Harrisburg, PA 17120

**Re: Completed Restoration of Momentary and Sustained Interruptions –
FirstEnergy Pennsylvania Electric Company; Docket No. M-2021-3023564**

Dear Secretary Chiavetta:

Pursuant to 52 Pa. Code § 67.1, FirstEnergy Pennsylvania Electric Company on behalf of Pennsylvania Electric Rate District (“Penelec”) submits written notification of completed restoration efforts following storm conditions that began on January 9, 2024 that caused multiple service interruptions in the Penelec service territory.

Attached please find the details relative to the impact of this recent outage event and the restoration activities that took place. It should be noted that the review and approval process of this outage information is still in progress at the time of filing this report and as such, all outage information contained in this report should be considered preliminary.

If you have any questions, please contact me at (610) 212-8331.

Sincerely,

Darsh Singh

ELECTRIC UTILITY REPORT OF OUTAGE TO
PENNSYLVANIA PUBLIC UTILITY COMMISSION
SECRETARY'S BUREAU
P O BOX 3265
HARRISBURG, PA 17105-3265

1. Reporting Utility: FirstEnergy Pennsylvania Electric Company on behalf of
Penelec Rate District ("Penelec")
Address: 800 Cabin Hill Drive
Greensburg, PA 15601

2. Name and title of person making report:

Scott Wyman President, Pennsylvania Operations
(Name) *(Title)*

3. Telephone number: (814) 449-9308
(Telephone Number)

4. Date and time report was made to Commission:

January 9, 2024 1617
(Date) *(Time)*

5. Interruption or Outage:

(a) Number of customers affected: 112,452 (Represents 19.2% of Penelec's total customers).

(b) Approximate number of outage cases and trouble cases for each county affected during event: See response to 5(c)

(c) Approximate number of outages for each county affected during the event:

County	Outages	Outage Cases	Trouble Cases
Bedford	529	23	29
Blair	1626	37	74
Bradford	2964	37	38
Cambria	2095	45	80
Centre	22	4	18
Clarion	1,163	26	24
Clearfield	4,533	57	67
Crawford	4,435	87	202
Cumberland	18	2	5
Erie	43,801	521	1835
Forest	2,367	19	23
Franklin	53	4	7
Huntingdon	184	16	16
Indiana	10411	102	165
Jefferson	5420	38	23
Juniata	70	1	1
Lycoming	18	4	1
Mckean	1358	42	50
Mifflin	1448	25	13
Perry	8	3	5
Potter	95	6	6
Somerset	5298	59	53
Sullivan	692	20	12
Susquehanna	1782	32	44
Tioga	1423	27	28
Venango	10013	70	93
Warren	8654	74	86
Wayne	284	12	10
Westmoreland	1,528	19	6
Wyoming	160	14	14
Total	112,452	1,426	3,028

(d) Approximate number of outage cases exceeding 6 or more hours in duration: 710

(e) A listing of each outage case exceeding 6 or more hours in duration:
See Attachment A.

- (f) Reason for the interruption or outages: Beginning in the afternoon hours of Tuesday, January 9, 2024, a weather system producing rain and heavy winds moved through Pennsylvania including the Penelec service territory. The system produced storms with heavy precipitation and high winds of approximately 54 miles per hour. See Attachment B for the maximum wind gusts and the 24-hour total precipitation for January 9 through January 11, 2024.

Damage as a result of the high winds included downed wires, and damaged and broken poles, trees, and branches. High winds affected restoration efforts as crews cannot safely handle materials if winds exceed 30 mph or operate bucket trucks if winds exceed 40 mph. The Erie region was the hardest hit area. Approximately 27.0% of the total outages that occurred were tree and an additional 18.5% were wind related.

Preliminary data indicates the reliability impact of the storm was 73.3 minutes of SAIDI, 0.19 of SAIFI, and an overall storm CAIDI of 381.55 minutes.

- (g) Projected time of restoration: It was estimated that the majority of customers would be restored by 2300 on Saturday, January 13, 2024.

See Attachment C for the restoration curve and Attachment D for the order restoration graphs.

- (h) The number of utility workers, contract workers, and workers received as mutual aid assigned specifically to the repair work by general function:

Company	# of Workers	General Function
Pennsylvania Electric Company	11	Damage Assessor
Subtotal	11	Damage Assessor
Asplundh Tree Expert, LLC	14	Forestry Contractor
Davey	48	Forestry Contractor
Hazlett Tree Service, Inc	11	Forestry Contractor

- (i) The date and time of the first information of a service interruption: January 9, 2024 at 0745.
- (j) The date and time that repair crews were assembled: January 9, 2024 at 0600.
- (k) The actual time that service was restored to the last affected customer: January 13, 2024 at 2010.
- (l) A general description of the physical damage sustained by the utility facilities as a result of the interruption/outage:

Equipment	Number
Primary Spans	331
Secondary Spans	336
Crossarms Replaced	232
Cutouts Replaced	152
Poles Replaced	105
Transformers Replaced	60
Wire & Cable Replaced (feet)	21,838

- (m) If the interruption/outage event was weather-related, the utility’s weather reports, outlooks, or scenarios for the day before and the day of the interruption/outage event:

See Attachment E for the weather forecast reports.

- (n) If the interruption/outage event caused approximate outages that exceed 10% or more of the number of customers in the utility’s entire service territory, rank the event in terms of the number and duration of outages and provide 2 comparable events, including the number and duration of outages for those comparable events.

The below chart reflects a ranking of the subject event in relation to two comparable Penelec events (based on the number and duration of outages).

Rank by Number of Outages	Operating Company	Date	Event Description	Duration (hours)	Customers Affected
1	Penelec	April 1 to 5, 2023	High Winds	116 hours 50 minutes	115,095
2	Penelec	January 9 to 13, 2024	High Winds & Rain	110 hours 10 minutes	112,452
3	Penelec	February 24 to 29, 2019	High Winds	108 hours 21 minutes	106,374

Remarks: The storm statistics contained in this report are preliminary. The review and approval of the storm statistics were still in progress as of the time this report was filed.

Attachment A: A listing of each outage case exceeding six or more hours in duration, including the following information¹:

Order #	Approximate Location (County)	Total Number of Customers Affected	Duration of the Outage (minutes)	Initial Date and Time of the Outage	Restoration Date and Time

New Issuance:

A large storm system is set to move through FE late Tuesday and Wednesday. This system will cover nearly all of FE, and has the potential to bring a mix of periods of snow, heavy rainfall and gusty winds at various times over the Tuesday-Wednesday period.

