To: FIRST ENERGY CORP.
CEO Brian X. Tierney
76 S. Main St.
Akron, Ohio 44308

NOTICE OF NO CONSENT TO TRESPASS AND SURVEILLANCE, NOTICE OF LIABILITY
Notice to principal is notice to agent and notice to agent is notice to principal.

Dear CEO Tierney, FIRSTENERGY counsel, agents, officers, employees, contractors and interested parties:

On January 13, 2020, a FIRSTENERGY (Met-Ed) EMPLOYEE arrived at our non-commercial, non-situs property to install a "smart meter" because, as he told us, he had been told by FIRSTENERGY that we "requested" it. Lawyer Geisler was instructed by PA PUC DC ALJ Cheskis' order of April 27, 2020 to suspend any further nefarious attempts to install same be suspended and engage a new protocol for reading the two analogue meters on site for the duration of this Complaint. Be reminded that:

If you intend to install a "Smart Meter" or any life activity-monitoring, trespassing device at our above address, you and all other parties are hereby denied consent for installation and use of all such devices on the above non-commercial, non-situs property. Installation and use of any activity-monitoring device is hereby refused and prohibited. **Informed consent is lawfully required for installation of any surveillance device and any device that will collect and transmit private and personal data to undisclosed and unauthorized parties for undisclosed and unauthorized purposes.** Authorization for sharing of personal and private information may only be given by the originator and subject of that information. **That authorization is hereby denied and refused with regard to the above non-commercial, non-situs property and all its owners.** As more and more of the public realize, especially from the subsequent 5G agenda now unveiled with force and coercion: "smart meters" violate the Supreme Law of the Land and cause endangerment to humanity by the following factors, including but not limited to:

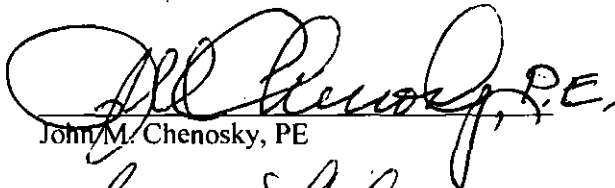

1. They individually identify electrical devices inside the home and record when they are operated causing invasion of privacy.
2. They monitor household activity and occupancy in violation of rights and domestic security.
3. They transmit wireless signals which may be intercepted by unauthorized and unknown parties. Those signals can be used to monitor behavior and occupancy and they can be used by criminals to aid criminal activity against the occupants.
4. Data about occupant's daily habits and activities are collected, recorded and stored in permanent databases which are accessed by parties not authorized or invited to know and share that private data by those whose activities were recorded.
5. Those with access to the smart meter databases can review a permanent history of household activities complete with calendar and time-of-day metrics to gain a highly invasive and detailed view of the lives of the occupants.
6. Those databases may be shared with, or fall into the hands of criminals, blackmailers, corrupt law enforcement, private hackers of wireless transmissions, power company employees, and other unidentified parties who may act against the interests of the occupants under metered surveillance.
7. "Smart Meters" are, by definition, surveillance devices which violate Federal and State wiretapping laws by recording and storing databases of private and personal activities and behaviors without the consent or knowledge of those people who are monitored.
8. It is possible for example, with analysis of certain "Smart Meter" data, for unauthorized and distant parties to determine medical conditions, sexual activities, physical locations of persons within the home, vacancy patterns and personal information and habits of the occupants.
9. **Your company has not adequately disclosed the particular recording and transmission capabilities of the smart meter, or the extent of the data that will be recorded, stored and shared, or the purposes to which the data will and will not be put.**
10. Electromagnetic and Radio Frequency radiation from smart meters has been classified by the World Health Organization as a Class 2B carcinogen. It can even exceed the inadequate FCC standards, which do not take into account health effects from non-thermal radiation emitted from wireless devices such as smart meters, and are based on acute heat exposure only.
11. They lack surge protection, contain a problematic switch mode power supply combined with the network interface card which render them noncompliant with FCC regulations, with problematic lithium batteries but without any scheduled

maintenance which would raise costs, especially in light of their short shelf life, and which expose life-threatening risk to customers that the utility ignores and blames as the customer's fault.

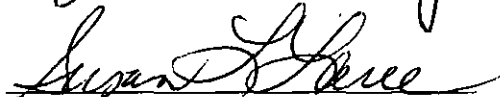

12. They will contribute to a 160% in electric usage by 2030 to support the 5G network which is the real intention for control, while raising non-commercial, non-situs customer billing up to 66% (current increase).

We forbid, refuse and deny consent of any installation and use of any monitoring, eavesdropping, and surveillance devices on our non-commercial, non-situs property. That refusal applies to and includes "Smart Meters" and activity-monitoring, trespassing devices of any and all kinds. **A second attempt by FIRSTENERGY and/or the PA PUC threatening shut-off of electricity to inflict emotional distress and coerce us under duress to an installation of any such life activity-monitoring, trespass device at our non-commercial, non-situs property (and without proper notice of arrival of a certified technician at the premises to allow circuit breaker in off position), will constitute further criminal activity, all prohibited and punishable by law through criminal and civil complaints.** All persons, government agencies and private organizations responsible for installing or operating life activity-monitoring trespass devices directed at or recording our activities, which we have not specifically authorized in writing, will be fully liable for any violations, intrusions, harm or negative consequences caused or made possible by those devices whether those negative consequences are justified by "law" or not, especially in light of the Pennsylvania Supreme Court opinion wracked and invalidated by logical inconsistencies, omissions, and ignorance of all the public efforts denied and prohibited by former Representative Godshall whose son manage(s)(ed) the "deployment" of smart meters for PECO – all in violation of the Supreme Law of the Land.

This document is lawful and legal notice. After this delivery, the liabilities listed above may not be denied or avoided by parties named and implied in this notice. Civil Servant immunities and protections do not apply to the installation of smart meters due to the criminal violations they represent.

John M. Chenosky, PE
