TO ALL PARTIES OF RECORD

Application of the Gettysburg & Northern Railroad for crossing (DOT 593 389 G) alterations where Gardners Station Road (T 397) crosses, at grade, the tracks of Gettysburg & Northern Railroad, located in Tyrone Township, Adams County.

To Whom It May Concern:

This matter is before us by reason of an application received by the Commission on August 1, 2023, by the Gettysburg & Northern Railroad seeking Commission approval to alter the crossing where Gardners Station Road (T 397) crosses, at grade, one (1) track of Gettysburg & Northern Railroad (DOT 593 389 G) located in Tyrone Township, Adams County.

In its application, Gettysburg & Northern Railroad states it is desirable to alter the crossing by rehabilitating the crossing with new Grade Crossing (Crossbuck) (R15-1) signs, new electrical bell, two (2) new 2-way assemblies, new mounting arms, new backgrounds and new LED flashers with hoods. No utility work is planned for this crossing location. In the application, Gettysburg & Northern Railroad states that the alterations are necessary to promote safer traffic flow along with enhancing railroad operations and safety.

A field investigation and conference was arranged by a Commission staff engineer and held on September 20, 2023 at the site of the subject crossing. Representatives of the Federal Railroad Administration, Pennsylvania Department of Transportation, Gettysburg & Northern Railroad, CSR Engineering (Gettysburg & Northern Railroad), CDL Electric (Gettysburg & Northern Railroad) and Tyrone Township attended the field conference.

At the field conference, it was noted that Gardners Station Road is a two (2) lane, two-way, bituminous paved roadway that crosses one (1) track of Gettysburg & Northern Railroad (DOT 593 389 G), with a concrete panel crossing surface in good condition. The crossing is equipped with post-mounted automatically operated flashing-light signals, Grade Crossing (Crossbuck) (R15-1), Emergency Notification (I-13) signs and a mechanical bell. Additionally, the approach roadways have grade crossing advance warning (W10-1) signs, but there are no pavement markings and stop lines present on either approach roadway.

Gettysburg & Northern Railroad described the details of the project and provided a preliminary plan attached to the subject application. At the field conference, it was determined that some of the proposed alterations have been previous completed by the railroad and the scope of the alterations for this docket will consist of new electrical bells, new Emergency Notification (I-13) signs, new STOP HERE WHEN FLASHING (R8-10a) signs and new stop lines on the approach roadways.

Gettysburg & Northern Railroad agrees to perform the necessary alterations, provide for maintenance and protection of highway and pedestrian traffic during the time the work is being performed and agrees to the future maintenance of all railroad facilities at the subject crossing including the active railroad warning devices and the crossing surface.

Tyrone Township agrees to maintain the highway approaches to the subject crossing as well as the grade crossing advance warning (W10-1) signs, STOP HERE WHEN FLASHING (R8-10a) signs, and the new stop lines.

No party in attendance at the field conference objected to the alterations completed by the Gettysburg & Northern Railroad.

The Commission hereby establishes its jurisdictional limits at the subject crossing as the area within the confines of the railroad right-of-way and the highway right-of-way.

The Commission has exclusive jurisdiction in crossing alterations and is the final arbiter of any fees associated with a crossing application. Any conditions, including fees associated with a crossing application, must be approved by the Commission.
