**RE: Newtown Artesian Water Company, Inc.
Petition for Approval of Lead Service Line Replacement Program
Docket No. P-2023-3041859**

Dear Secretary Chiavetta:

Please be advised that I am general counsel to Newtown Artesian Water Company, Inc. (“NAWC”), in the above-referenced matter. By electronic filing, I am submitting NAWC’s Petition (“Petition”) for Approval of its Lead Service Line Replacement (LSLR) Program (the “Program”) required under 52 Pa. Code §65.1 *et seq.*, together with NAWC’s LSLR Plan, the modification to NAWC’s current Long-Term Infrastructure Improvement Plan, and NAWC’s *Pro Forma* Tariff Supplement.

The original due date for NAWC to file its Program was Saturday, July 22, 2023. By letter dated August 16, 2023, the Commission granted NAWC’s petition that the filing deadline be extended to November 22, 2023. NAWC is timely filing this Petition for approval of its Program in accordance with that extension, and upon all parties set forth in the Certificate of Service attached to the Petition.

Thank you for your assistance in this matter. If you have any questions or require any information relating to this filing, please feel free to contact me.

Very truly yours,

Thomas J. Walsh III

Attorney for Newtown
Artesian Water Company

**PETITION OF NEWTOWN ARTESIAN
WATER COMPANY FOR APPROVAL OF
ITS LEAD SERVICE LINE REPLACEMENT
PROGRAM AND RELATED TARIFF CHANGES
PURSUANT TO 66 PA C.S.A. §1311(b)
AND 52 PA CODE §65.61 *ET SEQ.***

**PENNSYLVANIA PUBLIC
UTILITY COMMISSION

I.D. #73528

No. P-2023-3041859**

**PETITION OF NEWTOWN ARTESIAN WATER COMPANY
FOR APPROVAL OF ITS LEAD SERVICE LINE
REPLACEMENT PROGRAM AND RELATED TARIFF CHANGES**

TO THE HONORABLE PENNSYLVANIA PUBLIC UTILITY COMMISSION:

Newtown Artesian Water Company (“NAWC”), by and through its undersigned counsel, pursuant to 52 Pa. Code §5.41, hereby petitions the Pennsylvania Public Utility Commission (the “Commission”) for approval of its Lead Service Line Replacement Program (the “LSLR Program”) and related revisions to its Tariff (defined herein), pursuant to Section 1311(b)(2) of the Pennsylvania Public Utility Code (the “Code”), 66 Pa. C.S.A. §1311(b)(2); and Section 65.54 of the Commission’s Rules and Regulations (the “Regulations”), 52 Pa. Code §65.54.

NOW THEREFORE, in support thereof, NAWC respectfully represents as follows:

A. INTRODUCTION.

1. NWAC is a Class A Pennsylvania public utility providing water service to 10,641 customers in Newtown Borough, Newtown Township, and the northern portion of Middletown Township, Bucks County (the “Service Territory”).

2. Lead is a chemical element. It is a heavy metal that naturally occurs in the environment. Although lead does not naturally occur in water sources, a common source of human lead exposure is ingestion from drinking water. *See* DEP, Lead Ban Surveillance Project 2019.

3. Lead enters drinking water through the corrosion of plumbing materials through which the water passes. Lead can be toxic to humans. The Pennsylvania Department of

Environmental Protection (the “DEP”) advises that “[l]ead can cause serious health problems if too much enters [the] body from drinking water or other sources.” *See* DEP, Lead Ban Surveillance Project 2019.

4. Before the adverse effects of lead were recognized, water service was commonly provided through lead service lines (“LSL”). LSLs can be owned and maintained by the water supplier, the customer, or both.

5. In 1989, the Pennsylvania General Assembly passed the Plumbing System Lead Ban and Notification Act (the “Lead Ban Act”), 35 P.S. §723.1 *et seq.* The Lead Ban Act became effective on January 6, 1991.

6. The Lead Ban Act strengthened the existing Pennsylvania Safe Drinking Water Act, 35 P.S. §721.1 *et seq.*, as well as the 1986 amendments to the federal Safe Drinking Water Act, 42 U.S.C. §300f *et seq.* (collectively the “SDWAs”).

7. The Lead Ban Act prohibited “the sale of certain leaded materials used in plumbing systems” and prohibited “their use in plumbing system construction, modification, and repair.” *See* 35 P.S. §723.2(1), §723.4 and §723.5.

8. While the SDWAs and Lead Ban Act effectively discontinued the sale, use, and installation of LSLs in water distribution systems throughout Pennsylvania beginning in 1986, these laws did not address the *removal* of existing LSLs. *See* 35 P.S. §723.5.

9. In 2018, the Pennsylvania General Assembly passed Act 120 (“Act 120”). Act 120 amended the Code to accelerate and facilitate a water utility’s obligation and ability to remove LSLs owned by the utility and the customer, and recover the associated costs. *See* 66 Pa.C.S. §1311(b).

10. Prior to the passage of Act 120, the Commission was actively working with many regulated water utilities to address the replacement of LSLs. The passage of Act 120 served to clarify certain legal issues that the Commission and water utilities had identified.

11. On September 17, 2020, the Commission issued a Notice of Proposed Rulemaking Order at Docket No. L-2020-3019521 (the “Order”). The Order proposed Regulations to establish

“standards under which public utilities may...replace LSLs...and recover costs associated with replacement.”

12. The Regulations became effective on July 23, 2022. Per the Regulations and Act 120, NAWC must devise the instant LSL Replacement Plan (the “LSLR Plan”) which lays out how NAWC will implement its LSLR Program to remove all lead from its water distribution system, including LSLs owned by its customers. *See* 52 Pa. Code §65.51 *et seq.* NAWC’s LSLR Plan is attached hereto as Exhibit “A.”

B. SERVICE LINES IN NAWC’S SERVICE TERRITORY.

13. NAWC’s current tariff is Water-PA P.U.C. No. 9, last revised through Supplement No. 153, effective November 1, 2023 (the “Tariff”). Under the Tariff, NAWC owns the portion of the service line from the curb stop to the main. *See* Tariff, Page No. 7.

14. Under the Tariff, the customer owns the portion of the service line from the curb stop (or box) to the meter. The customer is responsible to maintain and replace their section of the service line at the customer’s sole cost and expense. *See* Tariff, Page Nos. 7 and 8.

15. NAWC has historical records of all mains and all company-owned service lines in its distribution system. Beginning in 1946, NAWC ceased installing any mains and related company-owned service lines that contained lead. NAWC has replaced all mains and company-owned service lines installed prior to 1946.

16. Based upon these historical records and NAWC’s additional records of main and company-owned service line replacements, NAWC has removed all lead from its distribution system, including mains and company-owned LSLs, in the Service Territory.

17. NAWC maintains records of its distribution system in its geographic information system (“GIS”) mapping software. Where known, NAWC includes customer service lines in its GIS.

18. The most up-to-date information in NAWC’s GIS system confirms the existence of TEN (10) known customer-owned LSLs in the Service Territory.

19. This same information confirms the existence of approximately TWO HUNDRED TWENTY FOUR (224) customer-owned service lines of unknown material in the Service Territory.

20. Based on NAWC’s prior experience, the average estimated cost to replace the customer-owned portion of a service line is between \$5,000 to \$10,000. This average excludes projects for which major excavation work is required to complete the replacement.

C. STANDARDS FOR REPLACEMENT OF AND RECOVERY OF COSTS.

(i) Time For LSL Replacement.

21. NAWC is a Class A public utility. It has until July 22, 2047 (25 years from the effective date of Regulations) to replace all LSLs in its Service Territory. *See* 52 Pa. Code §65.53(a).

(ii) NAWC’s Petition Requirements.

22. NAWC’s petition seeking approval of its LSLR Program must:

- (a) Be served upon the Commission, the Pennsylvania Office of the Consumer Advocate (“OCA”); the Commission’s Bureau of Investigation and Enforcement (“I&E”); the Pennsylvania Office of Small Business Advocate (“OSBA”); and the parties of record in NAWC’s most recent base rate case. *See* 52 Pa. Code §65.54(a).
- (b) Include a modification of NAWC’s Long Term Infrastructure Improvement Plan (“LTIIIP”) containing an LSLR Plan that is a separate and distinct component thereof. *See* 52 Pa. Code §65.54(b). NAWC’s LTIIIP modification is attached hereto as Exhibit “B.”
- (c) Include a LSLR Program that is filed within one (1) year of July 23, 2022,¹ that includes:
 - (i) A LSLR Plan as described in 52 Pa. Code §65.56 (relating to LSLR Plan requirements). *See* 52 Pa. Code §65.55(b)(1).
 - (ii) A pro forma Tariff supplement containing the proposed changes necessary to implement NAWC’s LSLR Program as described in 52 Pa. Code §65.58 (relating to pro forma tariff or tariff supplement requirements). *See* 52 Pa. Code §65.55(b)(2).
 - (iii) Information required by the Commission for filings under 66 Pa.C.S. §1308 (relating to voluntary changes in rates), including statements required by 52 Pa. Code §53.52(a) (relating to applicability; public utilities other than canal, turnpike, tunnel, bridge and wharf companies). *See* 52 Pa. Code §65.55(b)(3).