In general, the storms is to expected to unfold as follows:

- a) A period of snow/ice is possible across western/central FE early Tuesday as the storm approaches. This will change over to rain across all of FE during the day Tuesday.
- b) Periods of heavy rain are expected across eastern FE Tuesday evening into Wednesday morning.
- c) Gusty winds will arrive across FE as the storm moves through Tuesday. The greatest risk for significant wind gusts (50+ mph) currently reside in:
 - a. Areas of northwest PA and northeast OH Tuesday afternoon
 - b. Elevations of WV/MD/southern PA Tuesday afternoon/evening
 - c. Along the NJ coastline overnight Tuesday into Wednesday

Generally gusty winds will also be possible across most of FE late Tuesday into early Wednesday as a cold front moves through from west-to-east.

- d) A second round of wind gusts is possible Wednesday afternoon as the storm exits. Generally gusty winds are expected across most of FE Wednesday, with the highest gusts along the Lake Erie shoreline and in elevations of WV/MD.

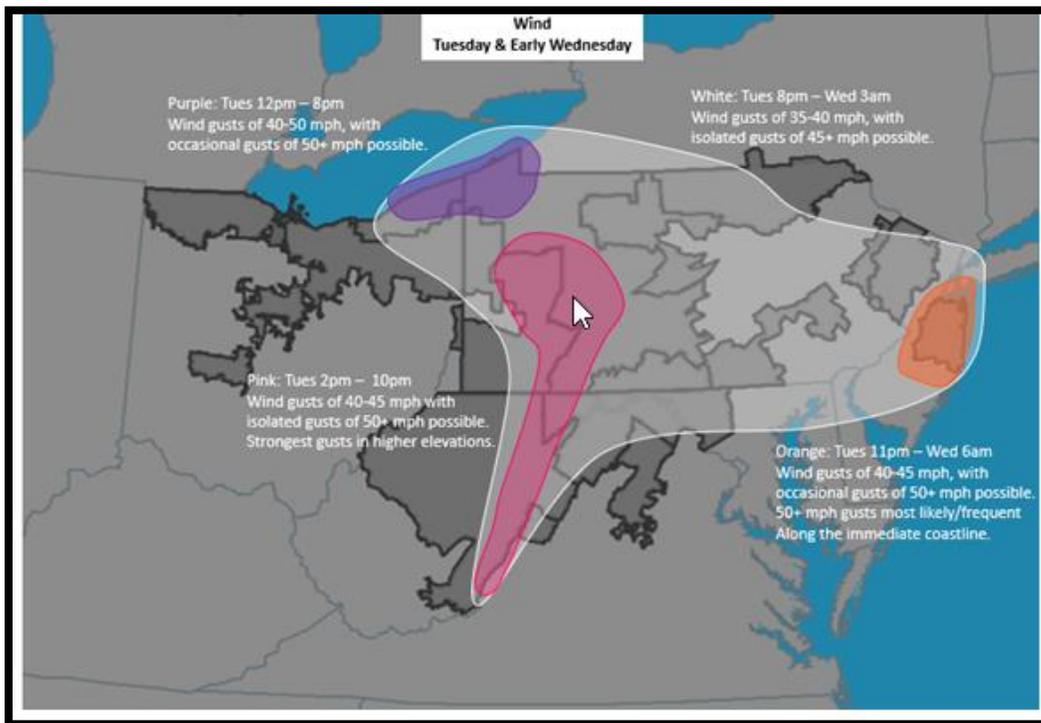

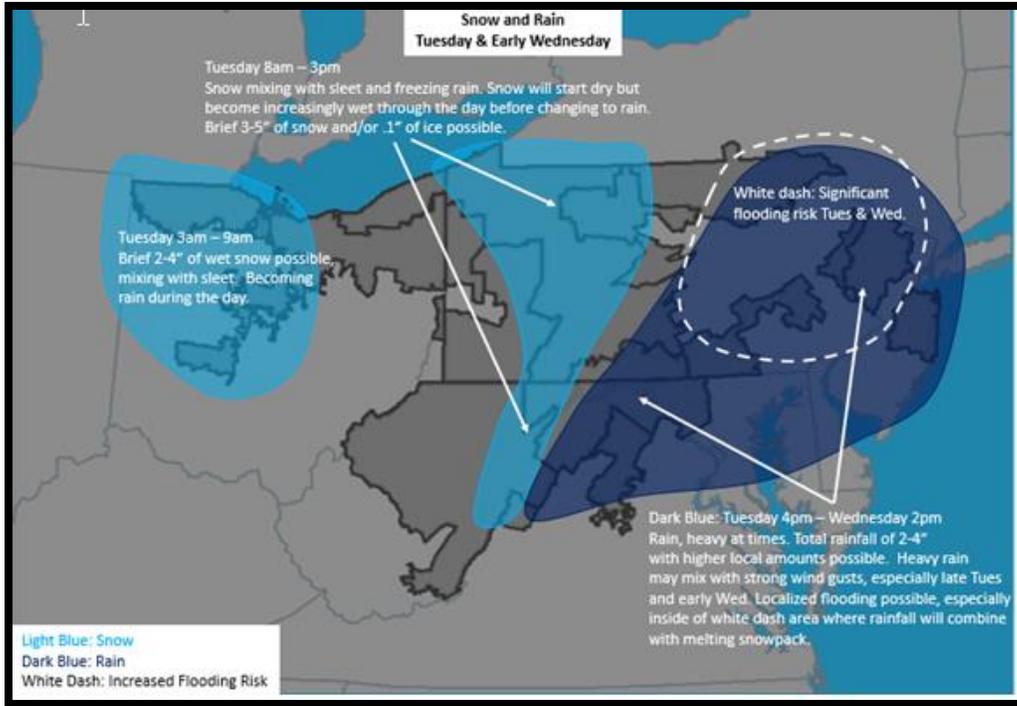

Other notes:

--Confidence is high about the likelihood of heavy rain in eastern FE. However, the overall wind forecast remains somewhat uncertain, and is likely to change in some areas in subsequent alerts as details of the forecast become clearer.

