WATER LINE REPLACEMENT INFORMATION PACKET

Everything you need to know about
your upcoming lead water service
line replacement

WATER LINE REPLACEMENT TIMELINE

This is the sequence of events for your upcoming
water line replacement

AGREEMENT SIGNED AND SUBMITTED

You must sign and submit the agreement included in this packet
in order for us to replace the private portion of your water line.
Once you submit the agreement and service line replacement
has started on your street, we will contact you to schedule an
inspection of your water line connection.

WATER LINE INSPECTION

We will inspect your water line connection to determine
if the portion of the water line you own is made out of
lead. If we find a lead water line, we will determine an
exact date for your water line replacement.

WATER LINE REPLACEMENT

If we find a lead public water line serving
your property, we will replace it, and with
your permission, we will replace the portion
of the lead water line that you own.
Our contractors may be able to use methods
to drill underneath walls and other obstacles
to replace your water line while minimizing
the impact to your property. There is always
a possibility that water line work may
require our contractors to dig a trench
on your property.

SCHEDULED FOR: _____

FLUSH YOUR HOUSEHOLD PLUMBING

You must follow the instructions to flush
your household plumbing following the
construction on your water line. It is important to
flush your plumbing whether or not construction
took place on the portion of the water line that
you own.

TAKE AND SUBMIT A WATER SAMPLE

To test the lead levels of your water following our
construction, you must follow the instructions we provide
in your lead water test kit to take a water sample and
submit it to the lab for analysis.

Pittsburgh
Water & Sewer
Authority

NOT THE OWNER OF THIS PROPERTY? Contact us to provide your landlord's contact information.

NOT THE OWNER OF THIS PROPERTY? Contact us to provide your landlord's contact information.

START THE PROCESS OF SAFER WATER: Sign and mail in the agreement form today.

DO YOU HAVE MORE QUESTIONS? Contact the Lead Help Desk using the email or phone number on the back of this folder.

READY TO GET STARTED?

Before we can begin the process of replacing your lead water
line, you will need to read, sign, and submit the agreement
provided in this packet. We are already planning on replacing
the portion of the lead water line that we own, running from the
water main to the curb. But if we determine that the portion you
own is also made of lead, we also want to replace that portion.
We need your permission because you own the portion of the
water line that runs between the curb and your house.

WHAT YOU NEED TO KNOW

Your water service line may be causing unsafe levels of lead
in the drinking water at your home. If we find a lead public
water line serving your property, we will replace it. With your
permission, we will also replace the portion of the water line
that you own if it is also made of lead. This packet contains
information to help you understand the water line replacement
process, which portion of the water line belongs to you and
which portion belongs to us, and how your lead water line may
be impacting your home.

RE: We need your permission to replace your lead service line

Property ID: «LocationID»

Dear Tenant/Owner,

We are contacting you from the Pittsburgh Water and Sewer Authority because we need your permission to replace your lead service line at « **ServiceAddress**», « **City**», « **State**» «**ZipCode**». If you are not the owner of this property, you should still read this letter, but please contact the Lead Help Desk to provide your landlord's or the new property owner's contact information.

Your water line, like many other old water lines throughout Pittsburgh, may be made of lead. Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can lead to new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.

We are scheduled to perform work starting in 2023 on your street to replace service lines. The reason why we need your permission to replace your service line is because you own a portion of the service line. If we determine that the portion you own is made of lead, we also want to replace that portion. **Without your permission to replace the section of the service line from the curb box to your property, we would be required by the Pennsylvania Public Utility Commission (PUC) to shut off your water service to protect the occupants of your property, until you have replaced this section of service line.**

In addition to the benefits to your water quality and your health and safety, replacing your lead service line can also potentially improve your property value, and help you to be able to sell your property in the future. Plus, if your property has a lead service line, that means it is already old, and more likely to break and cost you money to repair it in the future.

SIGNING THE AGREEMENT

In this packet, we have included an agreement that authorizes the Pittsburgh Water and Sewer Authority and our contractors to perform the construction required to replace the portion of the water service line that you own. **Please review and return this agreement as soon as possible. You must sign and return the agreement to receive a full lead service line replacement.** If you do not return a signed agreement and your service line is lead, we cannot replace your lead service line and will be required to terminate water service unless you have the service line replaced at your expense. After we receive the signed agreement, one of our representatives will contact you to begin the replacement process by scheduling an inspection of the service line connection inside your property.

What to Expect

If you allow us to replace the portion of the service line which you own, there will be a few times when our representatives or contractors will need to enter your property. First, before the replacement, one of our representatives must inspect your service line connection inside your property. This connection is typically located in your basement. During this visit, we will discuss options and potential obstacles to replacement before doing any work. Following this visit, we will determine an exact date for your service line replacement.

During the replacement itself, our contractors will need to enter your property for several hours. You will need to arrange for somebody 18 years old or older to be present during this time. Finally, once the work is complete the Allegheny County Health Department will need to inspect the work we have completed.

Our contractors will make every effort to minimize disruption to your property. They have methods to drill underneath walls and other obstacles, so they can replace your service line with limited impact to your property. During our construction, we may be required to make minor improvements to your internal plumbing. We will also restore your sidewalk as part of this work.

Please note that the Pittsburgh Water and Sewer Authority is not responsible for restoring private property, such as lawns and driveways, that may be disrupted during the service line replacement. Details on property

restoration can be found in the authorization included in this packet. Remember, before any construction starts, you can opt out of the portion of the service line replacement that takes place on your private property. However, if you do not replace your lead service line, **we would be required by the PUC to shut off water service to your property.**

Additional information regarding construction impacts as well as instructions for reducing your exposure to lead are provided in this mailing.

After the Water Line Replacement

Following the replacement, you will receive a water test kit and a certified lead water filter and pitcher at no cost. We will provide you with instructions for how to submit your water sample for testing. After you submit your water sample, we will let you know if you need to take any more steps to minimize your exposure to lead.

Contact Us

If you have any questions about this lead service line replacement process, please contact our Lead Help Desk at 412.255.8987 Monday through Friday between 8:00 a.m. and 5:00 p.m. or email us at LeadHelp@pgh2o.com.

William J. Pickering

Thank you for working with us to remove harmful sources of lead from our drinking water system. We appreciate your patience and coordination as we perform this important work.

Sincerely,

William J. Pickering
Chief Executive Officer

Enclosures

AUTHORIZATION FOR REPLACEMENT OF THE LEAD SERVICE LINE ON YOUR PROPERTY

RESPONSE REQUIRED

The Pittsburgh Water and Sewer Authority ("the PWSA") is offering certain property owners with lead service lines, replacement of their lead service line from the water main to the curb stop and from the curb stop to the meter or to interior plumbing, at no cost to the property owner.

Under the PWSA's Rules and Regulations, the PWSA owns and maintains residential service lines of 1 inch in diameter or less from the water main to and including the curb stop. The property owner owns and is responsible for the maintenance of that portion of the water service line running from the curb stop to the meter at the premises being served with PWSA water. Commercial customers own and are responsible for maintenance of the entire service line. As part of our work on your street, for residential properties, the PWSA, subject to available funding, will be (1) replacing service lines for which the PWSA has maintenance responsibility (from the water main to the curb stop) and (2) replacing the portion of the lead water service line owned by the property owner (from the curb stop to the water meter or to interior plumbing), when the property owner signs this agreement. (A Service Line Schematic is attached as Exhibit A.) For commercial properties, subject to available funding, PWSA will only replace the lead water service line owned by the property owner if we need to replace a portion of the service line as part of our work, and when the property owner signs this agreement.

Please return your agreement as soon as possible.

If PWSA determines, in its sole discretion, that replacement of the portion of the lead water service line owned by the property owner at a particular property or related interior plumbing modification is not technically feasible safe and secure conditions are not present, or will result in excess expense, due to conditions such as length, terrain, obstructions, structures, pavement, trees, or other utilities, PWSA may exclude such property from the Program and not replace the remaining portion of the lead water service line.

Property owners, or the owner's legal representative, must give their authorization by signing this Authorization for Private Side Replacement of Lead Service Line Form ("Form"). Following is a description of responsibilities of the PWSA and property owners who want to have their service line replaced:

The PWSA's Responsibilities:

- As part of its Program and with the property owner's signed Form, the PWSA, subject to the terms and conditions set forth in this Form, will (1) replace the service line from the water main to the curb stop, (2) replace the service line from the curb stop to the water meter (for meters inside the property) or to a point within 1-foot inside the outer foundation wall of the property (for meters outside the property), (3) backfill any excavation from the curb stop to the property, and (4) make interior plumbing modifications related to service line replacement, as required by the Allegheny County Health Department (limited to installation of a backflow preventer and water expansion tank), all at no cost to the property owner.
- The PWSA's contractor or sub-contractor will be responsible for obtaining all necessary permits.
- The PWSA will require by contract that the contractor and/or sub-contractor are insured.
- The PWSA's contractor or sub-contractor will be responsible for providing all pipe, fittings, miscellaneous material, equipment, tools, and labor to (1) replace the service line from the curb stop to the water meter or to interior plumbing, (2) backfill any excavation from the curb stop to the property, and (3) make any interior plumbing modifications related to service line replacement included in the Program. All replacement and repair debris will be removed from the work area by PWSA's contractor or sub-contractor upon completion of work.
- The PWSA's contractor or sub-contractor, before any work is done, will examine the areas of the property that will be disturbed by construction and provide a list of related work that may need to be done by the property owner prior to or after the service line replacement.
- The PWSA or its contractor may take interior and exterior photos before and after work begins.
- If the service line or any plumbing connected to it is damaged during the replacement of the service line and the property owner notifies PWSA of the damage within two years of installation of the new service line, PWSA's contractor will be responsible for repairing or replacing the damaged service line and any damaged plumbing connected to it. PWSA will be responsible for normal maintenance of the part of the service line from the curb stop to the meter for a period of two years from the date of installation. PWSA will not be responsible for damage to the service line caused by the property

owner, any tenant, any resident, or any third party. PWSA will otherwise have no maintenance responsibility or any other responsibility for (1) the part of the service line from the curb stop to the water meter or from an outside meter into the property or (2) interior plumbing modifications.