(iii) NAWC’s LSLR Plan Requirements.

¹ Upon NAWC’s separate petition under the instant docket number, by letter dated August 16, 2023, the Commission extended NAWC’s deadline to file this petition until November 22, 2023.

23. NAWC's LSLR Plan must contain, at a minimum:
- (a) A **service line inventory**, to be completed within sixty (60) months from the filing of this petition. The service line inventory must:
 - (1) Identify the material type of all LSLs within and connected to NAWC's distribution system. *See* 52 Pa. Code §65.56(a)(4)(i);
 - (2) Be grouped by material type and diameter. *See* 52 Pa. Code §65.56(a)(4)(ii);
 - (3) Detail any known or discovered lead components. *See* 52 Pa. Code §65.56(a)(4)(iii); and
 - (4) Include NAWC's projection of the annual number of service lines to be inventoried and the means by which NAWC will identify material types. *See* 52 Pa. Code §65.56(a)(4)(iv).
 - (b) A **planning and replacements** section, which must include:
 - (1) NAWC's projected annual investment in LSL replacements and an explanation of NAWC's anticipated sources of financing. *See* 52 Pa. Code §65.56(b)(1);
 - (2) NAWC's projected number of LSLs to be replaced each calendar year with explanation of how the projection was determined and a statement that the number is consistent with NAWC's annual cap on LSL replacements. *See* 52 Pa. Code §65.56(b)(2);
 - (3) The prioritization criteria considered by NAWC when developing the LSLR schedule. *See* 52 Pa. Code §65.56(b)(3);
 - (4) An explanation of NAWC's processes and procedures to address emergency repairs or replacements which reveal LSLs. *See* 52 Pa. Code §65.56(b)(4);
 - (5) NAWC's processes and procedures to obtain customer acceptance of a LSL replacement prior to LSL replacement project commencement. *See* 52 Pa. Code §65.56(b)(5);
 - (6) NAWC's processes and procedures based upon a customer's acceptance of a LSL replacement, including:
 - (a) A consent agreement form by which the customer will authorize completion of the LSL replacement. *See* 52 Pa. Code §65.56(b)(6)(i);
 - (b) A brief description of NAWC's processes for LSL replacements under normal and under atypical conditions. *See* 52 Pa. Code §65.56(b)(6)(ii);
 - (c) An explanation of NAWC's process of coordination with the customer and the information that NAWC will provide to the

customer throughout the LSL replacement process. *See* 52 Pa. Code §65.56(b)(6)(iii); and

- (d) NAWC's process for addressing LSL replacement completion and/or closeout with customers. *See* 52 Pa. Code §65.56(b)(6)(iv).
 - (7) NAWC's lead and material recycling and disposal efforts, including a description of what NAWC will do with proceeds from recycling and disposal efforts. *See* 52 Pa. Code §65.56(b)(7);
 - (8) The industry-accepted practices that NAWC plans to use to replace NAWC-owned and customer-owned LSLs. *See* 52 Pa. Code §65.56(b)(8);
 - (9) A detailed explanation of how NAWC's acquisition of water distributions systems will be integrated into NAWC's efforts to complete LSL replacements throughout its water distribution system. *See* 52 Pa. Code §65.56(b)(9); and
 - (10) The procedure for documenting a customer's refusal of, or failure to accept, the offer by NAWC to replace an LSL, including NAWC's duty to:
 - (a) Provide the customer with a complete disclosure of the known health hazards from the continued use of a LSL. *See* 52 Pa. Code §65.56(b)(10)(i);
 - (b) Inform the customer that refusal or failure to accept will require the customer to replace the customer-owned LSL, at the customer's expense, within one (1) year of NAWC's commencement of a LSL replacement project within a LSL replacement project area in order to be eligible for reimbursement. *See* 52 Pa. Code §65.56(b)(10)(ii); and
 - (c) Communicate to the customer that failure to allow NAWC to complete the LSL replacement or to replace the customer-owned LSL concurrent with NAWC replacing its LSL will lead to termination of water service pursuant to the provisions of NAWC's Tariff. *See* 52 Pa. Code §65.56(b)(10)(iii).
- (c) A **communications, outreach and education** section, which outlines NAWC's communication, outreach and education steps to educate customers about the harmful effects of lead and NAWC's plan to address LSL replacements. This section must also:
- (1) Describe how NAWC will prioritize LSL replacement efforts to target sensitive populations, areas with elevated levels of lead in tap water, areas with high concentrations of LSLs, and areas of NAWC's distribution system which have elevated corrosion rates. *See* 52 Pa. Code §65.56(c)(1)(i);

- (2) Describe how NAWC will establish and/or participate in voluntary lead advisory committees. *See* 52 Pa. Code §65.56(c)(1)(ii);
- (3) Describe how NAWC will coordinate LSL Program efforts with state, county and local governments and agencies, community organizations and public works departments. 52 Pa. Code §65.56(c)(1)(iii);
- (4) Describe how NAWC will ensure that relevant information will be provided to all bill-paying customers and persons that receive drinking water from NAWC, in plain language that can be understood by the general public, that complies with federal regulations at 40 C.F.R. 141.85 (regarding public education and supplemental monitoring and mitigation requirements). *See* 52 Pa. Code §65.56(c)(1)(iv)(A)-(C);
- (5) Describe how NAWC will provide customers with copies of as-built drawings or similar depictions that indicate the location of the LSL on the property between the customer's structure and the curb stop. *See* 52 Pa. Code §65.56(c)(1)(v);
- (6) Include copies of all printed and broadcast material to be distributed under NAWC's LSLR Program. *See* 52 Pa. Code §65.56(c)(2); and
- (7) Describe how NAWC will develop a LSL replacement section of its website within twelve (12) months of the Commission's approval of its LRLR Program. *See* 52 Pa. Code §65.56(c)(3).

(iv) Minimum Requirements For Tariff Supplement.

24. Section 1311(b)(2) of the Code provides that in connection with its request for Commission approval for the replacement of customer-owned LSLs, NAWC must provide a new tariff supplement. *See* 66 Pa.C.S. §1311(b)(2)(v) and (vi). NAWC's *pro forma* Tariff supplement is attached hereto as Exhibit "C."

25. Section 65.58 of the Regulations sets forth the proposed changes to NAWC's Tariff that will be deemed necessary to implement its LSLR Program, addressing at a minimum:

- (a) A cap on the maximum number of customer-owned LSLs that can be replaced annually. *See* 52 Pa. Code §65.58(a)(1);
- (b) Information relating to service line demarcation, including a definition for customer-owned LSLs. *See* 52 Pa. Code §65.58(b)(1) – (3);
- (c) Information related to partial LSL replacements. *See* 52 Pa. Code §65.58(c)(1) – (3);
- (d) Reimbursements for prior customer-owned LSL replacements, as appropriate. *See* 52 Pa. Code §65.58(d)(1) – (3); and
- (e) A warranty for the work performed by NAWC or its contractor for a term of not less than two (2) years, and coverage information. *See* 52 Pa. Code §65.58(e)(1) – (5).

(v) Cost Recovery; Accounting and Financial.

26. Section 1311(b)(2)(i) of the Code provides, in relevant part, that the “value of the property of a public utility providing water...service shall include the original cost incurred by the public utility for the replacement of a customer-owned [LSL], performed concurrent with a scheduled utility main replacement project or under a [C]ommission-approved program.” *See* 66 Pa.C.S. §1311(b)(2)(i).

27. The original cost replacement water service line charge incurred by NAWC is “deemed to be other related capitalized costs that are part of the public utility’s distribution system.” The Commission may allow these costs to be allocated “among each customer, classes of customers and types of service” *See* 66 Pa.C.S. §1311(b)(2)(ii) and (iv).

28. Section 65.60 of the Regulations mandates that costs for LSL replacements must be recorded under separate and distinct subaccounts, and permits NAWC to defer income taxes related to LSL replacements under certain circumstances. *See* 52 Pa. Code §65.60.

D. NAWC’S PROPOSAL FOR LSL REPLACEMENTS.

(i) NAWC’s Plan For Customer-Owned LSL Replacements.

29. When NAWC discovers a customer-owned LSL during a main replacement or other repair project, NAWC advises the customer and encourages the customer to replace the customer-owner LSL. NAWC will continue this practice.

30. NAWC has been proactive in ascertaining the number of customer-owned LSLs within its Service Territory. NAWC does not have records documenting the materials used in the construction of each and every customer-owned service line that connects to NAWC’s distribution system.

31. To compile an inventory of customer-owned LSLs, NAWC has been and will continue to use all of the following methods/procedures:

- (a) NAWC records, curb cards and computer or predictive modeling;
- (b) excavation;
- (c) visual inspections; and
- (d) other customer-provided information.

32. Pursuant to the federal guidance issued on service line inventories, “[w]ater systems with limited or nonexistent records will be more reliant on physical inspection of service line materials, which will require more time and resources.” *See* 86 Fed. Reg. 4212 (Jan. 15, 2021).