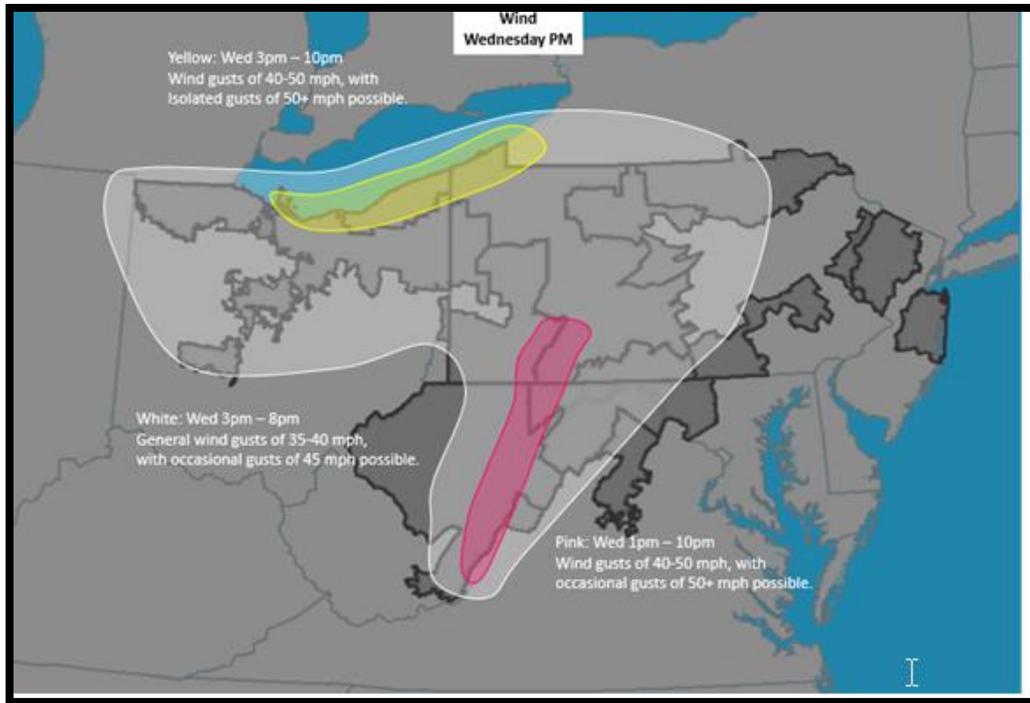

--Localized flooding, perhaps significant, is becoming increasingly likely across areas of eastern FE Tuesday and Wednesday. Periods of locally heavy rain, notable rainfall accumulations, and melting snowpack could combine to create a substantial flood threat.

--Easterly winds Tuesday and early Wednesday could provide a minor coastal flood threat along the NJ coastline.

See graphics below for further information.

Penelec Storm Report

Sunday, January 7, 2024 @ 1128

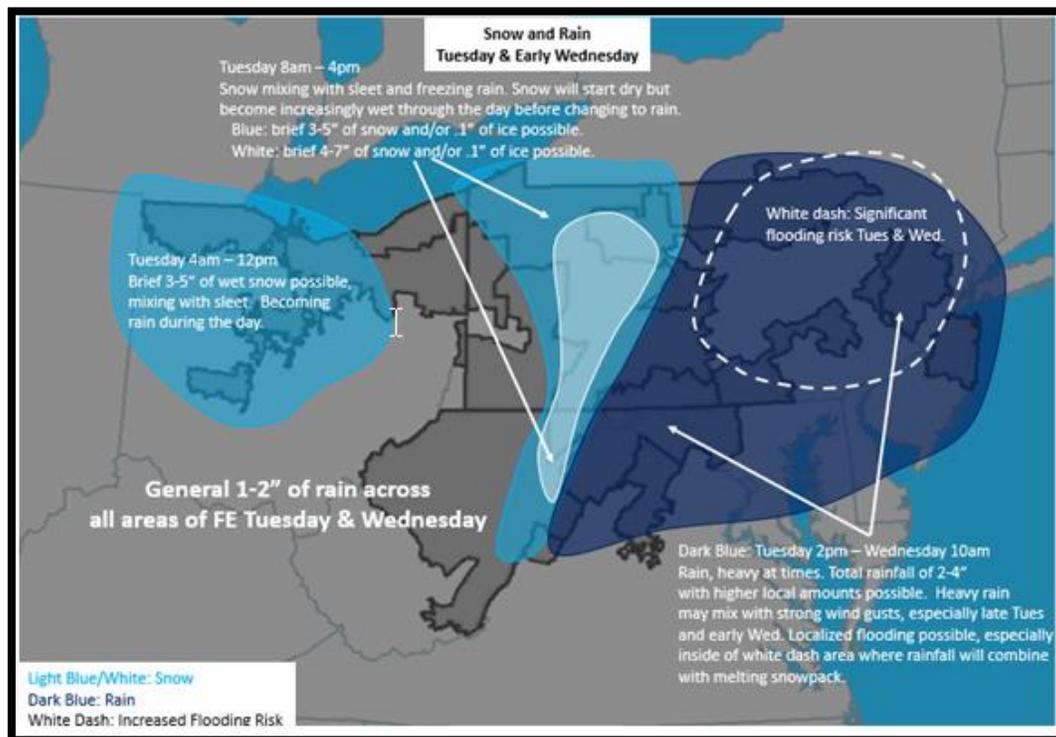

Update:

- Adjusted timing to precipitation forecasts and added potential for heavier snowfall accumulations across western/central PA early Tuesday. Any ice accumulations are expected to be minor at this time.
- Expanded risk of 45+ mph gusts Tuesday in northeast OH.
- Expanded risk of 45+ mph gusts Tuesday into central WV (low confidence).
- Added mention of sporadic 50 mph gusts across most of FE overnight Tuesday and early Wednesday, especially (but not limited to) the passage of the cold front overnight.
- Updated wind forecast for Wednesday, expanding risk of occasional 40 mph gusts into eastern FE and generally adjusting time to earlier in the day.