Property Owner's Responsibilities:

- Property owner recognizes that during the replacement and any maintenance of the service line there will be an interruption of water service to the property.
- Property owner or designee, at least 18 years in age, must be at the property on the date and time scheduled for the contractor to perform the work.
- Property owner must provide reasonable, safe, secured, lighted, and unencumbered access to the water meter and to the water service piping inside the property, including access to the wall or floor area where the water service line enters the building, and moving any items blocking access such as boxes, furniture, washers, dryers, etc. If the property owner does not provide these accommodations, PWSA reserves the right to not complete the lead service line replacement and will terminate water service at the property.
- If the meter and/or service line is located behind a finished wall, or under a finished floor such that gaining access will disrupt the room finish, the property owner is responsible for removing the obstruction and establishing the necessary access to perform the work. Restoration of the disturbed area upon completion of the service line replacement, any plumbing modifications, and maintenance is the property owner's responsibility.
- The property owner is responsible for final grading, seeding, and the restoration of exterior landscaping, hardscaping, or structures on the property that impede the replacement of the water service or maintenance, or will be disturbed as part of the service line replacement maintenance. This includes items such as steps, patios, retaining walls, specialty or tinted concrete, stone or brick walls or paving, structures of any type, grass, trees, shrubs, bushes, and flowers. Replacement and/or restoration of any such exterior landscaping, hardscaping, or structures on the property will be the responsibility of the property owner.
- After installation of the new service line, maintenance of the service line from the curb stop to the water meter and any interior plumbing modifications remain the responsibility of the property owner (except for PWSA's limited responsibility for normal maintenance of private service lines for two years, as provided above).
- The property owner is responsible for performing the required flushing of the property's plumbing system as described in the PWSA's Flushing Instructions for Replacement of Service Lines (attached to this Form as Exhibit C) after completion of the work.
- The property owner agrees to take tap water samples and return them to the laboratory in accordance with the Tap Water Sample Instructions for Replacement of Service Lines (attached to this Form as Exhibit D).
- For service lines for which PWSA will provide maintenance, as described above, the property owner agrees to (1) promptly notify PWSA of any conditions that may require maintenance of the service line, (2) promptly notify PWSA before any sale or transfer of the property and (3) provide to the purchaser or transferee of the property, before a sale or transfer, a copy of this Form.

I hereby authorize the PWSA to (1) replace the service line from the water main to the curb stop, (2) replace the service line from the curb stop to the water meter (for meters inside the property) or to a point within 1-foot inside the outer foundation wall of the property (for meters outside the property), (3) make any included interior plumbing modifications and (4) provide any included maintenance of the service line in or on my property in accordance with the terms and conditions set forth in this Form and I agree to all of the terms and conditions of this Form.

I agree that by signing this Form that the PWSA is permitted, but not obligated, to replace the service line and make any included interior plumbing modifications.

I certify that I am the owner, or the legal representative for the owner, of the below service address property and have the legal right and authority to execute this Form and to grant the PWSA the rights set forth in this Form. I hereby grant to the PWSA and its contractors or sub-contractors the license and the right to enter this property and perform such inspections, testing, construction and repairs as determined reasonably necessary for (1) the replacement of my service line and any related interior plumbing modifications and (2) any included maintenance of the service line. I certify that if there are any tenants or other residents of the property other than the undersigned, I will provide them advance notice of the scheduled work and provide a copy of the PWSA Flushing Instructions for Replacement of Service Lines to them.

COMMUNITY LEAD RESPONSE

I agree that I am responsible for ensuring that the property is in safe and sanitary condition and that the necessary plumbing shall be accessible for workers to complete the replacement of the service line and any required interior plumbing modifications.

I understand that if the PWSA determines that safe and sanitary conditions are not met, or that the plumbing is not accessible, replacement will not be done and water service to my property will be terminated.

YOUR RESPONSE IS REQUIRED: You must sign and submit this agreement in order for us to replace your service line. You own the portion of the service line on your property, and we will not replace it without your consent. If you DO NOT wish for us to replace this portion of your service line, you may decline using the form below. If you decline this work and have a lead service line, we are required to terminate your water service **unless you have the service line replaced at your expense.**

Use the enclosed envelope to send us your response.

DECLINE PRIVATE LEAD LINE REPLACEMENT:

If you DO NOT want the PWSA to replace your lead water service line when it replaces the system owned part, check this box, sign here, and return this form. Declining the private water line replacement will not impact any PWSA plans to replace the public portion of your water line. Note that partial water line replacement is prohibited because it may lead to increased levels of lead in your water.

O I understand that declining the private water line replacement may shut off service to my property until a time when I have replaced the portion I own.

Why have you decided to opt out?

EXHIBIT B
COVID-19 Health Precautions

Given the situation related to the novel coronavirus (COVID-19), PWSA understands that you may be concerned about workers entering your property. PWSA and our contractors are following strict guidelines established by the United States Centers for Disease Control and Prevention (CDC) and the Pennsylvania Department of Health related to the pandemic. The following measures are to protect the health of our employees, contractors, and you, our customer. As long as it is recommended by the CDC and PA Department of Health, all our work will occur under the following guidelines:

1. All workers will undergo daily health screenings prior to reporting to work.
2. All workers will maintain social distancing in the execution of their work, including when communicating with our customers.
3. All workers will wear face masks during their work inside your residence.
4. All surfaces our workers are in contact with will be sanitized prior to leaving the work site.

The safety of *everyone* associated with our work is our number one priority. We will strictly follow these guidelines while completing the critical work of replacing your lead water service line.

EXHIBIT C

Flushing Instructions

HAZARDS RELATED TO LEAD SERVICE LINE REPLACEMENT AND YOUR OPTIONS

Even though we are replacing the lead service line at your property, disturbance during work may temporarily increase lead levels. These flushing instructions are an additional method to minimize lead in your property's water supply. Do not consume any tap water or open hot water faucets during the following procedures.

Immediately after PWSA performs their replacement work, flush all faucets using these steps:

Throw away any ice in your freezer. If you have an automatic ice maker, shut it off.

Tip: Do not use any filtered water from your refrigerator or any other source until you complete the flushing.

Unscrew and remove the aerators from all of your sinks and taps.

Tip: If your aerator is difficult to remove, you may need to use a pair of pliers.

Once your aerators are removed, separate the parts and remove any debris. Soak the parts in white vinegar and scrub them with a brush.

Starting at the lowest level of your property and working your way up, fully turn on all the cold water taps in your sinks, tubs, and showers.

Tip: Make sure to turn on any taps and hose spigots on the outside of your property as well.

After you turn on the last tap, allow the water to run for at least 30 minutes.

Starting at the highest level of your property and working your way down, shut off each of your water taps.

EXHIBIT D

Water Sample Test Instructions

PWSA asks the property owner to collect a water sample after the line is replaced. Follow the instructions for sampling the water and send to the lab as instructed in the water sample kit.

Post-Construction Water Sample

After replacing the lead water service line at your property, PWSA requires the Owner or Occupant to sample the water in your property. In addition, PWSA may ask you to resample the water if your initial sample shows lead levels above the Action Level of 15 parts per billion set by the U.S. Environmental Protection Agency and the Pennsylvania Department of Environmental Protection. This will help to inform you and PWSA about the quality of drinking water in your property after lead service line replacement.

Sample Collection Instructions

Three to six months after replacement you will be sent a test kit. Before taking a sample of your water to send to PWSA, water must sit stagnant for six (6) hours. This means that you should not use any water for six hours. Overnight or while you are away at work is a good time to allow the water to sit in your pipes. Collect the water sample from a tap from which you would normally drink (for example, a kitchen sink). Run the water until there is a significant change in temperature. Collect samples in the bottles provided. Follow directions included with the sample kit and return to PWSA using the pre-paid postage.

THE SHARED RESPONSIBILITY OF LEAD SERVICE LINE REPLACEMENT

Este informe contiene información importante acerca de su agua potable.
Si necesita ayuda para traducir este documento, por favor comuníquese con nuestro equipo de Servicio al Cliente al 412.255.8987 y será conectado con un servicio de traducción.

Let's Work Together to Improve the Safety and Quality of Your Drinking Water

A lead water line may be causing unsafe levels of lead at your property. Your property is eligible to participate in the Pittsburgh Water and Sewer Authority's Community Lead Response program.

If you sign and submit the lead service line replacement agreement, we will replace the portion of your service line at no additional cost to you. However, because the portion of the water line is on your property, you have certain responsibilities that you must complete in order to make the replacement possible, and to improve the quality and safety of your water.

Remember, declining the lead service line replacement will shut off service to your property until a time when you have replaced the portion you own.

Please contact the Lead Help Desk at LeadHelp@pgh2o.com or 412.255.8987 with any questions.