33. The United States Environmental Protection Agency (the “EPA”) explains that “if water system personnel are already deployed on a street for a main replacement, they may visually inspect...the status of unknown [customer-owned] service lines on that street [and] engage with affected customers to determine the material composition of the service line entering the home.”

34. EPA also endorses the use of predictive models to assist in compiling a service line inventory, noting that “[w]ater systems may also create a strategy that involves proactive investigation of service line material compositions which is independent of other water system activities, such as the use of predictive models to evaluate the probability a service line is lead.”

35. The methods NAWC intends to utilize to complete its required service line inventory are consistent with those endorsed by the EPA.

(ii) Ownership and Maintenance of Service Line After Replacement; Agreement.

36. After NAWC has completed replacement of a customer-owned LSL, the responsibility for ownership, maintenance, repair, and replacement of the replacement service line will remain with the customer, consistent with the Tariff and applicable law. *See* 66 Pa. C.S.A. §1311(b)(2)(i).

37. NAWC’s *pro forma* Tariff supplement establishes that a customer will enter into an appropriate agreement with NAWC to permit NAWC (through the use of a preapproved, qualified contractor) to replace the customer-owned LSL on the customer’s property and document the customer’s ownership of the replacement customer service line.

38. If a customer declines to enter into such an agreement, NAWC will advise the customer of the potential health risks associated with a partial LSL in a communication to the customer and/or property owner.

39. NAWC will then follow the procedures outlined in its Tariff to terminate water service to any customer who fails to replace a customer-owned LSL within the prescribed time, consistent with the prohibitions on partial LSL replacements.

(iii) Estimated Quantities and Budgeted Costs.

40. Based on the estimated numbers of known customer-owned LSLs, customer-owned service lines of unknown material, and the resources available to NAWC, NAWC proposes to cap the total number of customer-owned LSL replacements in a given calendar year to FIVE (5).

41. As noted above, NAWC estimates that the average cost to replace a customer-owned LSL is between \$5,000.00 and \$8,000.00. This estimate is based upon an average that considers factors such as: contractor cost, excavation depth, length of the LSL, restoration costs to restore the customer's property, including concrete curb and sidewalk, lawn restoration, and/or street restoration.

42. NAWC proposes to establish an annual cap of FIFTY THOUSAND and 00/100 Dollars (\$50,000.00) on the aggregate costs associated with customer-owned LSL replacements.

43. If the full budgeted amount included for a given year is not expended, NAWC proposes to allow those unused portions of the cap to be rolled forward and applied to the cap for the subsequent year, with the understanding and recognition that this carry-forward shall not increase the number of customer-owned LSL replacements NAWC is permitted to conduct for that year.

44. NAWC believes the proposed number of annual replacements and budgetary cap on the costs related to those replacements is appropriate in light of the anticipated number of customer-owned service lines that will turn out to be LSLs.

45. NAWC has used best efforts in making these determinations to balance all interests, including the associated costs to customers.

46. Should NAWC feel that the annual number of replacements or budgetary cap be increased in order to achieve its goals and those of the Commission and other stakeholders of removing customer-owned LSLs, NAWC will seek approval from the Commission to modify these amounts.

(iv) Accounting; Cost Recovery.

47. NAWC will record the original cost it expends for replacement of a customer-owned LSL in a separate account that is segregated from other service line accounts as required by the Regulations.

48. NAWC is entitled to recover a return on and a return of its investment in customer-owned LSL replacements in future base rate cases. Between base rate cases, NAWC will recover the fixed costs of investments in customer-owned LSLs through NAWC's existing Distribution System Improvement Charge. *See* 66 Pa. C.S. §1311(b)(2)(iii).

(v) Customer Outreach and Communication.

49. NAWC will comply with the customer outreach, communications, and education requirements set forth in 40 C.F.R. § 141.85, as required by 52 Pa. Code §65.56(c)(1).

50. NAWC will provide notice to those customers it serves with a customer-owned LSL made of lead, galvanized material requiring replacement, or an unknown material with notice in the form set forth in Appendix B of NAWC's LSLR Plan.

51. The notice will advise of the health risks associated with lead in drinking water and steps that customers can take to reduce exposure to lead in drinking water, and provide information about opportunities to replace LSLs.

52. Within twelve (12) months of the Commission's approval of NAWC's LSLR Program, NAWC will develop an LSL replacement section on its public website. The LSR replacement website section will contain, at a minimum the information, data and tools required under 52 Pa. Code §65.56(c)(3).

(vi) Warranty Information; Reimbursement.

53. Any customer-owned LSL replacement completed by or on behalf of NAWC will be accompanied by a warranty approved by the Commission.

54. NAWC has a list of preapproved, qualified contractors who will conduct customer-owned LSL replacements on NAWC's behalf.

55. When customer-owned LSL replacements are performed by NAWC's preapproved, qualified contractors, NAWC will require the contractor to provide a two (2) year warranty on workmanship, materials, and restoration of surfaces. The customer, as the owner of the new service line, will be the beneficiary of the warranty.

56. NAWC's LSLR Plan will provide for reimbursement to any customer who replaced their customer-owned LSL at their own expense within one (1) year of commencement of a NAWC main and/or service line replacement project. *See* 66 Pa. C.S. §1311(b)(2)(vii)(B).

57. NAWC's reimbursement program will include the following terms and conditions:

- (a) The customer or property owner must provide NAWC or its qualified contractor with an opportunity to inspect the customer's installation.
- (b) The property owner or customer must provide NAWC with a minimum of 72 hours' advanced notice of the installation time.
- (c) The property owner or customer must reimburse NAWC for the cost of the inspector. Current inspection costs are \$XX per hour and will increase annually. The time for inspection is anticipated to be less than four (4) hours.
- (d) The property owner or customer must present NAWC with the bill for reimbursement within thirty (30) days of the installation's completion.
- (e) The property owner or customer will be reimbursed for up to 100% of the cost of a similarly sized service line, with similar attributes of replacement at the property in NAWC's sole discretion. NAWC will determine the average cost of the installation using one of its pre-approved contractors to estimate the replacement cost.
- (f) NAWC will issue the reimbursement via check to eligible applicants no later than one hundred eighty (180) days from receipt of the eligible application.

E. NAWC'S LSLR PROGRAM IS IN THE PUBLIC INTEREST.

58. NAWC's LSLR Program is reasonable and in the public interest.

59. Federal and Pennsylvania regulations impose an obligation on water systems to provide drinking water that is below the lead action level at the customer's tap regardless of whether the lead originates in the customer-owned or the NAWC-owned portion of the service line.

60. NAWC's LSLR Plan is designed to facilitate complete, rather than partial, LSL replacements.

61. NAWC requests approval of its LSLR Program, LSLR Plan, LTIP modifications, and Tariff revisions, to enable it to identify the material of all customer-owned service lines, replace known customer-owned LSLs, and to bear the costs of these replacements. This will assist in ensuring that customers who would not otherwise have the financial means to replace an LSL

will be able to secure a replacement of their customer-owned LSL and reduce or eliminate lead in their drinking water.

62. NAWC's proposed LSLR Program and LSLR Plan is an expeditious and financially responsible solution to address the recognized health risk posed by lead in drinking water. It is reasonable and in the public interest, and should be approved.

F. NOTICES

63. The name, address, and contact information of NAWC's counsel for this matter are set forth below. All pleadings, orders, notices, correspondence and other documentation with respect to this matter should be directed to the above counsel.

64. Notice of this Petition has been provided to the individuals and entities as required by Section 65.54(a) of the Regulations, as reflected on the Certificate of Service provided herewith.

WHEREFORE, NAWC respectfully requests that the Commission find and conclude that its Petition be GRANTED and enter an ORDER:

1. Approve NAWC's LSLR Program;
2. Approve NAWC's LSLR Plan which is attached to this Petition as **Exhibit A**;
3. Direct the Commission's Bureau of Technical Utility Services to complete its review of the LTIP modification included as **Exhibit B** to this Petition, and submit an Order for Commission consideration;
4. Approve NAWC's LTIP modification which is attached to this Petition as **Exhibit B**;
5. Approving NAWC's proposed tariff changes as set forth in **Exhibit C**, and authorizing NAWC to file the tariff supplement in **Exhibit C** on one-days' notice; and
6. Approve NAWC's proposal to record the costs of the customer-owned LSL replacements in a separate, segregated subaccount and to recover a return on and a return of its investment in the replacement of customer-owned LSLs, pursuant to 66 Pa. C.S.A. § 1311(b)(2)(iii).

Respectfully submitted,

/s/ THOMAS J. WALSH III, Esq.

Attorney for Petitioner

Newtown Artesian Water Company

VERIFICATION

I, **Daniel J. Angove**, General Manager and Chief Executive Officer of Newtown Artesian Water Company, hereby state that the facts above set forth are true and correct to the best of my knowledge, information and belief, and that I expect to be able to prove the same at a hearing held in this matter. I understand that the statements herein are made subject to the penalties of 18 Pa. C.S. §4904 (relating to unsworn falsification to authorities).

