has a
20 minimum and normal working pressure criterion. The PUC has a minimum
21 criterion of 25 psi at the main while DEP's minimum criteria is 20 psi at ground
22 level. Assuming the main is buried 4.5 feet below ground, DEP minimum criteria
23 is equivalent to 22 psi at the main.

24 Instead of having a pressure survey requirement for all water systems, DEP
25 imposes a pressure survey requirement on specific systems with known pressure
26 problems.
27

⁶ Public Water Supply Manual, Part II, Community System Design Standards, May 6, 2006, p. 186-187.

1 **Q. WHAT ARE THE REPRESENTATIVE POINTS ON THE SYSTEM WHERE**
2 **PRESSURE SURVEYS SHOULD BE CONDUCTED?**

3 A. In general, the representative points are highest and lowest ground elevations of
4 the distribution system in each pressure zone. Exceptions for low pressures
5 include areas served by long lengths of small diameter pipe.

6
7 **Q. HAS PWSA PROVIDED PRESSURE SURVEYS OF ITS DISTRIBUTION**
8 **SYSTEM**

9 A. No.

10

11 **Q. HAS THE OCA AGREED TO ACCEPT OTHER INFORMATION INSTEAD OF**
12 **PRSSURE SURVEYS UNDER CERTAIN CONDITIONS?**

13 A. Yes, when the water utility provides a complete complaint log that includes
14 pressure complaints. A satisfactory pressure survey can consist of only two
15 pressures (high and low) for each pressure zone taken at the two representative
16 points. I also note that the last revision of 52 Pa. Code § 65.6 occurred in 1983
17 prior to hydraulic computer models of water systems being common. For purposes
18 of evaluating utility system pressures, I have generally accepted utility statements
19 based on pressure information obtained from hydraulic computer models and
20 SCADA systems, when available, assuming that a complete complaint log is also
21 provided that includes all customer pressure complaints. The complaint log will
22 indicate if the pressure complaints are due to correctable Utility or customer

1 facilities or that the hydraulic computer model or SCADA system needs to be
2 modified.

3
4 **Q. DID PWSA PREVIOUSLY COMMIT TO TRACKING PRESSURE COMPLAINTS**
5 **AS PART OF A COMPLAINT LOG?**

6 A. Yes. In the Settlement of PWSA's 2021 base rate case⁷, PWSA committed to
7 ensuring that complaints received about pressure would be recorded and included
8 in its internal complaint log, but PWSA did not submit any information on pressure
9 complaints.

10
11 **Q. WHAT INFORMATION HAS PWSA PROVIDED ON SYSTEM PRESSURES?**

12 A. PWSA's response to Filing Requirement IX.2⁸ indicates that less than 5% of
13 PWSA's customers, or less than 3,774 customers [$0.05 \times (82,982 - 7,508)$]⁹ = 3,774],
14 have pressures higher or lower than the range allowed by 52 Pa. Code § 65.6.

15
16 **Q. HAS DEP ORDERED PWSA TO ADDRESS LOW PRESSURES?**

17 A. Yes. DEP's Administrative Order dated October 25, 2017¹⁰ requires PWSA to
18 identify critical low pressure points, install pressure sensors capable of reporting
19 pressure in "real time," and maintain records of pressure sensor data with the data
20 recorded at no less than fifteen minute intervals. Also, PWSA is required to notify

⁷ PWSA 2021 Settlement, Docket Nos. R-2021-3024773 et al), Section III(E)(8)(a).

⁸ PWSA Rate Filing, Volume I, Filing Requirement, Tab 12, Filing Requirement IX, Quality of Service, IX.2.

⁹ § 53.52(b) (Page 1 of 6), Total Water (Units & Sales) less Public Fire (Hydrants)

¹⁰ See DEP Administrative Order,

https://apps.pittsburghpa.gov/redtail/images/1005_PWSA%20Lead%20COA%2011172017%20final.pdf

1 DEP of a loss of a positive pressure and if any two consecutive fifteen minute
2 readings are less than 20 psi.

3 PWSA has installed 61 continuous “real time” pressure sensors at the critical low
4 pressure points and has reported low pressures to DEP.

5
6 **Q. HAS PWSA COMPLETED ANY PROJECTS THAT HAVE INCREASED**
7 **PRESSURES TO THE LOW PRESSURE AREAS?**

8 A. Not that I am aware of. In the 2020 Rate Case, PWSA’s budget for low pressure
9 remediation for FY 2020-2023 was \$2,293,358 (including \$100,000 spent prior to
10 FY 2021) but the proposed projects were not identified. See Exhibit TLF-7.

11 According to PWSA’s 2023-2027 Project Summary PWSA has budgeted a total of
12 \$1,696,441.49¹¹ to be used for low pressure area remediation. See Exhibit TLF-8
13 for a listing of the proposed projects for low pressure remediation and pressure
14 boundary adjustments.

15
16 **Q. HAS DEP ORDERED PWSA TO ADDRESS HIGH PRESSURES?**

17 A. No. DEP does not have any criteria for high pressure.

18
19 **Q. HAS PWSA DONE ANYTHING TO ADDRESS HIGH PRESSURES?**

20 A. Not that I am aware of.

21
22 **Q. DO YOU HAVE ANY RECOMMENDATIONS REGARDING HIGH PRESSURES?**

¹¹ 2023-2027 Project Summary, pg. 8, line 78.

1 A. PWSA should reduce normal operating pressures exceeding 125 psi in its mains
2 in order to protect customer service lines and inside plumbing. I made the same
3 recommendations in my testimony in the previous rate cases.¹² This may involve
4 adding pressure zones by using pressure reducing valves and/or distribution
5 storage tanks.

6

7 **Q. DO YOU HAVE ANY RECOMMENDATIONS REGARDING PRESSURES?**

8 A. Yes. PWSA should be required to submit pressure surveys for each pressure zone
9 in accordance with 52 Pa. Code § 65.6 until they provide a complete complaint log
10 that includes pressures.

11

12 **ISOLATION VALVES**

13 **Q. WHAT ARE ISOLATION VALVES?**

14 A. Isolation valves are installed on water mains so that the water can be shut off in
15 sections of the distribution system in case of a water main break or for main repairs
16 and replacements. Isolation valves are also used to separate different pressure
17 zones.

18

19 **Q. WHAT DOES IT MEAN TO EXERCISE ISOLATION VALVES?**

20 A. According to AWWA, "Each valve should be operated through a full cycle and
21 returned to its normal position on a schedule that is designed to prevent a buildup

¹² Docket Nos. R-2018-3002645, R-2020-3017951 & R-2021-3024773.

1 of tuberculation [rust formation in pipes as a result of corrosion] or other deposits
2 that could render the valve inoperable or prevent a tight shutoff.”

3 Exercising an isolation valve requires some effort even for a well-maintained valve
4 because the number of turns to fully open or close an isolation valve can vary from
5 12 turns for a 3-inch valve; and for larger valves the number of turns equal 3 times
6 the valve size plus 2 (i.e. 38 turns for a 12-inch valve, 110 turns for a 36-inch valve,
7 etc.).

8 **Q. WHY IS IT IMPORTANT TO EXERCISE ISOLATION VALVES?**

9 A. It is important to exercise isolation valves to prevent the valves from seizing up
10 and getting stuck from corrosion or other deposits adjacent to the valve. An
11 isolation valve that cannot be fully closed will increase the water loss during a water
12 main break and increase the number of customers affected.

13
14 **Q. WHAT HAPPENS IF AN ISOLATION VALVE BECOMES INOPERABLE DUE TO
15 LACK OF BEING EXERCISED?**

16 A. The valve either has to be repaired or replaced. Because isolation valves are
17 generally located underneath pavement, they can be very expensive to repair or
18 replace. Even repairing the valve requires that the valve be exposed so that
19 interior parts can be removed and replaced.

20
21 **Q. HOW OFTEN SHOULD AN ISOLATION VALVE BE EXERCISED?**

1 A. PUC auditors have recently encouraged water utilities to exercise critical valves
2 on a one-to three-year cycle and the remaining non-critical valves on a seven- to
3 ten-year cycle since AWWA's distribution valve exercising recommended
4 guidelines can be resource intensive. "Although not aligned with AWWA
5 standards, a one- to three-year schedule for critical valves provides the company
6 with a balance between resource management and appropriate maintenance."¹³

7

8 **Q. DO YOU AGREE WITH THE PUC AUDITORS' SCHEDULE?**

9 A. Yes, with the understanding if the utility's records do not indicate that all of the
10 system's the isolation valves have been exercised within the past ten years, then
11 all those unexercised valves should be exercised within the next five years on a
12 parallel schedule until all the valves have been exercised and are operable. Once
13 all of the utility's isolation valves have been exercised within ten years and are
14 operable, the PUC Auditors' schedule is reasonable and agreeable.

15 Previously, for those utilities that did not have records showing that all their
16 isolation valves have been regularly exercised, I recommended that they should
17 exercise all their isolation valves within 5-years and then set a schedule based on
18 their local experience.

19

20 **Q. WHAT INFORMATION DID PWSA PROVIDE REGARDING EXERCISING**
21 **ISOLATION VALVES?**

¹³ PAPUC PWSA Company Management & Operations Audit, March 2023, pp. 60,
<https://www.puc.pa.gov/pcdocs/1782123.pdf>

1 A. In its response to OCA-V-12, PWSA has 19,371 known PWSA-owned isolation
2 valves based on GIS mapping. There are 4,163 privately-owned valves that serve
3 commercial customers and/or function as isolation valves on private distribution
4 systems that are not part of the PWSA system. See Exhibit TLF-9.

5 In its responses to OCA-1-10, 11 & 12, PWSA addressed its responses to the
6 Settlement of its 2021 PWSA base rate case and included Confidential versions of
7 its 2021 and 2022 isolation valve inspection reports and a Confidential version of
8 the number of isolation valves that it replaced during 2020 through 2023 (to date).
9 See Exhibit TLF-10. A “non-confidential” summary of the valve inspection and
10 replacement reports is shown on Exhibit TLF-11¹⁴. It can be noted from Exhibit
11 TLF-11 that the 2021 and 2022 valve inspections found 1237 isolation valves
12 broken and that only 544 valves have been replaced during 2020 to date. The
13 2021 and 2022 inspections also noted that another 432 isolation valves needed to
14 be located.

15 According to PWSA’s response to OCA-I-11 (included in Exhibit TLF-10) PWSA
16 has identified, tested and inspected its critical isolation valves.

17 PWSA has allocated \$13,705,485 in its FY 2023-2027 Budget for Isolation Valve
18 Replacements. See Exhibit TLF-12.

19

¹⁴ PWSA has agreed that in summary form, the information presented in the Confidential response to OCA Set I-10, 11 and 12 does not need to be marked as Confidential.

1 **Q. DO YOU HAVE ANY COMMENTS REGARDING PWSA'S MAINTAINANCE OF**
2 **ISOLATION VALVES?**

3 A. Yes. In the Settlement of the 2020 rate case, PWSA committed to exercise 5,000
4 isolation valves per year and to repair the valves that are found to be inoperable.¹⁵
5 PWSA has set an internal goal to exercise 5,200 valves per year (1/5th of its
6 isolation valves). Since it has been determined that PWSA owns 19,371 isolation
7 valves (instead of 25,920), PWSA is on schedule for inspecting and exercising the
8 valves found during the 5-year period. As can be noticed from TLF-12, it appears
9 that inspecting and exercising some valves may occur after the 5-year period
10 (2026 & 2027) because of problems with replacing broken valves and locating
11 some valves.

12
13 **Q. DO YOU HAVE ANY RECOMMENDATIONS?**

14 A. Yes. In order to comply with the PUC Auditors' recent recommendations, PWSA
15 should: (1) exercise critical valves on a one- to three-year schedule; (2) exercise
16 non-critical valves on a seven- to ten-year schedule and (3) maintain useful
17 records of when each valve was exercised.

18 Also, if PWSA's records do not indicate that all the isolation valves have been
19 exercised within the past ten years, then I recommend that PWSA exercise all
20 those unexercised valves within the next five years on a parallel schedule until all
21 the isolation valves have been exercised and are operable.

22

¹⁵ R-2020-3017951, Settlement, para. III.H.2.

1 **TESTING AND REPLACING CUSTOMER METERS**

2
3 **Q. WHAT ARE THE PUC'S REQUIREMENTS FOR TESTING AND REPLACING**
4 **CUSTOMER METERS?**

5 A. The PUC requirements for testing and replacing meters according to 52 Pa. Code
6 § 65.8. Metered service are:

7 (a) *Allowable error.* No water meter which has an error in registration of more
8 than 2% may be placed in service, nor may a water meter which has an error in
9 registration of more than 4% be allowed to remain in service, when water is
10 passing through it at approximately the following rates of flow:

<i>Meter size (inches)</i>	<i>Gallons per minute</i>
5/8	6
3/4	10
1	20
1-1/2	30
2	50
3	90
4	180
6	300

11 (b) *Periodic tests.* No public utility furnishing metered water service may allow a
12 water meter of 1 inch or less nor a water meter of more than 1 inch to remain in
13 service for a period longer than 20 years and 8 years respectively without testing
14 it for accuracy and readjusting it if it is found to be incorrect beyond the limits
15 established in subsection (a). Upon a customer's request the public utilities shall
16 also perform a meter test without charge if a meter has been in service, and has
17 not been tested, for a period greater than that specified in the following table:

<i>Inch Meter</i>	<i>Years</i>
5/8	10
3/4	8
1	6
More than 1	4

1 (c) *Meter test records.* Whenever a water meter is tested, the original test record
2 should be kept indicating the information necessary for identifying the meter, the
3 reason for making the test, the reading of the meter before being disturbed, and
4 the accuracy of the meter together with data taken at the time of the test. This
5 record shall be sufficiently complete to permit the convenient checking of the
6 methods employed and the calculations made. A record shall also be kept,
7 preferably numerically arranged, indicating the date of meter purchase, name of
8 manufacturer, its size, its identification, its various places of installation with
9 dates of installation and removal, and the dates and general results of all tests.

10
11 **Q. HAS PWSA PROVIDED INFORMATION ON TESTING AND REPLACING**
12 **CUSTOMER METERS (METER AGE)?**

13 A. Yes. Prior to coming under the jurisdiction of the PUC, PWSA did not keep records
14 of where or when customer meters were installed. PWSA elected to replace all
15 the customer meters because it was cost-effective.

16 Mr. King previously testified that: (1) PWSA previously agreed to test or replace
17 10,000 meters per year until all undocumented meters are either tested or
18 replaced; (2) 10,290 meters were replaced in the calendar year 2019; (3) because
19 of issues with the COVID-19 pandemic, only 5,550 meters were replaced in 2020
20 and the goal for 2021 is 8,000 meters; and (4) they intend to replace 10,000 meters
21 in subsequent years.¹⁶

22 In response to OCA Set I-13, PWSA has replaced and documented a total of
23 20,248 customer meters from January 1, 2020 through May 2023. See Exhibit
24 TLF-13. Including the number of valves replaced during 2019, PWSA has
25 replaced/tested a total of 30,538¹⁷ meters between 2019 through May 2023.

¹⁶ Docket No. R-2021-3024773, PWSA St. No. 5, pp. 17 & 18.

¹⁷ 10,290+5273+6971+5845+2159=30,538.

1 For the FY 2023-2027, PWSA has budgeted \$487,923 for replacing customer
2 meters 1.5” to 2”; \$4,140,273 for annual replacement of meters larger than 1”; and
3 \$4,096,697 for annual replacement of meters sized 1” or less. See Exhibit TLF-14.
4

5 **Q. HAS PWSA PREVIOUSLY IDENTIFIED A TARGET FOR METER**
6 **REPLACEMENT?**

7 A. Yes. In the settlement of its 2021 base rate case, PWSA indicated that it would
8 “strive to test or replace 8,000 meters per calendar year beginning in 2022 until all
9 undocumented meters are either tested or replaced.”¹⁸
10

11 **Q. DID PWSA ACHIEVE ITS METER REPLACEMENT TARGET IN 2022?**

12 A. No. According to PWSA witness McFaddin, PWSA replaced 5,865 meters, and it
13 did not achieve the target because of delays associated with PWSA’s launch of
14 the ERP system, vendor turnover, and unexpected reductions in plumbing staff.¹⁹
15

16 **Q. DO YOU HAVE ANY RECOMMENDATIONS ON PWSA’S TESTING AND**
17 **REPLACEMENT OF CUSTOMER METERS?**

18 A. I continue to recommend that PWSA should test or replace 10,000 customer
19 meters per calendar year until all undocumented meters are either tested or
20 replaced. As it stands, PWSA has not been able to achieve a target of 8,000
21 meters, and therefore I also recommend that it address its software, vendor, and

¹⁸ PWSA 2021 Settlement, Docket Nos. R-2021-3024773 et al) Section III(E)(3)(a).

¹⁹ PWSA St. No.3, p. 8.

1 staffing issues that have curtailed its ability to meet the internal target of 8,000
2 meters.

3 4 **FLUSHING THE DISTRIBUTION SYSTEM**

5 **Q. WHY IS FLUSHING WATER MAINS IMPORTANT?**

6 A. Over time, sediments can build up in the pipes and could result in discolored water
7 during flow surges resulting from firefighting and main breaks. This especially
8 occurs in older mains. Too much sediment in the mains can also affect the taste,
9 clarity and color of water.

10 11 **Q. ARE YOU AWARE OF ANY PUC OR DEP REQUIREMENTS FOR MAIN 12 FLUSHING?**

13 A. No. However, most water utilities, especially the larger ones, consider it good
14 practice to flush the distribution system annually when possible.

15 16 **Q. DOES THE PWSA HAVE A PROGRAM FOR FLUSHING ITS DISTRIBUTION 17 SYSTEM?**

18 A. Yes. In previous years, PWSA flushed mains in localized areas where customers
19 complained of water quality. PWSA previously agreed to flush 1/3 of its distribution
20 system each year²⁰. As previously mentioned, PWSA has more than 7,300
21 hydrants. In a CONFIDENTIAL response to OCA Set I-14, PWSA provided details

²⁰ Docket No. R-2021-3024773, PWSA St. No. 5, p.18

1 of each hydrant that they inspected and flushed. A non-confidential summary of
2 PWSA's confidential response to OCA Set 1-14 indicates that 913, 2828, 3054 and
3 1155 hydrants in the years 2020, 2021, 2022 and 2023 to date, respectively²¹.
4 Therefore, PWSA has tested and flushed 7,037 hydrants during more than three
5 years which indicates that they are slightly behind in flushing the distribution
6 system.

7 I do not recommend any changes at this time.

8
9 **Q. DO YOU HAVE ANY CONCERNS REGARDING PWSA FLUSHING ITS**
10 **DISTRIBUTION SYSTEM?**

11 A. Yes, I have identified an issue concerning dead-end lines. PWSA indicates that it
12 does not separately identify dead-end lines in its GIS, making the number of them
13 eliminated in 2021, 2022, and 2023 "difficult to quantify." See Exhibit TLF-15.
14 Therefore, it appears that PWSA may not know where many of its dead-end lines
15 are located and if all of its dead-end lines have a blow-off valve or hydrant for
16 flushing. PWSA should make an effort to identify, locate, and track the dead-end
17 lines and make sure that they have a blow-off or hydrant so they can be flushed to
18 eliminate water quality problems.

19

²¹ PWSA has agreed that in summary form, the information presented in the Confidential response to OCA Set I-14 does not need to be marked as Confidential.

1 **FIRE HYDRANTS**

2 **Q. HOW MANY FIRE HYDRANTS ARE LOCATED IN PWSA’S WATER SYSTEM**
3 **THAT CANNOT PROVIDE A FIRE FLOW OF 500 GALLONS PER MINUTE AT**
4 **20 PSI?**

5 A. According to PWSA’s responses to OCA-V-15 & 16, there are about 374 public fire
6 hydrants that cannot provide the minimum fire flow of 500 gallons per minute (gpm)
7 at 20 pounds per square inch (psi) and 82 fire hydrants connected to a water main
8 of less than 6-inch diameter. See Exhibit TLF-16.

9 If any of the 82 fire hydrants connected to less than 6-inch mains can provide at
10 least 500 gpm at 20 psi, PWSA should indicated such and be prepared to provide
11 documentation.

12 Hydrants that cannot provide the minimum fire flow should be painted black or
13 otherwise marked to indicate that they should only be used for flushing and blow-
14 offs. PWSA should provide confirmation to the OCA and other parties when this
15 has been done.

16
17 **CUSTOMER COMPLAINTS LOGS (WATER)**

18 **Q. DID YOUR INVESTIGATION CONSIDER COMPLAINTS FROM WATER**
19 **CUSTOMERS?**

20 A. Yes. I have reviewed PWSA’s Confidential 2022-2023 Customer Complaint Logs
21 (PWSA refers to as Customer Inquiries) submitted in its response to OCA-V-30;
22 and other complaints received by OCA and the PUC together with PIH testimony.

23

1 **Q. WHAT DID YOUR REVIEW OF PWSA'S CONFIDENTIAL WATER CUSTOMER**
2 **COMPLAINT LOG CONSIST OF?**

3 A. I tabulated the two Confidential Excel spreadsheets that PWSA submitted in
4 response to OCA-V-30. See Exhibit TLF-17 for a copy of OCA-V-30 and a
5 summary of the number of complaints as categorized by PWSA²². I also compared
6 the Complaint Log shown of Exhibit TLF-17 with previously summaries of
7 Complaint Logs tabulated for 2018-2019 and 2020-2021. See Exhibit TLF-18.

8

9 **Q. DO YOU BELIEVE THAT PWSA SUBMITTED A COMPLETE COMPLAINT**
10 **LOG?**

11 A. No. There are many categories of complaints that are not included in the submitted
12 Complaint Logs for 2022-2023 that were included in the 2018-2019 Complaint Log.
13 The 2020-2021 Complaint Logs submitted in the last base rate case had the same
14 problem and PWSA indicated that they would be able to furnish a more complete
15 Complaint Log during future rate cases.

16

17 **Q. WHY IS PWSA UNABLE TO FURNISH A COMPLETE COMPLAINT LOG?**

18 A. Apparently, after providing a customer complaint log having many categories of
19 complaints for the 2018 Base Rate Case, PWSA purchased software that cannot
20 easily provide information on customer complaints because the complaints are

²² PWSA has agreed that in summary form, the information presented in the Confidential response to OCA Set V-30 does not need to be marked as Confidential.

1 filed as a note in each customer's account log. See Exhibit TLF-19 for a more
2 detailed explanation provided by Ms. Quigley's rebuttal testimony in the last
3 case.²³

4
5 **Q. IS THE COMPLAINT LOG SHOWN ON EXHIBIT TLF-17 ACCEPTABLE FOR**
6 **EVALUATION THE QUALITY OF THE WATER SERVICE PROVIDED BY**
7 **PWSA?**

8 A. No.

9
10 **Q. WHY IS AN ACCURATE CUSTOMER COMPLAINT LOG IMPORTANT DURING**
11 **A RATE CASE?**

12 A. Generally, it allows review by OCA and other parties of the utility's responses to
13 customer complaints regarding the quality of water, water pressure, property
14 damage by contractors, etc. A complete log will show how many customers are
15 complaining about the same complaint in the same area around the same time
16 and it can indicate if more information is required to evaluate the utility's response
17 to those complaints. Also, it is especially important in PWSA's case because many
18 needed construction improvements are expected to continue for many years.

19
20 **Q. DO YOU HAVE ANY RECOMMENDATIONS REGARDING CUSTOMER LOGS?**

21 A. Yes. PWSA should take the necessary steps to be able to provide a complete
22 customer complaint log. PWSA provided an acceptable log during the 2018 base

²³ Docket Nos. R-2021-3024773, R-201-3024774, R-201-3024779

1 rate case and then purchased software not suitable for providing oversight of
2 complaints. Other large water utilities under the jurisdiction of the PUC have been
3 providing acceptable complaint logs.

4
5 **WASTEWATER SYSTEM**

6 **Q. PLEASE PROVIDE A BRIEF DESCRIPTION OF PWSA'S WASTEWATER**
7 **SYSTEM.**

8 A. The wastewater collection and conveyance system consists of approximately
9 1,220 miles of sanitary, storm and combined sewer lines, 29,000 manholes,
10 approximately 30,000 stormwater catch basins and inlets, 38 combined sewer
11 overflow outfalls, 185 storm outfalls and four pump stations which are designed to
12 carry both storm and sanitary flows. About 75% of the system is serviced by
13 combined sewers (both wastewater and stormwater are collected in one pipe) and
14 the remaining 25% are designed as separate sewage and stormwater piped
15 systems. The average age of the sewer lines is between 60 and 70 years old, with
16 some portions reaching nearly 150 years in age. The wastewater collection and
17 conveyance system discharges to a regional system that conveys sewer flows
18 through trunk sewers to deliver to a wastewater treatment which services eighty-
19 three cities, towns and boroughs in Allegheny County. The regional system is
20 owned and operated by the Allegheny County Sanitary Authority ("ALCOSAN")
21 which maintains interceptors along the rivers to deliver sewage to its Woods Run
22 Wastewater treatment plant prior to discharge in the Ohio River. Because the
23 current combined sewer systems contribute to the Allegheny Region's Combined
24 Sewer Overflow volume, state and federal water quality regulations apply,

1 including a regional Consent Decree involving ALCOSAN and the Pennsylvania
2 Department of Environmental Protection mandating a \$2 billion Combined Sewer
3 Overflow reduction program.²⁴

4 PWSA has two types of wastewater conveyance systems — a combined system
5 and separated sanitary and storm sewer systems. Stormwater is conveyed in
6 different ways by each type of system.

7 **IMPROVEMENTS (WASTEWATER)**

9 **Q. IS PWSA REQUIRED TO MAKE IMPROVEMENTS TO ITS WASTEWATER** 10 **SYSTEM?**

11 A. Yes. PWSA is required to reduce the amount of combined sewer overflows as part
12 of the USEPA, DEP and the Allegheny County Sanitary Authority (ALCOSAN)
13 Consent Degree. See Exhibit TLF-1 for more details.

15 **Q. WHAT WASTEWATER IMPROVEMENTS ARE BUDGETED THROUGH** 16 **FISCAL YEAR 2027?**

17 A. For the Fiscal Years 2023-2027, PWSA has budgeted the following wastewater
18 projects:²⁵

- 19 • 31st Ward Pump Station and Appurtenances – Phase 2 @ \$17,192,667.
- 20 • 6122 and 6150 Mifflin Road Demolition @ \$50,000.
- 21 • Browns Hill Road Sewer Pump Station Replacement @ 3,920,000.
- 22 • Large Diameter Sewer Rehabilitation Program @ \$29,891,724.
- 23 • M29 Outfall Improvements @ \$250,000.
- 24 • Maytide Storm and Sanitary Sewer Improvements @ \$6,102,309.
- 25 • Queenston Sewer Improvements @ \$2,453,753.

²⁴ PWSA St. No. 1, pp. 19-20.

²⁵ PWSA Exh. EB-4, pp. 94-104.

- Sewer Reconstruction Program @ \$10,889,557.
- Sewers Under Structures Program @ \$18,499,314.
- Small Diameter Sewer Rehabilitation Program @ \$121,066,569.

QUALITY OF SERVICE ISSUES (WASTEWATER)

Q. WHAT QUALITY OF SERVICE ISSUES ARE INCLUDED IN YOUR TESTIMONY CONCERNING THE PWSA'S WASTEWATER SYSTEM?

A. My testimony will address customer complaints concerning sewer backups and odors.

CUSTOMER COMPLAINT LOG (WASTEWATER)

Q. IS THE COMPLAINT LOG SHOWN ON EXHIBIT TLF-17 ACCEPTABLE FOR EVALUATION THE QUALITY OF THE WASTEWATER SERVICE PROVIDED BY PWSA?

A. No. The Complaint Log only addresses customer sewer backup and sewer smell and did not identify if the complaint concerned a combined or separate sewer. Regarding the number of "customer sewer backup" it is unclear if the log presents data on total backups and the numbers of backups that occurred on combined sewers or separate sewers.

SEWAGE BACKUPS

Q. DO YOU HAVE ANY SPECIFIC COMMENTS ABOUT CUSTOMER COMPLAINTS REGARDING SEWAGE BACKUPS?

A. Yes. According to Exhibit TLF-17, PWSA opened work orders to investigate 374 sewer backups during 2022 and 85 backups in 2023 through June 1. This is an

1 important issue as it is both costly and a health hazard. It is unclear how many of
2 these backups are caused by stormwater flooding the sewers or for other reasons.
3 PWSA is taking steps to reduce the sewer backups from stormwater runoff. The
4 following wastewater and stormwater projects that specifically address sewer
5 backups have been budgeted approximately \$20.4 million for FY 2023-2027:

- 6 • Maytide Storm and Sanitary Sewer System Improvements @ \$6,102,309.
 - 7 • Braywood Stormwater Improvements @ \$874,000.
 - 8 • Catch Basin and Inlet Replacement Program @ \$72,159,260.
 - 9 • Dragoon Way Stormwater Improvements @ \$1,078,625.
 - 10 • Fleury Way Stormwater Infrastructure Improvements @ \$476,212.
 - 11 • Haverhill Street Improvement Project @ \$1,108,400.
 - 12 • Maryland Avenue Stormwater Infrastructure Improvements @ \$6,925.
 - 13 • Stewart Avenue Stormwater Infrastructure Project @ \$3,809,833.
 - 14 • Volunteer's Field Stormwater Infrastructure Improvements @ \$413,125.
 - 15 • Woodland Road Stormwater Infrastructure Improvements @ \$245,256.
- 16
17

18 **SEWER SMELL**

19 **Q. DO YOU HAVE ANY COMMENTS ABOUT CUSTOMER COMPLAINTS**
20 **REGARDING SEWER SMELL?**

21 A. The "sewer smell" log indicates that PWSA response was adequate and
22 sometimes included using closed circuit tv to investigate the customer complaints.

23
24 **Q. DO YOU HAVE ANY RECOMMENDATIONS REGARDING THE WASTEWATER**
25 **CUSTOMER COMPLAINT LOGS?**

26 A. Yes. As previously mentioned for the water system, PWSA take the necessary
27 steps to be able to provide a complete customer complaint log.

28

29

1 **STORMWATER SYSTEM**

2 **Q. PLEASE PROVIDE A BRIEF DESCRIPTION OF PWSA'S STORMWATER**
3 **SYSTEM.**

4 **A.** PWSA's overall wastewater conveyance system is composed of over 1,200 miles of sewer
5 lines, 4 pump stations, and approximately 25,000 catch basins. PWSA has two types of
6 wastewater conveyance systems – a combined system and separated sanitary and storm
7 sewer systems. Stormwater is conveyed in different ways by each type of system.

8 First, approximately 75% of the PWSA system, or approximately 900 miles of sewer lines,
9 is the combined sewer system. This is generally the older areas of the system here
10 wastewater and stormwater are conveyed in the same pipe. During times of dry weather,
11 all flow is conveyed to ALCOSAN for treatment. When it rains, the capacity of the system
12 to convey flow can be limited, which causes localized flooding, basement sewer backups,
13 and overflows to streams and rivers.²⁶

14 Second, newer, or more recently redeveloped communities have separated sanitary and
15 storm sewer systems. In a separated system, wastewater is conveyed to ALCOSAN for
16 treatment, and when it rains stormwater is discharged directly to a nearby stream or river.

17 The separate stormwater conveyance system ("MS4")²⁷ is not connected to either the
18 combined wastewater system or the sanitary sewer system, and only carries stormwater.

19 Approximately 25% of the PWSA system is separated. The separated system has
20 approximately 178 miles of sanitary sewer and 148 miles of stormwater pipes.²⁸

²⁶ PAWC St. No. 5, pp. 6.

²⁷ "MS4" stands for Municipal Separate Storm Sewer System. See 25 Pa. Code § 92a.2. Municipalities and other entities that meet certain standards must obtain National Pollutant Discharge Elimination System ("NPDES") permit coverage for discharges of storm water from their MS4s. See, e.g., the Storm Water Management Act, 32 P.S. §§ 680.1, et seq. See also 40 CFR 122.26(b) (relating to definitions).

IMPROVEMENTS (STORMWATER)

Q. WHAT STORMWATER IMPROVEMENTS ARE BUDGETED THROUGH FISCAL YEAR 2027?

A. PWSA has budgeted the following wastewater projects through 2027:²⁹

- Braywood Stormwater Improvements @ \$874,000.
- Bus Rapid Transit Phase 2 @ \$1,500,000.
- Bus Rapid Transit Stormwater Infrastructure Improvements @ \$1,560,654.
- Catch Basin and Inlet Replacement Program @ \$72,159,260.
- Dragoon Way Stormwater Improvements @ \$1,078,625.
- Fleury Way Stormwater Infrastructure Improvements @ \$476,212.
- Four Mile Run Stormwater Infrastructure Improvements @ \$20,040,792.
- Haverhill Street Improvement Project @ \$1,108,400.
- Lawn and Ophelia @ \$203,741.
- Martin Luther King Field Stormwater Infrastructure Improvements @ \$4,420,975.
- Maryland Avenue Stormwater Infrastructure Improvements @ \$6,925.
- MS4 Permit PRP Plan Sediment Reduction Project @ \$1,085,500.
- Saw Mill Run Municipal Separate Storm Sewer System Compliance @ \$3,500,000.
- Saw Mill Run Watershed Improvements @ \$1,000,000.
- Southside Flats Sewer Separation @ \$5,560,116.
- Southside Stormwater Infrastructure Improvements @ \$4,732,807.
- Stewart Avenue Stormwater Infrastructure Project @ \$3,809,833.
- Thomas and McPherson Stormwater Infrastructure Improvements @ \$854,905.
- Volunteer’s Field Stormwater Infrastructure Improvements @ \$413,125.
- Wet Weather Program Projects @ \$33,000,000.
- Wightman Park Phase 2 Project @ \$182,166.
- Woodland Road Stormwater Infrastructure Improvements @ \$245,256.
- Woods Run Stream Removal Stormwater Infrastructure Improvements @ \$3,569,058.

Q. WHAT QUALITY OF SERVICE ISSUES ARE INCLUDED IN YOUR TESTIMONY CONCERNING THE PWSA’S STORMWATER SYSTEM?

²⁹ PWSA Exh. EB-4, pp. 106-129.

1 A. None. My testimony usually addresses customer complaints about storm sewers
2 surcharging and maintenance issues; however, PWSA's complaint log for
3 stormwater only addressed missing lids.

4
5 **Q. IS THE COMPLAINT LOG SHOWN ON EXHIBIT TLF-17 ACCEPTABLE FOR**
6 **EVALUATION OF THE QUALITY OF THE STORMWATER SERVICE**
7 **PROVIDED BY PWSA?**

8 A. No. The stormwater complaint log only addressed missing or damaged lids of
9 stormwater grates and manholes.

10
11 **Q. DO YOU HAVE ANY RECOMMENDATIONS REGARDING THE STORMWATER**
12 **CUSTOMER COMPLAINT LOGS?**

13 A. Yes. As previously mentioned for the water and wastewater systems, PWSA
14 should take the necessary steps to be able to provide a complete customer
15 complaint log.

16
17 **ISSUES INVOLVING MORE THAN ONE SYSTEM**

18 **Q. ARE THERE ANY OTHER ISSUES THAT YOU WANT TO DISCUSS**
19 **THAT INVOLVE MORE THAN ONE SYSTEM?**

20 A. Yes. The cost sharing of surface restoration between PWSA and the City.
21 This is an issue that I discussed in the previous rate cases.

22

1 **Q. WHAT IS THE SURFACE RESTORATION ISSUE THAT YOU ARE**
2 **CONCERNED ABOUT?**

3 A. The surface restoration that is full lane or curb to curb paving, which is in
4 addition to the typical restoration of roadway pavement to its pre-existing
5 usable condition but would show where the trenches were excavated,
6 backfilled and repaved.

7
8 **Q. HOW MUCH MONEY HAS PWSA SPENT ON SURFACE**
9 **RESTORATION?**

10 A. I don't know the exact amount. However, PWSA's budget for FY 2019-2024
11 indicates that \$17,416,550 [$\$25,911,333 - (\$4,197,390 + \$4,297,393)$] was
12 proposed through FY 2022. Some of this amount may have been used for
13 other than full lane or curb to curb paving. See Exhibit TLF-20. More up to
14 date information is not available because PWSA no longer budgets surface
15 restoration as a separate item. After I made an issue about the lack of cost
16 sharing by the City in the 2020 base rate case, PWSA made surface
17 restoration a cost item in other contracts instead of a published separate
18 budget item.

19
20 **Q. WHY SHOULD THE CITY PAY FOR ANY PWSA PAVEMENT RESTORATION?**

21 A. There are at least three reasons why the City of Pittsburgh should pay for any
22 PWSA pavement restoration:

1 First, PWSA's 5-Year Long-Term Infrastructure Improvement Plan (LTIIP) requires
2 PWSA to coordinate its projects with the City's repaving plans to minimize
3 disruptions to the community and minimize surface restoration costs. See Exhibit
4 TLF-21.

5 Second, PWSA may jeopardize its DSIC and other funding for future projects if
6 money is wasted when the City repaves a street and a PWSA project repaves the
7 same street a short time later.

8 Third, PWSA is trying to correct problems to its water, wastewater, and stormwater
9 systems caused by the City prior to PWSA becoming a public utility under the
10 jurisdiction of the PUC.

11
12 **Q. HOW MUCH HAS THE CITY CONTRIBUTED TO PWSA'S SURFACE**
13 **RESTORATION COSTS?**

14 A. According to PWSA's response to OCA-V-31, starting in FY 2022, the City has
15 paid a total of \$252,597. See Exhibit TLF-22. The City paid nothing prior to FY
16 2022.

17
18 **Q. HAS PWSA CONSTRUCTED A PROJECT THAT REQUIRED SURFACE**
19 **RESTORATION ON A STREET RESURFACED BY THE CITY SINCE 2019?**

20 A. Not yet. See Exhibit TLF-22 for PWSA's response to OCA-V-31 g) & f) that
21 indicates that at least one will occur in the near future.

22

1 **Q. IS PWSA PROPOSING FUTURE PROJECTS THAT REQUIRE EXTENSIVE**
2 **SURFACE RESTORATION?**

3 A. Yes. Mr. King has testified in PWSA St. No. 2: (1) that in the implementing PWSA's
4 forthcoming wet weather consent decree, surface restoration is one of the main
5 drivers of costs; it is estimated that surface restoration will cost \$7,836,351,
6 \$8,306,532 and \$8,804,942 in FY 2024, FY 2025 and FY 2026, respectively. See
7 Exhibit TLF-23 for pages 15 thru 17 of Mr. Kings testimony that explains the
8 importance surface restoration in the wet weather projects.³⁰

9
10 **Q. PLEASE DISCUSS THE PROCEDURE OF HOW THE COSTS OF SURFACE**
11 **RESTORATION HAS BEEN DISTRIBUTED BETWEEN PWSA AND THE CITY?**

12 A. Presently, each year PWSA notifies the City where projects will be located during
13 the following three years and the City doesn't repave those streets until PWSA
14 complete construction (including surface restoration). As discussed above, that
15 method of coordination has not been very effective in sharing costs. What would
16 have been more effective is that once PWSA advises the City where its projects
17 will be located during the following three years, the City commits to provide an
18 agreeable amount as their share of the surface restoration costs of those PWSA
19 projects.

20
21 **Q. WHAT WOULD BE THE RESULT IF THE STATUS QUO CONTINUES?**

³⁰ PWSA St. No. 2, pp. 15-17.

1 A. Since PWSA has some of its water, wastewater or stormwater facilities located in
2 almost all of the City streets, PWSA customers will eventually pay for providing
3 surface restoration for almost all of the City streets – including those streets the
4 City has resurfaced since 2018.

5

6 **Q. WHAT DO YOU RECOMMEND?**

7 A. I recommend that the Cooperation Agreement between the City and PWSA be
8 amended and approved by the Commission prior to any PWSA rate increase after
9 January 1, 2025. This amendment is needed to indicate who is responsible for the
10 many cost items discussed in the existing Agreement after PWSA has sole
11 ownership of the systems.

12

13 **COST OF WATER TREATED AT THE MICROFILTRATION PLANT**

14 **Q. ARE THERE ANY OTHER COSTS THAT SHOULD BE CONSIDERED BY AN**
15 **AMENDED COOPERATION AGREEMENT?**

16 A. Yes. The City should pay for all water treated at the Microfiltration Treatment Plant
17 (MFP) or it should be considered as UFW/NRW.

18

19 **Q. PLEASE EXPLAIN.**

20 A. PWSA delivers treated water to the Highland 1 Reservoir (HR1). The main
21 purpose of determining UFW/NRW is to identify and reduce unnecessary costs of
22 treated water delivered to the customer. The MFP must treat all water from
23 Highland 1 Reservoir (HR1) even though it has been previously treated at the

1 Aspinwall Treatment Plant because HR1, an uncovered reservoir, allows the
2 previously treated water to become contaminated. See Exhibit TLF-24.

3 Previously, the Pennsylvania Department of Environment Protection (DEP)
4 required PWSA to either cover HR1 or retreat the water from the HR1 prior to
5 discharging the water into the Highland 1 distribution system. HR1 is an open
6 reservoir on top of a hill within a City park and the City did not want it to be lined
7 and covered like the other similar PWSA reservoirs (i.e. Lanpher, Highland 2, and
8 Herron Hill Reservoirs). PWSA elected to construct the Microfiltration Treatment
9 Plant (MFP) to re-treat the water from HR1 and allow HR1 to remain uncovered.

10 In order to determine the amount of water delivered to the Highland 1 distribution
11 system, PWSA has to meter water from two other metering stations near the MFP
12 in addition the amount metered and pumped from the MFP. Once the ongoing
13 construction of pumping facilities at Highland 2 Reservoir (HR2) are completed,
14 the Highland 1 distribution system can also be served from HR2 and the operation
15 of the MFP may not be necessary during normal conditions.

16 If the City is not willing to pay for the amount of water treated by the MFP, PWSA
17 should consider covering HR1 and reduce the operation of the MFP. It should be
18 noted that the relining of HR1 is budgeted for FY2026, and this would be the best
19 time to cover HR1 during the next twenty-five years (the expected useful life of the
20 relining). See Exhibit TLF-25.

1 **PUBLIC INPUT HEARING TESTIMONY**

2 **Q. WHAT QUALITY OF SERVICE ISSUES WERE RAISED AT THE PUBLIC**
3 **INPUT HEARINGS HELD ON JULY 25 AND 27, 2023?**

4 A. Based on the Transcripts for July 25 and 27, 2023, I noticed the following
5 testimony on quality of service (except for rates and billings) issues:

6 **Boil Water Advisory** – La'Tasha Mayes Tr. 67-72.

7 **Sewer Repair Construction** – Richard Marini Tr. 79-81.

8 **Unannounced Water Shut Offs** – Phyllis Hankins Tr. 139-143; Robert
9 Rubinstein Tr. 215.

10 **Rates Set By Meter Size** – Melissa McSwigan Tr 201-202; Caroline West
11 Tr. 253.

12 **Unrestored Property Damage** – Robert Rubinstein Tr 215.

13 **Charged for an Unfound Water Leak and Meter Replacement** – Kim
14 Williams Tr. 289 & 298.

15 **Brown Water** – Kim Williams, Tr. 290.

16
17 **Q. SHOULD THE AUTHORITY RESPOND TO THE ISSUES TESTIFIED AT**
18 **THE PIH?**

19 A. Yes. PWSA should include how they responded to these issues in their
20 rebuttal testimony.

21
22 **Q. DOES THIS COMPLETE YOUR WRITTEN DIRECT TESTIMONY?**

1 A. Yes. However, I reserve the right to supplement this testimony if additional
2 relevant information is received.

BACKGROUND AND QUALIFICATIONS

TERRY L. FOUGHT, P.E.

Education

Cleveland State University, Cleveland, Ohio, Bachelor of Civil Engineering, 1967

Professional Registrations

Professional Engineer, Pennsylvania, PE-023343-E, 1975

Professional Engineer, New Jersey, GE 25392, 1978 (Inactive)

Professional Engineer, Virginia, 10850, 1979 (Inactive)

Professional Land Surveyor, Pennsylvania, SU-000194-A, 1980 (Inactive)

Employment

From March 1983 to date, I have been a self-employed consulting engineer engaged in providing consulting engineering services to water and wastewater utilities, both private and municipal.

From May 1969 to March 1983, I was employed by E. H. Bourquard & Associates, Inc. as a project engineer to water and wastewater clients. At the time I left the firm I was a vice-president.

From 1962 to 1969, I was employed by the State of Ohio, Department of Highways and the Geauga County Ohio Sanitary Engineers Office as an engineer's assistant to assistant sanitary engineer with breaks in employment to attend college and 1½ years active duty military service.

Experience

I have prepared studies related to and designed water supply, treatment, transmission, distribution and storage facilities. I have provided services to the following private and municipal water suppliers: Amber Hill Mobile Home Park, Brockway Borough Municipal Authority, Dallas Water Company, Eastern Gas and Water Investment Company, Haddonfield Hills Development, Halifax Borough, Langhorne Spring Water Company, Mifflintown Municipal Authority, Neshaminy Water Resources Authority, Newberry Water Company, Pleasant View Mobil Home Park, H. B. Reese Candy Company, Shavertown Water Company, Smethport Water Company, Tunkhannock Water Company, and Watts Business Center.

I have prepared studies related to and designed wastewater collection and interceptor sewers, pumping stations and force mains, and treatment plants. I have provided services to the following private and municipal sewerage utilities: Brockway Glass Company, Central Dauphin School District, Clean Waste Technologies, Inc., Dauphin Borough, Dauphin Borough Municipal Authority, Halifax Area School District, Halifax Municipal Authority, Mercersburg Borough, Middle Paxton Township, Newberry Sewer Company, Newberry Township Municipal Authority, Park-a-way Park Family Campground, Reading Township Municipal Authority, Reynoldsville Borough, Saint Thomas Township, and Watts Business Center.

I have prepared over 100 stormwater management and drainage plans for land development and subdivision plans in Cumberland, Dauphin, and York Counties. Most of these plans included the design of storm sewer collection systems.

List of Public Utility cases which I have testified or provided substantial assistance:

Exhibit TLF – 1

IX. QUALITY OF SERVICE

IX.1. Indicate whether the company is in violation of any provision of the Pennsylvania Safe Drinking Water Act (SDWA) or any rule, regulation or order, or any condition of any permit, variance or exemption granted by the Pennsylvania Department of Environmental Protection (PA-DEP), or its predecessor.

a. Provide information indicating whether the company is in compliance with SDWA provisions at 25 Pa. Code § 109.407 regarding general public notification requirements:

(i) Provide a copy of each public notification given in accordance with this section, since the last rate proceeding.

(ii) Provide a detailed explanation of all actions taken to remedy an acute violation, and to comply with the requirements prescribed by a variance or exemption.

(iii) State whether any fines or penalties were assessed by PA-DEP, and indicate the amounts paid by the company.

b. Provide the most recent copies of all annual consumer confidence reports Issued pursuant to SDWA Amendments of 1996 since the last rate proceeding.

(i) Provide any annual consumer confidence reports which reflect violations of State and Federal safe drinking water requirements.

(ii) Explain how these violations were resolved.

RESPONSE:

PWSA is currently under the following Consent Orders and Agreements (COAs):

- November 17, 2017 – Corrosion Control and Lead Service Lines
- September 6, 2019 – Clearwell and Related Projects and Cross-Connections
- May 7, 2021 – First Amendment to September 6, 2019 COA
- January 20, 2021 – NPDES MS4 Compliance (USEPA)
- May 7, 2021 – Construction Prior to Authorization, Valve Pits, and Ferric Chloride
- August 3, 2022 – Aboveground Storage Tanks at Three Chlorine Booster Stations
- August 4, 2022 – Second Amendment to September 6, 2019 COA

November 17, 2017 COA – Corrosion Control and Lead Service Lines

IX. QUALITY OF SERVICE

PWSA received a COA for Violations of the Safe Drinking Water Act on November 17, 2017 relating to Lead Action Level Exceedances and Failure to Treat as Permitted. PWSA has introduced orthophosphate, a corrosion control treatment, for the system as well as implemented a successful lead service line replacement program.

Quarterly Status reports are being prepared and submitted to PA-DEP as required under the COA, with the most recent report submitted February 15, 2023.

PWSA has one remaining obligation under this COA: Within 30 days of the end of the second period of follow-up tap monitoring, PWSA shall submit a request for designation of optimal corrosion control treatment Water Quality Parameters. PWSA intends for the 2023a sampling event to be the second period of follow-up tap sampling after corrosion control treatment adjustments were made in June 2022. PWSA anticipates submitting the request for designation of optimal corrosion control Water Quality Parameters by July 30, 2023.

September 6, 2019 COA – Clearwell and Related Projects and Cross-Connections

May 7, 2021 – First Amendment to September 6, 2019 COA

August 4, 2022 – Second Amendment to September 6, 2019 COA

PWSA entered into the COA with the PA-DEP related to “Violations of the Pennsylvania Safe Drinking Water Act and the Rules and Regulations Promulgated Pursuant Thereto” for the Clearwell Response Projects on September 6, 2019 (hereto referenced as the 2019 COA). Under the 2019 COA, PWSA is required to construct a bypass system to enable the Authority to remove the existing single-cell clearwell from service and replace it with a new multi-celled clearwell. PWSA is obligated to submit a construction permit to PA-DEP on or before January 1, 2023 and to complete construction of a clearwell bypass system within two years of PA-DEP's issuance of a construction permit. As a result of the existing single-cell clearwell basin condition and design, a clearwell bypass system is essential to ensure uninterrupted water supply service should the existing clearwell should prematurely fail.

PWSA is also required by the 2019 COA to: (i) rehabilitate or replace Rising Main #3 (from the Breucken Pump Station) to PWSA's Highland 2 Reservoir; (ii) rehabilitate or replace Rising Main #4 (from the Breucken Pump Station) to PWSA's Highland 2 Reservoir; (iii) construct a new redundant rising main from the Aspinwall Pump Station to the Lanpher Reservoir to replace the existing 100 year old transmission main which has suffered 3 major failures in the past 5 years; (iv) replace the cover and liner of the Highland 2 Reservoir to comply with existing regulatory standards, and facilitate the clearwell bypass system construction; and (v) replace or rehabilitate the existing Aspinwall and Bruecken pump stations.

With respect to the completion of the clearwell bypass, acknowledging that PWSA submitted the construction permit application on September 30, 2021, and should the PA-DEP approve the construction permit on April 21, 2023 (an arbitrary date selected for schedule projection purposes

IX. QUALITY OF SERVICE

only), the resultant required construction completion deadline will be April 2026. Under this timing scenario, the clearwell bypass would be the last project to be completed prior to taking the existing clearwell offline for replacement.

On May 7, 2021 PWSA entered into the First Amendment to September 6, 2019 COA with PA-DEP, granting PWSA a 90-day extensions of the deadlines for submitting the requisite Construction Permit Applications for: Rising Main #3 Rehabilitation Project (which was due "on or before September 1, 2020", but with the 90 day extension, the revised date was "11/30/20" (which PWSA achieved, submitting on 11/30/2020)); for Aspinwall Pump Station to Lanpher Reservoir Rising Main Project (which as due "on or before December 30, 2020", but currently with the 90 day extension, the revised date is "3/31/21" (which PWSA achieved, submitting on 3/30/21); for the Aspinwall and Bruecken Pump Station Improvements Projects (which was due "on or before January 1, 2021", but with the 90 day extension, the revised date was "4/1/21", and with a second approved extension, are due on or before 9/31/21)); and for the Washout Disconnection (which was due "on or before June 1, 2020", but with the 90 day extension, the revised date was "8/31/20" (achieved, we submitted on 8/31/20).

On August 4, 2022 PWSA entered into the Second Amendment to September 6, 2019 COA with PA-DEP granting an extension to the completion of work associated with the reconstruction and rehabilitation of Rising Main 3 and installation of a new liner and cover for the Highland 2 Reservoir until December 31, 2022.

The Certificates of Construction completion were submitted for the reconstruction and rehabilitation of Rising Main 3 on November 7, 2022, and for the installation of a new liner and cover for the Highland 2 Reservoir on December 30, 2022. The PA-DEP Public Water Supply Operating Permits were received for Rising Main 3 on December 13, 2022 and for Highland 2 Reservoir on January 9, 2023.

PWSA is currently on schedule for all projects, having achieved all milestone deliverable dates thus far for the COA and COA amendment stated deadlines for the above referenced projects.

January 20, 2021 Administrative Order – NPDES MS4 Compliance (USEPA)

On January 26, 2021, PWSA and the City of Pittsburgh entered into a two-year Administrative Order on Consent with the United States Environmental Protection Agency (USEPA) to resolve violations related to the Municipal Separate Storm Sewer System (MS4) NPDES Permit #PA1136133. The Order required PWSA and the City to develop and implement a program for conducting inspections and enforcement of constructed erosion and sediment controls, and post-construction Best Management Practices (BMPs), including submission of an amended unified Stormwater Code to the City of Pittsburgh by July 1, 2021; in addition, the inspection and enforcement program must be fully implemented by March 31, 2022.

IX. QUALITY OF SERVICE

On January 7, 2022 an agreement between PWSA and the City of Pittsburgh was executed establishing roles and responsibilities as they relate to MS4 compliance within the City. The agreement specifies that the primary roles and responsibilities of PWSA's Stormwater Division include the planning, design, implementation, and maintenance of stormwater related Capital Projects that may reduce localized flooding and Combined Sewer System overflows at the rivers while improving the water quality health of streams and waterways.

PWSA and the City submitted quarterly reports to USEPA and PA-DEP on the status of compliance under the Administrative Order and have addressed the required items.

May 7, 2021 COA – Construction Prior to Authorization, Valve Pits, and Ferric Chloride

On May 7, 2021, the PWSA entered into a COA with the PA-DEP in the matter of “violations of the Pennsylvania Safe Drinking Water Act and the Rules and Regulations Promulgated Pursuant Thereto” and describes five violations related to the water system. After negotiation of these matters, the COA mandates, as ordered by the PA-DEP and agreed to by the PWSA, corrective actions as follows:

1. Submit a Corrective Action Plan (CAP), also called Permit CAP, by 7/7/2021, and implement the CAP after receiving approval of it from the PA-DEP.
2. Submit a plan and schedule, called a Meter and Valve Pit Inspection Plan, by 6/7/2021 and implement the Plan after receiving approval of it from the PA-DEP.
3. Conduct weekly monitoring of seven identified meter and valve pits and semi-annual monitoring of all other interconnect meter and valve pits.
4. Install barriers or other methods by 7/7/2021 to prevent future spills from entering meter or pump station valve pits.
5. Annual training about the Chemical Delivery Procedure Standard Operating Procedure.
6. Civil penalty settlement by 6/7/2021.
7. Submit a proposal for a Community Environmental Project by 7/7/2021.

The status of the above corrective actions are as follows. The PWSA has submitted the requirements of No.'s 1, 2, 6, and 7 to the PA-DEP by the due dates listed above. The PWSA is continuing the work for No. 3 and 5 as on-going activities. Work for No. 4 was completed and the civil penalty under No. 6 was satisfied. PWSA was unable to complete the Community Environmental Project under No. 7. PWSA notified PA-DEP of delays and cost increases beyond the Authority's control related to completion of the project by others. The completion of the project was going to be beyond the stipulated deadline in the COA and PA-DEP requested PWSA pay the stipulated penalty by May 31, 2022. PWSA paid the penalty and submitted documentation to PA-DEP on May 24, 2022.

IX. QUALITY OF SERVICE

August 3, 2022 COA – Aboveground Storage Tanks at Three Chlorine Booster Stations

As part of implementing PWSA's Environmental Compliance Program, the Authority self-identified to PA-DEP several above ground storage tanks which required registration under PA DEP regulations. Three of these storage tanks locations associated with chlorine booster systems did not have sufficient secondary or emergency containment. After negotiation of these matters, the COA mandates, as ordered by the PA-DEP and agreed to by the PWSA, corrective actions as follows:

1. Remote SCADA monitoring and loss of level alarms for the three tank systems (complete)
2. Daily visual inspection and submittal of documentation of the three tank systems (on-going)
3. Herron Hill Reservoir:
 - a. Completion of capital project to replace the tank system (in-progress)
4. Lanpher Reservoir:
 - a. Installation of a flood panel across the door to help use the room for emergency containment (complete)
 - b. Submit the permit for construction of a new tank system by July 30th (complete)
 - c. Construction of a new tank system (waiting on PA-DEP permitting)
5. Highland No. 2 Reservoir:
 - a. While the Highland No. 2 Reservoir is out of service, to pull the tanks from that room, install a liner in the room and a flood panel across the door and then reinstall the tanks (complete)
 - b. Submit a schedule for construction of a new tank system, associated with the construction of the Highland Pump Station. PWSA has received the construction permit for this work. (complete)

All three of these sites within the next three years will have capital projects that are in progress and then the existing tank systems will be replaced with new booster stations.

- a. Provide information indicating whether the company is in compliance with SDWA provisions at 25 Pa. Code § 109.407 regarding general public notification requirements:

PWSA had the following Public Notifications: Loss of Positive Pressure (Tier 1 Boil Water Advisory) on, June 2, 2021, July 9, 2021, May 11, 2022, July 6, 2022, July 20, 2022, July 30, 2022, September 22, 2022, October 18, 2022, and February 12, 2023. See copies of Public Notifications attached.

- (i) Provide a copy of each public notification given in accordance with this section, since the last rate proceeding. - Attached

IX. QUALITY OF SERVICE

(ii) Provide a detailed explanation of all actions taken to remedy an acute violation, and to comply with the requirements prescribed by a variance or exemption.

PWSA resolved all loss of positive pressure conditions by performing necessary repairs (in the case of water main breaks) and returning pumping operations to normal (in the case of power outages). Bacteriological sampling was conducted in accordance with PA-DEP requirements prior to lifting the boil water advisories. All documentation was submitted to PA-DEP at the conclusion of each event.

(iii) State whether any fines or penalties were assessed by PA-DEP, and indicate the amounts paid by the company.

PWSA has not been assessed any fines or penalties by PA-DEP for Loss of Positive Pressure events.

b. Provide the most recent copies of all annual consumer confidence reports Issued pursuant to SDWA Amendments of 1996 since the last rate proceeding.

1. Provide any annual consumer confidence reports which reflect violations of State and Federal safe drinking water requirements.
2. Explain how these violations were resolved.

Consumer Confidence Reports for FY 2021 is attached. The report includes a public notification of a monitoring requirement violation. PWSA routinely collects more samples than are required by regulation to assure the quality of the drinking water. In December 2021 PWSA collected 59 more chlorine samples than were required for the month. On December 28, 2021 a PWSA sampler failed to collect the required free and total chlorine measurement while collecting a coliform sample at one sample site. A coliform sample was analyzed and reported by our contract lab for the sample site and was negative. Chlorine measurements were completed at the site on January 3, 2022. In addition, PWSA and our contract laboratory reviewed chain of custody and sample acceptance procedure to ensure that all required analyses are collected at each sample site.

Exhibit TLF – 2

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)
to the Interrogatories of the Office of Consumer Advocate (“OCA”), Set V**

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-V-3 Please provide copies of PWSA’s unaccounted for water based on the PUC Section 500 Method for the calendar years 2021 and 2022. Include the procedure for estimating non-revenue water such as water used for blow-offs, street sweeping, flushing, firefighting, main breaks, and Highland Reservoir overflows and evaporation, etc. Explain all assumptions used in the calculations.

Response: See Attachment OCA-V-3. The “Notes” tab within the OCA-V-1 describes our methodologies and assumptions for estimating non-revenue water in a narrative format and are summarized as follows:

- Blow-offs: The PWSA elected to estimate this volume by multiplying the total water consumption with the water audits suggested default rate of 0.25%.
- Street Sweeping: The PWSA provided meters to the City of Pittsburgh to record water usage associated with street sweeping. Each meter was installed with an attached MXU unit, therefore the flow data is being transmitted remotely and billed accordingly. Based on the foregoing, water usage associated with street sweeping is categorized as Billed Metered Authorized Consumption, rather than Unbilled Unmetered Authorized Consumption.
- Flushing: The PWSA elected to estimate this volume by multiplying the total water consumption with the water audits suggested default rate of 0.25%.
- Firefighting: The PWSA elected to estimate this volume by multiplying the total water consumption with the water audits suggested default rate of 0.25%.
- Main Breaks: The PWSA estimates this volume by recording the characteristics of known breaks (area of break, size of main, pressure of main, estimated leak time, etc.) and calculating the estimated water loss. The 2021 and 2022 “SpryMobileLeakReporting_PWSA” spreadsheets are available, upon request.
- Clearwell leakage/overflows and Highland Reservoir Evaporation: These are located prior to the system delivery meters and are therefore not included in the unaccounted for water estimation.
- Reservoir Draining: In 2021, the PWSA drained the Herron Hill Reservoir (North Cell) and Lanpher Reservoir (East Cell). The work was required for inspection, operation and maintenance and/or construction purposes. The PWSA recorded the pre-drain water surface elevation and post-drain water surface elevation. In 2022 Highland No. 2 Reservoir was drained for replacement of the liner and cover. Based on historical records, we created a spreadsheet to estimate the volume of water discharged for each reservoir.
- Rising Main Inspection and Disinfection: The PWSA drained Rising Main 4 in December 2021 for the start of the 2019 Large Diameter Water Main Improvements Project. In addition, the PWSA drained, flushed and disinfected the Lanpher Rising Main between August and December 2021. In 2022 Rising Main 3 was drained, flushed, and disinfected.
- City Properties: On October 3, 2019, the PWSA and the City of Pittsburgh (City) entered into an updated cooperation agreement. The updated cooperation agreement was created under PUC oversight and includes provisions to completely transition the City accounts to be billed and metered. In 2019, the PWSA began metering the remainder of the City

500. WATER DELIVERED INTO SYSTEM DURING YEAR

WATER AUDIT DATA VALIDITY TIER:

***** The Water Audit Data Validity Score is in Tier III (51-70). See Dashboard tab for additional outputs. *****

[go to dashboard](#)

A weighted scale for the components of supply, consumption and water loss is included in the calculation of the Water Audit Data Validity Score

PRIORITY AREAS FOR ATTENTION TO IMPROVE DATA VALIDITY:

Based on the information provided, audit reliability can be most improved by addressing the following components:

1: Volume from Own Sources (VOS)
2: Billed Unmetered (BUAC)
3: Unauthorized Consumption (UC)

KEY PERFORMANCE INDICATOR TARGETS:

OPTIONAL: If targets exist for the operational performance indicators, they can be input below:

Unit Total Losses:	<input type="text"/>	gal/conn/day
Unit Apparent Losses:	<input type="text"/>	gal/conn/day
Unit Real Losses ^A :	<input type="text"/>	gal/conn/day
Unit Real Losses ^B :	<input type="text"/>	gal/mile/day

If entered above by user, targets will display on KPI gauges (see Dashboard)

**PITTSBURGH
WATER & SEWER
COMPANY**

MANAGEMENT AND OPERATIONS AUDIT

**Pennsylvania Public Utility Commission
Bureau of Audits
Issued March 2023**

**Docket Nos.:
D-2021-3025584,
D-2021-3025585, and
D-2022-3030308**

- **NRW** – water which does not provide revenue potential to the utility (apparent losses + real losses + unbilled metered consumption + unbilled unmetered consumption = NRW)
- **Apparent Losses** – losses associated with customer metering (worn meters, improperly sized meters, or wrong type of meter for the water usage profile); systematic data handling errors (meter reading, billing, archiving, and reporting); and unauthorized consumption (theft or illegal use)
- **Real Losses** – physical water losses from the pressurized system (water mains and customer service connections) and the utility’s storage tanks up to the point of customer consumption; annual volume lost depends on frequencies, flow rates, and average duration of individual leaks, breaks, and overflows
- **Unbilled Metered** – metered consumption authorized by the utility but deemed by utility policy to be unbillable (company use or consumed during treatment process, water agreements with third parties, etc.); does not include water exported for wholesale
- **Unbilled Unmetered** – water that is neither billed nor metered (water used in activities such as firefighting, flushing water mains and sewers, street cleaning, fire flow tests conducted by the utility); typically, a minimal component of NRW
- **Water Losses** – total volume lost for the entire system or for partial systems such as transmission systems, pressure zones, or district metered areas (water supplied less authorized consumption = water losses)

Exhibit VI-7 shows the PWSA’s amounts of water supplied and lost and its NRW data. It should be noted that, for 2017, the PWSA did not report unbilled unmetered consumption (e.g., hydrant flushing, operating & maintenance flushing, etc.); therefore, the reported water losses are the same as NRW.

Exhibit VI-7
Pittsburgh Water & Sewer Authority
Water Supplied and Lost Compared to Non-Revenue Water
For the Years 2017 – 2021

Year	Water Supplied (MG)	Apparent Losses (MG)	Real Losses (MG)	Water Losses ¹³ (MG)	NRW (MG)
2017	25,064.81	-	-	16,209.13	16,209.13
2018	24,597.10	81.27	16,294.91	16,376.18	16,683.78
2019	24,301.35	143.32	17,251.80	17,395.12	17,786.44
2020	22,700.23	49.06	15,580.14	15,629.20	15,789.36
2021	22,239.03	65.94	14,897.07	14,963.01	15,258.26

MG = million gallons

Exhibit TLF - 6

IX. QUALITY OF SERVICE

IX.2. Indicate whether the company is in compliance with 52 Pa. Code, § 65.6(a) regarding normal operating pressure standards, and with 52 Pa. Code, § 65.6(d) regarding pressure surveys at regular intervals.

- a. Provide details on any water pressure problems, lasting longer than 5 days, which had occurred since the last rate proceeding in any part of the water transmission and distribution system.
- b. Describe any action taken on a temporary basis, and the long term solutions developed to address any water pressure problems.

RESPONSE:

PWSA provides water service in compliance with 52 Pa. Code, § 65.6(a) over more than 95% of its service territory, during normal operating periods. The design of PWSA's system is such that some areas (less than 5%) experience higher or lower pressures routinely, outside of those provided in 52 Pa. Code, § 65.6(a). During non-normal operating periods, such as when there is a main break or a facility is out of service, PWSA may not be able to meet 52 Pa. Code, § 65.6(a) in larger portions of the system. PWSA has developed a pressure and flow monitoring program to address these issues.

- a. PWSA installed a total of 61 continuous recording pressure monitors throughout the system. The first 24 continuous recording pressure monitors were operational by July 8, 2018, and the remaining 37 pressure monitors were operational by January 21, 2021. This monitoring network ensures that there is at least one or more continuous recording pressure monitors in each separate pressure zone throughout the PWSA distribution system
- b. PWSA continues to work with the PA-DEP to review data from the pressure sensors in the distribution system. Analysis of the data being gathered will assist PWSA with developing the long-term plan to address the local pressure problems systematically and individually.

Exhibit TLF – 7

The Pittsburgh Water and Sewer Authority

2020 – 2024 Capital Improvement Plan

PGH₂O

Water Distribution System

Low Pressure Area Remediation

PROJECT NUMBER: Unidentified

NEIGHBORHOOD/WARD: Systemwide

PHASE:
Not Started

PRIORITY:
Regulatory Compliance, Reliability/Operational Flexibility, Level of Service

PROJECT DESCRIPTION:
Fix chronically low pressure areas by either extending neighboring higher pressure districts into the area, booster pump stations, or household booster pumps.

PROJECT JUSTIFICATION:
This project is in response to the low pressure monitors required by the October 2017 Administrative Order.

RISK(S):
Customers may experience temporary service outages as a result of the work on this project.

IMPACT ON OPERATIONS:
Increased system reliability and improved system management.

ALTERNATIVES TO THE RECOMMENDED ACTION:
There are no practical alternatives to the recommended action.

Water Distribution System

Herron Hill - Squirrel Hill Boundary Adjustments

PROJECT NUMBER: 2025-200-101-0

DSIC Eligible: No

PHASE: Not Started
PRIORITY: Regulatory Compliance, Safety, Operating Efficiency, Quality of Service, Organizational Goals, Social Impact
PROJECT DESCRIPTION: Main and valve adjustments to move the boundary between the Herron Hill Reservoir and Squirrel Hill pressure districts.
PROJECT JUSTIFICATION: Herron Hill and Squirrel Hill operate on similar hydraulic gradients. There are areas where these two systems intertwine, which has resulted in long dead end lines as well as frequent opening and altering of dividing pressure valves. Moving the boundary of the two zones to incorporate more of the Herron Hill system into the Squirrel Hill system will alleviate these issues as well as alleviate demand on the Herron Hill Reservoir.
RISK(S): Existing long dead ends can cause water quality issues.
IMPACT ON OPERATIONS: Decreased leakage between pressure districts.

<u>CASH FLOW SUMMARY</u>							<u>FUNDING SOURCE(S)</u>
	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>FY 2027</u>	<u>Total</u>	<u>Debt (Revenue Bonds)</u>

Water Distribution System

Low Pressure Area Remediation

PROJECT NUMBER: 2021-325-101-0

DSIC Eligible: No

PHASE: Planning
PRIORITY: Regulatory Compliance, Operating Efficiency, Quality of Service
PROJECT DESCRIPTION: Fix chronically low pressure areas by either extending neighboring higher pressure districts into the area, booster pump stations, or household booster pumps.
PROJECT JUSTIFICATION: This project is in response to the low pressure monitors required by the October 2017 Administrative Order.
RISK(S): Customers may experience temporary service outages as a result of the work on this project.
IMPACT ON OPERATIONS: Increased system reliability and improved system management.

CASH FLOW SUMMARY

	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>FY 2027</u>	<u>Total</u>	<u>FUNDING SOURCE(S)</u>
Annual Allocation	\$0	\$0	\$23,278	\$279,331	\$1,393,832	\$1,696,441	Debt (Revenue Bonds)

Water Distribution System

North Side Boundary Adjustments

PROJECT NUMBER: 2025-200-104-0

DSIC Eligible: No

PHASE: Not Started
PRIORITY: Operating Efficiency, Quality of Service, Organizational Goals
PROJECT DESCRIPTION: Main and valve installation to move some low pressure areas from the McNaugher Pressure District to the Brashears Pressure District.
PROJECT JUSTIFICATION: Areas within the McNaugher Pressure District that are near the Brashears Pressure District could have increased pressure by moving the pressure zone boundary through main improvements and valve adjustments.
RISK(S): Existing services are near or below minimum standards (20 psi).
IMPACT ON OPERATIONS: Increased system reliability and improved system management.

CASH FLOW SUMMARY

	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>FY 2027</u>	<u>Total</u>	<u>FUNDING SOURCE(S)</u>

Water Distribution System

South Side Slopes Boundary Adjustments

PROJECT NUMBER: 2025-200-107-0

DSIC Eligible: No

PHASE: Not Started
PRIORITY: Operating Efficiency, Quality of Service, Organizational Goals
PROJECT DESCRIPTION: Main and valve adjustments to move the boundary between the Highland No. 2 and Allentown Pressure Districts.
PROJECT JUSTIFICATION: Areas within the Highland No. 2 pressure district that are near the Allentown pressure district could have increased pressure by moving the pressure zone boundary through main improvements and valve adjustments.
RISK(S): Existing services are near or below minimum standards (20 psi).
IMPACT ON OPERATIONS: Increased system reliability and improved system management.

<u>CASH FLOW SUMMARY</u>							<u>FUNDING SOURCE(S)</u>
	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>FY 2027</u>	<u>Total</u>	<u>Debt (Revenue Bonds)</u>

Exhibit TLF – 9

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)
to the Interrogatories of the Office of Consumer Advocate (“OCA”), Set V**

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-V-12 Reference: PAWC St. No. 3, pg. 4: The following questions are regarding isolation valves:

- a) How many isolation valves are installed in the Authority’s system? Include both Authority and “privately owned” valves.
- b) How many are Authority valves?
- c) How many of the “privately owned” valves are installed on Authority transmission and distribution mains within public rights-of-ways or easements and include more than customer that the Authority bills separately?
- d) How many of these privately owned valves could be considered “critical” if owned by the Authority?
- e) Has the Authority notified DEP regarding the large number of “privately owned” isolation valves on the Authority’s system and the Authority’s intent regarding operating and maintaining these valves?

Response:

a) Based on current GIS mapping, there are 19,371 confirmed isolation valves and 4,163 private valves. The private valves are primarily service valves (generally 4-inch and larger) that serve commercial customers or valves that function as isolation valves on private distribution systems such as large shopping districts, hospitals, private housing developments, etc. that have their own private distribution system off of the PWSA system.

b) There are 19,371 PWSA-owned Isolation Valves based on current GIS mapping.

c) There are no privately owned valves that meet these criteria based on the current GIS mapping.

d) None of the private valves would be considered critical if owned by the Authority based on diameter. Critical valves that would be operated to isolate critical customers were defined based on review of PWSA-owned valves only at this time.

e) The private valves are only shown on GIS for general information to help the property owner in the event that they have an issue. Typically, PWSA will receive an as-built of a private development and add that information to the GIS. These private valves are not part of the PWSA system.