PROPERTY OWNER RESPONSIBILITIES

- Complete and return the agreement
- Be present during construction, or designate somebody else at least 18 years old to be present
- Provide contractors with clear access to the water meter and service line, both at designated inspection dates, and on the designated water line replacement date
- Allow the Allegheny County Health Department to access your property after the work is complete to conduct a final inspection of the work
- Replace any outdoor landscaping, hardscaping, or structures that are disturbed during construction. (We will make every effort to minimize disruption, but you are ultimately responsible for your property's final appearance)
- Flush out your interior plumbing after construction is complete, following the instructions provided
- Collect and submit a water sample three to six months after construction following the instructions provided
- Follow any additional instructions for testing water after your initial sample is evaluated by PWSA
- Notify PWSA within 30 days if the service line or any plumbing connected to it is damaged during construction

PWSA'S RESPONSIBILITIES

- Examine water service line and connections to determine whether portions are made of lead
- Require all contractors to obtain permits and carry insurance
- Prior to completing any construction, examine any areas of property that may be disturbed by construction and provide you with a list of related work that you may need to complete before, during, or after construction
- Replace the service line that is made of lead
- Make any required interior modifications associated with the service line replacement required to meet the plumbing code
- Take interior and exterior photos of the property before, during, and after to ensure safety and completeness of work
- Provide a lead test kit to sample water three to six months after construction
- Repair or replace any damaged service line or connected plumbing that is reported to us within 30 days of construction

The Pittsburgh Water and Sewer Authority reserves the right to exclude a property from the program due to construction feasibility or excessive cost concerns.

Property owners interested in participating in the Community Lead Response program must return the signed Agreement within ten days. Please review the enclosed agreement for additional details and requirements, including an explanation of the Pittsburgh Water and Sewer Authority's restoration policy.

FREQUENTLY ASKED QUESTIONS ABOUT LEAD IN DRINKING WATER

Este informe contiene información importante acerca de su agua potable.
Si necesita ayuda para traducir este documento, por favor comuníquese con nuestro equipo de Servicio al Cliente al 412.255.8987 y será conectado con un servicio de traducción.

1. Where does the lead found in tap water come from?

Lead enters drinking water through corrosion in lead pipes or plumbing materials. The primary source of lead in Pittsburgh Water and Sewer Authority water is the old water service lines that connect properties to the water main in the street. A residential lead service line is a joint responsibility—the Pittsburgh Water and Sewer Authority owns the portion of the water line that runs between the water main and the curb, and homeowners own the portion that runs between the curb and their homes. Commercial property owners own the entire service line.

We estimate that approximately 12% of homes in Pittsburgh still have a lead water service line.

Aside from lead water service lines, lead can also enter the water through:

- Interior lead pipes
- Interior galvanized iron pipes (especially if there is or was a lead water service line running to the property)
- Interior copper pipes with lead soldered joints
- Interior plumbing fixtures

2. What can I do to reduce risk of exposure to lead?

If you know or suspect that you have a lead service line or plumbing, there are ways to reduce your exposure to lead in your drinking water:

- Run your water to flush out lead. If you haven't used your water for several hours, run your cold tap for one minute before using your water for cooking or drinking. If your home has a longer service line, this may require flushing for a longer period of time. Using toilets, washing clothes, showering, or doing dishes before you drink from your tap are all ways that you can flush your interior plumbing without wasting water.
- Use cold water for cooking and preparing baby formula. Lead dissolves more easily in hot water. Do not drink, cook with, or make baby formula using hot water.
- Do not boil water to remove lead. Boiling water does not remove or reduce lead exposure.
- Look for alternative sources or treatment of water. Purchase a NSF Water filter that is certified to remove lead. Customers can also choose to drink bottled water.
- Identify if your plumbing fixtures contain lead. Lead check swabs are available at hardware stores to help you detect lead on plumbing surfaces, such as solder and pipes. You can also go to lead.pgh2o.com to see our infographic on identifying lead pipe materials in your home. Consider replacing pipes and fixtures that contain lead.
- Test your water for lead. Call us at 412.255.8987 or go to pgh2o.com/leadform to request a free lead test kit. This service is available to residential homes that receive drinking water from PWSA.
- Get your child's blood tested. If you think that your child may have been exposed to lead, talk to your doctor about testing your child. Allegheny County requires all children to be tested for lead exposure at approximately 9-12 months and again at 24 months.

FREQUENTLY ASKED QUESTIONS ABOUT LEAD IN DRINKING WATER

3. Why do some properties have high levels of detected lead?

Our corrosion control treatment reduces lead levels across our water service area. However, some homes may still show elevated lead levels through water sampling. This can be caused by low water usage at a property. When water is not consistently run through lead service lines or interior plumbing, orthophosphate does not have a chance to coat the inside of the pipes. Follow the tips for reducing lead exposure listed above to properly flush your pipes. You can also use filters and pitchers if necessary.

4. How does the Pittsburgh Water and Sewer Authority test homes for lead?

The Environmental Protection Agency (EPA) requires that we regularly request water samples from at least 100 homes that were determined to have, or are expected to have, a lead water service line or plumbing. Results from the most recent test can be found at lead.pgh2o.com/lead-data.

5. What's next?

We modified our water treatment process to reduce corrosion in lead pipes throughout the entire water system using orthophosphate. A extensive study completed by our water quality team showed that orthophosphate will be most effective at reducing corrosion from lead pipes. This will improve water quality for all customer with lead service lines while we work to remove all lead lines from the system. Orthophosphate is widely used across the country to reduce lead in water.

The Community Lead Response program is replacing thousands of lead service lines throughout our water distribution system at no direct cost to our customers. Changes to state law allow us to perform lead service line replacements on private property as part of the replacement program, preventing potentially harmful partial lead service line replacements.

Resources

TERMINATION RISKS AND RESOURCES FOR TENANTS

Este informe contiene información importante acerca de su agua potable. Si necesita ayuda para traducir este documento, por favor comuníquese con nuestro equipo de Servicio al Cliente al 412.255.8987 y será conectado con un servicio de traducción.

Important notice to tenants

The Pittsburgh Water and Sewer Authority (PWSA) will shut off water service at locations where the property owner has failed to allow PWSA to replace a private lead service line. To help ensure safe drinking water at properties, PWSA will replace the lead service line for free; however, we need the landlord's authorization. **If your landlord does not sign the agreement to allow us to replace the lead service line, your water service will be shut off.**

Contact your landlord as soon as possible to ensure that they sign and return the agreement allowing PWSA to replace the private lead service line. Property owners are eligible for a free lead service line replacement, even if the PWSA bill is overdue.

Resources

If you are a tenant, and your landlord refuses to sign the agreement, assistance may be available through the following organizations:

Door Hangers

Pittsburgh
Water & Sewer
Authority

Important Health Notice: Work to Occur on Your Water Service Line

The Pittsburgh Water & Sewer Authority has determined that the public portion of your water service line may be made of lead. For your safety, we plan to replace your public water line within the next two weeks.

The private portion of your water line may also be made of lead. If this is the case, we want to replace that portion, too. Since you own the private portion of the water line, we need your permission to complete this part of the project.

We need to schedule an appointment with you as soon as possible to discuss the work that will occur. We will be performing replacements on your street for approximately two weeks.

Today's Date: _____

Please contact our Lead Help Desk at 412.255.8987 as soon as possible to begin the process of scheduling a full lead service line replacement. If lead was found on your private lead service line and you do not give us permission to replace it, we will be required to terminate water service.

Pittsburgh
Water & Sewer
Authority

48-Hour Notice

The Pittsburgh Water and Sewer Authority will be performing work on your water service lines in approximately two days.

DATE OF WORK: _____

TYPE OF WORK:

- ☐ Service line inspection
- ☐ Public service line replacement

Following the completion of the work, we will leave a door hanger with the inspection results and a description of the type of material used when replacing the water service line, if applicable.

This work may impact the quality of your drinking water. Following the completion of our work, you will need to completely flush your household plumbing. Instructions for flushing your plumbing will be provided when the work has been completed.

Pittsburgh
Water & Sewer
Authority

Important Health Notice:

Water Service Line Inspection Results

The Pittsburgh Water and Sewer Authority has just completed an inspection to determine whether the public and/or private portion of your water service line contains lead pipes.

TODAY'S DATE: _____

INSPECTION RESULTS:

- ☐ No lead found
- ☐ Lead found on public side
- ☐ Lead found on private side - **If you have not already, call to schedule an appointment to discuss the work that will occur**
- ☐ Inspection unsuccessful - **Call to schedule an appointment to complete successful inspection.**

If lead was found on your private lead service line and you do not give us permission to replace it, we will be required to terminate water service.

PLEASE FLUSH YOUR HOUSEHOLD PLUMBING IMMEDIATELY.

Our inspection may have caused debris to enter your water service line. Follow the attached instructions or visit lead.pgh2o.com for video instructions to completely flush your household plumbing before using the water for drinking or cooking.

Pittsburgh
Water & Sewer
Authority

Important Health Notice:

Water Service Line Replacement Work Completed

The Pittsburgh Water and Sewer Authority replaced the lead water service line at your property.

Address: _____

Date of Replacement: _____

WE REPLACED:

- ☐ Public (PWSA's portion)

The public portion of your water line is now made of _____

- ☐ Private (homeowner's portion)

The private portion of your water line is now made of _____

If you have further questions, please contact the Lead Help Desk.

REMEMBER TO FLUSH YOUR HOUSEHOLD PLUMBING

For your safety, you must flush your household plumbing immediately. Before consuming any tap water, follow the instructions provided on the flushing instructions door hanger.

Pittsburgh
Water & Sewer
Authority

3-MONTH POST-CONSTRUCTION SAMPLE COLLECTION INSTRUCTIONS

Dear Water Customer,

Pittsburgh Water & Sewer Authority (PWSA) recently replaced your lead water service line (the pipe which connects your house to the water main in the street) to your home.

