- **What we're watching in the week ahead (7/11): Expert call with K&L gates on Utility Solar Modules (Anti-Circumvention, UFLPA, etc.):** On Tuesday, July 12 at 2pm the Utilities and Renewable energy teams will be hosting an expert call with Stacy Ettinger, Partner at K&L Gates, who leads the firm's trade policy practice. The discussion will include topics such as Anti-Circumvention (AD/CVDS) relief provided by the Biden Admin, and the impact of UFLPA on solar module imports. Please reach out to your salesperson if you are interested in attending.We note a quiet catalyst calendar otherwise in the week ahead.
- **2Q Preview Update (PEG, NEE, SRE, CNP):** We continue to speak with companiesthrough 2Q EPS prep and are providing previews / quarterly walks for PEG, NEE, SRE, and CNP. In Texas, we see both SRE and CNP benefiting from strong load / weather related tailwinds. We see an EPS beat at SRE (CSe $1.76 vs. Street (FS) $1.65) and are positive on the quarter. We expect SRE to have bought back additional stock (despite an elevated share price) and expect mgmt. to repivot investor focus on Port Arthur (PA) with contracting announcements through the summer. We don't think PA is reflected in the stock here. At PEG we project a 10c EPS miss due to lower capacity revenues not captured yet in consensus EPS. Pension remains an overhang and we expect limited clarity on the 2Q call. We are cutting our TP for PEG to $68 from $75 due to lower group multiples and lower EPS estimates (adj. for Power MtM) and maintain our Neutral rating. At CNP, NEE and SRE we shift our TP to $32 (from $33), $79 (from $76), and $166 (from $180), respectively, due to group multiples. We maintain our Outperform ratings on CNP, NEE and SRE.
- **Week in review:** The UTY underperformed SPX this past week, with a 270bp loss vs. a 190bp gain for the S&P. The 10YR/30YR yields were 20bp/15bp wider. Large Caps (-3.6%), Small Caps (-4.4%), Diversified (-3.8%) and LDCs (-3.8%) all closed lower for the week. **Top performers:** PCG, AES, NEE, SWX, EIX, PPL, D, SO, POR and ATO. **Bottom performers:** CMS, ES, ETR, LNT, AEE, OGE, PNW, NI, ED and FE. We fielded many questions to start the week on the groups weakness, but we don't think investors should necessarily been surprised after 600bps of outperformance in the week prior. We maintain our bullish view of the Utilities group vs. the SPX into 2Q reporting seeing earnings results continuing to be resilient.
- **NI: Columbia Gas OH Hearings Pushed to August 9 (Positive):** Recall parties in the Colombia Gas OH case already pushed hearings once to facilitate settlement discussions. On June 29, Columbia filed an unopposed request to push hearings again noting that more time is needed for settlement discussions. The ALJ granted this request on July 1. In general we see parties moving to a settlement in the case as a positive step forward in removing the rate case overhang.
- **CMS: Gas rate case approved:** On June 7 the Commission approved CMS' gas rate case settlement originally filed in June. The settlement includes a rate increase of $170Mn ($233Mn requested), maintains an ROE of 9.9% and an equity ratio of 50.75%. Additionally, the EIRP will continue with the increased spending amount of $250Mn for the 12 months ending Sept. 30, 2023, of which CMS will review the length of the EIRP in the next Nat Gas Delivery plan with considerations to complete the program beyond 2030. CMS will also write-off the capex (net of insurance proceeds) related to repair costs of the Ray Compressor Station from the Jan 2019 fire and maintains the ability to request cost recovery of said capex in future gas rate cases. The settlement also includes the approval of Revenue Decoupling Mechanism assumed from Case No. U-20650, as well as the company ceasing to move forward with Phase 2 of its NGDR Pilot and the company will seek recovery of costs associated with Phase 1 in future rate cases. Overall, this is a positive (but expected) catalyst for CMS and reduces rate risk for the gas segment moving forward.
- **ES: Water rate case:** On July 1 the Aquarion Water Company of CT submitted a letter of intent to PURA in regards to an application to amend existing rate schedules for the water utility to address an existing revenue deficiency. The application is expected to include a proposed multi-year rate plan beginning February 15, 2023 (Rate Year 1), February 15, 2024 (Rate Year 2), and February 15, 2025 (Rate Year 3). The application is expected to be filed within 30-60 days of the letter (August 1st to September 1st). Aquarion's last rate case was in 2013, and this rate case could lead to material changes in the rate/ROE profile of the ES subsidiary.
- **OGE: Securitization bond deal update:** On July 8 it was announced that the Oklahoma Development Finance Authority and OGE will issue ~$762Mn of recovery securitizations as a cost recovery mechanism for costs related to winter storm Uri. The first coupon is expected to be paid on February 1, 2023, with a maturity spread vs. Treasury coupon maturity spread between 115bps and 180bps. The bonds have a weighted average life of 24.42 years and scheduled final maturity of February 1, 2050. S&P and Fitch rated the bonds at AAA, while Kroll and Moody's have not yet released an official rating. Overall, it's a good sign to see securitizations sub 200bps spread vs. USTs given the volatile macro backdrop. Lower rates helps both customers and companies via bill headroom.
- **PCG: PG&E to apply for funds to extend life of Diablo Canyon plant:** Gov. Newsome has urged PG&E to preserve the Diablo Canyon plant to support grid reliability. PG&E will apply to receive funds from the Dept. of Energy for the extension of the lifespan of Diablo Canyon nuclear power plant. The DOE funded program was created specifically to help financially distressed nuclear plants remain open, coinciding with the US Gov't initiative to reduce fossil fuel use. The program is currently ~$6Bn in size, with funding coming from the infrastructure bill signed under the Biden Administration. On June 30 additional legislation was signed under Gov. Newsome including AB 205, which authorizes the creation of funding to extend the lifespan of existing plants currently scheduled for retirement. The funding from the DOE and Recently legislation was also signed by Governor Newsome on June 30· Assembly Bill 205 which authorizes the creation of funding to extend existing plants that are scheduled for retirement. Should the company receive funding, Diablo Canyon is expected to continue operation beyond the current retirement date of Aug. 2025.
- **ERCOT: Texas heat wave increases load demand in the state:** High temperatures in Texas are increasing load demand in the state. On July 7 ERCOT forecasted load demand peaking at 77.3 GW, just shy of the July 5 record of 77.5GW. Through July 12 the load demand range is expected to be between 77.8GW to 81.3GW. High temps in Texas are expected to reduce output of wind facilities by an average hourly output of 11.3GW, a 67% decrease. Reduced wind output could cause wholesale power prices and fuel demand to increase. According to the East Texas Benchmark Houston Ship Channel, gas spot prices for next day flows increased by $0.11 to $5.64/MMBTU, a sign of the increased demand for fuel amidst the current weather trends. We see high temps principally benefiting SRE (via Oncor) and CNP.

US Utilities: Week Ahead

Weekly Analysis & Datapoints; Into the earnings gauntlet; NEE 2Q Results; SO & SRE

Utilities | Weekly Analysis

- **What we're watching in the week ahead (7/25)**: Today**, 7/25** we're hosting a conference call with Kent Chandler, Chairman of the Kentucky PSC regarding energy & Utility Policy in the State of Kentucky. We see relevant read throughs to **AEP**, **PPL**, **AQN** and **NI** among others who operate in the state. **7/26 FE** reports earnings after market close. We remain bullish on shares into results see management working towards offsets for pension headwinds. **7/27 AEP** reports earnings where we expect management to reaffirm the Summer '22 timeline for KY close. **7/28** we expect **DTE, POR, CMS, SO**, and **PCG** earnings as well as **ES** results after market close. We also expect MISO Transmission awards to be finalized this week just in time for 2Q calls. We see the update as likely positive for **AEE** & **XEL**. See our earnings preview slides here.
- **Read-throughs from NEE's 2Q report:** We thought there were minimal surprises out of NEE's 2Q results. We are particularly encouraged by the backlog update where management added 500MWs / 1.5GWs to 22-23 / 24-25 COD respectively. While there has been some concern on continued renewable supply chain impacts disrupting origination timelines, comments from the call were positive in terms of management addressing UFLPA and DOC related tariff issues with management noting it's suppliers should be making component and wafers outside of China post the 24m timeframe. We see these comments as generally a positive read-across the AES' renewable business too. Separately, our Clean Tech team recently increased their 2023 solar model supply forecast to 25GWs from 21GWs Sizing 2023 Part 4 - Revising 2022/23 Forecast.
- **Week in review:** The UTY underperformed SPX this past week, with a 60bp loss vs. a 250bp gain for the S&P. The 10YR/30YR yields were 16bps/10bps narrower. Large Caps (-0.7%), Small Caps (-2.3%), Diversified (-0.1%) and LDCs (-0.7%) all saw losses this past week. **Top performers:** PCG, FE, SRE, NEE, POR, ATO, IDA, ES, CNP, AEE. **Bottom performers:** NI, LNT, CMS, OGE, XEL, DUK, D, WEC, AES, AVA. We believe SRE's continued contracting momentum on LNG (PA HOA with COP) is leading to outperformance. We note AES underperform could be related to 2Q EPS revisions (CSe $0.28 vs. Cons $0.32, 4wk Chg -15%), but we generally expect an in-line report from AES reiterating both FY22 EPS and the LT EPS CAGR of 7-9%.

DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, LEGAL ENTITY DISCLOSURE AND THE STATUS OF NON-US ANALYSTS. US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Weekly Data Point

- **SO: Georgia Power received IRP approval:** We see renewable deployment approval consistent with June settlement (2.3GW by 2025; 6GW by 2035); McGrau Ford battery storage project (265MW) is also approved as expected. There is an additional 500 MW battery storage approval granted which is more favorable than the settlement's proposed "case by case review/approval", although rate basing any of these incremental projects is unclear at this point. On the coal retirement front, all coal generation controlled by GP would be retired by 2028, with the only exception of Bowen (retirement date will be re-evaluated by the next IRP in 2025). We see this latest development all in line with the settlement and CSe baseline expectation.
- **SRE: CFE and SIP Expand Pacts for Mexico:** SRE and CFE announced several joint agreements to developer energy infrastructure projects in Mexico via a joint statement which includes rerouting the Guaymas-El Oro Pipeline Sonora), proposed Vista Pacifico Project and development of a potential LNG terminal in Salina Cruz. We remain focused on Vista Pacifico as a potential development project with the recent announcement outlining a path forward for the project including project configuration and advance in engineering and permits. Another positive data point for the LNG business, albeit many projects are long dated in nature.

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for AES Corp (AES.N)

Method: Our target price is $23 and is based on a SOTP analysis. We value the consolidated AES operation using a P/E method with a historical five-year average P/E multiple (11.3x) and projected 2023 EPS. For the Fluence stake, we derive AES' s proportional equity value using Fluence' s current market value and AES' s 34% ownership. We value AES' s DevCo business using an NPV approach by discounting to FCF to equity holders with a 12% discount rate. We rate AES Neutral as we expect the stock' s total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our $23 target price and Neutral rating include: (1) unexpected negative regulatory outcome in the US; (2) negative impact to AES's valuation owing to exposure to Fluence ownership; and (3) currency and political risks associated with AES's international business segments. Upside risk includes a better than expected rate outcome.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Ameren (AEE.N)

Method: Our target price is $94: We value AEE using a P/E methodology, applying relative P/E premiums and discounts to the company as a whole. In general, we view the Midwest (Illinois and Missouri) as a premium jurisdiction given the pro-development regulators and robust transmission development plan likely to be passed soon. We take a premium view on AEE (19.3x vs. 16.7x for the peer average), which we view to be fair given the strong upside potential and relatively limited downside risk for the company. We rate AEE Outperform as we expect the stock' s total return to outperform peers over the next 12 months.

Risk: Risks to achieving our $94 target price and Outperform rating include: Common equity funding that is not contemplated in our base-case scenarios, MISO Future 1 and 3 seeing delays, natural disasters, and a political landscape in the coverage area that is less favorable than current times. Climate change is also a risk to the extent that federal or state legislatures implement more restrictions on GHG emissions expected, which would increase standard asset risk for AEE's fossil generation. Commodity prices are surging, so Ameren must be diligent in maintaining bill pressure as it scales capex across IL and MO.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for CMS Energy Corp (CMS.N)

Method: Our target price is $69: We value CMS using an SOTP, applying relative P/E premiums/discounts to the two operating subsidiaries. In general, we view Michigan as a premium jurisdiction, given the historically constructive decisions and heathy earned ROEs. Michigan is also offering a premium allowed ROEs for renewable projects and EE. We take a premium view on both the Consumers and Enterprise segments with a 19.9x implied multiple for the electric and gas groups versus 17.6x and 16.7x implied multiples for the electric and gas peer groups, respectively. We place a premium on the two operating segments given the strength of the businesses and upside potential in both. We rate CMS Neutral as we expect the stock' s total return to be in line with peers over the next 12 months.

Risk: Risks to achieving our $69 target price and Neutral rating include: Difficulty executing on settled IRP plans that could lead to reduced capex spending and ultimately rate base growth. Construction delays could push back timelines for renewable projects and could delay upside from increased ROEs currently offered in Michigan for such projects. Increased severe weather events, particularly as coal plants are being phased out, could cause service continuity issues that would be costly to address.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for DTE Energy (DTE.N)

Method: We value DTE using an SOTP, applying 15% P/E premiums to both the electric (17.5x) and gas (16.6x) subsidiary, which yields a $133 target price. We hold a discounted view on Trading (-30% discount), given these are non-core businesses and contain higher earnings volatility. We rate DTE Outperform as we expect the stock' s total return to be above peers over the next 12 months.

Risk: Risks to our Outperform rating and $133 target price include: The uncertainties around timely recovery cost through base rate increase. The unregulated business earning is more susceptible to economic and industry cycles, with potential upside/downside.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for FirstEnergy (FE.N)

Method: We value FE using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries, which yields a $41 target price. We hold a discounted view on all utilities subsidiaries other than FET (-20% discount to Ohio utilities and 5% discount to the rest of the portfolio), given FE' s reputational risk and the upcoming base rate case filings across all jurisdictions, while the transmission company benefits from more constructive FERC regulation with timely and formulaic recovery. We rate FE Outperform as we expect the stock' s total return to outperform peers over the next 12 months.

Risk: Risks to out Outperform rating and $41 target price include: although the HB6 investigation is behind FE through the DPA, FE carries the reputation risk of a historically challenging organization. Even though the new management team has introduced internal control programs and is re-building the company's compliance culture, we recognize it takes time for a large organization to gradually achieve it.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NextEra Energy Inc. (NEE.N)

Method: Our target price is $79 is based on a SOTP analysis. On the regulated front, we use P/E approach based on forecasted 2024 EPS and electric group multiple of 17.5x. We apply 25% multiple premium to FPL and Gulf, given Florida is one of the most regulatory supportive jurisdiction in the country for of timely recovery of utilities' spending. We also consider the scale and efficiency of its operation as one of the best in the utilities space. We use EV/EBITDA approach to value the enterprise value of NEER's various business lines based on 2023 EBITDA. Our multiple is in-line with recent transaction multiples for each earning's driver. We subtract NEER's debt from enterprise value to derive equity value. We use a NPV approach to value DevCo's forecasted monetization proceeds with an assumed discount rate of 10.5%. Lastly, we value NEE's NEP LP stake proportionally using the current NEP share price multiply by NEE's LP share, then add GP IDR value, which is also estimated through an NPV approach. We rate NEE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to your Outperform rating and $79 target price include: 1) NEE's valuation multiple is more susceptible to market volatility as a growth name compared the value names; 2) the recent probe on solar anti-circumvention could exacerbate supply chain pressures; 3) Although benefiting from a deep bench of senior executives, Robo's retirement cast some doubt to the LT growth if NEE is not able to secure an effective new leadership team; 4) NEE's capital structures is among the most complex names and is more dependent on market condition.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for PG&E Corporation (PCG.N)

Method: Our target price is $15. We value PCG on an SOTP. We apply a 40% discount to our 2024E electric earnings, a 20% discount to gas earnings, and 10% discount to transmission earnings relative to the 2024E electric and gas group P/E multiples. We impute ~$1.0Bn of net wildfire liabilities, which include an additional $1Bn wildfire liability for fires to handicap incremental wildfire event risk. We see ~48% total return for PCG in our base case, which is the highest among any utility in our coverage group. Our target price implies an 11.5x consolidated P/E, a -48% discount, which is still the widest across the sector. We rate PCG Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $15 target price include: PCG has a history of having utility assets involved with large wildfires in CA. Additional wildfires in 2022-24 could materially affect our valuation. PCG is subject to environmental factors such as severe weather conditions and climate change, which could increase wildfire events. PCG's higher-than-average debt/capital and lower-than-average FFO/debt, while we forecast improving lower cash flow from rate proceedings or materially adverse rate case outcomes, could drive incremental equity needs or reduce the likelihood of reinstating the dividend.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Sempra Energy (SRE.N)

Method: Our $166 target price is based on an SOTP analysis. At the utilities, we use a P/E approach on 2024 projected net income. We apply a 15% multiple discount to SDGE, a 15% premium to Sempra Texas, and 5% discount to SoCalGas vs. their respective electric/gas 2024E group multiples. We view CA as a discount jurisdiction, owing to wildfire risk/recovery frameworks, and we see TX as a premium jurisdiction given outside growth opportunities and constructive regulatory framework. At SRE Infra, we apply a 13.5x EV/EBITDA multiple, which is 0.5-1.0x turns below where SRE recently monetized a 10% NCI interest in SRE. At for incremental LNG, we NPV the 20-year cash flows associated with ECA1 and Cameron Train 4 expansion, discounting them at Sempra's current expected market return of 9.3% for US projects and add 100bps to Mexico projects to reflect a country risk premium. Our SOTP base-case valuation implies a consolidated P/E multiple of 17.5x, which is in-line with current electric comps. We rate SRE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $166 target price include: (1) SRE operates several fossil fuel distribution systems, which subjects the company to event risk associated with transporting combustible molecules; (2) climate change and the increased frequency of wildfires across CA; (3) stranded asset risk associated with the gas distribution system; (4) regulatory outcomes, as our estimates assume constructive resolutions in both CA and TX on pending rate cases; and (5) performance of equity method investments, which SRE relies upon for cash flow.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Southern Co (SO.N)

Method: We value SO using an SOTP that leads to a $71 target price, applying relative P/E premiums/discounts to the various operating subsidiaries. All P/Es are based on our 2024E EPS. We view Georgia and Alabama as premium jurisdictions given numerous

constrictive mechanisms for real-time capital recovery. We have a discounted view on Southern Power (-25% discount, 13.4x), given it's non-regulated earning with higher volatility. We also take a discounted view of 30% on the Vogtle-related earnings given the uncertainties in project delay, concerns on cost overrun, and potentially higher burden to Georgia Power among other co-owners given the co-ownership agreement. We rate SO Underperform as we expect the stock's total return to underperform peers over the next 12 months.

Risk: Risks to achieve our $71 target price and Underperform rating include: The marketability of mandatory convertible securities and corresponding equity issuance. Non constructive ruling on Georgia Power's rate review, which could lead investors to take a discounted view on SO's largest earnings contributor. Climate change, and increased regulation on GHG emissions could accelerate closure of certain fossil investments which would increase stranded asset risks to shares. Lastly, Federal legislation, such as change in tax policy could negatively impact CFO for SO given its tax equity exposure through Southern Power.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Xcel Energy (XEL.N)

Method: Our target price is $72. We ascribe a 12.5% P/E premium to the wider regulated utility group average, which is in-line with XEL's historical 5yr average. XEL tends to trade with the 'premium' utilities given its strong track record for delivering on the high end of its 5-7% EPS CAGR. We see the premium further supported by XEL's history of generally constructive regulatory outcomes, the company's Steel for Fuel program, which has enabled an acceleration of energy transition-related capital expenditures, as well as the potentially positive benefits stemming from Build-Back-Better legislation. We typically would reflect a full 15% premium; however, we subtract 2.5% to handicap for wildfire risk in CO. We rate XEL Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to you Outperform rating and $72 target price include: Failure to obtain constructive outcomes in regulatory proceedings, failure to execute on the company's proposed IRP in CO, natural disasters, labor/inflationary pressures above management's current O&M trajectory. Climate change is also a risk to the extent federal or state legislatures implement more restrictions on GHG emissions than expected. Wildfires are becoming more common in some of XEL's service territories, which can cause its multiple to fluctuate more than peers.

Companies Mentioned *(Price as of 23-Jul-2022)*
AES Corp (AES.N, $19.73)

** Asterisk signifies initiation or assumption of coverage.*

As of December 10, 2012 Analysts' stock rating are defined as follows:
Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.
Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.
Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.
**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*
Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.
Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:
Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.
Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.
Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.
**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	55%	(29% banking clients)
Neutral/Hold*	34%	(21% banking clients)
Underperform/Sell*	10%	(17% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.
**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse Securities (USA) LLC..... Nicholas Campanella
There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.
Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.
An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. This research report is not a prospectus, basic information sheet (BIB) or a key information document (KID). Any recipients of this document should, however, note that any communication forwarding or using this research report as a basis for discussion, would qualify as such advertisement if it is intended to draw the recipient's attention to specific financial instruments covered by this research report.

US Utilities: KY PSC Chair Views; MISO Transmission Awards

KY regulatory environment (AEP/ATO/PPL/NI/DUK) takeaway notes + more

Research Analysts

Nicholas Campanella / 212 325 7505
nicholas.campanella@credit-suisse.com

Fei She, CFA / 212 325 7648
fei.she@credit-suisse.com

We provide key takeaways from our conversation with KY PSC chair Kent Chandler on the state's regulatory environment and comments from the widely anticipated MISO Tranche 1 Awards which we see as positive for AEE & XEL

- **AEP / ATO / PPL / NI / DUK: Conversation on KY regulatory environment:** We recently held discussions with KY PSC chair Kent Chandler to cover topics regarding utilities cost recovery, the higher fuel environment, utility M&A, state support on energy transition, and general thoughts on the states regulatory environment. Overall our conversations offered balanced and constructive views to both gas and electric utilities who operate in the state.
  - **Rate Cases Amidst Inflation**: Most companies have settled cases recently with committed stay-outs. Discussions noted DUK could see a potential case in KY but generally the state has seen settled cases with constructive outcomes for utilities. All gas LDCs have fairly robust fuel cost recovery mechanisms, as do the electrics, but the commissions is exploring how to better run the fuel adjustment clause (FAC) to help reduce volatility in times of pressure - essentially trying to alleviate both over and under recovery. The Commission appears supportive for utilities to utilize regulatory asset and deferral mechanisms to smooth out earnings impacts from extraordinary gas cost too.
  - **M&A:** The state has been a focus for utility M&A of late with the recent AQN / AEP KY Power transaction which has technically already been approved by the KY Commission. The transaction is part of a wider trend as holdcos continue to rotate portfolio asset/opcos are bought by smaller holdcos, while holdcos are justifying such transactions through tangible and identifiable benefits that commission is looking for. Companies have previously argued in joint applications that being part of a larger organization could benefit customers from cost of capital reductions, size & scale among other items. But now companies are going the other way, strategically divesting smaller underperforming assets. Despite this, discussions noted the Commission remains committed to public interest standard. We believe transactions that come with tangible identifiable customer benefits (such as rate credits) will fare better for ultimate approval or settlement based on the discussion points from our call. We think the environment is still ultimately supportive of future M&A. We have previously published a scenario analysis here for NI which includes selling the KY subsidiary at 2.5x RAB.
  - **AEP / AQN Mitchell Operating Agreement:** Recall parties filed at both KY and WV commissions proposing using the existing Mitchell operating agreement with out changes to allow the operating committee to determine any issues related to ELG investment and ownership/purchasing prices post 2028. The KY sale docket is closed but it is possible the commission may have to address the filing made by AEP in docket 2021-00370, so we did not discuss the matter thoroughly. Regardless, we still think AEP is on track to close the KY Power deal with the summer timeline to be re-affirmed on the 2Q call.
  - **Resource Adequacy and Capacity Planning:** Regarding energy transition, as a coal-rich state, investors should be mindful that the commission doesn't approve coal asset retirement, but leaves the recovery of undepreciated book value to a separate ask. As there could be additional federal mandates on environmental compliance investment, the commission would take a prudency review while economic benefit could be a big factor when considering approval. Discussions noted there should be consideration for future GHG compliance requirements that could affect cost prudency and we overall see the coal owning utilities (PPL) in the state as still on track to pursue transition goals. We note while PPL has a rider to amort stranded asset coal at full ROE, reg asset approval is still ultimately needed. We expect additional updates on PPLs coal transition by year end.
  - **Cost of Capital:** While conversations were clear that outside constituents will underwrite a lower ROE via unrecoverable M&A premium, our net takeaway is that higher ROEs are likely to be approved as interest rates increase.
  - **KY Political Arena:** We expect a generally stable environment for KY entering election season in '23 as the commissioner doesn't believe there will be big movement at state senate and additional

DISCLOSURE APPENDIX AT THE BACK OF THIS REPORT CONTAINS IMPORTANT DISCLOSURES, ANALYST CERTIFICATIONS, LEGAL ENTITY DISCLOSURE AND THE STATUS OF NON-US ANALYSTS. US Disclosure: Credit Suisse does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the Firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

commissioners appointed will help spread the workload and streamline processes within the PSC.

- **AEE / XEL: MISO Transmission Update Is Positive:** Yesterday as expected MISO voted on Tranche 1 of it's $10.3Bn investment plan. Tranche 1 provides a set of 'least regrets' solutions to meet portfolio changes of members and states principally to address 39GWs / 2GWs of coal / nuclear retirement being replaced with 37GWs/34GWs/ 19GWs of solar / gas / wind respectively. Of the $10.3Bn we see XEL eligible for $1.2Bn -$1.5Bn and AEE for potentially $1.5-$3Bn when comparing the total project portfolio vs. company service territory. Regarding AEE, the high end of our range assumes AEE fully builds project IDs 8, 10, 11, 12, 13, 14 as we are unsure on the CapEx split, expecting more details on AEE's Aug 5th call. Recall XEL already previewed $1-$2Bn of upside CapEx which will be funded with 50-50 debt / equity. Regardless, these are large opportunities which will be additive to both AEE & XEL's capital forecasts in the back half of the decade (Most ISDs are by 2030). We also see the Transmission update as positive for ATC (owned by WEC/LNT), and NI given project overlaps.

Figure 1: MISO Tranche 1 Transmission Awards

Tranche 1 represents the first iteration and includes 18 projects across the MISO Midwest subregion estimated at $10.3 billion

Assumption on all in-service dates is by 2030

ID	Project Description	Est. Cost ($M, 2022)
1	Jamestown – Ellendale	$439M
2	Big Stone South – Alexandria – Cassie's Crossing	$574M
3	Iron Range – Benton County – Cassie's Crossing	$970M
4	Wilmarth – North Rochester – Tremval	$689M
5	Tremval – Eau Clair – Jump River	$505M
6	Tremval – Rocky Run – Columbia	$1,050M
7	Webster – Franklin – Marshalltown – Morgan Valley	$755M
8	Beverly – Sub 92	$231M
9	Orient – Denny - Fairport	$390M
10	Denny – Zachary – Thomas Hill – Maywood	$769M
11	Maywood – Meredosia	$301M
12	Madison – Ottumwa – Skunk River	$673M
13	Skunk River – Ipava	$594M
14	Ipava – Maple Ridge – Tazewell – Brokaw – Paxton East	$572M
15	Sidney – Paxson East – Gilman South – Morrison Ditch	$454M
16	Morrison Ditch – Reynolds – Burr Oak – Leesburg – Hiple	$261M
17	Hiple – Duck Lake	$696M
18	Oneida – Nelson Rd.	$403M
	Total Project Portfolio Cost	**$10.3B**

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for AEP Inc (AEP.OQ)

Method: We value AEP using an SOTP methodology and our target price is $103. We apply the electric group's 17.6x P/E multiple to all subsidiaries while applying a 15% and 5% multiple premium to AEP TransCo and AEP Texas, reflecting formulaic/timely recovery in FERC jurisdictions and the relative constructive regulatory environment in Texas. For the unregulated power generation business, we apply a -15% discount given there's less earnings visibility and AEP is transitioning to a more regulated growth strategy. We currently have zero EPS contribution from Kentucky Power under a base-case assumption of a timely close of its sales transaction. We rate AEP Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $103 target price include: (1) any non-constructive regulatory decision for renewable capital spending recovery; (2) untimely execution of the Kentucky sale or unfavorable valuation applied to contracted renewable sales; (3) aggressive coal retirement programs could increase stranded asset risk given AEP's vision to retire an additional 5GW of coal generation by 2028.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Algonquin Power & Utilities Corp. (AQN.N)

Method: Our Neutral rating and US$14.5 target price are obtained from multiple methodologies, including: (a) a 2023e EBITDA driven NAV that includes a 14x multiple on the renewable energy segment and a 11.5x multiple on the regulated services segment; (b) a blended multiple of 14.5x on 2023e EV/EBITDA; and, (c) an implied ~5.50% 2023e dividend yield.

Risk: Risks to our Neutral rating and US$14.5 target price include: regulation; power prices; operational performance; and, among others, renewable power production levels that may vary from long-term average.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Ameren (AEE.N)

Method: Our target price is $94: We value AEE using a P/E methodology, applying relative P/E premiums and discounts to the company as a whole. In general, we view the Midwest (Illinois and Missouri) as a premium jurisdiction given the pro-development regulators and robust transmission development plan likely to be passed soon. We take a premium view on AEE (19.3x vs. 16.7x for the peer average), which we view to be fair given the strong upside potential and relatively limited downside risk for the company. We rate AEE Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to achieving our $94 target price and Outperform rating include: Common equity funding that is not contemplated in our base-case scenarios, MISO Future 1 and 3 seeing delays, natural disasters, and a political landscape in the coverage area that is less favorable than current times. Climate change is also a risk to the extent that federal or state legislatures implement more restrictions on GHG emissions expected, which would increase standard asset risk for AEE's fossil generation. Commodity prices are surging, so Ameren must be diligent in maintaining bill pressure as it scales capex across IL and MO.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Atmos Energy (ATO.N)

Method: We value ATO on a sum of the parts with a $124 target price. We apply relative P/E premiums/discounts to the regulated gas group multiple of 17.6x. At the distribution business, we apply a 15% premium. We think this is justified given ATO's best-in-class jurisdictions, continued constructive treatment in the regulatory arena, and management's conservative planning assumptions. At the Pipelines segment, we apply a 10% premium, lower than 15% to handicap for the unregulated nature of the RRC pipes. That said, we see the contracts offering utility-like returns with long-term contracts in place with all of ATO's LDCs. Our base-case scenario contemplates an 18.9x consolidated P/E, which is slightly lower the company's five-year historical average of 19.5x. We rate ATO Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to our Outperform rating and $124 target price include: Common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios could adversely affect our estimates. Gas is a highly combustible molecule. Pipeline leaks and explosions are risks of operating a gas distribution system, and any explosion/leak events could have a material adverse effect on ATO's multiple. ATO is subject to federal and state regulations, principally through rate regulatory proceedings. Failure to execute in the regulatory arena would inhibit shares from reaching our target price.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for Duke Energy (DUK.N)

Method: We value DUK using an SOTP, applying relative P/E premiums/discounts to the various operating subsidiaries, which yields a $112 target price. In general, we view Florida as a premium jurisdiction given numerous constrictive mechanisms for real-time capital recovery. We take a premium view on DEI (5% premium, 18.5x), which we flag as conservative given DUK has proven it can monetize this sub for 27.7x most recently with the announced minority sale to GIC. We take a discounted view on the commercial renewables segment given broad supply chain/inflation concerns and high proportion of HLBV income, which we believe are low-quality, non-cash earnings. We rate DUK Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to out Outperform rating and $112 target price include: common equity funding that is not contemplated in our base-case, Blue Sky, or Grey Sky scenarios. Failure to establish new rates at DEC/DEP, which could lead investors to take a discounted view on DUK's largest earnings contributor. Natural disaster risk, which could accelerate liabilities at DUK's numerous coal ash ponds or nuclear facilities. Climate change and increased regulation on GHG emissions could accelerate closure of certain fossil investments, which would increase stranded asset risks to shares. Lastly, Federal legislation, such as change in tax policy, could negatively impact CFO for DUK.

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource (NI.N)

Method: We value NI on a P/E approach that yields a $30 target price. Our base-case multiple of 17.8x is derived by taking the regulated electric and regulated gas group multiples and applying a weighted-average approach based on NI's rate base mix. We apply a 5% premium to this number to account for: (1) numerous tracking mechanisms in place to realize real-time return on capital; (2)

This report is beyond the fair use of clients with the trading ID of 1000 only.

new management, which is taking a refreshed view of the company's operating segments and pushing forward with a strategic review with the goal of creating value; and (3) potential upside to capex that isn't contemplated in our current EPS estimates. Our target price implied P/E multiple is 19.2x, which is in line to electrics and a premium to gas LDCs. We rate NI Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $30 target price include: Increased inflation above NI's cost-control ability, as well as headwinds delaying solar development via supply chain issues. Gas is a combustible molecule, and NI has a history of two separate high-profile explosions in the last 10 years, which could negatively affect the share price. Management also discussed buying and selling assets as part of its new strategy, and we think buying assets could weigh on NI's multiple. Climate change and increased scrutiny on GhG emissions is also a risk given ~70% of NI's rate base is coming from the gas distribution utility.

Target Price and Rating

Valuation Methodology and Risks: (12 months) for Xcel Energy (XEL.N)

Method: Our target price is $72. We ascribe a 12.5% P/E premium to the wider regulated utility group average, which is in-line with XEL's historical 5yr average. XEL tends to trade with the 'premium' utilities given its strong track record for delivering on the high end of its 5-7% EPS CAGR. We see the premium further supported by XEL's history of generally constructive regulatory outcomes, the company's Steel for Fuel program, which has enabled an acceleration of energy transition-related capital expenditures, as well as the potentially positive benefits stemming from Build-Back-Better legislation. We typically would reflect a full 15% premium; however, we subtract 2.5% to handicap for wildfire risk in CO. We rate XEL Outperform as we expect the stock's total return to outperform peers over the next 12 months.

Risk: Risks to you Outperform rating and $72 target price include: Failure to obtain constructive outcomes in regulatory proceedings, failure to execute on the company's proposed IRP in CO, natural disasters, labor/inflationary pressures above management's current O&M trajectory. Climate change is also a risk to the extent federal or state legislatures implement more restrictions on GHG emissions than expected. Wildfires are becoming more common in some of XEL's service territories, which can cause its multiple to fluctuate more than peers.

Companies Mentioned *(Price as of 25-Jul-2022)*

AEP Inc (AEP.OQ, $95.8, OUTPERFORM, TP $103.0)

Algonquin Power & Utilities Corp. (AQN.N, $13.56, NEUTRAL, TP $14.5)

Ameren (AEE.N, $88.28)

As of December 10, 2012 Analysts' stock rating are defined as follows:

Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.

Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.

Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.

**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*

Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.

Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:

Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	55%	(29% banking clients)
Neutral/Hold*	34%	(21% banking clients)
Underperform/Sell*	10%	(17% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

Credit Suisse's research reports are made available to clients through our proprietary research portal on CS PLUS. Credit Suisse research products may also be made available through third-party vendors or alternate electronic means as a convenience. Certain research products are only made available through CS PLUS. The services provided by Credit Suisse's analysts to clients may depend on a specific client's preferences regarding the frequency and manner of receiving communications, the client's risk profile and investment, the size and scope of the overall client relationship with the Firm, as well as legal and regulatory constraints. To access all of Credit Suisse's research that you are entitled to receive in the most timely manner, please contact your sales representative or go to https://plus.credit-suisse.com.

Credit Suisse's policy is to update research reports as it deems appropriate, based on developments with the subject company, the sector or the market that may have a material impact on the research views or opinions stated herein.

Credit Suisse's policy is only to publish investment research that is impartial, independent, clear, fair and not misleading. For more detail please refer to Credit Suisse's Policies for Managing Conflicts of Interest in connection with Investment Research:https://www.credit-suisse.com/sites/disclaimers-ib/en/managing-conflicts.html.

Any information relating to the tax status of financial instruments discussed herein is not intended to provide tax advice or to be used by anyone to provide tax advice. Investors are urged to seek tax advice based on their particular circumstances from an independent tax professional.

Credit Suisse has decided not to enter into business relationships with companies that Credit Suisse has determined to be involved in the development, manufacture, or acquisition of anti-personnel mines and cluster munitions. For Credit Suisse's position on the issue, please see https://www.credit-suisse.com/media/assets/corporate/docs/about-us/responsibility/banking/policy-summaries-en.pdf.

The analyst(s) responsible for preparing this research report received compensation that is based upon various factors including Credit Suisse's total revenues, a portion of which are generated by Credit Suisse's investment banking activities

Please refer to the firm's disclosure website at https://rave.credit-suisse.com/disclosures/view/selectArchive for the definitions of abbreviations typically used in the target price method and risk sections.

Singapore recipients should contact Credit Suisse AG, Singapore Branch for any matters arising from, or in connection with, this research report.

Analysts who conduct site visits of covered issuers are not permitted to accept payment or reimbursement for travel expenses from the issuer for the site visit.

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit https://www.credit-suisse.com/sites/disclaimers-ib/en/canada-research-policy.html.

Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment.

To the extent any Credit Suisse equity research analyst employed by Credit Suisse International (a "UK Analyst") has interactions with a Spanish domiciled client of Credit Suisse AG or its affiliates, such UK Analyst will be acting for and on behalf of Credit Suisse Bank (Europe), S.A., with respect only to the provision of equity research services to Spanish domiciled clients of Credit Suisse AG or its affiliates.

Pursuant to CVM Resolution No. 20/2021, of February 25, 2021, the author(s) of the report hereby certify(ies) that the views expressed in this report solely and exclusively reflect the personal opinions of the author(s) and have been prepared independently, including with respect to Credit Suisse. Part of the author(s)´s compensation is based on various factors, including the total revenues of Credit Suisse, but no part of the compensation has been, is, or will be related to the specific recommendations or views expressed in this report. In addition, Credit Suisse declares that: Credit Suisse has provided, and/or may in the future provide investment banking, brokerage, asset management, commercial banking and other financial services to the subject company/companies or its affiliates, for which they have received or may receive customary fees and commissions, and which constituted or may constitute relevant financial or commercial interests in relation to the subject company/companies or the subject securities.

This research report is authored by:

Credit Suisse Securities (USA) LLC	Nicholas Campanella ; Fei She, CFA

There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.

Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.

An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Important disclosures regarding companies that are the subject of this report are available by calling +1 (877) 291-2683. The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures. For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This article is intended for use solely and exclusively by the person to whom it is addressed

This report is produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change.

Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).
Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.
Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.
EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials,management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. - **What we're watching in the data point drought (8/22**): It remains a quiet week ahead as 2Q reporting has largely finished and Fall conference season has yet to kick off. Inflation Reduction Impacts (IRA) remain top of mind for investors with **EXC** (not covered) disclosing a $200Mn ongoing cash tax impact from the IRA bill (despite the additions of accelerated depreciation) this past week. The data point is largely confirmatory of the view that T&Ds remain overall worse positioned than vertically integrated utilities in terms of corporate minimum tax impacts. We have been fielding some incoming questions on the impact to **FE** but note just a 20-40bps modest impact to FFO/Debt. Overall, we still see utilities as net benefiters from the bill due to tax credits extensions, nuclear PTC and the potential for continued customer savings from 'steel for fuel' opportunities. Bottom line, we still think AMT related cash flow issues will be limited when assessing our coverage universe.
- **LDCs: NatGas back to $9/mmbtu & strips higher too:** We see utility hedging strategies for '23 and '24 as an important question as we enter prep for 2H22 updates. Natural gas is back to 1-year absolute highs and the current strip implies $5-6/mmbtu in '23/'24 which is higher vs. 1M, 6M and 1YR ago views. We see this as resulting in bill pressure to LDCs broadly but note hedging strategies are idiosyncratic across our coverage, given regulatory frameworks, fuel clauses and tracking mechanisms to consider. Overall, we do see the sector able to manage this headwind to 2023 CapEx deployment but note the latest move is one to watch amidst ongoing bill inflation pressures.
- **Week in review:** The UTY outperformed the S&P 500, seeing a 110bp gain vs. a 120bp loss for the SPX. 10YR/30YR USTs were 14bps/10bps wider. Large Caps (+1.4%) Small Caps (+0.4%), Diversified (+1.1%) and LDCs (+1.5%) all saw gains. **Top performers:** SWX, D, AES, DUK, AEE, PEG, SO, SRE, OGE and WEC. **Bottom performers:** EVRG, ES, ETR, CNP, SJI, AGR, ALE, PCG, EXC and NEE.
- **PNW: AZ ACC Rate Case Read Across at SWX:** Recall SWX filed a gas rate case last December with 9.9% ROE, 51% equity layer and year-end rate base of $2.6Bn. Recently, staff filed a recommendation of 9.3% ROE, 49.29% equity layer and same rate base. We don't cover SWX but want to flag as a potential read across to PNW who is filing a rate case for the subsidiary Arizona Public Service in October. We expect PNW to address pension, large capital projects and renewable spending tracker issues during this rate filing, but ROE and equity layer will also be a focus with the prior authorized ROE of 8.7% being quite low relative to peers. Overall, a 9.3% ROE is slightly positive vs. low expectations on PNW though still below the national average.
- **ETR: Chairman and CEO Leo Denault announces transition plan:** On August 17th ETR announced that Leo Denault will be retiring in 2023, capping off twenty-three years with the company. The ETR Board of Directors elected Andrew Marsh to be his successor, from his current role as Executive Vice President and Chief Financial Officer. Marsh will become the acting CEO effective November 1st, and Denault will continue to lead the Board of Directors until as the Executive Chairman until his retirement. Marsh has been with ETR since 1998 and was named Executive Vice President and Chief Financial Officer in 2013. We're not surprised by the move, seeing the transition for Denault and Marsh well telegraphed and in-line with prior executive management changes (recall Denault previously was CFO). Marsh will be succeeded by EVP and CFO Kimberly Fontan, who is currently SVP and Chief Accounting Officer.
- **NI: Executive Vice President and Group President Pablo Vegas announces exit from company:** On August 16th it was announced that Pablo Vegas will be leaving his current role at NI to become the President and CEO of the Electric Reliability Council of Texas (ERCOT), effective Oct. 1st. It is currently unclear who his successor will be, and Vegas will remain with the firm until Sept. 2nd while NI searches for a replacement. We note there have been a few management changes in the last 6 months at NI as new CEO Llyod Yates works through the broader strategic review. Melody Birmingham and William Jefferson joined as Chief Innovation Officer and Chief Safety Officer respectively. NI's strategic review remains ongoing with the company still committed to an Analyst Day in November – see our latest thoughts on the strategic review here.

fei.she@credit-suisse.com

- **What we're focused on this week (9/19):** We expect an update on the DTE electric rate case on Monday Sept. 19th via a PFD from the M-PSC ALJ. The most recent staff recommendation was 8/16, and included a $145Mn rate increase with a '23 test year, 9.6% ROE and 39.62% eq. layer, vs the original request of $370Mn rate increase, 10.25% ROE and 39.62% equity layer.
- **Back 2 School Marketing Feedback: What's been topical?** We have been marketing in NYC the last week with most investor discussions focused on 3Q / EEI updates, inflation impacts, IRA and financing considerations for specific companies. On pension names FE and PEG, at **FE** most investors have viewed the management review update as positive. Our conversations on **PEG** have been more mixed across HFs and LOs regarding the recent pension clarification filing; we still see an overhang on the stock due to downside to '23E EPS. Investors remain cautious on perceived negative cash flow impacts from the CMT to companies, though we note discussions with management teams and IR through the month have shown resilience with some even communicating a net positive impact. We still see T&Ds as worst position given lack of generation. Company specific discussions increasing in momentum: **ES into YE update**: What will the OSW proceeds yield (CSe $2.7Bn post tax cash)? How much can ES raise CapEx? We see $3Bn as base case. **NI into the AD:** The stock has been underperforming we believe due to wider LDC underperformance. We do see more positive optionality into the event given recent underperformance. **Our top Outperform names: FE** post management update where we believe a new CEO and upcoming asset sales provide continued positive catalysts into 3Q22 EPS. **ETR** with the potential to resolve remaining SERI settlements, large P/E discount, getting closer to end of hurricane season, optionality on NCI sale (mgmt. discussion here). **DTE** following the ALJ REC, upcoming IRP update in October, Capex raise and CSe expected guidance increase by YE. **PPL:** We see value in shares still at a 7.5% P/E discount with a de-risked outlook on equity needs, rate reviews and balance sheet. Upside to O&M efforts also remains an angle. We're more cautious on **DUK:** We still see Street EPS too high into 3Q22/EEI update, where we expect a re-base. **POR:** We cut numbers last week on perceived equity dilution overshowing RFP upside potential.
- **Week in Review:** The UTY outperformed the S&P 500, seeing a 390bp loss vs a 480bp loss for SPX. 10YR/30YR USTs ended the week +14bps/+7bps, respectively. Large Caps (-3.1%), Small Caps (-3.1%), Diversified (-3.9%) and LDCs (-1.9%) all closed the week lower. **Top performers:** PCG, AGR, FE, AVA, SWX, OGE, EIX, BKH, PEG and CNP. **Bottom performers:** DTE, AEP, CMS, EVRG, PNW, WEC, NI, AES, NEE, EXC.
- **Model Updates: NEE & PPL:** We are tweaking our EPS estimates for NEE lower by 3-4c from '23 to '26 to reflect equity units issued with convert year in '25. We are also tweaking PPL EPS estimates by 1c in '22, '23 and '24 to reflect our updated quarterly figures in '22, and updating our TP to $32 from $31 to reflect a higher group multiple. We maintain our OP ratings on both PPL and NEE.
- **ETR: AR PSC Chairman Ted Thomas resigns after eight years:** Arkansas PSC Commissioner Ted Thomas resigned effective Oct. 1st citing frustrations relating to certain cooperatives in the state dragging their feet on rooftop solar installation and grid connection. Thomas mentioned that high natural gas prices have led to increased utility bills for Arkansans, with ~1/3 estimated to be unable to afford the higher bills seen throughout '22. Thomas expects natural gas prices, and ultimately utility bills, to continue to increase into '23 and further exasperating the problem. We see turnover form the AR PSC Chair as negative for companies who operate in the state, such as ETR, but note the company has a strong track record for constructive outcomes at both the PSC and legislative level. Thomas' term should have expired Jan. 2027 and we see the new Arkansas governor to be determined in the pending Nov election likely choosing the PSC replacement.
- **PCG: Mosquito fire becomes CA's largest wildfire of '22:** On Wednesday Sept. 14th the Mosquito fire, which is burning across the Sierra Nevada foothills, officially became the state's largest wildfire of the year. The fire is burning around NE Sacramento and as of Wednesday has burned ~65k acres in the area. It has been a rough fire-season for CA, as the McKinney fire became the largest of the year in July, burning ~60k acres but is now almost entirely contained. As of this morning (9/19) the fire has burned 76k acres and is 38% contained. PCG did say one of its power lines experienced a fault at the start of the fire around Sept. 6th, however after further investigation the line shows no damage. The cause of the fire remains under investigation.
- **EIA says US Carbon intensity within power sector continues to fall:** From '16 to '20, carbon intensity fell 18% driven by moving away from coal and towards gas and renewables, while EIA only sees 7 states as exceptions over this period of time. The states with highest carbon intensities from power generation all have large in-state coal/petroleum generation, which also represents opportunities in carbon reduction. We see TN, MD, IA, KS and OK as the five states with largest reduction in carbon intensity between '16 and '20. Within our coverage, capex driven by coal replacement power project is a trend we continue to monitor. With the passage of IRA and favorable tax provisions on ITC/PTC, nuclear/hydrogen subsidies, we see this carbon theme will continue to play out, driving earning's growth and company ESG attributes.
- **CA LDCs: California removes subsidy for setting up gas lines:** On Sept. 15th, CPUC, in a bid to accelerate its target for carbon neutrality by 2045, removed subsidies for builders for gas hookups in new homes and commercial buildings via a PD by the CPUC. This is in line with reducing greenhouse gas emissions, which accounts for 10% of the state's overall emissions. The decision is estimated to save ratepayers about $164 million a year. Utilities won't be allowed to bill customers for extending a gas line to a new residential or commercial building starting in July. However, state's big investor-owned utilities, including PG&E Corp. and Sempra Energy's Southern California Gas Co., have proposed a phased-in approach to removing subsidies over complete elimination, saying it will drive up costs for certain industries who don't yet have access to viable alternative low-carbon energy sources. We see the recent move as slightly negative as it increases hook up costs to potential new customers to CA service territories.
- **Comments on utilities' coal stockpile and impact from railroad strike tentative deal:** Based on the conversations we have with companies, utilities with heavy coal generation reliance (AEP/DTE/SO) seem comfortable with current coal stockpile, typically storing 30 days of inventory on site, enough in our view to shield from any short-term impact/disruptions from shortage of rail transportation, although it's getting unlikely as the tentative deal has been reached. Specifically, for DTE's Monroe (3GW) and Belle River (1GW), company is confident with current level of inventory on site; for AEP, total inventory is above target level (27 days); as for SO, similar level of inventory is maintained on site and limited rail disruption shouldn't be an issue. We do see higher coal usage given generally higher gas price YTD, which could cause tightness in coal supply, with some utilities entering shoulder season serving lower load, alleviating some demand in generation.
- **Moody's downgraded FE's CE and TE and moved outlook to stable from negative:** The downgrade of CE (senior unsecured rating to Baa3 from Baa2) and TE (issuer rating to Baa2 from Baa1) reflects weaker financial metrics impacted by customer refunds from last year's OH regulatory settlement agreement. Moody's is looking at the next rate filing by May 2024 as the next opportunity for these opco's to improve metrics. We note these two downgrades but don't expect them to materially change our view on FE, as the current plan to strengthen b/s seems sufficient to bring the consolidated FE credit metrics to a competitive level, which benefits opco's ratings.
- **EVRG: KS Corporate Commission (KCC) requires company to explain increase in capex plan:** The KCC ordered EVRG to explain a $1.2Bn increase in the company's capex spending plan compared to projections presented in the company's Sustainability Transformation Plan (STP) in '21. The workshop to discuss is set to be scheduled by Sept. 28th and must take place prior to Dec. 1st. The company is required to explain the increase to Commission Staff and the Citizens Utility Ratepayer Board (CURB), and submit an updated financial model prior to the workshop. The Commission and other stakeholders are investigating the increase to ensure the company is pursuing the goal of achieving regionally competitive rates and reliable electric service. From a headline perspective, we see this as negative for EVRG, but this does allow EVRG the opportunity to vet its financial plan with regulators ahead of the KS rate review.

- **What we're focused on this week (9/26):** At **D**, we expect mgmt. to file rebuttal this week in the companies OSW petition for limited reconsiderations as the performance guarantee remains front and center. At **OGE**, the company could file yet another FRP extension by Oct 1 with the recent denial of the previous FRP raising investor concern on the state; cautious read to **ETR**. Lastly, we flag **XEL** could see a verbal order in its CO gas rate case with hearings ongoing through 9/30. Elsewhere, we see investors focused on Fall conference season where companies are poised for updates before 3Q earnings. We note **LNT** (not covered) already posted slides last week affirming a 5-7% EPS CAGR despite recent IRA tailwinds to CapEx and funding considerations. Please see our latest Fall '22 Q-Bank for the US Utilities Sector.
- **Week in review:** The UTY outperformed the S&P 500 this past week, seeing a 300bps loss vs. 460bps for the SPX. 10YR/30YR USTs ended the week +24bps/+9bps, respectively. Large Caps (-3.1%) and Diversifieds (-3.8%) underperformed Small Caps (-2.2%) and LDCs (-2.6%) through the week. We do see the sector as increasingly stretched from a valuation standpoint (see our latest macro update here) when comparing to other GICS sectors, but the defensive nature of US utility equities is still leading to relative outperformance within the S&P. At a single stock level: Best Performers: CNP, PNM, WEC, NWE, ED, POR, ATO, ES, LNT, DUK. Worst Performers: DTE, ETR, EXC, PCG, D, EIX, SRE, PEG, AES, AGR. We note AGR held an Analyst Day update where we found the read across to both OSW and Renewable Developer returns to be somewhat cautious (see here).
- **PCG: 8-K Update on Mosquito Fire slight negative, but somewhat expected**: This morning, PCG filed an 8-K noting the United States Forest Service (USFS) communicated to PG&E an initial assessment that the fire started in the area of the utilities power line on the National Forest System lands and that USFS is performing a criminal investigation into the 2022 Mosquito fire. On Sept 24 USFS removed and took possession of one of the Utility's transmission poles and attached equipment. Note PCG already filed an electric incident report on Sept 8th, so we think investors we're already braced for some type of potential linkage to the Mosquito fire which currently 60% contained, destroyed 78 structures, damaged 13 structures. We will continue to monitor for new updates, but we emphasize event risk is common across CA utilities with PCG already trading at a 45% discount to our large cap peer group.
- **LNT: Still targeting 5-7% EPS CAGR with recent IRA benefits:** With the recent IRA bill, LNT (not covered) is planning to shift away from the current tax equity partnership (~35% tax equity stake) to full ownership for its planned solar and storage projects, as well as current '22 solar projects in WI. Last week the company posted a new slide deck noting that LNT continues to target 5-7% long term EPS growth and expects to release a refreshed capex and financing plan in conjunction with it's 3Q earnings announcement.
- **OGE: AR FRP extension denied:** On Sept. 20th, the AR PSC denied the company's application for extension of the FRP filed last year. The PSC said that it was not in the public interest, citing the limitations from the Formula Rate Review Act. The Formula Rate Review Act, which was enacted in April '21, requires explicit consideration and evidence of the costs and economic impacts to all customer classes when determining rates for utilities in AR. In May '22 the AR PSC granted an extension of the FRP, but with a 45% equity layer vs a 50% equity layer currently in place in AR. OGE filed a motion for reconsideration. The Commission ruled that they could not change equity, citing affordability concerns. Along with this, the Commission also indicated that netting of the third and fourth Evaluation Reports was neither necessary or required given they are based on historical FRP and did not include any projections. Per the original FRP document, should the Commission deny an extension, the then-existing total FRP rates will be in effect until the new base rates reflecting the then existing Total FRP revenue are approved and implemented, and until OGE recovers or returns the remaining netting of historical year difference adjustments. This means that rates may not necessarily change at this time, and that overall returns are not expected to decline even when the rider drops off at some point in the future. OGE is currently seeking clarification on if they have two more filings, which is being discussed as the company intends to file again, if possible, on Oct. 1st. We view this as an overall concerning data point for the state of AR given it is an unfavorable outcome for OGE and see a read-across to the potential for a similar outcome for other AR utilities such as ETR.
- **OGE & ETR: What's the revision risk to 45% equity layer?** We don't see this materially effecting OGE's 5-7% UP&O EPS CAGR as we calculate $0.02-0.03/sh of EPS headwind from moving to 45% equity layer but remain concerned on investor perception of the state. For peer ETR, we already assume a 47% equity layer with moving to a 45% equity layer representing $0.07/sh of EPS (1%). This is a manageable headwind in our view for a stock that already trades at one of the widest regulated discounts in our coverage universe. That said, AR still has the potential to remain an overhang with the recent abrupt resignation of AR PSC Chairman Ted Thomas .
- **NI Indiana rate case:** This past Monday (9/19) NIPSCO filed a rate request with the IURC to adjust base rates next year. The proposed increase includes phased in changes to 2023 and 2024 vs. a tradition one-time increase, with the principal driver of the request $840Mn of renewable investments being made through 2023 and $700mn of T&D upgrades. NIPSCO is asking for a $291.7Mn base rate increase (19%) based on $5.9Bn of rate base and a 10.40% equity layer / 51.63% cap structure. This compares to the currently authorized 9.75% ROE / 47.86% cap structure from 2019. While the headline numbers are large, we view the rate filing as somewhat expected with the company pursuing an aggressive generation transition in Indiana. We note NI has multiple outstanding rate cases (OH, PA) to be resolved this year where outcomes have admittedly been delayed vs. our initial expectations. Outside of GRC expectations, we see the driving force the stock being the pending Analyst Day update this November where we think investors base case assumption is extension of the 7-9% EPS CAGR.
- **NEE's FPL proposed plan to refund customer due to tax saving:** The total refund could amount to $400mm, with cadence of $25mm in Jan 2023 and rest phasing in from 2023 through 2025. This refund is due to FPL's current rate agreement which includes a provision accounting for changes to federal tax law and its impact on bill adjustments. FPL's regulated solar generation that began serving customers in 2022 are retroactively eligible for PTC, although Treasury/IRS implementation guidance is still underway. FPL projects that average Jan 2023 monthly bill could go down to $126 from $130. We believe this plan to lower customer bill should also benefit the regulatory relationship from the standpoint of improving customer affordability. We see the existing SoBra recovery mechanism and potentially more solar deployment due to overachievement of 30-by-30 plan continuing to drive savings given the passage of IRA, allowing FPL to create more bill headroom for regulated growth.
- **SRE sees blue hydrogen export opportunity to Asia; LNG build up on US west coast:** Nikkei reported this week that SIP is considering exporting blue hydrogen made from LNG to Japan/other Asian countries and employs carbon capture during the production process. The plan is to leverage Cameron and its expansion, although currently there is no timeframe and projects are in early phases. SIP president Dan Brouillette believes much of natural gas infrastructure has the interchangeability and can be used for hydrogen and ammonia. SIP is also considering building LNG facilities on the US west coast, better serving Asian consumers with roughly half the transport time. We see these early developments in hydrogen integration and LNG buildout both positive on top of SRE's current momentum in LNG contracting. Japanese/Asian demand should provide another pillar of foundation for long-term contracting with existing European off-takers.
- **D: VA to issue tax rebates:** The VA Dept. of Taxation will be issuing tax rebates to Virginians of $250 for individual taxpayers and $500 for joint filers after the Northam Admin found excess money in the state's budget. The rebates were a part of the VA Budget Package passed in June. Representatives of the Administration indicated that the funds were left over after spending on state investments. The tax rebates were included in the budget legislation amidst increased cost of living and inflationary pressure putting strain on Virginians. The move is helpful to residential ratepayers as rate affordability has been a key concern across most states amidst decade high inflation pressures. Most rebates are expected to be received by October, and the remaining rebates are expected to be sent out by the end of this year.
- **D: Responses from Office of the Attorney and Walmart in OSW docket** We note last week responses were filed in the Dominion's Petition for Limited Reconsideration as it pertains to the performance guarantee it's OSW rider order (PUR-2021-00142). In summary, Walmart and the DA both are pushing back on the rehearing request, though this should be somewhat expected in our view, and we flag the DA was not on the original settlement presented to the commission earlier in the year. This coming week we expect D to file rebuttal testimony and responses with potential resolution on the matter by year end '22.

NiSource (NI.N)

Reviewing our Expectations into the AD; Mgmt Meeting Takeaways

- We met with CEO Lloyd Yates yesterday and are providing takeaways from our discussions. Overall we see management on track to execute currently stated EPS goals for FY22 - FY24 with investors focused on NI's recently scheduled November 7th Analyst Day.

Company Code	NI.N
Rating	NEUTRAL
Price (27-Sep-22, US$)	26.86
Target price (US$)	30.00
52-week price range (US$)	32.46 - 24.23
Market cap(US$ m)	10,904
Enterprise value (US$ m)	23,744

Target price is for 12 months.

- **NI: AD Scheduled; What we're expecting into conf season updates:** NiSource scheduled their widely anticipated Analyst Day for November 7th where the company is expected to provide an update on long term growth and the strategic review. Overall, we came away more certain that NI will be pursuing a standalone utility plan that may or may not include OpCo asset sales, but regardless will target a 6-8% EPS CAGR at minimum on the LT extension. Recall NI is guiding to 5-7% EPS growth through 2023 and 7-9% through 2024 as renewable capital projects at NIPSCO move in-service. We don't believe investors should be assuming an 7-9% EPS CAGR on the extension, though this remains a possibility as NI firms up details into the event. We think 6-8% slightly underwhelms near-term expectations but we emphasize either outcome would be top quartile vs. peers.

- **New NiSource Vs. Old: Focus First On Increasing efficiencies:** As for the core of the plan, we believe management will be focused on 1) Driving O&M efficiencies in excess of what's been introduced via NI NEXT; 2) Financing the plan in the most shareholder friendly way, which could include traditional financing or asset sales and 3) Delivering a plan that sets up mgmt to beat and raise over the long term. On O&M, discussions indicated opportunities across A&G with efficiencies from tech deployment. We believe Mr. Yates remains focused on deploying best practices from peers DUK / SO. Utilities with greater O&M / CapEx alignment opportunities we think can be better positioned for inflation and we await updated details on the strategy in November.

- **Asset sales or not... we still think this is a moving target:** There has been significant volatility in capital markets over the past 60 days and we believe this adds to an increasingly difficult deal-making environment. NI is growing rate base 10% across most jurisdictions, and we expect an uptick in financing needs when management likely increases CapEx in November. Asset sales do appear more accretive at these levels, and management indicated that it is open to the best accretive avenue at the time of the Analyst Day. We provide a refreshed asset sale vs. equity issuance analysis below for $750Mn of incremental CapEx, seeing asset sales at 2.5x RAB as 2.7% accretive to our base EPS. We include our analysis below.

- **Expectations & Recent Performance:** NI's most direct comparables at the LDC (ATO & OGS) have underperformed the wider utility group on a 6M trailing basis (ATO -8.7%, OGS -15.1%, UTY --6.0%, SPX -19.7%), which we think has weighed on shares. Expectations have been quite wide on the range of outcomes for the stock, which we believe is due to the strategic review and managements openness to consider all options, including outright sale of the company as discussed on public conference calls. We think most investors now assume NI pursues a standalone plan.

- **Progressing Positively On Rate Cases:** Discussions noted confidence in achieving a settlement in OH, where we're watching for data-points ahead of the Oct 18-21 hearing dates. Management recently executed on a PA settlement for $44.5Mn revenue requirement (vs. $81Mn ask) which we view as constructive. Indiana was recently filed and NI feels confident given CPCNs already approved and renewable rate base assets representing a large portion of the regulatory ask.

Other Discussion Points

- **Interest Rates:** Discussions acknowledged higher interest rates and increases in short-term borrowing costs with NI recently issuing commercial paper at a 3.6% rate; this is fairly in line with current 3M Libor which is up ~350bps YTD. We see higher interest rates as a clear theme for 3Q / EEI updates for the sector, given the increases in short term borrowing costs for the sector and compounding effects of raising deferred asset balances.

- **Fuel considerations for LDCs**: CapEx still appears manageable at current inflationary and fuel levels despite recent pressure to customer bills.

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource (NI.N)

Method: We value NI on a P/E approach that yields a $30 target price. Our base-case multiple of 17.1x is derived by taking the regulated electric and regulated gas group multiples and applying a weighted-average approach based on NI's rate base mix. We apply a 5% premium to this number to account for: (1) numerous tracking mechanisms in place to realize real-time return on capital; (2) new management, which is taking a refreshed view of the company's operating segments and pushing forward with a strategic review with the goal of creating value; and (3) potential upside to capex that isn't contemplated in our current EPS estimates. Our target price implied P/E multiple is in line to electrics and a premium to gas LDCs. We rate NI Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $30 target price include: Increased inflation above NI's cost-control ability, as well as headwinds delaying solar development via supply chain issues. Gas is a combustible molecule, and NI has a history of two separate high-profile explosions in the last 10 years, which could negatively affect the share price. Management also discussed buying and selling assets as part of its new strategy, and we think buying assets could weigh on NI's multiple. Climate change and increased scrutiny on GhG emissions is also a risk given ~70% of NI's rate base is coming from the gas distribution utility.

** Asterisk signifies initiation or assumption of coverage.*
Effective July 3, 2016, NC denotes termination of coverage.

As of December 10, 2012 Analysts' stock rating are defined as follows:

Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.

Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.

Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.

**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%;*

This report is provided for the sole use of customer with the tracking ID 1010...

Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.

Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.

Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.

Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:

Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.

Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.

**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	54%	(28% banking clients)
Neutral/Hold*	35%	(20% banking clients)
Underperform/Sell*	10%	(18% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.

**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

For Credit Suisse Securities (Canada), Inc.'s policies and procedures regarding the dissemination of equity research, please visit https://www.credit-suisse.com/sites/disclaimers-ib/en/canada-research-policy.html.

Investors should note that income from such securities and other financial instruments, if any, may fluctuate and that price or value of such securities and instruments may rise or fall and, in some cases, investors may lose their entire principal investment.

To the extent any Credit Suisse equity research analyst employed by Credit Suisse International (a "UK Analyst") has interactions with a Spanish domiciled client of Credit Suisse AG or its affiliates, such UK Analyst will be acting for and on behalf of Credit Suisse Bank (Europe), S.A., with respect only to the provision of equity research services to Spanish domiciled clients of Credit Suisse AG or its affiliates.

Pursuant to CVM Resolution No. 20/2021, of February 25, 2021, the author(s) of the report hereby certify(ies) that the views expressed in this report solely and exclusively reflect the personal opinions of the author(s) and have been prepared independently, including with respect to Credit Suisse. Part of the author(s)´s compensation is based on various factors, including the total revenues of Credit Suisse, but no part of the compensation has been, is, or will be related to the specific recommendations or views expressed in this report. In addition, Credit Suisse declares that: Credit Suisse has provided, and/or may in the future provide investment banking, brokerage, asset management, commercial banking and other financial services to the subject company/companies or its affiliates, for which they have received or may receive customary fees and commissions, and which constituted or may constitute relevant financial or commercial interests in relation to the subject company/companies or the subject securities.

This research report is authored by:

Credit Suisse Securities (USA) LLC	Nicholas Campanella ; Fei She, CFA ; Nathan Richardson

There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.

Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.

An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Important disclosures regarding companies that are the subject of this report are available by calling +1 (877) 291-2683. The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures. For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This article is intended for the use of customers of the following ID of 10081917

This report is produced by subsidiaries and affiliates of Credit Suisse ("CS") operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change.

Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk.

This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).
Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.
Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.
EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials, management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Reviewing the potential path(s) forward: Maintaining Neutral

NI

Target price (12M, US$) 30.00
Neutral

Gas Utilities | Earnings

NI reported in-line 2Q result and the call focused on the strategic review, renewable flexibility, and the narrowed AD date to Nov. We are not surprised and continue to see the current valuation as fair with shares currently trading at 17.8x '24 Cons. EPS vs. LDCs at 16.5x and Electrics at 18.3x. NI is working to deliver on a value enhancing plan at the Nov AD and we're reviewing three potential paths forward: 1) standalone plan with additional CapEx; 2) asset sales to fund CapEx upside and 3) strategic sale of a consolidated company. Option 3 could offer the most potential upside to shares which trade at 1.4x EV/RAB vs. recent transaction comps at 2.0x; but we're not making a call on M&A as we think paths 1 or 2 are more likely outcomes.

- **Ongoing Strategic review: all options on the table with AD now in Nov:** Conf call commentary suggested strong demand for LDC assets remains in place under the higher interest rate environment, especially from big infrastructure funds. Stand-alone O&M optimization also remains ongoing with commentary suggesting extensive cost benchmarking work. Regardless of the path forward, senior mgmt. and board members believe a robust process should create shareholder value to be further discussed during the Nov AD. Each of NI's OpCos are growing RAB 10-12% vs. a 7-9% LT EPS CAGR. Call commentary suggested mgmt. is looking at an extension of the 7-9% vs. being monetized in a short-term environment, but we don't think this should be investors' base case.
- **Working through rate case settlement in OH and PA; Executing on mitigation plan for solar delay:** Recall OH rate case settlement timeline was pushed to Oct, while mgmt. remains confident with settlement and the delay should not hinder execution of '22 guidance. Management is also on track to resolve the PA rate case this year too. As it related to the base plan, NI remains focused on the plan laid out during the 1Q call through cost saving and capex pull forward to offset rate base impact due to delay solar deployment. AD/CVD relief provides further flexibility to the base plan today, and management affirmed all long term EPS metrics, CapEx, and funding targets in 2Q.
- **EPS Est. & Valuation:** We re-affirm our Neutral rating and $30 Target Price. Minor EPS changes on share count. Risks: Strategic review; Reg outcomes; supply chain.

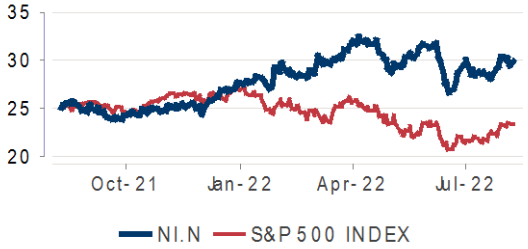
Company Background

NiSource (NI) is a gas & electric utility holding company.

Blue/Grey Sky Scenario



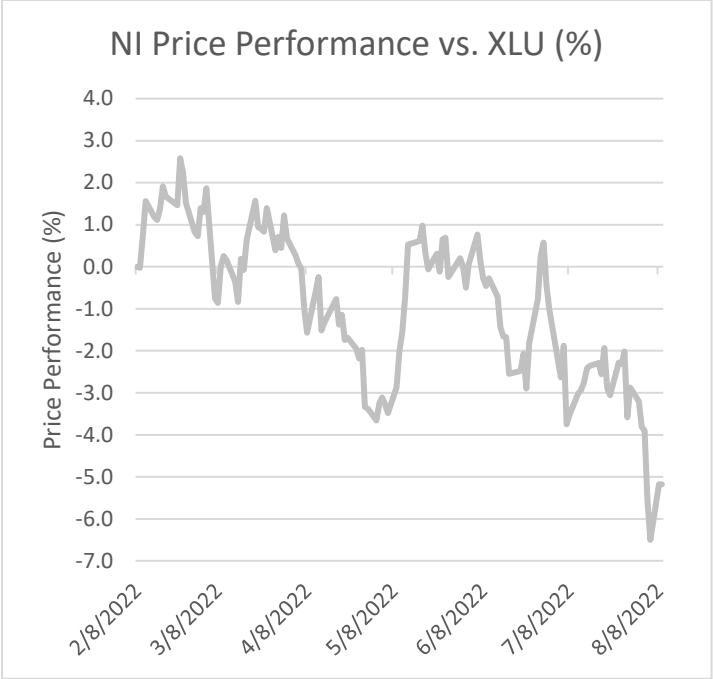
Our Blue Sky Scenario (US$) **32.00**

Our Blue Sky scenario contemplates a 19.2x blended 2024E P/E multiple, which could be achieved if: (1) NI raises capex above Street/our expectations; (2) management decides to pursue a go-private; or (3) NI raises 2022E EPS above consensus/our estimates and rebases the LT EPS CAGR higher.

Our Grey Sky Scenario (US$) **28.00**

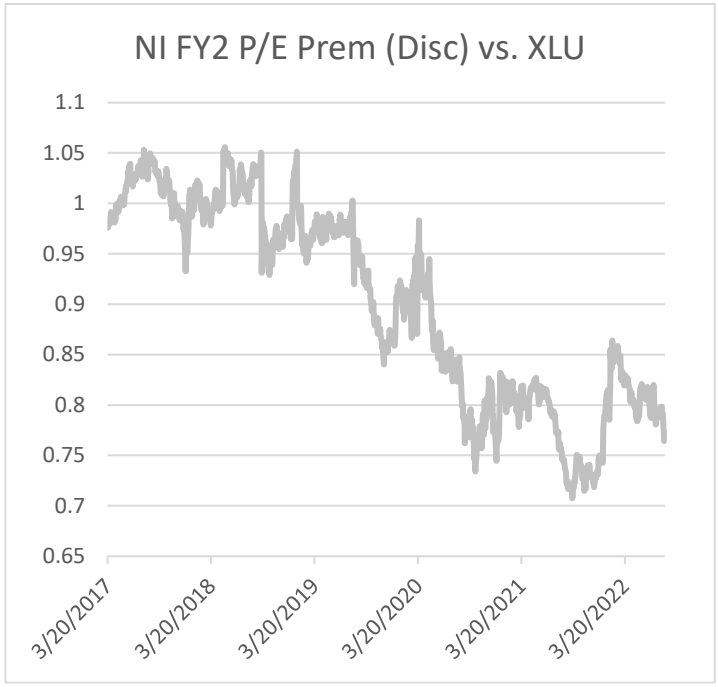
Our Grey Sky scenario contemplates an 16.6x blended 2024E P/E multiple, which could be realized if: (1) solar projects in NI's generation transition plan are delayed; (2) if management is unable to hit the midpoint of its stated EPS targets in 2022 or beyond; or (3) if management receives less constructive rate case outcomes than we expect.

Share price performance



On 08-Aug-2022 the S&P 500 INDEX closed at 4140.06
Daily Aug09, 2021 - Aug08, 2022, 08/09/21 = US$25.24

NiSource Trading Dynamics



We note shares have underperformed XLU peers through 1Q22 which we attribute to lack of visibility to the base plan amidst the ongoing AD/CVD pressures which have large renewable capital projects. Management cured concerns on the 1Q call which flowed through positively to the stock. However, we believe investors remained optimistic on a potential 'take-private' (as was reported in Bloomberg and other outlets) through the Spring with recent failed processes (SWX) from peers injecting further uncertainty in takeout optionality. We note NI now trades near relative lows on P/E vs. XLU when contrasting to the last 5 years as management has been working to restore confidence in the company post the Merrimac MA incident, Covid-related cost impacts and financing needs which have been an overhang for the stock. We do think the story is much clearer now on a 5yr basis which management addressing equity needs via converts and setting forth and achievable 7-9% EPS CAGR. **While we are now more positive on shares than our April '22 launch, we acknowledge limited upside to valuation on a 5% premium P/E view assuming an EPS outlook which is in line with the current 7-9% LT EPS CAGR, thus are affirming our Neutral rating.**

Key Investment Considerations

- **Sentiment for LDC M&A:** There has been private vs. public market arbitrage opportunities for LDC assets over the past 1-2 years and recall recent transactions, where CNP sold its AR/OK assets north of 2.0x rate base. Based on this and management commentary, NI could potentially consider monetizing its LDC asset to fund capex opportunities and reduce equity needs given this market sentiment. Recall CNP and NI both mentioned robust interest from infrastructure funds for such asset during most recent earing's calls. Despite the favorable backdrop, we view the recent development at SWX as negative and introduced some uncertainties into the overall market view on private vs. public arbitrage, especially M&A involving a consolidated company transaction. SWX also has a multi-state footprint, which raises execution risk comparable to NI and we see SWX's announcement of sticking with LDC asset as a negative read-across to NI complicating market sentiment, considering challenges where there's multiple hoops to jump through for regulatory approval.

- **LDC multiples have come in some too:** We believe shares have been pressured over the last two weeks from the broader decline in LDC multiples relative to electrics. We now see the sector trading at 16.5x 2024E EPS vs. large cap electrics at 18.3x.
- **Inflation Reduction Act & AMT impacts:** NI is looking at PTC / ITC transferability with the current plan not contemplating any IRA related provisions. Utilizing these concepts can increase investment and keep costs more competitive for customers. Based on management commentary on the call, there is potential upside for additional ownership of renewables through future RFP processes. In terms of AMT and cash flow impacts, with accelerated depreciation now allowed to offset the 15% AMT, utility companies are less impacted broadly. NI also has NOLs to be utilized through the first half of the decade. Lastly, we don't see the company hitting the $1Bn net income mark until ~2026E.
- **Upcoming RFP:** Recall NI is re-launching a prior all-source RFP which will consider resources for Michigan City retirement (450MWs). While the numbers could be completely different, we would expect this to be at least at or above the $750Mn of IRP related capex upside previously discussed by management in early '22.
- **MISO transmission capex within the decade:** Given the July MISO vote on tranche 1 transmission project, we see NIPSCo's service territory overlapping with Parcel IDs 15/16 (see below), which represents about $200-$500 mm non-competitive transmission opportunities within MISO that could be in service by late 2020/early 2030. We see this as on top of NI's existing base capital plan of $40 bn over 20+ years.

Figure 3: MISO Tranche 1 Transmission Investment Opportunity

Tranche 1 represents the first iteration and includes 18 projects across the MISO Midwest subregion estimated at $10.3 billion

Assumption on all in-service dates is by 2030

ID	Project Description	Est. Cost ($M, 2022)

EPS Estimates & Dashboard

There is no material change to EPS estimates compared to previous. The minor 1c shift in '23/'24/'25/'26 is due to updated share count and favorable view on additional cost cutting.

Strategic Funding Considerations – New Equity vs. Asset Sale

We continue to see the ongoing strategic review could potentially lead to a portfolio rotation opportunity and we run below scenario analysis, based on assumed $750mm capex upside related to the 2021 IRP (we also see capex upside from MISO transmission opportunities that are non-competitive nature for NI which would lean towards late 2020/early 2030). We show funding this at both current equity prices, with 14% FFO/debt minimum, and assuming monetizing a small KY gas LDC subsidiary at 2.5x RAB (see M&A comps here). We see still limited EPS accretion in asset sale scenario (2.7%) vs. simple equity issuance (1.8%), but nonetheless see either as value additive to NI's base 7-9% EPS plan.

Strategic Funding Considerations – Take Private

We heard a slight change in tone from the 2Q call that mgmt. was not ruling out the option of potentially taking company private given robust interest and valuation through private/public arbitrage. We ran a simple scenario analysis to show share price upside potential if a transaction valuation is above current market EV/RAB multiple for NI's asset (1.4x for 2022). Using a 1.8x EV/RAB multiple (recent transaction comps at 2.0x) would see meaningful shareholder value created through the monetization such favorable private valuation. We recommend investors risk adjust this figure when contemplating upside-downside skew to the stock, as we view any potential for a deal to be low probability but high impact and garner heightened execution risk. Under this scenario, we think investors should consider the need for potential substantial customer credits due to broader inflationary pressures, higher cost of capital, as well as mutli-state reg approvals. We also included our utilities M&A table showing average EV/RAB multiple for LDC transactions at 2.2x and electric at 1.8x, based on historical data points.

Valuation: TP remains $30

We are keeping our $30 TP and we maintain our Neutral rating on NI with 0.3% upside and 3.1% total return, in line with the average of our coverage universe. Our 5% premium view for NI's multiple remains unchanged which we apply for new management and the ongoing strategic review.

Figure 8: TP remains $30

Valuation Methodology and Risks

Target Price and Rating
Valuation Methodology and Risks: (12 months) for NiSource (NI.N)

Method: We value NI on a P/E approach that yields a $30 target price. Our base-case multiple of 17.1x is derived by taking the regulated electric and regulated gas group multiples and applying a weighted-average approach based on NI's rate base mix. We apply a 5% premium to this number to account for: (1) numerous tracking mechanisms in place to realize real-time return on capital; (2) new management, which is taking a refreshed view of the company's operating segments and pushing forward with a strategic review with the goal of creating value; and (3) potential upside to capex that isn't contemplated in our current EPS estimates. Our target price implied P/E multiple is in line to electrics and a premium to gas LDCs. We rate NI Neutral as we expect the stock's total return to be in line with peers over the next 12 months.

Risk: Risks to our Neutral rating and $30 target price include: Increased inflation above NI's cost-control ability, as well as headwinds delaying solar development via supply chain issues. Gas is a combustible molecule, and NI has a history of two separate high-profile explosions in the last 10 years, which could negatively affect the share price. Management also discussed buying and selling assets as part of its new strategy, and we think buying assets could weigh on NI's multiple. Climate change and increased scrutiny on GhG emissions is also a risk given ~70% of NI's rate base is coming from the gas distribution utility.

** Asterisk signifies initiation or assumption of coverage.*

Effective July 3, 2016, NC denotes termination of coverage.

As of December 10, 2012 Analysts' stock rating are defined as follows:
Outperform (O) : The stock's total return is expected to outperform the relevant benchmark* over the next 12 months.
Neutral (N) : The stock's total return is expected to be in line with the relevant benchmark* over the next 12 months.
Underperform (U) : The stock's total return is expected to underperform the relevant benchmark* over the next 12 months.
**Relevant benchmark by region: As of 10th December 2012, Japanese ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. As of 2nd October 2012, U.S. and Canadian as well as European (excluding Turkey) ratings are based on a stock's total return relative to the analyst's coverage universe which consists of all companies covered by the analyst within the relevant sector, with Outperforms representing the most attractive, Neutrals the less attractive, and Underperforms the least attractive investment opportunities. For Latin America, Turkey and Asia (excluding Japan and Australia), stock ratings are based on a stock's total return relative to the average total return of the relevant country or regional benchmark (India - S&P BSE Sensex Index); for China A share the relevant index is the Shanghai Shenzhen CSI 300 (CSI300); prior to 2nd October 2012 U.S. and Canadian ratings were based on (1) a stock's absolute total return potential to its current share price and (2) the relative attractiveness of a stock's total return potential within an analyst's coverage universe. For Australian and New Zealand stocks, the expected total return (ETR) calculation includes 12-month rolling dividend yield. An Outperform rating is assigned where an ETR is greater than or equal to 7.5%; Underperform where an ETR less than or equal to 5%. A Neutral may be assigned where the ETR is between -5% and 15%. The overlapping rating range allows analysts to assign a rating that puts ETR in the context of associated risks. Prior to 18 May 2015, ETR ranges for Outperform and Underperform ratings did not overlap with Neutral thresholds between 15% and 7.5%, which was in operation from 7 July 2011.*
Restricted (R) : In certain circumstances, Credit Suisse policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Credit Suisse's engagement in an investment banking transaction and in certain other circumstances.
Not Rated (NR) : Credit Suisse Equity Research does not have an investment rating or view on the stock or any other securities related to the company at this time.
Not Covered (NC) : Credit Suisse Equity Research does not provide ongoing coverage of the company or offer an investment rating or investment view on the equity security of the company or related products.

Volatility Indicator [V] : A stock is defined as volatile if the stock price has moved up or down by 20% or more in a month in at least 8 of the past 24 months or the analyst expects significant volatility going forward.

Analysts' sector weightings are distinct from analysts' stock ratings and are based on the analyst's expectations for the fundamentals and/or valuation of the sector* relative to the group's historic fundamentals and/or valuation:
Overweight : The analyst's expectation for the sector's fundamentals and/or valuation is favorable over the next 12 months.

Market Weight : The analyst's expectation for the sector's fundamentals and/or valuation is neutral over the next 12 months.
Underweight : The analyst's expectation for the sector's fundamentals and/or valuation is cautious over the next 12 months.
**An analyst's coverage sector consists of all companies covered by the analyst within the relevant sector. An analyst may cover multiple sectors.*

Credit Suisse's distribution of stock ratings (and banking clients) is:

Global Ratings Distribution

Rating	Versus universe (%)	Of which banking clients (%)
Outperform/Buy*	55%	(29% banking clients)
Neutral/Hold*	34%	(21% banking clients)
Underperform/Sell*	10%	(17% banking clients)
Restricted	1%	

Please click here to view the MAR quarterly recommendations and investment services report for fundamental research recommendations.
**For purposes of the NYSE and FINRA ratings distribution disclosure requirements, our stock ratings of Outperform, Neutral, and Underperform most closely correspond to Buy, Hold, and Sell, respectively; however, the meanings are not the same, as our stock ratings are determined on a relative basis. (Please refer to definitions above.) An investor's decision to buy or sell a security should be based on investment objectives, current holdings, and other individual factors.*

In addition, Credit Suisse declares that: Credit Suisse has provided, and/or may in the future provide investment banking, brokerage, asset management, commercial banking and other financial services to the subject company/companies or its affiliates, for which they have received or may receive customary fees and commissions, and which constituted or may constitute relevant financial or commercial interests in relation to the subject company/companies or the subject securities.
This research report is authored by:
Credit Suisse Securities (USA) LLC..... Nicholas Campanella ; Fei She, CFA
There is currently no universal definition or exhaustive list defining the issues or factors that are covered by the concept of "ESG" (Environmental, Social, Governance). If not indicated otherwise, 'ESG' is used interchangeably with the terms 'sustainable' and 'sustainability'. Unless indicated otherwise, the views expressed herein are based on CS' own assumptions and interpretation of ESG at the time of drafting. CS' views on ESG may evolve over time and are subject to change.
Where a sustainability assessment is identified as including elements which track environmental, social or governance (ESG) objectives, CS is, wholly or in part, reliant on third-party sources of information (including, but not limited to, such information produced by the issuing/manufacturing company itself) and external guidance. These sources of information may be limited in terms of accuracy, availability and timeliness. It is possible that the data from ESG data providers may be incorrect, unavailable (e.g., not existing, or absence of look-through), or not fully updated. CS has not sought to independently verify information obtained from public and third-party sources and makes no representations or warranties as to accuracy, completeness or reliability of such information. Additionally, as global laws, guidelines and regulations in relation to the tracking and provision of such data are evolving, all such disclosures are made on a non-reliance basis and are subject to change. Unless required by applicable law, CS is not obliged to provide updates on sustainability assessments. Any updates might be subject to a time lag, due to e.g. lack of available data.
An ESG assessment reflects the opinion of the assessing party (CS or external parties such as rating agencies or other financial institutions). In the absence of a standardized ESG assessment system, each assessing party has its own research and analysis framework/methodology. Therefore, ESG assessment or risk levels given by different assessing parties to the same company can vary. Further, ESG assessment is limited to considering company performance against certain ESG criteria only and does not take into account the other factors needed to assess the value of a company.

Important disclosures regarding companies that are the subject of this report are available by calling +1 (877) 291-2683. The same important disclosures, with the exception of valuation methodology and risk discussions, are also available on Credit Suisse's disclosure website at https://rave.credit-suisse.com/disclosures . For valuation methodology and risks associated with any recommendation, price target, or rating referenced in this report, please refer to the disclosures section of the most recent report regarding the subject company.

This report is produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division. For more information on our structure, please use the following link: https://www.credit-suisse.com/who-we-are This report may contain material that is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or which would subject Credit Suisse or its affiliates ("CS") to any registration or licensing requirement within such jurisdiction. All material presented in this report, unless specifically indicated otherwise, is under copyright to CS. None of the material, nor its content, nor any copy of it, may be altered in any way, transmitted to, copied or distributed to any other party, without the prior express written permission of CS. All trademarks, service marks and logos used in this report are trademarks or service marks or registered trademarks or service marks of CS or its affiliates.The information, tools and material presented in this report are provided to you for information purposes only and are not to be used or considered as an offer or the solicitation of an offer to sell or to buy or subscribe for securities or other financial instruments. CS may not have taken any steps to ensure that the securities referred to in this report are suitable for any particular investor. CS will not treat recipients of this report as its customers by virtue of their receiving this report. The investments and services contained or referred to in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about such investments or investment services. Nothing in this report constitutes investment, legal, accounting or tax advice, or a representation that any investment or strategy is suitable or appropriate to your individual circumstances, or otherwise constitutes a personal recommendation to you. Please note in particular that the bases and levels of taxation may change. Information and opinions presented in this report have been obtained or derived from sources believed by CS to be reliable, but CS makes no representation as to their accuracy or completeness. CS accepts no liability for loss arising from the use of the material presented in this report, except that this exclusion of liability does not apply to the extent that such liability arises under specific statutes or regulations applicable to CS. This report is not to be relied upon in substitution for the exercise of independent judgment. CS may have issued, and may in the future issue, other communications that are inconsistent with, and reach different conclusions from, the information presented in this report. Those communications reflect the different assumptions, views and analytical methods of the analysts who prepared them and CS is under no obligation to ensure that such other communications are brought to the attention of any recipient of this report. Some investments referred to in this report will be offered solely by a single entity and in the case of some investments solely by CS, or an associate of CS or CS may be the only market maker in such investments. Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. Information, opinions and estimates contained in this report reflect a judgment at its original date of publication by CS and are subject to change without notice. The price, value of and income from any of the securities or financial instruments mentioned in this report can fall as well as rise. The value of securities and financial instruments is subject to exchange rate fluctuation that may have a positive or adverse effect on the price or income of such securities or financial instruments. Investors in securities such as ADR's, the values of which are influenced by currency volatility, effectively assume this risk. Structured securities are complex instruments, typically involve a high degree of risk and are intended for sale only to sophisticated investors who are capable of understanding and assuming the risks involved. The market value of any structured security may be affected by changes in economic, financial and political factors (including, but not limited to, spot and forward interest and exchange rates), time to maturity, market conditions and volatility, and the credit quality of any issuer or reference issuer. Any investor interested in purchasing a structured product should conduct their own investigation and analysis of the product and consult with their own professional advisers as to the risks involved in making such a purchase. Some investments discussed in this report may have a high level of volatility. High volatility investments may experience sudden and large falls in their value causing losses when that investment is realised. Those losses may equal your original investment. Indeed, in the case of some investments the potential losses may exceed the amount of initial investment and, in such circumstances, you may be required to pay more money to support those losses. Income yields from investments may fluctuate and, in consequence, initial capital paid to make the investment may be used as part of that income yield. Some investments may not be readily realisable and it may be difficult to sell or realise those investments, similarly it may prove difficult for you to obtain reliable information about the value, or risks, to which such an investment is exposed. This report may provide the addresses of, or contain hyperlinks to, websites. Except to the extent to which the report refers to website material of CS, CS has not reviewed any such site and takes no responsibility for the content contained therein. Such address or hyperlink (including addresses or hyperlinks to CS's own website material) is provided solely for your convenience and information and the content of any such website does not in any way form part of this document. Accessing such website or following such link through this report or CS's website shall be at your own risk. This research report does not, and is not intended to be, an advertisement within the meaning of article 68 of the Swiss Financial Services Act and/or article 95 of the Swiss Financial Services Ordinance. This research report is not a prospectus, basic information sheet (BIB) or a key information document (KID). Any recipients of this document should, however, note that any communication forwarding or using this research report as a basis for discussion, would qualify as such advertisement if it is intended to draw the recipient's attention to specific financial instruments covered by this research report.

Additional Regional Disclaimers

Australia: Credit Suisse Securities (Europe) Limited ("CSSEL") and Credit Suisse International ("CSI") are authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority ("FCA") and the Prudential Regulation Authority under UK laws, which differ from Australian Laws. CSSEL and CSI do not hold an Australian Financial Services Licence ("AFSL") and are exempt from the requirement to hold an AFSL under the Corporations Act (Cth) 2001 ("Corporations Act") in respect of the financial services provided to Australian wholesale clients (within the meaning of section 761G of the Corporations Act) (hereinafter referred to as "Financial Services"). This material is not for distribution to retail clients and is directed exclusively at Credit Suisse's professional clients and eligible counterparties as defined by the FCA, and wholesale clients as defined under section 761G of the Corporations Act. Credit Suisse (Hong Kong) Limited ("CSHK") is licensed and regulated by the Securities and Futures Commission of Hong Kong under the laws of Hong Kong SAR, which differ from Australian laws. CSHKL does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Investment banking services in the United States are provided by Credit Suisse Securities (USA) LLC, an affiliate of Credit Suisse Group. CSSU is regulated by the United States Securities and Exchange Commission under United States laws, which differ from Australian laws. CSSU does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. Credit Suisse Asset Management LLC (CSAM) is authorised by the Securities and Exchange Commission under US laws, which differ from Australian laws. CSAM does not hold an AFSL and is exempt from the requirement to hold an AFSL under the Corporations Act in respect of providing Financial Services. This material is provided solely to Institutional Accounts (as defined in the FINRA rules) who are Eligible Contract Participants (as defined in the US Commodity Exchange Act). Credit Suisse Equities (Australia) Limited (ABN 35 068 232 708) ("CSEAL") is an AFSL holder in Australia (AFSL 237237).

Malaysia: Research provided to residents of Malaysia is authorised by the Head of Research for Credit Suisse Securities (Malaysia) Sdn Bhd, to whom they should direct any queries on +603 2723 2020.

Singapore: This report has been prepared and issued for distribution in Singapore to institutional investors, accredited investors and expert investors (each as defined under the Financial Advisers Regulations) only, and is also distributed by Credit Suisse AG, Singapore Branch to overseas investors (as defined under the Financial Advisers Regulations). Credit Suisse AG, Singapore Branch may distribute reports produced by its foreign entities or affiliates pursuant to an arrangement under Regulation 32C of the Financial Advisers Regulations. Singapore recipients should contact Credit Suisse AG, Singapore Branch at +65-6212-2000 for matters arising from, or in connection with, this report. By virtue of your status as an institutional investor, accredited investor, expert investor or overseas investor, Credit Suisse AG, Singapore Branch is exempted from complying with certain compliance requirements under the Financial Advisers Act, Chapter 110 of Singapore (the "FAA"), the Financial Advisers Regulations and the relevant Notices and Guidelines issued thereunder, in respect of any financial advisory service which Credit Suisse AG, Singapore Branch may provide to you.

EU: This report has been produced by subsidiaries and affiliates of Credit Suisse operating under its Securities Research function within the Investment Banking Division.

In jurisdictions where CS is not already registered or licensed to trade in securities, transactions will only be effected in accordance with applicable securities legislation, which will vary from jurisdiction to jurisdiction and may require that the trade be made in accordance with applicable exemptions from registration or licensing requirements.

This material is issued and distributed in the U.S. by CSSU, a member of NYSE, FINRA, SIPC and the NFA, and CSSU accepts responsibility for its contents. Clients should contact analysts and execute transactions through a Credit Suisse subsidiary or affiliate in their home jurisdiction unless governing law permits otherwise.

CS may provide various services to US municipal entities or obligated persons ("municipalities"), including suggesting individual transactions or trades and entering into such transactions. Any services CS provides to municipalities are not viewed as "advice" within the meaning of Section 975 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. CS is providing any such services and related information solely on an arm's length basis and not as an advisor or fiduciary to the municipality. In connection with the provision of the any such services, there is no agreement, direct or indirect, between any municipality (including the officials,management, employees or agents thereof) and CS for CS to provide advice to the municipality. Municipalities should consult with their financial, accounting and legal advisors regarding any such services provided by CS. In addition, CS is not acting for direct or indirect compensation to solicit the municipality on behalf of an unaffiliated broker, dealer, municipal securities dealer, municipal advisor, or investment adviser for the purpose of obtaining or retaining an engagement by the municipality for or in connection with Municipal Financial Products, the issuance of municipal securities, or of an investment adviser to provide investment advisory services to or on behalf of the municipality. If this report is being distributed by a financial institution other than Credit Suisse AG, or its affiliates, that financial institution is solely responsible for distribution. Clients of that institution should contact that institution to effect a transaction in the securities mentioned in this report or require further information. This report does not constitute investment advice by Credit Suisse to the clients of the distributing financial institution, and neither Credit Suisse AG, its affiliates, and their respective officers, directors and employees accept any liability whatsoever for any direct or consequential loss arising from their use of this report or its content. No information or communication provided herein or otherwise is intended to be, or should be construed as, a recommendation within the meaning of the US Department of Labor's final regulation defining "investment advice" for purposes of the Employee Retirement Income Security Act of 1974, as amended and Section 4975 of the Internal Revenue Code of 1986, as amended, and the information provided herein is intended to be general information, and should not be construed as, providing investment advice (impartial or otherwise).

Document Link

- We are providing quick takes before earnings today.
- **What the SWX strategic news means for the LDC sector:** Southwest Gas (not covered) today announced that they're continuing to execute their strategic plan at the utility while reviewing strategic alternatives for the MountainWest pipeline holding company and Centuri group. This comes after the company announced it had significant interest from potential bidders for all or part of the company in May '22. We believe the announcement is negative to the perceived private vs. public arbitrage that has existed over the last 1-2 years in the LDC market. Recall many LDC's have been sold (CNP AR/OK assets) north of 2.0x rate base, and there have been discussions that peer utilities such as NI can monetize LDCs as a means to fund future equity obligations. CNP management did note on the call yesterday that they still receive inbounds on their LDC portfolio, but we do see todays data-point as injecting some uncertainty into the overall markets view of the private vs. public arbitrage. There are specifics to the SWX footprint that should be considered such as regulatory jurisdictions, multi state footprint etc., but we still see this overall as a negative read-across to NI, CNP and others looking to potentially monetize LDC assets.
- **NI 2Q EPS (Neutral):** NI reaffirmed FY22 EPS of $1.42-1.48 and the 5-7% EPS CAGR through 2023, as well as the 7-9% EPS CAGR through 2024. CapEx of $2.4-2.7Bn in 2022 is reaffirmed as is the LT financing plan and LT capex plan. Management noted they remain committed to an Analyst Day in November where they will focus on extending NI's growth

plan. As expected, messaging on impacted renewable rate base projects and AD/CVD relief has provided additional flexibility to NI's mitigation plan. Settlement discussions in OH and PA remain ongoing and OH hearings were rescheduled to October to facilitate settlement discussions. Recall hearings were already pushed twice in the docket for settlement discussions. 2Q EPS was $0.12 vs. Cons $0.12 – quarterly EPS is less impactful this quarter as it's an LDC shoulder season. Topics for the call: Solar supply chain; IRA impacts / AMT; LDC M&A backdrop.

- **ETR 2Q EPS (Positive):** ETR reported $1.78/sh on an adjusted basis vs. Cons. of $1.37 and CSe of $1.31. The strong performance last quarter was largely driven by increased load demand via increased customer growth in the service territory and high temperatures across the region. ETR now expects 2.9% weather-adjusted sales growth vs. 2% in 1Q22 which we view as positive. Due to higher sales growth, ETR is flexing spending with O&M guidance now expected to be $0.60/sh for the year vs. $0.25/sh in 1Q22. This is a meaningful increase but should provide tailwinds in '23. ETR reaffirmed all performance metric guidance since the analyst day, including maintaining the current 6-8% EPS CAGR, with a bias towards the top half of the range in '22. ETR also completed several projects in 2Q including Sunflower Station, a 100MW solar asset in MS, a substation a part of a $44Mn investment in a distribution network in TX and increasing the AR RFP by 500MW to 1000MW. Key topics for the call include IRA/AMT impacts, SERI settlement update on funding outlook; equity needs update; O&M rationalization amidst inflation; load impacts. Our Analyst Day note can be found here.

- **PPL 2Q EPS (Neutral):** 2Q22 EPS of $0.30/sh vs. $0.19/sh 2Q21 and $0.29/sh Consensus. This inline print is driven by new retail rate implementation and higher sales in KY, higher peak transmission demand in PA, lower interest expense at corporate level, offset by higher O&M and integration expenses associated with the Rhode Island acquisition. Company reaffirmed 2022 EPS guidance range of $1.30-$1.45 and its EPS CAGR of 6%-8% through at least 2025 based off 2022 midpoint. It's a quiet quarter for PPL after the AD in June so we're not expecting material updates.

MISO Approves Tranche 1 Transmission Projects

Yesterday, the Midcontinent Independent System Operator (MISO) Board approved the Long-Range Transmission Planning Tranche 1 portfolio, which includes 18 projects in MISO's Midwest Subregion that totals $10.3 billion in investment to support system reliability. The assumption is that all projects will be in service by 2030, with some as early as 2028. Within our coverage universe, the projects identified on July 7th in Appendix A of the MISO Transmission Expansion Planning (MTEP21) Final Draft are located in AEE, NI, WEC and XEL's service territories, additional details by company within.

Next steps: MISO staff will determine and post the expected number of RFPs and whether it intends to stagger them by August 8th, then will post the schedule of the RFP releases on August 24th with the first RFP issued by September 23rd. Each of the RFPs will identify facilities eligible for the selected developer and states where they have the right of first refusal (ROFR). Separately, work on three more tranches is ongoing and MISO has indicated that an initial set of Tranche 2 projects also located at MISO North are scheduled for approval in the first quarter of 2023. Projects in Tranche 3 are located in MISO South, with approval scheduled for the fourth quarter of 2024, while projects identified in Tranche 4 are expected to improve transfer capability between MISO North and MISO South, with approval by the fourth quarter of 2025.

Ameren opportunities: Roughly $1.8 billion of the projects identified in the aforementioned MTEP21 Final Draft have listed Ameren as the transmission operator, including about $1,485 million in Illinois and ~$355 million in Missouri. Ameren has said it typically spends about 30% of MISO capex, which would have theoretically represented ~$3 billion of the Tranche 1 spending, so the preliminary award of $1.8 billion here would be less than that but we note that there are approximately $730 million of projects located in Missouri with a transmission operator "to be determined" which if AEE competes for and wins would put them closer to the ~$3 billion. We estimate the annual earnings contribution of the $1.8 billion projects identified for Ameren to be roughly $90 million, which would be ~7% of our 2024 EPS estimate of $4.65/share, though the projects are not expected to start going into service until at least 2028.

NiSource opportunities: Approximately $350 million of the projects identified in the aforementioned MTEP21 Final Draft have listed NiSource's NIPSCO subsidiary in Indiana as the transmission operator. NI has not indicated an amount that it was expecting to be rewarded. We estimate the earnings contribution of these projects to be roughly $17 million or ~1% of our 2024 EPS estimate of $1.73/share, though these projects are not expected to start going into service until at least 2028. Note that there are about $250 million of projects located in Indiana with a transmission operator "to be determined."

WEC opportunities: Approximately $800 million of the projects identified in the aforementioned MTEP21 Final Draft have listed ATC (American Transmission Company LLC) as the transmission operator, in which WEC has an approximately 60% equity ownership interest. WEC has not indicated an amount that it was expecting to be rewarded. We estimate the earnings contribution of these projects to be roughly $24 million or ~2% of our 2024 EPS estimate of $4.91/share, though these projects are not expected to start going into service until at least 2028.

Please see the analyst certification and important disclosures on page 3 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

This report is prepared solely for the use of Michael Weisenburger

Xcel opportunities: Roughly $150 million of the projects identified in the aforementioned MTEP21 Final Draft have listed Xcel Energy as the transmission operator. As of the first quarter earnings call the company was expecting to win $1-2 billion out of the $10.4 billion of projects to be awarded by MISO in the first tranche of Phase 1 spending, we will look for an update on their second quarter earnings call on Thursday. We estimate annual earnings contribution of the $150 million projects identified for XEL to be roughly $7 million or ~0.3% of our 2024 EPS estimate of $3.60/share, though these projects are not expected to start going into service until at least 2028.

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Michael Lonegan, Sharon Wang, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%
Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%

This report is prepared solely for the use of Michael Weisenburger

Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

Evercore ISI rating (as of 07/26/2022)

Energy | Power & Utilities

August 14, 2022

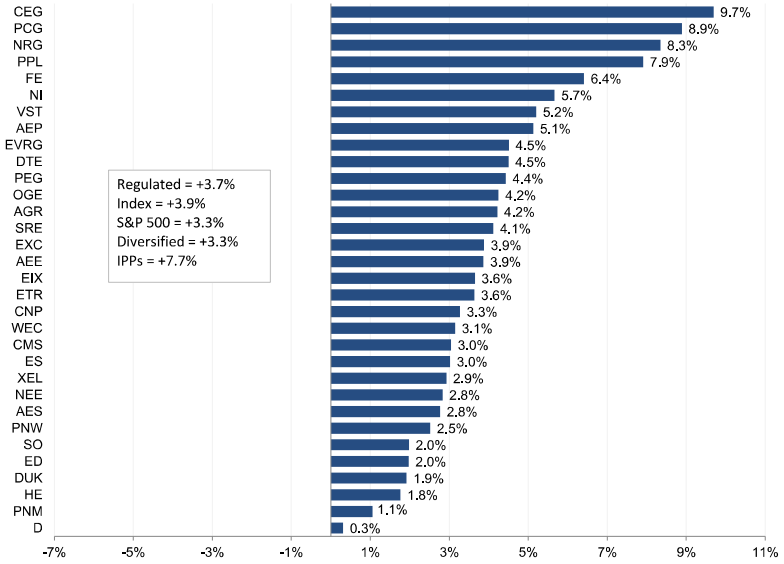
Durgesh Chopra
212-653-8998
durgesh.chopra@evercoreisi.com
Michael Lonegan
212-653-8997
michael.lonegan@evercoreisi.com
Sharon Wang
212-653-8999
Sharon.Wang@evercoreisi.com

Q2 Earnings Scorecard

Utilities modestly outperformed this past week. Regulated utilities under our coverage finished the week up +3.7%, outperforming S&P500 +3.3% which was up for a fourth-straight week since April, driven by more support around the peak-inflation theme. Diversifieds were +3.3% higher, while IPPs performed the best up +7.7%. In terms of specific stocks, CEG was the best performer up +9.7% (top beneficiary of Nuclear PTC included in the reconciliation bill which passed the house on Friday), while D was the worst, up +0.3%. On an absolute basis, the group is now trading in line with 12-month pre COVID recession levels and 10% below the valuation peak (pg.13). NTM P/E relative to S&P 500 is 3% below the 12-month pre COVID recession levels and 9% below the valuation peak (pg.14). Versus Bond Yields, group valuation is 1% above 08/09 pre-recession peak (pg.15). Recession and geopolitical risks have increased the appeal for defensive characteristics of the group vs the market as evidenced by material outperformance YTD (pg. 2). As we have stated in our **Utilities deep dive note** published in late March here (Utes/S&P500 +2%/-7% since Mar. 30th), we continue to expect the group to outperform relatively in the near term.

Stock Selection. We prefer value over quality: AEP (top pick), D, ETR, FE, EXC, NI, PPL and SRE are Outperform-rated names within the regulated value bucket. Within diversified names, we view AES (top pick) as best risk/reward and are Outperform-rated on PEG. We are also Outperform-rated on AEE, CNP, DTE and XEL within quality.

Weekly feature (Q2 Earnings Scorecard): With Q2 results, ~86% (vs 75% in Q1 2022) of the utilities met or exceeded Q2 EPS expectations: 18 (or ~62%) companies beat estimates, seven posted in line results, while four missing. 24 out of 29 companies reaffirmed expectations for 2022, four raised guidance at midpoint (CNP, WEC, DTE, and SRE) and HE lowered. Finally of those with established long-term growth rates in our coverage universe, guidance was reiterated or unchanged, see pages 3-6. Inflation Reduction Act (IRA) has been a key discussion topic with utility leadership viewing the bill as a tailwind to provide customer benefits and help enable their clean energy transition. Most companies under coverage have indicated that their preliminary. analysis suggests a non-material cash flow hit from 15% minimum tax after offsets (i.e. PTC, ITC). We show company specific commentary related to Inflation Reduction Act on pages 7-8.