Response Provided by: Barry King, PE, Director of Engineering
 Jackson Stoss, GIS Manager
 The Pittsburgh Water and Sewer Authority

Dated: June 13, 2023

Exhibit TLF – 10

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)
to the Interrogatories of the Office of Consumer Advocate (“OCA”)
Set I
Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919**

Request: OCA-I-10 As part of the Settlement of its 2021 PWSA base rate case at Docket Nos. R-2021-3024773 et al, PWSA agreed to create a plan to implement a record-keeping procedure for valve maintenance, including valve location (GPS coordinates), age, size manufacturer, serial number (when available from the manufacturer), number of rotations to fully open and fully close valve, and overall condition of valves for all new valve installations beginning in 2022. See Section III.E.1 of the Settlement, pp. 15-16. Please answer the following questions concerning the creation of this plan:

- a. Was a plan successfully created? If so, please provide the plan. If not, indicate why not.
- b. Was any portion of this identified information unable to be included in the plan? If so, identify which information could not be provided and explain why PWSA was unable to provide the information.
- c. Did PWSA file a report for calendar year 2021 identifying each valve that it attempted to exercise and whether it was broken or operable? If so, please provide that report.
- d. Did PWSA file a report for calendar year 2021 identifying each valve that it attempted to exercise and whether it was broken or operable? If so, please provide that report.

Response:

- a. Yes. PWSA created a valve inspection program and all valves are inspected on a 5-year cycle. We created a work order and capture all this information in our Spry Mobile application.
- b. As stated, PWSA does not track the serial number, also the GPS of the valves does not happen at the time of inspection. PWSA has a dedicated employee who GPS locates our valves both new and existing.
- c. Yes. See OCA-I-10 Attach A for the report filed on April 8, 2022 which includes the condition of the valve if known and reported at the time the valve was exercised. In 2021, PWSA did not record this information for each valve exercised and, therefore, the information is unavailable for some of the valves. See **CONFIDENTIAL** OCA-I-10 Attach B for an excel version of the 2021 Valve Inspection Report.
- d. See response to OCA-I-10. PWSA was not required to file a report for calendar year 2022. See **CONFIDENTIAL** OCA-I-10 Attach C for an excel version of the 2022 Valve Inspections Report.

Response Provided by: William McFaddin, Director of Operations
The Pittsburgh Water and Sewer Authority

Dated: June 7, 2023

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)

Set I
Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919**

Request: OCA-I-11 As part of the Settlement of its 2021 PWSA base rate case at Docket Nos. R-2021-3024773 et al PWSA agreed to work with a third-party expert for assistance with any necessary modeling, GIS layers, Standard Operating Procedures (SOPs) and planning efforts to develop a prioritization plan to be implemented in 2022. See Section III.E.1 of the Settlement, pp. 16-17. Please answer the following questions concerning the Prioritization Plan commitments PWSA made in the Settlement:

- a. Was a Prioritization Plan implemented? If yes, please provide a copy of the Prioritization Plan. If not, explain why not.
- b. Has PWSA completed any reports, either internal or public, that document the outcomes of this Prioritization Plan? If so, please provide a copy of any such reports. If not, indicate whether PWSA plans to produce such a report and provide an estimated timeline for completion of the report.

Response:

- a. Yes. PWSA has identified our critical valves. The cycle for which these valves will be inspected is currently being developed.
- b. Any valves that were identified as a critical valve are inspected and exercised; these steps are captured in our SPRY Mobile Application. Currently these would be part of our 2021 and 2022 valve inspection reports. *See Confidential OCA-I-10 Attach B and Attach C.*

The Pittsburgh Water and Sewer Authority

Dated: June 7, 2023

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)
to the Interrogatories of the Office of Consumer Advocate (“OCA”)**

Set I

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-I-12 Concerning PWSA’s isolation valves, please provide a report, by calendar year, beginning at the implementation of PWSA 2021 base rate case at Docket Nos. R-2021-3024773 et al, and continuing to May 2023, documenting the following information:

- a. The number and sizes of isolation valves that have been either repaired or replaced;
- b. The amount of time it took to replace valves larger than 16”; and
- c. The cost of the isolation valve repair and replacement program.

Response:

- a. See **CONFIDENTIAL** OCA-I-12 for valves replaced 2020 through 2023.
- b. Column N of **CONFIDENTIAL** OCA-I-12 identifies the number of days it took to replace the valve; this is for the 16” and larger valves.
- c. The annual contract amounts for PWSA’s valve replacement contracts the past 2 years are as follow:

2021: \$1,203,562

2022: \$1,285,152

PWSA does not have a contract for the 2023 program yet. These contracts are funded via capital dollars. PWSA also relies on employees to replace small valves as needed in addition to the annual large valve replacement contract. Those costs are included in the O&M budget.

Water Distribution System

Valve Replacement Program

PROJECT NUMBER: 2021-325-113-0, 2023-200-108-0, 2024-200-104-0, 2025-200-109-0, 2026-200-104-0, 2027-200-103-0

DSIC Eligible: Yes

PHASE: Construction / Not Started
PRIORITY: Safety, Operating Efficiency, Quality of Service
PROJECT DESCRIPTION: Replacement of defective or non-operational valves on transmission and distribution mains throughout the water distribution system, excluding valves replaced during waterline relays.
PROJECT JUSTIFICATION: Increasing the number of operable valves in the system will reduce the number of valves that would need to be closed during emergency conditions, and therefore the number of customers that may be impacted.
RISK(S): A larger number of customers may be subject to service outages.
IMPACT ON OPERATIONS: Increased operating flexibility and reliability.

Program Year	CASH FLOW SUMMARY						FUNDING SOURCE(S)

Set I

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-I-13 Concerning PWSA’s meter testing and replacement, please provide a report, by calendar year, beginning at the implementation of PWSA’s last base rate case at Docket Nos. R-2021-3024773 et al, and continuing to May 2023, documenting the following information:

- a. The number of meters tested;
- b. The number of meters replaced;
- c. The number of customers who were unwilling to have PWSA access their meters.

Response:

- a.
 - 2020 Tested 5273
 - 2021 Tested 6971
 - 2022 Tested 5845
 - 2023 Tested 2159
- b. In 2022, PWSA replaced 5,865 water meters. Thus far in 2023 YTD, PWSA has replaced 2,237 water meters.
- c. In 2022, PWSA issued 983 non-access termination notices. Thus far in 2023 YTD, PWSA has issued 1,149 non-access termination notices.

Water Distribution

PGH₂O

Water Distribution System

Intermediate Meter Replacement Program

PROJECT NUMBER: 2021-325-100-0

DSIC Eligible: No

PHASE: Planning
PRIORITY: Operating Efficiency, Quality of Service, Organizational Goals
PROJECT DESCRIPTION: Replacement of customer meters size 1.5" to 2".
PROJECT JUSTIFICATION: Ensure capture of all revenue. As meters age, they typically underestimate the amount of water consumed.
RISK(S): Failure to replace meters annually could result in lost revenue or violate regulatory requirements.
IMPACT ON OPERATIONS: Increased system reliability, reliability, and improved system management.

<u>CASH FLOW SUMMARY</u>							<u>FUNDING SOURCE(S)</u>
	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>FY 2027</u>	<u>Total</u>	Debt (Revenue Bonds)

Miscellaneous Items:

Request: OCA-V-30 Complaints. Please provide a copy of the Authority’s record of all customer complaints for the calendar years 2022 and 2023 to date, on a live Excel spreadsheet that can be sorted by system, date and location regarding the following quality of service and other issues:

- a) For the water system: water quality (taste, odor, color), staining of laundry or plumbing fixtures, pressure, property damage, incomplete surface restoration, notifications, health issues and other service complaints including billing and requests for water quality and meter testing. The response should include the nature of the complaint and the action taken by the Authority in response to the complaint.
- b) For the wastewater system: odor, sewer backups, pump station alarms, grinder pumps, sewer lateral blockages, missing or offset manhole lids, property damage, incomplete surface restoration, and other service complaints including billing. The response should include the nature of the complaint and the action taken by the Authority in response to the complaint.
- c) For the stormwater system: flood damage, sewer backups, missing or offset inlet grate and manhole lids, property damage, incomplete surface restoration, and other service complaints including billing. The response should include the nature of the complaint and the action taken by the Authority in response to the complaint.

Response:

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

REBUTTAL TESTIMONY OF

JULIE A. QUIGLEY

ON BEHALF OF
THE PITTSBURGH WATER
AND SEWER AUTHORITY

Docket Nos.

R-2021-3024773 (Water)
R-2021-3024774 (Wastewater)
R-2021-3924779 (Stormwater)

TOPICS:

Collections
Compliance Plan Stage 2
Customer Service
COVID-19 Impacts and Customer Protections
Low-Income Customer Assistance Programs
Miscellaneous Water/Wastewater Tariff Issues

July 29, 2021

1 **2. Complaint Handling**

2 **a. 2020 Customer Complaint/Call Log**

3 **Q. DID MR. FOUGHT RAISE CONCERNS ABOUT PWSA’S CUSTOMER**
 4 **COMPLAINT TRACKING IN PWSA’S LAST RATE CASE?**

5 A. Yes, in PWSA’s last rate case, Mr. Fought observed that PWSA’s record of calls for the
 6 years 2018 and 2019 did not clearly indicate the PWSA system (i.e. water, wastewater,
 7 combined sewer or stormwater) that they concerned.²⁸

8 **Q. HAS PWSA ADDRESSED THE ISSUE RAISED BY MR. FOUGHT IN THE**
 9 **LAST RATE CASE?**

10 A. Yes. In January 2020, PWSA implemented SpryMobile-Work Orders and Asset
 11 Management, an extension of the existing web based application with cloud technology
 12 that now enables Field Operations staff to input work orders using iPads to track
 13 corrective and preventative maintenance on water and wastewater assets. The
 14 implementation of SpryMobile permits submission of work orders with descriptions,
 15 denoting water versus wastewater assets.

16 **Q. PLEASE DESCRIBE MR. FOUGHT’S CONCERNS ABOUT THE 2020**
 17 **CUSTOMER COMPLAINT/CALL LOG.**

18 A. In this rate case, Mr. Fought notes that the 2020 Customer Complaint/Call Log does not
 19 include any complaints regarding “pressure” or “no water” or any complaints regarding
 20 high bills and “catch-up” bills due to faulty or non-registering meters. (OCA Statement 6
 21 at 17-18). Mr. Fought also observes that the category “investigate lid” appears to have
 22 many calls concerning the wastewater and stormwater systems that were incorrectly
 23 entered as being related to the water system. (OCA Statement 6 at 18).

²⁸ *Pennsylvania Public Utility Commission v. Pittsburgh Water and Sewer Authority*, Docket Nos. R-2020-3017951 (water) and R-2020-3017970 (wastewater) OCA St. No. 8 at 20-21.

1 **Q. DID PWSA’S SPRYMOBILE WORK ORDERS THAT WERE USED TO**
2 **PRODUCE THE 2020 COMPLAINT/CALL LOG CAPTURE COMPLAINTS**
3 **FALLING UNDER THE MISSING CATEGORIES IDENTIFIED BY MR.**
4 **FOUGHT?**

5 A. No.

6 **Q. WERE SOME OF THE CALLS IDENTIFIED IN THE 2020 COMPLAINT/CALL**
7 **LOG DEALING WITH THE “INVESTIGATE LID” CATEGORY**
8 **INCORRECTLY CLASSIFIED?**

9 A. Yes.

10 **Q. WHAT DOES MR. FOUGHT RECOMMEND?**

11 A. Mr. Fought recommends that PWSA should provide a “complete and accurate” customer
12 complaint log in future cases, which includes complaints received about pressure, no
13 water, high consumption, high bills and previously unbilled consumption. Further, he
14 recommends that complaints recorded as “investigate lid” should be identified and
15 correctly classified as being related to the water, sewer or stormwater system. (OCA
16 Statement 6 at 18-19).

17 **Q. WHAT IS PWSA’S POSITION ON THESE RECOMMENDATIONS?**

18 A. I appreciate Mr. Fought’s recommendations. As demonstrated over the three years since
19 PWSA has come under the jurisdiction of the Commission, PWSA is actively working to
20 update its systems based on constructive suggestions from the parties as well as the
21 Commission but it must not be forgotten that this is a process that takes time. The
22 complaints identified by Mr. Fought regarding pressure, no water, high consumption, and
23 previously unbilled consumption are currently recorded in customer account notes and
24 are not easily accessible for reporting purposes. PWSA will work with its vendor as part
25 of the SAP implementation to capture these types of complaints in a manner where they
26 are reportable. However, it would be difficult to classify complaints as alleging “high

1 bills” given the various or even multiple reasons that a consumer might be making that
 2 claim. Currently, PWSA customer service representatives are trained to record the
 3 customer’s explanation of his or her complaint in a general “notes” section of our system
 4 when the complaint cannot be more obviously be classified in one of the pre-determined
 5 categories. Because complaints about high bills can involve a number of different
 6 factors, it would be difficult to commit to standardize our reporting of these types of
 7 complaints. As to identifying and correctly classifying investigate lid complaints as
 8 being related to the water, sewer or stormwater system, PWSA will make every effort to
 9 do so, understanding that human error can occur.

10 **b. Volume of Complaints**

11 i. *Identifying Trends Based on 2020 and 2021 Data*

12 **Q. PLEASE DESCRIBE MS. ALEXANDER’S CONCERNS ABOUT COMPLAINTS.**

13 A. Ms. Alexander presents information about the number of complaints against PWSA in
 14 2020 and 2021 to reach the conclusion that PWSA experienced an increase in all
 15 complaint categories, including informal complaints, formal complaints, justified
 16 consumer complaints and verified infractions, for January through April in 2020 and
 17 2021. (OCA Statement 5 at 16). She also references the customer complaints received in
 18 the first quarter of 2021 in comparison with the same data from 2020 and concludes that
 19 the increase in complaints in 2021 raises “compliance concerns” because they occurred
 20 during a period of time when termination was not the root cause because terminations
 21 were not occurring then. (OCA Statement 5 at 17).

22 **Q. DO YOU AGREE THAT MS. ALEXANDER’S COMPARISON OF YEARS 2020**
 23 **AND 2021 IS AN ACCURATE REPRESENTATION OF THE DISPUTES AND**
 24 **INFORMAL COMPLAINTS THAT IT RECEIVES ON A REGULAR BASIS**

Exhibit TLF – 20

Water Distribution System

2019-2024 Surface Restoration

PROJECT NUMBER: 2019-325-106-0, Unidentified
NEIGHBORHOOD/WARD: Systemwide

PHASE:
Construction

PRIORITY:
Safety, Operations and Maintenance Efficiency

PROJECT DESCRIPTION:
Resurfacing of streets as a result of other capital projects.

PROJECT JUSTIFICATION:
Adequately restoring street surface conditions is a requirement for all applicable capital projects.

RISK(S):
Customers could experience temporary street closures as a result of street resurfacing work.

IMPACT ON OPERATIONS:
Increased system reliability and improved system management.

ALTERNATIVES TO THE RECOMMENDED ACTION:
There are no practical alternatives to the recommended action.

		CASH FLOW SUMMARY						FUNDING SOURCE(S)
	Total Budget (Prior Years Included)	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	Total	Debt (Revenue Bonds)
Total	\$25,911,333	3,564,474	4,158,926	4,097,387	4,197,390	4,297,393	\$20,315,569

Exhibit TLF – 21

PITTSBURGH WATER & SEWER AUTHORITY

5-YEAR
LONG-TERM INFRASTRUCTURE
IMPROVEMENT PLAN

April 27, 2020

	Criteria	Description	Score	% of Total Score	
		< 1910	100		
	Sub Total Percentage of Likelihood of Failure Criteria			62	
Consequences of Failure	Water Main Location	Water main located inside roadway limits	0	10	
		Water main outside limits of roadway	10		
		Water main located under structures	100		
	Traffic Functional Classification	Major/Minor Collectors, Local Roads	0	10	
		Minor Arterials	25		
		Primary Arterials and Interstates	100		
	Critical Facilities	Noncritical customers	0	18	
		Has Critical Customers Tap (Hospitals and Medical facilities)	100		
		Sub Total Likelihood of Likelihood of Failure Criteria			38
		Total Percentage			100

The ranking criteria outlined above will be revisited on an annual basis to ensure that the SDWMR program is cost-effective and addressing the most critical issues in the distribution system. The need to coordinate future water main replacements in conjunction with sanitary sewer or storm sewer replacement/improvement projects to minimize disruptions to the community and save on surface restoration will be considered in the site selection process. In addition, coordination efforts will also be undertaken to coordinate water main replacement with the City, County and State road restoration projects to minimize surface restoration costs. Finally, there will be an active coordination program with other utilities to ensure the Authority’s activities are integrated with other utility improvements to achieve a net savings in road restoration impacts.

8 OUTREACH AND COORDINATION ACTIVITIES

8.1 Construction Coordination

The Authority has developed a coordination team with the City and its other utility members. In addition, PWSA is developing a robust GIS based data layer to communicate its plans to other utilities. At present, the critical coordination appears to be with the City, specifically the annual paving plans, and the local Gas Companies' piping improvements. Significant improvement is expected with the coordination between the PWSA and the City as a result of the City's hiring of a new Chief Engineer, and additional engineering staff, which has delayed coordination in the past. Additionally, PWSA has assigned specific utility coordination duties to a primary, internal utility coordination staff member within the Engineering Department.

Additionally, as previously indicated in this report, the Authority is currently updating its GIS to add water and sewer system data, evaluate and edit existing data, and refine its data retrieval processes in order to make the system more comprehensive, dependable, and easy to use. Annually, water and sewer system capital projects including replacements, rehabilitations, and repairs are selected and vetted to the Authority's engineering department before being prioritized for the coming budget year. As part of this process, the Authority solicits information from PennDOT, Allegheny County, homeowner's associations and other utilities as to their intentions to undertake paving and other public works projects during the budget year. The Authority attends monthly utility coordination meetings with the City's Department of Mobility and Infrastructure (DOMI) and other local utilities and coordinates construction and repair efforts when possible to avoid conflicts where overlapping work is identified. Additionally, PWSA will utilize resources, including the Pennsylvania 811 Coordination web service application, to identify opportunities for collaboration between projects and to meet the need for increased coordination with local utilities and local, state, county and city government agencies.

Whenever and wherever the Authority decides to undertake a pipe or manhole refurbishment project on a road pre-scheduled for paving, the project is coordinated with the State, County, City or appropriate municipality. The Authority works closely with the government agency to ensure that the design, permitting and construction of the Authority's infrastructure project will be completed in time to allow for the road to be paved.

In some cases, the government agencies will agree to postpone paving of its roads to match the Authority's completion of construction date, even if it extends into the subsequent year. Typically, where the Authority undertakes a project where paving has been pre-planned by the involved government agency, the Authority and its rate payers will benefit financially through the avoidance of road surface restoration.

The Authority will continue the proactive means to identify opportunities to coordinate pipe replacement and road paving.

8.2 Lead Service Line Replacement Program Outreach

In full support of the COA, the Authority has built a program to support its customers through the lead service replacement process. These outreach and communication efforts encourage property owners to participate in the current no-cost private lead service replacements offered in contract work areas. The

2. Property owners will be contacted in advance and asked to enter into an agreement to allow PWSA employees and contractors to gain access to their private property in order to replace their private LSLs. The agreement will include provisions that require the property owner(s) to release and hold harmless the PWSA from any and all claims, causes of action, damages or losses, of any nature, whatsoever with respect to the work performed by PWSA or its contractors.⁵ July 2019 Policy at 3.
3. Homeowners will then be asked to cooperate with PWSA's timeline for replacement and allow workers access to the service line. July 2019 Policy at 3.
4. PWSA will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for the private side replacement. PWSA will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the homeowner. July 2019 Policy at 4.

I. Ad hoc replacements initiated by property owners after January 1, 2019: “Ad hoc replacements” refer to when a property owner elects on their own initiative to arrange for the replacement of a private side LSL when PWSA is not then-currently replacing the public side of the line. PWSA developed this program in the context of PWSA's implementation in April 2019 of its new orthophosphate water treatment plan in accordance with DEP requirements, which PWSA expects will reduce lead levels to below the lead action level under the Lead and Copper Rule. PWSA M.B. at 60; PWSA St. C-1RJ at 3, 17-18.

1. If the private LSL is connected to a public LSL, PWSA proposes to replace the public side portion of the LSL when a customer elects to replace the

⁵ A limitation of liability provision in connection with the PWSA's tort liability for any work it performs to replace the customer-owned service line in accordance with the PWSA's plan must be filed for the Commission's approval in the PWSA's tariff. See 52 Pa. Code § 69.87 (state case law permits tariff provisions to limit the liability of utilities to specified dollar amounts for injury or damages as a result of negligence or intentional torts); see also *In re: Tariff Provisions That Limit the Liability of Utilities for Injury or Damage as a Result of Negligence or Intentional Torts*, Pa. PUC v. PECO Energy Company, M-00960882, R-00943065, Pa. PUC LEXIS 111 (Declaratory Order entered March 17, 1997); see also *DeFrancesco v. Western Pennsylvania Water Co.*, 478 A.2d 1295, 1307 (Pa. Super. 1984) (holding a tariff provision limiting the company's liability was exculpatory and void as against public policy because it completely negated the water company's liability for its acts of negligence or intentional tort); see also *State Farm Fire and Casualty Co. v. PECO Energy Company*, 54 A.2d 921, 926-927 (Pa. Super. 2012) (holding that the tariff provision limiting liability to \$500 was valid and enforceable because the Commission had determined the reasonableness of the tariff and because the provision limited liability rather than negating liability altogether). As clarification, any approved limitation of liability provision for tort liability would not extend to any separate service claim raised in a complaint filed with the Commission against the PWSA under 66 Pa. C.S. § 701.

Exhibit TLF – 22

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)
to the Interrogatories of the Office of Consumer Advocate (“OCA”), Set V**

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-V-31 Surface Restoration of City Streets disturbed by PWSA projects.

- a) Please discuss the co-ordination between the PWSA and the City in selecting where the Authority’s projects will be located.
- b) Since 2019, how much of the surface restoration costs did the City pay for streets and/or alleys disturbed by PWSA projects that required repaving entire traffic lane(s),?
- c) Were the City’s contributions based on conditions of the streets/alleys prior to PWSA construction?
- d) What is the City’s budget for resurfacing streets for each year during the 2022-2027 period?
- e) What was the City’s budget for resurfacing streets for each year during the 2019-2021 period?
- f) Are any of the streets resurfaced by the City since 2019 proposed to be disturbed by future PWSA projects?
- g) Are any of the streets proposed to be resurfaced by the City during 2023- 2027 period also proposed to be disturbed by future PWSA projects?

Response:

- a) Historically, PWSA does not receive the City’s paving list until two weeks prior to paving season making coordination for defined projects difficult. For indefinite quantity indefinite delivery (IDIQ) projects, the Department of Mobility Infrastructure (DOMI) reviews Street Opening Permit requests for overlaps and begins coordination with other utilities or City projects for final restoration of the roadway.
 - b) Since 2021, a total of \$252,597 of surface restoration cost have been contributed by the City for streets/alleys disturbed by PWSA projects that required repaving for entire traffic lanes.
 - c) No.
 - d) City’s budget for resurfacing streets for 2022-2027:
 - 2022: \$16,002,244 (Street resurfacing)
 - 2023: 18,203,042 (Street resurfacing)
 - 2024: \$3,632,963 (Street resurfacing)
 - 2025: \$7,622,571 (Street resurfacing)
 - 2026: \$7,805,567 (Street resurfacing)
 - 2027: \$16,500,000 (Street resurfacing)
- *Source: City of Pittsburgh Capital Budgets (<https://pittsburghpa.gov/omb/capital-budgets>)

Response of the Pittsburgh Water and Sewer Authority (“PWSA”) to the Interrogatories of the Office of Consumer Advocate (“OCA”), Set V

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

- e) City’s budget for resurfacing streets for 2019-2021:
- 2019: \$18,570,890 (Street resurfacing)
 - 2020: \$15,684,154 (Street resurfacing)
 - 2021: \$17,109,505 (Street resurfacing)
- *Source: City of Pittsburgh Capital Budgets (<https://pittsburghpa.gov/omb/capital-budgets>)
- f) PWSA has requested data from the City of all roads resurfaced from 2019; however, the data has not been received.
- g) Yes, for 2023 there are currently overlaps. The City has not provided a paving list past 2023.

Response Provided by: Barry King, PE, Director of Engineering
Kate Mechler, P.E., Deputy Director of Engineering
The Pittsburgh Water and Sewer Authority

Dated: June 13, 2023

Exhibit TLF – 23

Net ALCOSAN	1,766,508	2,066,814	2,400,861	2,771,926
Total	\$117,504,058	135,911,272	145,641,684	159,623,404
Difference	-	18,407,213	9,730,412	13,981,720

1

2

The expense categories of Direct Operating, Salaries, and Employee Benefits are main drivers of the increase given PWSA’s continued efforts to right size its operations to fit the size of the system.

3

4

5

Q. CAN YOU EXPLAIN WHAT EXPENSES ARE INCLUDED IN THE DIRECT OPERATING EXPENSE CATEGORY?

6

7

A. Yes, as the name implies, the direct operating expense category includes expenses that are required to keep the authority running on a day-to-day basis such as material purchases, surface restoration, water and sewer repairs, vehicles purchases, catch basin cleaning, maintenance contracts and water treatment chemical purchases.

8

9

10

11

The direct operating expense category represents the largest increase of all of the operating budget categories. This is a result of PWSA’s continued need to address and maintain its large water, sewer, and stormwater systems. Not providing PWSA with the requested amount of funds for this expense category will put even more pressure on the already massive capital improvement plan as improvements will only be made when failures occur.

12

13

14

15

16

17

Q. WHAT ARE THE MAIN DRIVERS IN THE DIRECT OPERATING EXPENSE CATEGORY?

18

19

A. The main drivers of this category are the rapid increase in water treatment chemical costs, costs to implement PWSA forthcoming wet weather consent decree, surface restoration costs, and urgent water and sewer repair costs. These expenses make up over 40% of the cost increase in this expense category between the FPFTY and FY 2026.

20

21

22

1 **Q. CAN YOU ELABORATE ON THE WATER TREATMENT CHEMICAL COST**
 2 **INCREASE?**

3 A. Yes. As displayed by the chart below, water treatment chemical costs have risen by 50%
 4 between FY 2021 and FY 2022.

	FY 2021	FY 2022	\$ Increase	% Increase
Chemical Costs	\$3,495,040	\$5,248,184	\$1,753,143	50%

5 This is the result of inflation and supply chain issues. Prices are continuing to rise with
 6 recent bids showing some chemicals prices again doubling. As a result of this activity,
 7 PWSA’s chemical claim of \$6.8 million in the FPFTY, \$8.2 million in FY 2025, and \$9.8
 8 million in FY 2026 is justified. Having the funds available for this expense is non-
 9 negotiable. It is arguably the most important expense in order to ensure safe drinking
 10 water.

11 **Q. CAN YOU DISCUSS PWSA’S WET WEATHER CONSENT DECREE?**

12 A. As discussed in the testimony of Mr. Igwe, negotiations are currently ongoing between
 13 PWSA and the United States Environmental Protection Agency for the purpose of
 14 entering into a Wet Weather Consent Decree. The goal of the decree will be to
 15 significantly reduce sanitary sewer and combined sewer overflows.

16 While the timeline can change, PWSA anticipates that the consent decree will be
 17 finalized in FY 2024. It is for this reason that PWSA included \$7.5 million - \$2.5 million
 18 in the FPFTY, an additional \$2.5 million in FY 2025, and an additional \$2.5 million in
 19 FY 2026 – in this rate case to comply with the consent decree.

20 It is estimated that Wet Weather Consent Decree will result in hundreds of
 21 millions of dollars in required improvements, with a significant portion being paid for out
 22 of the operating budget. The reality of PWSA not receiving the necessary revenues in this

1 rate case will result in non-compliance. That only negatively impacts ratepayers while
 2 hurting the reputation that PWSA has worked so hard to rebuild.

3 **Q. CAN YOU PROVIDE THE REVENUE REQUIREMENTS FOR THE URGENT**
 4 **WATER, URGENT SEWER, AND SURFACE RESTORATION MENTIONED**
 5 **ABOVE FOR THE FPPTY, FY 2025, AND FY 2026?**

6 A. The chart below shows the requested revenue requirements for urgent water, urgent
 7 sewer, and surface restoration costs in the FPPTY, FY 2025, and FY 2026.

	FY 2024	FY 2025	FY 2026
Urgent Sewer	\$9,053,157	9,596,347	10,172,128
Surface Restoration	7,836,351	8,306,532	8,804,924
Urgent Water	4,836,911	5,127,126	5,434,753

8
 9 PWSA must receive revenues sufficient to cover these three expenses. The recent
 10 strides made on PWSA’s capital improvement plan has helped to jump start the
 11 replacement of assets that are well beyond their useful life. However, this effort will need
 12 to continue for at least the next decade in order to address the backlog of assets that need
 13 to be replaced. This means the risk for water line breaks and sewer failures remains high.
 14 PWSA cannot predict when breaks and failures will occur, but when they do, heavy
 15 reliance is placed on the urgent water and sewer contracts for repairs.

16 The surface restoration contract is used to repave streets that result from breaks or
 17 other work performed by PWSA. Due to funding restrictions, there is currently a large
 18 backlog of sites within PWSA’s service area that have a temporary patch and are waiting
 19 to be paved. This has resulted in a poor level of service and complaints from ratepayers.
 20 The requested funding in this rate case will provide PWSA with the funding necessary to
 21 address this backlog and future restoration work.

Exhibit TLF – 24

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)
to the Interrogatories of the Office of Consumer Advocate (“OCA”), Set XII (12)**

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-XII-3 Reference PWSA response to OCA-V-3. Is all the water pumped into to the Highland 1 Reservoir from the Aspinwall Treatment Plant treated and metered?

- A. If yes, why isn’t an estimate of rainfall in and evaporation out of Highland 1 Reservoir a consideration in UFW/NRW?
- B. If yes, why is the amount of water treated at and pumped from the microfiltration plant a factor in UFW/NRW for the entire system?

Response:

The water that is pumped to Highland 1 from the water treatment plant is treated but it is not metered until it leaves Highland 1 Reservoir. Since we do not meter the water until after it leaves the reservoir we do not need to account for rain or evaporation.

Response Provided by: William McFaddin, Director of Operations
The Pittsburgh Water and Sewer Authority

Dated: July 5, 2023

PRIORITY: Regulatory Compliance, Safety, Operating Efficiency, Quality of Service, Organizational Goals, Social Impact
PROJECT DESCRIPTION: Replacement of existing Highland 1 Reservoir liner.
PROJECT JUSTIFICATION: The reservoir liner is past it's useful design life and is in need of replacement.
RISK(S): Failure to replace the liner could result an emergency repairs or replacement.
IMPACT ON OPERATIONS: Increased operating efficiency, flexibility, reliability, and life expectancy,.

REBUTTAL TESTIMONY OF

KARL RICHARD PAVLOVIC

**ON BEHALF OF THE
PENNSYLVANIA
OFFICE OF CONSUMER ADVOCATE**

September 8, 2023

TABLE OF CONTENTS

	<u>PAGE</u>
I. STATEMENT OF QUALIFICATIONS	1
II. PURPOSE OF TESTIMONY	1
III. DISCUSSION	
A. SUMMARY	2
B. Revision of OCA Statement 2	3
C. I&E's DSIC Testimony	4

1 **I. STATEMENT OF QUALIFICATIONS**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 **A.** My name is Karl Richard Pavlovic. My business address is 22 Brooks Avenue,
4 Gaithersburg, MD 20877.

5 **Q. ARE YOU THE SAME KARL RICHARD PAVLOVIC WHO SUBMITTED**
6 **DIRECT TESTIMONY IN THIS PROCEEDING ON AUGUST 9, 2023?**

7 **A.** Yes. Exhibit KRP-1 to my direct testimony summarizes my qualifications and
8 experience.

9 **II. PURPOSE OF TESTIMONY**

10 **Q. ON WHOSE BEHALF ARE YOU TESTIFYING?**

11 **A.** I am testifying on behalf of the Pennsylvania Office of Consumer Advocate (OCA).

12 **Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?**

13 **A.** The purpose of my rebuttal testimony is two-fold. First, I will make a revision in
14 my direct testimony to clarify that PWSA does not need to request a formal waiver
15 to increase its water Distribution System Improvement Charge (DSIC) from 5% to
16 7.5%. Additionally, my testimony will respond to I&E Witness Spadaccio's direct
17 testimony supporting PWSA's proposal to increase its DSIC cap percentage from
18 5.0% to 7.5%.

1 **III. DISCUSSION**

2 **A. SUMMARY**

3 **Q. PLEASE SUMMARIZE THE SUBSTANCE OF YOUR REBUTTAL TESTIMONY.**

4 **A.** As detailed below, I am making a revision to my direct testimony to clarify that PWSA
5 does not need a waiver to increase its water DSIC cap from 5% to 7.5%; however, that
6 clarification does not change my position that PWSA has not demonstrated a need for the
7 increase. Thus, my recommendation remains that the Commission should reject PWSA’s
8 request to increase its DISC to 7.5% because their request is not supported by substantial
9 evidence. The remainder of my rebuttal testimony responds to the Bureau of Investigation
10 and Enforcement’s (I&E) witness, Anthony Spadaccio.¹ Despite Witness Spadaccio’s
11 support for the DSIC increase, the lack of justification for an increase to PWSA’s DSIC
12 cap to 7.5% on grounds of either increasing DSIC PAYGO funding or providing
13 accountability for funding capital projects remains.

14 **Q. HAVE YOU PREPARED ANY EXHIBITS TO YOUR TESTIMONY?**

15 **A.** No.

¹ I&E St. No. 1.

1 **B. REVISION OF OCA STATEMENT 2**

2 **Q. YOU INDICATED ABOVE THAT YOU HAVE A REVISION TO CLARIFY YOUR**
3 **DIRECT TESTIMONY. PLEASE IDENTIFY THE PORTION YOU ARE**
4 **REVISING.**

5 A. The portion of my testimony that must be revised is on page 19, line 11-12. The identified
6 portion reads as follows: “It is my understanding from Counsel at the OCA that to request
7 more than 5%, PWSA must make a specific waiver request.” I note that the sentence
8 contains an error of omission.

9 **Q. WHAT REVISION ARE YOU MAKING?**

10 A. The sentence should read “It is my understanding from Counsel at the OCA that to request
11 more than 5% for wastewater, PWSA must make a specific waiver request.” For purposes
12 of clarity, I recognize that as a water and wastewater utility, PWSA is required to seek a
13 waiver for a 7.5% DSIC for wastewater but not for water. Therefore, the error made in my
14 direct testimony was an inadvertent error that must now be revised. This error does not
15 change the overall conclusion that PWSA has failed to come forward with substantial
16 evidence indicating that it requires a DSIC rate of 7.5% for either water or wastewater and,
17 thus, I continue to recommend that the Commission disallow these increases.

1 **C. I&E’S DSIC TESTIMONY**

2 **Q. WHAT IS I&E’S POSITION REGARDING PWSA’S PROPOSAL TO INCREASE**
3 **ITS DSIC CAPS FROM 5.0% TO 7.5%?**

4 **A.** I&E witness Spadaccio states without more that “I&E is supporting the proposal to increase
5 the Authority’s DSIC, which was established in PWSA’s 2020 base rate case from 5% of
6 distribution revenues to 7.5% of distribution revenues.”²

7 **Q. WHY DOES I&E SUPPORT PWSA’S PROPOSAL TO INCREASE PWSA’S**
8 **PROPOSAL TO INCREASE ITS DSIC CAP PERCENTAGES TO 7.5%?**

9 **A.** Witness Spadaccio does not say *why* the DSIC should be increased or that PWSA provides
10 any evidence of need. Instead, he discusses the DSIC increase in juxtaposition to I&E’s
11 opposition to PWSA’s PAYGO funding claim and then lists two effects of the proposed
12 increase in the DSIC cap percentages. First, he claims that increasing the cap percentages
13 to 7.5% will provide “an additional approximately \$15 million in the FPFTY allowing for
14 additional internally generated funds to support planned infrastructure investments.”³
15 Second, he states that “the Long-term Infrastructure Improvement Plan (LTIIP), which is
16 required for the DSIC, provides a clear picture of how ratepayer funds are being used to
17 fund capital projects, which is a level of spending accountability that is not provided with
18 PAYGO.”⁴

² I&E St. No. 1, page 21 lines 17-19.

³ I&E St. No. 1, page 21 lines 19-21.

⁴ I&E St. No. 1, page 21 line 21 to page 22 line 4.

1 **Q. WHAT IS THE CONTEXT OF I&E'S ENDORSEMENT OF PWSA'S PROPOSED**
2 **INCREASE OF PWSA'S DSIC CAP PERCENTAGES TO 7.5%**

3 **A.** The context of this testimony is that witness Spadaccio's endorsement of an increase for
4 PWSA's DSIC PAYGO funding is embedded in his argument for rejection of PWSA's
5 non-DSIC PAYGO proposal in its MYRP.⁵ Thus in context, I&E's position on the DSIC
6 increases is that PWSA should increase its PAYGO funding of LTIIIP capital projects, but
7 only via the DSIC cap increases, which will purportedly provide greater ratepayer
8 accountability for the funds used for capital projects.

9 **Q. DID I&E ARGUE THAT PWSA'S DSIC INCREASES TO 7.5% ARE NECESSARY**
10 **FOR PWSA TO ENSURE AND MAINTAIN ADEQUATE, EFFICIENT, SAFE AND**
11 **RELIABLE SERVICE?**

12 **A.** No. Witness Spadaccio did not make any claim that PWSA's ability to ensure and maintain
13 adequate, efficient, safe, and reliable service is contingent on its ability to recover a 7.5%
14 DSIC for both water and wastewater. He simply argued that DSIC PAYGO funding is a
15 better alternative to non-DSIC PAYGO funding.

16 **Q. DID I&E ADDRESS ANY NEED OF INCREASED DSIC FUNDING FOR**
17 **SPECIFIC LTIIIP CAPITAL PROJECTS?**

18 **A.** No. Witness Spadaccio did not argue that PWSA's capital projects would be impacted by
19 increased DSIC funding, nor did he identify any capital project benefits that would
20 materialize if PWSA's requests were granted.

⁵ I&E St. No. 1, page 21 line 1 to page 23 line 20; see also PWSA St. No. 2, page 27 line 19 to page 28 line 4.

1 **Q. DID I&E ADDRESS ANY OF PWSA’S ARGUMENTS FOR INCREASING ITS**
2 **DSIC CAPS TO 7.5%**

3 **A.** No. Witness Spadaccio’s testimony is the sum total of I&E testimony regarding PWSA’s
4 DSIC and PWSA’s proposal to increase its DSIC caps to 7.5%. Witness Spadaccio’s
5 testimony does not address either the propriety of DSIC PAYGO or PWSA’s arguments
6 for an increase in DSIC caps.⁶

7 **Q. DO YOU AGREE THAT INCREASING THE DSIC CAP PERCENTAGES IS AN**
8 **APPROPRIATE MEANS OF INCREASING PWSA’S PAYGO FUNDING OF THE**
9 **CAPITAL PROJECTS IN PWSA’S LTIP?**

10 **A.** No. As I explained in my direct testimony regarding PWSA’s proposal to increase its
11 DSIC caps, (1) DSIC PAYGO recovery is not an option under Section 1357(c) and is
12 inconsistent with the recovery options that are set forth in Section 1357(c),⁷ (2) DSIC
13 PAYGO recovery violates the regulatory principle of ratable recovery of the costs of capital
14 assets, which violation in turn leads to the over recovery of capital costs from current
15 customers and the under recovery of capital costs from later generations of customers in
16 violation of intergenerational equity,⁸ (3) increasing PWSA’s DSIC caps to 7.5% will only
17 increase the amount of DSIC eligible capital assets the recovery of the costs of which is in
18 violation of the principle of ratable recovery, over recovering capital costs from current
19 customers and under recovering capital cost from future customers,⁹ and (4) PWSA’s

⁶ PWSA St. No. 2, page 27 line 6 to page 30 line 8.
⁷ OCA St. 2, page 23 lines 19-20 and page 24 line 10 to page 25 line 7.
⁸ OCA St. 2, page 23 line 20 to page 24 line 3.
⁹ OCA St. 2, page 24 lines 3-6.

1 DSICs are not PWSA's only option for accessing capital asset financing that is less
2 expensive than long term debt.¹⁰

3 **Q. WHAT IS YOUR RESPONSE TO THE LTIP CAPITAL PROJECT FUNDING**
4 **ACCOUNTABILITY ISSUE RAISED BY I&E?**

5 **A.** Witness Spadaccio is simply wrong that only the DSIC provides accountability for how
6 ratepayer funds are used to fund capital projects. In any given year, PWSA completes X
7 number of capital projects. Subtracting from that number of projects the completed
8 projects funded through the DSIC leaves the projects funded either through internally
9 generated funds or long term debt. Consequently, funding is clearly accounted for non-
10 DSIC capital projects. The issues of LTIP project accounting is further compounded by
11 the fact that any increased DSIC funding must be tied to LTIP projects that ensure and
12 maintain adequate, efficient, safe, reliable and reasonable service.¹¹ Neither PWSA nor
13 I&E Witness Spadaccio has supported increasing DSIC funding from the perspective that
14 increased funding is required for LTIP projects to ensure and maintain adequate, efficient,
15 safe, reliable and reasonable service to customers.

16 **Q. WHAT IS YOUR CONCLUSION REGARDING I&E'S SUPPORT FOR PWSA'S**
17 **PROPOSAL TO INCREASE ITS DSIC CAPS TO 7.5%?**

18 **A.** For the reasons detailed above, and in my Direct Testimony, I conclude that there is no
19 justified need to increase PWSA's DSIC caps to 7.5%, in terms of increasing either DSIC
20 PAYGO funding of or accountability for funding capital projects. Like PWSA, I&E too

¹⁰ OCA St. 2, page 24, lines 7-9; page 25 lines 12-17.

¹¹ 52 Pa. Code §121.1.

1 has not supported that increased DSIC funding is necessary. Simply arguing that DSIC
2 PAYGO funding is preferable to other internally generated funding is insufficient support.

3 **Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?**

4 **A.** Yes. However, I reserve the right to supplement this testimony if further information is
5 provided by PWSA.

REBUTTAL TESTIMONY OF
JEROME D. MIERZWA

ON BEHALF OF THE
PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE

SEPTEMBER 8, 2023

1 **I. INTRODUCTION**

2 Q. WOULD YOU PLEASE STATE YOUR NAME AND BUSINESS
3 ADDRESS?

4 A. My name is Jerome D. Mierzwa. I am a Principal and Vice President of Exeter
5 Associates, Inc (“Exeter”). My business address is 10480 Little Patuxent Parkway,
6 Suite 300, Columbia, Maryland 21044. Exeter specializes in providing public utility-
7 related consulting services.

8 Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN THIS
9 PROCEEDING?

10 A. Yes. My direct testimony was submitted as OCA Statement 3 on August 9, 2023.

11 Q. IN YOUR DIRECT TESTIMONY DID YOU PROPOSE ANY
12 ADJUSTMENTS TO THE PITTSBURGH WATER AND SEWER
13 AUTHORITY’S (PWSA) STORMWATER RATE DESIGN?

14 A. No. In my direct testimony, I did not propose any adjustments to PWSA’s stormwater
15 rate design.¹

16 Q. WHAT IS THE PURPOSE OF YOUR REBUTTAL TESTIMONY?

17 A. The purpose of my rebuttal testimony is to respond to certain aspects of the stormwater
18 rate testimony submitted by (1) River Development Corporation (RDC) witnesses Dr.
19 Robert Strauss (RDC St. No. 1) and Cheryl McAbee (RDC St. No. 2), and (2)
20 Pittsburgh School District (PSD) witnesses Michael J. McNamara (PSD St. No. 1) and
21 Eric M. Callocchia (PSD St. No. 2). Each of these witnesses oppose PWSA’s
22 stormwater rate for various reasons, and it is important note that the fact that I will not
23 address all aspect of these witnesses’ testimony should not be interpreted as my
24 agreement to their positions. Additionally, because these witnesses have raised certain

¹ OCA St 3. 22.

1 legal issues in this case, I will defer to counsel to address legal issues in briefing.

2 Q. HAVE ANY OF THE WITNESSES YOU IDENTIFIED CHALLENGED
3 THE PROPRIETY OF PWSA CHARGING A STORMWATER RATE?

4 A. Yes. RDC Witness Strauss claims that PWSA’s stormwater rate is improper because
5 it was never authorized by the City Council of Pittsburgh.² Additionally, RDC
6 Witnesses Strauss and McAbee, as well as PSD Witness McNamara each point to a
7 Commonwealth Court decision, *Borough of West Chester v. Pa. State System of*
8 *Higher Education et al*, as a potential basis to challenge PWSA’s stormwater rate.³

9 Q. WHAT IS YOUR RESPONSE REGARDING CLAIMS THAT PWSA’S
10 STORMWATER RATE IS UNLAWFUL?

11 A. As I already indicated, I am not offering a legal opinion in this case, and I will defer to
12 counsel to address these claims in briefing. For purposes of my analysis, it is important
13 to understand that my recommendations were developed based upon PWSA’s approved
14 stormwater rate design which was developed and approved in the settlement of
15 PWSA’s 2021 base rate case,⁴ and then later memorialized in the Commission’s
16 approval of PWSA’s Stormwater Compliance Plan case.⁵

17 Q. DID THE COMMISSION REQUIRE PWSA TO SET STORMWATER
18 RATES BASED ON A CLASS COST OF SERVICE STUDY?

19 A. No. As I indicated in my direct testimony, stormwater rates for all customers are
20 assessed based on Equivalent Residential Units (“ERU”), and PWSA calculated
21 stormwater rates based on ERUs. PWSA developed an analysis showing the cost of

² RDC St No. 1, p. 4.

³ RDC St. No. 1, pp. 4-5; RDC St. No. 2, p. 14; and PSD St. No. 1, p. 14.

⁴ *Pa. PUC v. Pittsburgh Water and Sewer Authority*, Docket Nos. R-2021-3024773 (water), R-2021-3024774 (wastewater), and R-2021-3024779 (stormwater) (PWSA 2021 Rate Case).

⁵ *Implementation of Chapter 32 of the Public Utility Code RE: Pittsburgh Water and Sewer Authority; Stage 2 Stormwater Compliance Plan*, Docket Nos. M-2018-2640802 and M-2018-2640803 (Order Aug. 25, 2022) (PWSA Stage 2 Stormwater Compliance Case).

1 serving each ERU. PWSA's rates for stormwater service for Residential customers are
2 based on a three-tier rate structure, with rates that vary based on the impervious area of
3 a customer's property. All other customers are assessed rates for stormwater service
4 based on the ERU of the customer's property.

5 Q. WAS PWSA'S STORMWATER RATE DESIGN PART OF A
6 COMPREHENSIVE RATE CASE INVESTIGATION IN 2021?

7 A. Yes. The publicly available record from PWSA's 2021 rate case demonstrates that
8 PWSA's stormwater rate design was investigated and challenged, in part, by multiple
9 parties, including the OCA. As an example, as part of its direct case in 2021, the OCA
10 questioned whether PWSA's proposed method for determining Residential stormwater
11 tiers was reasonable and fair to all customers.⁶ As part of its investigation, the OCA
12 performed a comprehensive review of stormwater fees charged in other communities
13 in Pennsylvania based upon a 2020 study conducted by Western Kentucky University.⁷
14 The OCA challenged various assumptions underlying PWSA's tiered proposal and
15 made multiple recommendations.⁸ Other parties also challenged aspects of PWSA's
16 stormwater rate design, and the resolution of all challenges ultimately resulted in a
17 settlement, approved by the Commission in 2021.⁹ Afterward, on January 20, 2022,
18 PWSA submitted a Stormwater Compliance Plan that reflected stormwater-related
19 issues addressed in PWSA's 2021 Rate Case, including the approved rate design.
20 PWSA's Stormwater Compliance Plan was ultimately approved by the Commission on
21 August 25, 2022 with only slight modifications unrelated to rate design.¹⁰

⁶ PWSA 2021 Rate Case, OCA St. No. 3. p. 16.

⁷ PWSA 2021 Rate Case, OCA St. No. 3. p. 24.

⁸ PWSA 2021 Rate Case, OCA St. No. 3. p. 24

⁸ PWSA 2021 Rate Case, OCA St. No. 3. p. 24

⁹ PWSA 2021 Rate Case (Order November 18, 2021).

¹⁰ PWSA Stage 2 Stormwater Compliance Plan (Order Aug. 25, 2022).

1 Q. IN THIS CASE, HAS PWSA PROPOSED CHANGES TO ITS
2 STORMWATER RATE DESIGN?

A. No. PWSA is not proposing to change its previously approved stormwater rate design in this case.¹¹

3 Q. ARE ERU-BASED STORMWATER CHARGES UNIQUE TO PWSA?

4 A. No. As I mentioned, in 2020, the OCA reviewed stormwater charges across the country
5 and determined that the ERU-based method was widely used by stormwater utilities
6 across the country. To carry the OCA's review forward and to update it for this case, I
7 have reviewed the Western Kentucky University Stormwater Utility Survey for 2022.¹²
8 Page 2 of the survey indicates that the most widely used method of funding stormwater
9 costs is the ERU system, which is usually the average impervious area on a single-
10 family residential parcel, with charges for Non-Residential property being proportional
11 to the ratio of the impervious area to the ERU.

12 Q. HAVE THE WITNESSES OF RDC AND PSD CHALLENGED PWSA'S
13 ERU-BASED STORMWATER RATE DESIGN IN THIS CASE?

14 A. Yes. RDC Witness McAbee and PSD Witness Callocchia argue that PWSA's ERU-
15 based rates are inequitable because they provide three tiers of rates for Residential
16 customers but all Non-Residential customers pay based on only one tier, which is a
17 charge per ERU.¹³ Additionally, RDC Witnesses Strauss and McAbee, as well as PSD
18 witness Callocchia, each argue that the ERU-based charges are improperly designed in
19 that they rely upon impervious surface area as a basis for calculation.¹⁴ Finally, PSD
20 Witness Callocchia also argues that PWSA should adjust the ERU rates assessed to

¹¹ PWSA St. No. 5, p. 30.

¹² The survey is publicly available online using the hyperlink below:

https://digitalcommons.wku.edu/cgi/viewcontent.cgi?article=1005&context=seas_faculty_pubs

¹³ RDC St. No. 2, p. 4; PSD St. No. 2, pp. 20-21.

¹⁴ RDC St. No. 1, p. 4; RDC St. No. 2, p. 4, pp. 15-16; PSD St. No. 2, pp. 20-22.

1 each customer class to assign certain costs directly to each customer class based on
2 Class Contribution.¹⁵

3 Q. HOW DO YOU RESPOND TO RDC AND PSD'S CHALLENGES TO
4 PWSA'S ERU-BASED STORMWATER RATE DESIGN?

5 A. My overall response is that I do not have enough information to consider the specific
6 challenges that they have raised in the context of how they would be reflected in
7 PWSA's rate design. As I mentioned, PWSA's stormwater rate design was developed
8 and approved in 2021, and my analysis in this case was built upon the adopted and
9 approved stormwater rate design. With respect to the claims of RDC Witness McAbee
10 and PSD Witness Callocchia that it is inequitable to provide three tiers to Residential
11 customers and only one tier to Non-Residential customers, neither Witness presents an
12 alternative that can be evaluated for reasonableness. In addition, I would note that the
13 current ERU system assesses stormwater rates and charges to all customers in direct
14 proportion to impervious area. It is unclear how a tiered system would materially
15 change the current assessment of stormwater rates and charges.

16 With respect to the claims of RDC Witness Strauss and McAbee, as well as
17 PSD Witness Callocchia that PWSA's ERU-based charges are improperly designed in
18 that they rely upon impervious area for the basis of calculation, again neither Witness
19 presents a specific alternative that can be evaluated for reasonableness. In addition as
20 indicated previously in this testimony, the Western Kentucky University Stormwater
21 Utility Survey for 2022 indicates that the most widely utilized method of funding
22 stormwater costs is the ERU system, which is usually the average impervious area on
23 a single-family Residential parcel, with charges for Non-Residential property being
24 proportional to the ratio of the impervious area to the ERU. Adopting an alternative

¹⁵ PSD St. No. 2, pp. 13-15.

1 method is likely to come with significant implementation costs which may not justify
2 a change.

3 Finally, Mr. Callocchia's claim that PWSA should adjust the ERU rates
4 assessed to each customer class to assign certain costs directly to each customer class
5 based on Class Contribution will be addressed by OCA Witness Roger D. Colton.

6 Q. RDC WITNESS MCABEE AND PSD WITNESS CALLOCCHIA ALLEGE
7 THAT PWSA IS IMPROPERLY EXEMPTING CEMETERIES FROM
8 PAYING STORMWATER RATES.¹⁶ HOW DO YOU RESPOND?

9 A. My response is that under PWSA's current stormwater tariff, all PWSA customers are
10 subject to paying stormwater rates. If RDC and PSD's claims are correct, PWSA must
11 take action to assess the proper stormwater rates as required by its tariff, as there is no
12 basis for PWSA to offer an exemption. I will await PWSA's response before
13 commenting further on this claim.

14 Q. IN SUMMARY, HAVE ANY OF THE CLAIMS MADE BY RDC AND
15 PSD CAUSED YOU TO CHANGE YOUR POSITION IN DIRECT
16 TESTIMONY?

17 Not at this time. I must reserve the right to reevaluate and consider PWSA's response
18 to these claims and respond in surrebuttal testimony if additional information enables
19 me to appropriately respond to the positions of RDC or PSD.

20 Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?

21 A. Yes, it does; however, I reserve the right to update this testimony as may be necessary.

Rebuttal Testimony of Roger Colton
on behalf of
Pennsylvania Office of Consumer Advocate
OCA Statement 4R

September 8, 2023

1 **Q. PLEASE STATE YOUR NAME AND ADDRESS.**

2 A. My name is Roger D. Colton. My business address is 34 Warwick Road, Belmont, MA.

3 **Q. ARE YOU THE SAME ROGER COLTON WHO PREVIOUSLY PREPARED**
4 **DIRECT TESTIMONY ON BEHALF OF THE OFFICE OF CONSUMER**
5 **ADVOCATE IN THIS PROCEEDING?**

6 A. Yes, I am.

7 **Q. PLEASE EXPLAIN THE PURPOSE OF YOUR REBUTTAL TESTIMONY.**

8 A. The purpose of my Rebuttal Testimony is to respond to the Direct Testimony of Kevin
9 Higgins prepared on behalf of the Office of Small Business Advocate (OSBA) (“OSBA
10 St. 1”) and the Direct Testimony of Eric Callocchia prepared on behalf of the School
11 District of Pittsburgh (“School District St. 2”). My Rebuttal Testimony is limited to
12 responding to the assertion of each of those two witnesses that the entire costs of the low-
13 income universal service programs delivered by Pittsburgh Water and Sewer Authority
14 (“PWSA”) should be borne only by the residential customer class. Since their testimony
15 was very similar, I will address the issue as a whole rather than addressing each piece of
16 direct testimony on a stand-alone basis.

17 **Q. DO MR. HIGGINS AND MR. CALLOCCHIA OFFER SIMILAR ARGUMENTS**
18 **WITH RESPECT TO WATER, WASTEWATER AND STORMWATER SERVICE?**

19 A. Yes. Similarly, my references to “water” below are intended to address the arguments for
20 all three services: water, wastewater and stormwater.

1 **Q. PLEASE RESPOND TO MR. HIGGINS' COMMENTS ON PREVIOUS**
2 **COMMISSION DECISIONS REGARDING THE ALLOCATION OF UNIVERSAL**
3 **SERVICE COSTS.**

4 A. Mr. Higgins asserts that it is his “understanding” that “the Commission has had a long-
5 standing policy of allocating customer assistance program costs only to the customer
6 class whose members are eligible for the program—residential customers. (OSBA St. 1,
7 at 17). The “understanding” that Mr. Higgins expresses is in error.

8 **Q. IS THERE LONG-STANDING COMMISSION PRECEDENT REGARDING THE**
9 **ALLOCATION OF UNIVERSAL SERVICE COSTS BY A REGULATED**
10 **MUNICIPAL UTILITY THAT MR. HIGGINS FAILED TO MENTION?**

11 A. Yes. PGW’s universal service costs have been allocated among all customer classes since
12 the Customer Responsibility Program (CRP) program (PGW’s CAP) was first created in
13 1993.¹ Even since the regulation of PGW was transferred to the PUC in 2000, the PUC has
14 maintained this cost allocation policy for PGW through an interim base rate proceeding,²
15 two emergency rate proceedings,³ four full base rate cases,⁴ and the PGW restructuring

¹ Recommended Decision in the Matter of Proposed Changes to PGW’s Customer Service Regulations (Sept. 22, 1993), affirmed, Order and Resolution of the Philadelphia Gas Commission (November 9, 1993).

² Pa. PUC v. Philadelphia Gas Works, Docket No. R-00005654 (Order Entered February 21, 2001).

³ Petition of Philadelphia Gas Works for Extraordinary Rate Relief Pursuant to 66 Pa. C.S. § 1308(e), Docket No. R-00017034 (Emergency Order Entered April 12, 2002); Pa. PUC v. Philadelphia Gas Works - Petition for Emergency Rate Relief, Docket No. R-2008-2073938 (Order Entered December 19, 2008).

⁴ Pa. PUC v. Philadelphia Gas Works, Docket No. R-00006042 (Order Entered October 4, 2001); Pa. PUC v. Philadelphia Gas Works, Docket No. R-00017034 (Order Entered August 8, 2002); Pa. PUC v. Philadelphia Gas Works, Docket No. R-00061931 (Order Entered September 28, 2007); Pa. PUC v. Philadelphia Gas Works, Docket No. R-2017-2586783 (Order Entered November 8, 2017).

1 proceeding.⁵ The last time this cost allocation decision was raised (in PGW’s 2017 base
2 rate case), the Commission rejected OSBA’s arguments. In that proceeding, the
3 Commission said “PGW has a long and continuous history of allocating its extensive
4 universal service costs over all firm customers and that there is insufficient evidence in
5 this proceeding to convince us to alter this allocation at this time.”⁶ The Commission said
6 that “We also find merit in the argument. . .that all firm customers, including commercial
7 and industrial customers, benefit indirectly from PGW’s extensive low-income assistance
8 programs.”⁷

9 The same is true for PWSA. Ever since PWSA has become regulated by the PUC, as a
10 municipal utility, the Commission has approved the allocation of Customer Assistance
11 Program (“CAP”) (the name of PWSA’s suite of universal service programs) over all
12 customer classes.⁸ It is important to remember that it is OSBA and the School District
13 which seek to change past practice in this proceeding. They have offered insufficient
14 evidence to alter this allocation.

⁵ Pa. PUC v. Philadelphia Gas Works, Docket No. M-00021612 (Order Entered April 17, 2003).

1 **Q. AS A MUNICIPAL UTILITY, WOULD IT BE PARTICULARLY INEQUITABLE**
2 **FOR PWSA TO CHANGE THE COST ALLOCATION SO THAT UNIVERSAL**
3 **SERVICE CHARGES ARE ALLOCATED ONLY TO THE RESIDENTIAL**
4 **CUSTOMER CLASS?**

5 A. Yes. To allocate all universal service costs exclusively to the residential customer class
6 today would operate to remake the bargain that the City of Pittsburgh has made with its
7 utility customers. As a municipal utility, the offer of programs in support of universal
8 service for all customers is a *quid pro quo* that was exacted in exchange for substantial --and
9 continuing-- public perquisites provided to PWSA. So long as all customer classes enjoy the
10 fruits of that exchange, they should also contribute to paying for the obligations that were
11 part of the exchange.

12 As a municipal utility, PWSA was granted two sets of public perquisites on behalf of all of
13 its customers: (1) the right to exercise eminent domain, and (2) the right to use the public's
14 streets, alleys and public ways as transportation corridors. The bargain that was made in
15 consideration of these two public perquisites is continuing. In accepting and exercising the
16 power of eminent domain, and the right to use public streets and ways, an exchange has
17 occurred. PWSA's customers have received the two perquisites and, as compensation for
18 those benefits, "pay" for those benefits through the support of universal service.

19 Making this exchange is not unusual. For example, in the health care industry, the same
20 exchange of public perquisites for universal service has been made.⁹

⁹ See, e.g., Colton (1997). "The 'Obligation to Serve' and a Competitive Electric Industry, prepared for U.S. Department of Energy, Office of Economic, Electricity and Natural Gas Analysis, Oak Ridge National Laboratory,

1 The concept of tax exemption as an exchange originated in the common law of
2 charitable trusts and is frequently restated in contemporary court decisions
3 considering charitable hospitals' exemption from various taxes. The cases do not
4 indicate that charitable exemptions turn on an exact accounting of the costs of
5 public services provided in comparison with tax revenues foregone. Exemption
6 has not, at least historically, been conceived as a negotiated transaction between
7 the tax authorities and the exempt organization. The task of such an accounting
8 would be beyond the institutional capacities of the courts. Instead, the exchange
9 concept appears to function as one of the underlying assumptions that lead a
10 legislature to grant exempt status to a class of organizations.¹⁰

11 **Q. HOW DOES THIS RELATE TO THE ALLOCATION OF PWSA'S UNIVERSAL**
12 **SERVICE COSTS?**

13 A. As with other municipal utilities, including both water utilities and energy utilities, this
14 discussion supports the conclusion that all customer classes should help fund universal
15 service programs. The public perquisites that have been provided to all PWSA customers
16 have a substantial value. If PWSA could *not* use eminent domain, in other words, or if it

Report No. ORNL/Con-459 (documenting analogy of non-profit hospitals who, in exchange for public perquisites, bear the burden of providing indigent care).

¹⁰ James Simpson and Sarah Strum, "How Good a Samaritan? Federal Income Tax Exemption for Charitable Hospitals Reconsidered," 14 U. Puget Sound L. Rev. 633, 655 - 656 (1991); see also, Barry Furrow, "Forcing Rescue: The Landscape of Health Care Provider Obligations to Treat Patients," 3 Health Matrix 31 (1993). The connection between the obligation to serve the indigent and the grant of federal, state and local tax subsidies is not merely implicit. When subsidies were challenged in court, judicial decisions: "were reached in the context of reviewing the validity of charitable trusts for hospital purposes, or the entitlement of charitable hospitals to exemption from various state and local taxes. The decisions rejected the idea that charity demanded exclusive attention to the indigent, but made the accessibility of the hospital to all without regard to ability to pay an important consideration." How Good a Samaritan, *supra*, at 642.

1 could not use the streets and public ways as transportation corridors for its lines or pipelines,
2 the increased costs associated with acquiring its distribution system would be borne by all
3 ratepayers. Providing PWSA's customers these public perquisites, therefore, conveys
4 substantial financial benefits to all customers.

5 Having received the financial benefits of the bargain, all PWSA customers should thus pay
6 the financial compensation to the public for having provided those benefits in the first place.
7 With all end users having taken their share of the benefits of the bargain, all end users
8 should also be required to pay their fair share of the responsibility part of the bargain. To
9 allow otherwise would be to grant the benefit while forgiving the costs.

10 **Q. HAS THE COMMISSION EVER RECOGNIZED THE BENEFITS TO THE CITY**
11 **AS A WHOLE, INCLUDING COMMERCIAL CUSTOMERS, ARISING FROM A**
12 **BILL AFFORDABILITY PROGRAM BY A MUNICIPAL UTILITY?**

13 A. Yes. The PUC noted in its 2014 Universal Service Plan Order regarding PGW's
14 universal service programs that PGW differs from other Pennsylvania natural gas utilities
15 in that PGW does not have stockholders. Instead, PGW is owned and operated by the
16 City of Philadelphia.

17 Even aside from PGW, however, the City of Philadelphia also owns its own water
18 distribution system, the Philadelphia Water Department. On November 19, 2015, the
19 Philadelphia City Council unanimously adopted a percentage of income bill affordability
20 program for the Philadelphia Water Department (Philadelphia City Council Bill 140607-
21 AA). That program, called IWRAP (Income-based Water Rate Affordability Program),

1 was modeled on the percentage of income program operated by PGW, the City's
2 municipally-owned gas system.

3 In addition to the design of the program, however, even more importantly for purposes
4 here is that, because the purpose of the program was not simply to provide benefits to
5 low-income customers, but to provide benefits to the entire City, including commercial
6 establishments throughout the City, the costs of the Philadelphia Water Department bill
7 affordability program are spread over all customer classes.

8 The PWSA universal service programs serve the same municipal functions for the City of
9 Pittsburgh, and provide the same benefits to all entities in the City of Pittsburgh, as does
10 the affordability program for PWSA's sister municipally-owned utility in Philadelphia.

11 To recognize those widespread benefits accruing to all customers, including commercial
12 customers, would not involve a change in PUC policy. It would instead simply *continue*
13 the same policy that has been in effect since PWSA's program first began.

14 **Q. DID MR. HIGGINS FULLY DISCUSS THE PRIOR LITIGATION OVER THE**
15 **ALLOCATION OF UNIVERSAL SERVICE COSTS FOR A MUNICIPAL**
16 **UTILITY?**

17 A. No. Mr. Higgins did not discuss the fact that OSBA specifically litigated the allocation of
18 universal service costs for a municipal utility in PGW's 2017 base rate proceeding.

19 (Pennsylvania PUC v. Philadelphia Gas Works, Docket Nos. R-2017-2586783, Opinion
20 and Order, November 8, 2017). OSBA even cited the same cases in that PGW litigation
21 that Mr. Higgins alludes to (without citation) in his testimony here.

1 Just as the Commission rejected that precedent in the 2017 proceeding, it should do so for
2 PWSA as a municipal utility in this proceeding as well. Instead, the Commission can
3 (and should) reach the same findings for PWSA. In doing so, the Commission does not
4 modify its prior precedent. Instead, it continues its prior precedent.

5 Moreover, the Commission should reach the same further conclusion with respect to
6 PWSA, in its capacity as a water utility, that it reached with respect to PGW in its
7 capacity as a natural gas utility. “We agree with the conclusion of the ALJ that there is
8 nothing within PGW’s allocation of universal service costs to all firm customers that
9 violates the Code or our Regulations.” (Id., at 73).

10 In short, Mr. Higgins has presented no compelling evidence to demonstrate that the
11 Commission’s historic allocation decisions for a city-owned utility should be changed.

12 **Q. ARE RECENT COMMISSION DECISIONS REGARDING PECO GAS OR**
13 **COLUMBIA GAS CONTRARY TO THE PRINCIPLE OF ALLOCATING**
14 **UNIVERSAL SERVICE COSTS TO ALL CUSTOMER CLASSES?**

15 A. No. Even setting aside the differences I explained immediately above between PWSA
16 and these two investor-owned utilities (PECO and Columbia Gas), Mr. Higgins
17 erroneously alludes (without citation) to recent decisions for PECO Gas and Columbia
18 Gas as establishing the principle that universal costs should be allocated exclusively to
19 the residential class. In reaching this conclusion, I acknowledge that the PUC rejected an
20 OCA proposal to allocate universal service costs to all customer classes in a Columbia
21 Gas decision. (Opinion and Order, *Pa. P.U.C. v. Columbia Gas of Pa., Inc.*, Docket No.
22 R-2020-3018835 (Order entered Feb. 19, 2021), pp. 258-261). The PUC, however,

1 explicitly stated in that Order that its decision was *limited to the facts presented in that*
2 *proceeding*. (Id., at 261). For example, the Commission observed that OCA did “not
3 propose a specific recovery rate design method.” (Id.) That decision, in other words, is
4 not precedential, and certainly not controlling, of this proceeding. The Joint Statement of
5 Chairman Gladys Brown Dutrieuille and Vice Chairman David Sweet further indicated
6 that the Columbia Gas decision was *limited to the facts of that case*.

7 Moreover, in a PECO Gas rate case decision (Docket No. R-2020-3018929), the PUC
8 reached a similar decision. (Opinion and Order, at 265, June 22, 2021). Similarly, a Joint
9 Statement of Chairman Gladys Brown Dutrieuille and Vice Chairman David Sweet was
10 issued noting that its decision was *limited to the facts of the PECO Gas case*. It thus
11 cannot be precedential.

12 **Q. WHAT IS THE COMMISSION’S MOST RECENT POLICY ON THE ISSUE OF**
13 **THE ALLOCATION OF UNIVERSAL SERVICE COSTS?**

14 A. In its 2019 Revised CAP Policy Statement in the PUC’s generic investigation into energy
15 affordability in Pennsylvania (Docket M-2019-3012599) (hereafter, “Final CAP Policy
16 Statement”),¹¹ the Commission explicitly acknowledged that, historically, it allocated
17 universal service costs exclusively to residential customers, but then stated that “our
18 review of Pennsylvania’s current universal service model in the *Review and Energy*
19 *Affordability* proceedings has *provided reasons to reconsider this position*. (Final CAP
20 Policy Statement, at 92) (emphasis added). The Commission observed that “[t]he current

¹¹ http://www.puc.pa.gov/about_puc/consolidated_case_view.aspx?Docket=M-2019-3012599 (November 5, 2019).

1 cost-recovery method for universal services, including CAP costs, is putting a significant
2 burden on residential customer bills. . .” (Id.).

3 I agree with these observations. As I explained in detail in my Direct Testimony, there is
4 a substantial population of PWSA customers who have difficulties in paying their utility
5 bills without being sufficiently “low-income” to qualify for CAP. The current CAP costs
6 could prove to be a problem for these customers, and those costs will increase in the
7 future. (pages 94 – 95).

8 The Commission stated in its Final CAP Policy Statement that “the Commission finds it
9 appropriate to consider recovery of the costs of CAP costs from all ratepayer classes.

10 Utilities and stakeholders are advised to be prepared to address CAP cost recovery in
11 utility-specific rate cases consistent with the understanding that *the Commission will no
12 longer routinely exempt non-residential classes from universal service obligations.* . .”

13 (Id., at 99, notes omitted). (emphasis added).¹²

14 **Q. DID THE COMMISSION ARTICULATE SPECIFIC FACTORS TO CONSIDER**
15 **IN DECIDING HOW TO ALLOCATE UNIVERSAL SERVICE COSTS?**

16 A. Yes. Mr. Higgins states that the Commission “would consider recovering the costs of
17 customer assistance programs from all ratepayer classes in utility-specific proceedings in
18 an effort to maintain affordability for non-CAP residential customers.” (OSBA St. 1, at
19 19). Based on this representation, Mr. Higgins addresses only that question.

¹² The Commission observed that it was not making “a final precedential decision regarding cost recovery in this docket. We are merely providing that the recovery of CAP costs in particular can be fully explored in utility rate cases henceforth.” (Id., at note 150).

1 That discussion by Mr. Higgins, however, is too narrow, and does not capture the full
2 range of the Commission’s decision when the Commission decided that it “will no longer
3 routinely exempt non-residential classes from universal service obligations.” In addition
4 to the limited issue which Mr. Higgins asserts was the basis for universal service cost
5 allocation decisions, the PUC was correct when it found in its 2019 Final CAP Policy
6 Statement that:

- 7 ➤ poverty and its impacts are “not just residential class problems” (Final CAP
8 Policy Statement, at 96);
- 9
10 ➤ several factors “contribute to households struggling to afford utility service” and
11 that, amongst those factors are “poverty, poor housing stock, and other factors”
12 (Id., at 96)
- 13
14 ➤ poverty is a broad-based social problem *not* associated with any particular
15 customer class, including specifically not being associated with the residential
16 class exclusively. (Id., citing 1992 *Final Report on The Investigation of*
17 *Uncollectible Balances*¹³ at Docket No. I-00900002, at 157 – 158).
- 18
19 ➤ “Helping low-income families maintain utility service and remain in their homes
20 is also a benefit to the economic climate of a community.” (Id., at 96, *Pa. PUC, et*
21 *al. v. PGW*, Docket No. R-2017-2586783 (order entered on November 8, 2017), at
22 75).
- 23
24 ➤ “Clearly, there is a persuasive argument to be made that home heating and energy
25 assistance for low-income households *serves a public good* whose responsibility
26 is not merely other residential ratepayers.” (Id., at 96 – 97) (emphasis added),
- 27
28 ➤ “While there are strong arguments to be made that non-residential classes do
29 benefit from universal services, there are also strong arguments to be made in
30 favor of multi-class allocation even if one discounts any non-residential benefits.”
31 (Id., at 97).
- 32

¹³ <http://www.puc.pa.gov/pcdocs/1524987.pdf>. This docket number is sometimes cited as Docket No. I-900002.