120Water has been contracted to assist in testing your water after replacement of your lead service line and answer any questions you might have. You are receiving this kit because your lead water service line has been replaced. You will use the enclosed bottle(s) to collect a water sample for testing and then utilize the prepaid shipping label to mail the sample to a state certified water quality laboratory for lead analysis. This sample is being collected to determine the lead levels in your water following your water service line replacement. The test results will be mailed directly to you **within 10 days** of the laboratory analysis of your sample.

IMPORTANT: Collect your water sample from the cold faucet in your kitchen after your water has been sitting unused for **6 hours, but no longer than 24 hours**. We recommend collecting your sample either first thing in the morning or in the evening upon your returning home. *Samples must be taken from a kitchen or bathroom tap used for drinking and/or cooking.* Do not remove the aerator prior to sampling. If there is a filter on your kitchen faucet, please collect your sample from another tap.

If you have any questions about your test kit or sampling process, please contact 120Water at 800-674-7961 or Support@120Water.com. If you have any questions about PWSA's drinking water, please contact the Lead Help Line at 412-255-8987 or LeadHelp@pgh2o.com.

Scan the QR Code to the right with your phone to watch a short sampling tutorial provided by 120Water.

STEP ONE I Kitchen tap is recommended. After your water has been unused for a minimum of 6 hours, you are ready to collect your sample.

STEP TWO A I Place bottles in order from 1–5 next to the kitchen or bathroom sink. Remove the caps from bottles 1 and 5 (caps are not provided for the other bottles) and place them next to their corresponding bottle. Do not touch the inside of the bottles or caps.

STEP TWO B I Place the sample bottle labeled “1st” below the faucet and then turn on the cold-water tap. If you have a single handle faucet, turn it fully to the COLD side. Fill the first sample bottle completely and be prepared to immediately start filling the next bottle once the first bottle has been filled. Repeat this process until all bottles are full, filling the sample bottle labeled “5th” last. **DO NOT** turn off the faucet in between filling sample bottles. Tightly cap the 1st and 5th bottles. Empty the other bottles out in the sink.

STEP THREE I Completely fill out the Chain of Custody area labeled “*To Be Completed by the Resident.*” Please note, we must have all the information filled out or your sample will not be analyzed.

STEP FOUR I Place all the bottles and Chain of Custody back in the box.

STEP FIVE I Place the return shipping label on top of the original mailing label, then place the kit in your mailbox or drop it off at your nearest United States Postal Service within 3 days of collection.

120Water

Dear CUSTOMER NAME,

Thank you for participating in the Pittsburgh Water and Sewer Authority's (PWSA) lead testing program. Your test kit is helping inform you and PWSA about the quality of our drinking water.

Sample Id	Collected On	Sample Bottle	Analyzed For	Result	Unit
650459	01/14/2024 14:00:00	1	Lead	2.99	ppb
650460	01/14/2024 14:00:00	5	Lead	ND	ppb

The results of the sample taken from STREET ADDRESS, PITTSBURGH, PA 15219 are listed in the above table. The Environmental Protection Agency (EPA) lead action level is 15 ppb.

We changed to 1st and 5th liter testing kits in accordance with new EPA recommendations. The 5th liter sample is intended to collect water in the plumbing closer to the service line in the building. Test results above show both examples.

What is the lead action level?

The lead action level is the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow when they reach or exceed 15 ppb. We ask residents from our service area to submit samples to help us determine if our treatment methods are effective at reducing corrosion from lead pipes. If more than ten percent of the samples we collect exceed the lead action level of 15 ppb, we must take certain actions like replace lead service lines and explore alternative water treatment methods. It is important to remember that this is not a safety standard because there is no safe level of lead. The Maximum Contaminant Level Goal (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety. The MCLG for lead is 0 ppb.

What do my results mean?

If the lead result listed above is 10 ppb or greater, you should have received a complimentary water filter pitcher and filters that are certified to remove lead delivered to the service address. If PWSA has previously provided you with a complimentary water pitcher, you will receive additional replacement filters. Please call our water testing partner, 120 Water, at 800-674-7961 if you did not receive these.

If the lead test result is ND ppb (Not Detected), this indicates that the laboratory equipment was not able to detect lead in the water sample.

Completing a lead test is a good first step in understanding your water quality. To check further for sources of lead, you can test your household plumbing for lead using swabs, which you can find at most home improvement stores. You can also check our online map at www.pgh2o.com/leadmap to see if your home has historical data on file indicating that lead pipe was used to build your service line.

If your lead test sample was not following a service line replacement, and you are interested in replacing your lead service line, PWSA's Lead Service Line Reimbursement Program offers up to 100% reimbursement and provides a minimum of a \$1,000 reimbursement based on a tiered income eligibility. PWSA will verify your income and determine the level of reimbursement you qualify for. Please contact at **PGH2O Cares at 412-255-2457** to begin the reimbursement process.

What are the health effects of lead?

According to EPA, "Lead can cause serious health problems if too much enters your body from drinking water or other sources. It can cause damage to the brain and kidneys and can interfere with the production of red blood cells that carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones, and it can be released later in life. During pregnancy, the child receives lead from the mother's bones, which may affect brain development."

How does lead exposure happen?

The Mayo Clinic states that most exposure to lead happens by ingesting paint chips or leadcontaminated dust. There can also be lead in soil and drinking water. Lead enters drinking water through corrosion in lead pipes or plumbing materials. The primary source of lead in PWSA's system are the old water service lines that connect homes to the water main in the street. Our water mains are not made of lead, and there is no lead in our water when it leaves the water treatment facilities.

What can I do to reduce exposure to lead in drinking water?

If you know or suspect that you have lead service lines or plumbing, there are ways to reduce your exposure to lead in your drinking water:

COMMUNITY LEAD RESPONSE

- Run your water to flush out lead. If you haven't used your water for several hours, run your cold tap for one minute before using your water for cooking or drinking. If your home has a longer lead line, this may require flushing for a longer period of time. Using toilets, washing clothes, showering, or doing dishes before you drink from your tap are all ways that you can flush your water lines without wasting water.
- Use cold water for cooking and preparing baby formula. Lead dissolves more easily in hot water. Do not drink, cook with, or make baby formula using hot water.
- Do not boil water to remove lead. Boiling water does not remove or reduce lead exposure.
- Look for alternative sources or treatment of water. Purchase or use the provided NSF Water Filter that is certified to remove lead from your water. Customers can also choose to drink bottled water. Coupons for NSF Water Filters certified to remove lead are available at lead.pgh2o.com.
- Identify if your plumbing fixtures contain lead. Lead check swabs are available at hardware stores to help you detect lead on plumbing surfaces, such as solder and pipes. Consider replacing pipes and fixtures that contain lead. Contact us if you decide to replace your lead service line. Depending on your income, you may be eligible to have your lead water service line replaced at no cost.
- Get your child's blood tested. If you think that your child may have been exposed to lead, talk to your doctor about testing your child. Allegheny County requires all children to be tested for lead exposure at approximately 9-12 months and again at 24 months.

What is being done?

We are identifying and replacing thousands of lead service lines, with a goal of replacing all of the lead service lines in our system. As we identify the location of lead service lines, we make this information available to the public on our webpage at <http://lead.pgh2o.com>. Customers who want to replace their lead service lines on their own should contact our Lead Help Desk for more information about coordinating efforts.

Where can I get more information?

For more information, visit the PWSA lead website at <http://lead.pgh2o.com> or call 412.255.8987.

Sincerely,

William J. Pickering

Line Replacement Reimbursement Program Correspondence

02.01.2024

STREET ADDRESS
PITTSBURGH, PA 15219

RE: Private Lead Service Line Reimbursement

5038216

Dear Applicant or Homeowner,

We are contacting you from The Pittsburgh Water and Sewer Authority (PWSA) with information regarding the application for reimbursement for private lead service line replacement. The results of the income verification by our PGH2O Cares Team for the resident at this property are as follows:

Applicant Name: CUSTOMER NAME

Percentage of Federal Poverty Level: 396.30%

PWSA's Reimbursement amount: 75.00%

This applies to the property at: STREET ADDRESS, PITTSBURGH, PA 15219

You must submit the attached estimate, completed by you and your plumber, to PWSA at LeadReimbursement@pgh2o.com. You will be notified by mail when the estimate is approved and can then hire the plumber to complete the work. **You will not be reimbursed for work that is completed without an approved estimate.**

The PWSA reserves the right to void authorizations if eligibility conditions for reimbursement have changed before an estimate is received for review. This includes the addition of the location to a planned PWSA work order.

A section of your water service line belongs to you, and a section of it belongs to PWSA

As shown in the example diagram, in a typical situation, the section of your water line that runs between the water main and the curb box is owned and maintained by the PWSA. The section between the curb box and the water meter belongs to you. In some instances, this example diagram may not be indicative of ownership. The PWSA will confirm your ownership responsibilities.

The best available record for the material type of your water service line is as follows:

Homeowner's (private) portion of the service line:
GALVANIZED

PWSA's (public) portion of the service line: **Lead**

Next Steps

You need to contact a licensed, private plumber to complete an inspection of your water service line entering your property. The plumber should confirm the service line material and provide you with an estimate of the costs for replacement of the section you own. PWSA recommends that you get at least two estimates to ensure you are receiving a fair cost for this service. Once you have the estimate, you must submit the estimate for the plumber you select to PWSA for approval prior to proceeding with the work.

Note that if the service line is confirmed to be lead or galvanized iron, PWSA will offer reimbursement at the percentage identified above. If the service line is found to be any other material PWSA will only reimburse you (at the percentage identified above) the cost of the test pit used to determine the material type.

If lead is found on the PWSA-owned section during replacement, your private plumber should coordinate with PWSA at least two weeks in advance so we can replace our section at the same time as yours.