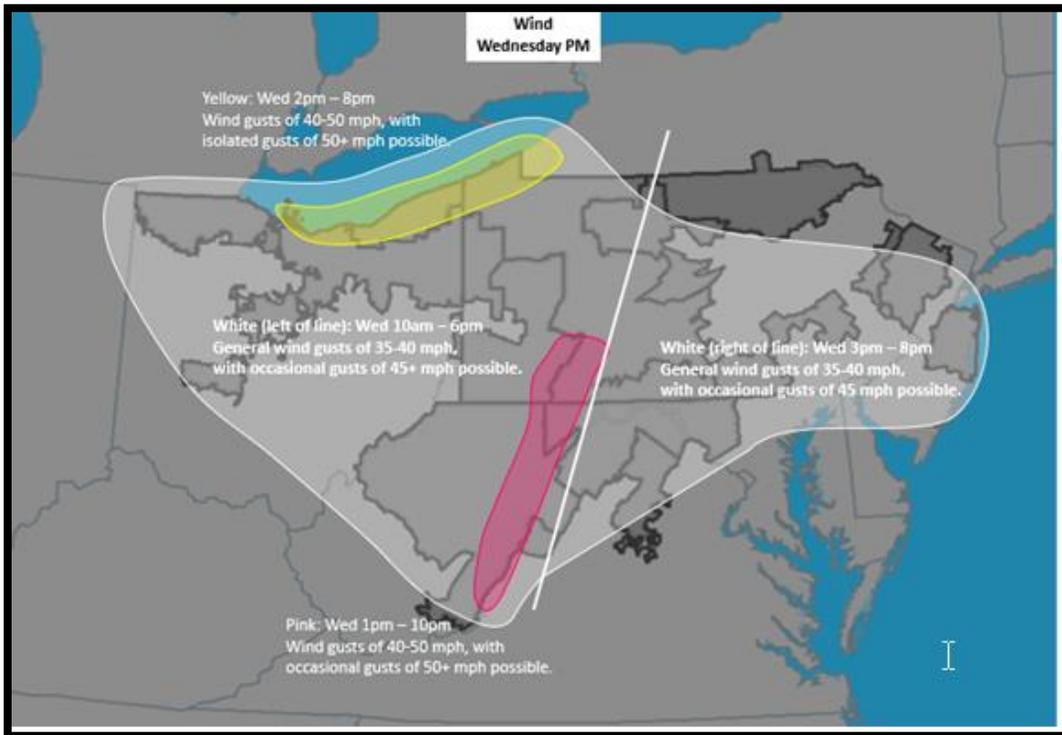

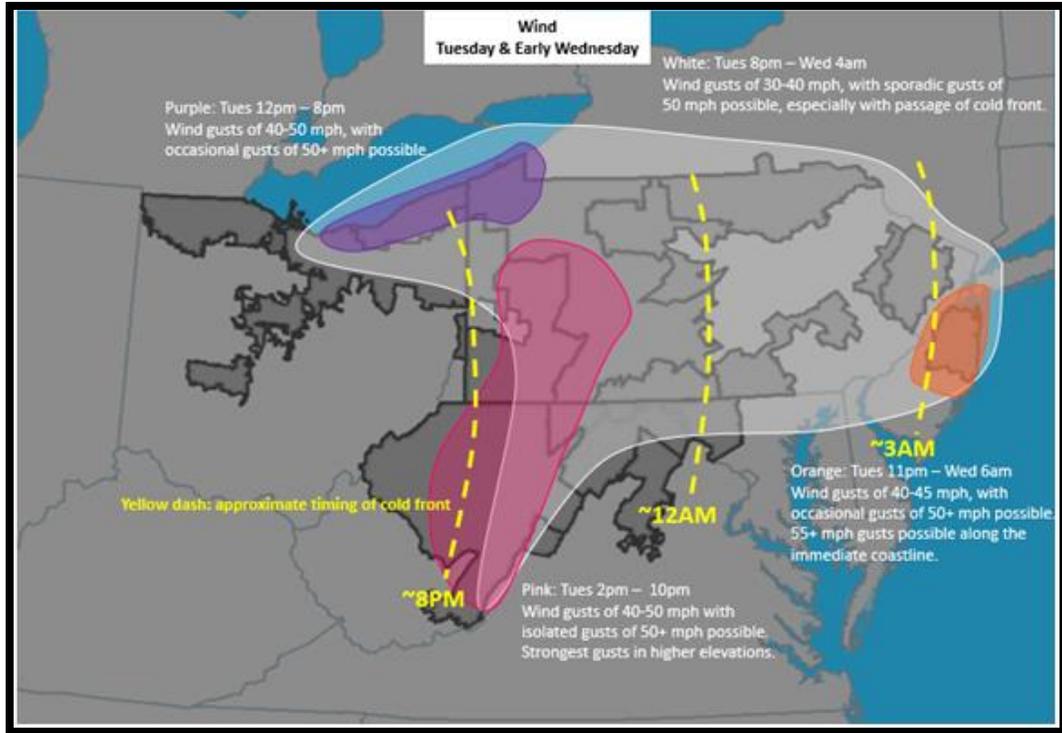

Notes:

- While the details of the wind forecasts for Tuesday and Wednesday are still a bit fluid, generally windy and (very) wet conditions are expected across nearly all of FE beginning Tuesday afternoon and lasting into the day Wednesday.
- Significant risk of flooding continues to exist in eastern FE. This includes potentially substantial river and stream flooding as rain combines with melting snow.

See graphics below for further information.