1 In fact, in direct contravention of the assertion by both Mr. Higgins and Mr. Callocchia
2 that only the residential customer class benefits from a universal service program, the
3 Commission explicitly found that “In approving PGW’s practice of recovering such costs
4 across all ratepayer classes, we noted that ‘all firm customers, including commercial and
5 industrial customers, benefit indirectly from PGW’s extensive low-income assistance
6 programs.” (Id., at 96, citing *Pa. PUC, et al. v. PGW*, Docket No. R-2017-2586783
7 (order entered on November 8, 2017), at 75). (emphasis added) internal note omitted).

8 The Commission favorably noted that in the 2017 PGW rate case proceeding, “PGW
9 argued that all non-residential customers indirectly benefit from universal service
10 programs by keeping low income customers in their homes and allowing them to
11 contribute to Philadelphia’s economic activity. PGW contended ‘the portion of universal
12 service costs paid by non-residential customers is offset by the substantial positive
13 economic impact in Philadelphia on those non-residential customers created by PGW’s
14 universal service programs.’” (Final CAP Policy Statement, at note 144, page 96, citing
15 *Pa. PUC, et al. v. PGW* at 63). Neither Mr. Higgins nor Mr. Callocchia have provided
16 any evidence at all that would support a different Commission finding in this proceeding.

17 While the PUC’s Revised CAP Policy Statement refers to “energy,” the Commission’s
18 decisions hold equally true for water bills as well.

19 **Q. IS THERE REASON FOR THE COMMISSION TO REACH THESE SAME**
20 **CONCLUSIONS FOR PWSA?**

21 A. Yes. First, the Commission found that poverty and its impacts are “not just residential
22 class problems” (Final CAP Policy Statement, at 96). Moreover, the Commission found
23 that low-income bill payment assistance is “a public good whose responsibility is not

1 merely other residential ratepayers.” (Id.) That is as true in Pittsburgh as it was for the
 2 state as a whole. One reason that customers income-qualify for PWSA’s universal service
 3 programs is because a substantial number of people throughout the PWSA service
 4 territory are working at Poverty wages.¹⁴

5 As the Economic Policy Institute (EPI) reports:

6 [G]iven rising costs of necessities such as child care, housing, and health
 7 care, many families’ ability to achieve a modest but adequate standard of
 8 living requires resources earned on the job *and* assistance from government
 9 programs. (internal citation omitted).

10
 11 *However, for many workers in certain sectors, wages are so low that even*
 12 *those who work full time must rely heavily on government assistance to make*
 13 *ends meet.* This suggests that *low pay by many employers.* . .is placing
 14 unwarranted demands on public resources.¹⁵

15 (emphasis added). As this research finds, the cause of the public expenditures –PWSA’s
 16 Bill Discount Program (“BDP”) and/or Arrearage Forgiveness Program (“AFP”) in the
 17 case at hand—is not the individual receiving the benefits. It is “caused,” at least in part,
 18 by the economic entities providing the low wages which require a public subsidy.

19 Second, the Commission found that several factors “contribute to households struggling
 20 to afford utility service” and that, amongst those factors are “poor housing stock.” (Id., at
 21 96). Pittsburgh’s recent housing needs assessment concluded that “Because rehabilitation
 22 costs of many older units would exceed the value of the house itself, *housing quality is a*

 government can do, Economic Policy Institute: Washington D.C. , available at
<https://www.epi.org/publication/wages-and-transfers/>.

1 *significant concern*. This is particularly true in Pittsburgh’s weaker housing markets,
 2 where home values are particularly low.”¹⁶ Moreover, in Pittsburgh’s recent
 3 “Consolidated Plan” prepared by the City for submission to the U.S. Department of
 4 Housing and Urban Development, the first priority stated was that “There is a need to
 5 improve the quality of the housing stock in the City. . .”¹⁷ Neither the OSBA nor the
 6 School District have presented evidence that would counter, let alone contradict, the
 7 City’s own findings regarding the quality of Pittsburgh housing stock.

8 Third, the Commission found that “helping low-income families maintain utility service. .
 9 .is also a benefit to the economic climate of a community.” (Id., at 96). Such programs
 10 not only improve the competitiveness of business and industry in a community,¹⁸ it
 11 supports future economic growth as well. The provision of a strong social safety-net so that
 12 individuals and households do not face the deprivation of basic household necessities is a

Financial wellness at work: A review of promising practices and policies. <https://www.consumerfinance.gov/data-research/research-reports/financial-wellness-at-work/>; *citing*, Garman et al., Financial Stress Among American Workers: Final report: 30 Million Workers in America –One in Four—Are Seriously Financially Distressed and Dissatisfied Causing Negative Impacts on Individuals, Families, and Employers, 17 (2005); *citing also*, MetLife, Inc., 10th Annual Study of Employee Benefits Trends: Seeing Opportunity in Shifting Tides 51 (2012), available at [http://www.winonaagency.com/img/~www.winonaagency.com/10th annual met life study of benefits trends.pdf](http://www.winonaagency.com/img/~www.winonaagency.com/10th%20annual%20met%20life%20study%20of%20benefits%20trends.pdf). (“22% of employees admit that they have taken unexpected time off in the past 12 months to deal with a financial issue and/or spent more time than they think they should at work on personal financial issues . . .”). 15% of Gen Y respondents, 10% of Gen X respondents, 5% of Younger Boomer respondents, and 1% of Older Boomer respondents admitted to the same; PricewaterhouseCoopers, LLC, Employee Financial Wellness Survey 10,11 (2014), available at http://www.pwc.com/en_US/us/private-company-services/publications/assets/pwc-employee-financial-wellness-survey-2014-results.pdf.

1 strong and growing factor in businesses making locational decisions. These locational
2 factors are particularly important for high technology firms, which represent a particularly
3 strong future growth potential for the economy.¹⁹ Businesses focus on quality of life
4 considerations when making location decisions because they are relevant for attracting a
5 high quality workforce.²⁰

6 Finally, the Commission found that “In approving PGW’s practice of recovering such
7 costs across all ratepayer classes, we noted that ‘all firm customers, including commercial
8 and industrial customers, benefit indirectly from PGW’s extensive low-income assistance
9 programs.’” Just as PGW’s universal service program helps keep people in their homes
10 and contribute the local economic activity, as the Commission favorably noted in the
11 2017 PGW rate case proceeding (Final CAP Policy Statement, at note 144, page 96,
12 citing *Pa. PUC, et al. v. PGW* at 63), the same is true in Pittsburgh. The Pittsburgh
13 Foundation has long studied the relationship between “housing insecurity” and the ability
14 of residents to participate in the local economy.²¹ Other research has documented not

¹⁹ Gertler (2002). *Competing on Creativity: Placing Ontario’s Cities in North American Context*, report produced for the Ontario Ministry of Enterprise, Opportunity and Innovation and the Institute for Competitiveness and Prosperity (available at http://webarchive.urban.org/UploadedPDF/410889_Competing_on_Creativity.pdf). In this sense, affordable home energy can be viewed in the same way that health and education are viewed. “There are numerous empirical studies that demonstrate the links between education, health and competitiveness. In particular, both health and education are correlated with superior economic outcomes such as higher productivity, higher per capita incomes, and faster growth.” Burstein (2004). *Developing the Business Case for Multiculturalism*, at 8, Multiculturalism and Human Rights Branch, Department of Canadian Heritage (available at <http://citeseerx.ist.psu.edu/viewdoc/download?doi=10.1.1.132.7196&rep=rep1&type=pdf>).

²¹ See, e.g., Pittsburgh Foundation. *Deconstructing the Housing Dilemma*. available at <https://pittsburghfoundation.org/deconstructing-housing-dilemma>.

1 only this conclusion, but also how keeping people in affordable housing is necessary for
2 employers to be able to recruit attract and retain their workforce.²² When Pittsburgh lose
3 their housing, as happens due to unaffordable utility bills, the financial health of the City
4 and its economy unquestionably suffers.²³

5 **Q. ARE THERE OTHER REASONS WHY THE IMPLEMENTATION OF**
6 **UNIVERSAL SERVICE INITIATIVES IS OF PARTICULAR IMPORTANCE TO**
7 **A MUNICIPALITY FROM A WATER UTILITY**

8 A. Yes. The whole community benefits from universal service programs because providing
9 affordable home energy addresses public health and safety costs that are borne by all
10 taxpayers (*e.g.*, homelessness). Businesses benefit from these programs because the
11 programs provide help to low-wage employees and low-income customers. Small
12 businesses require low-wage employees to survive, but low wages also create a situation
13 where the employees may need help to afford utility service.

14 As I noted in my direct testimony, even more than home energy, providing affordable
15 water is a public health issue. A 2022 White Paper by the U.S. Water Alliance states that
16 “for every community in our country, the availability of safe drinking water and

²² Shroyer and Gaitdn (September 11, 2019). Four Reasons Why Employers Should Care About Housing, Urban Institute: Washington D.C. <https://housingmatters.urban.org/articles/four-reasons-why-employers-should-care-about-housing>.

²³ Chernick, Newman and Reschovsky (July 21, 2021). What’s the link between housing markets and the financial health of cities, available at <https://housingmatters.urban.org/research-summary/whats-link-between-housing-markets-and-financial-health-cities>.

1 wastewater services is a precondition for public health and prosperity.”²⁴ Water is vital to
 2 maintaining hygiene and health. A recent study published in the American Journal of
 3 Preventative Medicine concluded that “Water shutoffs pose a real threat to human health
 4 because the lack of adequate sanitation can cause diseases to spread and allow people to
 5 become sick.”²⁵ A 2010 report for the Water Research Foundation (the research arm of
 6 the American Water Works Association, AWWA) concluded that “A final consideration of
 7 importance to water utilities is the relationship of payment problems to health issues. . .
 8 Potential impacts relate to many of the same public health endpoints targeted by Safe
 9 Drinking Water Act standards such as effects on children and the unborn.”²⁶ (OCA St. 4,
 10 at 8 – 9).

11 **Q. PLEASE RESPOND TO THE TESTIMONY OF MR. HIGGINS AND MR.**
 12 **CALLOCCIA THAT RESIDENTIAL CUSTOMERS SHOULD BE ALLOCATED**
 13 **ALL UNIVERSAL SERVICE COSTS BECAUSE ONLY RESIDENTIAL**
 14 **CUSTOMERS MAY PARTICIPATE.**

15 A. In arguing that PWSA’s universal service costs should be allocated only to the residential
 16 class because only residential customers may participate, both Mr. Higgins and Mr.
 17 Callocchia fail to recognize that the Commission has specifically rejected that argument

²⁴ Hara, Willette and Simonson (2022). Making Water a Public Good: The Bigger Picture of Water Affordability, at 1, US Water Alliance.

²⁵ Zhang et al (2021). Water Shutoff Moratoria Lowered COVID-19 Infection and Death Across U.S. States, 2021 American Journal of Preventative Medicine.

²⁶ Cromwell, et al. (2010). Best Practices in Customer Payment Assistance Programs, at xxii, Water Research Foundation: Washington D.C. (hereafter “Best Practices”).

1 in the past. When that argument was previously presented to the Commission, the
2 Commission responded:

3 We note there is no statutory or appellate prohibition that limits the recovery
4 of CAP costs, whether specifically calculated or as part of total universal
5 service costs, to funding from the residential class.²⁷ Universal service
6 funding from non-residential classes, while not mandatory, is permissible:

7 Thus, under *Lloyd*, there is no statutory requirement that the funding for
8 special programs come only from those who benefit from the programs.
9 However, the lack of such a requirement does not mean that funding for
10 special programs must come from those who do not benefit.

11 *MEIUG v. Pa. PUC*, 960 A.2d 189, 202 (2008), citing *Lloyd v. Pa. PUC*, 904 A.2d
12 1010 (Pa. Cmwlth. 2006).

13 Consistent with the comments of the Low Income Advocates and OCA, the
14 Commission concludes that the General Assembly clearly identified the
15 public purpose of these programs in the Competition Acts by requiring that
16 their costs be nonbypassable²⁸ when a customer switches energy providers.

17 As is evident, and as the Commission has previously held, the Commonwealth Court
18 decision in *Met-Ed Industrial Users Group (MEIUG) v. PA PUC*, in which the court
19 found that funding from special programs is not limited to those who benefit.

20 While PWSA does not operate under the same statutory universal service framework that
21 Pennsylvania's energy utilities do, there is no reason for the Commission to view the
22 costs of providing universal service programs as "public goods," or serving a "public
23 purpose," any less for PWSA today than it previously has for PWSA or than it previously
24 has for the state's natural gas and electric distribution companies.

²⁷ In PGW's 2017 rate case, the Commission noted that recovering universal service costs from all ratepayers does not appear to be a violation of Title 66 or Commission regulations. *Pa. PUC, et al. v. PGW* at 74.

²⁸ Some documents use the term "non-bypassable."

1 **Q. WHAT DO YOU CONCLUDE?**

2 A. I conclude that the Commission has a long-standing policy with respect to the allocation
3 of universal service costs for regulated municipal utilities. The arguments presented by
4 OSBA witness Higgins and School District witness Calocchia have been presented to the
5 Commission before and rejected. Neither Mr. Higgins nor Mr. Calocchia have
6 presented new or compelling evidence that would merit a change in Commission policy
7 in this proceeding.

8 **Q. DO YOU DISAGREE WITH THE SCHOOL DISTRICT'S TESTIMONY THAT IT
9 DERIVES NO BENEFIT FROM PWSA'S LOW-INCOME PROGRAMS?**

10 A. Yes. When Mr. Calocchia testifies on behalf of the School District that it derives no
11 benefit from the low-income programs offered by PWSA, he fails to acknowledge the
12 substantial adverse impacts that unaffordable utility bills have not only on the students
13 which the School District serves, but on the School District itself.

14 **Q. WOULD ANY OF THE HOUSEHOLDS ENROLLED IN THE PITTSBURGH
15 SCHOOL DISTRICT BE INCOME-ELIGIBLE FOR PWSA'S LOW-INCOME
16 PROGRAMS?**

17 A. Yes. Not all students who qualify for the free and reduced price school meals would
18 qualify for PWSA's low-income programs (though they will if PWSA's proposal to
19 increase the eligibility to 200% FPL is approved). According to the U.S. Department of
20 Agriculture's Food and Nutrition Services, the maximum income eligibility for the 2023
21 – 2024 School Year is determined as follows: "The Department's guidelines for free
22 meals and milk and reduced price meals were obtained by multiplying the year 2023
23 Federal income poverty guidelines by 1.30 and 1.85, respectively, and by rounding the

1 result upward to the next whole dollar.”²⁹ As can be seen, the current maximum PWSA
2 income eligibility (150% FPL) would reach most but not all of those students at or below
3 185% FPL, while the proposed PWSA maximum income eligibility (200% FPL) would
4 reach all of them.

5 **Q. DOES THE PITTSBURGH SCHOOL DISTRICT ENROLL A SUBSTANTIAL**
6 **NUMBER OF STUDENTS WHO QUALIFY FOR FREE AND REDUCED**
7 **MEALS?**

8 A. Yes. Pennsylvania school districts provide annual “data reports” to the state Department
9 of Education on the percentage of students who are eligible for free and reduced school
10 lunches (“Annual Building Data Report”).³⁰ According to the Department of Education’s
11 Annual Building Data Report, the Pittsburgh School District reported data for 56
12 different school sites. Of the 23,172 total “enrolled students” reported for those schools,
13 66% (15,340) were eligible for the free school lunch program. The Department reported
14 that 49 of those 56 sites had 50% or more of their enrolled students eligible for the free
15 school lunch program, while 23 had 75% or more of their enrolled students eligible for
16 the free school lunch program.

17 Moreover, under the federal Every Student Succeeds Act, school districts report data on,
18 among other things, chronic absenteeism to the U.S. Department of Education. Pursuant
19 to the most recent report of that data for the Pittsburgh School District, 30.0% (6,588 of

²⁹ Available at <https://www.fns.usda.gov/cn/fr-020923>

³⁰ Available at: <https://www.education.pa.gov/Teachers%20-%20Administrators/Food-Nutrition/reports/Pages/National-School-Lunch-Program-Reports.aspx>

1 21,974) of the School District's student population were chronically absent.³¹ Chronic
2 absenteeism is defined as a student who misses at least 15 days of school in a year.
3 While the Department of Education's data base does not track the contribution which
4 unaffordable utility bills make to that chronic absenteeism, that connection is the
5 connection that was made in my *Journal on Children and Poverty* article as I discuss
6 below.

7 **Q. GIVEN THIS LOW-INCOME STUDENT POPULATION IN THE PITTSBURGH**
8 **SCHOOLS, ARE THERE PARTICULAR BENEFITS TO THE PITTSBURGH**
9 **SCHOOL DISTRICT FROM PWSA PROVIDING AFFORDABLE UTILITY**
10 **SERVICE TO THE FAMILIES OF THESE LOW-INCOME CUSTOMERS?**

11 A. Yes. In 1996, I authored an article for the *Journal on Children and Poverty*. The article,
12 The Road Oft Taken: Unaffordable Home Energy Bills, Forced Mobility And Childhood
13 Education in Missouri,³² the article made several findings based on research I had
14 undertaken for the Missouri association of Head Start providers. I reported that that a
15 substantial portion of the low-income population in Missouri was "frequently mobile"
16 over a five year period; that one primary cause of this frequent mobility was the
17 unaffordability of home energy bills, including home heating and electricity; and that that
18 frequent mobility created problems both for the students in these mobile households and
19 for the teachers and schools who seek to educate those students. One conclusion I

³¹ U.S. Department of Education, Chronic Absenteeism in the Nation's Schools: A Hidden Educational Crisis, available at <https://www2.ed.gov/datastory/chronicabsenteeism.html>

³² Colton (1996). "The Road Oft Taken: Unaffordable Home Energy Bills, Forced Mobility And Childhood Education in Missouri." 2 *Journal on Children and Poverty* 23.

1 reached was that appropriate public policy should concentrate on breaking the causal
 2 chain which gives rise to the educational problems in the first place rather than seeking
 3 only to redress the problems once they occur.

4 **Q. WHAT IS THE ADVERSE IMPACT OF FREQUENT MOBILITY ON**
 5 **PITTSBURGH’S STUDENTS IN FAMILIES WHO CANNOT AFFORD THEIR**
 6 **UTILITY BILLS?**

7 A. My study reported that, “The problems of a lack of adequate education are, not
 8 surprisingly, immense. According to [the U.S. General Accounting Office], for example,
 9 low-income children are more likely than others to experience academic failure. ‘. . .the
 10 consequences of this failure follow them for their whole lives. These children are more
 11 likely to drop out of school, for example, and high school dropouts are more likely than
 12 high school graduates to be arrested and to become unmarried parents.’”³³

13 **Q. DID YOUR STUDY ADDRESS HOW THESE ADVERSE EDUCATIONAL**
 14 **IMPACTS AFFECT NOT ONLY THE CITY’S SCHOOLS BUT THE CITY’S**
 15 **BUSINESSES AS WELL?**

16 A. Yes. My study reported that: “Moreover, in 1987, one business group warned that
 17 without providing a quality education, ‘our industries will be unable to grow and compete
 18 because an expanding educational underclass will be unable to meet the demands’ of
 19 ‘dramatic and irreversible changes in the job market.’ Moreover, that group noted, youth

³³ Id., citing U.S. General Accounting Office (1994). *School-Age Children: Poverty and Diversity Challenge Schools Nationwide*,

At 2, Washington D.C.

1 who drop out of school are ‘virtually unemployable’ and each annual class of dropouts
 2 loses, in current dollars, about \$237 billion in lifetime earnings. Reducing the dropout
 3 rate would not only increase these individuals' incomes, but would boost government tax
 4 revenues from that income by up to \$70 billion.”³⁴

5 **Q. WHAT IMPACTS FROM UNAFFORDABLE UTILITY BILLS DID YOUR**
 6 **STUDY IDENTIFY THAT WOULD APPLY TO THE PITTSBURGH SCHOOL**
 7 **DISTRICT?**

8 A. My study reported:

- 9 ➤ The educational impacts of frequent mobility are dramatic. Overall, third-
 10 graders who have changed schools frequently are two-and-a-half times as
 11 likely to repeat a grade as third-graders who have never changed schools (20
 12 percent versus 8 percent).
- 13 ➤ Of the nation's third-graders who have changed schools frequently, 41 percent
 14 are low achievers, that is, below grade level, in reading, compared with 26
 15 percent of third graders who have never changed schools. Results are similar
 16 for math--33 percent of children who have changed schools frequently are
 17 below grade level, compared with 17 percent of those who have never changed
 18 schools.
- 19 ➤ Highly mobile students pose problems to the school systems as well. High
 20 numbers of mobile children, school officials have reported, can interfere with
 21 teachers' ability to organize and deliver instruction. While the mobility of
 22 children is often a reflection of underlying family issues, such as shortages of
 23 affordable housing, changes in marital status, or unemployment, it is the
 24 schools that must face the difficult challenge of meeting the educational needs
 25 of children who change schools frequently. Teachers may find it difficult to
 26 assess the needs of such new children, determine their past education
 27 experiences, and provide instruction that builds on these experiences. Teachers
 28 may therefore not have the time to identify gaps in such a child's knowledge;

³⁴ Id. (internal notes omitted).

1 moreover, these gaps may grow as the child is left on his or her own to make
2 sense of the new curriculum and its relation to the one at the previous school.³⁵

3 **Q. WOULD A FOCUS ON WATER AFFORDABILITY RATHER THAN ENERGY**
4 **AFFORDABILITY CHANGE YOUR FINDINGS OR CONCLUSIONS?**

5 A. No. My experience counsels that the unaffordability of home water service has the same
6 effect on households as the unaffordability of home energy does. Indeed, if anything, the
7 disconnection of water service has a more severe impact given that housing units are
8 generally deemed to be uninhabitable given a lack of running water.

9 **Q. WHAT DO YOU CONCLUDE?**

10 A. Based on the above data and discussion, I conclude that the testimony from OSBA and
11 the Pittsburgh School District that they derive no benefit from PWSA's universal service
12 programs is in error. Not only the Pittsburgh School District, but Pittsburgh's small
13 businesses as well derive considerable financial benefits from the PWSA initiatives.

14 **Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?**

15 A. Yes, it does.

³⁵ Id. (internal notes omitted).

BEFORE THE
PENNSYLVANIA PUBLIC UTILITY COMMISSION

Pennsylvania Public Utility Commission : Docket Nos. R-2023-3039919 (SW)
v. : R-2023-3039920 (W)
Pittsburgh Water and Sewer Authority : R-2023-3039921 (WW)

VERIFICATION

I, Roger D. Colton, hereby state that the facts above set forth in my Rebuttal Testimony, OCA Statement 4R, are true and correct (or are true and correct to the best of my knowledge, information, and belief) and that I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa.C.S. § 4904 (relating to unsworn falsification to authorities).

SURREBUTTAL TESTIMONY OF

DANTE MUGRACE

**ON BEHALF OF THE
COMMONWEALTH OF PENNSYLVANIA
OFFICE OF CONSUMER ADVOCATE**

September 22, 2023

TABLE OF CONTENTS

	<u>PAGE</u>
I. PURPOSE OF TESTIMONY	1
II. REVENUE REQUIREMENT ISSUES	
A. Direct Operating Expenses – Overview	4
1. Financial Metrics – Days Cash on Hand/Debt Service	6
2. Overall Expenses Issues/ Expenses in the FPFTY	7
3. Payroll and Employee Benefits	8
4. Drag Bucket	9
5. Line Televising	10
6. Rate Case Expenses	10
7. COVID-19	11
8. Normalization / Various Adjustments	12
9. Inflation Factors	14
10. Chemical Expenses	17
11. Executive Bonus	17
12. Utility Expenses – Electric and Gas	18
13. Charitable Contributions/Membership Fees	19
14. Lobbying	21
15. Bad Debt Expenses	22

1 **I. PURPOSE OF SURREBUTTAL TESTIMONY**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 **A.** My name is Dante Mugrace. My business address is 22 Brooks Avenue, Gaithersburg, MD
4 20877.

5 **Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN THIS DOCKET?**

6 **A.** Yes. I submitted Direct Testimony on August 9, 2023, which was marked as OCA
7 Statement 1. My qualifications and experience are attached to my Direct Testimony.

8 **Q. DO YOU HAVE ANY ADJUSTMENTS TO YOUR DIRECT TESTIMONY?**

9 **A.** No, I do not. Based upon the rebuttal testimonies of the witnesses and the additional
10 information received, I am still recommending an overall increase of \$30,584,475 as shown
11 on my Exhibit DM-1.

12 **Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?**

13 **A.** The purpose of my Surrebuttal Testimony is to address the Rebuttal Testimony of
14 Authority witnesses Pickering (PWSA St. No. 1-R), Barca (PWSA St. No. 2-R), and Fay
15 (PWSA St. No. 9-R). To the extent that I do not respond to or address a particular issue or
16 argument, I defer to my Direct Testimony on those issues.

17 **Q. DOES YOUR SURREBUTTAL TESTIMONY CONTAIN ANY EXHIBITS?**

18 **A.** Yes. Exhibits DM-SR 1, DM-SR 2 and DM-SR 3 are attached and they contain documents
19 that I reference in this surrebuttal testimony.

20 **Q. DID MR. BARCA UPDATE THE AUTHORITY'S COST OF SERVICE MODEL
21 REGARDING THE FPFTY REVENUE REQUIREMENT INCREASE?**

22 **A.** No.

23 **Q. WHAT DID MR. BARCA CLAIM REGARDING YOUR OVERALL
24 RECOMMENDED REVENUE REQUIREMENT?**

25 **A.** Mr. Barca claimed that the financial metrics that my analysis produced were inflated due
26 to the use of normalization and other adjustments. According to Mr. Barca, these

1 adjustments artificially lower PWSA's expected levels of operating expenses and debt
2 service in the FPFTY. (PWSA St. No. 2-R at 3). Mr. Barca alleges that the rate increase
3 recommendations provided by the OCA will not produce the financial metrics the OCA
4 claims and will not provide PWSA with the necessary resources to achieve its mission,
5 which is to support the Pittsburgh region by protecting public health and the environment
6 through delivery of safe and reliable water services with a commitment to future
7 generations. (PWSA St. No. 2-R at 4). Mr. Barca opined that the impact of the
8 recommendation would be so severe that PWSA would need to contemplate whether to
9 defer planned maintenance, cancel all active capital projects, and/or freeze the expansion
10 of operations to stay financially solvent. (PWSA St. No. 2-R at 4). Mr. Barca stated that
11 the PUC should not consider accepting the OCA's recommendations. (PWSA St. No. 2-R
12 at 4-5).

13 **Q. DID MR. BARCA AND MS. FAY ATTEMPT TO RECONFIGURE YOUR**
14 **REVENUE REQUIREMENT RECOMMENDATION TO SUPPORT THEIR**
15 **CLAIM THAT IT IS INSUFFICIENT FOR PWSA?**

16 **A.** Yes. Mr. Barca claims that the financial metrics in my direct testimony are inaccurate
17 because, according to him, my position actually results in a 1.44x senior debt coverage
18 level and 1.05x total debt service coverage and produces only 206.9 days cash on hand
19 (DCOH). (PWSA St. No. 2-R at 3-4). Ms. Fay makes similar claims with a slightly
20 different DCOH calculation in that she alleges my recommended revenue requirement and
21 related adjustments drops the senior debt service coverage to 1.44x and the total debt
22 service coverage to 1.05x in violation of the Authority's rate covenant and drops the DCOH
23 to an unacceptable level of 203. (PWSA St. No. 9-R at 3).

24 **Q. WHAT IS YOUR RESPONSE TO MR. BARCA AND MS. FAY'S CLAIMS**
25 **ABOUT YOUR RECOMMENDED REVENUE REQUIREMENT AND**
26 **FINANCIAL METRICS?**

27 **A.** Mr. Barca and Ms. Fay's attempts to recalculate my revenue recommendation and the
28 resulting conclusions are faulty because they rely upon the assumption that none of the
29 adjustments I made are appropriate, and that PWSA must be awarded the full level of rate
30 increase request. As I explained in my Direct Testimony, PWSA is responsible to
31 substantiate all of its claims in this case, and where it did not do so, I recommended

1 adjustments. (OCA St. 1 at 17). While Mr. Barca and Ms. Fay may not agree with my
2 adjustments, their attempt to mischaracterize my position produces skewed financial
3 metrics that fail to account for the totality of my recommendations.

4 **Q. DOES MS. FAY ARGUE THAT THE OCA IS NOT FAIRLY CONSIDERING**
5 **PWSA’S STATUS AS A CASH-FLOW UTILITY?**

6 **A.** Yes. Ms. Fay claims that while the Intervenors would undoubtedly support granting a for-
7 profit company a rate increase that includes a “rate of return” that would permit the firm to
8 maintain and attract capital, they have opposed the Authority obtaining an adequate “rate
9 of return for reinvestment” back into the system. (St. No. 9-R at 4). Ms. Fay claims that the
10 OCA’s proposal, which is \$14.9 million less than the Authority’s requested rate increase,
11 violates the Authority’s required rate covenant. She alleges that “the Intervenors’
12 consistent objection to the level of proposed rate increase in each filing situation has had
13 the effect of disrupting PWSA’s planning and implementation of operational, maintenance,
14 regulatory and supervisory improvements. (PWSA St. No. 9-R at 6). Ms. Fay claims that
15 the OCA’s revenue requirement recommendations would require PWSA to substantially
16 cut its operating budget to a point that would seriously threaten PWSA’s ability to continue
17 to provide safe and reliable services in order to achieve sufficient net operating revenue to
18 meet the Additional Bond Test (ABT). (PWSA St. No. 9-R at 7).

19 **Q. HOW DO YOU RESPOND TO MS. FAY’S CLAIMS?**

20 **A.** Setting rates for service under a cash flow method is not unique. Applying the same basic
21 ratemaking principles to that of a traditional Rate Base/Rate of Return methodology still
22 requires the finding of known and measurable (justified based upon the documentation and
23 evidence provided through discovery), prudent in nature (judged by the reasonableness and
24 based upon information received) and used and useful (whether costs that are incurred to
25 provide utility services are useful to ratepayers) expense and components. In order to allow
26 recovery of expenditures and costs components, PWSA should show that these
27 expenditures and costs components are realistic and a necessary part of its normal day to
28 day operations. There is a degree of interpretation involved when reviewing forecasted
29 data, and various levels of interpretations can vary among the parties to the proceeding,
30 which will ultimately be determined by the Commission when setting rates for service. Mr.

1 Barca and Ms. Fay claimed that my recommended revenue requirement will not provide
2 PWSA with the necessary resources to provide safe and reliable water services and stay
3 financially solvent, but my analysis demonstrates that the opposite is true. PWSA's rates
4 should be set sufficiently to cover all of its known and measurable costs and provide
5 sufficient cash on hand to meet its day to day obligations. Ratemaking concepts, including
6 those that are set under a cash flow method, do not provide for 100% guaranteed recovery
7 of all costs and expenditures. It provides for the opportunity and the ability to recover all
8 of a utility's known and measurable costs using good, sound management techniques and
9 proper operational approaches in order to provide utility service to ratepayers. The OCA's
10 recommendation is reasonable and will allow PWSA to remain financially secure while
11 ensuring that customers are not paying unjust and unreasonable rates.

12 **II. REVENUE REQUIREMENT ISSUES**

13 **A. Direct Operating Expenses – Overview**

14 **Q. DOES MS. FAY ARGUE THAT INTERVENORS MAY JEOPARDIZE PWSA'S**
15 **OPERATIONS IF THEY ARE WRONG ABOUT PWSA'S OPERATING**
16 **EXPENSES?**

17 **A.** Yes. Ms. Fay claims that if PWSA's expenses are higher than OCA's recommended
18 expenses, critical operations would not be funded, maintenance would not be
19 accomplished, certain projects would have to be cancelled and/or delayed, additional
20 regulatory efforts would be disrupted, and the operational level of service would be
21 reduced.

22 **Q. DOES MS. FAY ALSO MAKE CLAIMS ABOUT THE RESULT THAT WOULD**
23 **OCCUR IF PWSA'S EXPENSES ARE LOWER THAN IT PROJECTS AND IT**
24 **RECOVERS MORE REVENUE THAN EXPENDED?**

25 **A.** Yes. Ms. Fay opined that if expenses are much lower than PWSA budgeted for, or do not
26 entirely materialize, the Authority would simply have more funds to reduce its debt, build
27 its reserves, accelerate the timing for regulatory projects, improve the quality and level of
28 services and other operational goals, and lower its cost of doing business, among other
29 things. (PWSA St. No. 9-R at 7-8).

1 **Q. WHAT IS YOUR RESPONSE?**

2 **A.** My first response is that Ms. Fay presents a false-choice scenario in which PWSA must
3 either receive its full increase, regardless of whether ratepayers overpay for service, or
4 PWSA's operations will decline and impact service. Aside from the fact that Ms. Fay
5 ignores other options in between, including that PWSA can always seek additional rate
6 relief as needed, her argument is flawed in several other respects. In reviewing projected
7 and prospective costs, one must review historic costs to determine whether the Authority's
8 projections are reasonable in nature and prudent. Ms. Fay's interpretation is based upon
9 her opinion and based upon PWSA not recovering all of its projected expenditures, which
10 is an unreasonable and arbitrary approach. PWSA always has the ability to re-evaluate its
11 financial position and cash flow needs in future years and can seek further rate adjustments
12 as its business situation may require at that time. PWSA should not be permitted to over-
13 collect its expenditures simply because it is a cash flow utility. Ms. Fay's approach in
14 setting rates for service by using over-collected cash for other purposes such as reducing
15 debt, building its reserve and accelerating the timing of regulatory projects among other
16 things, are contrary to basic ratemaking principles of reasonableness. PWSA should not
17 use excess ratepayer monies to fund other areas of its operations. Ms. Fay's approach
18 shows a lack of understanding of regulatory concepts as any potential over-recoveries
19 should be refunded back to ratepayers.

20 **Q. HAS THE AUTHORITY PROVIDED ADEQUATE EVIDENCE TO SUPPORT ITS**
21 **REQUEST AND TO ESTABLISH THE REASONABLE AND APPROPRIATE**
22 **EXPENSES THAT SHOULD BE USED TO SET FORWARD LOOKING RATES?**

23 **A.** No. For the expenses I have adjusted, the Authority has not identified specific increases in
24 costs, nor provided detailed information as to why costs have increased. As I stated
25 previously, setting rates for service should be supported by costs that are known,
26 measurable, used and useful and prudent in nature. PWSA has provided insufficient detail
27 regarding the actual and projected balances on which the Authority has based its claim for
28 its proposed revenue requirement increase. I reviewed prior historical balances and used
29 my judgment and my ratemaking experience to evaluate whether the cost adjustments from
30 the HTY, the FTY and FPFTY budget balance were reasonable adjustments, reliable in
31 nature, and prudent. In the various tabs to the PWSA COSS 2023 Rate Model, the

1 Authority has not provided any further information regarding the absence of prior costs,
2 the fluctuations of certain costs from year to year, and the need and requirement to ramp
3 up these costs in the FPFTY period. Review, examination and analysis is needed to support
4 its claims, but where I reflected adjustments to operating expenses, the Authority has not
5 provided that support.

6 **1. Financial Metrics – Debt Service Coverage / Day Cash on Hand**

7 **Q. WHAT DID MR. BARCA CLAIM REGARDING YOUR RECOMMENDED DEBT**
8 **SERVICE COVERAGE RATIOS?**

9 **A.** Mr. Barca did not agree with my recommended Debt Service Coverage (DSC). He claims
10 that OCA’s claimed senior and total debt were arrived at by pretending that PWSA will
11 incur operating expenses on a normalized level rather than on the level projected in
12 PWSA’s approved operating budget. (PWSA St. No. 2-R at 12). Mr. Barca stated that
13 OCA’s recommendation actually results in a senior DSC of 1.44x and “an equally
14 catastrophic” 1.05x total DSC, cause PWSA multiple bond covenant defaults. (PWSA St.
15 No. 2-R at 12).

16 **Q. WHAT IS YOUR RESPONSE?**

17 **A.** Mr. Barca’s argument is inaccurate, as I explained above. Mr. Barca’s argument that its
18 total level of projected operating expenses should be recovered in order to produce the
19 recommended DSC ratios proposed is unsupported by facts and unrealistic. DSC ratios are
20 akin to the traditional rate base/rate of return methodology and that through reasonable
21 adjustments to PWSA’s operating expenses, the resulting DSC are achievable and
22 attainable. Mr. Barca’s argument that OCA’s recommendation as compared to the use of
23 PWSA’s projected expenses results in less than PWSA’s recommended DSC of 1.65x is
24 also not accurate or realistic. Mr. Barca tries to manipulate the OCA’s calculation of the
25 DSC ratios to show that it is in violation of legal requirements, but acceptance of his
26 position would require a determination that PWSA is entitled to every single dollar of the
27 rate increase it has requested, and that position is simply not supported in this case.

1 **Q. WHAT DID MR. BARCA AND MS. FAY CLAIM REGARDING YOUR**
2 **RECOMMENDED DAYS CASH ON HAND (DCOH)?**

3 **A.** Mr. Barca did not agree with my recommendation of the DCOH balance. (PWSA St. No.
4 2-R at 14). Mr. Barca claimed that my recommended balance pretends that PWSA will
5 incur operating expenses on a normalized level rather than on the level projected in
6 PWSA’s approved budget. Ms. Fay stated that these levels are not acceptable as she claims
7 they inhibit PWSA’s ability to continue to grow its reserves to levels that are comparable
8 to its peers as well as to levels that the rating agencies view as favorable in their scoring
9 methodologies. (PWSA St. No. 2-R at 14).

10 **Q. WHAT IS YOUR RESPONSE?**

11 **A.** As I previously stated above, PWSA’s recovery of 100% of its projected and forecasted
12 expenditures in order to achieve its recommended DCOH is not a realistic nor a credible
13 approach. PWSA has the opportunity, *not* the guarantee of recovery, and it must
14 substantiate all claimed expenses. PWSA has the burden of proof to support all of its
15 claimed expenses. Only known and measurable costs, which are prudent in nature and used
16 and useful in utility operations should be recovered from ratepayers. The fact that PWSA
17 had its budget approved by its Board of Directors bears no weight because the rates and
18 charges will ultimately be set by the Commission which has the overall regulatory authority
19 to set rates for service.

20 **2. Overall Expenses – Expenses in the FPFTY**

21 **Q. WHAT DID MR. BARCA CLAIM REGARDING THE OVERALL EXPENSE**
22 **RECOMMENDATION OF OTHER PARTIES?**

23 **A.** Mr. Barca claims that the concerns expressed by OCA regarding variances between
24 budgeted and actual expenses require distinctions between the capital budget and the
25 operating budget. According to Mr. Barca, the operating budget contains less variances
26 between actual to budget and the capital budget contains variances due to PWSA spending
27 less than all of its capital budget in FY 2021 and FY 2022. (PWSA St. No. 2-R at 40).

1 **Q. WHAT IS YOUR RESPONSE?**

2 **A.** I will address my adjustments related to Mr. Barca's statement regarding variances below
3 for each of my recommended adjustments as needed and addressed.

4 **3. Payroll and Employee Benefits**

5 **Q. WHAT DID MR. BARCA CLAIM REGARDING YOUR ADJUSTMENTS TO**
6 **PAYROLL AND EMPLOYEE BENEFITS?**

7 **A.** Mr. Barca did not agree with my adjustments or my methodology to determine employee
8 levels and expenses related to employees. He stated that my use of a vacancy rate ratio of
9 12.61% is unreasonable. (PWSA St. No. 2-R at 44). Mr. Barca stated that my recommended
10 employee count is far less than PWSA's total employee count of 418 as of September 7,
11 2023. Mr. Barca stated that my recommendation is only \$967,185 more than the FTY
12 amount which does not allow PWSA to recover increased expenses for additional
13 employees in the FPFTY as well as seriously jeopardizing the ability to pay for health
14 insurance costs and offer a 3% cost of living adjustments to employees. (PWSA St. No. 2-
15 R at 44).

16 **Q. WHAT IS YOUR RESPONSE?**

17 **A.** Mr. Barca claimed that as of September 7, 2023, a total of 418 employees were employed
18 by PWSA. In response to OCA Set 6-5, the actual total projected employees for 2023 was
19 393 with a vacancy level of 48 and projected total projected employees of 441. Exhibit
20 DM-SR 1. This is 23 vacancy fills short of PWSA's projections as of September 7, 2023.
21 To my knowledge, PWSA never supplemented its discovery response to reflect an increase
22 in employees, so I learned of Mr. Barca's claim for the first time in his rebuttal testimony.
23 Further, PWSA has not provided any schedule or a list of new employees that were hired
24 subsequent to April 23, 2023. Exhibit DM-SR 1, Exhibit DM-SR 2. The prior employee
25 count has shown vacancies in all of the years 2020 through 2023. It also appears that PWSA
26 is struggling to hire and retain employees and the use of a vacancy rate ratio is reasonable
27 given the inability to fill vacancies in prior years. Employee vacancies are inherent in all
28 companies including utilities in that in any given period, employees retire, voluntarily and
29 involuntarily leave the company and certain positions are eliminated. With respect to

1 PWSA's offer of a 3% cost of living increase, I accepted PWSA's cost of living increase
2 as shown in response to OCA Set 6-12. Exhibit DM-SR, 3. My vacancy rate adjustment
3 reflects the level of employees and employee count with current salaries and benefits.

4 **4. Drag Bucket**

5 **Q. WHAT DID MR. BARCA CLAIM WITH RESPECT TO YOUR ADJUSTMENT**
6 **RELATED TO PWSA'S DRAG BUCKET COSTS?**

7 **A.** Mr. Barca did not agree with my normalizing the cost of the Drag Bucket over a two year
8 period or \$368,100 annually. (OCA St. No. 1 Exhibit DM-11). He stated the full amount
9 of the claimed expense should be granted and that prior costs were repurposed to Flow
10 Monitoring to better track costs which were charged to a different account. (PWSA St. No.
11 2-R at 46). Mr. Barca stated that a new contract will be procured in the coming months and
12 that not providing PWSA with the funds to fulfill this contract will force PWSA to cancel
13 agreed upon commitments. (PWSA St. No. 2-R at 46).

14 **Q. WHAT IS YOUR RESPONSE?**

15 **A.** PWSA has not provided the new contract, nor identified the vendor, nor provided the
16 effective date of this new contract and when it will be in place in and become effective.
17 More than speculation is needed to substantiate PWSA's claim. PWSA argues that these
18 forecasted costs will be realized without providing any evidence. Prior costs, whether
19 accounted for in another account or repurposed, did not rise to the level of costs proposed
20 in the FPFTY period. In Account 5370 (Operating Contracts Other) (Tab 931) PWSA
21 proposed \$0 in 2020, \$0 in 2022 and \$790,230 in 2023. This results in an average cost of
22 about \$263,000 annually. $(\$0 + \$0 + \$790,230 / 3)$. PWSA's argument that not providing
23 these funds to fulfill this contract will force PWSA to cancel its commitments is without
24 merit as PWSA has not provided any evidence to show it actually entered into a contract
25 with a vendor. In the absence of support for PWSA's full claim normalization is a
26 reasonable approach to recover these costs in the FPFTY period.

1 **5. Line Televising**

2 **Q. WHAT DID MR. BARCA CLAIM WITH RESPECT TO YOUR ADJUSTMENT**
3 **RELATED TO PWSA’S LINE TELEVISIONING COSTS?**

4 **A.** Mr. Barca stated that he did not agree with my two-year average. He stated that I failed to
5 recognize that the account for these costs was changed in FY 2023 and these costs did exist.
6 Mr. Barca claimed that PWSA will incur such costs in the FPFTY and Forecasted Period
7 as projected and cutting the claim in half would deny PWSA the opportunity to recover
8 costs that it will incur in the FPFTY and the Forecasted Period. (PWSA St. No. 2-R at 48).
9 Mr. Barca provided a schedule showing that Line Televising costs were \$625,515 in 2020,
10 \$611,252 in 2021 and \$703,814 in 2022. Mr. Barca showed a balance of \$184,561 in FY
11 2023 (PWSA St. No. 2-R at 48).

12 **Q. WHAT IS YOUR RESPONSE?**

13 **A.** Prior costs related to Line Televising were accounted for in Account 7383 (Professional
14 Services Other) Tab 931. PWSA booked \$827,202 in 2020, \$1,700,159 in 2021 and
15 \$1,939,374 in 2022. PWSA reduced this balance by \$1,305,374 and booked a balance in
16 2023 of \$633,750. (OCA Set 18-24). PWSA has not provided a breakdown as to what level
17 of costs are included in Account 7383 that is related to Line Televising. However, Mr.
18 Barca indicated that these costs in prior years were \$625,515 (2020), \$611,252 (2021) and
19 \$703,814 (2022), and \$184,561 in 2023. Mr. Barca provided no further information related
20 to a new contract as to when it is to be procured in the coming months, nor has he provided
21 the name of the vendor, nor has he provided the effective date of the new contract. Whether
22 existing costs were incurred in prior years, no other information was provided but for the
23 response to OCA Set 18-24. In the absence of support for PWSA’s full claim, normalizing
24 this projected expense is a reasonable approach to recover these costs in the FPFTY period.

25 **6. Rate Case Expenses**

26 **Q. WHAT DID MR. BARCA CLAIM REGARDING YOUR ADJUSTMENT TO THE**
27 **AUTHORITY’S RATE CASE EXPENSES?**

28 **A.** Mr. Barca claimed that my normalization of rate case expenses is not appropriate since the
29 Authority is a cash flow utility, and that the Authority must have the full amount to

1 purchase any item or service and recovering these costs over multiple years is not an option.
2 (PWSA St. No. 2-R at 51).

3 **Q. WHAT IS YOUR RESPONSE?**

4 **A.** For regulated utilities in Pennsylvania, it is appropriate to normalize rate case expenses,
5 regardless of whether the utility operates under a Rate Base/Rate of Return methodology
6 or under a Cash Flow Methodology. It is also appropriate to normalize these types of costs
7 over a period of time and not solely within the current period, as these costs benefit future
8 periods. My recommendations remain the same. The mere fact that PWSA is a cash flow
9 utility is not a reason to recover the full amount of the claimed rate case expense over a
10 single period, as this will have the effect of over-collecting these costs in future periods
11 without having a base rate case proceeding before the Commission.

12 **7. COVID-19**

13 **Q. WHAT HAS MR. BARCA CLAIMED WITH RESPECT TO THE AUTHORITY'S**
14 **POSITION ON THE COVID-19 EXPENSE CLAIM?**

15 **A.** Mr. Barca stated that he did not agree with my recommendation to recover these COVID-
16 19 costs over a 24-month period. He stated that PWSA voluntarily deferred the recovery
17 of COVID-19 expenses in the last rate case to lessen the burden on ratepayers given the
18 grim economic conditions of the pandemic. (PWSA St. No. 2-R at 52). As a cash flow
19 utility, he claims that it was an enormous burden to have to fund these expenses but to defer
20 receiving the cash necessary to pay them. (PWSA St. No. 2-R at 52).

21 **Q. WHAT IS YOUR RESPONSE?**

22 **A.** My recommendation remains the same. I do not believe that reducing the COVID-19
23 balance and requesting recovery of these expenses over a two-year period or \$131,608
24 annually constitutes an enormous burden to fund these expenses. By not amortizing these
25 costs and allowing recovery of the full amount of \$263,215 annually, it would have the
26 effect of over-collecting these costs until PWSA files its next base rate case proceeding.
27 My recommendation to amortize these costs is a reasonable approach to permit recovery
28 of the expense in a way that recognizes that they are not expenses that should be an ongoing

1 part of PWSA’s rates. PWSA’s request to recover the full amount annually is not a
2 reasonable approach.

3 **8. Normalization / Various Adjustments**

4 **Q. WHAT DID MR. BARCA CLAIM REGARDING YOUR NORMALIZATION**
5 **ADJUSTMENTS AND VARIOUS OTHER ADJUSTMENTS?**

6 **A.** Mr. Barca did not agree with my various normalization adjustments to PWSA’s projected
7 expense categories. Mr. Barca claimed that this approach may be reasonable when it is
8 applied to an investor-owned utility that is regulated on a rate or return/rate base basis, but
9 for several reasons, is not reasonable for PWSA. (PWSA St. No. 2-R at 57). Mr. Barca
10 stated that PWSA is in a dynamic, ramp-up mode and using historical data to condemn
11 future projections amounts to a repudiation of the Authority’s efforts to repair the
12 negligence and inadequacies of the past. Mr. Barca claims that if PWSA is held to historic
13 spending levels for ratemaking purposes, it will be forced to reduce the levels of
14 expenditures to those levels and will not be able to accomplish key projects and initiatives.
15 (PWSA St. No. 2-R at 57). Mr. Barca stated that unlike investor-owned utilities, PWSA
16 has asked for no increment above the revenues it needs to fund its operating budget to be
17 able to attain financial indicators that would be consistent with its peer utilities. Finally,
18 Mr. Barca argues that unlike an investor-owned utility, if PWSA does encounter
19 unforeseen circumstances and is unable to expend all of its FY 2024 budget funding
20 provided in rates, that 100% of the revenues PWSA collects from customers is retained by
21 PWSA and will be used to support the Authority’s continued operations in a safe and
22 reasonable manner and will not go to shareholders or an owner. (PWSA St. No. 2-R at 58).
23 Mr. Barca then began to address each of my recommended normalization adjustments
24 beginning with Vehicles (PWSA St. No. 2-R at 54) and ending with Landscaping and
25 Grounds (PWSA St. No. 2-R at 57).

26 **Q. WHAT IS YOUR RESPONSE?**

27 **A.** I am addressing the use of normalization overall as a basis for setting rates for service. My
28 arguments for normalizing certain adjustment components are the same as discussed in my
29 direct testimony. The use of normalizing and averaging certain expense adjustments is an
30 appropriate method to set rates prospectively (FPFTY 2024). Past spending trends are a

1 good indicator of future needs and requirements. Abnormalities, fluctuations and variations
2 are among the reasons to normalize costs because it smooths out costs and provides for a
3 consistent and steady recovery. In periods where the Authority has not booked costs nor
4 documented any prior expense, it is difficult to measure or assess what level should be
5 considered reasonable and appropriate. Costs must be incurred continuously and be
6 recurring going forward, and the Authority has not provided any specific reason why
7 certain accounts did not have costs in prior periods but will have costs in future periods.
8 The test is the FPFTY period 2024, and the recovery of costs should be used for that
9 specific period only, and any over-recovery of costs in the FPFTY 2024 is not an
10 appropriate approach to set rates for service. This is the main reason for normalization, to
11 prevent over-recovery or over-collection of expenses in future periods. Over-recovery of
12 expenses comes at the expense of ratepayers as rates have already been set by the
13 Commission, and ratepayers will be harmed in being charged unreasonable rates.

14 The Authority has the opportunity to recover all of its prudent and known costs to provide
15 safe and reliable utility service. It is not guaranteed to recover all of its costs based on a
16 capital plan or budget for ratemaking purposes, and it must support all claimed expenses,
17 not merely be entitled to recover any claimed cost simply by alleging that terrible things
18 will occur if it is not awarded every dollar requested . In PWSA Statement No. 2-R at 57,
19 Mr. Barca stated that PWSA is in a dynamic ramp-up mode in order to repair the neglect
20 and inadequacies of the past. In other words, there was little or no investment in the systems
21 for a significant amount of time while PWSA was not a jurisdictional utility. PWSA was
22 previously controlled by the City of Pittsburgh and governed by a Board of Directors to
23 oversee the strategic direction of PWSA's operations. The Board of Directors still approves
24 PWSA's annual operating and capital budget, however it is the Public Utility Commission
25 that determines what rates are just and reasonable not the Board of Directors in deciding
26 the annual operating and capital budget. Even during a ramp up period, it remains
27 reasonable and appropriate to use normalization and to review historical data in the
28 development of rates going forward, and that is true even putting aside evidence in this
29 case that PWSA's capital budget is consistently over projected and that its case now is built
30 on the claim that it will double that budget .

1 **Q. DOES PWSA’S STATUS AS A CASH-FLOW UTILITY ENTITLE IT TO HAVE A**
2 **FINANCIAL CUSHION AT THE EXPENSE OF RATEPAYERS?**

3 A. No. PWSA should not have any incremental revenues above the revenues it needs simply
4 because under a cash flow basis of ratemaking, revenues equal expenses. PWSA has a daily
5 cash on hand balance of \$87,692,058 (which is akin to a rate base / rate of return cash
6 working capital balance) that it can use to cover unforeseen and unexpected expenditures
7 during its annual operating period. PWSA St. No. 2, pp. 39-40). This is PWSA’s cushion,
8 and I also note that PWSA is expecting an operating surplus of about \$6 million for 2023
9 (PWSA St. No. 9, Exh. CF-10, p. 4). Additionally, PWSA’s claims ignore that when rates
10 for service are set, they are neither the highest rates nor the lower rates, but rather a
11 reasonable rate that is set by the Commission based on evidence that rates are based on
12 reasonable and prudent costs of the utility. In this regard, there is no difference whether
13 Rate Base / Rate of Return or Cash Flow Methodology is being applied. Using either
14 methodology, it is not appropriate for PWSA to recover all prior deferred maintenance
15 costs in this one instant proceeding. This approach creates an unnecessary burden on
16 ratepayers and an undue hardship. PWSA should not have unfettered access to ratepayer
17 money without costs being justified, prudent and used and useful in nature. The
18 Commission should also take into consideration the ratemaking principle of gradualism in
19 permitting PWSA to recover increased costs over several years or through a number of rate
20 case proceedings.

21 **9. Inflation Factors**

22 **Q. WHAT DID MR. BARCA CLAIM REGARDING YOUR REMOVAL OF**
23 **INFLATION FACTORS?**

24 A. Mr. Barca did not agree with my characterization of projections as a blanket generalized
25 inflation adjustment. (PWSA St. No. 2-R at 67). Mr. Barca claimed that I attempted to
26 characterize PWSA’s adjustment as blanket inflation adjustment applied to numerous
27 expense claims, which is not what PWSA did. Mr. Barca stated that PWSA expects all
28 expenses/costs to increase from the FTY to the FPFTY. Mr. Barca stated that PWSA’s
29 budget process was derived through a comprehensive Authority-wide budgeting process.

1 PWSA used a zero-based budgeting method ¹ to develop annual budgets (PWSA St. No.
2 2-R at 67). This is in contrast to a traditional budgeting approach in which an escalation
3 factor is applied for an anticipated increase in a specific type of cost. (PWSA St. No. 2-R
4 at 67). Mr. Barca stated that for the utility industry and the Construction Cost Index,
5 escalation factors show that the requested 6% inflation adjustments are more in line with
6 this index. (PWSA St. No. 2-R at 70).

7 **Q. WHAT IS YOUR RESPONSE?**

8 **A.** First, it is important to note that PWSA did not truly utilize zero-based budgeting, as Mr.
9 Barca claims. While PWSA may have prepared its budget under a zero based budgeting
10 process for the 2020, 2021, 2022 and 2023, it did include an inflation factor or CPI index
11 to adjust and set the balances in FPFTY 2024, and in its FY 2025 and FY 2026 rate years
12 which is typically used under a traditional-based budgeting process. In setting rates for
13 utility service, costs should be prudently incurred, and known and measurable, regardless
14 of the test period utilized. I believe that general inflationary type expense adjustments do
15 not provide a true picture of cost increases (or decreases) because these types of general
16 adjustments apply to a general basket of goods and services and may or may not be accurate
17 adjustments for the costs of the specific goods and services incurred by the Authority.
18 While these types of cost adjustments are appropriate for economic data, they should not
19 be used to set rates under a ratemaking methodology, for ratemaking purposes. Inflationary
20 cost adjustments cannot be precisely determined because there is no way to pinpoint a
21 particular cost and determine whether that particular cost has been affected by the use of a
22 Consumer Price Index (CPI) adjustment. In response to OCA Set 6-12, I asked PWSA to
23 provide all inflation and CPI indices that the Authority used to develop its FPFTY 2024
24 revenue requirement increases. I also asked PWSA to provide the sources that it relied
25 upon to determine the rate of inflation. PWSA only provided various inflation factors and
26 indices with no further evidence to show where these factors were derived. In rebuttal, Mr.
27 Barca provided a site related to construction costs (Engineering News-Record) (PWSA St.
28 No. 2-R at 70). In PWSA 2023 COSS model, PWSA increased most if not all of the
29 expenses by an inflation factor of either 20%, 15% or 6%, which , does not particularly

¹ [Zero-Based Budgeting vs Traditional Budgeting: Pros and Cons \(linkedin.com\)](#)

1 constitute a true zero-based budgeted method, but rather a traditional budget approach or a
2 hybrid of both budget approaches (PWSA St. No. 2-R at 67). The Authority has not
3 provided any further information related to cost increases beyond its response to OCA-Set
4 6-12, and what has been provided in rebuttal. The proposed 6% increase identified and
5 related to all other operating expenses, does not solely include construction costs, but rather
6 administrative type related expenses which are not construction related expenses. My
7 recommendations remain the same. These are clearly blanket-type adjustments and do
8 overstate the expense claims in the FPFTY 2024 test year period.

9 **Q. WHAT DID MR. PICKERING CLAIM REGARDING ADJUSTMENTS TO**
10 **INFLATION?**

11 **A.** Mr. Pickering stated that given the recent inflation trends, it is reasonable and sensible to
12 incorporate a 6 percent inflation factor into PWSA’s cost projections. (PWSA St. No. 1-R
13 at 4). Mr. Pickering stated that to the extent the trends do not continue at that level, PWSA
14 will have more funds available to invest back into the system for the benefit of ratepayers,
15 to pay down debt or to delay future base rate increase requests. (PWSA St. No. 1 -R at 4).

16 **Q. WHAT IS YOUR RESPONSE?**

17 **A.** Mr. Pickering’s projection of a 6% inflation trend is unreasonable and not reflective of
18 what level of inflation is being incurred now and what is projected to be when new rates
19 are set by the Commission. ² According to the Congressional Budget Office (CBO),
20 inflation is projected to slow gradually in 2023 as pressures ease from the factors that have
21 caused demand to grow more rapidly than supply in recent years. CBO projects inflation
22 as measured by the price index consumption expenditures (PCE) will be 3.3% in 2023 and
23 2.4% in 2024. The price index for consumption expenditures is expected to continue to
24 decline thereafter approaching the Federal Reserve’s long-run goal of 2 percent by 2026.
25 Mr. Pickering’s 6% inflation proposal does not reflect what is being incurred in today’s
26 economic outlook. Mr. Pickering’s approach to use excess dollars to invest back into the
27 system is inappropriate and contrary to ratemaking principles. Mr. Pickering’s approach to
28 use over-collected dollars to fund other PWSA’s operations does not follow the “safe and
29 reliable utility service at reasonable rates” fundamental principles of ratemaking. Any

² [The Economic Outlook for 2023 to 2033 in 16 Charts | Congressional Budget Office \(cbo.gov\)](https://www.cbo.gov/publications/2022/07/the-economic-outlook-for-2023-to-2033-in-16-charts)

1 over-recovery of dollars collected by PWSA would be difficult to refund to customers
2 when new rates are set by the Commission.

3 **10. Chemical Expenses**

4 **Q. WHAT DID MR. BARCA CLAIM REGARDING YOUR ADJUSTMENTS TO**
5 **CHEMICAL EXPENSES?**

6 **A.** Mr. Barca did not agree with my proposed 6.8% chemical inflation adjustment, stating this
7 is still below the most recent levels for the Construction Cost Index and the increases that
8 PWSA is experiencing. (PWSA St. No. 2-R at 70). Mr. Barca stated that a bid was released
9 and ultimately signed by a supplier but was terminated through force majeure as a result of
10 chemical shortage and supply chain issues. PWSA will look to rebid the chemicals when
11 the market returns to normal. (PWSA St. No. 2-R at 71).

12 **Q. WHAT IS YOUR RESPONSE?**

13 **A.** Unless PWSA can provide further information related to its Chemical expenses, I am
14 continuing to recommend a 6.8% adjustment to PWSA Chemical costs. I am still of the
15 opinion that PWSA's proposed 20% increase is excessive and not reasonable. Supply
16 Chain issues have relaxed a bit since PWSA filed its rate case proceeding. PWSA has not
17 supported nor provided any other documentation or evidence that a 20% increase is
18 appropriate.

19 **11. Executive Bonus**

20 **Q. WHAT HAS MR. BARCA CLAIMED REGARDING YOUR ADJUSTMENT TO**
21 **EXECUTIVE BONUS?**

22 **A.** Mr. Barca did not agree with my disallowance of the executive bonus related to the Chief
23 Executive Officer. Mr. Barca stated that the performance goals and metrics that justify the
24 bonus are determined annually and approved at the discretion of PWSA's Board of
25 Directors. (PWSA St. No. 2-R at 71). According to Mr. Barca, this incentivizes the Chief
26 Executive Officer to continue to improve overall aspects of the PWSA. Mr. Barca stated
27 that the goals to be used for the end of FY 2024 will be set early in FY 2024. Mr. Barca
28 claimed that such goals have been instrumental in supporting PWSA's improved customer
29 service, financial health and system safety and reliability. (PWSA St. No. 2-R at 71).

1 **Q. WHAT IS YOUR RESPONSE?**

2 **A.** PWSA wants the dollars to be included in rates and recovered from ratepayers, for costs
3 related to executive bonuses even though the goals and metrics will be developed in a future
4 period, particularly when new rates are set by the Commission. In order to evaluate whether
5 the executive bonus should be included in the revenue requirement equation, one must
6 determine whether those dollars benefit ratepayers in the area of customer service, safety
7 and reliability. This review should occur now and not prospectively. This is not an
8 appropriate way to evaluate whether the costs related to incentive compensation are
9 reasonable and prudent in nature. PWSA has not provided any evidence now or in the past
10 with respect to the costs associated with the bonus paid to the Chief Executive Officer, nor
11 has PWSA demonstrated that the bonus is specifically conditioned upon meeting
12 performance goals and/or metrics that produce quantifiable ratepayer benefits. Therefore,
13 I am continuing to recommend disallowance of the costs related to the Chief Executive
14 Officer in the amount of \$47,223.

15 **12. Utility Expenses – Electric and Gas**

16 **Q. WHAT HAS MR. BARCA CLAIMED REGARDING YOUR ADJUSTMENTS TO**
17 **UTILITY EXPENSES – ELECTRIC AND GAS?**

18 **A.** Mr. Barca disagreed with my adjustments related to a reduction in PWSA’s claim for
19 electricity and natural gas. (PWSA St. No. 2-R at 72). Mr. Barca stated that PWSA’s
20 electric distributor is Duquesne Light with Direct Energy/NRG being its electric supplier.
21 The prices set forth by Direct Energy for electric generation supply are not regulated by
22 the PUC with the amount that PWSA is obligated to pay being set by the contract, which
23 is attached at Exhibit EB-12. (PWSA St. No. 2-R at 72). Mr. Barca stated that PWSA has
24 experienced growth of at least 17% in electric expenses in FY 2021 and FY 2022 and
25 electric expenses are up 35% through July 31, 2023. (PWSA St. No. 2-R at 72). Mr. Barca
26 also disagreed with my adjustment to PWSA’s gas distributor – People’s Gas with Synder
27 Brothers, Inc. Synder Brothers, Inc.’s natural gas prices are also not regulated by the PUC
28 with the amount that PWSA is obligated to pay being set by the contract that is attached as
29 Exhibit EB-13. (PWSA St. 2-R at 72-73). Mr. Barca stated that PWSA has experienced
30 over 8% growth in natural gas expenses in FY 2021 and FY 2022. Mr. Barca stated that

1 under the current contract, natural gas expenses are up 3.15% through July 31, 2023, as
2 compared to the prior year as a result of increased demand. (PWSA St. No. 2-R at 73).

3 **Q. WHAT IS YOUR RESPONSE?**

4 **A.** I reviewed PWSA’s attachments EB-12 and EB-13 related to the contracts for electricity
5 and gas, respectively. These contracts were dated May 18, 2021/July 1, 2021 (Electric Page
6 8 and 9 of 9) and May 25, 2017 / February 5, 2021 (Gas page 10 and 11 of 11). I am unable
7 to verify the claimed costs in the FPFTY 2024 as the contract for electric shows annual
8 historical usage and an approximation based upon best estimation (Electric) and various
9 monthly contract quantities and service addresses with a fixed price of \$2.50 / City Gate –
10 DTH (Gas). It is difficult to discern or calculate what PWSA may be obligated to pay under
11 the terms of the Electric and Gas contracts. PWSA has failed to provide actual invoices
12 that show the actual costs to date for both electric and gas utilities, I am still recommending
13 maintaining the costs of \$6,000,000 for electric utility costs and \$360,000 for gas utility
14 costs, which is based upon actual cost incurred in 2022 of \$5,558,804 (OCA Set 18-12 and
15 PWSA COSS Model 2024 tab 322 Account 7605 and 7650 (electric and gas, respectively),
16 and applying PWSA’s 7.9% increase adjustment for its electric charges and a -2.75%
17 adjustment for its gas charges in 2023. No other information was provided but for the
18 response in OCA Set 18-12, in which PWSA stated that given the unknown of future rate
19 case results from providers, market increases that would affect PWSA’s cost, and historic
20 price increases, PWSA is assuming an annual increase of 15% per year to both electric and
21 gas costs. PWSA has not supported that its assumption is reasonable.

22 **13. Charitable Contributions / Membership Fees**

23 **Q. WHAT DID MR. BARCA CLAIM REGARDING YOUR ADJUSTMENT TO**
24 **CHARITABLE CONTRIBUTIONS AND MEMBERSHIP EXPENSES?**

25 **A.** Mr. Barca did not agree with my recommendation of disallowing \$29,118 of expenses
26 related to membership fees. He stated that these costs are not associated with charitable
27 contributions or sponsorships. Mr. Barca stated that membership fees are a legitimate
28 expense that allows PWSA and its employees to collaborate and learn from other utilities
29 and professionals. (PWSA St. No. 2-R at 73).

1 **Q. WHAT IS YOUR RESPONSE?**

2 **A.** Mr. Barca’s claims are not accurate, and the only adjustments I made were not to
3 memberships such as AWWA, but to organizations where membership was either only
4 partly based, or not at all based upon service benefits to customers. More specifically, in
5 response to OCA Set 6–19, I asked PWSA to provide a schedule of charitable
6 contributions, sponsorships, membership dues, civic donations, and other related costs. My
7 adjustments or disallowances relate to the following:

8	African American Chamber of Commerce	\$664
9	Allegheny Conference of Community Development	\$4,782
10	Isle, Inc.	\$11,954
11	NACWA	\$9,271
12	PA. Municipal League	\$86
13	PA Rural Water Association (50% disallowed)	\$634
14	PA Municipal Authority Association (50% disallowed)	<u>\$1,727</u>
15	Total	\$29,118

16 These types of costs do not represent membership fees, but rather civic donations,
17 sponsorships, and other philanthropic expenses. As indicated above, I am allowing for 50%
18 recovery of certain expenses where at least some of the expense appears to provide a
19 service-based benefit to ratepayers, but I disallowed expenses that did not appear to have
20 any service-based benefits. It is important to recognize that PWSA did not provide a
21 detailed breakdown to substantiate benefits to ratepayers and that none of the expenses I
22 disallowed appeared to be related to the provision of utility service. For example, the
23 African American Chamber of Commerce is an organization that supports the economic
24 empowerment and growth of African-American businesses; the Allegheny Conference of
25 Community Development improves Pittsburgh regions economic future and quality of life;
26 Isle, Inc. provides for a healthy work-life balance and a positive team oriented atmosphere
27 and supports human growth and recognized the value of second chances; NACWA
28 represents the interest of public clean water utilities and serves as the advocate voice on
29 behalf of clean water sectors and legislative, regulatory and legal advocacy; PA Municipal
30 Association is a non-profit organization that represents 3rd class cities and shares policy
31 interests, legislative advocacy and municipal services; PA Rural Water Association
32 represents and works with industries to support water and wastewater utilities in training,
33 legislative representation and protects communities on economic health and; PA Municipal

1 Authority Association represents and assists authorities in providing services to protect the
2 environment and advocates for favorable legislation and proposals and provides for
3 economic vitality. In the absence of support for each of PWSA's claims here, my
4 adjustments represent my best attempt to permit PWSA recovery of expenses that provide,
5 either in whole or in part, service-based benefits.

6 **14. Lobbying**

7 **Q. WHAT DID MR. BARCA CLAIM REGARDING YOUR DISALLOWANCE**
8 **RELATED TO LOBBYING EXPENSE?**

9 **A.** Mr. Barca stated that while he understands the Commission's general rule with respect to
10 lobbying, he submits the amount of \$98,262 is reasonable for PWSA. PWSA is a municipal
11 authority and has an obligation to maintain lines of communication with other parts of
12 government. (PWSA St. No. 2-R at 74). Mr. Barca stated that since PWSA has no
13 shareholders, all of PWSA's lobbying efforts accrue to the benefit of customers and
14 believes that lobbying expenses should be deemed a reasonable pro forma expense for
15 PWSA. (PWSA St. No. 2-R at 74). Mr. Barca stated that the Commission should depart
16 from its general rule for lobbying expenses and stated that he was informed by counsel that
17 the PUC can waive provisions of the Public Utility Code if such a waiver would be
18 reasonable considering PWSA's special circumstances. (PWSA St. No. 2-R at 75).

19 **Q. WHAT IS YOUR RESPONSE?**

20 **A.** I continue to recommend disallowance of lobbying expenses from the revenue requirement
21 calculation. These types of costs do not benefit ratepayers and PWSA has not provided any
22 evidence that these costs do, nor has it supported the position that it must fund a lobbyist
23 to get legislative and regulatory updates. Regardless of whether or not PWSA has
24 shareholders is irrelevant, these types of costs are not an appropriate expense to be included
25 in the provision of utility services. Further, PWSA has not provided a special circumstance
26 surrounding PWSA's ratemaking development and PWSA did not provide any reason to
27 warrant for such treatment. Since these costs are not justified or reasonable, they should
28 not be recovered from ratepayers, as PWSA would have to determine how these amounts
29 should be expensed.

1 **15. Bad Debt Expenses**

2 **Q. WHAT HAS MR. BARCA STATED REGARDING YOUR ADJUSTMENTS TO**
3 **BAD DEBT EXPENSE?**

4 **A.**Mr. Barca stated that I am not challenging the percentages or collection rates that were
5 used to develop the Bad Debt Expense, but rather my recommended Bad Debt Expense is
6 related to the level of revenue requirement. (PWSA St. No. 2-R at 78).

7 **Q. WHAT IS YOUR RESPONSE?**

8 **A.**I am in agreement with Mr. Barca’s characterization of the development of Bad Debt
9 Expense in that the differences between PWSA’s and my recommended level is based upon
10 the recommended revenue requirement increase used to develop the Bad Debt Expense.
11 These adjustments are considered flow through adjustments.

12 **Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?**

13 **A.**Yes, it does.

**Response of the Pittsburgh Water and Sewer Authority (“PWSA”)
to the Interrogatories of the Office of Consumer Advocate (“OCA”), Set VI**

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-VI-5 Please prepare a vacancy rate analysis by employee group (Union / Non-Union Employees, Supervisory / Management, Executive) for the periods FY 2020 through the projected FY 2024, and for the projected FY 2025 – FY 2026. Please provide an explanation of the yearly vacancy rate adjustments for the periods required.

Response: See attachment OCA-VI-5.

Response provided by: Edward Barca, Director of Finance

Response of the Pittsburgh Water and Sewer Authority (“PWSA”) to the Interrogatories of the Office of Consumer Advocate (“OCA”), Set VI

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-VI-25 Refer to Statement No. 2 at 18. Please reconcile the employee levels as identified by Mr. Pickering in Statement No. 1 at 26 of 393 (April 23, 2023) with Mr. Barca’s identified level of over 400 employees in PWSA St. No. 2 at p. 18.

Response: Mr. Pickering’s employee count of 393 was the exact total as of April 23, 2023. The headcount changes throughout the year. Mr. Barca’s count of over 400 was a generalization given these changes.

Response provided by: Edward Barca, Director of Finance

Date response provided: June 22, 2023

Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919

Request: OCA-VI-12 Please provide all inflation factors and CPI indexes that the Authority used to develop its FPFTY 2024 revenue requirement increase. Please also provide the same for the multiyear rate years 2025 and 2026. Please provide the operating expenses to which the inflation factors and CPI indexes are adjusted to in the 2024-2026 multiyear rate plan period. What sources did the Authority rely upon to determine its inflation factors and CPI indexes levels?