We encourage you to use our directory of approved private plumbers

Included in this packet is a list of local private plumbers that PWSA has approved to ensure that the reimbursement process is as simple as possible for you, and that no deposit is charged for the work before it begins. Once you have selected a plumber, submit their estimate to the PWSA Lead Help Desk and PWSA will review the estimate and notify you of the reimbursement amount. If no further information is needed, the plumber may proceed with the lead line replacement. After the final invoice for the work is submitted to PWSA by

the plumber, a check will be made out to you and the plumber for the agreed-upon reimbursement amount. You will be responsible to use this check towards the cost of the plumber and also pay for any remaining costs not reimbursed by PWSA.

Enclosures in this letter

- A checklist of PWSA's responsibilities and your responsibilities as the homeowner during this reimbursement process
- List of local private plumbers
- Plumbers pay items estimate form

THE SHARED RESPONSIBILITY OF PRIVATE LEAD LINE REIMBURSEMENT

Let's Work Together to Improve the Safety and Quality of Your Drinking Water

A lead water line may be causing unsafe levels of lead at your home. Through our Private Lead Line Reimbursement Program, we will financially assist you with the replacement of privately-owned lead lines to improve the quality of your drinking water.

Below are a list of responsibilities that you - the homeowner - and PWSA will have during the reimbursement process. Please read this carefully before beginning work.

If you have any questions, please contact the Lead Help Desk at LeadReimbursement@pgh2o.com or 412.255.8987.

To contact PGH2O Cares Team to determine your reimbursement amount, call 412.255.2457.

A section of your water service line belongs to you, and a section of it belongs to PWSA

As shown in the diagram, in a typical situation, the section of your water line that runs between the water main and the curb box is owned and maintained by the PWSA. The section between the curb box and the water meter belongs to you. In some instances, this example diagram may not be indicative of ownership. The PWSA will confirm your ownership responsibilities.

PROPERTY OWNER AND PLUMBER RESPONSIBILITIES

- Contact PGH2O Cares to determine how much PWSA will reimburse you for the private service line work.
- Obtain private plumber.
- Plumber must verify the PWSA-owned and private service line material and generate an estimate to be submitted to PWSA.
- Plumber must replace lead service line as detailed in the approved estimate.
- Homeowner must provide final invoice and Allegheny County Health Department inspection to PWSA
- Homeowner must pay remaining costs of private service line replacement after reimbursement.

PWSA'S RESPONSIBILITIES

- Notify customer of reimbursement level after PGH2O Cares income verification.
- Review plumber estimate and request additional detail from plumber if needed.
- Review final invoice and submit co-written check to homeowner and private plumber for agreed-upon reimbursement amount

Residents who utilize choose to work with a plumber from PWSA's approved list of private plumbers will not be required to pay for the cost of an estimate.

RE: Private Lead Service Line Reimbursement – No replacement needed

5004751

Dear CUSTOMER NAME,

We are contacting you from the Pittsburgh Water and Sewer Authority (PWSA) with information regarding your reimbursement for private lead service line replacement. Based on our most updated records, the private portion of your service line at STREET ADDRESS, PITTSBURGH, PA 15219 is not made of lead. For this reason, you do not need to proceed with replacement work and PWSA will not provide any reimbursement for costs if you do proceed. You can view the Homeowner's (private) portion of the service line material on the PWSA Lead Map: pgh2o.com/leadmap. If you feel that the records we have for your property are incorrect, please contact us.

**Homeowner's (private) portion of the service line:
NONLEAD**

**Source of private side material:
Service line replaced or verified by excavation**

RE: Private Lead Service Line Reimbursement

5035536

Dear CUSTOMER NAME,

We are contacting you from The Pittsburgh Water and Sewer Authority (PWSA) with information regarding your application for reimbursement for private lead service line replacement. The results of your income verification by PGH2O Cares are as follows:

Percentage of Federal Poverty Level: 1000.00%

PWSA's Reimbursement amount: \$1,000.00

This applies to the property at: STREET ADDRESS, PITTSBURGH, PA 15219

A section of your water service line belongs to you, and a section of it belongs to PWSA

As shown in the example diagram, in a typical situation, the section of your water line that runs between the water main and the curb box is owned and maintained by the PWSA. The section between the curb box and the water meter belongs to you. In some instances, this example diagram may not be indicative of ownership. The PWSA will confirm your ownership responsibilities.

The best available record for the material type of your water service line is as follows:

Homeowner's (private) portion of the service line: Lead

PWSA's (public) portion of the service line: Unknown

Note that if the service line is confirmed to be lead or galvanized iron, PWSA will offer reimbursement identified above. If the service line is found to be any other material PWSA will only reimburse you the cost of the test pit used to determine the material type.

PAGE 1 OF 4

If you have already replaced your service line, PWSA will offer reimbursement for replacement of lead or galvanized iron if replacement occurred on or after January 1, 2019.

If lead is found on the PWSA-owned section during replacement, your private plumber should coordinate with us at least two weeks in advance so we can replace our section at the same time as yours.

Next Steps

After the work is completed by a licensed, private plumber and final invoice for the work is submitted to PWSA, a check will be made out to you for the agreed-upon reimbursement amount.

Please complete the attached PWSA Private Lead Line Reimbursement Form and return the form and attachments to LeadReimbursement@pgh2o.com.

COMMUNITY LEAD RESPONSE

FLUSHING INSTRUCTIONS

- 1 **Throw away any ice in your freezer. If you have an automatic ice maker, shut it off.**

Tip: Do not use any filtered water from your refrigerator or any other source until you complete the flushing.

- 2 **Unscrew and remove the aerators from all of your sinks and taps.**

Tip: If your aerator is difficult to remove, you may need to use a pair of pliers.

- 3 **Once your aerators are removed, separate the parts and remove any debris. Soak the parts in white vinegar and scrub them with a brush.**

- 4 **Starting at the lowest level of your home and working your way up, fully turn on all the cold water taps in your sinks, tubs, and showers.**

Tip: Make sure to turn on any taps and hose spigots on the outside of your house as well.

- 5 **After you turn on the last tap, allow the water to run for at least 30 minutes.**

- 6 **Starting at the highest level of your home and working your way down, shut off each of your water taps.**

**Please be advised that lead levels in your water may be elevated for up to six months following construction.
Please consider using a water filter pitcher for your drinking and cooking needs.**

RE: Private Lead Service Line Reimbursement Estimate Approved

5024646

Dear CUSTOMER NAME,

We are contacting you from The Pittsburgh Water and Sewer Authority (PWSA) to inform you that your plumber's estimate from Other submitted to our Lead Help Desk has been approved for certain eligible costs. The reimbursement amount you can expect after work is completed is as follows:

Plumber's Estimate: \$9500.00

PWSA's reimbursement percentage: 100.00%

PWSA's reimbursement amount: \$9500.00

This applies to the property at: STREET ADDRESS, PITTSBURGH, PA 15219

The best available record for the material type of your water service line is as follows:

Homeowner's (private) portion of the service line: Lead

PWSA's (public) portion of the service line: NONLEAD

Your plumber may now proceed with the private lead service line replacement. To receive reimbursement, you or your plumber must submit the PWSA Lead Line Replacement Form, including an itemized invoice from the plumber and the Allegheny County Health Department (ACHD) final inspection report (your plumber should provide). After this has been reviewed by the Lead Help Desk Staff, and based on your application, a check for the amount listed above will be written to:

MICHAEL HENRY and Other.

2.2.1 Lead Infrastructure Plan

PWSA's current goal is to complete the replacement of all residential lead service lines in its system by the end of 2026 and to remove and replace all lead service lines, whether PWSA-owned or customer-owned, within its water distribution system as required by the PUC's regulations at 52 Pa. Code § 65.53 and in accordance with the Lead Service Line Replacement Program Plan ("LSLR") dated February 15, 2024 at Docket Number P-2024-XXXXXX. As discussed further herein, PWSA will use funding from the Commission approved Distribution System Infrastructure Improvement Charge ("DSIC") to recover the costs of replacing lead service lines. Lead service lines not replaced using DSIC funds will be funded by revenue bonds or external funding, such as PENNVEST low-interest loans and grants.

PWSA has maintained a comprehensive lead section of its website since 2018, located here <https://lead.pgh2o.com>. The website includes the following:

- A GIS-based webmap showing project locations and service line materials for all customer locations in our water service area. Customers can search on any address in our water system and learn what information we have regarding their service line materials. The information on the webmap is updated on a monthly basis with information PWSA is developing concerning the service line material inventory.
- General information about the use of orthophosphate for corrosion control at PWSA.
- Information about lead in general and specifically lead service lines, including Frequently Asked Questions.
- Links to PWSA's customer request lead sampling program to order a test kit and how to get a free filter if your lead results are elevated (> 10.0 ppb).
- Sample results from PWSA Customer Request Program and LCR Compliance Testing Program. These results are updated every six months for the customer request program, and within 60 days of the completion of each compliance sampling event.
- Details and descriptions of the PWSA Line Replacement Reimbursement Program that provides an income-based reimbursement for customers electing to proactively replace their own private LSL.
- Information and resources on health risks associated with lead and lead service lines.
- Meeting minutes of the CLRAC, which meets quarterly.
- Press releases and other notable news events.

~~public and private side lead service lines in its system by 2026. The objectives of the Program are to:~~

- ~~• Reduce the amount of lead (and ultimately eliminate lead service lines entirely) in the Authority's water distribution system;~~
- ~~• Mitigate lead exposure through water consumption for the customer as quickly as possible;~~
- ~~• Comply with state and federal regulations; and~~

**Revisions Proposed to current approved LTIIP at Docket Number P-2022-3035953
Consistent with the LSLR Plan approved by the Commission at Docket Number P-2024-XXXXX
Submitted pursuant to Pa. Code §§ 65.51-65.62**

- ——— Prohibit partial lead service line replacements.