Date: 11/20/23

Daniel J. Angove

Attorney and Officer for
Newtown Artesian
Water Company

CERTIFICATE OF SERVICE

I, Thomas J. Walsh III, Esq., attorney for and officer of Newtown Artesian Water Company, hereby certify that I am this 21st day of November, 2023, serving copies of the **Petition for Approval of the Lead Service Line Replacement Program of Newtown Artesian Water Company**, and this Certificate of Service, on the following persons in the manner indicated:

By Electronic Mail:

The Honorable Charles E. Rainey Jr.
Chief Administrative Law Judge
Pennsylvania Public Utility Commission
crainey@pa.gov

By Electronic Mail:

Steven C. Gray, Esq.
Rebecca Lyttle, Esq.
Office of Small Business Advocate
Email: sgray@pa.gov; relyttle@pa.gov

By Electronic Mail:

Paul Diskin, Director
Dan Searfoorce, Manager
Bureau of Technical Utility Services
Pennsylvania Public Utility Commission:
Email: pdiskin@pa.gov; dsearfoorc@pa.gov

By Electronic Mail:

Richard A. Kanaski, Director
Bureau of Investigation and Enforcement
Pennsylvania Public Utility Commission
Email: rkanaskie@pa.gov

By Electronic Mail:

Harrison W. Breitman, Esq.
Christine Maloni Hoover, Esq.
Officer of Consumer Advocate

EXHIBIT "A"

LEAD SERVICE LINE REPLACEMENT PLAN

NEWTOWN ARTESIAN WATER COMPANY
LEAD SERVICE LINE REPLACEMENT PLAN

1. Introduction; Goals.

1.1. The Newtown Artesian Water Company (“NAWC” or the “Company”) has developed this Lead Service Line Replacement Plan (“Plan”) in accordance with the Rules and Regulations of the Pennsylvania Public Utility Commission (“PUC”), specifically Chapter 65 – Water Service, Subchapter B - Lead Service Line Replacements, Section 56 – LSLR Plan Requirements.

1.2. The Plan’s goal is to remediate and remove all lead water service lines (“LSL”) within NAWC’s water system no later than July 22, 2047. This includes the portion of the LSL that is owned by the customer. A “water service line” or “service line” means the pipe that connects a water main to a building and any fitting connected to the pipe. A “lead service line” or “LSL” means any service line that is made of lead, galvanized iron, or galvanized steel.

1.3. The Plan’s other goals include satisfying all PUC regulations, all other PUC requirements, as well as complying with regulations issued by the United States Environmental Protection Agency (“EPA”) and Pennsylvania Department of Environmental Protection (“DEP”) regarding the Plan.

2. Service Line Inventory.

2.1. NAWC has prepared its initial Service Line Inventory (“Inventory”) in compliance with EPA regulation 40 CFR 141.1-143.20, as enforced by DEP. The completed Inventory will be submitted on or before October 16, 2024, as required by EPA regulations. Once complete, the Inventory will be provided to the PUC as part of the annual Plan update.

2.2. The Inventory will include all water service lines served by NAWC. The Inventory will be updated annually, or as otherwise required by future changes to the applicable regulations. The Inventory will identify the material types for both the Company-owned and customer-owned portions of the water service line. The Inventory can be sorted by material type. Any known lead components of service lines will be detailed. For purposes of the Plan, LSLs will include water service lines consisting of lead or galvanized material requiring replacement.

2.3. If NAWC acquires any water distribution system in the future, the Inventory will be updated to include the acquired system’s information and meet the deadlines set forth by the PUC and the EPA. The Plan will be updated to include LSLs for any such new service area for completion within the 25-year schedule or as required by future changes to the regulations.

2.4. NAWC has completed the Inventory of the Company-owned portion of all water service lines. See Appendix A. None of the water service lines owned by Company contain lead, galvanized iron, galvanized steel or other materials that qualify as LSLs. All LSLs have been removed from the Company-owned portion of the water distribution system (i.e., mains and service lines) and replaced with copper materials.

2.5. NAWC has 10,641 customers. Utilizing NAWC’s existing historical utility data and records, work orders, Bucks County records, billing software records, and field verifications, NAWC has identified 10,455 of these customers as having a water service line. NAWC has determined and knows the material

types for 10,234 of the total 10,455 customer-owned water service lines. The remaining two hundred twenty four (224) customer-owned water service lines of unknown material will be identified over the next 10 years, at a rate of 10% per year, through review of additional records, and by employing geographic information system (“GIS”) mapping software and modeling techniques, additional field verifications, and/or via mechanical excavation (potholing).

2.6. Any assumptions used by NAWC to complete the Inventory will be identified and provided with the annual LSL Replacement Program Report. Since NAWC will implement the Plan as part of its Long-Term Infrastructure Improvement Plan (“LTIIIP”), future updates will also be provided in their Annual Asset Optimization Plan (“AAOP”).

3. Planning and Replacements.

3.1. *Annual Projections.* NAWC’s Inventory identifies 10 known customer-owned LSLs, and 224 customer-owned water service lines of unknown materials. NAWC estimates less than 50 lead and/or galvanized material service lines requiring replacement will be identified from that unknown quantity throughout the water system. NAWC will replace the 10 currently known customer-owned LSLs over the next 2 years, at a rate of 5 per year. Once the Inventory has been updated and completed, the remaining LSLs will be replaced at a rate of 5 per year until all LSLs are removed. NAWC will review this annual projection and adjust it as necessary based on its continuing investigation of unknown service line materials and ensure completion of the Plan by July 22, 2047.

3.2. *Annual Budget.* NAWC’s projected annual investment in LSL replacements is \$50,000. NAWC’s annual budget will include all costs relating to LSL replacements. Budgeted costs will include any outreach costs, mechanical excavations for investigation, replacement costs, sampling following LSL replacement, costs of pitcher filters, and any additional related costs that may be incurred. The costs incurred by NAWC for LSL replacements will be funded with operational revenues.

3.3. *Main Replacements.* LSL replacements in conjunction with a scheduled water main replacement project will be planned. Prior to commencing the main replacement project, NAWC’s staff will review records and/or physically inspect a portion of the service lines within the targeted area to gauge the likelihood of discovering customer-owned LSLs in that area. NAWC will reach out to the affected customers to determine all service line materials within the affected area, and to provide customers with detailed information regarding the routine procedures and potential health risks. Coordination with municipalities will also take place to minimize costs and minimize impact on roads and neighborhoods.

3.4. *Prioritization.* Prioritization of LSL replacement projects will be based on targeted sensitive populations as defined by the EPA and DEP, which includes schools, nursing homes, large apartment buildings, churches, and industries. These service lines will be detailed as sensitive populations in the Inventory. Homes with multiple meters and multiple family residents will also be prioritized to determine service line material. Other areas for prioritization will include those with elevated levels of lead in tap water, areas with high concentrations of lead service lines, and/or areas of the distribution system which have elevated corrosion rates.

3.5. *Outreach To Customers.* NAWC will reach out to all customers with known lead or unknown material service lines within thirty (30) days of submission of the Inventory and annually thereafter. These customers will be provided information explaining the health effects of lead in drinking

water and what the customer should do to prevent lead in their water. See Appendix B. For services lines of unknown material, customers will also be provided with information explaining how to help determine the service line material and procedures for providing that information to NAWC. See Appendix C. NAWC will be checking and documenting service line material in conjunction with meter changes. Customers who discover a LSL may schedule to have their service line replaced in accordance with this Plan.

3.6. *Discovery of LSLs.* If a LSL line is discovered, but in good condition and not leaking, the service line replacement will be scheduled for a later date following standard procedures. If a LSL is leaking or otherwise defective at the time it is discovered, NAWC will coordinate replacement of the LSL with the customer as soon as possible. NAWC will utilize pre-approved licensed contractors for replacement of the customer-owned LSL portion.

3.7. *Coordination with Customer.* Once a LSL replacement project has been determined, NAWC staff will notify the affected customer when the replacement is scheduled to occur. An agreement between NAWC and the customer will be provided with the notification. The Customer Agreement must be signed prior to the LSL replacement. See Appendix D. The signed Customer Agreement will be kept on file. NAWC will contract with a licensed contractor to perform the LSL replacements on the customer's private property. Replacement will be scheduled with the customer owner upon signing of the Customer Agreement.

3.8. If the customer-owned LSL is connected to multiple properties/residences, NAWC will obtain approval from all affected customers prior to performing the LSL replacement. In all instances, no partial LSL replacements will be performed. Replacements will be scheduled so that the entire LSL line is replaced at one time.

3.9. *LSL Replacement Routine Procedures and Restoration.* NAWC intends to replace LSLs in a manner to minimize disturbance as much as possible. NAWC's approved contractor may utilize guided boring to pull a new service line from the curb stop to the residence. A new service line may also be pulled through using the existing service line. This approach removes or displaces existing pipe while simultaneously replacing it with a new pipe. These methods are preferred under normal circumstances to install a new pipe with minimal disturbance. If unable to use these preferred methods due to site conditions, open trench excavation may be utilized to remove and replace the pipe. The appropriate replacement technique will depend on a combination of many site-specific characteristics, including, but not limited to, soil characteristics, condition of the service line, proximity to other utility services (e.g., electric, gas, cable, sewer, storm water), site conditions (e.g., access, parking, paving, landscaping, overhead obstructions), and conditions inside the home such as limited access to the water meter and plumbing. All new service pipe installation will be copper or plastic. If necessary, NAWC's contractor will restore roadways and public sidewalks, backfill any trenches, and will seal any wall or floor penetrations for the service line.