Penelec Storm Report

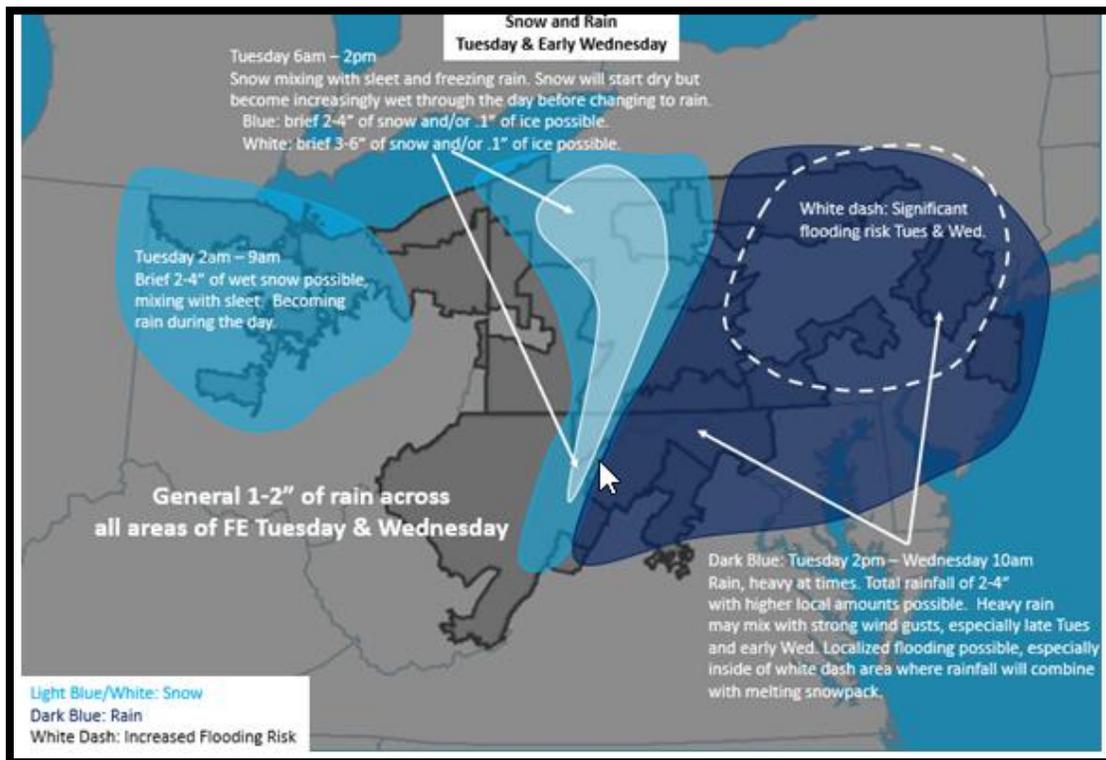

Monday, January 8, 2024 @ 0927

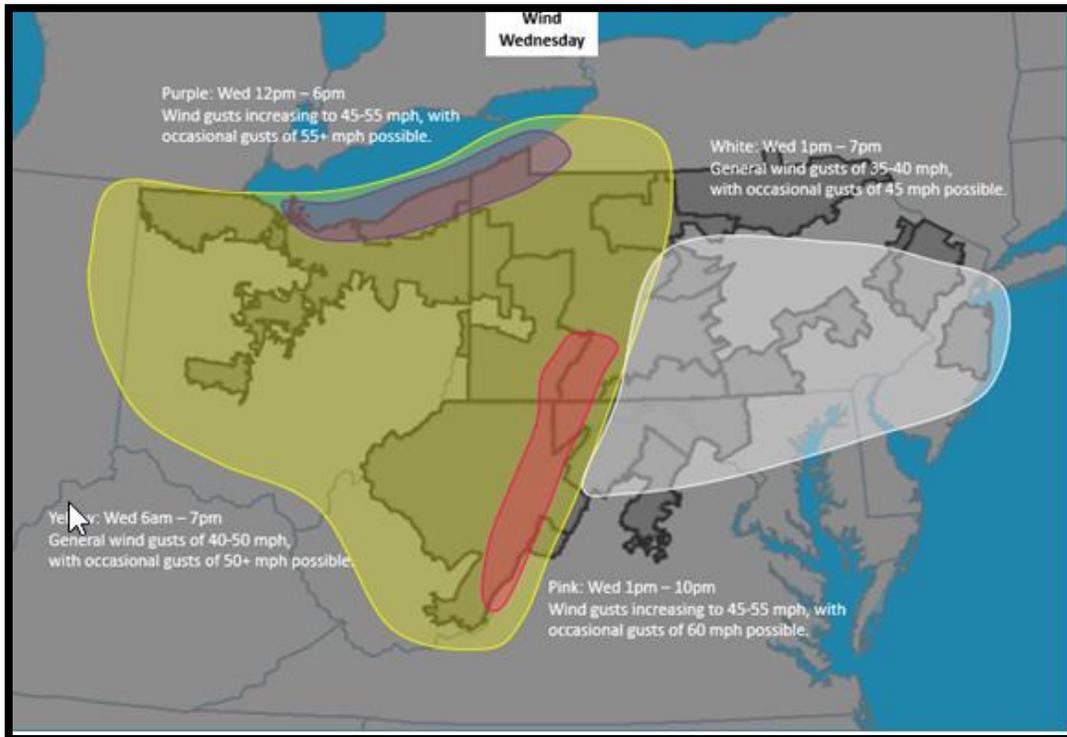

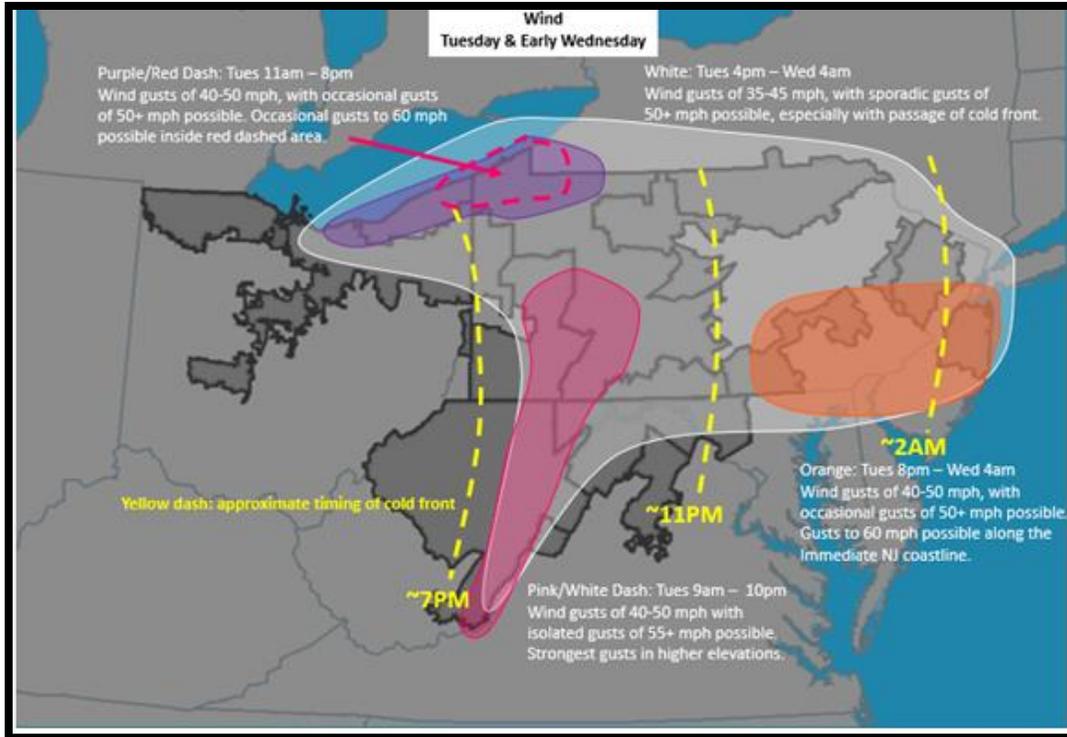

Update:

- General increase in the wind forecast, for both Tuesday and Wednesday.
- Most notably the potential of occasional gusts to 60 mph along the NJ coastline, in areas of northwest/PA and extreme northeast OH, and 55+ gusts along the ridgetops in WV/MD/southern PA.
- Expansion of potential of 40-50 mph gusts into southeastern PA Tuesday night.
- Slight changes to timing across various wind and snow threats.
- Slight changes to snow forecast timing and amounts.