Response: See below.

SURREBUTTAL TESTIMONY OF

KARL RICHARD PAVLOVIC

**ON BEHALF OF THE
PENNSYLVANIA**

OFFICE OF CONSUMER ADVOCATE

September 22, 2023

TABLE OF CONTENTS

	<u>PAGE</u>
I. STATEMENT OF QUALIFICATIONS	1
II. PURPOSE OF TESTIMONY	1
III. DISCUSSION	
A. SUMMARY	2
B. PWSA’S PROPOSED MULTI-YEAR RATE PLAN (MYRP)	2
C. PWSA’S PROPOSED DISTRIBUTION SYSTEM IMPROVEMENT CHARGE (DSIC) CAP PERCENTAGE INCREASE	14
D. PWSA’S PROPOSED INFRASTRUCTURE IMPROVEMENT CHARGE (IIC)	17
E. PWSA’S PROPOSED CUSTOMER ASSISTANCE CHARGE (CAC)	20

1 **I. STATEMENT OF QUALIFICATIONS**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

3 **A.** My name is Karl Richard Pavlovic. My business address is 22 Brooks Avenue,
4 Gaithersburg, MD 20877.

5 **Q. ARE YOU THE SAME KARL RICHARD PAVLOVIC WHO SUBMITTED**
6 **DIRECT AND REBUTTAL TESTIMONY IN THIS PROCEEDING ON**
7 **AUGUST 9, 2023 AND SEPTEMBER 8, 2023?**

8 **A.** Yes. Exhibit KRP-1 to my direct testimony summarizes my qualifications and
9 experience.

10 **II. PURPOSE OF TESTIMONY**

11 **Q. ON WHOSE BEHALF ARE YOU TESTIFYING?**

12 **A.** I am testifying on behalf of the Pennsylvania Office of Consumer Advocate (OCA).

13 **Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?**

14 **A.** The purpose of my surrebuttal testimony is to address the rebuttal testimony of
15 PWSA witnesses Pickering, Barca, and Smith regarding PWSA's proposed Multi-
16 Year Rate Plan (MYRP) and the rebuttal testimony of PWSA witness Barca
17 regarding PWSA's proposed Distribution System Improvement Charge (DSIC)
18 increase of its water and wastewater cap percentages from 5.0% to 7.5%, proposed
19 Infrastructure Improvement Charge (IIC) and proposed Customer Assistance
20 Charge (CAC).

1 **III. DISCUSSION**

2 **A. SUMMARY**

3 **Q. PLEASE SUMMARIZE THE SUBSTANCE OF YOUR SURREBUTTAL**
4 **TESTIMONY.**

5 **A.** As detailed below, the rebuttal testimony of witnesses Pickering, Barca, and Smith has
6 given me no reason to withdraw or modify my direct testimony recommendations that the
7 Commission reject PWSA’s proposed Multi-Year Rate Plan, proposed increase of the
8 Distribution System Improvement Charge cap percentages, proposed Infrastructure
9 Improvement Charge, and proposed Customer Assistance Charge,

10 **Q. HAVE YOU PREPARED ANY EXHIBITS TO YOUR TESTIMONY?**

11 **A.** Yes. Exhibit KRP-SR is attached and it contains a schedule referenced in this testimony.

12 **B. PWSA’S PROPOSED MULTI-YEAR RATE PLAN (MYRP)**

13 **Q. WHAT WAS YOUR DIRECT TESTIMONY REGARDING PWSA’S PROPOSED**
14 **MYRP?**

15 **A.** In my direct testimony I recommended that PWSA’s MYRP be denied for among other
16 reasons, it (1) fails to include a reconciliation mechanism to periodically adjust MYRP
17 rates in order to guard against over recovery of actual expenses,¹ (2) fails to include any
18 performance metrics,² (3) fails to satisfy the Commission’s factors regarding cost and rate

¹ OCA St. 2, page 8 lines 1-12.

² OCA St. 2, page 10 lines 1-10.

1 design, customer impact, reliability and administrative efficiency,³ (4) fails to account for
2 (a) PWSA’s acquisition of water and wastewater assets from the City of Pittsburgh in 2025
3 and (b) any amendments to or termination of PWSA’s Cooperation Agreement with the
4 City of Pittsburgh in 2025,⁴ and (5) is likely to over recover capital costs because PWSA
5 has consistently failed to complete its budgeted capital projects.⁵ For all these reasons I
6 recommended that the Commission not approve PWSA’s proposed MYRP.⁶

7 **Q. DID PWSA WITNESS PICKERING ATTEMPT TO DEFEND PWSA’S MYRP IN**
8 **HIS REBUTTAL TESTIMONY?**

9 A. Yes. Mr. Pickering makes several arguments in an attempt to defend PWSA’s unsupported
10 MYRP, including (1) that the MYRP would give PWSA a level of financial security needed
11 to perform work,⁷ (2) that the MYRP would provide transparency to customers and allow
12 them to plan for the increases,⁸ (3) that PWSA will be able to avoid filing additional rate
13 cases thereby conserving its resources,⁹ (4) that the General Assembly has made a policy
14 decision to permit utilities to implement a MYRP,¹⁰ and (5) that before becoming a
15 jurisdictional utility, it was customary for the PWSA Board to approve three-year rates,
16 and PWSA customers have become accustomed to this, so this should not create any “major
17 concerns.”¹¹

³ OCA St. 2, page 10 line 19 to page 16 line 18.

⁴ OCA St. 2, page 16 line 19 to page 17 line 15.

⁵ OCA St. 2, page 17 line 16 to page 18 line 10.

⁶ OCA St. 2, page 18 lines 11-17.

⁷ PWSA St. 1-R, page 7 lines 6-9.

⁸ PWSA St. 1-R, page 7 lines 10-22.

⁹ PWSA St. 1-R, page 7 line 23 to page 8 line 16.

¹⁰ PWSA St. 1-R, page 8 line 19 to page 9 line 9.

¹¹ PWSA St. 1-R, page 11 lines 10-13.

1 **Q. WHAT IS YOUR RESPONSE TO MR. PICKERING’S CLAIM THAT THE MYRP**
2 **WOULD GIVE PWSA A LEVEL OF FINANCIAL SECURITY?**

3 A. I will largely defer to OCA Witness Mugrace on this topic, as in his surrebuttal testimony,
4 he explains how PWSA’s arguments regarding its entitlement to a financial cushion are not
5 consistent with accepted ratemaking practices in Pennsylvania. For my part, and consistent
6 with my direct testimony,¹² I do not believe that ratepayers would be protected against
7 unjust and unreasonable rates under PWSA’s MYRP proposal.

8 **Q. WHAT IS YOUR RESPONSE TO MR. PICKERING’S CLAIM THAT PWSA’S**
9 **MYRP WOULD PROVIDE CUSTOMERS WITH TRANSPARENCY AND GIVE**
10 **THEM TIME TO BUDGET FOR FUTURE RATE INCREASES?**

11 A. My response is two-fold. First, the MYRP does not provide customers with transparency,
12 because as I explained in my direct testimony, there is no process identified that would
13 require PWSA to substantiate future rates for FY 2025 and FY 2026 to protect customers
14 from overpaying, or to reconcile any potential overpayments and to provide refunds. As I
15 explain below, PWSA has proposed a vague and poorly defined ‘process’ for the first time
16 in the rebuttal testimony of witnesses Barca and Smith that does not in any meaningful way
17 correct this deficiency in PWSA’s proposed MYRP. Second, it is important to recognize
18 that even if PWSA’s MYRP did promote transparency, which it clearly does not, it is of
19 little consequence whether customers know that three consecutive years of rate increases
20 will be coming if those rates impose a financial hardship on customers.

¹² OCA St. 2, p. 10.

1 **Q. WHAT IS YOUR RESPONSE TO MR. PICKERING’S CLAIM THAT THE MYRP**
2 **WOULD CONSERVE PWSA’S RESOURCES BY ELIMINATING ITS NEED TO**
3 **FILE MULTIPLE RATE CASES?**

4 A. While it may be easier and more convenient for PWSA if it is able to lock in consecutive
5 years of rate increases in this filing, Mr. Pickering’s argument here only considers the
6 benefits for PWSA while ignoring the detriments to its customers. In my direct testimony,
7 I explained that any administrative efficiency to PWSA comes at the expense of depriving
8 the Commission and ratepayers of any oversight of the justness and reasonableness of
9 PWSA’s rate through changing circumstances. Finally, any acceptable MYRP would have
10 to be accompanied by a specific and well-designed annual review process, which PWSA
11 has not proposed, and that process could easily consume the purported conservation of
12 resources that PWSA claims here. In any case, administrative efficiency is not a basis to
13 deprive ratepayers of the Commission’s scrutiny and oversight of the rates they must pay.

14 **Q. HOW DO YOU RESPOND TO MR. PICKERING’S CLAIM THAT THE**
15 **GENERAL ASSMEBLY HAS MADE A POLICY DECISION TO ENCOURAGE**
16 **UTILITIES HAVING ACCESS TO A MYRP?**

17 A. I acknowledge that the MYRP is an available ratemaking option that utilities may pursue
18 but Mr. Pickering ignores that a utility must demonstrate that its MYRP would produce
19 just and reasonable rates. As I explained I my direct testimony, PWSA’s MYRP is deficient
20 in multiple respects and it should not be approved.¹³

¹³ OCA St. 2, pages 4-18.

1 **Q. WHAT IS YOUR RESPONSE TO MR. PICKERING’S CLAIM THAT THERE**
2 **SHOULD BE NO MAJOR CONCERNS ABOUT THE MYRP BECAUSE IN THE**
3 **PAST, THE PWSA BOARD SET 3-YEAR RATES AND CUSTOMERS SHOULD**
4 **BE USED TO IT.**

5 A. Mr. Pickering’s argument ignores the fact that PWSA is now a regulated utility subject to
6 the Commission’s ratemaking oversight. PWSA’s Board no longer sets rates, and the
7 manner in which it increased rates in the past when it was a mismanaged unregulated entity
8 is of no consequence in this case. Mr. Pickering’s claim that customers should be used to
9 multiple years of rate increases truly exemplifies that he misses the point here about the
10 need for PWSA to support its rate increases and demonstrate that any increase is necessary
11 and produces just and reasonable rates.

12 **Q. HAS MR. PICKERING ALSO SOUGHT TO DOWNPLAY SEVERAL OF THE**
13 **PRACTICAL ISSUES YOU RAISED REGARDING PWSA’S MYRP?**

14 A. Yes. In my direct testimony, I identified multiple practical reasons why PWSA is not well-
15 suited for a MYRP, including that PWSA’s first-time ownership of its system in 2025 may
16 trigger changes that are not yet identifiable and that changes to PWSA’s 2019 Cooperation
17 Agreement with the City of Pittsburgh could be made in ways that may impact rates and
18 operations after January 1, 2025.¹⁴ Mr. Pickering simply concludes that the fact that the
19 PWSA is on the path to becoming the official owner of the City’s assets, effective on
20 September 1, 2025 and that the 2019 Cooperation Agreement is set to terminate by law on
21 January 1, 2025, are not issues.¹⁵

¹⁴ OCA St. 2, page 16 line 19 to page 17 line 15.

¹⁵ PWSA St. 1-R, pp. 12-13.

1 **Q. DOES MR. PICKERING’S TESTIMONY CAUSE YOU TO CHANGE YOUR**
2 **POSITION?**

3 A. Not at all, as he has provided no analysis of his conclusion, and as I explained in my direct
4 testimony, either PWSA’s new ownership of its system in 2025 or the potential changes
5 arising when the Cooperation Agreement may be terminated in 2025 could significantly
6 impact PWSA’s costs and operations in ways that are not yet identifiable; however, the
7 convergence of both of these potentially impactful changes in FY 2025 should not be
8 dismissed.

9 **Q. YOU MENTIONED ABOVE THAT SEVERAL PWSA WITNESSES HAVE**
10 **INDICATED IN THEIR REBUTTAL TESTIMONIES THAT PWSA HAS**
11 **DETERMINED TO OFFER A REVIEW PROCESS FOR FUTURE RATES**
12 **BEFORE THEY BECOME EFFECTIVE. PLEASE EXPLAIN.**

13 A. In his rebuttal, testimony Mr. Pickering indicates, for the first time, that PWSA witness
14 Smith is proposing a 90-day proceeding in which the basic assumptions of the MYRP
15 would be evaluated and confirmed.¹⁶ In turn, Mr. Smith’s rebuttal testimony claims that he
16 always intended to support the implementation of the MYRP with safeguards, though I
17 note that his intent did not carry into his direct testimony or into PWSA’s initial rate filing.
18 In any case, Mr. Smith suggests that the Commission implement “review mechanisms
19 similar to those spelled out in the Rhode Island legislation that enables MYRP” which he
20 now indicates only require a 45-day notice of rate changes, not the 90-day identified in his
21 direct testimony. He generally indicates that the type of information required in Rhode

¹⁶ PWSA St. 1-R, p. 11.

1 Island's compliance filings depends on the nature of expenses that the utility seeks to
2 recover. Finally, Mr. Smith concludes by suggesting that all parties in this case work
3 together to design requirements of the compliance filing for PWSA's MYRP so that they
4 will strike a balance between having sufficient evidence and not making the process too
5 onerous for PWSA, noting that this should all be done fairly quickly.¹⁷

6 **Q. DO YOU SUPPORT USING THE PROCESS THAT MR. PICKERING AND MR.**
7 **SMITH RAISED AS A PATH FORWARD FOR APPROVAL OF PWSA'S MYRP?**

8 A. No. Even putting aside the fact that Mr. Pickering and Mr. Smith's vague and poorly
9 defined proposal fails to address my points that the MYRP is not supported and should not
10 be approved for multiple reasons, their proposal inappropriately seeks to put PWSA's
11 burden of support on the OCA and other parties. Compounding the many other problems
12 here, PWSA seeks to impose this burden upon other parties with very little time for them
13 to give any meaningful thought or review to this process and it would limit them to the
14 undefined and inequitable scope of whether its recommendations were not overly onerous
15 for PWSA. In short, PWSA's proposal is mainly illusory and it would provide far too little,
16 too late.

¹⁷ PWSA St. No. 7-R, pages 11-13.

1 **Q. WHAT IS THE REBUTTAL TESTIMONY OF WITNESSES BARCA AND SMITH**
2 **REGARDING PWSA’S PROPOSED MYRP?**

3 A. Responding to a series of questions that mostly mischaracterize my testimony, witness
4 Barca asserts variously (1) that Counsel informs him that PWSA’s MYRP satisfies all the
5 statutory requirements of Section 1330,¹⁸ (2) that the legislature has made the
6 determination that an MYRP is just and reasonable via Section 1330,¹⁹ (3) that performance
7 metrics are not required by statute and no witness has provided evidence that PWSA is
8 providing inadequate service,²⁰ (4) that PWSA is proposing a compliance process
9 (explained in witness Smith’s rebuttal testimony) that will permit the Commission to adjust
10 the MYRP revenue requirements and guard customers against over recovery,²¹ (5) that the
11 asset ownership transfer will have no effect on PWSA’s revenue requirement and
12 amendment or termination of the Cooperation Agreement is not expected to make a
13 material change in PWSA’s expenses,²² (6) that (a) the projected capital requirements in
14 the MYRP revenue requirements are debt service payments not the budgeted capital
15 amounts, (b) PWSA will only issue new debt for expenses actually incurred, not budgeted,
16 and (c) capital budget shortfalls do not eliminate or diminish PWSA’s capital needs,²³ (7)
17 that I did not compare the administrative burden of the MYRP to that of more frequent
18 base rate proceedings,²⁴ and (8) that I did not explain how an MYRP guarantees rates will
19 be unreasonably high compared to actual costs.²⁵

¹⁸ PWSA St. No. 2-R, page 30 lines 18-23.
¹⁹ PWSA St. No. 2-R, page 30 line24- to page 31 line 3.
²⁰ PWSA St. No. 2-R, page 31 lines 4-18.
²¹ PWSA St. No. 2-R, page 31 line 19 to page 32 line 12.
²² PWSA St. No. 2-R, page 32 line13 to page 33 line 13.
²³ PWSA St. No. 2-R, page 34 lines 18-28.
²⁴ PWSA St. No. 2-R, page 35 lines 1-4.
²⁵ PWSA St. No. 2-R, page 35 lines 5-17.

1 As I explained above, responding specifically to my testimony regarding the lack of a
2 reconciliation mechanism, witness Smith proposes that the Commission approve PWSA’s
3 proposed MYRP and order a workshop amongst the parties to arrive at review and
4 reconciliation procedures and mechanisms to be implemented regarding the proposed
5 MYRP.²⁶

6 **Q. WHAT IS YOUR RESPONSE TO WITNESS BARCA’S MYRP REBUTTAL**
7 **TESTIMONY?**

8 A. I will respond seriatim to witness Barca’s rebuttal points numbered above.

9 1. Requirements of Section 1330.

10 As I noted in my direct testimony, Section 1330 (f) defines an MYRP as “a rate mechanism
11 under which the commission sets base rates and revenue requirements for a multiyear plan
12 period and authorizes periodic changes in base rates” (emphasis added). The MYRP
13 presented in PWSA’s filing did not meet the statutory requirements because it included no
14 mechanism for periodic changes to base rates.²⁷ Further, as I explain below responding to
15 witness Smith’s rebuttal, PWSA’s proposed MYRP still does not include such a
16 mechanism.

17 2. Justness and Reasonableness of MYRP.

18 The provisions in Section 1330 do not and cannot constitute a determination that a given
19 MYRP is just and reasonable because a just and reasonable determination is reserved to
20 the Commission.

²⁶ PWSA St. No. 7-R, page 11 line 14 to page 13 line 24.

²⁷ Exhibit KRP-SR, Schedule 1 (OCA response to PWSA OCA II-3).

1 3. MYRP Performance Metrics.

2 While performance metrics are not explicitly required for an MYRP by statute, all rates
3 must be just and reasonable and performance metrics should be required in making periodic
4 changes to MYRP base rates to ensure that this standard is met.

5 4. MYRP Compliance Process.

6 As explained in my response to witness Pickering above and to Mr. Smith’s rebuttal below,
7 PWSA has not in fact substantively proposed a compliance process for its MYRP.

8 5. Asset Ownership Transfer and Cooperation Agreement.

9 With regard to the Cooperation Agreement, an expectation is a mere hope and not a
10 certainty and does not exclude the possibility of a material change in PWSA’s expenses.
11 As regards the asset ownership transfer, the Commission has previously noted PWSA could
12 be subject to a change from a cash flow ratemaking methodology to a rate base ratemaking
13 methodology which could result in more fair and reasonable rates.²⁸ Thus, witness Barca
14 cannot exclude the possibility of a material change in PWSA’s revenue requirement at the
15 time of the asset transfer and beyond, as PWSA’s entire ratemaking methodology may be
16 contested.

17 6. MYRP Revenue Requirement Debt Service Payments.

18 My response is three-fold. First, witness Barca’s assertion that only debt service payments,
19 not capital expenditures, are included in the MYRP revenue requirements speaks only to
20 the magnitude of the shortfall in actual costs versus projected revenue requirement that will

²⁸ *Implementation of Chapter 32 of the Public Utility Code Re Pittsburgh Water and Sewer Authority*, Final Implementation Order 27-28 (Order entered March 15, 2018).

1 result if not all the capital projects underlying the MYRP revenue requirements are
2 completed. Second, witness Barca's assertion that PWSA only issues debt for the cost of
3 capital projects actually completed, only underscores the possibility of a shortfall between
4 the actual costs incurred and the projected costs if not all the capital projects underlying
5 the MYRP revenue requirements are completed. Third, witness Barca's assertion that
6 capital budget shortfalls do not eliminate or diminish PWSA's capital needs, is irrelevant
7 to the question of shortfalls between actual capital costs and projected capital costs in the
8 MYRP revenue requirements. Most importantly, Mr. Barca's claims ignore the point that
9 PWSA's projections have consistently been unreliable, and they are likely to be far less
10 reliable in this filing where PWSA is seeking to double its current level of spending²⁹ and
11 to project costs out even further into the future, extending into 2026.

12 7. MYRP Administrative Burden.

13 Contrary to witness Barca's assertion, I did in fact compare the administrative burden of
14 the MYRP and more frequent base rate proceedings and contrasted that reduced burden
15 with the Commission's and ratepayers' deprivation of oversight of the justness and
16 reasonableness of PWSA's MYRP 2024, 2025 and 2026 rates.³⁰

17 8. MYRP Rates Compared to Actual Costs.

18 I did not assert in my direct testimony that the MYRP would guarantee rates will be
19 unreasonably high compared to actual costs. Rather, I only stated that unreasonably high
20 rates compared to actual costs is a likely outcome.³¹

²⁹ PWSA St. No. 2, p. 24.

³⁰ OCA St. 2, page 15 line 9 to page 16 line 18.

³¹ OCA St. 2, page 8 lines 7-12, page 10 lines 15-18 and page 18 lines 7-10.

1 **Q. WHAT IS YOUR RESPONSE TO WITNESS SMITH'S MYRP REBUTTAL**
2 **TESTIMONY?**

3 A. As I noted earlier in my response to Mr. Pickering and Mr. Smith on this issue, witness
4 Barca's assertion to the contrary notwithstanding, witness Smith does not in fact layout a
5 specific mechanism for review of actual versus projected costs in an MYRP and adjustment
6 of the MYRP rates. Nor does he incorporate such a mechanism in PWSA's MYRP as laid
7 out in his direct testimony. Instead he recommends the Commission approve the MYRP
8 and then direct the parties to devise a review and rate adjustment mechanism to be used
9 during the MYRP period. My response is that witness Smith's recommendation puts the
10 cart before the horse and imposes PWSA's burden of justifying its rates onto other parties.
11 For all the reasons I presented in my direct testimony, without a mechanism for review of
12 actual costs and adjustment of rates and demonstration that the MYRP with such a
13 mechanism satisfies the factors in 52 Pa. Code §69.3302, PWSA has presented no grounds
14 upon which to find PWSA's proposed MYRP just and reasonable.

15 **Q. HAS THE REBUTTAL TESTIMONY OF WITNESSES BARCA AND SMITH**
16 **GIVEN YOU ANY REASON TO WITHDRAW OR MODIFY YOUR**
17 **RECOMMENDATION THAT THE COMMISSION REJECT PWSA'S**
18 **PROPOSED MYRP?**

19 A. No.

1 **C. PWSA’S PROPOSED DISTRIBUTION SYSTEM IMPROVEMENT**
2 **CHARGE (DSIC) CAP PERCENTAGE INCREASE**

3 **Q. WHAT WAS YOUR DIRECT TESTIMONY REGARDING PWSA’S PROPOSED**
4 **DSIC INCREASE?**

5 **A.** In my direct testimony I demonstrated that (1) PAYGO recovery of costs via PWSA’s
6 DSIC violates the regulatory principle of ratable recovery of capital costs in violation of
7 intergenerational equity and is not a recovery option under 66 Pa. C.S. §1357 (c),³² (2)
8 increasing PWSA’s DSIC cap percentage is not PWSA’s only option for meeting PWSA’s
9 10% PAYGO Capital Expenditure policy,³³ (3) increasing PWSA’s DSIC cap percentage
10 to account for loss of purchasing power due to inflation is inconsistent with forward-
11 looking regulatory ratemaking,³⁴ (4) increasing PWSA’s DSIC cap percentage is not likely
12 to accelerate the completion rate for LTIIP projects,³⁵ and (5) PWSA presented no evidence
13 that an increase to PWSA’s DSIC cap percentage is needed to further reduce PWSA’s debt
14 ratio.³⁶ Since PWSA failed to show a need for an increase in its DSIC cap percentage, I
15 recommended that the Commission deny PWSA’s DSIC increase.³⁷

16 **Q. WHAT IS THE REBUTTAL TESTIMONY OF WITNESS BARCA REGARDING**
17 **PWSA’S PROPOSED DSIC INCREASE?**

18 **A.** First, witness Barca states that my testimony that DSIC PAYGO funding is not consistent
19 with Section 1357 (c) and violates the regulatory principle of ratable recovery of capital

³² OCA St. 2, page 23 line 17 to page 25 line 7.

³³ OCA St. 2, page 25 lines 10-21.

³⁴ OCA St. 2, page 26 lines 2-13.

³⁵ OCA St. 2, page 26 line 15 to page 27 line 7.

³⁶ OCA St. 2, page 27 line 9 to page 28 line 2.

³⁷ OCA St. 2, page 28 lines 3-8.

1 costs is spurious because OCA accepted DSIC PAYGO funding in settling PWSA’s last
2 rate case.³⁸ Second, he argues that DSIC lower cost financing, i.e., PAYGO, should be
3 part of a balanced capital funding program.³⁹

4 **Q. WHAT IS YOUR RESPONSE TO WITNESS BARCA’S DSIC REBUTTAL**
5 **TESTIMONY?**

6 A. My response is three-fold. First, I note that witness Barca does not address my testimony
7 demonstrating that PWSA does not need to increase the DSIC cap percentage in order to
8 support PWSA’s 10% PAYGO Capital Expenditure Policy, to make up for loss of
9 purchasing power dues to inflation, to accelerate the completion rate of LTIP projects or
10 to further reduce PWSA’s debt ratio. Second, the fact that OCA accepted DSIC PAYGO
11 in settlement has no precedential value. The DSIC settlement provision that “[a]ll parties
12 reserve the right to reevaluate the use of DSIC revenue for PAYGO or bond related funding
13 as part of a future base rate proceeding”⁴⁰ hardly precludes my criticizing PWSA’s DSIC
14 PAYGO in this proceeding. Particularly when DSIC PAYGO is used to support PWSA’s
15 invalid arguments for increasing the DSIC cap percentage. Third, while witness Barca
16 states that DSIC PAYGO should be part of any balanced capital funding program, he
17 provides no evidence supporting that proposition either generally or specifically regarding
18 DSIC PAYGO.

³⁸ PWSA St. No. 2-R, page 22 lines 10-17.

³⁹ PWSA St. No. 2, page 22 line 18 to page 23 line 5.

⁴⁰ PA PUC v. Pittsburgh Water and Sewer Authority, Docket P-2020-3019019, Joint Petition for Settlement, p. 6, II.A.2.e (September 30, 2020).

1 **Q. DO MR. BARCA’S CLAIMS IGNORE AN IMPORTANT FACT ABOUT THE**
2 **UNIQUE WAY THAT PWSA’S DSIC IS IMPLEMENTED?**

3 A. Yes. As I indicated in my direct testimony, PWSA’s DSIC is somewhat unique in that
4 PWSA’s water and wastewater DSICs are structured to implement a full 5% charge on the
5 first date that its new rates into effect, meaning that it will have access to that level of
6 additional revenue immediately without any ramp-up period.⁴¹ With this type of DSIC
7 revenue automatically becoming available to PWSA as new rates go into effect, it becomes
8 even more important for PWSA to established a service-based need before increasing its
9 DSIC caps.

10 **Q. IN HIS REBUTTAL TESTIMONY, DID MR. BARCA RESPOND TO YOUR**
11 **POSITION THAT PWSA HAS NOT DEMONSTRATED THAT INCREASING ITS**
12 **WATER AND WASTEWATER DSIC PERCENTAGE CAPS IS NECESSARY FOR**
13 **IT TO ENSURE AND MAINTAIN ADEQUATE, EFFICIENT, SAFE, RELIABLE**
14 **AND REASONABLE SERVICE?**

15 A. No. Witness Barca did not respond to my direct testimony on this issue, nor did he offer
16 any information to support any service-based need for PWSA to increase its water or
17 wastewater DSIC cap from 5% to 7.5%.

⁴¹ OCA St. 2, page 27 lines 2-5.

1 **Q. IN HIS REBUTTAL TESTIMONY, DID MR. BARCA RESPOND TO YOUR**
2 **POSITION THAT PWSA HAS NOT IDENTIFIED HOW INCREASING THE DSIC**
3 **CAPS TO 7.5% WILL ACCELERATE THE COMPLETION OF LTIP**
4 **PROJECTS?**

5 A. No. I note that in the continued absence of any demonstration that increased DSIC funding
6 will modify the projects and timelines that exist in its LTIP, there is no support for
7 PWSA’s claim.

8

9 **Q. HAS THE REBUTTAL TESTIMONY OF WITNESS BARCA GIVEN YOU ANY**
10 **REASON TO WITHDRAW OR MODIFY YOUR RECOMMENDATION THAT**
11 **THE COMMISSION REJECT PWSA’S PROPOSED DSIC INCREASES?**

12 A. No. The same deficiencies I identified in my direct testimony continue to exist and PWSA
13 has not supported a need for increasing its water and wastewater DSIC caps from 5% to
14 7.5%.

15 **D. PWSA’S PROPOSED INFRASTRUCTURE IMPROVEMENT**
16 **CHARGE (IIC)**

17 **Q. WHAT WAS YOUR DIRECT TESTIMONY REGARDING PWSA’S PROPOSED**
18 **IIC?**

19 A. In my direct testimony I demonstrated that (1) PWSA had provided no evidence that the
20 IIC is needed to “expedite PWSA’s ability to obtain additional low cost funding through

1 PENNVEST and WIFIA,⁴² (2) the Commission typically has limited surcharges on
2 PENNVEST recovery to smaller water and wastewater companies⁴³, (3) reconciling
3 surcharges like the IIC weaken a utility’s incentive to control costs and the costs to be
4 recovered through the IIC do not meet the three criteria for a reconciling surcharge,⁴⁴ (4)
5 PWSA’s IIC does not comply with the 52 Pa. C.S. §69.363 requirements of DEP inspection
6 and listing of the IIC as a separate line item on customer bills.⁴⁵ For these reasons I
7 recommended to the Commission reject PWSA’s IIC.⁴⁶

8 **Q. WHAT IS THE REBUTTAL TESTIMONY OF WITNESS BARCA REGARDING**
9 **PWSA’S PROPOSED IIC?**

10 **A.** Witness Barca claims (1) that in his direct testimony he did not mean that the IIC would
11 expedite PWSA’s ability to obtain low cost loans, but rather that it would expedite its
12 recovery of the loan capital costs,⁴⁷ (2) that there is no evidence that the Commission
13 typically limits PENNVEST surcharge recovery to small water and wastewater
14 companies,⁴⁸ (3) that the Commission does not use the reconciling surcharge criteria I
15 cited, but that the IIC debt service costs satisfy the “outside of utility control,”
16 “unpredictable and volatile,” and “substantial and recurring” criteria⁴⁹ and (4) that PWSA’s
17 IIC will comply with the DEP inspection and separate line item requirements of 52 Pa. C.S.
18 §69.363.⁵⁰

⁴² OCA St. 2, page 29 line 6 to page 30 line 2.

⁴³ I note that there is no policy statement regarding a surcharge for WIFIA recovery.

⁴⁴ OCA St. No. 2, page 30 lines 3-17.

⁴⁵ OCA St. 2, page 31 lines 1-3.

⁴⁶ OCA St. 2, page 32 lines 1-9.

⁴⁷ PWSA St. No. 2-R, page 36 line 21 to page 37 line 10.

⁴⁸ PWSA St. No. 2-R, page 37 lines 11-16.

⁴⁹ PWSA St. No. 2-R, page 37 line 17 to page 38 line 6.

⁵⁰ PWSA St. No. 2-R, page 36 lines 3-20.

1 **Q. WHAT IS YOUR RESPONSE TO WITNESS BARCA’S IIC REBUTTAL**
2 **TESTIMONY?**

3 A. My response is three-fold. First, I note with satisfaction that PWSA meant the IIC would
4 expedite recovery of the IIC costs, which is what it actually does, and that PWSA will
5 comply with the DEP inspection and may be willing to separately provide a billing line-
6 item to be consistent with 52 Pa. Code §69.363. However, this does not resolve the issues
7 I raised. Second, Mr. Barca misstates my position regarding small water and wastewater
8 utilities by arguing that the Commission’s Policy Statement has no limitation or condition
9 indicating that only smaller water and wastewater utilities may implement a PENNVEST
10 Surcharge. My testimony was not that the Policy Statement imposed any limitation, but
11 instead that it is my understanding that *the Commission* has historically limited any
12 surcharge on PENNVEST recovery for smaller water and wastewater companies. This is
13 still my understanding, and I will defer to OCA’s counsel to address this matter further in
14 briefing. In any case, Mr. Barca misconstrued my position on this point. Third, witness
15 Barca’s lack of awareness notwithstanding, the Commission has in fact used the “outside
16 of utility control” and “unpredictable and volatile” criteria in the context of incentivizing
17 cost control.⁵¹ As for the IIC debt service costs, they are clearly (1) controllable by PWSA
18 because they are a function of the projects PWSA chooses to fund, (2) not unpredictable
19 and volatile for the same reason, and (3) neither substantial in relation to the capital
20 amounts nor recurring in volatility.

⁵¹ *Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc.*, Final Order entered May 16, 2022 at Docket Nos. R-2021-3027385 and R-2021-3027286 at 281, 315 and 317.

1 **Q. HAS THE REBUTTAL TESTIMONY OF WITNESS BARCA GIVEN YOU ANY**
2 **REASON TO WITHDRAW OR MODIFY YOUR RECOMMENDATION THAT**
3 **THE COMMISSION REJECT PWSA’S PROPOSED IIC?**

4 A. No.

5 **E. PWSA’S PROPOSED CUSTOMER ASSISTANCE CHARGE (CAC)**

6 **Q. WHAT WAS YOUR DIRECT TESTIMONY REGARDING PWSA’S PROPOSED**
7 **CAC?**

8 A. In my direct testimony I demonstrated (1) that PWSA’s assertion that the costs to be
9 recovered through the CAC are growing and that actual costs may differ from projected
10 costs does not distinguish the costs from any other costs and provides no reason for
11 including them in a reconciling surcharge like the CAC,⁵² (2) reconciling surcharges like
12 the CAC weaken a utility’s incentive to control costs and the costs to be recovered through
13 the CAC do not meet the criteria for a reconciling surcharge,⁵³ and (3) the Commission
14 recently rejected Aqua’s universal service rider as having neither been legislatively
15 mandated nor directed by the Commission.⁵⁴ For these reasons I recommended that the
16 Commission reject PWSA’s CAC.⁵⁵

⁵² OCA St. No. 2, page 33 lines 3-15.
⁵³ OCA St. No. 2, page 33 line 16 to page 34 line 10.
⁵⁴ OCA St. No. 2, page 34 line 11 to page 35 line 7.
⁵⁵ OCA St. No. 2, page 35 lines 12-16.

1 **Q. WHAT IS THE REBUTTAL TESTIMONY OF WITNESS BARCA REGARDING**
2 **PWSA’S PROPOSED CAC?**

3 **A.** Witness Barca (1) reiterates the purported benefits of the CAC for ratepayers and PWSA⁵⁶
4 and (2) states that the Aqua Decision⁵⁷ is not controlling because PWSA as a cash flow
5 company has a greater need for cash on hand than a rate of return/rate base company.⁵⁸

6 **Q. WHAT IS YOUR RESPONSE TO WITNESS BARCA’S REBUTTAL**
7 **TESTIMONY REGARDING THE CAC?**

8 **A.** My response is three-fold. First, the purported benefits do not outweigh the weakening of
9 PWSA’s incentive to control costs. Second, as I explained in my direct testimony, the
10 Commission has limited surcharges to circumstances where they are either legislatively
11 mandated, or when directed by the Commission, and neither of those circumstances apply
12 here. Instead of responding to my point on this issue, PWSA simply reiterates its request
13 for a waiver of Public Utility Code provisions, which is not responsive. Third, Mr. Barca’s
14 position ignores that the cash on hand recovered through a reconciling charge like the CAC
15 is no greater than the cash on hand generated through base rates.

16 **Q. HAS THE REBUTTAL TESTIMONY OF WITNESS BARCA GIVEN YOU ANY**
17 **REASON TO WITHDRAW OR MODIFY YOUR RECOMMENDATION THAT**
18 **THE COMMISSION REJECT PWSA’S PROPOSED CAC?**

19 **A.** No.

⁵⁶ PWSA St. No. 2-R, page 38 lines 9-24.

⁵⁷ *Pennsylvania Public Utility Commission v. Aqua Pennsylvania, Inc.*, Final Order entered May 16, 2022 at Docket Nos. R-2021-3027385 and R-2021-3027286

⁵⁸ PWSA St. No. 2-R, page 39 lines 1-10.

1 **Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?**

2 **A.** Yes. However, I reserve the right to supplement this testimony if further information is
3 provided by PWSA.

R-2023-3039921 (Wastewater)
2023 Base Rate Case Proceeding

Responses to PWSA
Interrogatories to OCA Set II

3. Reference OCA St. 2, page 8 at 1-12, is an annual reconciliation a requirement of a multi-year rate plan as defined by 66 Pa. C.S. § 1330?

Response: See 66 Pa. C.S. § 1330 (f) *Definitions* “Multiyear rate plan.” A rate mechanism under which the commission sets base rates and revenue requirements for a multiyear plan period and **authorizes periodic changes in base rates, including, but not limited to, adjustments to account for inflation and capital investments without the necessity for base rate proceedings during the approved plan period.** (emphasis added). As a matter of definition, MYRP’s are required to incorporate periodic adjustments to rates and, absent a reconciliation process, such adjustments to rates would not be possible. While the frequency of such adjustments to rates is not specified, annual adjustments would be appropriate, given that PWSA’s MYRP proposes rates based on three separate projected revenue requirements for calendar years 2024, 2025 and 2026.

SURREBUTTAL TESTIMONY OF
JEROME D. MIERZWA

ON BEHALF OF THE
PENNSYLVANIA OFFICE OF CONSUMER ADVOCATE

SEPTEMBER 22, 2023

EXETER

ASSOCIATES, INC.

10480 Little Patuxent Parkway, Suite 300
Columbia, Maryland 21044

1 **I. INTRODUCTION**

2 Q. WOULD YOU PLEASE STATE YOUR NAME AND BUSINESS ADDRESS?

3 A. My name is Jerome D. Mierzwa. I am a Principal and Vice President of Exeter Associates,
4 Inc (“Exeter”). My business address is 10480 Little Patuxent Parkway, Suite 300,
5 Columbia, Maryland 21044. Exeter specializes in providing public utility-related
6 consulting services.

7 Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN THIS
8 PROCEEDING?

9 A. Yes. My direct testimony was submitted as OCA Statement 3 on August 9, 2023, and my
10 rebuttal testimony was submitted as OCA Statement 3R on September 8, 2023.

11 Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?

12 A. The purpose of my surrebuttal testimony is to respond to certain aspects of the rebuttal
13 testimony submitted by Harold J. Smith, Edward Barca, William J. Pickering, and William
14 J. McFaddin on behalf of the Pittsburg Water and Sewer Authority (“PWSA”).
15

16 **II. WITNESS: HAROLD J. SMITH**

17 Q. MR. SMITH HAS MADE SEVERAL MODIFICATIONS TO THE WATER,
18 WASTEWATER CONVEYANCE, AND STORM WATER COST OF
19 SERVICE (“COS”) MODEL ORIGINALLY PRESENTED IN HIS DIRECT
20 TESTIMONY.¹ DO YOU HAVE ANY CONCERNS WITH THESE
21 MODIFICATIONS?

22 A. In my direct testimony, with the exception of the Industrial gradualism adjustment for
23 water service which I subsequently discuss, I found the COS model presented by Mr. Smith
24 to be reasonable.² With the exception of the revised water service Industrial gradualism

¹ PWSA St. No, 7-R, pp. 2-3.

² OCA St. 3, p. 8 and 11.

1 adjustment presented by Mr. Smith in his rebuttal testimony,³ I also find the modifications
2 to the COS model presented by Mr. Smith in his rebuttal testimony to be reasonable. I agree
3 with Mr. Smith that the overall impact of the proposed modifications is minimal and
4 relatively insignificant.⁴

5 Q. WHAT DID YOU PROPOSE IN YOUR DIRECT TESTIMONY
6 CONCERNING THE WATER SERVICE INDUSTRIAL GRADUALISM
7 ADJUSTMENT?

8 A. As noted on page 11 of my direct testimony, PWSA had proposed to limit the increase to
9 the Industrial class to 1.5 times the system average increase to provide for gradualism.⁵ I
10 further noted that there was no hard and fast rule as to what constitutes gradualism, and it
11 was my experience that an increase of 1.5 to 2.0 times the system average increase would
12 be consistent with the concept of gradualism.⁶ As shown on Exhibit HJS-10W, Mr. Smith
13 had reallocated \$1,030,000 of the Industrial customer class's cost of service to the other
14 customer classes to provide for gradualism.⁷ I noted that based on the information
15 presented on Exhibit HJS-15, inclusive of DSIC revenues, the increase proposed by PWSA
16 for the Industrial class was actually 1.4 times the system average increase rather than 1.5
17 times the system average increase as PWSA had claimed.⁸ I recommended that the
18 gradualism adjustment for the Industrial class be reduced by \$226,070 which would result
19 in an increase of 1.75 times the system average increase.⁹

³ PWSA St. No, 7-R, pp. 8-9.

⁴ PWSA St. No. 7-R, p. 3.

⁵ OCA St. 3, p. 11.

⁶ OCA St. 3, p. 11.

⁷ OCA St. 3, p. 11.

⁸ OCA St. 3, p. 11.

⁹ OCA St. 3, p. 11.

1 Q. DOES MR. SMITH AGREE WITH YOUR RECOMMENDATION
2 CONCERNING THE INDUSTRIAL GRADUALISM ADJUSTMENT?

3 A. No.¹⁰ Mr. Smith believes that the 1.5 times the system average increase threshold is
4 appropriate and reasonable.¹¹ However, he concedes that due to a cell error reference in
5 the COS model the original adjustment proposed by PWSA provided for a 1.4 times the
6 system average increase rather than 1.5 times the system average increase.¹² Mr. Smith has
7 subsequently modified his initial Industrial gradualism adjustment to reflect an increase of
8 1.5 times the system average increase.¹³

9 Q. DO YOU AGREE WITH MR. SMITH THAT AN INDUSTRIAL
10 GRADUALISM ADJUSTMENT OF 1.5 TIMES THE SYSTEM AVERAGE
11 INCREASE REMAINS REASONABLE AND APPROPRIATE?

12 A. No. The gradualism adjustment proposed by PWSA results in other customer classes
13 paying for a portion of the costs of providing service to Industrial customers. Table 2-
14 Surrebuttal below provides a comparison of the revised increase proposed by PWSA in Mr.
15 Smith's rebuttal testimony and the increase which would result for the Industrial class
16 under my recommended 1.75 times the system average increase. As shown in the table,
17 PWSA is proposing an overall system increase of 27.8% and an increase of 41.4% for the
18 Industrial class. Under my recommended 1.75 times the system average increase
19 recommendation, the increase for the Industrial class would be 48.6%. My proposed
20 increase is consistent with the general concept of gradualism that increases should be
21 limited to 1.5 – 2.0 times the system average increase.

¹⁰ PWSA St. No. 7-R, p. 8.

¹¹ PWSA St. No. 7-R, p. 8.

¹² PWSA St. No. 7-R, pp. 8-9.

¹³ PWSA St. No. 7-R, p. 9.

Table 2-Surrebuttal. Comparison of Present and Proposed Rates for the Industrial Class and Overall System Increase

	Proposed Rates	Increase	Percent
<u>PWSA Proposed</u>			
Industrial	\$3,362,523	\$984,281	41.4%
Overall System	\$168,073,706	\$36,554,901	27.8%
<u>OCA Proposed</u>			
Industrial	\$3,535,025	\$1,156,783	48.6%
Difference		\$172,502	7.2%

1
2 Q. IS MR. SMITH’S CLAIM THAT A 1.5 TIMES SYSTEM AVERAGE
3 INCREASE FOR THE ALLOCATION OF A RATE INCREASE TO A CLASS
4 IS WELL-ACCEPTED IN UTILITY RATEMAKING CONSISTENT WITH HIS
5 TESTIMONY IN OTHER PUBLIC UTILITY PROCEEDINGS?

6 A. No. As noted by Mr. Smith in his direct testimony,¹⁴ he provided testimony in a 2019 base
7 rate proceeding before the Rhode Island Public Utilities Commission involving the
8 Providence Water Supply Board’s (“PWSB”) multi-year rate plan (Docket No. 4994).¹⁵ In
9 that case, the overall requested water rate increase for the first year of the plan was 17.1%.¹⁶
10 The COS study presented by Mr. Smith in that proceeding indicated that monthly customer
11 charges should be more than doubled. To avoid rate shock and promote gradualism, Mr.
12 Smith proposed to limit customer charge increases to 40%, which was more than 2.0 times
13 the system average increase.

¹⁴ PWSA St. No. 7, p.2 and 5.

¹⁵ <https://ripuc.ri.gov/sites/g/files/xkgbur841/files/eventsactions/docket/4994-ProvWater-COSS-%284-1-21%29.pdf>

¹⁶The PWSB does not provide wastewater or stormwater service.

1 Q. IN YOUR DIRECT TESTIMONY, YOU RECOMMENDED THAT
2 ADMINISTRATIVE SUPPORT COSTS SHOULD NOT BE RECOVERED
3 THROUGH PWSA’S WATER AND WASTEWATER CONVEYANCE
4 CUSTOMER CHARGES.¹⁷ DOES MR. SMITH AGREE WITH THIS
5 RECOMMENDATION?

6 A. No.¹⁸ Mr. Smith claims that the approach he has utilized to recover administrative support
7 costs is consistent with the approach used by PWSA in its previous rate filings and is also
8 consistent with guidance provided by the AWWA Manual M-1.¹⁹ Mr. Smith also contends
9 that in the most recent Newport Water and PWSB base rate proceedings before the Rhode
10 Island Public Utilities Commission, I served as an expert witness and did not express any
11 concern with the recovery of administrative support costs through customer charges.²⁰

12 Q. WHAT IS YOUR RESPONSE TO MR. SMITH’S CLAIMS?

13 A. As I explained in my direct testimony, only the direct costs required to connect and
14 maintain a customer’s account should be included in the calculation of a customer charge.²¹
15 Administrative support costs are not direct costs that are required to connect and maintain
16 a customer’s account and, therefore, should not be recovered through customer charges.²²
17 Mr. Smith has presented no evidence that administrative support costs increase with the
18 addition of a customer and decrease with the subtraction of a customer and, therefore,
19 should be considered direct costs. With respect to guidance provided by the AWWA
20 Manual M-1, the AWWA Manual M-1 states that higher customer “charges may dampen
21 conservation price signals and affect the affordability of minimal levels of service.”²³

¹⁷ OCA St. 3, p. 4.

¹⁸ PWSA St. No. 7-R, p. 5.

¹⁹ PWSA St. No. 7-R, p. 5.

²⁰ PWSA St. No. 7-R, p. 6.

²¹ OCA St. 3, p. 14.

²² OCA St. 3, p. 14.

²³ AWWA Manual M-1, at 96.

1 Mr. Smith claims with respect to the proceedings in which I was an expert witness
2 in Rhode Island are over simplified and fail to consider other relevant factors that are
3 distinguishable here. In the Newport Water proceeding Mr. Smith identified,²⁴ based on
4 the as-filed revenue requirement, the monthly customer charge proposed by Mr. Smith for
5 a customer with a 5/8-inch meter was \$5.76, which reflected an increase of \$0.74 from the
6 existing charge.²⁵ In that case, the customer charge did not include a minimum usage
7 charge component or provide for the recovery of any Public Fire protection costs as is
8 currently provided for by PSWA's customer charges. By comparison, based on the
9 customer cost components identified in PWSA Exh. HJS-12-W-R page 1, exclusive of the
10 minimum usage charge component and Public Fire protection component, the customer
11 charge for a 5/8-inch meter proposed by Mr. Smith for 2024 in this proceeding based on
12 the as-filed revenue requirement is \$14.18, or 2.5 times higher than the customer charge
13 proposed in the Newport Water proceeding. Because the proposed Newport Water
14 customer charges were relatively low and would be further reduced at the approved revenue
15 requirement, I did not propose any adjustments to the calculation of those charges. The
16 actual 5/8-inch customer charge adopted in the Newport Water proceeding based on the
17 approved revenue requirement was \$5.23.²⁶ I would further note that in the Newport Water
18 proceeding, I proposed limiting the increase to any customer class to 2.0 times the system
19 average increase.

20 In the PWSB proceeding, as previously discussed, Mr. Smith had limited the
21 increase in customer charges to 40%. Therefore, it is unlikely that excluding administrative
22 support costs from the calculation of customer charges would have resulted in lower cost
23 of service based customer charges.

²⁴ PWSA St. No. 7-R, p. 6, citing RIPUC Docket No. 4933.

²⁵ https://ripuc.ri.gov/sites/g/files/xkgbur841/files/eventsactions/docket/4933-NewportWater-RateFiling_2-13-19.pdf

²⁶ <https://ripuc.ri.gov/sites/g/files/xkgbur841/files/eventsactions/docket/4933-NWD-RevSettlementAgreement-11-7-19.pdf>

1 Q. IN YOUR DIRECT TESTIMONY, YOU RECOMMENDED REMOVAL OF
2 THE READINESS-TO-SERVE COMPONENT OF THE WATER AND
3 WASTEWATER CONVEYANCE CUSTOMER CHARGES.²⁷ DOES MR.
4 SMITH AGREE WITH THIS RECOMMENDATION?

5 A. No.²⁸ Mr. Smith claims that the readiness-to-serve component is a common ratemaking
6 technique that adds numerous key benefits.²⁹ He claims the fixed readiness-to-serve
7 component within customer charges better aligns revenue recovery with the nature of
8 utility costs which are largely fixed.³⁰ He also claims that the readiness-to-serve component
9 helps to maintain PWSA's fixed revenue at a level deemed desirable by bond rating
10 agencies.³¹ Finally, Mr. Smith claims that a readiness-to-serve component is an industry-
11 accepted ratemaking practice and is addressed in the AWWA Manual M-1.³²

12 Q. WHAT IS YOUR RESPONSE TO MR. SMITH'S CLAIMS CONCERNING
13 THE INCLUSION OF A READINESS-TO-SERVE COMPONENT IN
14 CUSTOMER CHARGES?

15 A. With respect to Mr. Smith's claim that the readiness-to-serve component is a common
16 ratemaking technique, I would note that I have been an expert witness in utility rate
17 proceedings for nearly 35 years, and to the best of my recollection, aside from PWSA
18 proceedings, I cannot recall a proceeding in which a utility had currently included or
19 proposed to include a readiness-to-serve component in its customer charges. Mr. Smith has
20 sponsored numerous water cost of service studies in proceedings before the Rhode Island
21 Public Utilities Commission, and to the best of my recollection none of the water utilities
22 for which he has performed a cost of service study currently included a readiness-to-serve

²⁷ OCA St. 3, p. 4.

²⁸ PWSA St. No. 7-R, p. 6.

²⁹ PWSA St. No. 7-R, p. 6.

³⁰ PWSA St. No. 7-R, p. 7.

³¹ PWSA St. No. 7-R, p. 7.

³² PWSA St. No. 7-R, p. 7.

1 component its customer charges, and Mr. Smith did not propose to include a readiness-to-
2 serve component in the utility's customer charges in those proceedings. Finally, as noted
3 in the testimony of I&E Witness Ethan H. Cline, in response to an OCA discovery request,
4 Mr. Smith conceded that he knew of no other Pennsylvania utility that currently included
5 a readiness-to-serve component in its customer charges.³³

6
7 Q. HAS MR. SMITH MADE OTHER CLAIMS IN AN ATTEMPT TO SUPPORT
8 INCLUSION OF A READINESS-TO-SERVE COMPONENT?

9 A. Yes. With respect to Mr. Smith's claim that the readiness-to-serve component better aligns
10 revenue recovery with the nature of utility costs which are largely fixed, the recovery of a
11 utility's fixed costs through fixed charges is not ideal and is inconsistent with efficient
12 competitive pricing and competitive markets which should govern the setting of utility
13 rates. There are many capital-intensive industries, e.g., manufacturing and transportation,
14 that have cost structures predominated by "fixed" costs. Yet prices for competitive products
15 and services in these capital-intensive industries are invariably established on a volumetric
16 basis. Therefore, the notion that fixed costs should be recovered to a significant extent
17 through fixed charges does not reflect how competitive markets operate.

18 One of the most basic principles of economics is that prices determined through a
19 competitive market ensure the most efficient allocation of society's resources. A
20 fundamental goal of regulatory policy is that regulation should serve as a surrogate for
21 competition to the maximum extent practical.³⁴ Thus, the pricing policy for a regulated
22 public utility should reflect those of competitive markets to the greatest extent possible.
23 The recovery of revenues through fixed charges is inconsistent with pricing in competitive
24 markets. I also note that Mr. Smith has not offered any proof to support his claim that the
25 readiness-to-serve component is deemed desirable by bond rating agencies, but even if it

³³ I&E St. No. 3, p. 30.

³⁴ James C. Bonbright, *et al.*, *Principles of Public Utility Rates*, p. 141 (Second Edition, 1988).

1 were, it is not consistent with the type of costs that are appropriately assessed by
2 Pennsylvania public utilities.

3 Finally, with respect to Mr. Smith's claim that the readiness-to-serve component is
4 addressed in the AWWA Manual M-1, 7th Edition, p. 97, later pages of the AWWA Manual
5 M-1 provide a more comprehensive discussion, stating as follows:

6
7 The requirement to recover costs without regard to the volume of
8 sales is real but it does not necessarily suggest that fixed charges
9 should represent a large portion of total revenue requirements, nor
10 that the rate structure should match the cost structure of a utility. The
11 use of a water system is reflected in both potential and average usage
12 patterns, so a continued reliance on volumetric charges to recover
13 fixed costs has value from an equity perspective.

14 The extent to which a strategy of large service charges is employed
15 is frequently limited as a result of concerns over impacts on
16 affordability for smaller-volume customers.³⁵

17 Therefore, the recognition of the costs associated with having a system in place to provide
18 water service by the AWWA Manual M-1 does not operate as a blanket validation of
19 PWSA's proposal here. Thus, consistent with my direct testimony, I continue to
20 recommend removal of the readiness to serve component of the water and wastewater
21 conveyance customer charges.

22 **III. WITNESSES: EDWARD BARCA AND WILLIAM J. PICKERING**

23 Q. PLEASE EXPLAIN THE RECOMMENDATION PRESENTED IN YOUR
24 DIRECT TESTIMONY CONCERNING THE RATES OF WHOLESAL
25 CUSTOMERS.

26 A. In my direct testimony I noted that the water service rates proposed by PWSA for the
27 Wholesale class were significantly less than the indicated cost of service.³⁶ PWSA claimed
28 that the rates for each Wholesale customer were set by a contractual agreement and because

³⁵ AWWA Manual M-1, page 152.

³⁶ OCA St. 3, p. 9.

1 of this, PWSA was unable to increase the rates of Wholesale customers beyond what was
2 allowed by the individual agreements.³⁷ I recommended that PWSA issue a notice of
3 termination for each of the Wholesale agreements, and negotiate new agreements that
4 provide for the movement toward cost of service rates.³⁸

5 Q. WHAT WAS PWSA'S RESPONSE TO YOUR RECOMMENDATION?

6 A. Mr. Barca claims my recommendation was not appropriate.³⁹ He claims that prematurely
7 terminating the agreements for the purpose of increasing rates would create regional
8 hostility and damage PWSA's reputation and credibility for not honoring contractual
9 obligations that it previously agreed to.⁴⁰ He further claims that PWSA did not notify the
10 Wholesale customers that their existing agreements could be modified as a result of this
11 case.⁴¹

12 Mr. Pickering claims that PWSA has not engaged in any substantive conversations
13 with its Wholesale customer about negotiating their contracts.⁴² Further, no notice has been
14 provided to these customers that changes are being proposed as part of this proceeding,
15 which Mr. Pickering understands from legal counsel raises concerns about due process.⁴³
16 He indicates that PWSA will renegotiate these contracts when they expire or are up for
17 renewal, and recommends nothing should be considered or directed as part of this
18 proceeding.⁴⁴

³⁷ OCA St. 3, pp. 9-10.

³⁸ OCA St. 3, p. 10.

³⁹ PWSA St. No. 2-R, p. 33.

⁴⁰ PWSA St. No. 2-R, p. 33.

⁴¹ PWSA St. No. 2-R, p. 33.

⁴² PWSA St. No. 1-R, p. 18.

⁴³ PWSA St. No. 1-R, p. 18.

⁴⁴ PWSA St. No. 1-R, p. 18.

1 Q. WHAT IS YOUR RESPONSE TO MR. BARCA AND MR. PICKERING
2 CONCERNING THE RENEGOTIATION OF PWSA’S WHOLESAL
3 CONTRACTS?

4 A. First, each witness appears to misconstrue my testimony, as my recommendation was not
5 to “prematurely terminate” any contract, but instead it was for PWSA to give notice of its
6 intent to renegotiate each contract under the timeline identified in each contract because
7 PWSA is significantly under recovering its costs under the terms of the contracts. As
8 explained in my direct testimony, PWSA serves three Wholesale customers: Fox Chapel,
9 Aspinwall, and Reserve Township.⁴⁵ The agreement with Fox Chapel was executed in
10 1995 and had an initial term of 30 years.⁴⁶ No later than five years prior to the expiration
11 of the initial term, PWSA was entitled to give written notice that it intended to cancel the
12 agreement at the end of the initial term. No later than one year prior to the expiration of the
13 initial term, Fox Chapel was entitled to give written notice to PWSA that it intended to
14 cancel the agreement at the end of the current term. If notice of termination is not given by
15 either party within these time periods, the agreement is automatically continued until
16 terminated pursuant to the termination provisions just described. That is, PWSA may
17 cancel with five years prior notice and Fox Chapel may cancel with one year prior notice.

18 The agreement with Aspinwall was executed in 2009 and has an initial term of 30
19 years. The agreement provides that either party may terminate the agreement upon one year
20 prior written notice to the other party; however, the agreement may not be terminated by
21 either party prior to December 31, 2010.

⁴⁵ OCA St. 3, p. 10.

⁴⁶ PWSA’s contractual agreements with Fox Chapel, Aspinwall, and Reserve Township were filed with the Commission at Docket No. U-2020-3020772 in conformance with the March 26, 2020 Compliance Plan Stage Order at Docket Nos. M-2018-2640802, M-2018-2640803. The identified contractual terms are identified at these dockets at <https://www.puc.pa.gov/pcdocs/1669573.pdf>.

1 The agreement with Reserve Township was executed in 1993 and had an initial
2 term of 20 years. No later than five years prior to the expiration of the initial term, PWSA
3 was entitled to give notice to cancel the agreement at the end of the initial term. No later
4 than one year prior to the expiration of the initial term, Reserve Township was entitled to
5 give written notice to cancel the agreement at the end of the initial term. If notice of
6 termination was not given by either party within this time period, the agreement was
7 automatically renewed for two additional terms of five years and thereafter for additional
8 five year terms until timely notice of the cancellation is given by either part no later than
9 four years prior to the expiration date of any extended term.

10 Given the significant under recovery of the cost of serving Wholesale customers, I
11 believe it was imprudent for PWSA not to have already provided the notice for termination
12 currently provided for under each agreement pursuant to the notice provisions of those
13 agreements, and for it not to plan to renegotiate the agreements to provide for movement
14 toward cost of service rates. PWSA's options to terminate and/or renegotiate its current
15 Wholesale contracts are not being determined in this proceeding, as those options are
16 already specified in the current agreements. Regardless, PWSA is requesting a multi-year
17 rate increase and I stand by my position in direct testimony that if approved as filed, PWSA
18 rates will continue to reflect the under recovery at the expense of other customers who now
19 subsidize the cost of serving Wholesale customers.

1 **IV. WITNESS: WILLIAM J. MCFADDIN**

2 Q. WHAT DID YOU RECOMMEND IN YOUR DIRECT TESTIMONY
3 CONCERNING UNMETERED CITY OF PITTSBURGH PROPERTIES?

4 A. In my direct testimony, I noted that there were currently two unmetered City of Pittsburgh
5 properties.⁴⁷ I recommended that PWSA should provide a timeline for metering the two
6 properties and identify the estimated revenue impact of metering these properties.⁴⁸

7 Q. WHAT WAS MR. MCFADDEN'S RESPONSE TO YOUR
8 RECOMMENDATION?

9 A. Mr. McFadden notes that meters were installed on both properties in June 2023.⁴⁹ He
10 claims that PWSA does not have an estimate of annual water usage for these properties to
11 determine the revenue impact of metering the properties.⁵⁰ Therefore, PWSA views this
12 issue as being resolved for this proceeding.⁵¹

13 Q. DO YOU VIEW THIS ISSUE AS BEING RESOLVED FOR THIS
14 PROCEEDING?

15 A. No. PWSA should have several months of data available concerning the revenue impact of
16 metering the two properties. This data may be able to be utilized to determine the annual
17 revenue impact of metering these two properties. The OCA has served a discovery request
18 to obtain that information. Once that information is received, the OCA will assess whether
19 the revenue impact of metering the two City properties is significant and present that
20 impact in this proceeding. Therefore, the issue has not been resolved for this proceeding.

21 Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?

22 A. Yes, it does; however, I reserve the right to update this testimony as may be necessary.

Surrebuttal Testimony of Roger Colton
on behalf of
Pennsylvania Office of Consumer Advocate
OCA Statement 4SR

September 22, 2023

1 **Q. PLEASE STATE YOUR NAME AND ADDRESS.**

2 A. My name is Roger D. Colton. My business address is 34 Warwick Road, Belmont, MA.

3 **Q. ARE YOU THE SAME ROGER D. COLTON WHO PREVIOUSLY PREPARED**
4 **DIRECT AND REBUTTAL TESTIMONY FOR FILING BY THE OFFICE OF**
5 **CONSUMER ADVOCATE IN THIS PROCEEDING?**

6 A. Yes, I am.

7 **Q. PLEASE EXPLAIN THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY.**

8 A. The purpose of my Surrebuttal Testimony is to respond to the Rebuttal Testimony of
9 PWSA witness Julie Mechling (PWSA St. No. 6-R) regarding the customer service and
10 low-income issues I raised in my direct testimony. These issues include:

- 11 ➤ The enrollment of customers into PWSA's Bill Discount Program (BDP);
- 12 ➤ The design and structure of PWSA's BDP;
- 13 ➤ The design and structure of PWSA's Arrearage Forgiveness Program (AFP);
- 14 ➤ The treatment of bills, shutoff notices, and recertification notices that are
15 returned to PWSA as Undeliverable as Addressed.

16 In addition, I respond to the Rebuttal Testimony of OSBA witness Kevin Higgins to the
17 extent that he addresses the design of PWSA's low-income programs.

1 **I. Responding to Mail that is Returned as Undeliverable as Addressed.**

2 **Q. PLEASE RESPOND TO MS. MECHLING’S REBUTTAL TESTIMONY**
3 **REGARDING PWSA’S RESPONSE TO MAIL THAT IS RETURNED TO PWSA**
4 **AS UNDELIVERABLE AS ADDRESSED.**

5 A. Ms. Mechling argues in her testimony that there are not a substantial number of mail
6 pieces that are returned to PWSA as undeliverable. According to Ms. Mechling, “less
7 than 2% of the monthly bills that it issues to its 116,200 customers” are returned as
8 undeliverable. (PWSA St. 6-R, at 17). She does not acknowledge that this means that
9 more than 2,300 customers every month ($116,200 * .02 = 2,324$), or nearly 28,000 each
10 year ($2,324/\text{month} * 12 \text{ months} = 27,888$)¹ will have their bills returned to PWSA
11 returned as undeliverable. Just in the months of March through May 2023 (the only
12 months for which PWSA tracked undeliverable mail), there were nearly 4,500 bills
13 returned as undeliverable. (OCA-III-33(a)).

14 Even more problematic is when PWSA notices are returned as undeliverable. These
15 notices, for example, include shutoff notices for nonpayment and/or notices of the need
16 for low-income program participants to take action to remain in a PWSA low-income
17 program. PWSA does not track the number of those annual 28,000 bills ($2,324 \text{ customers}$
18 per month * 12 months) for which the bills were returned as undeliverable who
19 subsequently were sent a shutoff notice. (OCA-III-33(b)). Nor does PWSA track the
20 number of mailed shutoff notices that are returned as undeliverable. It is not possible for
21 Ms. Mechling to assert that the number of shutoff notices that are returned as

¹ I understand that some customers may have mail returned as undeliverable more than once.

1 undeliverable is “not substantial” when the Company concedes that it does not track that
2 number.

3 Ms. Mechling asserts that there is “a significant process in place before service is
4 terminated for non-payment which includes personal notice of pending termination.”
5 (PWSA St. 6-R, at 17). Even if one accepts the characterization of that process as “a
6 significant process,” PWSA’s process of providing personal notice is neither adequate nor
7 in compliance with PUC regulations. A customer who has had mail returned as
8 undeliverable to PWSA will not know that their bill has even been issued, let alone that it
9 remains unpaid, until that customer receives the posted shutoff notice, either a few days
10 before a disconnection or *at the time of disconnection*. Particularly for low-income
11 customers who may be struggling to pay their bills while paying other household
12 expenses (as I discuss in detail in my Direct Testimony), this provides insufficient time
13 for the customer to respond.

14 Ms. Mechling asserts that “the issue of UAA is not significant for PWSA and, when it
15 does occur, we already have processes in place to identify a more current address.” (Id.)
16 That assertion,² however, does not address the underlying issue presented in my Direct
17 Testimony. As I established in my Direct Testimony, fewer than 10% of mail that is

² Ms. Mechling argues that PWSA “partners with Kubra for its electronic billing, payment, and presentment services. Kubra utilizes a National Change of Address (NCOA) software that reads every potential mailing address in a PWSA bill, letter and notice file. When a more accurate address is discovered, Kubra utilizes it to ensure that the mail piece reaches the PWSA customer.” (PWSA St. 6-R, at 17). Hence, if there is no “change of address,” PWSA offers no process by which to ensure that customers receive the mail intended for them.

1 returned UAA is associated with an insufficient address. The “processes in place”
2 referenced by Ms. Mechling do not address the bulk of the problem.

3 Finally, Ms. Mechling advances two legal conclusions in her testimony that should be
4 dismissed. She states that all of PWSA’s procedures “are consistent with Commission
5 requirements.” (Id.) She asserts further that, based on advice of her counsel,
6 “Commission processes and regulations generally recognize the act of mailing as
7 sufficient for providing consumer notice. . .” (Id.) Ms. Mechling’s testimony provides no
8 basis for establishing the accuracy or legitimacy of those legal conclusions. Both such
9 legal conclusions should be addressed in the parties’ written legal briefs.

10 The factual foundation for my recommendation, however, would lead to the reasonable
11 conclusion that Ms. Mechling’s legal conclusions are in error. In the circumstances I
12 have identified, the only party to the transaction that has knowledge that something is
13 amiss is PWSA. PWSA is the only party that knows a bill (or shutoff notice) has been
14 mailed, but not delivered. PWSA is the only party that knows that information which is
15 important for the customer to receive has not been received. Particularly when PWSA
16 experiences repeated return of mail as UAA, PWSA no longer has a reasonable
17 expectation that merely placing a bill or other written notice in the mail will reach the
18 person to whom that mail is being sent.

1 **Q. DOES MS. MECHLING MISCHARACTERIZE WHAT YOU RECOMMEND**
2 **FOR PWSA WITH RESPECT TO MAIL THAT IS UNDELIVERABLE AS**
3 **ADDRESSED?**

4 A. Yes. Ms. Mechling states that I propose that PWSA create an exception in the
5 Company's normal collection process to place a hold when mail is UAA. (PWSA St. No.
6 6-R at 17) That mischaracterizes my recommendation. Rather, my Direct Testimony
7 recommended:

8 PWSA be directed to adopt a procedure which would create an exception *if*
9 *multiple pieces of mail are returned as undeliverable within a certain time*
10 *period* for a customer service representative to follow up with the customer to
11 update their contact information; enable reports on undeliverable mail;
12 generate an email (if an email address is attached to the account), phone call
13 or text to advise of undelivered mail and encourage the customer to log in
14 online to verify and update their information or if they do not have an online
15 account, ask that they contact the Customer Service Center.

16 (OCA St. 4, at 80 - 81).

17 **Q. WHAT DO YOU CONCLUDE?**

18 A. I conclude that Ms. Mechling's Rebuttal Testimony provides no basis to disapprove the
19 recommendation I make with respect to the treatment of mailed that is returned to PWSA
20 as Undeliverable as Addressed.

21 **II. Enrollment Processes for PWSA's Bill Discount Program (BDP).**

22 **Q. PLEASE RESPOND TO MS. MECHLING'S REBUTTAL TESTIMONY**
23 **REGARDING ENROLLMENT PROCESSES.**

24 A. The review of PWSA's enrollment of its low-income customers in its BDP and/or
25 Arrearage Forgiveness Program (AFP) is an essential component of a rate case. One
26 aspect of reasonable rates is the delivery of reasonable service. The identification and

1 enrollment of income eligible customers in PWSA’s BDP and AFP is one aspect of
2 providing reasonable service. The failure to take reasonable actions to identify low-
3 income customers and to enroll those customers in BDP and AFP is evidence that PWSA
4 is providing unreasonable service to low-income customers.

5 Ms. Mechling begins her response to the documentation of PWSA’s under-enrollment of
6 low-income customers in its BDP by asserting that “the Commission has not conditioned
7 the approval of a utility’s rate request on meeting specific low income customer
8 assistance program enrollment targets.” (PWSA St. No 6-R, at 23). She continues to
9 assert that “the commission has not deemed rates to be unjust and unreasonable based on
10 the number of customers enrolled in a natural gas or electric utility’s low income
11 customer assistance program.” (Id., at 23 – 24). She does not acknowledge that the
12 difference between PWSA and natural gas and electric utilities is that the review of
13 natural gas and electric Universal Service and Energy Conservation Plans (USECPs)
14 presents a specific process through which electric and natural gas enrollment can be
15 reviewed. Ms. Mechling opposes Pittsburgh United’s recommendation for PWSA to
16 submit a USECP to the Commission for review. (Id., at 28 – 30). Under Ms. Mechling’s
17 recommendation, therefore, whether PWSA is performing reasonably in enrolling low-
18 income customers would *never* be reviewed by the Commission. Such review would not
19 occur in a rate case. Nor would there be a separate review of PWSA universal service
20 plans and implementation.

1 **Q. PLEASE RESPOND TO MS. MECHLING’S COMMENT ABOUT PWSA’S**
2 **PARTICIPATION IN THE STATEWIDE UNIVERSAL SERVICE PLAN**
3 **WORKING GROUP.**

4 A. Ms. Mechling opposes program modifications recommended in this proceeding on the
5 grounds that “PWSA intends to be an active participant in the Commission’s Universal
6 Service Plan Working Group. . .” (PWSA St. 6-R, at 28). She argues that it would be a
7 “waste of valuable resources to impose requirements on PWSA in this proceeding that
8 may differ or be unrequired of other similarly situated utilities as a part of the working
9 group process.” (Id., at 29). The Universal Service Plan Working Group, however,
10 currently has only been presented with reviewing specific focused issues involving the
11 development of a common application; discussing the potential development of a
12 common website to facilitate the enrollment of customers into utility programs; the
13 potential requirements of a statewide administrator or other entity to administer universal
14 service enrollment statement, and DHS sharing of information. The initiative also offers
15 the opportunity to advance the goals set forth in the Commission’s March 27, 2023
16 Secretarial Letter. None of those issues, however, would necessarily supersede the
17 shortcomings of the PWSA BDP and AFP as I have documented throughout my Direct
18 Testimony, and in this Surrebuttal Testimony. Moreover, possible changes that the
19 Commission might make at some point in the future should not put a hold on further
20 development of PWSA’s low-income programs. The Commission, for example,
21 continues to review and modify the Universal Service and Energy Conservation Plans
22 (USECPs) filed by the state's natural gas and electric distribution companies even though
23 it is reviewing potential future improvements to the programs.

1 **Q. ARE THERE PROBLEMS WITH THE SPECIFIC FOUNDATIONAL**
2 **ARGUMENTS ON WHICH MS. MECHLING GROUNDS HER OPPOSITION?**

3 A. Yes. Ms. Mechling states that she “does not disagree” with my observation that low-
4 income programs not only address the social problems faced by PWSA’s low-income
5 customers, but can also address “the business [problems] faced by PWSA when it finds
6 that it cannot collect in a complete, regular, and timely fashion the bills which it renders
7 to customers who cannot afford to pay them.” (Id., at 25). Ms. Mechling argues that
8 “PWSA is willing to consider all reasonable suggestions as to how to improve our
9 enrollment levels. . .” (Id., at 24).