Inflation Reduction Act of 2022 update. On Friday, the House passed the Inflation Reduction Act, sending the bill to Biden's desk to be signed into law. As a reminder, the spending side, the bill includes $369b in energy provisions - extension and expansion of PTC and ITC for Wind, Solar, Storage and other technologies. AES (Top pick), NEE & CWEN positioned to benefit the most. The bill also proposes a PTC for Nuclear - CEG and PEG best positioned. The revenue components of the bill include a 15% minimum tax on book income which could be a cash flow headwind for some companies. We view this bill if passed as a net positive for the sector with a potential to boost rate base/earnings growth while improving ESG profiles of companies within our coverage.

Please see the analyst certification and important disclosures on page 21 of this report. Evercore ISI and affiliates do and seek to do business with companies covered in its research reports. Investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Weekly Feature: Second Quarter 2022 Earnings Highlights

- Below we rank our companies by relative stock price performance versus the UTY on each company's Q2 earnings day and list key highlights.

Ticker	Price Implication	Beat estimates	Missed estimates	In line with estimates	Raised 2022 guidance at midpoint	Reaffirmed 2022 guidance at midpoint	Reaffirmed long-term growth forecast	Other notable announcements
NRG	4.4%		✓			✓	NA	Q2 results were impacted by the May 9th fire at Unit 8 of the Parish coal-fired power plant in Texas.They are executing on the $1B share buyback program for 2022 with $405MM in buybacks executed and $595MM remaining..
EIX	2.7%	✓				✓	✓	During the quarter, SCE resolved $400MM of claims for 2017/2018 Wildfire/Mudslide Events and maintained its best estimate of potential losses of $7.9B; now 89% has been resolved or $7.0B of the estimated claims. Moody's and Fitch recently affirmed EIX's credit ratings of Baa3 and BBB-, respectively, and raised their outlooks to Positive from Stable.
PNW	1.3%	✓				✓	✓	Customer and load growth continue to be strong but slower rate than last quarter.
ETR	1.2%	✓				✓	✓	2022 EPS now expected in upper half of guidance range.
FE	0.5%			✓		✓	✓	Pension EPS headwind now $0.30 versus $0.20-0.30 most recently and $0.10 as of the Q1 call. First Energy is taking multiple steps to address the impact. FE said premium valuations of its businesses in the private sector give it "significant optionality to further improve the balance sheet and increase value" for shareholders.
CNP	0.4%	✓			✓		✓	Currently developing Houston regional master energy plan with incremental capital expected to be announced on Q3 earnings call.
NEE	0.3%	✓				✓	✓	2Q22 renewables origination rate faster than last quarter's. FPL commissioned the 1,200 MW (or $900MM) Dania Beach Clean Energy Center during Q2. FPL also placed in service the North Florida Resiliency Connection transmission line, which physically connects the FPL grid and the legacy Gulf Power grid.
CEG	0.1%	✓				✓	NA	Hedged percentages decreased for 2022 and increased for 2023. Gross margin guidance unchanged for 2022, increased for 2023. Announced agreements with Bank of America and PNC Bank to procure carbon-free energy and RECs to reduce their carbon footprints through Constellation's CORe retail power product.
AES	0.0%	✓				✓	✓	AES has already signed or been awarded 1.6 GW of new long-term contracts so far this year (vs 1.1GW as of Q1), and continues to target 4.5-5.5 GW in 2022. Company does not expect any material delays on 5.9 GW of backlog projects in the US as a result of supply chain issues. With expected growth of more than 75% in installed renewable capacity over the next four years, AES says it is well on its way to becoming a majority carbon free and majority US company by 2025.
WEC	-0.1%	✓			✓		✓	WI rate case filed on April 28, 2022 with order expected in Q4 2022. WEC initiated Q2 EPS guidance range of $0.80-$0.84.
ED	-0.1%	✓				✓	NA	Con Ed continues to pursue strategic alternatives for the CEBs that is expected to be announced this year. The Company's EPS growth forecast and financing plan currently assumes no sale of the CEBs.

Weekly Feature: Second Quarter 2022 Earnings Highlights (Contd)

- Below we rank our companies by relative stock price performance versus the UTY on each company's Q2 earnings day and list key highlights.

Ticker	Price Implication	Beat estimates	Missed estimates	In line with estimates	Raised 2022 guidance at midpoint	Reaffirmed 2022 guidance at midpoint	Reaffirmed long-term growth forecast	Other notable announcements
AEE	-0.2%		✓			✓	✓	Ten-year capex program increased to $48+ billion from $45+ billion previously. MISO projects assigned to Ameren totaling ~$1.8 billion. MoPSC Staff reviewing Ameren Missouri's plans to retire Rush Island; under no deadline to issue a final report. CCNs filed with MoPSC in July for two solar project acquisitions.
NI	-0.2%			✓		✓	✓	Settlement approved in NIPSCO gas rate case and settlement discussions in Ohio and Pennsylvania gas rate cases. Fall Investor Day expected in November (date TBD), focused on extending NiSource's growth plan.
SO	-0.2%	✓				✓	NA	Vogtle unit 3 and 4 in service now expected at latter end of of prior expectation. Cost increased modestly. Third quarter 2022 EPS guidance issued in line with Street.
AEP	-0.2%			✓		✓	✓	Kentucky asset sale still expected to close this summer, awaiting the Sale Transfer approval from the FERC. Unregulated renewable sales process will officially launch by early September. Proceeds will be invested in the regulated businesses. In May, AEP closed on the sale of five unregulated renewable development sites in the Midwest. Expects to finalize the sale of an additional solar development site in Ohio in the third quarter. Total load has now fully recovered and is in the expansion phase. It now exceeds pre-pandemic levels. Analyst Day still planned for October 4th in NYC.
EVRG	-0.5%	✓				✓	✓	IRP annual update in Missouri and Kansas. Missouri rate cases – next step is surrebuttal / true-up testminony on August 16th. Kansas rate case – preparing to file in April 2023
HE	-0.6%		✓			✓	✓	HE maintained its 2022 consolidated EPS outlook of $2.00-2.20 but is now guiding to the lower half of the expected utility contribution of $1.68-1.78. HE is lowering the top end of its three-year 2022-2024 program range, now expecting $1,050-1,250MM versus $1,050-1,300MM previously.
PEG	-0.7%			✓		✓	✓	Infrastructure Advancement Program filing approved on June 29th -$511mm in spending included in current capex. A decision in the offshore wind transmission investment proposals (PEG submitted nine bids in Sept. 2021) that have been submitted with the NJ BPU, which PEG has said could be $1-3B in total incremental investment over the back half of the decade, is still expected in Oct. 2022.
ES	-0.8%	✓				✓	✓	Narrowed 2022 adjusted EPS Guidance range from $4.00 - $4.17 to $4.04 - $4.14. Strategic review of offshore wind assets underway with a potential sale of all or part of its 50% interest in offshore wind joint venture with Ørsted. MA House and Senate approved climate related legislation on July 21. MA electric rate case decision date of December 1, 2022. Aquarion Connecticut formal rate review filing expected in August 2022. ~$130M in ATM equity issuance through July – The current financing plan has a total of $1.2B equity through 2026.

Weekly Feature: Company Remarks to Inflation Reduction Act

Company	Comments
AEE	When asked about the Inflation Reduction Act, Ameren stated there are several moving pieces but added it was excited about the potential tax credits, especially for wind and solar, and stated that it views the 15% AMT as having manageable cash flow impacts for the Company.
CEG	CEG spoke to significant benefits from the IRA Act of 2022. The Company highlighted the following benefits it would receive with passage of the Inflation Reduction Act (IRA), including: 1) the benefits of the zero emission nuclear production tax credit for the production from existing plants beginning in 2024 through 2032. The Company would qualify for the new tax nuclear tax credit up to $15/MWh as long as market revenues do not exceed $25MWh, in which case the credit is reduced. The credit can also offset CEG's tax obligation or can be monetized by transferring it to another taxpayer; and 2) the benefits of the new 10-year fully-refundable tax credit for the production of clean hydrogen. Constellation would qualify for a credit of $3.00/kg for hydrogen facilities under construction before December 31, 2032. The Company could claim both the nuclear PTC and hydrogen PTC.
CMS	Management is encouraged by the clean energy provisions in the proposed Inflation Reduction Act bill, Solar PTCs in particular and stated that since they are below the $1B pretax earnings marker they will not be impacted by the 15% minimum tax provision.
D	When asked about the reconciliation bill, D views it as a positive for company's Decarbonization efforts. For instance, management pointed to full PTC credit for wind lowering their offshore levelized cost of energy (LCOE) by $7 or 8%, which provides more headroom to the prudency criteria of $125/MWh. 15% AMT is not expected to have a meaningful impact on company financials as they are already paying cash taxes at a 5.25% federal cash tax rate. After offsets to the AMT including accelerated tax depreciation, they don't expect materially higher cash tax payments.
DTE	Management views the Inflation Reduction Act is a tailwind for renewables, the 15% alternative minimum tax (AMT) is not expected to have a material impact on company's cash flows as accelerated tax depreciation and general business tax credits will serve as offsets.
DUK	When asked, management stated that clean energy tax provisions in the Inflation Reduction Act is an enabler of clean energy transition, 15% AMT could be a cash flow headwind but they would also benefit from tax credits.
EVRG	Management views the Inflation Reduction Act is a tailwind for renewables and since EVRG does not expect to be at the $1B pre-tax threshold until second half of the decade the 15% AMT will not have an impact on results over the next few years.
HE	The Act through the renewable tax credits could help Hawaiian achieve and potentially accelerate its 100% renewable target by 2045. We estimate that HE is on track for roughly $230 million of consolidated pre-tax earnings, so it is far from qualifying for the 15% alternative minimum tax since it is well below the Act's $1 billion threshold.

Weekly Feature: Company Remarks to Inflation Reduction Act (Contd)

NI	Company noted that the 15% minimum tax provision in the Inflation reduction act will not impact them over the next few years as they won't reach the $1B pre-tax earnings threshold until the second half of the decade.
SO	If enacted, Southern views the proposed Inflation Reduction bill as positive and pointed to the benefits of the solar PTC; the Company does not expect the 15% minimum tax provision to materially impact its results.
VST	The Inflation Reduction Act if passed, just like industry peers would bolster Vistra's renewable (VST Zero) growth profile and management stated that the 15% minimum tax will not be impactful through the planning horizon given Uri related and other book losses.
WEC	Management stated that the Inflation Reduction Act would be beneficial from a customer bill standpoint and provide WEC with future incremental renewable investment opportunities. 15% AMT is a manageable cash flow headwind of roughly $20M-$30M per year, while the legislation is going to be a net positive to company's credit metrics driven by offsets like higher pace of investment and monetization of tax credits amongst other things.
XEL	Management stated that the energy provisions included in the Inflation Reduction Act of 2022 would provide substantial customer benefits and help enable their clean energy transition. Furthermore, they can more than offset the cash flow drag from 15% minimum tax using renewable/other tax credits.
AES	The Inflation Reduction Act could be a material tailwind for AES, with management stating it could result in EPS growth toward the high end of the targeted 7-9%. The Company said it does not expect to reach the $1 billion pre-tax income threshold over the next few years, so the 15% AMT would not have an impact on company financials through the planning period.
EXC	The stock is a material relative underperformer today (-3% vs utility peers +0.5%) on earlier than expected equity issuance of $500m in 2022 (we were modeling ~$250m) and $300m/yr cash flow hit if Inflation reduction act were to pass.
PEG	The Company would be one of the prime beneficiaries of a nuclear PTC included in the Inflation Reduction Bill. That along with ongoing offshore strategic review by Eversource (expected to be complete by year-end) will be inputs into the Company's long-term portfolio strategy as it relates to the nonregulated generation assets; as a reminder, the Ocean 1 offshore project FID is anticipated in 4Q22 or 1Q23.

Utilities are trading above our Case 1. Post COVID valuations should diverge towards Case 2 longer term.

- Our historic base case ("case 1") assumed an orderly transition to higher interest rates, with authorized ROEs falling to 9.25% from 9.75%, and 10- year Treasury yields rising over the next several years, resulting at the end in a **2.50%** spread between the return on equity and the calculated cost of equity.
  - When you look at the current valuation of 18.9x '24, above our "case 1" scenario of 17.5x, as described above it implies moderation in authorized ROEs and gradual increase in treasury yields.
- The perceived "best in class" earnings compounders and COVID-19 immune names (WEC, NEE, ES, XEL, CMS) trade a multiple that discounts both a more or less status quo authorized ROE regime and a longer runway for sustained rate base growth. That is "case 3".
- In our "case 4" scenario we assume authorized ROEs moderate and interest rates rise more rapidly, resulting in a more meaningful near-term reduction in profitability, along with a steeper decline in rate base growth, which drives utilities back to a P/E multiple that is closer to long-term historic averages.
- We set our target prices on "market-agnostic" basis using an anchor P/E multiple of ~18x '24 EPS so investors can better see where we see good relative value. Near term we could see some pressure on multiples if spreads widen, long term we see multiples diverging back towards Case 2 as the economy recovers.

DDM Model ROE and Cost of Equity Assumptions	Case 1 Base Case	Case 2 Rates Low Long Time	Case 3 Rates Low Long Time	Case 4 ROEs Fade Rates Rise
ROE (Year 1)	9.75%	9.75%	9.75%	9.75%

Bond regression model output close to 08/09 pre-recession peak

- The group was 16% expensive on average when compared to Moody's Baa yield in our bond regression model 12mths prior to the 08/09 recession with group valuation peaking at 24%.
- Utes were 4% expensive on average in our bond regression model 12mths leading up to the COVID recession peaking at 12%.
- Prior peak suggests ~1% multiple contraction (assuming yields stay flat) considering bond model readings in 08 recession

The Spread Between Corporates And Treasuries Is In Line with The Historical Average

- The spread between corporates and Treasuries has averaged 223bp since 1970.
- At the beginning of 2015 the 10-year was ~2.2% and corporates were 4.7%, a spread of 250bp.
- The wide spread between US Treasuries and corporates was the key factor that made utilities look fully priced in our bond model from October 2015 through early April 2016.
- Prior to COVID, that spread peaked last at 363bp on 2/16/16, with the 10-year yield at 1.74% and corporate bond yield average at 5.37%. On 3/23/20 during COVID, the spread peaked at ~431bp.
- The spread was 156bp on 1/31/18 and is currently at **222** bp.

Utilities vs. Inflation

- We plot the utilities relative performance to S&P 500 vs change in consumer price index (CPI) going back to 2007. The top five inflationary periods in our analysis saw an average of 3.5% increase in CPI and a 2.7% average underperformance by utilities. Three of the top five inflationary periods saw meaningful underperformance by utilities but two (first half of 2022 and first half of 2008) saw outperformance.

Top 5 inflationary periods				
	CPI % change	Uts Relative performance	Baa yield % change	10yr Treasury % Change
First half 2022	4.8%	19.0%	42.2%	69.7%
First half 2008	3.7%	2.0%	4.6%	12.8%
First half 2021	3.3%	-3.4%	14.8%	75.3%
First half 2007	2.9%	-11.4%	5.7%	5.9%
Second half 2021	2.9%	-7.2%	2.4%	0.0%
Average	**3.5%**	**-2.7%**	**9.4%**	**29.8%**

Weekly Economic Chart: Reasons Inflation Slowing

- **Our Evercore ISI economist Ed Hyman published a report last week pointing out reasons inflation slowing.**
  1. Global economic slowdown.
  2. Plunge in money growth.
  3. Basis effects.
  4. Supply chain problems easing.
  5. Demand destruction.

OECD's global LEI is likely to decline to 97, as the global economic slowdown continues into 2023. This is likely to keep downward pressure on inflation.

ANALYST CERTIFICATION

The analysts, Durgesh Chopra, Michael Lonegan, Sharon Wang, primarily responsible for the preparation of this research report attest to the following: (1) that the views and opinions rendered in this research report reflect his or her personal views about the subject companies or issuers; and (2) that no part of the research analyst's compensation was, is, or will be directly related to the specific recommendations or views in this research report.

IMPORTANT DISCLOSURES

This report is approved and/or distributed by Evercore Group L.L.C. ("Evercore Group"), a U.S. licensed broker-dealer regulated by the Financial Industry Regulatory Authority ("FINRA"), and Evercore ISI International Limited ("ISI UK"), which is authorised and regulated in the United Kingdom by the Financial Conduct Authority. The institutional sales, trading and research businesses of Evercore Group and ISI UK collectively operate under the global marketing brand name Evercore ISI ("Evercore ISI"). Both Evercore Group and ISI UK are subsidiaries of Evercore Inc. ("Evercore "). The trademarks, logos and service marks shown on this report are registered trademarks of Evercore.

The analysts and associates responsible for preparing this report receive compensation based on various factors, including Evercore's Partners' total revenues, a portion of which is generated by affiliated investment banking transactions. Evercore ISI seeks to update its research as appropriate, but various regulations may prevent this from happening in certain instances. Aside from certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Evercore ISI generally prohibits analysts, associates and members of their households from maintaining a financial interest in the securities of any company in the analyst's area of coverage. Any exception to this policy requires specific approval by a member of our Compliance Department. Such ownership is subject to compliance with applicable regulations and disclosure. Evercore ISI also prohibits analysts, associates and members of their households from serving as an officer, director, advisory board member or employee of any company that the analyst covers.

This report may include a Tactical Call, which describes a near-term event or catalyst affecting the subject company or the market overall and which is expected to have a short-term price impact on the equity shares of the subject company. This Tactical Call is separate from the analyst's long-term recommendation (Outperform, In Line or Underperform) that reflects a stock's forward 12-month expected return, is not a formal rating and may differ from the target prices and recommendations reflected in the analyst's long-term view.

Applicable current disclosures regarding the subject companies covered in this report are available at the offices of Evercore ISI: 55 East 52nd Street, New York, NY 10055, and at the following site: https://evercoreisi.mediasterling.com/disclosure.

Evercore and its affiliates, and I or their respective directors, officers, members and employees, may have, or have had, interests or qualified holdings on issuers mentioned in this report. Evercore and its affiliates may have, or have had, business relationships with the companies mentioned in this report.

Additional information on securities or financial instruments mentioned in this report is available upon request.

Ratings Definitions

Current Ratings Definition

Evercore ISI's recommendations are based on a stock's total forecasted return over the next 12 months. Total forecasted return is equal to the expected percentage price return plus gross dividend yield. We divide our stocks under coverage into three primary ratings categories, with the following return guidelines:

Outperform- the total forecasted return is expected to be greater than the expected total return of the analyst's coverage sector.
In Line- the total forecasted return is expected to be in line with the expected total return of the analyst's coverage sector.
Underperform- the total forecasted return is expected to be less than the expected total return of the analyst's coverage sector.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances.*
Rating Suspended- Evercore ISI has suspended the rating and target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon.*

*Prior to October 10, 2015, the "Coverage Suspended" and "Rating Suspended" categories were included in the category "Suspended."

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell" to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Outperform, In Line, and Underperform ratings can be equated to Buy, Hold and Sell, respectively.

Historical Ratings Definitions

Prior to March 2, 2017, Evercore ISI's recommendations were based on a stock's total forecasted return over the next 12 months:

Buy- the total forecasted return is expected to be greater than 10%
Hold- the total forecasted return is expected to be greater than or equal to 0% and less than or equal to 10%

This report is prepared solely for the use of Michael Weisenburger

Sell -the total forecasted return is expected to be less than 0%

On October 31, 2014, Evercore Partners acquired International Strategy & Investment Group LLC ("ISI Group") and ISI UK (the "Acquisition") and transferred Evercore Group's research, sales and trading businesses to ISI Group. On December 31, 2015, the combined research, sales and trading businesses were transferred back to Evercore Group in an internal reorganization. Since the Acquisition, the combined research, sales and trading businesses have operated under the global marketing brand name Evercore ISI.

ISI Group and ISI UK:

Prior to October 10, 2014, the ratings system of ISI Group LLC and ISI UK which was based on a 12-month risk adjusted total return:

Strong Buy- Return > 20%
Buy- Return 10% to 20%
Neutral - Return 0% to 10%
Cautious- Return -10% to 0%
Sell- Return< -10%

For disclosure purposes, ISI Group and ISI UK ratings were viewed as follows: Strong Buy and Buy equate to Buy, Neutral equates to Hold, and Cautious and Sell equate to Sell.

Evercore Group:

Prior to October 10, 2014, the rating system of Evercore Group was based on a stock's expected total return relative to the analyst's coverage universe over the following 12 months. Stocks under coverage were divided into three categories:

Overweight- the stock is expected to outperform the average total return of the analyst's coverage universe over the next 12 months.
Equal-Weight- the stock is expected to perform in line with the average total return of the analyst's coverage universe over the next 12 months.
Underweight -the stock is expected to underperform the average total return of the analyst's coverage universe over the next 12 months.
Suspended- the company rating, target price and earnings estimates have been temporarily suspended.

For disclosure purposes, Evercore Group's prior "Overweight," "Equal-Weight" and "Underweight" ratings were viewed as "Buy," "Hold" and "Sell," respectively.

Ratings Definitions for Portfolio-Based Coverage

Evercore ISI utilizes an alternate rating system for companies covered by analysts who use a model portfolio-based approach to determine a company's investment recommendation. Covered companies are included or not included as holdings in the analyst's Model Portfolio, and have the following ratings:

Long- the stock is a positive holding in the model portfolio; the total forecasted return is expected to be greater than 0%.
Short- the stock is a negative holding in the model portfolio; the total forecasted return is expected to be less than 0%.
No Position- the stock is not included in the model portfolio.
Coverage Suspended- the rating and target price have been removed pursuant to Evercore ISI policy when Evercore is acting in an advisory capacity in a merger or strategic transaction involving this company, and in certain other circumstances; a stock in the model portfolio is removed.
Rating Suspended - Evercore ISI has suspended the rating and/or target price for this stock because there is not sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, a rating or target price. The previous rating and target price, if any, are no longer in effect for this company and should not be relied upon; a stock in the model portfolio is removed.

Stocks included in the model portfolio will be weighted from 0 to 100% for Long and 0 to -100% for Short. A stock's weight in the portfolio reflects the analyst's degree of conviction in the stock's rating relative to other stocks in the portfolio. The model portfolio may also include a cash component. At any given time the aggregate weight of the stocks included in the portfolio and the cash component must equal100%.

Stocks assigned ratings under the alternative model portfolio-based coverage system cannot also be rated by Evercore ISI's Current Ratings definitions of Outperform, In Line and Underperform.

FINRA requires that members who use a ratings system with terms other than "Buy," "Hold/Neutral" and "Sell," to equate their own ratings to these categories. For this purpose, and in the Evercore ISI ratings distribution below, our Long, No Position and Short ratings can be equated to Buy, Hold and Sell respectively.

Evercore ISI rating (as of 08/14/2022)

Americas Utilities

After outperformance, utilities still fine for defensive purposes; upgrading SRE from Neutral to Buy

Goldman Sachs & Co. LLC

PM Summary

Utilities do not screen attractively for investors seeking outsized returns, but do offer a defensive alternative in this volatile market. Relative valuation versus the market does not appear overly compelling – we forecast just 6% total return on average across our utilities coverage — but the regulated business model likely shields utilities, relative to other sectors in the S&P, from major EPS negative revisions. We believe regulated utilities' earnings growth profile remains largely intact despite the current macro-economic environment, offering 5-8% EPS growth and 3-4% average dividend yield for an ~8-12% long-term or multi-year total return proposition as per our estimates. That said, the current sector P/E multiple of 19.1x reflects a 20%/25% premium to the S&P 500 on 2023 GSe/FactSet consensus EPS estimate, which screens elevated relative to historical relationship in a 3+% 10-year treasury yield environment that warrants a multiple more in-line or at a modest discount to the broader market. On an absolute basis, the multiple screens modestly above the 5-year average P/E of 18x but below the 21.6x peak multiple (in early 2020).

We recommend investors remain selective in gaining utility sector exposure while maintaining a balanced approach, acknowledging that increasing recession risk — and concerns that the S&P 500 could face downward earnings revisions — could support current utility valuations near-term. With this note, we roll forward our valuation year, now applying a 17x base utility P/E multiple on 2024E EPS (versus 18x P/E on 2023E prior), which screens modestly below Factset consensus S&P500 target P/E of ~18x.

In our coverage universe of Regulated Utilities and Diversified Utilities, we highlight Buy rated DTE (on CL), and XEL as premium defensive oriented business models we find attractive, while also recommending value oriented stocks like FE, PPL, ETR and PCG. Among Diversified Utilities, AES screens attractively as a sum of the parts story — and in this note, we upgrade large cap SRE from Neutral to Buy on attractive valuation, solid growth at its Texas/California utility and its exposure to potential LNG export capacity growth projects.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Risk/reward for relative utility valuations skewed to the downside, but market earnings power remains key

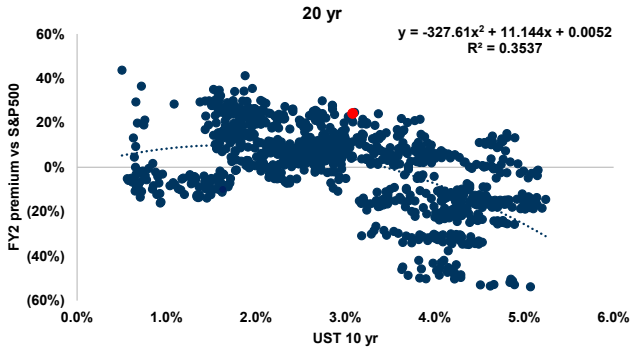
Key Summary: While US utilities trade below their peak P/E multiples — almost 11% below these levels — the sector on a relative basis screens at a ~20% premium to the S&P 500 (on GSe) which we do not view as attractive. That said, we do see a 6% total return to our US utilities coverage universe and view utilities as an appropriate investment option to position defensively. We recommend a selective approach to investing in utilities.

US utility valuations screen elevated versus historical relationship with 10-year yields... US utilities have outperformed the S&P 500 by ~17% year-to-date, despite US 10-year treasury yields rising from 1.6% to 3+% during the period. Over the past 20 years during periods of 3-3.5% 10-year treasury yields, utilities have traded relatively in-line with the broader market, while at a relative discount at yields over 3.5% (Exhibit 5). We note the current 25% P/E premium (on FactSet Consensus) is near the top of the historical range, although absolute valuations at 19.1x/17.9x on 2023E/2024E stand relatively in-line with its 5-year average levels. In addition, since 2000, utilities have traded at a discount to the market in periods when dividend yields are lower than the 10-year treasury yield (Exhibit 7); utilities currently offer a 3.3% average dividend yield versus 10-year yield at 3.1%.

...although more justified on a real-yield basis... In our 2022 outlook note, we noted how real rates in recent history had better explanatory power, with utilities trading at a relative discount in periods of negative real rates. From this perspective, with real rates (as measured by 10-year TIPS) now positive at 0.7% (Exhibit 8), this relationship implies the current utility valuation premium as justified, although still screening as largely reflected with limited further upside.

...and in a flattening term structure environment. Since 2010, during periods of bear flattening yield curve (10yr minus 2yr yield spread), utilities have outperformed all other sectors in the S&P 500 except for the energy sector (Exhibit 10). This seems logical, given recession concerns warrant some level of flight-to-safety to a relatively stable and defensive sector like utilities. Given increasing recession risk driving the current market downturn, we believe utilities could still trade at a relative premium valuation near-term; that said, we see risk/reward skewed negatively at current levels.

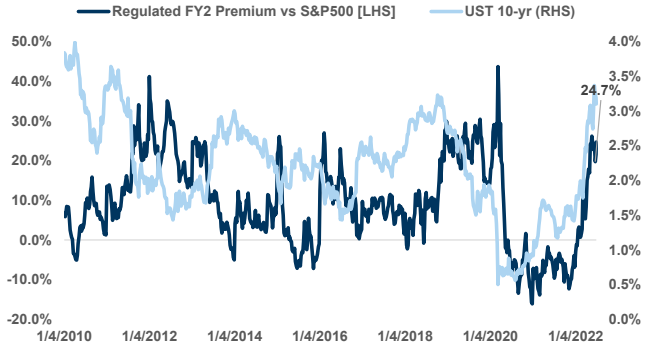
Broader market earnings power could dictate future relative performance... Utilities' current 20% P/E premium is based on the 2023 S&P 500 EPS estimate of $239 (GSe). If realized, we expect utilities to underperform the broader market and see a relatively in-line multiple as warranted. However, in a recession scenario - hair-cutting the S&P 500 EPS estimate by the 13% median historical recession earnings revision (per our GS strategy team analysis) - utilities screen in-line to the S&P 500. **We see meaningful S&P 500 downward earnings revisions as the key risk to our cautious relative sector view.**



...given utilities earnings remain resilient. We continue to see utilities' earnings

Provided for the exclusive use of Michael Weisenburger at NiSource on 07-Jul-2022 10:23 AM.

power as largely intact, with 5-8% EPS growth and 3-4% dividend yield offering 8-12% total return proposition per our estimates. For regulated utilities, which comprise the bulk of our coverage companies' earnings, higher costs - including fuel/purchased power and operational costs - represent either pass-through items or are periodically recovered via customer bills with no net income impact. That said, customer bill increases remain a key concern, which could elevate regulatory scrutiny over time as utilities look to recover its costs while also executing on its capital investments that drive earnings growth.



Remain selective and balanced in investing in utilities. With this macro backdrop, we see a balanced investing strategy between premium defensive utilities and dislocated value plays as appropriate. On the premium side, we recommend Buy-rated large-cap regulated utilities DTE Energy (DTE, on Conviction List) and Xcel Energy (XEL) for their consistent execution track record with above-average earnings growth. On the value side, we recommend Entergy (ETR), FirstEnergy (FE) and PPL Corp (PPL) for attractively valued regulated utility exposure, along with AES Corp (AES) for global clean energy exposure at a SOTP discount.

Exhibit 5: Current utility valuations screen elevated based on historical relationship in a 3-4% 10-year yield environment.

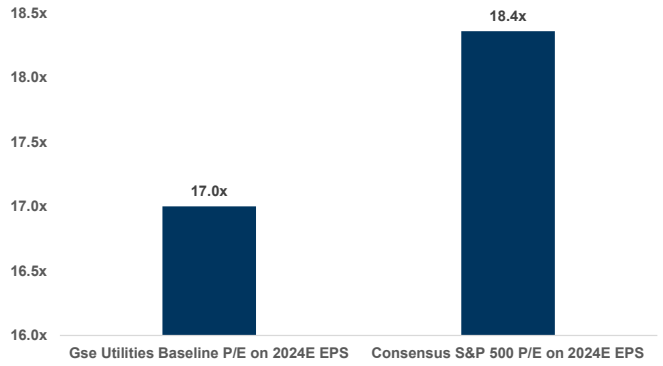
Exhibit 13: On an absolute P/E basis, utilities trade roughly 11% below prior peak and relatively close to its 5-year average
Market cap-weighted FY2 & FY3 Regulated Utilities' P/E

Source: FactSet, Goldman Sachs Global Investment Research



Rolling forward valuations to 2024E; see 6% total return to our coverage universe

We roll forward our coverage valuations, now utilizing 2024E EPS, while applying a 17x base P/E multiple for electric/gas utilities (versus 18x on 2023E EPS prior), below current FY3 trading P/E of 17.9x. While our GS strategy team has not yet forecasted target S&P 500 price and earnings for YE2023/2024E, we note our 17x base multiple screens as a modest discount to the FactSet consensus S&P 500 target P/E. For water utilities, we set a base P/E of 27x on 2024E, or a 10x premium to the electric/gas multiple, to continue reflecting our calculated fundamental advantages (and some scarcity factor) for water utility growth.

We see 6% total return to our coverage universe, with the highest total return for companies including PCG, EIX, and FE, and with negative total returns for companies including SO, AGR, and AEP.

Upgrade SRE to Buy: Attractive SOTP story with leverage to LNG development growth and robust Texas electric demand

PM Summary

We upgrade Sempra Energy (SRE) from Neutral to Buy given (1) a more attractive valuation on a sum of the parts, after shares lagged peers in the past 2 months, (2) exposure – given multiple potential growth projects – to the major theme of LNG development, especially as we only give partial credit in our sum of the parts analysis to several growth projects, (3) solid demand growth in its Texas utility that could lead to potential rate base and earnings upside there, and (4) potential resolution by year-end of the California cost of capital docket given the schedule published by the CPUC stating a target year-end resolution could alleviate an overhang – we already embed an RoE reduction in estimates for three California utilities. We also note, in the near term, SRE maintains a solid FCF outlook and capital allocation could still come in above peer group levels in the coming years. We now see more than 11.8% total return potential to our revised $167/sh target price, which we derive via a sum of the parts analysis.

What changes in our views?

As with all utility stocks in our coverage, we roll forward valuation from 2023 to 2024 – a year where we see continued growth in the company's California and Texas utilities, with limited growth in that year for its non-regulated LNG and Mexico businesses. We capture some potential long term upside related to LNG development in the sum of the parts. We maintain our EPS estimates, so the bulk of our change comes in our target price update.

Source: Goldman Sachs Global Investment Research

Valuation appears compelling on a sum of the parts basis — and we note SRE screens attractively on a P/E multiple as well. We utilize a sum of the parts to value SRE, in order to incorporate (1) credit to various LNG growth projects or initiatives that may not impact EPS or EBITDA until 2025+, (2) recognize uncertainty exists on when each of these potential LNG projects may move forward, so giving partial, different credit for each of them on a probability weighted basis and (3) a premium multiple for SRE's high growth Texas utility franchise and a discount one for its California business, given continued – albeit modest relative to its California peers – wildfire and regulatory risks ahead. As LNG projects move forward in the permitting and contracting aspects, we recognize probabilities may change – presenting upside risk to our sum of the parts analysis. We also note that on P/E multiples, SRE trades at an attractive level – at P/E multiples of 16.9x/15.9x on 2023/2024 earnings versus the large cap median (excluding PCG/EIX given wildfire risks) at 19.8x on 2023 and 17.9x on 2024 earnings.

Provided for the exclusive use of Michael Weisenburger at NiSource on 07-Jul-2022 10:23 AM.

...and yet we recognize risks still exist. For the regulated businesses in the US, we note the outstanding rate cases in both Texas and California present risks to revenues — with the Texas case likely getting resolved by year-end given rate cases generally take 180 days to resolve in Texas but the California one continuing well into 2023 given CPUC schedule. While we – as described earlier – already embed a lower authorized RoE for SRE's California utilities than the current authorized level, we recognize the ongoing Cost of Capital docket also presents risks to our view if the authorized RoE or equity ratio comes in below our expectation. Delays in LNG project development or in contracting present a risk to that part of the Sempra Infrastructure Partners (SIP) segment, while operating risk exists still (in terms of volumes or pricing) for the various assets (renewable, gas generation especially) in the Mexico portion of SIP.

...and what events should investors monitor from here?

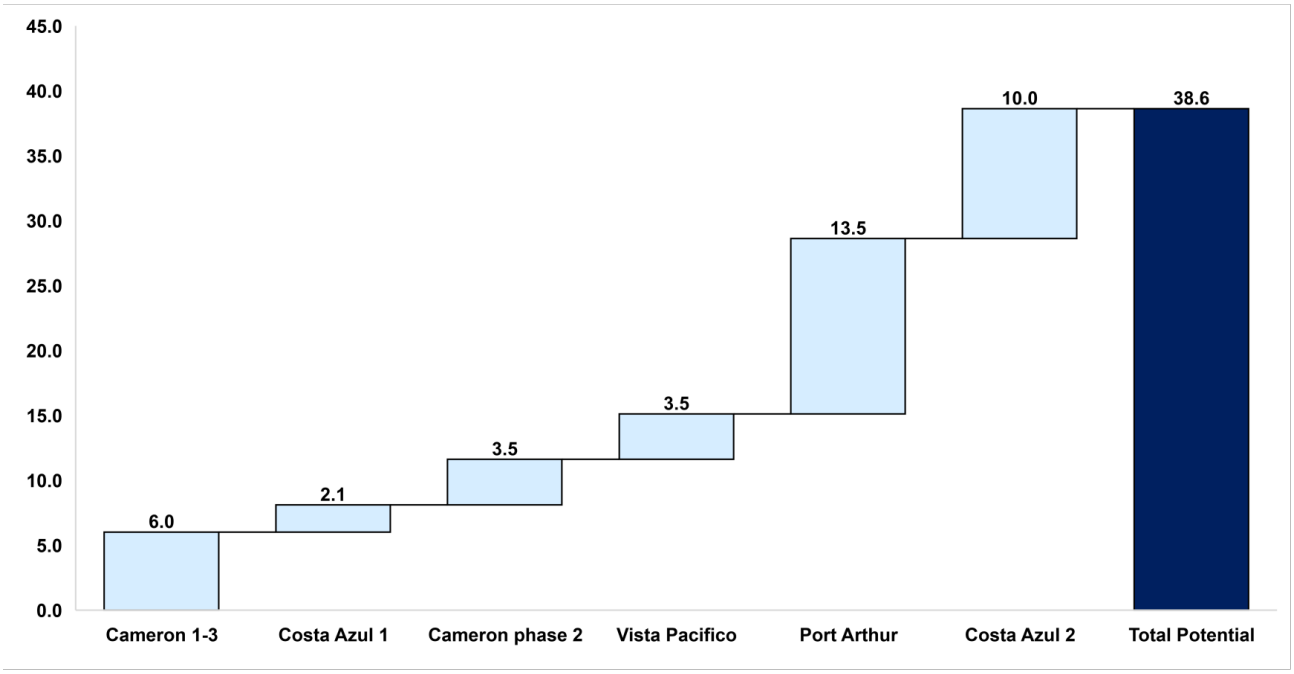
We highlight a number of events investors should monitor in the coming 12 months, starting with the company's regulated utilities in TX and CA... SRE maintains an active regulatory calendar this year for its US utility businesses — with a rate case just filed at its Texas utility and two proceedings in California, with its cost of capital docket and its rate cases there. We expect resolution of the Texas rate case late this year – and in fact note that upside risk to our estimates could emerge if SRE gains approval for a higher authorized equity ratio in Texas, a level closer to 45%, as we still assume slightly lower in our forecasts. We note SRE's Texas business maintains one of the lower authorized equity ratios among utilities under coverage – a higher level authorized by the state utility regulators there could drive upside risk to EPS in 2023+. SRE's California utilities remain involved in the cost of capital mechanism proceeding in California, a docket we expect to get resolved in late 2022 or early 2023 – we assume that this results, in 2023+, in a reduced authorized RoE level, despite all 3 utilities there (PCG, EIX and SRE) noting in public filings that the wildfire related risks they bear warrant a higher, not a lower authorized RoE. While we recognize this risk remains, we note the RoEs in California already remain above those authorized for most utilities under coverage – and we assume a very small reduction (25-30 bps) in our forecasts. Finally, SRE's utilities in California just filed general rate case proceedings – we do not expect resolution of this until late 2023 or so, and given the need for new electric infrastructure for the state's clean energy and vehicle electrification efforts (EVs), we do not see material downside risk or see these cases as serving as an overhang on SRE's shares, especially given the state generally approved 85%-90%+ of the company's capital spend and rate base requests in prior cases.

...and development activities at the LNG business within Sempra Infrastructure Partners (SIP) could drive material growth post 2025 – with contract announcements and permitting authorizations key to monitor from here. Given the rise in global natural gas prices and the focus on energy supply sources over the past 1-2 years – especially after the Russia/Ukraine conflict started this year – SRE via its Sempra Infrastructure Partners (SIP) venture continues development of multiple different LNG projects. We already include the small expansion (2.5 mtpa) at the Costa Azul site in Mexico — which adds to earnings only starting in 2025, given a multi year construction timeline. We do not give full credit to the other projects, like the Cameron

Provided for the exclusive use of Michael Weisenburger at NiSource on 07-Jul-2022 10:23 AM.

expansion (6-7 mtpa), the greenfield Port Arthur LNG (13.5 mtpa), the large scale Costa Azul expansion (12 mtpa), or the potential Vista Pacifico project (3-4 mtpa) – we only give partial or limited credit in our valuation analysis for these projects, given continued uncertainty on off-take contracting, permitting and project construction agreements. We see the Cameron LNG expansion as likely first in line owing to more commercial contracting and ownership agreements already announced relative to the other projects – with potential announcements of incremental contracts coming in the next 6+ months and with expected FERC approvals of the site design change in 1H2023, which could lead to a project FID in the next 9-12 months as per company guidance.

Key risks to our rating include:



(1) Rate case and regulatory risk given ongoing cases in both CA and TX — and the cost of capital docket in CA — our CA forecasts already assume a 25-30 bps reduction to the authorized RoE but a greater reduction could present downside.

(2) Wildfires in Southern CA — we do not embed wildfire related costs in our forecasts but recognize this could, if one occurs in the San Diego area where SRE owns an electric utility business, impact cash flows.

(3) Failure to move ahead with LNG export growth projects due to permitting or contracting challenges — cancellations would weigh on our target price as we assume partial credit for these projects.

(4) Cost management — higher than expected O&M expenses driven by inflation or other factors would reduce earnings potentially.

Exhibit 24: 38.6 Mtpa of potential capacity that SIP could get leaves a lot of room for upside

AEP	15x P/E on 2024 EPS	Sell	$80	$84	$97.95	3.16	3.2%	-15%	**Upside:** 1) demand, 2) financing, 3) cost management, and 4) rate base growth.
DUK	17x P/E on 2024 EPS	Neutral	$105	$103	$109.62	4.00	3.6%	-1%	**Upside:** 1) cost management & 2) future rate cases or proceedings in Carolinas/Midwest states DUK serves. **Downside:** 1) utility regulation, 2) cost management & 3) financing
DTE	21x P/E on 2024 EPS	Buy	$143	$138	$129.16	3.61	2.8%	14%	**Downside:** 1) unfavorable regulatory changes, 2) incentive returns & equity layers, 3) unfavorable legislation, & 4) customer demand & usage, & cost management.
ED	17x P/E on 2024 EPS	Sell	$85	$82	$97.24	3.16	3.2%	-9%	**Upside:** 1) NYPSC approves bulk of requested revenue/rate base increase at CECONY supporting an elevated earnings growth rate, 2) economic conditions in NYC from COVID-19 improve, & 3) ED executes an accretive monetization of the Clean Energy assets
EIX	14x P/E on 2024 EPS	Buy	$77	$76	$63.75	2.80	4.4%	25%	**Downside:** 1) wildfire risk, 2) litigation claims, and 3) regulatory risk.
ETR	16x P/E on 2024 EPS	Buy	$119	$119	$115.30	3.97	3.4%	7%	**Downside:** 1) utility regulation, 2) power demand, and 3) financing.
EVRG	16x P/E on 2024 EPS	Neutral	$69	$66	$66.81	2.33	3.5%	7%	**Upside:** 1) cost management. **Downside:** 1) Utility regulation, 2) power demand and 3) financing
ES	19x P/E on 2024 EPS	Neutral	$89	$88	$87.15	2.55	2.9%	5%	**Upside:** 1) improved offshore wind return forecasts, 2) reduced permitting/construction hurdles, 3) additional rate base investments. **downside:** 1) ineffective cost management, 2) slowing rate base growth, 3) utility regulatory environment
EXC	18x on 2024 EPS	Neutral	$47	$44	$46.07	1.35	2.9%	5%	**Upside:** 1) cost management. **Downside:** 1) Utility regulation, 2) power demand and 3) financing
FE	15x P/E on 2024 EPS	Buy	$44	$46	$39.33	1.56	4.0%	16%	**Downside:** 1) utility regulation, 2) power demand, and 3) financing.
PCG	50% weight each to (1) 13x P/E on 2024 EPS and, (2) DDM analysis on 35% dividend payout in 2025.	Buy	$16	$15	$10.24	0.00	0.0%	56%	**Downside:** 1) 2023 GRC proceeding, 2) general regulatory risk in CA, 3) wildfire related risk, 4) financing needs through both debt (including securitization) and equity issuance.
PPL	17x P/E on 2024 EPS	Buy	$32	$32	$27.76	0.88	3.2%	18%	**Downside:** 1) power demand in KY – a decrease in expected demand growth in Kentucky would negatively impact PPL earnings until future rate cases occur, 2) state utility regulation -- as negative regulatory outcomes would impact revenue set for PPL's regulated subsidiaries and 3) cost management – failure to reduce costs after successful completion of the Rhode Island acquisition could hamper earnings.
SO	13x P/E on 2024 EPS	Sell	$53	$51	$73.14	2.71	3.7%	-24%	**Upside**: 1) faster than expected completion of Vogtle Units 3 and 4, 2) greater than anticipated rate base growth, 3) financing, and 4) better than anticipated power demand or operating costs
WEC	21x P/E on 2024 EPS	Neutral	$102	$100	$102.58	2.91	2.8%	2%	1) utility regulation and rate cases, 2) power/gas demand in Wisconsin, & 3) rate base growth, renewable development, and the gas main replacement program in Northern Illinois.
XEL	21x P/E on 2024 EPS	Buy	$77	$76	$72.63	1.95	2.7%	9%	**Downside:** 1) Negative rate case outcomes, 2) XEL realizes less generation into rate base vs. PPA, impacting rate base growth & 3) PPA buyouts do not materialize, 4) Rising commodity prices
Regulated Utilities - Large Cap (median)							**3.2%**	**5.8%**	
Regulated Utilities - Large & Small Cap (median)							**3.1%**	**6.7%**	

DTE is on the Americas Conviction List

Exhibit 28: Price Target Methodologies and Key Risks

Time frame for price targets is 12 months

Price Target Methodologies and Key Risks									
Ticker	Price Target Methodology	Rating	Price Target (New)	Price Target (Old)	7/1/2022 Close	2022 DPS	Dividend Yield	Total Return (%)	Key Risks
Regulated Utilities (Small-Cap)									
ATO	18x P/E on 2024 EPS	Neutral	$116	$113	$115.15	2.72	2.4%	3%	**Upside**: 1) demand growth, and 2) ATO reduces annual equity needs through creation of a holding company or via accretive gas utility divestitures, **Downside:** 1) sustained elevated gas fuel cost pressure customer bills 2) Texas regulatory environment turns negative, and 3) market sentiment on gas utility business turns more negative, impacting absolute and relative P/E multiples.
AWK	30x P/E on 2024 EPS	Neutral	$155	$168	$153.43	2.57	1.7%	3%	**Upside:** 1) cost management, 2) ESG fund flows. **Downside:** 1) water quality issues, 2) regulatory environment
AEE	20x P/E on 2024 EPS	Neutral	$93	$92	$92.19	2.39	2.6%	3%	**Upside:** 1) utility investments to accelerate rate base/earnings growth,2) cost management, 3) outcomes in the upcoming Missouri electric rate case, **Downside:** 1) 30-year Treasury yields, and 2) equity financing needs.
CMS	22x P/E on 2024 EPS	Buy	$75	$72	$69.03	1.84	2.7%	11%	**Downside:** 1) Michigan's regulatory environment turns negative, impacting CMS's ability to earn a healthy rate of return, and 2) CMS's ability to achieve consistent cost savings slows, reducing bill headroom for future investments.
NI	18.35x Blended multiple on 2024 EPS	Buy	$32	$31	$30.05	0.94	3.1%	10%	**Downside:** (1) NI continues to face additional solar development delays which potentially pressure earnings power, (2) unfavorable outcome in the outstanding and upcoming rate cases which lowers allowed returns, (3) NI fails to realize rate base additions and instead has more PPA generation, and (4) NI announces strategic initiatives that are dilutive to EPS.
PNW	15x P/E on 2024 EPS	Sell	$68	$67	$74.68	3.42	4.6%	-4%	**Upside:** 1) AZ commission authorizes a higher ROE in the 2022 rate case, 2) PNW receives approval for contemporaneous recovery/return of clean energy investments, 3) robust electric demand growth, & 4) constructive federal renewable tax policies reduce future equity needs.
POR	17x P/E on 2024 EPS	Buy	$52	$52	$49.82	1.81	3.6%	8%	**Downside:**□1) POR secures little to no owned clean generation in the current RFP, capping earnings growth upside, 2) Oregon utility commission disallows recovery of a significant portion of the 2020-2021 significant events (ice storm, wildfire, power costs), impacting the balance sheet and elevating future equity issuance needs, and 3) POR experiences meaningful cost inflation that impacts EPS and/or requires filing another rate case near-term to seek recovery.
WTRG	SOTP 29x P/E on 2024 water EPS, 18x P/E on 2024 gas EPS	Buy	$52	$55	$47.44	1.11	2.3%	12%	**Downside**: 1) PA regulation turns less constructive, which impacts earnings growth potential given the bulk of WTRG's earnings are derived from the state's water/gas operations, 2) water system acquisitions do not receive necessary approvals for completion, which could impact longer-term water rate base growth outlook, and 3) equity issuances are meaningfully higher than expected, which dilutes EPS power.
Regulated Utilities - Small Cap (median)							**2.6%**	**5.7%**	
Regulated Utilities - Large & Small Cap (median)							**3.1%**	**6.7%**

Disclosure Appendix

Reg AC

We, Michael Lapides, Insoo Kim, CFA and John Miller, hereby certify that all of the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

Financial advisory disclosures

Goldman Sachs and/or one of its affiliates is acting as a financial advisor in connection with an announced strategic matter involving the following company or one of its affiliates: American Electric Power Company, Inc., Evergy, Inc., Eversource Energy

Distribution of ratings/investment banking relationships

Goldman Sachs Investment Research global Equity coverage universe

	Rating Distribution			Investment Banking Relationships		
	Buy	Hold	Sell	Buy	Hold	Sell
Global	50%	35%	15%	65%	57%	45%

As of April 1, 2022, Goldman Sachs Global Investment Research had investment ratings on 3,143 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage universe and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association.

Provided for the exclusive use of Michael Weisenburger at NiSource on 07-Jul-2022 10:23 AM.

Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) have been suspended pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Effective from the date of the United Kingdom's departure from the European Union and the European Economic Area ("Brexit Day") the following information with respect to distributing entities will apply:

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: GSI, authorised by the PRA and regulated by the FCA and the PRA, disseminates research in the following jurisdictions within the European Economic Area: the Grand Duchy of Luxembourg, Italy, the Kingdom of Belgium, the Kingdom of Denmark, the Kingdom of Norway, the Republic of Finland, the Republic of Cyprus and the Republic of Ireland; GS -Succursale de Paris (Paris branch) which, from Brexit Day, will be authorised by the French Autorité de contrôle prudentiel et de resolution ("ACPR") and regulated by the Autorité de contrôle prudentiel et de resolution and the Autorité des marches financiers ("AMF") disseminates research in France; GSI - Sucursal en España (Madrid branch) authorized in Spain by the Comisión Nacional del Mercado de Valores disseminates research in the Kingdom of Spain; GSI - Sweden Bankfilial (Stockholm branch) is authorized by the SFSA as a "third country branch" in accordance with Chapter 4, Section 4 of the Swedish Securities and Market Act (Sw. lag (2007:528) om värdepappersmarknaden) disseminates research in the Kingdom of Sweden; Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research in the Federal Republic of Germany and those jurisdictions within the European Economic Area where GSI is not authorised to disseminate research and additionally, GSBE, Copenhagen Branch filial af GSBE, Tyskland, supervised by the Danish Financial Authority disseminates research in the Kingdom of Denmark; GSBE - Sucursal en España (Madrid branch) subject (to a limited extent) to local supervision by the Bank of Spain disseminates research in the Kingdom of Spain; GSBE - Succursale Italia (Milan branch) to the relevant applicable extent, subject to local supervision by the Bank of Italy (Banca d'Italia) and the Italian Companies and Exchange Commission (Commissione Nazionale per le Società e la Borsa "Consob") disseminates research in Italy; GSBE - Succursale de Paris (Paris branch), supervised by the AMF and by the ACPR disseminates research in France; and GSBE - Sweden Bankfilial (Stockholm branch), to a limited extent, subject to local supervision by the Swedish Financial Supervisory Authority (Finansinpektionen) disseminates research in the Kingdom of Sweden.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may

Provided for the exclusive use of Michael Weisenburger at NiSource on 07-Jul-2022 10:23 AM.

discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

Goldman Sachs & Co. LLC

John Miller
+1(801)884-4034 | john.y.miller@gs.com
Goldman Sachs & Co. LLC

NiSource (NI, Buy) reported 2Q22 operating EPS of $0.12, in line with FactSet consensus of $0.12, just below GSe $0.13, and versus 1Q2021 EPS of $0.13. NI reiterated 2022 guidance of $1.42-$1.48 ($1.45 mid-point) versus GSe/consensus of $1.46/$1.45. NI continues to expect EPS to grow by 7% to 9% CAGR - with 2021 EPS of $1.37 as the base - through 2024 as well as 5% to 7% CAGR through 2023; our current estimates reflect an ~8.3% CAGR from 2021A-2024E.

Key takeaway: We view the results as largely neutral, although weather-normal electric demand fell YoY largely driven by lower industrial demand, on which we look for additional color on the earnings call. We remain constructive on NI reiterating its revised renewable in-service timing, as well as levers to offset potential EPS impact to maintain 2024 growth commitment. We note the announced November Investor Day remains a key catalyst for this stock, where we expect a comprehensive update to its strategy and growth plans.

Key takeaways from NI's release and slides include:

- **NI's 2Q22 slight miss versus GSe was largely driven by higher O&M, partly offset by better gross margins**. On the electric side, 2Q22 weather-adjusted sales growth decreased 3.4% YoY, driven by a 7.4% decrease in industrial load offset by a 2.9% increase in residential load. Overall customer count increased ~0.7% YoY, mainly driven by an increase in residential customers.
- **NI disclosed that its PA gas utility is engaging in settlement discussions** on its rate case, which requests $82.2mn revenue increase on gas pipelines replacement and safety measures. This should alleviate near-term regulatory uncertainty on its largest gas utility.
- **NI reiterated its financing plan, including no bulk equity needs through 2024.**

Key topics to monitor on NI's earnings call (11am ET) include: 1) update on the Ohio/PA gas rate case and what's embedded in the company's EPS growth guidance, 2) thoughts on various strategic considerations for the company longer-term, 3) color on YTD decline in weather-normal electric demand growth, especially in the industrial customer base, and 4) assumptions behind EPS growth trajectory through 2024.

Goldman Sachs does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision. For Reg AC certification and other important disclosures, see the Disclosure Appendix, or go to www.gs.com/research/hedge.html. Analysts employed by non-US affiliates are not registered/qualified as research analysts with FINRA in the U.S.

Our 12-month price target of $32 embeds assigned electric/gas utility P/E multiples (on 2024E) of 19x/18x, which represent ~10%/5% premiums to our 17x industry base multiple for regulated utilities. **Key downside risks** include: 1) NI continues to face additional solar development delays, which potentially pressure earnings power, 2) unfavorable outcome in the outstanding and upcoming rate cases, which lowers allowed returns (especially in OH), 3) NI fails to realize rate base additions and instead has more PPA generation, and 4) NI announces strategic initiatives that are dilutive to EPS.

Disclosure Appendix

Reg AC

I, Insoo Kim, CFA, hereby certify that all of the views expressed in this report accurately reflect my personal views about the subject company or companies and its or their securities. I also certify that no part of my compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics).

For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

M&A Rank

Across our global coverage, we examine stocks using an M&A framework, considering both qualitative factors and quantitative factors (which may vary across sectors and regions) to incorporate the potential that certain companies could be acquired. We then assign a M&A rank as a means of scoring companies under our rated coverage from 1 to 3, with 1 representing high (30%-50%) probability of the company becoming an acquisition target, 2 representing medium (15%-30%) probability and 3 representing low (0%-15%) probability. For companies ranked 1 or 2, in line with our standard departmental guidelines we incorporate an M&A component into our target price. M&A rank of 3 is considered immaterial and therefore does not factor into our price target, and may or may not be discussed in research.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

Disclosures

The rating(s) for NiSource Inc. is/are relative to the other companies in its/their coverage universe: Ameren Corp., American Electric Power, American Water Works, Atmos Energy Corp., Avangrid Inc., CMS Energy Corp., Centerpoint Energy Inc., Clearway Energy Inc., Consolidated Edison Inc., Constellation Energy Corp., DTE Energy Co., Dominion Energy Inc., Duke Energy Corp., Edison International, Entergy Corp., Essential Utilities Inc., Evergy Inc., Eversource Energy, Exelon Corp., FirstEnergy Corp., NRG Energy Inc., NextEra Energy Inc., NextEra Energy Partners, NiSource Inc., OGE Energy Corp., PG&E Corp., PPL Corp., Pinnacle West Capital Corp., Portland General Electric Co., Public Service Enterprise Group, Sempra Energy, Southern Co., The AES Corp., WEC Energy Group, Xcel Energy Inc.

Price target and rating history chart(s)

The price targets shown should be considered in the context of all prior published Goldman Sachs research, which may or may not have included price targets, as well as developments relating to the company, its industry and financial markets.

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman Sachs & Co. LLC and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at https://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia:** Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the companies and other entities which are the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. To the extent that the contents of this document contains any financial product advice, it is general advice only and has been prepared by Goldman Sachs without taking into account a client's objectives, financial situation or needs. A client should, before acting on any such advice, consider the appropriateness of the advice having regard to the client's own objectives, financial situation and needs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests and a copy of Goldman Sachs' Australian Sell-Side Research Independence Policy Statement are available at: https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Brazil:** Disclosure information in relation to CVM Resolution n. 20 is available at https://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 20 of CVM Resolution n. 20, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. **Canada:** This information is being provided to you for information purposes only and is not, and under no circumstances should be construed as, an advertisement, offering or solicitation by Goldman Sachs & Co. LLC for purchasers of securities in Canada to trade in any Canadian security. Goldman Sachs & Co. LLC is not registered as a dealer in any jurisdiction in Canada under applicable Canadian securities laws and generally is not permitted to trade in Canadian securities and may be prohibited from selling certain securities and products in certain jurisdictions in Canada. If you wish to trade in any Canadian securities or other products in Canada please contact Goldman Sachs Canada Inc., an affiliate of The Goldman Sachs Group Inc., or another registered Canadian dealer. **Hong Kong:** Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. **India:** Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. **Japan:** See below. **Korea:** This research, and any access to it, is intended only for "professional investors" within the meaning of the Financial Services and Capital Markets Act, unless otherwise agreed by Goldman Sachs. Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. **New Zealand:** Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. A copy of certain Goldman Sachs Australia and New Zealand disclosure of interests is available at:

https://www.goldmansachs.com/disclosures/australia-new-zealand/index.html. **Russia:** Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Research reports do not constitute a personalized investment recommendation as defined in Russian laws and regulations, are not addressed to a specific client, and are prepared without analyzing the financial circumstances, investment profiles or risk profiles of clients. Goldman Sachs assumes no responsibility for any investment decisions that may be taken by a client or any other person based on this research report. **Singapore:** Goldman Sachs (Singapore) Pte. (Company Number: 198602165W), which is regulated by the Monetary Authority of Singapore, accepts legal responsibility for this research, and should be contacted with respect to any matters arising from, or in connection with, this research. **Taiwan:** This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. **United Kingdom:** Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union and United Kingdom: Disclosure information in relation to Article 6 (2) of the European Commission Delegated Regulation (EU) (2016/958) supplementing Regulation (EU) No 596/2014 of the European Parliament and of the Council (including as that Delegated Regulation is implemented into United Kingdom domestic law and regulation following the United Kingdom's departure from the European Union and the European Economic Area) with regard to regulatory technical standards for the technical arrangements for objective presentation of investment recommendations or other information recommending or suggesting an investment strategy and for disclosure of particular interests or indications of conflicts of interest is available at https://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage universe and related definitions

Buy (B), Neutral (N), Sell (S) Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage universe. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each region's Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage Universe: A list of all stocks in each coverage universe is available by primary analyst, stock and coverage universe at https://www.gs.com/research/hedge.html.

Not Rated (NR). The investment rating, target price and earnings estimates (where relevant) have been suspended pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or in a strategic transaction involving this company, when there are legal, regulatory or policy constraints due to Goldman Sachs' involvement in a transaction, and in certain other circumstances. **Rating Suspended (RS).** Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock and should not be relied upon. **Coverage Suspended (CS).** Goldman Sachs has suspended coverage of this company. **Not Covered (NC).** Goldman Sachs does not cover this company. **Not Available or Not Applicable (NA).** The information is not available for display or is not applicable. **Not Meaningful (NM).** The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. Available Weekdays (except holidays), from 9am to 6pm. Canal de Comunicação com o Público Goldman Sachs Brasil: 0800 727 5764 e/ou contatogoldmanbrasil@gs.com. Horário de funcionamento: segunda-feira à sexta-feira (exceto feriados), das 9h às 18h; in Canada by Goldman Sachs & Co. LLC; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman Sachs & Co. LLC. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom.

Effective from the date of the United Kingdom's departure from the European Union and the European Economic Area ("Brexit Day") the following information with respect to distributing entities will apply:

Goldman Sachs International ("GSI"), authorised by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA") and the PRA, has approved this research in connection with its distribution in the United Kingdom.

European Economic Area: GSI, authorised by the PRA and regulated by the FCA and the PRA, disseminates research in the following jurisdictions within the European Economic Area: the Grand Duchy of Luxembourg, Italy, the Kingdom of Belgium, the Kingdom of Denmark, the Kingdom of Norway, the Republic of Finland, the Republic of Cyprus and the Republic of Ireland; GS -Succursale de Paris (Paris branch) which, from Brexit Day, will be authorised by the French Autorité de contrôle prudentiel et de resolution ("ACPR") and regulated by the Autorité de contrôle prudentiel et de resolution and the Autorité des marches financiers ("AMF") disseminates research in France; GSI - Sucursal en España (Madrid branch) authorized in Spain by the Comisión Nacional del Mercado de Valores disseminates research in the Kingdom of Spain; GSI - Sweden Bankfilial (Stockholm branch) is authorized by the SFSA as a "third country branch" in accordance with Chapter 4, Section 4 of the Swedish Securities and Market Act (Sw. lag (2007:528) om värdepappersmarknaden) disseminates research in the Kingdom of Sweden; Goldman Sachs Bank Europe SE ("GSBE") is a credit institution incorporated in Germany and, within the Single Supervisory Mechanism, subject to direct prudential supervision by the European Central Bank and in other respects supervised by German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht, BaFin) and Deutsche Bundesbank and disseminates research in the Federal Republic of Germany and those jurisdictions within the European Economic Area

For the exclusive use of MWEISENBURGER@NISOURCE.COM

where GSI is not authorised to disseminate research and additionally, GSBE, Copenhagen Branch filial af GSBE, Tyskland, supervised by the Danish Financial Authority disseminates research in the Kingdom of Denmark; GSBE - Sucursal en España (Madrid branch) subject (to a limited extent) to local supervision by the Bank of Spain disseminates research in the Kingdom of Spain; GSBE - Succursale Italia (Milan branch) to the relevant applicable extent, subject to local supervision by the Bank of Italy (Banca d'Italia) and the Italian Companies and Exchange Commission (Commissione Nazionale per le Società e la Borsa "Consob") disseminates research in Italy; GSBE - Succursale de Paris (Paris branch), supervised by the AMF and by the ACPR disseminates research in France; and GSBE - Sweden Bankfilial (Stockholm branch), to a limited extent, subject to local supervision by the Swedish Financial Supervisory Authority (Finansinpektionen) disseminates research in the Kingdom of Sweden.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman Sachs & Co. LLC, the United States broker dealer, is a member of SIPC (https://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage universe as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options and futures disclosure documents which are available from Goldman Sachs sales representatives or at https://www.theocc.com/about/publications/character-risks.jsp and https://www.fiadocumentation.org/fia/regulatory-disclosures_1/fia-uniform-futures-and-options-on-futures-risk-disclosures-booklet-pdf-version-2018. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

Differing Levels of Service provided by Global Investment Research: The level and types of services provided to you by the Global Investment Research division of GS may vary as compared to that provided to internal and other external clients of GS, depending on various factors including your individual preferences as to the frequency and manner of receiving communication, your risk profile and investment focus and perspective (e.g., marketwide, sector specific, long term, short term), the size and scope of your overall client relationship with GS, and legal and regulatory constraints. As an example, certain clients may request to receive notifications when research on specific securities is published, and certain clients may request that specific data underlying analysts' fundamental analysis available on our internal client websites be delivered to them electronically through data feeds or otherwise. No change to an analyst's fundamental research views (e.g., ratings, price targets, or material changes to earnings estimates for equity securities), will be communicated to any client prior to inclusion of such information in a research report broadly disseminated through electronic publication to our internal client websites or through other means, as necessary, to all clients who are entitled to receive such reports.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data related to one or more securities, markets or asset classes (including related services) that may be available to you, please contact your GS representative or go to https://research.gs.com.

Disclosure information is also available at https://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.

DUK — Sale of commercial renewables business kicks off

NI — NiSource to host Investor Day event November 7 in NYC

NEE, DUK — Tropical Storm Ian closing in; prompts Florida governor to declare state of emergency

Policy — Carbon policy group links IRA's success to passage of permitting reforms; state AGs oppose

ED – NY Lawmakers request hearing on rising rates and electricity prices

ETR – ETR enters MOU to evaluate offshore wind development in LA

FE — PUCO special counsel turns out to have multiple ties to HB 6

SO — Hearings begin in Georgia Power's triennial rate case

DUK – Rising fuel costs could lead to higher utility bills in North Carolina

SRE – CPUC looking at alternatives to replace Aliso Canyon

Hydrogen – PEM manufacturer and rail company partner on fuel cell passenger train

Nuclear – Air Force issues microreactor RFP

DUK – Sale of commercial renewables business kicks off

- No preferred financial structure has been established in materials that were provided to investors, according to SparkSpread.
- Potential bidders so far include pension funds, private equity, and infrastructure investors, although some parties have apparently said that the portfolio size would keep them on the sidelines.
- More HERE.

Guggenheim takeaway: *Recall that our original note (link HERE) estimated 2023/2024 dilution of $0.04/$0.08 per share, respectively, based on an assumed 3.5% cost of HoldCo debt, but also included a sensitivity analysis table showing the change in accretion/dilution at different costs of avoided debt and different portfolio valuations on a $/kW basis. Then, as per our Daily (link HERE), following the HoldCo's $3.2bn debt issuance at a weighted average interest rate of 4.62% in August, we refined our view regarding the potential dilutive impact in 2023/2024 to ~$0.01/$0.03 per share, respectively.*

NI – NiSource to host Investor Day event November 7 in New York City

- NiSource (NYSE: NI) will hold an Investor Day event in New York City on Monday, Nov. 7, 2022, starting at noon EST and concluding at 3 p.m. NiSource's senior management plans to provide a detailed update, followed by additional in-person investor meetings at the Edison Electric Institute (EEI) Financial Conference from Sunday, Nov. 13 through Tuesday, Nov. 15.
- 3Q22 financial results will also be released before U.S. financial markets open on Nov. 7th.
- More HERE.

Guggenheim takeaway: *We expect an update on post-2024 growth and mgmt.'s plans for the company going forward, likely in the form of a full OpCo update, roll forward of the capital plan, and redefined trajectory, which sets NI perhaps on a growth rate in between its prior 5%-7% (through 2023) and 7%-9% (through 2024) CAGRs. As far as strategic initiatives, we continue to believe that* ***the company is not for sale, nor do we expect any LDC sales*** *given the opportunities around extracting efficiencies, O&M levers, and incremental growth at the OpCos. Much of this, including the longer-term growth plan roll forward would be largely in line with our conversation with new CEO Lloyd Yates earlier this year (****see our note HERE****).*

NEE/DUK – Tropical Storm Ian closing in; prompts Florida governor to declare state of emergency

- Tropical Storm Ian formed on Friday over the southern Caribbean and was forecast to intensify through Monday, potentially into a Category 4 storm.
- National Hurricane Center at the NOAA: Hurricane Ian
- More HERE, HERE.

Guggenheim takeaway: *Investors should recall that Florida is generally pretty supportive of its utilities given the frequency of occurrence of major storms. Utilities in the state have mechanisms in place which build up regulatory assets with funds to be used towards material storm restoration costs; alternatively, utilities can apply*

for expedited recovery of spending with the FPSC. At DUK, Hurricane Dorian resulted in ~$150m of costs despite the Category 5 hurricane not making landfall; DEF filed for recovery of incurred costs, as they are deemed recoverable under the FPSC's storm rule and Duke Energy Florida's OATT formula rates. In the case of NEE's FP&L, for example, Hurricane Irma was ~$1.375bn in costs, which would have drained the storm reserve, but the FPSC agreed to let the costs be offset by tax cuts from TCJA. More broadly, under the latest rate settlement, FPL Future storm restoration costs would be recoverable on an interim basis beginning 60 days from the filing of a cost recovery petition but capped at an amount that could produce a surcharge of no more than $4 for every 1,000 kWh of usage on residential bills during the first 12 months of cost recovery. Any additional costs would be eligible for recovery in subsequent years. If storm restoration costs exceed $800 million in any given calendar year, FPL may request an increase to the $4 surcharge to recover amounts above $400 million. In terms of stock performance, while there's always a headline impact to some extent, the stocks tend to recover once investors remember that the utilities generally do not have a history of taking losses due to a storm. For example, when Hurricane Irma hit in Sept. 2017, relative to the UTY, NEE traded down 200bps right ahead of the hurricane's peak ~Sept. 10, and then promptly returned to parity vs. the UTY.

Policy – Carbon policy group links IRA's success to passage of permitting reforms; state AGs oppose

- The lobbying group American Clean Power Association linked the two pieces of legislation in a lengthy OpEd late last week
- "Without permitting reform, such as the recently released proposal to speed up the process for energy projects, the United States runs the risk of falling 100 gigawatts short of this expected clean energy impact. Project delays from the current permitting system would result in 550 million metric tons of additional carbon emissions this decade — equivalent to the annual emissions of 88 coal-fired power plants — as clean energy projects would not come online timely enough to displace those emissions." - ACPA
- More HERE.
- A group of 18 state AGs have penned a letter to Senate leaders opposing the expansion of FERC authority.

Guggenheim takeaway: *Part of the lobbying process, although we share the group's view, based on long-running conversations with companies under coverage, that the permitting process remains the primary bottleneck to transmission expansion – not access to capital. Manchin's legislation continues to face significant pushback from both sides of the aisle and the media (e.g., WSJ Board HERE), with a potential procedural vote in the Senate coming as soon as today – stay tuned.*

ED – NY Lawmakers request hearing on rising rates and electricity prices

- Lawmakers are requesting a hearing to address rising energy prices in New York.
- The request specifically addressed Con Edison, from more than 50 state representatives.
- Con Edison has warned that customers in the city could see 22% bill increases and heating bills could rise by 32%.
- More Here.

Guggenheim takeaway: *The bill sensitivity issue continues to pop up in NY, especially as a geography with one of the highest retail rates nationally. CECONY is simultaneously in rate case settlement talks where the company is proposing double-digit base rate increases, which could be a tough negotiating position with price sensitive*

intervenors.

ETR – ETR enters MOU to evaluate offshore wind development in LA

- ETR and Diamond Generation Corp. (subsidiary of Mitsubishi MSBHF (OTCMKTS)) signed a memorandum of understanding on evaluation and development of offshore wind in Louisiana.
- "This is an important first step to possibly bring wind power to our Louisiana shores," said Phillip May, Entergy Louisiana president and CEO. "While there remains work to be done before that happens, we are excited by the opportunity to begin this process. We aspire to help our communities thrive for generations to come, and this marks yet another milestone in honoring that mission."
- More Here.

Guggenheim takeaway: *This is an early-stage venture for ETR, but highlights the nationwide push for decarbonization and available alternatives in different geographies. The Gulf coast has not been a leader in offshore wind but having the option value is good for ETR.*

FE ─ PUCO special counsel turns out to have multiple ties to HB 6

- Dinsmore & Shohl, which is headquartered in Cincinnati, is an outside law firm working with PUCO to respond to federal subpoenas and public records requests. The firm allegedly has multiple ties to the HB 6 law at the center of Ohio's ongoing corruption scandal.
- More HERE.

Guggenheim takeaway: *The saga continues. Recall that PUCO's investigations are paused until early 2023, following the federal trials taking place beginning in January 2023.* ***For recent takes from our call with John Somerhalder, see HERE.***

SO ─ Hearings begin in Georgia Power's triennial rate case

- Live webcast
- Docket #44280

Guggenheim takeaway: *We continue to expect a constructive outcome in Georgia Power's triennial rate case, likely after Thanksgiving, with new rates effective Jan. 1, 2023. Recall that we recently met with all 5 commissioners in GA, along with Georgia Power and Southern Company C-Suite.* ***For our latest takes on the regulatory climate in Georgia and how we're thinking about SO post-Vogtle construction, see our in-depth note (HERE) as well as our Georgia IRP post-decision flash note (HERE).***

DUK ─ Rising fuel costs could lead to higher utility bills in North Carolina

- The new fuel and renewable energy adoption rates were requested to go into effect Sept. 1, 2022, and the new energy efficiency and demand management rates would go into effect Jan. 1, 2023.
- DUK press release HERE.
- More HERE.

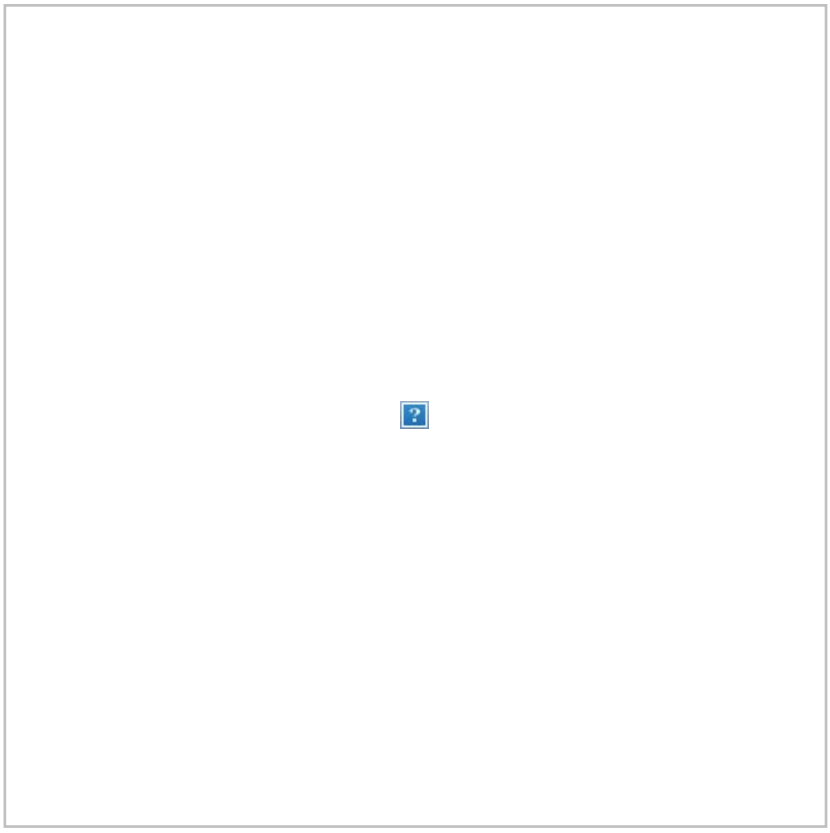
Guggenheim takeaway: *The article mentions that critics suggest that DUK should be pursuing more renewable energy sources, however, no mention of the enormous undertaking towards building out renewable energy in the form of the Carbon Plan is mentioned whatsoever.*

SRE – CPUC looking at alternatives to replace Aliso Canyon

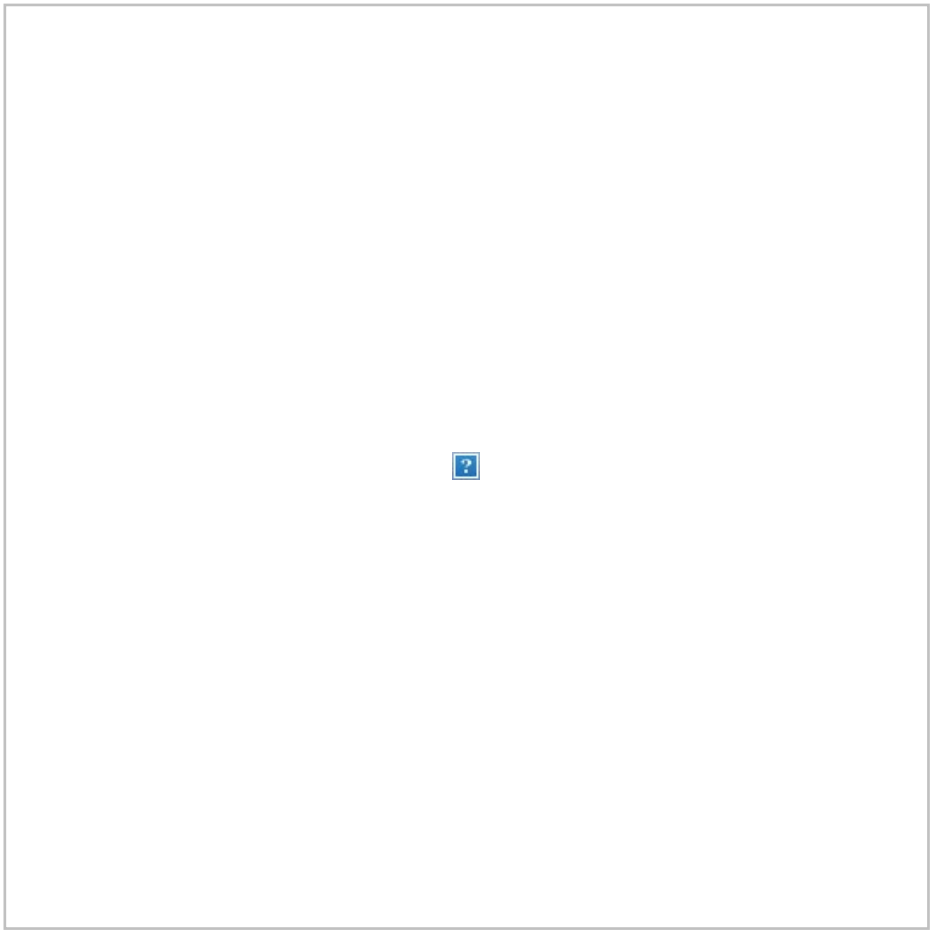
- CPUC staff issued a proposal for Aliso Canyon replacement by using non-gas fired electricity generation and storage, building electrification, and energy efficiency.
- The associated ruling finds that Aliso Canyon is currently needed for SoCalGas to reliably meet energy demand in the Los Angeles basin, and therefore sufficient replacement resources must be available for the eventual elimination of Aliso Canyon's use.
- The replacement resources would need to be a mix of non-gas generation and aggressive load reduction: two percent of electric capacity or four percent of forecast peak gas demand.
- More Here.

Guggenheim takeaway: *This is not an earnings impact for SCG/SRE but highlights the steep pathway for decarbonization once you account for large resources being replaced. While the proposal includes energy efficiency, the sheer amount could be very tough since most of the high ROI efficiency improvements have already been implemented.*

Hydrogen ─ PEM manufacturer and rail company partner on fuel cell passenger train

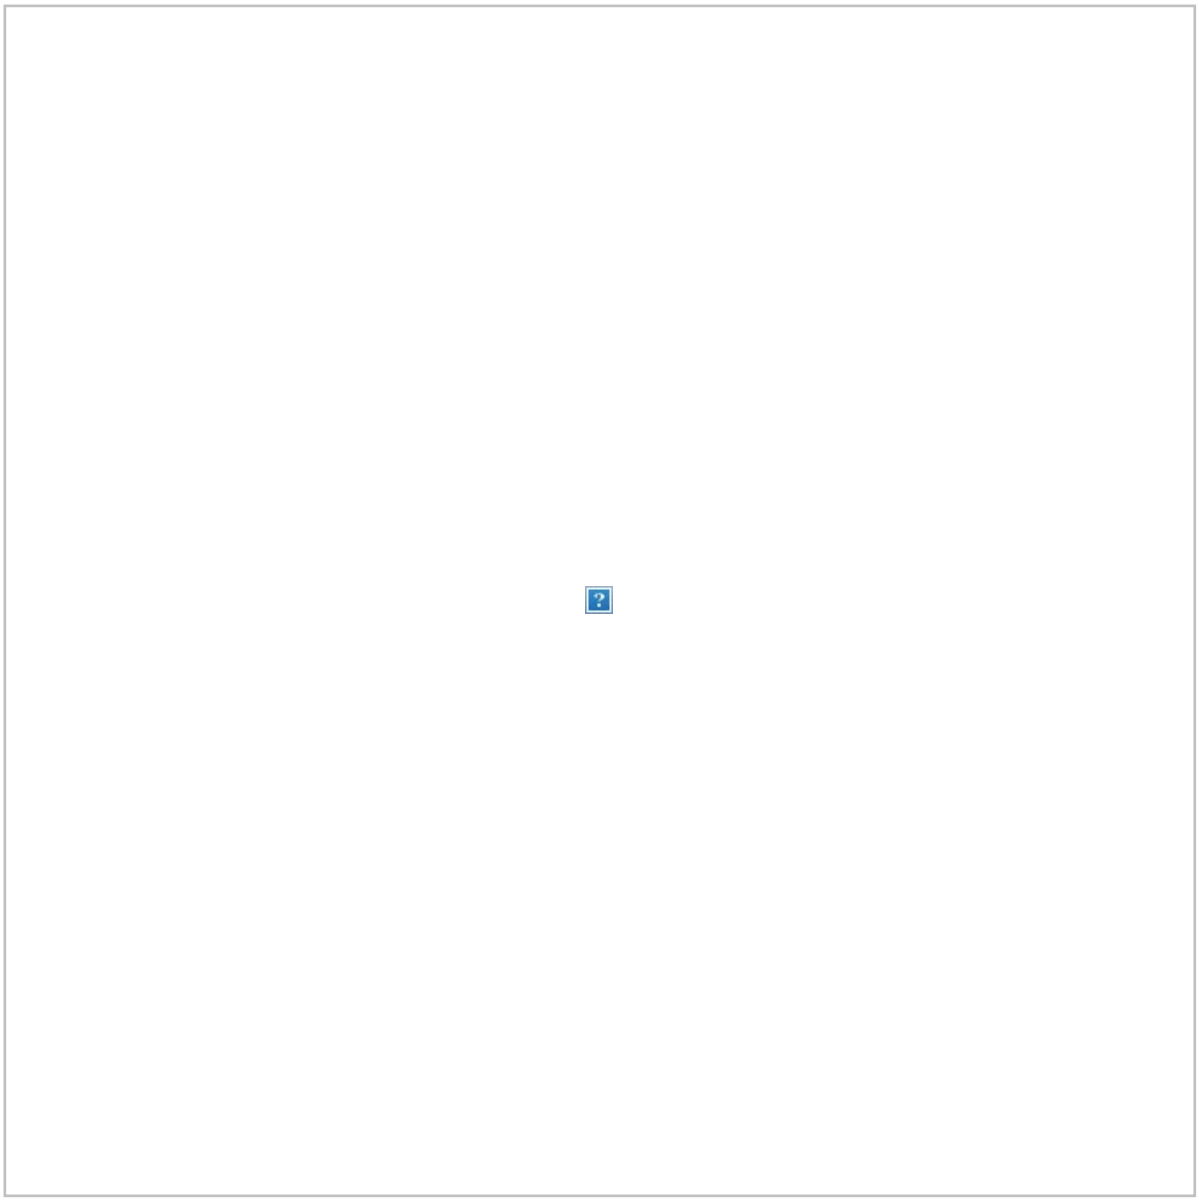


- "The contract to provide the hydrogen-powered train was awarded to Stadler by San Bernardino County Transportation Authority (SBCTA), with the option of additional trains in the future. The train is expected to be in service in San Bernardino, California in 2024 and will seat over 100 passengers." – release [SWX: SRAIL]
- More HERE.



Guggenheim takeaway: *Another example of end users approaching commercialization, with transport a key area of focus in many of our utility conversations – not dissimilar to existing fuel cell mass transit efforts.*

Nuclear ─ Air Force issues microreactor RFP



- "The Department of the Air Force, in partnership with the Defense Logistics Agency Energy, released a request for proposal for the Eielson Air Force Base Micro-Reactor Pilot Program today. This is an important first step toward developing the next-generation energy technology needed for energy resilience at Eielson Air Force Base and to inform future initiatives to power national security infrastructure" - release
- More HERE.

Guggenheim takeaway: *Minor FYI and as we expected – this RFP has been in the works for several years now, although we see the 2027 target as aggressive given the lack of commercial designs at the moment following the NRC's earlier rejection of a microreactor combined license application.*

For details on our Guggenheim-hosted client Utility events including: our DTE NDR; POR NDR; NEE NDR; CEG NDR; WEC NDR; OGS NDR; and other events, scroll down…

Utilities — Life, Death… and Pension Expense? (see our note HERE)

WEC – 2Q22 Beat and Raise; Firing on All Cylinders (see note HERE)

PEG – 2Q in Line; Pension Impacts Cast a Cloud, but Nuclear and OSW Value Debate Continues (see note HERE)

CNP – 2Q EPS Beat; Optimization and Organic Growth Build on "Resiliency Now" Upside with Financing Flexibility (see note HERE)

OGS – Q2 Pension Plan Remeasurement Removes 2022 Overhang; Strong Regulatory and Operational Execution Continues (see note HERE)

PNW reports 2Q22 EPS of $1.45 vs. Gugg/consensus at $1.46/$1.31; maintained 2022 guidance of $3.90-$4.10 ($4.00 midpoint) vs. Gugg/consensus at $4.05/$4.01; maintained 5%-7% EPS CAGR through 2026 (based off of current 2022 guidance midpoint)

PPL – **PPL reports 2Q22 earnings**

ETR reported 2Q22 EPS of $1.78 vs. $1.37 consensus and our $1.43 estimate; 2022 EPS guidance reiterated and now in top half

NI reports 2Q22 net operating EPS of $0.12 vs Gugg/consensus at $0.15/$0.12; maintains 2022 guidance of $1.42-$1.48 ($1.45 midpoint) vs Gugg/consensus at $1.45/$1.45; reiterates 7%-9% 2021–2024 CAGR based on 2021's $1.37 actual, and 5%-7% growth through 2023

EXC – **EXC reports 2Q22 earnings**

ALE – **ALE reports 2Q22 earnings**

AVA reports 2Q22 EPS of $0.16 vs Gugg/consensus at $0.29/$0.16; maintained existing 2022 EPS range of $1.93-$2.13 (pointing to lower end), and compared to Gugg/consensus at $1.94/$1.95; reiterated 2023 EPS guidance of $2.42-$2.62 ($2.52 midpoint) vs Gugg/consensus at $2.47/$2.47

Policy – Inflation Reduction Act could see floor vote as soon as this week

AVA – Washington Public Counsel opposes rate increase requests by Avista Utilities

Uranium – Additional uranium producers point to restarts as secondary stockpiles dwindle

IL/MISO – IPA approves operating permit for new CCGT; draws pushback from ICJC

NRG/PJM – NRG files to deactivate additional PJM units

Provided for the exclusive use of Michael Weisenburger at NiSource on 03-Aug-2022 10:00 AM.

PNW reports 2Q22 EPS of $1.45 vs. Gugg/consensus at $1.46/$1.31; maintained 2022 guidance of $3.90-$4.10 ($4.00 midpoint) vs. Gugg/consensus at $4.05/$4.01; maintained 5%-7% EPS CAGR through 2026 (based off of current 2022 guidance midpoint)

- +$0.20 weather impact vs. normal in 2Q22
- No quantification of currently projected 2023 pension/OPEB drag; recall that our estimate stands at $0.38 (see our note HERE)
- Reiterated 1.5%-2.5% customer growth guidance through 2024
- Reiterated ~1.5%-2.5% weather-normalized retail electricity sales growth in 2022, and electric sales growth of 3.5%-4.5% through 2024
- Capex plan unchanged: $4.7bn for 2022-2026 reiterated; rate base guidance reiterated as well
- Still no plans to issue equity before conclusion of yet-to-be-filed next rate case
- 2019 GRC: Court of Appeals process remains ongoing **(**more **HERE)**
- Original 2022 guidance was $3.80-$4.00 ($3.90 midpoint); LT CAGR grows off higher 2022 guidance, not this figure, however
- Conference call will be at **11am ET: 888-506-0062 (PIN: 507998)**

PPL — PPL reports 2Q22 earnings

- PPL reported $0.30 vs. our $0.28 and Cons $0.29
- Reaffirmed guidance of $1.30-1.45 (partial year of RI) and 6-8% LT growth off proforma 2022 $1.40-1.55
- Provides color on O&M savings targets to '25 in deck (HERE)
- Call at 11am ET - 1-888-346-8683 code 0662630

ETR reported 2Q22 EPS of $1.78 vs. $1.37 consensus and our $1.43 estimate; 2022 EPS guidance reiterated and now in top half

- ETR reported 2Q22 EPS of $1.78 vs. $1.37 consensus and our $1.43 estimate.
- ETR recorded $$0.24 benefit vs. normal weather in 2Q and weather adjusted sales were 4.6% above the same quarter last year.
- ETR anticipates the benefits of sales volumes to be partially offset by flex spending increases, higher interest costs (-5c utility, -10c holdco)
- ETR now expects 2.9% annualized load growth vs. 2.0% prior.
- ETR reiterated 2022 EPS guidance of $6.15-6.45, and is now in the top end of the range.
- ETR LT EPS guidance reiterated.

NI reports 2Q22 net operating EPS of $0.12 vs Gugg/consensus at $0.15/$0.12; maintains 2022 guidance of $1.42-$1.48 ($1.45 midpoint) vs Gugg/consensus at $1.45/ $1.45; reiterates 7%-9% 2021–2024 CAGR based on 2021's $1.37 actual, and 5%-7% growth through 2023

- Reaffirmed 2024 EPS guidance with unchanged (2Q22 HERE, and 1Q22 HERE) slide 8 of presentation detailing EPS increments/decrements to **maintain 2024 EPS guidance** despite delayed solar in-service dates vs prior plans.
- NI continues to guide to $10bn in 2021–2024 capex, with ~$2bn for renewable projects expected, primarily between 2022–2024, with **any remainder expected in 2025** (*this is the same 2025 messaging as per 1Q22 call*)
- Reiterated rate base CAGR guidance of 10%–12% **for each of the company's businesses through 2024**.
- Reiterated coal retirement plans from 1Q22 call: Schahfer Generating Station Units 17 & 18 (the last two coal units) are now expected to retire by the end of 2025 vs 2023 previously. However, Michigan City Generating Station still expected to retire on schedule between 2026-2028.
- Maintained 2021–2024 financing plan and target of LT adjusted FFO/total debt of **~14%–15%**
- **2021 IRP update:** new RFP solicitation process expected to launch in August 2022
- Conference call will be held at **11:00am ET —** Dial-in: **(888) 330-2391...** Access code: **28323**

Provided for the exclusive use of Michael Weisenburger at NiSource on 03-Aug-2022 10:00 AM.

EXC – EXC reports 2Q22 earnings

- EXC reported $0.44 vs. Gugg/Consensus $0.46
- Reaffirmed 20222 guidance of $2.18-2.23 (vs. Gugg $2.27)
- Results include $0.07 of drags at PHI ($0.05, net of higher distribution rates)
- Expects to issue $500mm in equity via ATM over remainder of year, or a block (a part of the previously-disclosed $1bn by '25)
- Call at 10am EST - registration HERE

ALE – ALE reports 2Q22 earnings

- ALE reported $0.67 vs. Gugg $0.64, Consensus $0.60
- Results included $0.07 of adjustments and $0.03 of fees tied to the purchase of NEE
- ALE reaffirmed 2022 guidance of $3.60-3.90 (vs. Gugg $3.75)
- Results included a drag at ACE from SPP congestion and 'extreme volatility' impacting the Caddo wind farm
- NEE has contributed ~$17mm in revenue since April
- Call at 10am EST – registration HERE

AVA reports 2Q22 EPS of $0.16 vs Gugg/consensus at $0.29/$0.16; maintained existing 2022 EPS range of $1.93-$2.13 (pointing to lower end), and compared to Gugg/consensus at $1.94/$1.95; reiterated 2023 EPS guidance of $2.42-$2.62 ($2.52 midpoint) vs Gugg/consensus at $2.47/$2.47

- "Other business" segment contribution to 2022 EPS guidance raised by $0.10
  - "Earnings at our other businesses increased due to net investment gains recognized during the period primarily due to fair value adjustments in certain equity investments, resulting in net unrealized gains." - AVA 2Q22 earnings release
- Avista Utilities' segment contribution to 2022 EPS guidance lowered by $0.10
  - "Earnings at Avista Utilities were lower than expected, primarily due to a write-off of the Dry Ash Disposal project at Colstrip as agreed upon in our 2022 Washington rate case settlement, as well as increased costs due to the impacts of rising interest rates and inflation." – AVA CEO
- Alaska Electric Light & Power filed a general rate case in July, as planned
- **Financing plans:**
  - **Debt:** $400m of LT debt issued in 1Q22, with no expectation of further issuances this year
  - **Equity:** AVA expects to issue $135m of equity in 2022 (vs $120m previously), including $60.8m issued during 1H22
- Conference call will be held at **10:30am ET —** Dial-ins use **personal PIN numbers**, generated by registering HERE

Policy – Inflation Reduction Act could see floor vote as soon as this week

- The timing data point from the Washington Post comes as Senator Sinema's stance remains unclear
- "We are on schedule to consider this bill later this week" - Senator Schumer
- More HERE

Guggenheim takeaway: *Interesting timing data point as Senator Sinema's views remain shrouded and Republicans continue to hammer on the legislation. As noted by the Washington Post, this will likely be a more protracted process given the intricacies of reconciliation and the ability for roadblocks to be thrown up in the process.*

AVA – Washington Public Counsel opposes rate increase requests by Avista Utilities

- "For Avista, the unit says the settlement provides rates over two years that are about $47 million too high for electric rates and $7 million too high for natural gas rates." - Washington Attorney General's office
- Public Counsel's announcement HERE

Provided for the exclusive use of Michael Weisenburger at NiSource on 03-Aug-2022 10:00 AM.

- Rate case docket HERE

Guggenheim takeaway: *No surprise, as the Public Counsel always takes this stance. The question now is how much influence the Public Counsel's opinion will have in swaying the final order, given supportive legislation and a settlement involving all relevant parties other than the Public Counsel itself.*

Uranium ─ Additional uranium producers point to restarts as secondary stockpiles dwindle

- Additional operators are restarting mines according to attendees at the Digger & Dealers Mining Forum in Australia, with one CEO putting the forecasted annual deficit at 40mm lbs. in the coming years
- More HERE

Guggenheim takeaway: *Minor FYI.* ***See our deep dive uranium baseline note from 1Q HERE for more thoughts.***

IL/MISO ─ IPA approves operating permit for new CCGT; draws pushback from ICJC

- The 1.1GW CCGT would be operational in 2024 and have the ability to co fire varying levels of hydrogen
- Plant HERE
- More HERE

Guggenheim takeaway: *Interesting power data point following the passage of CEJA last year as MISO Zone 4 remains tight on capacity.*

NRG/PJM ─ NRG files to deactivate additional PJM units

- Joliet Units 6-8 represent 1.3GW of gas-fired ST capacity, with NRG requesting deactivation by 06/2023
- More HERE

Guggenheim takeaway: *Zero surprise given NRG's retirement actions following last year's BRA.*

Provided for the exclusive use of Michael Weisenburger at NiSource on 03-Aug-2022 10:00 AM.

DTE Energy Company (DTE)

Jerry Norcia, *Chief Executive Officer*

Barbara Tuckfield, *Director, Investor Relations*

Date

August 8 & 9, 2022
New York

Meeting Format

NDR - 1:1 Meetings, Group Meeting

Company Information

Market Cap: $25.7bn

DTE Energy Co. (DTE) operates as a diversified energy company, which engages in the development and management of energy-related businesses and services. It operates through the following segments: Electric, Gas, DTE Vantage, Energy Trading, and Corporate and Other. The Electric segment consists of generation, purchase, distribution, and sale of electricity to residential, commercial, and industrial customers in southeastern Michigan. The Gas segment is involved in the purchase, storage, transportation, distribution, and sale of natural gas to residential, commercial, and industrial customers throughout Michigan, and the sale of storage and transportation capacity. The DTE Vantage segment focuses on projects that deliver energy and utility-type products and services to industrial, commercial, and institutional customers, produce reduced emissions fuel, and sell electricity and pipeline-quality gas from renewable energy projects. The Energy Trading segment covers energy marketing and trading operations. The Corporate and Other segment composed of various holding company activities, holds certain non-utility debt, and holds certain investments, as well as funds supporting regional development and economic growth. The company was founded in January 1995 and is headquartered in Detroit, MI. (Source: FactSet)

Provided for the exclusive use of Michael Weisenburger at NiSource on 03-Aug-2022 10:00 AM.

Share Price Performance (Year-to-Date, Three-Month, One-Month, & Five-Day Trailing)

(1) Regulated utilities deliver power to end-use customers via regulated transmission & distribution (T&D) infrastructure; vertically integrated utilities with regulated or mostly contracted generation are also included.

(2) Local Gas Distribution Companies (LDCs), as well as diversified utilities with a business mix largely comprised of gas infrastructure and related activities (i.e., LDC franchises, interstate pipelines, and/or other gas midstream activities).

(3) Integrated utilities own and operate regulated T&D franchises, as well as un-regulated power generation with commodity exposure.

(4) IPPs operate merchant (i.e., un-regulated, non-utility) power plants that compete to sell power in wholesale markets or through retail marketing businesses.

ANALYST CERTIFICATION

By issuing this research report, each Guggenheim Securities, LLC ("Guggenheim Securities") research analyst whose name appears in this report hereby certifies that (i) all of the views expressed in this report accurately reflect the research analyst's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst.

IMPORTANT DISCLOSURES

The research analyst(s) whose name(s) appear(s) in this report have received compensation based upon various factors, including quality of research, investor client feedback, and Guggenheim Securities, LLC's overall revenue, which includes investment banking revenue.

Please refer to this website for company-specific disclosures referenced in this report: https://guggenheimsecurities.bluematrix.com/sellside/Disclosures.action. Disclosure information is also available from Compliance, 330 Madison Avenue, New York, NY 10017.

RATINGS EXPLANATION AND GUIDELINES

BUY (B) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of 10% or more within a 12-month period.

NEUTRAL (N) - Describes stocks that we expect to provide a total return (price appreciation plus yield) of between plus 10% and minus 10% within a 12-month period.

SELL (S) - Describes stocks that we expect to provide a total negative return (price appreciation plus yield) of 10% or more within a 12-month period.

NR - The investment rating and price target have been temporarily suspended. Such suspensions are in compliance with applicable regulations and/or Guggenheim Securities, LLC policies.

CS - Coverage Suspended. Guggenheim Securities, LLC has suspended coverage of this company.

NC - Not covered. Guggenheim Securities, LLC does not cover this company.

Monitor - Describes stocks whose company fundamentals and financials are being monitored, and for which no financial projections or opinions on the investment merits of the company are provided.

Under Review (UR) - Following the release of significant news from this company, the rating has been temporarily placed under review until sufficient information has been obtained and assessed by the analyst.

Guggenheim Securities, LLC methodology for assigning ratings may include the following: market capitalization, maturity, growth/value, volatility and expected total return over the next 12 months. The price targets are based on several methodologies, which may include, but are not restricted to, analyses of market risk, growth rate, revenue stream, discounted cash flow (DCF), EBITDA, EPS, cash flow (CF), free cash flow (FCF), EV/EBITDA, P/E, PE/growth, P/CF, P/FCF, premium (discount)/average group EV/EBITDA, premium (discount)/average group P/E, sum of the parts, net asset value, dividend returns, and return on equity (ROE) over the next 12 months.

Price targets are assigned for Buy- and Sell-rated stocks. Price targets for Neutral-rated stocks are provided at the discretion of the analyst.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at https://guggenheimlibrary.bluematrix.com/client/library.jsp, contact the primary analyst or your Guggenheim Securities, LLC representative, or email GSResearchDisclosures@guggenheimpartners.com.

Ticker	Issuer	Rating	ISIN	Moody's / S&P / Fitch	Benchmark Bond				5yr CDS Spread	J.P. Morgan View
					Issue	Price ($)	Yield (%)	Z Sprd		
Utilities (Holdco)										
AES	AES Corp	OW	US00130HCC79	Baa3/BBB-/BBB-	3.950% '30	90.0	5.52	**280**	215	We maintain our Overweight on AES Corp. The company has a very strong and diverse set of assets relative to other power generators. Most of AES' IPP operations are under long-term PPAs, providing cash flow visibility and stability. AES is now fully IG rated, following Moody's upgrade in May 2022, and is now committed to reach mid-BBB metrics, mainly through rapid growth of its renewable and US regulated utility footprint. The company is well-positioned to benefit from the surge in renewable development given its growing backlog. We continue to see AES as one of the strongest ESG transition stories within our coverage universe. Risks to our rating: large growth spending, power price volatility.
AEE	Ameren Corp	OW	US023608AJ15	Baa1/BBB/-	3.500% '31	93.4	4.44	**172**	NA	We maintain our Overweight on AEE Corp. We view the enactment of SB 564 in Missouri, which ultimately improves the state's regulatory framework for utilities, favorably for AEE, particularly, as more than ~50% of consolidated earnings are derived from its Missouri subsidiary. Additionally, AEE has historically exhibited strong credit metrics without significant regulatory lag. We believe the 10-year bonds remain attractive versus other regulated peers such as XEL and DUK and integrated NEE. Risks to our Overweight include the below-average MO operating environment and any adverse strategic decisions management could undertake.
AEP	American Electric Power (Holdco)	OW	US025537AN10	Baa2/BBB+/BBB	2.300% '30	86.7	4.37	**166**	50	We maintain our Overweight on AEP. We view AEP as a low-risk utility holding company that is underpinned by a geographically and regulatory diverse number of fully regulated utility operating companies. In addition, AEP benefits from a disciplined management team that over the last few years has worked to improve the holding company's underlying business risk by prioritizing the expansion of regulated earnings and the successful exit of its merchant generation. Risks to our Overweight include adverse regulatory decisions, elevated capital spending and accelerated deterioration of credit metrics.
BKH	Black Hills Corp	OW	US092113AT65	Baa2/BBB+/BBB+	2.500% '30	83.5	5.05	**233**	NA	We maintain our Overweight on Black Hills Corp. In our opinion, BKH has taken multiple steps over the last two years to de-risk its business and improve its financial profile. We consider BKH a fully regulated utility holding company as the company divested its remaining O&G assets in 2018. Additionally, BKH's business structure has been simplifying via consolidation of its utilities. Risks to our Overweight rating include increased debt issuance to fund its operations, any leveraging acquisition and regulatory outcomes in ERCOT.

kevin.l.kwan@jpmorgan.com

J.P.Morgan

Ticker	Issuer	Rating	ISIN	Moody's / S&P / Fitch	Benchmark Bond				5yr CDS Spread	J.P. Morgan View
					Issue	Price ($)	Yield (%)	Z Sprd		
DQE	Duquesne Light Holdings (Holdco)	OW	US266233AJ47	Baa3/BBB-/-	2.775% '32	82.8	5.08	**235**	NA	We maintain our Overweight credit recommendation on Duquesne Light Holdings. DQE benefits from a supportive regulatory environment in Pennsylvania. The company is expected to pare down its unregulated exposure by winding down its energy supply and marketing businesses. Risks to our Overweight include DQE's status as a private company.
ETR	Entergy Corp (Holdco)	OW	US29364GAP81	Baa2/BBB/-	2.400% '31	82.7	4.80	**208**	NA	We maintain our Overweight on Entergy. In our opinion, ETR's credit is supported by the strength of its regulated franchise and robust credit metrics. We believe management is committed to maintaining a strong balance sheet across the complex and growing through ETR's regulated businesses, despite of recent headwinds including the ongoing LPSC complaint and storm cost securitizations. Additionally, management is expected to make further rationalization decisions on its unregulated portfolio, which should help its credit ratings and overall risk profile. Risks to our Overweight include high percentage of holdco debt, regulatory pushback on nuclear decommissioning, and deterioration in existing nuclear operations.
EVRG	Evergy Inc.	OW	US30034WAB28	Baa2/BBB+/-	2.900% '29	88.2	4.87	**216**	NA	We maintain our Overweight on Evergy. EVRG's credit is supported by relatively strong regulatory environments in Kansas and Missouri. Its credit metrics are expected to improve as it benefits from storm cost securitization and tax credits this year. On the other hand, following a March 2020 agreement with activist investor Elliott, EVRG discontinued its stock buyback plan and is committed to a five-year investment strategy that incorporates an accelerated decarbonization plan. While capital expenditure is expected to stay elevated in the coming years, successful execution of the plan is likely to improve its ESG profile and reduce cost in the long term, a credit positive. Risks to our OW include adverse regulatory decisions and larger than anticipated new issuance plans.
FE	FirstEnergy Corp (Holdco)	OW	US337932AC13	Ba1/BB+/BB+	7.375% '31	112.5	5.60	**287**	150	We maintain our Overweight on FirstEnergy Corp (FE). FE continues to be a low-risk, fully regulated transmission and distribution utility that is geographically diversified, with reasonable financial cushion to withstand the repercussions of their deferred prosecution agreement. The company has taken several steps to correct its governance issues. Separately, FE recently closed its partial stake sale of FET, with proceeds being allocated toward the company's recently announced $800mn tender offer, improving its credit metrics. We expect FE Holdco to have IG ratings from at least two of the three agencies by the end of 2022. Risks to the downside include a deterioration of regulatory relationships, the large capital spending plan and the company's ongoing coal exposure.