3.10. *Completion.* When the LSL replacement work has been completed, a LSL Replacement Completion Checklist form ("Checklist") will be completed by the contractor. See Appendix E. The Checklist will contain the address, date of completion, and list of the items provided to the customer including the LSL Replacement Information Sheet and pitcher-filter. The Checklist will be signed by both the contractor and customer, and then provided to NAWC to update its records and keep on file. In addition, customers will be provided with an as-built drawing depicting the location of the customer-

owned portion of the water service line between the curb stop and customer-owned structure. As-built drawings will be prepared by the contractor and kept on file with NAWC.

3.11. *Disposal of Lead.* Lead removed during any LSL replacement project will be disposed of at an approved disposal facility to ensure proper disposal of all lead by the plumbing contractor. Scrap receipts will be kept on file. The contractor will provide appropriate documentation, which will be kept on file. The customer will not have any right to the proceeds of a recycled LSL.

3.12. *Post-Replacement Risk Mitigation Measures.* All customers with a LSL replacement will receive documentation explaining the health effects of lead and information on flushing their interior plumbing. See Appendix F. Customers will be given a pitcher-filter prior to or during the LSLR, together with instructions on how to use the pitcher-filter. If the affected service line serves more than one residence, such as a multi-unit building or a non-residential unit, NAWC will provide a pitcher-filter to every unit in the building.

3.13. *Flushing.* NAWC will assist customers with the flushing of the customer's interior plumbing after replacement of a LSL. Information on flushing after having a LSL replacement is provided to all customers that have a LSL replacement. See Appendix F. A detailed description of how to flush will also be found on NAWC's website.

3.14. *Sampling.* NAWC will be offering to collect water samples for all customers who have a LSL replacement. If the customer wants their water sampled, NAWC will provide the customer with sampling procedures and bottles to collect one set of follow-up first draw and fifth liter tap samples. The sampling will be scheduled with the customer and will be collected between three to six months after completion of the LSL replacement. If either of the follow up samples exceed 15 parts per billion (ppb) of lead, NAWC will provide the results of both samples to residents as soon as practicable, but no later than three (3) calendar days after becoming aware of the results. If none of the follow up samples exceed 15 ppb of Lead, NAWC shall provide the results of the samples to residents within 30 days after receiving the results. Accompanying information from NAWC includes an explanation of the effects of lead, a list of steps customers can take to reduce exposure to lead in drinking water, contact information for NAWC, and the maximum contaminant level goal and the action level for lead, as well as the definitions for these two terms. The follow-up sample results, and accompanying information will be delivered to the customer through one of the following methods: electronically, mail, phone, hand delivered, or another method approved by DEP. See Appendix G.

3.15. *Refusal of Lead Service Line Replacement by Customer.* If a customer refuses to grant permission to NAWC to replace the LSL or refuses to have it replaced, NAWC will provide the customer with a disclosure of the known health hazards from the continued use of a LSL. See Appendix B. NAWC will also inform the customer that refusal or failure will require replacement of the customer-owned LSL, at the customer's expense, within one year from the commencement of a LSL replacement project for the customer to be eligible for reimbursement. NAWC will communicate to the customer that failure to allow NAWC to complete the LSL replacement will lead to termination of water service under the provisions of NAWC's tariff. If the customer still refuses replacement of the customer-owned LSL, NAWC will require the customer to sign a form documenting their refusal. See Appendix H. If the customer refuses or fails to sign the refusal form, NAWC will make a record of it to document their refusal. NAWC will then schedule to terminate water service at that location as per the provisions of NAWC's tariff.

3.16. *Warranty.* Upon completion of an LSL replacement by the approved contractor at NAWC's request, the Completion Checklist Form must be signed by the NAWC and the customer or representative of the customer. See Appendix E. From the date of the Completion Checklist Form, NAWC will provide a two-year warranty for materials and workmanship of the replaced customer-owned portion of the water service line, including restoration of surfaces consistent with this Plan, so long as the customer allows access to the property for repairs. This warranty shall cover repairs conducted by NAWC's approved contractor to replace the customer-owned portion of the water service line. Only material defects and incomplete installation methods are covered by the warranty. The warranty does not cover, among other things, damage caused by natural disasters, acts of God, fires, terrorism, excavation activities, acts of sabotage, or deliberate damage. NAWC shall have no liability for any damages not covered by the warranty.

3.17. *Reimbursements.* If an eligible customer chooses to use their own contractor to replace the customer-owned service line, NAWC shall reimburse the customer for the replacement cost of the customer-owned lead service line. See Appendix I. The reimbursement form will be available at the NAWC office or on the NAWC website. Customers are to use this as a guide for determining eligibility for reimbursement, and ensuring they have the correct documentation for reimbursement. For every LSL replaced, a cost form will be completed. See Appendix J. NAWC will use these completed forms to establish the reimbursement amount for the customers who choose to use their own contractors. NAWC will reimburse the customer in a manner that is consistent with its tariff and PUC guidelines.

3.18. *Website Information, Communication, Outreach, and Education.* NAWC may establish or participate in, or both, voluntary lead advisory committees, either individually or on an industry-wide basis to further their customer education and outreach efforts. NAWC will add a service line inventory location to its website within twelve (12) months of PUC approval of this Plan. A tab will be created on the main page of NAWC's website that will link a user to a specific page about lead service lines. That tab will include the following:

- This Plan and the Appendices referenced herein.
- An online tool describing the LSL replacement project and schedule by geographic location, at least six (6) months into the future.
- Information regarding reimbursement requirements and a secure online tool that provides customers the ability to determine whether the customer or property owner may be eligible for reimbursement.
- Instructions that provide the ability to determine whether a property may have a LSL, outline the known or reasonably anticipated material types for the customer-owned portions of the service line, and a method to request assistance to determine if the service line is a LSL.
- Information and resources relating to health risks associated with lead in drinking water and LSLs, the status of efforts to replace the lines, and any community meetings.
- Any community outreach programs or coordination efforts.

List of Appendices:

- A. Service Line Inventory
- B. Information About Lead In Drinking Water
- C. How to Check Your Service Line Material
- D. Customer Agreement
- E. Replacement Completion Checklist
- F. Flushing
- G. Sampling
- H. Customer Refusal Form
- I. Reimbursement Form
- J. Cost Form

IMPORTANT INFORMATION ABOUT LEAD IN DRINKING WATER

NEWTOWN ARTESIAN WATER COMPANY, PWSID 1090043

IMPORTANT INFORMATION ABOUT LEAD IN YOUR DRINKING WATER

The Newtown Artesian Water Company (NAWC) found elevated levels of lead in drinking water in some homes/buildings. Lead can cause serious health problems, especially for pregnant women and young children. Please read this information closely to see what you can do to reduce lead in your drinking water.

Health Effects of Lead

Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.

Sources of Lead

Although most lead exposure occurs from inhaling dust or from contaminated soil, or when children eat paint chips, the U.S. Environmental Protection Agency (USEPA) estimates that 10 to 20 percent of human exposure to lead may come from lead in drinking water. Infants who consume mostly mixed formula can receive 40 percent to 60 percent of their exposure to lead from drinking water. Lead is rarely found in the source of your drinking water but enters tap water through corrosion, or wearing away, of materials containing lead in the water distribution system and household plumbing materials. These materials include lead-based solder used to join copper pipes, brass, and chrome-brass faucets, and in some cases, service lines made of or lined with lead.

New brass faucets, fittings, and valves, including those advertised as “lead-free”, may still contain a small percentage of lead, and contribute lead to drinking water. The law currently allows end-use brass fixtures, such as faucets, with up to 0.25 percent lead to be labeled as “lead free”. Prior to January 4, 2014, “lead free” allowed up to 8 percent lead content of the wetted surfaces of plumbing products. When water stands in lead service lines, lead pipes, or plumbing systems containing lead for several hours or more, the lead may dissolve into your drinking water.

Steps to Reduce Exposure to Lead in Drinking Water

There are steps you can take to protect you and your family from exposure to lead in tap water which are explained below:

1. **Run the water to flush out lead.** If your water hasn't been used for several hours, run your water to flush out lead before using it for drinking or cooking. Run water for 30-60 seconds to flush lead from interior plumbing or until it becomes cold or reaches a steady temperature before using it for drinking or cooking.
2. **Use cold, flushed water for cooking and preparing baby formula.** Because lead from lead-containing plumbing materials and pipes can dissolve into hot water more easily than cold water. Never drink, cook, or prepare beverages including baby formula using hot water from the tap. If you need hot water, draw water from the cold tap and then heat it.
3. **Do not boil water to remove lead.** Boiling water will not reduce lead; however, it is still safe to wash dishes and do laundry. Lead will not soak into dishware or most clothes.
4. **Use alternative sources or treatment of water.** You may want to consider purchasing bottled water or a water filter. Read the package to be sure the filter is approved to reduce lead or contact NSF International at 800-NSF-8010 or www.nsf.org for information on performance standards for water filters.
5. **Get your child's blood tested.** Contact your local health department or health care provider to find out how you can get your child tested for lead if you are concerned about exposure.
6. **Test your water for lead.** Call us at 215-968-6781 to find out how to get your water tested for lead. Testing is essential because you cannot see, taste, or smell lead in drinking water.