10 Nonetheless, she rejects every recommendation advanced in my Direct Testimony and
11 that of Pittsburgh United as being not “necessary or cost-effective to implement at this
12 time.” (PWSA St. 6-R, at 25). She offers no analysis or data indicating that the
13 recommended enrollment improvements that I advance are not “cost-effective.” That
14 conclusion should be rejected as being unsupported.

15 That leaves her two arguments: (1) that improved enrollment is not “necessary” (i.e., “we
16 are unable to agree that the proposals offered here by OCA. . .are necessary”); and (2)
17 that the improved enrollment is not “reasonable” (i.e., “PWSA is willing to consider all
18 reasonable suggestions as to how to improve our enrollment levels”).

19 Her argument that the enrollment recommendations are “not necessary” is at odds with
20 even Ms. Mechling’s own testimony. She concedes that she does not “dispute that there
21 are likely more low-income customers in PWSA’s service territory than are enrolling in
22 our low-income customer assistance programs.” (Id., at 24). There are, however, not

1 merely some low-income customers that are not enrolled, the vast majority of low-
2 income customers are not enrolled. PWSA, itself, estimates that it currently serves
3 25,793 customers with income less than 150% of Federal Poverty Level (OCA-III-13), an
4 increase of 5,603 customers in that income bracket from its estimate based on 2017 data.
5 In contrast, as of May 2023, PWSA had 5,006 BDP participants. (OCA-III-1). Hence, in
6 assessing whether enrollment can be improved, it is appropriate to consider that the
7 current PWSA participation rate misses more than eight-of-ten low-income customers.
8 Moreover, while Ms. Mechling argues that PWSA increased its BDP enrollment by 20%
9 in 2022, its current enrollment level is still less than simply the increase in low-income
10 customers since 2017 (5,006 current BDP enrollment vs. 5,603 increase in number of
11 low-income customers).

12 Her argument that the enrollment improvements I recommend are not “reasonable”
13 should be rejected as well. Ms. Mechling does not respond to my recommendation that,
14 as a municipal authority, PWSA should contact the City of Pittsburgh to negotiate
15 mechanisms through which it can cross-enroll customers through other municipal offices
16 serving the City of Pittsburgh.³ She does not explain why my conclusion that “as a
17 publicly-owned water authority, PWSA can, and should, take advantage of its association
18 with municipal government” is “not reasonable.” Nor does she explain why my
19 recommendation that, as a municipal utility, “PWSA work with the City of Pittsburgh to
20 identify and utilize those municipal programs that would assist PWSA in identifying its
21 lowest income customers and enrolling those customers in its BDP” is not reasonable.

³ I discuss my recommendation to engage in a cross-enrollment with other municipal programs at OCA St. 4, at 22 – 23).

1 Other utilities have been directed to work with their respective cities. In its 2023 rate
2 case, for example, the Philadelphia Water Department was directed by the Philadelphia
3 Water and Wastewater Rates Board to work with the city to improve enrollment in
4 PWD’s low-income discount program. Moreover, the Recommended Decision in the
5 2023 Philadelphia Gas Works rate case recommended that “PGW be directed to develop
6 and deliver to the Commission for its approval plans to implement the following
7 suggestions within 60 days after a final order in this proceeding . . . plans to confirm
8 customers’ low-income status as promptly and efficiently as possible, using data sharing
9 and in coordination with DHS and Philadelphia’s Department of Revenue. . .”⁴ As I
10 explained in my Direct Testimony, and Ms. Mechling did not dispute, the City of
11 Pittsburgh has programs similar to the City of Philadelphia.

12 **Q. DOES MS. MECHLING PROPOSE AN UNREASONABLE LIMITATION ON**
13 **THE COMMISSION’S AUTHORITY TO REVIEW BDP AND AFP**
14 **ENROLLMENT?**

15 A. Yes. Ms. Mechling asserts a conclusion that should be rejected as being unsupported.
16 She states that “it is axiomatic that PWSA has not violated any statute, regulation, or
17 policy statement of the Commission in voluntarily offering this program and therefore the
18 Commission may not force PWSA to dramatically extend its program.” (PWSA St. 6-R,
19 at 27). There are at least three problems with this testimony. First, it is a legal conclusion
20 that is inappropriate for, and not supported by, Ms. Mechling’s testimony or expertise.

⁴ Pennsylvania PUC v. Philadelphia Gas Works, Docket No. R-2023-3037933, Recommended Decision, at 127 (September 5, 2023).

1 Second, Ms. Mechling’s statement goes too far. Having offered the low-income discount
2 to its customer base, it is not within the sole discretion of PWSA to decide which low-
3 income customers may participate and which may not. Otherwise, under Ms. Mechling’s
4 reasoning, PWSA could hypothetically “voluntarily” offer the discount to 100 low-
5 income customers and refuse to extend the program to the other 25,700 low-income
6 customers and the Commission, under her view of the law, would be powerless to
7 respond.

8 Third, my recommended modifications are not based on a conclusion that PWSA has
9 somehow violated a statute, regulation or policy statement. As I document in my Direct
10 Testimony, my recommended modifications are grounded in the undisputed observation
11 that PWSA’s proposed rates will have a disproportionately adverse impact on low-income
12 customers. My Direct Testimony further documents that the modifications I recommend
13 are necessary to respond to the harms that PWSA will impose on low-income customers
14 through the rates that it has proposed in this proceeding. Finally, my Direct Testimony
15 documents how, without the modifications I recommend, the programs (i.e., BDP and
16 AFP) that have been implemented to date are failing to achieve the objectives upon which
17 the programs were grounded in the first instance. Ms. Mechling’s argument that no
18 “violation” of a statute, regulation or policy statement is a red herring that should be
19 rejected.

20 As can be seen, the limitation on Commission authority proffered by Ms. Mechling –that
21 the Commission lacks the authority to direct the expansion of any program that is
22 voluntarily offered by PWSA-- is clearly unreasonable. If there are reasonable actions
23 which PWSA might take to identify customers who qualify for its low-income programs,

1 and then enroll those customers in its low-income programs, the Commission may
 2 certainly direct PWSA to take those actions. Moreover, the BDP and AFP are both
 3 tariffed programs made available by PWSA. Under the Suspension Order, the
 4 Commission has the authority to review all aspects of PWSA's tariffs in this proceeding.

5 **Q. PLEASE RESPOND TO MS. MECHLING'S REBUTTAL TESTIMONY**
 6 **REGARDING THE USE OF TECHNOLOGY.**

7 A. Ms. Mechling opposes my recommendation that the Commission direct PWSA to submit
 8 the question of how PWSA might better use technology to identify low-income
 9 customers; to enroll those customers in the BDP and AFP; and to assist those customers
 10 in maintaining their enrollment. (PWSA St. 6-R, at 28). She states that my "suggestion
 11 to consider how enhanced technology could increase enrollment and retention of low-
 12 income customers in the BDP is an excellent issue for LIAAC to explore," (Id.), she
 13 opposes being directed to submit that question to LIAAC. Moreover, she fails to commit
 14 to submitting the question for LIAAC consideration.

15 While there is yet to be a final decision, the September 2023 Recommended Decision in
 16 PGW's 2023 base rate proceeding expressed an interest in hearing how that municipal
 17 utility was proposing to use technology to improve participation in low-income programs.
 18 The PGW Recommended Decision stated in response to a proposal similar to the
 19 proposed advanced for PWSA:

20 We also adopt OCA's recommendation that PGW be directed to include,
 21 beginning with its next-filed USECP, a specific section that summarizes any
 22 actions included in the plans described above that have not been completed in
 23 full, and presents a workplan identifying the technology tools it has adopted,
 24 or that it intends to adopt in the near-term, mid-term, and long-term, to

1 address low-income consumer identification, CRP enrollment, and CRP
2 enrollment maintenance.⁵

3 While PWSA does not file USECPs (since it is a water utility), adoption of the
4 reporting I recommend is the equivalent of what the PGW RD directed.⁶

5 **Q. PLEASE RESPOND TO MS. MECHLING’S OPPOSITION TO YOUR**
6 **GEO-TARGETED OUTREACH RECOMMENDATIONS.**

7 A. Ms. Mechling opposes my recommendations regarding geo-targeted outreach on
8 the basis that “they are unnecessary given PWSA’s current processes.” (PWSA St.
9 6-R, at 32). She argues that PWSA is already engaging in “neighborhood
10 canvassing efforts” and “cold-calling campaign.” (Id.). She further argues that
11 PWSA is developing GIS mapping to identify “neighborhoods of need” to “focus
12 canvassing efforts.” (Id.)

13 What Ms. Mechling does not acknowledge is that my recommendation extended
14 beyond the “GIS mapping” and blanket outreach that she references in her
15 testimony. My recommendation was that not only should PWSA engage in
16 outbound phone calling, outbound e-mails, and outbound mailings specifically
17 directed toward geographic areas identified as having high concentrations of

⁵ PGW 2023 Base Rate Case RD, *supra*, at 127 – 128. While PGW excepted to the consideration of *any* universal service issues in a base rate case, it did not specifically except to the Recommended Decision’s directives regarding the use of technology.

⁶ “For each of the actions recommended above, PWSA should maintain detailed outcomes records that it should present for review by its LIAAC. The outreach reporting should include data not merely on what PWSA is *doing* with respect to these two recommended outreach strategies, but what PWSA has *achieved* in improving the identification of PWSA’s lowest income customers and the enrollment of such customers in BDP and AFP.” (OCA St. 4, at 25).

1 PWSA’s lowest income customers, but also that “in addition to this geo-targeted
2 outbound outreach, PWSA should be directed to identify specific customers in
3 these geo-targeted areas that exhibit payment difficulties that could reasonably be
4 associated with an inability-to-pay.” (OCA St. 4, at 21).

5 It is difficult to understand Ms. Mechling’s opposition to my recommended geo-
6 targeting outreach proposal. Elsewhere in her testimony, Ms. Mechling states that
7 she “does not disagree” with my observation that low-income programs can
8 address “the business [problems] faced by PWSA when it finds that it cannot
9 collect in a complete, regular, and timely fashion the bills which it renders to
10 customers who cannot afford to pay them.” (PWSA St. 6-R, at 25). She further
11 states that “PWSA is willing to consider all reasonable suggestions as to how to
12 improve our enrollment levels. . .” (Id., at 24).

13 Moreover, Ms. Mechling does not dispute that the fourteen (14) zip codes served
14 by PWSA that had a penetration of customers with income at or below 150% FPL
15 that was higher than the average for the PWSA service territory as a whole had:
16 (1) 58% of the number of PWSA accounts in arrears; (2) 72% of the dollars of
17 arrears; (3) 65% of the PWSA nonpayment disconnections; (4) an average arrears
18 75% higher than the average arrears for the non-low-income zip codes (\$521 for
19 low-income zip code; \$298 for non-low-income zip codes); (5) a rate of
20 disconnections (i.e., disconnections per 100 accounts in arrears) 36% higher than
21 the rate of disconnections per 100 accounts in arrears for the non-low-income zip
22 codes; and (6) a reconnection rate (reconnection after a nonpayment
23 disconnection) for the low-income zip codes 15% lower than the reconnection

1 rate for the non-low-income zip codes. (OCA St. 4, at 12 – 13, citing OCA-III-
2 57). Nonetheless, Ms. Mechling opposes engaging in targeted personalized (e.g.,
3 outbound phone calling, outbound e-mails, outbound mail) to those individuals to
4 determine whether both they, and thus PWSA, would benefit from enrolling these
5 customers in the BDP and/or AFP.

6 **Q. PLEASE RESPOND TO MS. MECHLING’S OPPOSITION TO THE USE**
7 **OF COMMUNITY-BASED ORGANIZATIONS TO ENROLL LOW-**
8 **INCOME CUSTOMERS IN PWSA’S LOW-INCOME PROGRAMS.**

9 A. Ms. Mechling states that she “vehemently oppose[s]” using third-party
10 Community Based Organizations to enroll customers in PWSA’s low-income
11 programs. (PWSA St. 6-R, at 33). She asserts first that using CBOs, such as
12 Connecticut’s utilities do as I explain in my Direct Testimony (OCA St. 4, at 22),
13 is “unnecessary given PWSA’s current processes.” (PWSA St. 6-R, at 32). She
14 asserts that PWSA’s internal team “is positioned to perform the entire enrollment
15 process with low-income customers in the most effective and least costly manner
16 possible.” (Id., at 32 – 33). She finally argues that to “pay outside agencies with
17 ratepayer money to do what the [internal PWSA] team is already paid to do. .
18 .would drive PWSA’s rate request even higher.” (Id., at 34).

19 Moreover, Ms. Mechling argues that “there are also numerous back-office
20 functions that must be performed to ensure that our most vulnerable customers
21 received the program benefits that they are eligible to receive.” (Id., at 33). She
22 argues that even if third-party CBOs were enlisted to help “identify the lowest

1 income customers and to facilitate the enrollment of such customers in the BDP’
2 (OCA St. 4, at 22), “PWSA personnel would still need to perform data entry into
3 PWSA’s Customer Information System.” (PWSA St. 6-R, at 33).

4 Ms. Mechling’s argument that enlisting the assistance of CBOs “is not necessary”
5 and that performing the entire enrollment process internally is “the most effective.
6 . . .manner possible” should be rejected. Ms. Mechling argues that PWSA provides
7 “meaningful outreach to low-income customers and to enroll eligible customers in
8 assistance programs. . .” (Id., at 49). She asserts that “PWSA also increased
9 staffing of its PGH2O Cares team in 2022 to perform additional outreach and
10 enrollment.” (Id.)

11 This argument ignores that, as I documented in my Direct Testimony and note
12 above, while PWSA has increased its BDP enrollment by 20% in 2021 (Id., at
13 49), the vast majority of low-income customers are not enrolled. In assessing
14 whether performing the entire enrollment process internally is “the most effective
15 manner possible” it is appropriate to consider that the current PWSA enrollment
16 process has missed more than eight-of-ten low-income customers. In assessing
17 whether performing the entire enrollment process internally is “the most effective
18 manner possible,” it is appropriate to consider that PWSA’s current enrollment
19 level is still less than simply the increase in low-income customers since 2017
20 (5,006 current BDP enrollment vs. 5,603 increase in number of low-income
21 customers). There are, in other words, more unserved low-income customers
22 today than there were in the past.

1 Moreover, the weakness of Ms. Mechling’s argument about the required “back
2 office functions” is evident even in the manner in which she articulates it. She
3 asserts that “PWSA personnel would *still* need to perform data entry into PWSA’s
4 Customer Information System.” (PWSA St. 6-R, at 33) (emphasis added). Using
5 CBOs in the manner in which I recommend, in other words, would not create new
6 “back office functions” that would need to be performed. The use of CBOs
7 would simply not relieve PWSA of the need to perform such “back office
8 functions” (i.e., those back-office functions would “still” need to be performed).
9 And the functions that Ms. Mechling identifies are neither onerous nor surprising.
10 They include entering new enrollees into PWSA’s Customer Information System,
11 reviewing enrollment applications for accuracy, updating customer contact
12 information, updating the Enrollment Date and Poverty Level fields, adding an
13 “interaction record” to the account, forwarding the account to Billing to update
14 the billing rate, and recording the account and “any missing information” to the
15 Daily Tracking spreadsheet. These back-office functions are necessary
16 irrespective of whether the enrollment occurs through an internal team contact, or
17 through a cross-enrollment with another program, or through a CBO.

18 Finally, Ms. Mechling’s argument that compensating CBOs to help identify low-
19 income customers and facilitate their enrollment in PWSA’s low-income
20 programs necessarily “would drive PWSA’s rate request even higher” is not even
21 consistent with Ms. Mechling’s other testimony. Elsewhere, Ms. Mechling
22 testifies that she “does not disagree” with my testimony that well-designed
23 customer assistance programs “can also address ‘the business programs faced by

1 PWSA when it finds that it cannot collect in a complete, regular, and timely
2 fashion the bills which it renders to customers who cannot afford to pay them.”
3 (PWSA St. 6-R, at 25). In stating that she “does not disagree” with that
4 proposition, neither did Ms. Mechling dispute my findings that about the fourteen
5 zip codes that had a penetration of customers with incomes at or below 150% FPL
6 that was higher than average for the PWSA service territory as a whole, as
7 described above. Increasing participation in PWSA’s low-income programs
8 through enlisting the assistance of CBOs generates cost reductions as well as cost
9 increases. It is not at all the case that adoption of my recommendation would
10 necessarily “drive PWSA’s rate increase even higher.”

11 **III. Modifications to PWSA’s Bill Discount Program.**

12 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
13 **TESTIMONY.**

14 A. In this section of my testimony, I respond to the Rebuttal Testimony of PWSA witness
15 Mechling regarding the modifications which I recommend to PWSA’s Bill Discount
16 Program.

17 **Q. PLEASE RESPOND TO MS. MECHLING’S COMMENTS ABOUT**
18 **DETERMINING THE COSTS OF YOUR MODIFIED DISCOUNT TIERS.**

19 A. Ms. Mechling argues that my recommended modifications to the income tiers for
20 PWSA’s BDP should not be adopted because, due to a mistake made by PWSA, “accurate
21 data available to indicate FPL of BDP enrollees is limited and does not provide
22 information about the over 6,700 current BDP enrollees.” (PWSA St. 6-R, at 38). She
23 argues that PWSA cannot “support recommendations that will increase the costs to other

1 ratepayers when the data does not offer a way to reasonably project accurate impacts.”
2 (Id., at 39). She concedes, however, that “these data tracking issues have been addressed
3 in our billing system.” (Id., at 39).

4 Ms. Mechling’s opposition grounded on this basis should be rejected. She asserts that “in
5 our current structure, there was no reason to focus on FPL breakpoints beyond those
6 necessary to qualify customers for the BDP.” (Id., at 39). That statement is simply not
7 accurate. Both under PWSA’s existing discounts, and under PWSA’s proposed credits to
8 offset the impact of eliminating its minimum charge, PWSA needs to differentiate
9 households by Federal Poverty Level. Customers with income less than 50% FPL
10 receive a different discount, and will receive a different bill credit, than customers with
11 income greater than 50%. Moreover, PWSA is proposing to expand its BDP to customers
12 with income greater than 150% FPL but at or below 200% FPL. Even if PWSA had
13 made no mistakes, it would have no information about customers with income in that
14 FPL range (150% to 200%). Nonetheless, that lack of information did not prevent PWSA
15 from proposing to implement its expanded discount and projecting the costs of extending
16 the discount.

17 Ms. Mechling noted, in particular, that due to its mistakes, PWSA lacked information on
18 the enrollment date and percent of FPL “for accounts with listed tenants.” (Id., at 38).
19 She argues that, accordingly, “accurate data available to indicate FPL of BDP enrollees is
20 limited. . .” (Id., at 38) The enrollment date (whether for a tenant or for someone else),
21 however, is not a factor used to calculate the cost of the modified discount tiers I
22 recommend. Irrespective of whether a customer is a tenant or not, whether a customer
23 enrolled in the BDP in January 2022, or January 2023, or July 2023 will not change the

1 cost of the modifications I recommend for PWSA's BDP up or down. Moreover, when
2 PWSA was asked to provide the breakdown of BDP participants by owner/tenant status,
3 it reported that the number of tenants participating in the BDP was relatively minor.
4 (OCA-III-36). Indeed, my Direct Testimony expressed concern about the extent to which
5 PWSA fails to serve low-income tenants ("Despite the prevalence of tenant status
6 amongst the households in these low-income tiers, PWSA serves very few low-income
7 tenants as evidenced by its BDP." OCA St. 4, at 35).

8 **Q. HOW WOULD THE MISTAKES IDENTIFIED BY MS. MECHLING HAVE**
9 **AFFECTED YOUR COST CALCULATION?**

10 A. The PWSA mistakes identified by Ms. Mechling as occurring in the migration from the
11 previous Information Technology to the current system would not affect my cost
12 calculations. Thus, Ms. Mechling's assertion that my recommendations "will increase
13 the costs to other ratepayers when the data does not offer a way to reasonably project
14 accurate impacts" has no basis. Consider:

- 15 ➤ My recommended increase in the discount to customers with income less than
16 50% FPL uses the exact same data used by PWSA on calculating its costs to
17 serve those below 50% FPL customers, excepting using an expanded discount
18 percentage.
- 19 ➤ My recommended changes to the fixed credits (to offset the elimination of the
20 minimum charge) do not vary in cost based on FPL tiers. While my
21 recommended fixed credits are larger than the fixed credits proposed by
22 PWSA, the increase I recommend is \$3 per month across-the-board. There is

1 no need to know the exact FPL tier of a low-income customer to calculate the
2 increase in costs associated with my recommendation.

3 ➤ My recommended modification in the discount tiers (adding a new tier for
4 customers with income between 50% and 100% of customers) does not rely
5 on the historic distribution of BDP customers. Rather, I use the method of
6 estimating future enrollment in the BDP by FPL range that PWSA, itself,
7 uses. (OCA-III-13). This PWSA methodology is not based on, and would not
8 be affected by, the mistakes identified in Ms. Mechling’s Rebuttal Testimony.

9 The fact is that in estimating the costs of my recommended modification to PWSA’s
10 discount tiers, I use the exact same methodology, and the exact same data, that PWSA
11 used to estimate the costs which would be imposed by its proposed BP income tiers (and
12 proposed fixed credits to offset the elimination of the minimum charge).

13 **Q. ARE MS. MECHLING’S “CONCERNS” ABOUT INCENTIVIZING**
14 **CONSERVATION WELL-FOUNDED?**

15 A. No. Ms. Mechling testified that she is “concerned about how incentivizing conservation
16 can be achieved by providing greater discounts for more usage.” (PWSA St. 6-R, at 39).
17 She argues that BDP participants would be “less inclined to conserve” if they are
18 provided a greater discount. She argues that “high consumption bills will be
19 meaningless” and that “leaks will go undetected and conservation will suffer.” (Id., at
20 40).

21 Ms. Mechling’s “concerns” are based on no data. They are merely unsupported
22 conclusory statements. In fact, the impact of discount rates on “incentivizing

1 conservation” has been studied time and again by Pennsylvania’s utilities. Empirical data
 2 from numerous evaluations of Pennsylvania’s affordability programs have found that the
 3 offer of affordable low-income rates not only does not impede price signals, but,
 4 conversely, affirmatively improves them. By examining the evaluations of other
 5 Pennsylvania universal service programs, we can determine the impact of the PIP on
 6 participant usage using real information, rather than on supposition.

- 7 ➤ Consider, for example, the “percentage of income program” offered by Peoples
 8 Gas Company. The Peoples Gas evaluation of its Percentage of Income Plan
 9 (PIP) reported that the program succeeded in promoting conservation. In
 10 accordance with Pennsylvania PUC regulations, Peoples engaged an external
 11 third party evaluator to assess its PIP; the most recent evaluation was published
 12 in 2017.⁷ In that Evaluation, Peoples specifically considered the impact of its
 13 PIP on the natural gas consumption of PIP participants. The Peoples Evaluation
 14 reported that nearly three times more Peoples PIP participants reduced their
 15 consumption under PIP than increased their consumption under PIP. While 25%
 16 of PIP participants reduced their usage, only 9% increased their consumption.
 17 More than half of all PIP participants reported no change in their consumption.
- 18 ➤ The evaluation of PPL Corporation’s electric affordability program also shows
 19 the conservation impacts of that affordable rate.⁸ Even given the affordable rate
 20 assistance provided by PPL Corporation, only 6% of low-income participants
 21 increased their usage. Of those who did increase their usage, only two (2) said
 22 that it was because they “could afford to use more electricity.” In contrast, 40%
 23 of program participants reported that they used less electricity. Two-thirds (65%)
 24 of those said they used electricity because they were trying to reduce their
 25 consumption or to conserve.

⁷ APPRISE, Inc. (August 2017). Peoples Natural Gas, 2017 Universal Service Program Evaluation, Final Report, available at https://www.puc.pa.gov/General/pdf/USP_Evaluation-Peoples.pdf

⁸ APPRISE, Inc. (January 2020). PPL Electric Utilities, Universal Service Programs, Final Evaluation Report, available at <https://www.puc.pa.gov/pcdocs/1656535.pdf>

- 1 ➤ The 2017 evaluation of First Energy’s rate affordability program found similar
2 results as well.⁹ The First Energy evaluation found that while 14% of program
3 participants reported having higher usage under the program than they had before
4 participating in the program, 25% of program participants reported having lower
5 usage under the program. Of all program participants, 20% reported having
6 lower usage because they were trying to conserve or reduce consumption. In
7 contrast, fewer than 3% of total program participants reported having increased
8 usage either because of a “heavy use of appliances” or because they were using
9 electric space heaters.

10 The fact that these evaluations involve natural gas and electric utilities rather than a water
11 utility does not detract from their relevance to demonstrating that Ms. Mechling’s
12 “concerns” have no basis. Indeed, the fact that the *same* results were reported for both
13 natural gas and electricity demonstrates that the impact of an affordability program on
14 promoting conservation behavior does not turn on the type of utility service being
15 delivered.

16 **Q. WHAT DO YOU CONCLUDE?**

17 A. The empirical evidence from the implementation of rate affordability programs indicates
18 that affordable rates have no noticeable impact on a degradation in any “incentive” to
19 engage in conservation. If anything, those incentives are improved. Not only do far
20 more program participants reduce consumption than increase consumption, but those who
21 do reduce consumption, do so because they are *trying* to do so.

⁹ APPRISE, Inc. (January 2017). First Energy Universal Service Programs, Final Evaluation Report,
https://www.puc.pa.gov/general/pdf/USP_Evaluation-FirstEnergy.pdf

1 **Q. PLEASE RESPOND TO MS. MECHLING’S OPPOSITION TO YOUR**
2 **PROPOSED INCREASE IN THE FIXED MONTHLY CREDITS TO OFFSET**
3 **THE ELIMINATION OF THE MINIMUM CHARGE.**

4 A. Ms. Mechling opposes my recommendation to increase the low income fixed credits as a
5 means to offset the elimination of PWSA’s minimum charge and argues, simply, that
6 PWSA’s proposed fixed credits are adequate to prevent rate increases to low-income
7 customers higher than rate increases to residential customers generally. (PWSA St. 6-R,
8 at 40). She argues, for example, that a BDP Tier 2 rate increase of 63.5% (by Year 2026)
9 is reasonable given that the residential rate increase in that same time period would be
10 69.1%. Likewise, a BDP Tier 1 rate increase of 59.5% is reasonable because it is not
11 substantially different from the 69.1% residential increase in the same time period.
12 (PWSA St. 6-R, at 40, citing OCA St. 4, Table 8). She asserts that low-income customers
13 should “share in the costs of Commission approved rates,” (Id., at 41), not noting that
14 even with my recommended increased credits, Tier 2 BDP customers would experience a
15 rate increase of 43% by 2026, while Tier 1 BDP customers would experience a rate
16 increase of 21%.

17 Ms. Mechling argues that “Mr. Colton’s proposed discounting of the amounts [low-
18 income customers] will be asked to pay in the future results in too high a cost for the
19 other ratepayers.” (Id.). That assertion, of course, assumes that in the absence of the
20 fixed credit, low-income customers would actually *pay* the *entire* amount of the rate
21 increase proposed by PWSA. That assumption is contrary to what we know to be the
22 situation of PWSA’s low-income customers. As I documented in my Direct Testimony
23 (based on data provided by PWSA, itself), “over the period May 2021 through May 2023,

1 more than 71% of the customers who enrolled in BDP entered the program with a pre-
2 existing arrears. The average arrears of those having arrears was \$1,226.” (OCA St. 4, at
3 51). Responding to these bill payment problems by increasing bills by 59.5% (Tier 1
4 BDP participants) or by 63.5% (Tier 2 BDP participants) will not make those arrearages
5 decline. Adopting the fixed credits I recommend will lower costs for the “other
6 ratepayers” rather than increasing costs. As I discussed above, even Ms. Mechling stated
7 that she “does not disagree” with my observation that low-income programs can address
8 “the business [problems] faced by PWSA when it finds that it cannot collect in a
9 complete, regular, and timely fashion the bills which it renders to customers who cannot
10 afford to pay them.” (PWSA St. 6-R, at 25).

11 Finally, Ms. Mechling inexplicably argues that future rate increases (in percentage terms)
12 should only be calculated relative to rates in the immediately preceding year, rather than
13 relative to current rates. (PWSA St. 6-R, at 41). In her view, a 60% rate increase by the
14 Year 2026 isn’t *really* a 60% rate increase, but is instead only a 20% rate increase,
15 because the other 40% had occurred in the two prior years. The notion that the
16 cumulative percentage rate increases over time should be ignored when assessing the
17 impacts of rates on PWSA’s low-income customers should be rejected. To examine only
18 a year-over-year percentage increase does not capture the impact of rate increases on
19 low-income customers. Nor is it the way in which other price increases are measured.
20 The Consumer Price Index, for example, published by the U.S. Bureau of Labor Statistics
21 does not examine only year-over-year changes. Rather, it sets a base year equal to “100,”
22 and measures the cumulative impact of price changes relative to that base year as the way

1 to measure inflation. The presentation of the Consumer Price Index (all urban
 2 consumers) in the Table below illustrates.

Consumer Price Index (water, sewer and trash collection) (January 2023 – August 2023) (December 1997 base = 100) ¹⁰								
	Jan. 2023	Feb. 2023	Mar. 2023	Apr. 2023	May 2023	Jun. 2023	Jul. 2023	Aug. 2023
Water and sewer and trash collection services	281.461	283.663	284.166	285.052	286.322	287.457	289.005	290.975

3 I offer this Table not to establish what the increase in water bills has been, but rather to
 4 illustrate that Ms. Mechling’s objection to examining the cumulative price increase over
 5 time should be rejected as unreasonable.

6 **III. Modifications to PWSA’s Arrearage Forgiveness Program (AFP).**

7 **Q. PLEASE EXPLAIN THE PURPOSE OF THIS SECTION OF YOUR**
 8 **TESTIMONY.**

9 A. In this section of my testimony, I respond to the Rebuttal Testimony of Ms. Mechling
 10 regarding recommended modifications to PWSA’s arrearage forgiveness program. Ms.
 11 Mechling opposes every recommended modification. (PWSA St. 6-R, at 42).

12 In advancing her opposition, Ms. Mechling relies first on three statements known to be in
 13 error. She notes, for example, that “the distribution of funding for the Low-Income

¹⁰ U.S. Bureau of Labor Statistics, CPI-U, August 2023, available at <https://www.bls.gov/cpi/tables/supplemental-files/>

1 Household Waer Assistance Program (“LIHWAP”) is continuing. . .” (Id.) That statement
2 is in error. As I observed in my Direct Testimony, when Congress adopted its legislation
3 increasing the federal debt ceiling, it rescinded all unspent LIHWAP funding. Federal
4 funding through LIHWAP no longer exists and expired in Pennsylvania as of August 18,
5 2023.¹¹ The number of PWSA customers who received LIHWAP grants has been
6 insubstantial in 2023. As I noted in my Direct Testimony, from January 2023 through
7 May 2023, only nine (9) PWSA customers received LIHWAP grants. From March 2023
8 through May 2023, three (3) PWSA customers received LIHWAP.

9 Moreover, Ms. Mechling relies on the discredited “cost-benefit analysis” prepared by
10 Edward Barca.¹² Mr. Barca’s only response to the failings of his cost-benefit analysis
11 was that PWSA customers have historically received LIHWAP funding. (PWSA St. 2-R,
12 at 76). He does not explain how that observation corrects or cures the erroneous
13 assumptions and methodology that he utilizes. Indeed, it is interesting to note that while
14 Mr. Barca asserts that LIHWAP is significant in that it is no longer available (Id.), Ms.
15 Mechling asserts that LIHWAP is significant in that it is “continuing.” (PWSA St. 6-R, at
16 42). In fact, the availability or non-availability of LIHWAP does not affect the
17 modifications I recommend for PWSA’s arrearage forgiveness program.

18 Finally, Ms. Mechling argues that forgiving arrears over a 36-month period would result
19 in an estimated loss of \$900,000 in annual revenue. (Id., at 42). She then argues that the

¹¹ Pennsylvania had sufficient funds remaining to *temporarily* reopen applications for LIHWAP. That temporary period ended on August 18, 2023, before PWSA witness Mechling testified on September 8, 2023 that LIHWAP distribution “is continuing.”

¹² OCA St. 4, at 69 – 72.

1 costs of my recommended 24-month forgiveness period “would likely be greater as more
2 debt would be forgiven.” (Id.) She does not even attempt to reconcile that Mr. Barca’s
3 \$1,231,722 cost estimate (PWSA Ex. EB-9) unreasonably assumes that 100% of the debt
4 eligible for forgiveness would, in fact, be forgiven. Not even PWSA believes that
5 number. PWSA claimed only \$240,000 in arrearage forgiveness expenses in this rate
6 case, not the \$1,231,722 calculated by Mr. Barca (see, OCA St. 4, Table 22, page 72).

7 In reality, pre-program arrears would be forgiven pursuant to my recommended
8 modifications only if and when a customer makes a complete payment. PWSA did not
9 dispute either the methodology used in my calculation of arrearage forgiveness costs, or
10 the data I used in making those calculations, or the results that flowed from those
11 calculations. My calculated cost of a 24-month forgiveness period (\$871,461) is
12 substantially less than the cost of the 100% forgiveness advanced by Mr. Barca
13 (\$1,231,722).

14 Finally, Ms. Mechling argues that my recommended 24-month arrearage forgiveness
15 period would “likely be greater” than the annual cost of the 36-month forgiveness period
16 recommended by Pittsburgh United witness Harry Geller “as more debt would be
17 forgiven.” (PWSA St. 6-R, at 42). What she does not state, however, is that even if that
18 were true in the short-term, it would not be true in the long-term. The important word in
19 Ms. Mechling’s Rebuttal Testimony is “annual.” While my cost estimate would spread
20 forgiveness over two years, Mr. Geller’s would spread forgiveness over three years.
21 Comparing the costs per-year (i.e., “annual costs”) of one approach over the other,
22 without acknowledging that my forgiveness period has fewer years, is not appropriate.

1 **Q. PLEASE RESPOND TO MS. MECHLING’S REBUTTAL TESTIMONY**
2 **REGARDING YOUR RECOMMENDED AUTOMATIC ENROLLMENT OF BDP**
3 **PARTICIPANTS IN THE ARREARAGE FORGIVENESS PROGRAM.**

4 A. Ms. Mechling argues that “PWSA is already automatically enrolling customers who are
5 eligible for the Bill Discount Program into the Arrearage Forgiveness Program when they
6 have past due charges and are willing to enter into a payment plan.” (PWSA St. 6-R, at
7 43). Ms. Mechling does not dispute the fact that PWSA’s existing approach to arrearage
8 forgiveness enrollment excludes most of those customers who would be eligible for
9 forgiveness. That is not surprising given that the data was provided by PWSA, itself. As
10 my Direct Testimony documents, while PWSA had 6,497 BDP participants in May 2023,
11 it had only 1,956 BDP participants who were *also* enrolled in arrearage forgiveness.
12 (OCA St. 4, at 55). Under Ms. Mechling’s recommended approach, in other words, 7-of-
13 10 BDP participants do not also participate in arrearage forgiveness.

14 PWSA’s current arrearage forgiveness structure then limits low-income customers who
15 actually receive forgiveness even more. From September 2022 through May 2023,
16 PWSA had an average of 1,704 participants enrolled in its arrearage forgiveness program.
17 During that same time period, PWSA actually provided an average of 631 forgiveness
18 credits each month.

19 Taken individually, but certainly when viewed together, the unreasonable nature of
20 PWSA’s arrearage forgiveness structure can be seen. In April 2023, PWSA had 6,297
21 BDP participants, and yet granted forgiveness to only 696 participant accounts. In
22 February 2023, PWSA had 6,272 BDP participants and yet granted forgiveness to only

1 712 participant accounts. In December 2022, PWSA had 6,081 BDP participants and yet
2 granted forgiveness to only 513 participant accounts.

3 The data thus shows the fallacy of Ms. Mechling’s two conclusions. First, she concludes
4 that “the current Arrearage Forgiveness Program is an incentive for customers to keep
5 paying. . .” (PWSA St. 6-R, at 43). If providing an incentive is the intended objective—
6 Ms. Mechling argues that “PWSA’s Arrearage Forgiveness Program is a valuable tool to
7 incentivize payment”— the data shows that that incentive is failing. The data I cite
8 above¹³ shows that PWSA is providing arrearage credits to only roughly 10% of BDP
9 participants (e.g., $696 / 6,297 = 11\%$ in April 2023; $712 / 6,272 = 11\%$ in February 2023;
10 $513 / 6,081 = 8\%$ in December 2022). The program is failing 90% of the time.

11 Second, she concludes that PWSA’s current structure “offers the appropriate balance
12 between providing a reasonable level of financial assistance to those in need while also
13 requiring them to make fair payments. . .” (PWSA St. 6-R, at 43). As I note immediately
14 above, PWSA’s current structure is not providing “a reasonable level of financial
15 assistance to those in need” nor does it represent an “appropriate balance.” PWSA’s
16 current program provides arrearage forgiveness to only 10% of all BDP participants.
17 Even amongst those low-income customers actually enrolled in the AFP, as I found in my
18 Direct Testimony, from December 2022, when the federal government’s COVID
19 emergency water assistance grant program went away, through April 2023, PWSA would

¹³ The complete data for all months through May 2023 was presented in my Direct Testimony

1 have issued 10,597 AFP bills but made only 3,728 AFP arrearage forgiveness credits.
2 (OCA St. 4, at 57).

3 Finally, Ms. Mechling again argues that the arrearage forgiveness program creates new
4 costs that would need to be borne by other ratepayers. She asserts that the forgiveness
5 modifications recommended by OCA and by Pittsburgh United “will cause our
6 ratepayers to unfairly subsidize these costs.” (PWSA St. 6-R, at 43) (emphasis added).
7 We know, however, that statement is not accurate. The arrearage forgiveness program
8 does not “cause” new costs to be incurred. It instead moves unpaid bills from PWSA’s
9 current unpaid balances to the arrearage forgiveness program. We know that more than
10 70% of new BDP enrollees enter the BDP with pre-existing arrears. We know that the
11 average level of those pre-existing arrears is \$1,226. (OCA St. 4, Table 15, page 53).

12 PWSA’s existing forgiveness program does not “incentivize” changes in those non-
13 payment patterns. Instead, PWSA’s program continues the pattern of nonpayment in
14 90% (or more) of the cases. The modifications to the Arrearage Forgiveness Program
15 that I recommend in my Direct Testimony would create successful incentives. Those
16 modifications should be adopted.

17 **IV. Response to OSBA Witness Kevin Higgins.**

18 **Q. PLEASE RESPOND TO THE REBUTTAL TESTIMONY OF OSBA WITNESS**
19 **KEVIN HIGGINS AS HE ADDRESSES YOUR RECOMMENDED**
20 **MODIFICATIONS TO PWSA’S LOW-INCOME PROGRAMS.**

21 **A.** OSBA witness Kevin Higgins states in his Rebuttal Testimony that “OSBA neither
22 supports nor opposes the multitude of recommendations made by Mr. Colton, so long as

1 all customer assistance program costs are recovered solely from residential customers.”
2 (OSBA St. 1-R, at 4). The merits of my recommended modifications do not depend on
3 cost allocation decisions. As I describe in detail in my Direct Testimony, as well as in
4 this Surrebuttal Testimony, my recommended modifications are designed to make
5 PWSA’s low-income programs achieve the purposes for which they were designed in the
6 first instance. Without my modifications, the PWSA programs not only reach a fraction
7 of the low-income customer population, but even for those customers who do participate,
8 the programs do not promote an improved affordability of bills given PWSA’s proposed
9 rates. Moreover, the PWSA arrearage forgiveness program does not provide meaningful
10 arrearage relief. OSBA's proposal to change the way in which PWSA allocates its
11 universal service costs presents an issue entirely separate from the need to adopt the
12 program modifications I have identified. I addressed the merits of OSBA’s argument that
13 universal service costs should be allocated exclusively to the residential class in my
14 Rebuttal Testimony. (OCA St. 4R).

15 **Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?**

16 A. Yes.

SURREBUTTAL TESTIMONY

**BARBARA R. ALEXANDER
BARBARA ALEXANDER CONSULTING LLC**

ON BEHALF OF

OFFICE OF CONSUMER ADVOCATE

September 22, 2023

1 Q. PLEASE STATE YOUR NAME, ADDRESS AND OCCUPATION.

2 A. My name is Barbara R. Alexander. I am the sole member manager of Barbara Alexander
3 Consulting LLC. My address is 44 Beech St., Hallowell, ME 04347. I appear in this case
4 as a witness on behalf of the Pennsylvania Office of Consumer Advocate (OCA).

5 Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN THIS PROCEEDING?

6 A. Yes. I submitted Direct Testimony on behalf of the OCA on August 9, 2023.

7 Q. WHAT IS THE PURPOSE OF THIS TESTIMONY?

8 A. I am submitting Surrebuttal Testimony on behalf of the OCA in response to the Rebuttal
9 Testimony of Julie A. Mechling (Statement No. 6-R) and the Rebuttal Testimony of
10 Edward Barca (Statement No. 2-R) on behalf of the Pittsburgh Water and Sewer Authority
11 (PWSA) submitted on September 8, 2023. The issues I will address in my Surrebuttal
12 Testimony include the following conclusions and recommendations reflected in my Direct
13 Testimony:

- 14 • Multi-year rate plan's failure to include any customer service performance
15 commitments;
- 16 • PWSA's call center performance;
- 17 • PWSA's root cause complaint analysis;
- 18 • PWSA's processing fees for certain customer payment options; and
- 19 • PWSA's use of a third party debt collection agency.

1 Q. AS A RESULT OF YOUR REVIEW OF PWSA'S REBUTTAL TESTIMONY, DO YOU
2 HAVE ANY CHANGES TO YOUR ORIGINAL CONCLUSIONS AND
3 RECOMMENDATIONS?

4 A. No. I continue to recommend that PWSA's proposal for a multi-year rate increase not be
5 approved due, in part, to the lack of any specific performance standards or consequences
6 for the failure to meet reasonable performance standards. Based on my evaluation of
7 certain other PWSA proposals and service quality performance, I recommend the following
8 requirements that should be imposed if rates are increased:

9 • PWSA's Call Center should meet its internal standards of an average answer time
10 of 1 minute and an abandonment rate of 3% or less for all its customer queues each quarter.

11 • PWSA's "root cause" analysis of customer complaints failed to meet the
12 requirements of its prior commitment due to the failure to include informal and formal BCS
13 complaints. PWSA's should be required to conduct the required complaint analysis at no
14 additional cost to customers or ratepayers and report the results within 6 months.

15 • PWSA's proposal to impose a transaction fee for payment by credit and/or debit
16 cards by residential customers should be rejected.

17 • PWSA's intent to hire a third-party debt collection agency should not be approved
18 at this time or prior to a demonstration that any such proposal will be cost effective
19 compared to internal debt collection and lien authority or that any such proposal will ensure
20 a reduction in collection costs or debt collection efficiency.

1 Q. PLEASE RESPOND TO PWSA’S REBUTTAL TESTIMONY CONCERNING THE
2 LACK OF STATUTORY REQUIREMENTS FOR SERVICE QUALITY OR
3 CUSTOMER SERVICE PERFORMANCE STANDARDS AS PART OF THE MULTI-
4 YEAR RATE PLAN.

5 A. PWSA witnesses Barca and Mechling address the need for service quality or customer
6 service performance standards as part of the multi-year rate plan. Ms. Mechling’s Rebuttal
7 argues that since there is no precedent for this issue in a litigated proceeding, that the
8 Commission should reject my recommendation to link the multi-year plan rate recovery to
9 reasonable service quality and customer service performance criteria.¹ Mr. Barca argues
10 that there is no evidence that PWSA is providing inadequate service.² In response to Ms.
11 Mechling, there is no “alternative rate plan” in effect for Pennsylvania public utilities, that
12 argument has no weight. As to the legal argument, I will defer to OCA’s Brief on that
13 matter. In response to my testimony that PWSA has not provided a “meaningful assurance
14 or mechanism to meet reasonable customer service performance and service quality
15 performance,” Ms. Mechling states that the multi-year rate plan is not being proposed based
16 on the need to assure adequate service quality and customer service and that there is no
17 basis to assume that PWSA would “halt its progress toward becoming a highly responsive
18 and trusted public utility.”³ Mr. Barca’s basis for his rejection of my proposal to link
19 customer service quality to a proposal to increase rates (whether through a multi-year rate
20 plan or with a more traditional rate case) is not correct. I documented that PWSA has
21 routinely not complied with its own internal performance standards and has performed

¹ PWSA St. No. 6-R, page 7, lines 11-14.

² PWSA St. No. 2-R, page 31, lines 14-18.

³ Ibid., page 7, lines 14-16.

1 poorly in several areas compared to other Pennsylvania utilities in my Direct Testimony.
2 It is not necessary to prove violations to raise my concerns. Both Mr. Barca and Ms.
3 Mechling fail to address the obvious purpose of including commitments and measurements
4 of customer service performance in a multi-year rate plan which is that the lack of such a
5 mechanism shifts the risk of degradation of performance for essential customer service to
6 customers while setting in motion automatic rate increases. Rate increase requests are
7 required to include a review of efficiency, effectiveness and adequacy of service⁴ PWSA's
8 Rebuttal does not satisfy the risks and policy concerns that I identified in my Direct
9 Testimony. When faced with such arguments, it is best to "trust but verify" in the world
10 of utility regulation. In fact, PWSA has a history of up and down performance at its call
11 center as I documented in my Direct Testimony and will discuss further below.

12 Q. PLEASE RESPOND TO PWSA'S REBUTTAL WITH REGARD TO YOUR
13 RECOMMENDATION TO ENSURE REASONABLE ONGOING PERFORMANCE AT
14 PWSA'S CALL CENTER.

15 A. Ms. Mechling provides updated information on the performance of PWSA's call center for
16 the period January 1, 2023, through August 31, 2023.⁵ The average performance for this
17 period indicates a continuing concern with the high 4.8% abandonment rate for customers
18 who select the "collections" queue to speak to a representative, as well as 3.3%
19 abandonment rate for calls relating to permits and 3.9% abandonment rate for stormwater
20 calls. Evidently, Ms. Mechling justifies her opposition to my recommendation by relying
21 on overall call average results and ignores the performance for those call queues that are

⁴ 66 Pa. C.S. Sec. 523.

⁵ Ibid., page 9.

1 not in compliance with the internal average performance standard. I do not agree that calls
2 from some customers should be handled at a lesser quality of service than calls from other
3 customers on different topics. Ensuring a performance for each customer queue is a
4 particular concern when dealing with “collections” calls in which customers are responding
5 to a termination notice or other collection-related communications. This performance is
6 relevant to my concern about the lack of any standards for the multi-year rate plan and is
7 also of concern to PWSA’s request for any rate increase in this proceeding. Furthermore,
8 the suggestion that customer satisfaction survey results as described by Ms. Mechling
9 should excuse performance that does not meet reasonable performance standards is not
10 reasonable.⁶ The customer surveys do not link the experience of customers who choose to
11 respond to a survey to the call queues. The use of different customer queues to route
12 incoming calls may be reasonable but, as I have identified, the call center answering
13 performance should be linked to each queue, particularly in months when termination of
14 service is allowed. I continue to recommend that PWSA be required to meet its own internal
15 performance standards for all customer calls as a condition of any rate increase.

⁶ Ibid., page 10, lines 15-25.

1 Q. PLEASE RESPOND TO PWSA’S REBUTTAL CONCERNING THE COMPLIANCE
2 WITH THE PRIOR SETTLEMENT THAT REQUIRES A ROOT CAUSE ANALYSIS
3 OF CUSTOMER COMPLAINTS.

4 A. Ms. Mechling’s Rebuttal confirms that PWSA’s root cause complaint analysis focused on
5 “disputes,” defined as customer contacts directly with PWSA in which the customer was
6 dissatisfied with the initial response at first contact.⁷ I do not dispute that statement and I
7 agree that disputes reflect a larger group of “complaints” than those informally appealed to
8 the BCS or that were evaluated by the BCS to determine “infractions.” I also agree that
9 PWSA took actions internally in response to this analysis of disputes in the root cause
10 report. However, PWSA failed to conduct a root cause analysis pursuant to the language
11 of the stipulation. The exact language of the commitment in the settlement states, “PWSA
12 will undertake a root cause analysis of informal and formal complaints and identify and
13 adopt reforms to reduce formal complaints, verified complaints and justified complaints.”⁸
14 PWSA’s root cause report does not discuss any complaints except “disputes” and does not
15 identify or discuss the pattern of informal complaints submitted to BCS or any formal
16 complaints submitted to the Commission. Ms. Mechling fails to recognize that identifying
17 those disputes that result in informal and/or formal complaints and why such escalation
18 occurred and with what results was clearly an intended part of the root cause analysis. Nor
19 does the report identify or discuss any BCS findings with respect to verified or justified
20 complaints. PWSA’s root cause report failed to conform to the plain language of the

⁷ Ibid., page 12, line 6.

⁸ *Pennsylvania Public Utility Commission v. Pittsburgh Water and Sewer Authority*, Docket Nos. R-2021-3024773 (water), R-2021-3024774 (wastewater), and R-2021-3024779 (stormwater), Final Order entered November 18, 2021 adopting Recommended Decision dated October 6, 2021 at p. 27 Section 9, E,8,c.

1 settlement. I continue to recommend that PWSA comply with the settlement language and
2 conduct a root cause analysis of the informal and formal complaints, and their relationship
3 to BCS findings as required. As I documented in my Direct Testimony, there are trends
4 and patterns in the BCS findings that need analysis and response by PWSA in this corrected
5 root cause report.

6 Q. TURNING TO PWSA'S PROPOSAL TO CHANGE ITS PRIOR AGREEMENT TO
7 ELIMINATE CREDIT AND DEBIT CARD PROCESSING FEES AND RESUME
8 CHARGING SUCH FEES TO RESIDENTIAL CUSTOMERS, PLEASE RESPOND TO
9 PWSA'S REBUTTAL.

10 A. As a part of the Settlement of its 2021 base rate proceeding, PWSA agreed to eliminate
11 merchant fees for residential customers to make Interactive Voice Response and on-line
12 payments as part of its 2020 rate case settlement.⁹ Beginning in January 2022, PWSA
13 eliminated these payment fees for residential customers. Now, however, PWSA is
14 proposing to reverse that agreement and charge residential customers \$1.95 per transaction
15 for paying their PWSA bill via credit or debit card. As documented by Mr. Geller on behalf
16 of United, PWSA also charges residential customers a \$1.49 fee for cash payments at third
17 party locations. Both Ms. Mechling and Mr. Barca on behalf of PWSA continue to reject
18 recommendations to eliminate specific fees. I do not accept the basis for their proposal or
19 their response to my testimony. PWSA should accept payment by any lawful means
20 without additional fees and reflect reasonable and prudent costs to process these payments
21 in its revenue requirement.

⁹ *Pennsylvania Public Utility Commission v. Pittsburgh Water and Sewer Authority, Docket Nos. R-2020-3017951 (water) and R-2020-3017970 (wastewater) Final Order entered December 3, 2020 (approving Settlement Section III.G.2.).*

1 Their argument is that those who incur fees must pay them or other ratepayers are
2 forced to subsidize their payment methods.¹⁰ They also argue that these fees, if eliminated
3 for individual customers, will cause the revenue requirement to increase.¹¹ PWSA's
4 reasons are neither logical nor fair. First, every payment method requires costs for
5 processing the payment. In an age in which electronic payments are the norm for many
6 customers for their routine purchases, it is unfair to single out certain payment methods for
7 a penalty by charging the customer an additional fee. Second, the fees are negotiable and
8 PWSA does not apparently recognize that they could either solicit a lower cost contract or
9 take on the internal process of processing debit and credit cards that most merchants handle
10 without a third-party payment processing agent. No such analysis or attempt to explore
11 these options have apparently been implemented by PWSA. Finally, this policy is
12 particularly harmful for lower income customers who may be unbanked and rely on pre-
13 purchase debit cards to make payments.¹² I include a summary of this report with its key
14 findings as Exhibit BA-6. PWSA should encourage every form of lawful payment of their
15 bills and promote these payment methods to support the on-time payment of their bills.

16 While PWSA may not benefit directly from imposing these fees, they are in fact
17 imposed on customers as a condition of payment of the PWSA bill and promoted on
18 PWSA's web portal and result, therefore, in higher costs to these households compared to

¹⁰ Ibid., page 15, lines 8-14.

¹¹ See, e.g., PWSA St. No. 2-R, page 77, lines 22-27.

¹² According to the 2021 FDIC National Survey of Unbanked and Underbanked Households, 6.9% of households were using general purchase reloadable prepaid cards and 46.4% of all households were using nonbank online payment services, such as PayPal, Venmo, and Cash App. The use of prepaid debit cards was much higher among unbanked households. Unbanked households were twice as likely to use prepaid cards or nonbank online payment services to conduct four or more types of transactions compared with banked households.

<https://www.fdic.gov/analysis/household-survey/index.html>

1 those who use PWSA's favored payment methods for which fees are not charged. PWSA's
2 policy is discriminatory. As documented in my Direct Testimony, PWSA's data shows
3 that a substantial percentage of customers are using these fee-based payment options to
4 avoid termination of service, indicating that the impact on vulnerable and disadvantaged
5 customers is greater than those with the ability to pay bills on time and in full. I attach
6 PWSA's Response to OCA-IV-15 as Exhibit BA-7 that I relied upon for those facts. In
7 addition, Mr. Barca's statement that customers who pay by credit and/or debit card have a
8 bank account and could use payment by bank withdrawal for free is not necessarily correct
9 and ignores those who are unbanked as documented in the FDIC Survey I have cited¹³ and
10 does not reflect the difficulties facing vulnerable customers who are forced to make a
11 choice to incur debt or suffer termination of essential water and sewer services. PWSA
12 should eliminate specific fees that are advertised and encouraged by PWSA as a method of
13 bill payment.

14 Q. PLEASE RESPOND TO PWSA'S UPDATED INFORMATION ON ITS USE OF A
15 THIRD-PARTY DEBT COLLECTOR.

16 A. As documented by Ms. Mechling in her Rebuttal, PWSA has issued an RFP for a third
17 party debt collector for certain of its unpaid receivables. Based on my review of these
18 materials¹⁴ PWSA has developed a set of criteria and performance standards that appear to
19 be generally reasonable subject to the concerns that I note below. Of particular importance
20 is that the contractor will focus on unpaid debt from individuals or businesses that are not
21 customers or applicants consistent with Chapters 14 and 56 and who are not, therefore,

¹³ PWSA St. No. 2-R, page 78, lines 1-3.

¹⁴ PWSA Exh. JAM-21. The updated version of the RFP appeared shortly before my Direct was filed and was not, therefore, reviewed at that time.

1 subject to the regular rights and responsibilities associated with Chapter 56 of the
2 Commission's rules. This distinction is crucial to any consideration of my
3 recommendation. However, while the RFP appears to try to distinguish those without
4 service from current customers, more can be done to ensure that any applicant for service
5 is also protected from third party collections rather than the payment requirements provided
6 by Chapter 56.¹⁵ Thus, I continue to have some concerns that the scope of the agreement
7 is too broad. For the reasons outlined below, I do not recommend that PWSA enter into
8 this agreement at this time; however, if they do so, I recommend that the Authority exclude
9 from the scope of collection any individual who is an applicant for service from the scope
10 of third-party collections so that these individuals have the ability to make arrangements
11 directly with PWSA for the re-establishment of service rather than through a third-party
12 collection agency.

13 Having agreed with the overall conditions set forth in the RFP, I nevertheless conclude
14 that entering this contract is neither prudent nor reasonable because there are important
15 aspects to this initiative that are not yet resolved, particularly since there is no obligation
16 under any prior settlement or order that PWSA must pursue this collection tool. First, the
17 cost of the contract is not known and whether the cost of this initiative is "worth" the
18 expenditure of ratepayer funds that could otherwise be targeted to improvements in
19 PWSA's own collection practices is not known. Second, the Authority has also failed to
20 document how any such private agency could achieve the stated goal for a 10% increase in
21 its monthly collection rate compared to the ongoing collection activities that could or

¹⁵ To the extent that any applicant for service (whether or not they have a PFA or medical certificate) is contacted by the third party collection agency, the applicant for service should be warm transferred back to the Authority by the third party collection agency.

1 should be implemented by PWSA employees or more targeted outreach and collection
2 activities by individuals working under PWSA direct supervision. This concern is
3 particularly relevant to PWSA since the Authority can initiate a lien on a nonpaying
4 customer's property to collect overdue bills, an option that, coupled with its Chapter 56
5 rights, provides a greater flexibility to collect overdue bills compared to other investor-
6 owned water, gas, and electric utilities in Pennsylvania.

7 Q. DOES THIS CONCLUDE YOUR TESTIMONY AT THIS TIME?

8 A. Yes. However, I reserve the right to supplement this testimony if additional relevant
9 information is received.

Analysis

2021 FDIC National Survey of Unbanked and Underbanked Households

Last Updated: July 24, 2023

Additional Links

The FDIC is committed to expanding Americans' access to safe, secure, and affordable banking services, which is integral to the FDIC's mission of maintaining the stability of and public confidence in the U.S. financial system. The *FDIC National Survey of Unbanked and Underbanked Households* is one contribution to this end. Conducted biennially since 2009 partly in response to a statutory mandate, the survey is administered in partnership with the U.S. Census Bureau and collects information on bank account ownership; use of prepaid cards and nonbank online payment services; use of nonbank money orders, check cashing, and money transfer services; and use of bank and nonbank credit.

2021 Survey Results

Key Findings and Implications from the 2021 Survey

Key Findings

National Unbanked Rate

- An estimated 4.5 percent of U.S. households (approximately 5.9 million) were “unbanked” in 2021, meaning that no one in the household had a checking or savings account at a bank or credit union.
- The unbanked rate in 2021—4.5 percent—was the lowest since the survey began in 2009. Between 2019 and 2021, the unbanked rate fell 0.9 percentage points, corresponding to an increase of approximately 1.2 million banked households.
- Between 2011—when the unbanked rate was at its highest level since the survey began—and 2021, the unbanked rate fell 3.7 percentage points, corresponding to an increase of approximately 5.0 million banked households.

Unbanked Rates by Household Characteristics

- Consistent with the results of previous surveys, unbanked rates in 2021 varied considerably across the U.S. population. For example, unbanked rates were higher among lower-income households, less-educated households, Black households, Hispanic households, working-age households with a disability, and single-mother households.
 - Differences in unbanked rates between Black and White households and between Hispanic and White households in 2021 were present at every income level. For example, among households with income between \$30,000 and \$50,000, 8.0 percent of Black households and 8.4 percent of Hispanic households were unbanked, compared with 1.7 percent of White households.

Unbanked Households: Reasons for Not Having a Bank Account

- “Don't have enough money to meet minimum balance requirements” was cited by 21.7 percent of unbanked households as the main reason for not having an account—the most cited main reason.
- “Don't trust banks” was the second-most cited main reason for not having an account in 2021 (13.2 percent), and “Avoiding a bank gives more privacy” was the third-most cited main reason (8.4 percent).

COVID-19 Pandemic and Transitions in Bank Account Ownership

- New questions in the 2021 survey asked households whether they experienced economic changes since the start of the COVID-19 pandemic in March 2020 and whether those changes contributed to the closing or opening of households' bank accounts.
 - About one in three (34.9 percent) recently banked households reported that receiving a government benefit payment (for example, unemployment benefits or a pandemic stimulus payment) contributed to opening a bank account since March 2020.
 - In other words, among the 77.9 percent of recently banked households that received a government benefit payment, almost half (44.8 percent)—representing approximately 1.9 million households—said that the payment contributed to opening an account.
 - About one in five (21.1 percent) recently unbanked households reported that losing or quitting a job, being furloughed, having reduced hours, or having a significant loss of income contributed to closing a bank account since March 2020.

Banked Households: Primary Method Used to Access Bank Accounts

- Among banked households:
 - Use of mobile banking increased sharply (from 15.1 percent in 2017 to 34.0 percent in 2019 to 43.5 percent in 2021) and remained the most prevalent primary method of account access.
 - Use of a bank teller declined considerably (from 24.8 percent in 2017 to 21.0 percent in

2019 to 14.9 percent in 2021) but remained prevalent among certain segments of the population, including lower-income households, less-educated households, older households, and households that did not live in a metropolitan area.

Prepaid Cards and Nonbank Online Payment Services

- In 2021, 6.9 percent of all households were using general purpose reloadable prepaid cards at the time of the survey, and 46.4 percent of all households were using nonbank online payment services. Examples of nonbank online payment services are PayPal, Venmo, and Cash App.
 - Use of prepaid cards was much higher among unbanked households (32.8 percent) than among banked households (5.7 percent).
 - Use of nonbank online payment services was much lower among unbanked households (18.1 percent) than among banked households (47.7 percent).
 - Unbanked households were twice as likely to use prepaid cards or nonbank online payment services to conduct four or more types of transactions compared with banked households.

Nonbank Money Orders, Check Cashing, and Money Transfer Services

- Use of nonbank money orders and nonbank check cashing declined steadily between 2017 and 2021.
 - In 2021, 9.7 percent of all households used nonbank money orders, down from 14.3 percent in 2017 and 11.9 percent in 2019.
 - In 2021, 3.2 percent of all households used nonbank check cashing, down from 6.4 percent in 2017 and 5.5 percent in 2019.
- In 2021, 7.0 percent of all households used nonbank money transfer services from companies like Western Union, MoneyGram, Walmart Money Center, or Ria Money Transfer.

Bank and Nonbank Credit

- In 2021, 71.5 percent of households had a Visa, MasterCard, American Express, or Discover credit card (i.e., a credit card), similar to the proportion in 2019 (71.3 percent) and above the 2017 level (68.5 percent). The share of households that had a personal loan or line of credit from a bank (i.e., a bank personal loan) decreased from 10.8 percent in 2019 to 8.0 percent in 2021. Altogether, 72.5 percent of households in 2019 and 72.3 percent of households in 2021 had a credit card or bank personal loan. In addition, 2.8 percent of households had a personal loan or line of credit from a company other than a bank (i.e. a nonbank personal loan) in 2021.
 - Differences by race and ethnicity in the likelihood of having a credit card or bank personal loan were present at every income level. For example, even among households with

income between \$50,000 and \$75,000, 64.8 percent of Black households and 71.2 percent of Hispanic households had a credit card or bank personal loan, whereas 81.3 percent of White households did so.

- Use of rent-to-own services and payday, pawn shop, tax refund anticipation, and auto title loans all decreased between 2017 and 2021. About 1 percent of households in 2021 used each product or service. The proportion of households that used at least one of the five products or services declined sharply from 7.4 percent in 2017, to 4.8 percent in 2019, and to 4.4 percent in 2021.
 - The proportion of unbanked households that used at least one of the five products or services decreased substantially between 2017 and 2021. Despite this decline, use of these nonbank credit products or services in 2021 continued to be more prevalent among unbanked households than among banked households.

Underbanked Households

- An estimated 14.1 percent of U.S. households (approximately 18.7 million) were “underbanked” in 2021, meaning that the household was banked and in the past 12 months used at least one of the following nonbank transaction or credit products or services that are disproportionately used by unbanked households to meet their transaction and credit needs:
 - Money orders, check cashing, or international remittances (i.e., nonbank transactions) or
 - Rent-to-own services or payday, pawn shop, tax refund anticipation, or auto title loans (i.e., nonbank credit).
- An estimated 81.5 percent of U.S. households (approximately 107.9 million) were “fully banked” in 2021, meaning that the household was banked and in the past 12 months did not use any of the above nonbank transactions and credit.
- As the primary method of bank account access, use of mobile banking was higher among underbanked households (48.8 percent) than among fully banked households (42.5 percent). Use of online banking as the primary method of account access was much lower among underbanked households (11.6 percent) than among fully banked households (23.8 percent). Similar proportions of underbanked households (15.0 percent) and fully banked households (14.9 percent) used a bank teller as the primary method of account access.
- Almost all underbanked households (96.1 percent) and fully banked households (97.3 percent) used their bank accounts to pay bills or receive income. However, while 81.6 percent of fully banked households exclusively used their bank accounts to conduct these transactions, only 38.1 percent of underbanked households did so.
- Underbanked households were less likely to have a credit card and were more likely to have both bank and nonbank personal loans than fully banked households in 2021. For example, 62.4 percent of underbanked households had a credit card, compared with 76.6 percent of fully banked households. One in ten underbanked households (10.0 percent) had a bank

personal loan, compared with 8.0 percent of fully banked households. And 5.6 percent of underbanked households had a nonbank personal loan, compared with 2.4 percent of fully banked households.

Implications

The financial disruptions due to the COVID-19 pandemic created unique opportunities and challenges for economic inclusion, some of which may be temporary, while others may be longer lasting. The importance of quickly receiving income from Economic Impact Payments or other government relief programs created a unique bankable moment, and consumers benefitted from enhanced online and mobile account opening technologies and the greater availability of safe and affordable bank accounts. This combination of factors resulted in meaningful gains in connecting households to the banking system.

Health and safety concerns regarding in-person interactions during the pandemic may have accelerated the long-term trend of increasing use of mobile and online channels to access financial products and services, such as mobile banking and online payment services. As the pandemic wanes, it will be important to carefully monitor whether the shift from in-person activity continues, stabilizes, or subsides.

Beyond impacts directly tied to the pandemic, the financial services marketplace continues to become more disaggregated, and consumers are bundling services and providers (bank and nonbank) in new and interesting ways. This disaggregation may provide greater choices for consumers but also may make it more difficult for consumers to clearly distinguish differences between bank and nonbank products and to understand the protections available, such as deposit insurance. The economic inclusion implications of disaggregation on different segments of the population bear further research and highlight the need to learn more about how consumers are navigating the choices presented to them by the evolving marketplace.

- + [Despite economic challenges posed by the pandemic, more consumers became banked and sustained their banking relationship through financial distress. The importance of quickly receiving government payments contributed to decisions by many unbanked consumers to open bank accounts. Focusing on opportunities to connect consumers to safe and affordable bank accounts when they are receiving income and other government payments continues to be a promising economic inclusion strategy. Enhancements to online account opening technology deployed during the pandemic and the increased availability of low-cost accounts in recent years also may facilitate these banking efforts. Disruptions in income had a smaller impact in exits from the banking system than previous survey results might suggest, and further research is needed to explore the reasons for this smaller than expected impact, including strategies banks used to assist low- and moderate-income \(LMI\) consumers navigate short-term financial shocks.](#)

+

factors may be driving these trends, including reduced demand from changing needs, increased participation in the banking system, or the increasing supply of other, new nonbank products and services, many of which can be found online or through mobile applications. Much remains to be learned about consumer choices and the factors that are motivating them. Additional research into these choices and motivations is vital to ensuring that economic inclusion efforts evolve to address consumers' changing needs and preferences.

- + While many banked households appear to use nonbank online payment services such as PayPal, Venmo, and Cash App to complement banking products, unbanked households may be using them as substitutes for banking or other financial services. These use cases have different economic inclusion implications but highlight that it is important for all consumers to understand limits and applicability of consumer protections, especially deposit insurance.

1 **INTRODUCTION**

2 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS FOR THE RECORD.**

3 A. Terry L. Fought, 780 Cardinal Drive, Harrisburg, Pennsylvania, 17111.

4

5 **Q. MR. FOUGHT, HAVE YOU ALREADY SUBMITTED TESTIMONY IN THIS**
6 **PROCEEDING ON BEHALF OF THE OFFICE OF CONSUMER ADVOCATE?**

7 A. Yes. I submitted direct testimony.

8

9 **Q. WHAT IS THE PURPOSE OF YOUR SURREBUTTAL TESTIMONY?**

10 A. The purpose of my surrebuttal testimony is to respond to portions of the rebuttal
11 testimonies by: William J. Pickering, PWSA St. No. 1-R; Edward Barca, PWSA St.
12 No. 2-R; William J. McFaddin, PWSA St. No. 3-R; Barry King, PWSA St. No. 4-R;
13 and Julie A. Mechling, PWSA St. No. 6-R.

14

15 **Q. WHAT ISSUES ARE YOU GOING TO ADDRESS?**

16 A. I am going to address the following issues: (1) Amendment of Cooperation
17 Agreement between the City and PWSA (Cooperation Agreement); (2) Pressures
18 and Pressure Surveys; (3) Microfiltration Plant (MFP) and Highland Reservoir 1
19 (HR1); (4) Unaccounted for Water (UFW); (5) Isolation Valves; (6) Meter Testing
20 and Replacement; (7) Flushing Distribution System; (8) Fire Hydrants; (9)
21 Complaint Log; and (10) Public Input Hearing Testimony.

1 **COOPERATION AGREEMENT**

2 **Q. WHICH PWSA WITNESSES PROVIDED REBUTTAL TESTIMONY**
3 **REGARDING THE COOPERATION AGREEMENT?**

4 A. PWSA witnesses William J. Pickering, PWSA St. No. 1-R and Edward Barca,
5 PWSA St. No. 2-R provided rebuttal testimony about amending the Cooperation
6 Agreement.

7
8 **Q. WHAT IS MR. PICKERING'S POSITION ON AMENDING THE COOPERATION**
9 **AGREEMENT?**

10 A. On page 13 of his Rebuttal Testimony, Mr. Pickering states that: (1) he does not
11 agree that the Cooperation Agreement needs to be amended; (2) the Cooperation
12 Agreement has the effect of law under Act 70 of 2020; (3) no language appears in
13 Act 70 providing for an amendment of the Cooperation Agreement; (4) when the
14 Cooperation Agreement ends on January 1, 2025, the City will be just like any
15 other customer; and (5) the only exception is that although the City will pay for the
16 utility services it receives and other services on an arms-length transactional basis,
17 billing may continue to be handled through existing arrangements.

18
19 **Q. WHAT IS YOUR RESPONSE TO MR. PICKERING'S POSITION?**

20 A. The following responses are in the same numerical order as Mr. Pickering's
21 position noted above.

22 1. As identified in my Direct Testimony, an Amendment to the Cooperation
23 Agreement is needed prior to any PWSA rate increase after January 1, 2025 to

1 clarify who is responsible for the many items discussed in the Cooperation
2 Agreement.¹

3 2. The Cooperation Agreement has the effect of law under Act 70 of 2020 until
4 January 1, 2025.

5 3. I agree; but nothing in Act 70 prevents amending the Cooperation
6 Agreement.

7 4 & 5. I agree with Mr. Pickering's position that after January 1, 2025, the City
8 should be just like any other customer; however I disagree with his position that
9 the City should be allowed to continue pay for the utility services it receives and
10 other services on an arms-length transactional basis, billing may continue to be
11 handled through existing arrangements.

12
13 **Q. WHY DO YOU DISAGREE THAT THE CITY CONTINUE TO PAY FOR**
14 **SERVICES IT RECEIVES THROUGH EXISTING ARRANGEMENTS?**

15 A. All the existing arrangements that are proposed to continue after January 1, 2025
16 should be clearly explained with financial audits for the previous three years. The
17 water and wastewater customers of PWSA should not be responsible for owning,
18 repairing and maintaining: (1) water and sewer lines within any City Park; (2)
19 combined and sanitary sewer mains and laterals within any City Park; and (3)
20 water and sewer mains, service lines and laterals to other City Properties.

¹ OCA Statement 6, pg. 36.

1 **Q. WHAT IS MR. BARCA'S POSITIONS ON AMENDING THE COOPERATION**
2 **AGREEMENT?**

3 A. On page 34 of his Rebuttal Testimony, Mr. Barca stated that: (1) I recommended
4 that PWSA be required to amend its Cooperation Agreement to prevent its
5 customers from paying for service restoration of all City Streets; (2) the City is not
6 forcing PWSA to pave all City Streets; (3) the proposed surface restoration
7 includes PWSA costs to restore its construction sites to the City specifications; and
8 (4) PWSA is not being held to a different standard than all utilities doing work in
9 the City.

10

11 **Q. WHAT IS YOUR RESPONSE TO MR. BARCA'S POSITION?**

12 A. On page 36 of my Direct Testimony, I recommended that the Cooperation
13 Agreement be amended prior to any PWSA rate increase after January 1, 2025 to
14 indicate who is responsible for the many cost items discussed in that agreement
15 after PWSA has sole ownership of the systems. Surface Restoration is an
16 example of the lack of cooperation by the City to share in the surface restoration
17 costs in accordance with PWSA's Long-Term Infrastructure Improvement Plan.