Kevin L Kwan
(1-212) 270-9455
kevin.l.kwan@jpmorgan.com

J.P.Morgan

Ticker	Issuer	Rating	ISIN	Moody's / S&P / Fitch	Benchmark Bond				5yr CDS Spread	J.P. Morgan View
					Issue	Price ($)	Yield (%)	Z Sprd		
FE	FirstEnergy Transmission	OW	US33767BAD10	Baa2/BB+/BB+	2.866% '28	88.4	5.03	**231**	150	We maintain our Overweight recommendation on FirstEnergy Transmission. We believe FET will be one of the primary focus areas for FE's new regulated growth strategy, especially as FE continues to grow its transmission business and the Biden administration makes transmission development a priority. Risks to our Overweight include FE failing to stabilize its credit story, resulting in a further ratings downgrade.
AES	IPALCO Enterprises	OW	US462613AN04	Baa3/BBB-/BBB	4.250% '30	93.7	5.22	**250**	215	We maintain our Overweight recommendation on IPALCO. IPALCO's primary subsidiary is the utility Indianapolis Power & Light, which operates in what we view as a credit supportive environment in Indiana. Additionally, we have a positive view on IPALCO's parent, AES Corp, and the S&P rating is linked due to consolidated methodology. Risks to our Overweight include an adverse regulatory environment and a change in AES Corp's financial strategy.
PSD	Puget Energy	OW	US745310AJ12	Baa3/BBB-/BBB	4.100% '30	93.7	5.04	**232**	NA	We maintain our Overweight credit recommendation on PSD. PSD stands to benefit from the recently passed SB 5295 in Washington, its primary jurisdiction, which requires utilities to file for multi-year rate plans (MYRPs), reducing regulatory lags. While we generally view the Washington Utilities and Transportation Commission (WUTC) as restrictive from a credit standpoint, given its unfavorable rate decisions in the past, this new law will likely improve the regulatory backdrop in the state. PSD filed MYRPs for both electric and gas rate increases earlier this year. Risks to our Overweight include an adverse outcome in future rate case proceeding in Washington, and any change to PSD's ownership consortium resulting in more aggressive financial policies.
SRE	Sempra Energy (Holdco)	OW	US816851BG34	Baa2/BBB/BBB+	3.400% '28	94.5	4.47	**175**	71	We maintain our Overweight rating on Sempra Energy. SRE is one of the remaining diversified utilities that has significant exposure to unregulated businesses, primarily through their majority ownership of Sempra Infrastructure Partners, which has exposure to Mexico Utilities and LNG operations. Regardless, we think Sempra will continue to focus on its regulated businesses in Texas and California which will reduce the amount of unregulated risk over time. Risks to our Overweight on Sempra include material leveraging at the holding company or increased unregulated business risk.

Kevin L Kwan
(1-212) 270-9455
kevin.l.kwan@jpmorgan.com

Ticker	Issuer	Rating	ISIN	Moody's / S&P / Fitch	Benchmark Bond				5yr CDS Spread	J.P. Morgan View
					Issue	Price ($)	Yield (%)	Z Sprd		
AWK	Amerinca Water Works	N	US03040WAY12	Baa1/A/-	2.300% '31	86.7	4.10	**138**	NA	We maintain our Neutral rating on American Water Works. AWK has a strong credit profile, driven by its low-risk nature as a water and wastewater utility and its geographic diversity. We think the company is well-positioned as a defensive, low-risk credit relative to the broader regulated utilities sector. Our Neutral rating on the name is mostly predicated on relative value, as we don't expect AWK to trade materially tighter than some of the higher quality regulated utilities in the space. Risks to our rating include environmental risks associated with water sourcing, highly acquisitive growth strategies, and aggressive capital spending programs.
BRKHEC	Berkshire Hathaway Energy	N	US084659AV35	A3/A-/-	3.700% '30	97.1	4.13	**141**	NA	We maintain our Neutral on Berkshire Hathaway Energy Co, the holding company. BRKHEC is a highly regulated utility holding company with a strong financial profile due to its BRK parental ownership. The BRK ownership allows for BRKHEC to maintain a strong FCF profile (no dividend requirements). The strong financials are offset by management's acquisitive growth strategy, as highlighted by the company's recent acquisition of Dominion Energy Gas. Risks to the upside for our Neutral rating include deleverage with FCF and positive rate case outcomes. Risks to the downside for our Neutral rating include leveraging acquisitions and adverse rate outcomes.
CNP	CenterPoint Energy (Holdco)	N	US15189TBB26	Baa2/BBB/BBB	2.650% '31	85.5	4.66	**194**	NA	We maintain our Neutral rating on CNP. Over the last year, the company has executed well on its plan to exit from its ownership of ENBL. The credit is supported by its strong regulated subsidiaries, CEHE and CERC and remains on a steady path for rate base growth following its exit from unregulated businesses. Over the longer term, we anticipate CNP could utilize proceeds from its ENBL divestiture to help fund investments or capex. Risks to the upside and downside are dependent on its ownership of ENBL.
CMS	CMS Energy Corp (Holdco)	N	US125896BS82	Baa2/BBB/BBB	3.450% '27	96.5	4.19	**146**	NA	We maintain our Neutral on CMS Energy. We view CMS as a low-risk, highly regulated utility holding company operating solely in Michigan, an above-average regulatory jurisdiction. The Michigan regulatory environment has historically been credit supportive by authorizing above-average ROEs and faster rate case decisions relative to other states. Management has historically been comfortable with its current metrics, and, as such, we do not expect any de-leveraging. Risks to the downside include CMS's weak credit metrics and single-state concentration. Risks to the upside include the strong Michigan regulatory environment and above-average ratemaking treatment.

Kevin L Kwan
(1-212) 270-9455
kevin.l.kwan@jpmorgan.com

J.P.Morgan

Ticker	Issuer	Rating	ISIN	Moody's / S&P / Fitch	Benchmark Bond				5yr CDS Spread	J.P. Morgan View
					Issue	Price ($)	Yield (%)	Z Sprd		
D	Dominion Energy (Holdco)	N	US25746UDL08	Baa2/BBB/BBB+	2.250% '31	81.0	4.86	**213**	55	We maintain our Neutral on Dominion Energy. In our opinion, management has taken meaningful credit-supportive measures in order to maintain its current ratings profile, including the completion of its sale of midstream assets. However, our Neutral recommendation is predicated on actual de-leveraging at the parent balance sheet. Risks to the upside include accelerated deleveraging and regulatory developments. Risks to the downside include outstanding holdco debt and increasing exposure to natural gas generation.
AES	DPL Inc.	N	US233293AP46	Ba1/BB+/BB	4.350% '29	95.2	5.20	**248**	NA	We are downgrading DPL to Neutral from Overweight. DPL's primary subsidiary is the utility Dayton Power & Light, which operates in what we view as a developing regulatory environment in Ohio given the recent staff recommendation to freeze rates at AES Ohio, as well as a more cautious regulatory commission following the recent HB6 scandal. While uncertainty looms, management at AES still sees a strong economic case for investing in grid upgrades and growing its rate base. We still see DPL on the track of getting upgraded back to IG, following resolution of the rate case, but the timeline for an upgrade remains uncertain. Risks to the downside include any further averse regulatory developments on rate cases and declining credit metrics, risks to the upside include a positive development in AES Ohio's ongoing distribution rate case.
DTE	DTE Energy Co (Holdco)	N	US233331BC02	Baa2/BBB/BBB	3.400% '29	92.5	4.68	**197**	NA	We maintain our Neutral on DTE. In our opinion, DTE's business risk profile is underpinned by its historically disciplined management team and utility operations within a favorable regulatory jurisdiction. The company's recent spinoff of its Gas Storage & Pipeline (GSP) segment spinoff in 2021 further improved DTE's regulated business focus, although we believe there are more attractive utility holdco opportunities with similar underlying fundamentals to DTE. Upside risks to our Neutral include increased emphasis on DTE's regulated utility business and stronger regulatory outcomes. Downside risks to our rating include increased non-utility investments.

Kevin L Kwan
(1-212) 270-9455
kevin.l.kwan@jpmorgan.com

Ticker	Issuer	Rating	ISIN	Moody's / S&P / Fitch	Benchmark Bond				5yr CDS Spread	J.P. Morgan View
					Issue	Price ($)	Yield (%)	Z Sprd		
DUK	Duke Energy Corp (Holdco)	N	US26441CBL81	Baa2/BBB/-	2.550% '31	83.3	4.88	**216**	NA	We maintain our Neutral recommendation on DUK following the company's resolution of some of its coal ash recovery issues in North Carolina and the recent sale of a partial ownership of its Indiana assets to GIC to fund the capital plan. We expect DUK to remain a core holding for investors, given the size of the consolidated utility, its fully regulated status, ESG focus and credit-supportive nature across its various regulatory environments. DUK holdco bonds currently trade behind other comparable peers. In our opinion, current levels of DUK are fair. Risks to our Neutral include deleveraging and positive rate case decisions, as well as any actions taken by activist investors, including recent Elliott involvement.
BRKHEC	Eastern Energy Gas Holdings	N	US257375AP04	Baa1/A/WD	3.000% '29	86.1	5.31	**259**	NA	We maintain our Neutral on Eastern Energy Gas Holdings. EEGH is a low-risk pipeline holding company, previously owned by Dominion Energy, and was sold to Berkshire Hathaway Energy in 2020. The company's pipelines are located in supply basins with strong geographic diversity. The majority of the company's earnings are generated by its FERC regulated interstate gas pipeline and storage segments, and the pipeline capacity is largely contracted. Management is also committed to reduce debt, further supporting its credit profile. Downside risks include adverse changes in regulatory environment, elevated capital spending.
EIX	Edison International (Holdco)	N	US281020AM97	Baa3/BBB-/BBB-	4.125% '28	94.6	5.19	**246**	NA	We maintain our Neutral on EIX. We believe California electric utilities remain susceptible to a disproportionate level of wildfire risk. The passage of the wildfire insurance fund provides a level of protection against persisting California wildfire risks, but a scenario still exists where a catastrophic fire could exhaust the insurance fund, in our view. Risks to our rating include continued legislation designed to socialize the costs of wildfire risk and the continued possibility of another catastrophic fire in any IOU's service territory that could exhaust the insurance fund.
WTRG	Essential Utilities Inc	N	US29670GAF90	Baa2/A-/-	2.400% '31	82.6	4.85	**213**	NA	We maintain our Neutral rating on WTRG. We acknowledge the low-risk characteristics of water utilities, but we also note that WTRG has a significant exposure to its regulated natural gas business. Nonetheless, the regulatory environment for water and gas is and will likely remain strong and supportive in WTRG's main jurisdiction Pennsylvania. Overall, we see limited opportunities for WTRG to tighten materially from current levels, relative to some of the higher quality regulated names such as XEL. Risks to our ratings include environmental risks associated with water sourcing, highly acquisitive growth strategies, and aggressive capital spending programs.

Kevin L Kwan

EXC	Exelon Corp	N	US30161NBC48	Baa2/BBB/BBB	3.350% '32	90.6	4.54	**181**	45	We maintain our Neutral on EXC. Our Neutral on EXC continues to be predicated on relative value. EXC is now a pure-play regulated utility holding company after the completion of its ExGen spinoff earlier this year. The company is supported by strong regulatory environments across its jurisdictions, with nearly 100% of rate base growth in the next 4 years expected to be recovered through alternative recovery channels. Upside risks to our Neutral include expedited de-leveraging at the holdco, material improvement of credit metrics and increased focus on the regulated utility business. Downside to our Neutral includes regulatory developments.
ITC	ITC Holdings Corp (Holdco)	N	US465685AQ80	Baa2/BBB+/-	2.950% '30	88.8	4.61	**190**	NA	In our view, ITC has one of the lowest business risk profiles in the sector given its status as a transmission-only holding company. The low business risk profile is offset by its credit metrics, in our view, which are at the low end of its peer group of utility holding companies. Risks to our rating include upside from FERC's ROE complaints and downside from new parent Fortis.
NI	Nisource Inc (Holdco)	N	US65473PAJ49	Baa2/BBB+/BBB	3.600% '30	93.3	4.64	**192**	NA	We maintain our Neutral on NI. In our opinion, the NI management team has a well telegraphed track record toward credit supportiveness and commitment to IG ratings. The company's regulatory environment is also broadly supportive across its six jurisdictions, and NI benefits from regulatory riders for cost recovery, a credit positive. Risks to the upside and downside are driven by the company's ability to focus on growing its regulated business going forward.
PPL	PPL Corp (Holdco)	N	US69352PAQ63	Baa1/BBB+/-	4.125% '30	97.1	4.57	**185**	NA	We are Neutral PPL. PPL successfully transitioned to a fully regulated US utility holding company after completing the acquisition of NECO in May 2022, a credit positive. PPL's financial metrics have improved in the last two years as it sold off its utility business in the UK and used the proceeds to reduce debt and fund capex. Going forward, we expect PPL to maintain a relatively strong credit profile with stable cash flow generations, underpinned by supportive regulatory environment in PA, KY, and RI.
DUK	Progress Energy Inc.	N	US743263AG09	Baa1/BBB/WD	7.000% '31	112.2	5.32	**259**	NA	We maintain our Neutral rating on Progress Energy. Progress Energy is an intermediate holding company with fully regulated subsidiaries Duke Energy Florida and Duke Energy Progress. Progress Energy relies solely on the upstream dividends from its opcos to support its debt service. Credit metrics continue to be constrained by the large proportion of holding company debt and negative impact of hurricanes. Risks to the downside include additional new issuance at Progress Energy's operating companies and deterioration of regulatory relationships. Risks to the upside include accelerated debt reduction measures.

J.P.Morgan

Ticker	Issuer	Rating	ISIN	Moody's / S&P / Fitch	Benchmark Bond				5yr CDS Spread	J.P. Morgan View
					Issue	Price ($)	Yield (%)	Z Sprd		
PEG	Public Service Enterprise Group	N	US744573AU04	Baa2/BBB/-	2.450% '31	84.0	4.57	**184**	NA	We maintain our Neutral recommendation on Public Service Electric & Gas. PSE&G is a fully regulated utility operating in a favorable regulatory environment, and we think spreads fairly reflect its strength. Upside risks to our Neutral rating include stronger regulatory decisions, and downside risks include adverse regulatory decisions and its large capex program.
EIX	Southern California Edison (1st Mtg)	N	US842400GJ61	A3/A-/BBB+	3.650% '28	95.2	4.61	**188**	NA	As the principal subsidiary of EIX, Southern California Edison (SCE) generates essentially all the company's consolidated revenues. We think the level of cushion afforded to SoCal Ed's FMBs is adequate, in the event of a catastrophic fire event. We consider SoCal Ed FMBs priority over unsecured claims improves the likelihood of full recovery, in the event of an extreme downside scenario, which we currently do not anticipate. Risks to the upside and downside are largely tied to ongoing wildfire risk and the effectiveness of the wildfire fund established under AB1054.
SO	Southern Co (Holdco)	N	US842587DE49	Baa2/BBB/BBB+	3.700% '30	92.2	4.89	**217**	65	We maintain our Neutral on SO Corp. In our opinion, SO bonds trading behind other highly or fully regulated holding company peers is fair, given concerns around their ability to manage a large-scale construction project in a disciplined and cost-effective manner. Further, we believe SO's preservation of support from all three constituent groups (regulatory, political, and the ownership consortium) throughout the remaining construction period is a key component to its underlying credit risk. Our Neutral recommendation draws a balance between cost increases and heightened construction risk associated with Vogtle and with recent credit measures aimed at supporting the holding company. Risks to the upside and downside are largely tied to Vogtle construction.
WEC	WEC Energy Group (Holdco)	N	US92939UAE64	Baa1/BBB+/BBB+	1.800% '30	81.2	4.55	**184**	NA	We maintain our Neutral on WEC. WEC generally trades at the tight end of other high-quality fully-regulated holding companies, which we believe is appropriate given its credit metrics and low business risk profile. Risks to the upside and downside largely relate to regulatory outcomes and management's growth strategy.
NEE	NextEra Energy	UW	US65339KCJ79	Baa1/BBB+/A-	5.000% '32	103.1	4.60	**186**	85	We maintain our Underweight on NEE. While the management team continues to employ a disciplined approach toward its growth strategy and commitment to strong ratings, we believe current levels do not adequately reflect NEE's well-telegraphed excess balance sheet capacity and acquisition appetite. We believe NEE's anticipation of new issuance will weigh on spreads over the near term. Risks to our Underweight include the strong management team, increased regulated business mix, and overall de-emphasis of M&A strategy.

J.P.Morgan

Ticker	Issuer	Rating	ISIN	Moody's / S&P / Fitch	Benchmark Bond				5yr CDS Spread	J.P. Morgan View
					Issue	Price ($)	Yield (%)	Z Sprd		
XEL	Xcel Energy Inc (Holdco)	UW	US98388MAD92	Baa1/BBB+/BBB+	4.600% '32	99.5	4.66	**192**	NA	We maintain our Underweight on Xcel Energy. XEL is a fully regulated utility holding company. The company's credit strength is underpinned by its subsidiaries such as NSP-Minnesota and Public Service Co of Colorado. While the company's credit profile is expected to remain steady, we believe the company will continuously access the capital markets to fund its relatively large capex program. Risks to our Underweight on Xcel include strong credit metrics, disciplined regulatory growth, and solid regulatory decisions and approvals.

Important Disclosures

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables, are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Explanation of Credit Research Valuation Methodology, Ratings and Risk to Ratings:
J.P. Morgan uses a bond-level rating system that incorporates valuations (relative value) and our fundamental view on the security. Our fundamental credit view of an issuer is based on the company's underlying credit trends, overall creditworthiness and our opinion on whether the issuer will be able to service its debt obligations when they become due and payable. We analyze, among other things, the company's cash flow capacity and trends and standard credit ratios, such as gross and net leverage, interest coverage and liquidity ratios. We also analyze profitability, capitalization and asset quality, among other variables, when assessing financials. Analysts also rate the issuer, based on the rating of the benchmark or representative security. Unless we specify a different recommendation for the company's individual securities, an issuer recommendation applies to all of the bonds at the same level of the issuer's capital structure. We may also rate certain loans and preferred securities, as applicable. This report also sets out within it the material underlying assumptions used.

We use the following ratings for bonds (issues), issuers, loans, and preferred securities: Overweight (over the next three months, the recommended risk position is expected to outperform the relevant index, sector, or benchmark); Neutral (over the next three months, the recommended risk position is expected to perform in line with the relevant index, sector, or benchmark); and Underweight (over the next three months, the recommended risk position is expected to underperform the relevant index, sector, or benchmark). J.P. Morgan Emerging Markets Sovereign Research uses Marketweight, which is equivalent to Neutral. NR is Not Rated. In this case, J.P. Morgan has removed the rating for this particular security or issuer because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating no longer should be relied upon. An NR designation is not a recommendation or a rating. NC is Not Covered. An NC designation is not a rating or a recommendation.

For CDS, we use the following rating system: Long Risk (over the next three months, the credit return on the recommended position is expected to exceed the relevant index, sector or benchmark); Neutral (over the next three months, the credit return on the recommended position is expected to match the relevant index, sector or benchmark); and Short Risk (over the next three months, the credit return on the recommended position is expected to underperform the relevant index, sector or benchmark).

J.P. Morgan Credit Research Ratings Distribution, as of July 02, 2022

	Overweight	Neutral	Underweight
Global Credit Research Universe*	32%	53%	15%
IB clients**	62%	60%	60%

*Please note that the percentages might not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
The Credit Research Rating Distribution is at the issuer level. Issuers with an NR or an NC designations are not included in the table above. This information is current as of the end of the most recent calendar quarter.

(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

Investment Thesis, Valuation and Risks

Atmos Energy Corp *(Overweight; Price Target: $128.00)*

Investment Thesis

ATO remains a top-tier rate base and EPS growth story versus gas and electric utility peers, with one of the most conservatively managed balance sheets among our utility coverage. The company's ability to cut costs and/or use balance sheet capacity provides dry powder, in addition to strong customer growth providing tailwinds to growth between rate cases. We view the 6-8% LT EPS CAGR guided by management as comfortably achievable.

Valuation

We establish a Dec 2023 price target of $128/share (replaces prior Dec 2022 PT of $122). We base our valuation on our 2024 EPS estimate and a 20.1x P/E multiple, a premium to gas utility peers due to strong rate base growth visibility and transparent, low-lag regulatory mechanisms.

Risks to Rating and Price Target

- Regulated electric and gas utilities are subject to strict federal and state regulation, including determinations of allowed revenues. Any change to the existing ratemaking mechanisms, including a repeal of the mechanism itself, may cause future earnings to differ materially from our current expectations.
- Achievement of Atmos' long-term rate base and EPS CAGR targets is heavily dependent on robust capital investments, regulatory support, and favorable ratemaking mechanism. Any deferral of spending could put the company at risk of falling short of the LT rate base and earnings growth CAGR in any one year.
- Gas pipeline accidents in the industry have heightened the importance of pipeline safety and integrity management. These accidents can result in significant financial strains related to pipeline replacement, accident investigations, life and property claims, regulatory fines, and disallowances.
- Atmos is in the midst of a robust capital spending program, and any change in the company's operating environment and/or project cost overruns could require greater external equity funding, exposing investors to potential dilution risk in the future.

NiSource Inc. *(Overweight; Price Target: $34.00)*

Investment Thesis

With renewables driving ~20% of the five-year capital plan, NI's "green hue" stands unique among LDCs. Additionally, the company's potential portfolio optimization efforts could accelerate a relative re-weighting toward NI's electric operations should the company divest a smaller LDC jurisdiction to fund renewables investment. We remain constructive on NI's long-term outlook given its attractive growth, subject to manageable execution risk, and relative positioning vs. LDC peers.

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

Valuation

We establish a December 2023 price target of $34/share (replaces prior Dec 2022 PT of $31). We base our price target on a sum-of-the-parts analysis using our 2024 electric and gas segment EPS forecasts. We value the gas and electric segments using 18.7x and 20.1x P/E multiples, respectively. This represents a premium to peers on account of NI's coal generation transition, incremental renewables investment, and above-average growth as a result.

Risk to Rating and Price Target

- Gas pipeline accidents in the industry have heightened the importance of pipeline safety and integrity management. These accidents can result in significant financial strains related to pipeline replacement, accident investigations, life and property claims, regulatory fines, and disallowances.
- Achievement of NiSource's long-term rate base and EPS CAGR targets is heavily dependent on robust capital investments, regulatory support, and favorable ratemaking mechanism. Any deferral of spending could put the company at risk of falling short of the LT rate base and earnings growth CAGR in any one year.
- Regulated electric and gas utilities are subject to federal and state regulations, including determinations of allowed revenues. Negative changes to the regulatory environments may cause future earnings to be materially lower than current expectations.

New Jersey Resources Corporation *(Neutral; Price Target: $47.00)*

Investment Thesis

Favorable green attributes differentiate NJR from natural gas LDC peers given decarbonizing utility investments and significant solar growth. However, the company's diversified energy model appears increasingly out of step with sector moves to streamline business mix around utility operations, and New Jersey energy policy creates both risks and opportunities for local LDCs. NJR's growth targets screen attractively versus LDC peer averages, and the company has made additional progress since its Nov 2020 analyst day to de-risk growth drivers in lowering plan equity needs and stabilizing future Energy Services contributions. We see current levels as fairly reflecting NJR's favorable green attributes, exposure to non-utility transportation & storage and energy services earnings, and NJ-specific energy transition risks.

Valuation

We establish a Dec 2023 price target of $47/share (replaces prior Dec 2022 PT of $44), using a 17.3x P/E multiple on our 2024 estimate. The multiple reflects a discount to natural gas LDC peers on account of 1) ongoing solar development risk while PJM and NJ market changes remain unresolved, 2) exposure to non-utility transportation & storage and energy services earnings, and 3) NJ-specific energy transition risks.

Risks to Rating and Price Target

- Robust capital investments, regulatory support, and favorable ratemaking mechanisms are significant drivers of NJR's long-term rate base and EPS CAGR

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

targets. Any spending deferrals or negative regulatory outcomes could lower these growth rates.

- Changing state receptivity to continued natural gas system investment has the potential to meaningfully alter NJNG's capex opportunities. While we see current New Jersey policies as balanced, the state has demonstrated a commitment to clean energy that could lead to widespread electrification as a means to decarbonize its overall economy. Conversely, any NJ prioritization of RNG and hydrogen for future use of current gas infrastructure could expand both regulated and non-regulated growth opportunities.
- NJR's solar projects have faced delays that are lowering near-term segment investment. These investments are a core component of the company's long-term earnings growth outlook, and an inability to boost development activity could cause NJR to miss its growth targets.

South Jersey Industries Inc. *(Neutral; Price Target: $36.00)*

Investment Thesis

On 2/24, SJI announced its sale to Infrastructure Investments Fund (IIF). This $36/shr cash deal represents a +53% premium to SJI's 2/23 closing price. The company expects a 4Q transaction close, with NJ BPU approval representing the gating hurdle to final completion. For regulatory approvals, we note positive elements such as continued local management and headquarters, plus independence versus incorporation into a large multi-state utility. That said, we acknowledge the lack of recent comps for NJ regulatory approvals creates some uncertainty to the regulatory review.

Valuation

We establish a December 2023 price target of $36 (replaces prior Dec 2022 PT of $36). This target reflects the value of IIF's $36/shr cash deal to acquire SJI, announced on 2/24. Absent the NJ BPU denying regulatory approval of the transaction, for which the company anticipates a 4Q final order, we do not expect SJI's value to meaningfully deviate from the deal price over the long term.

Risks to Rating and Price Target

- Regulated electric and gas utilities are subject to strict federal and state regulation, including determinations of allowed revenues. Any change to the existing ratemaking mechanisms or capital disallowances may raise or lower utility rate base and earnings growth.
- On 2/24, SJI announced its sale to Infrastructure Investments Fund (IIF). This $36/shr cash deal represents a +53% premium to SJI's 2/23 closing price. Should the parties fail to secure necessary regulatory approvals to close the transaction, there could be meaningful downside if SJI returns to trading at more normalized levels.
- SJI has targeted various large utility and pipeline projects that have seen delays and cancellations. Successful execution on similar large projects going forward may drive higher earnings growth versus our current expectations.

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

Spire Inc *(Neutral; Price Target: $74.00)*

Investment Thesis

We see SR's previous MO rate case outcome as disappointing, diverging from initial expectations for a smooth rate case process, reversing MO's improving regulatory backdrop, and ultimately reducing earnings power versus more balanced results. MO regulation remains inconsistent at best, with markedly different rate case decisions across utilities over the past several years, and Spire's latest order amplifies untenable regulatory instability, in our view. Given SR's remaining work in addressing case challenges and the STL Pipeline's uncertainty at FERC, we anticipate SR's current discount to persist absent full clarity across consolidated earnings power.

Valuation

We establish a December 2023 price target of $74/share (replaces prior Dec 2022 PT of $72). We base our price target on a P/E multiple of 16.2x applied to our 2024 EPS estimate. The multiple incorporates a discount to the gas utility peer group, reflecting MO regulatory risk.

Risks to Rating and Price Target

- Given the importance of capital spending levels to the company's adjusted net income, timely rate relief is a necessity for the company to continue to grow earnings. Any change to the regulatory environments may cause future earnings to materially differ from current expectations.
- Utilities are subject to federal and state regulation, including determination of allowed revenues. A meaningful change to the regulatory environment may cause future earnings to be lower than our current expectations.

Southwest Gas Holdings Inc. *(Neutral; Price Target: $84.00)*

Investment Thesis

Southwest Gas Holdings and large shareholder Carl Icahn reached a settlement in their conflict over the company's Questar Pipelines transaction and overall SWX strategy in the face of a perceived SOTP valuation discount, among other items. The company's subsequent strategic review update indicated that SWX is no longer pursuing potential total company and utility sale processes, pointing to more incremental action around separating Centuri and MountainWest. While we see these prospective sales as a positive step in unlocking value, the path to near-term upside appears less clear at this time as the company works through operational improvements at the utility.

Valuation

We establish a Dec 2023 price target of $84/shr (replaces prior Dec 2022 PT of $80), based on an SOTP valuation using our 2024 segment forecasts. Our price target includes $46 of value for SWX's natural gas distribution operations (inclusive of a partial parent drag allocation), utilizing a 15.5x P/E multiple. This multiple reflects a discount to gas utility peers on account of AZ regulatory risk and below average AZ ratemaking mechanics. Additionally, we include $12/shr and $24/shr of value for MountainWest and Centuri, respectively, based on in-line 11x and 8.9x EV/EBITDA

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

multiples. Our SOTP also includes $2/shr of COLI value. We exclude COLI mark-to-market and future payouts from our 2023-2025 EPS estimates.

Our price target remains sensitive to the assumed EV/EBITDA multiple for Centuri. Here, a +/- 1x change drives a +/- $5 impact to total value per share.

Risks to Rating and Price Target

- Rates charged to the company's utility customers are set by separate state regulators in AZ, NV, and CA. Given the current elevated level of capital spending, consistent rulings and interim recovery riders remain instrumental in providing rate relief to drive earnings growth. Any meaningful positive or negative change to the regulatory framework in these jurisdictions may cause future earnings to differ materially from current expectations.
- SWX has guided that a portion of its three-year capex plan will be funded by incremental equity issuances. Equity timing and ultimate funding levels may cause future earnings per share to differ from current expectations.
- The company intends to separate its construction business. Potential paths include a tax-free spin and outright sale, and the ultimate method pursued could impact value to shareholders versus our assumptions and SWX's residual equity needs, as discussed above.

Analyst Certification: The Research Analyst(s) denoted by an "AC" on the cover of this report certifies (or, where multiple Research Analysts are primarily responsible for this report, the Research Analyst denoted by an "AC" on the cover or within the document individually certifies, with respect to each security or issuer that the Research Analyst covers in this research) that: (1) all of the views expressed in this report accurately reflect the Research Analyst's personal views about any and all of the subject securities or issuers; and (2) no part of any of the Research Analyst's compensation was, is, or will be directly or indirectly related to the specific recommendations or views expressed by the Research Analyst(s) in this report. For all Korea-based Research Analysts listed on the front cover, if applicable, they also certify, as per KOFIA requirements, that the Research Analyst's analysis was made in good faith and that the views reflect the Research Analyst's own opinion, without undue influence or intervention.

All authors named within this report are Research Analysts who produce independent research unless otherwise specified. In Europe, Sector Specialists (Sales and Trading) may be shown on this report as contacts but are not authors of the report or part of the Research Department.

Important Disclosures

Company-Specific Disclosures: Important disclosures, including price charts and credit opinion history tables, are available for compendium reports and all J.P. Morgan–covered companies, and certain non-covered companies, by visiting https://www.jpmm.com/research/disclosures, calling 1-800-477-0406, or e-mailing research.disclosure.inquiries@jpmorgan.com with your request.

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

Coverage Universe: Sunderland III, Richard W: AES Corp. (AES), Algonquin Power & Utilities Corp. (AQN.TO), Allete Inc. (ALE), American Water Works Company, Inc. (AWK), Atmos Energy (ATO), Avangrid, Inc (AGR), Emera Inc. (EMA.TO), Fortis Inc. (FTS.TO), New Jersey Resources (NJR), NiSource Inc. (NI), SJW Group (SJW), South Jersey Industries (SJI), Southwest Gas Holdings Inc. (SWX), Spire Inc (SR)

J.P. Morgan Equity Research Ratings Distribution, as of July 02, 2022

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	52%	37%	12%
IB clients**	50%	44%	34%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	72%	65%	52%

*Please note that the percentages might not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Morgan Representative or visit https://www.theocc.com/components/docs/riskstoc.pdf for a copy of the Option Clearing Corporation's Characteristics and Risks of Standardized Options or http://www.finra.org/sites/default/files/Security_Futures_Risk_Disclosure_Statement_2018.pdf for a copy of the Security Futures Risk Disclosure Statement.

Changes to Interbank Offered Rates (IBORs) and other benchmark rates: Certain interest rate benchmarks are, or may in the future become, subject to ongoing international, national and other regulatory guidance, reform and proposals for reform. For more information, please consult: https://www.jpmorgan.com/global/disclosures/interbank_offered_rates

Private Bank Clients: Where you are receiving research as a client of the private banking businesses offered by JPMorgan Chase & Co. and its subsidiaries ("J.P. Morgan Private Bank"), research is provided to you by J.P. Morgan Private Bank and not by any other division of J.P. Morgan, including, but not limited to, the J.P. Morgan Corporate and Investment Bank and its Global Research division.

Legal entity responsible for the production and distribution of research: The legal entity identified below the name of the Reg AC Research Analyst who authored this material is the legal entity responsible for the production of this research. Where multiple Reg AC Research Analysts authored this material with different legal entities identified below their names, these legal entities are jointly responsible for the production of this research. Research Analysts from various J.P. Morgan affiliates may have contributed to the production of this material but may not be licensed to carry out regulated activities in your jurisdiction (and do not hold themselves out as being able to do so). Unless otherwise stated below, this material has been distributed by the legal entity responsible for production. AGA Mini Forum Takeaways: Quick Updates Across the Natural Gas LDCs

By Richard W Sunderland[AC], Jeremy Tonet, CFA, Brandon Travis, CFA, Aidan C Kelly

Click here for the full Note and disclaimers

Last week, we met with company management teams at the AGA Mini Forum and held update calls with the remainder of our natural gas LDC coverage. Common themes included rising customer bills into the upcoming heating season and the sector's ongoing valuation debate amid heightened interest in strategic actions. Full takeaways follow for ATO, NI, NJR, SJI, SR, and SWX.

- **Top company takeaways:** We note growing attention on **NI's** messaging into its November analyst day, both in how its business review could impact an outlook extension and potential framework to evaluate base system growth versus generation investment upside. **ATO** saw questions on higher gas prices and the TX securitization flowing through rates, but reiterated its line of sight to the strong underlying growth fundamentals driving the company's plan. **SR** emphasized key elements to testimony in its MO rate case that shape potential paths forward for a more favorable resolution and remains focused on reaching a settlement. There are no specific updates to **SWX's** ongoing MountainWest and Centuri processes, where the company's timeline suggests ~October announcements (as outlined in SWX's August update). We see the company biased towards sales for both, with Centuri's spin option reflecting a fallback plan should sale valuations land short of SWX's expectations. Potential Inflation Reduction Act impacts and higher natural gas prices were topical for **NJR**, although our attention remains on PJM's proposed interconnection queue revisions and NJ's progress in standing up the solar successor program, which are critical to recapturing development momentum at CEV. Finally, **SJI** continues to demonstrate confidence in the sale approval process and its targeted 4Q close, as work continues between the company and intervenors to reach a settlement agreement.
- **ATO:** ATO saw questions on higher gas prices and the TX securitization flowing through rates but reiterated its line of sight to the strong underlying growth fundamentals driving the company's plan. We expect the refreshed customer bill impact on ATO's traditional F4Q outlook update will show near-tern rate growth exceeding levels realized over the past decade, including a step-up for the initial increase covering the TX securitization charge (excluded from ATO's current bill outlook). The securitization process remains in its final stages, although ultimate timing remains at the discretion of the Texas Public Finance Authority.
- **NI:** We note growing attention on NI's messaging into its November analyst day, both in how its business review could impact an outlook extension and potential framework to evaluate base system growth versus generation investment upside. With no updates on the business review, potential outcomes remain broad between incremental plan tweaks, portfolio rotation, or a whole company sale. That said, significant discussion around NI's O&M opportunity

stood out in conversations, where extending the current NiSource Next program to more formal efforts at the opcos appears to be a minimum outcome of this process. Key questions remain the degree of capital acceleration off incremental bill headroom from cost controls, overall willingness to execute on portfolio rotation, and how these opportunities compare to NI's current growth outlook. For its upcoming November analyst day, we do not expect NI to anchor growth to the next round of IN generation investments, in a change from the company's current dual growth rates and plan period that revolve around its renewables buildout. Considerations appear broad across messaging options, including moving to an annual growth rate or extending formal EPS guidance beyond the prompt year.

- **NJR:** Potential Inflation Reduction Act impacts and higher natural gas prices were topical for **NJR**, although our attention remains on PJM's proposed interconnection queue revisions and NJ's progress in standing up the solar successor program, a key hurdle to recapturing development momentum at CEV. As highlighted in our recent downgrade to UW, renewables capital deployment remains critical to NJR's long-term earnings growth outlook, although SREC sales and strong performance across the company's other businesses have insulated earnings from any project delay impacts over the past two years. On commodity prices, NJR anticipates a ~16% customer bill increase this heating season from higher natural gas prices, inclusive of BGSS changes and other adjustments. The company sees itself as well positioned on hedging efforts and underlying service territory demographics relative to state and regional peers.
- **SJI:** SJI continues to demonstrate confidence in the sale approval process and its targeted 4Q close, as work continues between the company and intervenors to reach a settlement agreement. Nov 9, Dec 7, and Dec 21 BPU meetings all stand as plausible vote dates should SJI reach a settlement this fall. While difficult to discern the status of settlement discussions, we see no indication of a heated or politicized process and continue to expect favorable deal elements such as continued local management, the absence of a larger multi-state utility absorbing SJI, and SJI's position as a small gas utility in the state to benefit the path towards final regulatory approvals.
- **SR:** SR emphasized key elements to testimony in its MO rate case that shape potential paths forward for a more favorable resolution and remains focused on reaching a settlement. Commentary is consistent with our cautious optimism around SR's ability to press its position more consistently in the rate case docket, settlement prospects out of recent Staff testimony, and settlement overall as a viable path forward in the MO rate case, as outlined in our recent upgrade to OW. The next six weeks should inform efforts to narrow the list of disputed issues, although OPC remains a wildcard in prospects for a unanimous settlement to present to the commission versus a partial settlement with Staff.
- **SWX:** There are no specific updates to SWX's ongoing MountainWest and Centuri processes, where the company's timeline suggests ~October announcements (as outlined in SWX's August update; see our takeaways here and post-earnings takeaways here). We see the company biased towards sales for both, with Centuri's spin option reflecting a fallback plan should sale valuations land short of SWX's expectations. Separately, the company's executive search to replace retiring CFO Greg Peterson remains active and could yield an October announcement under language in the May retirement announcement. As such, we note some potential for MountainWest, Centuri, and permanent CFO updates all prior to SWX's 3Q earnings release in November.

2Q22 Previews: ATO, NI, NJR, SR, & SWX

- **ATO: TX securitization end in sight; await bill outlook into next heating season.** The TX securitization process continues to track a late August or September completion, with the Texas Public Financing Authority actively working towards actual debt issuance. When concluded, this process will result in ATO's recovery of $2bn in excess purchased gas costs from Winter Storm Uri, in a positive step forward (although the process is largely de-risked at this stage). Separately, we expect no material update on the customer bill outlook into next heating season, but flag this topic as a substantial focus with ATO currently working to procure gas. As discussed at AGA, management noted that customer bills are up ~14.5% YoY for the first six months, with the vast majority attributable to higher gas costs. On the quarter, we estimate F3Q earnings of $0.84 and 2022 EPS of $5.56 versus ATO's $5.50-5.60 range. We see some potential for management to directionally raise guidance to the upper half of this 2022 range.

- **NI: Spotlight on fall analyst day for solar and business review updates.** We expect some solar project commentary and minor rate case updates on the quarter, with the company's upcoming fall analyst day as a more likely forum for greater detail on solar impacts from the DoC investigation/tariff moratorium alongside a long-term outlook refresh. NI's solar message is evolving following the administration's recent steps to address industry challenges from the DoC. The company has subsequently emphasized greater flexibility to complete projects, with additional work remaining to fully account for DoC-driven timing impacts (particularly on 2023-2024 projects). We anticipate NI to largely reiterate this message and offer no new thoughts on the ongoing business review (tapped for completion by the analyst day, which will feature an update on the review outcome). Here, we continue to expect capex acceleration, cost cuts, and some smaller portfolio rotation as the base case outcome. On the quarter, we estimate 2Q22 earnings of $0.11 ($0.13 in 2Q21), although O&M timing could swing the quarter higher or lower following higher expenses than anticipated on 1Q (some timing factors impacted).

- **NJR: Solar debate continues, pending PJM and BPU actions.** PJM interconnection delays and an extended rulemaking process around the BPU's solar successor program are tracking for fall/winter updates, leaving little change to the solar backdrop and NJR's recent development headwinds. As a result, we expect attention on quarterly project progress following meaningful capex revisions last quarter (on F2Q: -45% cut to 2022 CEV capex; 2023-2024 CEV capex ranges also revised lower). While important to NJR's long-term growth outlook, near-term development pace has limited impacts on earnings for the next 12+ months. We expect NJR will emphasize this runway while it awaits work to accelerate PJM's interconnection process and stand up NJ's go forward solar subsidies. Separately, we estimate F3Q22 earnings -$0.01, in a seasonally low quarter, and 2022 EPS of $2.38 (2022 guidance of $2.30-2.40 after a +10c raise last quarter off Energy Services outperformance).

- **SR: MO rate case is quiet for now, with process set to heat up this fall.** Late August testimony marks a turning point in SR's MO rate case, allowing parties to begin settlement discussions as the company continues to seek expedited resolution of the proceeding. We expect no changes to SR's overall message on the case, where management has framed this filing as very straightforward given its proximity to last year's rate case, with streamlined testimony as a result and a likely narrower scope to contested issues versus SR's last filing. While we remain concerned over the PSC's history of inconsistent outcomes and risk to SR's revenue ask from the full range of drivers behind the 11% requested rate increase, we highlight constructive overall dialogue from our MO NARUC meeting last week. As a result, we look to August testimony to help define the scope of contested issues and overall settlement prospects. On the quarter, our F3Q22 estimate of $0.03 assumes some normalization of Marketing from last year's post-Uri loss. Our $3.94 2022 EPS estimate remains near the top end of SR's $3.75-3.95 guidance range.

- **SWX: 90 day spin update due ~8/4, overshadowing the quarter.** We await a formal Centuri spin/no spin decision from the company in advance of earnings, with this update tapped to arrive on or before 8/4 in accordance with terms from the SWX/Icahn settlement. Given market interest in SWX's sale process and prospective timing that puts the company into second rounds prior to a spin decision, this update could also feature greater detail around the process to date and factors underpinning SWX's ultimate Centuri decision. We continue to see the preferred path as a total company sale and look to this ~8/4 update as the next data point to potentially confirm this view, given a spin would create a two-year lookback/look forward period with tax consequences triggered by a utility sale. Under a no-spin scenario, a whole company sale announcement could land as early as September. Sentiment remains relatively aligned around an assumed sale, although questions of ultimate construction value and interest rate headwinds are topical of late. On the quarter, we estimate 2Q22 EPS of $0.55, inclusive of an assumed -11c COLI drag.

Investment Thesis, Valuation and Risks

Atmos Energy Corp *(Overweight; Price Target: $122.00)*

Investment Thesis

ATO remains a top-tier rate base and EPS growth story versus gas and electric utility peers, with one of the most conservatively managed balance sheets among our utility coverage. The company's ability to cut costs and/or use balance sheet capacity provides dry powder, in addition to strong customer growth providing tailwinds to growth between rate cases. We view the 6-8% LT EPS CAGR guided by management as comfortably achievable.

Valuation

We lower our Dec 2022 price target to $122/share, from prior $126. We base our valuation on our 2023 EPS estimate and a 20.6x P/E multiple, a premium to gas utility peers due to strong rate base growth visibility and transparent, low-lag regulatory mechanisms. The lower price target is due to decreased peer average multiples.

Risks to Rating and Price Target

- Regulated electric and gas utilities are subject to strict federal and state regulation, including determinations of allowed revenues. Any change to the existing ratemaking mechanisms, including a repeal of the mechanism itself, may cause future earnings to differ materially from our current expectations.
- Achievement of Atmos' long-term rate base and EPS CAGR targets is heavily dependent on robust capital investments, regulatory support, and favorable ratemaking mechanism. Any deferral of spending could put the company at risk of falling short of the LT rate base and earnings growth CAGR in any one year.
- Gas pipeline accidents in the industry have heightened the importance of pipeline safety and integrity management. These accidents can result in significant financial strains related to pipeline replacement, accident investigations, life and property claims, regulatory fines, and disallowances.
- Atmos is in the midst of a robust capital spending program, and any change in the company's operating environment and or project cost overruns could require greater external equity funding, exposing investors to potential dilution risk in the future.

NiSource Inc. *(Overweight; Price Target: $31.00)*

Investment Thesis

With renewables driving ~20% of the five-year capital plan, NI's "green hue" stands unique among LDCs. Additionally, the company's potential portfolio optimization efforts could accelerate a relative re-weighting toward NI's electric operations should the company divest a smaller LDC jurisdiction to fund renewables investment. We remain constructive on NI's long-term outlook given its attractive growth, subject to manageable execution risk, and relative positioning vs. LDC peers.

This document is being provided for the exclusive use of mweisenburger@nisource.com.

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

Valuation

We lower our December 2022 price target to $31/share, from prior $33. We base our price target on a sum-of-the-parts analysis using our 2023 electric and gas segment EPS forecasts. We value the gas and electric segments using 20.6x and 20.1x P/E multiples, respectively. This represents a premium to peers on account of NI's coal generation transition, incremental renewables investment, and above-average growth as a result. The lower price target is due to decreased peer average multiples.

Risk to Rating and Price Target

- Gas pipeline accidents in the industry have heightened the importance of pipeline safety and integrity management. These accidents can result in significant financial strains related to pipeline replacement, accident investigations, life and property claims, regulatory fines, and disallowances.
- Achievement of NiSource's long-term rate base and EPS CAGR targets is heavily dependent on robust capital investments, regulatory support, and favorable ratemaking mechanism. Any deferral of spending could put the company at risk of falling short of the LT rate base and earnings growth CAGR in any one year.
- Regulated electric and gas utilities are subject to federal and state regulations, including determinations of allowed revenues. Negative changes to the regulatory environments may cause future earnings to be materially lower than current expectations.

New Jersey Resources Corporation *(Neutral; Price Target: $44.00)*

Investment Thesis

Favorable green attributes differentiate NJR from natural gas LDC peers given decarbonizing utility investments and significant solar growth. However, the company's diversified energy model appears increasingly out of step with sector moves to streamline business mix around utility operations, and New Jersey energy policy creates both risks and opportunities for local LDCs. NJR's growth targets screen attractively versus LDC peer averages, and the company has made additional progress since its Nov 2020 analyst day to de-risk growth drivers in lowering plan equity needs and stabilizing future Energy Services contributions. We see current levels as fairly reflecting NJR's favorable green attributes, exposure to non-utility transportation & storage and energy services earnings, and NJ-specific energy transition risks.

Valuation

We lower our Dec 2022 price target to $44/share, from prior $46, using an 18.8x P/E multiple on our 2023 estimate. The multiple reflects a premium to natural gas LDC peers on account of NJR's favorable green attributes, partially offset by exposure to non-utility transportation & storage and energy services earnings as well as NJ-specific energy transition risks. The lower price target is due to decreased peer average multiples.

Risks to Rating and Price Target

- Robust capital investments, regulatory support, and favorable ratemaking mechanisms are significant drivers of NJR's long-term rate base and EPS CAGR

This document is being provided for the exclusive use of mweisenburger@nisource.com.

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

targets. Any spending deferrals or negative regulatory outcomes could lower these growth rates.

- Changing state receptivity to continued natural gas system investment has the potential to meaningfully alter NJNG's capex opportunities. While we see current New Jersey policies as balanced, the state has demonstrated a commitment to clean energy that could lead to widespread electrification as a means to decarbonize its overall economy. Conversely, any NJ prioritization of RNG and hydrogen for future use of current gas infrastructure could expand both regulated and non-regulated growth opportunities.
- NJR's solar projects have faced delays that are lowering near-term segment investment. These investments are a core component of the company's long-term earnings growth outlook, and an inability to boost development activity could cause NJR to miss its growth targets.

Spire Inc *(Neutral; Price Target: $72.00)*

Investment Thesis

We see SR's MO rate case outcome as disappointing, diverging from initial expectations for a smooth rate case process, reversing MO's improving regulatory backdrop, and ultimately reducing earnings power versus more balanced results. MO regulation remains inconsistent at best, with markedly different rate case decisions across utilities over the past several years, and Spire's latest order amplifies untenable regulatory instability, in our view. Given SR's remaining work in addressing case challenges and the STL Pipeline's uncertainty at FERC, we anticipate SR's current discount to persist absent full clarity across consolidated earnings power.

Valuation

We lower our December 2022 price target to $72/share, from prior $75. We base our price target on a P/E multiple of 16.7x applied to our 2023 EPS estimate. The multiple incorporates a discount to the gas utility peer group, reflecting MO regulatory risk. The lower price target is due to decreased peer average multiples.

Risks to Rating and Price Target

- Given the importance of capital spending levels to the company's adjusted net income, timely rate relief is a necessity for the company to continue to grow earnings. Any change to the regulatory environments may cause future earnings to materially differ from current expectations.
- Utilities are subject to federal and state regulation, including determination of allowed revenues. A meaningful change to the regulatory environment may cause future earnings to be lower than our current expectations.

Southwest Gas Holdings Inc. *(Neutral; Price Target: $80.00)*

Investment Thesis

Southwest Gas Holdings and large shareholder Carl Icahn recently reached a settlement in their conflict over the company's Questar Pipelines transaction and

This document is being provided for the exclusive use of mweisenburger@nisource.com.

Richard W Sunderland
(1-212) 622-2869
richard.w.sunderlandiii@jpmorgan.com

overall SWX strategy in the face of a perceived SOTP valuation discount, among other items. With the company's announcement of a strategic review, including a potential whole company sale, other outcomes that previously appeared less realistic are increasingly gaining credibility. Given strong recent appetite for gas LDC assets, we see this review carrying meaningful prospects for a total company sale, although we acknowledge limited clarity into the process at this time. At current levels, we see the company embedding some optionality from a sale scenario.

Valuation

We lower our Dec 2022 price target to $80/shr, from prior $86, based on an SOTP valuation using our 2023 segment forecasts. Our price target includes $46 of value for SWX's natural gas distribution operations (inclusive of a partial parent drag allocation), utilizing a 15.9x P/E multiple. This multiple reflects a discount to gas utility peers on account of AZ regulatory risk and below average AZ ratemaking mechanics. Additionally, we include $12/shr and $21/shr of value for MountainWest and Centuri, respectively, based on in line 11x and 8.4x EV/EBITDA multiples. Our SOTP also includes $2/shr of COLI value. We exclude COLI mark-to-market and future payouts from our 2023-2024 EPS estimates. The lower price target is due to decreased peer average multiples.

This SOTP analysis values SWX on a standalone basis and does not incorporate potential upside under a sale scenario.

Our price target remains sensitive to the assumed EV/EBITDA multiple for Centuri. Here, a +/- 1x change drives a +/- $5 impact to total value per share.

Risks to Rating and Price Target

- Rates charged to the company's utility customers are set by separate state regulators in AZ, NV, and CA. Given the current elevated level of capital spending, consistent rulings and interim recovery riders remain instrumental in providing rate relief to drive earnings growth. Any meaningful positive or negative change to the regulatory framework in these jurisdictions may cause future earnings to differ materially from current expectations.
- SWX has guided that a portion of its three-year capex plan will be funded by incremental equity issuances. Equity timing and ultimate funding levels may cause future earnings per share to differ from current expectations.
- The company intends to separate its construction business. Potential paths include a tax-free spin and outright sale, and the ultimate method pursued could impact value to shareholders versus our assumptions and SWX's residual equity needs, as discussed above.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight [Over the next six to twelve months, we expect this stock will outperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Neutral [Over the next six to twelve months, we expect this stock will perform in line with the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Underweight [Over the next six to twelve months, we expect this stock will underperform the average total return of the stocks in the analyst's (or the analyst's team's) coverage universe.] Not Rated (NR): J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap equity research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying analyst's coverage universe can be found on J.P. Morgan's research website, https://www.jpmorganmarkets.com.

Coverage Universe: Sunderland III, Richard W: AES Corp. (AES), Algonquin Power & Utilities Corp. (AQN.TO), Allete Inc. (ALE), American Water Works Company, Inc. (AWK), Atmos Energy (ATO), Avangrid, Inc (AGR), Emera Inc. (EMA.TO), Fortis Inc. (FTS.TO), New Jersey Resources (NJR), NiSource Inc. (NI), SJW Group (SJW), South Jersey Industries (SJI), Southwest Gas Holdings Inc. (SWX), Spire Inc (SR)

J.P. Morgan Equity Research Ratings Distribution, as of July 02, 2022

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	52%	37%	12%
IB clients**	50%	44%	34%
JPMS Equity Research Coverage*	51%	37%	12%
IB clients**	72%	65%	52%

*Please note that the percentages might not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
For purposes only of FINRA ratings distribution rules, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of JPMorgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

Any long form nomenclature for references to China; Hong Kong; Taiwan; and Macau within this research material are Mainland China; Hong Kong SAR (China); Taiwan (China); and Macau SAR (China).

J.P. Morgan Research may, from time to time, write on issuers or securities targeted by economic or financial sanctions imposed or administered by the governmental authorities of the U.S., EU, UK or other relevant jurisdictions (Sanctioned Securities). Nothing in this report is intended to be read or construed as encouraging, facilitating, promoting or otherwise approving investment or dealing in such Sanctioned Securities. Clients should be aware of their own legal and compliance obligations when making investment decisions.

Any digital or crypto assets discussed in this research report are subject to a rapidly changing regulatory landscape. For relevant regulatory advisories on crypto assets, including bitcoin and ether, please see https://www.jpmorgan.com/disclosures/cryptoasset-disclosure.

Exchange-Traded Funds (ETFs): J.P. Morgan Securities LLC ("JPMS") acts as authorized participant for substantially all U.S.-listed ETFs. To the extent that any ETFs are mentioned in this report, JPMS may earn commissions and transaction-based compensation in connection with the distribution of those ETF shares and may earn fees for performing other trade-related services, such as securities lending to short sellers of the ETF shares. JPMS may also perform services for the ETFs themselves, including acting as a broker or dealer to the ETFs. In addition, affiliates of JPMS may perform services for the ETFs, including trust, custodial, administration, lending, index calculation and/or maintenance and other services.

Options and Futures related research: If the information contained herein regards options- or futures-related research, such information is available only to persons who have received the proper options or futures risk disclosure documents. Please contact your J.P. Inflation Reduction Act: Increasing Our Confidence in Utilities' Long-Term Growth

Analyst Note Travis Miller, Strategist, 16 Aug 2022

Our initial analysis of the U.S. Inflation Reduction Act that President Joe Biden plans to sign on Aug. 16 has led us to reaffirm or make slight increases to our fair value estimates for U.S. utilities. We are reaffirming our moat and moat trend ratings.

Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.

Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.

Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.

Sector
Utilities

Industry
Utilities - Regulated Gas

Business Description

NiSource is one of the nation's largest natural gas distribution companies with approximately 3.5 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NiSource's electric utility transmits and distributes electricity in northern Indiana to about 500,000 customers. The regulated electric utility also owns more than 3,000 megawatts of generation capacity, most of which is now coal-fired but is being replaced by natural gas and renewable energy.

Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

Business Strategy & Outlook Travis Miller, Strategist, 1 Jul 2022

After decades of deriving most of its income from natural gas distribution and midstream businesses, NiSource has transitioned to a more diversified earnings mix. About 60% of NiSource's operating income comes from its six natural gas distribution utilities and 40% from its electric utility in Indiana following the 2015 separation from Columbia Pipeline Group. The share of earnings from the electric business could jump if new CEO Lloyd Yates decides to divest some of NiSource's smaller gas utilities.

NiSource's utilities have constructive regulatory frameworks that allow it to collect a cash return of and a cash return on the bulk of its capital investments within 18 months. We expect NiSource to invest more than $8 billion over the next three years, including what could be $2 billion of renewable energy projects in Indiana, where NiSource enjoys favorable regulation.

That growth could extend even longer based on electric and gas system infrastructure improvement projects NiSource has identified. Replacing steel and cast-iron pipe with plastic at its natural gas distribution utilities is a key initiative along with investments across the business that reduce greenhouse gases. Almost all of these investments receive favorable regulatory treatment, allowing NiSource to earn near its regulatory allowed returns.

In October 2020, NiSource sold its Columbia Gas of Massachusetts utility and received $1.1 billion of proceeds that it used to strengthen the balance sheet and prepare for its planned infrastructure investments. The sale came nearly two years after a natural gas explosion on NiSource's Massachusetts system killed one person north of Boston. Insurance covered roughly half of the almost $2 billion of claims, penalties, and other expenses.

Earnings are set to rebound quickly from their low in 2020 when COVID-19 pandemic costs, lower energy use, the Massachusetts utility sale, and a large equity issuance weighed on earnings. We expect modest customer growth combined with NiSource's infrastructure growth investments to support 8% annual earnings growth and 6% annual dividend growth from 2022 to 2026.

Bulls Say Travis Miller, Strategist, 30 Jun 2022

- We expect the dividend to grow near 6% annually during the next few years before accelerating to keep

pace with earnings in 2024 and beyond.

- NiSource's growth plan will support Indiana policymakers' desire to cut the state's carbon emissions by replacing coal generation with renewable energy and energy storage.
- New legislation has improved the regulatory framework in Indiana for NiSource's electric and natural gas distribution utilities.

Bears Say Travis Miller, Strategist, 30 Jun 2022

- Industrial customers account for over half of NiSource's electric sales, higher than most utilities. Industrial sales are more sensitive to the economy than residential and commercial sales.
- Policies to reduce carbon emissions could be a long-term threat for NiSource's natural gas distribution business if policymakers in states it serves aim to reduce retail gas use.
- NiSource has issued nearly $3 billion of equity and preferred stock during the last four years, resulting in little earnings growth since 2018.

31.36 USD 15 Aug 2022	31.00 USD 15 Mar 2022 18:34, UTC	1.01	12.73 USD Bil 15 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

Economic Moat Travis Miller, Strategist, 30 Jun 2022

Service territory monopolies and efficient scale advantages are the primary moat sources for NiSource's regulated gas and electric utilities. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their infrastructure. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow NiSource's regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

NiSource derives roughly 60% of its operating earnings from its natural gas distribution utilities and 40% from its integrated electric business in Indiana. In all cases, state and federal regulators set customer rates that allow NiSource to recover its operating and capital costs.

NiSource has no direct commodity price risk that could weaken its moat. NiSource exited the no-moat retail energy supply business in 2010.

Fair Value and Profit Drivers Travis Miller, Strategist, 30 Jun 2022

Our fair value estimate is $31 per share.

We assume NiSource invests more than $8 billion in 2022-24, including $2 billion of investment in renewable energy projects in Indiana to replace its coal-fired power generation fleet by 2028. Investment in the gas distribution systems, primarily for pipeline replacement, should remain well above maintenance-level spending for several more years, resulting in earnings growth at all of its gas utilities. We expect investment at the gas utilities to slow beyond 2025 while growth investment at the electric utility continues.

In total, we expect 11% average annual rate base growth and 8% average annual earnings growth through 2025 when combining the planned electric and gas system investments. The key factor in our growth outlook is a favorable outcome in NiSource's planned 2023-24 electric rate case in Indiana. Renewable energy and gas distribution infrastructure investments also should support strong dividend growth, a better ESG profile, and lower risk for investors. We don't expect a material valuation impact from year-to-year policy-related shifts in investment, notably Indiana solar projects.

We use a 5.8% cost of capital in our discounted cash flow valuation, which incorporates a 7.5% cost of equity. Our cost of equity is lower than the 9% rate of return we expect investors will demand of a diversified equity portfolio. We believe our cost of equity reflects the risk associated with regulated

electric and natural gas distribution utilities operating in states that have constructive regulatory frameworks.

Risk and Uncertainty Travis Miller, Strategist, 30 Jun 2022

Regulatory risk remains the key uncertainty. However, NiSource's regulatory exposure is diversified with operations in six states and its federal-regulated electric transmission system. NiSource has reduced some of the regulatory uncertainty related to its planned natural gas distribution and electric utilities investments by securing preapprovals and favorable rate mechanisms that provide for automatic rate increases as the utility makes its infrastructure investments.

In 2020, NiSource announced it would eliminate all coal-fired generation from its power plant fleet by 2028, significantly reducing ESG risk. This transition will require signing power purchase agreements for renewable energy, building new solar and wind farms, and making modifications to its electric grid. There is a modest amount of execution risk to this dramatic transition away from coal generation.

Capital Allocation Travis Miller, Strategist, 30 Jun 2022

We assign NiSource a Standard capital allocation rating primarily due to management's work with regulators and policymakers to develop a growth plan based on clean energy, infrastructure modernization, and safety.

The CEO transition from Joe Hamrock to Lloyd Yates in February 2022 could bring some changes in NiSource's portfolio of companies. We expect any changes would aim to reduce NiSource's equity needs to fund renewable energy investments and take advantage of what we consider very attractive valuations for gas distribution utilities in recent market transactions. Yates has been a director at NiSource since 2020 and previously led Duke Energy's core Carolina operations, which are more than twice the size of NiSource.

Current and former management made two key capital allocation decisions in recent years that we think were favorable for shareholders and positioned the company to execute its current growth plan. The first move was forming Columbia Pipeline Partners and executing Columbia Pipeline Group's tax-free separation. The second move was selling Columbia Gas of Massachusetts to Eversource Energy in 2020 after regulators determined NiSource was responsible for a gas explosion north of Boston. Even though the incident had a negative effect on shareholder value, NiSource resolved the issues quickly and received an attractive price to exit a region that was farthest from its core Midwest utilities.

Hamrock championed NiSource's clean energy growth strategy after succeeding Bob Skaggs in mid-2015 when Skaggs, a 32-year NiSource veteran, chose to lead the newly formed Columbia Pipeline Group. Hamrock had started his career at American Electric Power and worked in NiSource's gas distribution business before becoming CEO. CFO Donald Brown joined NiSource in April 2015 after stints

NiSource's Growth Plan and Strategic Review On Track; Stock Offers Attractive Total Return Potential Travis Miller, Strategist, 3 Aug 2022

We are reaffirming our $31 per share fair value estimate for NiSource after the company reported earning $0.12 per share on an adjusted basis during the second quarter of 2022. Results remain on track to meet our full-year and long-term outlooks. We are reaffirming our narrow moat and stable moat trend ratings.

We think NiSource's combination of a 3.1% dividend yield, long runway of 7% annual growth, and potential incremental value from its current strategic review makes it among the most attractive utilities in our coverage. The stock trades at a 5% discount to our fair value estimate and a discount to other utilities with similar growth outlooks.

Management reaffirmed its $1.42 to $1.48 EPS guidance range for 2022, in line with our estimate. We continue to assume $8 billion of capital investment in 2022-24, including $2 billion of renewable energy investments. The timing of this capital investment might shift due to delays in renewable energy projects, but we don't expect that to have a material impact on NiSource's long-term growth trajectory. Potential delays don't impact our 2022 outlook.

CEO Lloyd Yates said he plans to announce the outcome of management's strategic review of NiSource's portfolio in November. This could include selling some of NiSource's six gas distribution companies, most likely its smaller gas utilities in Kentucky, Pennsylvania, and Maryland. Yates suggested they are receiving interest from private market infrastructure investors.

We expect NiSource to file a critical rate review proposal at its Indiana electric utility late this year with new rates effective in late 2023. The outcome of this proceeding will largely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024. With customer bills up as much as 20% this year due to higher energy costs, regulators might be hesitant to approve a large base rate increase that we expect NiSource will request.

Utilities Caught in the Middle of Investors' Recession and Inflation Fears Travis Miller, Strategist, 18 Jul 2022

We are reaffirming our fair value estimates and economic moat ratings for our U.S. utilities coverage after the U.S. Bureau of Labor Statistics reported 9.1% core inflation on July 14. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

MORNINGSTAR®

NiSource Inc NI ★★★ 15 Aug 2022 21:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
31.36 USD 15 Aug 2022	31.00 USD 15 Mar 2022 18:34, UTC	1.01	12.73 USD Bil 15 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

Investors have flocked to utilities this year to protect against recession fears and geopolitical uncertainty. However, utilities' outperformance has papered over what we consider the sector's biggest long-term risk: inflation. After June's 8.6% inflation reading, the Morningstar US Utilities Index fell 9% in one week. Utilities moved little on last week's inflation reading, probably because investors already expected a high inflation number.

We expect utilities stocks to remain volatile as investors alternately fret a recession (positive for utilities) and inflation (negative for utilities). After the recent jump in interest rates, utilities' 3.2% dividend yield is nearly the same as the 10-year Treasury yield for the first time since 2008, a setback for income investors.

Renewable energy growth remains a long-term opportunity, but higher supply costs and uncertain federal policy could stall near-term growth, especially for solar. High fossil fuel costs have kept renewable energy competitive. Warm summer weather should boost utilities earnings this year, potentially helping some utilities offset inflation's impact. However, customer bill shock from higher gas and power prices could significantly increase regulatory risk next year, potentially putting some growth projects at risk.

We now consider the sector to be near fair value, down from 14% overvalued in early June. Ten utilities trade at or below our fair value estimates as of mid-July, the most since mid-2021. We think utilities that operate in constructive regulatory jurisdictions with support for infrastructure growth are the best positioned to mitigate the impacts of inflation.

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates Travis Miller, Strategist, 15 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a

MORNINGSTAR®

NiSource Inc NI ★★★ 15 Aug 2022 21:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
31.36 USD 15 Aug 2022	31.00 USD 15 Mar 2022 18:34, UTC	1.01	12.73 USD Bil 15 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-last week. Now, nearly half our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades Travis Miller, Strategist, 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected Travis Miller, Strategist, 6 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

NiSource's Flexibility Supports Our Earnings Growth Outlook; Remains Top Utilities Pick Travis Miller, Strategist, 4 May 2022

We are reaffirming our $31 per share fair value estimate for NiSource after the company reported earning $0.75 per share on an adjusted basis during the first quarter of 2022. Results remain on track to meet our full-year and long-term outlooks. We are reaffirming our narrow moat and stable moat trend ratings.

We think NiSource's combination of a 3.3% dividend yield and potential for more than 7% annual growth makes it among the most attractive utilities in our coverage. The stock trades at a 5% discount to our fair value estimate and a discount to other utilities with similar growth outlooks.

MORNINGSTAR®

NiSource Inc NI ★★★ 15 Aug 2022 21:21, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
31.36 USD 15 Aug 2022	31.00 USD 15 Mar 2022 18:34, UTC	1.01	12.73 USD Bil 15 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

NiSource's diverse mix of businesses and growth projects should minimize any impact from potential delays of its planned solar projects and coal plant retirements due to federal policy uncertainties. We are not changing our $8 billion of capital investment forecast in 2022-24, including $2 billion of renewable energy investments, in line with management's plan. We estimate only about $500 million of solar investment could be delayed, and we expect NiSource can pull forward planned infrastructure investment to offset those delays. Potential delays don't impact our 2022 outlook. Management reaffirmed its $1.42 to $1.48 EPS guidance range for 2022, in line with our estimate.

We still expect NiSource to file a critical rate review proposal at its Indiana electric utility late this year with new rates effective in late 2023. The outcome of this proceeding will likely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024.

New CEO Lloyd Yates said he plans to announce the outcome of his strategic review of NiSource's portfolio this fall. This could include marketing some of NiSource's six gas distribution companies, given the relatively high market valuations of recent gas utilities deals. We think the most likely divestitures are NiSource's smaller gas utilities in Kentucky, Pennsylvania, and Maryland.

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

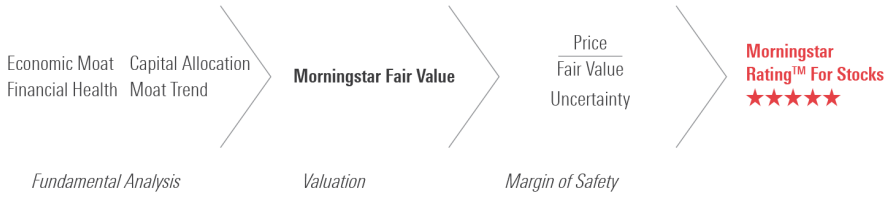
Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity



Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

MORNINGSTAR®

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

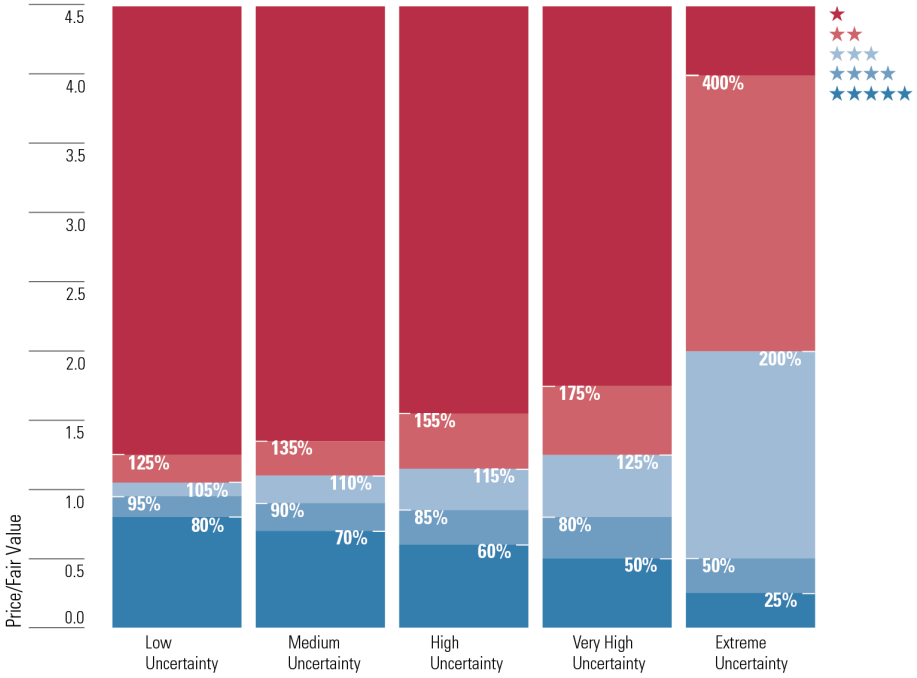
Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price



The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close tabs on the companies they follow, and, based on thor ough and ongoing analysis, raise or lower their fair value estimates as warranted.

Morningstar Equity Research Star Rating Methodology

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

MORNINGSTAR®

Research Methodology for Valuing Companies

- Morningstar, Inc. may hold a long position in the security subject of this investment research report that exceeds 0.5% of the total issued share capital of the security. To determine if such is the case, please click http://msi.morningstar.com and http://mdi.morningstar.com.
- Analysts' compensation is derived from Morningstar, Inc.'s overall earnings and consists of salary, bonus and in some cases restricted stock.
- Neither Morningstar, Inc. or the Equity Research Group receives commissions for providing research nor do they charge companies to be rated.
- Neither Morningstar, Inc. or the Equity Research Group is a market maker or a liquidity provider of the security noted within this report.
- Neither Morningstar, Inc. or the Equity Research Group has been a lead manager or co-lead manager over the previous 12-months of any publicly disclosed offer of financial instruments of the issuer.
- Morningstar, Inc.'s investment management group does have arrangements with financial institutions to provide portfolio management/investment advice some of which an analyst may issue investment research reports on. However, analysts do not have authority over Morningstar's investment management group's business arrangements nor allow employees from the investment management group to participate or influence the analysis or opinion prepared by them.
- Morningstar, Inc. is a publicly traded company (Ticker Symbol: MORN) and thus a financial institution the security of which is the subject of this report may own more than 5% of Morningstar, Inc.'s total outstanding shares. Please access Morningstar, Inc.'s proxy statement, "Security Ownership of Certain Beneficial Owners and Management" section https://shareholders.morningstar.com/investor-relations/financials/sec-filings/default.aspx
- Morningstar, Inc. may provide the product issuer or its related entities with services or products for a fee and on an arms' length basis including software products and licenses, research and consulting services, data services, licenses to republish our ratings and research in their promotional material, event sponsorship and website advertising.

Further information on Morningstar, Inc.'s conflict of interest policies is available from https://shareholders.morningstar.com. Also, please note analysts are subject to the CFA Institute's Code of Ethics and Standards of Professional Conduct.

For a list of securities which the Equity Research Group currently covers and provides written analysis on please contact your local Morningstar office. In addition, for historical analysis of securities covered, including their fair value estimate, please contact your local office.

NiSource Securing Regulatory Support for Large Growth Plan

Travis Miller
Strategist
Morningstar

Business Strategy and Outlook 30 Jun 2022

After decades of deriving most of its income from natural gas distribution and midstream businesses, NiSource has transitioned to a more diversified earnings mix. About 60% of NiSource's operating income comes from its six natural gas distribution utilities and 40% from its electric utility in Indiana following the 2015 separation from Columbia Pipeline Group. The share of earnings from the electric business could jump if new CEO Lloyd Yates decides to divest some of NiSource's smaller gas utilities.

NiSource's utilities have constructive regulatory frameworks that allow it to collect a cash return of and a cash return on the bulk of its capital investments within 18 months. We expect NiSource to invest more than $8 billion over the next three years, including what could be $2 billion of renewable energy projects in Indiana, where NiSource enjoys favorable regulation.

That growth could extend even longer based on electric and gas system infrastructure improvement projects NiSource has identified. Replacing steel and cast-iron pipe with plastic at its natural gas distribution utilities is a key initiative along with investments across the business that reduce greenhouse gases. Almost all of these investments receive favorable regulatory treatment, allowing NiSource to earn near its regulatory allowed returns.

In October 2020, NiSource sold its Columbia Gas of Massachusetts utility and received $1.1 billion of proceeds that it used to strengthen the balance sheet and prepare for its planned infrastructure investments. The sale came nearly two years after a natural gas explosion on NiSource's Massachusetts system killed one person north of Boston. Insurance covered roughly half of the almost $2 billion of claims, penalties, and other expenses.

Earnings are set to rebound quickly from their low in 2020 when COVID-19 pandemic costs, lower energy use, the Massachusetts utility sale, and a large equity issuance weighed on earnings. We expect modest customer growth combined with NiSource's infrastructure growth investments to support 8% annual earnings growth and 6% annual dividend growth from 2022 to 2026.

Profile

NiSource is one of the nation's largest natural gas distribution companies with approximately 3.5 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NiSource's electric utility transmits and distributes electricity in northern Indiana to about 500,000 customers. The regulated electric utility also owns more than 3,000 megawatts of generation capacity, most of which is now coal-fired but is being replaced by natural gas and renewable energy.

Morningstar Analysis

Fair Value & Profit Drivers 30 Jun 2022
Our fair value estimate is $31 per share.

We assume NiSource invests more than $8 billion in 2022-24, including $2 billion of investment in renewable energy projects in Indiana to replace its coal-fired power generation fleet by 2028. Investment in the gas distribution systems, primarily for pipeline replacement, should remain well above maintenance-level spending for several more years, resulting in earnings growth at all of its gas utilities. We expect investment at the gas utilities to slow beyond 2025 while growth investment at the electric utility continues.

In total, we expect 11% average annual rate base growth and 8% average annual earnings growth through 2025 when combining the planned electric and gas system investments. The key factor in our growth outlook is a favorable outcome in NiSource's planned 2023-24 electric rate case in Indiana. Renewable energy and gas distribution infrastructure investments also should support strong dividend growth, a better ESG profile, and lower risk for investors. We don't expect a material valuation impact from year-to-year policy-related shifts in investment, notably Indiana solar projects.

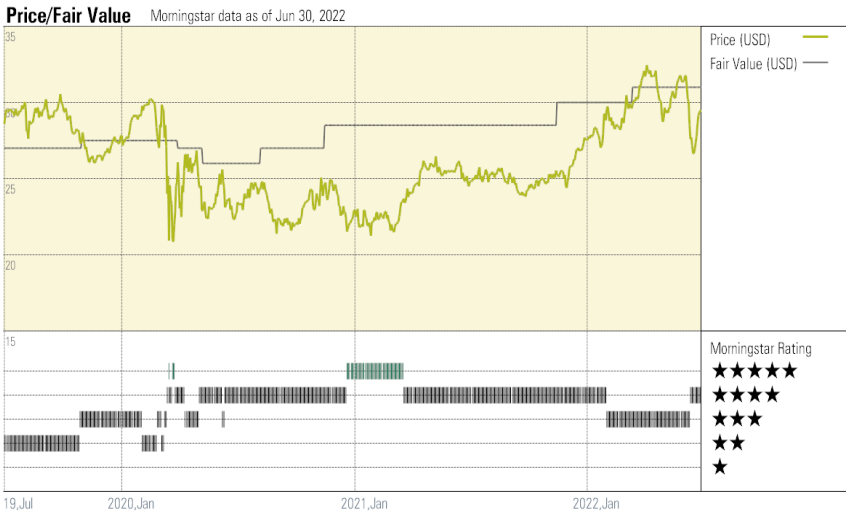
We use a 5.8% cost of capital in our discounted cash flow valuation, which incorporates a 7.5% cost of equity. Our cost of equity is lower than the 9% rate of return we expect investors will demand of a diversified equity portfolio. We believe our cost of equity reflects the risk associated with regulated electric and natural gas distribution utilities operating in states that have constructive regulatory frameworks.

Scenario Analysis
Our bull and bear cases suggest a low uncertainty rating for NiSource. Our low uncertainty rating is due in large part to the favorable regulatory frameworks in the jurisdictions of NiSource's utility operations. In addition, we believe we have captured potential ESG risk in our base-case scenario.

If we assume capital expenditures are 25% lower than our estimate during the next five years, then our annual EPS growth would decline about 5% and our fair value estimate would decrease approximately $3 per share. We estimate similar upside impact in our bull case if NiSource secures more growth investment opportunities during the next five years.

A 50-basis-point change in our cost of equity assumption changes our fair value estimate by $3 per share.

Economic Moat
Service territory monopolies and efficient scale advantages are the primary moat sources for NiSource's regulated gas and electric utilities. State and federal regulators typically grant regulated utilities exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their infrastructure. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.



This implicit contract between regulators and capital providers should, on balance, allow NiSource's regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

NiSource derives roughly 60% of its operating earnings from its natural gas distribution utilities and 40% from its integrated electric business in Indiana. In all cases, state and federal regulators set customer rates that allow NiSource to recover its operating and capital costs.

NiSource Inc NI (NYSE) | ★★★★

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
29.49 USD	31.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

NiSource has no direct commodity price risk that could weaken its moat. NiSource exited the no-moat retail energy supply business in 2010.

Moat Trend

We believe NiSource's moat trend is stable. We do not foresee a long-term change to the firm's business as a monopoly provider of natural gas and electricity. We also believe the core Federal Energy Regulatory Commission and state cost-of-service regulatory frameworks will remain in place for the foreseeable future. As with almost all regulated utilities, we believe regulatory caps on revenue and returns preclude NiSource from establishing a wide economic moat.

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
29.49 USD	31.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Bulls Say/Bears Say

Bulls Say

- We expect the dividend to grow near 6% annually during the next few years before accelerating to keep pace with earnings in 2024 and beyond.
- NiSource's growth plan will support Indiana policymakers' desire to cut the state's carbon emissions by replacing coal generation with renewable energy and energy storage.
- New legislation has improved the regulatory framework in Indiana for NiSource's electric and natural gas distribution utilities.

Bears Say

- Industrial customers account for over half of NiSource's electric sales, higher than most utilities. Industrial sales are more sensitive to the economy than residential and commercial sales.
- Policies to reduce carbon emissions could be a long-term threat for NiSource's natural gas distribution business if policymakers in states it serves aim to reduce retail gas use.
- NiSource has issued nearly $3 billion of equity and preferred stock during the last four years, resulting in little earnings growth since 2018.

Financial Strength

NiSource has issued a substantial amount of equity in the past few years in part to fund its large infrastructure growth projects and in part to cover liabilities arising from the Massachusetts gas explosion. This dilution and the sale of Columbia Gas of Massachusetts has kept earnings mostly flat since 2018.

The equity has strengthened NiSource's balance sheet going into the next two years of heavy growth investment. NiSource issued over $1 billion of common stock and $880 million of preferred stock in 2018 and 2019. The Massachusetts utility sale in 2020 raised $1.1 billion, and NiSource issued $862.5 million of convertible preferred equity units in early 2021. We expect NiSource will still need $600 million of new equity during the next three years to fund its planned growth investments and maintain its current capital structure.

NiSource's large renewable energy investment plan could allow it to raise more clean energy-related financing such as the green bond that it issued in June totaling $350 million with a 5% coupon.

NiSource has grown its dividend nearly 40% since the 2015 Columbia Pipeline Group spinoff despite a slight slowdown in the last few years. The board accelerated that growth for 2022 with a 7% increase, exceeding our expectations. We expect dividend growth to remain near 6% with a payout ratio around 60% for at least the next three years. This is in line with most of its peers.

Risk & Uncertainty

Regulatory risk remains the key uncertainty. However, NiSource's regulatory exposure is diversified with operations in six states and its federal-regulated electric transmission system. NiSource has reduced some of the regulatory uncertainty related to its planned natural gas

distribution and electric utilities investments by securing preapprovals and favorable rate mechanisms that provide for automatic rate increases as the utility makes its infrastructure investments.

In 2020, NiSource announced it would eliminate all coal-fired generation from its power plant fleet by 2028, significantly reducing ESG risk. This transition will require signing power purchase agreements for renewable energy, building new solar and wind farms, and making modifications to its electric grid. There is a modest amount of execution risk to this dramatic transition away from coal generation.

Capital Allocation 30 Jun 2022

We assign NiSource a Standard capital allocation rating primarily due to management's work with regulators and policymakers to develop a growth plan based on clean energy, infrastructure modernization, and safety.

The CEO transition from Joe Hamrock to Lloyd Yates in February 2022 could bring some changes in NiSource's portfolio of companies. We expect any changes would aim to reduce NiSource's equity needs to fund renewable energy investments and take advantage of what we consider very attractive valuations for gas distribution utilities in recent market transactions. Yates has been a director at NiSource since 2020 and previously led Duke Energy's core Carolina operations, which are more than twice the size of NiSource.

Current and former management made two key capital allocation decisions in recent years that we think were favorable for shareholders and positioned the company to execute its current growth plan. The first move was forming Columbia Pipeline Partners and executing Columbia Pipeline Group's tax-free separation. The second move was selling Columbia Gas of Massachusetts to Eversource Energy in 2020 after regulators determined NiSource was responsible for a gas explosion north of Boston. Even though the incident had a negative effect on shareholder value, NiSource resolved the issues quickly and received an attractive price to exit a region that was farthest from its core Midwest utilities.

Hamrock championed NiSource's clean energy growth strategy after succeeding Bob Skaggs in mid-2015 when Skaggs, a 32-year NiSource veteran, chose to lead the newly formed Columbia Pipeline Group. Hamrock had started his career at American Electric Power and worked in NiSource's gas distribution business before becoming CEO. CFO Donald Brown joined NiSource in April 2015 after stints at UGI Utilities and Constellation Energy.

Analyst Notes

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates 14 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-last week. Now, nearly half our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Dominion Energy has transitioned to a predominantly rate-regulated utility operating in highly constructive regulatory environments. The company's five-year $37 billion capital investment plan focusing on clean energy supports our 6.5% annual earnings growth forecast. Virginia is the company's most important subsidiary and has the most constructive regulation. Dominion expects 90% of its capital investment in the region will be eligible for rate riders, reducing regulatory risk in an inflationary environment.

We think Entergy has several advantages over its peers in an inflationary environment. The company's five southeast utilities should benefit from a jump in U.S. energy demand, constructive state regulation, and substantial opportunities for clean energy growth. More than 90% of Entergy's investments flow through customer rates with little regulatory lag. This minimizes the impact from inflation. We expect Entergy to invest $4 billion annually through 2025 to upgrade its expansive grid and replace coal generation with mostly solar. This supports our annual earnings growth estimate at the high end of management's 7%-9% target.

Constructive regulation in Florida supports industry-leading returns and growth for NextEra Energy. Florida's highly constructive rate-setting mechanisms support investment in the state. NextEra benefits from one of the highest allowed returns in the industry. The utility also has among the lowest electricity bills and highest customer growth across its peer group, helping protect itself in an inflationary environment. At the company's competitive renewable business, NextEra is well positioned to for the clean energy transition. A U.S. Department of Commerce anti-circumvention investigation regarding the import of solar panels from certain Asian countries had created uncertainty to the company's near-term development program; however, the Biden administration's recent decision to not apply solar

Analyst Notes

panel tariffs for at least the next two years brings near-term clarity.

NiSource's transition from coal to renewable energy in Indiana along with regulatory support in the states where it operates natural gas systems should support more than $10 billion of investment over the next four years and 8% annual earnings growth, among the highest in the sector. We think this is an opportunity to buy a high-growth utility at a discount to recent market acquisitions involving similar natural gas distribution utilities. New CEO Lloyd Yates could shake up NiSource's portfolio to capitalize on those market valuations while boosting the share of earnings from its high-growth electric business.

For a more detailed analysis of how inflation affects utilities, see our latest reports, "Inflation Unraveling U.S. Utilities' Safety Net" and "Utility Regulation Critical To Manage Inflation Risk."

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest reports, "Inflation Unraveling U.S. Utilities' Safety Net" and "Utility Regulation Critical To Manage Inflation Risk."

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected 06 Jun 2022

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
29.49 USD	31.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Analyst Notes

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

For more on our long-term solar growth outlook for U.S. utilities, see our report, "U.S. Utility-Scale Solar: Top Picks Hiding In Shadows." Our most recent utilities sector report, "Constructive Utility Regulation Critical to Reduce Inflation Risk," addresses key issues that we think will impact our top utilities picks, including NextEra Energy and NiSource.

NiSource's Flexibility Supports Our Earnings Growth Outlook; Remains Top Utilities Pick 04 May 2022

We are reaffirming our $31 per share fair value estimate for NiSource after the company reported earning $0.75 per share on an adjusted basis during the first quarter of 2022. Results remain on track to meet our full-year and long-term outlooks. We are reaffirming our narrow moat and stable moat trend ratings.

We think NiSource's combination of a 3.3% dividend yield and potential for more than 7% annual growth makes it among the most attractive utilities in our coverage. The stock trades at a 5% discount to our fair value estimate and a discount to other utilities with similar growth outlooks.

NiSource's diverse mix of businesses and growth projects should minimize any impact from potential delays of its planned solar projects and coal plant retirements due to federal policy uncertainties. We are not changing our $8 billion of capital investment forecast in 2022-24, including $2 billion of renewable energy investments, in line with management's plan. We estimate only about $500 million of solar investment could be delayed, and we expect NiSource can pull forward planned infrastructure investment to offset those delays. Potential delays don't impact our 2022 outlook. Management reaffirmed its $1.42 to $1.48 EPS guidance range for 2022, in line with our estimate.

NiSource Inc NI (NYSE) | ★★★★

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
29.49 USD	31.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Analyst Notes

We still expect NiSource to file a critical rate review proposal at its Indiana electric utility late this year with new rates effective in late 2023. The outcome of this proceeding will likely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024.

New CEO Lloyd Yates said he plans to announce the outcome of his strategic review of NiSource's portfolio this fall. This could include marketing some of NiSource's six gas distribution companies, given the relatively high market valuations of recent gas utilities deals. We think the most likely divestitures are NiSource's smaller gas utilities in Kentucky, Pennsylvania, and Maryland.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices 09 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest report, "Inflation Unraveling U.S. Utilities' Safety Net."

Utilities Top Pick NiSource Sets Up Pivotal Year With Regulatory, Strategic Reviews 23 Feb 2022

We are reaffirming our $30 per share fair value estimate for NiSource after the company reported earning $1.37 per share on an adjusted basis in 2021, in line with our estimate and management guidance. We are reaffirming our narrow moat and stable moat trend ratings.

We think NiSource's combination of a 3.4% dividend yield and potential for more than 7% annual growth makes it among the most attractive utilities in our coverage. The stock trades at a 5% discount to our fair value estimate and a discount to other utilities with similar growth outlooks.

New CEO Lloyd Yates signaled that he is considering selling

NiSource Inc NI (NYSE) | ★★★★

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
29.49 USD	31.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Analyst Notes

some of NiSource's six gas distribution companies, a key strategic shift in response to what we consider rich valuations for recent gas utility sales. Any transactions at comparable valuations would represent at least a 30% premium to NiSource's current consolidated valuation, creating significant shareholder value.

Its smaller gas utilities in Kentucky, Pennsylvania, and Maryland are well positioned for potential sales after achieving constructive regulatory outcomes during the last three months. Gas distribution represents about 60% of NiSource's consolidated earnings. We expect any sales proceeds would go to increase its share of electric utility earnings and renewable energy investment.

This is a critical year for NiSource's Indiana electric utility, its largest and the one we think has the best long-term growth potential. NiSource plans to request an electric rate increase late this year effective in late 2023. The outcome of this request will likely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024.

Management reaffirmed its $1.42 to $1.48 EPS guidance range for 2022, in line with our estimate. We assume NiSource invests $2.5 billion of its $8 billion capital investment plan in renewable energy during the next three years.

NiSource CEO Hamrock to Retire; Stock Remains a Top Utilities Pick 27 Jan 2022

We are reaffirming our $30 per share fair value estimate for NiSource after CEO Joe Hamrock announced he plans to retire Feb. 14. Lloyd Yates, a NiSource director and former Duke Energy executive, is set to succeed Hamrock. We are reaffirming our narrow moat and stable moat trend ratings.

We suspect this succession plan has been in the works for at least a year since Yates left Duke and joined the NiSource board in 2020. Yates is two years older than Hamrock and has never worked for NiSource, two distinctions that make this transition plan different than most utilities' succession plans that favor long-tenured insiders.

NiSource's stock remains one of the most undervalued in our U.S. utilities coverage, trading at a 7% discount to our fair value estimate with a 4-star rating. On Jan. 26, the board approved a 7% dividend increase to $0.94 annualized, a bigger raise than we expected. This implies a 3.4% yield as of Jan. 27, higher than the utilities sector 3.2% median yield. We think NiSource's combination of yield and long-term growth is among the most attractive in the sector.

We consider Yates well prepared for the role after managing Duke's core Carolina operations, which are more two times as large as NiSource. Yates' immediate task is ensuring NiSource continues to achieve constructive regulatory outcomes, especially in its largest service territory, Indiana. We expect regulators to rule on NiSource's gas rate increase request later this year and an electric rate increase in 2023. Constructive outcomes in these cases are critical to support our 8% annual earnings growth forecast.

We expect Yates will continue Hamrock's clean energy growth strategy. We assume NiSource invests $3 billion of its $10 billion capital investment plan in renewable energy during the next four years, primarily at its Indiana electric utility. This will make it one of the fastest-growing utilities in our coverage.

NiSource Kicks Off 2022 Regulatory Year With Constructive Rulings in Kentucky, Pennsylvania 05 Jan 2022

We are reaffirming our $30 per share fair value estimate for

Last Price	Fair Value	Uncertainty	Economic Moat™	Moat Trend™	Capital Allocation	Industry Group	ESG Risk Rating Assessment[1]
29.49 USD	31.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

Analyst Notes

NiSource after Kentucky regulators approved an $18.3 million, or 12%, increase in gas base rates, mostly in line with a settlement reached in October. We are also reaffirming our narrow moat and stable moat trend ratings.

The constructive outcome in Kentucky shortly after Pennsylvania regulators approved a $58.5 million, or 12%, gas rate increase is a good early indication of regulatory support as NiSource faces several critical regulatory tests this year. We expect regulators to sign off on large gas rate increases during the second half of the year in Ohio and Indiana to support NiSource's infrastructure investments. These rate increases support our 8% earnings growth forecast for 2022.

This also is a critical year for NiSource's Indiana electric utility, which we think has the best long-term growth potential. NiSource plans to file its request for electric rate increases in Indiana during 2022 with new rates effective in late 2023. The outcome of this request will likely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024.

We assume electric and gas systemwide customer growth and core investment support 5% earnings growth through 2024. We expect additional earnings growth to come from NiSource's potential $750 million of clean energy investments to replace retiring coal generation through 2028, particularly in Indiana. We also assume regulators approve $600 million of investment for NiSource with the rest of the generation secured through earnings-neutral power purchase agreements.

We expect dividend growth to stay near 5% in 2022-23 before a potential step-up in 2024, assuming constructive regulatory outcomes.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

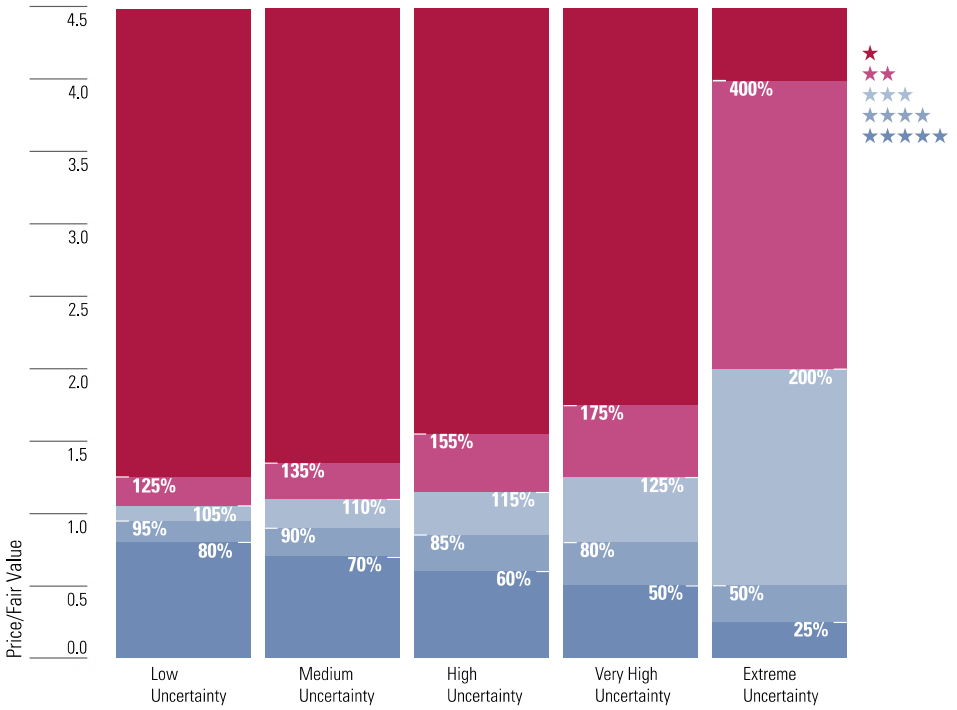
Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.



- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

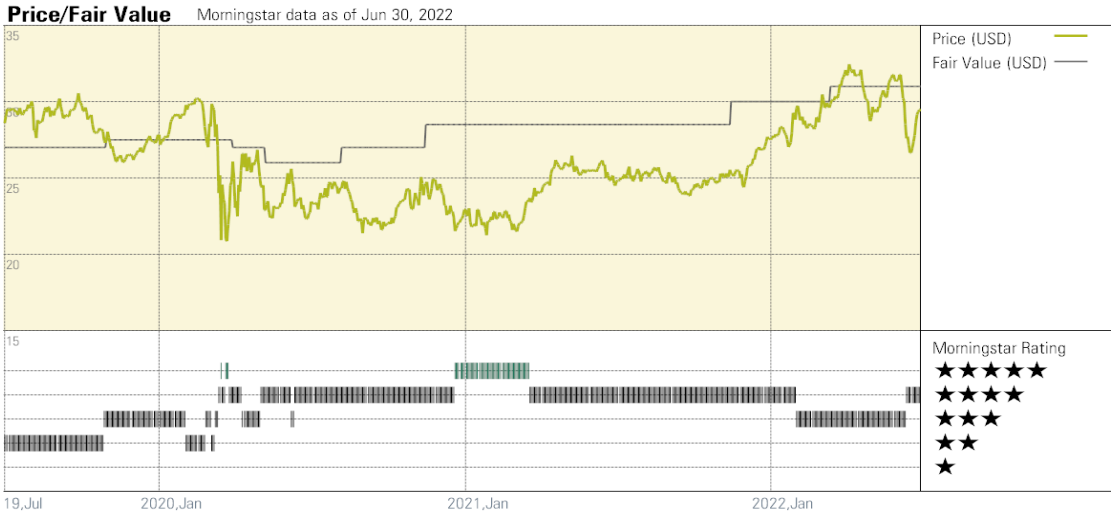
Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.



Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

Utilities Caught in the Middle of Investors' Recession and Inflation Fears

Travis Miller
Strategist
Morningstar

Analyst Note 18 Jul 2022

We are reaffirming our fair value estimates and economic moat ratings for our U.S. utilities coverage after the U.S. Bureau of Labor Statistics reported 9.1% core inflation on July 14. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Investors have flocked to utilities this year to protect against recession fears and geopolitical uncertainty. However, utilities' outperformance has papered over what we consider the sector's biggest long-term risk: inflation. After June's 8.6% inflation reading, the Morningstar US Utilities Index fell 9% in one week. Utilities moved little on last week's inflation reading, probably because investors already expected a high inflation number.

We expect utilities stocks to remain volatile as investors alternately fret a recession (positive for utilities) and inflation (negative for utilities). After the recent jump in interest rates, utilities' 3.2% dividend yield is nearly the same as the 10-year Treasury yield for the first time since 2008, a setback for income investors.

Renewable energy growth remains a long-term opportunity, but higher supply costs and uncertain federal policy could stall near-term growth, especially for solar. High fossil fuel costs have kept renewable energy competitive. Warm summer weather should boost utilities earnings this year, potentially helping some utilities offset inflation's impact. However, customer bill shock from higher gas and power prices could significantly increase regulatory risk next year, potentially putting some growth projects at risk.

We now consider the sector to be near fair value, down from 14% overvalued in early June. Ten utilities trade at or below our fair value estimates as of mid-July, the most since

Profile

NiSource is one of the nation's largest natural gas distribution companies with approximately 3.5 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NiSource's electric utility transmits and distributes electricity in northern Indiana to about 500,000 customers. The regulated electric utility also owns more than 3,000 megawatts of generation capacity, most of which is now coal-fired but is being replaced by natural gas and renewable energy.

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

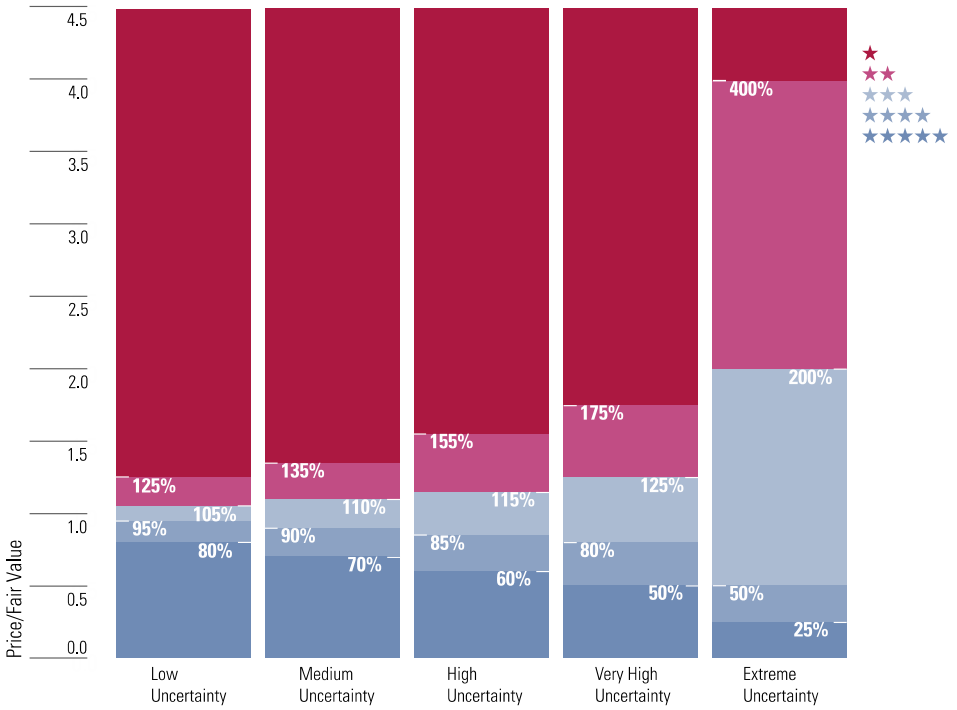
Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.



- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

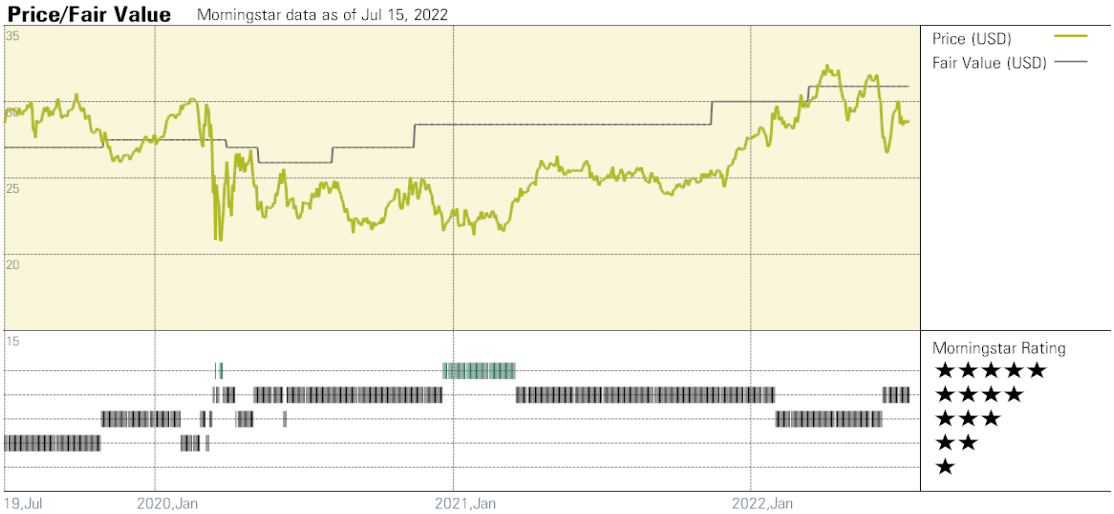
Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.



Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

NiSource Must Secure Regulatory Support for Growth Projects

Updated Forecasts and Estimates from 24 Aug 2022

Travis Miller
Strategist
Morningstar

Business Strategy and Outlook 24 Aug 2022

NiSource continues to transition away from its roots in the natural gas distribution and midstream businesses to an increasing focus on electric infrastructure and renewable energy. About 60% of NiSource's operating income comes from its six natural gas distribution utilities and 40% from its electric utility in Indiana following the 2015 separation from Columbia Pipeline Group. The share of earnings from the electric business could jump if new CEO Lloyd Yates decides to divest some of NiSource's smaller gas utilities.

NiSource's utilities have constructive regulatory frameworks that allow it to collect a cash return of and a cash return on the bulk of its capital investments within 18 months. We expect NiSource to invest more than $8 billion over the next three years, including what could be $2 billion of renewable energy projects in Indiana, where NiSource enjoys favorable regulation.

That growth could extend even longer based on electric and gas system infrastructure improvement projects NiSource has identified. Replacing steel and cast-iron pipe with plastic at its natural gas distribution utilities is a key initiative along with investments across the business that reduce greenhouse gases. Almost all of these investments receive favorable regulatory treatment, allowing NiSource to earn near its regulatory allowed returns.

In October 2020, NiSource sold its Columbia Gas of Massachusetts utility and received $1.1 billion of proceeds that it used to strengthen the balance sheet and prepare for its planned infrastructure investments. The sale came nearly two years after a natural gas explosion on NiSource's Massachusetts system killed one person north of Boston. Insurance covered roughly half of the almost $2 billion of claims, penalties, and other expenses.

Earnings are set to rebound quickly from their low in 2020 when COVID-19 pandemic costs, lower energy use, the Massachusetts utility sale, and a large equity issuance weighed on earnings. We expect modest customer growth combined with NiSource's infrastructure growth investments to support 8% annual earnings

Profile

NiSource is one of the nation's largest natural gas distribution companies with approximately 3.5 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NiSource's electric utility transmits and distributes electricity in northern Indiana to about 500,000 customers. The regulated electric utility also owns more than 3,000 megawatts of generation capacity, most of which is now coal-fired but is being replaced by natural gas and renewable energy.

Morningstar Analysis

Fair Value & Profit Drivers 24 Aug 2022
Our fair value estimate is $32 per share.

We assume NiSource invests nearly $9 billion in 2022-24, including $2 billion of investment in renewable energy projects in Indiana to replace its coal-fired power generation fleet by 2028. Investment in the gas distribution systems, primarily for pipeline replacement, should remain well above maintenance-level spending for several more years, resulting in earnings growth at all of its gas utilities. We expect investment at the gas utilities to slow beyond 2025 while growth investment at the electric utility continues.

In total, we expect 11% average annual rate base growth and 8% average annual earnings growth through 2025 when combining the planned electric and gas system investments. The key factor in our growth outlook is a favorable outcome in NiSource's planned 2023-24 electric rate case in Indiana.

Renewable energy and gas distribution infrastructure investments should support strong dividend growth, a better ESG profile, and lower risk for investors. We don't expect a material valuation impact from year-to-year policy-related shifts in investment, notably Indiana solar projects.

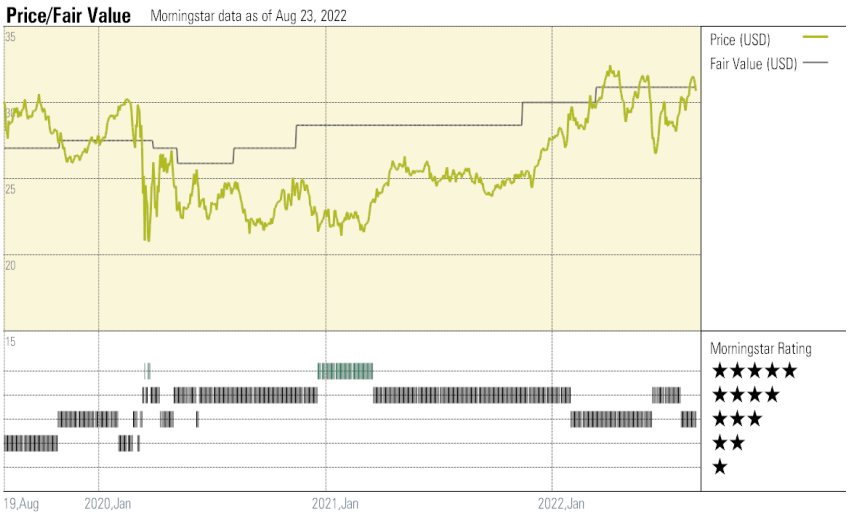
We use a 5.8% cost of capital in our discounted cash flow valuation, which incorporates a 7.5% cost of equity. Our cost of equity is lower than the 9% rate of return we expect investors will demand of a diversified equity portfolio. We believe our cost of equity reflects the risk associated with regulated electric and natural gas distribution utilities operating in states that have constructive regulatory frameworks.