NEWTOWN ARTESIAN WATER COMPANY, PWSID 1090043

7. **Identify and replace plumbing fixtures containing lead.** New brass faucets, fittings, and valves, including those advertised as “lead-free” may contribute lead to drinking water. Until 2014, the law allowed end-use brass fixtures, such as faucets, with up to 8% lead to be labeled as “lead-free”.

NAWC Efforts to Reduce/Remove Lead from Drinking Water

1. **Corrosion Control Treatment.** Addition of a corrosion inhibitor makes it less likely that lead will dissolve into the water.
2. **Lead Service Line Replacements.** NAWC is currently preparing an inventory of all customer-owned and NAWC-owned portions of water services. Once complete, the inventory will be posted onto the NAWC website and affected customers will be notified. NAWC will begin replacing lead service lines in 2024 and all lead service lines are to be replaced by 2047. NAWC must replace its portion of a lead service line when a customer notifies NAWC that they are replacing their portion of the lead service line. Customers may also be eligible for reimbursement for replacement of their own lead service lines. Please contact our office for additional information.
3. **Public Education Program.** NAWC strives to educate the public on lead in drinking water. For example, this pamphlet provides customers information on how to reduce lead in your water.

APPENDIX “C”

HOW TO CHECK YOUR WATER SERVICE LINE MATERIAL

How to check your water service line material

NAWC's water mains are not made of lead. However, the water service line running from the curb into your home may be made of lead or steel.

Lead can also be found in older brass fixtures and valves and in old solder or epoxy, where pipes are joined.

You can test the water service line where it connects to the water meter in the basement.

Water Service Line
May be made of lead, copper, galvanized steel or plastic.

! For any questions about lead in your water:

Call us at (215) 968-6781

Our staff will provide information on water testing, safety tips and replacement options.

Possible Pipe Materials

Lead

Copper

Galvanized Steel

Plastic

Follow these steps:

You will need:

- Key or a coin
- Strong refrigerator magnet

1. Find the water meter in your basement. Look at the pipe that comes through the outside wall of your home and connects to your meter.
2. Carefully scratch the pipe (like you would a lottery ticket) with a key or a coin. Do not use a knife or other sharp tool. Take care not to make a hole in the pipe. If the scratch turns a shiny silver color, it could be lead or steel.
NOTE: If pipe is painted, use sandpaper to expose the metal first.
3. Place the magnet on the pipe. If a magnet sticks, it is a steel pipe.

Other ways you can check for lead:

- Purchase a lead test kit at a hardware or home improvement store. These kits test what the pipe is made from – not the water inside. Look for an EPA recognized kit.
- A licensed and insured plumber can inspect your pipes and other plumbing for lead or steel. Replacing an older brass faucet or valve might reduce the lead in water.

APPENDIX “D”

CUSTOMER AGREEMENT

LEAD SERVICE LINE REPLACEMENT AGREEMENT

This **Lead Service Line Replacement Agreement** (the “Agreement”) is made this _____ day of _____, 20____, by and between Newtown Artesian Water Company, Inc. (the “Company”), and _____, an adult individual(s) or entity with an address of _____ (collectively “Customer”).

BACKGROUND:

A. In consideration of the Company’s efforts to remove lead water services, the Customer has given permission per this Agreement to the Company and its officials, employees, and approved contractors to excavate, investigate, and replace non-copper water services on the property identified below.

B. The address for this property is: _____ (the “Property”).

C. Customer shall permit temporary access and right of entry to and upon the above-referenced property to the Company and the Company’s designated agent(s) and contractor(s) to perform investigation, inspection, construction and testing of the new private water service line and to enable any needed adjustments, maintenance, or repairs during the warranty period.

CUSTOMER hereby acknowledges and understands that the work contemplated by this Agreement shall be performed subject to the following provisions:

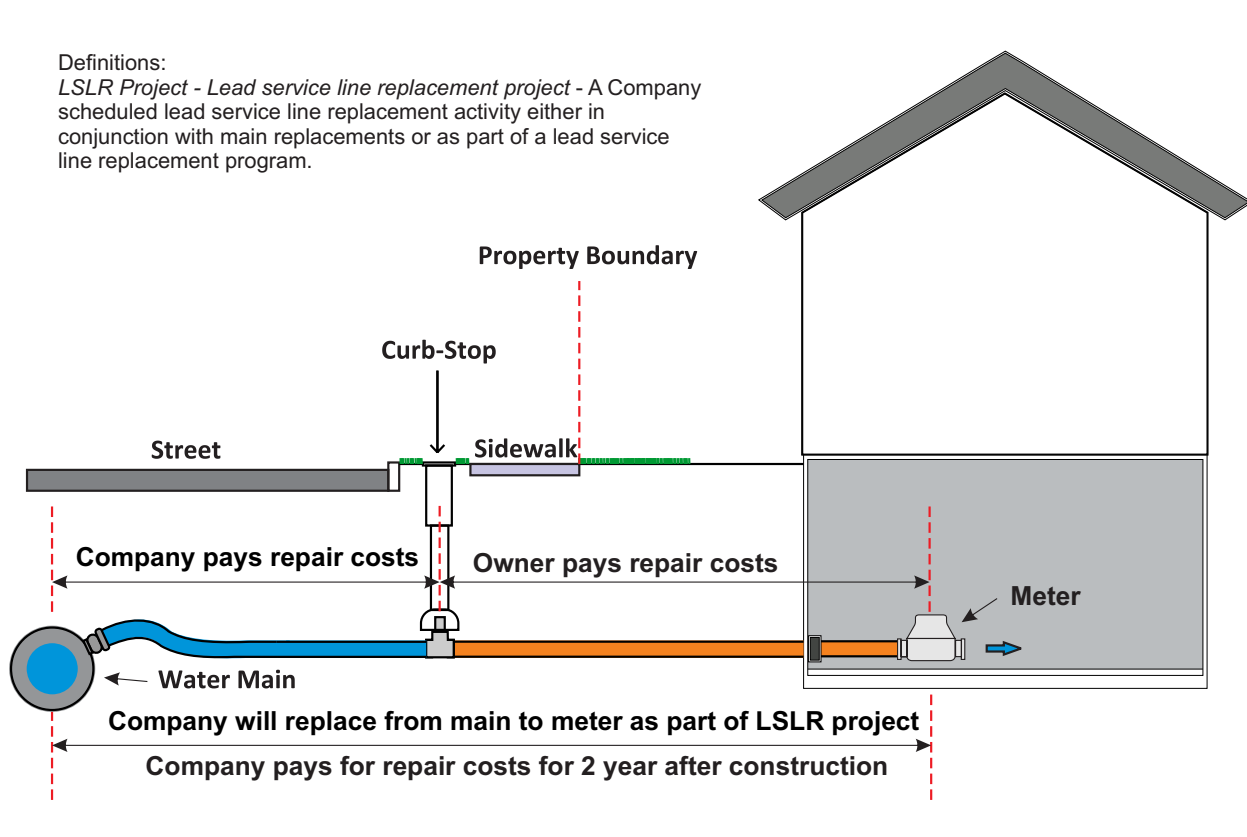

1. The service line replacement is mandated by the Commonwealth of Pennsylvania “Lead and Copper Rule,” adopted by the Pennsylvania Department of Environmental Protection. The Company is not permitted to re-establish water service to the water main until my lead/galvanized water service is completely replaced.
2. A new copper or plastic private water service line will be constructed at the Company’s expense from the curb box in the public or private street or other right-of-way to the water meter on the Property, including the meter setting and any necessary connections to reset the water meter. The existing lead service water line will be disconnected and either capped off or removed.
3. The Company or its approved contractor will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for or in connection with the lead service line replacement. The Company will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the Customer.
4. If an approved contractor is doing the work as contemplated in this Agreement on behalf of the Company, the contractor doing the work shall provide reasonably adequate insurance to protect the Customer against any loss that may result from damage caused by negligent construction operations on the Property. The contractor shall be required to provide the Company with adequate proof of such insurance coverage.
5. The Company warrants that any work performed by the Company or its approved contractor pursuant to this Agreement shall be free from defects in materials and workmanship for a period of two (2) years after completion (the “Warranty Period”).

LEAD SERVICE LINE REPLACEMENT AGREEMENT

6. The Customer confirms that Customer is the only owner(s) of the Property, and that Customer has or will provide adequate proof of such ownership to the Company.
7. Customer permits temporary access and right of entry to an upon the Property to the Company and the Company’s approved contractor to perform construction and testing of the new private water service line and to enable any needed adjustments, maintenance or repairs during the Warranty Period.
8. Customer assumes full responsibility for the maintenance, repair and replacement of the private part of the water service line located on the Property after expiration of the Warranty Period. After expiration of the Warranty Period, the responsibility of each party (the Company and the Customer) for the water service line shall be as shown on the following diagram:

Definitions:

LSLR Project - Lead service line replacement project - A Company scheduled lead service line replacement activity either in conjunction with main replacements or as part of a lead service line replacement program.