18

19 **Q. HAVE YOU CHANGED YOUR RECOMMENDATIONS OF AMENDING THE**
20 **COOPERATION AGREEMENT?**

21 A. No. The Cooperation Agreement should be amended and approved by the
22 Commission prior to any rate increase after January 1, 2025 so that it is clear who

1 is responsible for the many items discussed in the existing Agreement after PWSA
2 has sole ownership of the systems.

3
4 **PRESSURES AND PRESSURE SURVEYS**

5 **Q. WHICH PWSA WITNESSES PROVIDED REBUTTAL TESTIMONY**
6 **REGARDING PRESSURES AND PRESSURE SURVEYS?**

7 A. PWSA witnesses William J. Pickering, PWSA St. No. 1-R and William J. McFaddin,
8 PWSA St. No. 3-R provided rebuttal testimony about pressures and pressure
9 surveys.

10
11 **Q. WHAT IS MR. PICKERING'S POSITION ON PRESSURE AND PRESSURE**
12 **SURVEYS?**

13 **A.** On page 5 of his rebuttal testimony, Mr. Pickering stated "For instance, without
14 presenting any allegations as to inadequate service or even pointing to specific
15 problems, OCA witness Fought is seeking to require PWSA to reduce operating
16 pressures and submit pressure surveys for each zone."

17
18 **Q. WHAT IS YOUR RESPONSE TO MR. PICKERING'S POSITIONS?**

19 A. In regard to reducing high pressures, the purpose of my testimony is to inform the
20 reviewer that PWSA provides some customers higher pressures than permitted by
21 52 Pa. Code § 65.6 Pressures and what may be necessary to bring the high
22 pressures into the range in the regulations. So far, I have not been informed of the
23 highest pressures provided to customers in each pressure zone. As noted on

1 Pages 10 and 11 of my direct testimony, for purposes of evaluating pressures, I
2 have generally accepted utility statements based on pressure information from
3 hydraulic models and SCADA systems when the utility submits a complete
4 customer log that includes all pressure complaints.

5 If a utility has properly responded to high pressure complaints, then it is not an
6 issue. Until PWSA submits a complete complaint log that includes all pressure
7 complaints, they should be required to submit pressure surveys for each pressure
8 zone in compliance with 52 Pa. Code § 65.6 Pressures.

9 It should be noted that on September 11, 2023, PWSA submitted a Supplemental
10 Response to OCA Set V-30 that included 135 and 72 “Low Pressure” complaints
11 in 2022 and 2023, respectively. PWSA’s response did not include any “High
12 Pressure” complaints. Upon an informal request, PWSA verified that there were
13 no “High Pressure” complaints.

14 **Q. DO YOU CONSIDER THAT PWSA’S SUPPLEMENTAL RESPONSES TO OCA**
15 **SET V-30 TO BE A COMPLETE COMPLAINT LOG?**

16 A. No. A complete complaint log would include all non-billing complaints. Those
17 complaints not specifically categorized would be included in an “other” or
18 “miscellaneous” category that could also be searched. As discussed later in this
19 testimony, PWSA uses a “Work Order Log” that files complaints in a separate file
20 for each customer. It is possible that a “Work Order Log” search for “Pressures”
21 may include more pressure complaints than a search for “Low Pressures”.
22

1 **Q. WHAT IS MR. MCFADDIN'S POSITIONS ON PRESSURE AND PRESSURE**
2 **SURVEYS?**

3 **A.** On page 4 of his rebuttal testimony, Mr. McFaddin states that: (1) I acknowledge
4 that less than 5% of PWSA's customers, or fewer than 3,774 customers have water
5 pressures higher or lower than the Commission's regulations; (2) the Authority's
6 tariff requires PWSA to maintain service at historic pressures at the main and
7 permits PWSA to furnish service at other pressures where necessary to supply
8 adequate service; (3) the tariff also requires the customers to install and maintain
9 a pressure regulator to reduce pressures; (4) the Allegheny County Code requires
10 a water pressure regulator to be installed when the pressure exceeds 80 psi; (5) I
11 have not identified the number of customers whose pressure is over 125 psi or
12 explain any issues that have arisen due to or harm that has been caused by high
13 pressures; (6) there is no evidence of a pressure problem; (7) reducing pressures
14 over 125 psi is challenging due to the terrain and hills throughout the City and
15 requires funds for new pump stations, tank and piping; (8) PWSA is capturing
16 pressure inquiries in its work order logs; and (9) PA DEP Administrative Order
17 dated October 15, 2017 is involved in PWSA's low pressures.

18
19 **Q. WHAT IS YOUR RESPONSE TO MR. MCFADDIN'S POSITIONS?**

20 **A.** The following responses are in the same numerical order as Mr. McFaddin's
21 position noted above.

22 1. My acknowledgment that less than 5% of PWSA's customers have water
23 pressures above or below Commission's regulations is based on information

1 provided by PWSA.² Just less than 5% non-compliance is not an acceptable
2 standard.

3 2. Agreed; however PWSA's tariff can be revised and it should be noted that
4 PA DEP is not satisfied with PWSA's historic low pressures.³

5 3. Agreed that the tariff requires the customers to install and maintain a
6 pressure regulator to reduce pressures.

7 4. Agreed that the Allegheny County Code requires a water pressure regulator
8 to be installed when the pressure exceeds 80 psi.

9 5. Agreed that I have not identified the number of customers whose pressure
10 is over 125 psi or provided further details that have arisen due to or harm that
11 has been caused by high pressures; however, I have been unable to provide
12 those details because PWSA has not appropriately logged them. As I discussed
13 in my Direct Testimony, it is necessary to evaluate the pressure issue from a
14 complete Customer Complaint Log (that includes all pressure complaints) for
15 systems located in an area having terrain as Pittsburgh does.

16 6. Disagree that there is no evidence of a pressure problem. PA DEP has
17 identified areas having low pressure problems.⁴

18 7. Agreed that reducing pressures over 125 psi is challenging due to the
19 terrain and hills throughout the City and it will require funds for new pump
20 stations, tank and piping.

² OCA Statement 6, pg. 11.

³ OCA Statement 6, pg. 11.

⁴ OCA Statement 6, pg. 11.

1 8. Agreed PWSA is capturing pressure inquiries in its work order logs;
2 however, PWSA's work order logs files all customer complaints in a file for each
3 customer file instead of a complaint log. It appears that complaints are found by
4 using "key words" for each type of complaint.

5 9. Agreed that the PA DEP Administrative Order dated October 15, 2017 is
6 involved in PWSA's low pressures.

7
8 **Q. HAVE YOU CHANGED YOUR RECOMMENDATIONS REGARDING**
9 **PRESSURES AND PRESSURE SURVEYS?**

10 A. No. Just because the PWSA's tariff and Allegheny Code require customers to
11 install pressure regulators does not eliminate the need for utility oversight of high
12 pressures. The OCA has been accepting a complete complaint log instead of
13 pressure surveys for that utility oversight and to review pressure complaints.
14 PWSA should be required to submit pressure surveys for each pressure zone in
15 accordance with 52 Pa. Code § 65.6 until they provide a complete complaint log.

16
17 **MICROFILTRATION PLANT AND HIGHLAND RESERVOIR 1**

18 **Q. WHICH PWSA WITNESS PROVIDED REBUTTAL TESTIMONY REGARDING**
19 **THE MICROFILTRATION PLANT AND HIGHLAND RESERVOIR 1?**

20 A. PWSA witnesses Barry King, PWSA St. No. 4-R provided rebuttal testimony
21 regarding the Microfiltration Treatment Plant and covering Highland Reservoir 1.

1 **Q. WHAT IS MR. KING'S POSITION ON YOUR PROPOSAL TO COVER**
2 **HIGHLAND RESERVOIR 1 (HR1) IF THE CITY DOESN'T PAY FOR ALL**
3 **WATER TREATED BY THE MICROFILTRATION PLANT (MFP)?**

4 A. On pages 10 and 11 of his rebuttal testimony, Mr. King states that PWSA cannot
5 require the City to pay for the water treated at the MFP because: (1) prior to PWSA
6 coming under the regulation of the Commission, the decision was made to keep
7 HR 1 uncovered; (2) in the 2018 base rate case settlement, PWSA committed to
8 providing a cost-benefit analysis (Exhibit BK-5 attached to his Rebuttal Testimony)
9 of operating the MFP instead of covering and placing a physical barrier around
10 HR1; (3) in his Direct Testimony offered in support of PWSA's 2020 base rate
11 request, he detailed the importance of the MFP to the delivery of water supply and
12 explained that a decision of whether to cover HR1 is not one that can be made
13 based solely on costs; (4) the feasibility of covering the existing HR1 is not
14 reasonable in terms of constructability, water quality, and cost; and (5) I provided
15 no basis for reconsidering that decision now.

16
17 **Q. WHAT IS YOUR RESPONSE TO MR. KING'S POSITIONS?**

18 A. The following responses are in the same numerical order as Mr. King's position
19 noted above.

20 1. Mr. King provided no evidence that the decision to keep HR1 uncovered
21 cannot be changed.

22 2. Changes in the water system have been made since the memo included in
23 Exhibit BK-5 was drafted. Mr. King did not dispute that the Highland 1 service area

1 can be served by the pumping facilities at Highland Reservoir 2 when the on-going
2 construction is completed. Also, when some of the constant speed pumps in the
3 Bruecken Pumping Station that presently serve the Highland 1 service area with
4 Aspinwall Treatment Plant water are replaced with variable frequency (flow) drives,
5 both HR1 and MFP are no longer necessary for normal operation. HR1 is presently
6 filled when the flow from the constant speed Bruecken pumps exceed the water
7 demands of Highland 1 service area.

8 3. The importance of the MFP to the delivery of water supply will be greatly
9 reduced in the near future due to proposed variable frequency drives at the
10 Bruecken Pump Station that is budgeted to be completed in FY 2027, just one year
11 later than a new liner is budgeted for HR1. See Exhibit TLF-1SR.

12 4. Covering HR1 is just as reasonable as installing a new liner and continuing
13 to use the MFP. If covered, the Aspinwall water quality can be maintained in HR1
14 by pumping enough water from the MFP existing pump station to keep the water
15 fresh. It should be noted that the following problems in covering HR1, as noted in
16 the Exhibit BK-5 Memo, seem to have reasonable alternatives or are no longer
17 important: (1) uncertainties about the existing reservoir structural/physical
18 concrete conditions; (2) modifications needed to HR1's "dam-related" physical
19 elements; (3) hydraulics of pumping Aspinwall treated water from a covered HR1
20 is no different than pumping MFP treated water from an uncovered HR1; (4) water
21 quality can be addressed similar to the other three PWSA covered reservoirs; (5)
22 removing trees and vegetation from the embankment around a covered reservoir
23 is not different than for an uncovered reservoir; (6) regrading the embankment

1 slope would be the same for either a covered or uncovered reservoir; (7) public
2 acceptance; (8) PWSA is leaning towards replacing the three reservoirs with
3 structural tanks (but has relined and re-covered all three between 2018 and 2022).
4 It should be noted that a review of all PWSA construction contracts that started
5 after January 1, 2019 and budgeted for FY 2023 through 2027 does not show any
6 work at HR1 except for repairs to a parapet wall. See Exhibit TLF-2SR.

7 5. The above discussion should be enough to reconsider covering HR1 unless
8 the City decides to pay for all water treated at the MFP. Reconsideration should
9 include a neutral, third-party report of covering or not covering HR1 prior to relining
10 HR1.

11
12 **Q. WILL THE EXISTING HR1 RESERVOIR AND MFP HAVE ANY USE TO THE**
13 **PWSA WATER SYSTEM UPON COMPLETION OF THE HIGHLAND**
14 **RESERVOIR 2 PUMPING FACILITIES AND THE INSTALLATION OF**
15 **BRUECKEN VARIABLE FREQUENCY PUMPS?**

16 A. Not for normal operation including as a backing up for service to the Highland 1
17 service area. HR1 does contain 130.5 million gallons of water that may be useful
18 in some system wide emergencies. A covered reservoir containing Aspinwall
19 treated water would have the same benefits.

1 **Q. IF THE CITY DECIDES TO PAY FOR WATER TREATED BY THE MFP TO KEEP**
2 **HR1 UNCOVERED, HOW MUCH WATER WOULD THEY HAVE TO PAY FOR?**

3 A. I don't know, but it would only be for the amount of water needed to keep the MFP
4 in operating condition.

5

6 **OTHER ISSUES ADDRESSED BY MR. MCFADDIN**

7 **UNACCOUNTED FOR WATER (UFW)**

8 **Q. WHAT IS MR. MCFADDIN'S POSITION ON YOUR UFW TESTIMONY?**

9 A. On pages 2 and 3 of his rebuttal testimony, Mr. McFaddin states that: (1) PWSA
10 will eventually reduce reliance on the AWWA Audit defaults for estimating volumes
11 of water used for blow-offs and main flushing because it is already capturing better
12 information through the Spry Mobil application and (2) he expects that PWSA's
13 estimates will be lower than AWWA's defaults.

14

15 **Q. DO YOU AGREE WITH MR. MCFADDIN'S RESPONSE AND DOES THIS**
16 **RESOLVE YOUR CONCERNS IDENTIFIED IN DIRECT TESTIMONY?**

17 A. Yes.

18 **ISOLATION VALVES**

19 **Q. WHAT IS MR. MCFADDIN'S POSTION ON ISOLATION VALVES?**

20 A. On pages 7 and 8 of his rebuttal testimony, Mr. McFaddin states that: (1) PWSA
21 has developed and implemented a valve exercising program where all valves are
22 inspected and exercised on a 5-year cycle; (2) PWSA has identified critical valves

1 and expects to inspect and exercise critical valves on a 3-year cycle by the fourth
2 quarter of 2024; and (3) it is unnecessary to impose any additional obligations on
3 PWSA as part of this base case.

4
5 **Q. DO YOU AGREE WITH PWSA'S PLANS TO EXERCISE ISOLATION VALVES**
6 **AS STATED BY MR. MCFADDIN?**

7 A. Yes, and I hope PWSA will implement those plans as stated.

8
9 **METER TESTING AND REPLACEMENT**

10 **Q. WHAT IS MR. MCFADDIN'S POSTION ON METER TESTING AND**
11 **REPLACEMENT?**

12 A. On pages 8 and 9 of his rebuttal testimony, Mr. McFaddin states that: (1) PWSA
13 cannot test and replace 10,000 meters per year and is doing everything within its
14 power to achieve its target of 8,000 meters per year and (2) stated that factors
15 preventing PWSA from replacing 10,000 meters per year include getting into
16 customer's homes, debugging the ERP system (makes customer appointments),
17 supply chain problems and recruiting plumbers.

18
19 **Q. DO YOU AGREE WITH PWSA IS DOING ALL IT CAN TEST AND REPLACE**
20 **AND REPLACE CUSTOMER METERS?**

21 A. No. PWSA should consider contracting out the testing and replacing of the
22 additional 2,000 meters per year until its three plumbers on long-term leave return
23 to work.

1 **FLUSHING THE DISTRIBUTION SYSTEM**

2 **Q. WHAT IS MR. MCFADDIN'S POSTION ON LOCATING DEAD-END LINES AND**
3 **MAKING SURE THAT THEY HAVE A BLOW-OFF VALVE OR HYDRANT SO**
4 **THEY CAN BE FLUSHED?**

5 A. On pages 9 and 10 of his rebuttal testimony, Mr. McFaddin states that: (1) PWSA
6 is making every effort to identify, locate and track the dead-end lines; (2) due to
7 the topography of Pittsburgh many dead-end lines cannot be fixed; and (3) he does
8 not believe it is feasible to direct PWSA to do more than it is already doing.

9
10 **Q. DO YOU HAVE ANY COMMENTS ON MR. MCFADDIN'S POSITION?**

11 A. Yes. I recommend that PWSA submit a quarterly report to the Commission and
12 other parties on its progress in finding its dead-end lines, including identification of
13 those dead-end lines that the Authority does not believe can be fixed, and installing
14 a flushing device.

15 **FIRE HYDRANTS**

16 **Q. WHAT IS MR. MCFADDIN'S POSTION ON FIRE HYDRANTS THAT CANNOT**
17 **PROVIDE THE MINIMUM FIRE FLOW?**

18 A. On pages 10 and 11 of his rebuttal testimony, Mr. McFaddin states that: (1) PWSA
19 already marks these hydrants with a color-coded ring on the front nozzle that
20 identifies the flow; (2) it is up to the Pittsburgh Fire Department to decide whether
21 the color of the ring means that is should be used for a fire; and (3) this approach
22 has been working.

Q. DO YOU AGREE WITH MR. MCFADDIN THAT THE PRESENT COLOR-CODING IS ACCEPTABLE AND THAT IT RESOLVES YOUR CONCERNS IDENTIFIED IN DIRECT TESTIMONY?

A. Yes.

COMPLAINT LOGS

Q. IS MR. MCFADDIN AWARE THAT THE PUC HAS A REQUIREMENT FOR A UTILITY TO KEEP A COMPLAINT LOG?

A. It is apparent from his rebuttal testimony that Mr. McFaddin was not aware that the PUC has a requirement for complaint logs. I am submitting the following Q & A for his information when he reviews this Surrebuttal Testimony.

Q. WHAT ARE THE PUC'S REQUIREMENTS FOR CUSTOMER COMPLAINTS?

A. According to 52 Pa. Code § 65.3. Complaints.

- (a) *Investigations.* A public utility shall make a full and prompt investigation of complaints made by the Commission or by others, including customers, relating to service or facilities.
- (b) *Records of complaints.* A public utility shall preserve for a period of at least 5 years, written service complaints showing the name and address of the complainant, the date and character of the complaint and the final disposition of the complaint.

1 **Q. WHAT IS MR. MCFADDIN'S POSTION ON WORK ORDER/COMPLAINT**
2 **LOGS?**

3 A. In his rebuttal testimony Mr. McFaddin states: (1) PWSA already captures the data
4 in the Spry Mobile application that I wished to receive but since I referred to a
5 "customer complaint log", this information was not produced; (2) a driver reporting
6 a missing manhole cover is not a complaint; (3) the best way forward is to rename
7 complaint logs as "Work Order Logs" and PWSA can provide data in the requested
8 categories; and (4) PWSA is already in the process of including the information
9 requested.

10

11 **Q. WHAT ARE YOUR RESPONSES TO MR. MCFADDIN'S COMMENTS?**

12 A. The following responses are in the same numerical order as Mr. King's position
13 noted above: (1) the PUC's regulations require the utility to keep a complaint log –
14 not a work order log; (2) the example of a driver reporting a missing manhole cover
15 is a complaint and it is important to track in a complaint log in order to know how
16 long it takes the utility to replace the lid because of safety issues; (3) the Spry
17 Mobile application may have many desirable features for an unregulated utility; but
18 is not very suitable for providing a Complaint Log for a utility regulated by the PUC;
19 (4) the additional information provided was not sortable by house number, street,
20 and zip code.

1 **Q. DID YOU TABULATE THE CONFIDENTIAL COMPLAINT INFORMATION**
2 **PWSA PROVIDED IN RESPONSE TO OCA SET V-30?**

3 A. Yes. Exhibit TLF-3SR is a non-confidential tabulation of the complaint information
4 PWSA provided in response to OCA Set V-30 that can be used as reference and
5 provide a template for a PWSA complaint log in future base rate cases.

6 **Q. WHAT DO YOU CONSIDER THE MAJOR PROBLEMS WITH USING SPRY**
7 **MOBILE APPLICATION FOR COMPLAINT LOGS?**

8 A. It is not complete and easily sortable by location.

9 PWSA submitted data on the complaint categories (issues) as shown on Exhibit
10 TLF-3SR and provided that information on an Excel spreadsheet; but it was not
11 sortable by house number, street, and zip code. It is my understanding that (1)
12 Spry Mobile was used to capture the information by “key words” for each category
13 (issue) that was stored in every customer’s file and (2) with great difficulty some
14 other method was used put that information into an Excel format for submission as
15 a complaint log.

16 The Spry Mobile complaint log is not complete because there are many other
17 consumer non-billing issues that have not been sorted by the “key words”.

18 Also, there may be a difference of opinion regarding what is or is not a complaint.

19
20 **Q. DO HAVE ANY SUGGESTIONS?**

21 A. Yes. If PWSA continues using Spry Mobile for developing a complaint log, it is
22 possible to reduce the number of Categories that need to be sorted by house

1 number, street, and zip code; but all other non-billing customer interaction must be
2 made available for sorting by other “key words” in some readily available format.

3 **PUBLIC INPUT HEARING TESTIMONY**

4 **Q. DID YOU REVIEW MS. MECHLING’S REBUTTAL TESTIMONY REGARDING**
5 **PWSA’S RESPONSES TO WITNESS TESTIMONY AT THE PUBLIC INPUT**
6 **HEARINGS?**

7 A. Yes. PWSA’s responses were acceptable.

8

9 **Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?**

10 A. Yes. I reserve the right to revise this testimony if new or newly discovered
11 information becomes available.

**Exhibit TLF-1SR
(2023 Project Summary)**

2023-2027 Project Summary

Water Pumping and Storage

Bruecken Pump Station Improvements

PROJECT NUMBER: 2017-323-106-0

DSIC Eligible: No

PHASE: Construction – Project Close
PRIORITY: Regulatory Compliance, Safety, Operating Efficiency, Quality of Service
PROJECT DESCRIPTION: Replacement of aged pump and valve equipment, electrical equipment, HVAC, auxiliary systems, and rehabilitation of the building architectural and energy management systems.
PROJECT JUSTIFICATION: The pump station was constructed in 1931. The pump station is in need of renovations and upgrades to maintain service, restore a 20 to 25 year useful life expectancy, and to provide safer conditions for staff. Additionally, installation of variable frequency drives will reduce water pressure surges during start-up, allow the pumps to operate more efficiently over a wide range of flow demands, and will reduce the required size of the new Clearwell.
RISK(S): Exposes PWSA to higher capital costs to address emergency facility failures and its customers to a potentially deficient water supply.
IMPACT ON OPERATIONS: Increased operating efficiency, flexibility, reliability, and improved safety conditions for staff.

<u>CASH FLOW SUMMARY</u>							<u>FUNDING SOURCE(S)</u>
	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>FY 2027</u>	<u>Total</u>	
Annual Allocation	\$8,653,054	\$30,991,126	\$30,991,126	\$31,037,546	\$5,188,398	\$106,861,250	WIFIA/PENN VEST

Water Pumping and Storage

Highland 1 Reservoir Liner

PROJECT NUMBER: 2026-300-100-0

DSIC Eligible: No

PHASE: Not Started – Project Close
PRIORITY: Regulatory Compliance, Safety, Operating Efficiency, Quality of Service, Organizational Goals, Social Impact
PROJECT DESCRIPTION: Replacement of existing Highland 1 Reservoir liner.
PROJECT JUSTIFICATION: The reservoir liner is past it's useful design life and is in need of replacement.
RISK(S): Failure to replace the liner could result an emergency repairs or replacement.
IMPACT ON OPERATIONS: Increased operating efficiency, flexibility, reliability, and life expectancy,.

<u>CASH FLOW SUMMARY</u>							<u>FUNDING SOURCE(S)</u>
	<u>FY 2023</u>	<u>FY 2024</u>	<u>FY 2025</u>	<u>FY 2026</u>	<u>FY 2027</u>	<u>Total</u>

LIST OF EVIDENCE TO BE ADMITTED INTO THE EVIDENTIARY RECORD BY THE OFFICE OF SMALL BUSINESS ADVOCATE

The Office of Small Business Advocate (“OSBA”) intends to admit the following evidence into the evidentiary record in the above-captioned proceeding at the evidentiary hearings currently scheduled for October 4th, 2023 through October 6th, 2023:

- **DIRECT TESTIMONY**: OSBA Direct Testimony and Exhibits of Kevin Higgins labelled as OSBA Statement No. 1, including 21 pages of Testimony and Exhibits KCH-1 through KCH-4 and Mr. Higgins’ signed verification.
- **REBUTTAL TESTIMONY**: OSBA Surrebuttal Testimony of Kevin Higgins, labeled as OSBA Statement No. 1-R, including four pages of Testimony and Mr. Higgins signed verification .
- **SURREBUTTAL TESTIMONY**: OSBA Surrebuttal Testimony of Kevin Higgins labeled as OSBA Statement No. 1-S, including five pages of Testimony and Mr. Higgins signed verification .

OSBA Hearing Exhibit List & Testimony to be Admitted on the Record

The evidence listed is enclosed herein and included as part of **OSBA HEARING EXHIBIT & TESTIMONY TO BE ADMITTED ON THE RECORD.**

OSBA STATEMENT NO. 1

Direct Testimony of Kevin C. Higgins

on behalf of the

Pennsylvania Office of Small Business Advocate

Topics:

Revenue Requirement Adjustments for Workforce Expense and Inflation

Distribution System Improvement Charge

Customer Assistance Charge

Date Served: August 9, 2023

Date Submitted for the Record:

1 **DIRECT TESTIMONY OF KEVIN C. HIGGINS**

2

3 **Section I - Introduction**

4 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

5 A. My name is Kevin C. Higgins. My business address is 111 East Broadway, Suite
6 1200, Salt Lake City, Utah, 84111.

7 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

8 A. I am a Principal in the firm of Energy Strategies, LLC. Energy Strategies is a
9 private consulting firm specializing in economic and policy analysis applicable to
10 energy production, transportation, and consumption.

11 **Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?**

12 A. My testimony is being sponsored by the Pennsylvania Office of Small Business
13 Advocate (“OSBA”).

14 **Q. PLEASE DESCRIBE YOUR PROFESSIONAL EXPERIENCE AND**
15 **QUALIFICATIONS.**

16 A. My academic background is in economics, and I have completed all coursework
17 and field examinations toward the Ph.D. in Economics at the University of Utah.
18 In addition, I have served on the adjunct faculties of both the University of Utah
19 and Westminster College, where I taught undergraduate and graduate courses in
20 economics. I joined Energy Strategies in 1995, where I assist private and public
21 sector clients in the areas of energy-related economic and policy analysis,
22 including evaluation of electric and gas utility rate matters.

1 Prior to joining Energy Strategies, I held policy positions in state and local
2 government. From 1983 to 1990, I was an economist, then assistant director, for
3 the Utah Energy Office, where I helped develop and implement state energy
4 policy. From 1991 to 1994, I was chief of staff to the chairman of the Salt Lake
5 County Commission, where I was responsible for development and
6 implementation of a broad spectrum of public policy at the local government
7 level. My qualifications are attached in the Appendix to this testimony.

8 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THIS COMMISSION?**

9 A. Yes. In 2006, I testified in a proceeding concerning the rate transition plans filed
10 by Metropolitan Edison Company and Pennsylvania Electric Company, Docket
11 Nos. P-00062213 et al. In 2022, I filed testimony on behalf of the Pennsylvania
12 OSBA on revenue requirement issues in the Leatherstocking Gas Company LCC
13 general rate case, Docket No. P. R2022-3032764. And earlier this year, I
14 testified in National Fuel Gas Distribution Corporation's 2022 General Base Rate
15 Increase Filing, Docket No. R2022-3035730, and Pennsylvania American Water
16 Company's acquisition of Butler Area Sewer Agency proceeding, Docket No. A-
17 2022-3037047.

18 **Q. HAVE YOU TESTIFIED BEFORE UTILITY REGULATORY**
19 **COMMISSIONS IN OTHER STATES?**

20 A. Yes. I have testified in approximately 285 proceedings on the subjects of utility
21 rates and regulatory policy before state utility regulators in Alaska, Arizona,
22 Arkansas, Colorado, Florida, Georgia, Idaho, Illinois, Indiana, Kansas, Kentucky,
23 Michigan, Minnesota, Missouri, Montana, Nevada, New Mexico, New York,

1 North Carolina, Ohio, Oklahoma, Oregon, South Carolina, Texas, Utah, Virginia,
2 Washington, West Virginia, and Wyoming. I have also filed affidavits in
3 proceedings before the Federal Energy Regulatory Commission and prepared
4 expert reports in state and federal court proceedings involving utility matters.

5 **Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY IN THIS**
6 **PROCEEDING?**

7 A. My testimony addresses components of the PWSA revenue requirement for the
8 fully projected future test year “FPFTY” comprised of the period from January 1,
9 2024 through December 31, 2024 (FPFTY 2024) as well as the following two
10 future years comprised of the periods from January 1, 2025 through December 31,
11 2025 (FY 2025) and January 1, 2026 through December 31, 2026 (FY 2026). I
12 also make a recommendation regarding the Distribution System Improvement
13 Charge (“DSIC”). In addition, I address the proper way of allocating PWSA’s
14 Customer Assistance Program (“CAP”) costs in FPFTY 2024, FY 2025, and FY
15 2026. The absence of comment on my part regarding a particular issue does not
16 signify support for (or opposition to) the filing with respect to that issue.

17 **Q. ARE YOU MAKING A RECOMMENDATION FOR A SPECIFIC TOTAL**
18 **REVENUE REQUIREMENT IN THIS CASE?**

19 A. No. My revenue requirement recommendations address a limited number of
20 issues. Therefore, I am not offering a recommendation for a specific total
21 revenue requirement.

22 **Q. PLEASE SUMMARIZE YOUR PRIMARY CONCLUSIONS AND**
23 **RECOMMENDATIONS CONCERNING REVENUE REQUIREMENT.**

1 A. I offer the following conclusions and recommendations:

2 1) PWSA’s method of adding labor expenses related to new hires in FPFTY
3 2024 and FY 2025 is an oversimplification and will likely lead to customers
4 paying for new employees before they are hired. My adjustment smooths out the
5 roll out of projected new hires evenly throughout the year rather than assuming all
6 of a year’s new hires begin employment on January 1, as PWSA implicitly
7 assumes. My adjustment results in a revenue requirement reduction of
8 \$1,252,079 in FPFTY 2024 and \$659,330 in FY 2025.

9 2) In some departments, PWSA is building in wage adjustments that are
10 significantly in excess of its planned employee count and its stated cost-of-living
11 adjustments, particularly in FPFTY 2024. Adhering to PWSA’s stated cost of
12 living adjustment of 3% in FPFTY 2024, 3% in FY 2025, and 5% in FY 2026,
13 rather than the excess wage adjustments incorporated into PWSA’s requested
14 revenue requirement, will reduce the revenue requirement by \$1,864,109 in
15 FPFTY 2024, \$1,957,596 in FY 2025, and \$2,088,442 in FY 2026.

16 3) Adjusting the roll out rate of new hires will also affect certain general
17 ledger (“GL”) accounts related to employee count. This adjustment will reduce
18 revenue requirement by \$678,765 in FPFTY 2024, \$565,852 in FY 2025, and
19 \$440,204 in FY 2026.

20 4) The generic inflation escalator of 6% applied by PWSA to non-labor, non-
21 chemical O&M expenses in FPFTY 2024, FY 2025, and FY 2026 is unwarranted
22 and should be removed. Removing the generic escalator will reduce revenue

1 requirement by \$4,143,358 in FPPTY 2024, \$7,491,750 in FY 2025, and
 2 \$12,266,358 in FY 2026.

3 Table KCH-1 summarizes my recommended revenue requirement
 4 adjustments. I will explain these adjustments in Section II of my testimony.

5
 6
 7
 8

**Table KCH-1
 OSBA Revenue Requirement Adjustments**

Adjustment Description	FPPTY 2024	FY 2025	FY 2026	Total
PWSA Requested Increase*	\$46,507,280	\$44,131,754	\$52,603,707	\$143,242,741
New Hire Roll Out Adjustment	(\$1,252,079)	(\$659,330)	\$0	(\$1,911,409)
Cost of Living Adjustment	(\$1,864,109)	(\$1,957,596)	(\$2,088,442)	(\$5,910,147)
Other Employee Related Adjustment	(\$678,765)	(\$565,852)	(\$440,204)	(\$1,684,821)
Inflation Adjustment	(\$4,143,358)	(\$7,491,750)	(\$12,266,358)	(\$23,901,466)
Total OSBA Adjustments	(\$7,938,311)	(\$10,674,528)	(\$14,795,005)	(\$33,407,844)

9 *PWSA Exh WJP-1 Rate Case Tables, Worksheet I, Row 26

10

11 **Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS CONCERNING**
 12 **THE DISTRIBUTION SYSTEM IMPROVEMENT CHARGE.**

13 A. I recommend capping the Distribution System Improvement Charge at the current
 14 level of 5% as discussed in Section III of my testimony.

15 **Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS CONCERNING**
 16 **THE ALLOCATION OF THE CUSTOMER ASSISTANCE PROGRAM**
 17 **COST'S IN FPPTY 2024 AND THE PROPOSED CUSTOMER**
 18 **ASSISTANCE CHARGE STARTING IN FY 2025.**

1 A. The customer assistance program exists solely for the benefit of the residential
2 class and therefore should be recovered solely by residential customers. I will
3 explain this recommendation in Section IV of my testimony.

4

5 **Section II - Revenue Requirement Adjustments**

6 **Q. BRIEFLY DESCRIBE THE REVENUE REQUIREMENT INCREASE**
7 **BEING REQUESTED BY PWSA IN THIS CASE.**

8 A. PWSA is seeking a multi-year revenue requirement increase of \$146.1 million,
9 inclusive of DSIC. The overall requested increase includes \$46.8 million in fully
10 projected future test year “FPFTY” 2024, \$45.4 million in FY 2025, and \$53.9
11 million in FY 2026¹. This amounts to average increases of 22.5% in FY 2024,
12 17.8% in FY 2025, and 17.9% in FY 2025. As a municipal utility, PWSA utilizes
13 the “Cash Flow Method” to establish revenue requirement for its fully projected
14 future test year ending December 31, 2024 based off of the partially projected test
15 year ending December 31, 2023. Future years ending December 31, 2025 and
16 December 31, 2026 are derived from FPFTY 2024 using assumed escalation
17 factors.

18 **Q. BRIEFLY DESCRIBE THE NEW CHARGES THAT PWSA IS**
19 **PROPOSING IN THIS CASE THAT WOULD BE ADDED TO BASE**
20 **RATES.**

21 A. PWSA is proposing to add two new charges: (1) an Infrastructure Improvement
22 Charge (“IIC”) and (2) a Customer Assistance Charge (“CAC”). The IIC is

¹ Direct Testimony of Edward Barca, pg. 4

1 intended to recover debt service obligations for new loans received from the
2 Pennsylvania Infrastructure Investment Authority (“PENNVEST”) and the federal
3 government loan program known as the Water Infrastructure Finance and
4 Innovation Act (“WIFIA”) between rate case filings. The CAC is being proposed
5 to recover certain costs associated with the residential Customer Assistance
6 Program². Both charges are proposed to being in FY 2025. As proposed, the IIC
7 would be charged to Water and Wastewater customers, and the CAC would be
8 collected from Water, Wastewater, and Stormwater customers. Although not part
9 of the CAC, PWSA is also proposing to collect certain Customer Assistance
10 Program costs, not before approved by the Commission, in base rates from retail
11 customers in FPFTY 2024.

12 **Q. WHAT ADJUSTMENT ARE YOU PROPOSING WITH RESPECT TO**
13 **LABOR EXPENSES INCURRED AS THE RESULT OF NEW HIRES?**

14 A. I am proposing reducing in half the expenses for new hires in the first year of
15 service and then including the full expense in the first full year of their
16 employment.

17 **Q. PLEASE EXPLAIN THE BASIS FOR YOUR ADJUSTMENT.**

18 A. PWSA is proposing a rather large increase in work force by adding 33 new
19 employees in FPFTY 2024 and 19 more in FY 2024³. PWSA is requesting
20 revenue requirement increases of \$2,504,158 in FPFTY 2024 and \$1,318,660 in
21 FY 2025 to cover salaries.⁴ As illustrated in PWSA’s response to the Bureau of

² Direct Testimony of Julie A. Mechling, pgs. 27-28

³ Direct Testimony of Edward Barca, pg.18

⁴ See OSBA Exhibit KCH-1, pgs. 1-2

1 Investigation and Enforcement, all the new employees are assumed by PWSA to
 2 begin employment in January of the respective year.⁵ A more reasonable
 3 approach is to assume the new hires are rolled out smoothly throughout the year,
 4 which is equivalent to assuming they begin mid-year. This treatment is supported
 5 by a review of the historical years 2020-2023, as shown in Table KCH-2, below,
 6 which clearly shows that employees are hired in every month of the year.

7 **Table KCH-2**
 8 **Historical Net Change in Employee Count by Month**

Month	2020	2021	2022
January	0	-3	1
February	4	2	1
March	8	-1	2
April	2	0	7
May	-2	-1	2
June	-1	7	8
July	-2	7	-4
August	-1	6	-1
September	4	4	4
October	0	3	-3
November	3	2	6
December	-2	-3	2

9
 10 **Q. PLEASE EXPLAIN YOUR ADJUSTMENT.**

11 A. To make the adjustment in 2024, I have reduced the requested \$2,504,158 for
 12 FPFTY 2024 by 50%. In FY 2025, I included the full \$2,504,158 for employees
 13 hired in 2024 and reduced salaries for new hires in 2025 by 50% to reflect a
 14 continuous roll out of the new hires. In FY 2026, I included the full \$1,318,600
 15 for employees hired in 2025. No new employees were added in 2026 so no partial

⁵ See OSBA Exhibit KCH-1, pg. 3

1 year adjustments were needed in 2026. Please see OSBA Workpaper 1 – New
2 Hire Rollout & Cost of Living Adjustment for my calculations.

3 **Q. WHAT IS THE IMPACT OF THIS ADJUSTMENT?**

4 A. As reported in Table KCH-1, above, this adjustment results in a revenue
5 requirement reduction in GL account 4001-Salary Wages of \$1,252,079 in
6 FPPTY 2024 and a reduction of \$659,300 in 2025.

7 **Q. IS THIS THE ONLY ADJUSTMENT YOU ARE RECOMMENDING FOR**
8 **GL ACCOUNT 4001 SALARY WAGES?**

9 A. No. PWSA’s response to I&E RE-24-D states that the two underlying factors
10 causing year-over-year increases are 1) workforce expansion and 2) annual cost of
11 living increases.⁶ I attempted to reconcile projected expenses in GL Account
12 4001 using PWSA’s stated costs of living increases of 3% in FY 2024, 3% in FY
13 2025 and 5% in FY 2026, but it appears the cost of living escalators PWSA is
14 using are higher than their stated rates, especially in FY 2024. My adjustment
15 utilizes PWSA’s stated cost of living increases. Please see OSBA Workpaper 1 –
16 New Hire Rollout & Cost of Living Adjustment for my calculations.

17 **Q. WHAT IS THE IMPACT OF THIS ADJUSTMENT?**

18 A. As reported in Table KCH-1, above, this adjustment results in a revenue
19 requirement reduction in GL account 4001-Salary Wages of \$1,864,109 in
20 FPPTY 2024, \$1,957,596 in FY 2025, and \$2,088,442 in FY 2026.

21 **Q. WERE ANY OTHER GL ACCOUNTS IMPACTED BY YOUR**
22 **ADJUSTMENTS FOR EMPLOYEE ROLL OUT AND COST OF LIVING?**

⁶ See OSBA Exhibit KCH-1, pg. 4

1 A. Yes. I also made conforming adjustments to the following GL accounts:

- 2 • 4005-OT Premium Pay
- 3 • 4010-Shift Differential
- 4 • 4025-Bonus
- 5 • 4030-Holiday Pay
- 6 • 4035-Vacation Pay
- 7 • 4050-Personal Time Pay

8
9 These GL accounts are directly tied to underlying employee counts. In shifting the
10 new hires from January to a continuous roll out and using PWSA's stated cost of
11 living increase, it was also necessary to adjust the expenses in these accounts.

12 This adjustment conforms to the methodology used by PWSA in the FPFTY 2024
13 COS and Rate Design Model ⁷.

14 **Q. WHAT IS THE REVENUE REQUIREMENT IMPACT OF THIS**
15 **CONFORMING ADJUSTMENT TO GL ACCOUNTS 4005, 4010, 4025,**
16 **4030, 4035, 4050?**

17 A. As reported in Table KCH-1, above, this adjustment reduces revenue requirement
18 \$678,765 in FPFTY 2024, \$565,852 in FY 2025, and \$440,204 in FY 2026.

19 **Q. PLEASE SUMMARIZE THE AGGREGATE IMPACT OF YOUR**
20 **ADJUSTMENTS RELATED TO NEW HIRES ROLL OUT AND COST OF**
21 **LIVING ESCALATION.**

22 A. Taken together, the impact of these adjustments is a reduction of revenue
23 requirement of \$3,794,953 in FPFTY 2024, \$3,128,778 in FY 2025, and
24 \$2,528,647 in FY 2026, as shown in Table KCH-3, below.

25

⁷ See FPFTY 2024 COS and Rate Design Model as shared 5.9.23, worksheets 910 through 931, column G

Table KCH-3
OSBA Revenue Requirement Adjustments Related to Accounts 4001-4050

Description of Adjustment	GL Account	FPFTY 2024	FY 2025	FY 2026
Change new hire date from January to mid-year	4001	\$ (1,252,079)	\$ (659,330)	\$ -
Cost of Living escalation of 3% in 2024, 3% in 2025, and 5% in 2026	4001	\$ (1,864,109)	\$ (1,957,596)	\$ (2,088,442)
Adjustment to reflect same escalation for account 4001	4005, 4010, 4025, 4030, 4035, 4050	\$ (678,765)	\$ (565,852)	\$ (440,204)
Total		\$ (3,794,953)	\$ (3,182,778)	\$ (2,528,647)

My calculations for these adjustments are included in OSBA Workpaper 2 – PWSA FPFTY 2024 COS and “Rate Design Model as shared 5.9.23 – RR Adj 0% Inflation.”

Q. WHAT ADJUSTMENT ARE YOU PROPOSING WITH RESPECT TO GENERIC O&M INFLATION?

A. I am proposing removing PWSA’s generic 6% O&M escalator that is used for most GL accounts that are not related to salaries, benefits, or chemicals in FPFTY 2024, FY 2025, and FY 2026. I am not proposing any adjustments to escalation rates for chemicals in GL accounts 5005 – 5085 or employee benefits in GL accounts 4110 – 4170.

Q. PLEASE EXPLAIN THE BASIS FOR YOUR ADJUSTMENT.

A. Except for costs related to salaries, benefits and chemicals, most O&M expenses projected by PWSA for FPFTY 2024, FY 2025 and FY 2026 contain a generic cost escalation component to reflect projected inflation of 6%. To apply this cost escalator, PWSA starts with its partially projected future test year of 2023 and

1 then applies the 6% escalation factor to arrive at costs for the fully projected
2 future test year in 2024 and then applies the 6% escalation factor again for FY
3 2025 values, and then applies 6% one more time to arrive at the FY 2026 values.

4 From a ratemaking perspective, I have serious concerns with this
5 approach. First, at a broad policy level, I have concerns about regulatory pricing
6 formulations that reinforce inflation. This occurs when *projections* of inflation
7 are built into formulas that are used to set administratively-determined prices,
8 such as utility rates. Such pricing mechanisms help to make inflation a self-
9 fulfilling prophecy. As a matter of public policy, this is a serious concern. It is
10 one thing to adjust for inflation after the fact; it is another to help guarantee it.
11 For this reason, I believe that regulators should use extreme caution before
12 approving prices that guarantee inflation before it occurs. In this case, the
13 situation is exacerbated by the fact that PWSA is seeking a multi-year approval of
14 rates.

15 The best evidence of what it costs PWSA for non-labor, non-chemical
16 O&M is the Company's actual costs recorded in the base period, adjusted for
17 certain known and measurable changes. The cost increases represented by the
18 escalation factors may or may not come to fruition. In any case, PWSA should be
19 expected to strive to improve its O&M efficiency on a continuous basis, and
20 thereby lessen the net impact of inflation on its O&M costs.

21 **Q. DO YOU HAVE ADDITIONAL CONCERNS REGARDING PWSA'S**
22 **INFLATION ADJUSTMENT?**

1 A. Yes. The cumulative level of generic inflation that PWSA is attempting to build
2 into its rates over a three-year period – 19.1% – is unwarranted and unreasonable.
3 According to PWSA, its annual escalation factor of 6% was estimated by
4 considering inflation that occurred in 2021, 2022 and through the end of March
5 2023.⁸ However, it is not justifiable to roughly extrapolate the inflation results
6 from that anomalous period and assume that high inflation will persist for the
7 three years 2024-2026 – and then to seek to build those higher costs into customer
8 utility rates.

9 **Q. ARE THERE INDICATIONS THAT FUTURE INFLATION IS LIKELY**
10 **TO BE WELL BELOW THE ESCALATORS USED BY PWSA IN ITS**
11 **FILING?**

12 A. Yes. There are now indications that inflation is easing as Federal policymakers
13 have been taking aggressive action to get inflation under control. Since March of
14 2022, the Federal Reserve has increased the Federal Funds Rate eleven times
15 taking the rate from 0.25% to 5.50%, including a 0.25% increase in the most
16 recent July meeting. Public material from the July meeting is not yet available so I
17 refer to the notes from the June 2023 meeting in my testimony.

18 In the June 2023 Federal Open Market Committee meeting, the committee
19 did not raise rates, determining it was expedient to provide additional time to
20 observe the effects of cumulative tightening and assess their implications for
21 policy. In short, the Fed wants to make sure that past policy decisions were not
22 going to plunge the economy into a recession, or a so-called “hard landing.” In

⁸ See OSBA Exhibit 1, pg. 5

1 the June meeting, 15 of 18 participants projected that PCE, or personal
2 consumption expenditures, the Fed’s preferred measure of inflation will be below
3 2.8% in 2024. All 18 members projected that the PCE would be below 3.0% in
4 2025 and will be closer to the target of 2.0% beyond 2025. All members
5 confirmed that they are strongly committed to returning inflation to their 2%
6 objective.⁹ Please refer to OSBA Exhibit KCH-2 for an illustration of the
7 distribution of FOMC participants projections for PCE inflation in 2024, 2025, and
8 longer term.

9 On July 12, 2023 the Bureau of Labor Statistics (“BLS”) released the
10 Consumer Price Index for All Urban Consumer (“CPI-U”), another closely
11 watched inflation metric. Based on the June release, the index increased 3.0%
12 over the last 12 months before seasonal adjustments. As noted in the BLS
13 announcement, this was the smallest 12-month increase since the period ending
14 March 2021.¹⁰

15 **Q. WHAT IS THE REVENUE REQUIREMENT IMPACT OF REMOVING**
16 **THE GENERIC NON-LABOR, NON-CHEMICAL O&M ESCALATION?**

17 A. Removing the generic 6% escalation rate will reduce revenue requirement
18 \$4,143,358 in FPFTY 2024, \$7,491,750 in FY 2025, and \$12,266,358 in FY
19 2026, as shown in Table KCH-4, below.

Table KCH-4
Revenue Requirement Impacts of Removing Generic 6% Inflation

<u>GL Account(s)</u>	<u>FPFTY 2024</u>	<u>FY 2025</u>	<u>FY2026</u>
Multiple	\$ (4,143,358)	\$ (7,491,750)	\$ (12,266,358)

OSBA Exhibit KCH-3 shows the impacts of removing the 6% inflation factor in more detail by operating expense sub-accounts. My calculations are included in OSBA Workpaper 2 – PWSA FPFTY 2024 COS and “Rate Design Model as shared 5.9.23 – RR Adj 0% Inflation.”

Q. IF THE COMMISSION IS INCLINED TO APPROVE A GENERIC NON-LABOR, NON-CHEMICAL O&M ESCALATION RATE, WHAT IS THE MAXIMUM ESCALATION RATE THAT SHOULD BE ALLOWED?

A. Based upon the policy intentions of the Federal Open Market Committee to tame inflation as well as the recent CPI-U results, the escalation rate for non-labor, non-chemical O&M should be limited to no greater than 3%. However, my primary recommendation is to remove the inflation escalators entirely from PWSA’s proposed revenue requirement.

Section III – Other Funding Mechanisms

Q. WHAT IS THE DISTRIBUTION SYSTEM IMPROVEMENT CHARGE?

A. The Distribution System Improvement Charge (“DSIC”) is an alternative funding mechanism or revenue source that is assessed as a percentage of revenues collected in base rates from Water and Wastewater retail customers. DSIC

1 revenues are used to fund capital improvement projects. The DSIC is currently set
2 at 5%. In this case, PWSA is proposing to increase the rate to 7.5%

3 **Q. WHAT RECOMMENDATIONS DO YOU HAVE REGARDING PWSA’S**
4 **PROPOSALS CONCERNING THE DISTRIBUTION SYSTEM**
5 **IMPROVEMENT CHARGE?**

6 A. I recommend capping the DSIC at the current level of 5%.

7 **Q. PLEASE EXPLAIN.**

8 A. In this rate case, PWSA is already seeking approval for a three-year rate plan with
9 significant increases in revenue requirement. In PWSA Statement No. 2,
10 Company witness Edward Barca states that, “A multi-year filing permits a better
11 alignment with the levels of expenses and revenues that are reasonably expected
12 to be experienced in the years following the fully projected test year.”¹¹ With the
13 revenue assurance inherent in a multi-year plan, PWSA should be expected to
14 manage within the rates are that pursuant to that plan without resorting to
15 additional extraordinary relief.

16 **Q. WHAT IS THE IMPACT OF THESE RECOMMENDATIONS?**

17 A. Calculating the impacts of capping the DSIC at 5% is a bit of a moving target
18 since the DSIC is assessed as a percentage of revenues and will change based on
19 the underlying revenue requirement. However, based upon the revenue
20 requirement adjustments I am recommending, keeping the DSIC rate at 5% will
21 reduce ratepayer impacts by \$4,840,624 in FPFTY 2024, \$5,692,491 in FY 2025,

¹¹ Direct Testimony of Edward Barca, pg. 45

1 and \$6,715,841 in FY 2026. For calculations, refer to OSBA Workpaper 3 –
2 DSIC Impacts.

3

4 **Section IV – Class Revenue Allocation**

5 **Q. BRIEFLY DESCRIBE PWSA’S PROPOSAL REGARDING RECOVERY**
6 **OF CERTAIN COSTS ASSOCIATED WITH THE CUSTOMER**
7 **ASSISTANCE PROGRAM.**

8 A. PWSA is proposing to collect \$4,663,702 in Customer Assistance Program
9 (“CAP”) costs in FPFTY 2024, \$5,517,017 in FY 2025 and \$6,391,795 as
10 outlined in Table KCH-5

11 **Table KCH-5**
12 **Proposed CAP Costs to be Collected from Customers**

13

Customer Assistance Programs	FPFTY 2024	FY 2025	FY 2026
Forgone Revenue	\$ 4,036,834	\$ 4,651,868	\$ 5,494,825
Direct Operations Costs	\$ 386,869	\$ 408,830	\$ 440,650
Hardship Grant	\$ -	\$ 216,320	\$ 216,320
Arrearage	\$ 240,000	\$ 240,000	\$ 240,000
Total Costs	\$ 4,663,702	\$ 5,517,017	\$ 6,391,795

14

15
16 **Q. HOW DOES PWSA PROPOSE TO COLLECT THESE COSTS?**

17 A. PWSA is proposing to collect the FPFTY 2024 CAP costs shown in Table KCH-5
18 through base rates and is proposing a new charge called the Customer Assistance
19 Charge (“CAC”) to collect these costs in FY 2025 and FY 2026. The costs
20 associated with PWSA’s Customer Assistance Programs benefit residential

1 customers only; however, PWSA is proposing to collect these costs from all
2 customer classes.

3 **Q. BRIEFLY DESCRIBE PWSA’S PROPOSAL REGARDING THE NEW**
4 **CUSTOMER ASSISTANCE CHARGE IN THIS RATE CASE.**

5 A. As designed, the CAC would recover (1) the discounts provided to residential
6 customers pursuant to the Bill Discount Program, (2) the operating costs for the
7 PGH2O Cares team, (3) the costs of PWSA’s residential Hardship Fund, and (4)
8 past due arrearages that would be forgiven pursuant to PWSA’s residential
9 Arrearage Forgiveness Program¹².

10 **Q. ARE THESE CUSTOMER ASSISTANCE PROGRAMS NEW?**

11 A. No, these customer assistance programs are not new. However, collecting CAP
12 costs in base rates in FPFTY 2024 and the proposed CAC are new and are being
13 introduced as PSWA is also proposing to expand some of the programs. Since
14 coming under Commission jurisdiction in 2018, PWSA has advocated having
15 these costs recovered in rates from all customer classes, but doing so would be a
16 change to past Commission precedent.

17 **Q. WHAT DO YOU PROPOSE IN REGARD TO CUSTOMER ASSISTANCE**
18 **PROGRAM COSTS IN FPFTY 2024 AND THE RECOVERY OF CAC IN**
19 **FY 2025 AND FY 2026?**

20 A. My recommendation is that all CAP costs (including CAC in FY 2025 and FY
21 2026) should be recovered solely by the residential class.

22 **Q. PLEASE EXPLAIN THE BASIS FOR YOUR RECOMMENDATION.**

¹² Direct testimony of William J. Pickering, pg. 15

1 A. Consistent with cost allocation principles, customer class should bear the cost of
2 services that directly benefit them. Non-residential customers pay their utility bills
3 based on their usage and requirements, and it is reasonable for them to expect that
4 their payments to support services related to their own consumption, not
5 residential assistance.

6 **Q. DOES THE COMMISSION HAVE A POLICY ON ALLOCATING**
7 **UNIVERSAL SERVICE COSTS?**

8 A. It is my understanding that the Commission has had a longstanding policy of
9 allocating customer assistance program costs only to the customer class whose
10 members are eligible for the program – residential customers. However, more
11 recently the Commission has indicated it would consider recovering the costs of
12 customer assistance programs from all ratepayer classes in utility-specific
13 proceedings in an effort to maintain affordability for non-CAP residential
14 customers.

15 **Q. WHAT WOULD BE THE IMPACT ON EACH CUSTOMER CLASS IN**
16 **FPFTY 2024 IF ALL CAP RELATED COSTS WERE RECOVERED BY**
17 **THE RESIDENTIAL CLASS?**

18 A. The Residential Class would be required to collect an additional \$2,650,585 or
19 2.8%. All other classes would be reduced as shown in Table KCH-6, below.

20

Table KCH-6
Class Impact of Allocating FPFTY 2024 CAP Costs to Residential

Customer Class	Increase/(Decrease)	% Change
Residential	\$ 2,650,585	2.8%
Residential - CAP	\$ (6,768)	-0.3%
Commercial	\$ (1,730,862)	-2.0%
Industrial	\$ (96,848)	-2.3%
Health or Education	\$ (572,450)	-1.8%
Municipal	\$ (131,853)	-1.9%
All Other	\$ (111,803)	-1.0%
Total	\$ -	0%

Q. HAVE YOU QUANTIFIED THE AVERAGE MONTHLY COST TO NON-CAP RESIDENTIAL CUSTOMERS ASSUMING PWSA’S NEWLY PROPOSED CAC WAS RECOVERED SOLELY FROM NON-CAP RESIDENTIAL CUSTOMERS?

A. Yes, I have. These calculations are presented in Exhibit KCH-4. They indicate that if costs associated with the CAC were recovered from non-CAP residential customers, the increase on the monthly bill would be less than \$2.36 in FY 2025 for a customer with two ERUs and would be \$2.74 in FY 2026 for a customer with two ERUs.

My calculations are based on changes made to the PWSA FPFTY COS and “Rate Design Model as shared 5.9.23.” Please see OSBA Workpaper 4 – PWSA FPFTY 2024 COS and “Rate Design Model as shared 5.9.23 – CAP Covered by Residential.”

Q. IN YOUR OPINION, WOULD RECOVERING PWSA’S PROPOSED CAP COSTS FROM NON-CAP RESIDENTIAL CUSTOMERS RENDER

1 **PWSA’S RESIDENTIAL WATER, WASTEWATER, AND**
2 **STORMWATER BILL UNAFFORDABLE?**

3 A. Based on the bill impacts shown in Tables KCH-7 and KCH-8, it would not.

4 **Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

5 A. Yes, it does.

OSBA EXHIBIT KCH-1

Set RE Nos. 21-44
Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919**

Request: I&E-RE-24-D Reference PWSA Volume I, FR-III.1 and the 2024 Cost of Service Study and Rate Design - FR-III.1 Excel file concerning operating expenses by account. Explain in detail any year-over-year increases of \$25,000 and 10% or greater in the following sub-categories of Wages and Salaries Expense for each calendar year from 2020 through 2026 and provide the detailed basis, calculation, and supporting documentation for these expense projections in the FTY, FPFTY, FY 2025 and FY 2026:

- A. Salary and Wages (4001).
- B. OT Premium Pay (4005).
- C. Shift Differential (4010).
- D. Bonus (4025).
- E. Holiday Pay (4030).
- F. Vacation Pay (4035).
- G. Personal Time Pay (4050).

Response:

The two underlying factors that are causing year-over-year increases in the GL accounts listed above is 1) workforce expansion and 2) annual cost of living increases.

PWSA has increased its workforce by approximately 60 employees between 2020 and 2023 with the plans to add an additional 52 positions between the FPFTY and FY 2026. The chart below demonstrates the cost of living increases from 2020 through 2026 by non-union and union employees.

	Actual				Projected		
	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026
Non-Union	3%	3%	3%	3%	3%	3%	5%
PJCBC	3%	3%	3%	3%	3%	3%	5%
AFSCME 2719	3%	2%	0%	4%	3%	3%	5%
AFSCME 2037	3%	3%	3%	3%	3%	3%	5%

Set RE Nos. 21-44
Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919**

- Request: I&E-RE-44-D** Reference PWSA Volume I, FR-III.1 and the 2024 Cost of Service Study and Rate Design - FR-III.1 Excel file concerning operating expenses by account. Provide the following:
- A. Basis, calculation, and supporting documentation for applying a 6% inflation increase to the majority of expenses from FTY to FPFTY.
 - B. Basis, calculation, and supporting documentation for any general inflation increase from FPFTY to FY 2025 and from FY 2025 to FY 2026.

Response: See below.

- A. Basis, calculation, and supporting documentation for applying a 6% inflation increase to the majority of expenses from FTY to FPFTY. – See Testimony St. No. 2, pages 10 and 11. PWSA analyzed historical inflationary rates to find an inflationary rate that was reasonable and just for the FTY to FPFTY. 6% is reasonable when you consider it was 4.70% in 2021, 8.00% in 2022, and 6.89% through the end of March 2023.
- B. Basis, calculation, and supporting documentation for any general inflation increase from FPFTY to FY 2025 and from FY 2025 to FY 2026. – See Testimony St. No. 2, pages 10 and 11. PWSA analyzed historical inflationary rates to find an inflationary rate that was reasonable and just for the FPFTY to FY 2025. 6% is reasonable when you consider it was 4.70% in 2021, 8.00% in 2022, and 6.89% through the end of March 2023.

OSBA STATEMENT NO. 1-R

Rebuttal Testimony of Kevin C. Higgins

on behalf of the

Pennsylvania Office of Small Business Advocate

September 8, 2023

Topics:

Customer Assistance Charge

Customer Assistance Program

Date Served: September 8, 2023

Date Submitted for the Record: _____

1 **REBUTTAL TESTIMONY OF KEVIN C. HIGGINS**

2

3 **Section I - Introduction**

4 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

5 A. My name is Kevin C. Higgins. My business address is 111 East Broadway, Suite
6 1200, Salt Lake City, Utah, 84111.

7 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

8 A. I am a Principal in the firm of Energy Strategies, LLC. Energy Strategies is a
9 private consulting firm specializing in economic and policy analysis applicable to
10 energy production, transportation, and consumption.

11 **Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?**

12 A. My rebuttal is being sponsored by the Pennsylvania Office of Small Business
13 Advocate (“OSBA”).

14 **Q. HAVE YOU PREVIOUSLY SUBMITTED DIRECT TESTIMONY IN THIS**
15 **PROCEEDING?**

16 A. Yes.

17 **Q. WHAT IS THE SUBJECT OF YOUR REBUTTAL TESTIMONY?**

18 A. I will respond to the direct testimony of the following witnesses: (1) Dr. Karl R.
19 Pavlovic on behalf of the OCA; (2) Ms. Vanessa Okum on behalf of BIE, and (3)
20 Mr. Roger D. Colton on behalf of the OCA.

21 **Q. BEFORE PROCEEDING WITH YOUR REBUTTAL, DO YOU HAVE**
22 **ANY PRELIMINARY COMMENTS REGARDING YOUR DIRECT**
23 **TESTIMONY?**

1 A. Yes. On page 21, line 3 of my direct testimony, I erroneously referenced Tables
2 KCH-7 and KCH-8. The reference should instead be to OSBA Exhibit KCH-4.

3

4 **Section II – Customer Assistance Charge**

5 **Q. WHAT DOES OCA WITNESS DR. PAVLOVIC RECOMMEND**
6 **REGARDING PWSA’S PROPOSAL TO INSTITUTE THE CUSTOMER**
7 **ASSISTANCE CHARGE (CAC) STARTING IN FY 2025?**

8 A. In OCA Statement 2, Dr. Pavlovic recommends that the Commission reject
9 PWSA’s proposed Customer Assistance Charge.

10 **Q. WHAT ARGUMENTS DOES DR. PAVLOVIC’S MAKE IN SUPPORT OF**
11 **HIS RECOMMENDATION?**

12 A. Dr. Pavlovic argues that mechanisms that allow for the automatic pass through of
13 costs, commonly called “cost trackers”, weaken a utility’s incentive to control
14 costs. Such mechanisms are generally disfavored by regulators and only
15 appropriate under certain circumstances, namely when costs are (1) largely
16 outside of control of utility, (2) unpredictable and volatile and, (3) substantial and
17 recurring. None of these circumstances are applicable to the customer assistance
18 program costs intended to be collected by the CAC.

19 Dr. Pavlovic also disputes the CAC based on his conclusion that PWSA has
20 made no showing that there are exceptional circumstances that warrant a
21 suspension or waiver of the Public Utility Code to allow a universal service rider.

1 **Q. WHAT DOES BIE WITNESS VANESSA OKUM RECOMMEND**
2 **REGARDING PWSA’S PROPOSAL TO INSTITUTE THE CUSTOMER**
3 **ASSISTANCE CHARGE (CAC) STARTING IN FY 2025?**

4 A. In I&E Statement 2, Ms. Okum also recommends that the CAC be disallowed.

5 **Q. WHY DOES MS. OKUM RECOMMEND THE CAC BE DISALLOWED?**

6 A. Ms. Okum notes that “with the implementation of this charge not proposed before
7 FY 2025, the expectation is that this charge will simple serve as an opportunity to
8 add new revenues between base rate cases”¹ which resembles single-issue
9 ratemaking. Supporting this argument, she notes that PWSA does not propose to
10 keep all program costs with the rider but, instead will use it to adjust for over or
11 under recoveries of the amount included in base rates. Ms. Okum also argues that
12 since the CAC is proposed to be combined with other charges on customer bills, it
13 will reduce transparency.

14 **Q. DO YOU AGREE WITH THE RECOMMENDATIONS MADE BY DR.**
15 **PAVLOVIC AND MS. OKUM?**

16 A. Yes, I agree that the Commission should reject PWSA’s proposed CAC.

17 **Q. WHY DO YOU AGREE?**

18 A. I agree that the CAC is poorly designed, will reduce transparency, and will
19 weaken PWSA’s incentive to control the costs of the customer assistance
20 programs.

¹ BIE Statement No 2, pg. 35, lines 13-15

1 **Section III - Response To OCA Witness Roger Colton**

2 **Q. WHAT SUBJECT MATTER DOES MR. COLTON ADDRESS IN OCA**
3 **STATEMENT 4?**

4 A. As stated by Mr. Colton, the purpose of his testimony is “to review the
5 reasonableness of the design and proposed implementation of the low-income bill
6 payment assistance programs offered by the Pittsburgh Water and Sewer
7 Authority (PWSA)”.² As a result of his review, Mr. Colton makes several
8 recommendations on how to enhance and/or expand components of PWSA’s
9 customer assistance programs some of which are intended to expand eligibility
10 and to increase enrollment and retention.

11 **Q. DO YOU SUPPORT THE RECOMMENDATIONS MADE BY MR.**
12 **COLTON IN OCA STATEMENT 4?**

13 A. OSBA neither supports nor opposes the multitude of recommendations made by
14 Mr. Colton, so long as all customer assistance program costs are recovered solely
15 from residential customers.

16 **Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?**

17 A. Yes, it does.

SURREBUTTAL TESTIMONY OF KEVIN C. HIGGINS

Section I - Introduction

Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.

A. My name is Kevin C. Higgins. My business address is 111 East Broadway, Suite 1200, Salt Lake City, Utah, 84111.

Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?

A. I am a Principal in the firm of Energy Strategies, LLC. Energy Strategies is a private consulting firm specializing in economic and policy analysis applicable to energy production, transportation, and consumption.

Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?

A. My surrebuttal is being sponsored by the Pennsylvania Office of Small Business Advocate (“OSBA”).

Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN THIS PROCEEDING?

A. Yes. I have submitted both direct and rebuttal testimony.

Q. WHAT IS THE SUBJECT OF YOUR SURREBUTTAL TESTIMONY?

A. I will respond to the rebuttal testimony of the following witnesses: (1) Mr. Edward Barca, Director of Finance for PWSA; and (2) Mr. Roger Colton on behalf of OCA.

1 Section II – Response to Rebuttal of PWSA Witness Edward Barca

2 **Q. ON PAGE 43 OF HIS REBUTTAL TESTIMONY, MR. BARCA**
3 **DISAGREES WITH OSBA’S ADJUSTMENT TO “ROLL OUT” NEW**
4 **HIRES OVER THE COURSE OF THE TEST YEAR, STATING THAT**
5 **“OSBA IS NOT USING A FULLY FORECASTED TEST YEAR.” HOW**
6 **DO YOU RESPOND?**

7 A. I disagree. Section 315(e) of Pennsylvania Statue Title 66 defines a fully
8 projected future test year (FPFTY) as “the 12-month period beginning with the
9 first month that the new rates will be placed in effect after application of the full
10 suspension period permitted under section 1308 (d).”¹ In this docket, the FPFTY
11 has been designated as the “fully forecasted 12 months ending December 31,
12 2024”² as stated in Mr. Barca’s direct testimony. All of the legitimately projected
13 expenses expected to be incurred over the course of the FPFTY should be
14 included in the revenue requirement, but a FPFTY does not imply that all new
15 employees for that year will be hired on the first day of the year.

16 In calculating my revenue requirement adjustment related to new hires, I
17 relied on PWSA’s employee count projections provided in response to I&E Data
18 Request 3Da, entitled “Budgeted and Actual Employee Counts by Months 2022-
19 2026.” The spreadsheet provided by PWSA as the response includes monthly
20 employee counts by department from January 2020 through December 2026. The
21 data for January 2020 through April 2023 represent actual historical counts³ and

¹ 66 Pa. C.S. § 315(e)

² PWSA St. No. 2, pg. 8

³ In Statement 1, pg. 26, PWSA witness William J. Pickering states that “PWSA has 393 employees as of April 23, 2023” which closely ties to the 392 value for April 2023 in Data Response I&E RE-3Da.

1 May 2023 through December 2026 represent budgeted projections. The
2 spreadsheet shows that PWSA assumed that the Authority would have 388
3 employees in December 2023 and 421 employees in January 2024, implying that
4 PWSA assumed all 33 new hires in the FPFTY would occur at once. I do not
5 consider such an assumption to be realistic.

6 While Mr. Barca testifies that PWSA's headcount is now 418, he does not
7 reconcile the current headcount with the budgeted projections provided in the
8 previously cited data response to BI&E, nor does he provide any explanation for
9 the difference.

10 **Q. MR. BARCA CONTENDS THAT PWSA WILL NOT PASS THE**
11 **ADDITIONAL BONDS TEST IF THE FPFTY REVENUE**
12 **REQUIREMENT RECOMMENDATIONS OF OSBA WERE ADOPTED.**
13 **DO YOU AGREE?**

14 A. No, I do not.

15 **Q. WHY NOT?**

16 A. Mr. Barca calculated the additional bond test using revenues adjusted by OSBA's
17 recommended reductions but did not make the corresponding reductions to
18 expenses incorporated into my adjusted revenue requirement. The revenue
19 requirement adjustments I recommended in my direct testimony were related to
20 O&M expenses such as new employee costs, PWSA's overstated cost-of-living
21 adjustment, and PWSA's unreasonable inflation adjustment. If revenues and
22 expenses were adjusted based on the recommendations in my direct testimony, all
23 bond tests, including the additional bond test, would be satisfied.

1 **Q. MR. BARCA CONTENDS THAT “OSBA RECOMMENDS THAT PWSA’S**
2 **INFLATION ADJUSTMENTS BE REMOVED IN THEIR ENTIRETY.”⁴**

3 **WHAT IS YOUR RESPONSE?**

4 A. While I recommend removing PWSA’s 6% generic inflation factor, I did not
5 make any adjustments to the 20% inflation factor that was applied to chemicals
6 (GL Accounts 5005 – 5085), nor did I recommend adjusting the escalation factors
7 applied to employee benefits (GL Accounts 4110 – 4175), such as medical health
8 insurance that PWSA assumes will escalate at 13% in 2024, 18% in 2025, and
9 20% in 2026. I also recommended a cost-of-living adjustment for costs
10 associated with Salaries of 3% in 2024, 3% in 2025, and 5% in 2026 that was
11 equal to the company’s projected annual cost of living increases provided in
12 response to I&E-RE-24-D data request. I stand by my recommendation that the
13 Commission reject PWSA’s exaggerated generic inflation factor.

14 **Section III - Response to Rebuttal of OCA Witness Roger Colton**

15 **Q. MR. COLTON ASSERTS THAT “EVER SINCE PWSA HAS BECOME**
16 **REGULATED BY THE PUC, AS A MUNICIPAL UTILITY, THE**
17 **COMMISSION HAS APPROVED THE ALLOCATION OF CUSTOMER**
18 **ASSISTANCE PROGRAM (“CAP”) OVER ALL CUSTOMER**
19 **CLASSES.”⁵ DO YOU AGREE WITH THIS CHARACTERIZATION?**

20 A. No. It is my understanding that PWSA initiated its CAP on January 1, 2018. Just
21 three months later, PWSA came under the jurisdiction of the Commission, and the
22 Authority filed its first base rate case under Commission jurisdiction on July 2,

⁴ PWSA St. No. 2-R, pg. 68

⁵ OCA Statement 4R, pg. 3

1 2018. It is also my understanding that prior to the current proceeding, PWSA
2 concluded three base rate cases via black box settlements that did not specifically
3 address cost recovery of CAP costs. While I agree it is correct to state that PWSA
4 has consistently advocated for recovering its CAP costs from all customer classes,
5 it is my understanding that the Commission has not ever ruled on the issue for
6 PWSA.

7 **Q. MR. COLTON CITES SEVERAL PHILADELPHIA GAS WORKS**
8 **(“PGW”) CASES AS LONGSTANDING PRECEDENT FOR**
9 **ALLOCATING UNIVERSAL SERVICE COSTS BY A REGULATED**
10 **MUNICIPAL UTILITY. WHAT IS YOUR REPSONSE.**

11 A. It is my understanding that PGW’s CAP program operated for many years before
12 becoming regulated by the Commission, and that prior to being subject to
13 Commission oversight, PGW collected rates to fund its program from all rate
14 classes except Large Industrial. In contrast, PWSA did not have a long history of
15 operating its BDP-CAP program before becoming regulated by the Commission.
16 Nor has PWSA’s requested universal service budget expanded to the point where
17 its services would be unaffordable for non-CAP customers if universal service
18 costs were to be recovered solely from residential ratepayers. The Commission
19 should decide the issue of universal service cost recovery for PWSA based on the
20 evidence presented in their respective base rate proceedings – not on the basis of
21 how PGW recovers universal service costs.

22 **Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?**

23 A. Yes, it does.

OSBA STATEMENT NO. 1

Direct Testimony of Kevin C. Higgins

on behalf of the

Pennsylvania Office of Small Business Advocate

Topics:

Revenue Requirement Adjustments for Workforce Expense and Inflation

Distribution System Improvement Charge

Customer Assistance Charge

Date Served: August 9, 2023

Date Submitted for the Record:

1 **DIRECT TESTIMONY OF KEVIN C. HIGGINS**

2

3 **Section I - Introduction**

4 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

5 A. My name is Kevin C. Higgins. My business address is 111 East Broadway, Suite
6 1200, Salt Lake City, Utah, 84111.

7 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

8 A. I am a Principal in the firm of Energy Strategies, LLC. Energy Strategies is a
9 private consulting firm specializing in economic and policy analysis applicable to
10 energy production, transportation, and consumption.