See graphics below for further information.

Penelec Storm Report

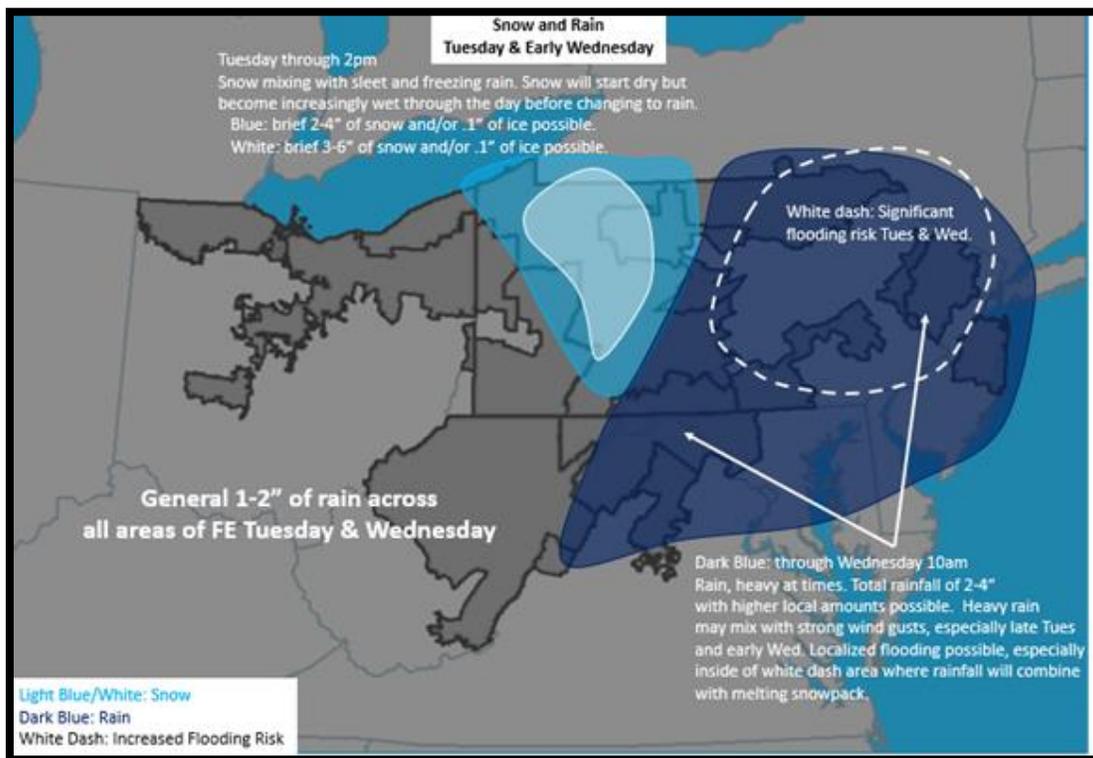

Tuesday, January 9, 2024 @ 0841

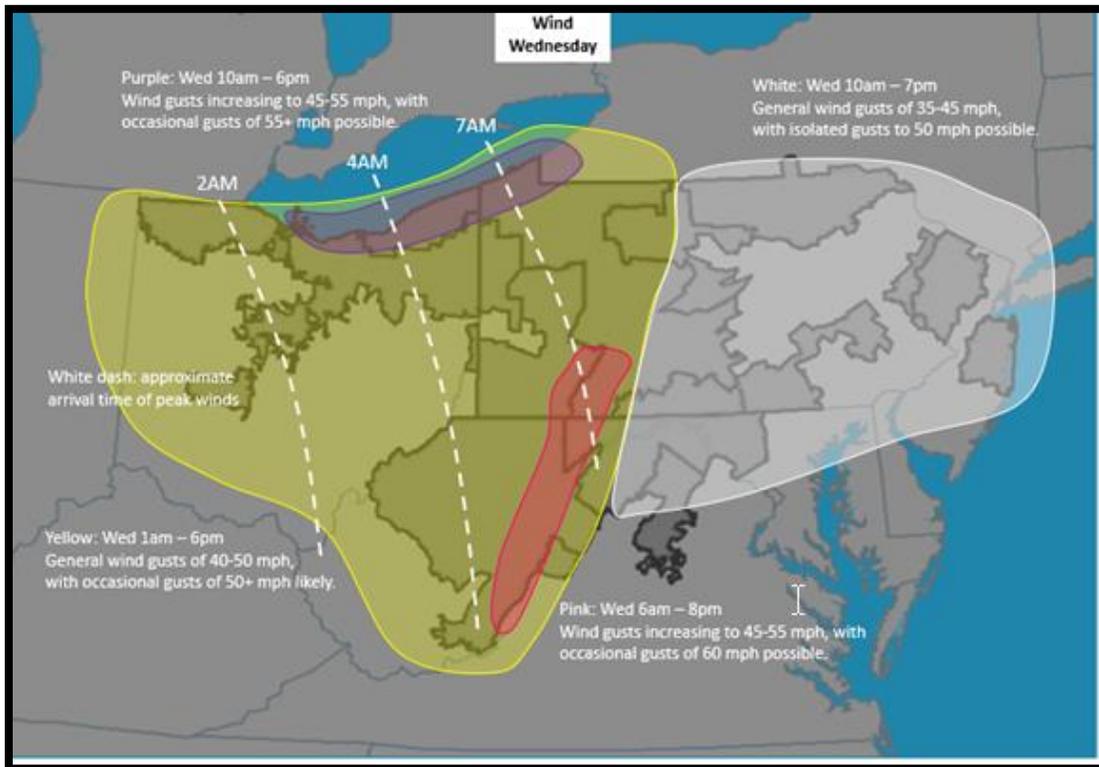

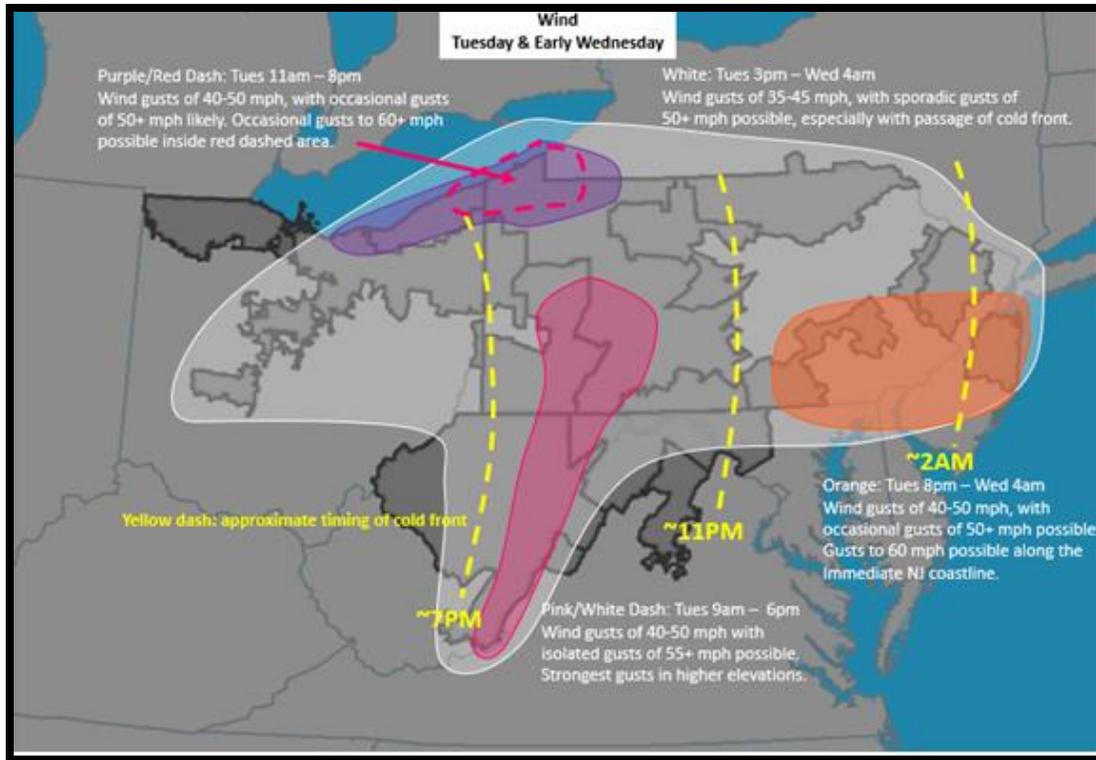

Update:

- Only small adjustments to today’s forecast, with subtle changes to some elements of the wind forecast (magnitudes and timing). This includes expanding mention possibility of a few 40+ mph gusts into central OH and central WV later Tuesday.
- Most notable changes are to Wednesday’s forecast:
- Adjusted timing of arrival of strong wind gusts, moving them several hours earlier on Wednesday.
- Added potential of occasional 50+ mph gusts across all of western FE Wednesday.
- Expanded wind forecast to include all elements of eastern FE Wednesday afternoon.

See graphics below for further information.

**Note: FE Weather is tracking another impactful storm system—with potential for widespread significant wind gusts across the FE footprint—for this weekend (late Friday and Saturday). Separate weather alerts for this system are scheduled to begin Wednesday.

Tuesday, January 9, 2024 @ 1541

Update:

-Updated precipitation graphic to estimate times of rainfall ending overnight tonight. While rough estimates, precipitation will generally end west-to-east this evening. This will generally be followed by a brief lull in wind speeds in most locations.

-Added mention of possibility of brief period (10-15 mph) of strong gusts (55+ mph) along the cold front for areas of eastern PA and NJ this evening. Strong gusts potential will exist with or without thunderstorms (low risk of isolated thunderstorms along the front, but cannot be ruled out).

-Increased maximum wind gust potential for Wednesday in areas of eastern WV, western MD, and southern PA. *Areas of higher elevation will be at risk of 60+ mph gusts tomorrow morning and into the afternoon, with isolated gusts of 70 mph possible in some locations.*

-Slight uptick in the wind forecast for eastern FE Wednesday, where occasional 50 mph gusts now look possible across the region in the afternoon.