~~The Policy includes the replacement of public and private side lead service lines at any residence, of which PWSA is aware, where the replacement is operationally feasible. In the case of a private side line, the owner must authorize the replacement by PWSA, replace the line in accordance with PWSA policy, or be subject to termination of water service.~~

2.2.2 Inventory of Lead Service Lines

A comprehensive discussion of PWSA's service line inventory is discussed in PWSA's LSLR Program Plan dated February 15, 2024, Section 2. As discussed therein, PWSA started developing a service line inventory in 2016. Its inventory efforts have evolved and continue to evolve since then to conform to changing regulations, guidance and developing technology. PWSA plans to submit an updated service line inventory to PADEP by October 16, 2024 pursuant to the requirements of 40 C.F.R. § 141.80.

~~PWSA prepared a residential service line inventory and submitted it to PADEP in accordance with the COA in December 2020. Another update for all service lines is due and will be submitted by December 31, 2022. Since 2018 PWSA has maintained an on-line web map showing the status of all service line materials on our public-facing website. The inventory and web map are updated monthly as new information is gathered regarding service line materials.~~

~~PWSA is closely evaluating the future requirements of the Lead and Copper Rule Revisions (LCRR) and worked with the United States Environmental Protection Agency (US EPA) as they developed their "Guidance for Developing and Maintaining a Service Line Inventory" (August 2022) and are following the development of PADEP's guidance as well.~~

2.2.3 Corrosion Control Program

In April 2016, the Authority initiated a Corrosion Control Study to determine the optimum chemical **treatment** strategy for reducing lead release due to corrosion of lead service lines and building plumbing. The study's goal was to identify an effective, immediate and minimal cost approach to achieve compliance with the lead action level. The approach was assessed to ensure that it did not otherwise adversely impact water quality in the distribution system. The study tested two corrosion inhibitors: orthophosphate and silicate. Each has advantages and disadvantages for water quality management, risks to sustained performance and cost-effectiveness. After study, orthophosphate was determined to be the best solution for the Authority.

The Authority completed the design of the appropriate corrosion control chemical feed storage and feed facilities for the water system, obtained all necessary permits and completed construction of the facilities in early 2019. Orthophosphate feed commenced in about one third of the water system in early April 2019, and in the entire water system by the end of April 2019.

**Revisions Proposed to current approved LTIP at Docket Number P-2022-3035953
Consistent with the LSLR Plan approved by the Commission at Docket Number P-2024-XXXXX
Submitted pursuant to Pa. Code §§ 65.51-65.62**

Since the time of initial orthophosphate feed, the Authority has continued LCR Compliance Sampling in accordance with the schedule established by PADEP. The following are the results, presented in Table 2-2 on the following page, of the completed sampling events.

Table 2-2: LCR Compliance Sampling		
Event	Dates	90th Percentile Lead Level (ppb)
2019b	July – December, 2019	10.0
2020a	January to June, 2020	5.1
2021b	July to December, 2021	7.0527
2022a	January to June, 2022	4.4
2022b	July to December 2022	5.0
2023a	January to June 2023	3.35
2023b	July to December 2023	3.58

The Authority continues to monitor the application of orthophosphate across the distribution system and evaluate its effectiveness. The Authority is also closely monitoring the upcoming requirements of the LCRR to determine potential impacts on the corrosion control program.

Finally, the Authority continues to provide the Commission, and the CLRAC with quarterly updates regarding the progress of PWSA's orthophosphate program and the results of the lead level testing.

1.1 Water System Replacement and Prioritization Approach

The Authority is working to accelerate the replacement of small diameter water mains. In both 2018 and 2019, the Authority committed to replacing two miles of small diameter main per year. With approximately 788 miles of small diameter main in the system, this equated to 0.2% of the system per year. In the previous LTIP, the Authority targeted to annually replace 1% of the system by 2024.

In addition to continuing to accelerate the replacement of small diameter water mains, PWSA has committed to replacing all remaining lead service lines by 2026. This is to be accomplished using a combination of Small Diameter Water Main Replacement (SDWMR) and Lead Service Line Replacement (LSLR) projects. In cases where service lines are replaced as part of a LSLR project, the water main would typically need to be replaced later as part of a completely separate project. However, this is not the preferred approach for several reasons: Tapping new service lines into older, brittle water mains can be difficult, and completing two separate projects is not as cost effective and is more disruptive to our customers.

Based on our proposed CIP, it was determined that we would be able to replace 64 miles of water mains by the end of 2026. This led to an initiative to develop a GIS based web application that would allow the Authority to select which water mains to replace.

The developed web application prioritizes mains to be replaced utilizing three criteria: the potential number of lead service lines, low fire flow areas, and frequency of main breaks. It scores pipes on a formula that is based on these criteria, and projects are selected based on the scores.

Additionally, a small annual contract for the urgent replacement of water mains, valued at approximately \$1 to \$2 million a year is also part of the Program. The purpose of the Water Relay Program is to replace small areas, typically a block or less, where a water main replacement is needed urgently due to a failure to a pipeline with a highly compromised condition.

2.4 Eligible Water System Property to be Improved

Table 2-7 describes the 4 project categories which comprise the eligible water system projects of this LTIP as discussed above. These projects conform to the definition of “eligible property” described in section 1.1.1.

Table 2-7: Water System Eligible Properties to be Improved	
Project Category	Project Descriptions
Urgent and Priority Lead Service Line Replacement	Replacement of lead service lines, both public and private. Due to exceedance of the action levels from compliance tests for lead and copper, the Pennsylvania Department of Environmental Protection required the authority to perform additional distribution system water quality monitoring, optimization of corrosion control treatment, source water monitoring/treatment, public education, and lead service line replacement.
Small Diameter Water Main Replacement	Strategic replacement of water mains (including lead service lines) to improve system reliability as well as improve water pressure, maintain water quality, and minimize disturbance to the community. By maintaining a proactive approach to asset management, efforts can be directed towards remedying assets before failure, thus saving in overall replacement cost. Additionally, projects will be coordinated with other utilities to minimize disturbance to the community and street surface restoration costs. Water quality and available hydrant flows will also improve by removing tuberculated mains.
Water Relay	Replacement of existing water mains, valves, fittings, service connections and hydrants due to emergency situations
Valve Replacement	Replacement of defective or non-operational valves on transmission and distribution mains throughout the water distribution system, excluding valves replaced during relays. Includes locating, assessing and documenting the operability, raising to grade and/or cleaning existing buried or obstructed valves. Increasing the number of operable valves in the system will reduce the number of customers that may be impacted and the number of valves that would need to be closed during emergency conditions.

1.2 Initial Planned Repair and Replacement Schedule and Projected Annual Expenditures

Table 2-8: Water System Eligible Properties Project Schedules and Costs in Appendix B identifies the costs associated with the projects for each year of the project schedule (2023-2027), organized into the following major project categories:

- **Urgent and Priority** Lead Service Line Replacement
- Small Diameter Main Replacement
- Water Relay Replacement
- Valve Replacement

LIST OF CHANGES

PART VI: LEAD SERVICE LINE REMEDIATION (PAGE NOS. 63-70)

Text added and modified regarding Lead Service Line Remediation as approved or directed at Docket No. P-2024-XXXXXXX.

PART VI: LEAD SERVICE LINE REMEDIATION (PAGE No. 69A)

New Page 69A contains overflow text, new provisions on Service Line Demarcation and modified text on warranty on workmanship and materials for Customer Lead Service Lines replaced by the Authority.

Issued: _____, 202X

Effective: _____, 202X

PART VI: LEAD SERVICE LINE REMEDIATION

1. Definitions: For purposes of Part VI (Lead Service Line Remediation), the following definitions apply:
- a. **Authority Facility**: A water distribution main or a public lead service line owned by the Authority and connected to a private lead service line. (C)
 - b. **CLRAC**: The Community Lead Response Advisory Committee established pursuant to PWSA's first jurisdictional base rate case docketed at R-2018-3002645 *et al.*
 - c. **Customer Lead Service Line**: (1) A Lead Service Line extending from the Curb Stop to the meter or one foot inside a building foundation, whichever is farther; or (2) a non-residential Lead Service Line extending from the Authority Facility to the meter or one foot inside a building foundation, whichever is farther. (C)
 - d. **Independent Legal Restrictions**: Commission Rules or orders which otherwise prevent termination of water service at a property including but not limited to winter moratorium, medical certifications, or Commission directed moratoriums or suspensions.
 - e. **Lead Service Line**: Any service line made of lead, or galvanized iron or galvanized steel that is or formerly was downstream of lead. (C)
 - f. **Partial Lead Service Line Replacement**: The replacement of a ~~Customer Lead Service Line-an Authority Facility made of any material~~ without the simultaneous replacement of a connected ~~Customer~~ Public Lead Service Line. (C)
 - g. **Public Lead Service Line**: A Lead Service Line owned by the Authority from the distribution facilities of the Authority which connects to the customer service line at the hypothetical or actual line or the actual property line, including the Curb Stop and/or control valve and valve box. (C)
 - h. **Residence**: A residential property with no more than four (4) dwelling units or a dual use property (commercial & residential) ~~with no more than four (4) dwelling units~~ with service lines 1-inch in diameter or less, for which the PWSA has maintenance responsibility for the water service line from the water main to and including the curb stop. The term also includes a single-family residence that is served by a lead service line greater than 1-inch diameter. (C)