Scenario Analysis
Our bull and bear cases suggest a low uncertainty rating for NiSource. Our low uncertainty rating is due in large part to the favorable regulatory frameworks in the jurisdictions of NiSource's utility operations. In addition, we believe we have captured potential ESG risk in our base-case scenario.

If we assume capital expenditures are 25% lower than our estimate during the next five years, then our annual EPS growth would decline about 5% and our fair value estimate would decrease approximately $3 per share. We estimate similar upside impact in our bull case if NiSource secures more growth investment opportunities during the next five years.

A 50-basis-point change in our cost of equity assumption changes our fair value estimate by $3 per share.

Economic Moat
Service territory monopolies and efficient scale advantages are the primary moat sources for NiSource's regulated gas and electric utilities. State and federal regulators grant regulated utilities like NiSource exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.



This implicit contract between regulators and capital providers should, on balance, allow NiSource's regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

NiSource derives roughly 60% of its operating earnings from its natural gas distribution utilities and 40% from its integrated electric business in Indiana. In all cases, state and federal regulators set customer rates that allow NiSource to recover its operating and capital costs.

30.97 USD	32.00 USD	Low	Narrow	Stable	Standard	Utilities - Regulated	

NiSource has no direct commodity price risk that could weaken its moat. NiSource exited the no-moat retail energy supply business in 2010.

Moat Trend

We believe NiSource's moat trend is stable. We do not foresee a long-term change to the firm's business as a monopoly provider of natural gas and electricity. We also believe the core Federal Energy Regulatory Commission and state cost-of-service regulatory frameworks will remain in place for the foreseeable future. As with almost all regulated utilities, we believe regulatory caps on revenue and returns preclude NiSource from establishing a wide economic moat.

Bulls Say/Bears Say

Bulls Say

- We expect the dividend to grow near 6% annually during the next few years before accelerating to keep pace with earnings in 2024 and beyond.
- NiSource's growth plan will support Indiana policymakers' desire to cut the state's carbon emissions by replacing coal generation with renewable energy and energy storage.
- New legislation has improved the regulatory framework in Indiana for NiSource's electric and natural gas distribution utilities.

Bears Say

- Industrial customers account for over half of NiSource's electric sales, higher than most utilities. Industrial sales are more sensitive to the economy than residential and commercial sales.
- Policies to reduce carbon emissions could be a long-term threat for NiSource's natural gas distribution business if policymakers in states it serves aim to reduce retail gas use.
- NiSource has issued nearly $3 billion of equity and preferred stock during the last four years, resulting in little earnings growth since 2018.

Financial Strength

NiSource has issued a substantial amount of equity in the past few years in part to fund its large infrastructure growth projects and in part to cover liabilities arising from the Massachusetts gas explosion. This dilution and the sale of Columbia Gas of Massachusetts has kept earnings mostly flat since 2018.

The equity has strengthened NiSource's balance sheet going into the next phase of heavy growth investment. NiSource issued over $1 billion of common stock and $880 million of preferred stock in 2018 and 2019, raised $1.1 billion from the Massachusetts utility sale in 2020, and issued $862.5 million of convertible preferred equity units in early 2021. During the next three years, we expect NiSource will need to raise $600 million of new equity, issue $3 billion of new debt, and remarket the preferred units when they convert in 2023 to fund its planned growth investments.

NiSource's large renewable energy investment plan could allow it to raise more clean energy-related financing such as the green bond that it issued in June totaling $350 million with a 5% coupon.

NiSource has grown its dividend nearly 40% since the 2015 Columbia Pipeline Group spinoff despite a slight slowdown in the last few years. The board accelerated that growth for 2022 with a 7% increase, exceeding our expectations. We expect dividend growth to remain near 6% with a payout ratio around 60% for at least the next three years. This is in line with most of NiSource's peers.

Risk & Uncertainty

Regulatory risk remains the key uncertainty. However, NiSource's regulatory exposure is diversified with operations in six states and its federal-regulated electric transmission system. NiSource has reduced some of the

regulatory uncertainty related to its planned natural gas distribution and electric utilities investments by securing preapprovals and favorable rate mechanisms that provide for customer rate increases as the utility makes its infrastructure investments.

In 2020, NiSource announced it would eliminate all coal-fired generation from its power plant fleet by 2028, significantly reducing ESG risk. This transition will require signing power purchase agreements for renewable energy, building new solar and wind farms, and making modifications to its electric grid. There is a modest amount of execution risk to this dramatic transition away from coal generation.

Capital Allocation 24 Aug 2022

We assign NiSource management a Standard capital allocation rating primarily due to its work with regulators and policymakers to develop a growth plan based on clean energy, infrastructure modernization, and safety.

The CEO transition from Joe Hamrock to Lloyd Yates in February 2022 could bring some changes in NiSource's portfolio of companies. We expect any changes would aim to reduce NiSource's equity needs to fund renewable energy investments and take advantage of what we consider very attractive valuations for gas distribution utilities in recent market transactions. Yates has been a director at NiSource since 2020 and previously led Duke Energy's core Carolina operations, which are more than twice the size of NiSource.

Current and former NiSource management made two key capital allocation decisions in recent years that we think were favorable for shareholders and positioned the company to execute its current growth plan. The first move was forming Columbia Pipeline Partners and executing Columbia Pipeline Group's tax-free separation. The second move was selling Columbia Gas of Massachusetts to Eversource Energy in 2020 after regulators determined NiSource was responsible for a gas explosion north of Boston. Even though the incident had a negative effect on shareholder value, NiSource resolved the issues quickly and received an attractive price to exit a region that was farthest from its core Midwest utilities.

Hamrock championed NiSource's clean energy growth strategy after succeeding Bob Skaggs in mid-2015 when Skaggs, a 32-year NiSource veteran, chose to lead the newly formed Columbia Pipeline Group. Hamrock had started his career at American Electric Power and worked in NiSource's gas distribution business before becoming CEO. CFO Donald Brown joined NiSource in April 2015 after stints at UGI Utilities and Constellation Energy.

Analyst Notes

Inflation Reduction Act: Increasing Our Confidence in Utilities' Long-Term Growth 16 Aug 2022

Our initial analysis of the U.S. Inflation Reduction Act that President Joe Biden plans to sign on Aug. 16 has led us to reaffirm or make slight increases to our fair value estimates for U.S. utilities. We are reaffirming our moat and moat trend ratings.

Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.

Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.

Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.

Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

We think the act will only exceed its target 40% carbon emissions reduction from 2005 if tax incentives lead to more electric vehicle purchases, building electrification, and energy efficiency. We estimate the transportation, residential, commercial, and industrial sectors must reduce their emissions 14% by 2030 to meet the act's target. This will take a substantial acceleration of carbon emissions reductions for these sectors, which have cut their carbon emissions by only 12% during the last 15 years, according to the U.S. Environmental Protection Agency data.

The power generation sector, which primarily contains utilities, has already cut carbon emissions more than 40% since 2005. We estimate growth in wind and solar energy will result in a 64% reduction in power generation carbon emissions by 2030 based on utilities' investment plans, state policies, and corporate renewable energy demand. We think it's unlikely the act will result in any carbon emissions reductions in the power generation sector incremental to our forecast without more solar and wind manufacturing capacity and a faster regulatory process for project development.

NiSource's Growth Plan and Strategic Review On Track; Stock Offers Attractive Total Return Potential 03 Aug 2022

We are reaffirming our $31 per share fair value estimate for NiSource after the company reported earning $0.12 per share on an adjusted basis during the second quarter of 2022. Results remain on track to meet our full-year and long-term outlooks. We are reaffirming our narrow moat and stable moat trend ratings.

We think NiSource's combination of a 3.1% dividend yield, long runway of 7% annual growth, and potential

Analyst Notes

incremental value from its current strategic review makes it among the most attractive utilities in our coverage. The stock trades at a 5% discount to our fair value estimate and a discount to other utilities with similar growth outlooks.

Management reaffirmed its $1.42 to $1.48 EPS guidance range for 2022, in line with our estimate. We continue to assume $8 billion of capital investment in 2022-24, including $2 billion of renewable energy investments. The timing of this capital investment might shift due to delays in renewable energy projects, but we don't expect that to have a material impact on NiSource's long-term growth trajectory. Potential delays don't impact our 2022 outlook.

CEO Lloyd Yates said he plans to announce the outcome of management's strategic review of NiSource's portfolio in November. This could include selling some of NiSource's six gas distribution companies, most likely its smaller gas utilities in Kentucky, Pennsylvania, and Maryland. Yates suggested they are receiving interest from private market infrastructure investors.

We expect NiSource to file a critical rate review proposal at its Indiana electric utility late this year with new rates effective in late 2023. The outcome of this proceeding will largely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024. With customer bills up as much as 20% this year due to higher energy costs, regulators might be hesitant to approve a large base rate increase that we expect NiSource will request.

Utilities Caught in the Middle of Investors' Recession and Inflation Fears 18 Jul 2022

We are reaffirming our fair value estimates and economic moat ratings for our U.S. utilities coverage after the U.S. Bureau of Labor Statistics reported 9.1% core inflation on July 14. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Investors have flocked to utilities this year to protect against recession fears and geopolitical uncertainty. However, utilities' outperformance has papered over what we consider the sector's biggest long-term risk: inflation. After June's 8.6% inflation reading, the Morningstar US Utilities Index fell 9% in one week. Utilities moved little on last week's inflation reading, probably because investors already expected a high inflation number.

We expect utilities stocks to remain volatile as investors alternately fret a recession (positive for utilities) and inflation (negative for utilities). After the recent jump in interest rates, utilities' 3.2% dividend yield is nearly the same as the 10-year Treasury yield for the first time since 2008, a setback for income investors.

Renewable energy growth remains a long-term opportunity, but higher supply costs and uncertain federal policy could stall near-term growth, especially for solar. High fossil fuel costs have kept renewable energy competitive. Warm summer weather should boost utilities earnings this year, potentially helping some utilities offset inflation's impact. However, customer bill shock from higher gas and power prices could significantly increase regulatory risk next year, potentially putting some growth projects at risk.

We now consider the sector to be near fair value, down from 14% overvalued in early June. Ten utilities trade at or below our fair value estimates as of mid-July, the most since mid-2021. We think utilities that operate in constructive regulatory jurisdictions with support for infrastructure growth are the best positioned to mitigate the impacts of inflation.

Analyst Notes

For more on our outlook for the utilities sector, see our recent report, "Recession or Inflation? Utilities Caught In the Middle."

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates 14 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-last week. Now, nearly half our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Dominion Energy has transitioned to a predominantly rate-regulated utility operating in highly constructive regulatory environments. The company's five-year $37 billion capital investment plan focusing on clean energy supports our 6.5% annual earnings growth forecast. Virginia is the company's most important subsidiary and has the most constructive regulation. Dominion expects 90% of its capital investment in the region will be eligible for rate riders, reducing regulatory risk in an inflationary environment.

We think Entergy has several advantages over its peers in an inflationary environment. The company's five southeast utilities should benefit from a jump in U.S. energy demand, constructive state regulation, and substantial opportunities for clean energy growth. More than 90% of Entergy's investments flow through customer rates with little regulatory lag. This minimizes the impact from inflation. We expect Entergy to invest $4 billion annually through 2025 to upgrade its expansive grid and replace coal generation with mostly solar. This supports our annual earnings growth estimate at the high end of management's 7%-9% target.

Constructive regulation in Florida supports industry-leading returns and growth for NextEra Energy. Florida's highly constructive rate-setting mechanisms support investment in the state. NextEra benefits from one of the highest allowed returns in the industry. The utility also has among the lowest electricity bills and highest customer growth across its peer group, helping protect itself in an inflationary environment. At the company's competitive renewable business, NextEra is well positioned to for the clean energy transition. A U.S. Department of Commerce anti-circumvention investigation regarding the import of solar

Analyst Notes

panels from certain Asian countries had created uncertainty to the company's near-term development program; however, the Biden administration's recent decision to not apply solar panel tariffs for at least the next two years brings near-term clarity.

NiSource's transition from coal to renewable energy in Indiana along with regulatory support in the states where it operates natural gas systems should support more than $10 billion of investment over the next four years and 8% annual earnings growth, among the highest in the sector. We think this is an opportunity to buy a high-growth utility at a discount to recent market acquisitions involving similar natural gas distribution utilities. New CEO Lloyd Yates could shake up NiSource's portfolio to capitalize on those market valuations while boosting the share of earnings from its high-growth electric business.

For a more detailed analysis of how inflation affects utilities, see our latest reports, "Inflation Unraveling U.S. Utilities' Safety Net" and "Utility Regulation Critical To Manage Inflation Risk."

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest reports, "Inflation Unraveling U.S. Utilities' Safety Net" and "Utility Regulation Critical To Manage

Inflation Risk."

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected 06 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

For more on our long-term solar growth outlook for U.S. utilities, see our report, "U.S. Utility-Scale Solar: Top Picks Hiding In Shadows." Our most recent utilities sector report, "Constructive Utility Regulation Critical to Reduce Inflation Risk," addresses key issues that we think will impact our top utilities picks, including NextEra Energy and NiSource.

NiSource's Flexibility Supports Our Earnings Growth Outlook; Remains Top Utilities Pick 04 May 2022

We are reaffirming our $31 per share fair value estimate for NiSource after the company reported earning $0.75 per share on an adjusted basis during the first quarter of 2022. Results remain on track to meet our full-year and long-term outlooks. We are reaffirming our narrow moat and stable moat trend ratings.

We think NiSource's combination of a 3.3% dividend yield and potential for more than 7% annual growth makes it among the most attractive utilities in our coverage. The stock trades at a 5% discount to our fair value estimate and a discount to other utilities with similar growth outlooks.

NiSource's diverse mix of businesses and growth projects should minimize any impact from potential delays of its planned solar projects and coal plant retirements due to federal policy uncertainties. We are not changing our $8 billion of capital investment forecast in 2022-24, including $2 billion of renewable energy investments, in line with management's plan. We estimate only about $500 million of solar investment could be delayed, and we expect NiSource can pull forward planned infrastructure investment to offset those delays. Potential delays don't impact our 2022 outlook. Management reaffirmed its $1.42 to $1.48 EPS guidance range for 2022, in line with our

Analyst Notes

estimate.

We still expect NiSource to file a critical rate review proposal at its Indiana electric utility late this year with new rates effective in late 2023. The outcome of this proceeding will likely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024.

New CEO Lloyd Yates said he plans to announce the outcome of his strategic review of NiSource's portfolio this fall. This could include marketing some of NiSource's six gas distribution companies, given the relatively high market valuations of recent gas utilities deals. We think the most likely divestitures are NiSource's smaller gas utilities in Kentucky, Pennsylvania, and Maryland.

Utilities Could Start to Feel Pressure From Inflation, Higher Energy Prices 09 Mar 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover ahead of the U.S. Bureau of Labor Statistics' Consumer Price Index report March 10. We consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 8% premium to our fair value estimates, which assume 2.3% long-term inflation. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by midyear if inflation remains above 3%.

Utilities are up 9% during the last two weeks, but we think that rally will be short-lived. The Morningstar US Utilities Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 5.5% in December and 6.0% in January, the largest 12-month change since mid-1982, based on BLS data. A recent polling of economists estimate inflation near 8% for March, according to The Wall Street Journal.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue, high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2020. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Low inflation and interest rates have helped most utilities increase earnings with only moderate customer bill impacts. Electric and gas utility bills have fallen from 2.2% of total household spending in 2008 to 1.6% in 2021. This is primarily due to mostly flat operating costs and lower interest costs offsetting a near doubling of capital investment during the last decade.

For a more detailed analysis of how inflation affects utilities, see our latest report, "Inflation Unraveling U.S. Utilities' Safety Net."

Research Methodology for Valuing Companies

Qualitative Equity Research Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, in-depth competitive advantage analysis, and a variety of other analytical tools to augment this process. We believe this bottom-up, long-term, fundamentally based approach allows our analysts to focus on long-term business drivers, which have the greatest valuation impact, rather than short-term market noise.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at an uncertainty-adjusted discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk-adjusted discount to their fair values whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our single-point star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

Morningstar Research Methodology for Valuing Companies

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.
Our model is divided into three distinct stages:

Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in working-capital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes, or EBI, and the net new investment, or NNI, to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital, or RONIC, and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until the perpetuity stage is reached. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity

Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to

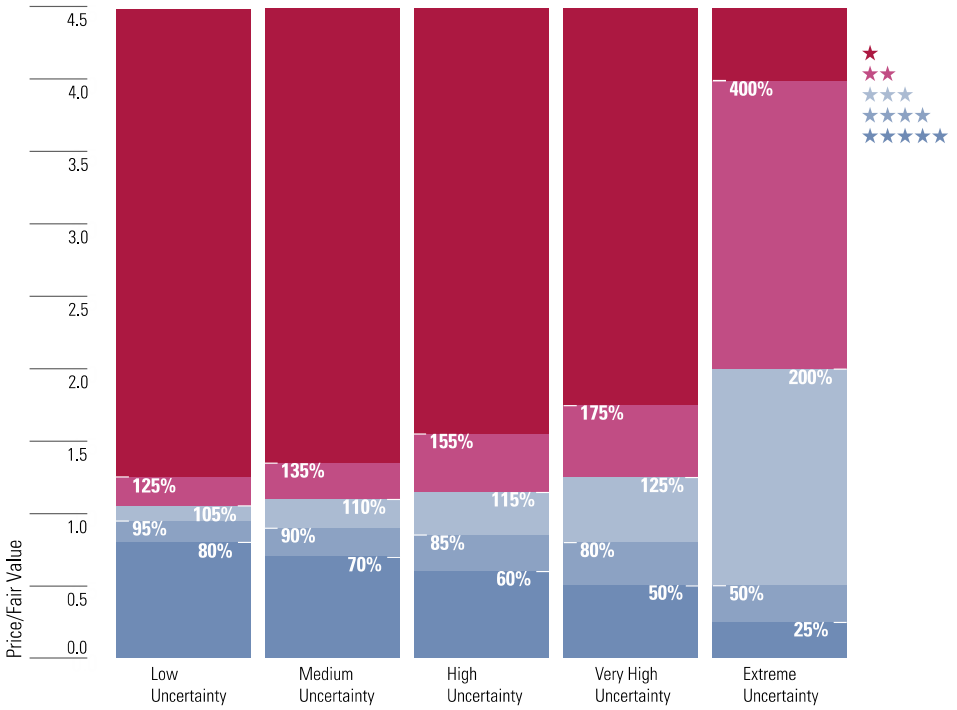
Research Methodology for Valuing Companies

assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.



- Low–margin of safety for 5-star rating is a 20% discount and for 1-star rating is 25% premium.
- Medium–margin of safety for 5-star rating is a 30% discount and for 1-star rating is 35% premium.
- High–margin of safety for 5-star rating is a 40% discount and for 1-star rating is 55% premium.
- Very High–margin of safety for 5-star rating is a 50% discount and for 1-star rating is 75% premium.
- Extreme–margin of safety for 5-star rating is a 75% discount and for 1-star rating is 300% premium.

4. Market Price

The market prices used in this analysis and noted in the report come from exchange on which the stock is listed, which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Equity Research Star Rating Methodology

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time, generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk-adjusted return is highly likely over a multiyear time frame. The current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. The market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Research Methodology for Valuing Companies

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environmental, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

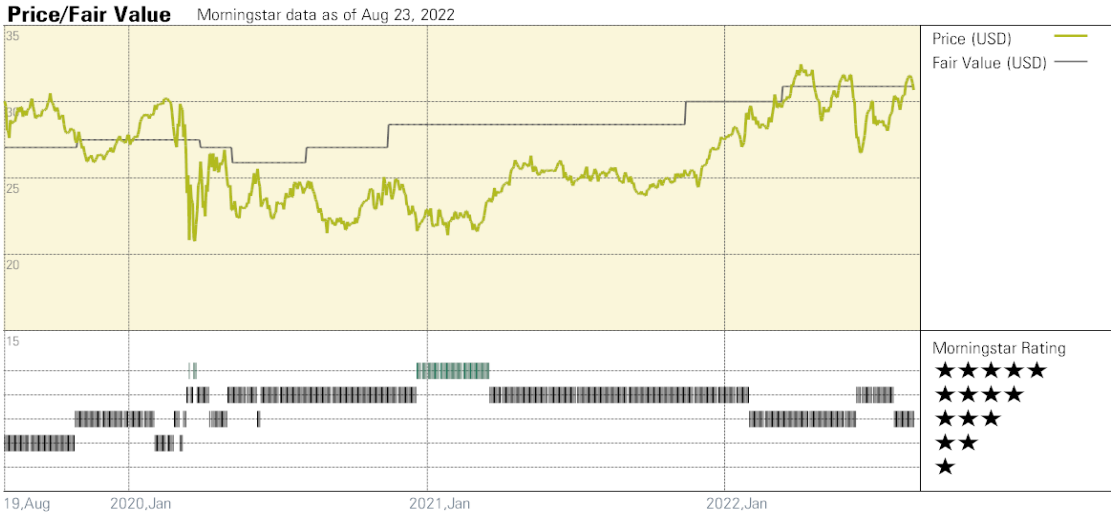
Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/.

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Quantitative Valuation: Using the below terms, intended to denote the relationship between the security's Last Price and Morningstar's quantitative fair value estimate for that security.

- Undervalued: Last Price is below Morningstar's quantitative fair value estimate.
- Fairly Valued: Last Price is in line with Morningstar's quantitative fair value estimate.
- Overvalued: Last Price is above Morningstar's quantitative fair value estimate.



Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

The analysis within this report is prepared by the person(s) noted in their capacity as an analyst for Morningstar's equity research group. The equity research group consists of various Morningstar, Inc. subsidiaries ("Equity Research Group)". In the United States, that subsidiary is Morningstar Research Services LLC, which is registered with and governed by the U.S. Securities and Exchange Commission.

The opinions expressed within the report are given in good faith, are as of the date of the report and are subject to change without notice. Neither the analyst nor Equity Research Group commits themselves in advance to whether and in which intervals updates to the report are expected to be made. The written analysis and Morningstar Star Rating for stocks are statements of opinions; they are not statements of fact.

The Equity Research Group believes its analysts make a reasonable effort to carefully research information contained in the analysis. The information on which the analysis is based has been obtained from sources believed to be reliable such as, for example, the company's financial statements filed with a regulator, company website, Bloomberg and any other the relevant press sources. Only the information obtained from such sources is made available to the issuer who is the subject of the analysis, which is necessary to properly reconcile with the facts. Should this sharing of information result in considerable changes, a statement of that fact will be noted within the report. While the Equity Research Group has obtained data, statistics and information from sources it believes to be reliable, neither the Equity Research Group nor Morningstar, Inc.performs an audit or seeks independent verification of any of the data, statistics, and information it receives.

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

This report is for informational purposes only and has no regard to the specific investment objectives, financial situation or particular needs of any specific recipient. This publication is intended to provide information to assist institutional investors in making their own investment decisions, not to provide investment advice to any specific investor. Therefore, investments discussed and recommendations made herein may not be suitable for all investors: recipients must exercise their own independent judgment as to the

NiSource Must Secure Regulatory Support for Growth Projects

Business Strategy & Outlook Travis Miller, Strategist, 24 Aug 2022

NiSource continues to transition away from its roots in the natural gas distribution and midstream businesses to an increasing focus on electric infrastructure and renewable energy. About 60% of NiSource's operating income comes from its six natural gas distribution utilities and 40% from its electric utility in Indiana following the 2015 separation from Columbia Pipeline Group. The share of earnings from the electric business could jump if new CEO Lloyd Yates decides to divest some of NiSource's smaller gas utilities.

NiSource's utilities have constructive regulatory frameworks that allow it to collect a cash return of and a cash return on the bulk of its capital investments within 18 months. We expect NiSource to invest more than $8 billion over the next three years, including what could be $2 billion of renewable energy projects in Indiana, where NiSource enjoys favorable regulation.

That growth could extend even longer based on electric and gas system infrastructure improvement projects NiSource has identified. Replacing steel and cast-iron pipe with plastic at its natural gas distribution utilities is a key initiative along with investments across the business that reduce greenhouse gases. Almost all of these investments receive favorable regulatory treatment, allowing NiSource to earn near its regulatory allowed returns.

Sector
Utilities

Industry
Utilities - Regulated Gas

Business Description

NiSource is one of the nation's largest natural gas distribution companies with approximately 3.5 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NiSource's electric utility transmits and distributes electricity in northern Indiana to about 500,000 customers. The regulated electric utility also owns more than 3,000 megawatts of generation capacity, most of which is now coal-fired but is being replaced by natural gas and renewable energy.

In October 2020, NiSource sold its Columbia Gas of Massachusetts utility and received $1.1 billion of proceeds that it used to strengthen the balance sheet and prepare for its planned infrastructure investments. The sale came nearly two years after a natural gas explosion on NiSource's Massachusetts system killed one person north of Boston. Insurance covered roughly half of the almost $2 billion of claims, penalties, and other expenses.

Earnings are set to rebound quickly from their low in 2020 when COVID-19 pandemic costs, lower energy use, the Massachusetts utility sale, and a large equity issuance weighed on earnings. We expect modest customer growth combined with NiSource's infrastructure growth investments to support 8% annual earnings growth and 6% annual dividend growth from 2022 to 2026.

Bulls Say Travis Miller, Strategist, 24 Aug 2022

- We expect the dividend to grow near 6% annually during the next few years before accelerating to keep pace with earnings in 2024 and beyond.
- NiSource's growth plan will support Indiana policymakers' desire to cut the state's carbon emissions by replacing coal generation with renewable energy and energy storage.
- New legislation has improved the regulatory framework in Indiana for NiSource's electric and natural gas distribution utilities.

Bears Say Travis Miller, Strategist, 24 Aug 2022

- Industrial customers account for over half of NiSource's electric sales, higher than most utilities. Industrial sales are more sensitive to the economy than residential and commercial sales.
- Policies to reduce carbon emissions could be a long-term threat for NiSource's natural gas distribution business if policymakers in states it serves aim to reduce retail gas use.
- NiSource has issued nearly $3 billion of equity and preferred stock during the last four years, resulting in little earnings growth since 2018.

Economic Moat Travis Miller, Strategist, 24 Aug 2022

Service territory monopolies and efficient scale advantages are the primary moat sources for NiSource's regulated gas and electric utilities. State and federal regulators grant regulated utilities like NiSource exclusive rights to charge customers rates that allow the utilities to earn a fair return on and return of the capital they invest to build, operate, and maintain their networks. In exchange for regulated utilities' service territory monopolies, state and federal regulators set returns at levels that aim to minimize customer costs while offering fair returns for capital providers.

This implicit contract between regulators and capital providers should, on balance, allow NiSource's regulated utilities to achieve at least their costs of capital, though observable returns might vary in the short run based on demand trends, investment cycles, operating costs, and access to financing.

NiSource derives roughly 60% of its operating earnings from its natural gas distribution utilities and 40% from its integrated electric business in Indiana. In all cases, state and federal regulators set customer rates that allow NiSource to recover its operating and capital costs.

NiSource has no direct commodity price risk that could weaken its moat. NiSource exited the no-moat retail energy supply business in 2010.

Fair Value and Profit Drivers Travis Miller, Strategist, 24 Aug 2022

Our fair value estimate is $32 per share.

We assume NiSource invests nearly $9 billion in 2022-24, including $2 billion of investment in renewable energy projects in Indiana to replace its coal-fired power generation fleet by 2028. Investment in the gas distribution systems, primarily for pipeline replacement, should remain well above

MORNINGSTAR®

NiSource Inc NI ★★★ 24 Aug 2022 19:56, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
30.97 USD 24 Aug 2022	32.00 USD 24 Aug 2022 19:55, UTC	0.97	12.49 USD Bil 23 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

maintenance-level spending for several more years, resulting in earnings growth at all of its gas utilities. We expect investment at the gas utilities to slow beyond 2025 while growth investment at the electric utility continues.

In total, we expect 11% average annual rate base growth and 8% average annual earnings growth through 2025 when combining the planned electric and gas system investments. The key factor in our growth outlook is a favorable outcome in NiSource's planned 2023-24 electric rate case in Indiana.

Renewable energy and gas distribution infrastructure investments should support strong dividend growth, a better ESG profile, and lower risk for investors. We don't expect a material valuation impact from year-to-year policy-related shifts in investment, notably Indiana solar projects.

We use a 5.8% cost of capital in our discounted cash flow valuation, which incorporates a 7.5% cost of equity. Our cost of equity is lower than the 9% rate of return we expect investors will demand of a diversified equity portfolio. We believe our cost of equity reflects the risk associated with regulated electric and natural gas distribution utilities operating in states that have constructive regulatory frameworks.

Risk and Uncertainty Travis Miller, Strategist, 24 Aug 2022

Regulatory risk remains the key uncertainty. However, NiSource's regulatory exposure is diversified with operations in six states and its federal-regulated electric transmission system. NiSource has reduced some of the regulatory uncertainty related to its planned natural gas distribution and electric utilities investments by securing preapprovals and favorable rate mechanisms that provide for customer rate increases as the utility makes its infrastructure investments.

In 2020, NiSource announced it would eliminate all coal-fired generation from its power plant fleet by 2028, significantly reducing ESG risk. This transition will require signing power purchase agreements for renewable energy, building new solar and wind farms, and making modifications to its electric grid. There is a modest amount of execution risk to this dramatic transition away from coal generation.

Capital Allocation Travis Miller, Strategist, 24 Aug 2022

We assign NiSource management a Standard capital allocation rating primarily due to its work with regulators and policymakers to develop a growth plan based on clean energy, infrastructure modernization, and safety.

The CEO transition from Joe Hamrock to Lloyd Yates in February 2022 could bring some changes in NiSource's portfolio of companies. We expect any changes would aim to reduce NiSource's equity needs to fund renewable energy investments and take advantage of what we consider very attractive valuations for gas distribution utilities in recent market transactions. Yates has been a director at

30.97 USD 24 Aug 2022	32.00 USD 24 Aug 2022 19:55, UTC	0.97	12.49 USD Bil 23 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

NiSource since 2020 and previously led Duke Energy's core Carolina operations, which are more than twice the size of NiSource.

Current and former NiSource management made two key capital allocation decisions in recent years that we think were favorable for shareholders and positioned the company to execute its current growth plan. The first move was forming Columbia Pipeline Partners and executing Columbia Pipeline Group's tax-free separation. The second move was selling Columbia Gas of Massachusetts to Eversource Energy in 2020 after regulators determined NiSource was responsible for a gas explosion north of Boston. Even though the incident had a negative effect on shareholder value, NiSource resolved the issues quickly and received an attractive price to exit a region that was farthest from its core Midwest utilities.

Hamrock championed NiSource's clean energy growth strategy after succeeding Bob Skaggs in mid-2015 when Skaggs, a 32-year NiSource veteran, chose to lead the newly formed Columbia Pipeline Group. Hamrock had started his career at American Electric Power and worked in NiSource's gas distribution business before becoming CEO. CFO Donald Brown joined NiSource in April 2015 after stints at UGI Utilities and Constellation Energy.

Inflation Reduction Act: Increasing Our Confidence in Utilities' Long-Term Growth Travis Miller, Strategist, 16 Aug 2022

Our initial analysis of the U.S. Inflation Reduction Act that President Joe Biden plans to sign on Aug. 16 has led us to reaffirm or make slight increases to our fair value estimates for U.S. utilities. We are reaffirming our moat and moat trend ratings.

Overall, the act gives us more confidence in our 5%-7% annual average long-term growth outlooks for most utilities. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 7%-8% long-term annualized total returns even if valuation multiples compress, as we think they will. We consider the sector 13% overvalued on a median basis.

Utilities likely will not benefit directly from the act's clean energy tax credits since they will pass the savings to customers. However, utilities should benefit indirectly from lower regulatory risk as tax benefits offset bill increases related to their growth investments. Utilities with the largest share of renewable energy investments relative to their total investment budgets should have an easier time hitting their earnings growth targets without substantial customer bill increases.

Electric utilities should benefit from more electricity demand and infrastructure growth opportunities if the act speeds adoption of electric vehicles and building electrification, two areas that have been slow to decarbonize.

MORNINGSTAR®

NiSource Inc NI ★★★ 24 Aug 2022 19:56, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
30.97 USD 24 Aug 2022	32.00 USD 24 Aug 2022 19:55, UTC	0.97	12.49 USD Bil 23 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

Partially offsetting those customer benefits is the act's 15% minimum tax, which we estimate will raise cash taxes for most mid- and large-cap utilities. Ultimately, utilities will recover these higher taxes by raising customer bills. Customers also might lose the long-term benefits from accelerated tax depreciation, especially for utilities with large growth investment plans. The act's tax on book income rather than taxable income might cause a slight near-term reduction in utilities' cash flow but should accelerate long-term earnings growth. We don't expect this tax change to have a material impact on our long-term valuations.

NiSource's Growth Plan and Strategic Review On Track; Stock Offers Attractive Total Return Potential Travis Miller, Strategist, 3 Aug 2022

We are reaffirming our $31 per share fair value estimate for NiSource after the company reported earning $0.12 per share on an adjusted basis during the second quarter of 2022. Results remain on track to meet our full-year and long-term outlooks. We are reaffirming our narrow moat and stable moat trend ratings.

We think NiSource's combination of a 3.1% dividend yield, long runway of 7% annual growth, and potential incremental value from its current strategic review makes it among the most attractive utilities in our coverage. The stock trades at a 5% discount to our fair value estimate and a discount to other utilities with similar growth outlooks.

Management reaffirmed its $1.42 to $1.48 EPS guidance range for 2022, in line with our estimate. We continue to assume $8 billion of capital investment in 2022-24, including $2 billion of renewable energy investments. The timing of this capital investment might shift due to delays in renewable energy projects, but we don't expect that to have a material impact on NiSource's long-term growth trajectory. Potential delays don't impact our 2022 outlook.

CEO Lloyd Yates said he plans to announce the outcome of management's strategic review of NiSource's portfolio in November. This could include selling some of NiSource's six gas distribution companies, most likely its smaller gas utilities in Kentucky, Pennsylvania, and Maryland. Yates suggested they are receiving interest from private market infrastructure investors.

We expect NiSource to file a critical rate review proposal at its Indiana electric utility late this year with new rates effective in late 2023. The outcome of this proceeding will largely determine whether NiSource hits the high end or low end of management's 7%-9% annual average earnings growth range through 2024. With customer bills up as much as 20% this year due to higher energy costs, regulators might be hesitant to approve a large base rate increase that we expect NiSource will request.

Utilities Caught in the Middle of Investors' Recession and Inflation Fears Travis Miller, Strategist, 18 Jul 2022

MORNINGSTAR®

NiSource Inc NI ★★★ 24 Aug 2022 19:56, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
30.97 USD 24 Aug 2022	32.00 USD 24 Aug 2022 19:55, UTC	0.97	12.49 USD Bil 23 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

We are reaffirming our fair value estimates and economic moat ratings for our U.S. utilities coverage after the U.S. Bureau of Labor Statistics reported 9.1% core inflation on July 14. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Investors have flocked to utilities this year to protect against recession fears and geopolitical uncertainty. However, utilities' outperformance has papered over what we consider the sector's biggest long-term risk: inflation. After June's 8.6% inflation reading, the Morningstar US Utilities Index fell 9% in one week. Utilities moved little on last week's inflation reading, probably because investors already expected a high inflation number.

We expect utilities stocks to remain volatile as investors alternately fret a recession (positive for utilities) and inflation (negative for utilities). After the recent jump in interest rates, utilities' 3.2% dividend yield is nearly the same as the 10-year Treasury yield for the first time since 2008, a setback for income investors.

Renewable energy growth remains a long-term opportunity, but higher supply costs and uncertain federal policy could stall near-term growth, especially for solar. High fossil fuel costs have kept renewable energy competitive. Warm summer weather should boost utilities earnings this year, potentially helping some utilities offset inflation's impact. However, customer bill shock from higher gas and power prices could significantly increase regulatory risk next year, potentially putting some growth projects at risk.

We now consider the sector to be near fair value, down from 14% overvalued in early June. Ten utilities trade at or below our fair value estimates as of mid-July, the most since mid-2021. We think utilities that operate in constructive regulatory jurisdictions with support for infrastructure growth are the best positioned to mitigate the impacts of inflation.

Utility Selloff Now Has Sector Trading in Line With Our Fair Value Estimates Travis Miller, Strategist, 15 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the median utility in our coverage now trades in line with our fair value estimate, after the Morningstar US Utilities Sector Index declined 12% since Wednesday, June 8.

We think the selloff was sparked in large part by the U.S. Bureau of Labor Statistics' Consumer Price Index reading last week, which reported inflation was at a four decade high for May. Utilities peaked at 17% overvalued as of late April, and were 13% overvalued as of June 8, as global uncertainty drove investors to U.S. utilities.

Up until last week, investors had largely ignored the risk of inflation, which we considered the largest

MORNINGSTAR®

NiSource Inc NI ★★★ 24 Aug 2022 19:56, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
30.97 USD 24 Aug 2022	32.00 USD 24 Aug 2022 19:55, UTC	0.97	12.49 USD Bil 23 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

threat to utilities' long-term returns. Utilities have historically significantly underperformed the S&P 500 in inflationary environments, as utilities have fixed revenue, high capital and labor costs, and large energy pass-through costs. With higher-than-expected inflation, the market has increased expectations for the Fed to expedite interest rate increases. The utilities sector median 3.3% dividend yield is now a mere 18 basis point discount to the 10-year U.S. Treasury, making utility dividends less attractive to income-focused investors. In early March, the dividend yield was a 150 basis point premium to the 10-year U.S. Treasury.

No utility was trading below our fair value estimate mid-last week. Now, nearly half our utility coverage trades at or below our fair value estimates and we now think there are opportunities for long-term utility investors. While there are a few utilities that trade at a larger discount to our fair values, we think long-term investors are best served focusing on utilities in constructive regulatory environments that are better positioned to address inflationary headwinds, with Dominion Energy, Entergy, NextEra Energy, and NiSource our top picks.

Utility Valuations Look Stretched Amid Highest Inflation in Four Decades Travis Miller, Strategist, 10 Jun 2022

We are reaffirming our fair value estimates and moat ratings for the U.S. utilities we cover after the U.S. Bureau of Labor Statistics' Consumer Price Index, or CPI, reported 8.6% inflation for May. We continue to consider inflation to be the largest threat to utilities' long-term returns and ability to pay robust, growing dividends.

Utilities trade at a median 10% premium to our fair value estimates. With utilities' market valuation multiples well above 20-year highs, we think the market is ignoring the potential for cuts in earnings growth and valuations by year-end if inflation remains above 3%.

Utilities are flat year to date compared with the S&P 500's 18% decline, but we think that outperformance will be short-lived. The Morningstar US Utilities Sector Index has underperformed the S&P 500 by 18 percentage points on average over two-year periods following months when the CPI rose more than 3% year over year. Core CPI was up 8.6% in May, a four-decade high, with electricity prices up 12% over the 12-month period based on U.S. Bureau of Labor Statistics data.

While all utilities will be affected by inflation, we think utilities that operate in constructive regulatory environments, in which utilities are allowed to adjust customer rates for higher costs and higher returns on investments, can better offset inflation and rising interest rates. We think Dominion Energy, Entergy, NextEra Energy, and NiSource are the best positioned among utility peers to mitigate the impacts of inflation.

Inflation hurts utilities' earnings and returns on capital because utilities generally have fixed revenue,

MORNINGSTAR®

NiSource Inc NI ★★★ 24 Aug 2022 19:56, UTC

Last Price	Fair Value Estimate	Price/FVE	Market Cap	Economic Moat™	Moat Trend™	Uncertainty	Capital Allocation	ESG Risk Rating Assessment[1]
30.97 USD 24 Aug 2022	32.00 USD 24 Aug 2022 19:55, UTC	0.97	12.49 USD Bil 23 Aug 2022	Narrow	Stable	Low	Standard	3 Aug 2022 05:00, UTC

high capital and labor costs, and large energy pass-through costs that raise customer bills without raising earnings. We estimate utilities' operating and core capital costs were more than 70% of net revenue on average in 2021. Rising costs make it critical that utilities receive timely rate adjustments, a particularly tough task when energy costs also are rising.

Biden Pauses Potential Solar Tariffs; Utilities' Solar Growth Plans on Track as We Expected Travis Miller, Strategist, 6 Jun 2022

We are reaffirming our fair value estimates, moat ratings, and moat trend ratings for all utilities after the Biden administration announced it would not apply solar panel tariffs on East Asian countries for at least the next two years. Some utilities' management teams had suggested that potential tariffs resulting from a U.S. Department of Commerce anticircumvention investigation would slow their growth plans. We never thought the investigation would have a material impact on our long-term outlooks given the Biden administration's and most states' support for renewable energy. The Biden administration also announced plans to boost U.S. solar panel manufacturing, which will support solar growth.

Two of our top utilities picks, NextEra Energy and NiSource, were among those utilities whose stocks took the hardest hit because of the solar tariff fears. The management team of each firm said it was postponing a portion of its large solar growth plans because of tariff-related supply concerns. AES and Alliant Energy are among many other utilities that have made solar key parts of their growth plans.

NextEra's stock fell as much as 16% in the three weeks after management said that it might delay up to 2.8 gigawatts of a possible 15 GW solar project pipeline. The stock has since rebounded to near our $78 fair value estimate. We are reaffirming our 8% annual earnings growth outlook. NiSource's stock fell 11% in late April before management said $500 million of its planned solar investments could be delayed. The stock has since rebounded to near our $31 per share fair value estimate. We continue to assume NiSource invests $8 billion in 2022-24, including $2 billion on renewable energy, supporting our 7% annual earnings growth outlook.

Solar panel tariffs remain a risk pending the outcome of the DOC's investigation into whether Chinese manufacturers sidestepped tariffs by shipping panels through tariff-free Asian countries. We expect an initial DOC report this fall.

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

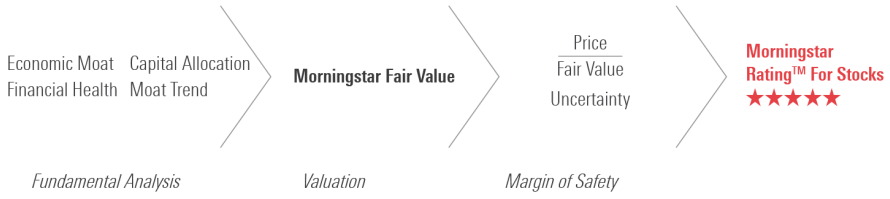
Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity



Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

MORNINGSTAR®

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

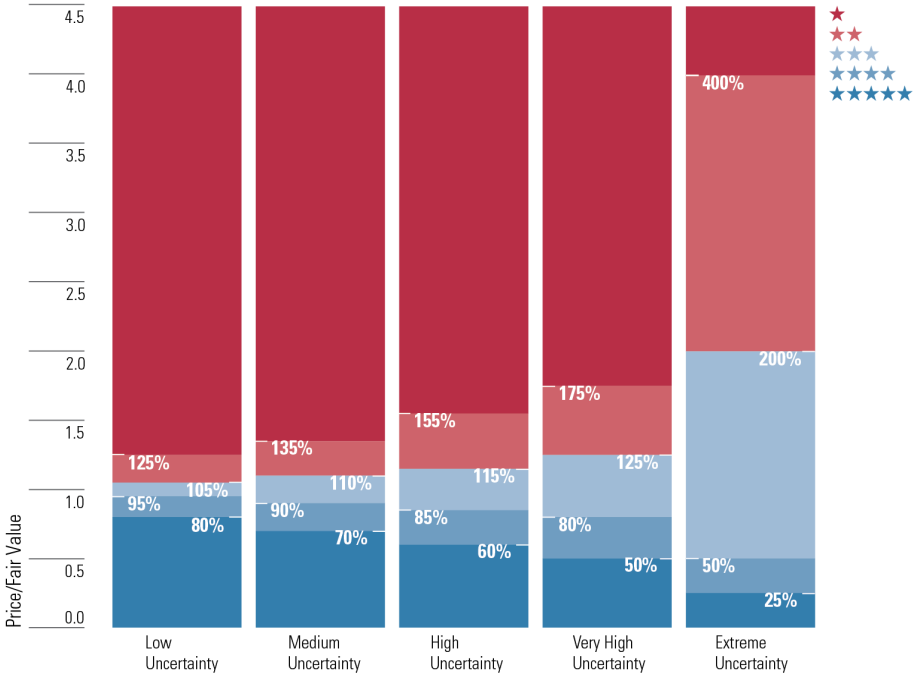
Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price



The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close

Morningstar Equity Research Star Rating Methodology

tabs on the companies they follow, and, based on thorough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. Unless stated otherwise, the original distributor of the report is Morningstar Research Services LLC, a U.S.A. domiciled financial institution.

Raising U.S. Electricity Demand Growth Outlook, Reaffirming Utilities Fair Value Estimates

Analyst Note Travis Miller, Strategist, 27 Sep 2022

We are reaffirming our fair value estimates for U.S. utilities after raising our 10-year annual U.S. electricity demand growth forecast to 1.4%, up from 1.2% in our previous forecast two years ago. We also are reaffirming our economic moat and moat trend ratings for all U.S. utilities.

We believe the path to eliminate carbon emissions and meet environmental targets will lead to accelerating electricity demand growth and new infrastructure growth investment opportunities for utilities. We forecast 6%-8% annual earnings and dividend growth for most utilities through the decade to support electricity demand growth. With most utilities yielding above 3%, we think utilities investors are well positioned to earn 8%-9% long-term annualized total returns even if valuations compress, as we think they will. We consider the sector 5% overvalued on a median basis as of Sept. 27.

Our new electricity demand forecast is more bullish than most. We think other forecasts underestimate the speed and scale of the U.S. clean energy transition. With many regions already facing strained electric grids, electricity demand growth presents opportunities and challenges for utilities as they manage the surge of electric vehicles, Big Data, building electrification, and other mandates.

We expect electricity demand from electric vehicles will grow faster than any other new source of electricity demand in our forecast, climbing 15-fold by 2032. Data centers, already sizable electricity users, are the second-fastest-growing new source of electricity demand in our forecast. Building and industrial electrification represents upside to our forecast.

Utilities

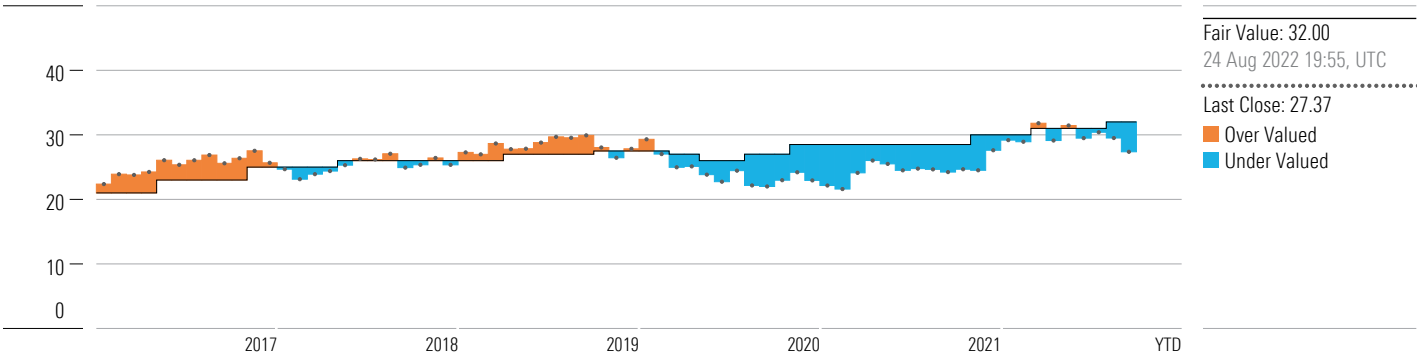
Industry

Utilities - Regulated Gas

Business Description

NiSource is one of the nation's largest natural gas distribution companies with approximately 3.5 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NiSource's electric utility transmits and distributes electricity in northern Indiana to about 500,000 customers. The regulated electric utility also owns more than 3,000 megawatts of generation capacity, most of which is now coal-fired but is being replaced by natural gas and renewable energy.

Energy efficiency gains will offset some of the core electricity demand growth that we forecast. We expect U.S. electricity intensity of the economy to fall 12% over our forecast period. Energy efficiency gains have held U.S. electricity demand mostly flat for the last decade.



For more details on our electricity demand forecast, see our Utilities Observer, "Electrifying the U.S.: Utilities Control the Path to Decarbonization."

MORNINGSTAR®

Research Methodology for Valuing Companies

Overview

At the heart of our valuation system is a detailed projection of a company's future cash flows, resulting from our analysts' research. Analysts create custom industry and company assumptions to feed income statement, balance sheet, and capital investment assumptions into our globally standardized, proprietary discounted cash flow, or DCF, modeling templates. We use scenario analysis, indepth competitive advantage analysis, and a variety of other analytical tools to augment this process. Moreover, we think analyzing valuation through discounted cash flows presents a better lens for viewing cyclical companies, high-growth firms, businesses with finite lives (e.g., mines), or companies expected to generate negative earnings over the next few years. That said, we don't dismiss multiples altogether but rather use them as supporting cross-checks for our DCF-based fair value estimates. We also acknowledge that DCF models offer their own challenges (including a potential proliferation of estimated inputs and the possibility that the method may miss shortterm market-price movements), but we believe these negatives are mitigated by deep analysis and our longterm approach.

Morningstar's equity research group ("we," "our") believes that a company's intrinsic worth results from the future cash flows it can generate. The Morningstar Rating for stocks identifies stocks trading at a discount or premium to their intrinsic worth—or fair value estimate, in Morningstar terminology. Five-star stocks sell for the biggest risk adjusted discount to their fair values, whereas 1-star stocks trade at premiums to their intrinsic worth.

Four key components drive the Morningstar rating: (1) our assessment of the firm's economic moat, (2) our estimate of the stock's fair value, (3) our uncertainty around that fair value estimate and (4) the current market price. This process ultimately culminates in our singlepoint star rating.

1. Economic Moat

The concept of an economic moat plays a vital role not only in our qualitative assessment of a firm's long-term investment potential, but also in the actual calculation of our fair value estimates. An economic moat is a structural feature that allows a firm to sustain excess profits over a long period of time. We define economic profits as returns on invested capital (or ROIC) over and above our estimate of a firm's cost of capital, or weighted average cost of capital (or WACC). Without a moat, profits are more susceptible to competition. We have identified five sources of economic moats: intangible assets, switching costs, network effect, cost advantage, and efficient scale.

Companies with a narrow moat are those we believe are more likely than not to achieve normalized excess returns for at least the next 10 years. Wide-moat companies are those in which we have very high confidence that excess returns will remain for 10 years, with excess returns more likely than not to remain for at least 20 years. The longer a firm generates economic profits, the higher its intrinsic value. We believe low-quality, no-moat companies will see their normalized returns gravitate toward the firm's cost of capital more quickly than companies with moats.

When considering a company's moat, we also assess whether there is a substantial threat of value destruction, stemming from risks related to ESG, industry disruption, financial health, or other idiosyncratic issues. In this context, a risk is considered potentially value destructive if its occurrence would eliminate a firm's economic profit on a cumulative or midcycle basis. If we deem the probability of occurrence sufficiently high, we would not characterize the company as possessing an economic moat.

To assess the sustainability of excess profits, analysts perform ongoing assessments of the moat trend. A firm's moat trend is positive in cases where we think its sources of competitive advantage are growing stronger; stable where we don't anticipate changes to competitive advantages over the next several years; or negative when we see signs of deterioration.

2. Estimated Fair Value

Combining our analysts' financial forecasts with the firm's economic moat helps us assess how long returns on invested capital are likely to exceed the firm's cost of capital. Returns of firms with a wide economic moat rating are assumed to fade to the perpetuity period over a longer period of time than the returns of narrow-moat firms, and both will fade slower than no-moat firms, increasing our estimate of their intrinsic value.

Our model is divided into three distinct stages:

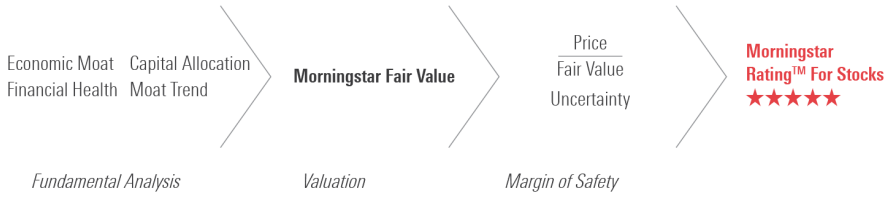
Stage I: Explicit Forecast

In this stage, which can last five to 10 years, analysts make full financial statement forecasts, including items such as revenue, profit margins, tax rates, changes in workingcapital accounts, and capital spending. Based on these projections, we calculate earnings before interest, after taxes (EBI) and the net new investment (NNI) to derive our annual free cash flow forecast.

Stage II: Fade

The second stage of our model is the period it will take the company's return on new invested capital—the return on capital of the next dollar invested ("RONIC")—to decline (or rise) to its cost of capital. During the Stage II period, we use a formula to approximate cash flows in lieu of explicitly modeling the income statement, balance sheet, and cash flow statement as we do in Stage I. The length of the second stage depends on the strength of the company's economic moat. We forecast this period to last anywhere from one year (for companies with no economic moat) to 10–15 years or more (for wide-moat companies). During this period, cash flows are forecast using four assumptions: an average growth rate for EBI over the period, a normalized investment rate, average return on new invested capital (RONIC), and the number of years until perpetuity, when excess returns cease. The investment rate and return on new invested capital decline until a perpetuity value is calculated. In the case of firms that do not earn their cost of capital, we assume marginal ROICs rise to the firm's cost of capital (usually attributable to less reinvestment), and we may truncate the second stage.

Stage III: Perpetuity



Once a company's marginal ROIC hits its cost of capital, we calculate a continuing value, using a standard perpetuity formula. At perpetuity, we assume that any growth or decline or investment in the business neither creates nor destroys value and that any new investment provides a return in line with estimated WACC.

Because a dollar earned today is worth more than a dollar earned tomorrow, we discount our projections of cash flows in stages I, II, and III to arrive at a total present value of expected future cash flows. Because we are modeling free cash flow to the firm—representing cash available to provide a return to all capital providers—we discount future cash flows using the WACC, which is a weighted average of the costs of equity, debt, and preferred stock (and any other funding sources), using expected future proportionate long-term, market-value weights.

3. Uncertainty Around That Fair Value Estimate

Morningstar's Uncertainty Rating captures a range of likely potential intrinsic values for a company and uses it to assign the margin of safety required before investing, which in turn explicitly drives our stock star rating system. The Uncertainty Rating represents the analysts' ability to

MORNINGSTAR®

Research Methodology for Valuing Companies

bound the estimated value of the shares in a company around the Fair Value Estimate, based on the characteristics of the business underlying the stock, including operating and financial leverage, sales sensitivity to the overall economy, product concentration, pricing power, exposure to material ESG risks, and other company-specific factors.

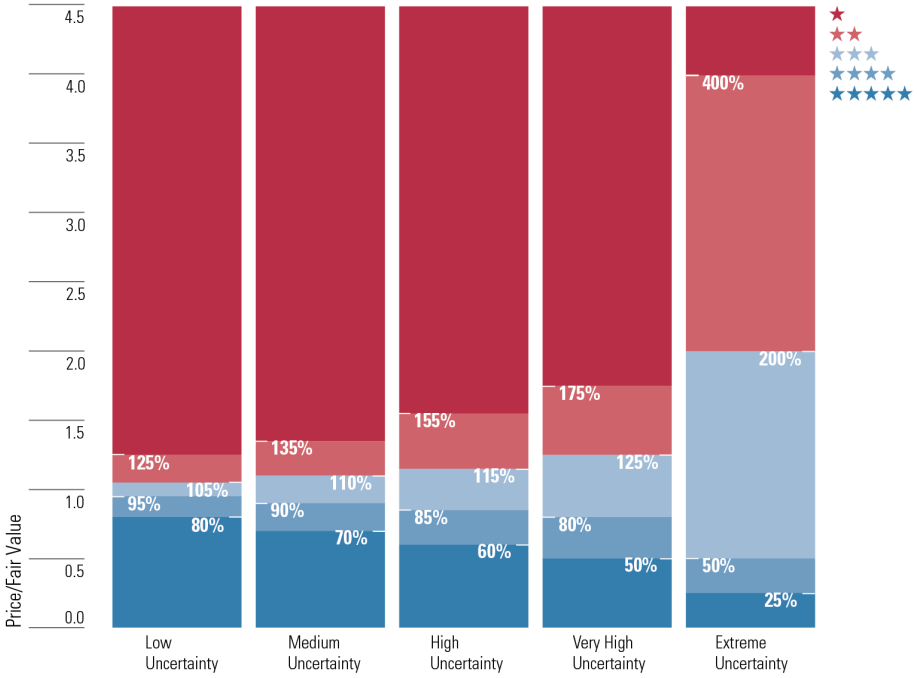
Analysts consider at least two scenarios in addition to their base case: a bull case and a bear case. Assumptions are chosen such that the analyst believes there is a 25% probability that the company will perform better than the bull case, and a 25% probability that the company will perform worse than the bear case. The distance between the bull and bear cases is an important indicator of the uncertainty underlying the fair value estimate. In cases where there is less than a 25% probability of an event, but where the event could result in a material decline in value, analysts may adjust the uncertainty rating to reflect the increased risk. Analysts may also make a fair value adjustment to reflect the impact of this event.

Our recommended margin of safety widens as our uncertainty of the estimated value of the equity increases. The more uncertain we are about the estimated value of the equity, the greater the discount we require relative to our estimate of the value of the firm before we would recommend the purchase of the shares. In addition, the uncertainty rating provides guidance in portfolio construction based on risk tolerance.

Our uncertainty ratings for our qualitative analysis are low, medium, high, very high, and extreme.

	Margin of Safety	
Qualitative Analysis Uncertainty Ratings	★★★★★Rating	★Rating
Low	20% Discount	25% Premium
Medium	30% Discount	35% Premium
High	40% Discount	55% Premium
Very High	50% Discount	75% Premium
Extreme	75% Discount	300% Premium

4. Market Price



The market prices used in this analysis and noted in the report come from exchange on which the stock is listed which we believe is a reliable source.

For more details about our methodology, please go to https://shareholders.morningstar.com.

Morningstar Star Rating for Stocks

Once we determine the fair value estimate of a stock, we compare it with the stock's current market price on a daily basis, and the star rating is automatically re-calculated at the market close on every day the market on which the stock is listed is open. Our analysts keep close

Morningstar Equity Research Star Rating Methodology

tabs on the companies they follow, and, based on thor ough and ongoing analysis, raise or lower their fair value estimates as warranted.

Please note, there is no predefined distribution of stars. That is, the percentage of stocks that earn 5 stars can fluctuate daily, so the star ratings, in the aggregate, can serve as a gauge of the broader market's valuation. When there are many 5-star stocks, the stock market as a whole is more undervalued, in our opinion, than when very few companies garner our highest rating.

We expect that if our base-case assumptions are true the market price will converge on our fair value estimate over time generally within three years (although it is impossible to predict the exact time frame in which market prices may adjust).

Our star ratings are guideposts to a broad audience and individuals must consider their own specific investment goals, risk tolerance, tax situation, time horizon, income needs, and complete investment portfolio, among other factors.

The Morningstar Star Ratings for stocks are defined below:

★★★★★ We believe appreciation beyond a fair risk adjusted return is highly likely over a multiyear time frame. Scenario analysis developed by our analysts indicates that the current market price represents an excessively pessimistic outlook, limiting downside risk and maximizing upside potential.

★★★★ We believe appreciation beyond a fair risk-adjusted return is likely.

★★★ Indicates our belief that investors are likely to receive a fair risk-adjusted return (approximately cost of equity).

★★ We believe investors are likely to receive a less than fair risk-adjusted return.

★ Indicates a high probability of undesirable risk-adjusted returns from the current market price over a multiyear time frame, based on our analysis. Scenario analysis by our analysts indicates that the market is pricing in an excessively optimistic outlook, limiting upside potential and leaving the investor exposed to Capital loss.

Other Definitions

Last Price: Price of the stock as of the close of the market of the last trading day before date of the report.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exem-

MORNINGSTAR®

Research Methodology for Valuing Companies

plary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Capital Allocation Rating: Our Capital Allocation (or Stewardship) Rating represents our assessment of the quality of management's capital allocation, with particular emphasis on the firm's balance sheet, investments, and shareholder distributions. Analysts consider companies' investment strategy and valuation, balance sheet management, and dividend and share buyback policies. Corporate governance factors are only considered if they are likely to materially impact shareholder value, though either the balance sheet, investment, or shareholder distributions. Analysts assign one of three ratings: "Exemplary", "Standard", or "Poor". Analysts judge Capital Allocation from an equity holder's perspective. Ratings are determined on a forward looking and absolute basis. The Standard rating is most common as most managers will exhibit neither exceptionally strong nor poor capital allocation.

Capital Allocation (or Stewardship) analysis published prior to Dec. 9, 2020, was determined using a different process. Beyond investment strategy, financial leverage, and dividend and share buyback policies, analysts also considered execution, compensation, related party transactions, and accounting practices in the rating.

Sustainalytics ESG Risk Rating Assessment: The ESG Risk Rating Assessment is provided by Sustainalytics; a Morningstar company.

Sustainalytics' ESG Risk Ratings measure the degree to which company's economic value at risk is driven by environment, social and governance (ESG) factors.

Sustainalytics analyzes over 1,300 data points to assess a company's exposure to and management of ESG risks. In other words, ESG Risk Ratings measures a company's unmanaged ESG Risks represented as a quantitative score. Unmanaged Risk is measured on an open-ended scale starting at zero (no risk) with lower scores representing less unmanaged risk and, for 95% of cases, the unmanaged ESG Risk score is below 50.

Based on their quantitative scores, companies are grouped into one of five Risk Categories (negligible, low, medium, high, severe). These risk categories are absolute, meaning that a 'high risk' assessment reflects a comparable degree of unmanaged ESG risk across all subindustries covered.

The ESG Risk Rating Assessment is a visual representation of Sustainalytics ESG Risk Categories on a 1 to 5 scale. Companies with Negligible Risk = 5 Globes, Low Risk = 4, Medium Risk = 3 Globes, High Risk = 2 Globes, Severe Risk = 1 Globe. For more information, please visit sustainalytics.com/esg-ratings/

Ratings should not be used as the sole basis in evaluating a company or security. Ratings involve unknown risks and uncertainties which may cause our expectations not to occur or to differ significantly from what was expected and should not be considered an offer or solicitation to buy or sell a security.

Risk Warning

Please note that investments in securities are subject to market and other risks and there is no assurance or guarantee that the intended investment objectives will be achieved. Past performance of a security may or may not be sustained in future and is no indication of future performance. A security investment return and an investor's principal value will fluctuate so that, when redeemed, an investor's shares may be worth more or less than their original cost. A security's current investment performance may be lower or higher than the investment performance noted within the report. Morningstar's Uncertainty Rating serves as a useful data point with respect to sensitivity analysis of the assumptions used in our determining a fair value price.

General Disclosure

Unless otherwise provided in a separate agreement, recipients accessing this report may only use it in the country in which the Morningstar distributor is based. THE FLEISHMAN DAILY 9/7/22

PEG, EIX, PCG, NI, Weekly Mark, LNG

The Fleishman Daily 9/7/22
Utilities: PEG, EIX, PCG, NI, Weekly Mark
Midstream: LNG

Utilities

PEG – Files for accounting mechanism that would smooth utility pension impact; promising
EIX – Fairview fire – 2 fatalities, 4,500 acres burned, evacuations ordered as 3,500 structures threatened and only 5% contained; utility files incident report
PCG – Utility raises requested rate increases in 2023-26 GRC, reflects inflation, federal tax law; large requests
NI – Details on PA settlement filed; $44.5M rate increase, silent on ROE/equity ratio
The Weekly Mark – A nuclear inflection point

Midstream

LNG – EPA denies emissions waiver for LNG's turbines; not a surprise but won't impact operations or financials; late day selloff unwarranted

Wolfe Utility & Midstream Materials: Utility Comps, Utility Stock Charts, Midstream Comps, Midstream Stock Charts, Clean Energy Comps, Valuation Charts, Models

Utilities

PEG – Files for accounting mechanism that would smooth utility pension impact; promising

- On Friday, PS&EG filed a request at the New Jersey BPU – asking for authorization of an accounting order that would allow for smoothing of returns on pension trust assets – effective January 1 2023 (link)
- Specifically the requested order would allow PSE&G to:
  - "modify its calculation of net pension expense for rate-making purposes by utilizing a calculated value that recognizes changes in fair value in a systematic and rational manner that smooths returns on pension trust assets" (PSE&G is proposing a phased-in five-year method, which is more similar to most other utilities, rather than an all-in-one-year impact)
  - "record a regulatory asset or liability to account for the difference between pension expense determined using the smoothed, calculated market-related value and the fair value at year-end for purposes of determining the amortization of net gains of losses"
- The regulatory asset/liability would be included in net pension expense and submitted for cost recovery/return in future rate cases

This is a potential positive if approved, as it could address some of the pension headwind PEG faces. PEG has been a significant underperforming since the Q1 call, when the company was identified as exposed to pension downside without "smoothing of asset returns." Thus far, management has been hesitant to specifically talk to offsets. We had estimated a $0.30 headwind back in early-June when the market was down 14% YTD (down even more now), but assumed half of this could be offset in our official estimates. We always believed PEG would ultimately be able to true-up its pension costs in the late-2023 rate case filing, such that it could be back on track by 2025, but in the interim there appeared to be a material headwind. We were also encouraged by the AWK rate case settlement approved last month that allowed for a pension deferral for 2 years in between rate cases. The potential to address this issue ahead of the rate case would be a unexpected positive for PEG (this would address the majority of the issue for the regulated utility – on the Q2 call PEG said the pension impact was roughly 75-80% on the regulated side, though the filing says PSE&G accounts for 63% of liabilities).

EIX – Fairview fire – 2 fatalities, 4,500 acres burned, evacuations ordered as 3,500 structures threatened and only 5% contained; utility files incident report

- As of last night, the Fairview fire around Hemet, Riverside County had burned 4,500 acres, destroyed 7 structures, threatened 3,500 structures and caused 2 fatalities and one injury. The fire was 5% contained.
- The fire appears to be in a High Fire Risk Area. The cause remains under investigation.
- EIX filed an incident report related to the Fairview fire after it was reported on 9/5.
- EIX wrote then: "...Our information reflects circuit activity occurring close in time to the reported time of the fire [which was 3:37pm]. Our investigation is ongoing". Full report here. An incident report must be filed if it meets certain requirements (see here); it does not imply utility equipment caused the fire. An update filing (known as a 315 filing) must be made within 25 days after the initial incident report.

At this time, it is unclear whether the 12 kV circuit in the incident report had a covered conductor or was under a PSPS or fast curve setting.

The stock underperformed the UTY by 330bp yesterday. While EIX's role, if any, is unknown, the “circuit activity”, 2 fatalities, number of structures threatened and little current containment make the fire worth monitoring. EIX has its own insurance, and then AB 1054 wildfire fund if the fire worsens materially.

PCG – Utility raises requested rate increases in 2023-26 GRC, reflects inflation, federal tax law; large requests

- On 9/6, PCG filed updated testimony in its GRC, raising the annual requested rate increases by $835M to $1,090 depending on the year; below are the updated requests vs the previous request in March:
  - 2023: $3,961M (32.4% increase over 2022) vs $3,125M (25.6%)
  - 2024: $1,048M vs $1,018M
  - 2025: $860M vs $755M
  - 2026: $680M vs $561M
- The main drivers are capital cost and expense escalation due to inflation, less so federal tax law and guidance changes.
- Earlier this summer, intervenors filed testimony in PCG's 2023-26 GRC; the Cal Public Advocates Office's annual recommended rate increases/decreases are below:
  - 2023: $1,139M (9.3% increase over 2022)
  - 2024: $301M
  - 2025: -$55M
  - 2026: -$227M
- PCG’s updated rate base projections in yesterday’s filing rise by $5.4B in 2026 vs those in its March 2022 filing:
  - 2023: $50.9B vs $49.2B in March 2022 filing
  - 2024: $56.8B vs $53.8B
  - 2025: $62.5B vs $58.2B
  - 2026: $68.2B vs $62.8B

Inflation appears to be driving the notable uptick in PCG’s requested annual rate increases in the rate case. PCG's rate increase requests were already among the highest we've seen in recent/pending rate cases. In its investor presentations this year, PCG saw rate increases moderating over the long-term to 2-4%, net O&M reductions, load growth and other efficiencies. As we noted last week, the recent undergrounding legislation de-risks some of PCG’s long-term plan.

NI – Details on PA settlement filed; $44.5M rate increase, silent on ROE/equity ratio

- Yesterday, details of the settlement in NI’s PA rate case covering the revenue requirement were made public
- Parties agreed to a $44.5M rate increase; the revenue requirement was settled via “black box”, meaning that ROE and equity ratio were not specified

    - NI requested a $82.2M rate increase using a 11.20% ROE, 54.38% equity ratio and $2.958B rate base (test-year ending 12/31/23)
- For the purposes of calculating NI's distribution system improvement charge (DSIC), the ROE shall reflect the return in the PUC's most recent Quarterly Report on the Earnings of Jurisdictional Utilities (10.15%)
- New rates are proposed to go into effect on 12/17/22

While the settlement is silent on ROE/equity ratio, the agreed upon rate increase is over 50% of NI's initial ask which we believe is a solid outcome. Assuming the settlement is approved by the PUC, it should be sufficient to help NI execute on its 7-9% EPS CAGR through 2024. PA is NI's second largest gas LDC and accounts for ~15% of the company's entire rate base. The other key rate case pending is in OH, where settlement discussions have been ongoing for a couple months now.

The Weekly Mark – A nuclear inflection point
Click here to view our complete note
The nuclear plant shutdown trend is effectively over for now
Last week's passage of SB846 in California extended the life of the 2.2 GW Diablo Canyon nuclear plant until at least 2030. The votes were near unanimous, as the state is clearly taking reliability risks seriously. This follows last month's passage of the IRA which enacted a nuclear PTC to stabilize economics of the U.S. fleet.

Midstream

LNG – EPA denies emissions waiver for LNG's turbines; not a surprise but won't impact operations or financials; late day selloff unwarranted

- Yesterday afternoon the EPA announced that it had denied Cheniere an emissions waiver for its gas turbines that run the liquefaction units at Sabine Pass and Corpus Christi
- This means that its turbines (along with that 200 others) will have to comply with the National Emissions Standards for Hazardous Air Pollutants (NESHAP) with an effective date of September 5
- In response Cheniere indicated that while it disagreed with the waiver denial and there may be some expenditures, compliance with the regulations will not have a material impact on financials or operations

The stock fell about 2.5% when the news hit the tape around 3:15 yesterday but we think the selloff is unwarranted - Cheniere had previously indicated that it didn't think the rules would materially impact operations. Importantly, the EPA reaffirmed the process from here - operational and emissions tests will continue to determine the course of action to meet the emissions standards. Once that is established Cheniere will then work with the EPA on an implementation plan, which the company believes will likely occur during routine maintenance outages over time. Particularly with the geopolitical situation, we do not think that it is in the administration's interests to do anything to restrict LNG gas supplies to

Europe, which is going into the heating season with effectively no Russian natural gas supply.

Industry Update — July 1, 2022

Utilities

UIPL: Week 25 Standings

Come for the Tables; Stay for the Punditry

Our Call

The UIPL had a strong week (S&P Utilities +3.4% vs. S&P 500 -0.3%) as the 10-year Treasury retreated and Chairman Powell flagged recession risk. Outside of macro, there was not a lot of action as the league wrapped up 1H and eases into the holiday weekend.

NI moved up 2 spots to #9 in Light. The company filed to delay hearings in the Columbia Gas of OH rate case (in focus, in light of a disappointing Staff rec) to 8/9 from 7/13 to allow more time for settlement discussions, which we generally view favorably.

POR got a boost to #21 in Power (from #22), helped by its addition to the S&P MidCap 400 index, though a subsequent competitor downgrade seemingly dampened the effect.

UIPL clubs continue to execute on **generation transition plans** with **AEE** announcing plans to acquire the 200 MW Huck Finn Solar project under a build-transfer agreement with EDF Renewables and **CNP** receiving approval to construct two gas CTs as part of the company's coal replacement plan. Both clubs moved up one spot this week and sit in the top half of the Power division.

Event names **SJI** (pending takeout) **and SWX** (strategic review) didn't participate in the action, as both just barely made it into the green.

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department ("WFS Research") personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company's common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company's common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company's common equity may perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

Utilities

UIPL: Week 29 Standings

Come for the Tables; Stay for the Punditry

Our Call

While we thought earnings and macro (Fed hikes rates 75 bps, GDP -0.9% in Q2) were going to rule the week, BBB rose from the ashes (again) under a new name, the Inflation Reduction Act. With Manchin on board, the legislation would seem to have a high likelihood of passage.

Most notably, in our view, is the inclusion of a **nuclear PTC**, which we think effectively puts a floor on power prices at ~$44/MWh beginning in 2024 and extending through 2032. Clearly positive for UIPL clubs **CEG (+19.3%),** which burst into the #3 spot in the Promotion Zone, & **PEG (+9.8%)**.

The package also extends and restores the **renewable PTC and ITC** and introduces an ITC for stand-alone storage. In 2025, the credits morph into a broader Clean Electricity Credit (can choose PTC or ITC), which extends until the later of 2032 or when the power sector emits 75% less carbon vs. '22 levels. This provides *significant visibility* to renewable developers and utilities.

On the renewable developer side, we highlight **NEE/NEP, BEP/BEPC, AGR, ØRSTED, AQN & ALE**. NEE (+7.2%) only moved up one spot to #25 in Power while NEP (+12.3%) had a nice 8 spot move to the middle of the pack at #15.

More broadly, the tax credits should help from an **affordability** standpoint, which bodes well for renewables in utility planning processes. Notable clubs with large renewable investment plans include **D, LNT, WEC, NI, CMS & XEL**.

In addition to nuclear, another new credit would be established for **hydrogen at $3/kg** (full credit for clean hydrogen). While it's early innings for the technology in the power/utility space, **NEE** seems to be leading the charge with other notable initiatives being advanced by **SRE & CEG**.

Transmission did not make the cut for ITC eligibility, but all was not lost as the **MISO approved $10.3B of Tranche 1 projects** this week. Notable participants in the early build-out include **AEE**, **FTS**, **XEL**, American Transmission Company (**WEC/LNT/ALE**), **ALE** & **NI** with Tranche 2 (additional upper MISO solutions) and Tranche 3 (MISO South), Tranche 4 (north-south links) still to come.

Investment Thesis, Valuation and Risks

Constellation Energy Corporation (CEG)

Investment Thesis

Our Overweight rating reflects our view that CEG is uniquely positioned to capitalize on the long-term trend towards decarbonization. CEG is the largest nuclear owner in the U.S with ~20% market share. We consider nuclear to be an important part of the nation's future power generation mix, as the country trends toward net zero carbon by 2050. We have also been encouraged by growing policy support, as evidenced by subsidy regimes in several states (IL, NJ and NY). We do not think CEG's share price adequately reflects the potential long-term value of the nuclear fleet.

Target Price Valuation for CEG: $72.00

Our $72/sh price target is based on a DCF analysis and results in a EV/EBITDA multiple of ~6x our 25E open EBITDA of ~$4.3B. The analysis assumes (a) the nuclear fleet operates through 2050, (b) annual FCFF post '25 of $2.25B, and (3) a WACC of 6.5%

Risks to Our Price Target and Rating for CEG

Key risks include a material deterioration in power prices, lack of government support for nuclear going forward, and poor capital allocation decisions.

Public Service Enterprise Group Incorporated (PEG)

Investment Thesis

We rate shares Overweight. We believe PEG shares offer investors an attractive risk/reward proposition. Key features include (1) a premier utility with well-above average rate base & EPS growth prospects, (2) a carbon-free nuclear generation fleet that generates significant FCF and (3) a strong balance sheet, in our view, which provides the company with financial flexibility.

Target Price Valuation for PEG: $75.00

Our $75/sh price target is based on a sum-of-the-parts analysis consisting of (1) $64/sh for PSE&G/Enterprise/Other (19x our 24E EPS of $3.37) and (2) ~$11/sh for PSEG Power based on an EV/EBITDA multiple of 6-7x our 25E open EBITDA of ~$1B (and supported by a DCF analysis). The P/E multiple of 19x is in line with the '22 median multiple for a basket of high-quality utilities (AEE, CMS, ES, LNT, WEC & XEL) that we think are most comparable to PSE&G.

Risks to Our Price Target and Rating for PEG

Risks to our valuation include earnings sensitivity to commodity prices, operational risks, unfavorable regulatory/political developments particularly as it relates to PEG's nuclear fleet.

Important Disclosure for U.S. Clients

This report was prepared by Wells Fargo Securities Global Research Department (“WFS Research”) personnel associated with Wells Fargo Securities, LLC ("Wells Fargo Securities").

WFS Research may, from time to time, provide clients with short-term trading views in its research reports regarding subject companies on which Wells Fargo Securities currently has equity research coverage. A short-term trading view offers a view on how the market price of a subject company’s common equity may trend in absolute terms during the 30 days following the date of the short-term trading view. A short-term trading view on a subject company’s common equity does not impact our fundamental investment rating or price target for that company, which reflect our view of how the subject company’s common equity may

This document is for mweisenburger@nisource.com and should not be distributed further.

perform over a one-year period. A short-term trading view may reach a different conclusion than the firm's fundamental investment rating and price target for a subject company and, therefore, short-term trading views could result in short-term price movements that are contrary to our fundamental investment rating and price target. Short-term trading views are not ratings and the firm does not intend, nor undertakes any obligation, to maintain, update or close out short-term trading views. Short-term trading views may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any short-term trading views discussed in WFS Research reports.

Important Disclosure for International Clients

United Kingdom – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the United Kingdom, this report is distributed by Wells Fargo Securities International Limited ("WFSIL"). WFSIL is a UK incorporated investment firm authorised and regulated by the Financial Conduct Authority. For the purposes of Section 21 of the UK Financial Services and Markets Act 2000 (the "Act"), the content of this report has been approved by WFSIL, an authorised person under the Act. WFSIL does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). The FCA rules made under the Financial Services and Markets Act 2000 for the protection of retail clients will therefore not apply, nor will the Financial Services Compensation Scheme be available. This report is not intended for, and should not be relied upon by, retail clients.

EEA – The securities and related financial instruments described herein may not be eligible for sale in all jurisdictions or to certain categories of investors. For recipients in the EEA, this report is distributed by WFSIL or Wells Fargo Securities Europe S.A. ("WFSE"). WFSE is a French incorporated investment firm authorized and regulated by the Autorité de contrôle prudentiel et de résolution and the Autorité des marchés financiers. WFSE does not deal with retail clients as defined in the Directive 2014/65/EU ("MiFID2"). This report is not intended for, and should not be relied upon by, retail clients.

Australia – Wells Fargo Securities, LLC and Wells Fargo Securities International Limited are exempt from the requirements to hold an Australian financial services license in respect of the financial services they provide to wholesale clients in Australia. Wells Fargo Securities, LLC is regulated under the laws of the United States and Wells Fargo Securities International Limited is regulated under laws of the United Kingdom. All such laws differ from Australian laws. Any offer or documentation provided to Australian recipients by Wells Fargo Securities, LLC or Wells Fargo Securities International Limited in the course of providing the financial services will be prepared in accordance with the laws of the United States or United Kingdom and not Australian laws.

Canada – This report is distributed in Canada by Wells Fargo Securities Canada, Ltd., a registered investment dealer in Canada and member of the Investment Industry Regulatory Organization of Canada (IIROC) and Canadian Investor Protection Fund (CIPF). Wells Fargo Securities, LLC's research analysts may participate in company events such as site visits but are generally prohibited from accepting payment or reimbursement by the subject companies for associated expenses unless pre-authorized by members of Research Management.

China – Strictly Private and Confidential. For the sole use of the recipient only. Not to be copied or redistributed within the People's Republic of China.

Brazil - This report was not created for distribution to investors resident in Brazil or to the Brazilian public in general. Wells Fargo Securities, LLC is a broker-dealer registered in United States of America with and regulated by the U.S. Securities and Exchange Commission. Wells Fargo Securities, LLC is not registered in Brazil and its products, including this report and the securities mentioned in this report, have not been and will not be publicly issued, placed, distributed, offered or negotiated in the Brazilian capital markets, and, as a result, have not been and will not be registered with the Brazilian Securities Commission (Comissão de Valores Mobiliários, the CVM). The offer of Wells Fargo Securities, LLC's products, including this report and any securities mentioned in this report, is intended only for residents in the countries in which Wells Fargo Securities, LLC is authorized to operate.

About Wells Fargo Securities

THE FLEISHMAN DAILY 8/17/22
ERCOT/NI, PCG, PAA, NOVA, BE, STEM, FLNC

The Fleishman Daily 8/17/22
Utilities: ERCOT/NI, PCG
Midstream: PAA
Clean Energy: NOVA, BE, STEM, FLNC

Utilities

ERCOT/NI – Pablo Vegas leaving NI for ERCOT CEO position
PCG – Undergrounding bill amendments detailed, could get Assembly floor vote by 8/31

Midstream

PAA – Exploring 50 mbd frac capacity expansion at Fort Saskatchewan

Clean Energy

NOVA – Announces pricing of upsized convert offering, $500M at 2.625%
BE – Bloom prices equity offering at $26; including SK options, $650M total equity raised for future optionality

STEM – More insider stock sales; Angeleno Group sells 100K shares, CTO sells 60K
FLNC – New boss, lots of work to do

Wolfe Utility & Midstream Materials: Utility Comps, Utility Stock Charts, Midstream Comps, Midstream Stock Chart Comps, Valuation Charts, Models

Utilities

ERCOT/NI – Pablo Vegas leaving NI for ERCOT CEO position

- Yesterday, it was announced that NI's EVP and Group President, Pablo Vegas, would become the CEO of ERCO October 1
- Pablo had been working at NI and before that AEP within the utilities sector
- He will replace interim CEO of ERCOT, Brad Jones, who had been serving in that position since Spring 2021 whe Magness was fired in the Winter Storm Uri fallout

New leadership for ERCOT, as it looks to avoid any future instances similar to Uri. A big and challenging opportunity for reliability issues and political microscope at ERCOT, but not surprising after the management shifts at NI earlier this yea

PCG – Undergrounding bill amendments detailed, could get Assembly floor vote by 8/31

- Earlier this week, the latest amendments to an undergrounding bill were posted online, and the bill is on the CA reading file, meaning it could receive a floor vote before the legislative session ends 8/31.
- The amendments to SB 884 require large electric utilities to:
    - submit 10-year undergrounding plans that include projects located in tier 2 and tier 3 high fire risk distric
    - apply for available federal, state and other non-ratepayer moneys throughout the duration of the underg and use those moneys to reduce costs to ratepayers; the amendment removed language that would have recovery from ratepayers unless all non-ratepayer moneys were fully exhausted.
- The amendments also removed provisions that would have imposed new duties on local agencies.
- PCG previously submitted annual undergrounding miles through 2032 in its WMP, with 3,575 miles by 2026, fo miles/yr 2027-31 and 355 miles in 2032. PCG sees cost declining from the $4.2M/mile originally filed for 2022- 2022 and $2.5M by 2026.

We think the undergrounding legislation would de-risk PCG's plan and would be positive for the stock.

Midstream

PAA – Exploring 50 mbd frac capacity expansion at Fort Saskatchewan

- Plains Canada announced yesterday that they are exploring a 50 mbd expansion of C3+ fractionation capacity a Saskatchewan
- PAA currently fracs about 50-55 mbd at Fort Saskatchewan and 135 mbd across the Canadian business

This could be an interesting opportunity as management has highlighted the potential to grow the lucrative NGL busine adding 50 mbd of frac capacity would be meaningful. We'd be interested in how much of the purity NGL products from capacity would be sold under contracts versus exposed to short-term frac spreads.

Clean Energy

NOVA – Announces pricing of upsized convert offering, $500M at 2.625%

- Yesterday, NOVA announced the pricing of a $500M convertible senior note offering at 2.625%; NOVA also gra option to purchase an additional $100M of principal
  - The notes mature on Feb 15th, 2028, unless earlier converted/redeemed/repurchased
  - NOVA may redeem the notes after 8/20/25 if the common stock is at least 130% of the conversion price trading days during a consecutive 30-day period
- The initial conversion rate will be 29.2039 shares per $1K of principal (equivalent to an initial conversion price o $34.24/sh)
- NOVA expects net proceeds of $487.1M or $584.6 with the greenshoe; $40.4M will be used to pay to cost of a remainder will be used for general purposes
- The capped call will be subject to a cap initially equal to $46.10/sh

As we said yesterday, the timing/form of capital was a bit of a surprise and NOVA finished down over 11% on the news upsizing and assuming the greenshoe is allotted, NOVA will have net proceeds well in excess of the $300M of corporat intended to raise in early 2023. This should provide a nice buffer to help capitalize on accelerated growth opportunities

BE – Bloom prices equity offering at $26; including SK options, $650M total equity raised for future optionality

- Last night Bloom announced that it had priced its 13M share offering at $26 per share
- There remains a greenshoe of up to 1.95M shares
- The offering was 3% below yesterday's closing price and about 14% below Monday's close (pre offering annou

- On top of the $310M raised via SK ecoplant's option exercise this means total equity raised of about $650M plus from the shoe

We noted yesterday that the equity raise was unexpected particualrly so soon after the $310M raised from SK. The stoc yesterday – down 11% - highlighted the surprise from the market as well. Note that NOVA was down a similar amount issuance announced at that same time. That said, Bloom capitalized on the recent share price strength and momentum f Reduction Act to secure some optionality on future growth opportunities.

STEM – More insider stock sales; Angeleno Group sells 100K shares, CTO sells 60K

- Yesterday, two Form 4s were filed showing more insider stock sales at STEM
- Anil Tammineedi (Board Member) sold 100K shares ~$1.6M; the shares are beneficially owned by the Angeleno investor in STEM; Angeleno Group still owns 4.639M shares
    - Recall, last week the Angeleno Group filed a Form 144 to register 500K shares, indicating sales were for
- Larsh Johnson (Chief Technology Officer) then sold 60K shares for proceeds of ~$950K; Mr. Johnson still owns 1 directly and 41.6K shares indirectly

This follows several insider sales last week and is likely a function of capitalizing on the recent stock run up post IRA announcement/passage.

FLNC – New boss, lots of work to do

Click here to view our complete note

Q3 in-line, 2022 reaffirmed; backlog down on soft order intake. On 8/16, FLNC reported FQ3 revenue of $239M in-lin $229M. Gross margins saw QoQ improvement coming in at -2.1% vs -4.3%; adj GM was positive at 0.7% vs -3.3% in Q guidance of ~$1.1B was reaffirmed. Financial results were in-line, but orders across all three segments were weaker tha and backlog actually fell to $2.1B from $2.2B. The attach rate for service contracts was notably weak (26% in Q3). But 2022 being unusual from a seasonality perspective for orders and said that Q1 and Q2 were better than typical. There is be a catch up for service contracts in the coming quarters.

Utilities

NI – Files Indiana electric rate case; requesting $291.7M rate increase and 10.4% ROE
DTE – MI ALJ recommends $146M electric rate increase, 9.90% ROE, $20.5B rate base
OGE – APSC denies FRP extension upon capital structure re-hearing; poor datapoint for AR regulation
The Weekly Mark – Pretty in pink – nukes and hydrogen

Midstream

Oil – DOE announces SPR withdrawals to continue into November, but total amount appears unchanged

Clean Energy

Hydrogen – Seven Midwestern states announce hydrogen initiative; would build off existing

hydrogen/ammonia infrastructure
STEM – Announces partnership with InCharge, will offer complete solution for fleet charging

Wolfe Utility & Midstream Materials: Utility Comps, Utility Stock Charts, Midstream Comps, Midstream Stock Charts, Clean Energy Comps, Valuation Charts, Models

Utilities

NI – Files Indiana electric rate case; requesting $291.7M rate increase and 10.4% ROE

- Yesterday, NI filed a NIPSCO electric rate case requesting a $291.7M rate increase – a 19.09% increase vs present base rates
- The rate increase is premised on a 10.4% ROE; equity ratio and rate base requests aren't clear as witness testimony has yet to be filed in the docket
    - NIPSCO electric is currently allowed 9.75% ROE and 47.9% equity ratio
- It is proposed that the increase be phased in over two steps – first effective 9/1/23 (based on rate base as of 6/30/23) and the second effective 3/1/24 (based on rate base as of 12/31/23)
- NIPSCO is seeking a new semi-annual tracking mechanism to recover variable non-labor expenses associated with its coal-fired generation assets
    - Approval of this tracker would result in a separate rate increase in July 2024
- NIPSCO is also seeking the authority to implement a pension/OPEB balancing account to defer future differences between the actual amounts vs what is included in the revenue requirement in this case

This will be a big focus given the amount of renewable investment that is sought to be recovered in the case by the company. A timely and constructive outcome is a key piece of NI meeting its 7-9% EPS CAGR through 2024. All the renewable projects have approved CPCNs, so the cost/recovery of those investments shouldn't be too controversial. Though, it is possible there need to be updates to the costs given supply chain challenges and related inflationary impacts. Aside for the normal items, NIPSCO is also requesting a new tracker for variable non-labor coal costs as well as a deferral mechanism for pension/OPEB. The latter is particularly notable given the focus on pension costs across the sector due to the weak market performance YTD.

DTE – MI ALJ recommends $146M electric rate increase, 9.90% ROE, $20.5B rate base

- Yesterday, Michigan PSC ALJ filed testimony in DTE's electric rate case – recommending a $146M rate increase, 9.90% allowed ROE, and $20.5B rate base
- DTE originally requested – $388M (7.5%) rate increase, 10.25% allowed ROE, and $21.27B rate base
- Michigan PSC Staff previously filed – recommending a $143M rate increase, 9.60% allowed ROE, and $20.6B rate base
- DTE electric is currently allowed a 9.90% allowed ROE (50% equity) and its last approved rate increase and rate base were $188M ($351M original request) and $17.89B respectively

DTE gas was recently approved for a 9.90% allowed ROE (51% equity ratio)

- Rates are expected to go into effect in November 2022 and would be the first rate increase in 2.5 years

The ALJ recommendation seems relatively balanced, especially on ROE. As a reminder, DTE's electric business has been in a voluntary stayout keeping rates flat for ~2.5 years. DTE's most recent gas rate case outcome was balanced and we viewed the less constructive CMS electric case outcome in late-2021 as more on an anomaly, than broader concern with respect to Michigan regulation.

OGE – APSC denies FRP extension upon capital structure re-hearing; poor datapoint for AR regulation

- Yesterday, the APSC rejected OG&E's application for extension of its FRP Rider due to the limitations of the FRRA legislation.
- Recall, on 5/18, the APSC approved the extension of OG&E's FRP in AR for 5 years stipulating an unchanged 9.5% ROE, reduction in equity layer to 45% from 50%, and use of year-end rate base.
    - On 6/17, OG&E filed a petition for re-hearing, contending that the revision in its capital structure is not allowed under the FRRA since it is a "material change".
- Based on additional evidence, the APSC found that without a material change in OG&E's capital structure, adjusting the ROE within the statutorily-allowed limits (9.5% +/- 10bps) will not result in just and reasonable rates.
    - This would also violate the Commission's precedent that the ROE and the capital structure should be set in a congruent manner.

OGE believes that it has 2 filings remaining under its current FRP for historical test years Apr. 2021 – Mar. 2022 and Apr. 2022 – Mar. 2023, which would provide rate relief in AR in 2023 and 2024. Given the APSC's denial of its FRP extension, OG&E would have to file a rate case in AR in the next couple of years, where the company may elect to pursue another FRP. Alternatively, OG&E may choose to seek recovery through traditional rate cases given potential generation investments stemming from its pending RFPs. While AR is ~8% of OG&E's rate base, this datapoint reads negatively for regulation in the state, where equity ratios appear to be trending downwards. For reference, ETR AR is authorized 47% equity ratio (excluding $1.7B ADIT) and APSC Staff recently recommended 45% equity ratio in Black Hills' (not covered) ongoing rate case.

The Weekly Mark – Pretty in pink – nukes and hydrogen

Click here to view our complete note

The future of hydrogen from nuclear power looks promising

Hydrogen made using nuclear power, aka "pink hydrogen", is in the very early innings but appears promising. Like that used for green hydrogen, nuclear power is carbon free. The 2021 infrastructure bill requires at least one of the 6-10 DOE-funded hydrogen hubs to be pink hydrogen. There are also about 55 nuclear plants (92 units) in over half the states in the country, representing ~95 GW of capacity and ~780 TWh generation (~20% of total US generation). Pink hydrogen will likely begin around merchant nukes, over a dozen plants. CEG

is the largest nonutility nuclear owner, with 21 GW of nuclear capacity and a little over 170 TWh of annual nuclear generation. Over half of that is in IL, ~30% in MD/NJ/PA and ~15% in NY. Other owners of merchant nuclear have much less capacity/generation; they are Energy Harbor, PEG, Talen Energy, NRG, VST, D and NEE.

Midstream

Oil – DOE announces SPR withdrawals to continue into November, but total amount appears unchanged

- Reuters reported yesterday that the DOE will sell 10M bbls of oil in November, which is an extension from the initial plan to release 1M bpd over a six month period through October
- However, the total withdrawal of 180M bbls over the period appears unchanged

There's some pressure on the administration to continue SPR withdrawals into the November election and ahead of the implementation of the European ban of Russian crude in December. However, this announcement appears to only be a timing shift, which one could argue may be a bullish that the administration isn't taking more aggressive action (yet).

Clean Energy

Hydrogen – Seven Midwestern states announce hydrogen initiative; would build off existing hydrogen/ammonia infrastructure

- Yesterday governors of Illinois, Indiana, Kentucky, Michigan, Minnesota, Ohio and Wisconsin announced a MOU to partner on hydrogen, named the "M-H2 Coalition"
- The MOU cites the region's existing hydrogen and in particular ammonia infrastructure as well as large industrial and agricultural demand base coupled with significant wind resource
- The participants will evaluate the possibility of filing for one or more DOE-funded hydrogen hub grants

This is one of the largest post-IRA hydrogen initiative announcements that we're aware of. Clearly this MOU is very high level and will likely take years to fully develop. However it does underscore that the hydrogen incentives in the IRA as well as the 2021 infrastructure legislation are spurring deeper looks into hydrogen, a good sign. The Midwest continues to be a very logical region for broad hydrogen infrastructure: significant zero carbon energy resource with wind and nuclear, developed transportation networks and demand from industry and agriculture. There have been more localized hub proposals in the region, such as the Great Lakes Clean Hydrogen Coalition announced by Energy Harbor last week, so it will be interesting to see what specific hubs will be applying for the DOE grants this fall.

STEM – Announces partnership with InCharge, will offer complete solution for fleet charging

- This morning, STEM announced a partnership with InCharge – a company that

develops hardware, software and services designed/engineered specifically for commercial EV fleets
- Together, the companies will utilize STEM's Athena platform and InCharge's In-Control platform to develop a powerful software suite for commercial charging projects

We expect to learn more about this partnership at STEM's Analyst Day next week. STEM has previously talked to its fleet electrification offering in the context of a multi-billion-dollar TAM opportunity. Success in this market would also enhance margins at an even faster rate given that the EV offering collects 2x the revenue vs traditional battery software contracts.

UTILITIES & POWER

Regulateds – Market Overweight
IPPs – Market Weight

July 4, 2022

THE UTILITY TRADER

The best of times in the worst of markets

- **Utilities significantly outperform amidst worst first half for market since 1970**
  June's Analyst Day mania was a bust except for NEE, but utilities nonetheless extended their outperformance as the market took another leg down. The S&P 500 had its worst first half performance since 1970 falling over 20% while Utilities ended the first half down only 2%. Defensive sectors were long forgotten in the 2019-2021 bull market, but they are all outperforming this year with utilities just middle of the pack. Telecom and Pharma are actually up YTD (see Ex. 1) while Staples are down a little more than utilities as they have seen more inflationary pressures.

- **It's rare that utilities outperform in rising rate environments, presaging a recession?**
  On a relative basis, this has been a historic run for utilities following historic underperformance in 2019-2021. Utilities 1800bp outperformance in the first half is the second best in the last 40 years (2016 was just a touch better, see here). More interesting is that utilities have outperformed in a rising rate and inflationary environment. This only happened once before - in 1981 utilities beat the market despite rates rising over 100bps in the first half (see here). This presaged the 1982 recession and it's hard to not see the similarities to this time.

- **Utilities now at premiums, but where will market earnings and multiples settle out?**
  Utilities are now back toward the high end of their historic valuation ranges on a relative P/E and relative yield basis (link here). This makes us less constructive on the surface, but market earnings have not come down much yet and we think could see a reset lower this earnings season. Other than a few pension-exposed names, utility earnings are likely to hold up and we have seen several companies raising numbers and/or growth rates this year (NEE has done it twice). Thus, we think relative valuations are cheaper than they appear on the surface. Utilities have less economic and currency sensitivity than other sectors. Their big risk has been high fuel prices. These get passed through to customers but put pressure on the political/regulatory environment. Thus, the recent gas price pullback on the Freeport outage has been a relief.

- **What's worked in 1H? Energy plays, large regulateds, high quality and LDC exposure**
  Energy exposed names have led performance namely CEG and SRE. All the large regulateds are performing well – EXC, SO, DUK, D, AEP and ED. The latter two also benefitting from asset sales and EPS CAGR guide-ups. High-quality names are also outperforming – XEL, CMS, and WEC. Gas LDC exposed names such as NI and CNP are doing well. Finally, our DUTY portfolio of last year's worst performers is outperforming the UTY slightly (1.4%) led by SRE, XEL, and PNW.

- **What's not worked in 1H? Growth, solar, offshore wind, CA utes, pension risk**
  The QQQ of utilities – AWK and NEE – are still the worst performers this year given the market weakness. Solar names have not fully recovered yet from AD/CVD – NEE, AES, NEP. Offshore wind risk has hurt ES and AGR despite ES planned sale. CA utilities are again underperforming into fire season led by PCG. Those most at risk to pension hits have also been weak – FE, PEG.