11 **Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?**

12 A. My testimony is being sponsored by the Pennsylvania Office of Small Business
13 Advocate (“OSBA”).

14 **Q. PLEASE DESCRIBE YOUR PROFESSIONAL EXPERIENCE AND
15 QUALIFICATIONS.**

16 A. My academic background is in economics, and I have completed all coursework
17 and field examinations toward the Ph.D. in Economics at the University of Utah.
18 In addition, I have served on the adjunct faculties of both the University of Utah
19 and Westminster College, where I taught undergraduate and graduate courses in
20 economics. I joined Energy Strategies in 1995, where I assist private and public
21 sector clients in the areas of energy-related economic and policy analysis,
22 including evaluation of electric and gas utility rate matters.

1 Prior to joining Energy Strategies, I held policy positions in state and local
2 government. From 1983 to 1990, I was an economist, then assistant director, for
3 the Utah Energy Office, where I helped develop and implement state energy
4 policy. From 1991 to 1994, I was chief of staff to the chairman of the Salt Lake
5 County Commission, where I was responsible for development and
6 implementation of a broad spectrum of public policy at the local government
7 level. My qualifications are attached in the Appendix to this testimony.

8 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THIS COMMISSION?**

9 A. Yes. In 2006, I testified in a proceeding concerning the rate transition plans filed
10 by Metropolitan Edison Company and Pennsylvania Electric Company, Docket
11 Nos. P-00062213 et al. In 2022, I filed testimony on behalf of the Pennsylvania
12 OSBA on revenue requirement issues in the Leatherstocking Gas Company LCC
13 general rate case, Docket No. P. R2022-3032764. And earlier this year, I
14 testified in National Fuel Gas Distribution Corporation's 2022 General Base Rate
15 Increase Filing, Docket No. R2022-3035730, and Pennsylvania American Water
16 Company's acquisition of Butler Area Sewer Agency proceeding, Docket No. A-
17 2022-3037047.

18 **Q. HAVE YOU TESTIFIED BEFORE UTILITY REGULATORY**
19 **COMMISSIONS IN OTHER STATES?**

20 A. Yes. I have testified in approximately 285 proceedings on the subjects of utility
21 rates and regulatory policy before state utility regulators in Alaska, Arizona,
22 Arkansas, Colorado, Florida, Georgia, Idaho, Illinois, Indiana, Kansas, Kentucky,
23 Michigan, Minnesota, Missouri, Montana, Nevada, New Mexico, New York,

1 North Carolina, Ohio, Oklahoma, Oregon, South Carolina, Texas, Utah, Virginia,
2 Washington, West Virginia, and Wyoming. I have also filed affidavits in
3 proceedings before the Federal Energy Regulatory Commission and prepared
4 expert reports in state and federal court proceedings involving utility matters.

5 **Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY IN THIS**
6 **PROCEEDING?**

7 A. My testimony addresses components of the PWSA revenue requirement for the
8 fully projected future test year “FPFTY” comprised of the period from January 1,
9 2024 through December 31, 2024 (FPFTY 2024) as well as the following two
10 future years comprised of the periods from January 1, 2025 through December 31,
11 2025 (FY 2025) and January 1, 2026 through December 31, 2026 (FY 2026). I
12 also make a recommendation regarding the Distribution System Improvement
13 Charge (“DSIC”). In addition, I address the proper way of allocating PWSA’s
14 Customer Assistance Program (“CAP”) costs in FPFTY 2024, FY 2025, and FY
15 2026. The absence of comment on my part regarding a particular issue does not
16 signify support for (or opposition to) the filing with respect to that issue.

17 **Q. ARE YOU MAKING A RECOMMENDATION FOR A SPECIFIC TOTAL**
18 **REVENUE REQUIREMENT IN THIS CASE?**

19 A. No. My revenue requirement recommendations address a limited number of
20 issues. Therefore, I am not offering a recommendation for a specific total
21 revenue requirement.

22 **Q. PLEASE SUMMARIZE YOUR PRIMARY CONCLUSIONS AND**
23 **RECOMMENDATIONS CONCERNING REVENUE REQUIREMENT.**

1 A. I offer the following conclusions and recommendations:

2 1) PWSA’s method of adding labor expenses related to new hires in FPFTY
3 2024 and FY 2025 is an oversimplification and will likely lead to customers
4 paying for new employees before they are hired. My adjustment smooths out the
5 roll out of projected new hires evenly throughout the year rather than assuming all
6 of a year’s new hires begin employment on January 1, as PWSA implicitly
7 assumes. My adjustment results in a revenue requirement reduction of
8 \$1,252,079 in FPFTY 2024 and \$659,330 in FY 2025.

9 2) In some departments, PWSA is building in wage adjustments that are
10 significantly in excess of its planned employee count and its stated cost-of-living
11 adjustments, particularly in FPFTY 2024. Adhering to PWSA’s stated cost of
12 living adjustment of 3% in FPFTY 2024, 3% in FY 2025, and 5% in FY 2026,
13 rather than the excess wage adjustments incorporated into PWSA’s requested
14 revenue requirement, will reduce the revenue requirement by \$1,864,109 in
15 FPFTY 2024, \$1,957,596 in FY 2025, and \$2,088,442 in FY 2026.

16 3) Adjusting the roll out rate of new hires will also affect certain general
17 ledger (“GL”) accounts related to employee count. This adjustment will reduce
18 revenue requirement by \$678,765 in FPFTY 2024, \$565,852 in FY 2025, and
19 \$440,204 in FY 2026.

20 4) The generic inflation escalator of 6% applied by PWSA to non-labor, non-
21 chemical O&M expenses in FPFTY 2024, FY 2025, and FY 2026 is unwarranted
22 and should be removed. Removing the generic escalator will reduce revenue

1 requirement by \$4,143,358 in FPPTY 2024, \$7,491,750 in FY 2025, and
 2 \$12,266,358 in FY 2026.

3 Table KCH-1 summarizes my recommended revenue requirement
 4 adjustments. I will explain these adjustments in Section II of my testimony.

5
 6
 7
 8

**Table KCH-1
 OSBA Revenue Requirement Adjustments**

Adjustment Description	FPPTY 2024	FY 2025	FY 2026	Total
PWSA Requested Increase*	\$46,507,280	\$44,131,754	\$52,603,707	\$143,242,741
New Hire Roll Out Adjustment	(\$1,252,079)	(\$659,330)	\$0	(\$1,911,409)
Cost of Living Adjustment	(\$1,864,109)	(\$1,957,596)	(\$2,088,442)	(\$5,910,147)
Other Employee Related Adjustment	(\$678,765)	(\$565,852)	(\$440,204)	(\$1,684,821)
Inflation Adjustment	(\$4,143,358)	(\$7,491,750)	(\$12,266,358)	(\$23,901,466)
Total OSBA Adjustments	(\$7,938,311)	(\$10,674,528)	(\$14,795,005)	(\$33,407,844)

9 *PWSA Exh WJP-1 Rate Case Tables, Worksheet I, Row 26

10

11 **Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS CONCERNING**
 12 **THE DISTRIBUTION SYSTEM IMPROVEMENT CHARGE.**

13 A. I recommend capping the Distribution System Improvement Charge at the current
 14 level of 5% as discussed in Section III of my testimony.

15 **Q. PLEASE SUMMARIZE YOUR RECOMMENDATIONS CONCERNING**
 16 **THE ALLOCATION OF THE CUSTOMER ASSISTANCE PROGRAM**
 17 **COST'S IN FPPTY 2024 AND THE PROPOSED CUSTOMER**
 18 **ASSISTANCE CHARGE STARTING IN FY 2025.**

1 A. The customer assistance program exists solely for the benefit of the residential
2 class and therefore should be recovered solely by residential customers. I will
3 explain this recommendation in Section IV of my testimony.

4

5 **Section II - Revenue Requirement Adjustments**

6 **Q. BRIEFLY DESCRIBE THE REVENUE REQUIREMENT INCREASE**
7 **BEING REQUESTED BY PWSA IN THIS CASE.**

8 A. PWSA is seeking a multi-year revenue requirement increase of \$146.1 million,
9 inclusive of DSIC. The overall requested increase includes \$46.8 million in fully
10 projected future test year “FPFTY” 2024, \$45.4 million in FY 2025, and \$53.9
11 million in FY 2026¹. This amounts to average increases of 22.5% in FY 2024,
12 17.8% in FY 2025, and 17.9% in FY 2025. As a municipal utility, PWSA utilizes
13 the “Cash Flow Method” to establish revenue requirement for its fully projected
14 future test year ending December 31, 2024 based off of the partially projected test
15 year ending December 31, 2023. Future years ending December 31, 2025 and
16 December 31, 2026 are derived from FPFTY 2024 using assumed escalation
17 factors.

18 **Q. BRIEFLY DESCRIBE THE NEW CHARGES THAT PWSA IS**
19 **PROPOSING IN THIS CASE THAT WOULD BE ADDED TO BASE**
20 **RATES.**

21 A. PWSA is proposing to add two new charges: (1) an Infrastructure Improvement
22 Charge (“IIC”) and (2) a Customer Assistance Charge (“CAC”). The IIC is

¹ Direct Testimony of Edward Barca, pg. 4

1 intended to recover debt service obligations for new loans received from the
2 Pennsylvania Infrastructure Investment Authority (“PENNVEST”) and the federal
3 government loan program known as the Water Infrastructure Finance and
4 Innovation Act (“WIFIA”) between rate case filings. The CAC is being proposed
5 to recover certain costs associated with the residential Customer Assistance
6 Program². Both charges are proposed to being in FY 2025. As proposed, the IIC
7 would be charged to Water and Wastewater customers, and the CAC would be
8 collected from Water, Wastewater, and Stormwater customers. Although not part
9 of the CAC, PWSA is also proposing to collect certain Customer Assistance
10 Program costs, not before approved by the Commission, in base rates from retail
11 customers in FPFTY 2024.

12 **Q. WHAT ADJUSTMENT ARE YOU PROPOSING WITH RESPECT TO**
13 **LABOR EXPENSES INCURRED AS THE RESULT OF NEW HIRES?**

14 A. I am proposing reducing in half the expenses for new hires in the first year of
15 service and then including the full expense in the first full year of their
16 employment.

17 **Q. PLEASE EXPLAIN THE BASIS FOR YOUR ADJUSTMENT.**

18 A. PWSA is proposing a rather large increase in work force by adding 33 new
19 employees in FPFTY 2024 and 19 more in FY 2024³. PWSA is requesting
20 revenue requirement increases of \$2,504,158 in FPFTY 2024 and \$1,318,660 in
21 FY 2025 to cover salaries.⁴ As illustrated in PWSA’s response to the Bureau of

² Direct Testimony of Julie A. Mechling, pgs. 27-28

³ Direct Testimony of Edward Barca, pg.18

⁴ See OSBA Exhibit KCH-1, pgs. 1-2

1 Investigation and Enforcement, all the new employees are assumed by PWSA to
 2 begin employment in January of the respective year.⁵ A more reasonable
 3 approach is to assume the new hires are rolled out smoothly throughout the year,
 4 which is equivalent to assuming they begin mid-year. This treatment is supported
 5 by a review of the historical years 2020-2023, as shown in Table KCH-2, below,
 6 which clearly shows that employees are hired in every month of the year.

7 **Table KCH-2**
 8 **Historical Net Change in Employee Count by Month**

Month	2020	2021	2022
January	0	-3	1
February	4	2	1
March	8	-1	2
April	2	0	7
May	-2	-1	2
June	-1	7	8
July	-2	7	-4
August	-1	6	-1
September	4	4	4
October	0	3	-3
November	3	2	6
December	-2	-3	2

9
 10 **Q. PLEASE EXPLAIN YOUR ADJUSTMENT.**

11 A. To make the adjustment in 2024, I have reduced the requested \$2,504,158 for
 12 FPPTY 2024 by 50%. In FY 2025, I included the full \$2,504,158 for employees
 13 hired in 2024 and reduced salaries for new hires in 2025 by 50% to reflect a
 14 continuous roll out of the new hires. In FY 2026, I included the full \$1,318,600
 15 for employees hired in 2025. No new employees were added in 2026 so no partial

⁵ See OSBA Exhibit KCH-1, pg. 3

1 year adjustments were needed in 2026. Please see OSBA Workpaper 1 – New
2 Hire Rollout & Cost of Living Adjustment for my calculations.

3 **Q. WHAT IS THE IMPACT OF THIS ADJUSTMENT?**

4 A. As reported in Table KCH-1, above, this adjustment results in a revenue
5 requirement reduction in GL account 4001-Salary Wages of \$1,252,079 in
6 FPPTY 2024 and a reduction of \$659,300 in 2025.

7 **Q. IS THIS THE ONLY ADJUSTMENT YOU ARE RECOMMENDING FOR**
8 **GL ACCOUNT 4001 SALARY WAGES?**

9 A. No. PWSA’s response to I&E RE-24-D states that the two underlying factors
10 causing year-over-year increases are 1) workforce expansion and 2) annual cost of
11 living increases.⁶ I attempted to reconcile projected expenses in GL Account
12 4001 using PWSA’s stated costs of living increases of 3% in FY 2024, 3% in FY
13 2025 and 5% in FY 2026, but it appears the cost of living escalators PWSA is
14 using are higher than their stated rates, especially in FY 2024. My adjustment
15 utilizes PWSA’s stated cost of living increases. Please see OSBA Workpaper 1 –
16 New Hire Rollout & Cost of Living Adjustment for my calculations.

17 **Q. WHAT IS THE IMPACT OF THIS ADJUSTMENT?**

18 A. As reported in Table KCH-1, above, this adjustment results in a revenue
19 requirement reduction in GL account 4001-Salary Wages of \$1,864,109 in
20 FPPTY 2024, \$1,957,596 in FY 2025, and \$2,088,442 in FY 2026.

21 **Q. WERE ANY OTHER GL ACCOUNTS IMPACTED BY YOUR**
22 **ADJUSTMENTS FOR EMPLOYEE ROLL OUT AND COST OF LIVING?**

⁶ See OSBA Exhibit KCH-1, pg. 4

1 A. Yes. I also made conforming adjustments to the following GL accounts:

- 2 • 4005-OT Premium Pay
- 3 • 4010-Shift Differential
- 4 • 4025-Bonus
- 5 • 4030-Holiday Pay
- 6 • 4035-Vacation Pay
- 7 • 4050-Personal Time Pay

8
9 These GL accounts are directly tied to underlying employee counts. In shifting the
10 new hires from January to a continuous roll out and using PWSA's stated cost of
11 living increase, it was also necessary to adjust the expenses in these accounts.

12 This adjustment conforms to the methodology used by PWSA in the FPFTY 2024
13 COS and Rate Design Model ⁷.

14 **Q. WHAT IS THE REVENUE REQUIREMENT IMPACT OF THIS**
15 **CONFORMING ADJUSTMENT TO GL ACCOUNTS 4005, 4010, 4025,**
16 **4030, 4035, 4050?**

17 A. As reported in Table KCH-1, above, this adjustment reduces revenue requirement
18 \$678,765 in FPFTY 2024, \$565,852 in FY 2025, and \$440,204 in FY 2026.

19 **Q. PLEASE SUMMARIZE THE AGGREGATE IMPACT OF YOUR**
20 **ADJUSTMENTS RELATED TO NEW HIRES ROLL OUT AND COST OF**
21 **LIVING ESCALATION.**

22 A. Taken together, the impact of these adjustments is a reduction of revenue
23 requirement of \$3,794,953 in FPFTY 2024, \$3,128,778 in FY 2025, and
24 \$2,528,647 in FY 2026, as shown in Table KCH-3, below.

25

Table KCH-3
OSBA Revenue Requirement Adjustments Related to Accounts 4001-4050

Description of Adjustment	GL Account	FPFTY 2024	FY 2025	FY 2026
Change new hire date from January to mid-year	4001	\$ (1,252,079)	\$ (659,330)	\$ -
Cost of Living escalation of 3% in 2024, 3% in 2025, and 5% in 2026	4001	\$ (1,864,109)	\$ (1,957,596)	\$ (2,088,442)
Adjustment to reflect same escalation for account 4001	4005, 4010, 4025, 4030, 4035, 4050	\$ (678,765)	\$ (565,852)	\$ (440,204)
Total		\$ (3,794,953)	\$ (3,182,778)	\$ (2,528,647)

My calculations for these adjustments are included in OSBA Workpaper 2 – PWSA FPFTY 2024 COS and “Rate Design Model as shared 5.9.23 – RR Adj 0% Inflation.”

Q. WHAT ADJUSTMENT ARE YOU PROPOSING WITH RESPECT TO GENERIC O&M INFLATION?

A. I am proposing removing PWSA’s generic 6% O&M escalator that is used for most GL accounts that are not related to salaries, benefits, or chemicals in FPFTY 2024, FY 2025, and FY 2026. I am not proposing any adjustments to escalation rates for chemicals in GL accounts 5005 – 5085 or employee benefits in GL accounts 4110 – 4170.

Q. PLEASE EXPLAIN THE BASIS FOR YOUR ADJUSTMENT.

A. Except for costs related to salaries, benefits and chemicals, most O&M expenses projected by PWSA for FPFTY 2024, FY 2025 and FY 2026 contain a generic cost escalation component to reflect projected inflation of 6%. To apply this cost escalator, PWSA starts with its partially projected future test year of 2023 and

1 then applies the 6% escalation factor to arrive at costs for the fully projected
2 future test year in 2024 and then applies the 6% escalation factor again for FY
3 2025 values, and then applies 6% one more time to arrive at the FY 2026 values.

4 From a ratemaking perspective, I have serious concerns with this
5 approach. First, at a broad policy level, I have concerns about regulatory pricing
6 formulations that reinforce inflation. This occurs when *projections* of inflation
7 are built into formulas that are used to set administratively-determined prices,
8 such as utility rates. Such pricing mechanisms help to make inflation a self-
9 fulfilling prophecy. As a matter of public policy, this is a serious concern. It is
10 one thing to adjust for inflation after the fact; it is another to help guarantee it.
11 For this reason, I believe that regulators should use extreme caution before
12 approving prices that guarantee inflation before it occurs. In this case, the
13 situation is exacerbated by the fact that PWSA is seeking a multi-year approval of
14 rates.

15 The best evidence of what it costs PWSA for non-labor, non-chemical
16 O&M is the Company's actual costs recorded in the base period, adjusted for
17 certain known and measurable changes. The cost increases represented by the
18 escalation factors may or may not come to fruition. In any case, PWSA should be
19 expected to strive to improve its O&M efficiency on a continuous basis, and
20 thereby lessen the net impact of inflation on its O&M costs.

21 **Q. DO YOU HAVE ADDITIONAL CONCERNS REGARDING PWSA'S**
22 **INFLATION ADJUSTMENT?**

1 A. Yes. The cumulative level of generic inflation that PWSA is attempting to build
2 into its rates over a three-year period – 19.1% – is unwarranted and unreasonable.
3 According to PWSA, its annual escalation factor of 6% was estimated by
4 considering inflation that occurred in 2021, 2022 and through the end of March
5 2023.⁸ However, it is not justifiable to roughly extrapolate the inflation results
6 from that anomalous period and assume that high inflation will persist for the
7 three years 2024-2026 – and then to seek to build those higher costs into customer
8 utility rates.

9 **Q. ARE THERE INDICATIONS THAT FUTURE INFLATION IS LIKELY**
10 **TO BE WELL BELOW THE ESCALATORS USED BY PWSA IN ITS**
11 **FILING?**

12 A. Yes. There are now indications that inflation is easing as Federal policymakers
13 have been taking aggressive action to get inflation under control. Since March of
14 2022, the Federal Reserve has increased the Federal Funds Rate eleven times
15 taking the rate from 0.25% to 5.50%, including a 0.25% increase in the most
16 recent July meeting. Public material from the July meeting is not yet available so I
17 refer to the notes from the June 2023 meeting in my testimony.

18 In the June 2023 Federal Open Market Committee meeting, the committee
19 did not raise rates, determining it was expedient to provide additional time to
20 observe the effects of cumulative tightening and assess their implications for
21 policy. In short, the Fed wants to make sure that past policy decisions were not
22 going to plunge the economy into a recession, or a so-called “hard landing.” In

⁸ See OSBA Exhibit 1, pg. 5

1 the June meeting, 15 of 18 participants projected that PCE, or personal
2 consumption expenditures, the Fed’s preferred measure of inflation will be below
3 2.8% in 2024. All 18 members projected that the PCE would be below 3.0% in
4 2025 and will be closer to the target of 2.0% beyond 2025. All members
5 confirmed that they are strongly committed to returning inflation to their 2%
6 objective.⁹ Please refer to OSBA Exhibit KCH-2 for an illustration of the
7 distribution of FOMC participants projections for PCE inflation in 2024, 2025, and
8 longer term.

9 On July 12, 2023 the Bureau of Labor Statistics (“BLS”) released the
10 Consumer Price Index for All Urban Consumer (“CPI-U”), another closely
11 watched inflation metric. Based on the June release, the index increased 3.0%
12 over the last 12 months before seasonal adjustments. As noted in the BLS
13 announcement, this was the smallest 12-month increase since the period ending
14 March 2021.¹⁰

15 **Q. WHAT IS THE REVENUE REQUIREMENT IMPACT OF REMOVING**
16 **THE GENERIC NON-LABOR, NON-CHEMICAL O&M ESCALATION?**

17 A. Removing the generic 6% escalation rate will reduce revenue requirement
18 \$4,143,358 in FPFTY 2024, \$7,491,750 in FY 2025, and \$12,266,358 in FY
19 2026, as shown in Table KCH-4, below.

20

Table KCH-4
Revenue Requirement Impacts of Removing Generic 6% Inflation

<u>GL Account(s)</u>	<u>FPFTY 2024</u>	<u>FY 2025</u>	<u>FY2026</u>
Multiple	\$ (4,143,358)	\$ (7,491,750)	\$ (12,266,358)

OSBA Exhibit KCH-3 shows the impacts of removing the 6% inflation factor in more detail by operating expense sub-accounts. My calculations are included in OSBA Workpaper 2 – PWSA FPFTY 2024 COS and “Rate Design Model as shared 5.9.23 – RR Adj 0% Inflation.”

Q. IF THE COMMISSION IS INCLINED TO APPROVE A GENERIC NON-LABOR, NON-CHEMICAL O&M ESCALATION RATE, WHAT IS THE MAXIMUM ESCALATION RATE THAT SHOULD BE ALLOWED?

A. Based upon the policy intentions of the Federal Open Market Committee to tame inflation as well as the recent CPI-U results, the escalation rate for non-labor, non-chemical O&M should be limited to no greater than 3%. However, my primary recommendation is to remove the inflation escalators entirely from PWSA’s proposed revenue requirement.

Section III – Other Funding Mechanisms

Q. WHAT IS THE DISTRIBUTION SYSTEM IMPROVEMENT CHARGE?

A. The Distribution System Improvement Charge (“DSIC”) is an alternative funding mechanism or revenue source that is assessed as a percentage of revenues collected in base rates from Water and Wastewater retail customers. DSIC

1 revenues are used to fund capital improvement projects. The DSIC is currently set
2 at 5%. In this case, PWSA is proposing to increase the rate to 7.5%

3 **Q. WHAT RECOMMENDATIONS DO YOU HAVE REGARDING PWSA’S**
4 **PROPOSALS CONCERNING THE DISTRIBUTION SYSTEM**
5 **IMPROVEMENT CHARGE?**

6 A. I recommend capping the DSIC at the current level of 5%.

7 **Q. PLEASE EXPLAIN.**

8 A. In this rate case, PWSA is already seeking approval for a three-year rate plan with
9 significant increases in revenue requirement. In PWSA Statement No. 2,
10 Company witness Edward Barca states that, “A multi-year filing permits a better
11 alignment with the levels of expenses and revenues that are reasonably expected
12 to be experienced in the years following the fully projected test year.”¹¹ With the
13 revenue assurance inherent in a multi-year plan, PWSA should be expected to
14 manage within the rates are that pursuant to that plan without resorting to
15 additional extraordinary relief.

16 **Q. WHAT IS THE IMPACT OF THESE RECOMMENDATIONS?**

17 A. Calculating the impacts of capping the DSIC at 5% is a bit of a moving target
18 since the DSIC is assessed as a percentage of revenues and will change based on
19 the underlying revenue requirement. However, based upon the revenue
20 requirement adjustments I am recommending, keeping the DSIC rate at 5% will
21 reduce ratepayer impacts by \$4,840,624 in FPFTY 2024, \$5,692,491 in FY 2025,

¹¹ Direct Testimony of Edward Barca, pg. 45

1 and \$6,715,841 in FY 2026. For calculations, refer to OSBA Workpaper 3 –
2 DSIC Impacts.

3

4 **Section IV – Class Revenue Allocation**

5 **Q. BRIEFLY DESCRIBE PWSA’S PROPOSAL REGARDING RECOVERY**
6 **OF CERTAIN COSTS ASSOCIATED WITH THE CUSTOMER**
7 **ASSISTANCE PROGRAM.**

8 A. PWSA is proposing to collect \$4,663,702 in Customer Assistance Program
9 (“CAP”) costs in FPFTY 2024, \$5,517,017 in FY 2025 and \$6,391,795 as
10 outlined in Table KCH-5

11 **Table KCH-5**
12 **Proposed CAP Costs to be Collected from Customers**

13

Customer Assistance Programs	FPFTY 2024	FY 2025	FY 2026
Forgone Revenue	\$ 4,036,834	\$ 4,651,868	\$ 5,494,825
Direct Operations Costs	\$ 386,869	\$ 408,830	\$ 440,650
Hardship Grant	\$ -	\$ 216,320	\$ 216,320
Arrearage	\$ 240,000	\$ 240,000	\$ 240,000
Total Costs	\$ 4,663,702	\$ 5,517,017	\$ 6,391,795

14

15
16 **Q. HOW DOES PWSA PROPOSE TO COLLECT THESE COSTS?**

17 A. PWSA is proposing to collect the FPFTY 2024 CAP costs shown in Table KCH-5
18 through base rates and is proposing a new charge called the Customer Assistance
19 Charge (“CAC”) to collect these costs in FY 2025 and FY 2026. The costs
20 associated with PWSA’s Customer Assistance Programs benefit residential

1 customers only; however, PWSA is proposing to collect these costs from all
2 customer classes.

3 **Q. BRIEFLY DESCRIBE PWSA’S PROPOSAL REGARDING THE NEW**
4 **CUSTOMER ASSISTANCE CHARGE IN THIS RATE CASE.**

5 A. As designed, the CAC would recover (1) the discounts provided to residential
6 customers pursuant to the Bill Discount Program, (2) the operating costs for the
7 PGH2O Cares team, (3) the costs of PWSA’s residential Hardship Fund, and (4)
8 past due arrearages that would be forgiven pursuant to PWSA’s residential
9 Arrearage Forgiveness Program¹².

10 **Q. ARE THESE CUSTOMER ASSISTANCE PROGRAMS NEW?**

11 A. No, these customer assistance programs are not new. However, collecting CAP
12 costs in base rates in FPFTY 2024 and the proposed CAC are new and are being
13 introduced as PSWA is also proposing to expand some of the programs. Since
14 coming under Commission jurisdiction in 2018, PWSA has advocated having
15 these costs recovered in rates from all customer classes, but doing so would be a
16 change to past Commission precedent.

17 **Q. WHAT DO YOU PROPOSE IN REGARD TO CUSTOMER ASSISTANCE**
18 **PROGRAM COSTS IN FPFTY 2024 AND THE RECOVERY OF CAC IN**
19 **FY 2025 AND FY 2026?**

20 A. My recommendation is that all CAP costs (including CAC in FY 2025 and FY
21 2026) should be recovered solely by the residential class.

22 **Q. PLEASE EXPLAIN THE BASIS FOR YOUR RECOMMENDATION.**

¹² Direct testimony of William J. Pickering, pg. 15

1 A. Consistent with cost allocation principles, customer class should bear the cost of
2 services that directly benefit them. Non-residential customers pay their utility bills
3 based on their usage and requirements, and it is reasonable for them to expect that
4 their payments to support services related to their own consumption, not
5 residential assistance.

6 **Q. DOES THE COMMISSION HAVE A POLICY ON ALLOCATING**
7 **UNIVERSAL SERVICE COSTS?**

8 A. It is my understanding that the Commission has had a longstanding policy of
9 allocating customer assistance program costs only to the customer class whose
10 members are eligible for the program – residential customers. However, more
11 recently the Commission has indicated it would consider recovering the costs of
12 customer assistance programs from all ratepayer classes in utility-specific
13 proceedings in an effort to maintain affordability for non-CAP residential
14 customers.

15 **Q. WHAT WOULD BE THE IMPACT ON EACH CUSTOMER CLASS IN**
16 **FPFTY 2024 IF ALL CAP RELATED COSTS WERE RECOVERED BY**
17 **THE RESIDENTIAL CLASS?**

18 A. The Residential Class would be required to collect an additional \$2,650,585 or
19 2.8%. All other classes would be reduced as shown in Table KCH-6, below.

20

Table KCH-6
Class Impact of Allocating FPFTY 2024 CAP Costs to Residential

Customer Class	Increase/(Decrease)	% Change
Residential	\$ 2,650,585	2.8%
Residential - CAP	\$ (6,768)	-0.3%
Commercial	\$ (1,730,862)	-2.0%
Industrial	\$ (96,848)	-2.3%
Health or Education	\$ (572,450)	-1.8%
Municipal	\$ (131,853)	-1.9%
All Other	\$ (111,803)	-1.0%
Total	\$ -	0%

Q. HAVE YOU QUANTIFIED THE AVERAGE MONTHLY COST TO NON-CAP RESIDENTIAL CUSTOMERS ASSUMING PWSA’S NEWLY PROPOSED CAC WAS RECOVERED SOLELY FROM NON-CAP RESIDENTIAL CUSTOMERS?

A. Yes, I have. These calculations are presented in Exhibit KCH-4. They indicate that if costs associated with the CAC were recovered from non-CAP residential customers, the increase on the monthly bill would be less than \$2.36 in FY 2025 for a customer with two ERUs and would be \$2.74 in FY 2026 for a customer with two ERUs.

My calculations are based on changes made to the PWSA FPFTY COS and “Rate Design Model as shared 5.9.23.” Please see OSBA Workpaper 4 – PWSA FPFTY 2024 COS and “Rate Design Model as shared 5.9.23 – CAP Covered by Residential.”

Q. IN YOUR OPINION, WOULD RECOVERING PWSA’S PROPOSED CAP COSTS FROM NON-CAP RESIDENTIAL CUSTOMERS RENDER

1 **PWSA’S RESIDENTIAL WATER, WASTEWATER, AND**
2 **STORMWATER BILL UNAFFORDABLE?**

3 A. Based on the bill impacts shown in Tables KCH-7 and KCH-8, it would not.

4 **Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

5 A. Yes, it does.

Set RE Nos. 21-44
Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919**

Request: I&E-RE-24-D Reference PWSA Volume I, FR-III.1 and the 2024 Cost of Service Study and Rate Design - FR-III.1 Excel file concerning operating expenses by account. Explain in detail any year-over-year increases of \$25,000 and 10% or greater in the following sub-categories of Wages and Salaries Expense for each calendar year from 2020 through 2026 and provide the detailed basis, calculation, and supporting documentation for these expense projections in the FTY, FPFTY, FY 2025 and FY 2026:

- A. Salary and Wages (4001).
- B. OT Premium Pay (4005).
- C. Shift Differential (4010).
- D. Bonus (4025).
- E. Holiday Pay (4030).
- F. Vacation Pay (4035).
- G. Personal Time Pay (4050).

Response:

The two underlying factors that are causing year-over-year increases in the GL accounts listed above is 1) workforce expansion and 2) annual cost of living increases.

PWSA has increased its workforce by approximately 60 employees between 2020 and 2023 with the plans to add an additional 52 positions between the FPFTY and FY 2026. The chart below demonstrates the cost of living increases from 2020 through 2026 by non-union and union employees.

	Actual				Projected		
	FY 2020	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026
Non-Union	3%	3%	3%	3%	3%	3%	5%
PJCBC	3%	3%	3%	3%	3%	3%	5%
AFSCME 2719	3%	2%	0%	4%	3%	3%	5%
AFSCME 2037	3%	3%	3%	3%	3%	3%	5%

**Response of the Pittsburgh Water and Sewer Authority ("PWSA")
to the Interrogatories of the Bureau of Investigation and Enforcement ("I&E")
Set RE Nos. 21-44
Docket Nos. R-2023-3039920, R-2023-3039921, & R-2023-3039919**

- Request: I&E-RE-44-D** Reference PWSA Volume I, FR-III.1 and the 2024 Cost of Service Study and Rate Design - FR-III.1 Excel file concerning operating expenses by account. Provide the following:
- A. Basis, calculation, and supporting documentation for applying a 6% inflation increase to the majority of expenses from FTY to FPFTY.
 - B. Basis, calculation, and supporting documentation for any general inflation increase from FPFTY to FY 2025 and from FY 2025 to FY 2026.

Response: See below.

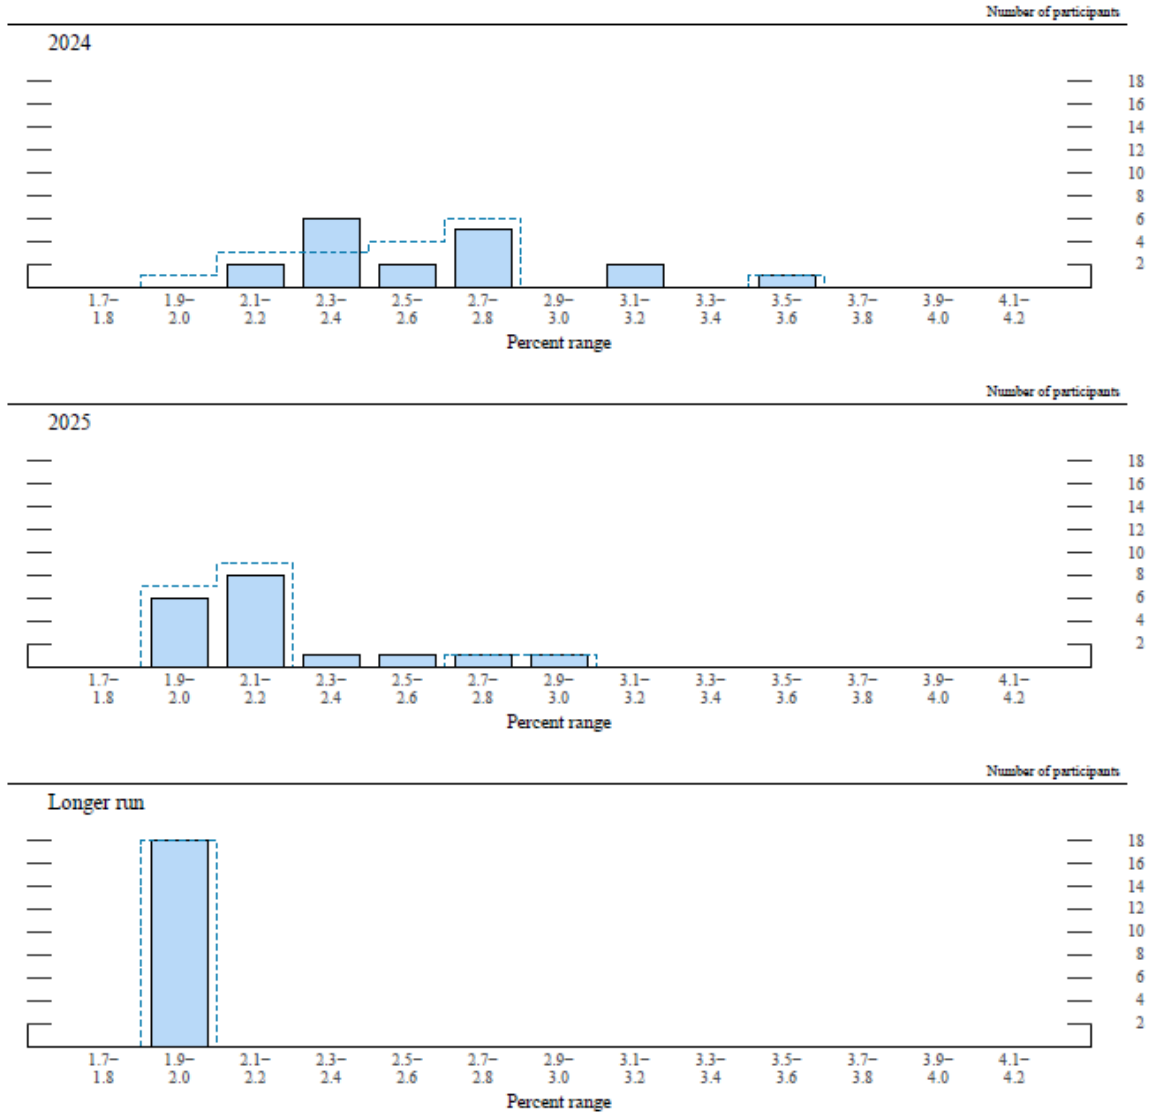

- A. Basis, calculation, and supporting documentation for applying a 6% inflation increase to the majority of expenses from FTY to FPFTY. – See Testimony St. No. 2, pages 10 and 11. PWSA analyzed historical inflationary rates to find an inflationary rate that was reasonable and just for the FTY to FPFTY. 6% is reasonable when you consider it was 4.70% in 2021, 8.00% in 2022, and 6.89% through the end of March 2023.
- B. Basis, calculation, and supporting documentation for any general inflation increase from FPFTY to FY 2025 and from FY 2025 to FY 2026. – See Testimony St. No. 2, pages 10 and 11. PWSA analyzed historical inflationary rates to find an inflationary rate that was reasonable and just for the FPFTY to FY 2025. 6% is reasonable when you consider it was 4.70% in 2021, 8.00% in 2022, and 6.89% through the end of March 2023.

OSBA STATEMENT NO. 1-R

Rebuttal Testimony of Kevin C. Higgins

on behalf of the

Pennsylvania Office of Small Business Advocate

September 8, 2023

Topics:

Customer Assistance Charge

Customer Assistance Program

Date Served: September 8, 2023

Date Submitted for the Record: _____

1 **REBUTTAL TESTIMONY OF KEVIN C. HIGGINS**

2

3 **Section I - Introduction**

4 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

5 A. My name is Kevin C. Higgins. My business address is 111 East Broadway, Suite
6 1200, Salt Lake City, Utah, 84111.

7 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

8 A. I am a Principal in the firm of Energy Strategies, LLC. Energy Strategies is a
9 private consulting firm specializing in economic and policy analysis applicable to
10 energy production, transportation, and consumption.

11 **Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?**

12 A. My rebuttal is being sponsored by the Pennsylvania Office of Small Business
13 Advocate (“OSBA”).

14 **Q. HAVE YOU PREVIOUSLY SUBMITTED DIRECT TESTIMONY IN THIS**
15 **PROCEEDING?**

16 A. Yes.

17 **Q. WHAT IS THE SUBJECT OF YOUR REBUTTAL TESTIMONY?**

18 A. I will respond to the direct testimony of the following witnesses: (1) Dr. Karl R.
19 Pavlovic on behalf of the OCA; (2) Ms. Vanessa Okum on behalf of BIE, and (3)
20 Mr. Roger D. Colton on behalf of the OCA.

21 **Q. BEFORE PROCEEDING WITH YOUR REBUTTAL, DO YOU HAVE**
22 **ANY PRELIMINARY COMMENTS REGARDING YOUR DIRECT**
23 **TESTIMONY?**

1 A. Yes. On page 21, line 3 of my direct testimony, I erroneously referenced Tables
2 KCH-7 and KCH-8. The reference should instead be to OSBA Exhibit KCH-4.

3

4 **Section II – Customer Assistance Charge**

5 **Q. WHAT DOES OCA WITNESS DR. PAVLOVIC RECOMMEND**
6 **REGARDING PWSA’S PROPOSAL TO INSTITUTE THE CUSTOMER**
7 **ASSISTANCE CHARGE (CAC) STARTING IN FY 2025?**

8 A. In OCA Statement 2, Dr. Pavlovic recommends that the Commission reject
9 PWSA’s proposed Customer Assistance Charge.

10 **Q. WHAT ARGUMENTS DOES DR. PAVLOVIC’S MAKE IN SUPPORT OF**
11 **HIS RECOMMENDATION?**

12 A. Dr. Pavlovic argues that mechanisms that allow for the automatic pass through of
13 costs, commonly called “cost trackers”, weaken a utility’s incentive to control
14 costs. Such mechanisms are generally disfavored by regulators and only
15 appropriate under certain circumstances, namely when costs are (1) largely
16 outside of control of utility, (2) unpredictable and volatile and, (3) substantial and
17 recurring. None of these circumstances are applicable to the customer assistance
18 program costs intended to be collected by the CAC.

19 Dr. Pavlovic also disputes the CAC based on his conclusion that PWSA has
20 made no showing that there are exceptional circumstances that warrant a
21 suspension or waiver of the Public Utility Code to allow a universal service rider.

1 **Q. WHAT DOES BIE WITNESS VANESSA OKUM RECOMMEND**
2 **REGARDING PWSA’S PROPOSAL TO INSTITUTE THE CUSTOMER**
3 **ASSISTANCE CHARGE (CAC) STARTING IN FY 2025?**

4 A. In I&E Statement 2, Ms. Okum also recommends that the CAC be disallowed.

5 **Q. WHY DOES MS. OKUM RECOMMEND THE CAC BE DISALLOWED?**

6 A. Ms. Okum notes that “with the implementation of this charge not proposed before
7 FY 2025, the expectation is that this charge will simple serve as an opportunity to
8 add new revenues between base rate cases”¹ which resembles single-issue
9 ratemaking. Supporting this argument, she notes that PWSA does not propose to
10 keep all program costs with the rider but, instead will use it to adjust for over or
11 under recoveries of the amount included in base rates. Ms. Okum also argues that
12 since the CAC is proposed to be combined with other charges on customer bills, it
13 will reduce transparency.

14 **Q. DO YOU AGREE WITH THE RECOMMENDATIONS MADE BY DR.**
15 **PAVLOVIC AND MS. OKUM?**

16 A. Yes, I agree that the Commission should reject PWSA’s proposed CAC.

17 **Q. WHY DO YOU AGREE?**

18 A. I agree that the CAC is poorly designed, will reduce transparency, and will
19 weaken PWSA’s incentive to control the costs of the customer assistance
20 programs.

¹ BIE Statement No 2, pg. 35, lines 13-15

1 **Section III - Response To OCA Witness Roger Colton**

2 **Q. WHAT SUBJECT MATTER DOES MR. COLTON ADDRESS IN OCA**
3 **STATEMENT 4?**

4 A. As stated by Mr. Colton, the purpose of his testimony is “to review the
5 reasonableness of the design and proposed implementation of the low-income bill
6 payment assistance programs offered by the Pittsburgh Water and Sewer
7 Authority (PWSA)”.² As a result of his review, Mr. Colton makes several
8 recommendations on how to enhance and/or expand components of PWSA’s
9 customer assistance programs some of which are intended to expand eligibility
10 and to increase enrollment and retention.

11 **Q. DO YOU SUPPORT THE RECOMMENDATIONS MADE BY MR.**
12 **COLTON IN OCA STATEMENT 4?**

13 A. OSBA neither supports nor opposes the multitude of recommendations made by
14 Mr. Colton, so long as all customer assistance program costs are recovered solely
15 from residential customers.

16 **Q. DOES THIS CONCLUDE YOUR REBUTTAL TESTIMONY?**

17 A. Yes, it does.

OSBA STATEMENT NO. 1-S

Surrebuttal Testimony of Kevin C. Higgins

on behalf of the

Pennsylvania Office of Small Business Advocate

September 22, 2023

Topics:

Revenue Requirement Adjustments

Customer Assistance Program

1 **SURREBUTTAL TESTIMONY OF KEVIN C. HIGGINS**

2

3 **Section I - Introduction**

4 **Q. PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

5 A. My name is Kevin C. Higgins. My business address is 111 East Broadway, Suite
6 1200, Salt Lake City, Utah, 84111.

7 **Q. BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

8 A. I am a Principal in the firm of Energy Strategies, LLC. Energy Strategies is a
9 private consulting firm specializing in economic and policy analysis applicable to
10 energy production, transportation, and consumption.

11 **Q. ON WHOSE BEHALF ARE YOU TESTIFYING IN THIS PROCEEDING?**

12 A. My surrebuttal is being sponsored by the Pennsylvania Office of Small Business
13 Advocate (“OSBA”).

14 **Q. HAVE YOU PREVIOUSLY SUBMITTED TESTIMONY IN THIS**
15 **PROCEEDING?**

16 A. Yes. I have submitted both direct and rebuttal testimony.

17 **Q. WHAT IS THE SUBJECT OF YOUR SURREBUTTAL TESTIMONY?**

18 A. I will respond to the rebuttal testimony of the following witnesses: (1) Mr.
19 Edward Barca, Director of Finance for PWSA; and (2) Mr. Roger Colton on
20 behalf of OCA.

1 **Section II – Response to Rebuttal of PWSA Witness Edward Barca**

2 **Q. ON PAGE 43 OF HIS REBUTTAL TESTIMONY, MR. BARCA**
3 **DISAGREES WITH OSBA’S ADJUSTMENT TO “ROLL OUT” NEW**
4 **HIRES OVER THE COURSE OF THE TEST YEAR, STATING THAT**
5 **“OSBA IS NOT USING A FULLY FORECASTED TEST YEAR.” HOW**
6 **DO YOU RESPOND?**

7 A. I disagree. Section 315(e) of Pennsylvania Statue Title 66 defines a fully
8 projected future test year (FPFTY) as “the 12-month period beginning with the
9 first month that the new rates will be placed in effect after application of the full
10 suspension period permitted under section 1308 (d).”¹ In this docket, the FPFTY
11 has been designated as the “fully forecasted 12 months ending December 31,
12 2024”² as stated in Mr. Barca’s direct testimony. All of the legitimately projected
13 expenses expected to be incurred over the course of the FPFTY should be
14 included in the revenue requirement, but a FPFTY does not imply that all new
15 employees for that year will be hired on the first day of the year.

16 In calculating my revenue requirement adjustment related to new hires, I
17 relied on PWSA’s employee count projections provided in response to I&E Data
18 Request 3Da, entitled “Budgeted and Actual Employee Counts by Months 2022-
19 2026.” The spreadsheet provided by PWSA as the response includes monthly
20 employee counts by department from January 2020 through December 2026. The
21 data for January 2020 through April 2023 represent actual historical counts³ and

¹ 66 Pa. C.S. § 315(e)

² PWSA St. No. 2, pg. 8

³ In Statement 1, pg. 26, PWSA witness William J. Pickering states that “PWSA has 393 employees as of April 23, 2023” which closely ties to the 392 value for April 2023 in Data Response I&E RE-3Da.

1 May 2023 through December 2026 represent budgeted projections. The
2 spreadsheet shows that PWSA assumed that the Authority would have 388
3 employees in December 2023 and 421 employees in January 2024, implying that
4 PWSA assumed all 33 new hires in the FPFTY would occur at once. I do not
5 consider such an assumption to be realistic.

6 While Mr. Barca testifies that PWSA's headcount is now 418, he does not
7 reconcile the current headcount with the budgeted projections provided in the
8 previously cited data response to BI&E, nor does he provide any explanation for
9 the difference.

10 **Q. MR. BARCA CONTENDS THAT PWSA WILL NOT PASS THE**
11 **ADDITIONAL BONDS TEST IF THE FPFTY REVENUE**
12 **REQUIREMENT RECOMMENDATIONS OF OSBA WERE ADOPTED.**
13 **DO YOU AGREE?**

14 A. No, I do not.

15 **Q. WHY NOT?**

16 A. Mr. Barca calculated the additional bond test using revenues adjusted by OSBA's
17 recommended reductions but did not make the corresponding reductions to
18 expenses incorporated into my adjusted revenue requirement. The revenue
19 requirement adjustments I recommended in my direct testimony were related to
20 O&M expenses such as new employee costs, PWSA's overstated cost-of-living
21 adjustment, and PWSA's unreasonable inflation adjustment. If revenues and
22 expenses were adjusted based on the recommendations in my direct testimony, all
23 bond tests, including the additional bond test, would be satisfied.

1 **Q. MR. BARCA CONTENDS THAT “OSBA RECOMMENDS THAT PWSA’S**
2 **INFLATION ADJUSTMENTS BE REMOVED IN THEIR ENTIRETY.”⁴**

3 **WHAT IS YOUR RESPONSE?**

4 A. While I recommend removing PWSA’s 6% generic inflation factor, I did not
5 make any adjustments to the 20% inflation factor that was applied to chemicals
6 (GL Accounts 5005 – 5085), nor did I recommend adjusting the escalation factors
7 applied to employee benefits (GL Accounts 4110 – 4175), such as medical health
8 insurance that PWSA assumes will escalate at 13% in 2024, 18% in 2025, and
9 20% in 2026. I also recommended a cost-of-living adjustment for costs
10 associated with Salaries of 3% in 2024, 3% in 2025, and 5% in 2026 that was
11 equal to the company’s projected annual cost of living increases provided in
12 response to I&E-RE-24-D data request. I stand by my recommendation that the
13 Commission reject PWSA’s exaggerated generic inflation factor.

14 **Section III - Response to Rebuttal of OCA Witness Roger Colton**

15 **Q. MR. COLTON ASSERTS THAT “EVER SINCE PWSA HAS BECOME**
16 **REGULATED BY THE PUC, AS A MUNICIPAL UTILITY, THE**
17 **COMMISSION HAS APPROVED THE ALLOCATION OF CUSTOMER**
18 **ASSISTANCE PROGRAM (“CAP”) OVER ALL CUSTOMER**
19 **CLASSES.”⁵ DO YOU AGREE WITH THIS CHARACTERIZATION?**

20 A. No. It is my understanding that PWSA initiated its CAP on January 1, 2018. Just
21 three months later, PWSA came under the jurisdiction of the Commission, and the
22 Authority filed its first base rate case under Commission jurisdiction on July 2,

⁴ PWSA St. No. 2-R, pg. 68

⁵ OCA Statement 4R, pg. 3

1 2018. It is also my understanding that prior to the current proceeding, PWSA
2 concluded three base rate cases via black box settlements that did not specifically
3 address cost recovery of CAP costs. While I agree it is correct to state that PWSA
4 has consistently advocated for recovering its CAP costs from all customer classes,
5 it is my understanding that the Commission has not ever ruled on the issue for
6 PWSA.

7 **Q. MR. COLTON CITES SEVERAL PHILADELPHIA GAS WORKS**
8 **(“PGW”) CASES AS LONGSTANDING PRECEDENT FOR**
9 **ALLOCATING UNIVERSAL SERVICE COSTS BY A REGULATED**
10 **MUNICIPAL UTILITY. WHAT IS YOUR REPSONSE.**

11 A. It is my understanding that PGW’s CAP program operated for many years before
12 becoming regulated by the Commission, and that prior to being subject to
13 Commission oversight, PGW collected rates to fund its program from all rate
14 classes except Large Industrial. In contrast, PWSA did not have a long history of
15 operating its BDP-CAP program before becoming regulated by the Commission.
16 Nor has PWSA’s requested universal service budget expanded to the point where
17 its services would be unaffordable for non-CAP customers if universal service
18 costs were to be recovered solely from residential ratepayers. The Commission
19 should decide the issue of universal service cost recovery for PWSA based on the
20 evidence presented in their respective base rate proceedings – not on the basis of
21 how PGW recovers universal service costs.

22 **Q. DOES THIS CONCLUDE YOUR SURREBUTTAL TESTIMONY?**

23 A. Yes, it does.

TABLE OF EXHIBITS

WJP-1	Rate Case Tables
WJP-2	2019 Cooperation Agreement

1 **I. INTRODUCTION**

2 **Q. PLEASE STATE YOUR NAME AND CURRENT POSITION WITH PWSA.**

3 A. My name is William J. Pickering. My position with The Pittsburgh Water & Sewer
4 Authority (“PWSA” or “Authority”) is Chief Executive Officer.

5 **Q. HOW LONG HAVE YOU HELD THIS POSITION?**

6 A. I assumed the position of Executive Director for PWSA on June 1, 2020. On November
7 13, 2020, my title changed to Chief Executive Officer, through modifications made by
8 the Board to the Bylaws.

9 **Q. WHAT ARE YOUR VARIOUS JOB RESPONSIBILITIES?**

10 A. In my present position, my responsibilities include executing policy goals and objectives
11 established by the Board of Directors; preparing an annual business plan and budget;
12 developing, supervising and administering the PWSA’s staff and programs; directing the
13 operation of the water system; overseeing the operation of the sewer system and related
14 stormwater system; developing and implementing a capital improvement and
15 maintenance plan; directing water Customer Assistance Program efforts; and interacting
16 with customers, elected officials, consumer groups, governmental entities and the media.

17 **Q. PLEASE SUMMARIZE YOUR BACKGROUND AND EXPERIENCE.**

18 A. Prior to joining PWSA in fall 2016, I was Manager of Communications and Government
19 Relations at DC Water. There, I managed the communications program and spearheaded
20 DC Water’s interactions with the federal, District and neighboring local governments. I
21 have also held several positions in the local and federal government. I have a Bachelor of
22 Science in Political Science from Santa Clara University and received my Certificate in
23 Public Management from George Washington University.

1 **Q. HAVE YOU EVER PROVIDED TESTIMONY BEFORE THIS COMMISSION?**

2 A. Yes. In PWSA’s 2021 base rate proceeding, I submitted direct testimony on April 13,
 3 2021 and rebuttal testimony on July 29, 2021.¹ Also, in PWSA’s 2020 rate case, I
 4 submitted rebuttal testimony and adopted the direct testimony of Robert A. Weimar,
 5 PWSA’s former Executive Director, in that rate proceeding.²

6 **Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS PROCEEDING?**

7 A. The purpose of my testimony is to offer a high-level synopsis of this rate filing while
 8 introducing the other PWSA witnesses presenting testimony and explaining the scope of
 9 their testimony. I will also provide an overview about PWSA to include its continuing
 10 transition process to Commission jurisdiction and the current status of various projects
 11 and initiatives that have occurred since PWSA’s 2021 rate case filing.

12 **Q. ARE YOU SPONSORING ANY EXHIBITS?**

13 A. Yes. I am sponsoring PWSA Exhibit WJP-1, which includes the Rate Case Tables; and
 14 PWSA Exhibit WJP-2, which is the 2019 Cooperation Agreement.

15 **Q. WHO ARE THE OTHER WITNESSES PROVIDING TESTIMONY ON BEHALF**
 16 **OF PWSA?**

17 A. The other witnesses providing testimony on behalf of PWSA are:

Witness	St. No.	Topics
Edward Barca	2	Support for Proposed Rate Increase, Support for DSIC Cap Increase, <i>Pro Forma</i> Financial Results, Rate Structure Changes & New Charges, Calculation of Revenue Requirements, Development of Operating Budget & Capital Needs
William J. McFaddin	3	Valve Maintenance, Meter Replacement, Flushing Distribution System

¹ Docket Nos. R-2021-3024773, R-2021-3024774 and R-2021-3024779.

² Docket Nos. R-2020-3017951, R-2020-3017970 and P-2020-3019019.

Witness	St. No.	Topics
Barry King	4	Capital Projects, Wastewater Laterals, Minimum Warranty
Tony Igwe	5	Stormwater
Julie A. Mechling	6	Customer Service and Collections Updates, Rate Mitigation Efforts, Prior Settlement Commitments, Water, Wastewater and Storm Water Tariffs
Harold J. Smith	7	Allocation of Total System Revenue Requirements, Water Cost Allocation and Rate Design, Wastewater Cost Allocation and Rate Design, Stormwater Cost Allocation and Rate Design, Gradualism Adjustment
Keith Readling	8	Stormwater Program Revenue Requirements, Identifying Impervious Area, Stormwater Fee Structure, Stormwater Fee Billing, Stormwater Credit Program
Christine Fay	9	Support for Proposed Rate Increase, Financial Policies and Goals, Capital Markets Consideration, Peer Review of Financial Metrics

I also wish to note, although she is not providing direct testimony in support of the rate case filing, on April 19, 2022, PWSA announced that Monica Walaan, Esquire, had joined the organization as Chief Legal Officer. In this role, Ms. Walaan oversees the legal affairs of PWSA and serves as an advisor to counsel, support and guide the organization on a comprehensive range of legal and strategic issues. As part of PWSA’s robust focus on environmental compliance and ethics, Ms. Walaan also serves as an important internal resource to help guide PWSA employees in acting with the highest ethical standards.

Q. DO YOU HAVE ANY GENERAL OBSERVATIONS ABOUT PWSA’S PROPOSED RATE INCREASE?

A. Yes. At the outset, I wish to emphasize that PWSA understands that this request for rate relief is larger than it has submitted in the past. The Authority did not make the decision lightly to seek rate relief at the level of \$146 million, over a three-year period. While I

1 expect that this amount seems like an extraordinary request, the reason is that PWSA is
2 making extraordinary strides in every area of our operations to be the water, wastewater
3 and stormwater utility of the future. The many accomplishments of PWSA in recent
4 years, some of which I will highlight, demonstrate that PWSA has devoted itself to
5 making the most of the prior rate relief approved by the Commission. The combination
6 of PWSA's commitments to excellence, and the steady revenue stream afforded by the
7 Commission's approvals, have placed PWSA on a trajectory toward becoming "best in
8 class" in terms of providing excellent customer service, implementing a robust
9 construction program, replacing lead service lines throughout Pittsburgh and continuing
10 to excel in all areas of its operations. Of particular note, PWSA has completed a number
11 of construction projects designed to provide more reliable service to customers, meet
12 stricter water quality standards and improve water quality and stormwater management.

13 A compelling example that demonstrates the commitment to excellence
14 throughout PWSA's organization is the Strategic Planning Project on which the
15 Authority embarked on March 29, 2022 to guide its priorities over the next five years.
16 The first phase of this project was to define our Mission, Vision and Core Values, which
17 are listed below:

- 18 • PWSA's Mission is: To support its region by protecting public health and the
19 environment through the delivery of safe and reliable water services with a
20 commitment to future generations.
- 21 • PWSA's Vision is: To transform Pittsburgh's water system while being recognized
22 by its customers as a trusted service provider and a steadfast steward of a vital
23 public asset.
- 24 • PWSA's Core Values are:
 - 25 (a) **Stewardship:** As a public utility, PWSA is responsible for serving as mindful
26 stewards of its water system and continuing to provide essential and
27 dependable water services now and for generations to come. Right now,
28 PWSA is making decisions that will impact Pittsburgh for the next 100 years.

- 1 (b) **Ethics & Integrity:** PWSA acts ethically and with integrity in all instances,
2 both as individuals and as an organization. This means modeling honesty,
3 transparency and professionalism in everything we do.
- 4 (c) **Accountability:** PWSA is held accountable, both individually in everyday
5 roles and as one organization. Only by doing what PWSA promised can
6 PWSA rebuild trust with the community.
- 7 (d) **Safety:** PWSA ensures a safe working environment for employees, the safety
8 of its infrastructure assets and the safety of the millions of gallons of water
9 delivered to customers every day.
- 10 (e) **Equity:** PWSA strives to deliver quality and affordable water services to
11 every community in its service area and to create a workplace that reflects the
12 diversity of those communities.

13 While PWSA has made significant achievements, we need to continue these
14 efforts so that we are a utility of the future that delivers the highest possible quality of
15 services to our customers. In this vein, it is fitting to point out that in March 2020, less
16 than two years after assuming jurisdiction over the Authority, the Commission found that
17 PWSA had presented a plan for compliance that would adequately ensure and maintain
18 the provision of adequate, efficient, safe, reliable and reasonable service. In reaching this
19 finding, the Commission recognized that “PWSA’s transition to Commission jurisdiction
20 is a vast and complex undertaking requiring prioritization and allocation of resources and
21 the redevelopment of operations.”³ It is against this backdrop that PWSA urges the
22 Commission to view the current request for rate relief.

23 **Q. IS PWSA PROPOSING SPECIFIC MEASURES TO MODERATE THE IMPACT**
24 **OF THE RATE INCREASE ON CUSTOMERS?**

25 A. Yes. Since PWSA recognizes that the rate increases it is seeking over the next three-year
26 period are significant, we have also considered the impact on future affordability and are

³ *Implementation of Chapter 32 of the Public Utility Code Regarding Pittsburgh Water and Sewer Authority – Stage I*, Docket Nos. M-2018-2640802 (water) and M-2018-2640803 (wastewater); and *Petition of Pittsburgh Water and Sewer Authority for Approval of its Long-Term Infrastructure Improvement Plan*, Docket Nos. P-2018-3005037 (water) and P-2018-3005039 (wastewater) (Order entered March 26, 2020), at 23.

1 offering several proposals in an effort to mitigate these impacts as part of this rate
 2 request. These mitigation measures include: (1) a request for a three-year multi-year
 3 increase; (2) a proposed two-year transition period for the removal of the minimum
 4 allowance; (3) introduction of two new charges, to include one to timely and accurately
 5 recover the actual costs of our low income programs; (4) new stormwater rate mitigation
 6 measures; (5) removal of the COVID-19 policy to recover the costs of third party
 7 payment processing fees from all ratepayers; and (6) additional enhancements for our
 8 low-income customer assistance programs. More details about each of these measures
 9 are explained in the testimony of PWSA witness Julie Mechling.

10 **Q. PLEASE HIGHLIGHT EXAMPLES OF THE POSITIVE STRIDES THAT PWSA**
 11 **MADE IN 2022 AND HAS CONTINUED TO MAKE IN 2023.**

12 A. Certainly. I will highlight examples of the many positive strides that PWSA made in
 13 2022 and has made in 2023. Since the last rate case in 2021, PWSA has continued to
 14 enhance the quality and effectiveness of its customer service, provide responsible and
 15 responsive operations service, improve infrastructure reliability, and maintain regulatory
 16 compliance. These accomplishments have been made throughout the Authority’s system
 17 and fall into each category of its operations.

18 *Lead Levels and Lead Service Line Replacement*

19 On January 24, 2023, the Authority announced that the most recent round of
 20 testing shows that the lead levels continue to be well below the state and federal action
 21 levels, which has been the case since water quality came back into compliance in the
 22 summer of 2020. In April 2019, we began adding orthophosphate to reduce lead levels
 23 in drinking water while continuing to replace thousands of lead service lines.

24 Orthophosphate is a food-grade additive that forms a protective layer inside of lead

1 service lines, creating an anti-corrosive barrier between the lead pipes and the water
2 flowing through them. It is approved by the EPA and successfully used in water systems
3 across the world. Combined with PWSA’s aggressive lead service line replacement, the
4 use of orthophosphate has resulted in the compliance levels now achieved by the
5 Authority.

6 Earlier this year, PWSA celebrated the removal of its 10,000th public lead service
7 line. Since 2016, PWSA has replaced approximately 59 miles of lead lines, including
8 6,900 private lead lines. PWSA has invested over \$100 million in the removal of lead
9 lines throughout its water service area because it is one of the most proactive ways to
10 reduce lead exposure and provide Pittsburgh residents with safe, high-quality drinking
11 water. As a result, PWSA is committed to this program and will continue to aggressively
12 replace lead service lines with the goal of replacing all of them by 2026. For its work on
13 the Community Lead Response in 2022, PWSA received an award from the U.S.
14 Environmental Protection Agency (“EPA”) through the Aquarius Recognition Program,
15 which annually issues awards to exceptional projects in five different categories.⁴ The
16 award received by PWSA was in the category of “Excellence in Environmental and
17 Public Health Protection,” and was made possible through a nomination from the
18 Pennsylvania Infrastructure Investment Authority (“PENNVEST”), which recognizes
19 PWSA’s commitment to public health and drinking water safety at the national level.

20 Water System

21 Another notable accomplishment improving PWSA’s water service was the
22 completion of the Highland II Reservoir and Cover Replacement project in 2022, which

⁴ See [Aquarius Recognition Program](#).

1 was the largest project of its type in North America that year. Through this project,
2 PWSA reinstated the 125 million-gallon covered reservoir after replacing the liner and
3 cover, which ensured the reliability and security of the reservoir and will play a key role
4 in the Authority’s Water Reliability Plan. The project involved draining the reservoir,
5 removing the previous materials, and installing a new liner, floating cover, and
6 supplemental equipment like rainwater removal pumps. This work will add 25 more
7 years of service to the structure and improve its reliability as other Water Reliability Plan
8 projects take place. For this project, the American Society of Civil Engineers (“ASCE”)
9 presented an Award of Merit to PWSA, and gave individual awards for specific
10 accomplishments to three PWSA employees, including Barry King who is providing
11 direct testimony in this proceeding on PWSA’s Capital Improvement Plan. This
12 recognition from within the industry reflects how PWSA has evolved as an organization
13 in recent years, focusing on modernizing infrastructure, maintaining water quality, and
14 growing talent from within.

15 Another significant project that has been completed is the Rising Main 3
16 Rehabilitation, which revitalized a large diameter pipe that moves water from the
17 Bruecken Pump Station into the Highland II Reservoir. This project is also part of
18 PWSA’s Water Reliability Plan and was the first of several once-in-a-generation projects
19 that will renew key components of our water production and distribution systems. The
20 rehabilitation of Rising Main 3 has improved the reliability of the water system and
21 hydraulic performance needed to distribute water throughout the system. Work is already
22 underway on the next phase of this project, Rising Main 4 Rehabilitation and
23 Replacement, which PWSA began constructing in 2022.

1 Wastewater System

2 In 2022, PWSA completed the rehabilitation of the 100+ year old M-29 combined
3 sewer outfall and replaced the endwall on the Monongahela River. These project
4 improvements will extend the useful life of the outfall, reduce river flow entering the
5 combined sewer system, and begin to mitigate backups into the lower Four Mile Run
6 neighborhoods.

7 Another impressive measure regarding our sewer system is that in August 2022,
8 PWSA completed an extensive infrastructure upgrade on Centre Avenue, between
9 Morewood Avenue and Devonshire Street, in the Shadyside neighborhood. This
10 four-month-long project replaced an aging sewer main and water main, as well as any
11 lead service lines found during the work. The \$2 million investment ensures reliable
12 sewer service for customers on the block while also relocating and completing upgrades
13 to the water main and replacing any lead service lines found during the work. This
14 project was part of PWSA's Sewer Under Structures Program, which addresses aging
15 sewers that are obstructed by structures like other utilities or buildings.

16 Notably, in April of this year, PWSA received a \$59.1 million low-interest loan
17 from PENNVEST for a sewer rehabilitation project. This funding supports PWSA's
18 2023-2025 Small and Large Sewer Rehabilitation programs, which will evaluate and
19 rehabilitate approximately 56 miles of aging sewer mains throughout the city. With this
20 funding, the Authority can more quickly complete needed work on our sewer system,
21 with some sewers being more than a century old and in need of repair, while improving
22 services that are essential to everyone in Pittsburgh.

1 Stormwater System

2 As of April 2023, PWSA has constructed (or partnered with) twenty-six
3 stormwater infrastructure projects in the City of Pittsburgh. In addition, nine projects are
4 currently in various stages of planning and design. PWSA has also released the final
5 draft of a Stormwater Strategic Plan that will set the stage for how stormwater is
6 managed in the service area. This Plan builds off past planning efforts by using climate
7 data, previous regional studies, community input, and best practices of our peer utilities
8 to provide recommendations that consider equity, the environment, priority sites and
9 water quality. Important components of the Plan include increasing transparency of
10 PWSA’s strategy and enhancing coordination with other entities in the City for more
11 coordinated and effective management of stormwater. PWSA intends to use the Plan,
12 which is currently open for community feedback, to eventually design and implement
13 specific projects that meet a determined level of service to manage stormwater quantity at
14 a rate PWSA customers can afford.

15 These accomplishments are a natural extension of numerous projects that have
16 been completed. For example, in August 2020, PWSA completed construction on two
17 new green infrastructure projects to help manage stormwater within Four Mile Run,
18 which consists of building two engineered drainage channels in Schenley Park along
19 Overlook Drive and next to the Bridle Trail. Without these improvements, stormwater is
20 mostly unmanaged, flowing off the steep hillside from Overlook Drive to the Bridle Trail
21 below and further downhill, where it causes the combined sewer system to overflow into,
22 and flood, downstream neighborhoods and properties. The channels will create a path
23 where water can flow. These two “Early Action Projects” were part of the larger Four
24 Mile Run Stormwater Project that has a total project cost of approximately \$28 million

1 and encompasses Schenley Park and several City of Pittsburgh neighborhoods, including
2 Greenfield, Hazelwood, Oakland, Squirrel Hill, and the Run.

3 Customer Service

4 Customer service continues to be major area of focus for PWSA, particularly in
5 providing excellent customer service and in administering programs that are designed to
6 assist our most vulnerable low-income customers who face challenges in paying their
7 utility bills. PWSA witness Julie Mechling provides additional details about the many
8 measures that the Authority is taking to become a trusted public utility that is recognized
9 for excellence and valued by the customers it serves. She also discusses the
10 enhancements that PWSA has made to its low-income customer programs to improve the
11 availability of assistance to customers in need. In my testimony, I am highlighting only a
12 few initiatives in each area.

13 Through the use of technology and the streamlining of day-to-day operations,
14 PWSA has significantly improved customer access since 2021. On August 8, 2022,
15 PWSA's enterprise resource system SAP and its accompanying Customer Advantage
16 portal went live. This is an entirely new system that has enhanced customer access. The
17 Customer Advantage portal gives customers important tools to monitor and manage their
18 accounts. PWSA has also improved its call handling response times, resulting in
19 personnel handling 31,104 more customer calls in 2022 than in 2021. In addition to more
20 timely responding to customers, and responding to a greater number of customers, PWSA
21 has also embarked on a campaign designed to evaluate the quality of information that is
22 being conveyed to consumers, and improve those experiences, as necessary.

23 As to financial assistance that is available to qualifying low-income residential
24 customers, PWSA offers the following programs: (1) the Bill Discount Program

1 (“BDP”), (2) the Hardship Grant Program, (3) Winter Moratorium, and (4) the Lead
2 Service Line Replacement Reimbursement Program. It is noteworthy that in 2022,
3 PWSA’s enhanced Customer Assistance Programs offered more discounts to more
4 customers than ever before with a simplified and accessible process for enrollment. As a
5 result of these enhancements, enrollment in the BDP increased, with approximately 6,000
6 customers currently receiving assistance under this program. Among the highlights of
7 these new benefits, the BDP included an additional 50% discount on water usage charges
8 for very low-income customers and all customers enrolled in the Program automatically
9 receive an 85% discount on the stormwater charge. PWSA also expanded the Hardship
10 Grant Program to include sewage-only customers, and all confirmed low-income
11 customers are now automatically enrolled in the Winter Shutoff Moratorium. Further,
12 reconnection fees for all customers continued to be waived in 2022.

13 Environmental Compliance

14 PWSA has also made tremendous progress in the area of environmental
15 compliance, as it has continued to expand its Environmental Compliance program across
16 its system, with a program manager providing day-to-day oversight. A team of
17 specialists brings expertise in areas of air quality, stormwater, spill prevention,
18 wastewater discharge, and waste management. As part of this program, PWSA has
19 expanded its training and project coordination efforts across the organization. Currently,
20 PWSA is implementing an Environmental Management Information System to track and
21 coordinate regulatory compliance activity. I also wish to note that PWSA has fulfilled its
22 commitments under a 2020 settlement with the Pennsylvania Office of Attorney General
23 (“OAG”) relating to environmental compliance, which obligated PWSA to hire an

1 external and independent corporate monitor to provide reports to the OAG, PWSA and
2 the Pennsylvania Department of Environmental Protection (“DEP”).

3 **II. OVERVIEW OF NEED FOR RATE INCREASE AND UNIQUE PROPOSALS**
4 **INCLUDED WITH THIS FILING**

5 **Q. PLEASE PROVIDE AN OVERVIEW OF THIS FILING.**

6 A. Consistent with the significant progress PWSA has made in recent years, the Authority
7 remains focused on rebuilding and upgrading Pittsburgh’s water systems and is taking
8 every reasonable step to operate efficiently and keep its costs down. Nonetheless, the
9 Authority’s operating and capital expenses continue to increase. As explained in the
10 direct testimony of Mr. Barca, PWSA seeks a multi-year total overall rate revenue
11 increase of \$146.1 million, which is inclusive of the proposed Distribution System
12 Improvement Charge cap increase from 5% to 7.5%. This includes a \$46.8 million or
13 22.5% increase in the FPFTY (FY 2024), \$45.4 million or 17.8% in FY 2025, and \$53.9
14 million or 17.9% in FY 2026.