(C)= Change

2. Lead Service Line Replacement Infrastructure Plan:

(C)

- a. Notwithstanding Part III, Section B.1 of this Tariff, the Authority will replace Customer Lead Service Lines pursuant to its Lead Infrastructure Service Line Replacement Plan (as approved at Docket No. MP-202418-XXXXXX2640802 and set forth in Amended Appendix C to the Authority's 5-Year Long-Term Infrastructure Improvement Plan approved at Docket No. P-2018-3005037, hereinafter "LSLRead Infrastructure Plan"), subject to an expenditure cap of 4,000 Customer Lead Service Line replacements \$11.0 million per year. The Authority may modify its annual expenditure cap for Customer Lead Service Line replacements by the number of emergency repairs and/or reimbursements and decrease its annual cap by same for the following year with Commission approval. The costs incurred by the Authority to undertake remediation efforts pursuant to its Lead Infrastructure LSLR Plan shall be recoverable in the Authority's Distribution System Improvement Charge and in base rates, as applicable rate proceedings.
- b. PWSA's Lead Infrastructure LSLR Plan is in effect until December 31, 2026, and applies to any Lead Service Line (1) serving any Residence and non-residential properties where specified; (2) of which PWSA is aware; (3) the replacement of which is operationally feasible; and (4) the Property Owner authorizes the replacement or replaces the line in accordance with PWSA policy or, PWSA is otherwise authorized to replace the line in accordance with this Tariff.

(C)

(C)

(C) = Change

3. Replacement of Customer Lead Service Lines:

a. ~~After January 1, 2019,~~ PWSA will offer to replace Customer Lead Service Lines at no direct cost to the Property Owner: (i) at any residential or non-residential property where PWSA replaces an Authority Facility connected to a Customer Lead Service Line pursuant to its Small Diameter Water Main Replacement Program; (ii) at any Residence where PWSA replaces an Authority Facility connected to a Customer Lead Service Line; (iii) at any Residence with a private-side only Lead Service Line located within a work order area of a neighborhood-based Lead Service Line replacement program where Lead Service Line replacements are performed; and (iv) when PWSA's operations crew replaces an Authority Facility regardless of material, in emergencies including line breaks, leaks or other unplanned emergency replacements. (C)

~~Customers who received a Partial Lead Service Line Replacement at their Residence after February 1, 2016 due to a PWSA action, such as, for example, a lead service line replacement contract, PWSA operation replacement or water main replacement, will be eligible to have their Customer Lead Service Line replaced by PWSA, at no direct cost to the customer.~~ (C)

b. ~~For customers who elected to replace their Customer Lead Service Line at their Residence as a result of a PWSA Public Lead Service Line replacement between February 1, 2016 and December 31, 2018, PWSA will offer a direct reimbursement for costs incurred up to a maximum of \$5,500.~~

c. ~~For ad hoc replacements initiated by customers between February 1, 2016 and December 31, 2018, PWSA will not offer reimbursement. An "ad hoc replacement" refers to when a Property Owner elects on their own initiative to arrange for the replacement of a Customer Lead Service Line when PWSA is not then currently replacing the public side of the line.~~

(C) = Change

4. Reimbursement Program:

- ~~a~~. For ad hoc replacements initiated by Property Owners at their Residence ~~after January 1, 2019~~, if the Customer Lead Service Line is connected to a Public Lead Service Line, PWSA will replace the Public Lead Service Line when a customer elects to replace the Customer Lead Service Line. A Property Owner that elects to replace their Customer Lead Service Line must replace the Customer Lead Service Line concurrent with the Authority replacing the Public Lead Service Line. A Property Owner shall provide the Authority at least 90 days' notice prior to replacing their Customer Lead Service Line. For ad hoc replacements ~~after January 1, 2019~~, PWSA will reimburse the Residential customer for all or a portion of the cost of the Customer Lead Service Line replacement based on the customer's income. The ~~proposed~~ income-based reimbursement of the cost to replace Customer Lead Service Lines is tiered as follows: (C)
- i. Full cost reimbursement for households with income levels below 300 percent of the federal poverty level (FPL), as adjusted annually;
 - ii. 75 percent of the cost for households with income levels between 301 and 400 percent of the federal poverty level, as adjusted annually;
 - iii. 50 percent of the cost for households with income level between 401 and 500 percent of FPL, as adjusted annually;
 - iv. For all other households, a \$1,000 stipend towards the replacement cost of Customer Lead Service Line replacement.
- ~~b~~. Reimbursements will be issued in the form of a check issued no later than 45 days after the request is approved. (C)

(C) = Change

5. Replacement of Authority Facility - Customer Lead Service
Lead Service Line Replacement - Termination of Service:

(C)

a. Except as set forth below, if after being notified of the Authority's offer to replace at no cost a property owner's Customer Lead Service Line the property owner has not provided an executed property owner agreement authorizing the replacement of the customer service line or where the legal owner can not be identified or located, PWSA will not reconnect the Customer Lead Service Line to the Authority's Service Line and will initiate termination of water service at that location following the procedures and providing the notices set forth in accordance with this Tariff and the ~~Lead Infrastructure-LSLR~~ Plan. PWSA will proceed with termination of water service to a location irrespective of whether Independent Legal Restrictions would otherwise delay or prohibit termination.

(C)

b. At any time prior to completing termination, or, within five days after termination, the property owner executes the property owner agreement, or if after the termination, the property owner submits proof in the form of a plumbing inspection report from the Allegheny County Health Department that the lead customer service line has been replaced, water service will be restored to the property provided that service will not be restored until either both the Public Lead Service Line and the Customer Lead Service Line have been replaced or an alternative, non-lead temporary bypass is installed. The property owner will have five days from termination to provide the executed agreement, or ten days from termination if the replacement was made pursuant to PWSA's emergency replacement procedures, and coordinate with PWSA to schedule the replacement as necessary. If the aforementioned steps are not completed within that timeframe, PWSA will terminate service again on the fifth day (or tenth day in the case of emergency replacements) without re-initiating termination notices and procedures.

(C)

(C) = Change

- c. Neither a customer nor a property owner may install a Partial Lead Service Line Replacement. A Partial Lead Service Line Replacement will result in termination of service until the Authority can replace the Public Lead Service Line.

(C)

6. Customer Lead Service Line on Multiple Properties:

(C)

When, pursuant to the ~~Lead-Infrastructure~~ LSLR Plan, PWSA is replacing a Customer Lead Service Line at no direct cost to the property owner, and the Customer Lead Service Line crosses one (or more than one) property to access another, PWSA will:

- a. Attempt to obtain approval from all property owners to allow the work necessary to replace the Customer Lead Service Line; and
- b. Evaluate solutions available to install conforming service lines.

If PWSA is unable to obtain the neighboring property owner or owners' consent, and there is no other viable and economic solution (to be determined in PWSA's sole discretion) such as installing conforming service lines, PWSA will commence procedures to terminate service to the neighboring property owner or owners' property pursuant to this Tariff and the ~~Lead-Infrastructure~~ LSLR Plan.

(C)

PWSA will complete or suspend the termination of the neighboring property owner's water service as set forth in section ~~5(f)~~ above.

~~(C)~~

(C) = Change

7. Non-Owner Occupied Properties:

(C)

The Authority may stand in the shoes of the property owner and is authorized to replace a Customer Lead Service Line when:

- a. PWSA has offered pursuant to this Tariff to replace at no direct cost to the property owner a Customer Lead Service Line;
- b. The property is not occupied by the legal owner of the property; and
- c. The Authority has made attempts to obtain authorization for the Customer Lead Service Line replacement pursuant to this Tariff and the ~~Lead Infrastructure~~ LSLR Plan and (i) the legal owner can not be identified; (ii) the legal owner can not be located; or (iii) PWSA has notified the legal owner but the owner has never responded.

(C)

In such instances, and when, in the sole discretion of the Authority, replacing the Customer Lead Service Line and preventing the termination of water service would be reasonable and in the public interest, PWSA may proceed to make the replacement without obtaining authorization from the property owner. In any such instance of replacement, the Authority, and any person associated with the Authority, including but not limited to employees, agents, board members and executives, are released and held harmless from any and all claims, causes of action, damages or losses, of any nature, whatsoever with respect to the work performed by PWSA or its contractors, and shall not be otherwise liable for any claim asserted by any person, including the property owner, as a result of the Customer Lead Service Line replacement except to the extent otherwise authorized by this Tariff.

(C) = Change

8. Property Owner Agreement: Except in the case of non-owner occupied properties at which the Authority has exercised "stand in the shoes" rights, the Authority shall enter into an agreement with a Property Owner for replacement of a Customer Lead Service Line that allows PWSA employees and contractors to gain access to their private property in order to replace their Customer Lead Service Line prior to the initiation of any work by the Authority to replace the Customer Lead Service Line. The agreement shall be in a form provided by the Authority and shall include provisions that require the Property Owner(s) to release and hold harmless the Authority from any and all claims, causes of action, damages or losses, of any nature, whatsoever with respect to the work performed by PWSA or its contractors.

~~(C)~~

9. Service Line Demarcation: If a shutoff valve is not located within 12 inches of the structure wall of the property, the Authority may install a shutoff valve during the lead service line replacement to serve as a point of demarcation between the property's service line and the property's interior water distribution piping.

(C)

The Authority shall perfect its ownership of the portion of the service line located within the then-existing right-of-way in conformance with this Tariff to ensure that the Authority can obtain necessary permits during the planning phase of a lead service line replacement project.

(C)

10. Limitation of Liability: The Authority's liability relating to Lead Service Line remediation efforts is limited as set forth in Part III, Section I of this Tariff.