WOLFE RESEARCH

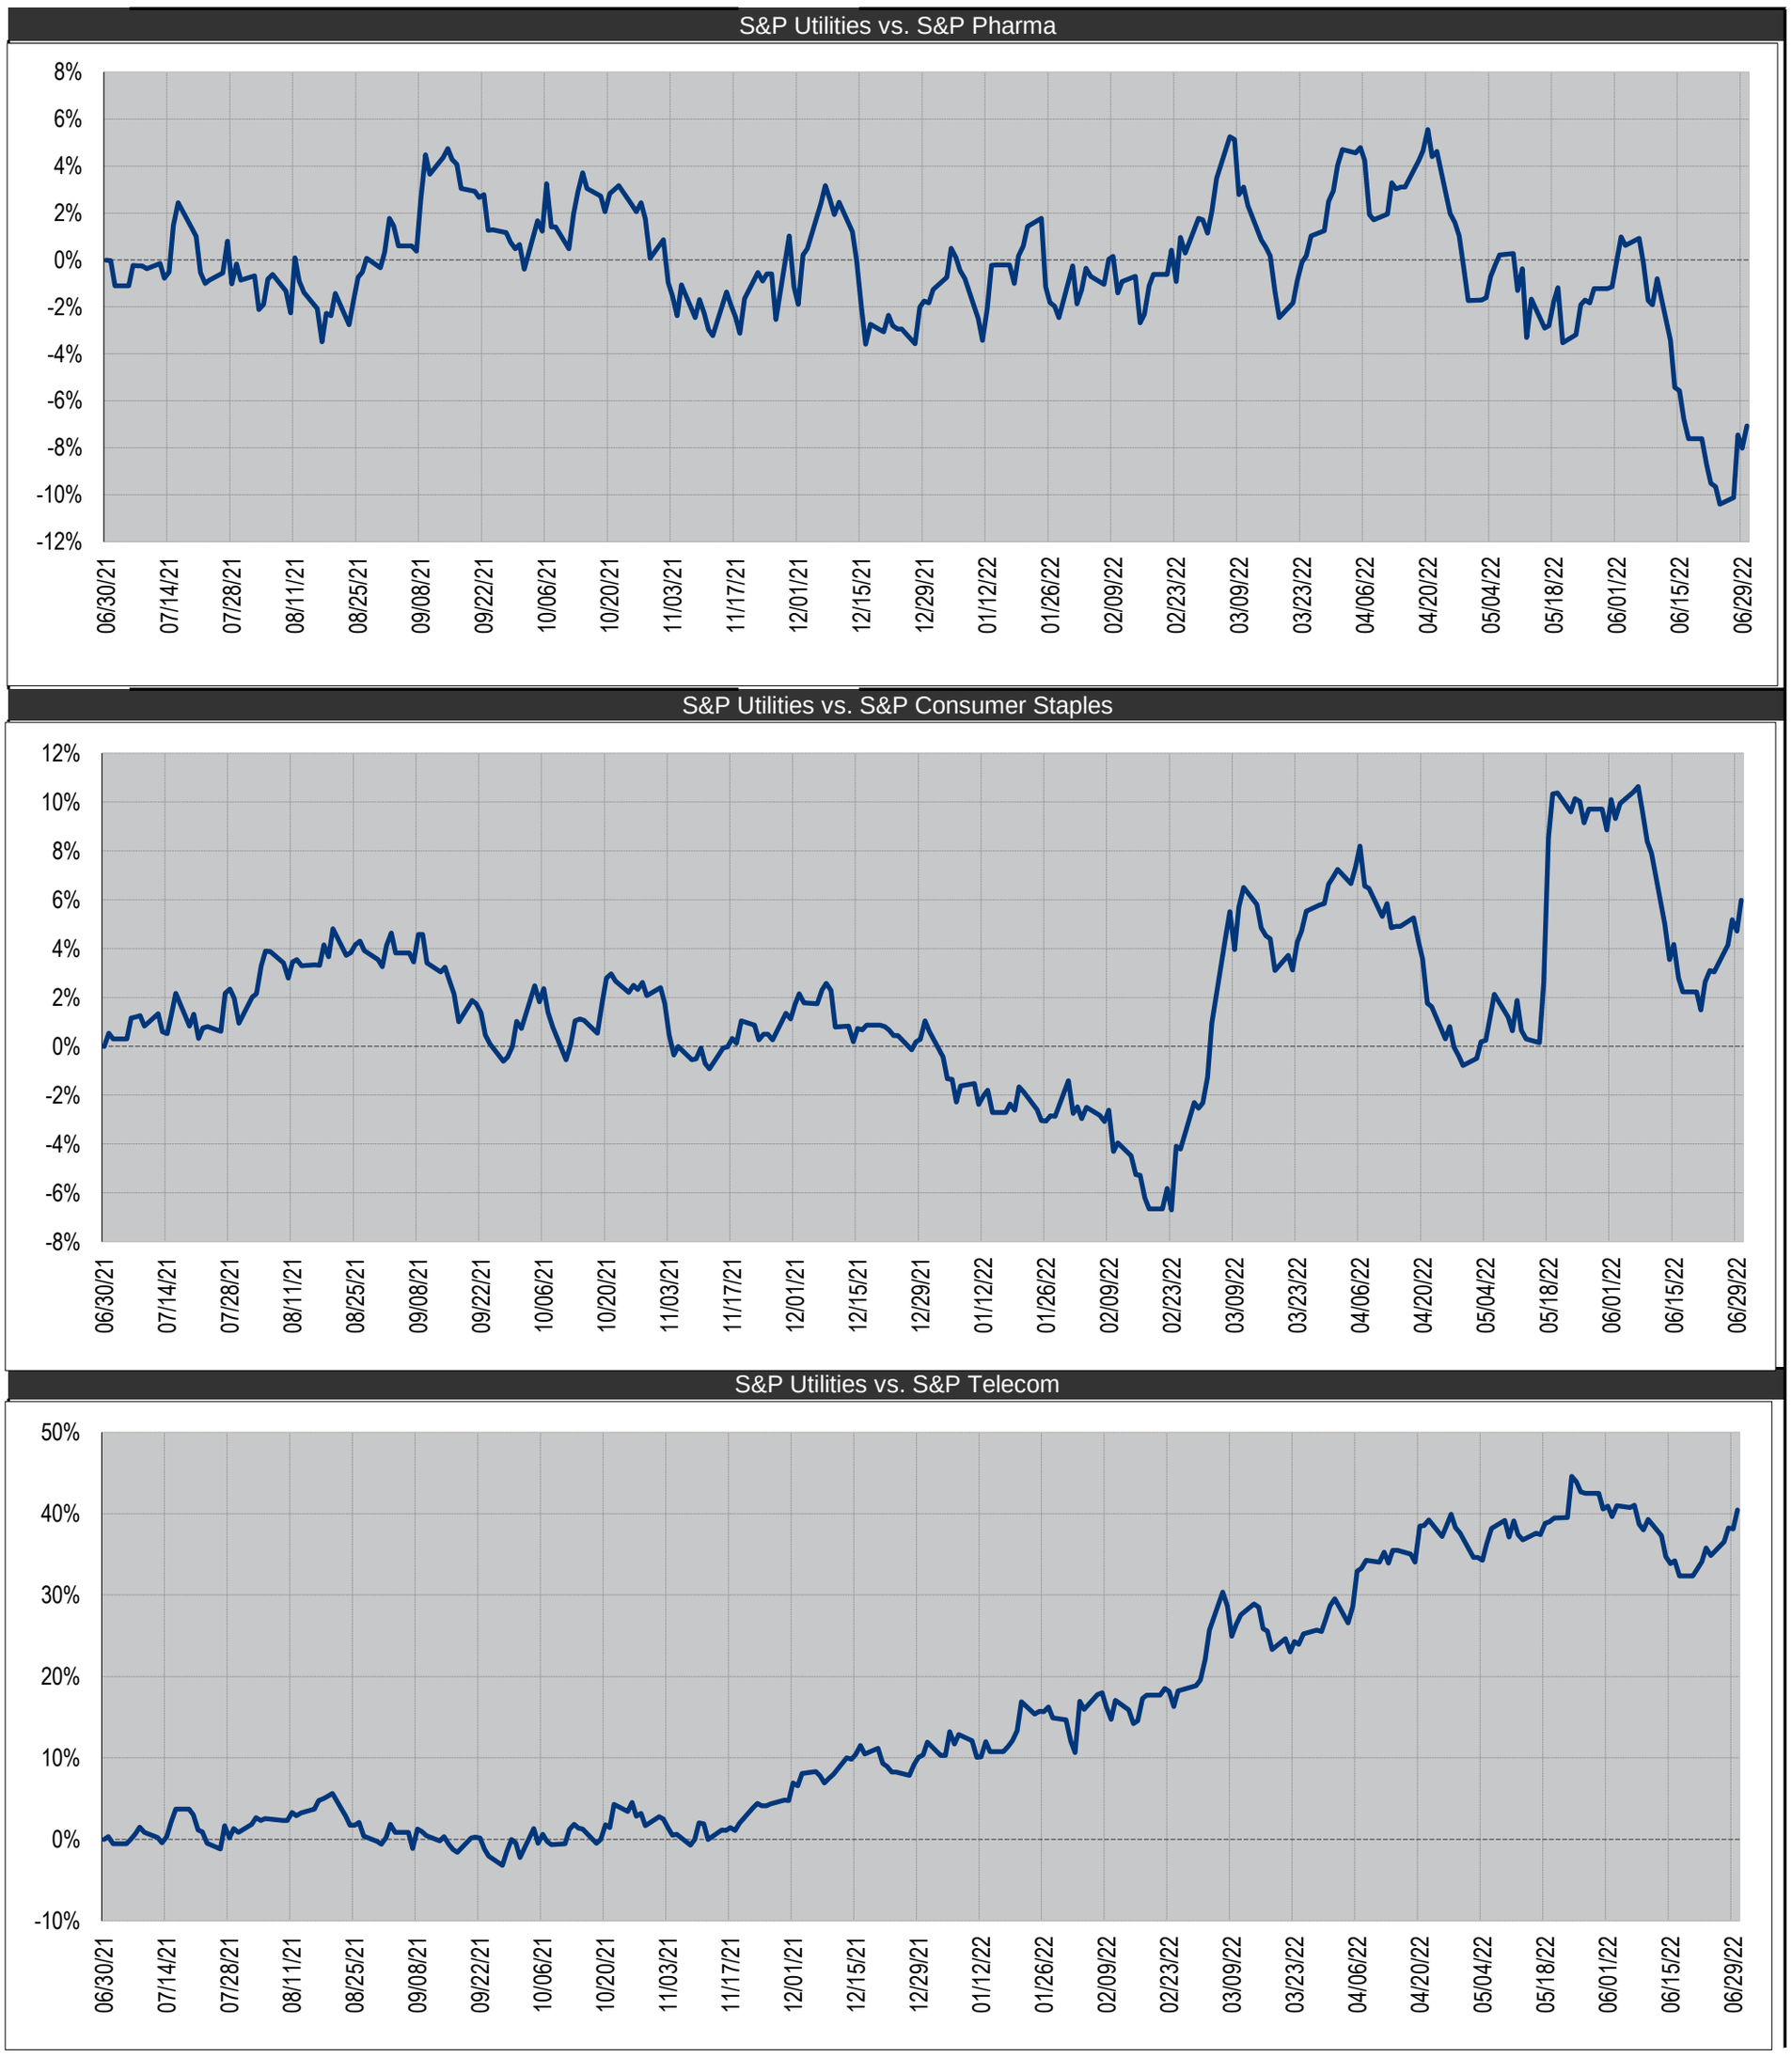
S&P Utility Index vs Market

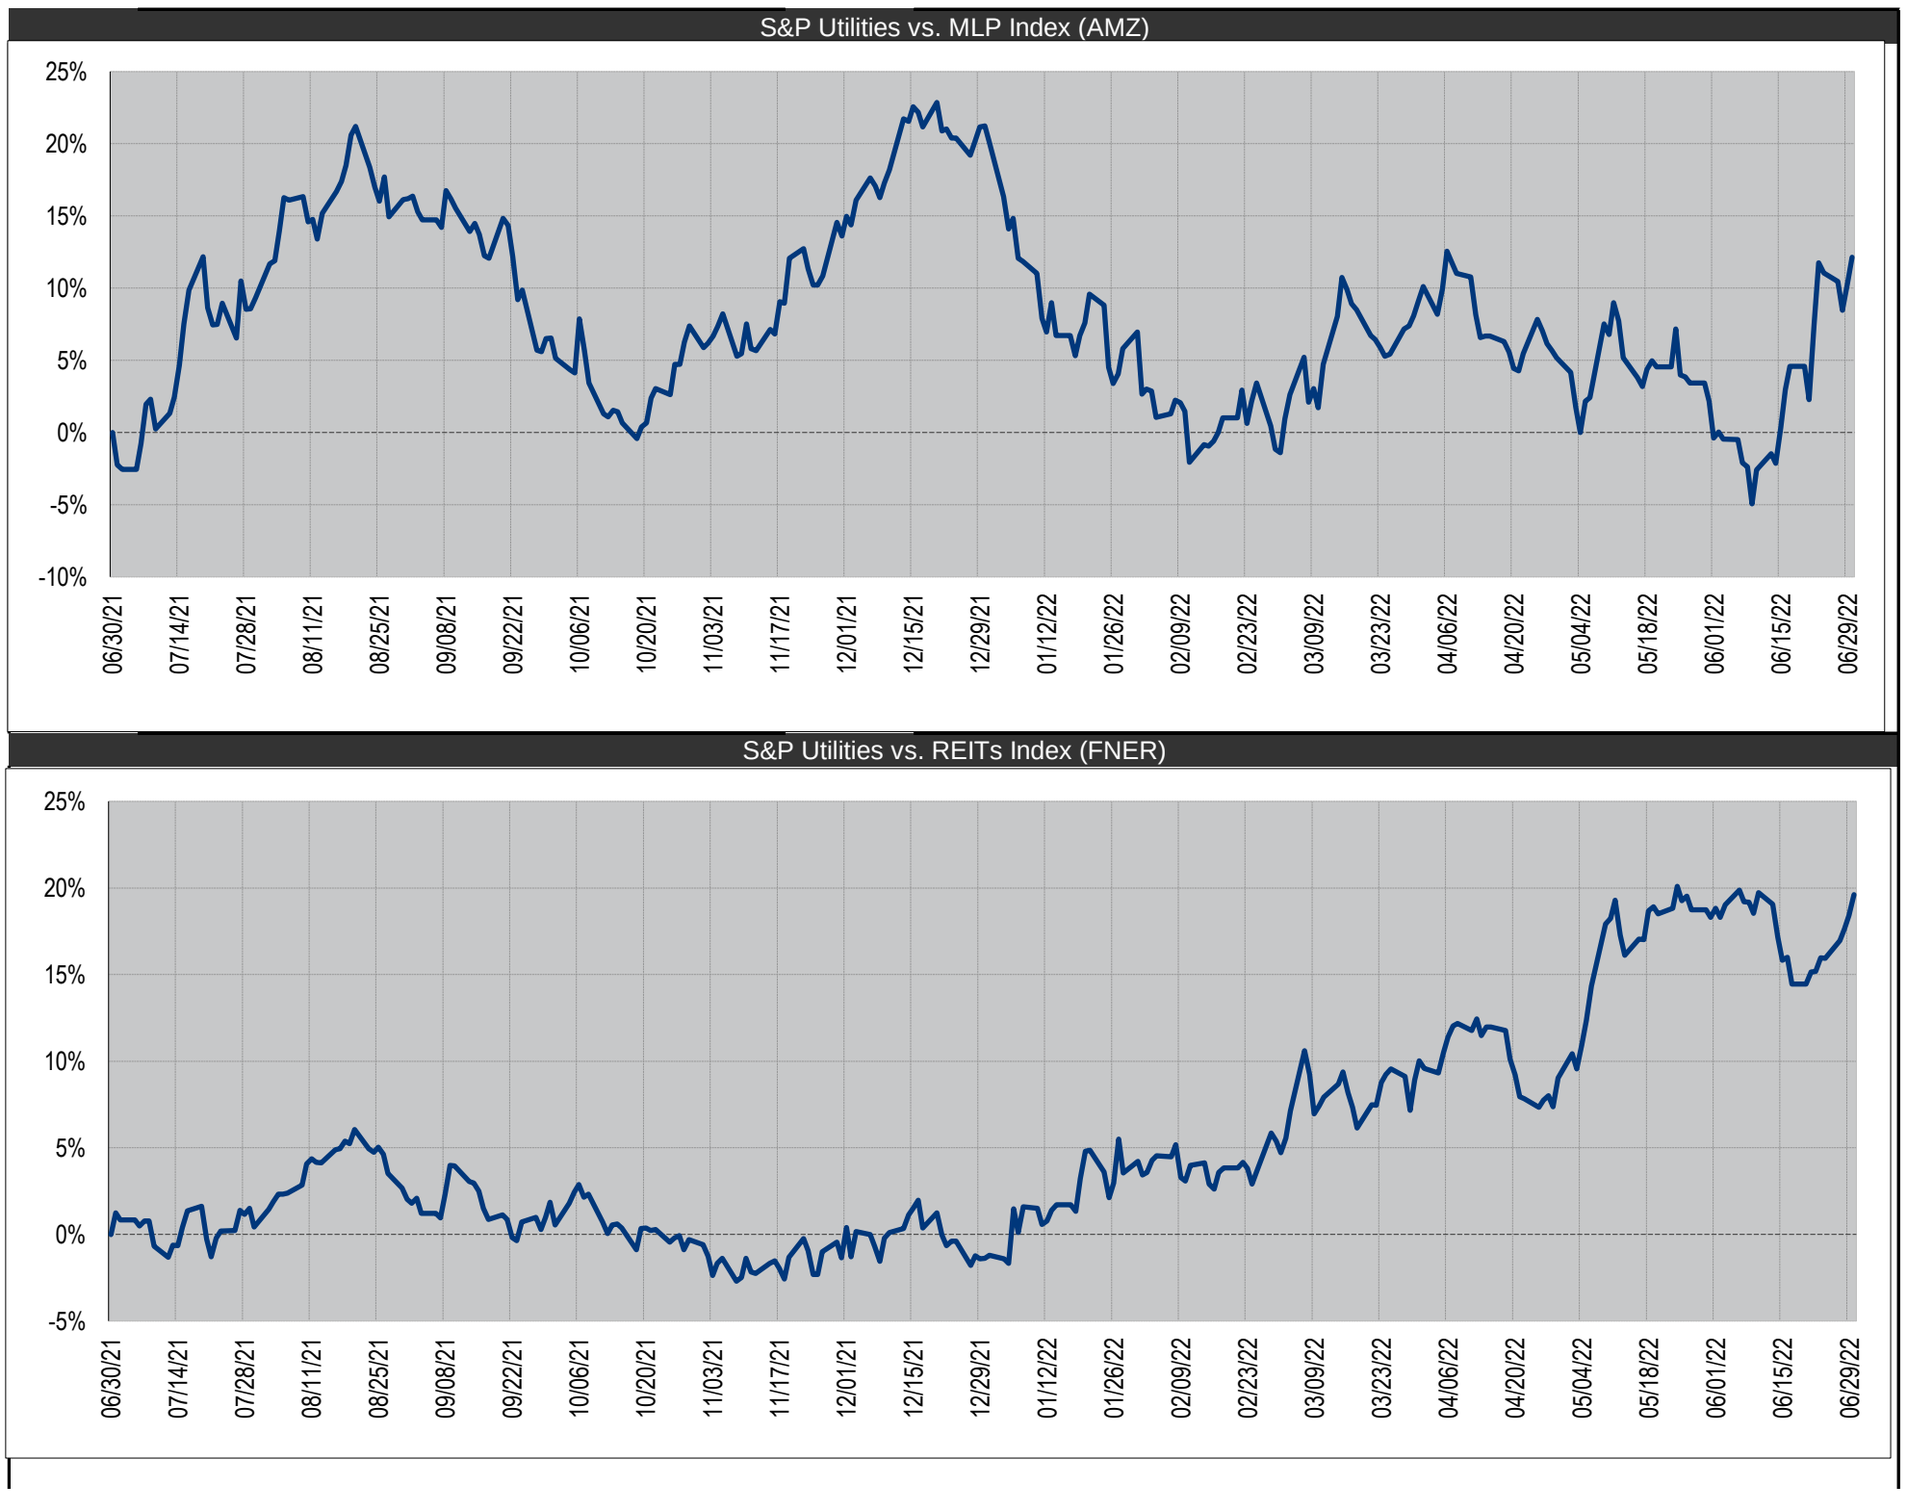


Utilities outperformed the S&P 500 by ~330bps in June and now lead the market by ~1,860bps as investors continued to flock to defensive sectors in an effort to safeguard against runaway inflation and other macroeconomic headwinds.

WOLFE RESEARCH

Utilities vs Other Sectors

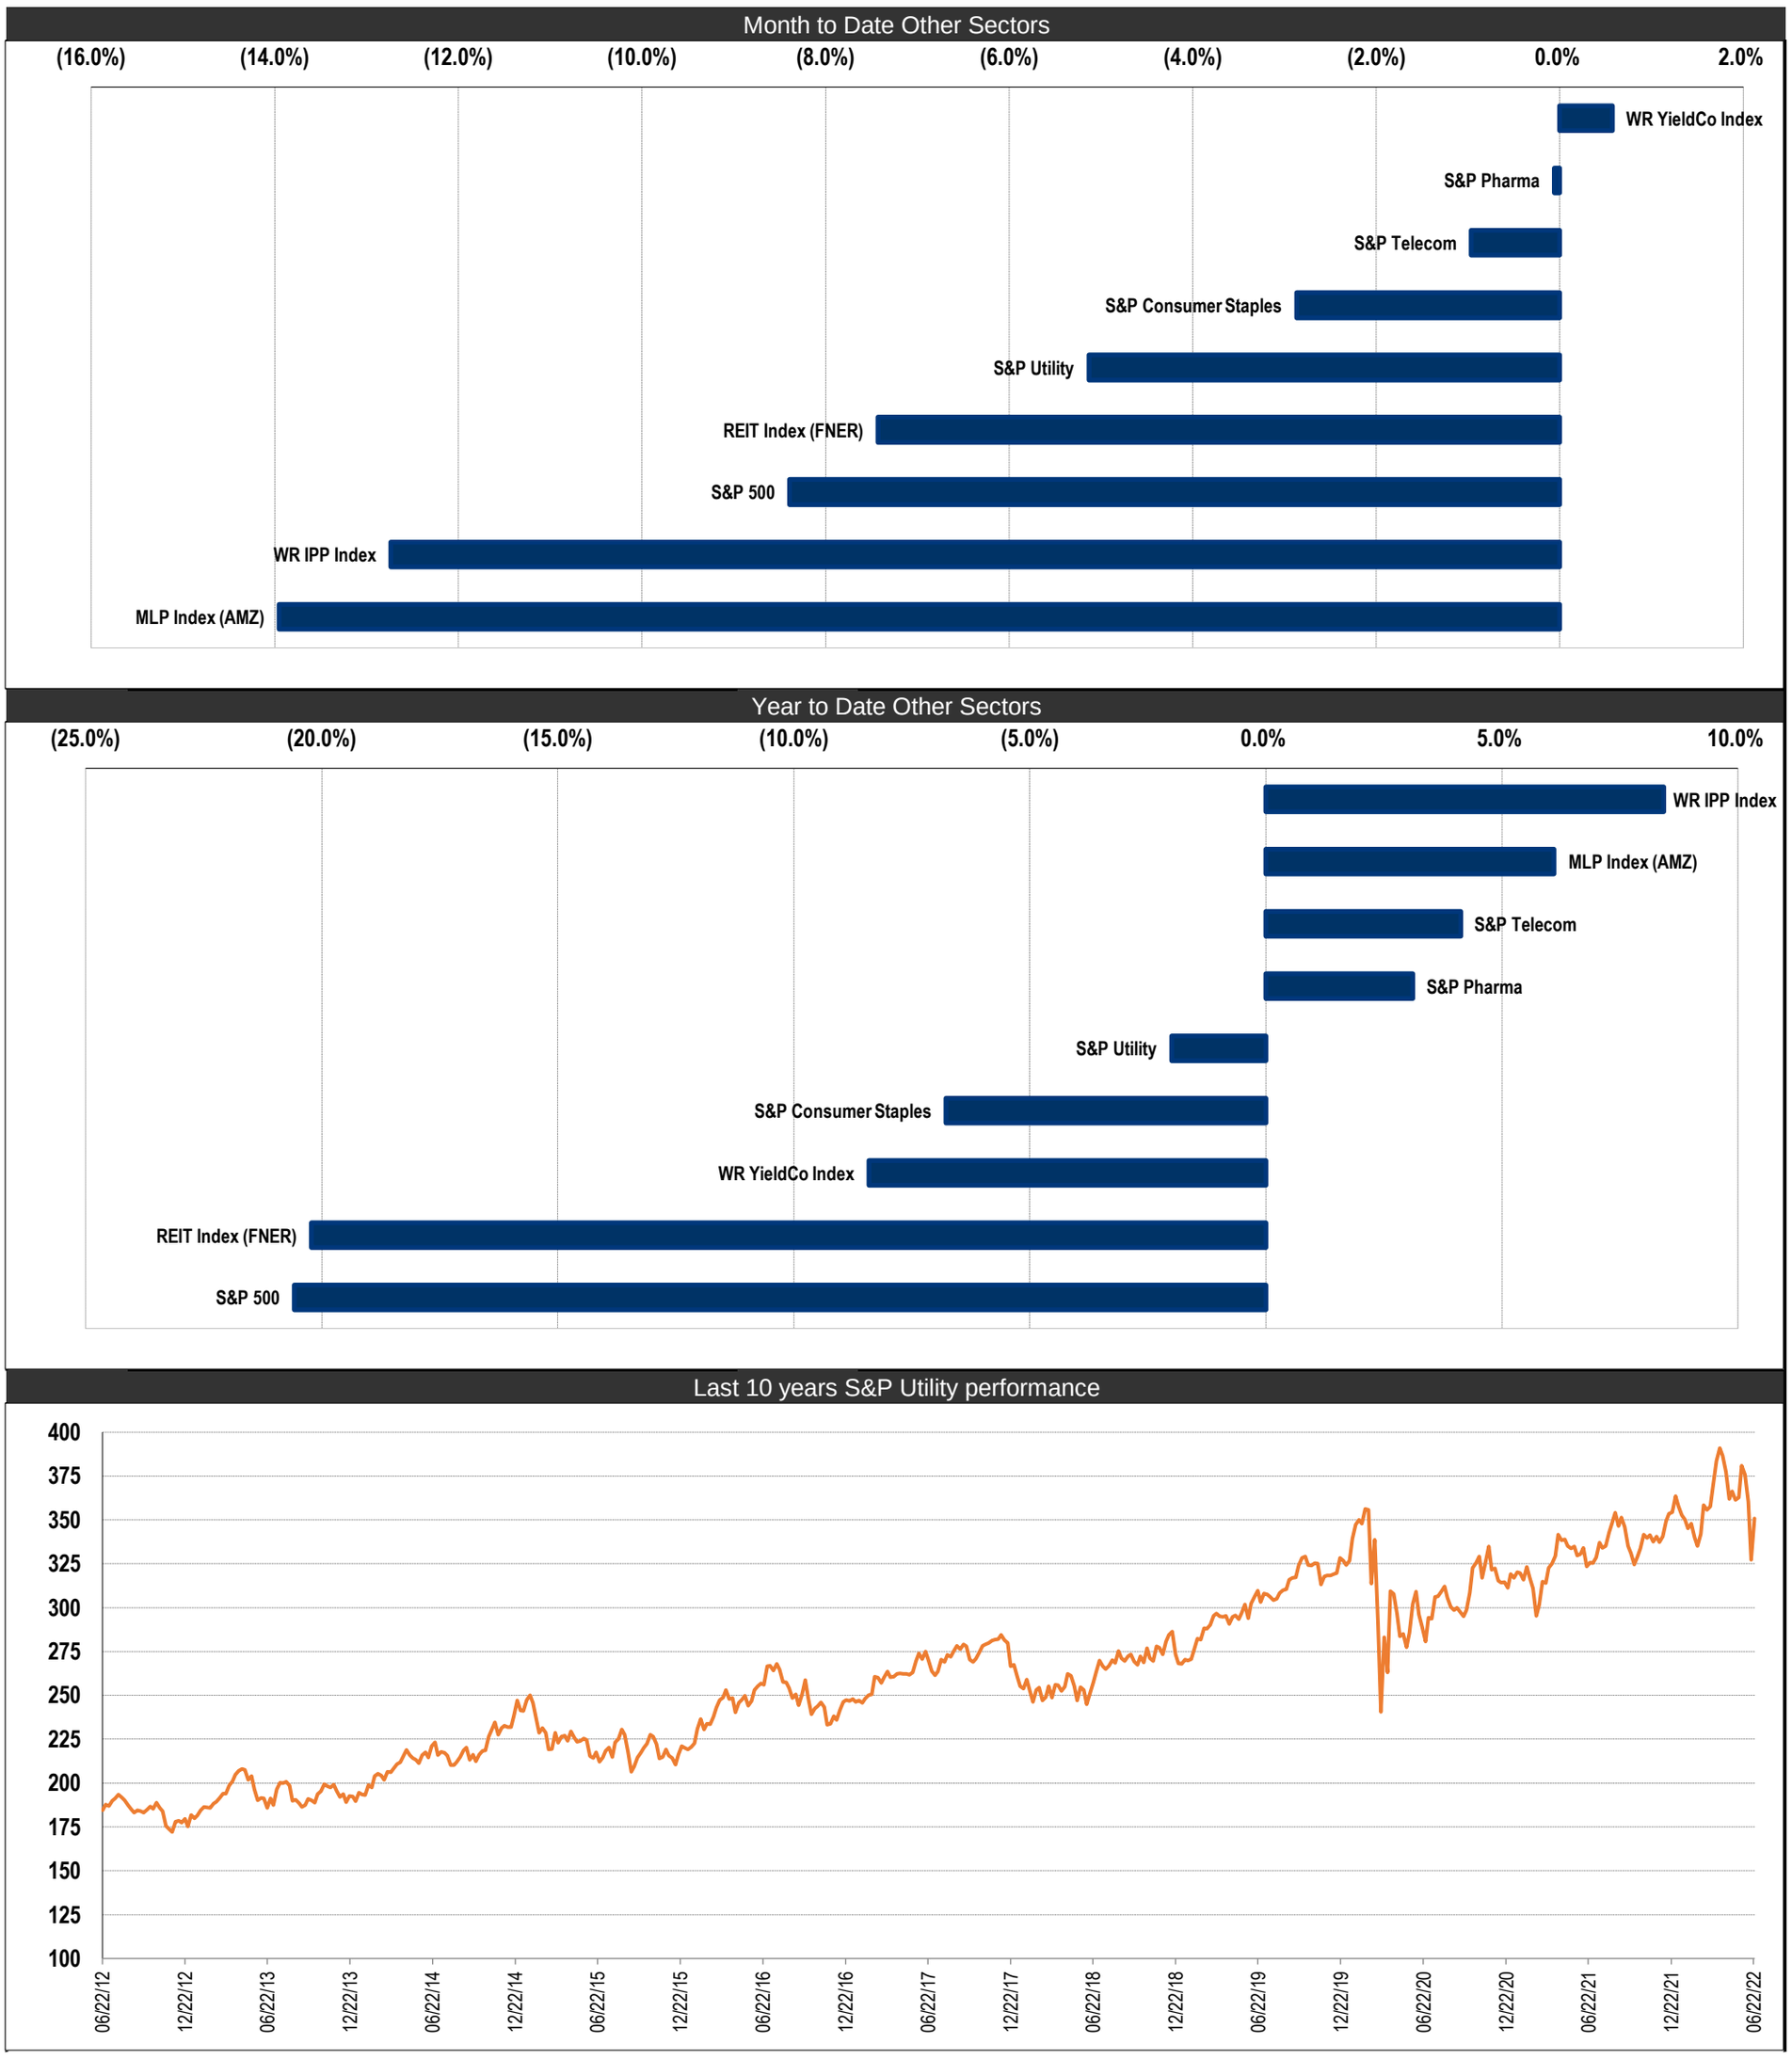
In June, Utilities (-5.1%) underperformed Consumer Staples (-2.9%), Telecom (-1.0%), and Pharma (-0.1%). With the Fed raising the federal funds rates by 75bps in the month, Interest rates spiking likely drove utility underperformance vs. other defensive sectors as utilities are viewed as bond proxies.



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Utilities vs Other Sectors continued

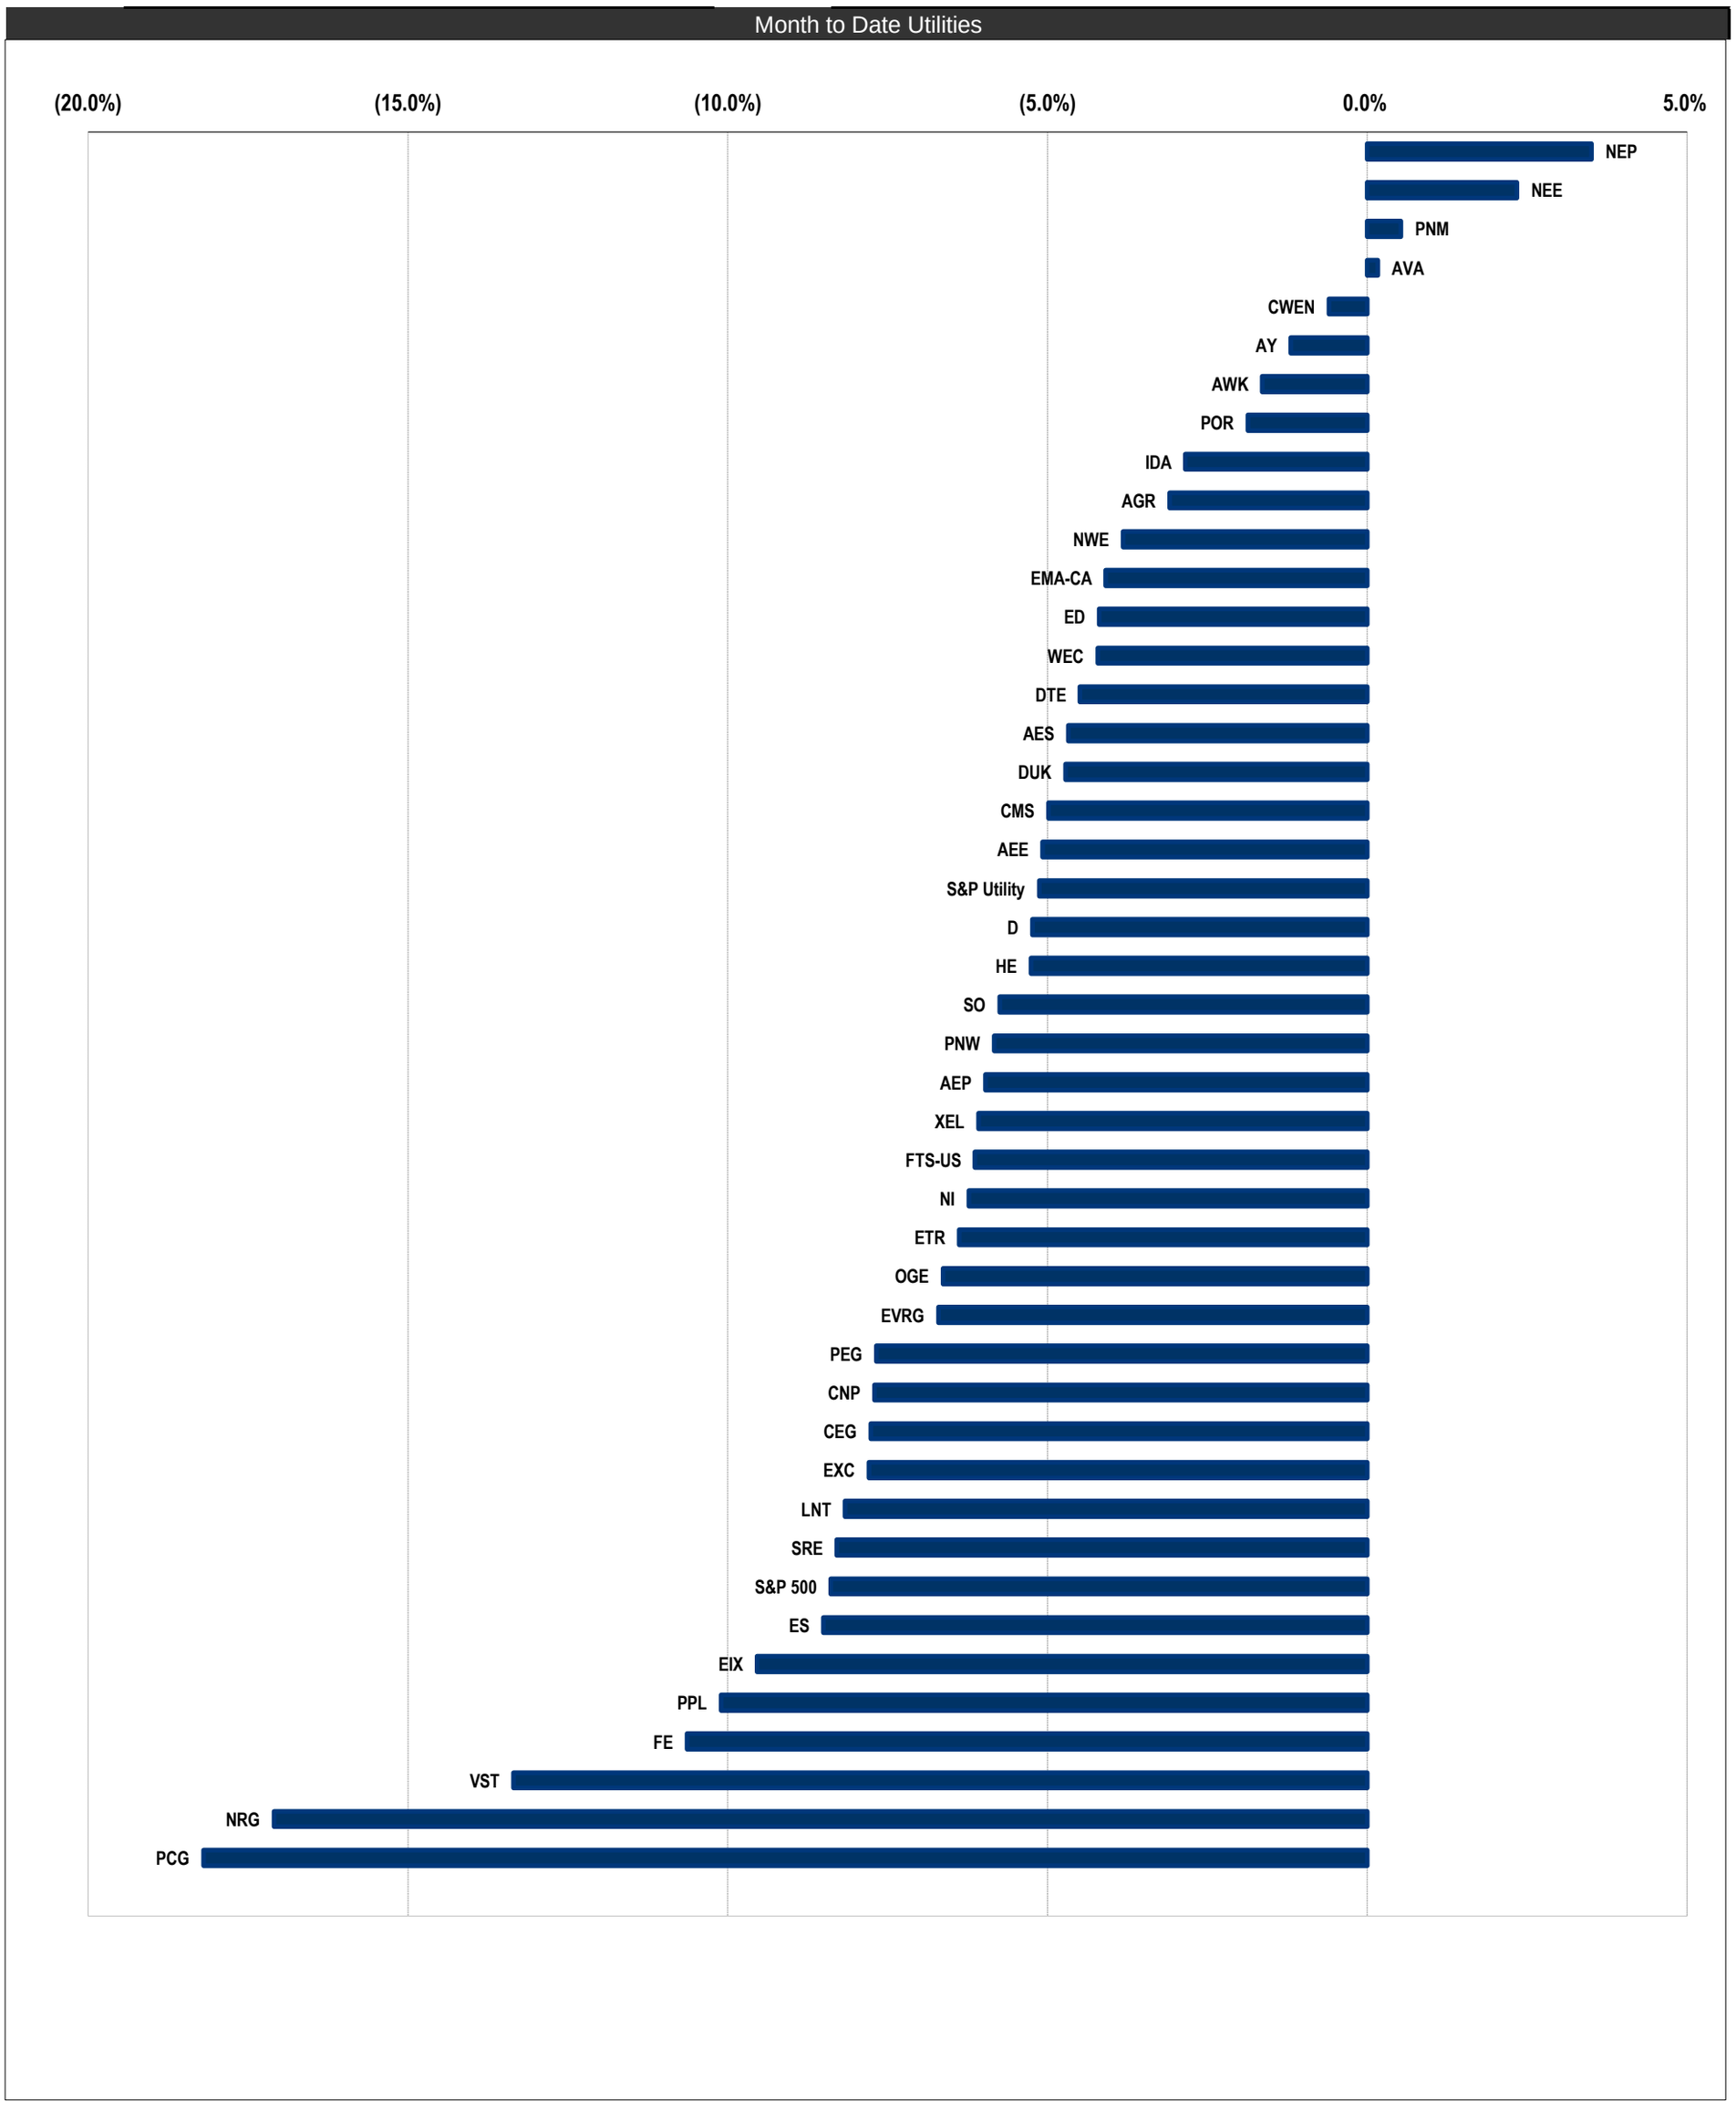


The MLP Index (AMZ) declined 14% in June, underperforming the S&P 500 by ~560bps, as WTI Crude Oil fell 8% in the month, while Henry Hub Natural Gas plummeted 34% due to the Freeport LNG facility explosion. That said, Midstream outperformed the broader energy sector (XLE), which declined 18% in June, and remains one of the best performing income sectors YTD. REITs (-7.4%) outperformed the S&P 500 (-8.4%) in the month, but remains the worst performing income sector YTD (-20.2%).

WOLFE RESEARCH

Month to Date and Year to Date performance of income sectors

YieldCos led the way in June, rising 0.6%, as President Biden's 2-year delay on new solar tariffs removed the AD/CVD overhang. On the other hand, MLPs were the worst performer in the month, falling alongside the broader energy sector, due to weakness in the commodity trade. While Midstream, IPP, and REITs were at the bottom of the board for June, REITs, YieldCos, and Consumer Staples occupy bottom positions YTD. The defensive sectors (Consumer Staples, Utilities, and Pharma) have continued to hold up well against the downward spiral in the overall market.

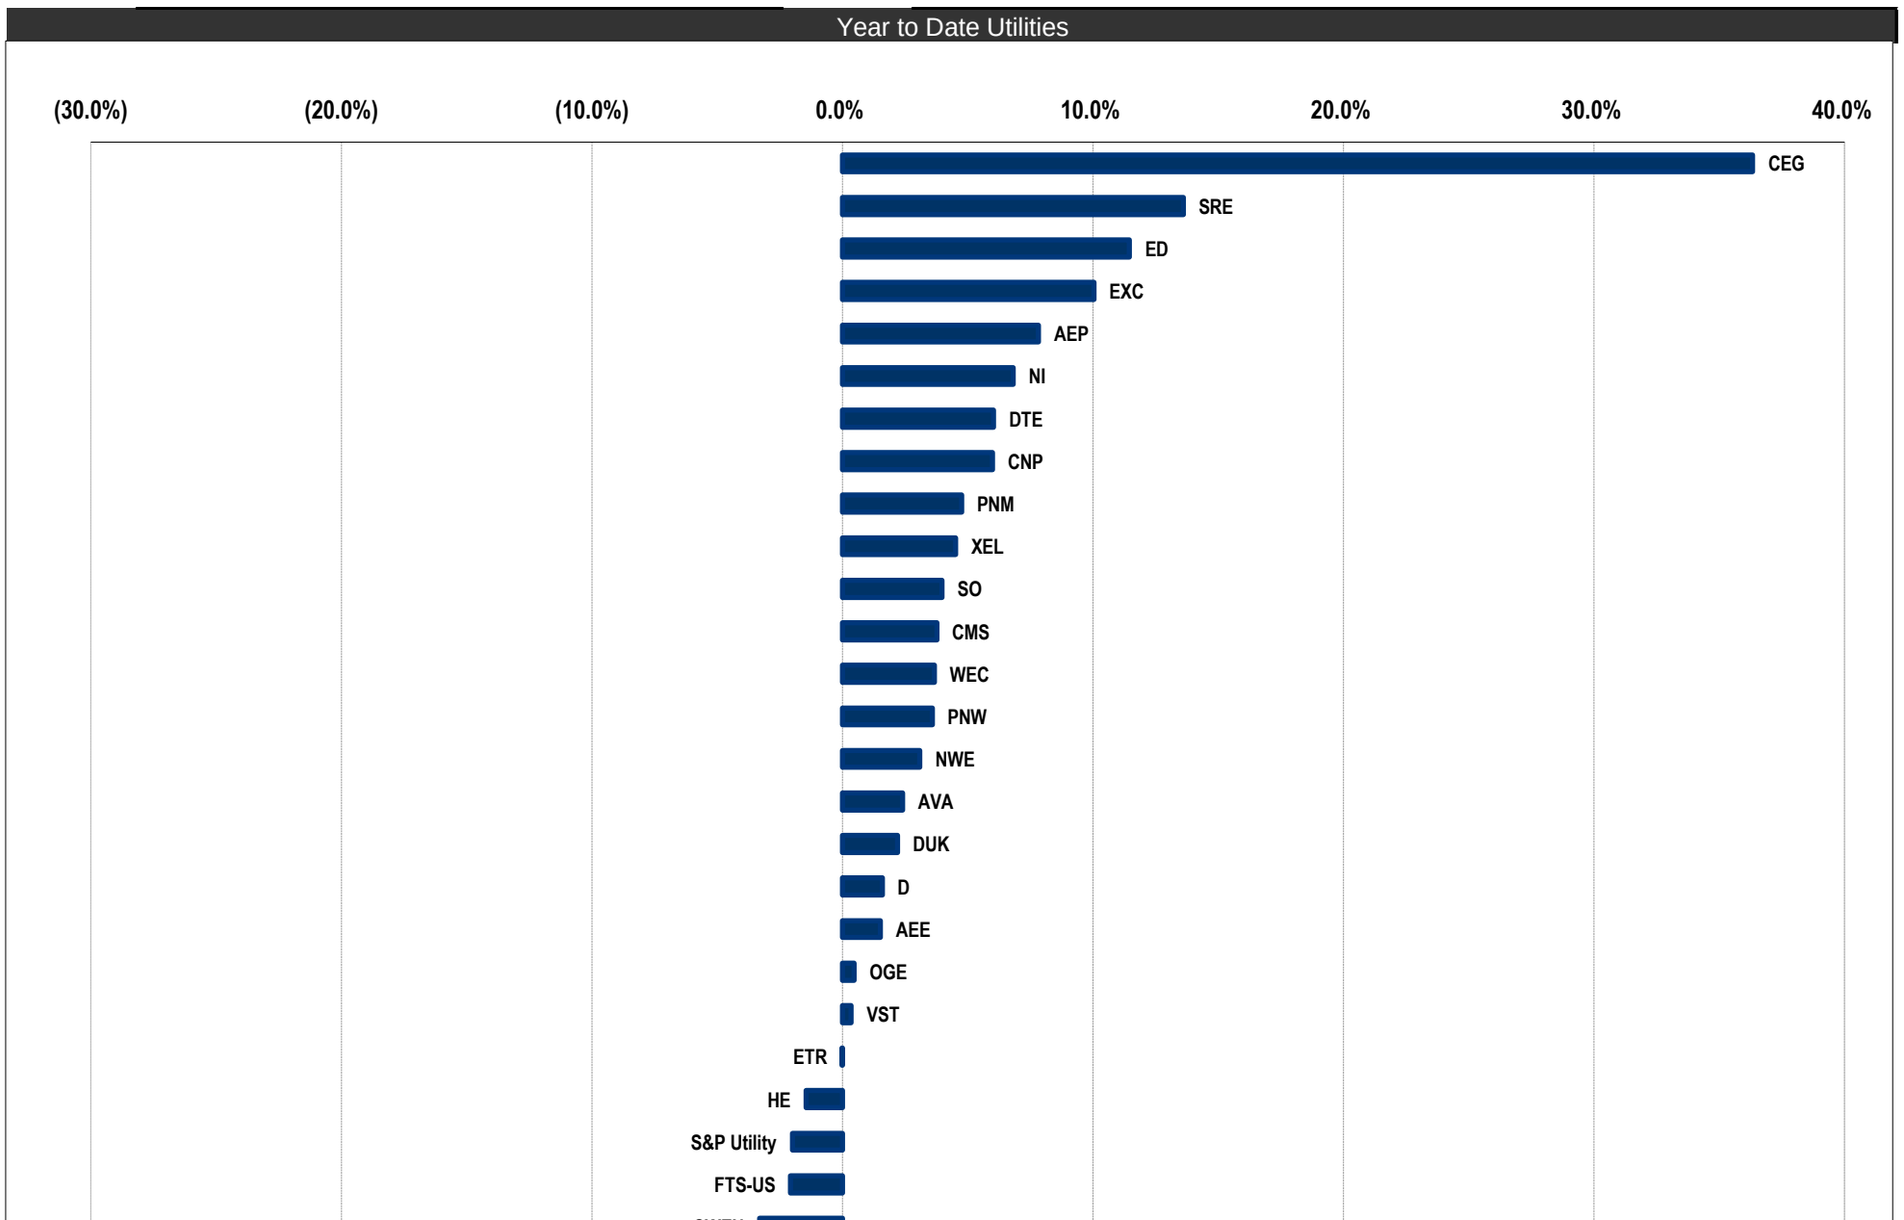


Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Month to Date performance of Utilities Group

NEP and NEE were top performers in June following a bullish Analyst Day. NEE and NEP also benefitted from the resolution of the AD/CVD overhang, with President Biden postponing new solar tariffs for 2 years, as did CWEN. PCG stock nosedived as investors reacted negatively to CAL Fire's report finding that PCG's actions caused and exacerbated the Dixie fire, which blazed in July 2021. NRG and VST pulled back sharply on the severe decline in natural gas prices resulting from the safety incident at Freeport's LNG facility. Pension risk, which appears to be a significant earnings headwind, continued to weigh down on FE's stock.

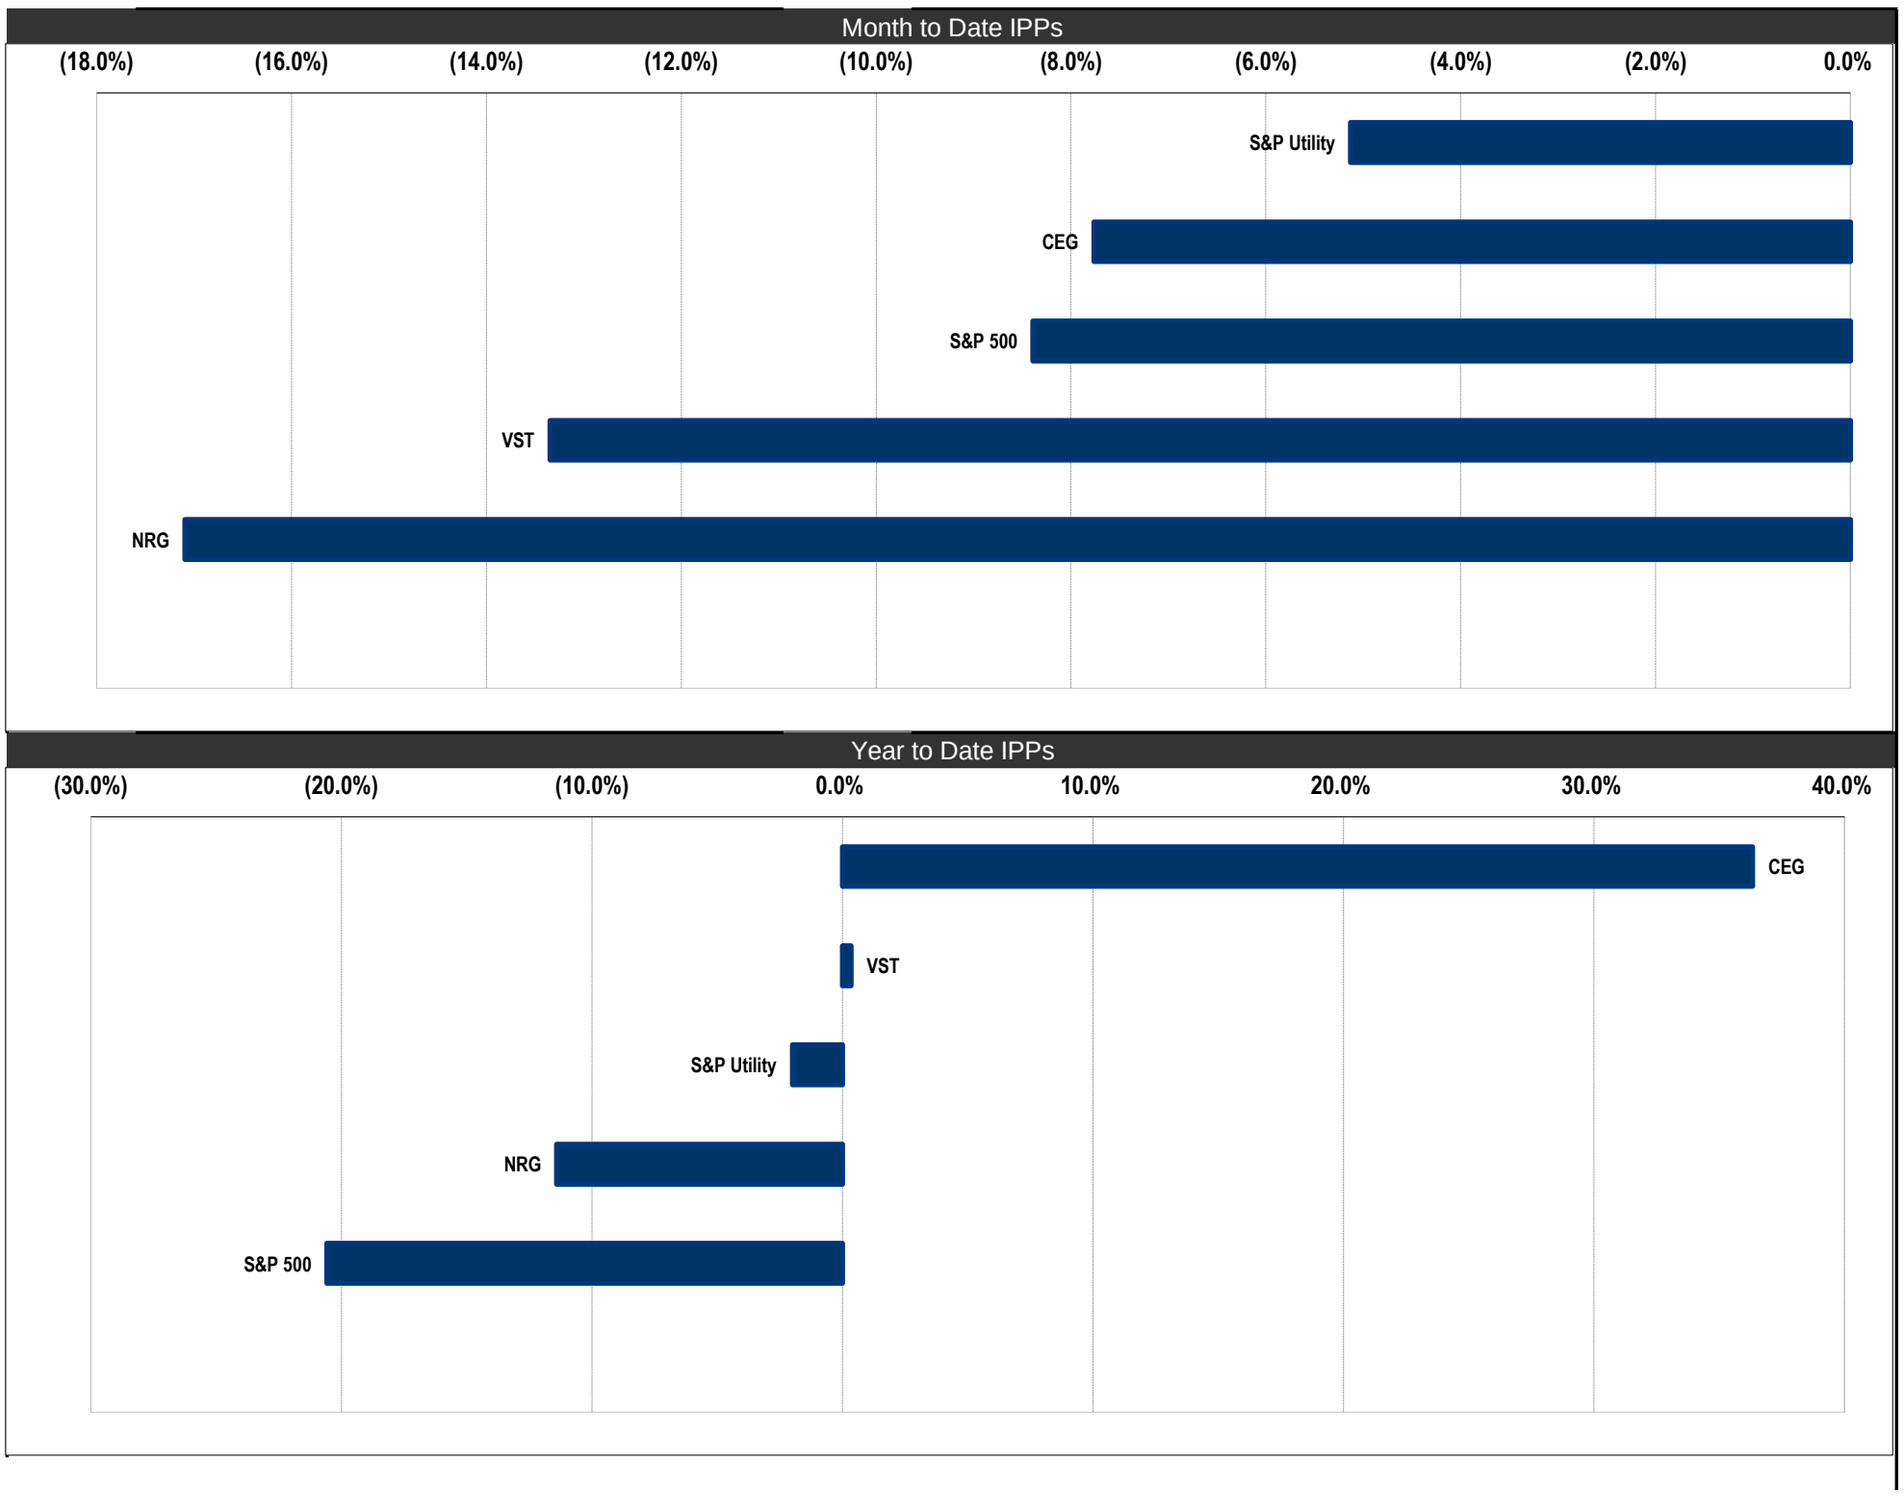


Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Year to Date performance of Utilities Group

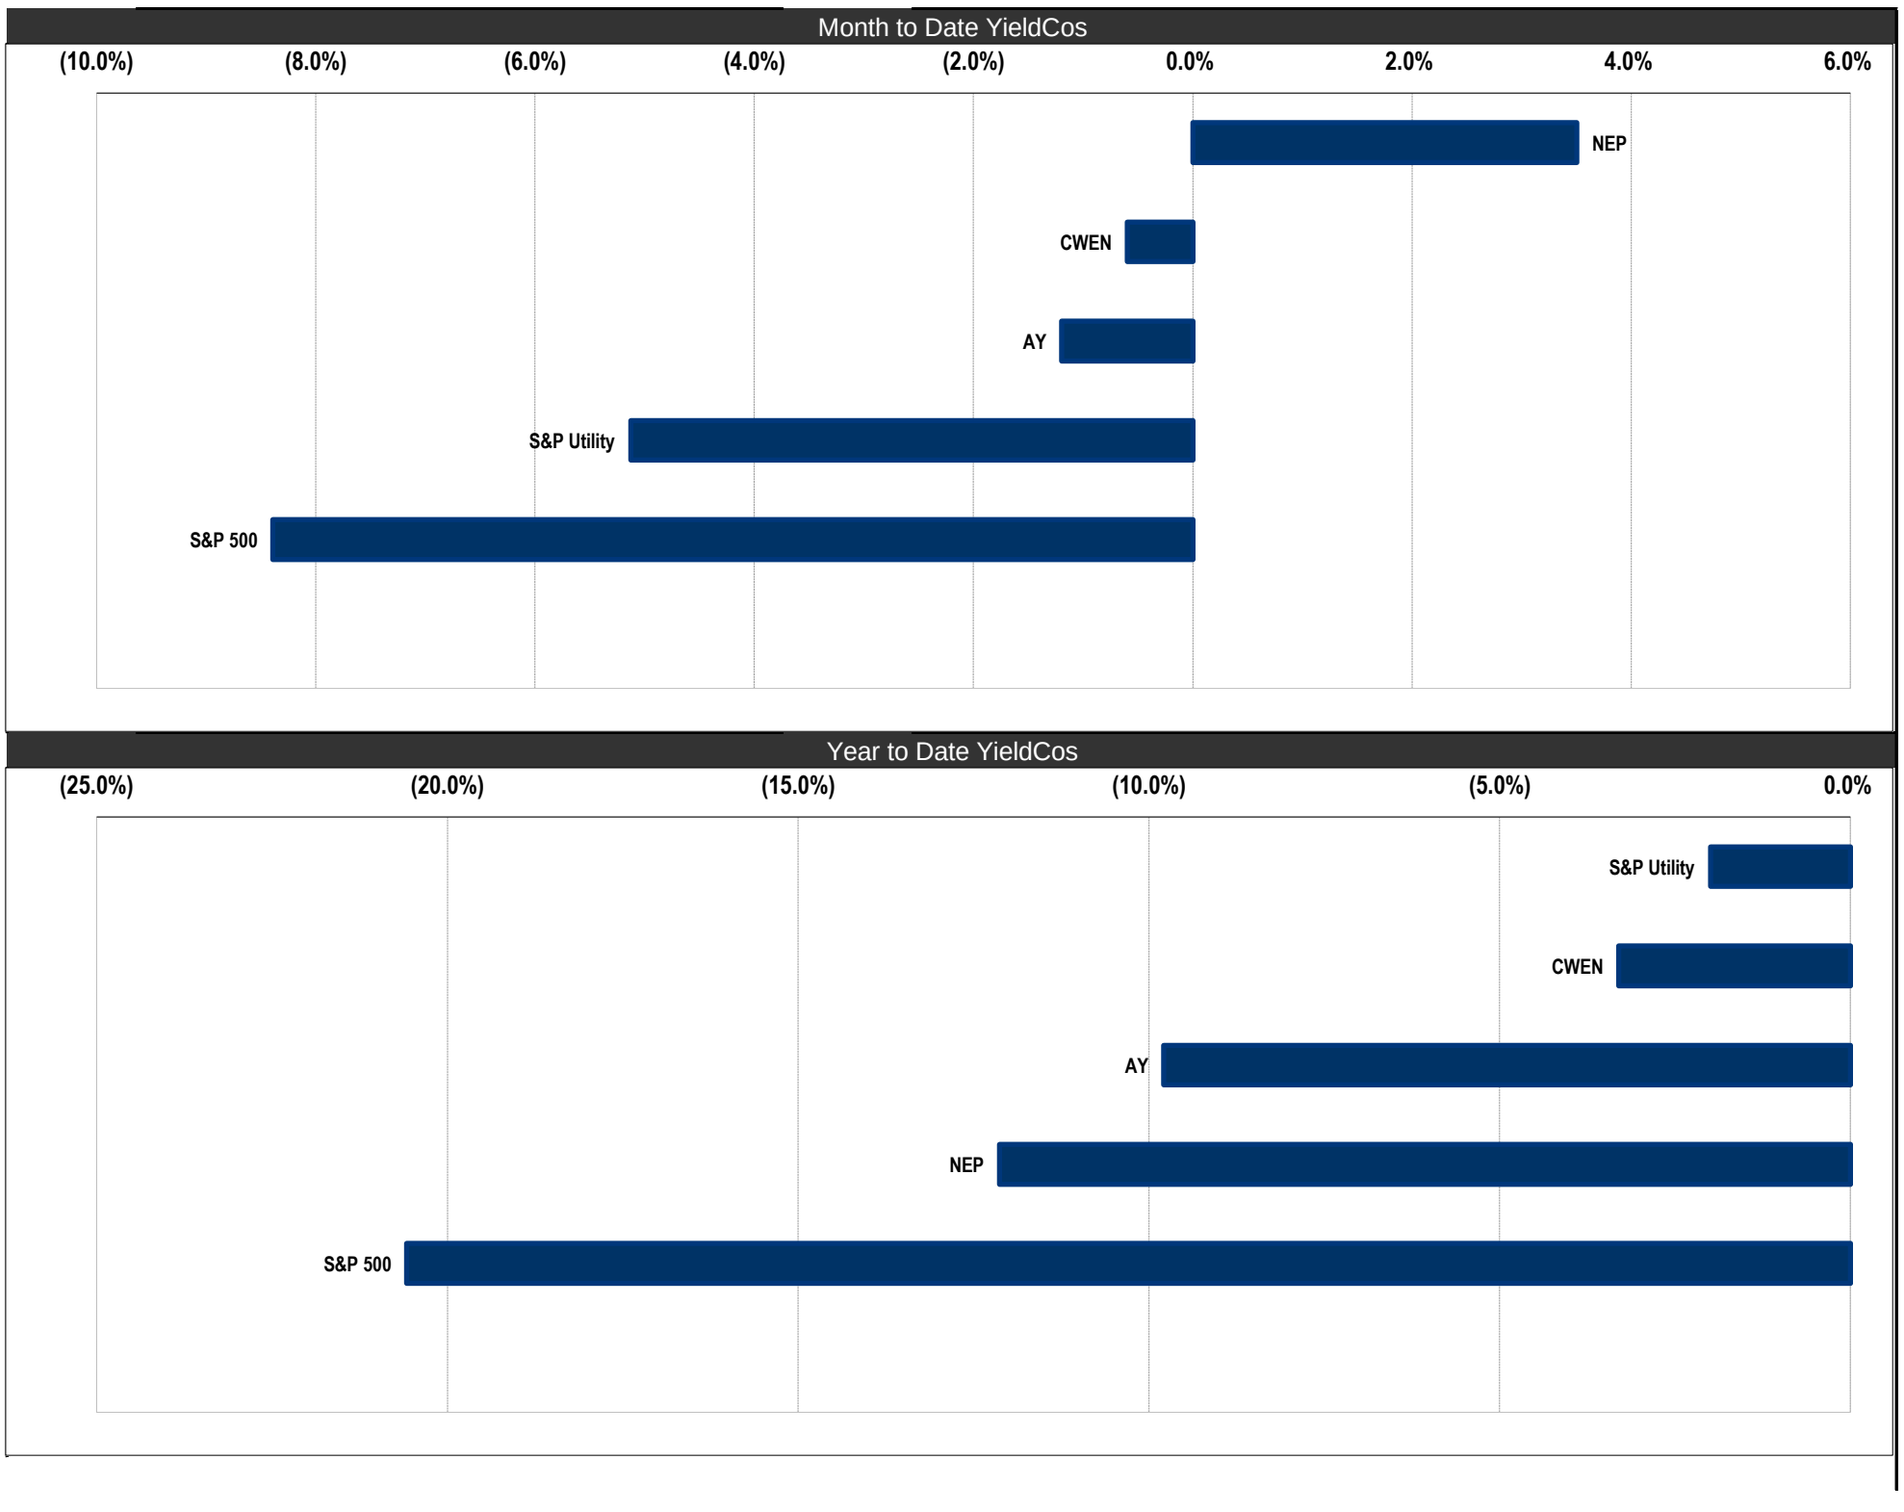
CEG remains the top performer YTD as investors look to play higher commodity prices and the carbon-free attributes of nuclear energy. SRE is next as it is one of the few companies with LNG export growth opportunities. ED and AEP are amongst the best performers YTD as both raised their L-T EPS growth rates and announced potential asset sales early this year. EXC continues to re-rate from business mix simplification after successfully spinning-off CEG. AWK, NEE, AES, and NEP remain bottom performers YTD due to the negative growth bias punishing ESG/GREEN leaders within the utility space. PCG's weakness can be attributed to fire risk overhang prevalent during the fire season in CA.



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

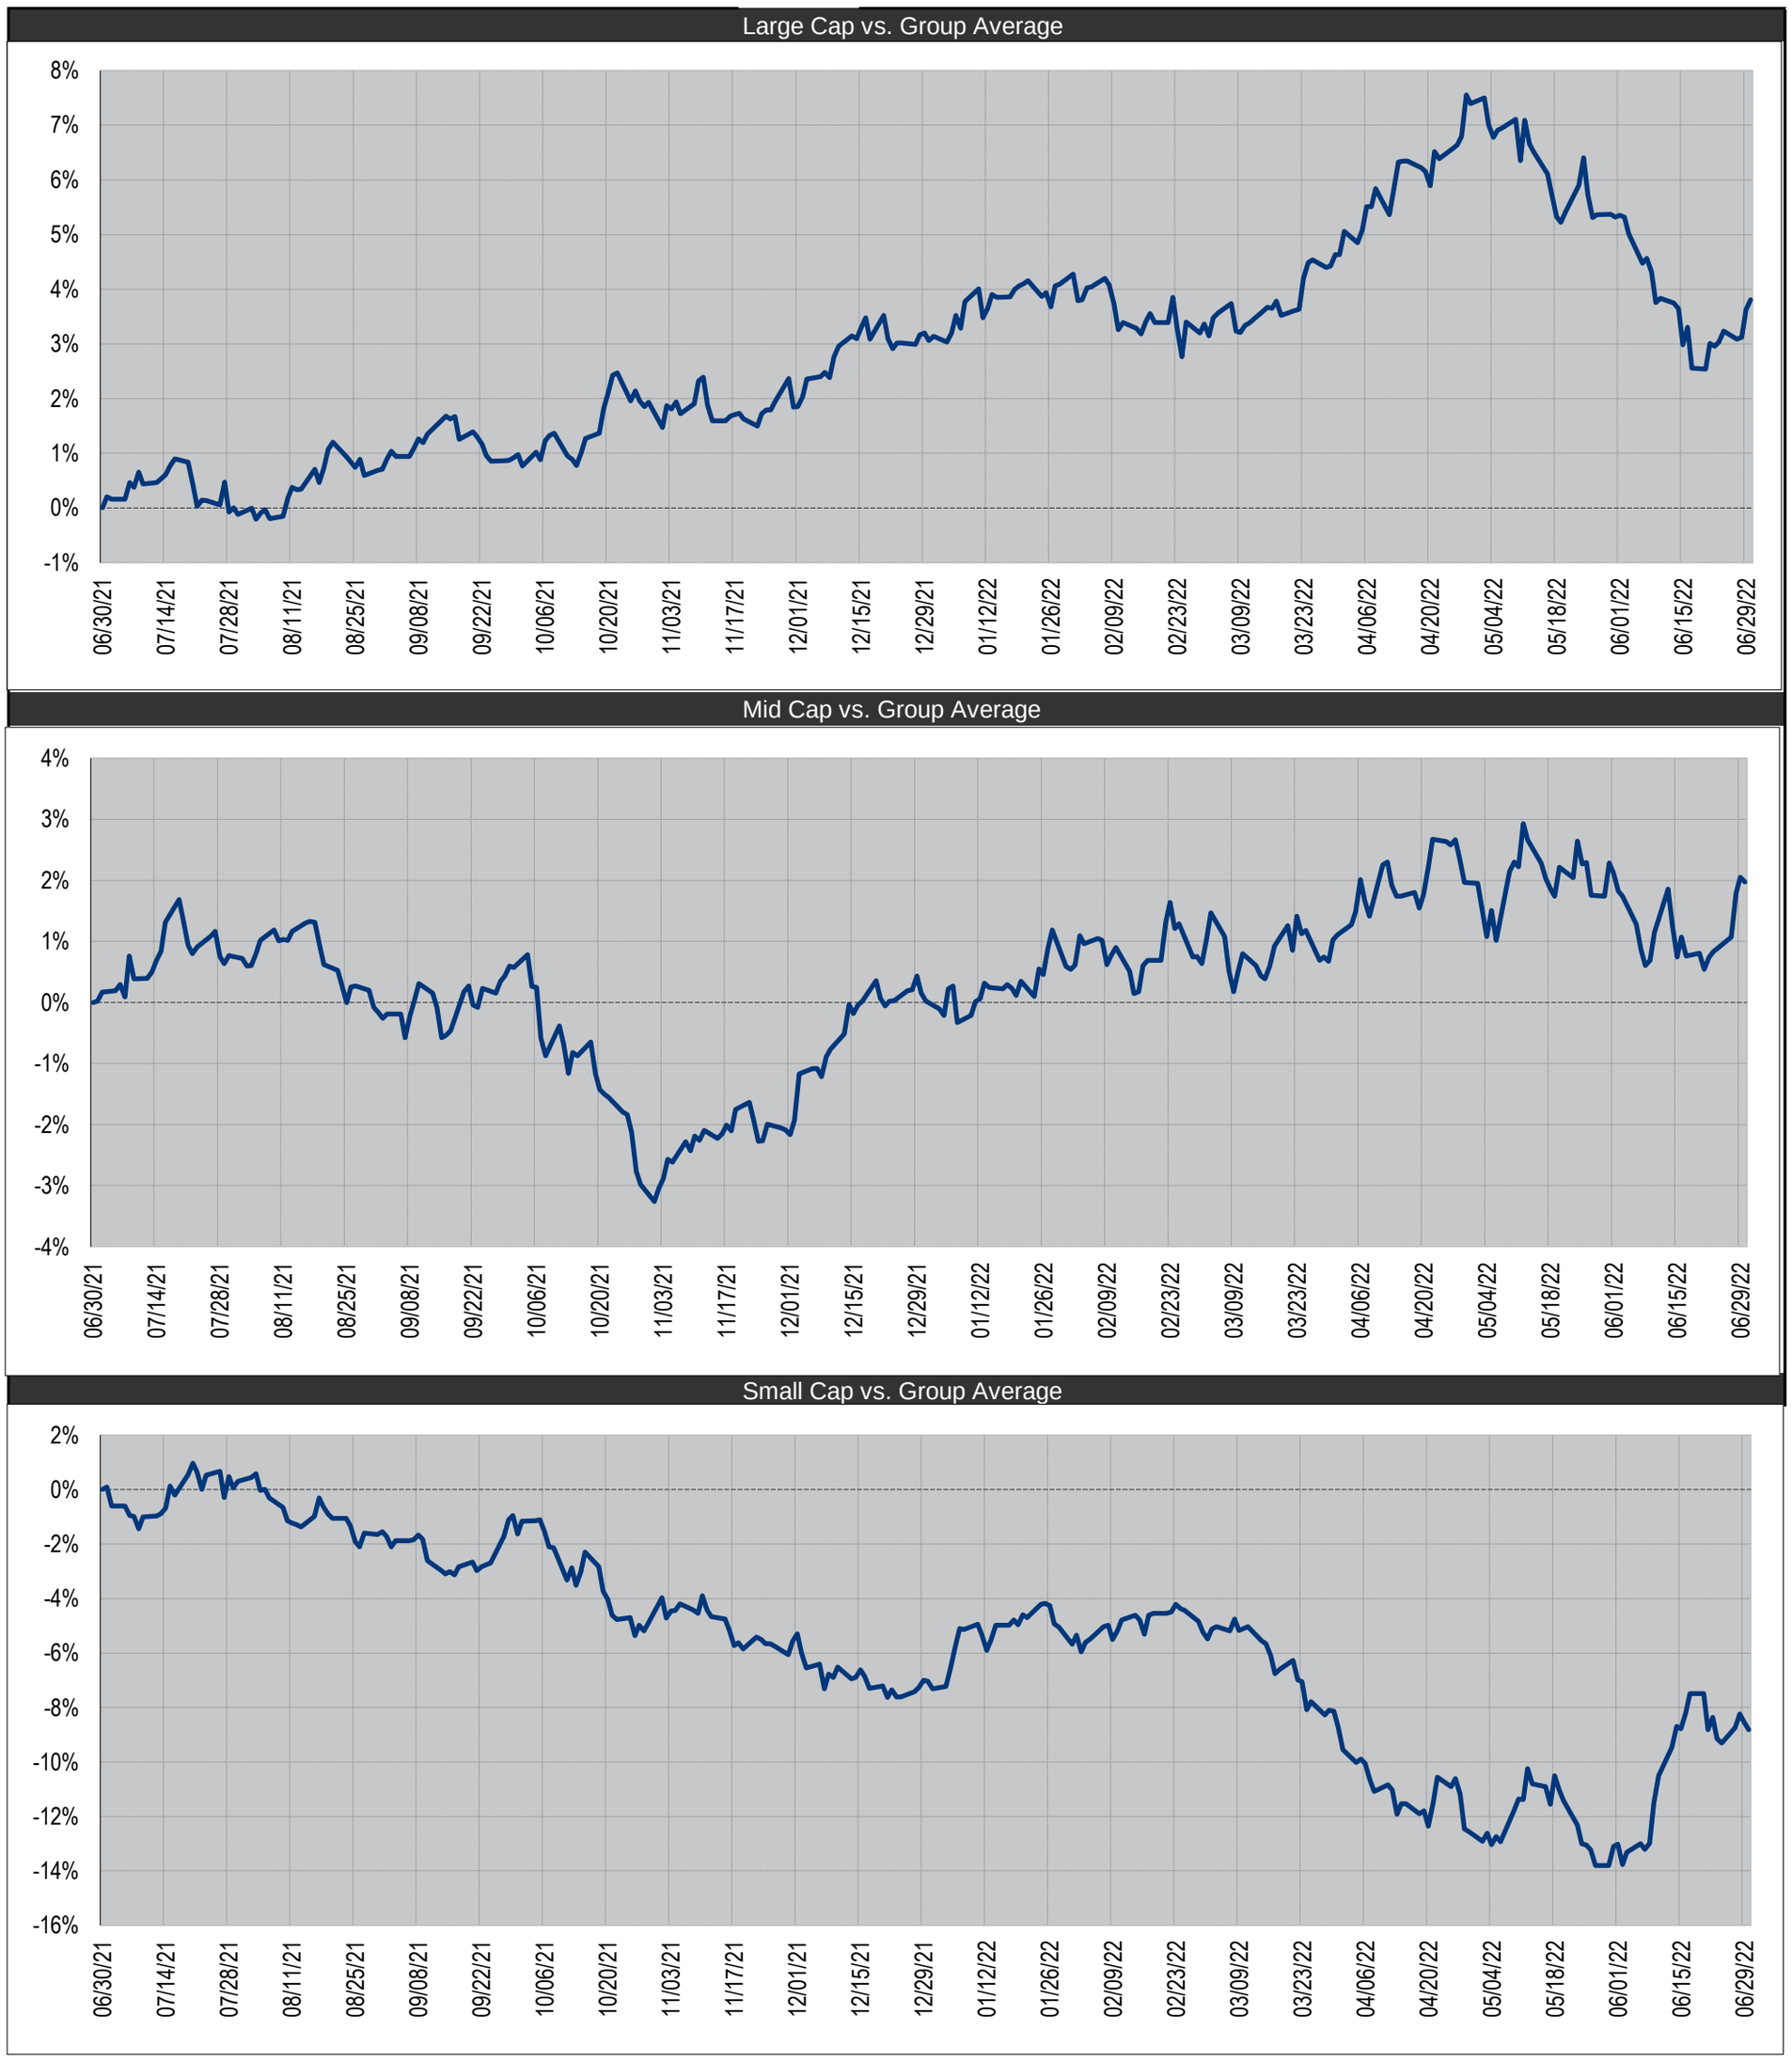
Month to Date and Year to Date performance of IPPs



IPPs experienced a sharp sell-off due to the pullback in the commodity trade as front-month natural gas declined from over $8/MMBtu towards ~$6/MMBtu following the Freeport LNG outage. CEG remains the top performing IPP YTD, with VST slightly outperforming utilities on the year, while NRG continues to trail its peers due the company having less commodity exposure in this spiked commodity environment.

WOLFE RESEARCH

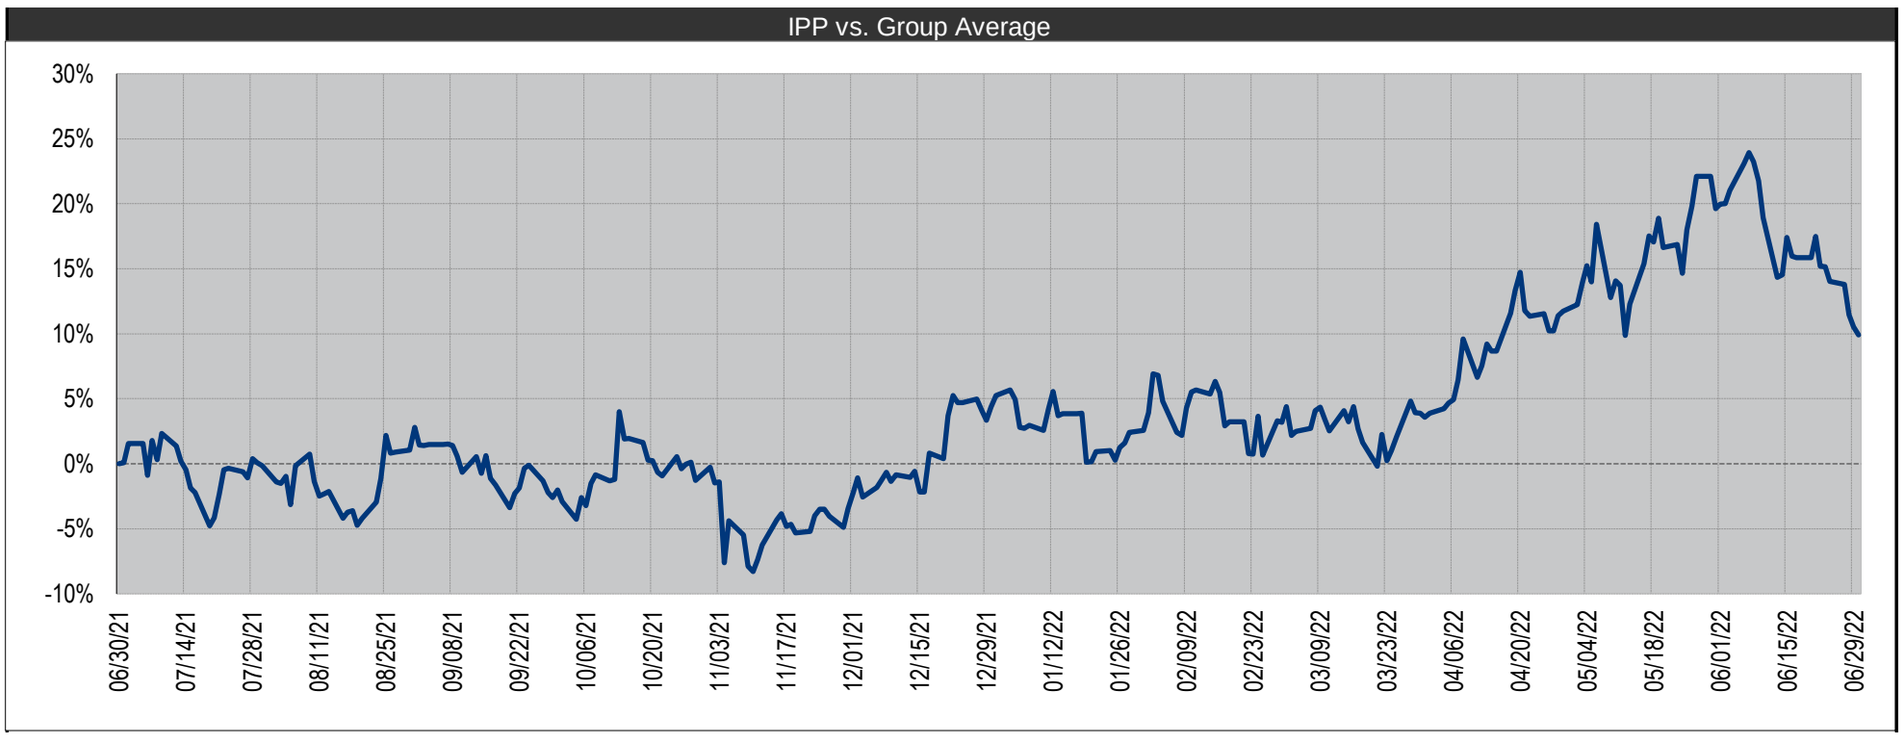
Month to Date and Year to Date performance of YieldCos



YieldCos traded substantially ahead of the S&P 500 as President Biden implemented a 2-year pause on new solar AD/CVD tariffs through an executive order. NEP, CWEN, and AY were amongst the best performers in the month, but all YieldCos are still performing negatively on the year, likely due to their inverse correlation with rising interest rates.

WOLFE RESEARCH

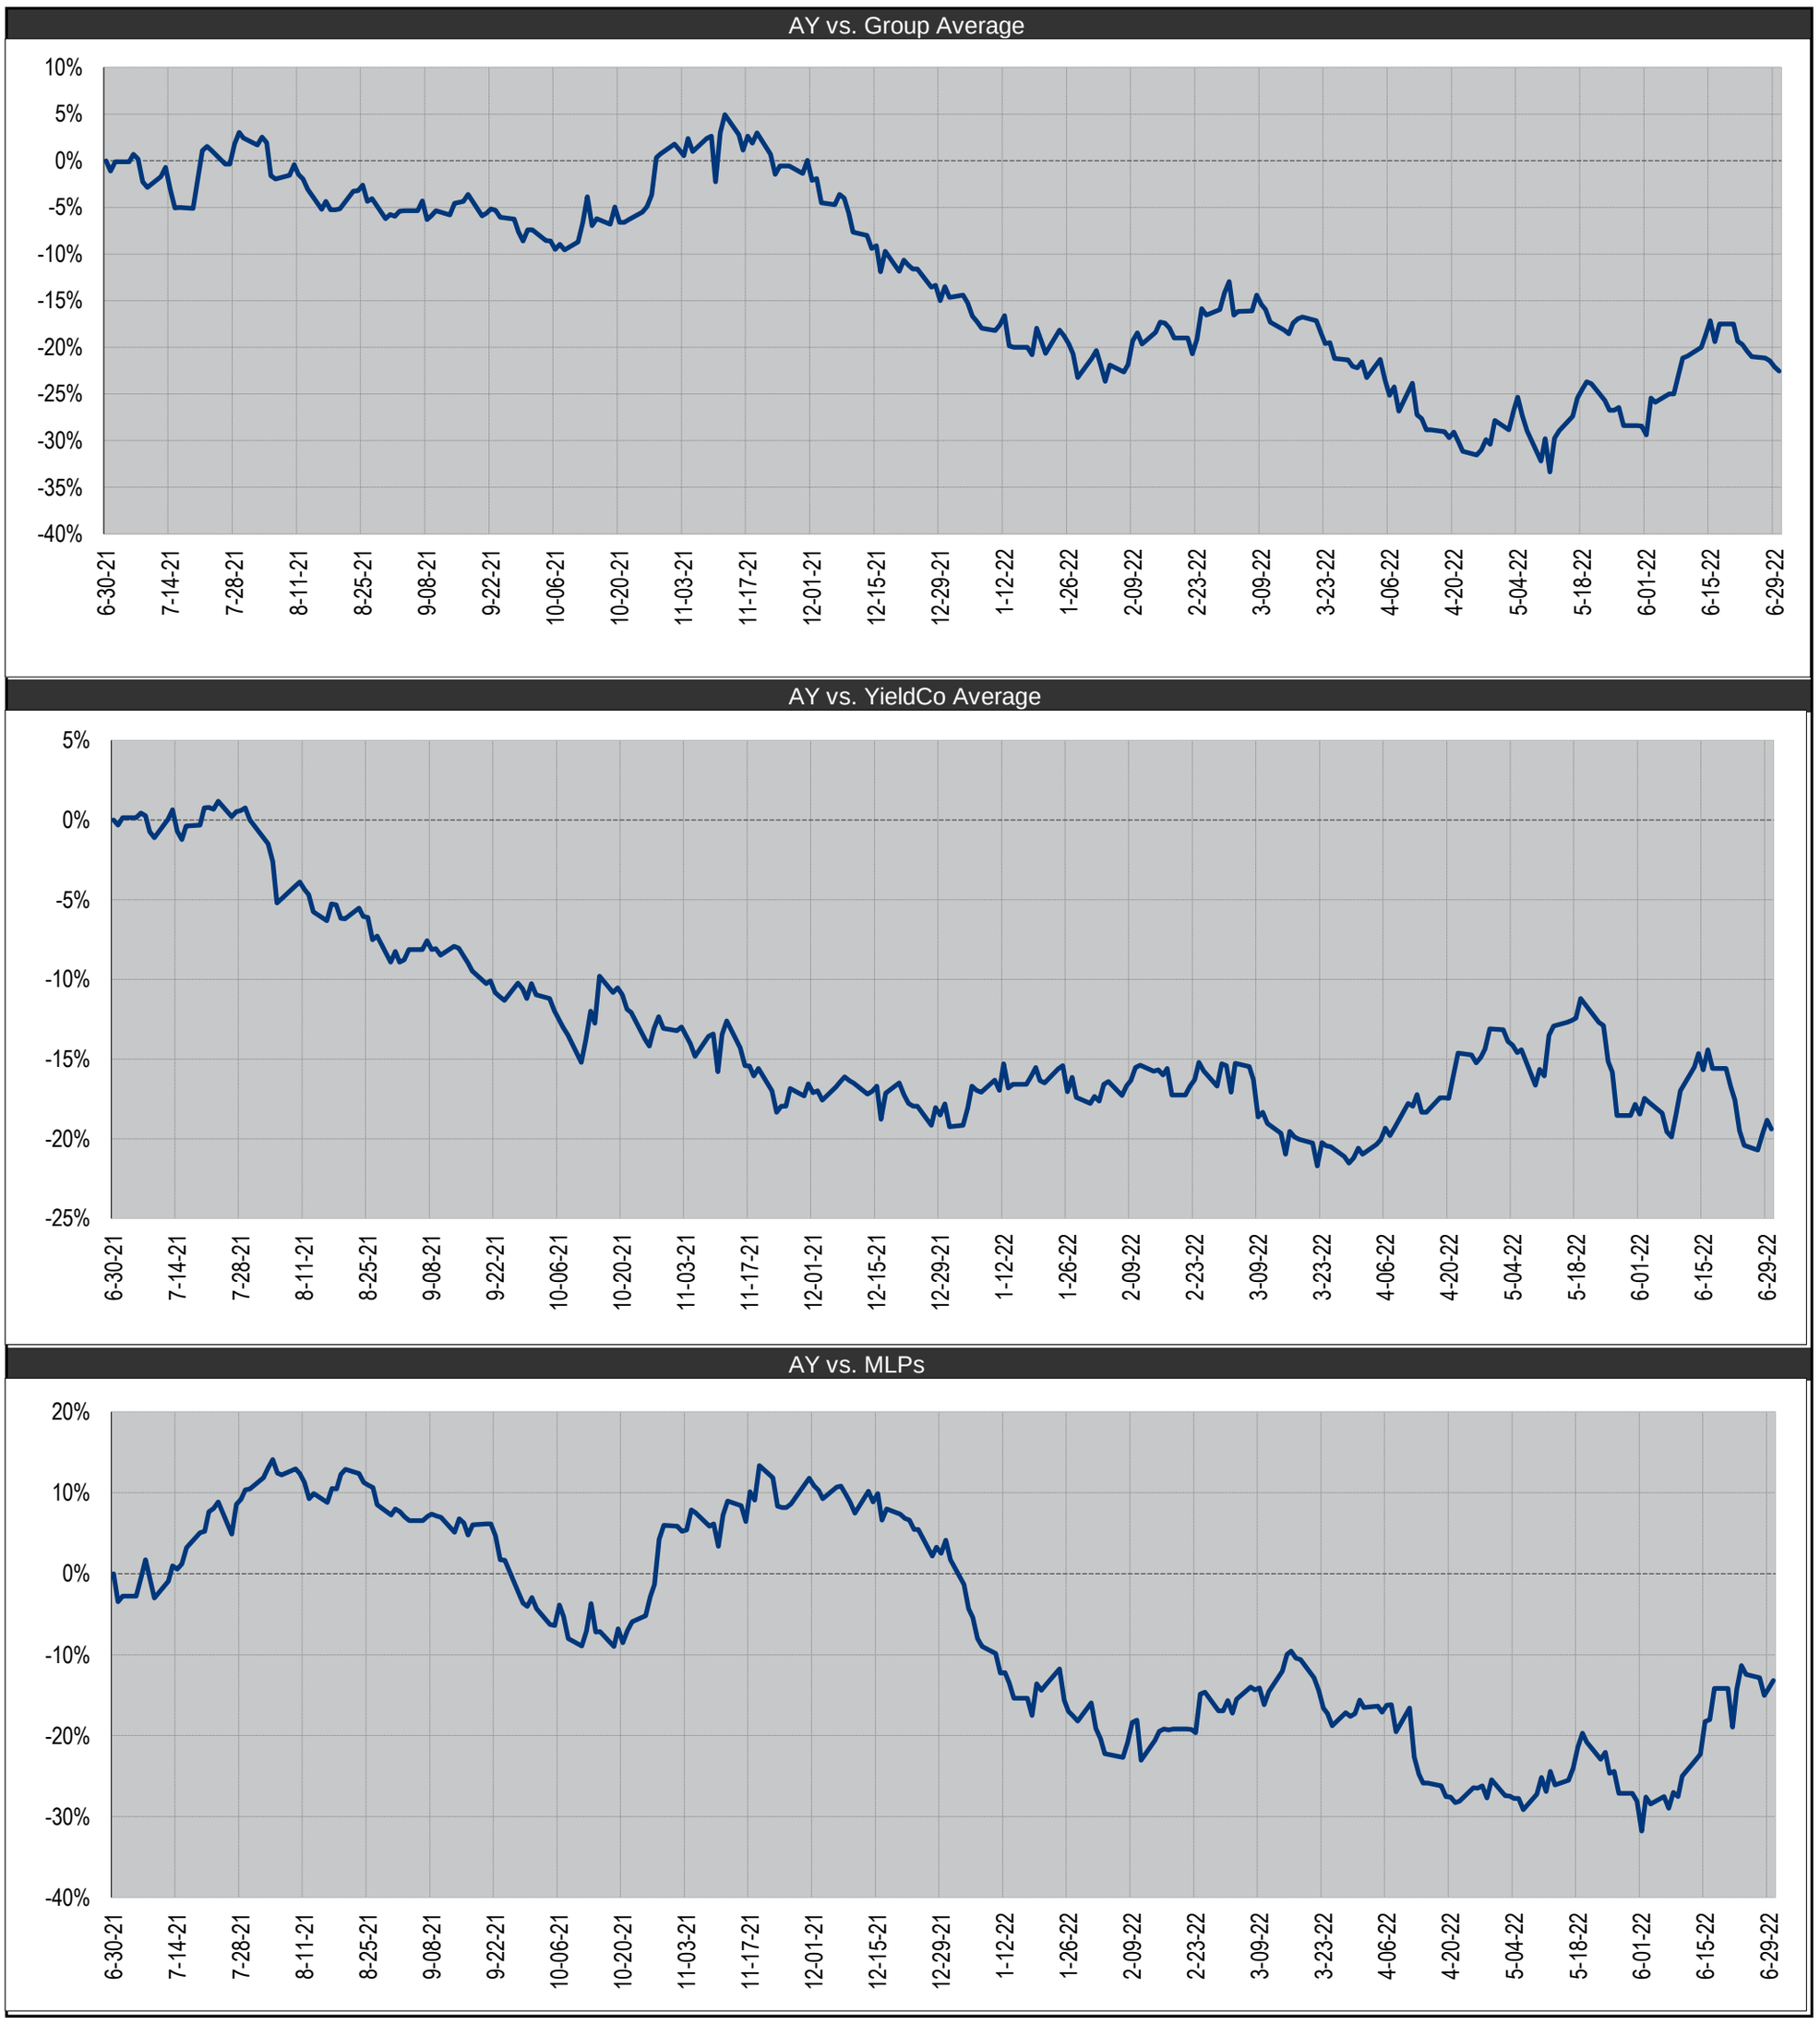
Utilities Performance by Market Cap



- Large caps underperformed the group average in June, led down by PCG (-18.2%) and FE (-10.6%).
- Mid caps slightly underperformed the group average in the month, led down by LNT (-8.2%) and CNP (-7.7%).
- Small caps considerably outperformed the group average in June, led up by PNM (+0.5%) and AVA (+0.2%).

WOLFE RESEARCH

Utilities Performance by Segment

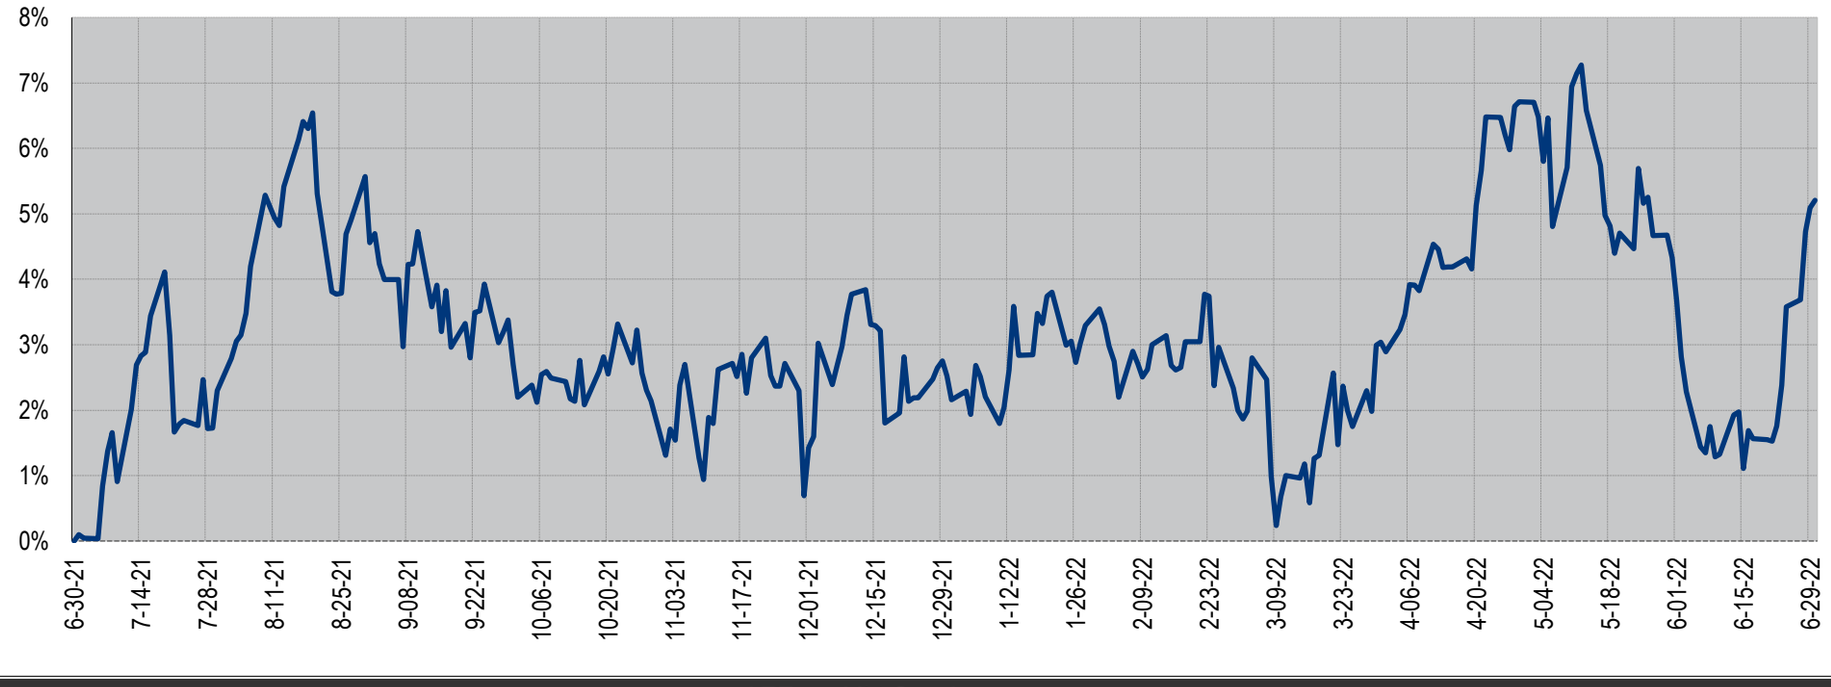


• IPPs significantly underperformed the group average in June, led down by NRG (-17.1%) and VST (-13.3%).

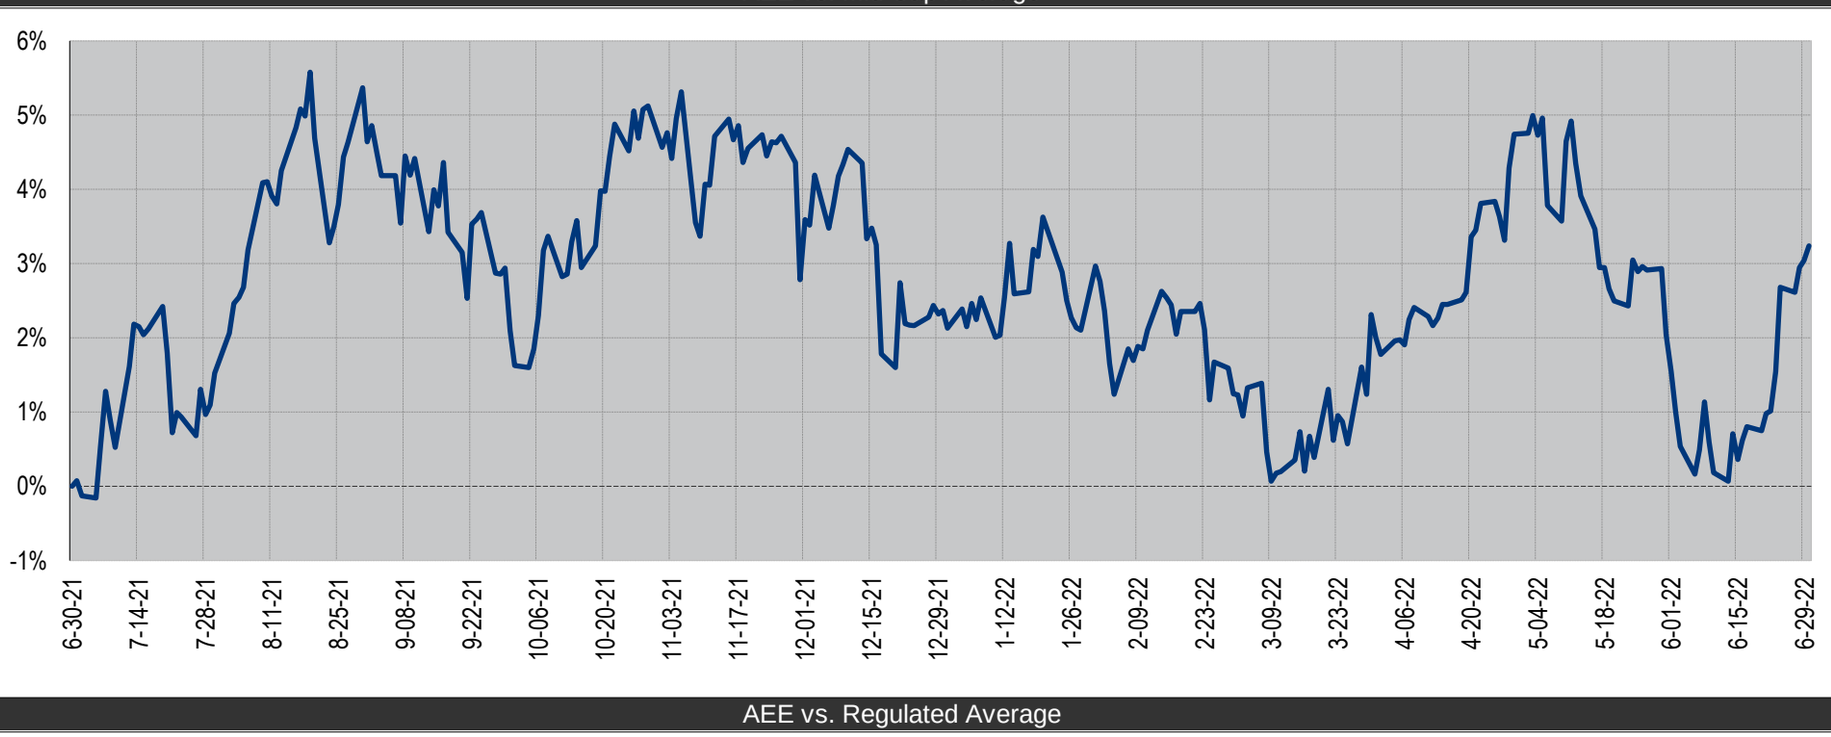
WOLFE RESEARCH

Atlantica Yield (AY) $32.26, NR

Atlantica Sustainable Infrastructure was flattish in June on no notable news.