15 The drivers for this increase are as follows: 1) capital costs; 2) inflationary
16 operating budget costs, specifically for essential items such as energy, employee benefits,
17 and chemical costs; 3) costs related to the Wet Weather Consent Decree with the United
18 States Environmental Protection Agency (“US EPA”); 4) environmental compliance; 5)
19 decreased consumption; and 6) funds to meet new financial obligations and improve
20 financial metrics that impact PWSA’s bond rating. In addition, PWSA’s extensive
21 Capital Improvement Plan (“CIP”) discussed in Mr. King’s testimony includes the
22 refurbishment and replacement of a significant portion of PWSA’s water supply system,
23 which simply cannot be accomplished without additional rate relief. While grant funding
24 enables PWSA to stay on track, accelerating our plans to be a leader in the industry in

1 serving our customers requires additional money. Also, addressing regulatory
2 compliance issues and responding to unexpected situations that arise due to the age of the
3 system are directly contributing to increases in operating costs. As Mr. Barca explains in
4 his testimony, the rate increase that PWSA is seeking is the minimum amount that is
5 needed to continue operations while meeting the required financial metrics.

6 As noted above, PWSA is proposing to implement this increase over a three-year
7 period. An important reason for this proposal is that such an outcome would give PWSA
8 a level of financial security needed to continue performing our work, as well as better
9 access to the capital markets. A multiyear rate request also provides more transparency
10 for customers over the three-year period as to the increases that will be implemented. In
11 addition, preparing for and litigating rate cases involves a significant cost that is borne by
12 our ratepayers as we are a cash flow municipal authority. If PWSA is able to secure
13 approval for our three-year rate increase, we will be able to allocate the costs that would
14 normally be allocated to the rate cases to our operations and capital projects. I also note
15 that the efforts of PWSA staff in preparing for and litigating rate cases are in addition to
16 our regular operational duties. Without the added pressure of litigating a rate case for the
17 next three years, PWSA staff can more fully concentrate our efforts on operating and
18 improving our system for the benefit of our customers.

19 Also being proposed are two new adjustment charges: the Infrastructure
20 Improvement Charge (“IIC”) and the Customer Assistance Charge (“CAC”). The IIC
21 would permit PWSA to recover debt service on PENNVEST loans and loans authorized
22 by Water Infrastructure Finance and Innovation Act (“WIFIA”). WIFIA is the Federal
23 government equivalent of PENNVEST. The IIC will expedite PWSA’s ability to obtain

1 additional low-cost funding through PENNVEST and WIFIA by having a stable revenue
2 source to ensure the required debt covenants and additional bonds tests can be met, in
3 addition to having funds available to pay annual debt service.

4 The CAC is being proposed because, while PWSA values the benefits that its
5 customer service assistance program provides to vulnerable ratepayers, the administration
6 of customer assistance program has become increasingly expensive. The Customer
7 Assistance Charge would recover 1) the discounts provided to customers pursuant to the
8 Bill Discount Program, 2) the operating costs for the PGH2O Cares team, 3) the costs of
9 PWSA's Hardship Fund, and 4) past due arrearages forgiven pursuant to PWSA's
10 Arrearage Forgiveness Program. The CAC will ensure that PWSA collects the funds it
11 needs to provide these programs.

12 PWSA is also proposing to begin phasing out the minimum water and wastewater
13 charges starting in 2024 and completely removed in 2025. The rate design mechanics of
14 these proposals are fully described in the testimony of Mr. Smith. This proposal
15 includes additional features intended to mitigate the rate impact for our customers as
16 described more fully in the testimony of Ms. Mechling. PWSA is also proposing to
17 allocate \$432,640 to its Hardship Grant program and \$720,000 for the Arrearage
18 Forgiveness program to support the grants and credits provided to eligible customers.

19 **Q. PLEASE EXPLAIN THE RATE CASE TABLES YOU ARE PRESENTING AS AN**
20 **EXHIBIT WITH THIS TESTIMONY.**

21 A. PWSA Exhibit WJP-1 includes the Rate Case Tables. Support for the figures in this
22 Exhibit is provided in the testimony of the following PWSA Witnesses: Edward Barca,
23 Harold Smith, and Keith Readling.

1 **Q. PLEASE EXPLAIN THE ORIGIN AND PURPOSE OF THE RATE CASE**
2 **TABLES.**

3 A. The Rate Case Tables were developed in collaboration with the parties in PWSA's prior
4 rate case as directed by the Administrative Law Judges ("ALJs"). Because the
5 Commission's existing template for this information was developed for traditionally
6 regulated utilities, the ALJs granted PWSA leave to develop Rate Case Tables consistent
7 with the cash flow method for calculating the revenue requirement. Pursuant to this
8 directive, PWSA developed an initial version of the Rate Case Tables and then worked
9 collaboratively with the parties to further adjust and refine the initial version. PWSA
10 received helpful feedback from the parties during this process and the final, agreed-to
11 version of the Rate Case Tables were shared with the ALJs on July 24, 2020 and again in
12 the 2021 rate case, which would be helpful to the parties in the event of a fully litigated
13 proceeding. PWSA Exhibit WJP-1 presents PWSA's proposals in this case using this
14 template.

15 **Q. ARE THERE ANY SPECIFIC PROPOSALS INCLUDED WITH THIS FILING**
16 **THAT YOU WOULD LIKE TO POINT OUT?**

17 A. Yes. While PWSA's financial needs are compelling in view of the importance of fully
18 funding its CIP and enhancing the quality of its services, we are also cognizant of the
19 financial challenges that many of our customers have faced, and are continuing to face.
20 For that reason, PWSA is proposing a multiyear plan that is implemented over the course
21 of three years, 2024, 2025 and 2026. As testified by Ms. Mechling, PWSA has also
22 proposed enhancements to its customer assistance program. For instance, to promote
23 enrollment in its programs, PWSA is proposing to reach more potentially eligible
24 customers by expanding the eligibility from 150% of FPL to 200% of FPL. In addition,
25 to increase the impact of its Hardship Grant program, PWSA proposes to allocate two,

1 separate \$300 annual grants; one to be distributed to eligible water customers and one to
2 be distributed to eligible wastewater customers. An additional proposal would make a bill
3 customer available to eligible low-income customers in 2025 to offset the transition to a
4 new rate structure, which removes the minimum allowance. Thus, while the Authority
5 needs to make this request due to increases in operating expenses and to fund the
6 numerous essential projects in the CIP that are key to enhancing the quality of utility
7 services that PWSA provides, we have sought through these other proposals to balance
8 our financial needs against the challenges faced by customers in paying higher rates.

9 **Q. IS THERE A MAJOR FACTOR DRIVING THE NEED FOR THIS RATE**
10 **INCREASE?**

11 A. As explained by Mr. Barca, inflation is one of the biggest drivers for this rate request. It
12 has impacted all facets of the organization, from day-to-day operating expenses to
13 contractor bids for capital improvement projects. This is further compounded by the fact
14 that PWSA was drastically increasing operations to address deferred maintenance prior to
15 the rise of inflation. PWSA is now at a point where additional revenues must be
16 implemented or risk the financial stability of the organization.

17 **Q. PLEASE DESCRIBE OTHER IMPORTANT FACTORS FOR THE**
18 **COMMISSION TO CONSIDER.**

19 It is important to recognize the mandatory nature of many projects included in
20 PWSA's CIP due to the Consent Orders and Agreements ("COAs") issued by DEP,
21 which is included with Mr. King's testimony as PWSA Exhibit BK-1. These obligations
22 are addressed in detail by Mr. King's testimony. As most of what is in the CIP is
23 mandated by regulators, it is imperative that the funding be available to support them.
24 As Mr. King notes, PWSA's total approved budget in the 2023-2027 CIP for the

1 construction projects that are necessary to comply with the 2019 COA is approximately
2 \$377 million. However, the total budget for these projects, including what has been
3 completed to date and what will be completed post-2027 is approximately \$450 million.
4 Under recent amendments to the 2019 COA described by Mr. King and shown in PWSA
5 Exhibits BK-3 and BK-4, if PWSA does not comply in a timely manner with any term or
6 provision, it will be required to pay a one-time civil penalty of \$20,000.00, in addition to
7 \$1,000.00 per day for each violation, and is also subject to the imposition of additional
8 penalties. These penalties significantly contrast with the \$100.00 per day for each
9 violation that was in the original 2019 COA. As Mr. Barca explains, if PWSA is not
10 permitted to raise its rates as proposed in this proceeding, it will be unable to fulfill these
11 obligations. The result is that PWSA would be subject to the payment of these penalties,
12 and since PWSA does not have shareholders, our ratepayers would have to bear this
13 burden.

14
15 **III. DESCRIPTION OF PWSA AND THE PROCESS OF TRANSITIONING TO**
16 **COMMISSION JURISDICTION**

17 **Q. PLEASE DESCRIBE PWSA.**

18 A. Created by the City of Pittsburgh in 1984 pursuant to the Municipality Authorities Act,⁵
19 PWSA operates the largest combined water and sewer authority in Pennsylvania
20 producing an average of 70 million gallons of treated water daily and providing service to
21 more than 300,000 residents as well as up to 520,000 people during working hours in
22 total throughout the City of Pittsburgh and surrounding communities. PWSA's
23 employees have expertise in engineering, operations, maintenance, water quality,

⁵ 52 Pa.C.S. §§ 5601-5632.

1 customer service, safety, green infrastructure and many other disciplines. PWSA is
 2 committed to continuing to enhance its operations to provide service in a safe, sustainable
 3 and customer-friendly manner at just and reasonable rates.

4 **Q. WHAT INFRASTRUCTURE DOES PWSA MANAGE?**

5 A. Currently, PWSA is responsible for the day-to-day management, operation, maintenance,
 6 and improvement of virtually the entire City water supply, distribution, and wastewater
 7 collection systems. Below is an overview of these systems.

- 8 • The **water** supply and distribution system consists of a 117 million gallon per
 9 day conventional flocculation, sedimentation and rapid sand process
 10 treatment plant which was placed in service in 1969, 964 miles of water mains
 11 plus more than 81,000 service lines, more than 25,900 line valves, more than
 12 7,300 fire hydrants, one raw water pump station, ten finished water pump
 13 stations, one microfiltration plant, four reservoirs, and ten storage tanks. The
 14 total storage capacity of the reservoirs and tanks is approximately 455 million
 15 gallons. With consideration given to the pressure requirements of the
 16 distribution system, and storage capacities in each of the 15 pressure zones,
 17 the Authority stores enough finished water to provide (with water use
 18 restrictions) a 3 day uninterrupted supply to all customers should it
 19 temporarily be unable to treat additional water from the Allegheny River.
- 20 • The **wastewater** collection and conveyance system consists of approximately
 21 1,220 miles of sanitary, storm and combined sewer lines, 29,000 manholes,
 22 approximately 30,000 stormwater catch basins and inlets, 38 combined sewer
 23 overflow outfalls, 185 storm outfalls and four pump stations which are
 24 designed to carry both storm and sanitary flows. About 75% of the system is
 25 serviced by combined sewers (both wastewater and stormwater are collected
 26 in one pipe) and the remaining 25% are designed as separate sewage and
 27 stormwater piped systems. The average age of the sewer lines is between 60
 28 and 70 years old, with some portions reaching nearly 150 years in age. The
 29 wastewater collection and conveyance system discharges to a regional system
 30 that conveys sewer flows through trunk sewers to deliver to a wastewater
 31 treatment which services eighty-three cities, towns and boroughs in Allegheny
 32 County. The regional system is owned and operated by the Allegheny County
 33 Sanitary Authority (“ALCOSAN”)⁶ which maintains interceptors along the

⁶ ALCOSAN is a municipal authority (created by the City of Pittsburgh to comply with the Pennsylvania Clean Streams Law enacted in 1937) that serves as the regional sewage treatment facility. 35 Penn. Cons. Stat. §§ 691.1–691.1001. ALCOSAN provides wastewater treatment for 83 communities, including the City of Pittsburgh and maintains the facility pursuant to its National Pollutant Discharge Elimination

1 rivers to deliver sewage to its Woods Run Wastewater treatment plant prior to
 2 discharge in the Ohio River. Because the current combined sewer systems
 3 contribute to the Allegheny Region’s Combined Sewer Overflow volume,
 4 state and federal water quality regulations apply, including a regional Consent
 5 Decree involving ALCOSAN and the Pennsylvania Department of
 6 Environmental Protection mandating a \$2 billion Combined Sewer Overflow
 7 reduction program.⁷

8 **Q. HOW DOES STORMWATER FIT WITHIN THE WATER/WASTEWATER**
 9 **CONVEYANCE SYSTEM?**

10 A. Stormwater issues arise in two contexts: (1) the combined wastewater system Combined
 11 Sewer Overflows (“CSOs”); and, (2) the municipal separate storm sewer system (known
 12 as “MS4s”).⁸ The federal Environmental Protection Agency (“EPA”) develops and
 13 implements federal stormwater regulations to require compliance with water quality
 14 standards, which are implemented by EPA and the DEP. Regarding the sewer system,
 15 75% of the wastewater conveyance infrastructure is designed as a “combined” sewer
 16 system to capture both wastewater and stormwater in one pipe network. In addition to
 17 the combined system, one quarter of the current infrastructure managed by PWSA
 18 includes separate sewer and stormwater systems, which require compliance with
 19 stormwater management regulations (*i.e.*, MS4) and are subject to National Pollutant
 20 Discharge Elimination System (“NPDES”) Permits issued by DEP pursuant to EPA
 21 requirements.

System (“NPDES”) permit. PWSA does not own any sewage treatment facilities or provide consumers sewage treatment services. ALCOSAN is not regulated by the Commission.

⁷ ALCOSAN entered into a modified consent decree agreement with the Department of Environmental Protection, which approved a comprehensive, \$2 billion, long-term plan to significantly reduce the overflow of diluted, untreated wastewater into the region’s rivers. Details of ALCOSAN’s Clean Water Plan are available at: <https://www.alcosan.org/our-plan/plan-documents>

⁸ MS4 refers to a conveyance that is owned by a public entity that discharges to waters, is designed or used to collect or convey stormwater, is not a combined sewer system and is not part of a sewage treatment plan.

1 **Q. PLEASE EXPLAIN HOW PWSA IS WORKING TO ADDRESS STORMWATER**
2 **ISSUES.**

3 A. As Mr. Igwe explains in his direct testimony, PWSA approaches stormwater management
4 throughout Pittsburgh in an effort to lower the volume of combined system overflows.
5 PWSA’s forthcoming stormwater master plan will look comprehensively at stormwater
6 issues and overlaps both categories of stormwater (i.e. addressing the combined system
7 and the separate stormwater system). It also outlines how Pittsburgh intends to use green
8 infrastructure solutions to manage stormwater. The primary goals of PWSA’s
9 stormwater program are to reduce CSO volume; implement a stormwater asset
10 management program; define a publicly accepted level of stormwater management
11 capacity; achieve regulatory compliance; develop partnership with government and other
12 agencies to access eligible funds for flood protection and water quality projects; and
13 establish an affordable stormwater utility fee structure.

14 **Q. WHAT IS THE RELATIONSHIP BETWEEN PWSA AND THE CITY OF**
15 **PITTSBURGH?**

16 A. The water/wastewater conveyance infrastructure operated by PWSA is currently owned
17 by the City of Pittsburgh (“City”). PWSA first assumed responsibility for the system
18 operation and maintenance from the City pursuant to an agreement effective January 1,
19 1995 between the City and PWSA (the “1995 Cooperation Agreement”). Consistent with
20 a Memorandum of Lease dated July 27, 1995, PWSA is on the path to becoming the
21 official owner of the City’s assets and, on September 1, 2025, this transfer will be
22 effectuated. Under a newly negotiated City Cooperation Agreement (the “2019
23 Cooperation Agreement”), which has the force and effect of law under Act 70 of 2020,⁹

⁹ Act of July 23, 2020, P.L. 677, No. 70.

1 the City and PWSA conduct interactions on a business-like, transactional basis. The
 2 2019 Cooperation Agreement is included with my testimony as PWSA Exhibit WJP-2.

3 **Q. WHAT ISSUES ARE FACING PWSA AS IT OPERATES THE WATER AND**
 4 **WASTEWATER CONVEYANCE SYSTEMS OF THE CITY OF PITTSBURGH?**

5 A. As the City’s current water and sewer systems date back to the 1850s, PWSA continues
 6 to face challenges caused by the dated infrastructure, the presence of lead in water service
 7 lines, extreme storm events that impact stormwater and sewer systems, historical
 8 contractual relationships, complex organizational and management structures and
 9 numerous regulatory requirements and obligations.

10 **Q. HOW DID PWSA – A MUNICIPAL AUTHORITY – COME TO BE SUBJECT TO**
 11 **THE COMMISSION’S JURISDICTION?**

12 A. In December 2017, Act 65 was passed which added Sections 3201-3209 to the Public
 13 Utility Code subjecting PWSA to the Commission’s jurisdiction. Shortly after passage of
 14 Act 65, the Commission issued a Tentative Implementation Order to guide the process for
 15 PWSA’s transition to Commission jurisdiction.¹⁰ After review of comments from
 16 interested stakeholders, the Commission entered its Final Implementation Order on
 17 March 15, 2018, which is the roadmap PWSA has been following to transition to
 18 Commission jurisdiction.¹¹ I am pleased to report that with the adoption of Orders
 19 entered on July 14, 2022 and August 25, 2022, PWSA’s Compliance Plans have been

¹⁰ *Implementation of Chapter 32 of the Public Utility Code Re Pittsburgh Water and Sewer Authority*, Docket Numbers M-2018-2640802 (water) and M-2018-2640803 (wastewater), Tentative Implementation Order entered January 18, 2018.

¹¹ *Implementation of Chapter 32 of the Public Utility Code Re Pittsburgh Water and Sewer Authority*, Docket Numbers M-2018-2640802 (water) and M-2018-2640803 (wastewater), Final Implementation Order entered March 15, 2018.

1 approved by the Commission and their provisions are now undergoing full and final
 2 implementation.¹²

3

4 **IV. PWSA ORGANIZATIONAL STRUCTURE, MANAGEMENT QUALITY**
 5 **UPDATES**

6 **Q. PLEASE DESCRIBE THE GOVERNING BODY FOR PWSA.**

7 A. PWSA is governed by a nine-member Board of Directors (“Board”) whose members are
 8 appointed by the Mayor of the City and confirmed by City Council. Although previously
 9 the Board had seven members, it voted on March 26, 2020 to amend the Articles of
 10 Incorporation to expand to nine members. The Board is responsible for providing
 11 strategic direction and oversight to the PWSA management team, as well as adopting the
 12 Authority’s annual operating and capital budgets, approving contracts, and setting rates.

13 **Q. PLEASE DESCRIBE PWSA’S EXECUTIVE MANAGEMENT AND**
 14 **ORGANIZATIONAL STRUCTURE.**

15 A. PWSA is managed by an Executive Leadership Team under the Chief Executive Officer
 16 inclusive of Chief Legal Officer, Chief Operating Officer & Chief Financial Officer,
 17 Chief Environmental Compliance & Ethics Officer, Chief Information & Performance
 18 Officer, Chief People & Culture Officer, and Chief Engineering Officer. Environmental
 19 Compliance, Engineering and Construction, and Operations are three main departments
 20 to highlight given some of the major PWSA initiatives underway. The remaining areas
 21 within the organization could be categorized as administrative functions which are
 22 responsible for the administrative and support functions of PWSA; this includes

¹² *Implementation of Chapter 32 of the Public Utility Code Regarding Pittsburgh Water and Sewer Authority – Stage 2, Docket Nos. M-2018-2640802 and M-2018-2640803 (Orders entered July 14, 2022 and August 25, 2022).*

1 Customer Service, Finance, Procurement, Information Technology, Public Affairs, Legal,
2 and Human Resources.

3 The PWSA Environmental Compliance department, and subsequent
4 programming, has been developed over the last two years as the foundation of PWSA's
5 commitment to operating in accordance not only with the strict requirements of the law,
6 but also in a manner that is consistent with high ethical and professional standards in the
7 delivery of drinking water, wastewater, and stormwater services to our customers. In
8 September 2021, a federal judge accepted the plea agreement PWSA negotiated with the
9 EPA and the U.S. Department of Justice related to Clean Water Act violations dating
10 back to prior management in 2016 and 2017. This final step in the legal process means
11 that we are owning up to our past failures and moving forward as a utility that is focused
12 on serving our customers and protecting the environment. PWSA is equipped with the
13 resources, the dedicated leadership, and the fortitude to ensure that we move beyond past
14 mistakes and forge a culture that prioritizes ethical behavior with a focus on
15 environmental compliance. This culture change will help protect the environment and
16 ensure PWSA continues to provide high-quality water services to the City of Pittsburgh
17 and our neighbors. PWSA has developed and implemented an Environmental
18 Compliance and Ethics Program with three primary goals: 1) Prevent fraud, waste, abuse,
19 and other improper activity by creating a culture of environmental compliance and ethics
20 within PWSA, 2) Detect any non-compliance activities at an early stage before they may
21 impact water quality or compliance with regulations, and 3) Respond swiftly to
22 environmental compliance and ethics issues through appropriate action and
23 documentation. The Environmental Compliance and Ethics Program establishes an

1 organization-wide framework for environmental compliance and ethics through the
2 following five key components: 1) PWSA's Mission Statement and Core Values, 2)
3 Organizational Structure, 3) Codes and Policies, 4) Training, and 5) an Environmental
4 Compliance Manual. The Environmental Compliance and Ethics Program applies to all
5 PWSA Directors, Employees, Agents, and Contractors.

6 The Operations Department operates and maintains the water treatment, water
7 supply and water distribution storage system, to ensure an adequate quantity of water to
8 PWSA's customers while maintaining compliance with state and federal quality drinking
9 water regulations. The Operations Department also ensures conveyance of sewage and
10 stormwater to the ALCOSAN regional wastewater system and is responsible for
11 maintaining all sewage collection infrastructure below grade. The Operations Department
12 works collaboratively with the City of Pittsburgh Department of Public Works and
13 Department of Mobility and Infrastructure to ensure roads remain safe for public travel at
14 all times. Operations' responsibility is to be aware of customer needs and address their
15 concerns (e.g., public service line leaks, water main leak repairs, catch basin cleaning,
16 and sewer line and fire hydrant maintenance and repair). PWSA maintains a sufficient
17 inventory of materials, staff, and equipment to respond promptly to a request regarding
18 water and wastewater services. Additionally, Operations strives to maintain a safe
19 working environment while establishing an effective and efficient operations division that
20 will provide the highest quality customer service at the lowest possible cost.

21 The Engineering and Construction Department works to deliver a safe, efficient
22 and effective capital improvement program and to support operations with cost-effective
23 technical solutions to water line breaks, sewer stoppages and collapsed pipes, combined

1 sewer overflows (“CSOs”) and stormwater flooding and basement backups. Also,
2 Engineering and Construction is responsible for managing PWSA’s response to
3 regulatory consent orders for drinking water, wastewater, and stormwater. Specific
4 program areas delivered through Engineering and Construction include: Water Reliability
5 Plan for critical drinking water infrastructure, Lead Service Line Replacement Projects,
6 Wet Weather Planning for combined and sanitary sewer overflows, Urgent Water and
7 Sewer Projects, and Green Infrastructure for stormwater management. Engineering and
8 Construction also prepares and assists in reviewing of water and sewer tap-in applications
9 from developers.

10 **Q. HOW DOES PWSA STAFF ITS OPERATIONS?**

11 A. PWSA has 393 employees as of April 23, 2023. The majority of Authority employees
12 are represented by one of three labor unions: The Pittsburgh Joint Collective Bargaining
13 Committee represents blue-collar employees (plumber, electrician, truck driver, etc.); The
14 American Federation of State, County and Municipal Employees represents Local 2719
15 (customer service, dispatch, field service technicians, chemists) and Local 2037 (union
16 foremen). Management and professional staff are “at will” employees with no Union
17 affiliation. PWSA has engaged the services of professional consultants to support
18 PWSA’s rapid growth in all staff categories and as necessary to meet its goals and
19 objectives. These embedded consultants assist with permitting, design, and construction
20 of facilities/infrastructure upgrades and replacements. PWSA engages engineering
21 consultants to support all capital project implementation, including planning, design, and
22 construction under the supervision of PWSA Project Managers. PWSA also supplements
23 its core staff with a financial consulting services firm to support tariff and fee analyses

1 and additional experts in finance, legal and administration are engaged as needed or
2 required to fulfill state, federal and local regulatory and administrative requirements.

3 **Q. IS PWSA WELL-POSITIONED TO CONTINUE ITS FORWARD PROGRESS?**

4 A. Provided that PWSA's obtains approval for the necessary rate relief, PWSA will be in a
5 solid position to continue making progress toward enhancing the quality and
6 effectiveness of customer service, providing responsible and responsive operations
7 service, improving infrastructure reliability, and maintaining regulatory compliance.
8 While PWSA has completed a number of construction projects that are designed to
9 provide more reliable service to customers, meet stricter water quality standards and
10 improve stormwater management, we need to continue these efforts so that we are a
11 utility of the future that delivers the highest possible quality of services to our customers.
12 Frankly, continued support from the Commission in the form of rate relief as well as
13 collaborative efforts to improve the safety, quality and reliability of PWSA's water,
14 wastewater and stormwater services are a must.

15
16 **V. CONCLUSION**

17 **Q. DOES THAT COMPLETE YOUR DIRECT TESTIMONY?**

18 A. Yes, although I reserve the right to file supplemental testimony if needed.

Exhibit WJP-1

(1) Company Main Brief

Exhibit WJP-2

COOPERATION AGREEMENT
BETWEEN THE CITY OF PITTSBURGH AND
THE PITTSBURGH WATER AND SEWER AUTHORITY

This Cooperation Agreement ("Agreement"), is made this 3rd day of October, 2019, by and between the CITY OF PITTSBURGH, a municipal corporation existing under the laws of the Commonwealth of Pennsylvania ("City"), and THE PITTSBURGH WATER AND SEWER AUTHORITY, a body corporate and politic organized and existing under the laws of the Commonwealth of Pennsylvania ("PWSA").

WHEREAS, the City and PWSA entered into a Cooperation Agreement dated as of June 15, 1995 but effective as of January 1, 1995 (the "1995 Cooperation Agreement") and a First Amendment to Cooperation Agreement dated March 21, 2011 (the "First Amendment" and together with the 1995 Cooperation Agreement, the "Original Cooperation Agreement") relating to the operation and maintenance of the System, as hereinafter defined; and

WHEREAS, this Agreement is specifically intended to reinforce the concurrence of the parties that neither the City nor PWSA will entertain proposals, make arrangements or allow the sale or ownership of the System to a for-profit private entity; and

WHEREAS, pursuant to Act 65 of 2017, which amended the Pennsylvania Public Utility Code (the "Public Utility Code"), PWSA became subject to the Public Utility Code, except Chapters 11 (relating to certificates of public convenience) and 21 (relating to affiliated interests) in the same manner as a public utility and subject to regulation by the Pennsylvania Public Utility Commission (the "PUC"); and

WHEREAS, the Original Cooperation Agreement terminated on October 3, 2019 and City and PWSA desire to enter into this Agreement to, among other things, (i) reflect changes in their rights and obligations each with respect to the other, (ii) accurately reflect the division of services related to the System, (iii) accurately provide for payments by the City and PWSA to the other based upon actual, verifiable, direct expenses, and in accordance with customary utility practices under the Public Utility Code, (iv) confirm that payments by PWSA to the City continue to be subordinate to all debt obligations of PWSA, (v) provide for cooperation by the City and PWSA in their respective capital projects which may impact each other, (vi) provide for clarification of the responsibilities of PWSA with respect to City Parks larger than 50 acres and other City properties, (vii) confirm that the System will remain under public ownership and (viii) set forth certain other provisions relating to the roles and responsibilities of the City and PWSA with respect to the System.

Therefore, intending to be legally bound, the parties agree as follows:

1. **Incorporation of Recitals.** The foregoing recitals are incorporated herein by reference.
2. **Definitions.**

2.1 "Actual Direct Expenses" will mean all costs and expenses incurred by the City or PWSA that are directly related to services or goods provided to or for the benefit of the

other. Expenses in this category are either documented by a third-party invoice or specifically identifiable in the records of the party incurring the expense.

2.2 "Agreement" means this Cooperation Agreement.

2.3 "ALCOSAN" means the Allegheny County Sanitation Authority.

2.4 "City Parks" means City-owned parks that consist of fifty (50) or more contiguous acres, which include the following: Hays Woods, Frick Park, Schenley Park, Highland Park, Emerald View Regional Park, Riverview Park, McKinley Park, Allegheny Commons, Southside Park, Brookline Memorial Park and Sheraden Park. It is recognized that additional parks may be added, subject to the approval by PWSA, which approval will not be unreasonably withheld.

2.5 "Combination Sewer Laterals" means those Laterals that connect to Combined Sewers.

2.6 "Combined Sewers" means underground pipes or tunnels designed to transport sewage and stormwater.

2.7 "Distribution Mains" means small water mains that convey drinking water to Service Lines.

2.8 The "Effective Date" of this Agreement is October 3, 2019.

2.9 "Sanitary Sewers" means underground pipes or tunnels designed to transport sewage.

2.10 "Senior Debt" means all those bonds, notes, indentures, loan agreements, funding agreements, interest-rate swap agreements, hedge agreements, credit facilities, liquidity facilities, remarketing agreements, intercreditor agreements and any other related financial obligations and indebtedness issued, entered into or undertaken by the PWSA at any time, including but not limited to those in existence on the Effective Date hereof, but will not mean or include any obligations of the PWSA to the City, either under this Agreement or otherwise.

2.11 "Sewer Grates" means a grate that covers the entrance to a ground level Sewer Line, which allows water to enter the sewer.

2.12 "Sewer Lines" means Sewer Mains and Sewage Laterals.

2.13 "Service Lines" means those water lines that connect to System Water Mains and that deliver water from the Water Mains to one or more buildings, premises, or facilities.

2.14 "Sewage Laterals" means those individual Sewer Lines that transport sewage and/or storm water from one or more buildings or premises to the Sewer Mains.

2.15 "Sewer Mains" means the pipes that carry sanitary or combined sewage from Laterals to ALCOSAN sanitary mains or combined sewer mains.

2.16 "Sewer System" means the portion of the System that 1) collects sanitary and combined sewage and conveys it to ALCOSAN and 2) collects and discharges stormwater.

2.17 "Stormwater Conveyance Lines" means stormwater pipes that convey separated stormwater to points of approved discharge.

2.18 "System" means and includes, the following, then owned or operated by PWSA and used in the rendering of water service and sewer service by PWSA as of any particular time: all plants, warehouses, equipment, structures, facilities, lands, easements, rights of way, public Water Lines and public sewer lines, patents, copyrights, contracts with municipalities or authorities outside the boundaries of the City, water treatment plants, pumping facilities, reservoirs, storage tanks, distribution mains, public Service Lines and appurtenances, public sewers, inlets, sewer grates, manholes, diversion structures, pumping stations, force mains, public subsurface Stormwater Conveyance Lines and related facilities conveying stormwater, all patents and copyrights obtained by the City, assigned to the PWSA, or retained directly by PWSA and related to the design, operation, maintenance, replacement or abandonment of water, sewer or stormwater systems, all other tangible public property, fixed or moveable, all capital additions then constructed or otherwise acquired relating to water service and sewer service, and all franchises used or useful to the PWSA at such particular time in the rendering of water, sewer and stormwater service by PWSA and other agreements between the City and PWSA.

2.19 "Water Lines" means Water Mains and Service Lines.

2.20 "Water Mains" means the pipes that distribute drinking water from the treatment plants, pump stations and storage facilities to Service Lines.

2.21 "Water System" means the portion of the System that treats and distributes drinking water.

3. Services to be Provided between the City and PWSA.

3.1. The City Services. The City may render to PWSA the following services and goods: (i) participation of eligible PWSA employees in the City's Pension Plan, (ii) fuel for PWSA vehicles, (iii) City permits and licenses relating to PWSA projects (the charges to PWSA to be based on the usual customary charges paid by utilities obtaining similar permits and licenses from the City), (iv) vehicle fleet maintenance services, (v) a portion (50%) of street sweeping costs starting January 1, 2020, and (vi) any other services and goods upon such terms as may be agreed to by the parties hereto performed at usual and customary costs and the charges to PWSA based on the usual customary charges paid by utilities obtaining similar services and goods from the City. Except where otherwise specifically provided, PWSA will compensate the City for those services and goods provided pursuant to this Agreement. Any payments by PWSA pursuant to this Agreement shall be based on Actual Direct Expenses and must meet external audit and PUC auditing standards. The parties to this Agreement acknowledge that due to the unavailability of actual cost data certain current year charges by the City to PWSA may be

based on prior year data. If payments are made based on information other than actual current data, the accounts will be reconciled and overpayment and underpayment corrected no later than July 1 of the following calendar year. The City and the PWSA are not obligated to provide or to purchase these services from each other and may seek the services from other providers.

3.2 PWSA Services. PWSA may render to the City such services as agreed to by the City and PWSA which may include but not be limited to the following: (i) providing water through PWSA water mains to City properties, (ii) fire hydrant services, (iii) conveyance of sewage through PWSA sewer mains to ALCOSAN and payment of ALCOSAN charges, subject to Section 6.3 of this Agreement, and (iv) payment of any subsidy to other water service providers. Any such services by PWSA to the City will either be paid for directly by the City to PWSA or taken as a credit by PWSA against amounts owed by PWSA to the City under this Agreement. Any payments by the City to PWSA shall be based on Actual Direct Expenses. The City and the PWSA are not obligated to provide or to purchase these services from each other and may seek the services from other providers.

4. Capital Improvement Projects. The parties will work together in good faith, consistent with the City Right-of-Way Manual, as the same exists on the date of this Agreement (the "City Right-of-Way Manual") and the PWSA Developer Manual, as the same exists on the date of this Agreement (the "PWSA Developer Manual") to determine the impact of a City project on the System, including the design and location of any project and including the reconstruction and/or resurfacing of roadways. The parties will also work together in good faith, consistent with the City Right-of-Way Manual and the PWSA Developer Manual, to determine the impact of a PWSA project on the City's existing facilities and infrastructure, including the design and location of any replacement facilities or infrastructure resulting from the PWSA's project construction.

5. Water and Sewer Lines To and Within City Properties. The City and the PWSA agree as follows:

5.1 City Parks.

5.1.1 Water Mains and Service Lines. The PWSA will be responsible for the operation, maintenance, repair, and replacement of water mains. The PWSA will be responsible for existing and new service lines, which provide water service by PWSA to City Parks larger than 50 acres. If a water meter is not in place, PWSA shall provide a meter installation, and if necessary, a meter vault, as prescribed in the PWSA Developer Manual and in accordance with PUC requirements. The cost of the meter and meter vault installation shall be shared equally by PWSA and the City. The City shall be responsible for the cost of the repair and replacement of any meter vaults and meters. The City will be responsible for the operation, maintenance, installation, repair and replacement of plumbing inside City Park buildings or other City Park facilities such as fountains, spray pools and swimming pools.

5.1.2 Combined and Sanitary Sewers Mains and Laterals. The PWSA will be responsible for the operation, maintenance, repair and replacement of sanitary

sewer and combined sewer mains. The PWSA will be responsible for existing and new sewer laterals within the City Parks larger than 50 acres.

5.2 Other City Properties.

5.2.1 Water and Sewer Mains, Service Lines and Laterals. The PWSA will be responsible for the operation, maintenance, repair, and replacement of water mains providing water service by PWSA to City properties. The PWSA will be responsible for the operation, maintenance, repair, and replacement of sanitary sewer and combination sewer mains.

The City shall be treated like other commercial customers of PWSA with respect to service lines and sewer laterals with two important exceptions:

First, the operation, maintenance, repair and replacement of water service lines and sewer laterals in City Parks larger than 50 acres shall remain the responsibility of PWSA.

Second, the City will be responsible for the total cost of the operation, maintenance, repair and replacement of all other water service lines and sewer laterals beginning in 2025 and thereafter. Prior to 2025, the City will be responsible for the cost of these service lines and sewer laterals in increasing proportion following this annual schedule:

<u>Year</u>	<u>Percentage of Cost to be paid by City</u>
2020	0%
2021	20%
2022	40%
2023	60%
2024	80%
2025 and thereafter	100%

With respect to water service provided by PWSA, if a water meter is not in place, PWSA shall provide a meter installation, and if necessary, a meter vault, as prescribed in the PWSA Developer Manual and in accordance with PUC meter requirements. The cost of the meter and meter vault installation shall be shared equally by PWSA and the City. The City shall be responsible for the cost of the repair and replacement of any meter vaults and meters. The City shall be responsible for the operation, maintenance, installation, repair and replacement of internal plumbing with respect to all City buildings, facilities and City properties, including City Parks of 50 acres or less.

5.3 Saw Mill Run. PWSA will be responsible for the operation, maintenance, repair and replacement of water and sewer mains located in Saw Mill Run. PWSA shall not be responsible for the operation, maintenance, repair and replacement of service lines and laterals located in Saw Mill Run.

6. **Subsidy Payments; Water to City; Sewage Treatment Charges.**

6.1 **Subsidy Payments.** Pursuant to Ordinance No. 675 of the City enacted on December 27, 1973, the City entered into an agreement, dated December 28, 1973, with the Western Pennsylvania Water Company (now known as the Pennsylvania American Water Company ("PAWC")) (the "Water Rate Subsidy Agreement"). This agreement permitted the City to subsidize the water rates for City residents who are customers served by PAWC. Currently PWSA makes those subsidy payments to PAWC on behalf of the City. PWSA is now subject to PUC regulation and PUC regulations do not permit PWSA to subsidize the rates of a utility which is subject to PUC regulation.

Pursuant to this Agreement, it is agreed by both parties that:

- (1) The original Water Rate Subsidy Agreement is immediately assigned to PWSA;
- (2) It is understood that this Subsidy Agreement will be terminated by PWSA as soon as PWSA's current and projected rate increases have effectively eliminated any measurable subsidy to at least 67% of the residential customers (those with a 5/8" meter) for City residents served by PAWC. A measurable subsidy is defined as more than \$1.00 per month. The termination of the subsidy could occur as early as 2020.
- (3) Until the Water Rate Subsidy Agreement is terminated, PWSA and the City will share in the subsidy payments as follows:

--In 2020, PWSA will pay for any subsidy pursuant to the Water Rate Subsidy Agreement, if one exists;

--In 2021, PWSA and the City will share equally in any subsidy payment pursuant to the Water Rate Subsidy Agreement, if one exists;

--In 2022 and years thereafter, the City will pay any existing subsidy pursuant to the Water Rate Subsidy Agreement, if one exists.

During this period, the City will either promptly reimburse PWSA or PWSA will take as a credit the amount of any subsidy payments made by PWSA against payments to be made by PWSA hereunder.

6.2 **Water to City and Fire Hydrant Charges.** Until January 1, 2020, the City shall be entitled without charge to receive up to 600 million gallons of water each calendar year to be used by the City, its departments, agencies, and instrumentalities.

With respect to the Pittsburgh Zoo & PPG Aquarium, the Bob O'Connor Golf Course at Schenley Park and Phipps Conservatory and Botanical Gardens (collectively, the "Third Party Water Users"), which have agreements (e.g. leases) containing provisions contractually obligating the City to provide water and sewage service without charge as long as the City receives water and sewage service without charge, the water and sewer usage by the Third Party Water Users beginning January 1, 2020, shall be subject to the phased in PWSA

charges set forth in the table included in the second paragraph immediately following this paragraph. After water meters have been installed at the facilities of the Third Party Water Users, PWSA shall directly bill said users for their water and sewer usage in accordance with the aforesaid table.

The City shall not receive a credit for any water not used. To the extent the City uses in excess of 600 million gallons in any calendar year, the PWSA may offset that cost based on normal PWSA charges against monies owed the City under this Agreement. The City will cooperate with the PWSA in providing for the installation of water meters and meter vaults, if necessary, in all City properties including City Parks not metered as of the Effective Date, the cost of which shall be shared equally by PWSA and the City as set forth in Section 5 of this Agreement. The City shall not withhold or impede the installation of water meters and meter vaults at any of its properties including parks. Any City properties including parks not metered by January 1, 2024 will be subject to flat water charges levied by PWSA in accordance with its usual and customary practices.

Beginning January 1, 2020, the City shall pay PWSA normal PWSA charges (currently water, wastewater and ALCOSAN) on City-owned metered properties for all water usage and any fire hydrant usage charge. The foregoing charges shall be phased in over a five-year period as follows:

<u>Year</u>	<u>Percentage of Usage Charged</u>
2020	20%
2021	40%
2022	60%
2023	80%
2024 and thereafter	100%

6.3 Sewage Treatment Charges. As set forth in Section 5B of that certain Memorandum of Understanding by and among the City, PWSA and ALCOSAN dated October 16, 1996, the City will pay ALCOSAN directly for all City property ALCOSAN accounts. If ALCOSAN does not permit the City to pay it directly for the City property ALCOSAN accounts and PWSA makes such payments to ALCOSAN on behalf of the City, the City shall either promptly reimburse PWSA the amount of such payments made by PWSA to ALCOSAN or PWSA shall be entitled to a credit against any payments required to be made by PWSA under this Agreement.

7. Granting of Easements and Rights of Way. Subject to necessary City Council approval, the City shall grant to PWSA all necessary easements and rights of way which may be required by PWSA in the maintenance, repair and capital improvements to the System.

8. City Payroll Tax. Similar to other utility employers subject to the City's Payroll Tax, PWSA hereby agrees to pay the City effective January 1, 2020 an amount calculated based on the prior year's payroll data but otherwise in accordance with the City's Payroll Tax and the regulations issued pursuant to the Title II, Article VII, Chapter 258 of the City Code (the

"Payroll Tax Regulations"). Such amount shall be paid annually or taken as a credit by PWSA against amounts owed by the City under this Agreement.

9. **PURTA Payments.** Similar to other entities furnishing utility services that are regulated by the PUC, PWSA hereby agrees to pay the City, beginning with the year commencing January 1, 2020, an amount calculated pursuant to the Pennsylvania Public Utility Realty Tax (PURTA) (Article XI-A of the Tax Reform Code of 1971 (P.L. 6, No. 2), as amended). Subject to the phase-in below, the amount to be paid by PWSA ("PURTA Payment") shall be calculated based on the fair market value, as determined under PURTA and the regulations thereunder, of the PWSA realty of the System used for the treatment and delivery of water to PWSA customers. The PURTA Payment shall be paid annually by PWSA to the City in an amount that shall be phased in as follows:

<u>Year</u>	<u>% of PURTA Payment to be paid to the City</u>
2020	20%
2021	40%
2022	60%
2023	80%
2024 and thereafter	100%

In lieu of making a PURTA Payment, the amount of such payment, at the sole option of PWSA, may be taken as a credit against amounts owed by the City to PWSA under this Agreement.

10. **Credit May Not Be Pledged.** The credit of one party to this Agreement will not be pledged for payment of any debts of the other party, and neither party will be liable for debt payments of the other party. Unless consented to by the City, the taxing power of the City will not be pledged for payment of any PWSA indebtedness.

11. **Subordination to Senior Debt.** The City agrees to subordinate all legal and equitable rights it has or may have to payment from the PWSA for services rendered and goods provided by the City to the PWSA, whether under this Agreement, any amendment thereto, or otherwise, to the Senior Debt. The PWSA may make and the City may retain regularly scheduled payments under this Agreement when and as due; provided, however, that no payments may be made by the PWSA or retained by the City upon the occurrence of an event of default under any Senior Debt instrument or agreement or if the making of such payment would cause an event of default thereunder. The City agrees to subordinate, and does hereby subordinate, any payments received from the PWSA to the indefeasible payment or satisfaction in full of the Senior Debt.

The City is not obligated to pay the principal, redemption price, if any, or other payments on the Senior Debt. Neither the full faith, credit nor taxing power of the City is pledged to such payments.

This Agreement constitutes a supplement to the Original Cooperation Agreement within the meaning of PWSA's 2017 Amended and Restated Trust Indenture and 2019 Amended and Restated Subordinate Trust Indenture.

12. **Conflict With PUC Regulations.** If any obligation of PWSA to the City under this Agreement conflicts with provisions of the Public Utility Code or regulations of PUC thereunder, the provisions of the Public Utility Code and regulations of the PUC shall control. By signing this Agreement, or any other agreement to which it and PWSA are parties, the City does not consent to automatic PUC jurisdiction and does not waive any right to object thereto.

13. **Notices.** All notices and correspondence between the City and PWSA concerning or in furtherance of this Cooperation Agreement will be addressed to:

The City: Mayor William Peduto

 Pittsburgh, PA 15219
 Phone: 412-394-2428
 Fax: 412-394-2555

Each party will notify the other whenever there is any change in the required contact.

14. **Miscellaneous Matters.**

a. With respect to tap-in fees charged by PWSA, until January 1, 2025, or at such later date as approved by the PWSA Board, the City shall be entitled to a 100% governmental exception to tap-in fee charges with respect to City owned governmental projects, to include community gardens located on City property.

c. PWSA and the City will obtain an appraisal of the water facilities component of the System, the cost of which shall be equally shared by the City and PWSA.

d. With respect to unknown water lines, if PWSA or the City discovers a previously unknown water line PWSA will consider such line to be part of the System provided the line was constructed in accordance with PWSA specifications that existed at that time and located within City owned property.

e. The City and PWSA will jointly create a map identifying water service lines and laterals within the City Parks. Each party will be entitled to an original copy of this map.

f. If PWSA abandons or vacates any System property prior to September 1, 2025, such property shall remain as City-owned property. After PWSA exercises its option to acquire the System, PWSA will provide the City with ninety (90) days prior written notice of its intent to sell any of the System's real property and the City shall have a right of first refusal to purchase said real property at fair market value. The City must exercise said right of first refusal within ninety (90) days after receiving the above written notice from PWSA.

15. **Relationship of PWSA and City.** The City agrees that the interactions between the City and PWSA under this Agreement will be on a business-like, transactional basis and the provisions hereof will be applied to PWSA in a manner similar to utilities operating in the City subject to the provisions of this Agreement.

16. **Public Ownership.** The City and PWSA agree that the System will remain under public ownership.

17. **Entire Agreement.** This Agreement will constitute the entire integrated agreement of the parties. No prior or contemporaneous communications or prior drafts will be

relevant or admissible for purposes of determining the meaning or intent of any of the provisions hereof.

18. **Amendments.** No changes, additions, modifications or amendments of this Agreement will be effective unless they are set out in writing and signed by the parties hereto.

19. **Assignment.** This Agreement will not be assignable by either party without the written consent of the other party.

20. **Termination.** The City and PWSA shall each have the right to unilaterally terminate this Agreement at any time upon ninety (90) days written notice to the other.

21. **Governing Law.** This Agreement will be governed by the laws of the Commonwealth of Pennsylvania, without reference to its conflicts-of-laws principles.

22. **Conflict.** To the extent that any provision in this Agreement conflicts with any provision of any trust indenture securing any indebtedness of the PWSA, the provisions of the trust indenture will prevail.

23. **Severability.** The provisions of this Agreement will be severable and should any part of the Agreement be declared invalid or unenforceable, the remainder will continue in full force and effect.

24. **No Third-Party Beneficiaries.** This Agreement shall create no rights in any party other than the City and the PWSA and no other party is intended to be a third-party beneficiary of this Agreement, except as specifically indicated herein. Moreover, the respective responsibilities and obligations of PWSA and the City with respect to service lines and the System set forth in this Agreement shall only apply to PWSA and the City and not to any other customer of PWSA.

25. **Pittsburgh Home Rule Charter.** This Agreement is subject to the provisions of the City of Pittsburgh Home Rule Charter.

26. **Authorizing Resolution.** The City is authorized to enter into this Agreement pursuant to Resolution No. 464 of 2019, effective July 25, 2019; and the PWSA is authorized to enter into this Agreement under Agenda Item No. 130 of 2019 duly approved and adopted at a meeting of its Board held on June 28, 2019.

[SIGNATURES ON NEXT PAGE]

IN WITNESS WHEREOF, the parties have duly executed this Cooperation Agreement the day and year first above written.

1 **I. INTRODUCTION**

2 **Q. PLEASE STATE YOUR NAME AND POSITION FOR THE RECORD.**

3 A. My name is Edward Barca and I am the Director of Finance for The Pittsburgh Water and
4 Sewer Authority (“PWSA” or “Authority”).

5 **Q. WHEN DID YOU TAKE ON THE POSITION OF TREASURER?**

6 A. I was appointed as the Authority’s Treasurer in June 2018 and assumed my duties with
7 the Authority during August 2018. I was promoted to the Deputy Director of
8 Finance/Treasurer in July 2019 and ultimately became the Director of Finance in June
9 2020, which is my current position.

10 **Q. PLEASE SUMMARIZE YOUR EDUCATIONAL BACKGROUND.**

11 A. I have a Master’s Degree in Finance from the Colorado State University-Global Campus
12 and a Bachelor's Degree in Finance from Mercyhurst University.

13 **Q. PLEASE PROVIDE A SUMMARY OF YOUR RELEVANT EXPERIENCE.**

14 A. I have been at the Authority since August 2018. As I stated, I started as the Authority’s
15 Treasurer in August 2018. I remained in that position until I became the Authority’s
16 Deputy Director of Finance/Treasurer in July 2019 and then the Director of Finance,
17 which is the position I currently hold.

18 Prior to working at the Authority, I worked for the City of Pittsburgh (“City”). I
19 joined the City in 2015 and was promoted to the Assistant Director of Finance in 2017.
20 While at the City, I served as a Business Intelligence Analyst, Senior Financial Analyst,
21 Revenue Manager, and, finally, Assistant Director of Finance.

22 Before starting with the City, I had prior work experience as a Financial Planning
23 Analyst for the Allegheny Financial Group and as a Financial Services Representative for

1 E*TRADE Financial. In addition, since November 2015, I have owned and operated a
2 business — Barca Tax Services, LLC — that provides tax preparation services.

3 **Q. MR. BARCA, WHAT ARE YOUR VARIOUS JOB RESPONSIBILITIES WITH**
4 **THE PWSA?**

5 A. In my present position, I am responsible for the financial affairs of the Authority along
6 with overseeing the Finance Department. This includes creating, implementing, and
7 monitoring the annual operating and capital budgets. I also manage the Authority’s (a)
8 cash and liquidity to ensure that sufficient funds are available to process payments, invest
9 in infrastructure, and service debt while preserving principal and thereafter maximizing
10 return on cash and investments; and (b) debt portfolio, which includes assessing
11 opportunities for financing and refinancing, securing additional debt capital from both
12 bank and capital markets, managing the interest rate swap portfolio and maintaining all
13 credit support vehicles. I further help to ensure compliance with all trust indentures, loan
14 agreements, bond covenants, and filing deadlines.

15 **Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE PENNSYLVANIA**
16 **PUBLIC UTILITY COMMISSION?**

17 A. Yes. I presented written Direct, Supplemental Direct, Rebuttal and Rejoinder testimony
18 in support of PWSA’s most recent rate case at Docket Numbers R-2021-3024773 (water),
19 R-2021-3024774 (wastewater), and R-2021-3024779 (stormwater). I also presented
20 written Direct Testimony in support of PWSA’s Compliance Plan Stage 2 Stormwater
21 Proceeding at Docket Nos. M-2018-2640802 and M-2018-2640803. In addition, I have
22 been directly involved in various financial proceedings before the Pennsylvania Public
23 Utility Commission (“PUC” or “Commission”) regarding the issuance of securities
24 certificates. In 2022 and 2023, these proceedings included: (1) the issuance of a
25 securities certificate (S-2022-3032187) for a Capital Line of Credit; (2) the issuance of a

1 securities certificate (S-2022-3032192) for a series of Water Infrastructure and Finance
2 Innovation Act (“WIFIA”) loans; (3) the issuance of an abbreviated securities certificate
3 for a PENNVEST loan (S-2022-3034057); (4) the issuance of a securities certificate (S-
4 2022-3034813) for indebtedness (revenue bonds in an amount up to \$125,000,000); (5)
5 the issuance of a securities certificate for debt refunding (in an amount up to
6 \$110,000,000); (6) the issuance of an abbreviated securities certificate for a PENNVEST
7 Loan (S-2022-3036874), (7) the issuance of an abbreviated securities certificate for a
8 PENNVEST Loan (S-2022-3036875); (8) the issuance of an abbreviated securities
9 certificate for a PENNVEST Loan (S-2022-3036876); (9) the issuance of an abbreviated
10 securities certificate for a PENNVEST Loan (S-2022-3036877); (10) the issuance of an
11 abbreviated securities certificate for a PENNVEST Loan (S-2023-3038462).

12 **Q. PLEASE EXPLAIN THE PURPOSE OF YOUR TESTIMONY?**

13 A. The purpose of my testimony is to:

- 14 1) Provide the documentation and supporting methodology for the schedules and
15 exhibits that are included in PWSA’s rate filing;
- 16 2) Describe PWSA’s financial results for the Authority’s proposed multi-year rate
17 increase, which includes the fully projected future test year (“FPFTY”) comprised
18 of the period from January 1, 2024 through December 31, 2024, as well as periods
19 from January 1, 2025 through December 31, 2025 and January 1, 2026 through
20 December 31, 2026;
- 21 3) Provide support for PWSA's total requested overall rate increase of \$146.1
22 million, which is inclusive of the DSIC;
- 23 4) Explain and support two new charges starting in FY 2025, an “Infrastructure
24 Improvement Charge” and a “Customer Assistance Charge”; and,
- 25 5) Explain how the Authority’s capital budget spending will be recovered from
26 ratepayers.

27 **Q. ARE YOU SPONSORING ANY EXHIBITS?**

28 A. Yes. I am sponsoring the following exhibits:

- 1 • **Exh. EB-1:** Exhibit EB-1 provides schedules showing PWSA's Income
2 Statement, Cash Flow Statement, and Debt Service Coverage Statement at present
3 rates for the HTY (FY 2022), FTY (FY 2023), FPFTY (FY 2024), the Forecast
4 Period (FY 2025), and the Forecast Period (FY 2026).
- 5 • **Exh. EB-2:** Exhibit EB-2 provides schedules showing PWSA's Income
6 Statement, Cash Flow Statement, and Debt Service Coverage Statement at
7 proposed rates for the HTY, FTY, FPFTY, Forecast Period 2025, and Forecast
8 Period 2026.
- 9 • **Exh. EB-3:** Exhibit EB-3 contains additional budget information for HTY, FTY,
10 FPFTY, Forecast Period 2025, and Forecast Period 2026.
- 11 • **Exh. EB-4:** Exhibit EB-5 contains PWSA's 2022-2027 Capital Improvement
12 Plan.
- 13 • **Exh. EB-5:** Exhibit EB-5 contains PWSA's Financial Management Policy.
- 14 • **Exh. EB-6:** Exhibit EB-6 contains PWSA's Debt and Swap Portfolio Summary.
- 15 • **Exh. EB-7:** Exhibit EB-7 contains PWSA's Additional Bonds Test at Existing
16 Rates.
- 17 • **Exh. EB-8:** Exhibit EB-8 contains PWSA's Additional Bonds Test at Proposed
18 Rates.
- 19 • **Exh. EB-9:** Exhibit EB-9 contains PWSA's Cost-Benefit Analysis on the
20 Arrearage Forgiveness Program.

21 **II. PROPOSED RATE INCREASE**

22 **Q. PLEASE SUMMARIZE THE RATE INCREASE SOUGHT BY PWSA IN THIS**
23 **PROCEEDING.**

24 A. The following points below summarize the requested increase in this proceeding.

- 25 • PWSA seeks a multi-year total overall rate revenue increase of \$146.1 million,
26 which is inclusive of the DSIC. This includes a \$46.8 million or 22.5% increase in
27 the FPFTY (FY 2024), \$45.4 million or 17.8% in FY 2025, and \$53.9 million or
28 17.9% in FY 2026.
- 29 • It is proposed to allocate in rates \$432,640 for the Hardship Grant program and
30 \$720,000 for the Arrearage Forgiveness program to support the grants and credits
31 provided to eligible customers.

- 1 • It is proposed to adopt two new charges starting in FY 2025. The first is an
2 Infrastructure Improvement Charge and the second is a Customer Assistance
3 Charge.
- 4 • PWSA proposes to phase out the minimum water and wastewater charges starting
5 in 2025 and in 2025 introduce the two new above-mentioned reconcilable charges
6 to recover the costs of PENNVEST and Water Infrastructure and Finance
7 Innovation Act (“WIFIA”) loans as well as the costs of PWSA’s low income
8 customer assistance programs.

9 **Q. CAN YOU DESCRIBE THE NEED FOR THIS RATE INCREASE?**

10 A. The main factors driving the need to file this rate case include inflation, capital costs, the
11 expansion of operations, continued compliance to meet financial obligations, and
12 improvements to the financial metrics that impact PWSA’s bond rating.
13 The details that justify the need for the additional revenues in this rate case along with the
14 rate structure changes proposed in this proceeding will be fully described later in my
15 testimony.

16 **III. CALCULATION OF REVENUE REQUIREMENT**

17 **A. Cash Flow Ratemaking**

18 **Q. PLEASE EXPLAIN THE BASIS ON WHICH PWSA HAS CALCULATED ITS**
19 **REVENUE REQUIREMENT FOR THE FPFTY.**

20 A. PWSA is not regulated on the basis of a fair rate of return on a used and useful rate base
21 as are investor-owned utilities; instead, the Authority’s revenue requirement is
22 established on the basis of the “Cash Flow Method.”

23 The Commission has directed that PWSA’s revenue requirement will be
24 determined using the “Cash Flow” method, the traditional method of determining just and

1 reasonable rates for municipal utilities such as PWSA.¹ In PWSA’s first three rate cases,²
2 PWSA and the other parties determined its revenue requirement using the “Cash Flow”
3 method.

4 It is appropriate to continue to use the “Cash Flow” method for PWSA, since
5 PWSA has no shareholders and does not pay a dividend or a rate of return to its owner.
6 With that in mind, rather than having its revenue requirement determined on the basis of
7 a fair rate of return on a used and useful rate base, PWSA’s rates should be set by
8 determining the levels of cash necessary to fund an operating budget that enables PWSA
9 to maintain the system, pay for needed capital improvements, the level of debt service
10 coverage that both meets PWSA’s bond covenant requirements, meets the additional
11 bonds test, and also produces sufficient cash to fund all obligations and maintain access
12 to the capital markets at reasonable rates.

13 In a 2010 Policy Statement, the Commission described the requirements of the
14 Cash Flow Method as follows:

15 *(b) ... Included in that requirement [of establishing just and reasonable rates] is the*
16 *subsidiary obligation to provide revenue allowances from rates adequate to cover*
17 *[the utility’s] reasonable and prudent operating expenses, depreciation allowances*
18 *and debt service, as well as sufficient margins to meet bond coverage requirements*
19 *and other internally generated funds over and above its bond coverage*
20 *requirements, as the Commission deems appropriate and in the public interest for*
21 *purposes such as capital improvements, retirement of debt and working capital.*³

¹ *Implementation of Chapter 32 of the Public Utility Code Re Pittsburgh Water And Sewer Authority*, Docket Nos. M-2018-2640802 and M-2018-2640803, Final Implementation Order entered March 15, 2018 at 27-28.

² *See, e.g., Pennsylvania Public Utility Commission v. PWSA*, Docket Nos. R-2018-3002645 (water) and R-2018-3002647 (wastewater), Opinion and Order entered February 27, 2019.

³ 52 Pa.Code § 69.2702.

1 The Commission also stated that, in determining just and reasonable rate levels
 2 under the Cash Flow Methodology it would consider, among other relevant factors, the
 3 following financial factors:⁴

- 4 • Test year-end and (as a check) projected future levels of non-borrowed
 5 year-end cash.
- 6 • Available short term borrowing capacity and internal generation of
 7 funds to fund construction.
- 8 • Debt to equity ratios and financial performance of similarly situated
 9 utility enterprises.
- 10 • Level of financial performance needed to maintain or improve the
 11 utility’s bond rating thereby permitting the utility to access the capital
 12 markets at the lowest reasonable costs to customers over time.

13 **Q. PLEASE EXPLAIN HOW PWSA DETERMINED ITS REVENUE**
 14 **REQUIREMENT IN THE FPFTY?**

15 A. PWSA’s revenue requirement in this case was determined by calculating the level of
 16 additional revenues the Authority needs in order to fund its capital and operating budgets
 17 and maintain financial metrics at least at or above its minimum requirements, considering
 18 the levels needed to maintain PWSA’s current bond rating.

19 **IV. PRO FORMA FINANCIAL RESULTS**

20 **Q. HAVE YOU PREPARED A PROFORMA TEST YEAR INCOME STATEMENT,**
 21 **CASH FLOW AND DEBT SERVICE COVERAGE STATEMENT THAT**
 22 **PROJECTS THE AUTHORITY’S STATUS IN THE CURRENT YEAR AS WELL**
 23 **AS ON A PROJECTED BASIS?**

24 A. Yes. Please see Exhibit EB-1 and Exhibit EB-2.

⁴ 52 Pa.Code § 69.2703.

1 **Q. FIRST, PLEASE EXPLAIN THE TEST YEAR ON WHICH PWSA’S CLAIMED**
2 **REVENUE REQUIREMENT IS BASED.**

3 A. As permitted by Act 11 of 2012, PWSA has based its claimed revenue requirement on the
4 fully forecasted 12 months ending December 31, 2024, referred to as the Fully Projected
5 Future Test Year (“FPFTY”). The Future Test Year (“FTY”) is calendar year 2023,
6 January 1, 2023 to December 31, 2023, and the Historical Test Year (“HTY”) is calendar
7 year 2022, January 1, 2022 to December 31, 2022. Those results are displayed on Exhibit
8 EB-1. Each page of this exhibit shows data for: (1) the HTY, the 12 months ended
9 December 31, 2022 or FY 2022; (2) the FTY, the 12 months ended December 31, 2023
10 or FY 2023; (3) the FPFTY, the 12 months ended December 31, 2024 or FY 2024; (4) the
11 Forecast Period, the 12 months ended December 31, 2025 or FY 2025; and (5) the
12 Forecast Period, the 12 months ended December 31, 2026 or FY 2026.

13 **Q. HAS THE AUTHORITY RELIED UPON OTHER PROVISIONS OF ACT 11 IN**
14 **DEVELOPING THIS CASE?**

15 A. Yes, as addressed in two petitions which are being filed simultaneously with the filing of
16 its rate case package. First, PWSA is filing a Petition for consolidation of the three
17 dockets (water, wastewater, stormwater) and for authorization to use combined water,
18 wastewater and stormwater revenue requirements as authorized by 66 Pa. C.S. §
19 1311(c).⁵ Granting of the Petition will continue the prior accounting and ratemaking
20 practice of PWSA. Second, PWSA is simultaneously filing a Petition for Waiver of
21 Statutory Definition of FPFTY to enable it to use a FPFTY beginning on January 1, 2024.
22 Due to the May 9, 2023 filing date of this rate package, the application of the full
23 suspension period (60 days plus 7 months) will end on February 8, 2024. The purpose of

⁵ Alternatively, PWSA requests a waiver pursuant to 66 Pa. C.S. § 3203(b) which permits the Commission to suspend or waive the applicability of any provision of the Public Utility Code to PWSA.

1 PWSA’s Petition is to enable it to utilize a FPFTY beginning on January 1, 2024 (rather
2 than February 1, 2024 as would be required by the statute) which is consistent with
3 PWSA’s budgeting processes.

4 **Q. PLEASE DESCRIBE HOW THE DATA FOR THE HISTORIC TEST YEAR**
5 **WERE DERIVED.**

6 A. The HTY is the cash-basis results for FY 2022.

7 **Q. PLEASE DESCRIBE HOW THE FUTURE TEST YEAR AND FULLY**
8 **PROJECTED FUTURE TEST YEAR RESULTS WERE DERIVED.**

9 A. The FTY (FY 2023) and FPFTY (FY 2024) results were derived through a
10 comprehensive Authority-wide budgeting process. PWSA uses a zero-based budgeting
11 method to develop annual budgets. The previous year’s budgets are referenced when
12 developing the FPFTY budget, but each cost is individually considered when developing
13 the budget. This is contrary to a traditional budgeting approach in which an escalation
14 factor is applied for an anticipated increase in a specific type of cost.

15 On Exhibit EB-3, I have provided additional information concerning actual and
16 budget financial information. This Exhibit shows the Operating Budgets for FPFTY (FY
17 2024), FY 2025, FY 2026 as well as the anticipated Operating Expenses incurred in the
18 FTY (FY 2023). The types of expenses incurred or projected for each department are also
19 shown.

20 Exhibit EB-3 provides information regarding changes in budgeted levels from the
21 HTY (FY 2022) to the FTY (FY 2023) and from the FTY (FY 2023) to the FPFTY (FY
22 2024), FY 2025, and FY 2026.

1 **B. Impact of Inflation**

2 **Q. WHAT IMPACT HAS INFLATION HAD ON THIS RATE REQUEST?**

3 A. Inflation is one of the biggest drivers for this rate request. As I will describe, general
 4 price increases over the past two years have made it difficult to fund all operations at
 5 current rates. This increase is further compounded by the fact that PWSA continues to
 6 drastically increase operations to address deferred maintenance. PWSA is now at a point
 7 where additional revenues must be implemented or the financial stability of the
 8 organization will be at risk.

9 **Q. HOW MUCH HAS INFLATION INCREASED SINCE PWSA’S LAST RATE**
 10 **CASE FILING IN APRIL 2021?**

11 A. The chart below shows the consumer price index for all urban consumers from fiscal year
 12 2013 through March 2023. The data clearly demonstrates that inflation is dramatically
 13 increasing with the combined 2021 and 2022 total increase of 12.70%. This trend does
 14 not appear to be slowing down in 2023 with the estimated annual percentage of 6.89%.
 15 That would result in an estimated increase of 19.59% over a three-year period.

16

Annual Inflation: 2013 - 2023 ⁶	
Year	Percentage Increase
2013	1.46%
2014	1.62%
2015	0.12%
2016	1.26%
2017	2.13%
2018	2.44%
2019	1.81%

⁶ United States Bureau of Labor Statistics ([BLS Data Viewer](#))

2020	1.23%
2021	4.70%
2022	8.00%
2023 ⁷	6.89%

Q. HAS INFLATION OUTPACED THE REVENUE INCREASE IN PWSA’S LAST RATE INCREASE?

A. Yes. The PWSA filed a proposed settlement with the PUC regarding its 2022 and 2023 water, wastewater, and stormwater rate proposal, which was approved by the PUC in November 2021 and went into effect on January 12, 2022. The settlement raised rates by approximately 10.98%, with the estimated combined total 2022 and 2023 inflation rate of 14.89% far exceeding that amount. That has, in effect, forced PWSA to maintain operations with "decreased" rates due to a loss of purchasing power. To make matters worse, PWSA experienced significant non-discretionary cost increases that exceeded the amount of inflation, such as water treatment chemicals and utility costs.

PWSA has been making tough financial decisions over the past two years in order to stay solvent. One example is that PWSA had to limit the amount of public bonds issued in 2022 to approximately \$45 million, with \$100 million originally planned to be issued. This ultimately resulted in lower debt service costs design to alleviate budget pressures in 2023. It is clear that the organization has struggled to maintain its financial position amid the current environment and must implement additional revenues to continue operations reasonably.

⁷ Estimated annual percentage based on average increase between January 1, 2023 through March 31, 2023.

1 **Q. DO YOU HAVE ANYTHING ELSE TO MENTION AS IT RELATES TO THE**
2 **ISSUE OF INFLATION?**

3 A. Yes. I want to be clear that inflation is impacting every revenue requirement in this rate
4 case. My testimony will describe specific cost increases that justify the proposed
5 increase. However, to some degree, inflation is the primary or secondary factor for all
6 increases.

7 **C. PWSA Budgeting Process**

8 **Q. PLEASE DESCRIBE HOW PWSA’S OPERATING BUDGETS ARE CREATED.**

9 A. Each of the fifteen departments within PWSA prepares budget requests for the upcoming
10 fiscal year. Those requests are reviewed by the Finance Department for accuracy and
11 adherence to the realistic expectations and/or projections. The Finance Department
12 prepares a “roll-up” of initial funding and expense recommendations for the Chief
13 Executive Officer and Chief Operating Officer / Chief Financial Officer. The Chief
14 Executive Officer and Chief Operating Officer / Chief Financial Officer then may make
15 recommendations on the initial budget requests. Any recommendations are discussed
16 with the applicable department and, if accepted, results in a revised set of budget
17 requests. Once satisfied, the Chief Executive Officer and Chief Operating Officer / Chief
18 Financial Officer (with the assistance of the Finance Department) prepares an operating
19 budget for review by the Board. The Board may accept or modify the operating budget.
20 The final operating budget is approved by the Board. Typically, approval is received in
21 November or December for the fiscal year commencing on January 1.

22 **Q. PLEASE DESCRIBE HOW PWSA’S CAPITAL IMPROVEMENT PLAN IS**
23 **CREATED.**

24 A. PWSA updates its 5-year capital improvement plan annually by soliciting budget requests
25 from subject matters experts within the main functional areas (water, wastewater, and

1 stormwater). The Finance Department prepares a “roll-up” of all budget requests for the
2 purposes of being reviewed by the Capital Improvement Plan Committee. The Capital
3 Improvement Plan Committee is made of up of representatives from the Water Treatment
4 Plan, Operations, Engineering & Construction, Management Information Systems, and
5 Finance. The purpose of the Capital Improvement Plan Committee is to ensure capital
6 funds are invested efficiently given the needs of the PWSA, with funding
7 recommendations ultimately being sent to the Chief Executive Officer and Chief
8 Operating Officer / Chief Financial Officer for review. The Chief Executive Officer and
9 Chief Operating Officer / Chief Financial Officer then may make recommendations on
10 the initial budget requests. Any recommendations are discussed with the Capital
11 Improvement Plan Committee and, if accepted, results in a revised set of budget requests.
12 Once satisfied, the Chief Executive Officer and Chief Operating Officer / Chief Financial
13 Officer (with the assistance of the Finance Department) prepares a capital improvement
14 plan for review by the Board. The Board may accept or modify the capital improvement
15 plan. The final budget is approved by the Board. Typically, approval is received in
16 around the last quarter of the year for the fiscal year commencing on January 1.

17 **Q. WHAT IS THE REVIEW AND APPROVAL PROCESS ASSOCIATED WITH**
18 **THIS BUDGET AND TWO-YEAR FORECAST?**

19 A. In addition to an internal review and approval process by the PWSA executive team,
20 PWSA is required to obtain final approval by PWSA’s Board of Directors. The Board is
21 the governing body of the Authority and is responsible for providing strategic direction
22 and oversight to PWSA management team, as well as adopting the Authority’s annual
23 operating and capital budgets, approving contracts, and approving proposed rate increases

(that are subject to final review and approval by the Commission). Once final, PWSA makes its annual operating budget and CIP available to the public on its website.

Q. DOES PWSA ALSO PREPARE A TWO-YEAR FORECAST OF FINANCIAL OPERATIONS (HERE REFERRED TO AS THE FORECAST PERIOD)?

A. Yes. PWSA rolls forward its budgeted operating results using the Budget year which is the FPFTY in this case, as the base year to create a two-year forecast, taking account of any known rate or other changes that might affect the results in a particular year. For this filing, PWSA accelerated its budgeting process for FY 2024 to establish a fully developed FPFTY as the test year in this proceeding and as a base year of its two-year forecast. Beyond FPFTY, FY 2025, and FY 2026, the remainder of the Forecast Period, PWSA uses the aforementioned traditional budgeting method of applying escalation factors to certain groups or types of cost in anticipation of increased cost of service. The Forecast Period results are shown on Exhibit EB-2.

D. PWSA’s Operating Needs

Q. WHAT ARE THE OPERATING REVENUE REQUIREMENTS IN THE FPFTY 2024, FY 2025, AND FY 2026?

A. PWSA is proposing operating revenue requirements of \$18.4 million in the FPFTY, \$9.7 million in FY 2025, and \$14.0 in FY 2026, making up about 29% of the total revenue requirement increase in this rate case. The table below summarizes this request by the expense categories within the operating budget.

Expense Category	FY 2023	FY 2024	FY 2025	FY 2026
Direct Operating	\$48,605,780	59,314,576	65,692,572	73,197,072
Salaries	35,521,459	41,932,394	44,845,082	47,105,066
General & Administrative	18,390,087	17,531,950	16,142,127	17,867,654
Employee Benefits	10,917,059	12,360,967	13,973,205	15,938,579
Inventory	2,303,165	2,441,355	2,587,837	2,743,107
COVID-Related Expenses	-	263,215	-	-

Net ALCOSAN	1,766,508	2,066,814	2,400,861	2,771,926
Total	\$117,504,058	135,911,272	145,641,684	159,623,404
Difference	-	18,407,213	9,730,412	13,981,720

The expense categories of Direct Operating, Salaries, and Employee Benefits are main drivers of the increase given PWSA’s continued efforts to right size its operations to fit the size of the system.