9. Customer holds the Company harmless and free from any claim or liability from any lawsuits, claims, injuries or damage done in performance of the water service line replacement work.
10. The responsibility of the maintenance, repair and replacement of the water service located in the public street or other public right-of-way will be pursuant to the Company’s tariff.
11. This Agreement is a legally binding document. Customer’s signature will commit Customer to this Agreement’s terms. Customer acknowledges that he/she has been advised to discuss this Agreement with an attorney. Customer acknowledges that he/she has carefully reviewed and

LEAD SERVICE LINE REPLACEMENT AGREEMENT

fully understands all the provisions of this Agreement. Customer is voluntarily entering into this Agreement.

12. This documents states the entire agreement reached between the Company and the Customer with respect to the construction activities contemplated hereby, and supersedes all prior or contemporaneous agreements, understandings, representations and warranties between the parties.
13. This Agreement may be executed in counterparts, and signatures may be exchanged electronically via email, each of which shall constitute an original and all of which shall constitute one binding agreement.
14. This Agreement shall be governed by and construed in accordance with the laws of the Commonwealth of Pennsylvania without regard to conflict of law principles.
15. If any provision of this Agreement shall be found invalid, illegal or unenforceable in any respect, the remaining provisions contained in this Agreement shall not be affected.
16. This Agreement may not be amended or modified except by a written instrument signed by the Company and Customer.

LEAD SERVICE LINE REPLACEMENT COMPLETION CHECKLIST

CUSTOMER NAME _____

CUSTOMER ADDRESS _____

This Lead Service Line Removal Completion Form is made by and between the Newtown Artesian Water Company and the above-named property owner to document that the removal of the customer-owned lead water service line by the Newtown Artesian Water Company has been completed.

Now, therefore, the parties hereby agree to the following:

1. Newtown Artesian Water Company has replaced the lead service line at the above address as part of NAWC's Lead Service Line Replacement Program.
2. The lead service line replacement was completed on the following date: _____
3. NAWC has backfilled any trenches excavated as part of the replacement process and has filled and sealed any wall or floor penetrations in the private home.
4. NAWC has provided a pitcher-filter and six (6) months of filter cartridges to reduce lead in drinking water.

APPENDIX “F”

FLUSHING INFORMATION

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

LEAD SERVICE LINE REPLACEMENT INFORMATION

ESTE INFORME CONTIENE INFORMACIÓN IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.

Newtown Artesian Water Company is replacing your lead service line. This notice provides information you need to know regarding the replacement and why it is important.

The pipe that connects your household plumbing to the water main in the street is called a service line. Newtown Artesian Water Company is replacing your service line because it either contains lead, is galvanized iron/steel and was or is currently downstream of lead, or there is a lead gooseneck, pigtail or connector on your service line. Lead from your existing pipes can leach into the water you drink. While it's important for the long term quality of your drinking water to remove these lead pipes, studies have shown that when lead service lines are disturbed, in the short-term they can release lead for weeks or months after the disturbance. There are steps you can take to protect you and your family from exposure to lead in tap water which are explained below.

What should I do?

- After the service line is returned to service but before using the water for consumption, remove and clean all faucet aerators, flush your service line and all internal plumbing by opening all taps and letting the water run for at least 30 minutes, and re-install the cleaned aerators.
- To conserve water instead of simply running the water for 30 minutes, other household/non-potable water usage activities such as washing clothes, showering, flushing the toilet and running the dishwasher are effective methods of flushing the pipes.
- After the initial flush, run the water for 3-5 minutes before using and use cold water for cooking and drinking to reduce your exposure to lead in the water.
- In addition to flushing the lines, you are being provided with a pitcher filter that is certified to remove lead and six months of replacement cartridges. This filter may be used for water that will be used for drinking and cooking.

Why should I do it?

Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risk of heart disease, high blood pressure, kidney, or nervous system problems.

Please share this information with all the other individuals who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

For more information, please contact Newtown Artesian Water Company at 215-968-6781.

APPENDIX “H”

CUSTOMER REFUSAL FORM

LEAD SERVICE LINE REPLACEMENT REFUSAL FORM

DECLINE PRIVATE LEAD WATER SERVICE LINE REPLACEMENT

I, the undersigned customer, VOLUNTARILY DECLINE to have Newtown Artesian Company (the “Company”) address my privately owned lead water service line. I understand that lead is a toxic metal that can be harmful to human health even at low exposure levels. Lead is persistent, and it can accumulate in the human body over time. All persons, especially pregnant women, children, and infants, are vulnerable to the dangerous effects of lead in drinking water.

More information on the harmful effects of lead in drinking water is available at the following website maintained by the United States Environmental Protection Agency:

<https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water>.

I, the undersigned customer, understand that my refusal or failure to accept the Company’s offer to replace my privately owned lead water service line will require replacement of my private lead service line at my expense within one (1) year from the date when the commencement of the work on the property identified below would have begun in order for me to be eligible for reimbursement for the replacement of my private lead service line by the Company.

I further understand that my refusal or failure to allow the Company or its approved contractor to replace my private lead service line, or my failure to replace my private lead service line concurrently with the Company’s replacement of its portion of its service line if applicable, may lead to termination of my water service under the applicable provisions of the Company’s currently-effective tariff.

LEAD SERVICE LINE REPLACEMENT (LSLR) PLAN (2024 – 2026)

Prepared By: Gannett Fleming, Inc.

TABLE OF CONTENTS

<u>Section</u>	<u>Page</u>
1.0 LEAD SERVICE LINE REPLACEMENT PLAN	1
Table 1 – Projected Number and Costs Associated with Lead Service Line Replacement	

1.0 Lead Service Line Replacement Plan

Introduction

In accordance with the requirements of 66 Pa. C.S. § 1311 and the Public Utility Commission's Final Rulemaking Order for the Implementation of Act 120 of 2018 (Public Meeting of February 24, 2022, Docket No. L-2020-3019521), NAWC is submitting this Lead Service Line Replacement Plan (LSLR Plan). NAWC's LSLR Plan addresses the Company's efforts to replace company-owned and customer-owned Lead Service Lines.

Lead is a heavy metal that commonly occurs in our environment. Humans can be exposed to lead through a variety of sources, including dust, soil, or paint chips, as well as through ingestion from drinking water. The deleterious health effects of lead are now well-recognized. Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.

In October 2018, Governor Wolf signed into law Act 120 of 2018 ("Act 120"), which became effective on December 23, 2018. Act 120 amended Section 1311(b) of the public Utility Code in order to, inter alia, authorize water utilities to pursue comprehensive replacement of lead service lines that remain in service across Pennsylvania subject to Public Utility Commission ("Commission") approval.

Pursuant to Act 120, the Commission promulgated its LSLR Regulations at 52 Pa. Code § 65.51, et seq. 52 Pa. Code § 65.53 states that "[a]n entity...shall remove and replace all LSLs, whether entity-owned or customer-owned, within or connected to its water distribution systems within 25 years from the effective date of this section for a Class A public utility..." Moreover, 52 Pa. Code § 65.54(b) requires that the utility shall include with its LSLR Program a modified Long Term Infrastructure Improvement Plan (LTIIIP) containing the LSLR Plan as a separate and distinct component of the entity's LTIIIP.

NAWC's latest LTIIIP (2022 – 2026) was approved by the Commission at Docket No. P-2021-3028377 on December 16, 2021. NAWC's LSLR Plan is presented herein for approval and will be added to its LTIIIP.

NAWC has begun efforts to identify and replace lead service lines in its system. This LSLR Plan is considered part of the LTIIIP and identifies how NAWC will continue replacing aging infrastructure including the replacement of lead service lines.

Types and Age of Eligible Property

A listing of the eligible property, as defined in 66 Pa. C.S. §1351(3), is provided in this section. NAWC is developing a lead service line inventory (Inventory) to locate, track, and replace company-owned and customer-owned service lines that contain lead, galvanized steel downstream of a lead service line, and lead pigtails, goosenecks, or other fittings connected to lead service lines. NAWC is currently working to incorporate the Inventory into its GIS to map and manage these assets.

NAWC owns the following water system components:

Company-Owned Service Lines - Water gets delivered from the water main to the customer's curb stop (Curb Stop) through a Company-owned, pressurized service line. NAWC owns the service line between the water main and the curb stop ("Company-Owned Service Line"). The Company-Owned Service Lines vary in size from 6-inch down to ¾-inch. All Company-Owned Service Lines are constructed of copper.

The customer owns the following water system components:

Customer-Owned Service lines - The portion of the service line extending from the Curb Stop to the meter or one foot inside a building foundation, whichever is further ("Customer-Owned Service Line"). Generally, any replacement of the Customer-Owned Service Line is the responsibility of the customer. However, Customer-Owned Service Lines are included in this LTIP for purposes of the LSLR Plan. The Customer-Owned Service Lines vary in size from 6-inch down to ¾-inch with a majority of Customer-Owned Service Lines being constructed of copper. Copper is used when Customer-Owned Service Lines are replaced pursuant to the LSLR Plan.