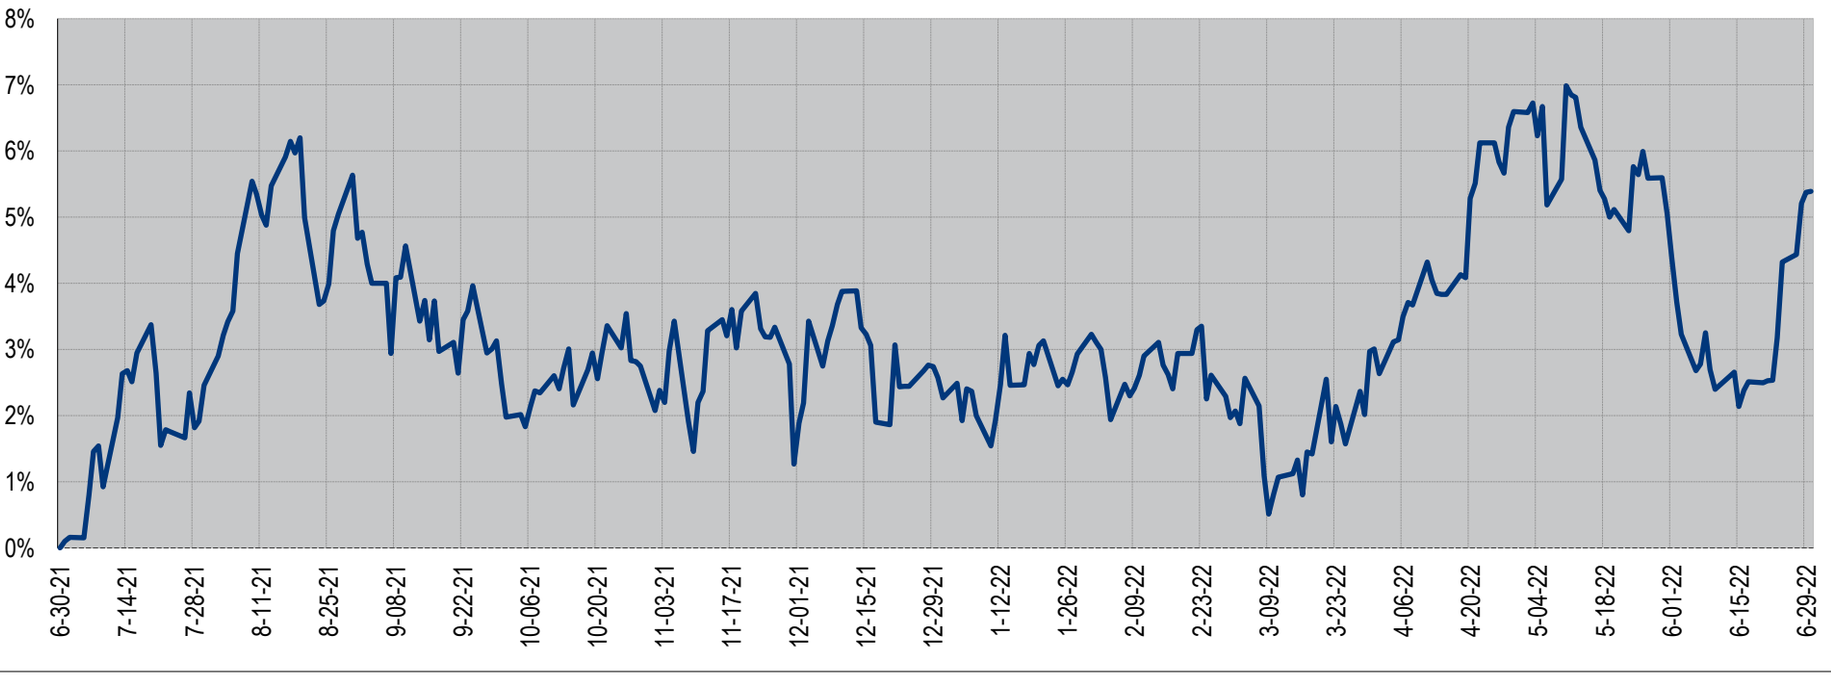


WOLFE RESEARCH



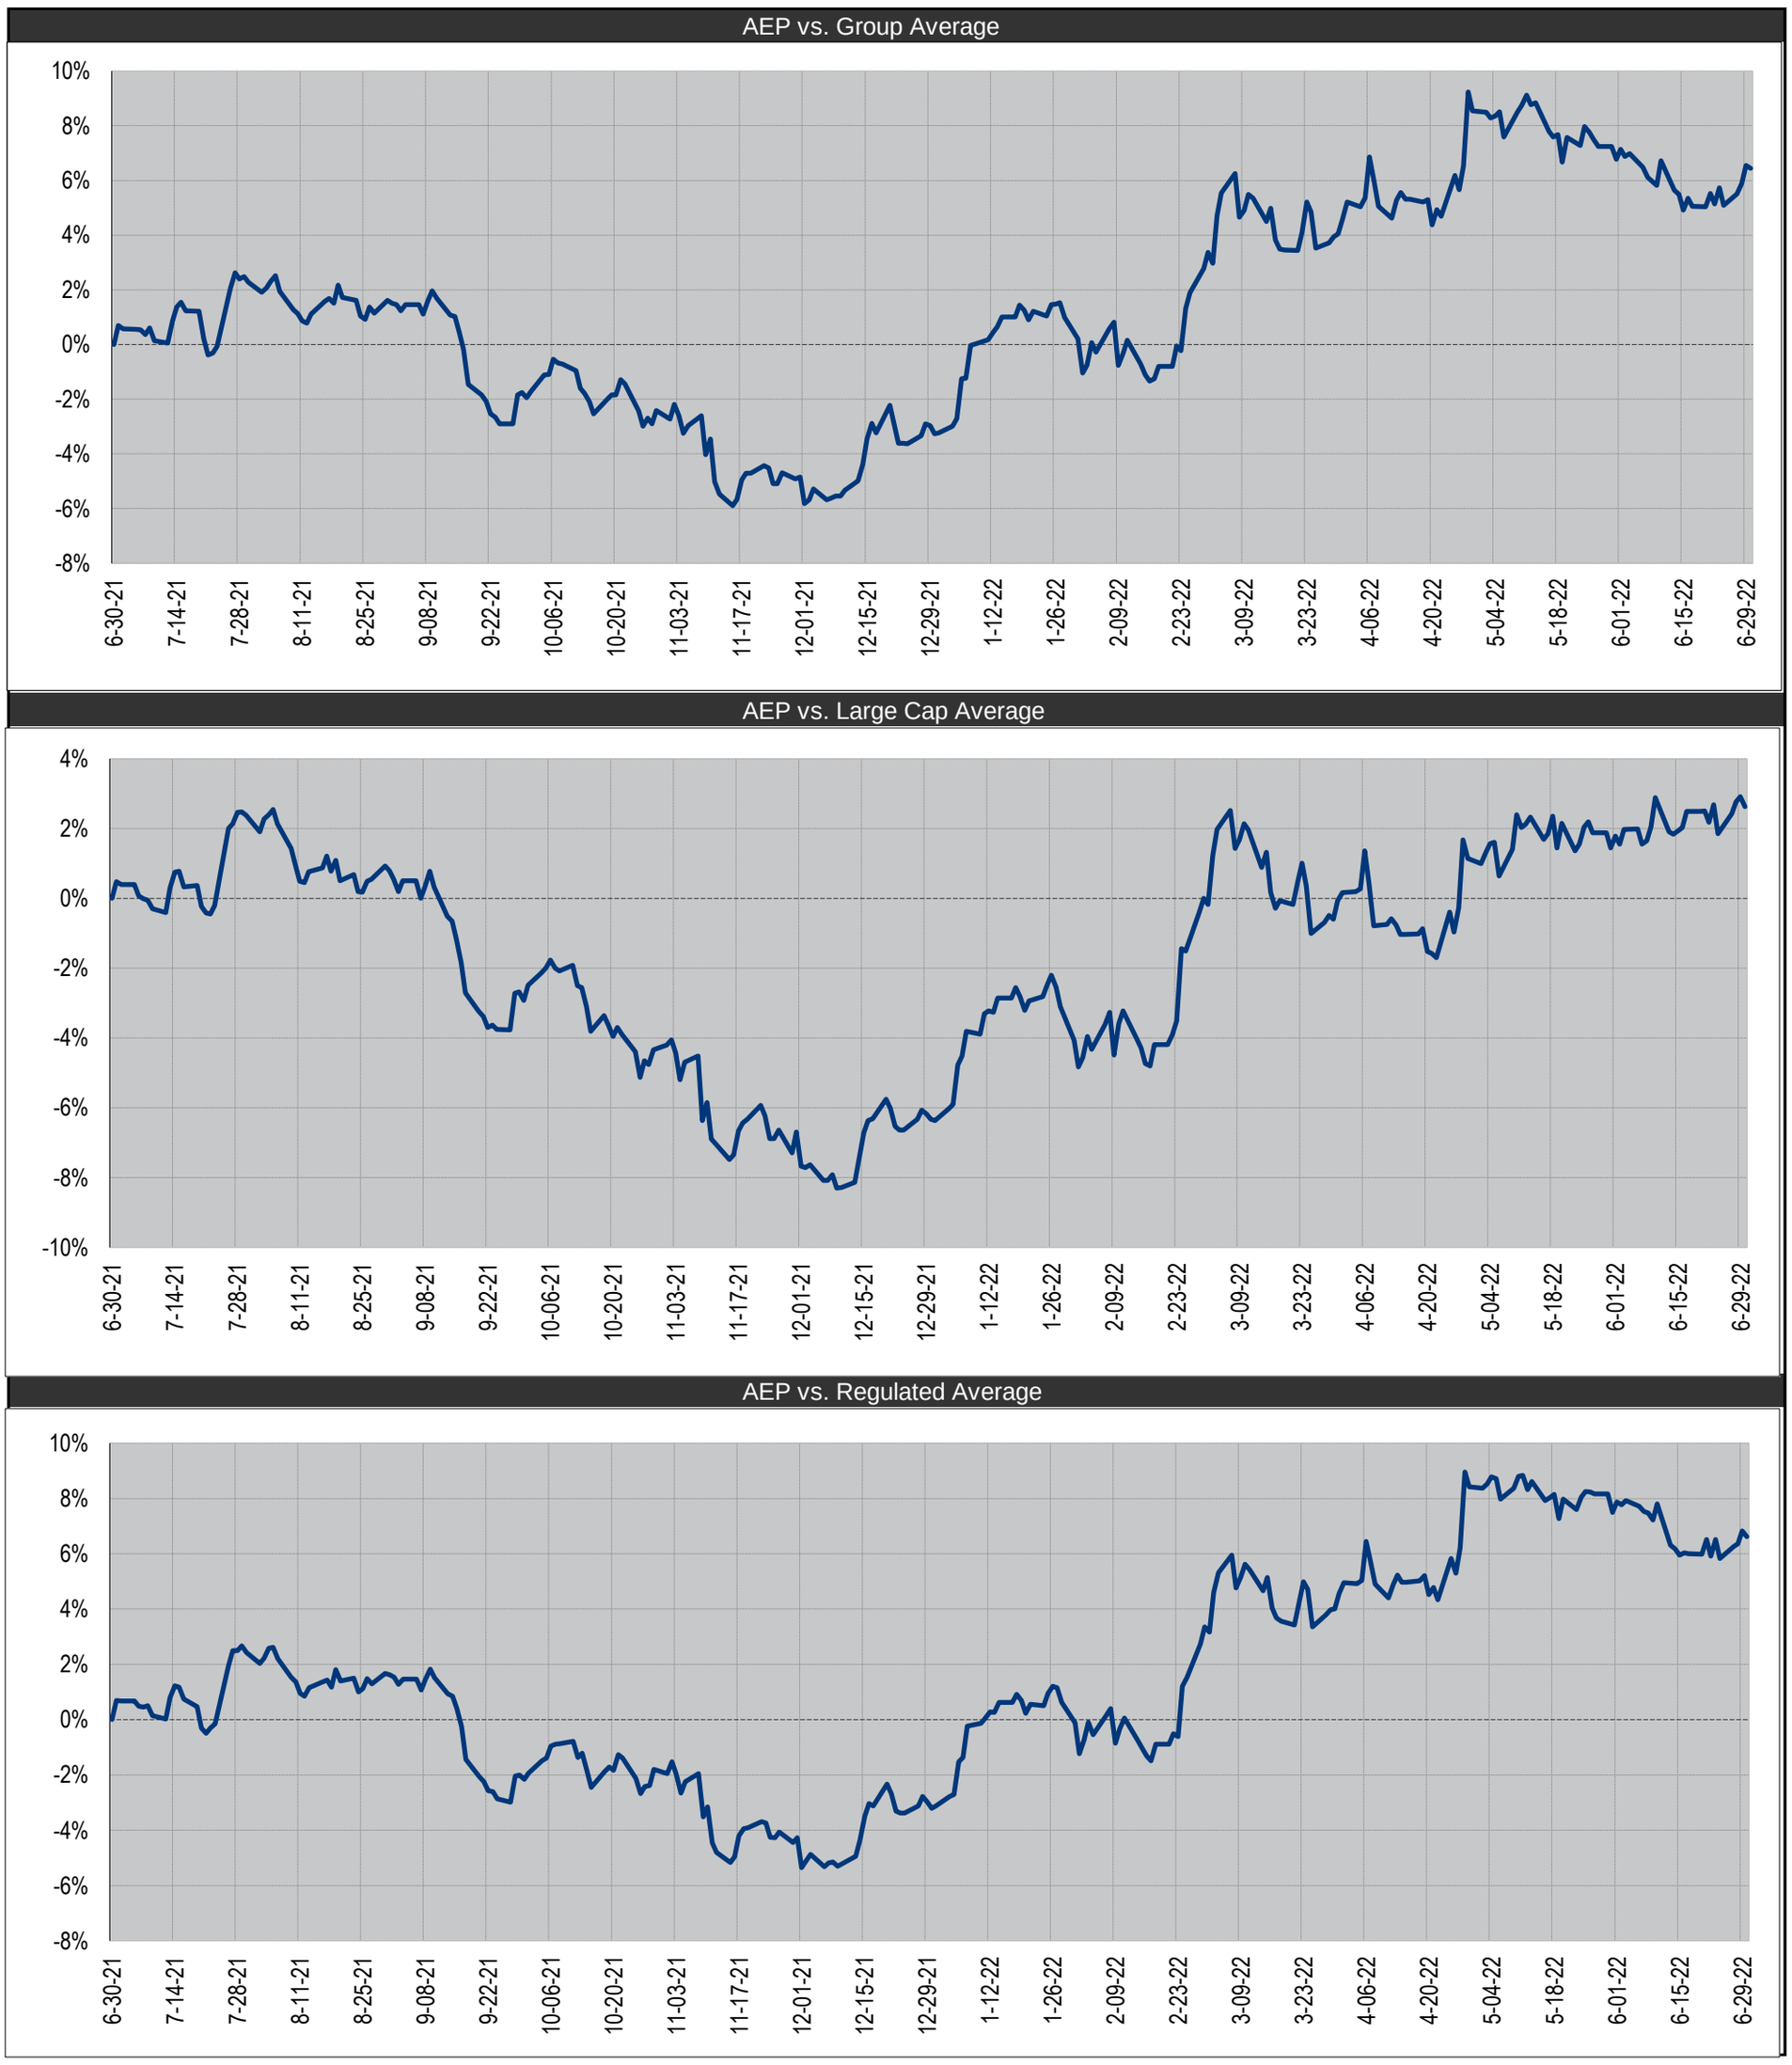
Ameren (AEE) $90.36, Outperform, $103 PT

The stock sharply fell in Jun relative to peers after hitting a 52-week relative high in mid-May but recovered to finish flat for the month after its updated IRP filing showed more future renewables/gas investments.



AEE vs. Group Average

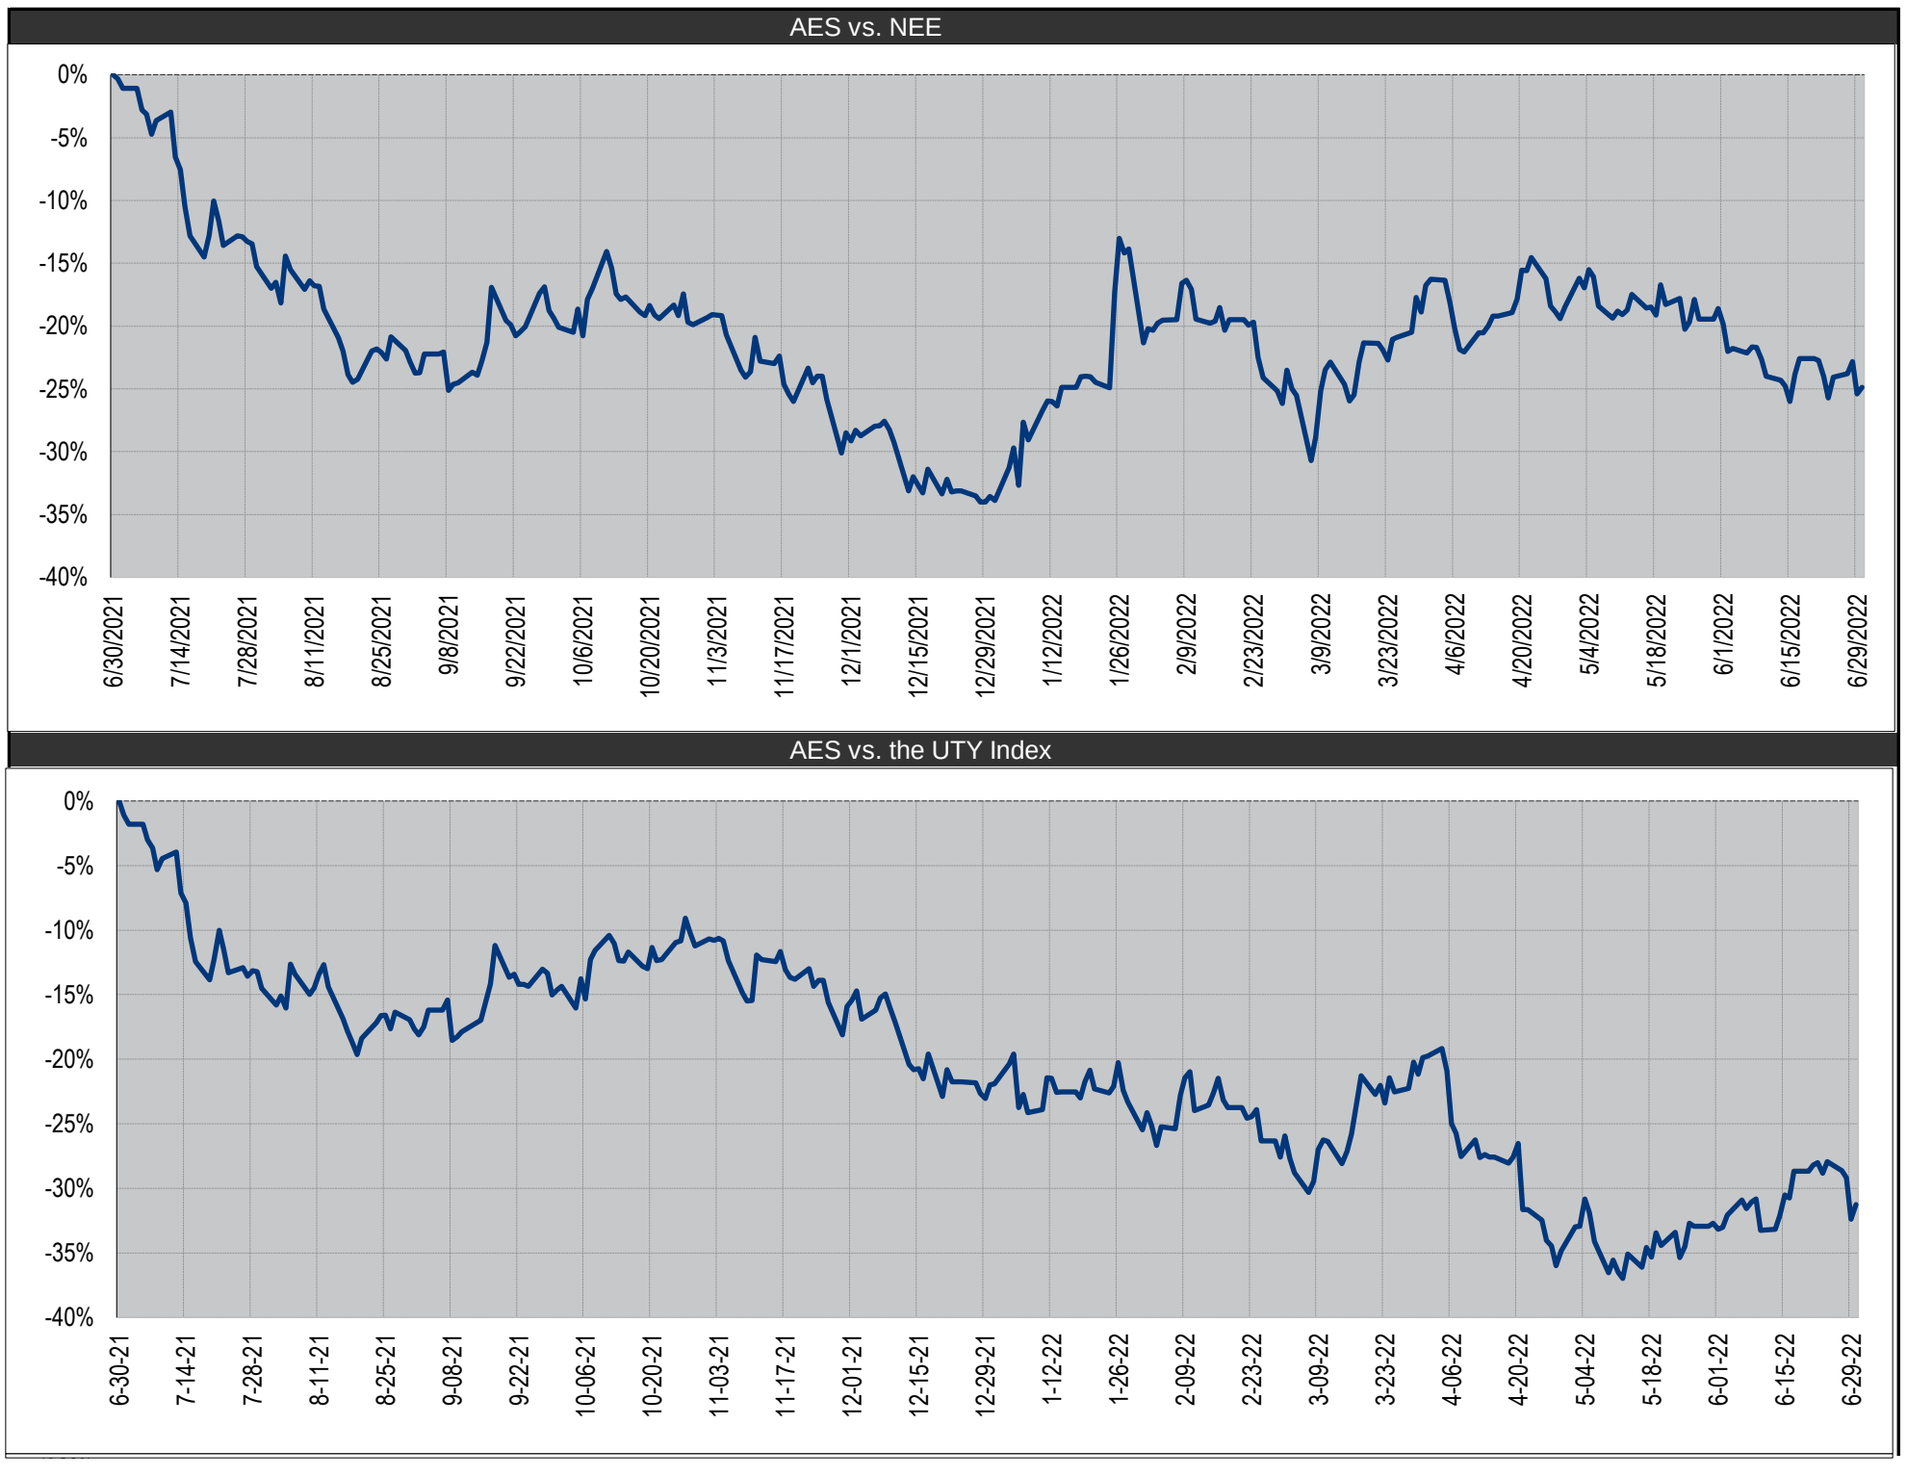
AEE vs. Mid Cap Average



AEE vs. Regulated Average

WOLFE RESEARCH

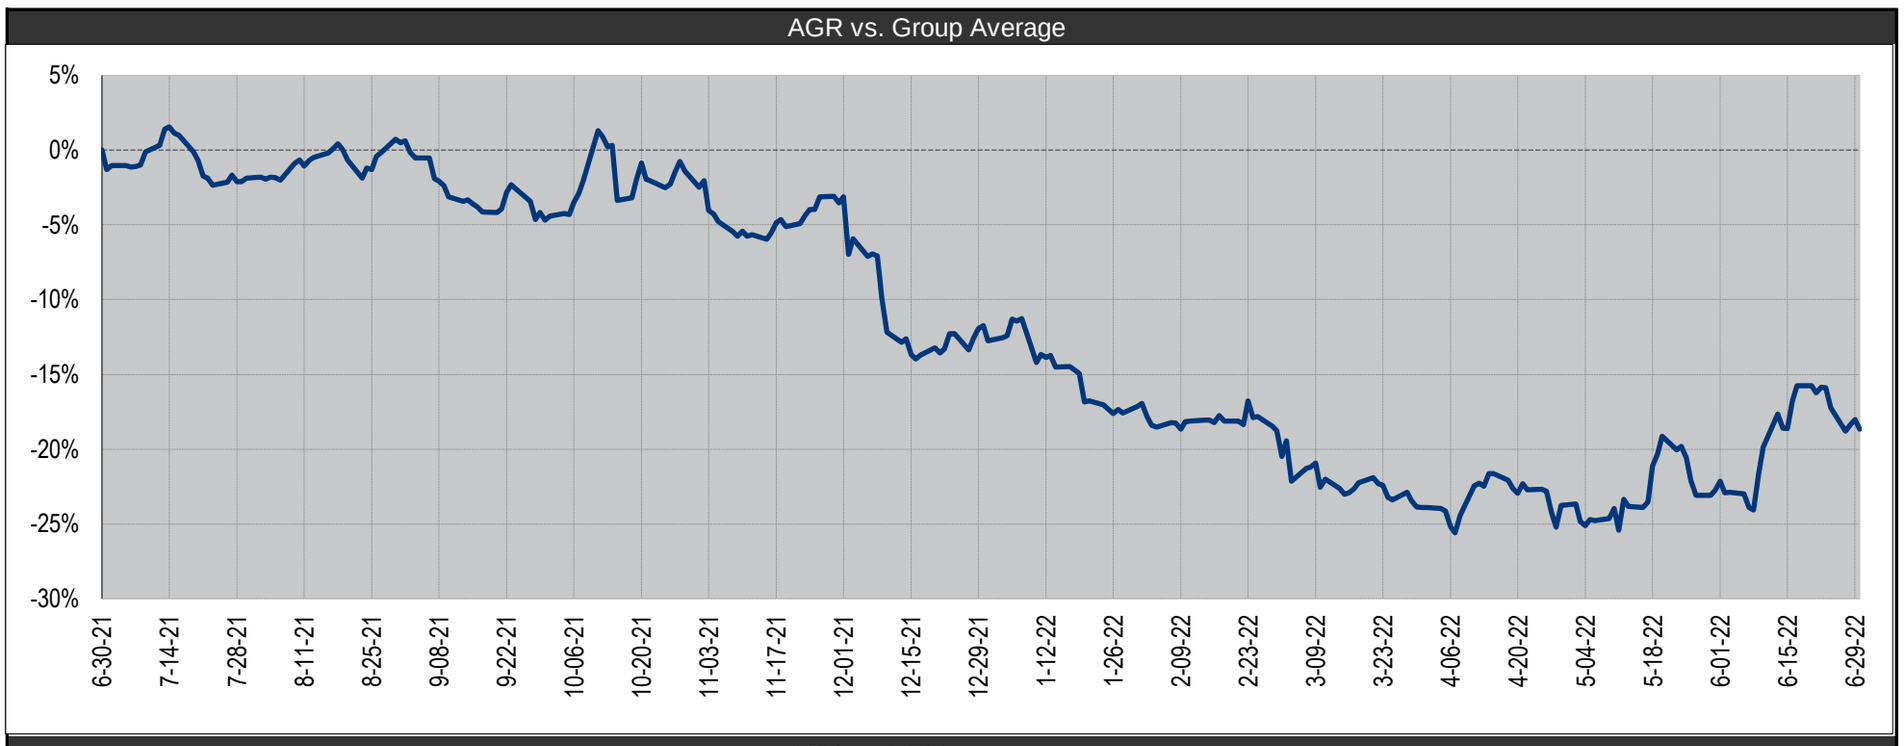
American Electric Power (AEP) $95.94, Peer Perform, $107 PT



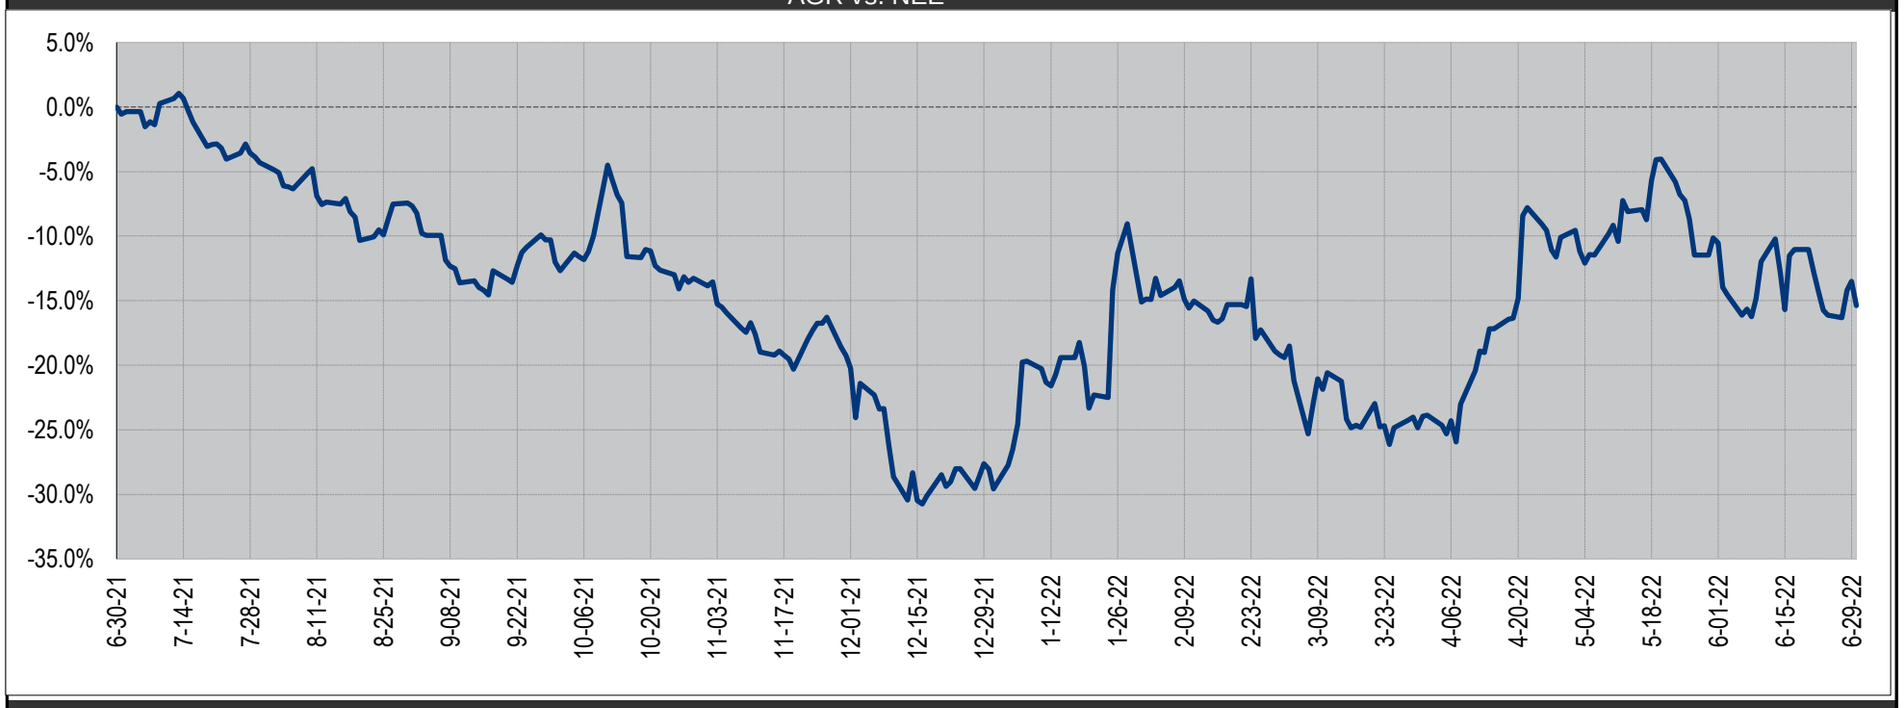
The stock modestly trailed peers on little news aside from some Midwest storm-related outages.

WOLFE RESEARCH

AES Corporation (AES) $21.01, Outperform, $30 PT



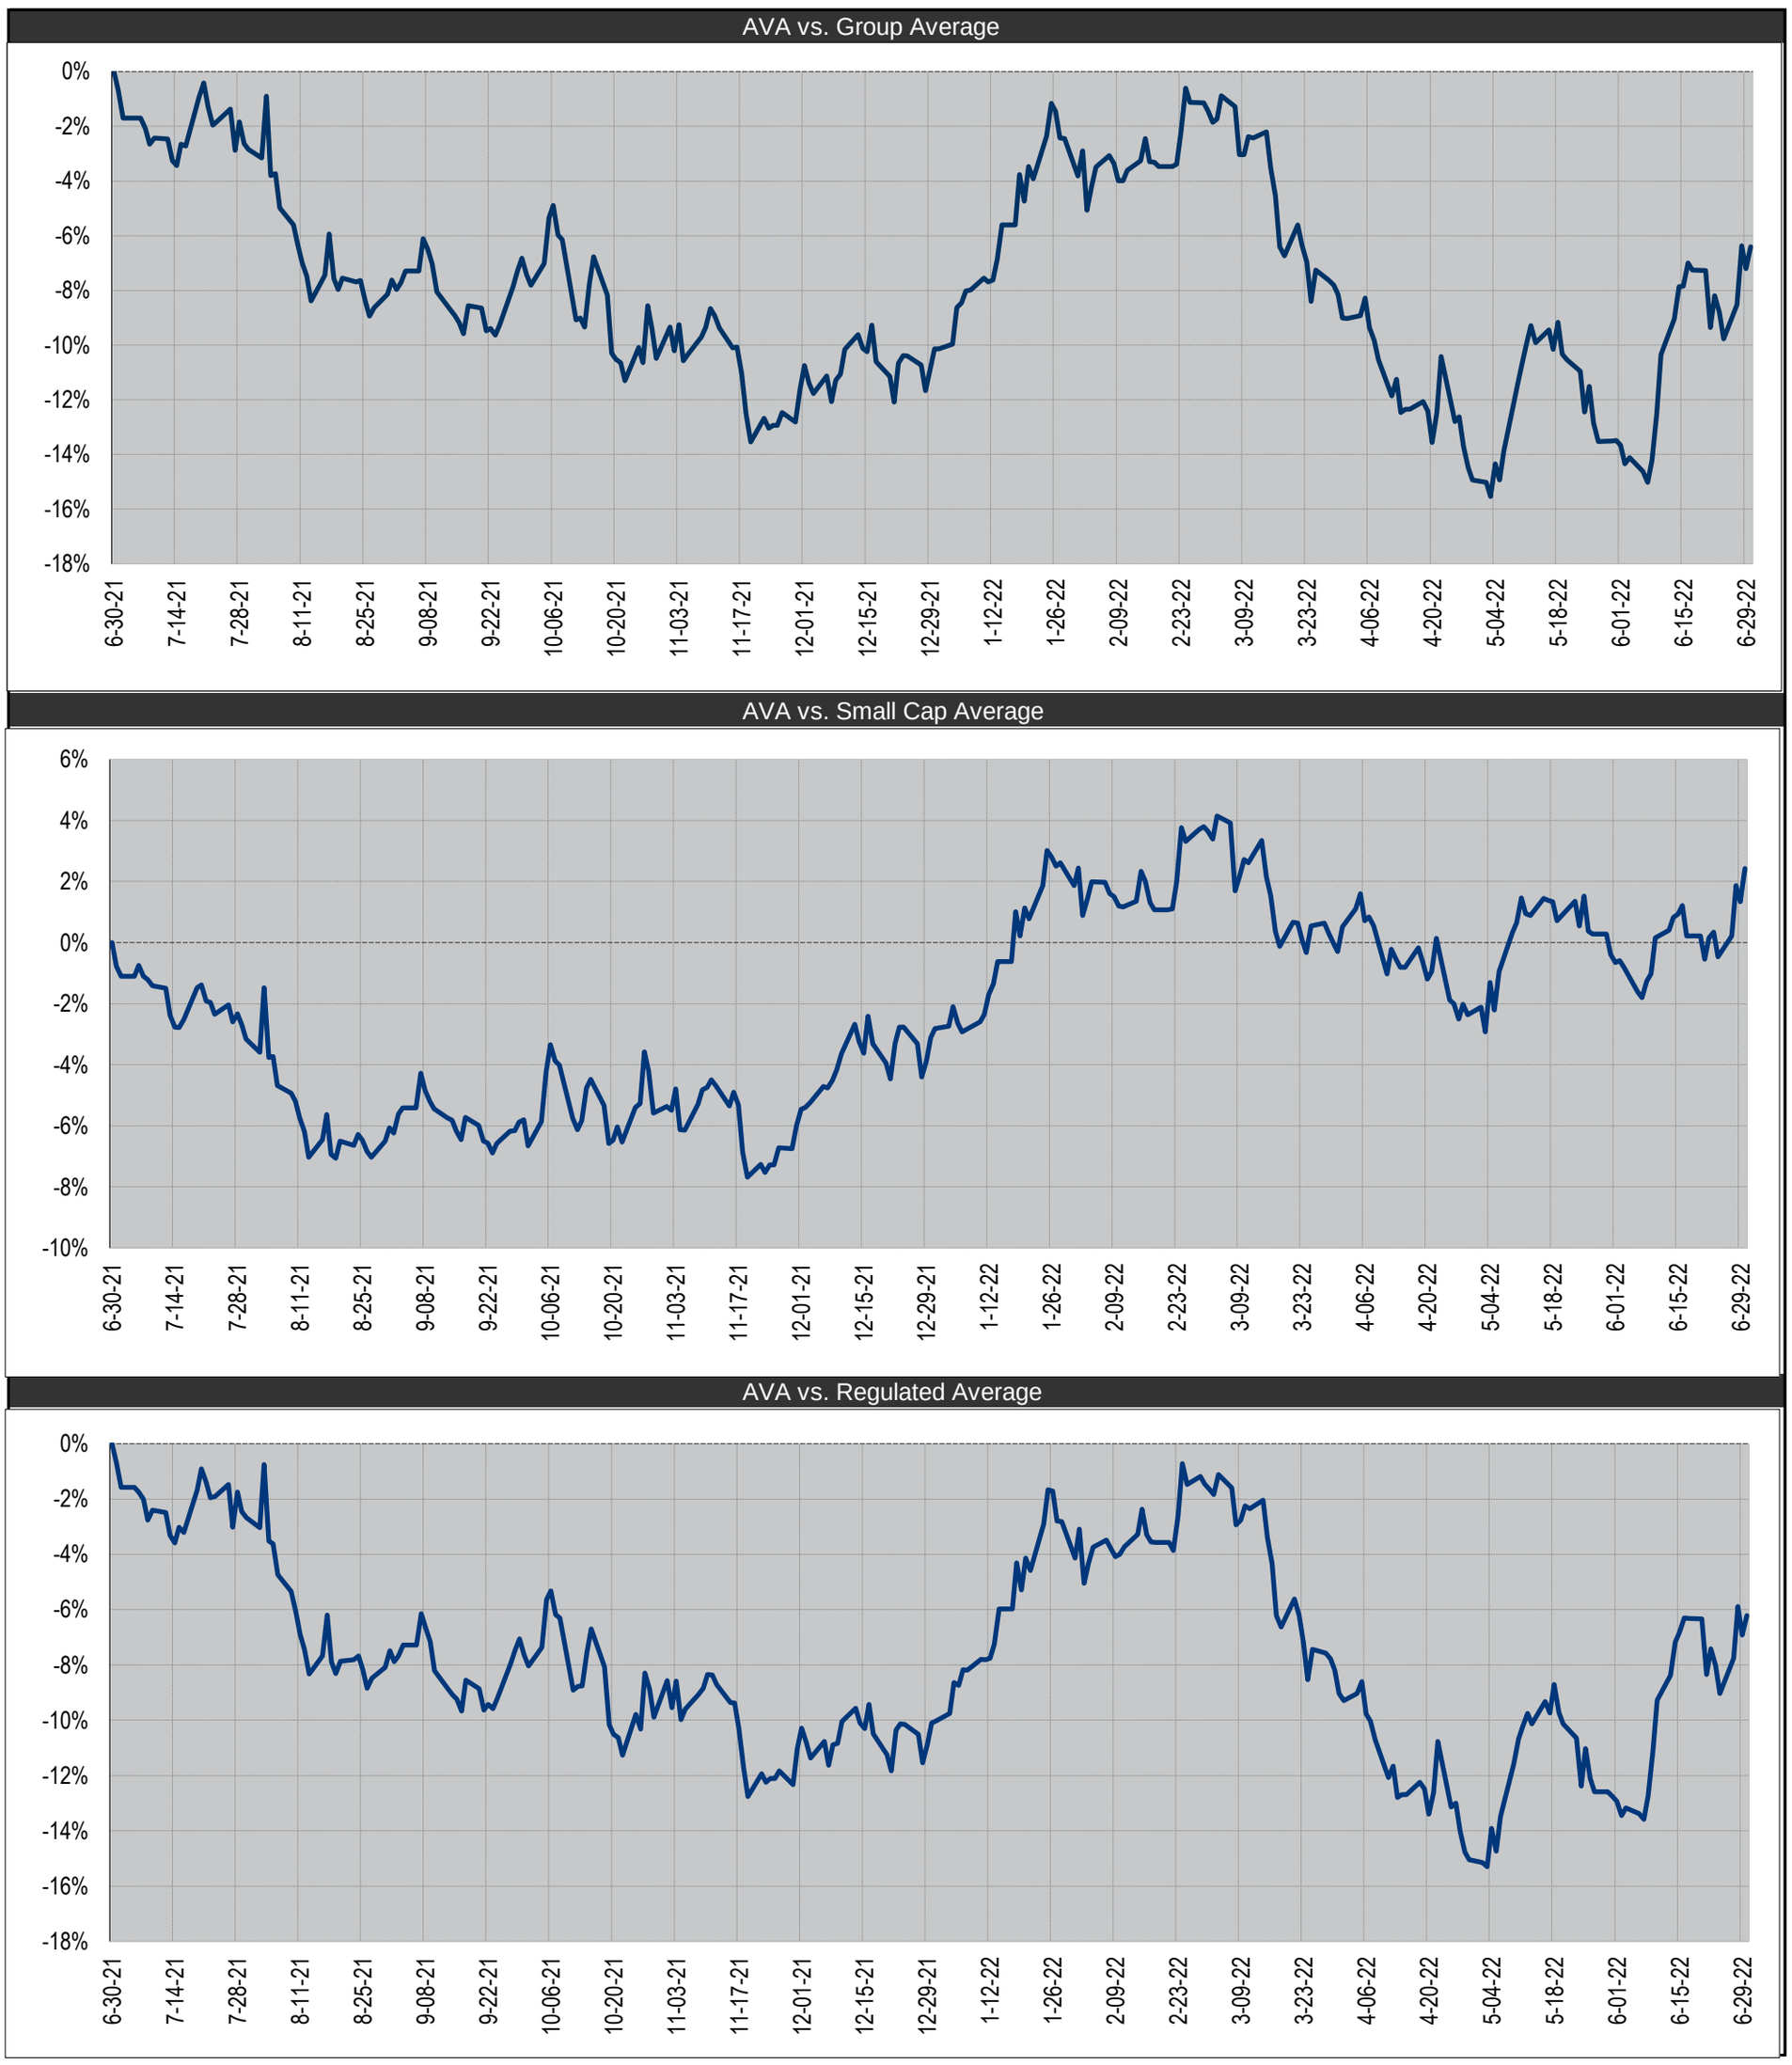
AES modestly outperformed the utilities index in June but is one of the worst performers through the 1H of 2022. During June, AES and several other renewable developers announced the formation of the US Solar Buyers Consortium in an effort to spur development of the solar supply chain within the US. We believe this was some evidence of the company's confidence that the Biden Administration's 24-month pause on any new tariffs would be sufficient to fix the global supply chain issues for solar.



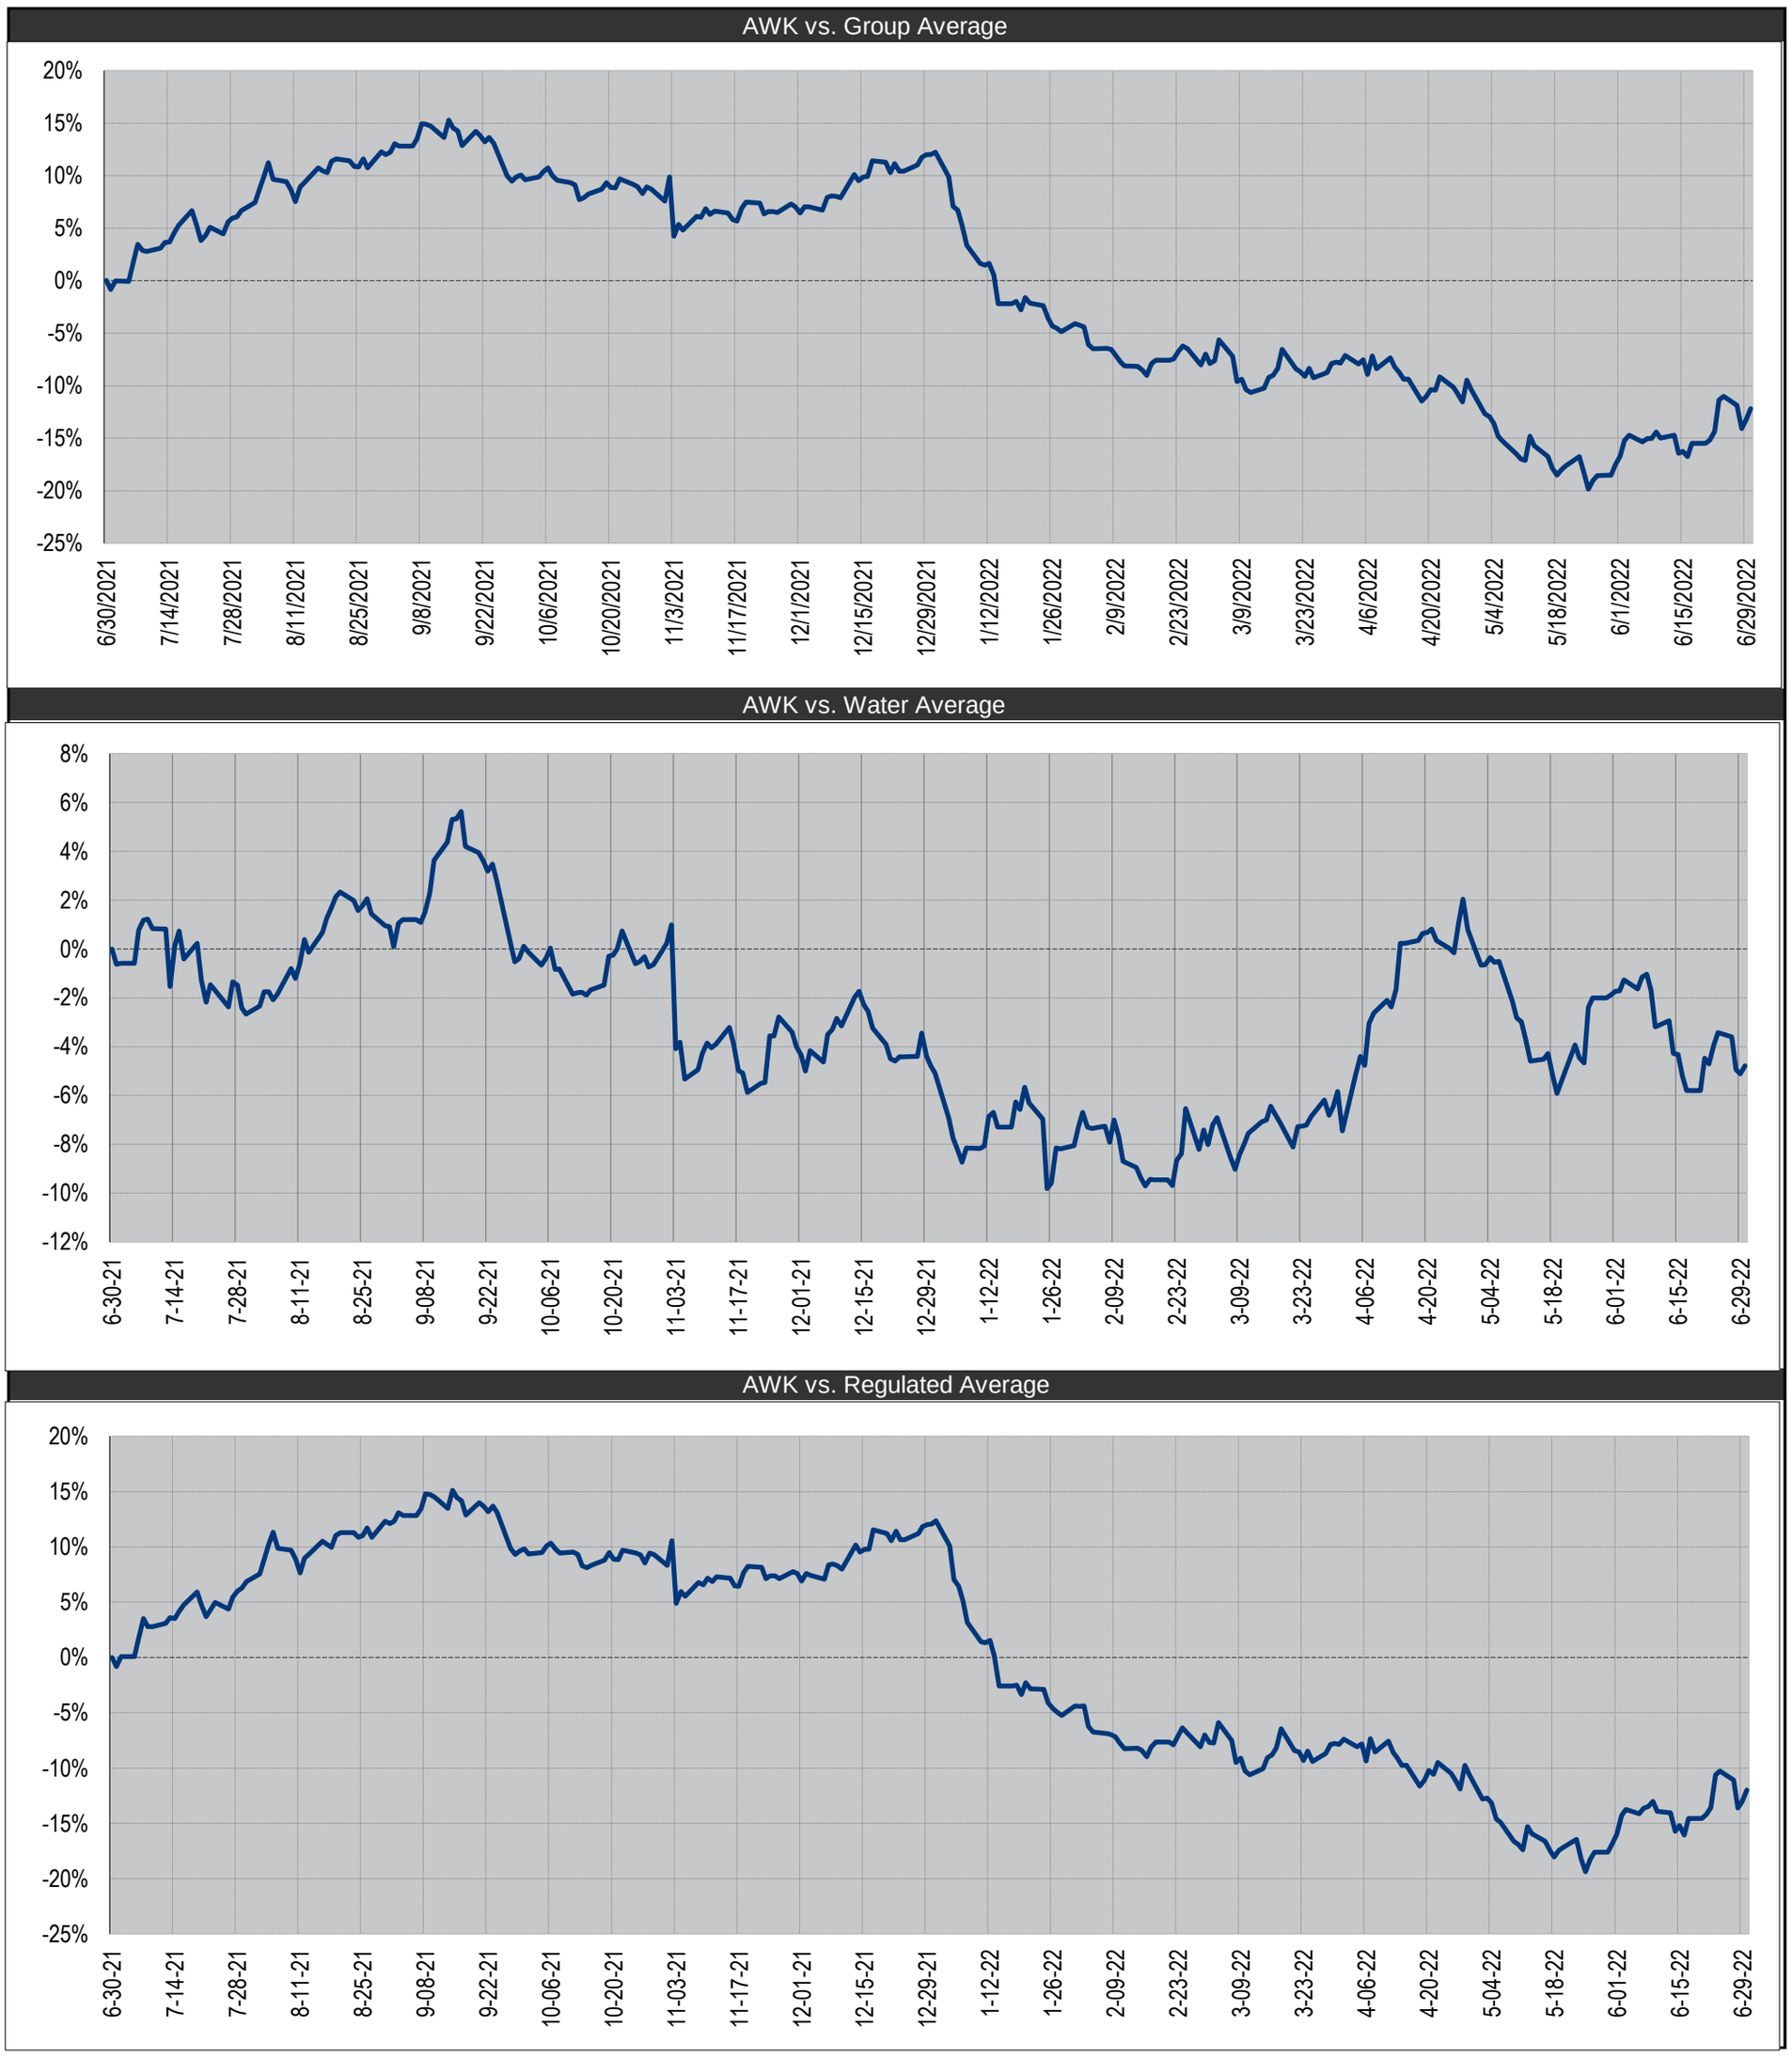
WOLFE RESEARCH

Avangrid (AGR) $46.12, Underperform, $46 PT

The stock was one of the best performers in June, as all the renewables names bounced after President Biden took executive action to stop any new solar tariffs for 2 years – removing a big overhang sector (AGR's solar development plans are actually relatively modest in the scheme of the company). AGR is still underperforming on the year though.



WOLFE RESEARCH

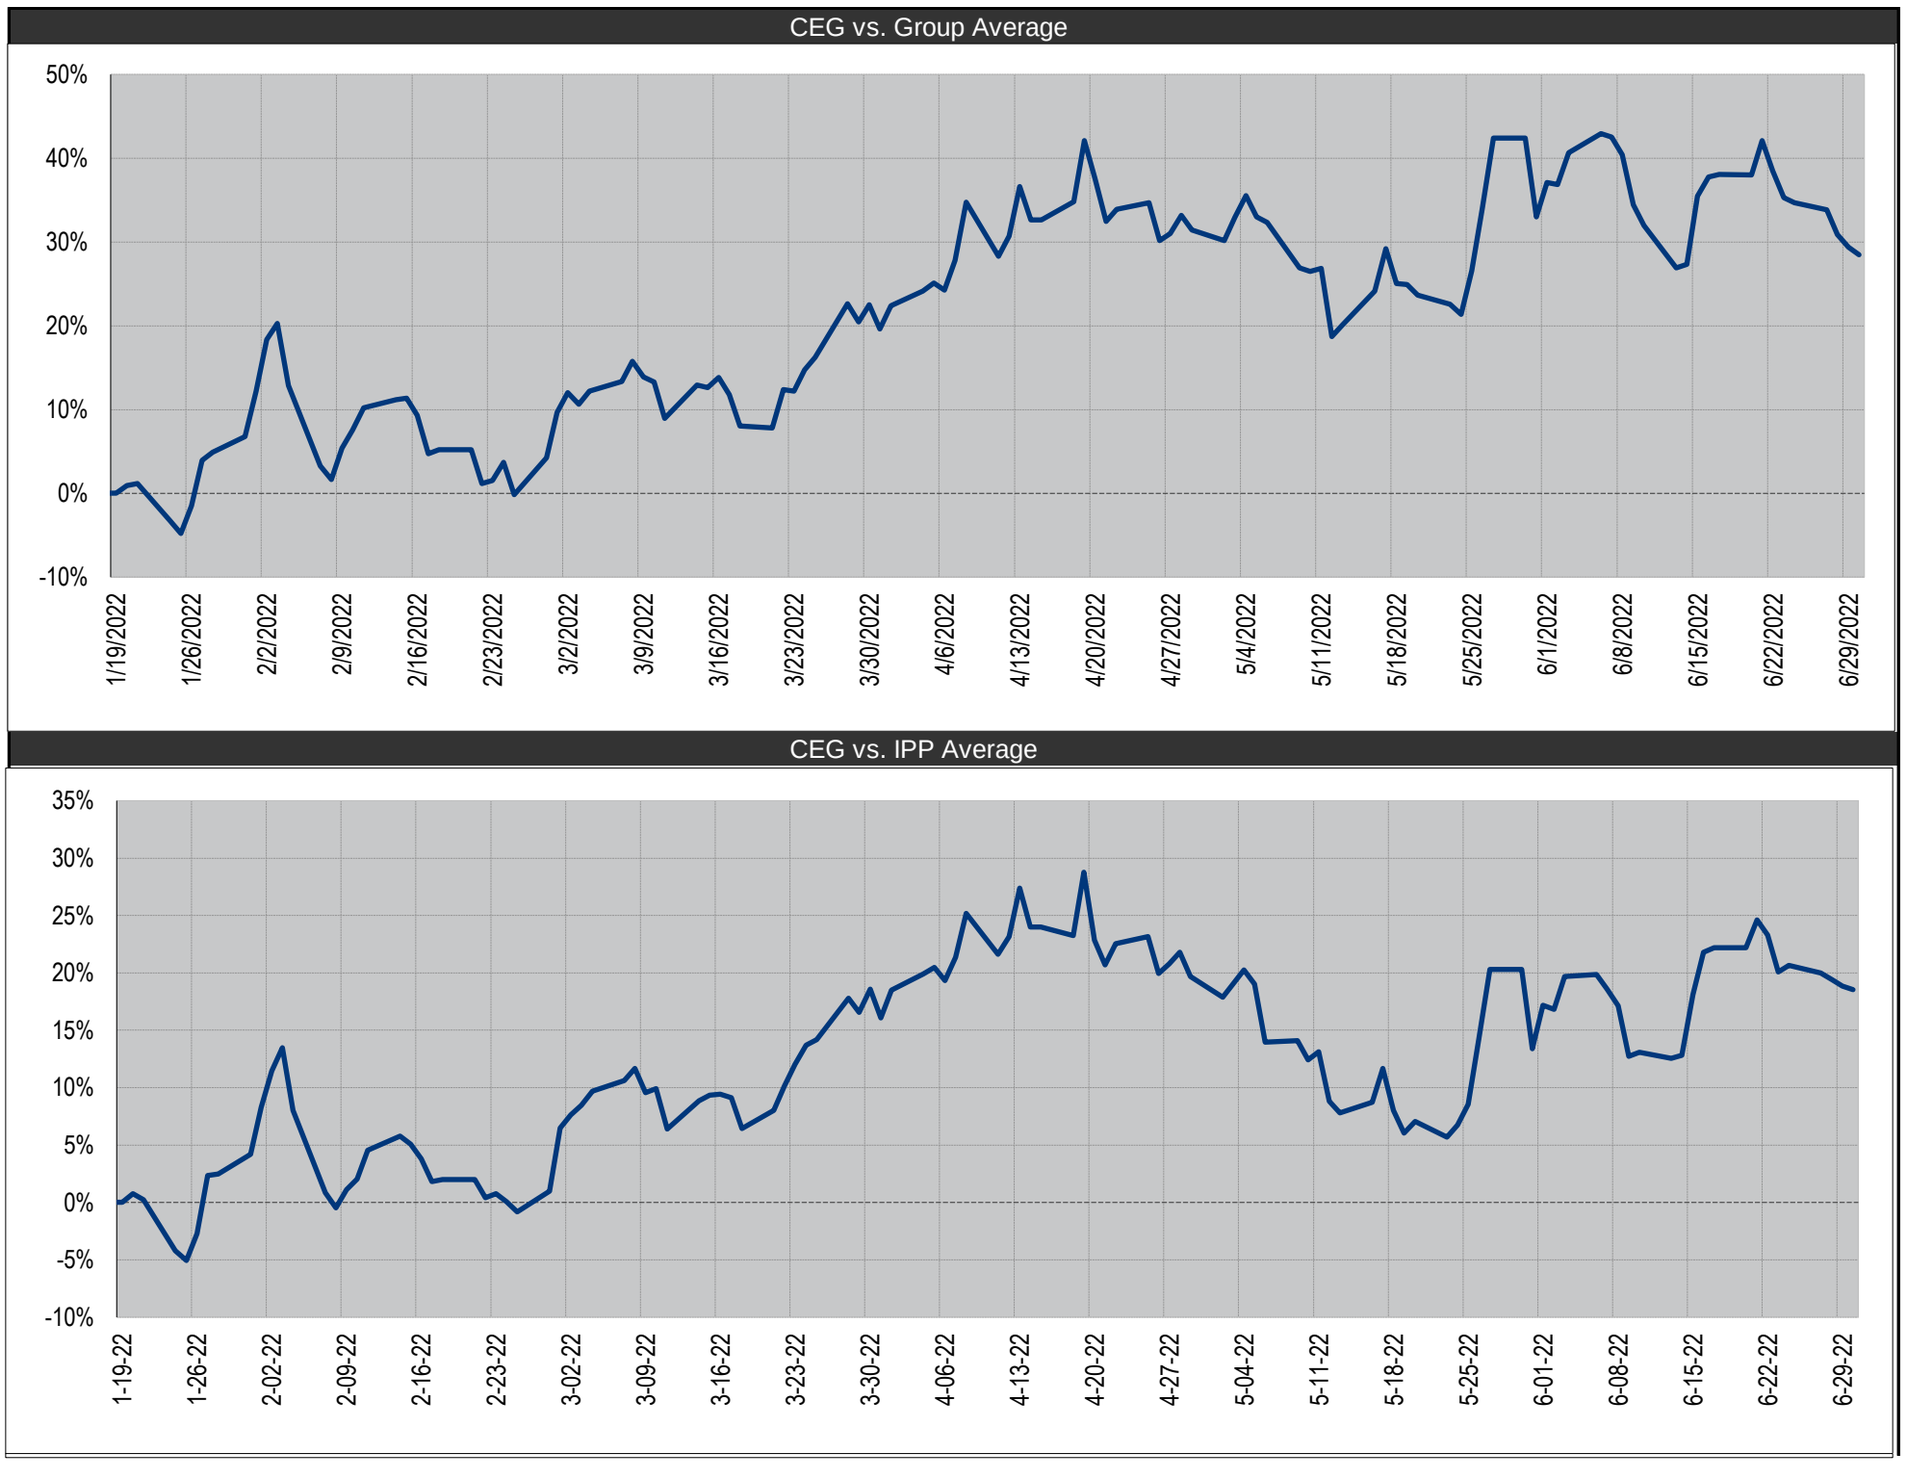


Avista Corporation (AVA) $43.51, NR

WOLFE RESEARCH

American Water Works (AWK) $148.77, Peer Perform, $152 PT

AWK was amongst the best performers in June, and this coincided with NEE surging as both these stocks are considered the QQQ of utilities. At month-end, AWK's Military Services Group secured a ~$341M, 50-year contract for Naval Station Mayport, FL. That said, AWK remains the worst performer YTD due to the decline in high-growth, ESG leader stocks as the market turned risk off at the turn of the year.

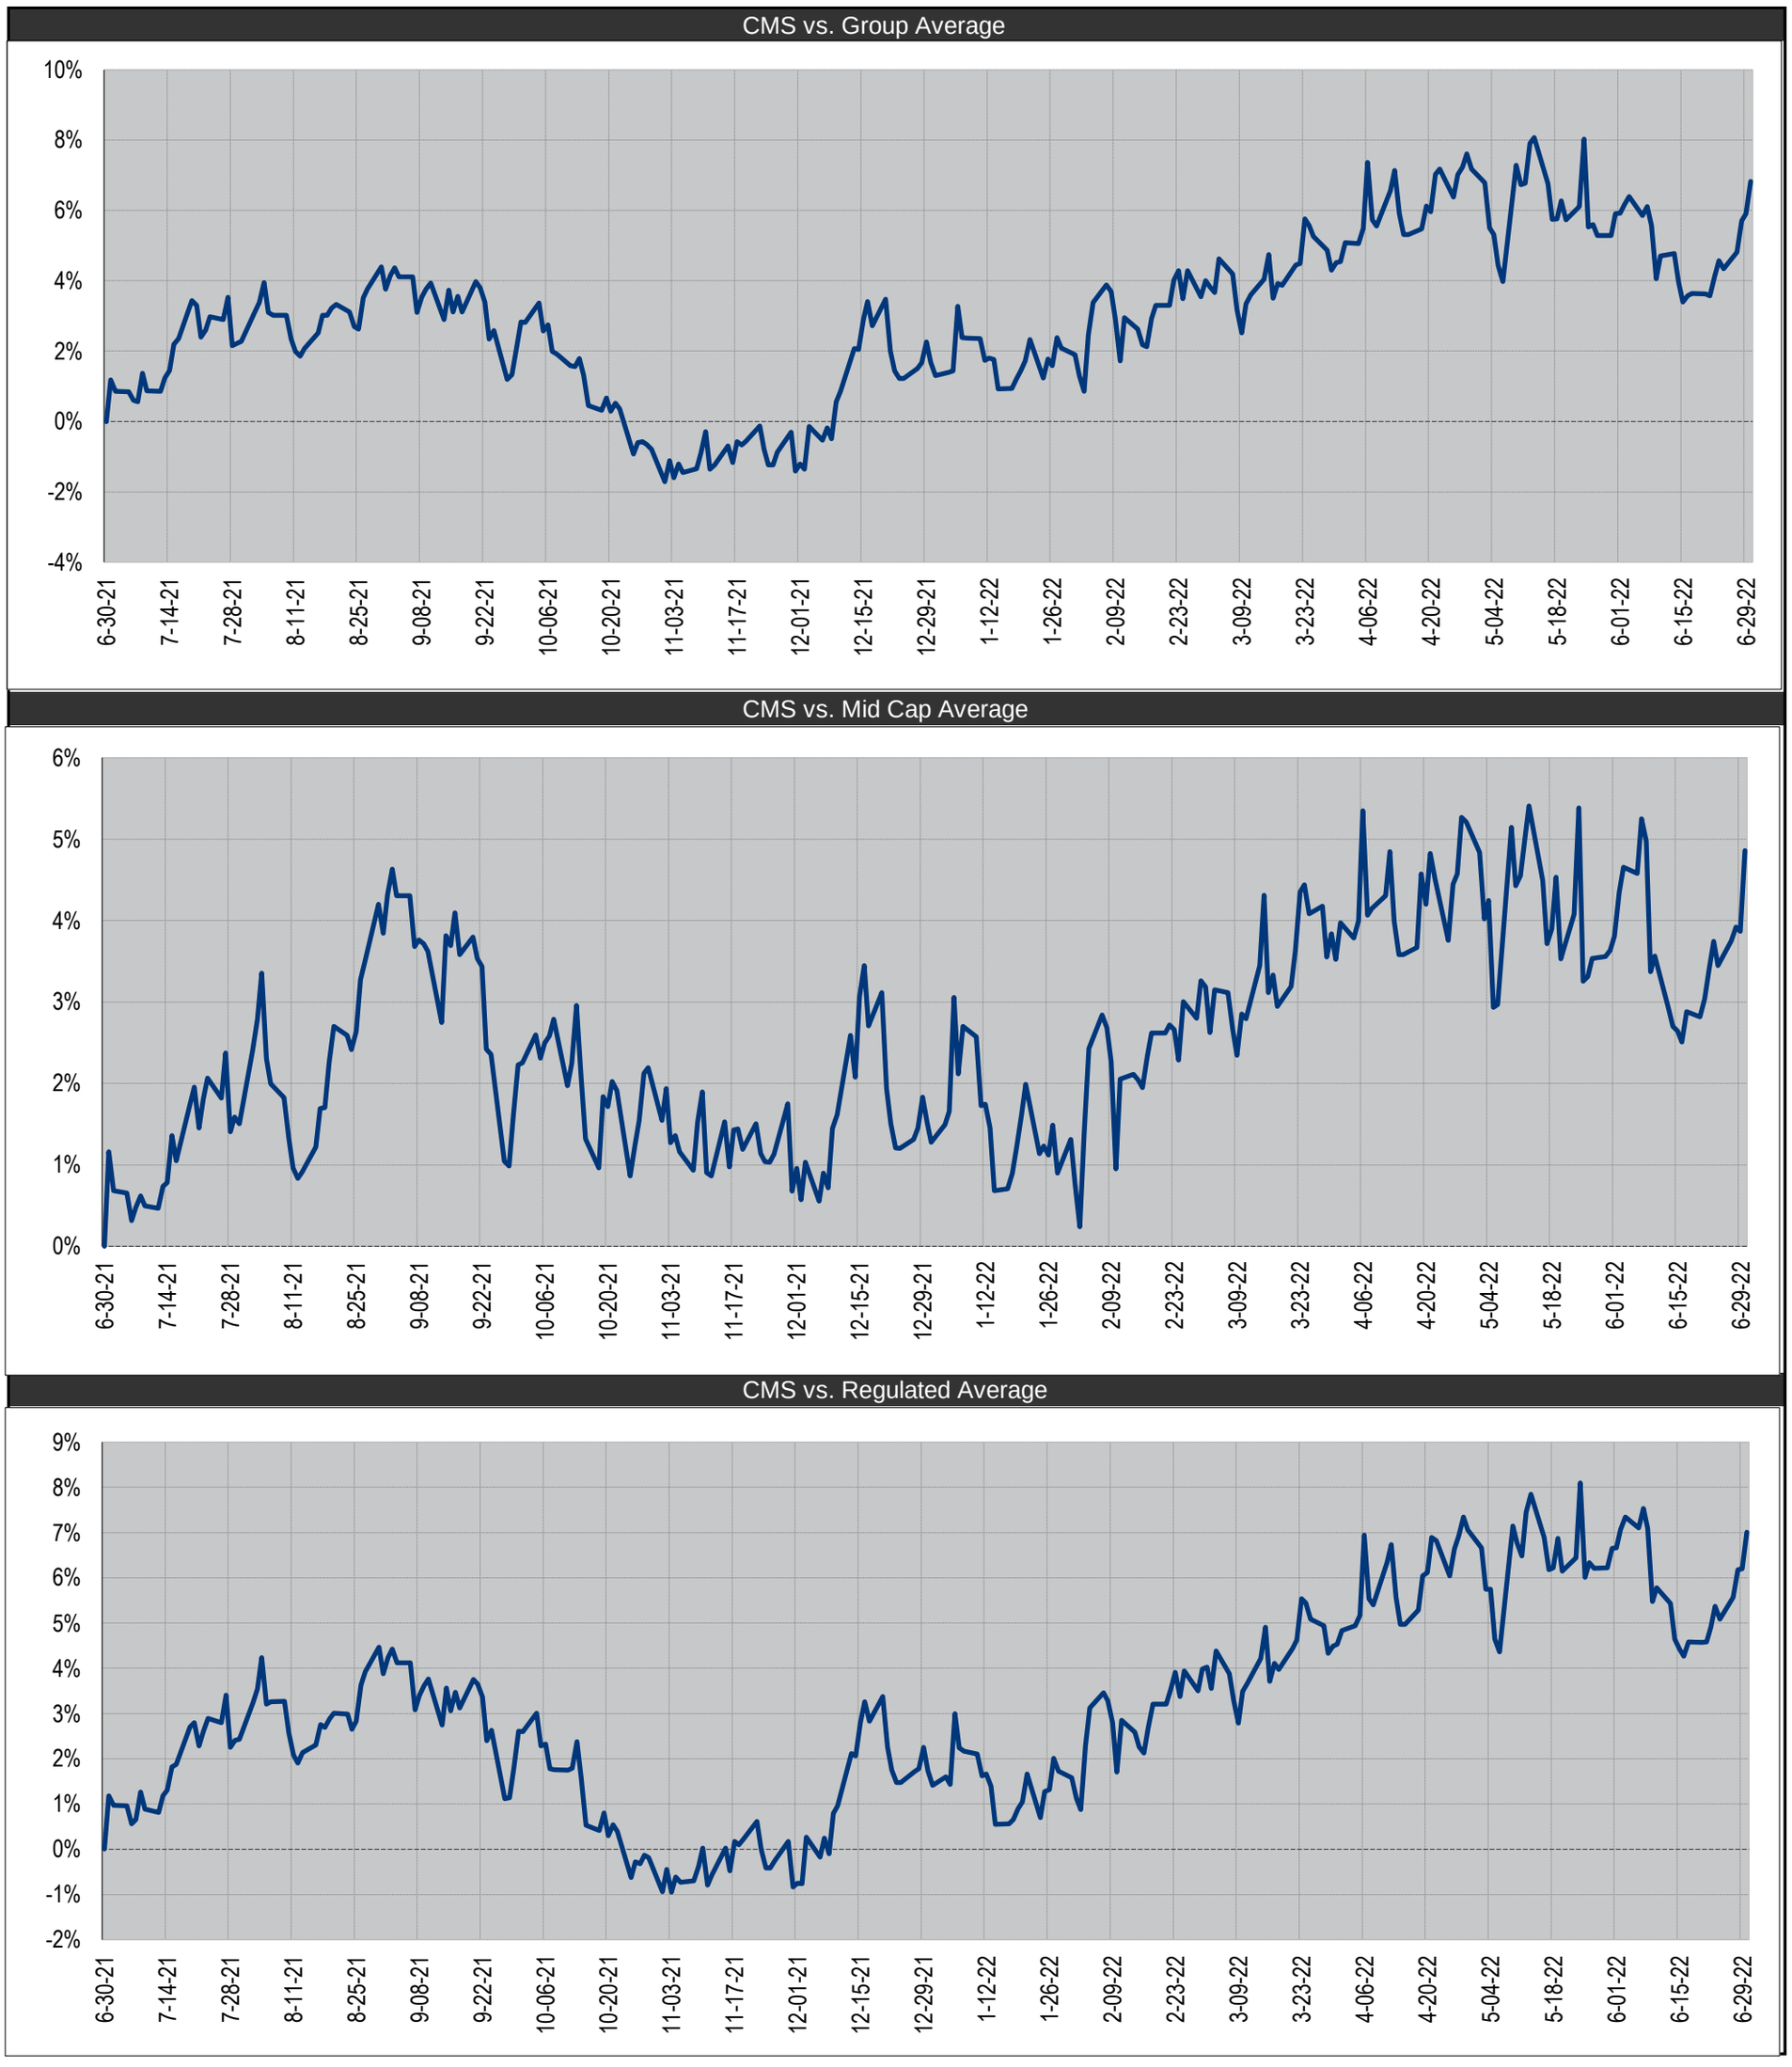


Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Constellation Energy Corporation (CEG) $57.26, Outperform, $62 PT

CEG lagged our utility/power coverage in Jun but is the best performer by far YTD, given commodities boom and nuclear/carbon-free thematic.

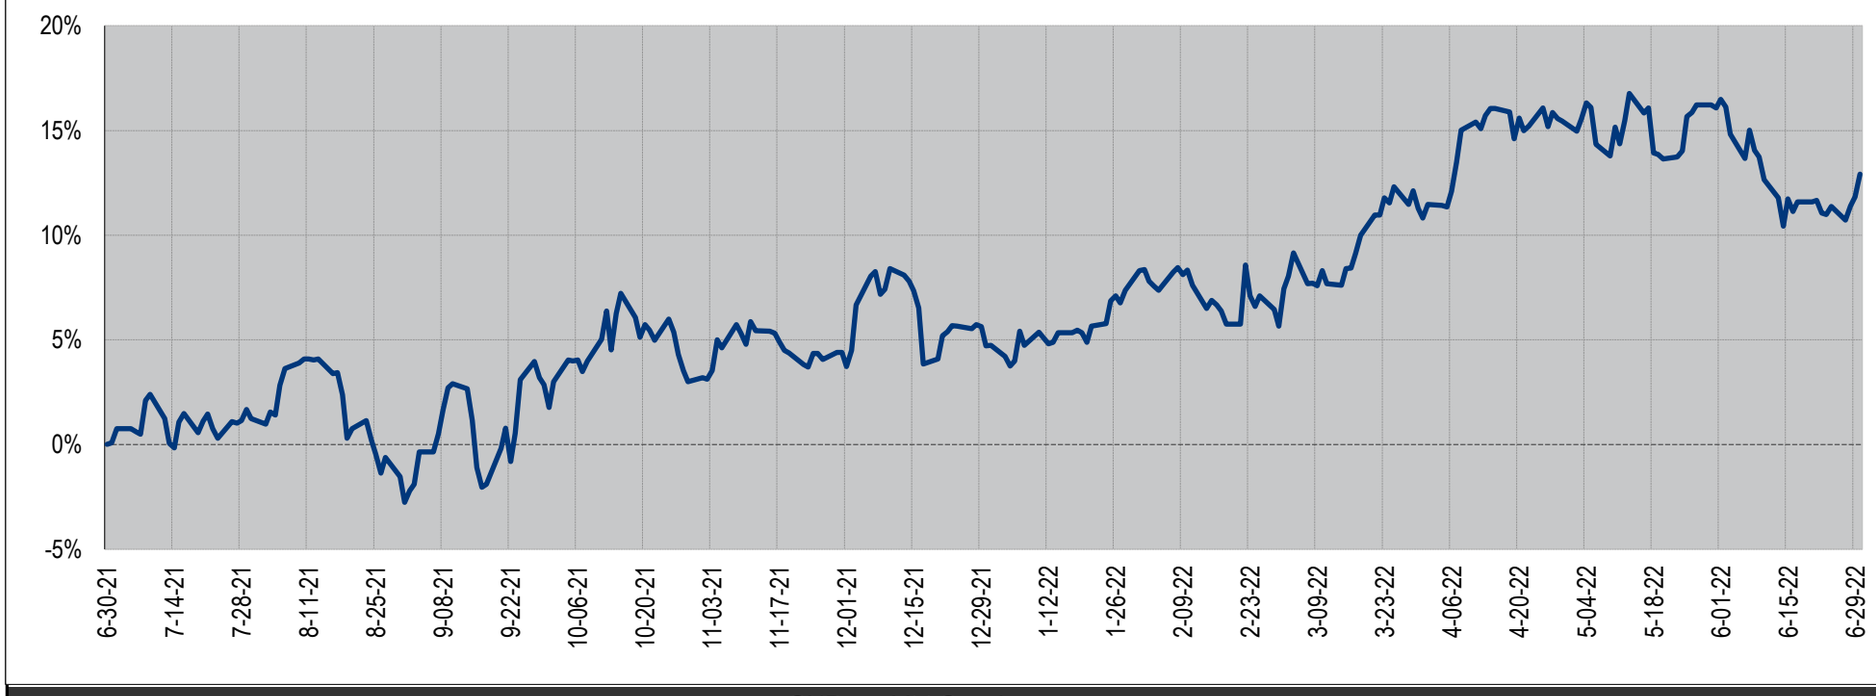


Please help us protect your advantage...
DO NOT FORWARD

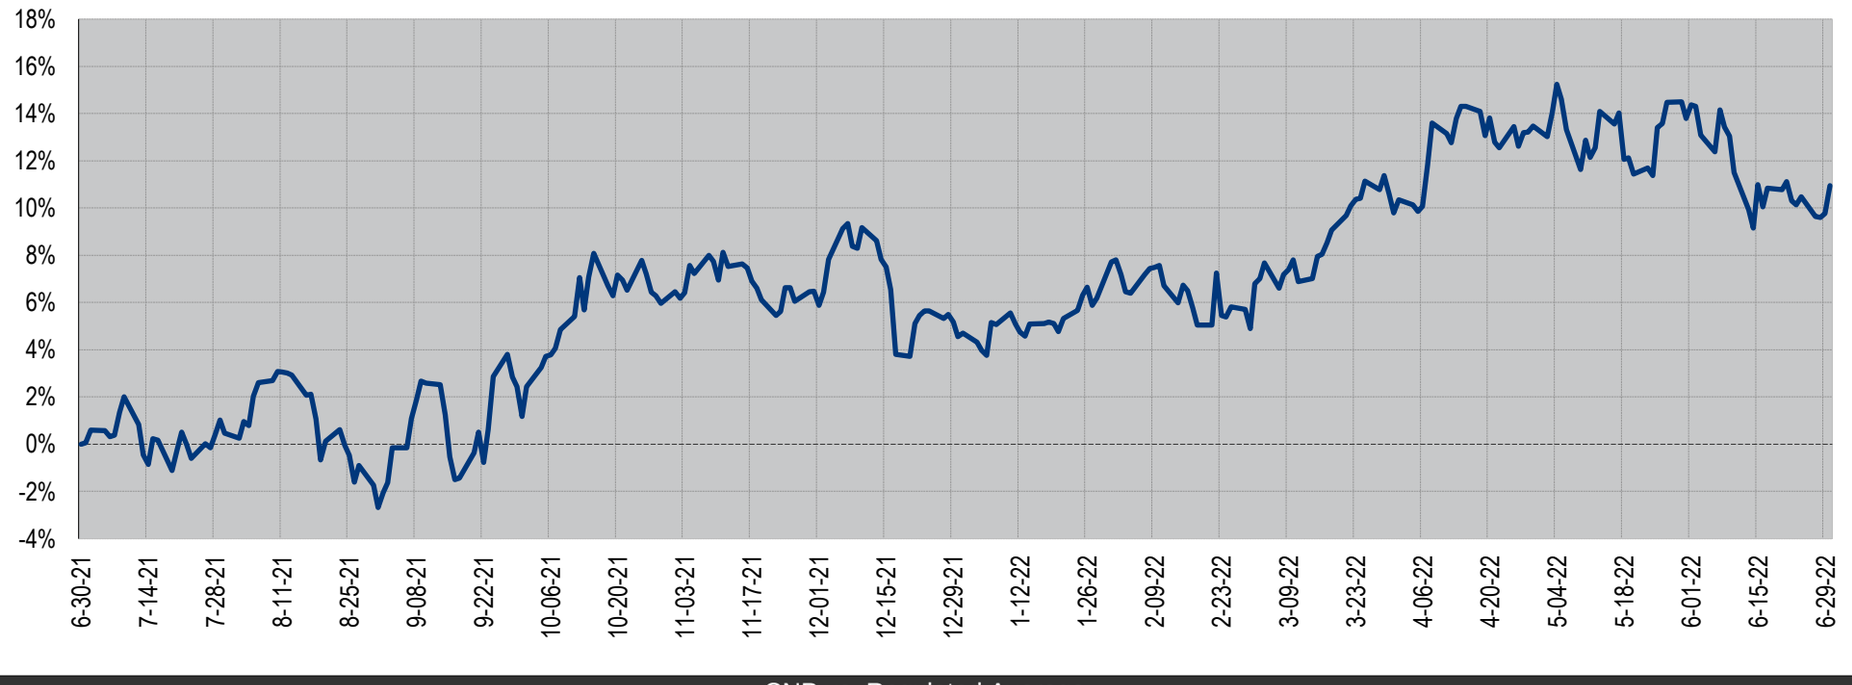
WOLFE RESEARCH

CMS Energy (CMS) $67.50, Peer Perform, $70 PT

CMS traded in-line for June, despite reaching a gas rate case settlement and seeing its Integrated Resource Plan approved by the Michigan PSC. The stock is still outperforming on the year.

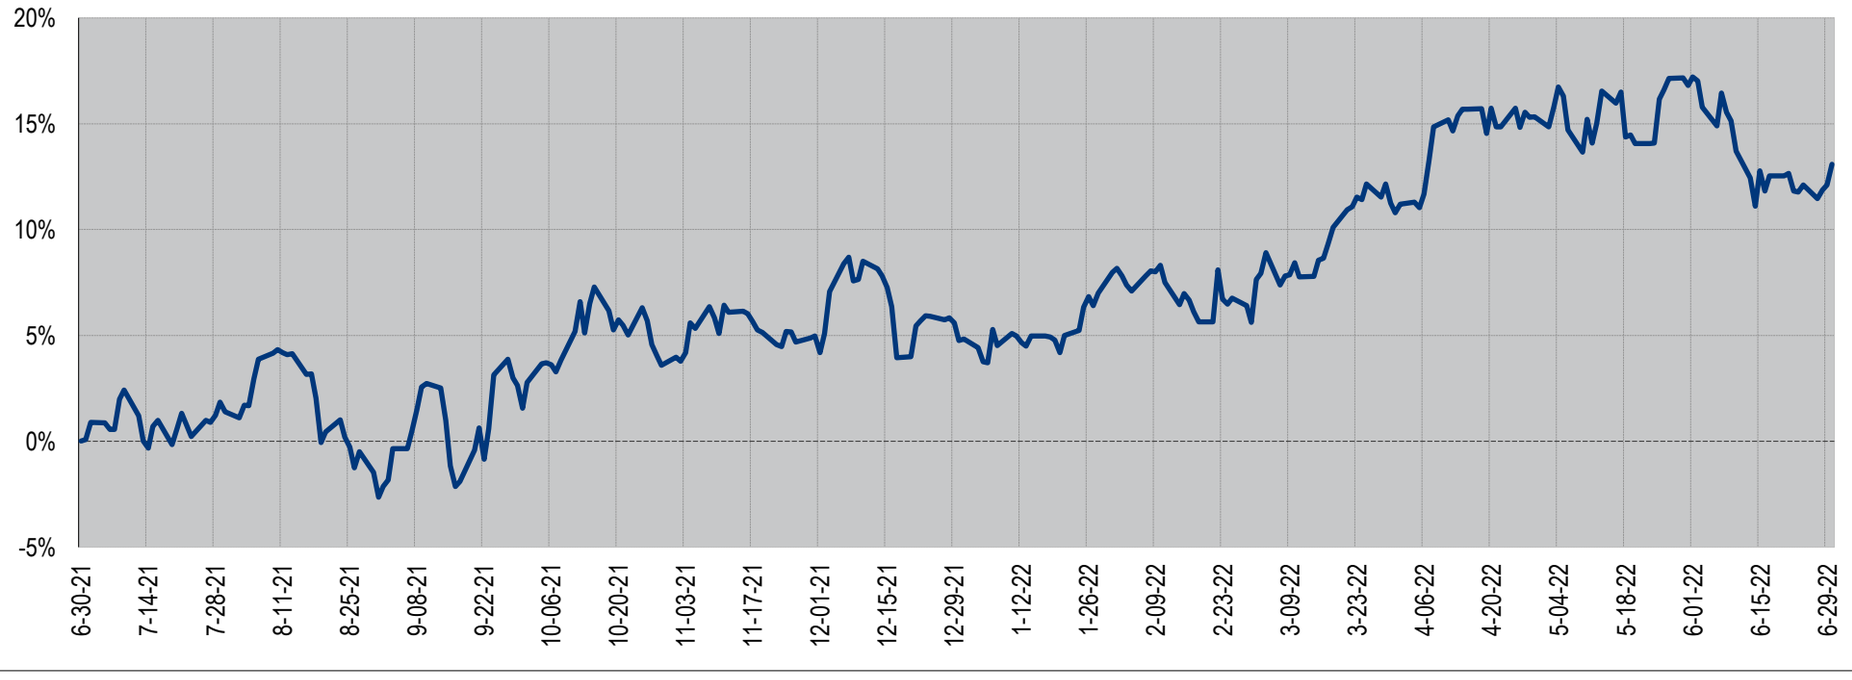


WOLFE RESEARCH



CenterPoint Energy (CNP) $29.58, Outperform, $34 PT

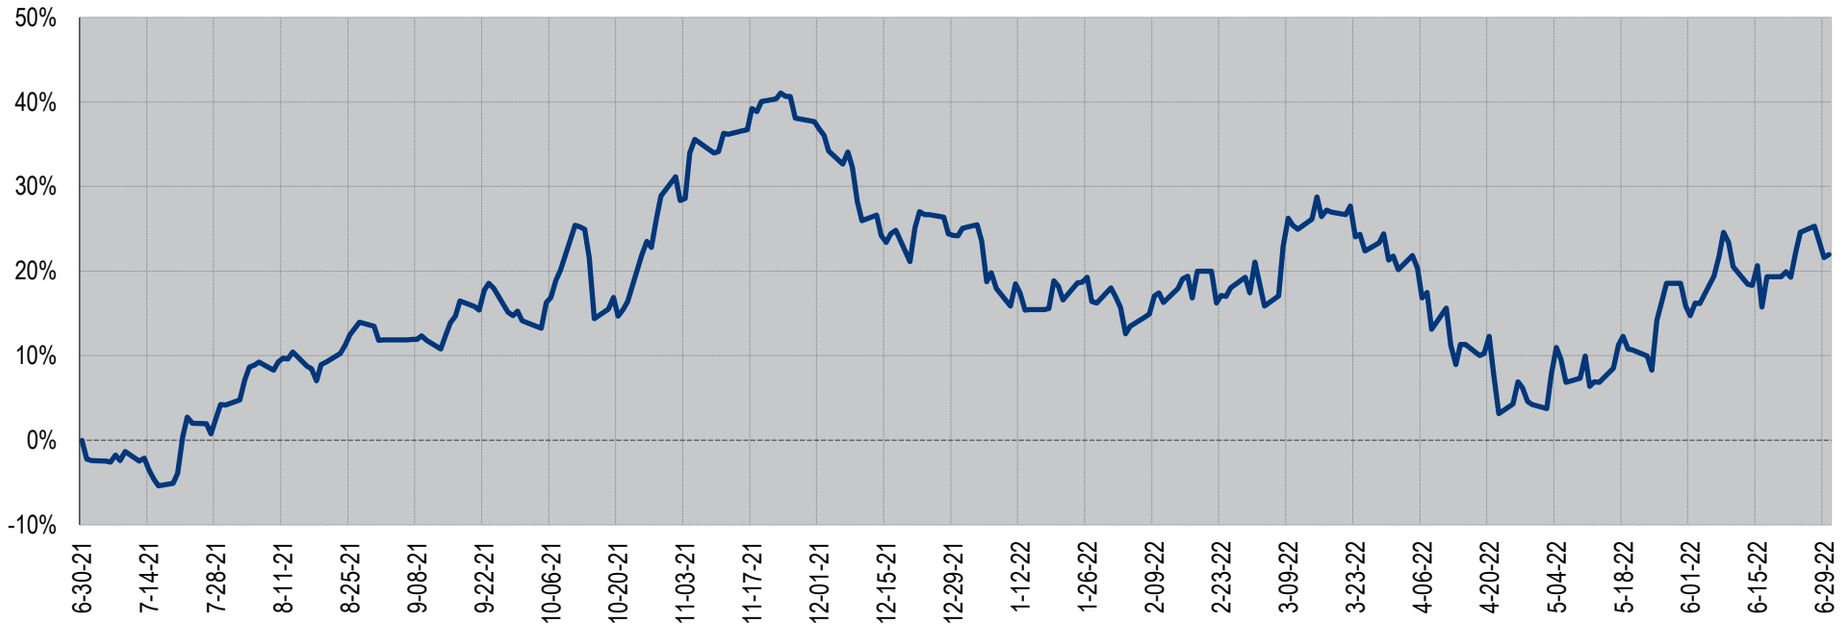
CNP underperformed the sector average in June, though is still a top-10 performer through the 1H of 2022. CNP filed a letter in June detailing that it had reached a settlement in principle in CEHE's DCRF filing in TX (covers everything but temporary generation investments). CNP also got approval of its gas CT CPCN's in Indiana from the IURC.



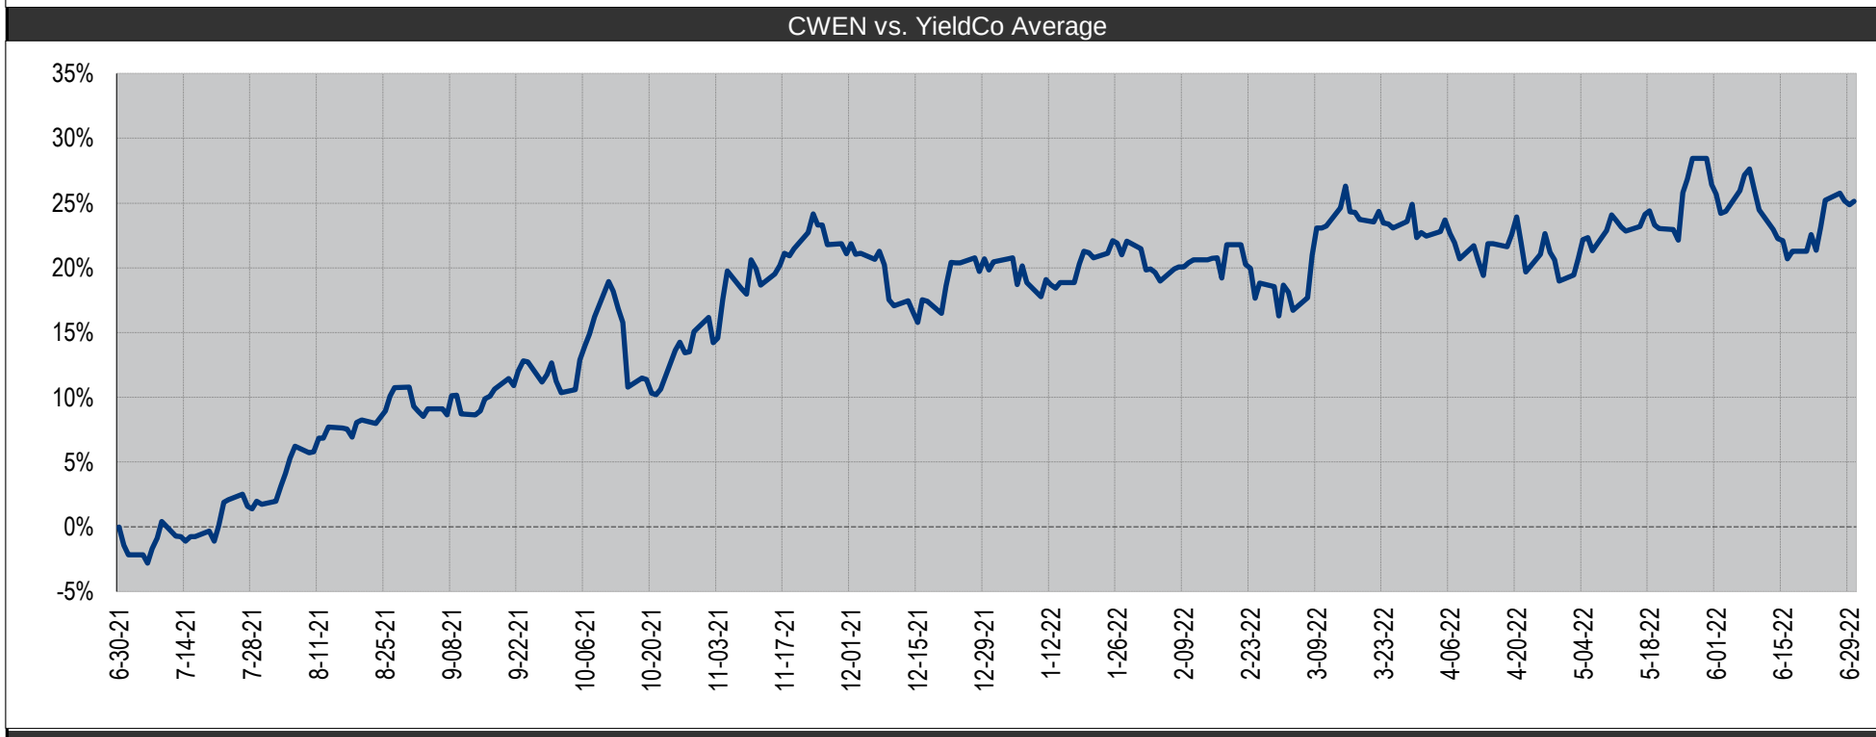
CNP vs. Group Average

CNP vs. Mid Cap Average

CNP vs. Regulated Average

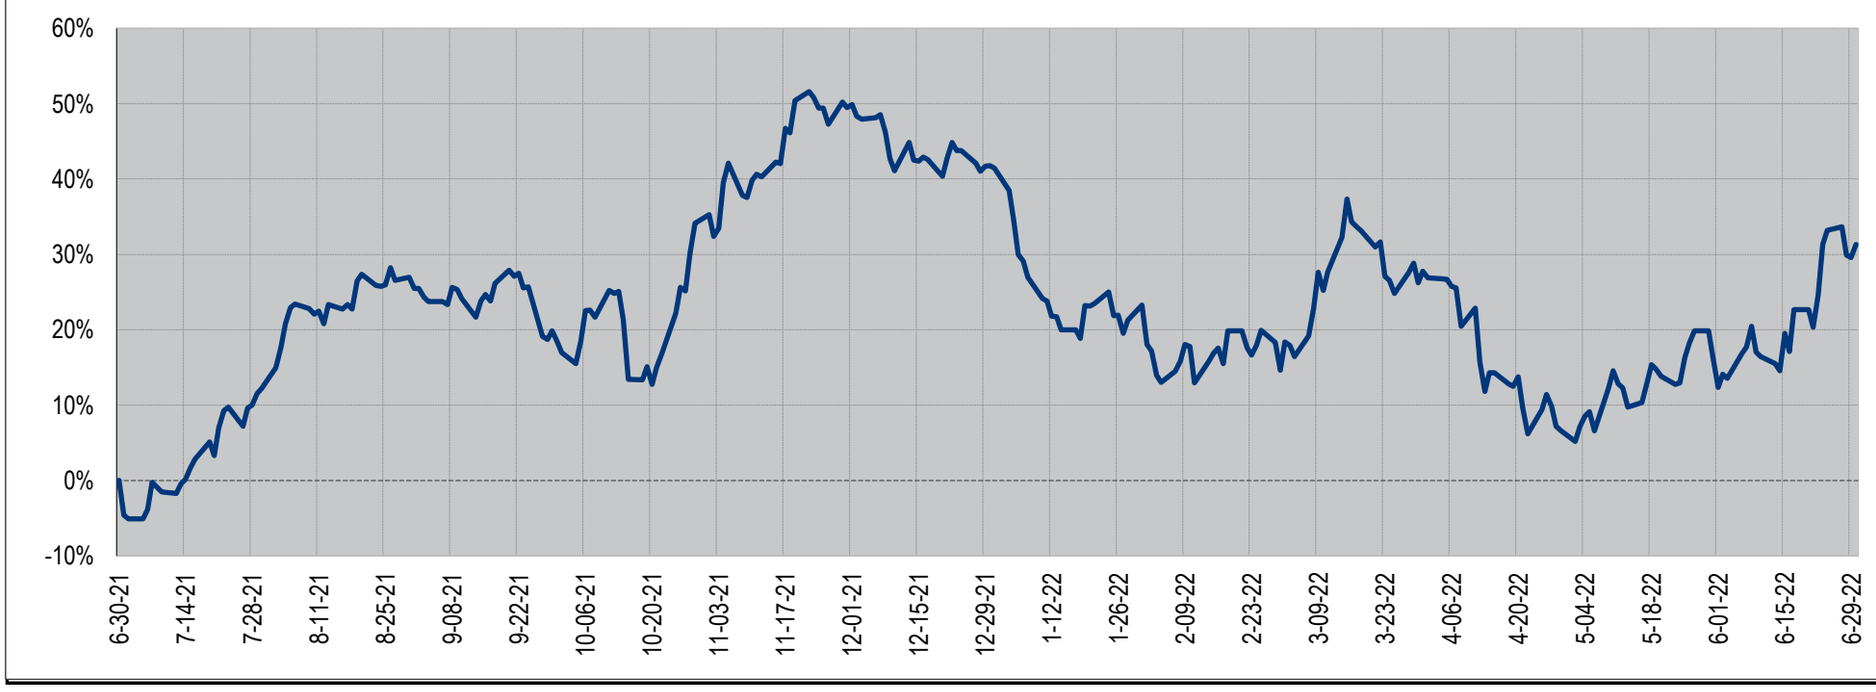


WOLFE RESEARCH



Clearway Energy (CWEN) $34.84, Outperform, $40 PT

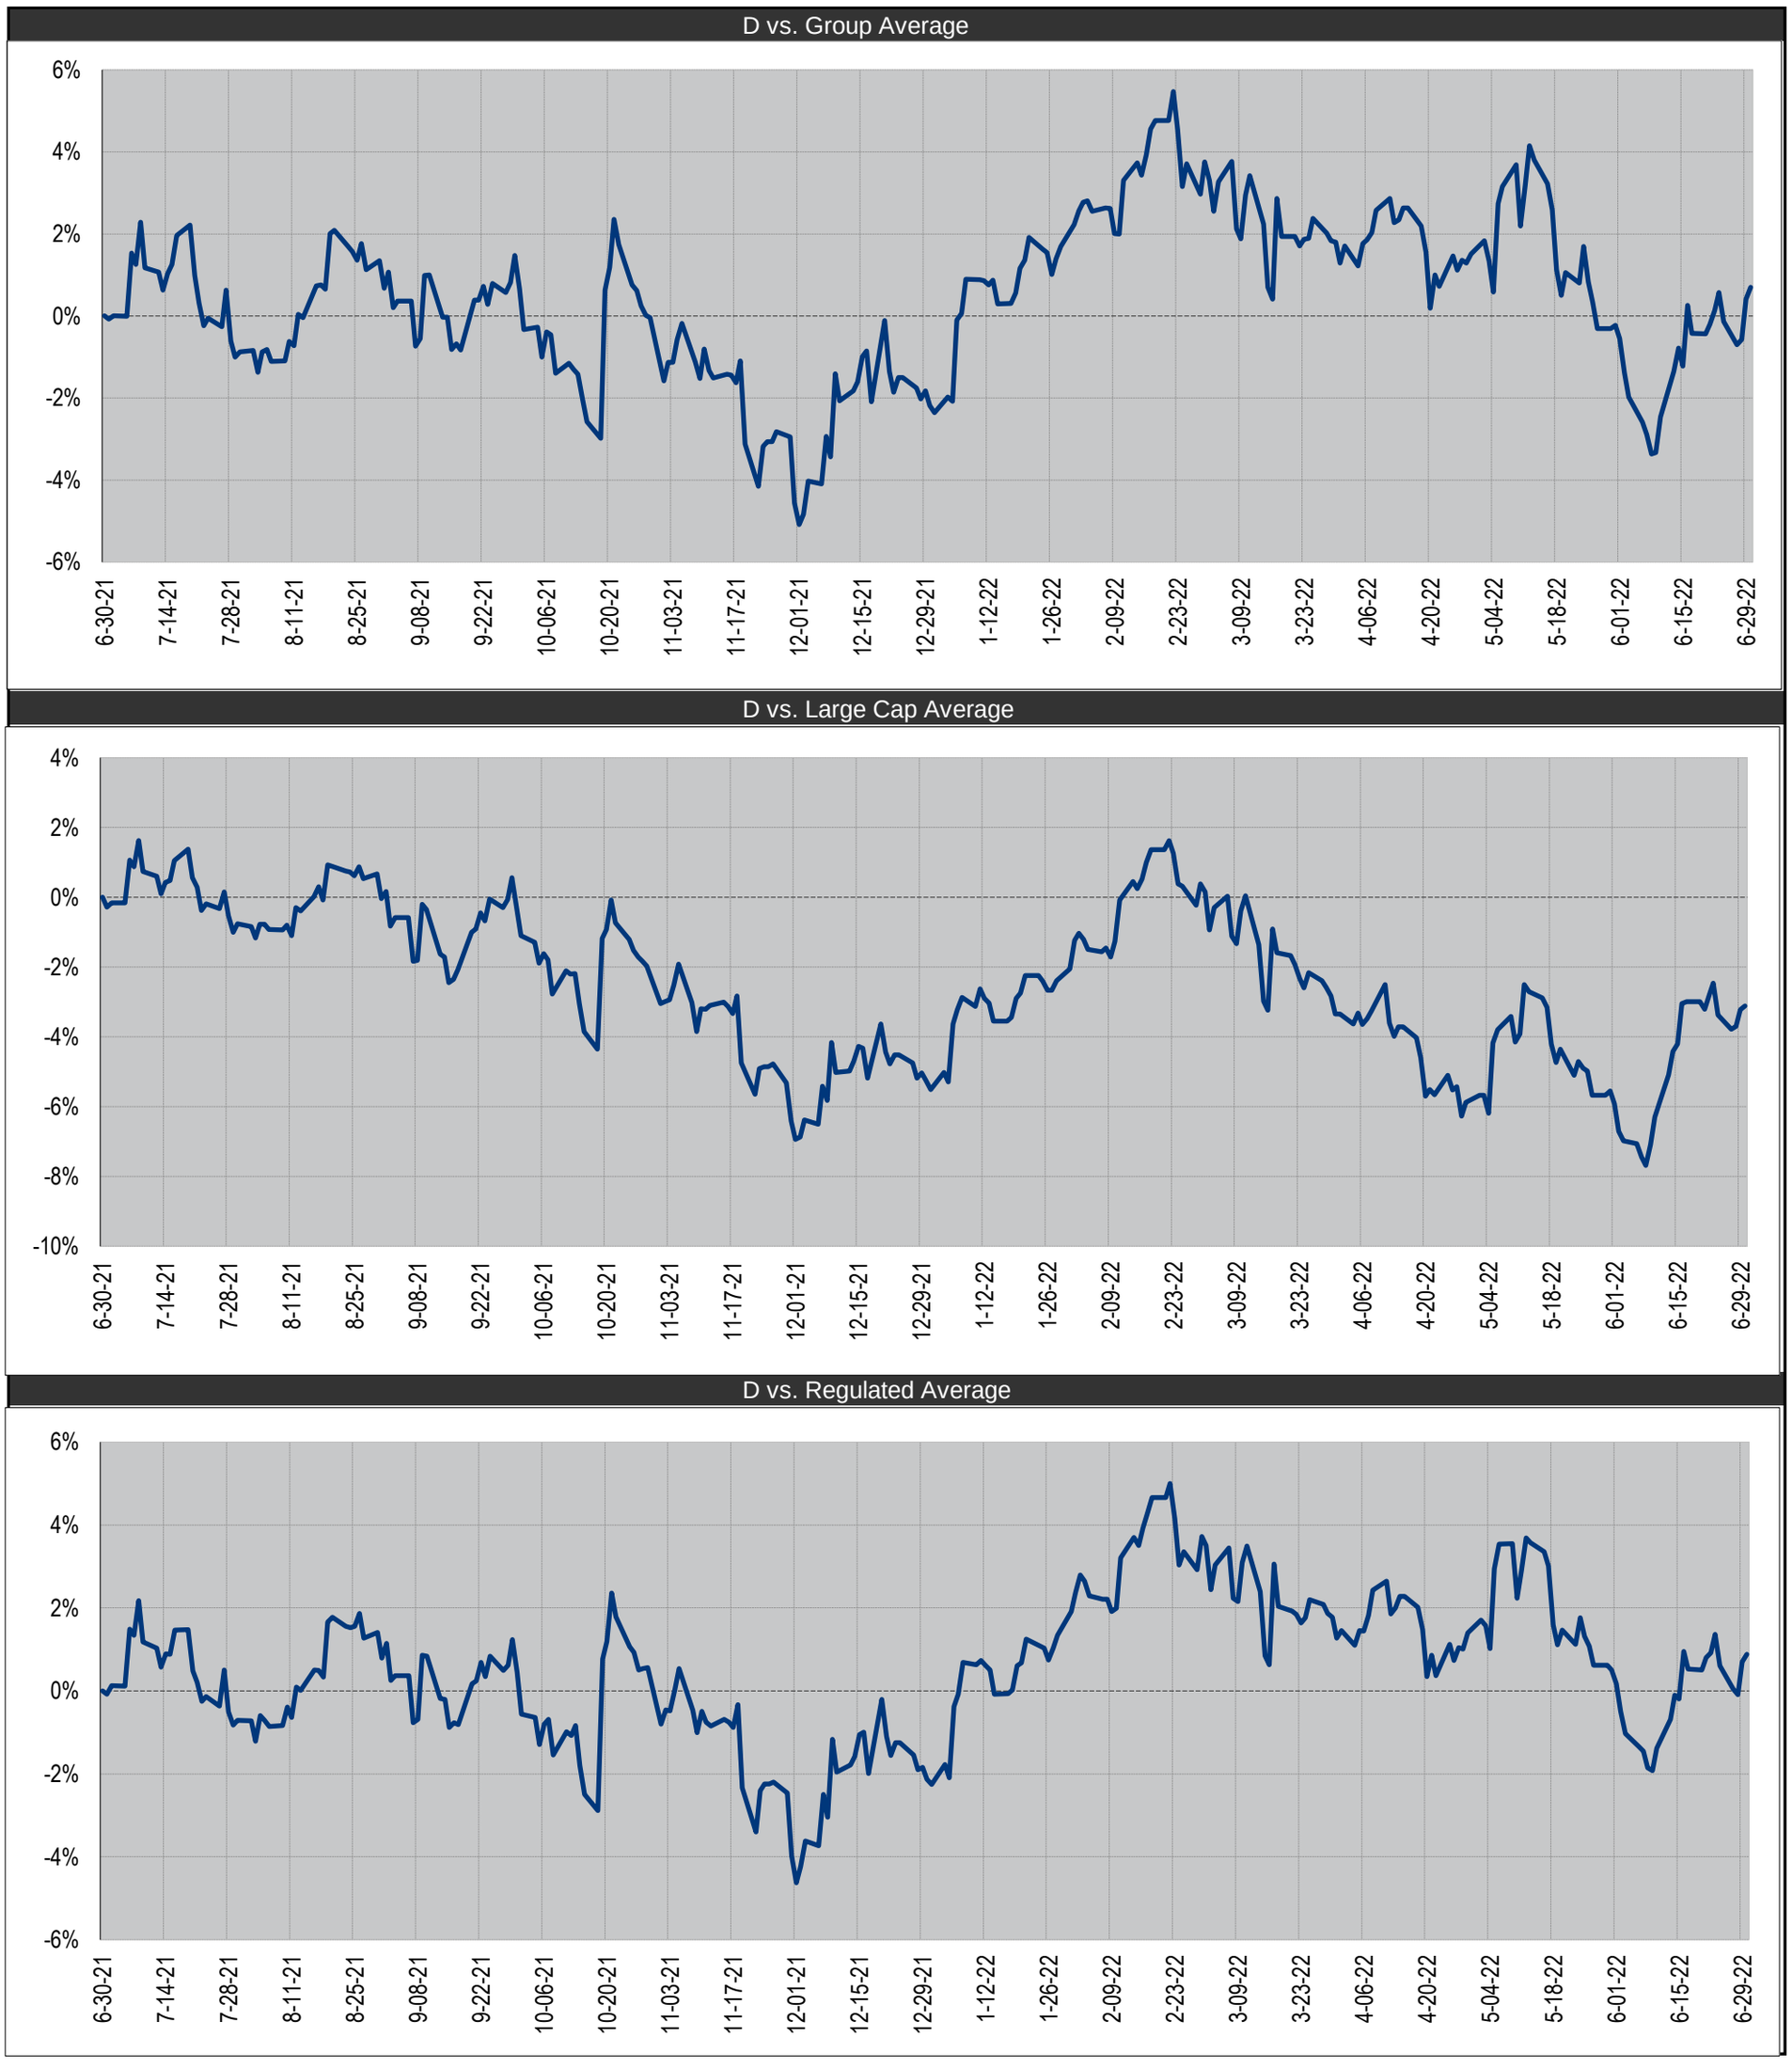
Clearway was flattish in June, but is still the top performing YieldCo year-to-date. The company announced a modest sized third party acquisition during June which continued the progress toward redeploying excess thermal sale proceeds.