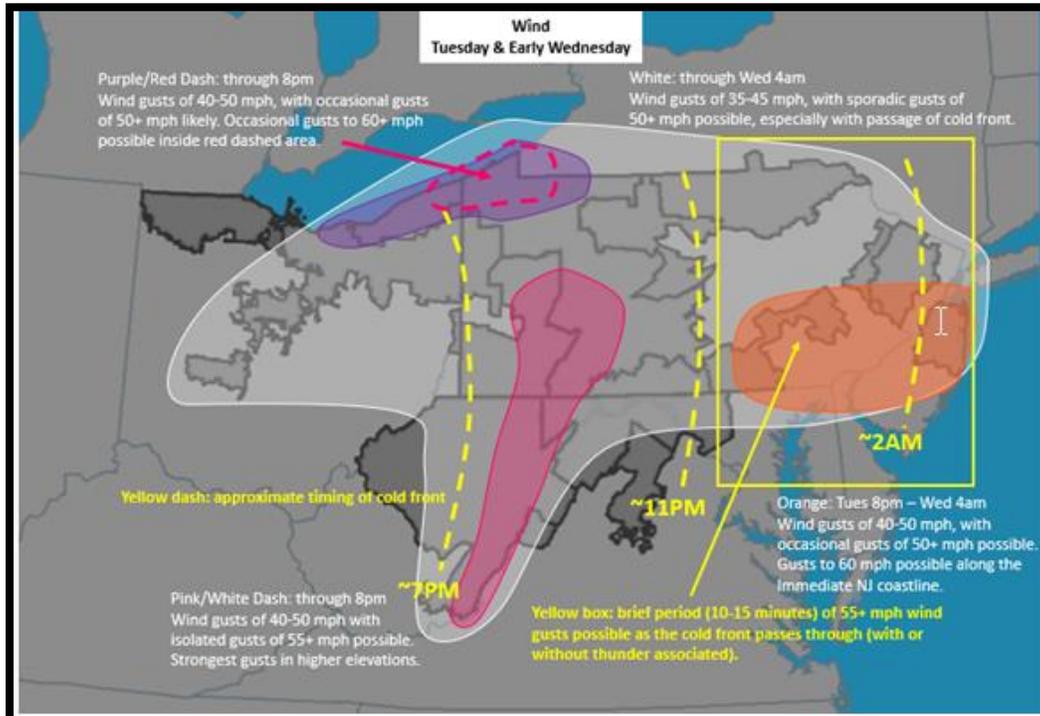

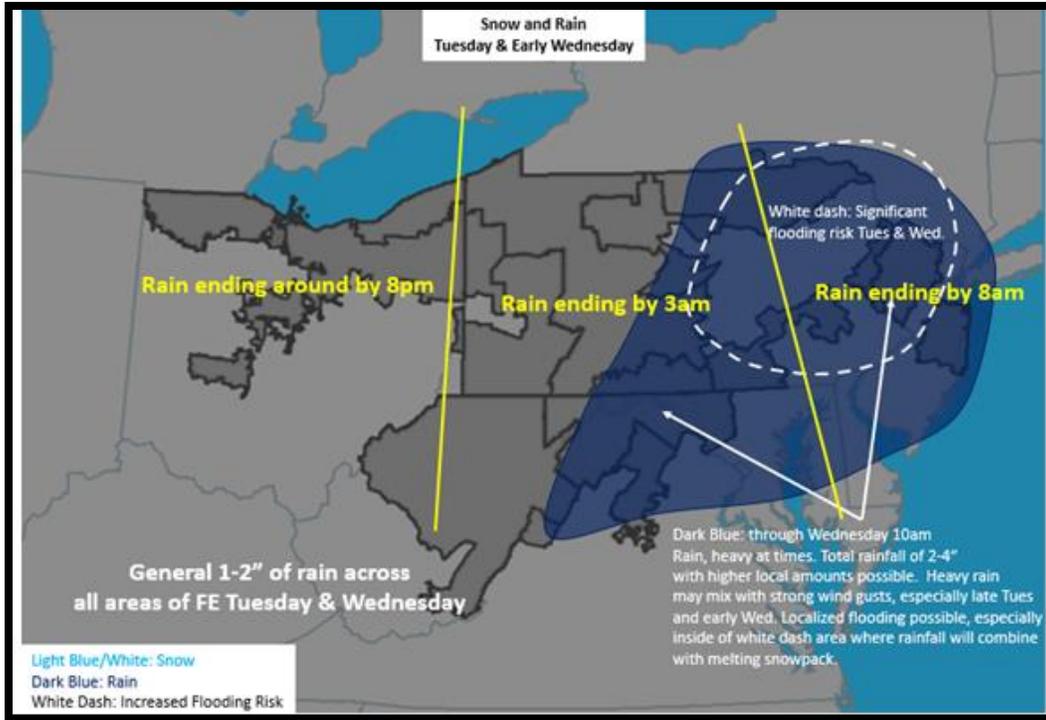

Notes:

-Strong winds tomorrow across western FE (yellow area on third graphic below) will also mix with wet snow showers during the day. General pockets of wet snow accumulations (1-3") are possible across the broad area. Mixed with wind, this could lead to difficult travel and low visibility at times.

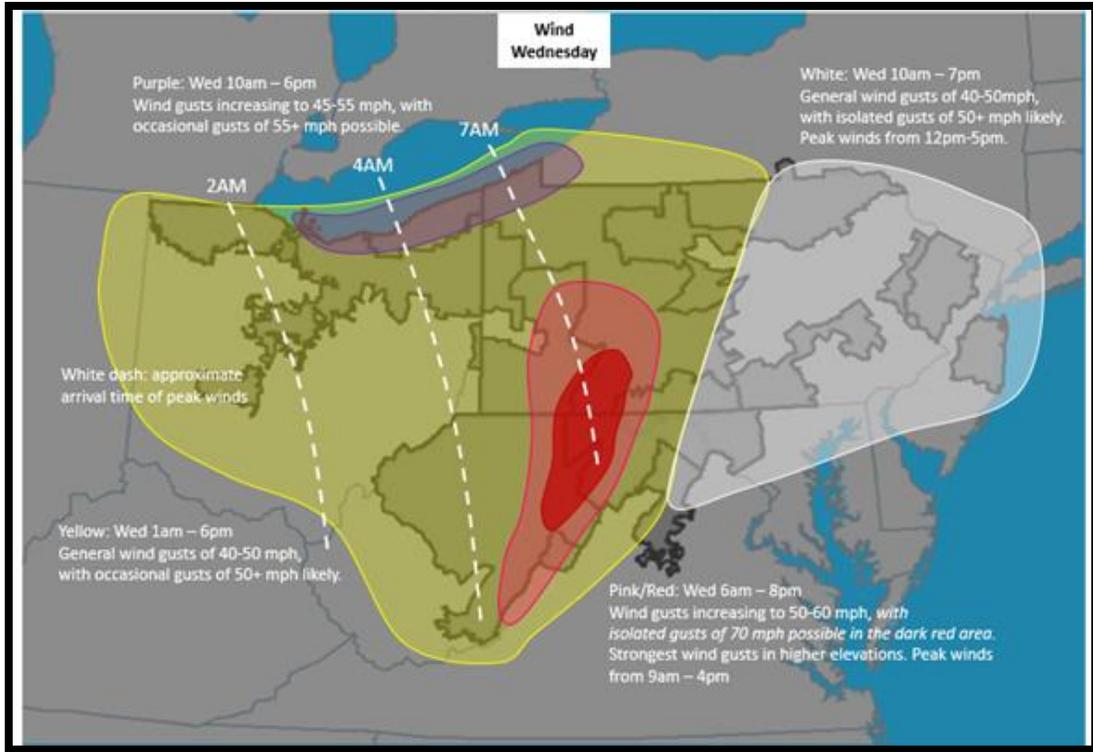

-Any stream and river flooding, associated with heavy rainfall and melting snow in eastern FE, will likely not peak until Wednesday or Thursday.

-FE Weather continues to track another impactful storm system—with potential for widespread significant wind gusts across the FE footprint—for this weekend (late Friday through early Sunday). Separate weather alerts for this system are scheduled to begin Wednesday.

See graphics below for further details.

Penelec Storm Report

Wednesday, January 10, 2024 @ 0846

Update:

- General improvements in the forecast this morning. Slightly reduced expected wind speeds across a bulk of FE for Wednesday. It will still be windy at times, however.
- Adjusted timing of winds, providing ending times for most 40+ mph wind gust.
- Strongest gusts are still expected in elevations of eastern WV, western MD and southern PA during the middle portion of the day.
- Thursday will remain blustery across a good portion of FE, but in general gusts are expected to remain below 40 mph and are therefore there is no alert for Thursday at this time.

See graphics below for further details.