11. Warranty on Workmanship: The Authority will provide, at a minimum, a ~~30-day~~ **two-year** warranty on workmanship and materials for a Customer Lead Service Line it replaces and restoration of surfaces. The warranty period shall commence on the day the Customer Lead Service Line is replaced. The maximum coverage under the warranty shall be to repair or replace the Customer Lead Service Line replacement if the failure was due to the workmanship or materials of the Customer Lead Service Line replacement, and restoration of surfaces identified in subsection 12 below to the condition that existed prior to the replacement of the Customer Lead Service Line, as reasonably practicable.

(C)

(C)

(C) = Change

The Authority will not be liable for any damages beyond the maximum coverage of the two-year warranty as described in this warranty section. (C)

If a repair is required and qualifies under the warranty, the customer or property owner consents and grants license to the Authority and/or its contractor(s) to access the property and complete the repair as necessary. (C)

12.Restoration: PWSA will restore roadways and public sidewalks, backfill any trenches excavated as part of the replacement process and will fill and seal any wall or floor penetrations in the private home. No other restoration will be conducted for Customer Lead Service Line replacements. PWSA will not replace any landscaping, interior finishes, paving, seeding, or walkways. All restoration costs shall be borne by the Property Owner.

13.Ownership and Responsibility for Replacement Line: After a Customer Lead Service Line is replaced by the Authority, the Customer shall own the Customer Service Line and shall have full responsibility for the repair, replacement and maintenance of the new Customer Service Line.

14.Post-Replacement Measures: The Authority will implement post-Customer Lead Service Line replacement measures, including distribution of water filters and filter cartridges, in accordance with its ~~Lead Infrastructure~~-LSLR Plan. (C)

(C) = Change

Appendix D

The Pittsburgh Water and Sewer Authority (“PWSA” or “Authority”) submits the following information as required by 52 Pa. Code § 53.52(a) regarding its tariff supplement:

1. The specific reasons for each change.

The Authority is seeking Commission approval of its Lead Service Line Replacement Program and associated tariff changes to comply with the Commission’s regulations under Act 120 of 2018 (“Act 120”) at 52 Pa. Code § 65.51 et seq.

PWSA proposes to replace the annual expenditure cap of \$11.0 million with a cap on the number of customer-owned lead service lines (“LSLs”) that may be replaced annually, to comply with the directives of Section 65.52(a).

The Authority seeks to add language explaining that timing and form of reimbursements to eligible customers under its LSL replacement reimbursement program.

In addition, the Authority is seeking approval to include provisions on service line demarcation, pursuant to Section 65.58(b)(2) and (b)(3).

To comply with Section 65.58(e) of the Commission’s regulations, the Authority is seeking approval to modify the coverage and term of its warranty on LSL replacement work.

2. The total number of customers served by the utility.

The Authority provides water service to approximately 80,000 residential, commercial and industrial customers in the City of Pittsburgh.

3. A calculation of the number of customers, by tariff subdivision, whose bills will be affected by the change.

No customer bills will be affected as a result of this change at this time. The Authority will seek recovery of associated costs in rate proceedings or via its Distribution System Improvement Charge (DSIC). To the extent the Authority closes on PENNVEST loans on or after January 1, 2025 to fund the cost of LSL replacements, it will seek recovery of those costs through a PENNVEST charge.

4. The effect of the change on the utility’s customers.

Customers that have lead service lines will have the opportunity to have the Authority, or its contractors, replace their customer lead service line at no direct cost to the customer. In addition, customers that have replaced their LSL may be eligible for reimbursement of those costs.

5. The direct or indirect effect of the proposed change on the utility’s revenue and expenses.

Pursuant to 52 Pa. Code § 65.58(a), the Authority is proposing to cap the number of customer-owned lead service replacements at 4,000 annually. PWSA anticipates that those replacements will cost roughly \$25M in 2024 dollars.

6. The effect of the change on the service rendered by the utility.

Pursuant to the Authority's LSLR Program, the Authority will work to eliminate customer LSLs in its service territory. PWSA does not anticipate any other significant effect on the service rendered by the Authority.

7. A list of factors considered by the utility in its determination to make the change.

The Authority is required to comply with Act 120 and the Commission's regulations which require that the Authority submit a LSLR Program in accordance with the Commission's Lead Service Line Replacement regulations no later than the effective date of rates established under the Authority's next base rate case filed following the effective date of the Commission's regulations or within two years of the effective date of the Commission's lead regulations, whichever comes first. The Authority is also proposing the changes to continue the Authority's efforts to reduce and eliminate lead service lines through the Authority's system.

8. Studies undertaken by the utility in order to draft its proposed change.

The Authority did not undertake a study to specifically address the proposed changes.

9. Customer polls taken or other documents which indicate customer acceptance and desire for the proposed change.

While the Authority has not taken a formal poll with respect to customer acceptance and desire for the proposed changes, the Authority has already been replacing lead service lines in its service area and customers that have participated in the Authority's existing Lead Service Line Remediation program were generally supportive of the program.

10. Plans the utility has for introducing or implementing the changes with respect to its ratepayers.

The Authority has included various plans it has relating to communications, outreach and educational materials in its LSLR Plan. Please see Appendix A to the Petition of PWSA for Approval of its Lead Service Line Replacement Program.

11. FCC, FERC or Commission orders or rulings applicable to the filing.

Please refer to the Commission's Order entered March 14, 2022, at Docket No. L-2020-3019521 regarding the implementation of Act 120.

Appendix E

Reference Key – LSLR Regulatory Requirements

Section 65.53. Time to replace LSLs

- 65.53(a) – See LSLR Plan at 22, and Section 3.5 generally
- 65.53(b) – Not applicable

Section 65.54. Petitioning the Commission for a LSLR Program

- 65.54(a) – See the Certificate of Service accompanying PWSA’s LSLR Petition
- 65.54(b) – See Appendix B to PWSA’s LSLR Petition
- 65.54(c) – Not applicable

Section 65.55. LSLR program requirements

- 65.55(a) – PWSA received prior PUC approval to perform LSLR activities so it will comply with § 65.61. LSLR Plan at 2
- 65.55(b) – See the LSLR Plan (Appendix A), *pro forma* tariff supplement (Appendix C), and responses to 52 Pa. Code § 53.52(a) (Appendix D)
- 65.55(c) – Not applicable at this time
- 65.55(d) – Not applicable at this time

Section 65.56 – LSLR plan requirements

- 65.56(a) – See generally LSLR Plan Section 2
 - 65.56(a)(1) – LSLR Plan at 3
 - 65.56(a)(2) – LSLR Plan at 3
 - 65.56(a)(3) – LSLR Plan at 8-10
 - 65.56(a)(4) – See generally LSLR Plan Section 2
 - 65.56(a)(5) – LSLR Plan at 3
 - 65.56(a)(6) – Not applicable at this time
- 65.56(b) – See generally LSLR Plan Section 3
 - 65.56(b)(1) – See LSLR Plan at 27-28
 - 65.56(b)(2) – See LSLR Plan at 27-28
 - 65.56(b)(3) – See LSLR Plan at 13-14
 - 65.56(b)(4) – See LSLR Plan at 12, 13, 24-25
 - 65.56(b)(5) – See LSLR Plan at 15, and Section 5 generally
 - 65.56(b)(6)
 - 65.56(b)(6)(i) – See the Informational Packet provided as Appendix B to the LSLR Plan
 - 65.56(b)(6)(ii) – See generally LSLR Plan Section 3, and at 24-25
 - 65.56(b)(6)(iii) – See LSLR Plan at 20-22, and Section 5
 - 65.56(b)(6)(iv) – See LSLR Plan at 21-22, 34
 - 65.56(b)(7) – See LSLR Plan at 18
 - 65.56(b)(8) – See LSLR Plan at 14 and Section 3 generally
 - 65.56(b)(9) – Not applicable at this time; see 65.56(a)(2) above and LSLR Plan at 3.
 - 65.56(b)(10) – See LSLR Plan at 32
 - 65.56(b)(10)(i) – LSLR Plan at 32
 - 65.56(b)(10)(ii) – See PWSA’s Petition for Waiver
 - 65.56(b)(10)(iii) – See generally LSLR Plan Section 5

Reference Key – LSLR Regulatory Requirements

- 65.56(c) – See LSLR Plan at 10, 29, 31.
 - 65.56(c)(1) – LSLR Plan, Appendices A-E
 - 65.56(c)(2)
 - 65.56(c)(2)(i) – LSLR Plan at 34-35
 - 65.56(c)(2)(ii) – LSLR Plan at 35
 - 65.56(c)(2)(iii) – LSLR Plan at 34-35
 - 65.56(c)(2)(iv) – LSLR Plan at 35

Section 65.57 – Periodic review of LSLR plan.

- Not applicable at this time

Section 65.58 – Pro forma tariff or tariff supplement requirements

- 65.58(a) – Appendix C at Page No. 64
- 65.58(b) – Appendix C at Page No. 69A
- 65.58(c) – Appendix C at Page No. 68
- 65.58(d) – See PWSA’s Petition for Waiver, and Appendix C at Page No. 66
- 65.58(e) – Appendix C at Page No. 69A

Section 65.59 – LSLR program reports

- Not applicable at this time

Section 65.60 – Accounting and financial

- Not applicable at this time

Section 65.61 – Preexisting LSLR activities

- As an entity with a prior approved LSLR plan, PWSA is meeting this requirement by filing a LSLR program that complies with the regs by the effective date of rates in its next base rate case (February 15, 2024).

Section 65.62 – Prohibition on partial LSLRs

- See LSLR Plan at 32