CWEN vs. Group Average

CWEN vs. YieldCo Average

CWEN vs. MLPs

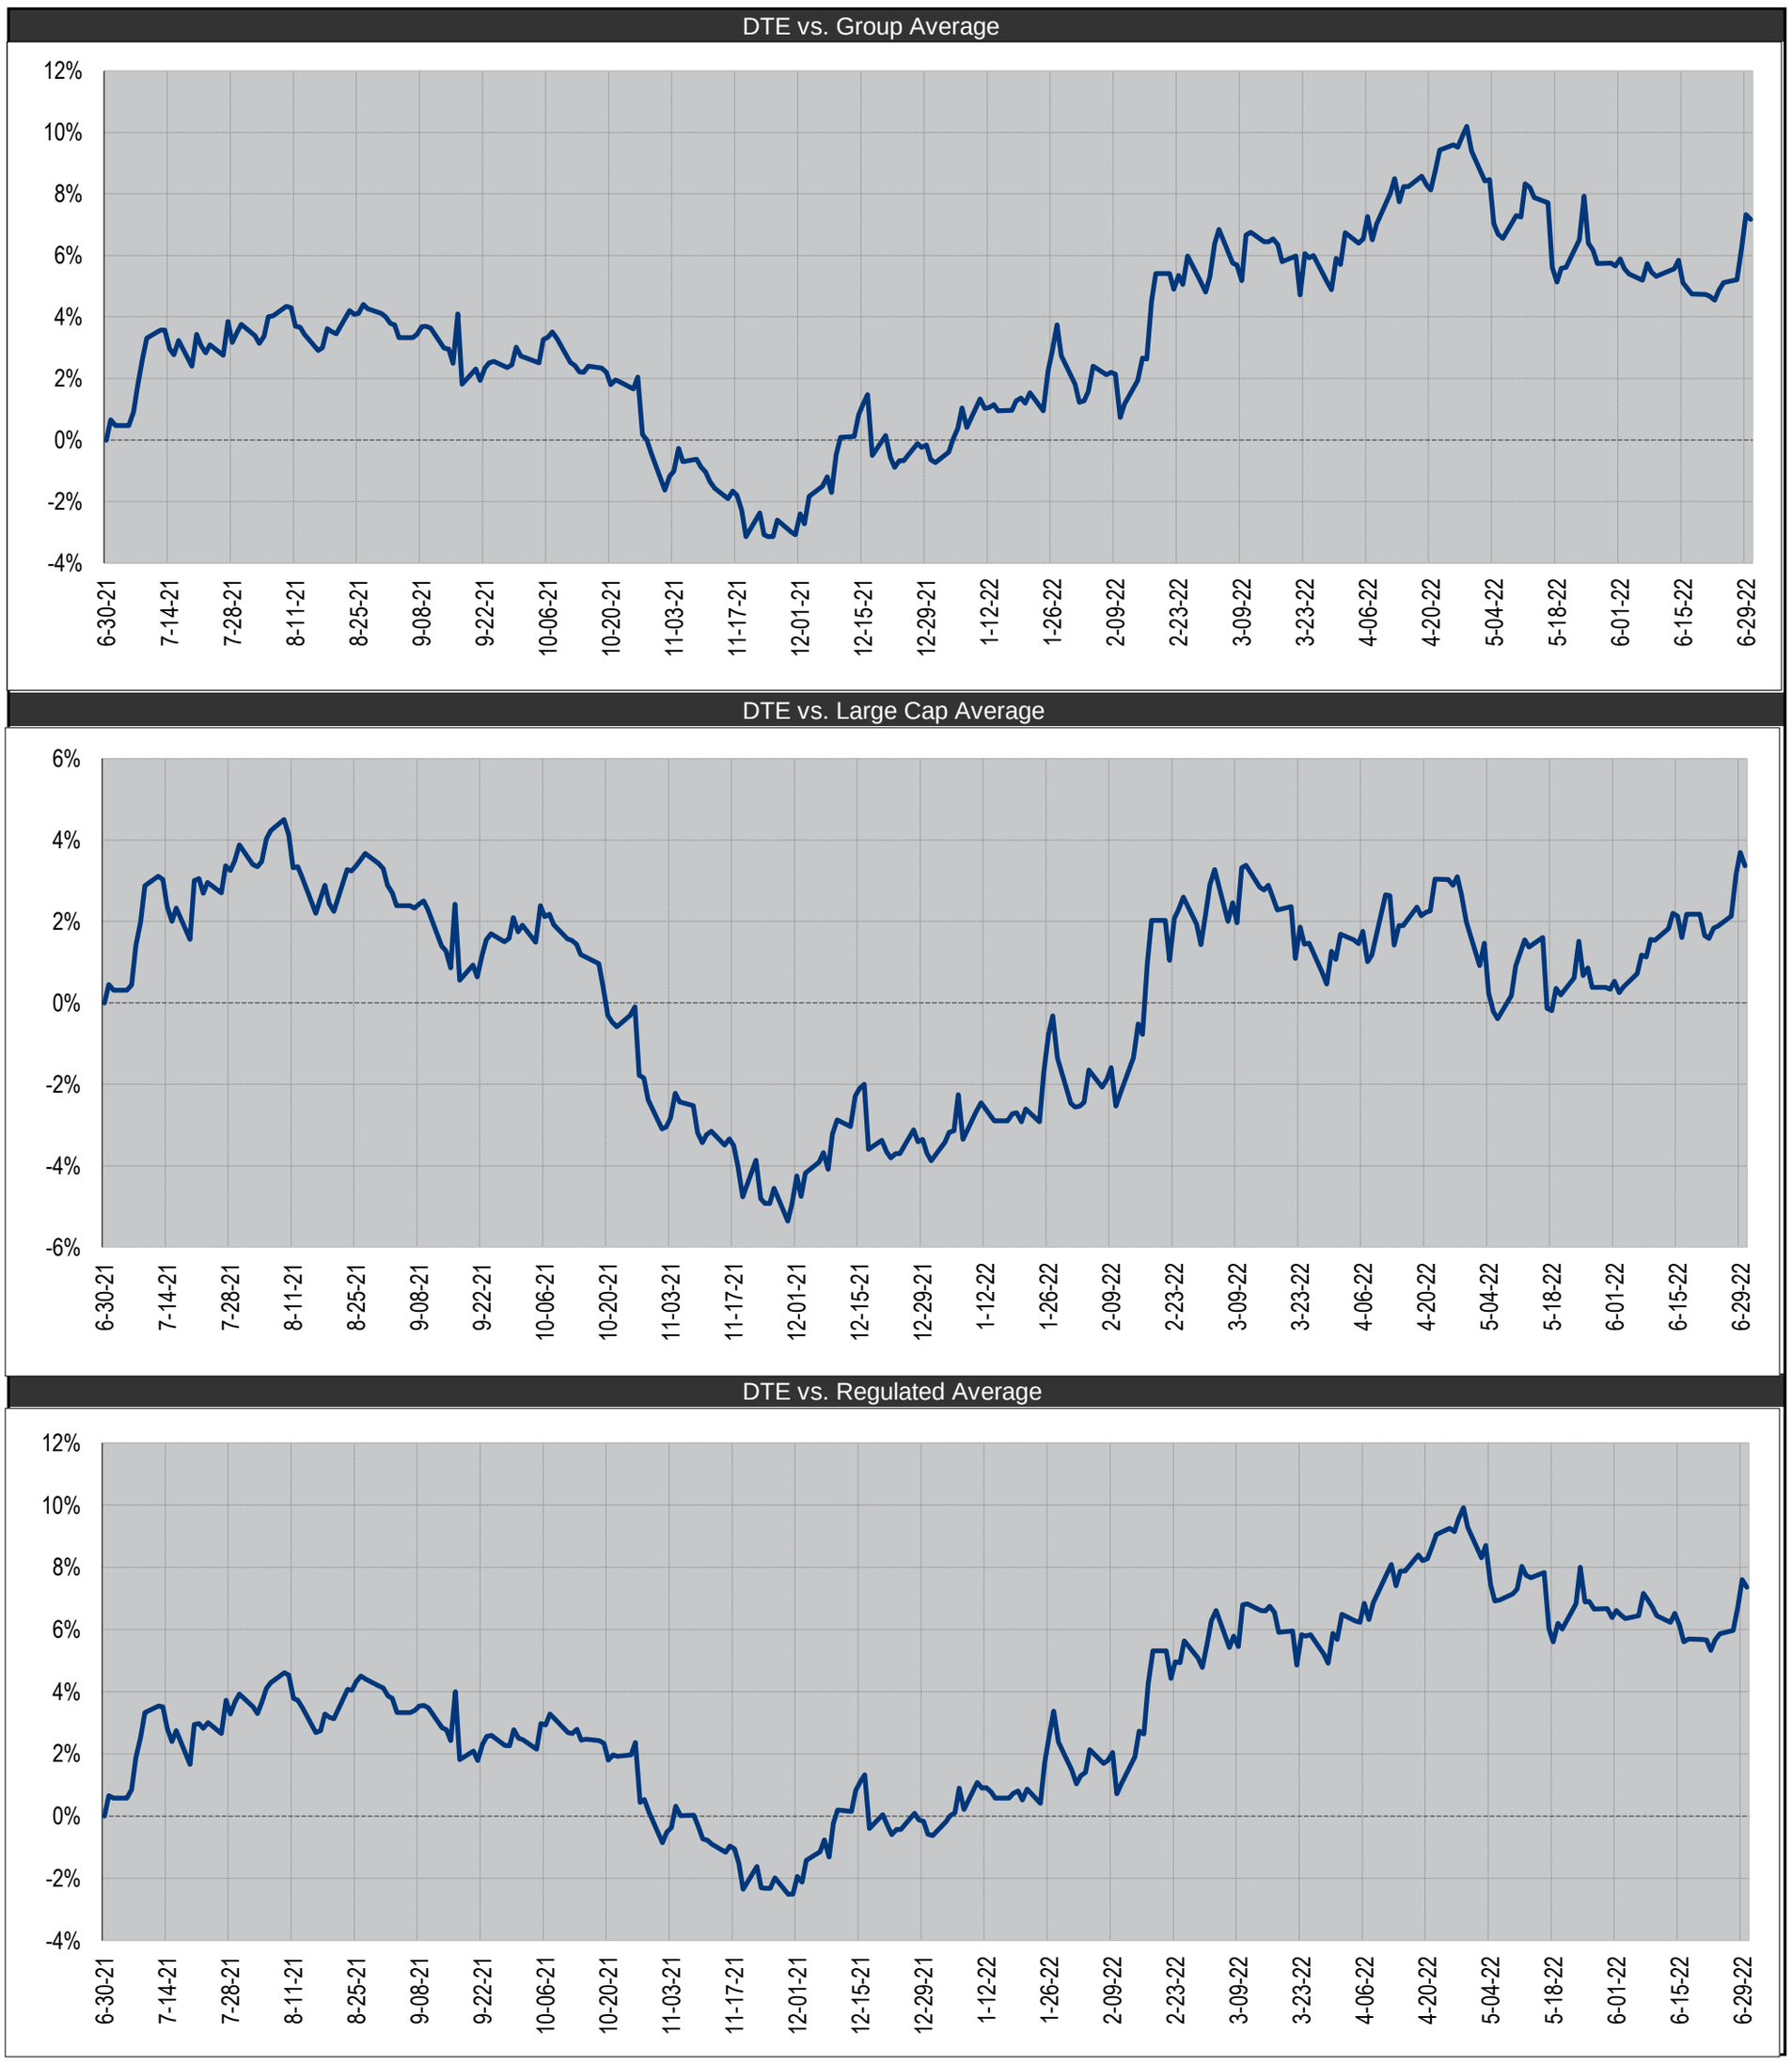


Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Dominion Energy (D) $79.81, Outperform, $91 PT

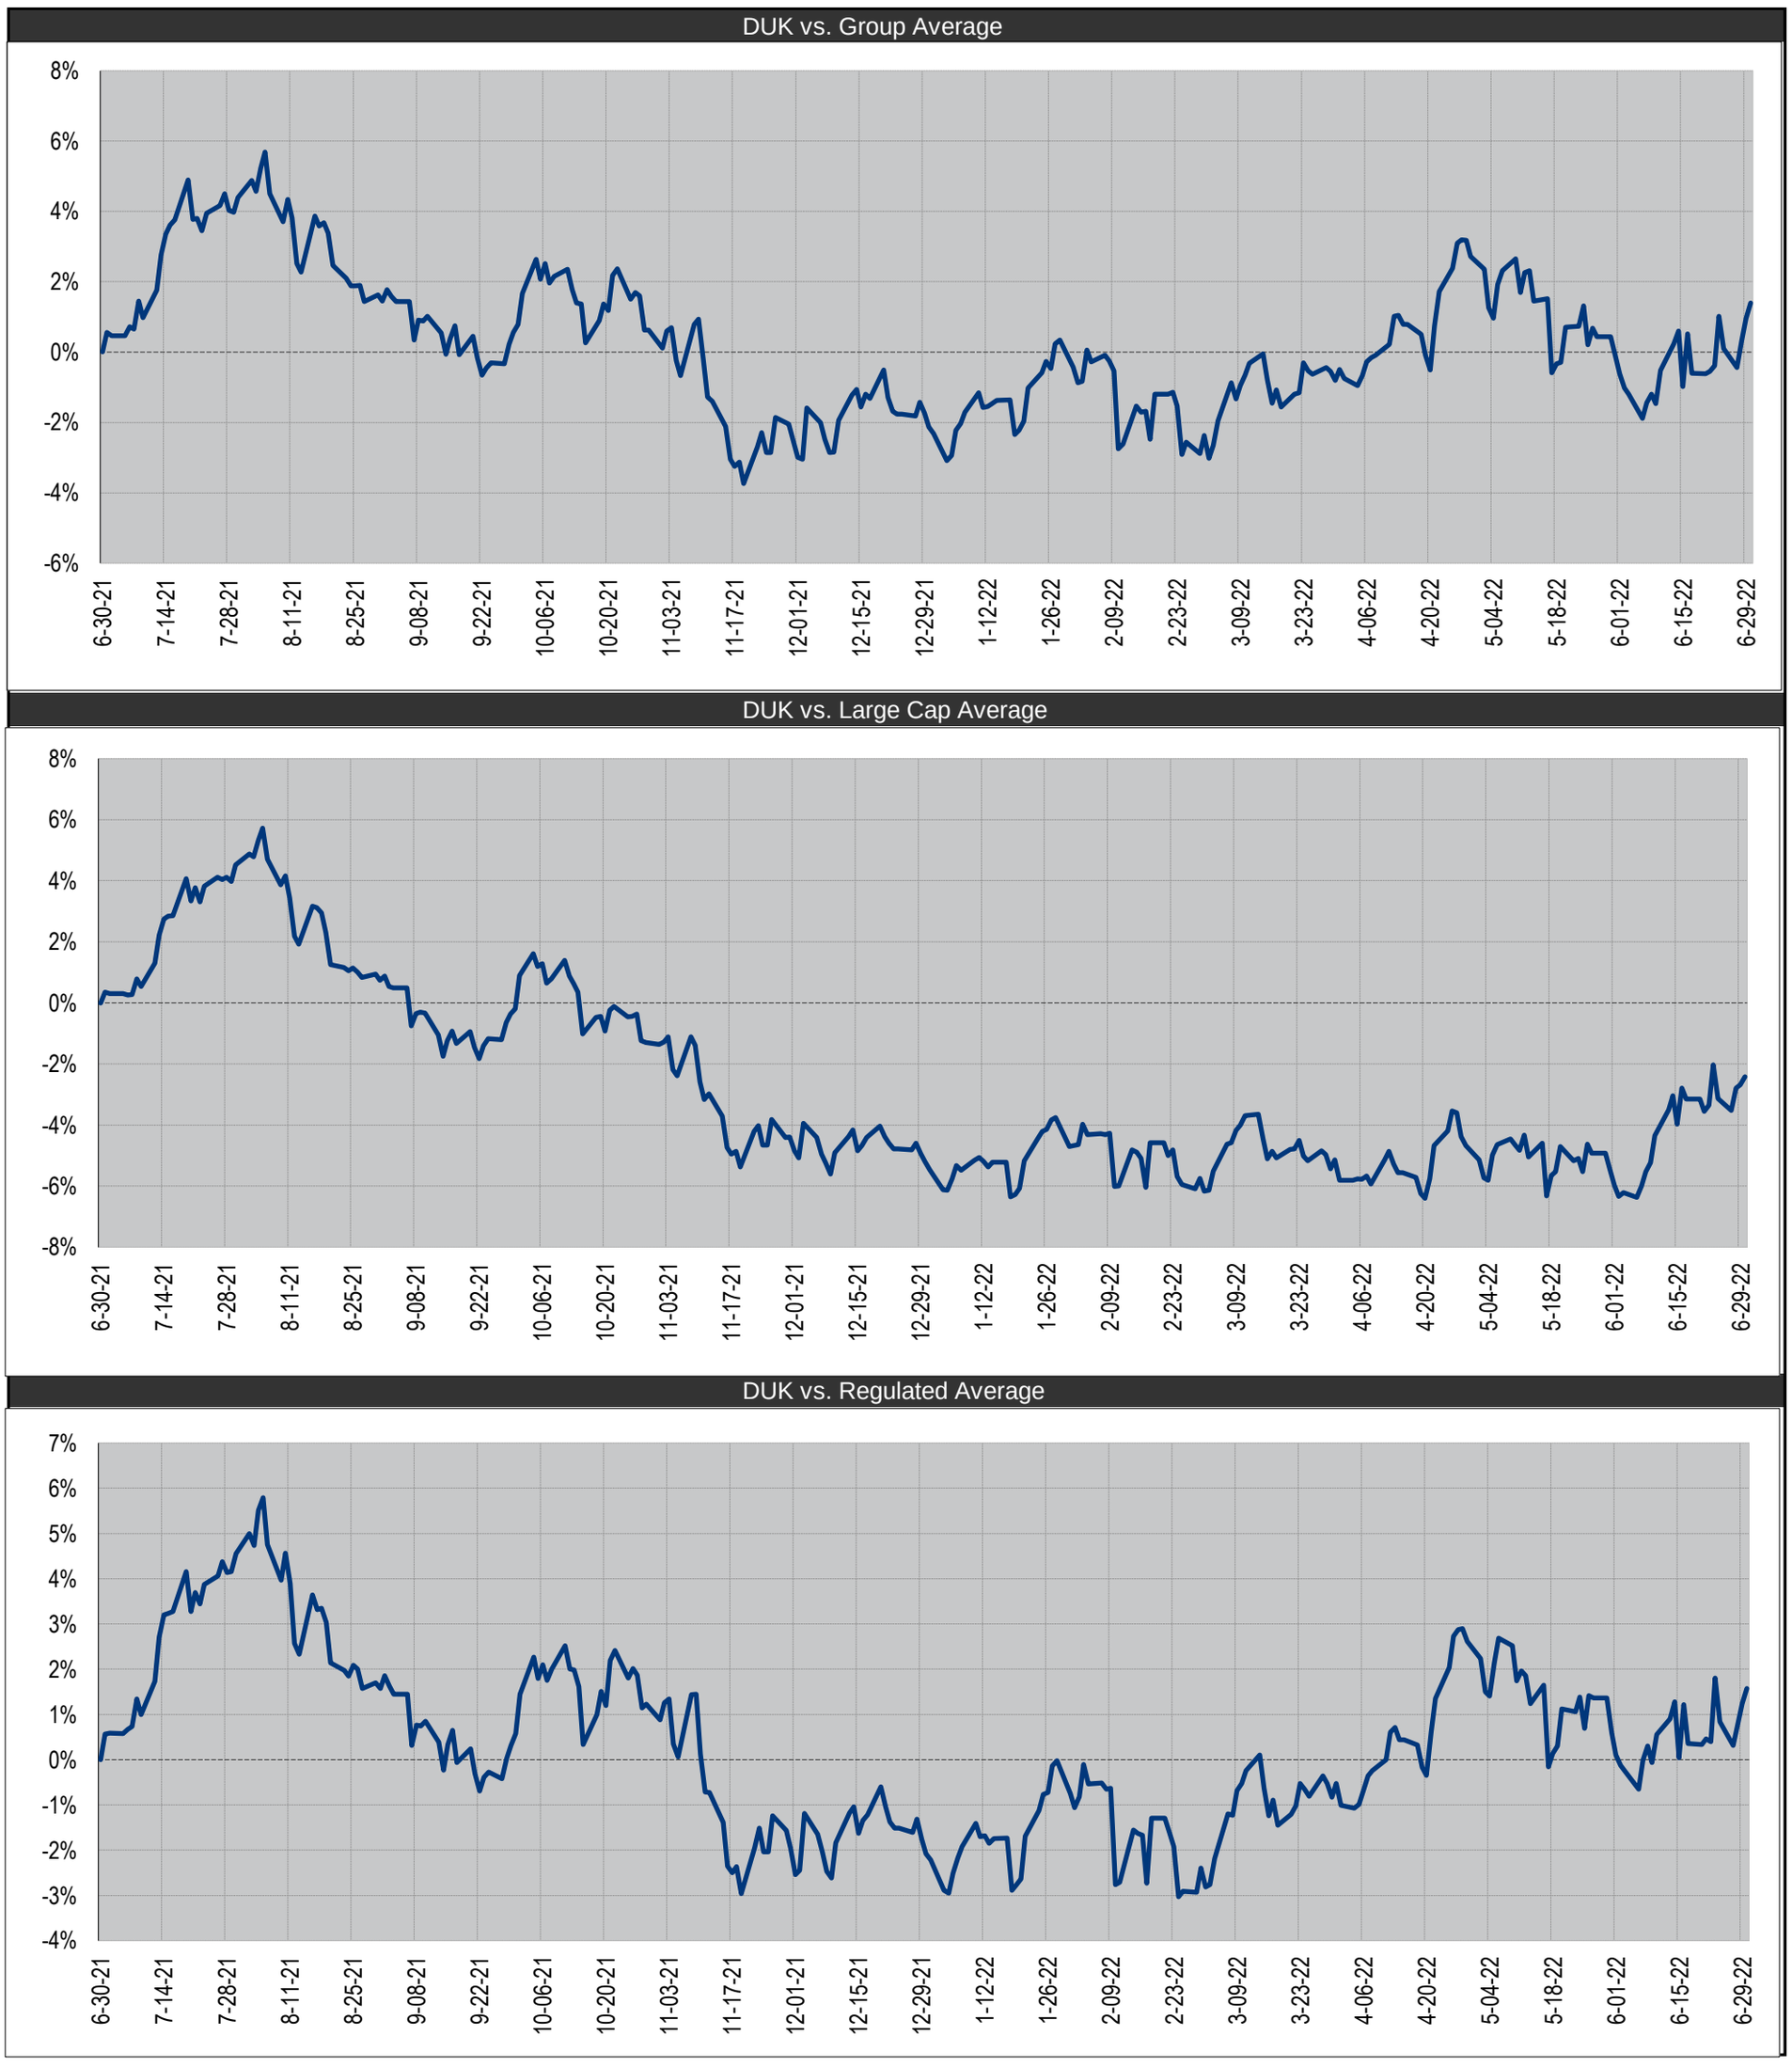
D outperformed the utility average in June and is ~400bps ahead through the 1H of 2022. News on D was relatively quiet during June. However, the stock rallied nicely mid-month after falling near a 52-week low.



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

DTE Energy (DTE) $126.75, Peer Perform, $136 PT

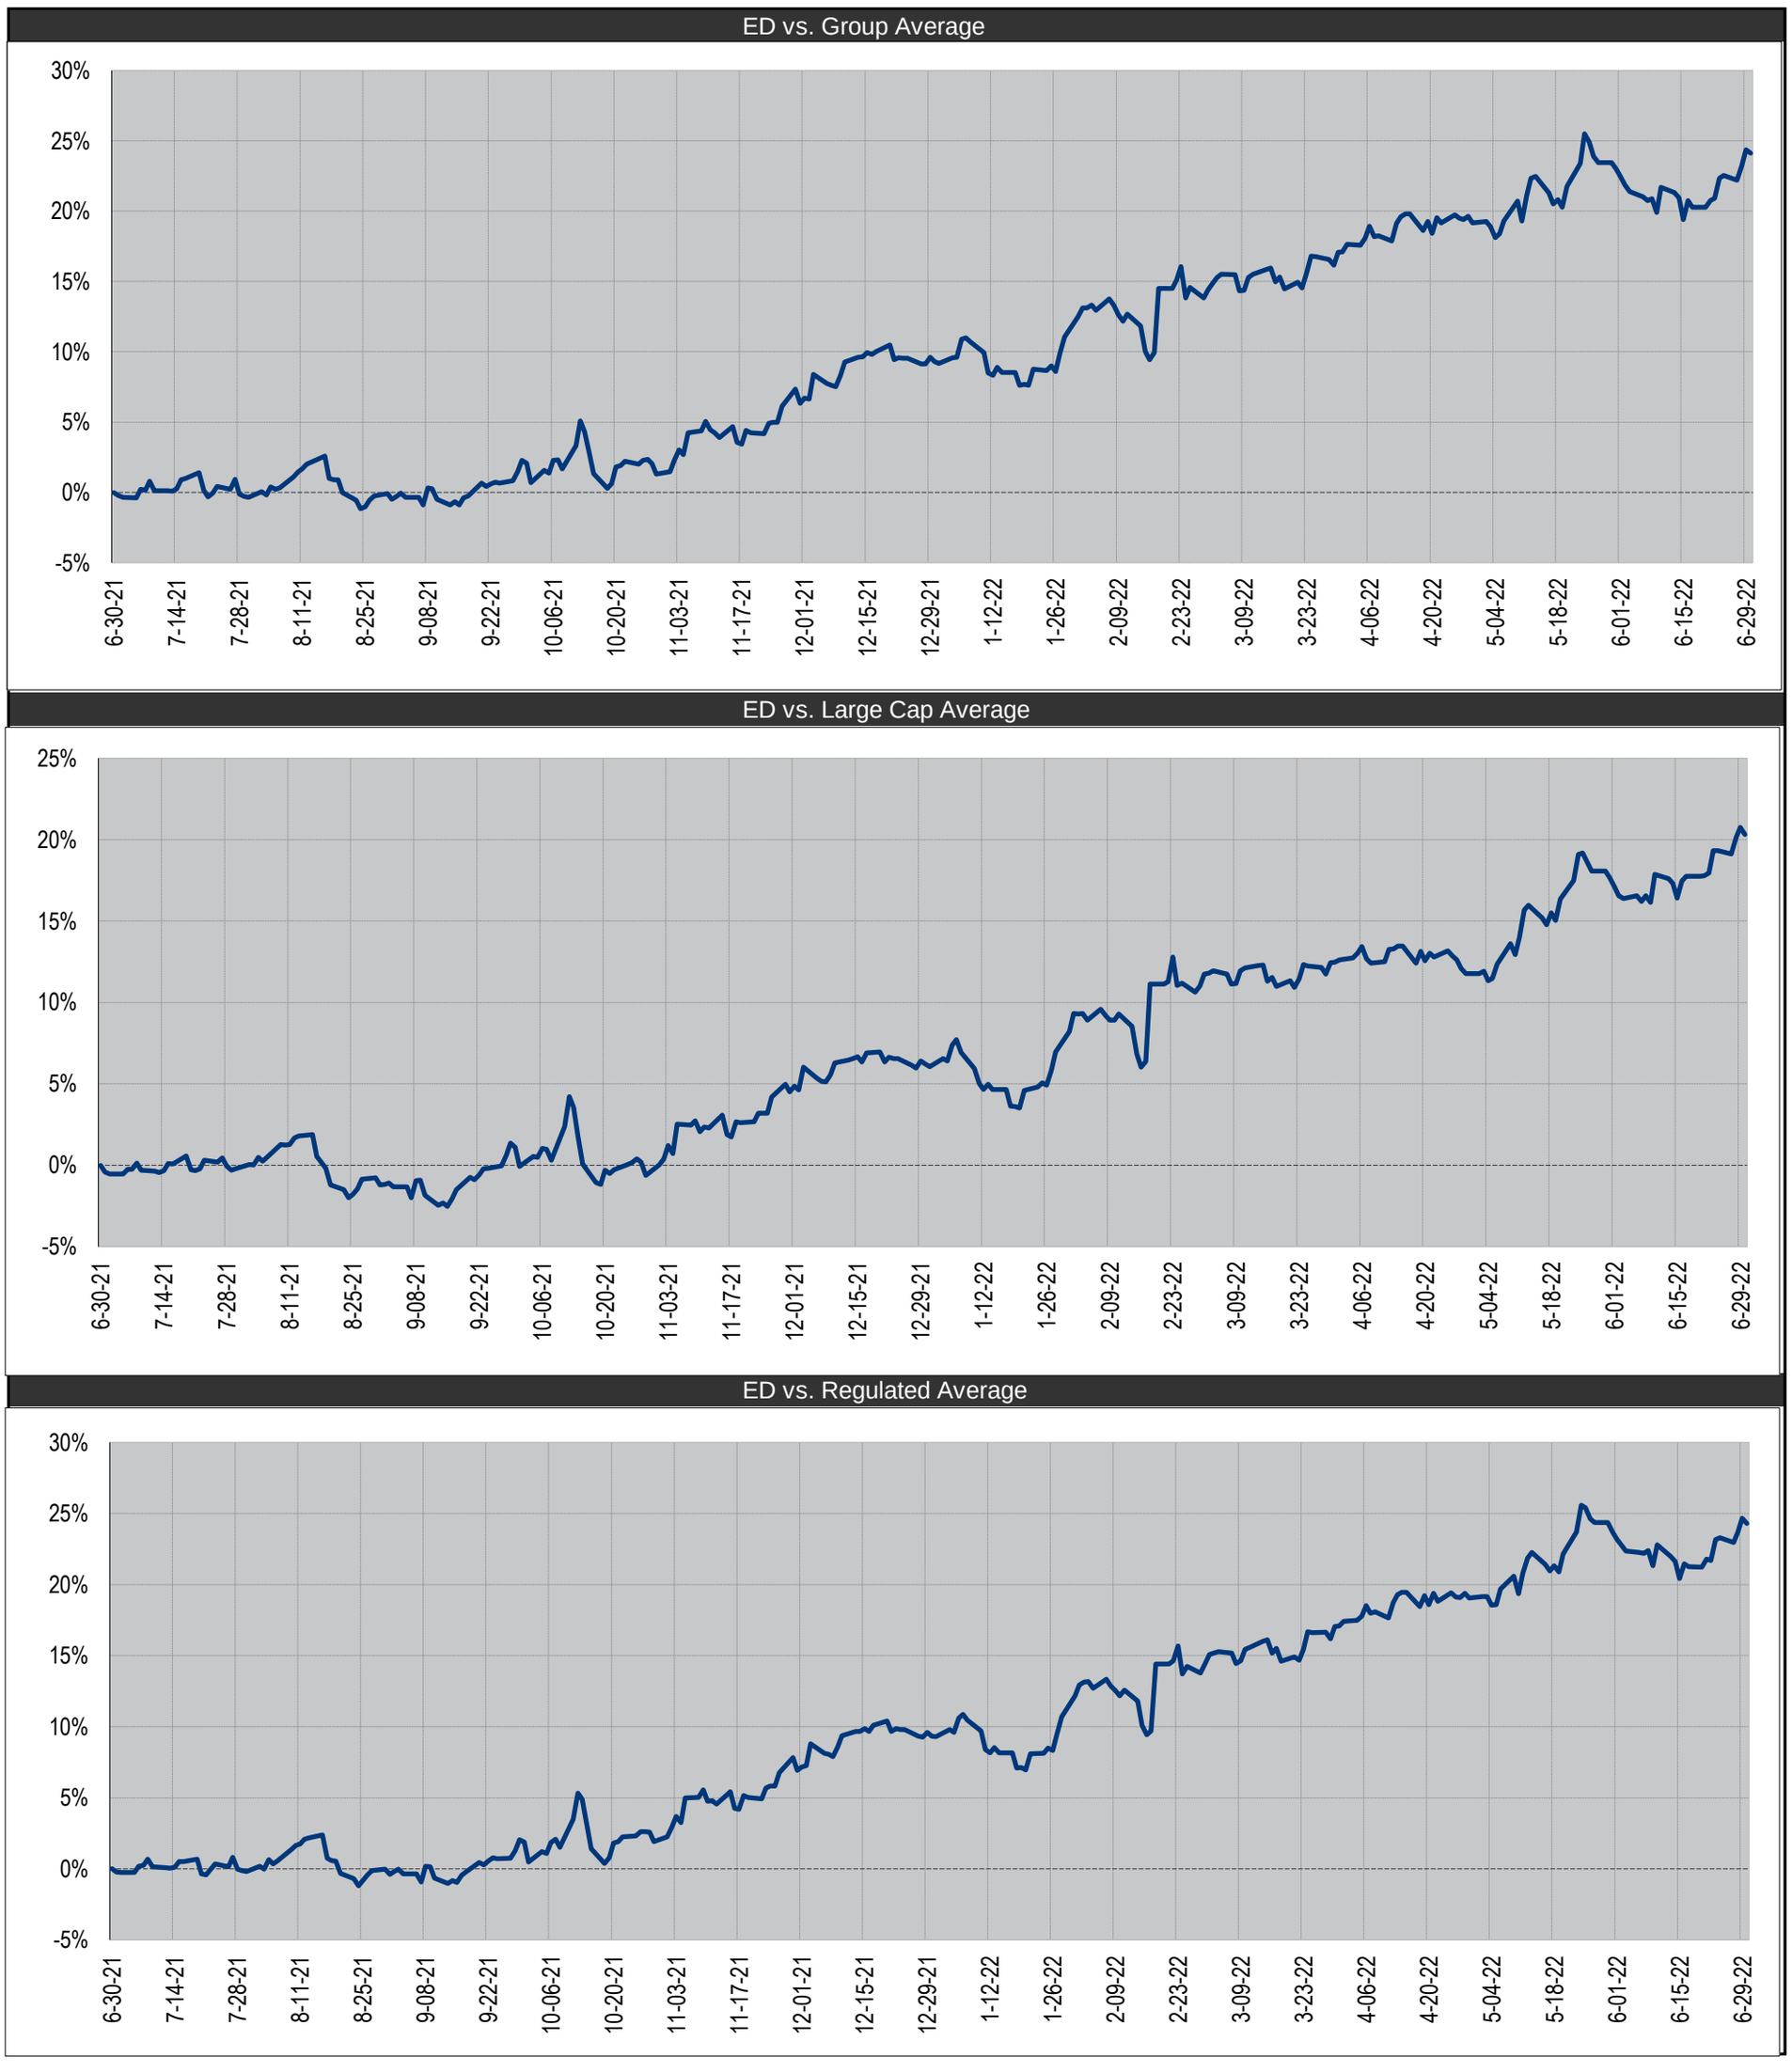


DTE traded in-line for the month on little news, but is still outperforming on the year.

WOLFE RESEARCH

Duke Energy (DUK) $107.21, Peer Perform, $113 PT

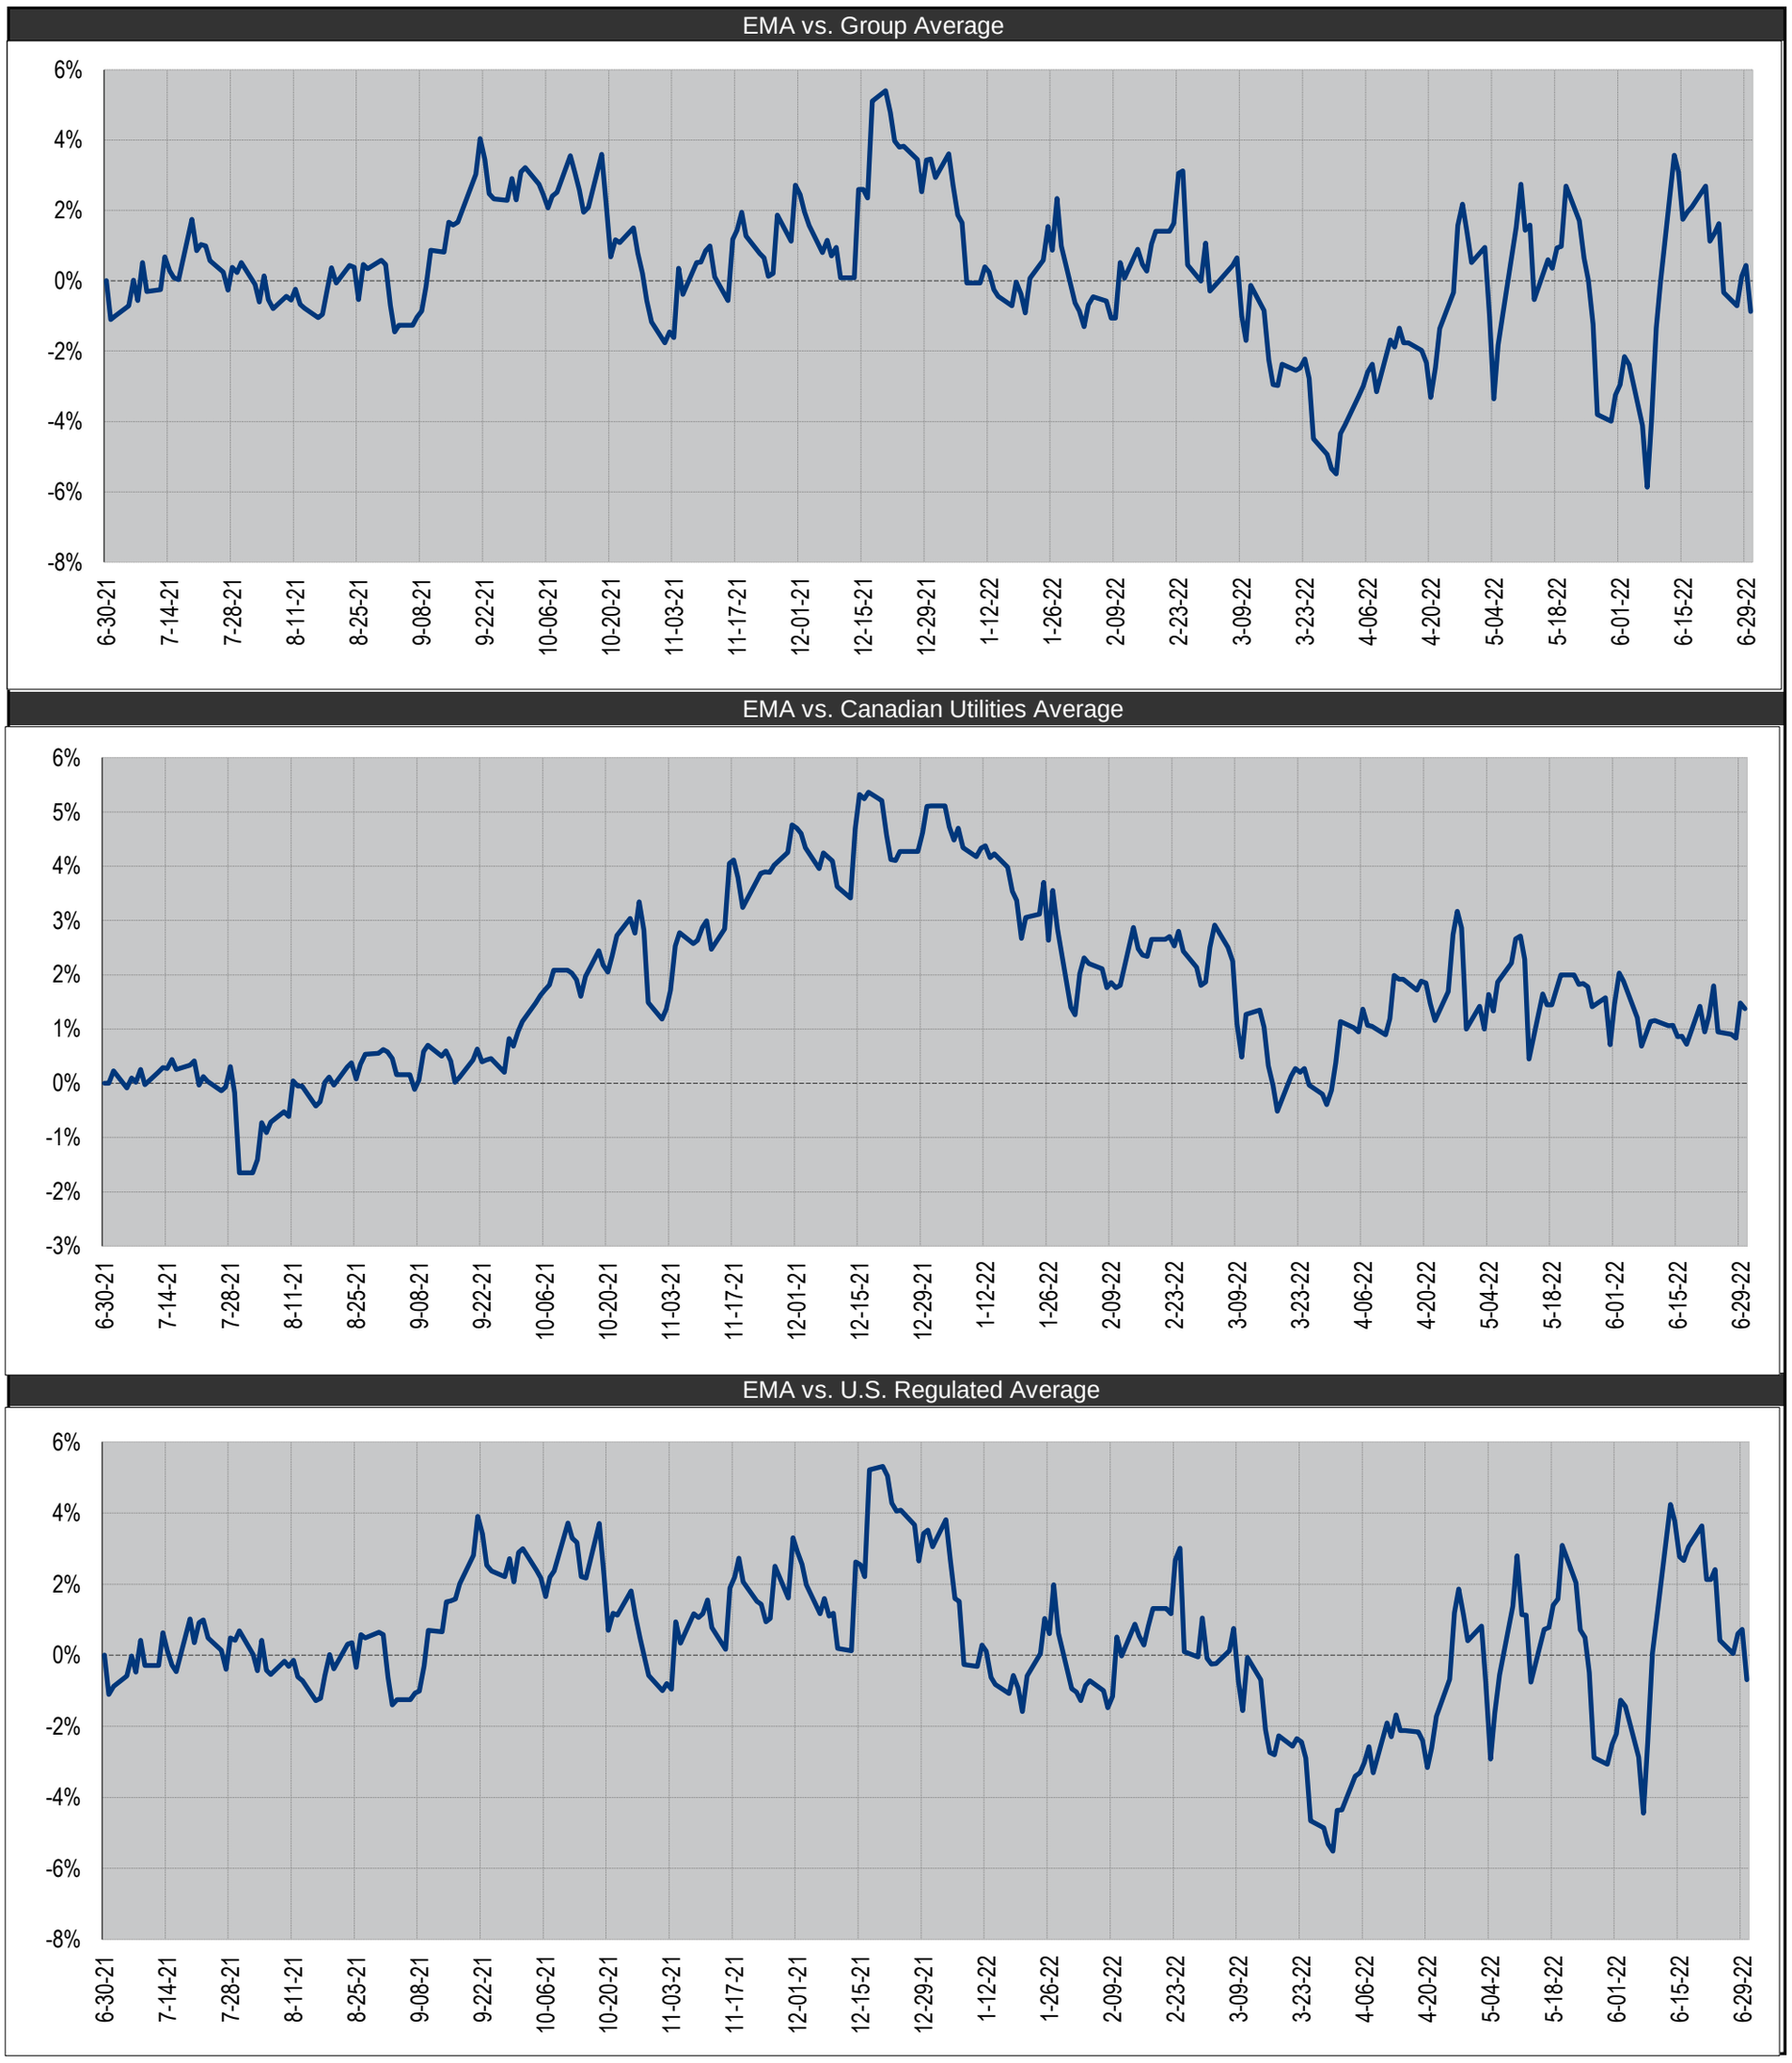
The stock matched a 52-week low relative to large cap peers early in Jun, but ended the month breaking out of a long-term trading range on little news.



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Consolidated Edison (ED) $95.10, Peer Perform, $94 PT

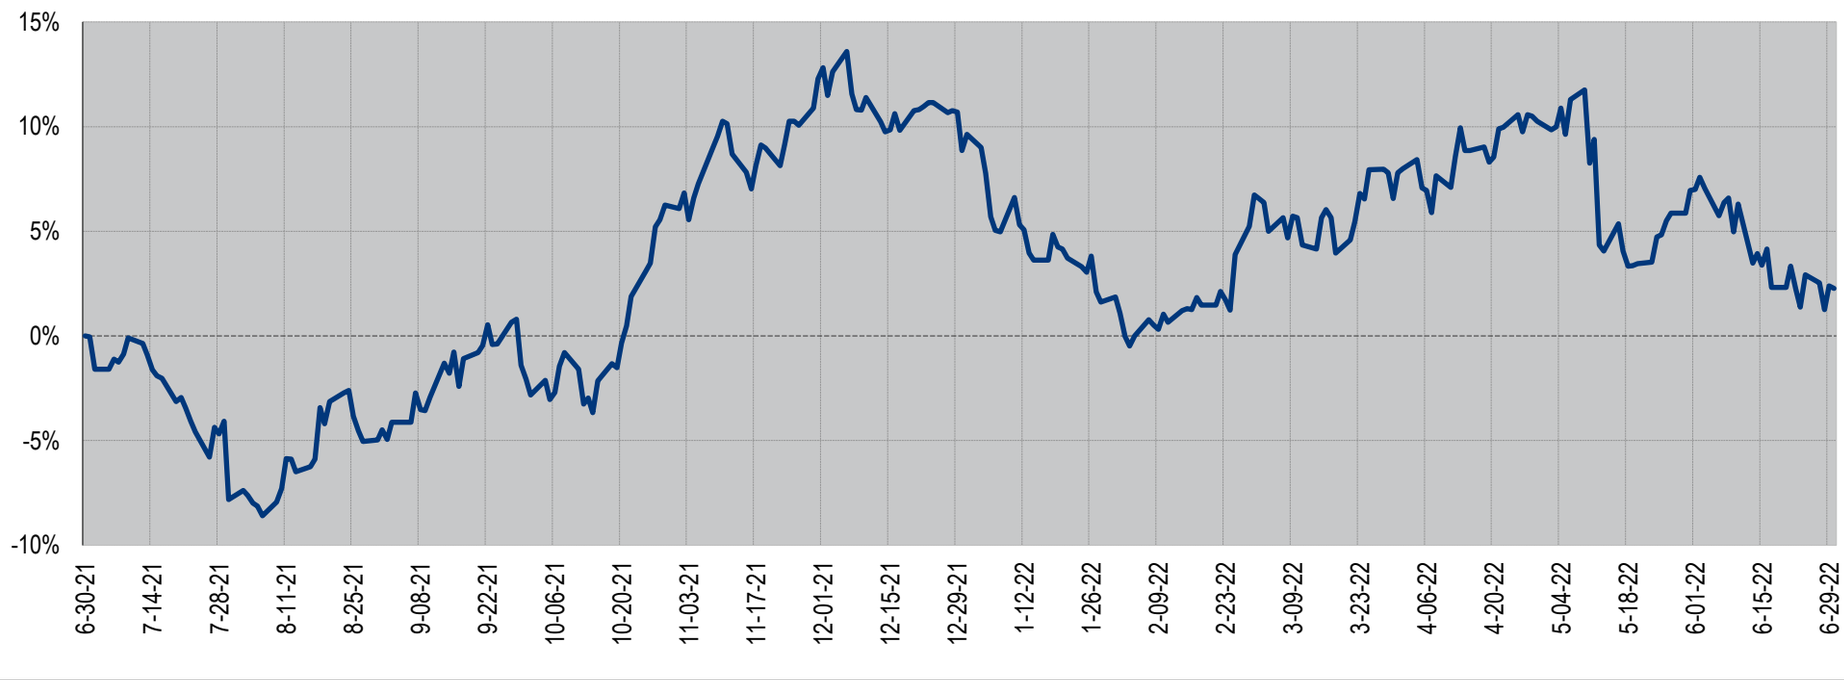


ED notably outperformed its large cap peers in June, breaking out to 1-year relative highs, after evidentiary hearings in CECONY's rate cases were postponed for a month as the company filed a notice of impending settlement negotiations, with the first meeting scheduled for July 6th. During the month, the NY PSC also approved the allotment of ~$166M to ED from $250M of NY's FY23 state budget to reduce low-income customer bills.

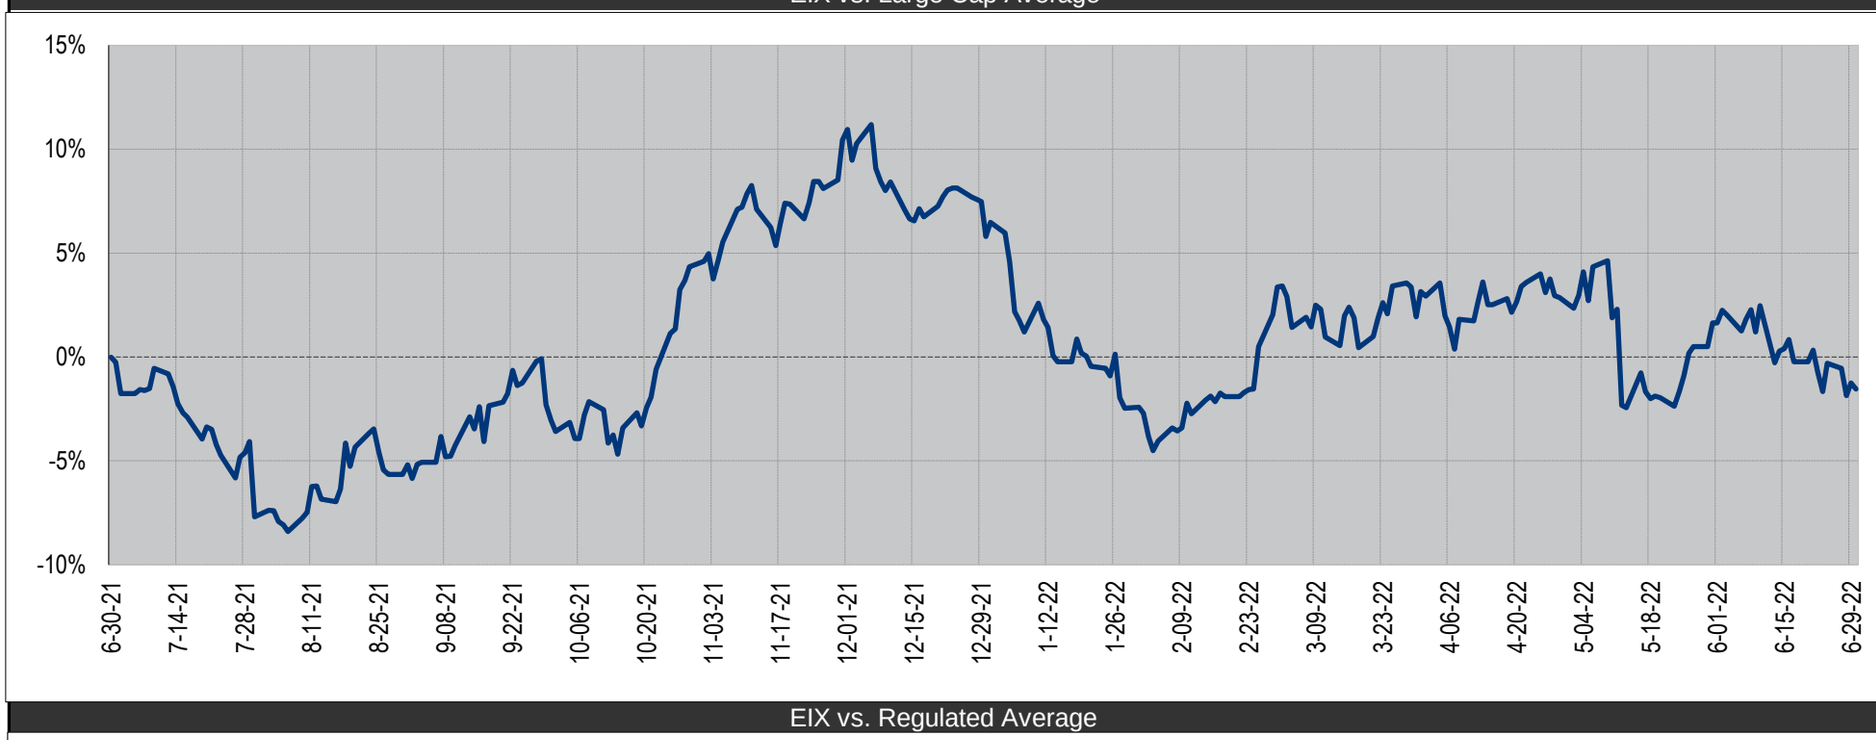
WOLFE RESEARCH

Emera (EMA) $60.30, Peer Perform, $65 PT

EMA outperformed the US utility average as well as its closest Canadian peer FTS in June but is still behind both YTD by about 250bps. Some initial intervenor testimony was filed for Nova Scotia Power's rate case during June where the ROE recommendation was quiet low as expected. Equity ratio was in-line with the current allowed and there were very little rate base disagreements.

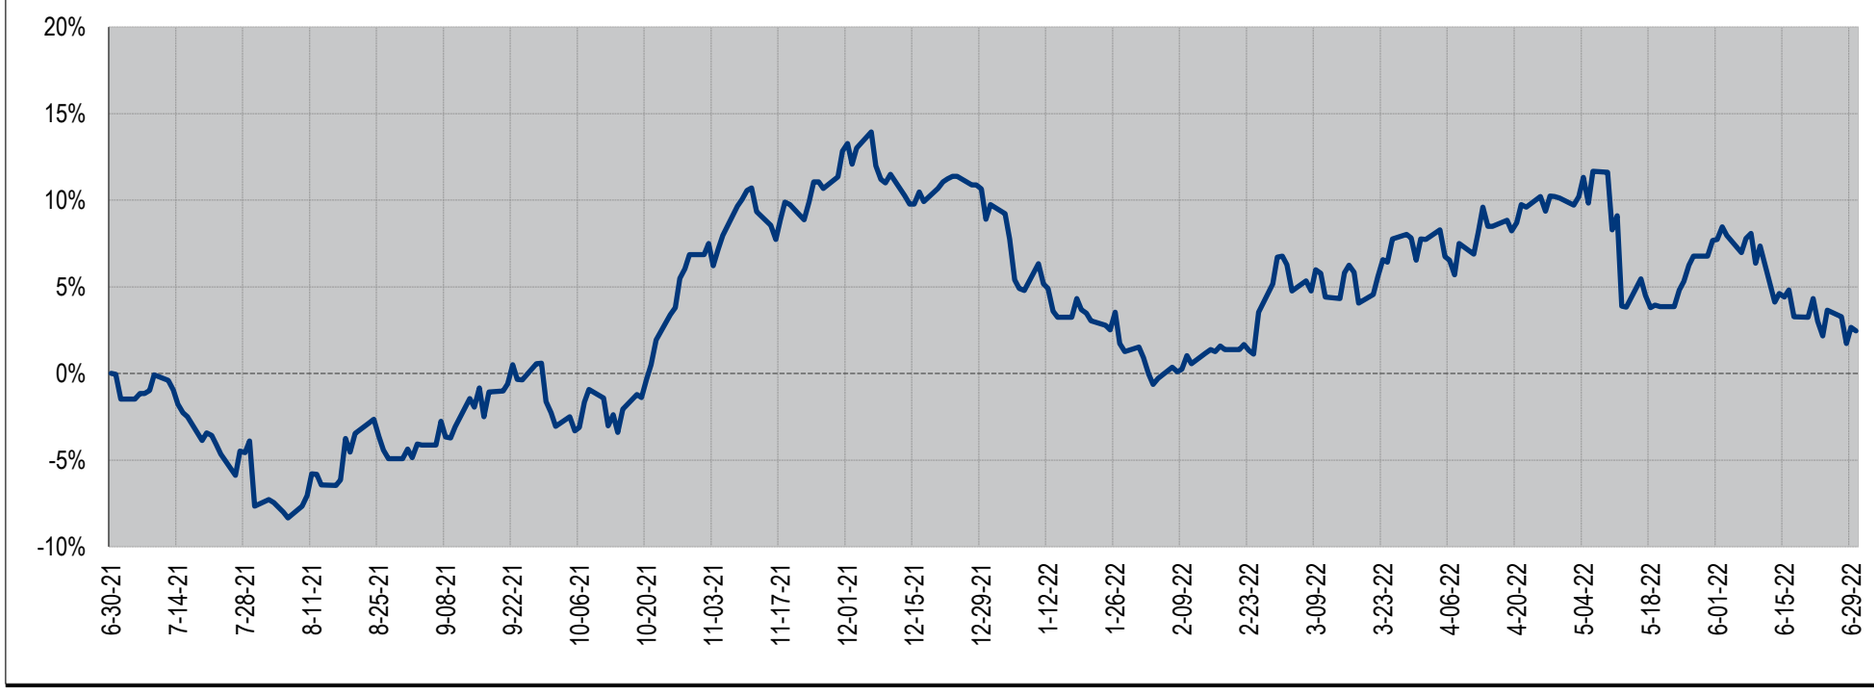


WOLFE RESEARCH



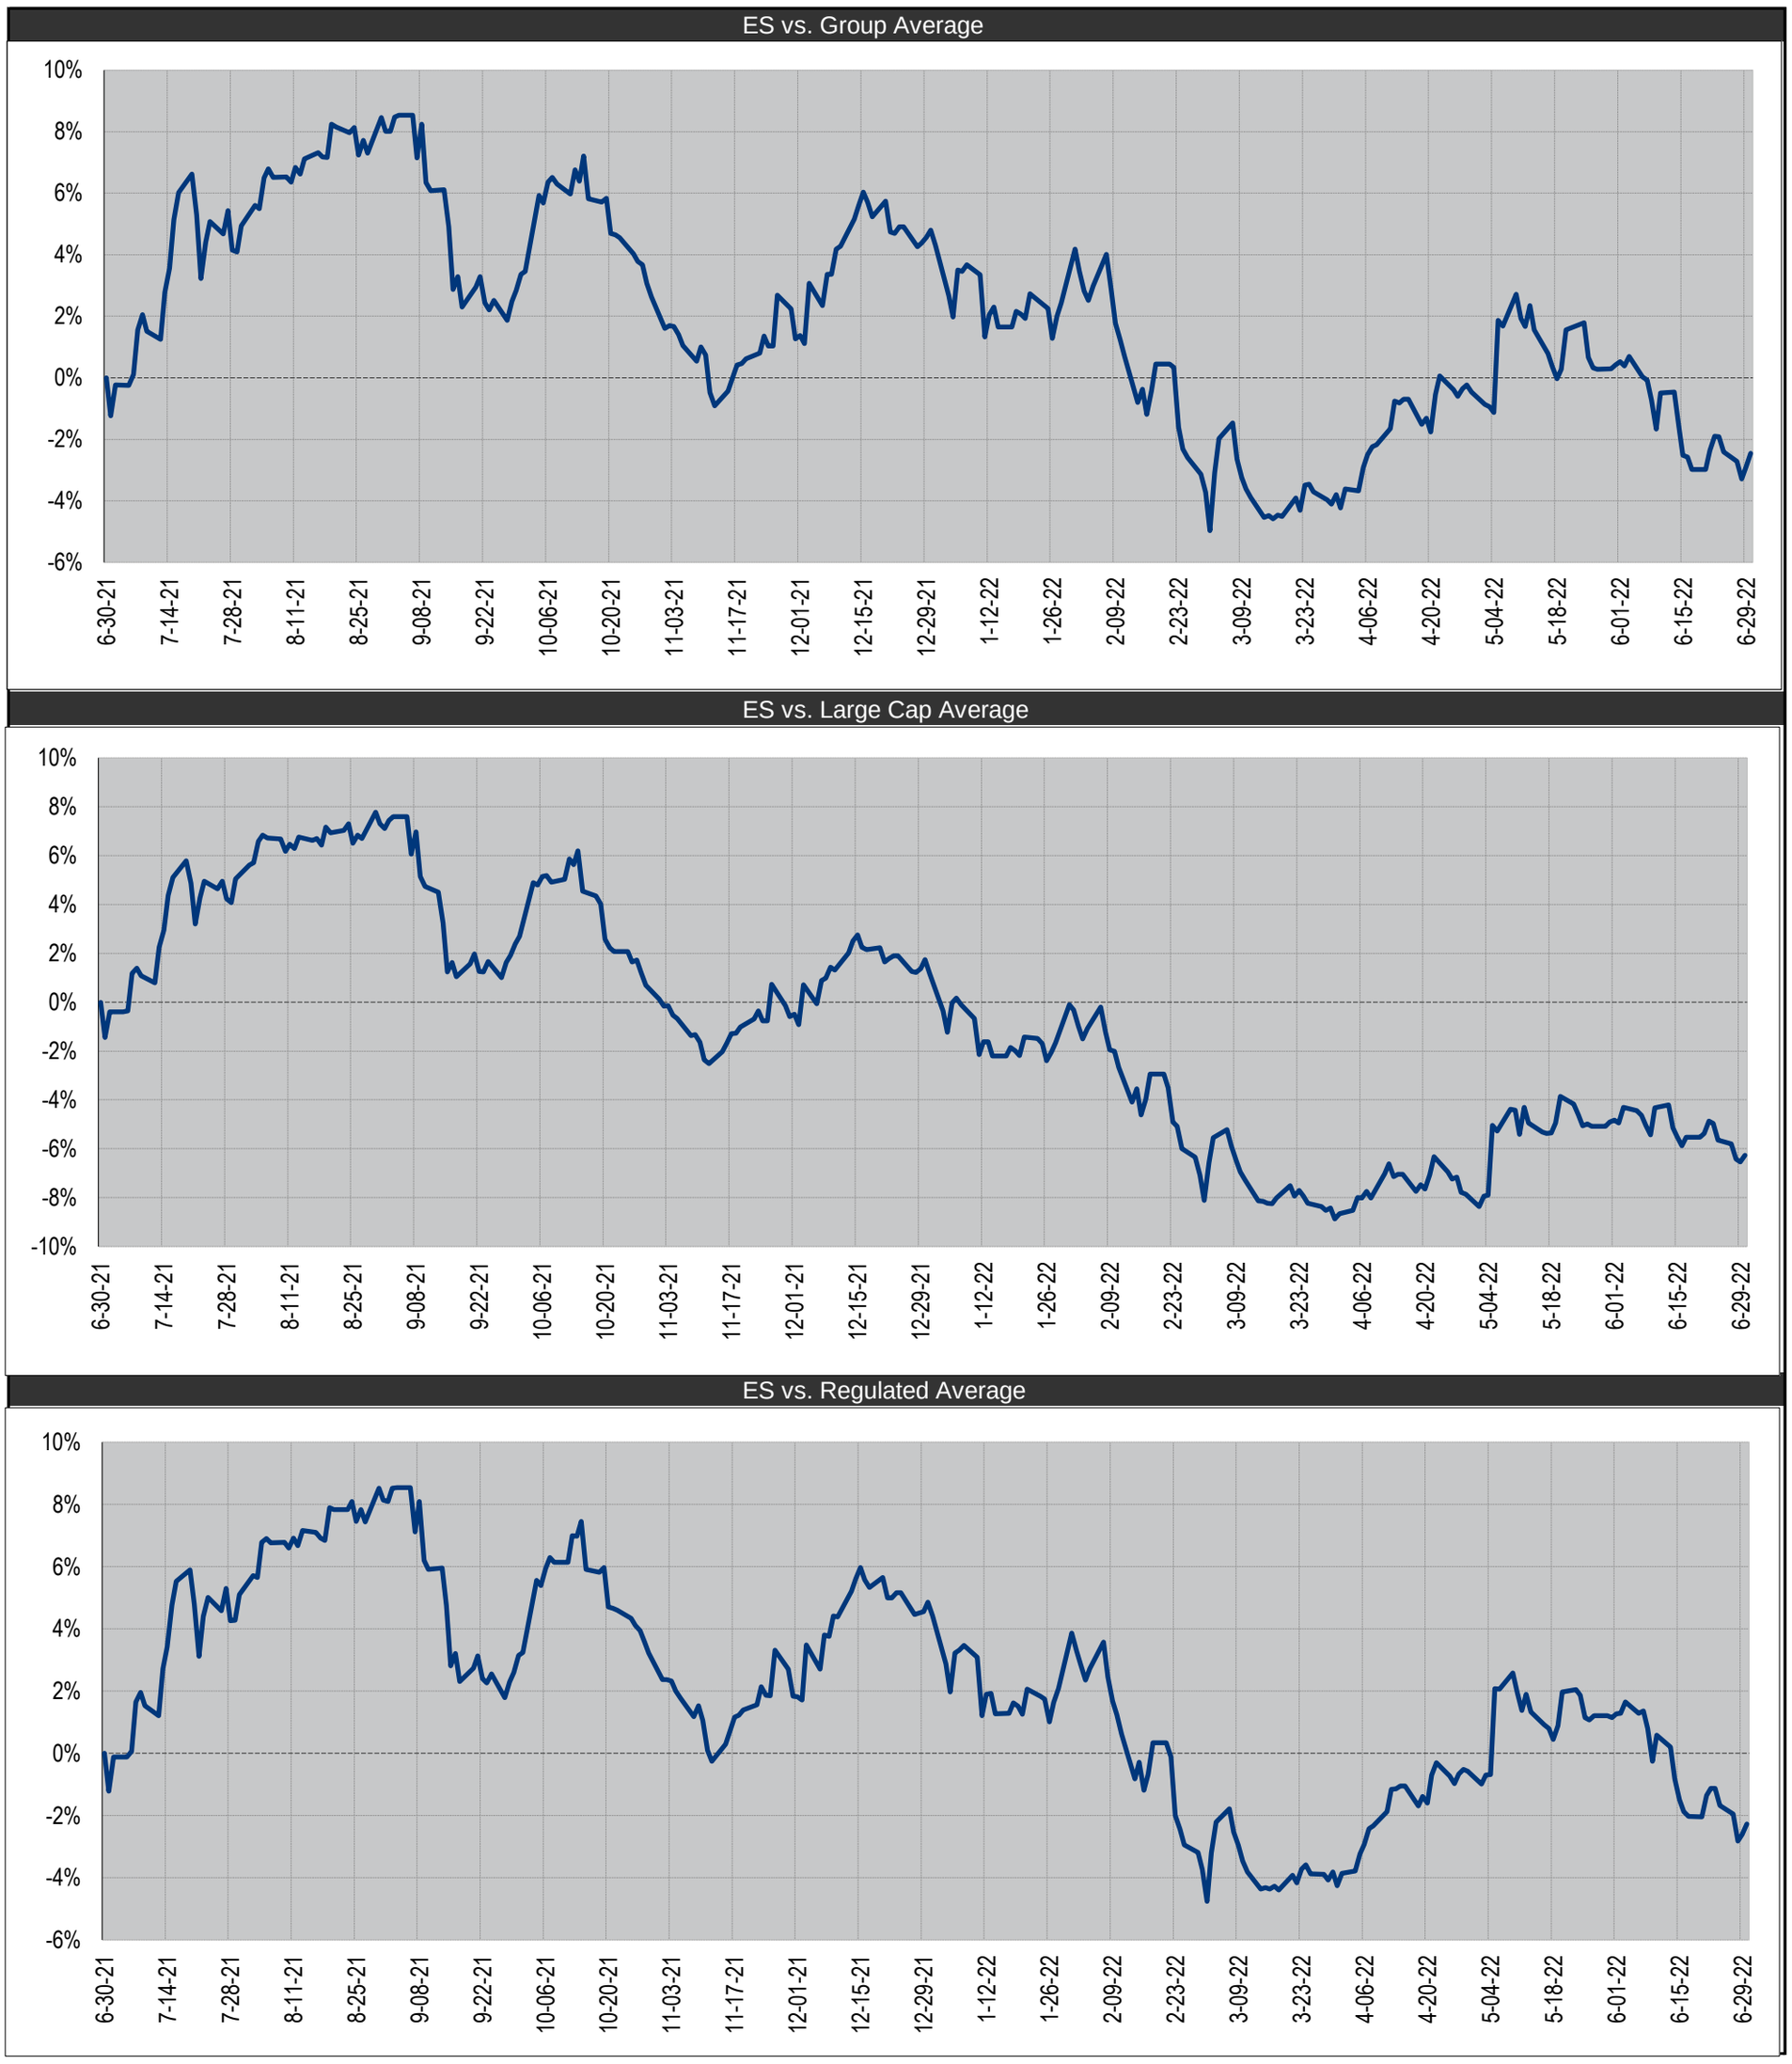
Edison International (EIX) $63.24, Outperform, $77 PT

The stock has lagged peers and is now back at Feb 2022 relative levels, possibly on wildfire risk and rising interest rates (low-cost wildfire-damage debt matures largely in 2023-24).



EIX vs. Group Average

EIX vs. Large Cap Average

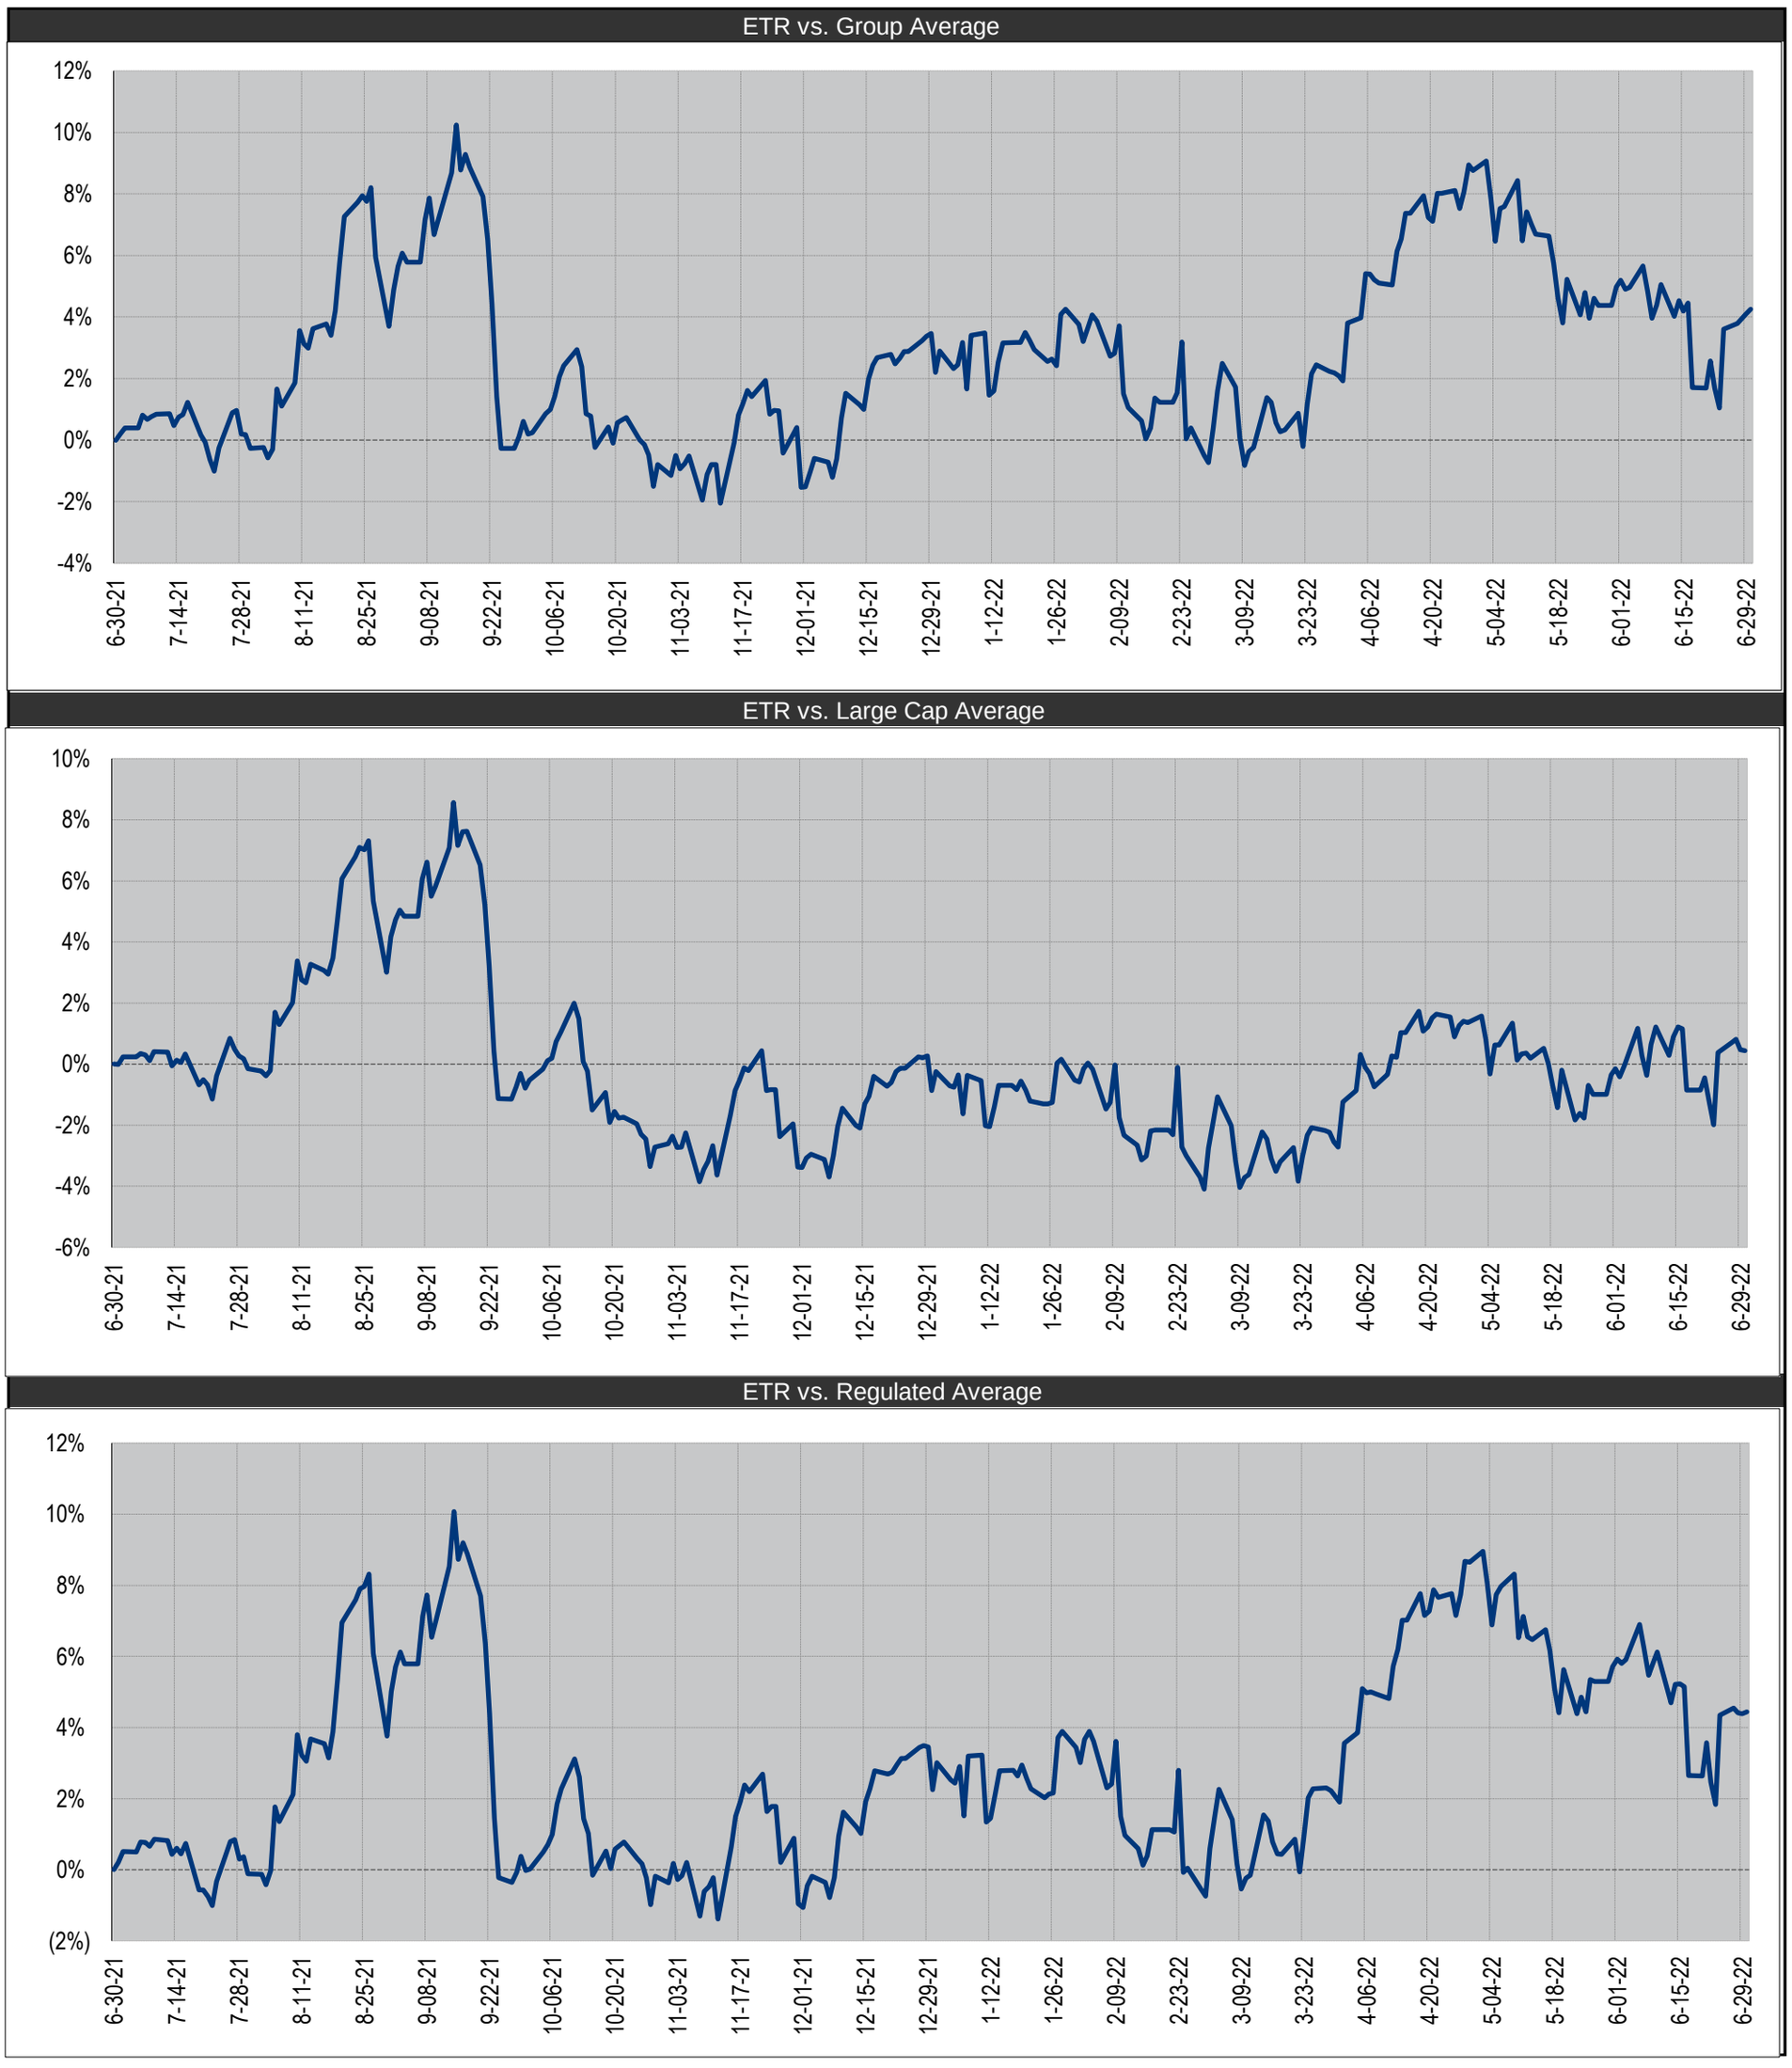


EIX vs. Regulated Average

WOLFE RESEARCH

Eversource Energy (ES) $84.47, Peer Perform, $95 PT

ES lagged peers, particularly regulateds, possibly on Moody's affirming rating but keeping a negative outlook and uncertainty over the sale of its stake in US offshore wind JV with Ørsted.

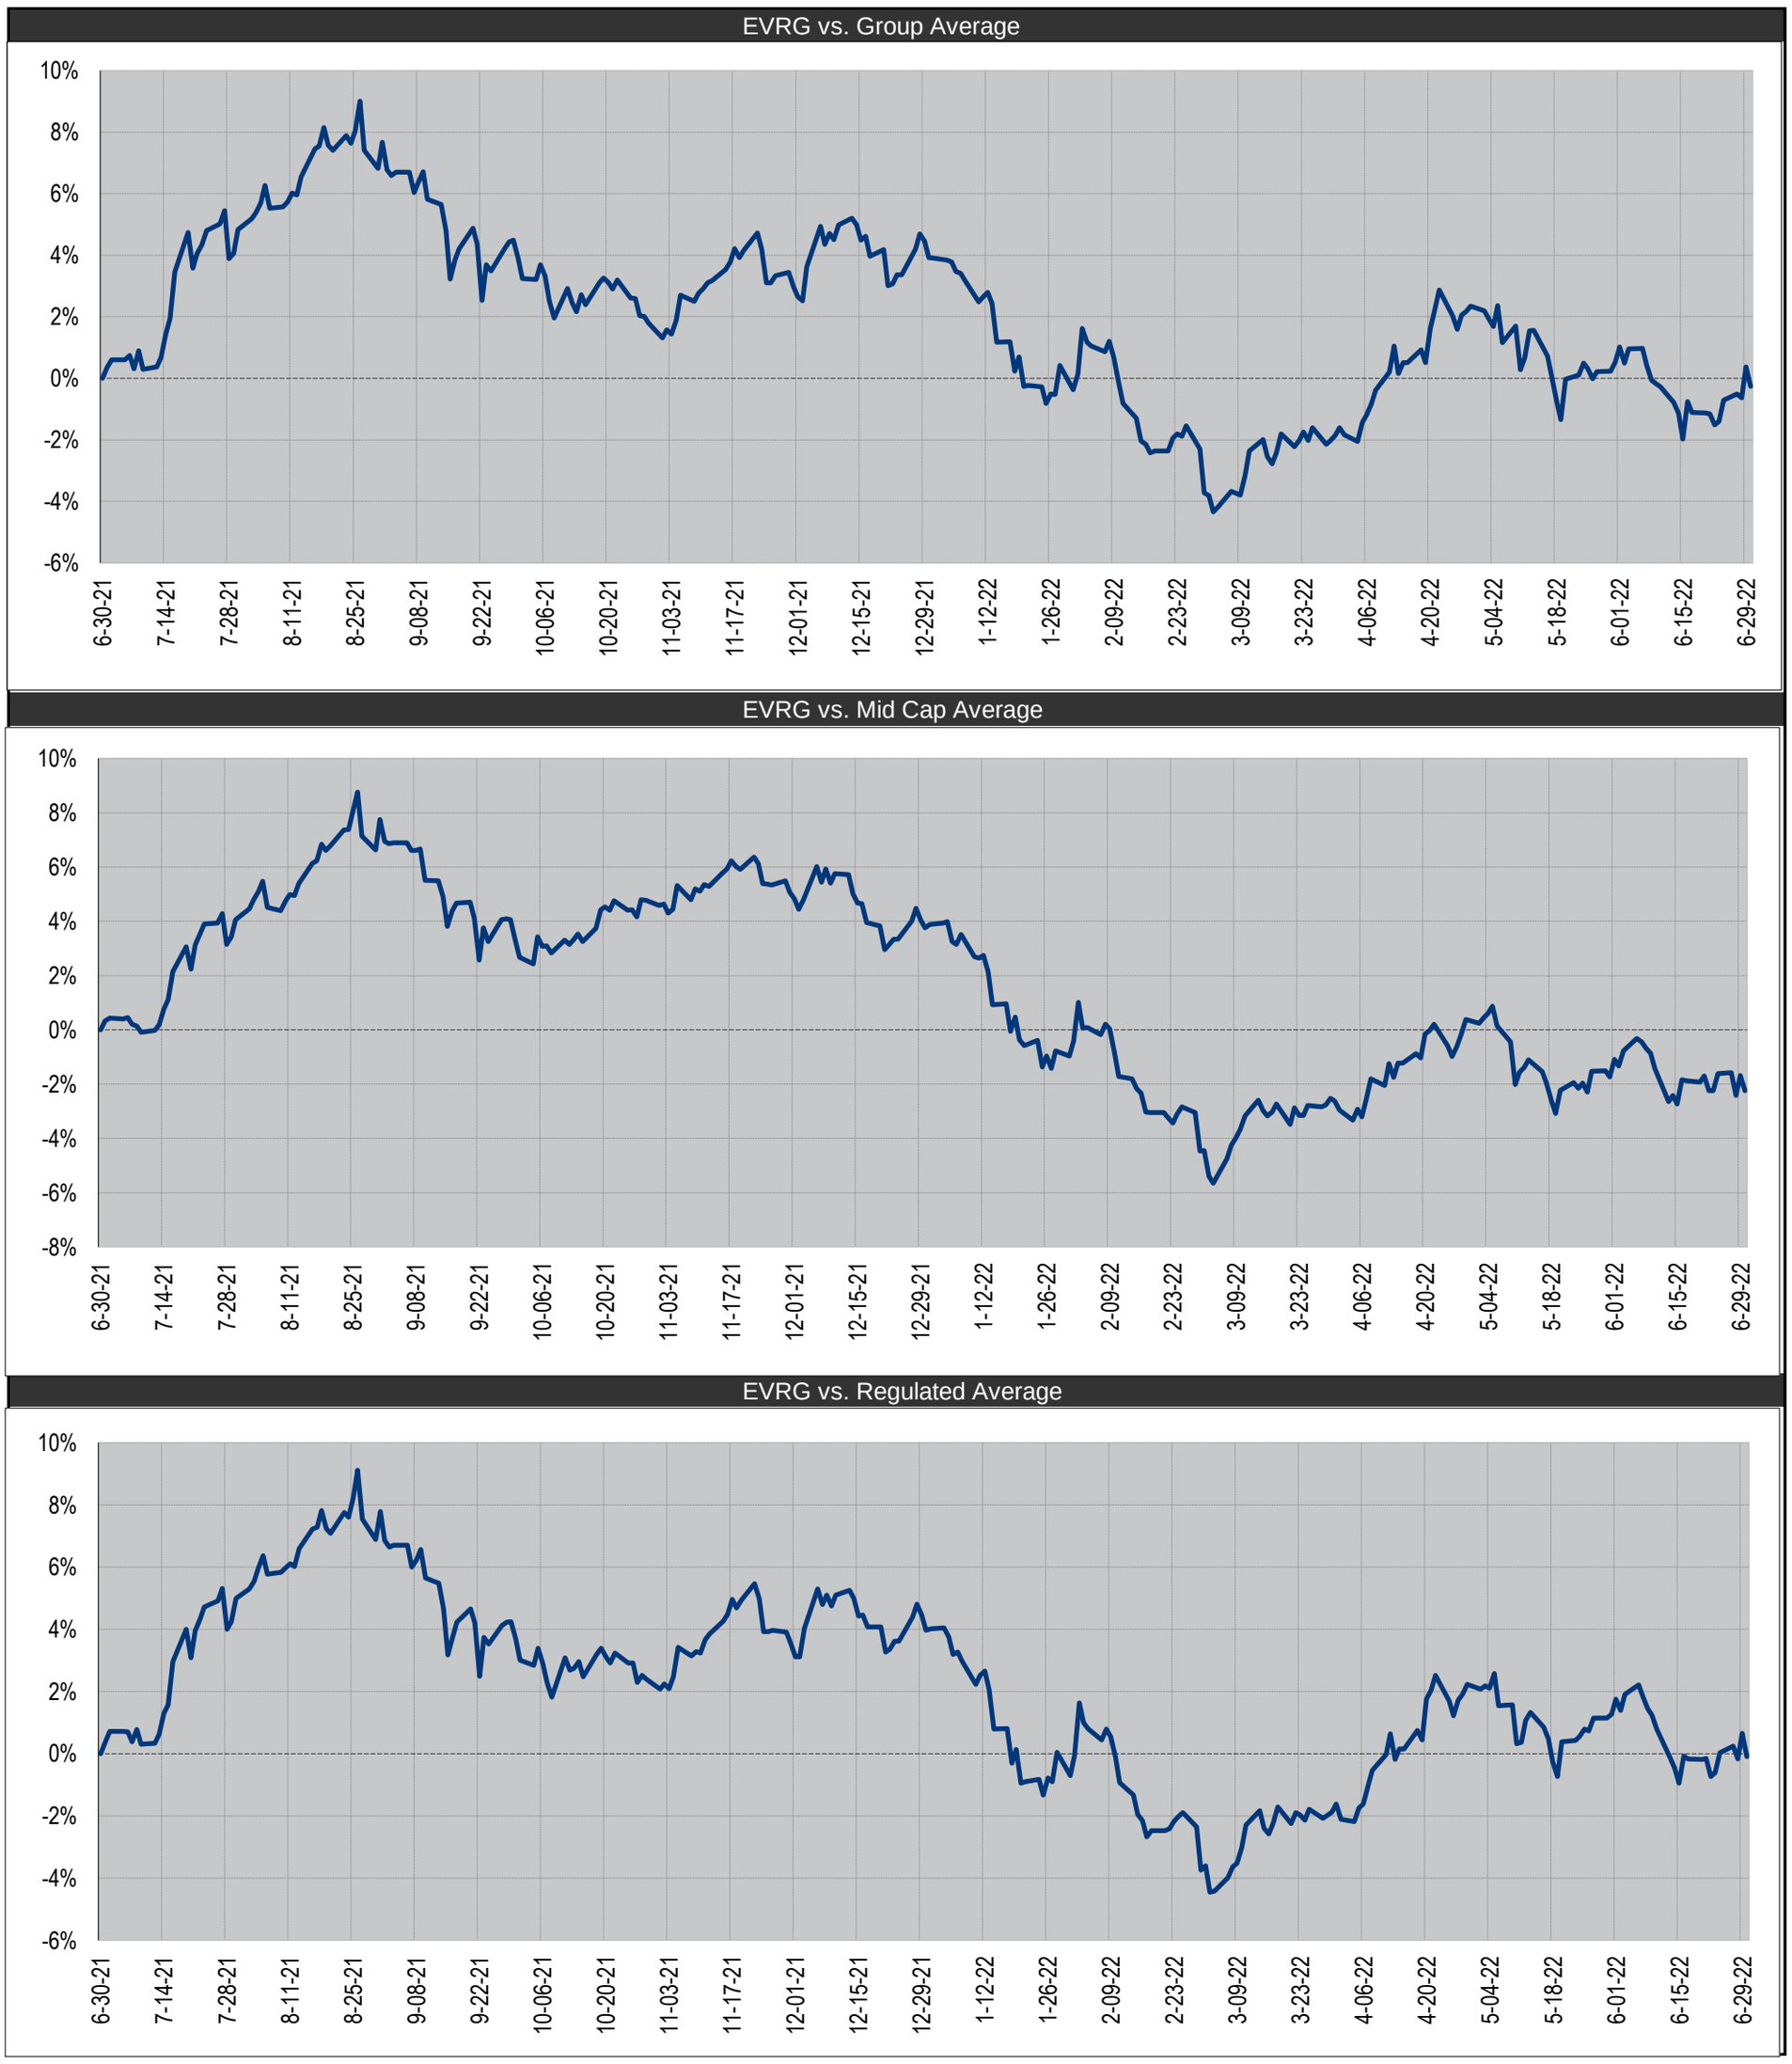


Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Entergy (ETR) $112.64, Outperform, $126 PT

ETR slightly beat large cap peers but trailed regulated peers in Jun, declining versus both after the 6/16 Investor Day before regaining most of that underperformance by month end.