Based on the initial Inventory, NAWC has identified ten (10) Customer-Owned Service Lines consisting of lead materials. NAWC estimates the total number of lead service lines that will need to be replaced to be less than 50. NAWC plans to identify, at a minimum, 10% of the initial unknown service materials annually by utilizing additional records, GIS modeling techniques, field verifications, and/or mechanical excavation (potholing).

Schedule for Planned Repair and Replacement of Eligible Property

At this time, NAWC has 224 unknown and 10 known lead service lines that are customer-owned. NAWC estimates ultimately that less than 50 lead service lines will be identified for replacement throughout the water system. NAWC will replace the known lead services lines over the next two years, at a rate of 5 per year. Once the Inventory has been updated, the remaining LSLs will be replaced at a rate of 5 per year until all lead services lines are removed from the water system. NAWC will review this annual projection and adjust it as necessary based on the ongoing investigation of unknown service line materials. Based on the estimated quantity of 50 LSLs, completion of the LSLR Plan is anticipated within 10 years, which is well within the 25-year requirement.

The projected annual investment in lead service line replacements is \$50,000. NAWC’s annual budget will include all costs relating to lead service line replacements. Budgeted costs will include any outreach costs, mechanical excavations for investigation, replacement costs, sampling following LSLR, costs of pitcher filters, and any additional related costs that may be incurred.

Location of Eligible Property

There is a limited number of known customer-owned lead service lines throughout the service area of NAWC. Lead service lines are generally in older buildings constructed prior to 1950, which are concentrated within Newtown Borough. However, lead service lines may also be identified within older homes in Newtown Township and Middletown Township.

Reasonable Estimate of the Quantity of Eligible Property to Be Improved

NAWC will replace the known lead services lines over the next two years, at a rate of 5 per year. Once the inventory has been updated, the remaining LSLs will be replaced at a rate of 5 per year until all lead services lines are removed from the water system.

Projected Annual Expenditures and Measures to Ensure Cost-Effective Project Implementation

Year	Projected Number of Lead Service Line Replacements	Projected Annual Expenditures
2024	5	\$50,000
2025	5	\$50,000
2026	5	\$50,000
2027 and Beyond	5/Year	\$50,000/Year

Table 11 – Projected Number and Cost Associated with Lead Service Line Replacements

NAWC will pursue the same cost-effective construction practices as noted in Section 5.0 of its LTIIP.

Acceleration Plan and Maintenance of Safe and Reliable Service

Through the LSLR Plan, NAWC will make a concerted effort to replace existing lead service lines in a timely manner. As noted earlier, NAWC is projecting to complete the lead service line replacements within 10 years, which is well within the time frame set forth in 52 Pa. Code § 65.53(a). The LSLR Plan will take place in conjunction with NAWC’s other infrastructure investments.

Workforce Management and Training Program

Same as LTIIP Section 7.0

Outreach and Coordination with Utilities, PennDOT and Other Governmental Agencies

Same as LTIP Section 8.0

Service Connection (continued)

11H. Generally, the Company will maintain service pressures from 25 p.s.i.g (pounds per square inch gauge) to 125 p.s.i.g at the main, but during period of peak demand pressures at the main may range from 20 to 150 p.s.i.g. The Company may furnish service at other pressures where necessary to supply adequate service.

Deleted: →→(C)

If a customer needs the pressure reduced, the customer must install and maintain, at the customer's expense, a pressure regulator or valve. The pressure regulator will be installed on the inlet side of the meter.

Replacement of Customer Owner Lead Service Lines (COLSL).

11I. Notwithstanding Sections 11 through 11D, inclusive, above, the Company shall, provided the Customer provides consent, replace Customer Owned Lead Service Lines ("COLSL") pursuant to the Company's approved Lead Service Line Replacement Plan (the "Replacement Plan") and as set forth in Rules 11I through 11S herein.

11J. Pursuant to the Replacement Plan, the Company will replace up to FIVE (5) COLSL replacements per calendar year and within a maximum annual budgeted amount of FIFTY THOUSAND and 00/100 Dollars (\$50,000.00) per calendar year.

11K. The Company will replace a COLSL it encounters when replacing its mains and/or service lines.

11L. The Company will also replace a COLSL at a Customer's request subject to the following conditions:

- (1) verification that the Customer has a lead service line;
- (2) the time when the replacement occurs will be determined by the Company based on facts determined by the Company including, without limitation, the number of Customer requests for COLSL replacements during that calendar year;
- (3) the annual budgetary and number caps identified in section 11J above; and
- (4) availability of allocated funds not used for COLSL replacements when the Company is replacing its mains and/or service lines.

11M. COLSL replacements performed by the Company when replacing its mains and/or service lines shall have priority on the use of funds under the annual budget allotment. In any calendar year, funds will be used for replacement of COLSLs at a Customer's request only to the extent that funds are available within the budgetary allotment and are not allocated to Company-planned replacements for that year.

- 11N. Any portion of the annual budgetary allotment that is not spent on COLSL replacements in that calendar year will roll over to the next subsequent year, subject to the annual cap of COLSL replacements per calendar year. If the Company does not use the excess budgeted amount that carried over from the previous year, that excess budgeted amount will not carry forward into the following year (i.e., excess budgetary allotments will not carry forward on a cumulative basis).
- 11O. The Company may, but shall not be required to, petition the Commission to modify its annual budgeted amount and/or the cap of COLSL replacements per calendar year if, in the Company's sole discretion, the Company determines these amounts are not adequate to meet the needs of the Replacement Plan. Any such petition to modify the budgeted amount and/or maximum number of COLSL replaced per year is subject to Commission approval.
- 11P. Costs incurred by the Company under the Replacement Plan shall be subject to Act 120 of 2018 (P.L. 738, No. 120) and the accounting and ratemaking treatment approved by the Commission at Docket No. P-2023-3041859.
- 11Q. After a COLSL is removed and replaced by the Company, the Customer shall own and have full responsibility for the repair, replacement and maintenance of the new service line. Upon installation, the Customer and the new service line shall be subject to the terms and conditions of these rules governing Service Connections.
- 11R. The Customer shall enter into an agreement for replacement of the COLSL, in a form provided by the Company, prior to the initiation of any work by the Company to replace a COLSL. Commencing on the date the new service line is put into use, the Company will provide a two (2) year warranty on workmanship, materials, and replacement of surface cover for any COLSL that the Company replaces. The maximum coverage under the warranty shall be the average amount required to replace a COLSL. The Company's liability shall be limited to only those costs necessary to reasonably replace the COLSL and restore the affected portion of the Customer's property to approximately the same condition it was in prior to commencement of the COLSL replacement.
- 11S. If the Company, at the request of the Customer, determines that the Customer replaced their COLSL, and the COLSL has been replaced at or within one (1) year of the date the Company commenced a project to replace COLSLs, the Company will reimburse the Customer in accordance with the following:
- (1) The Company must be provided an opportunity to inspect the installation. The Customer must reimburse the Company for the cost of the inspector. Current inspection costs are \$76.78 per hour and will increase annually. The time for inspection is anticipated to be less than four (4) hours.

NEWTOWN ARTESIAN WATER COMPANY
Newtown, Pennsylvania 18940

Supplement No. PRO FORMA
To
Water-PA P.U.C. No. 9B
Original Page No. 9B

- (2) The Customer must provide the Company with a paid invoice, a certification from a certified plumber or other installer, and any other documentation required by the Company to verify the replacement. Such documentation must be provided within thirty (30) days of the installation or within seven (7) days of request by the Company if the installation occurred more than thirty (30) days prior.
- (3) Upon satisfaction of conditions (1) and (2) above, the Company will reimburse the Customer's or property owner's (as applicable) reasonable costs up to an amount not to exceed 125% of the cost the Company would have incurred to perform the replacement of a similarly sized service line, with similar attributes of replacement at the property in the Company's sole discretion. The Company will determine the average cost of the installation using one of its pre-approved contractors to estimate the replacement cost. The Company will issue the reimbursement via a check.

Use of Service Must Be in Accordance with Application and Contract

12. The use of water service by a Consumer shall in general be in accordance with the class, scope and type of use, and the purpose stated in this application and service contract. A Consumer shall not use or allow use by others of water service through his service facilities for others or other purposes than covered in his application. (See Rule 39). A new application and contract will make service for other purposes or character of use available.

Availability of the Different Classes of Service and Rates

13. The various classes of service and rates are available to a Consumer in accordance with the obvious intent of, and statements as to application made under the different rates in the schedule of rates.

Metered Consumers

14. Each metered rate Consumer's service shall have a separate meter to register the amount of water consumed, except as provided in Rule 54.
15. All meters will be furnished by, and remain the property of, the Company and shall be accessible to and subject to its control. They shall be conveniently located within the building supplied, at a point approved by the Company, so as to control the entire supply; and, a proper place and protection therefor shall be provided by the Consumer.
16. In any case where it is not convenient to place the meter within the building, as provided in Rule 15, the Company may place it outside the building in a concrete or brick vault provided with a suitable cover and lock and key. Said vault shall be built inside the property line at the expense of the Customer.