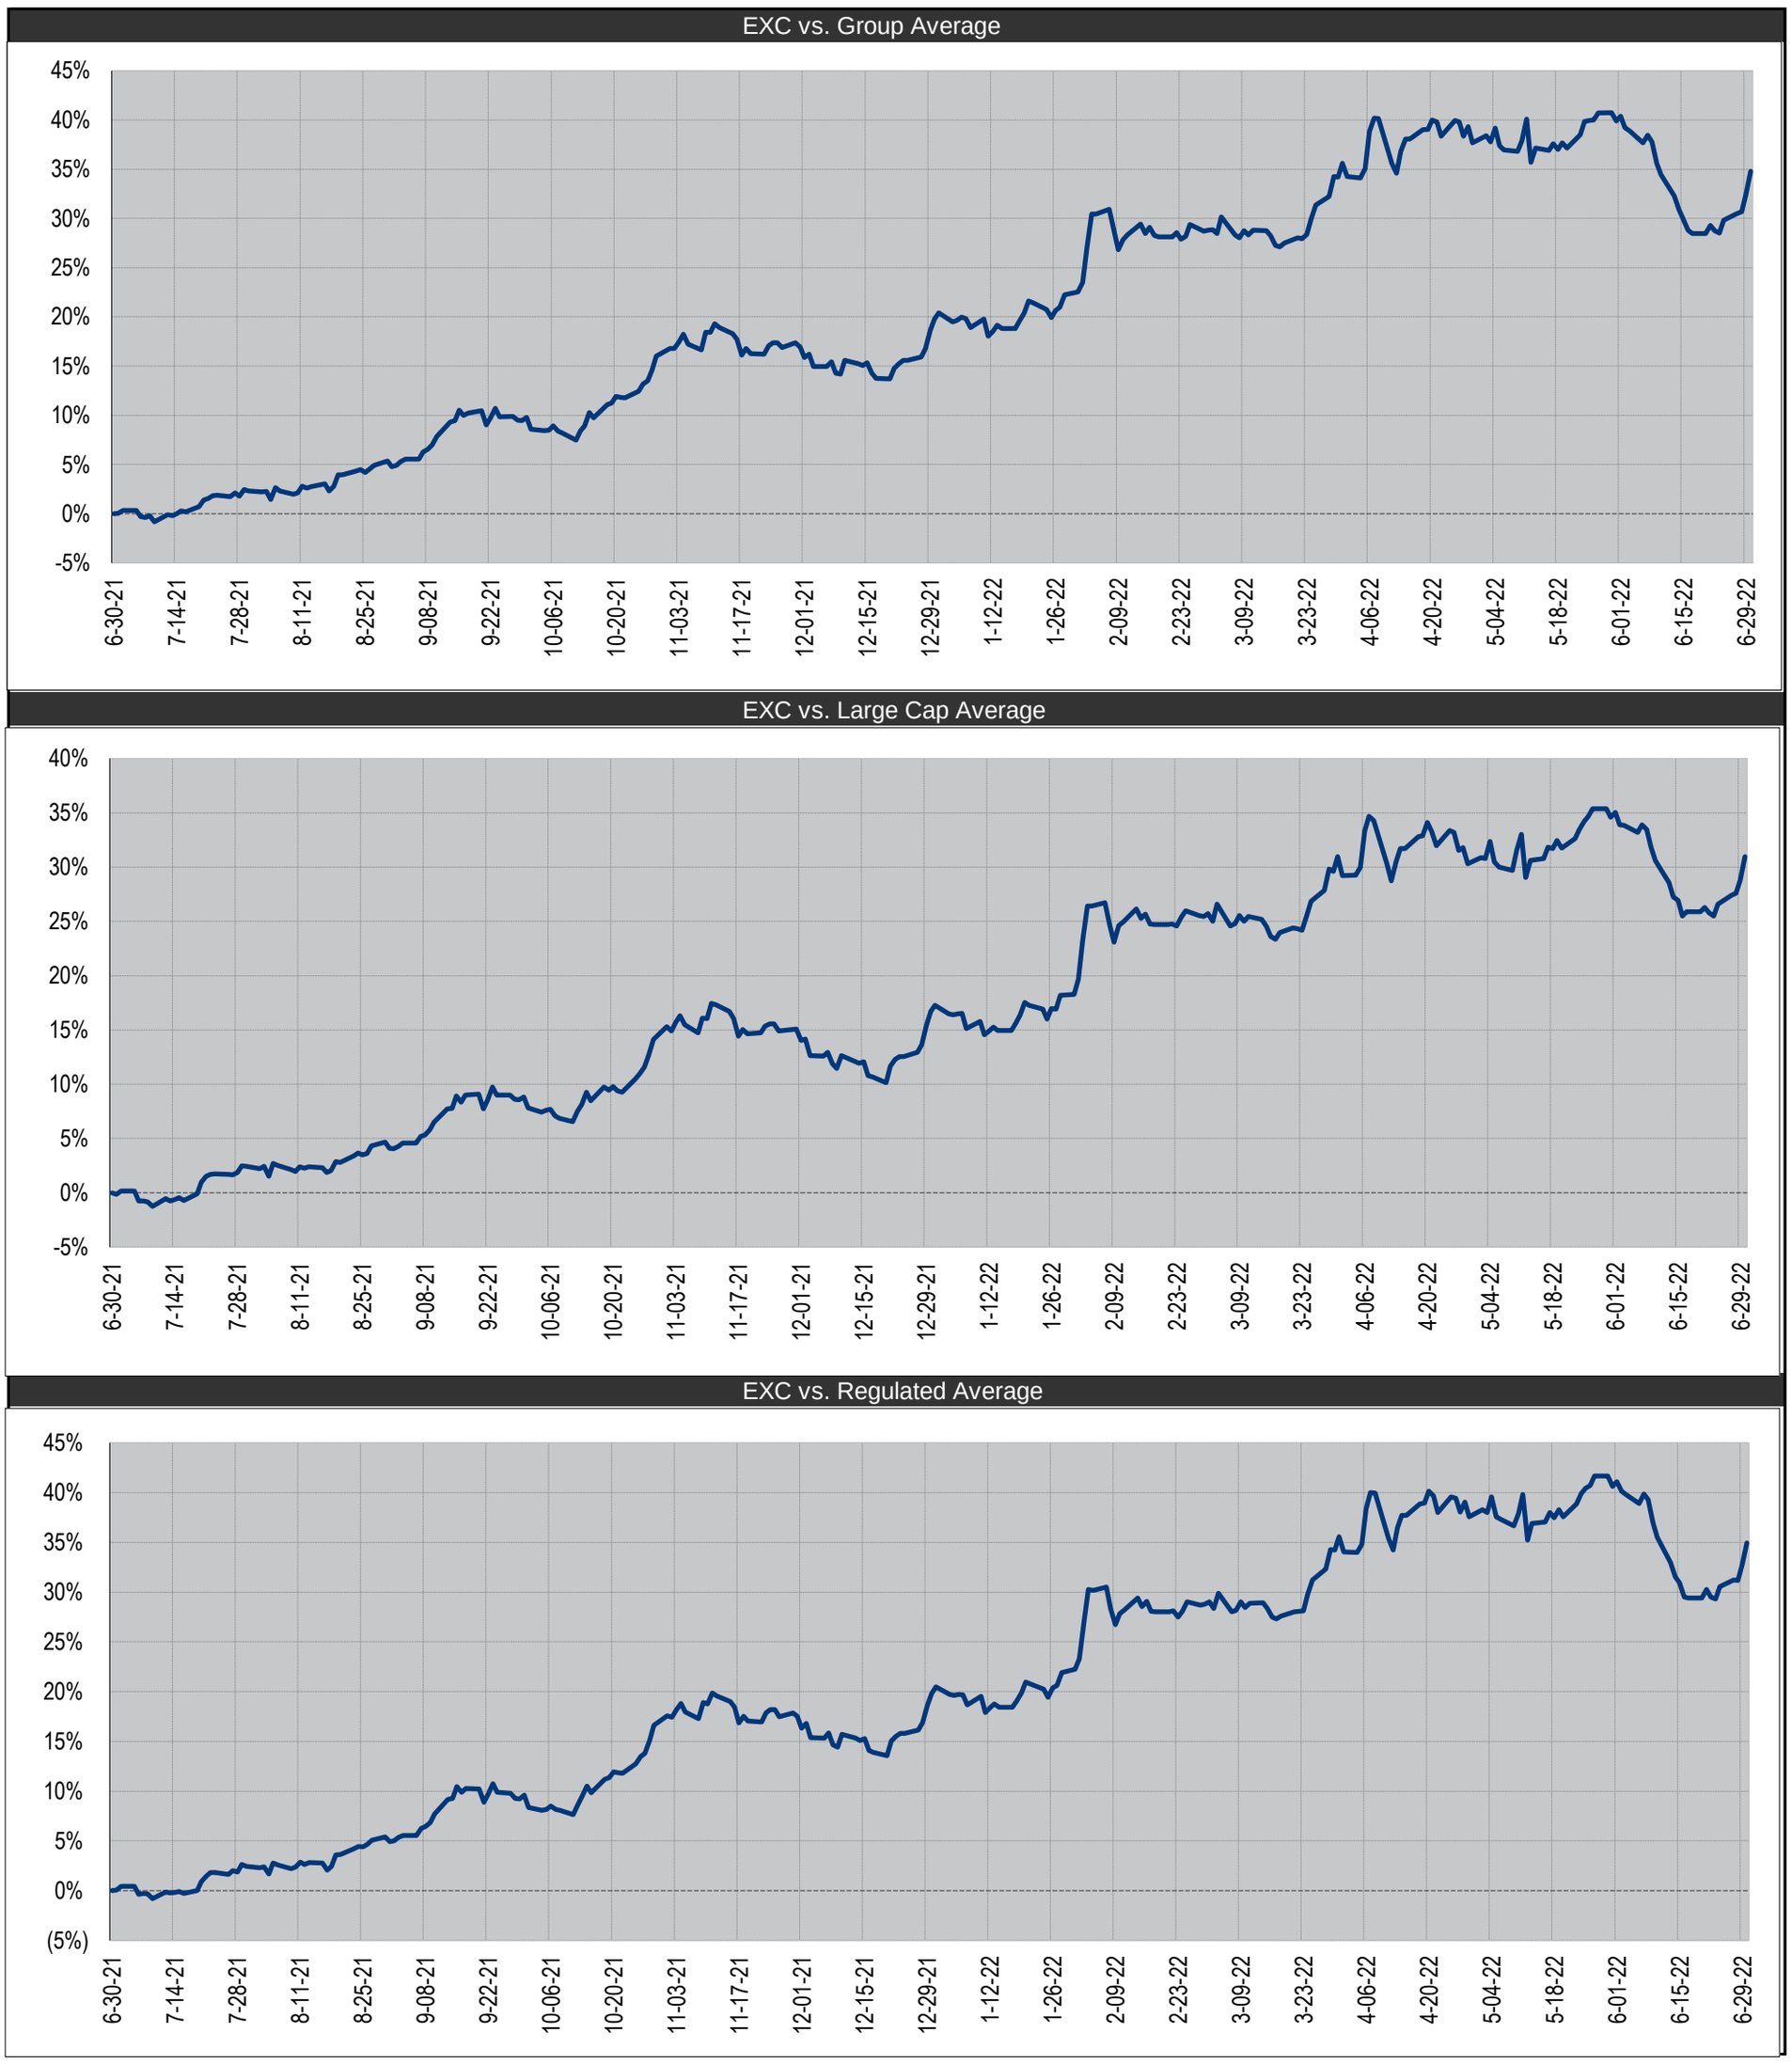


Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Evergy (EVRG) $65.25, Outperform, $77 PT

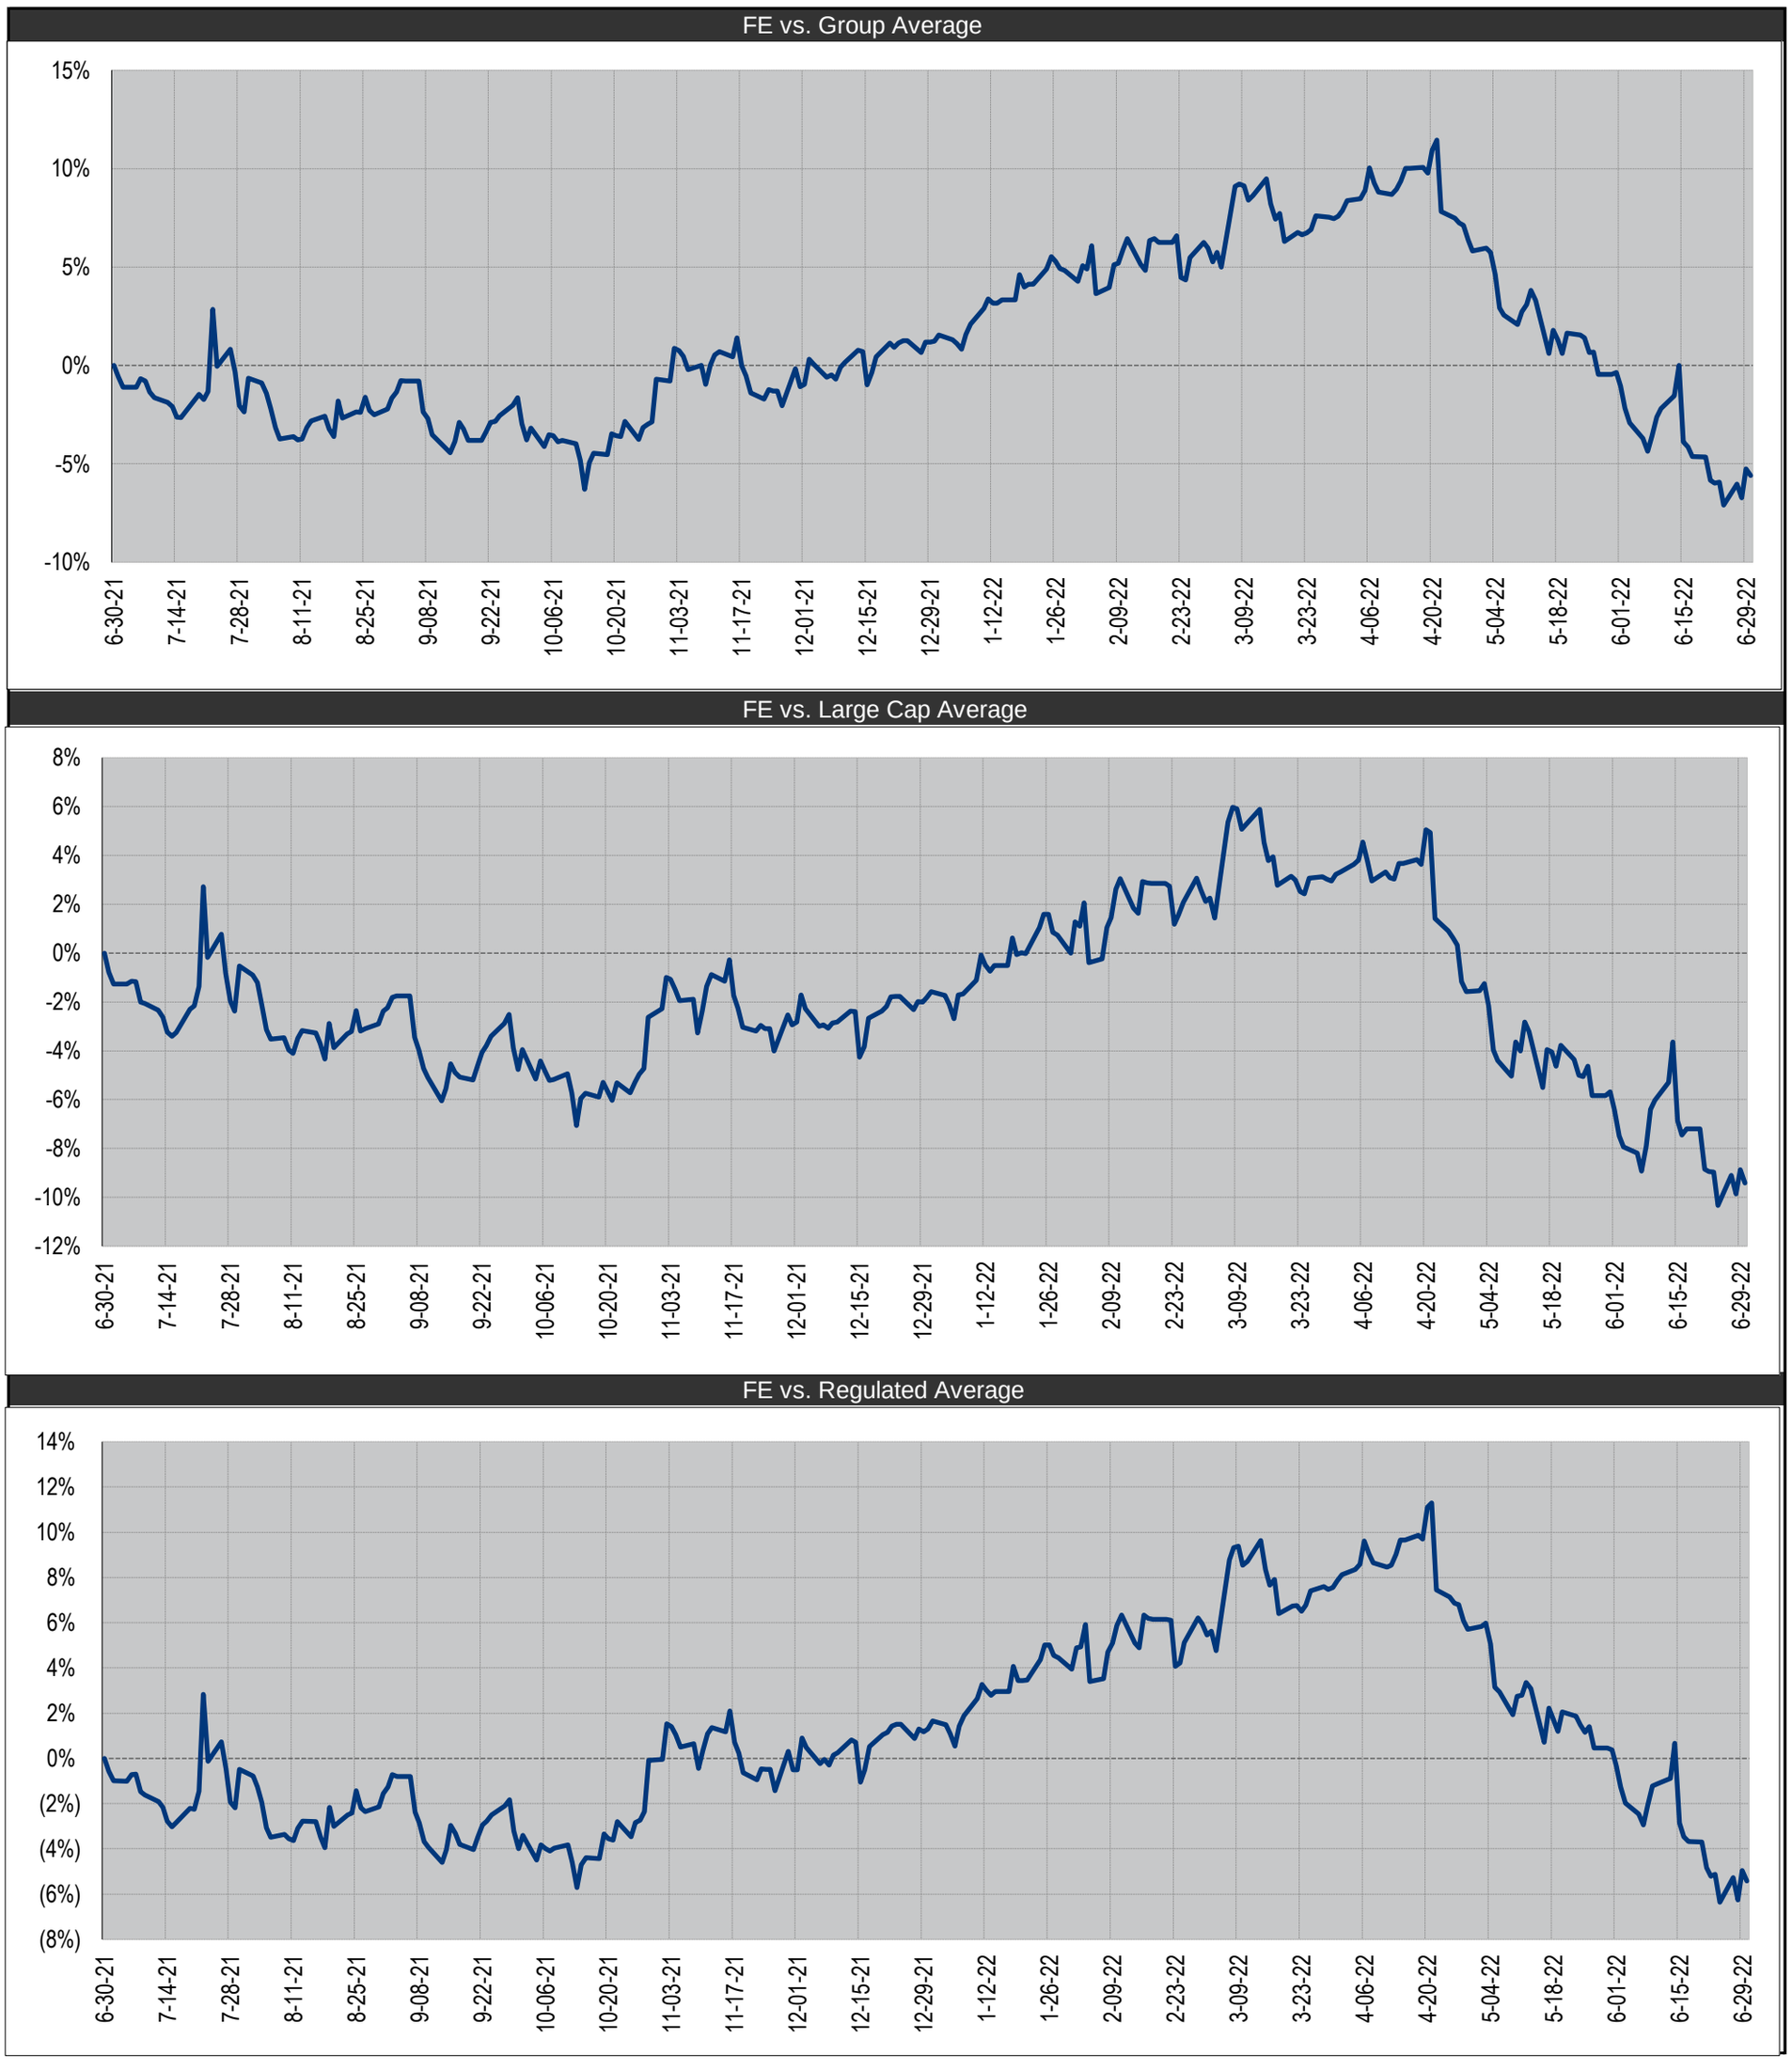
EVRG underperformed in June, despite what we thought was a reasonable Missouri PSC Staff recommendation in its pending rate cases. EVRG filed its IRP update too, which showed some shifting toward wind and reduction in planned solar. The stock is also lagging on the year due to the rate case overhang.



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Exelon (EXC) $45.32, Outperform, $50 PT

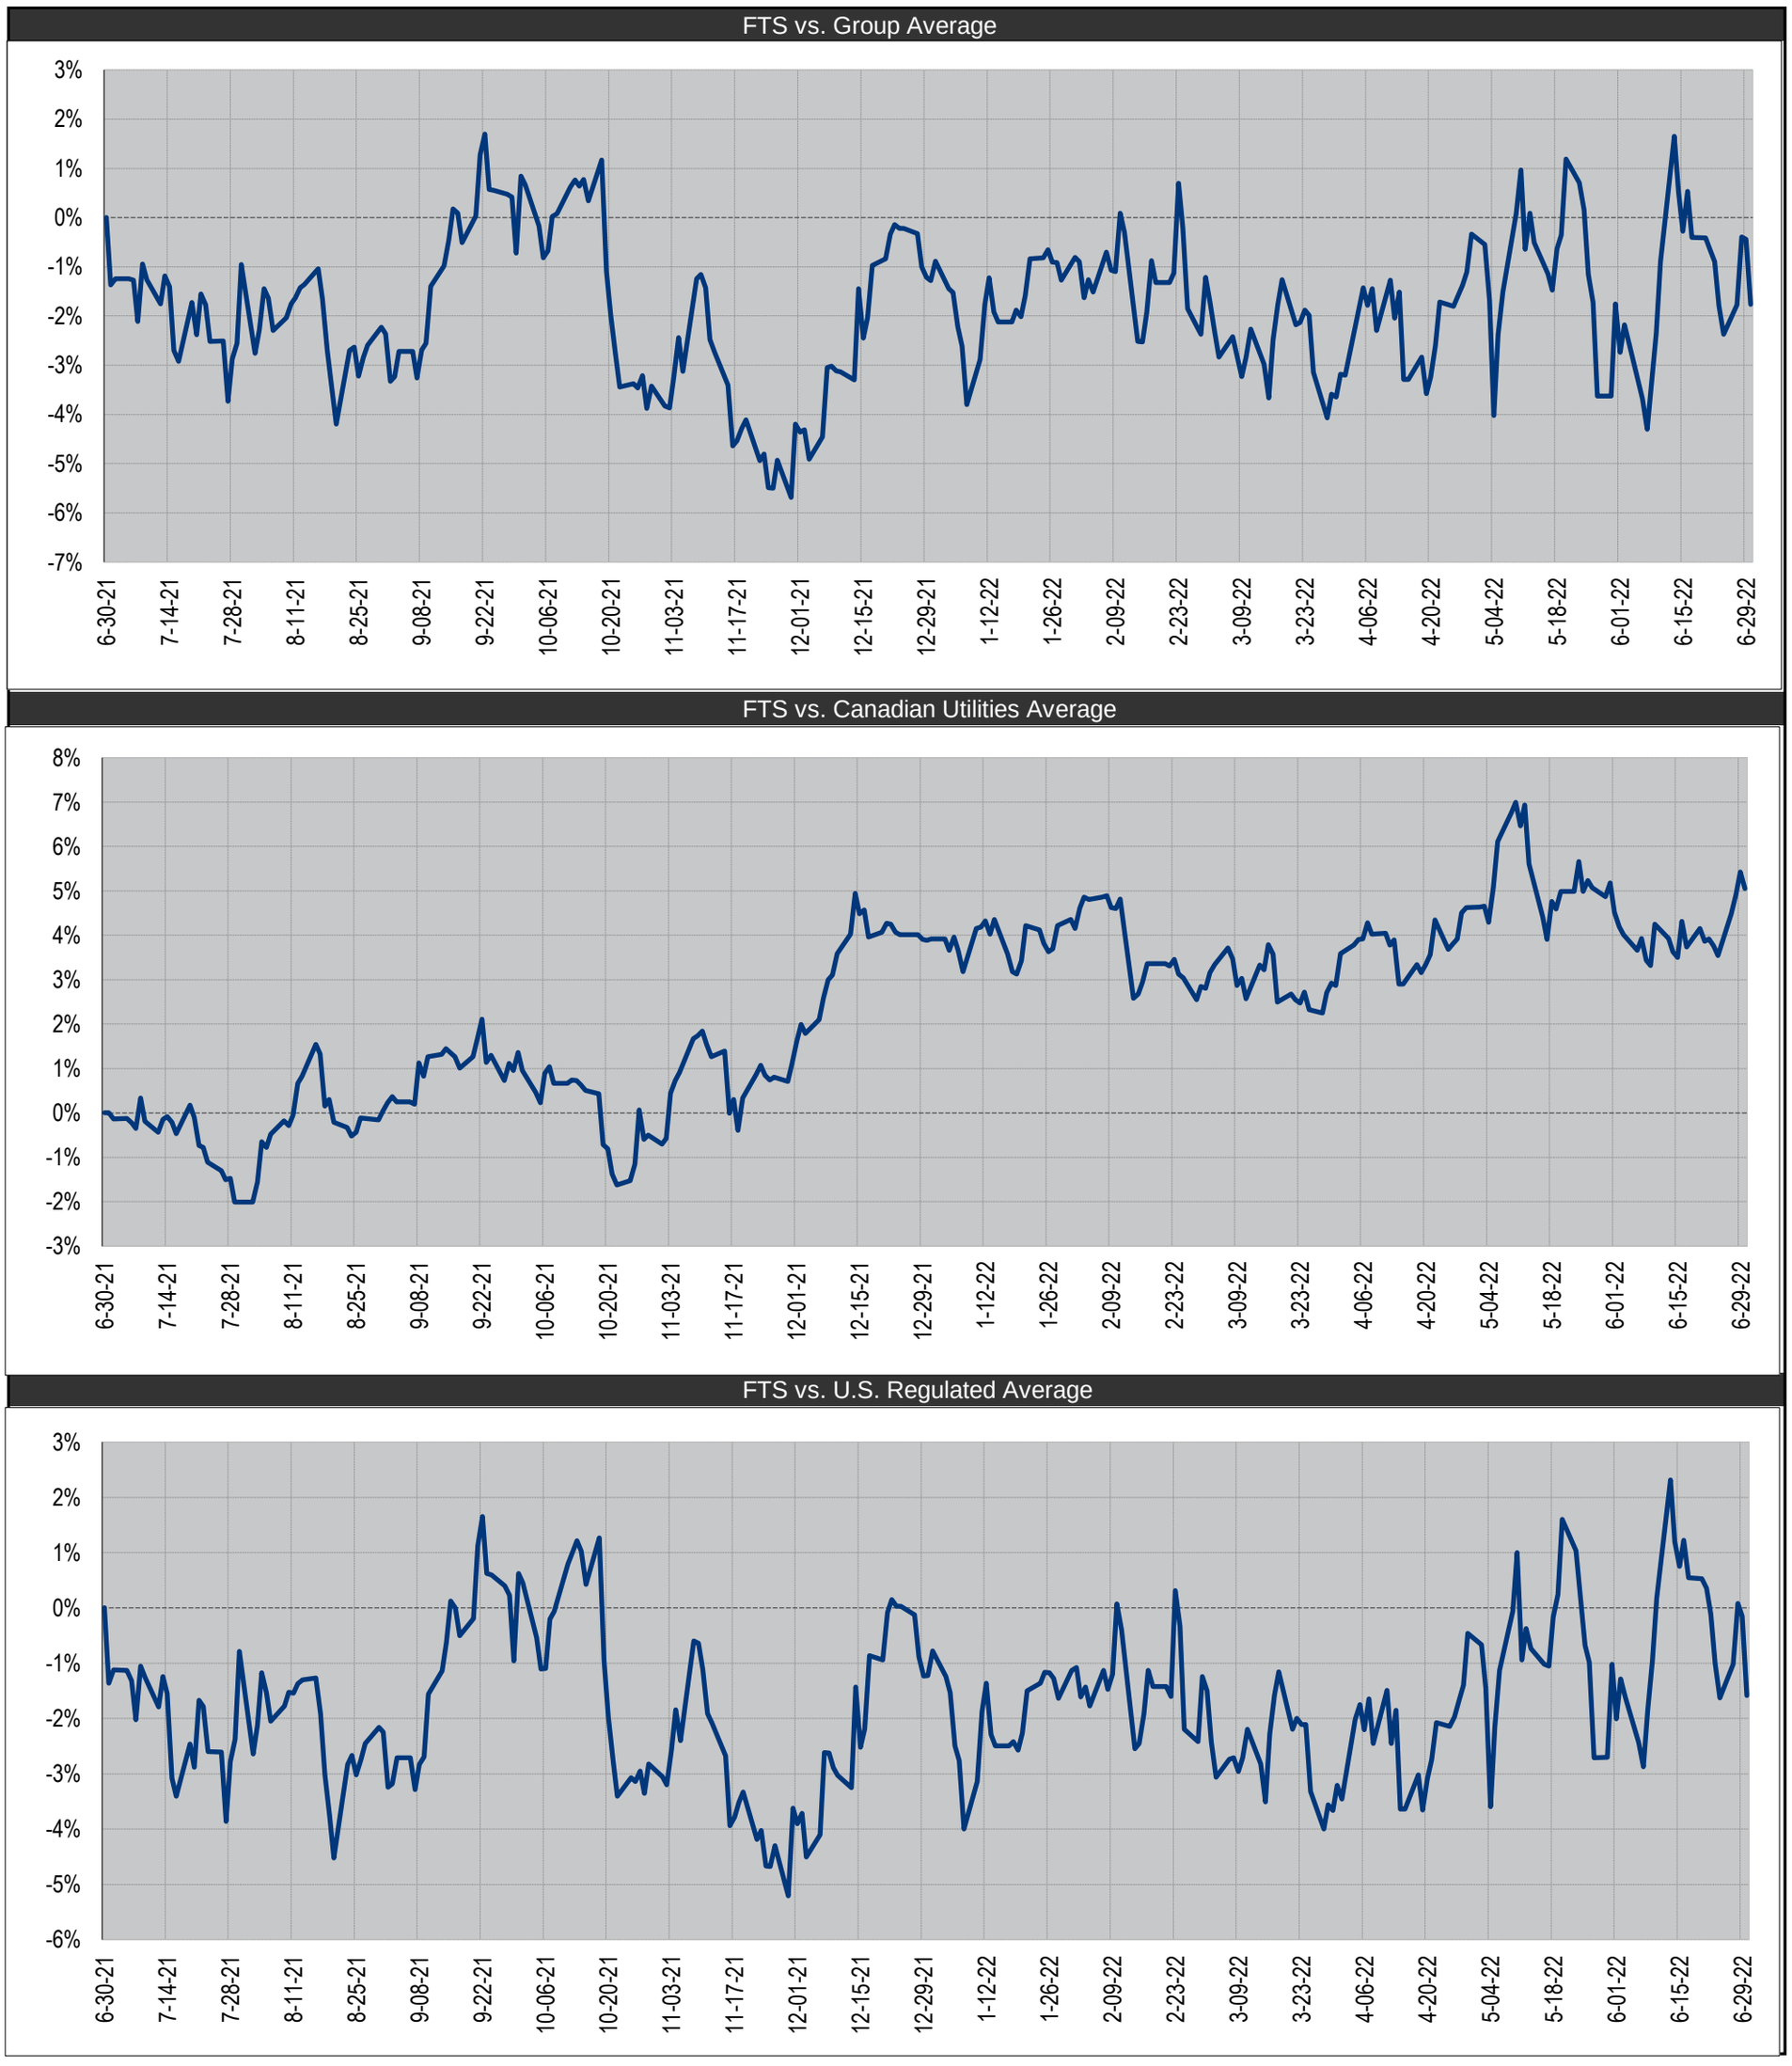


EXC finally took a breather in Jun after months of outperformance; by month end it had recovered more than half of the ~1000bp of underperformance in the first half of the month.

WOLFE RESEARCH

FirstEnergy (FE) $38.39, Outperform, $45 PT

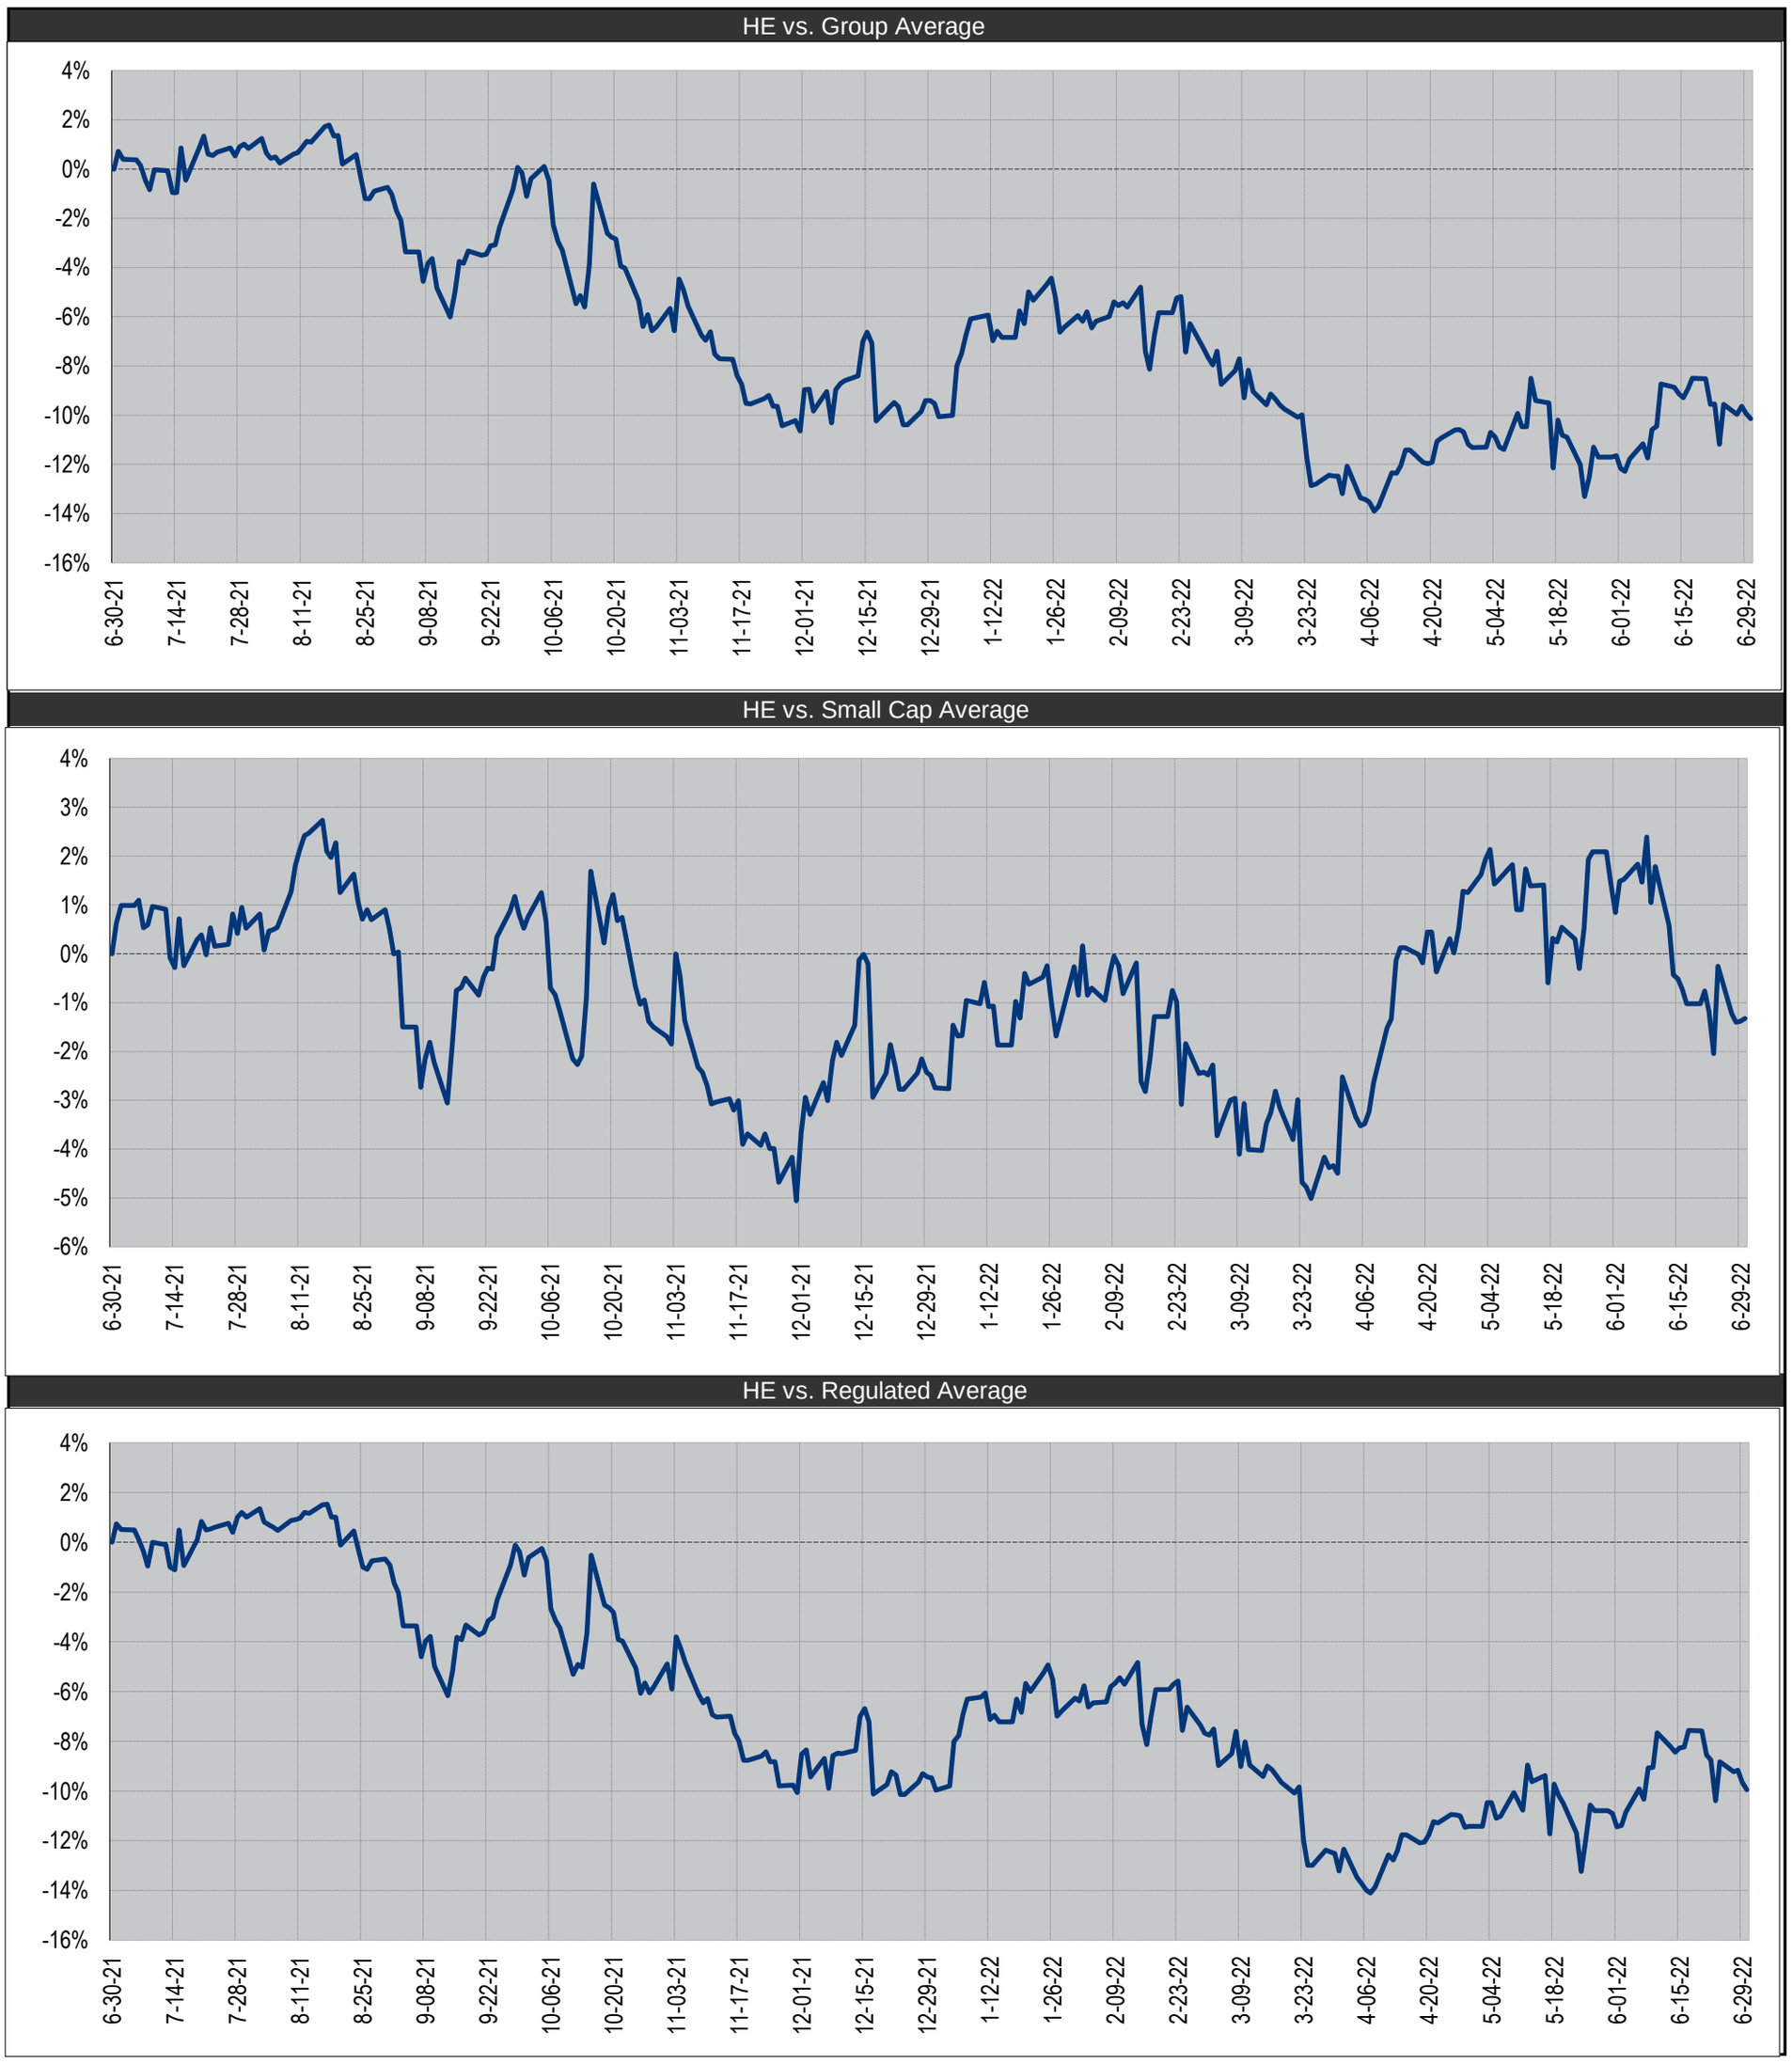
FE continued to set fresh lows in June, alongside the broader market sell-off. This remains tied to pension risk, which is looking like a big earnings headwind given the decline in equities and fixed income.



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

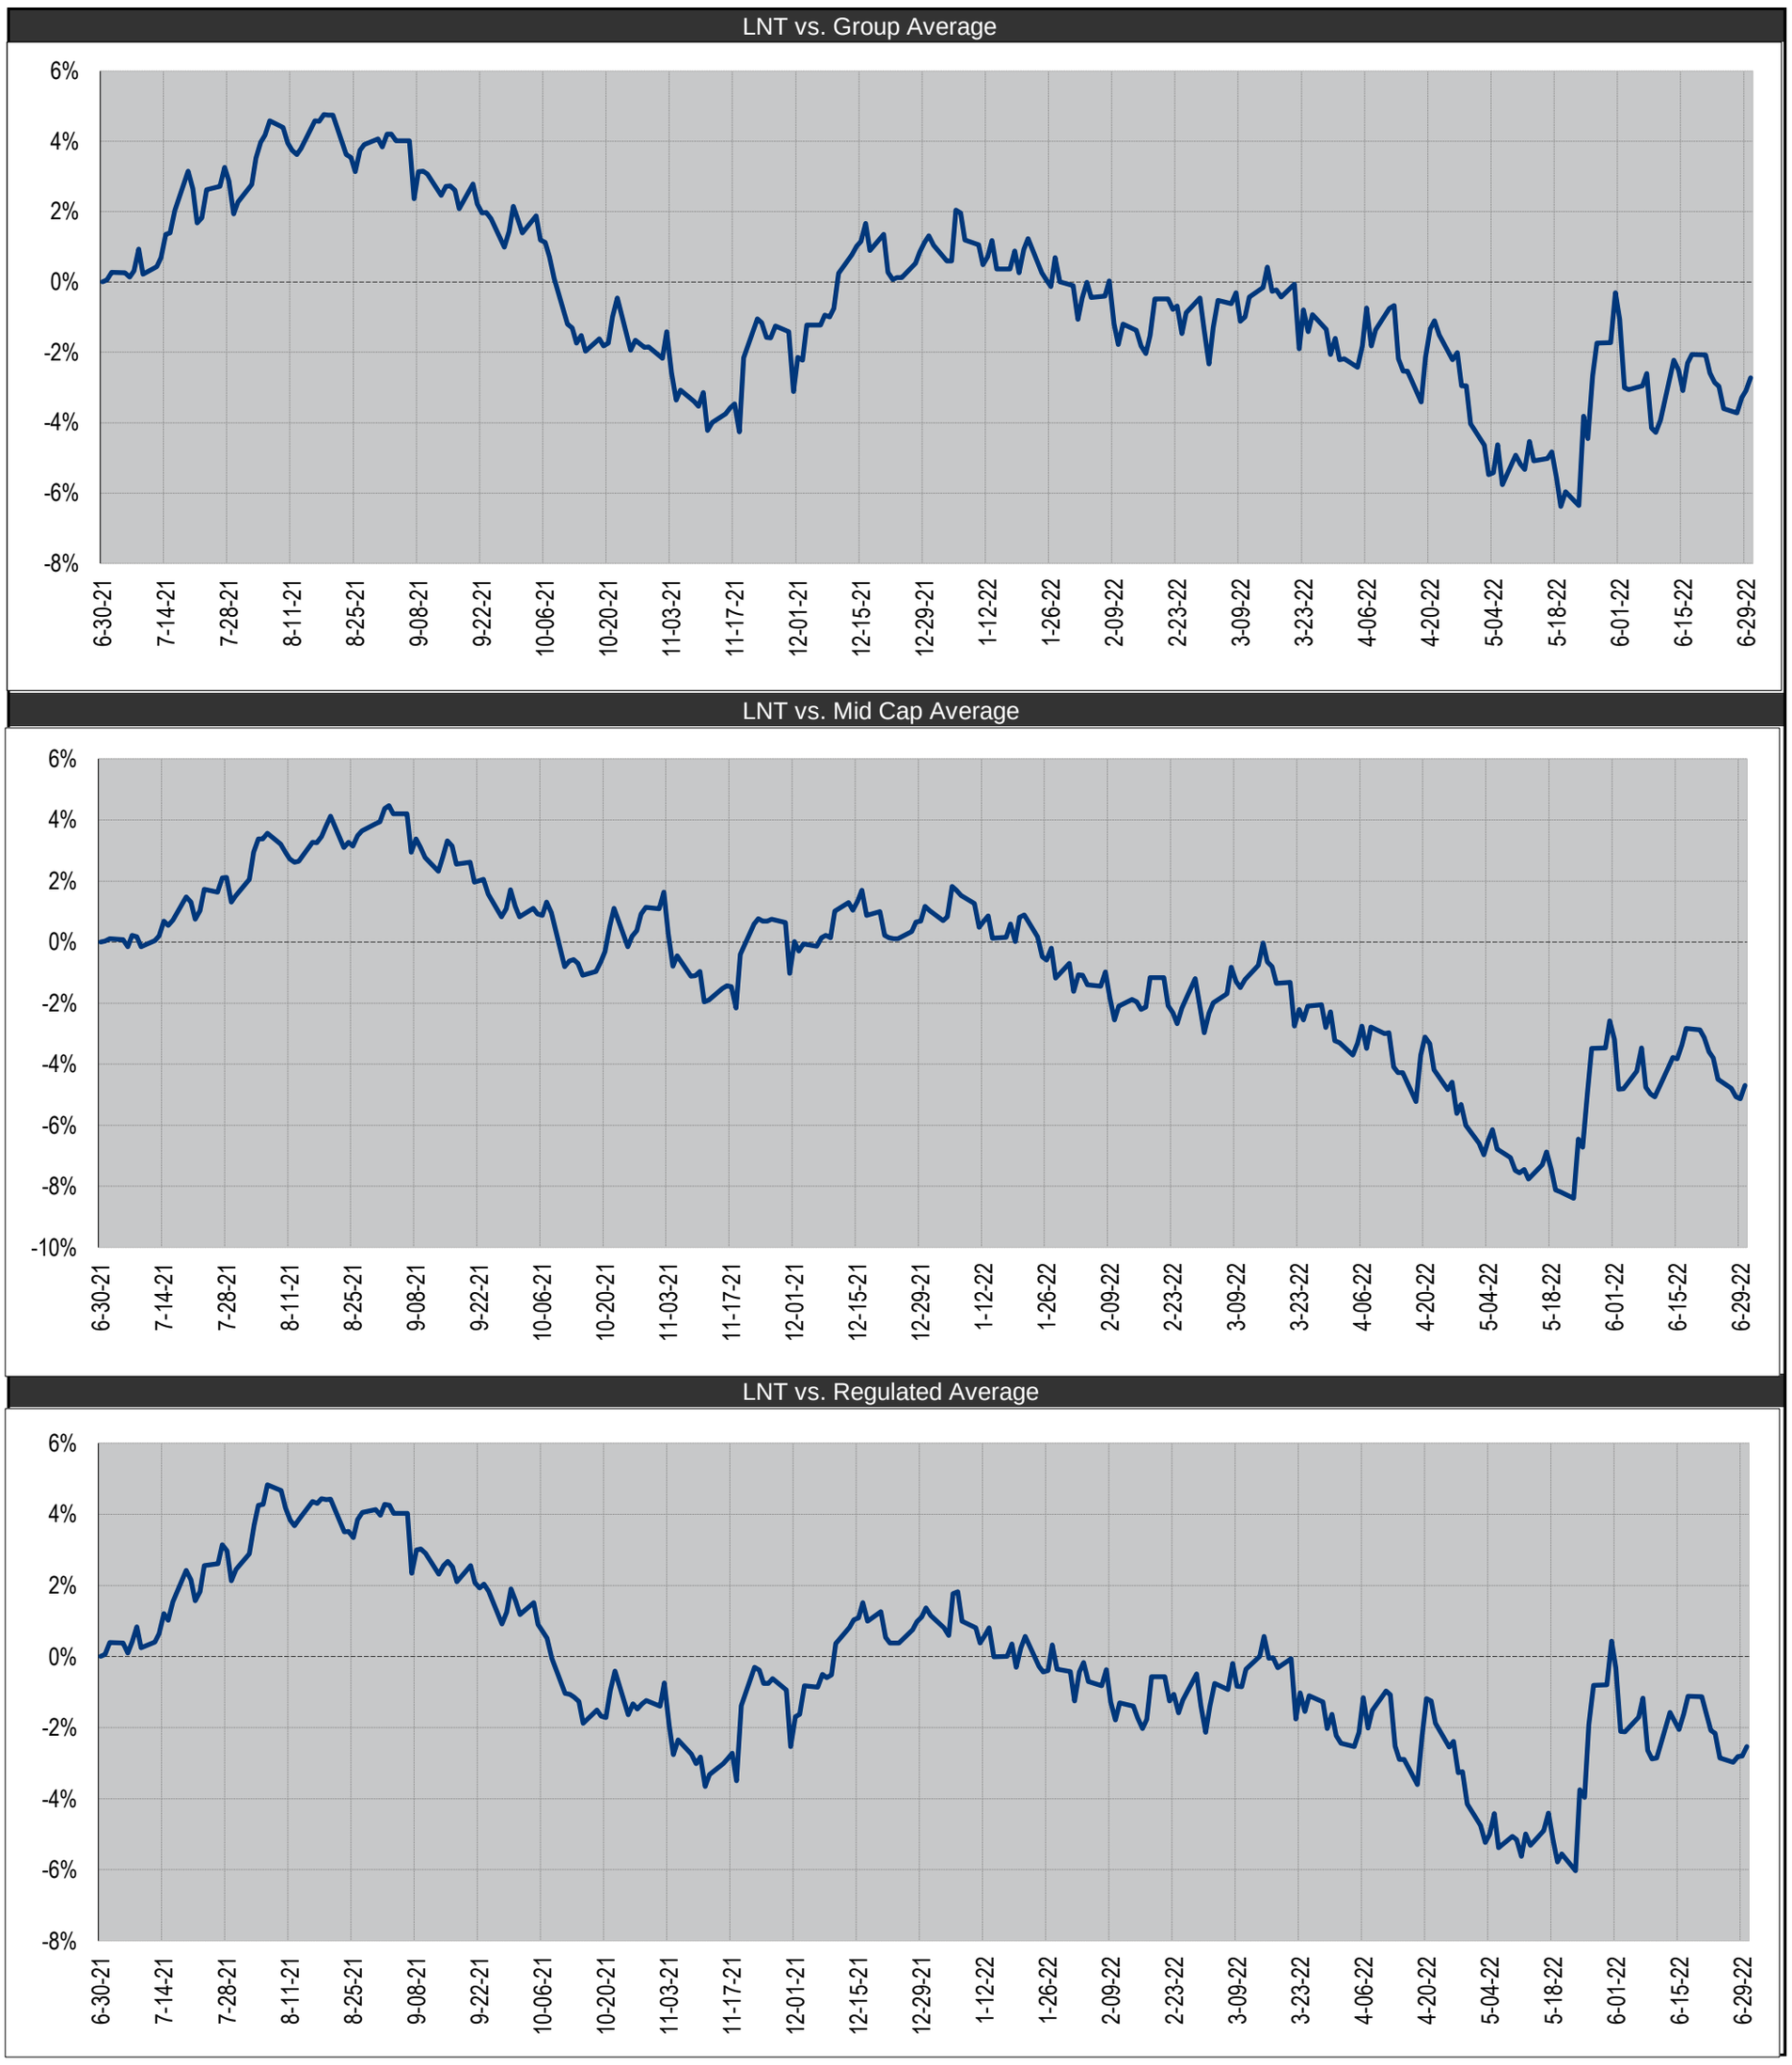
Fortis (FTS) $47.27, Underperform, $47 PT



FTS saw choppy trading again in June – outperforming to start the month before mostly retracing that move. The stock is trading in-line with the group for the year too. FTS issued a response at FERC to the equity ratio complaint and also filed its TEP rate case in Arizona.

Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

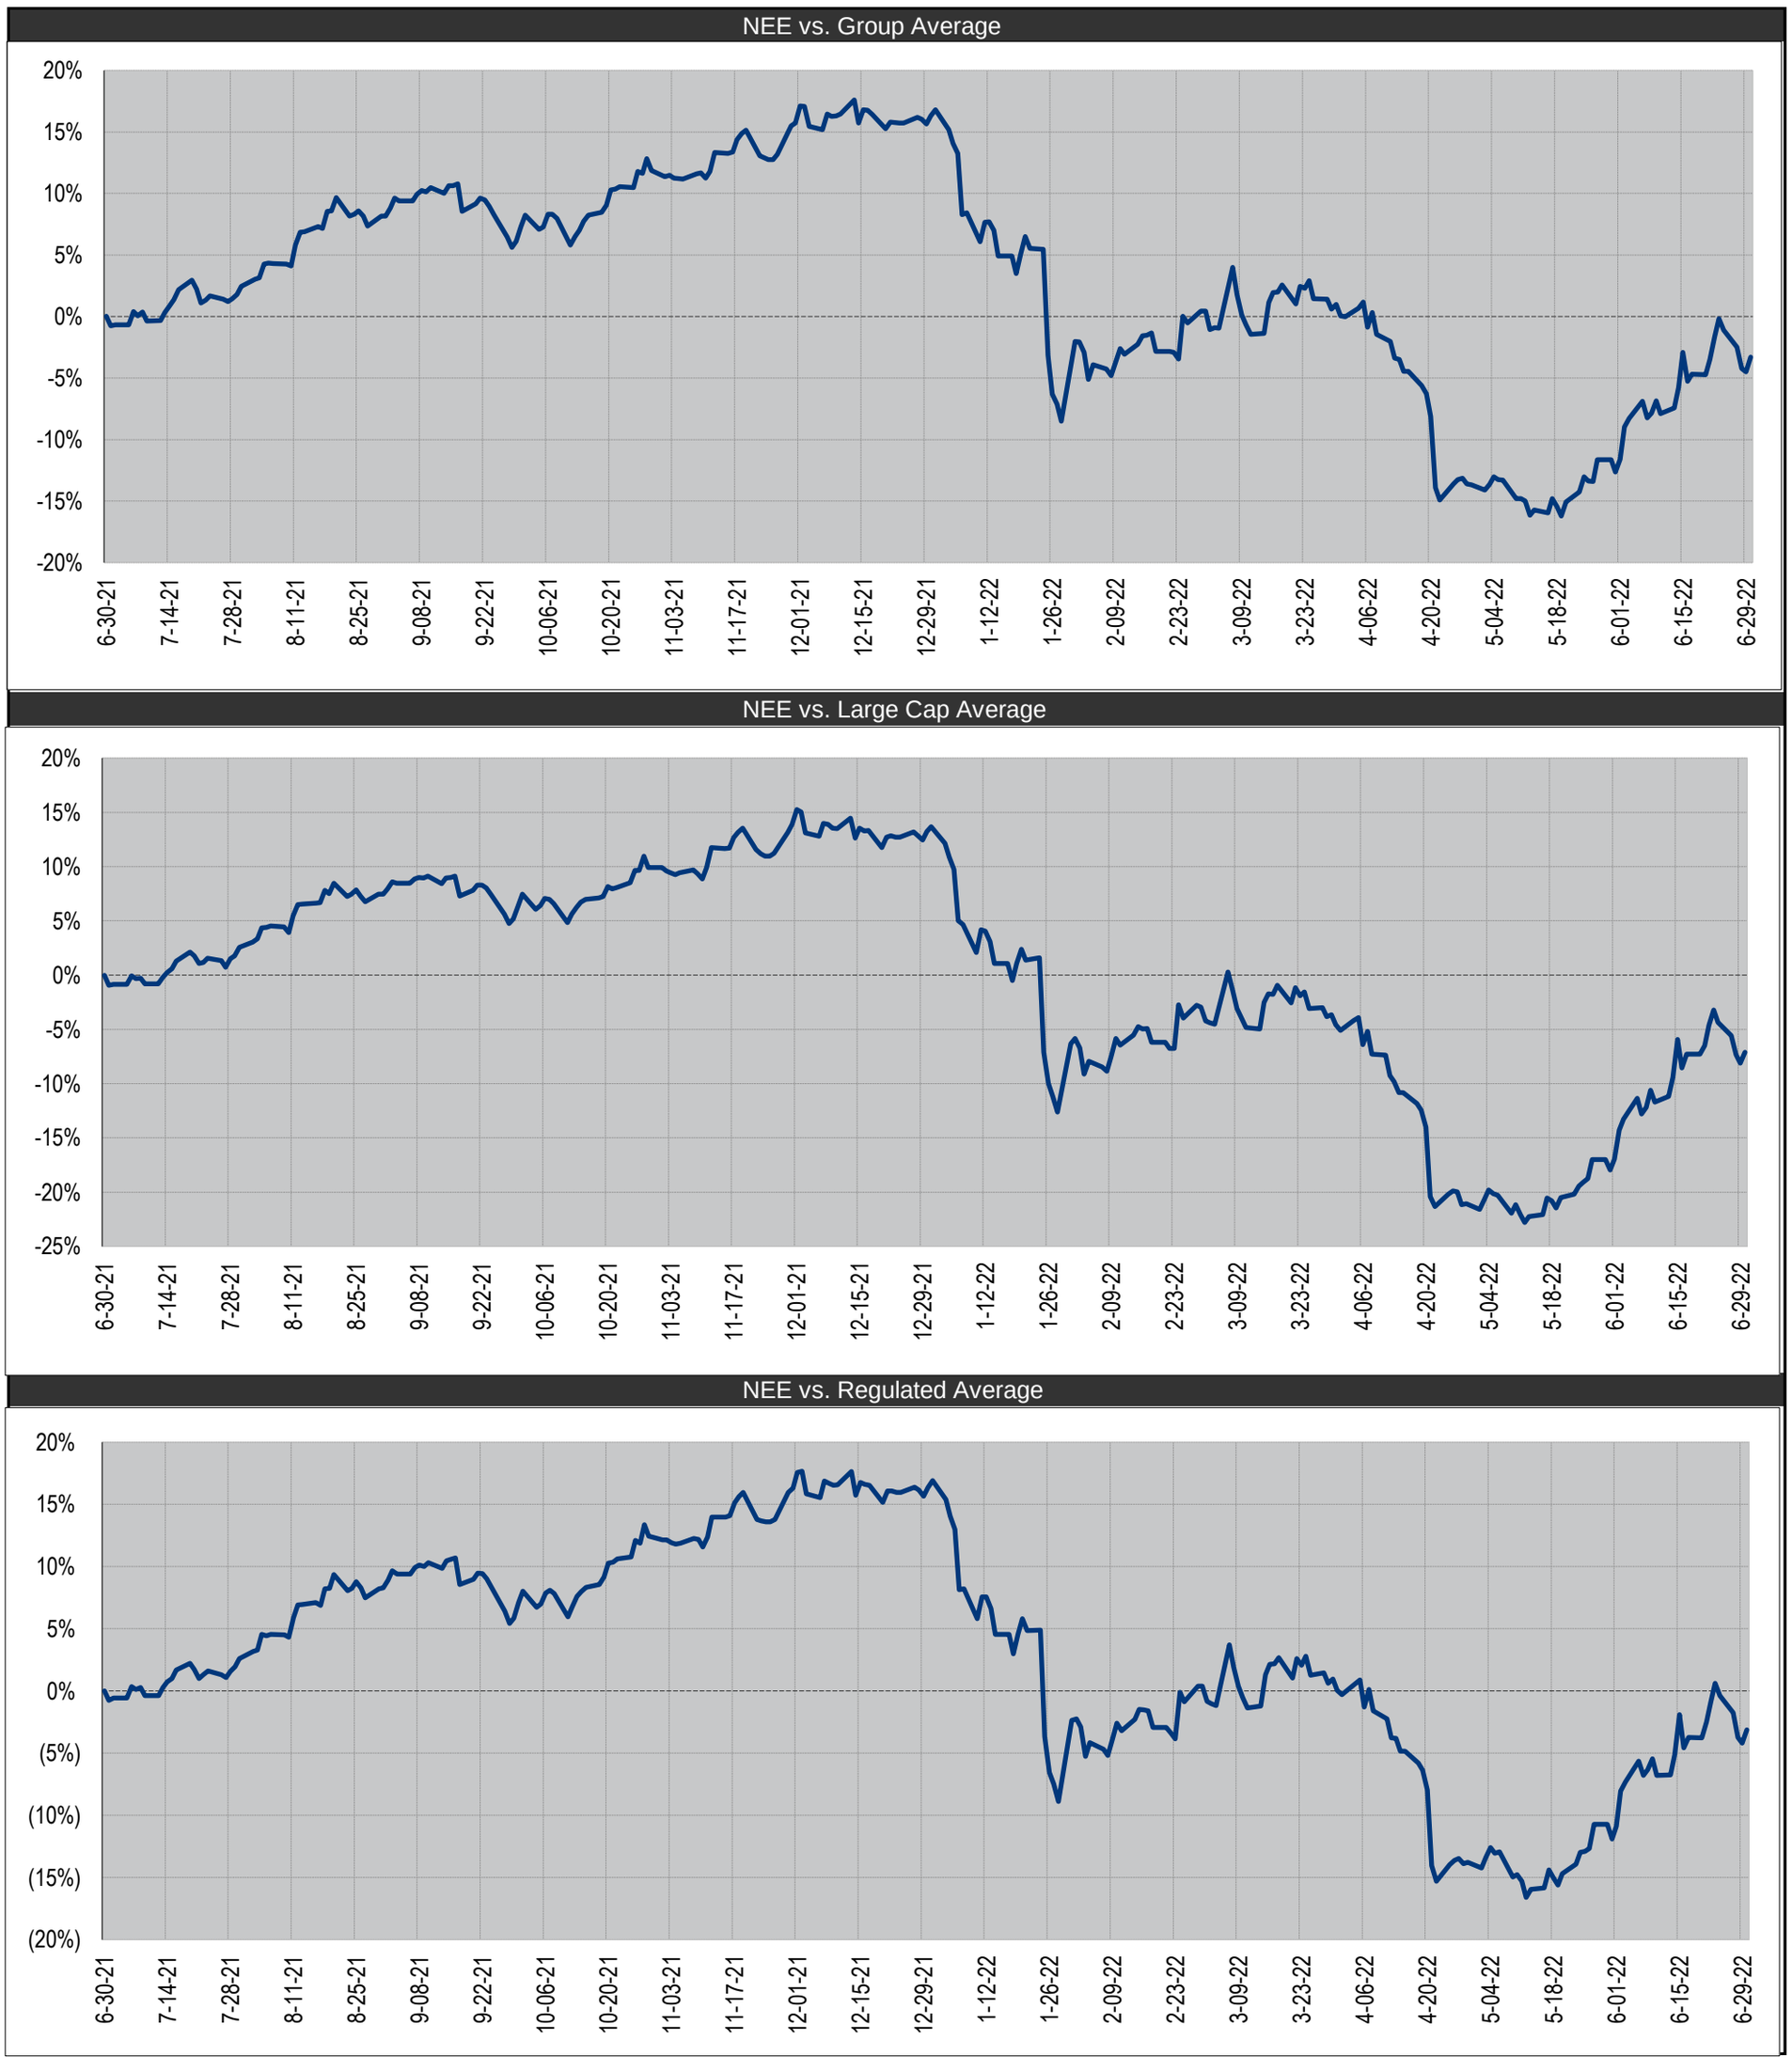


Hawaiian Electric (HE) $40.90, NR

WOLFE RESEARCH

Alliant Energy (LNT) $58.61, Outperform, $65 PT

LNT was one of the worst performers for the month, despite President Biden's 2-year pause on new solar tariffs that removes an overhang. LNT then said it was moving forward on its solar buildout (1.1 GWs in Wisconsin), while delaying the retirement timelines on its Edgewater/Columbia coal plants. LNT is underperforming on the year as well.

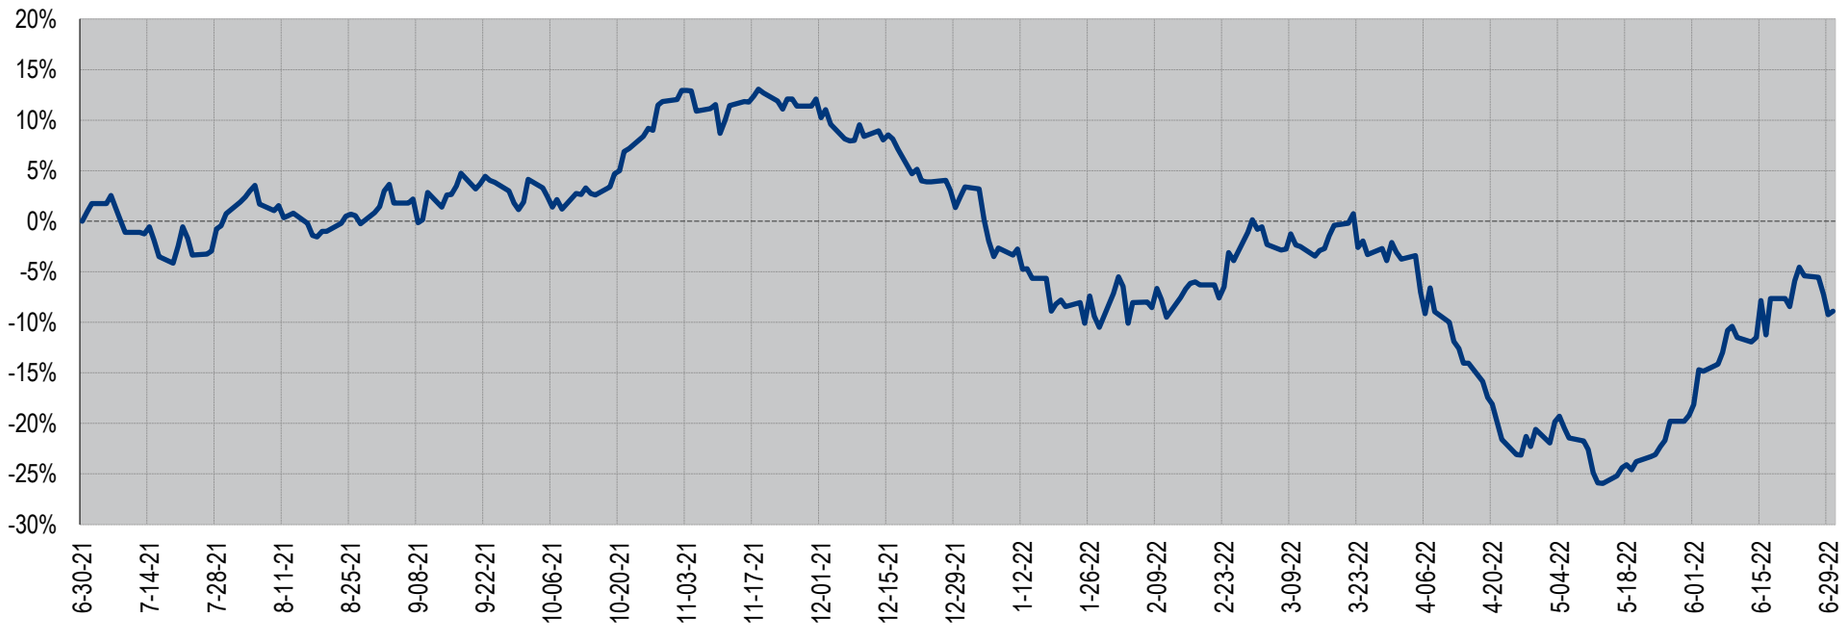


Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

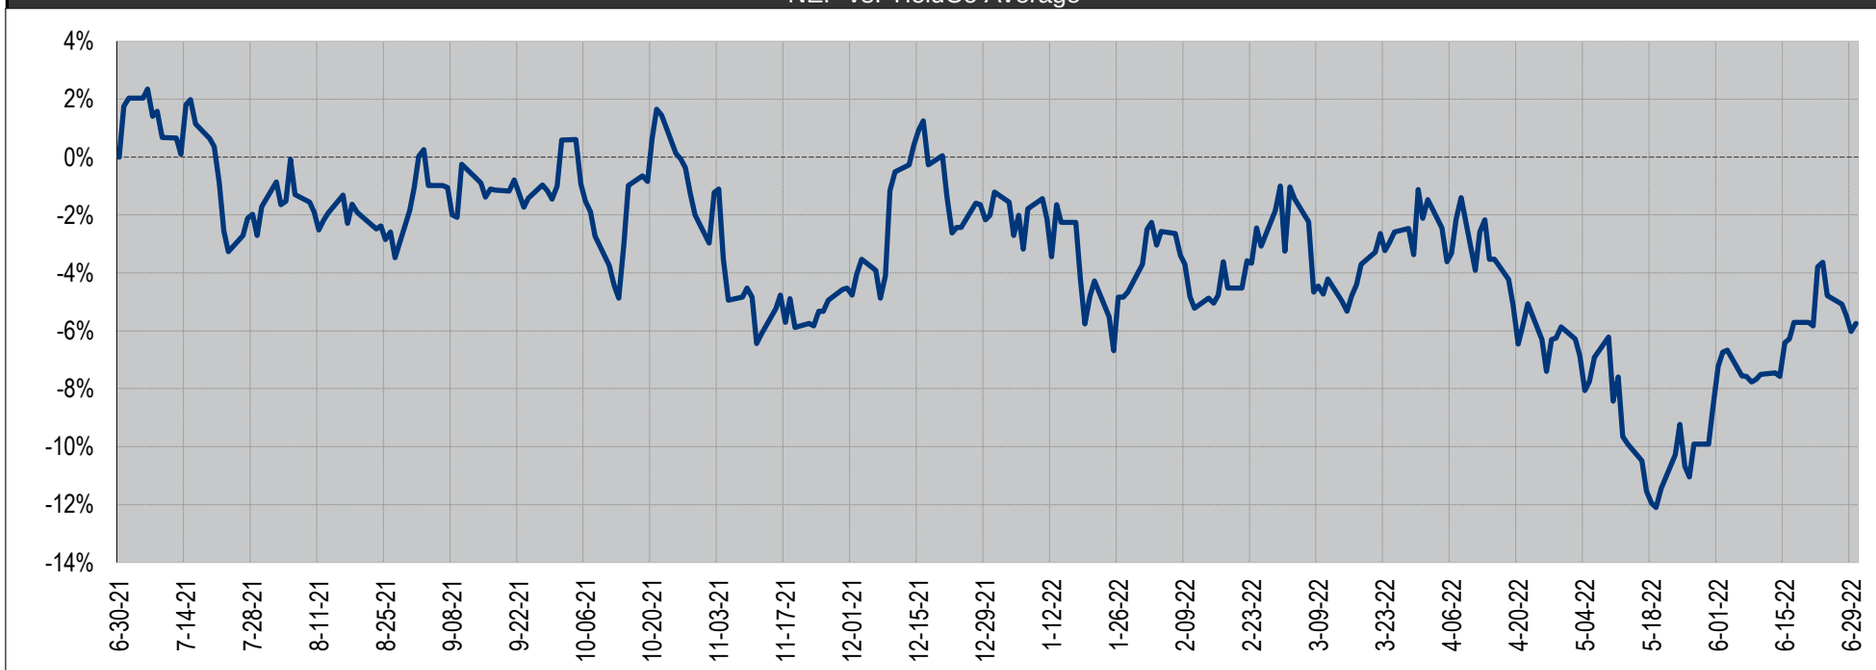
NextEra Energy (NEE) $77.46, Outperform, $91 PT

NEE saw a huge bounce in June – the best performer in the sector behind only NEP. This started with President Biden's 2-year pause on new solar tariffs. The outperformance continued around NEE's Analyst Day – 2022-2023 guidance was raised $0.05, 2024-2025 guidance was raised $0.10, and the high-end of 6-8% EPS growth target was re-based off 2024. NEE also revised its renewables development targets upward and set a "Real Zero" emissions goal. After all that though, NEE is still one of the worst stocks in the sector on the year.



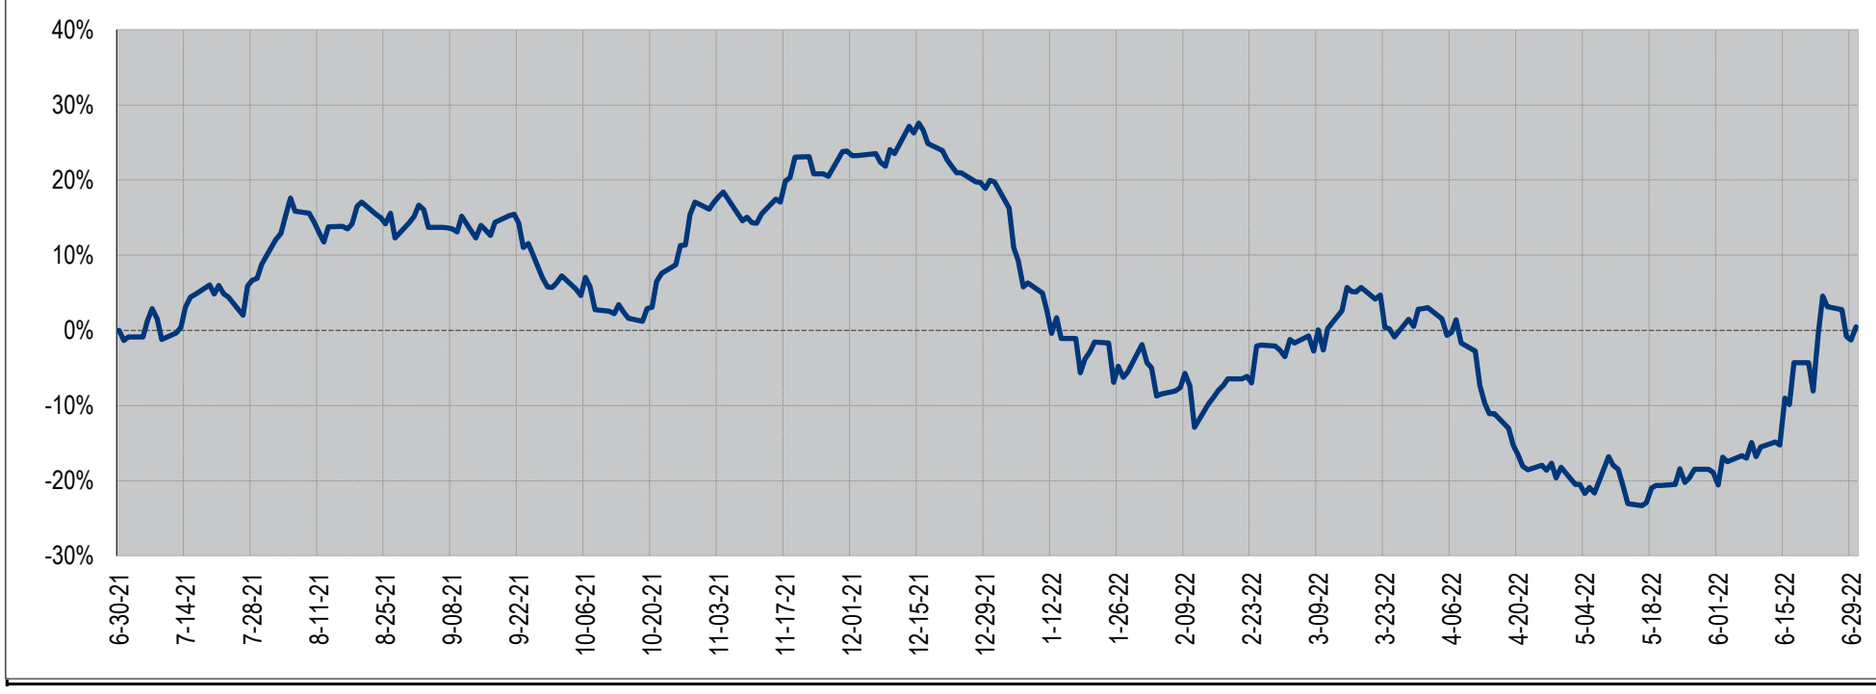
Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH



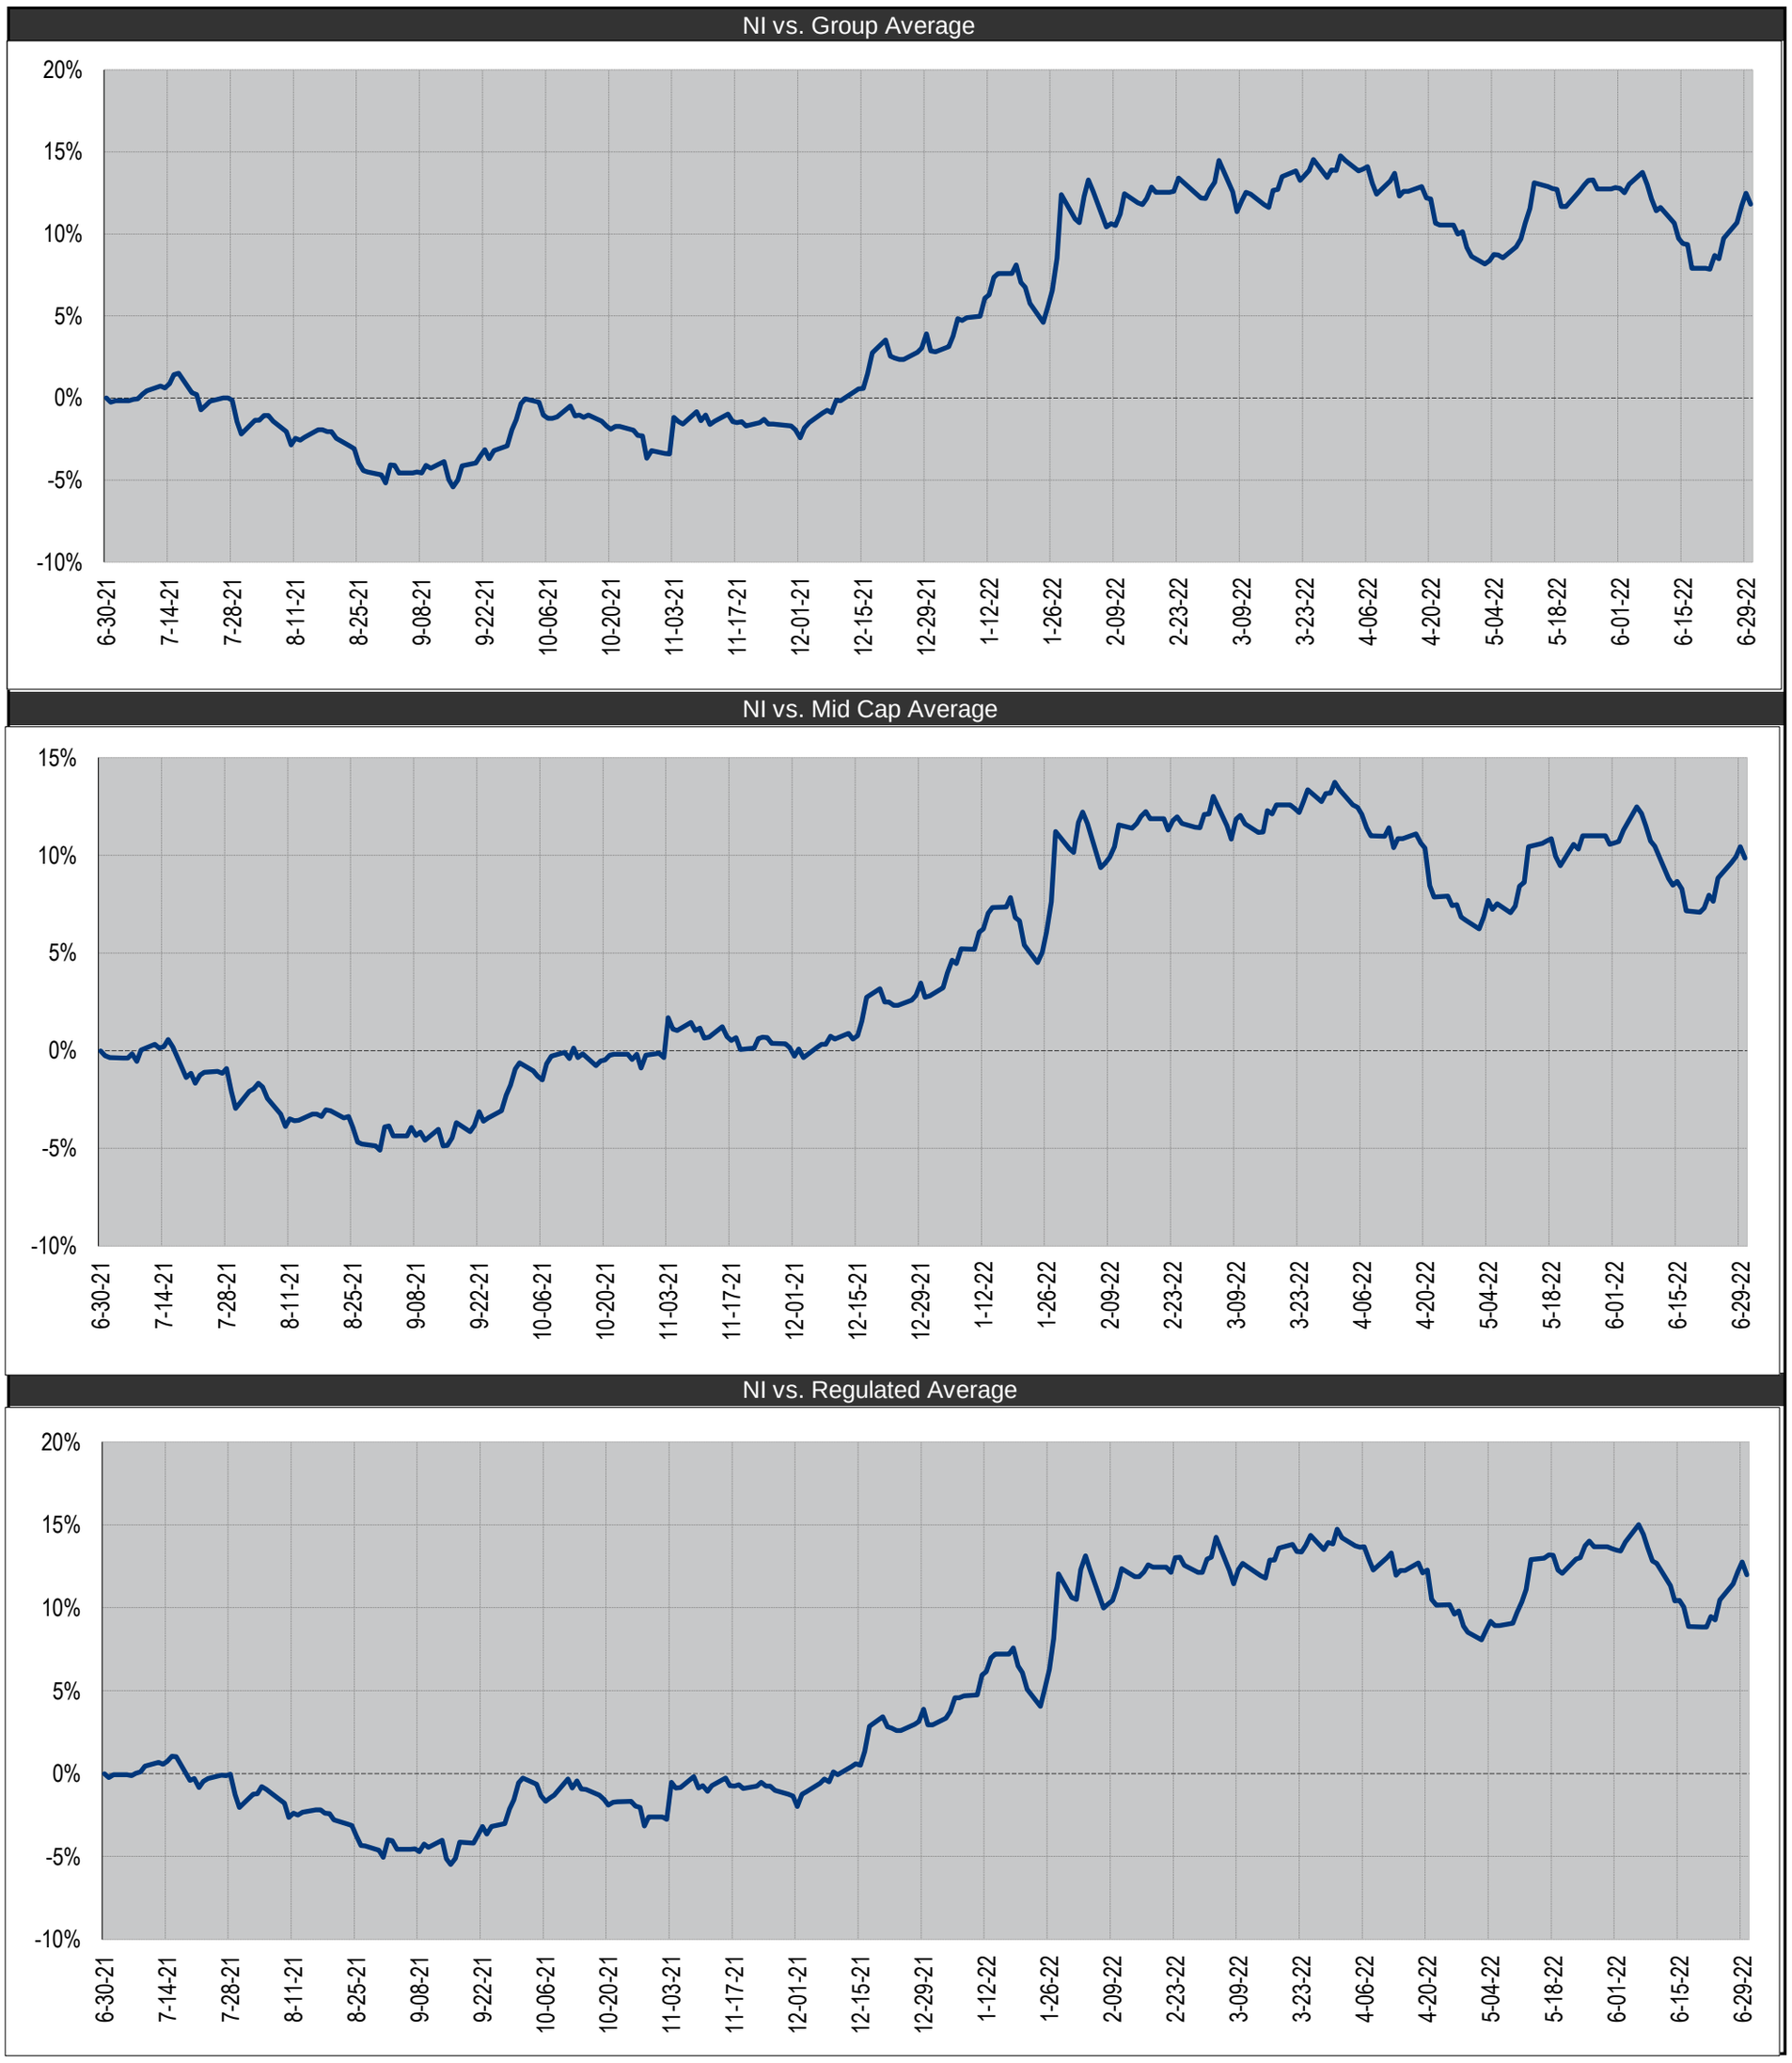
NextEra Energy Partners (NEP) $74.16, Outperform, $95 PT

NEP was the best performing stock in the sector in June. This started with President Biden's 2-year pause on new solar tariffs (though this uncertainty shouldn't have impacted NEP's operating portfolio to begin with). Then at the Analyst Day, NEP extended its 12-15% distribution growth target another year 2025, while the incentive distribution rights (IDRs) were revised to be held flat at $157M/year going forward. The stock is still one of the biggest underperformers in 2022 though.



NEP vs. Group Average

NEP vs. YieldCo Average

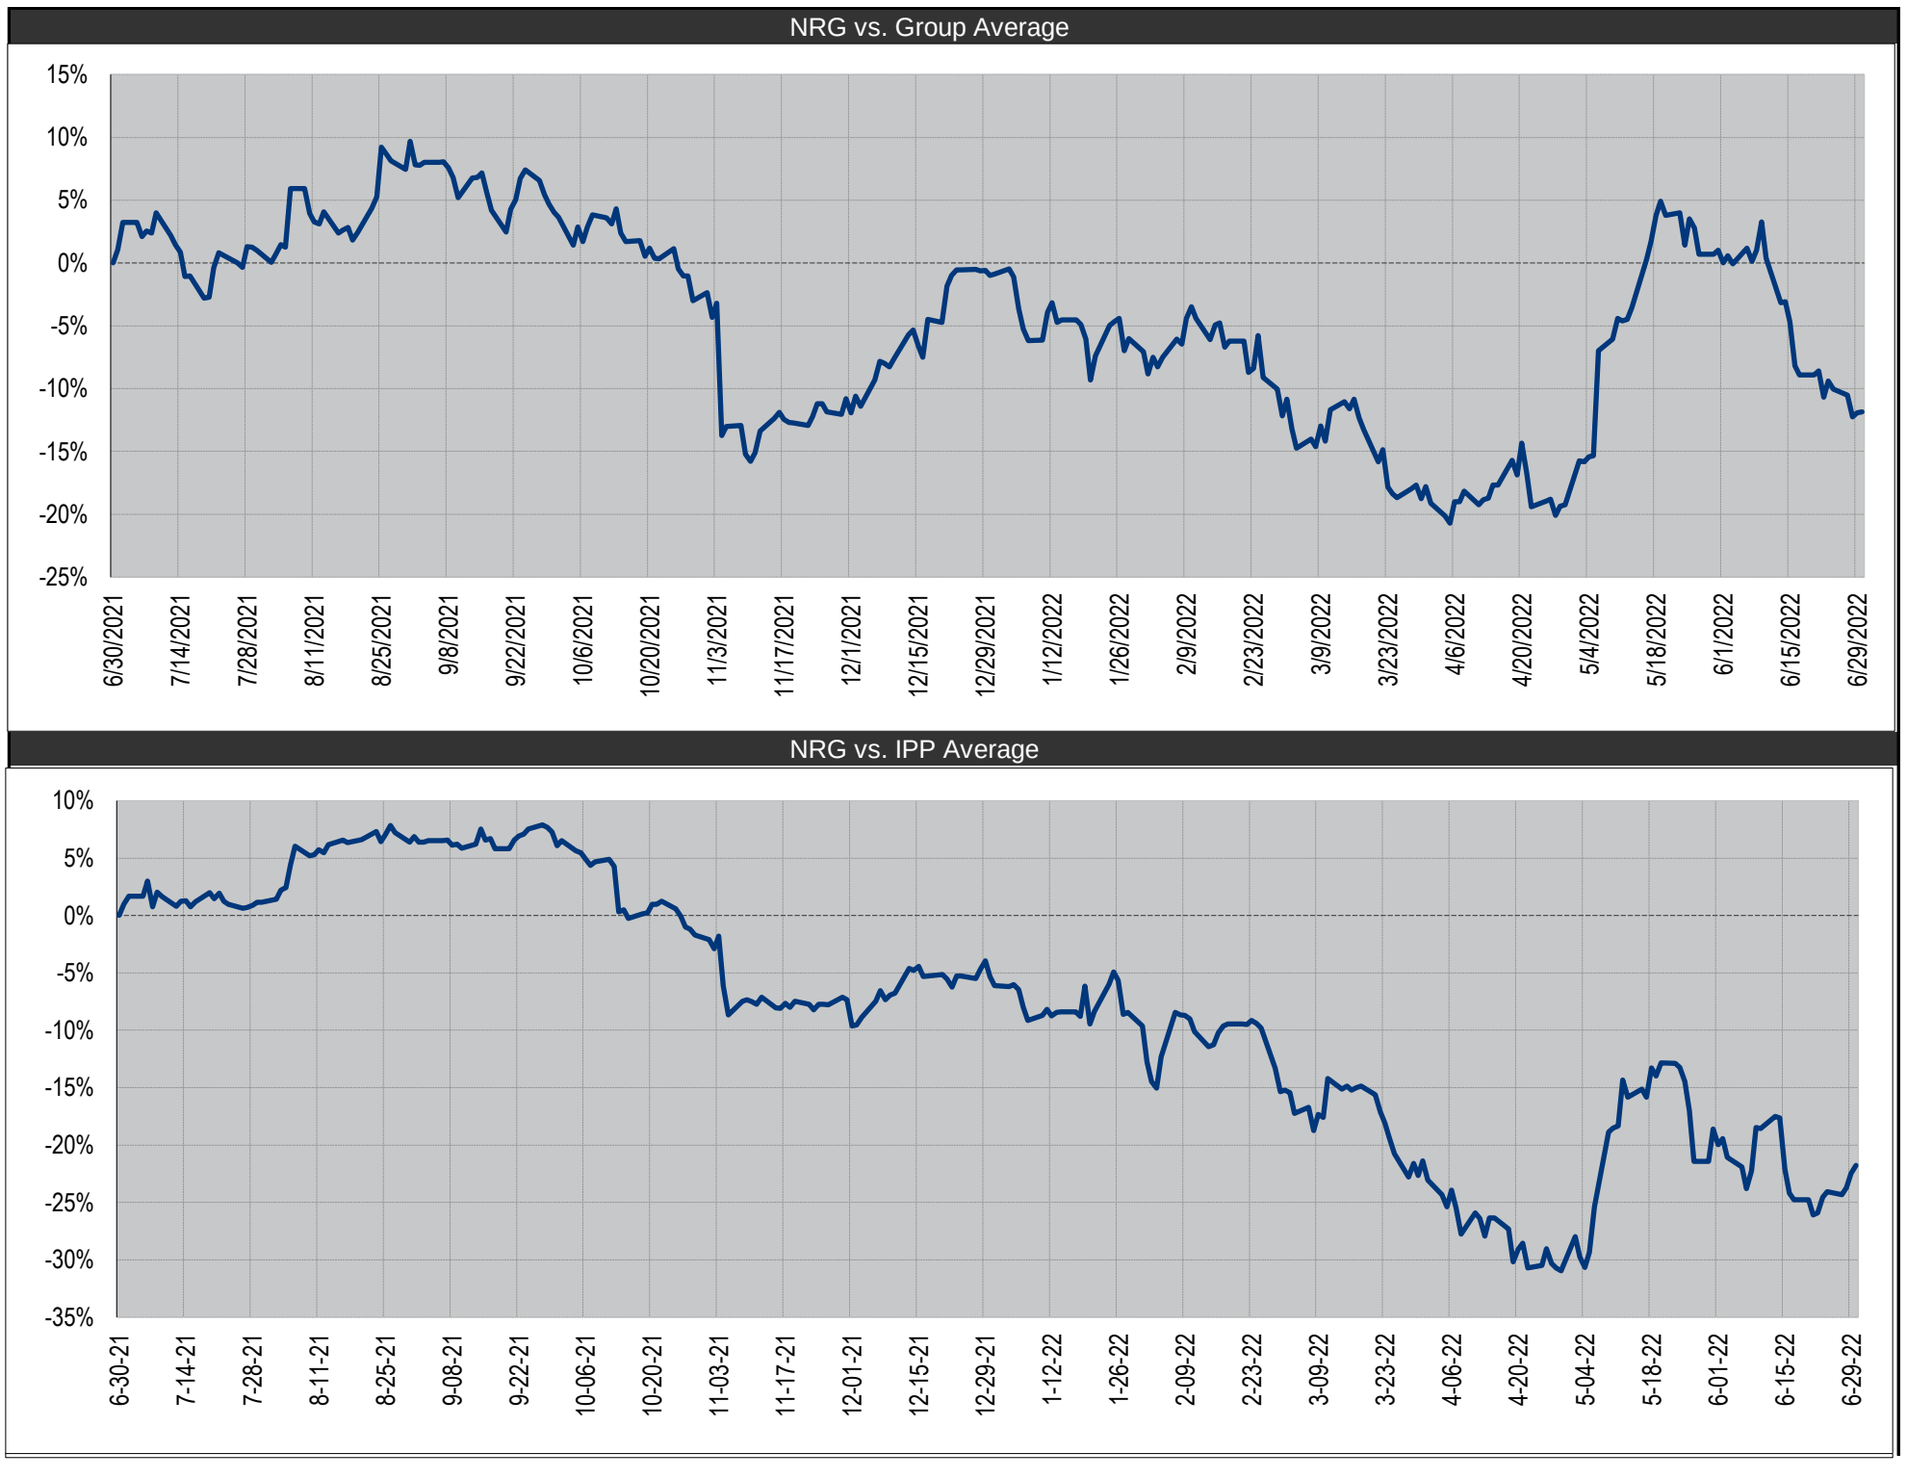


NEP vs. MLPs

WOLFE RESEARCH

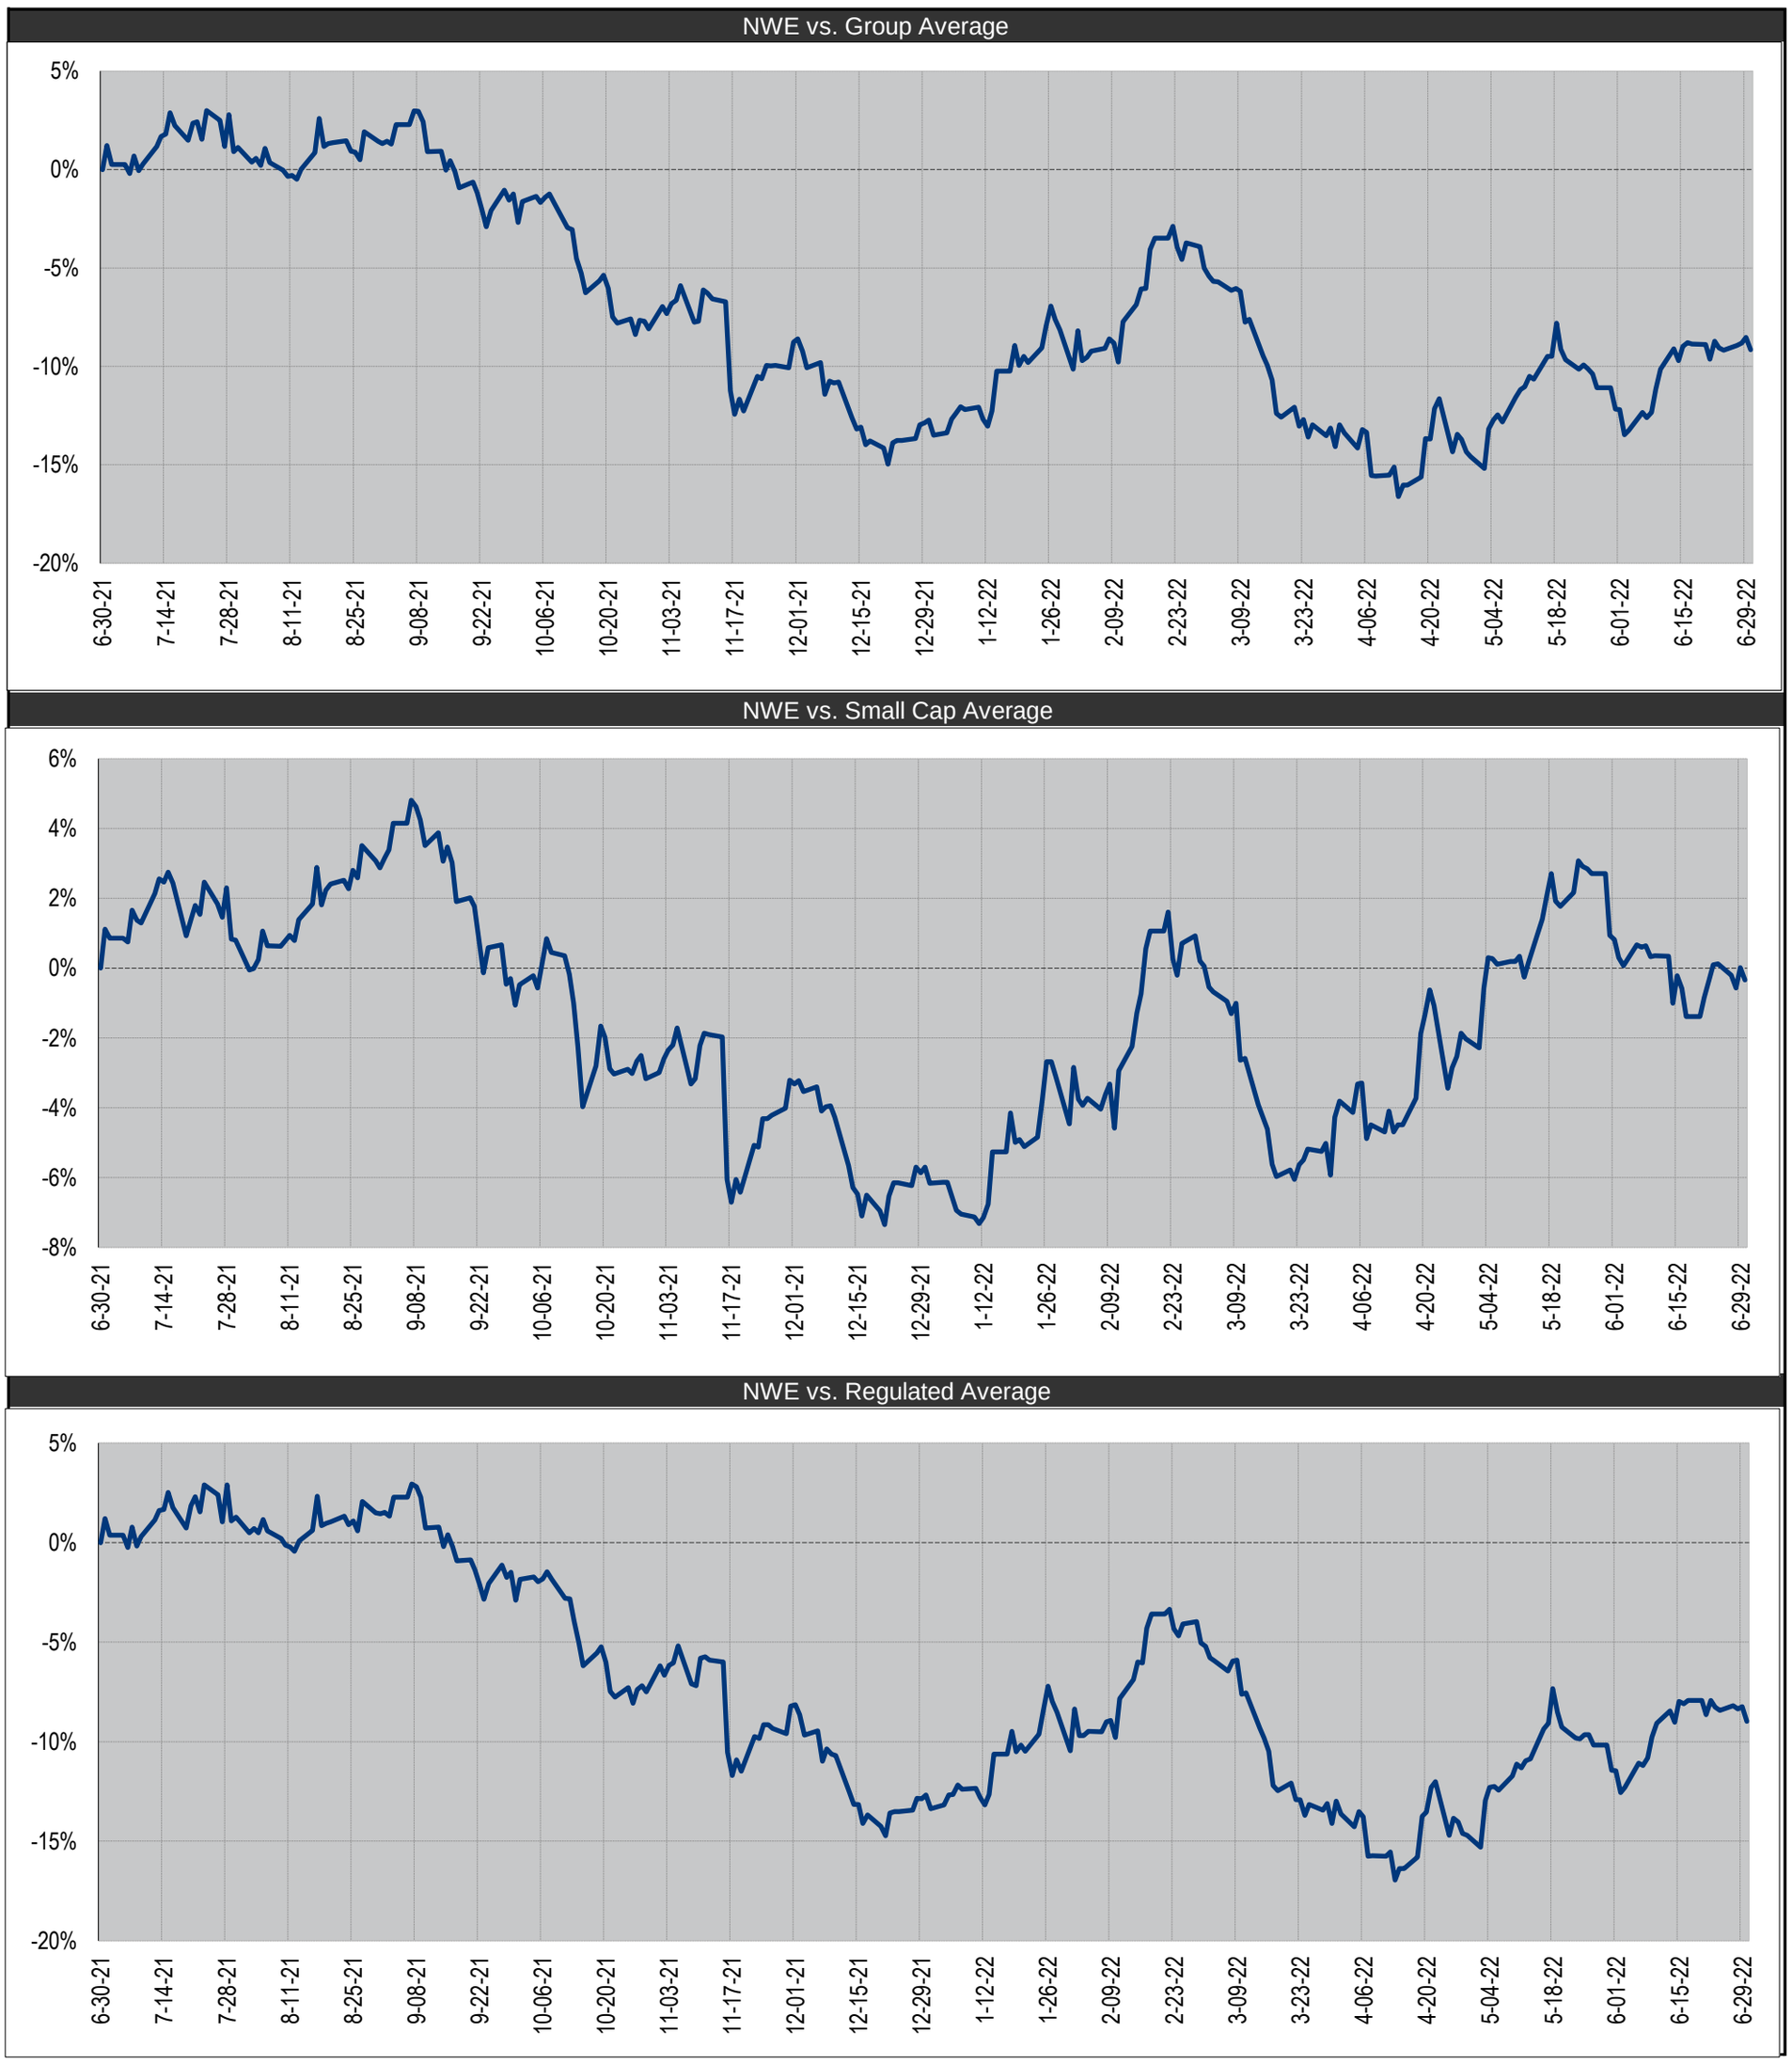
NiSource (NI) $29.49, Outperform, $33 PT

NI underperformed the utilities index by 100bps in June but remains a top performer YTD. During the month, NI requested to delay the start of evidentiary hearings twice for its OH rate case. We viewed this positively as it likely means that settlement conversations are headed in the right direction.



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

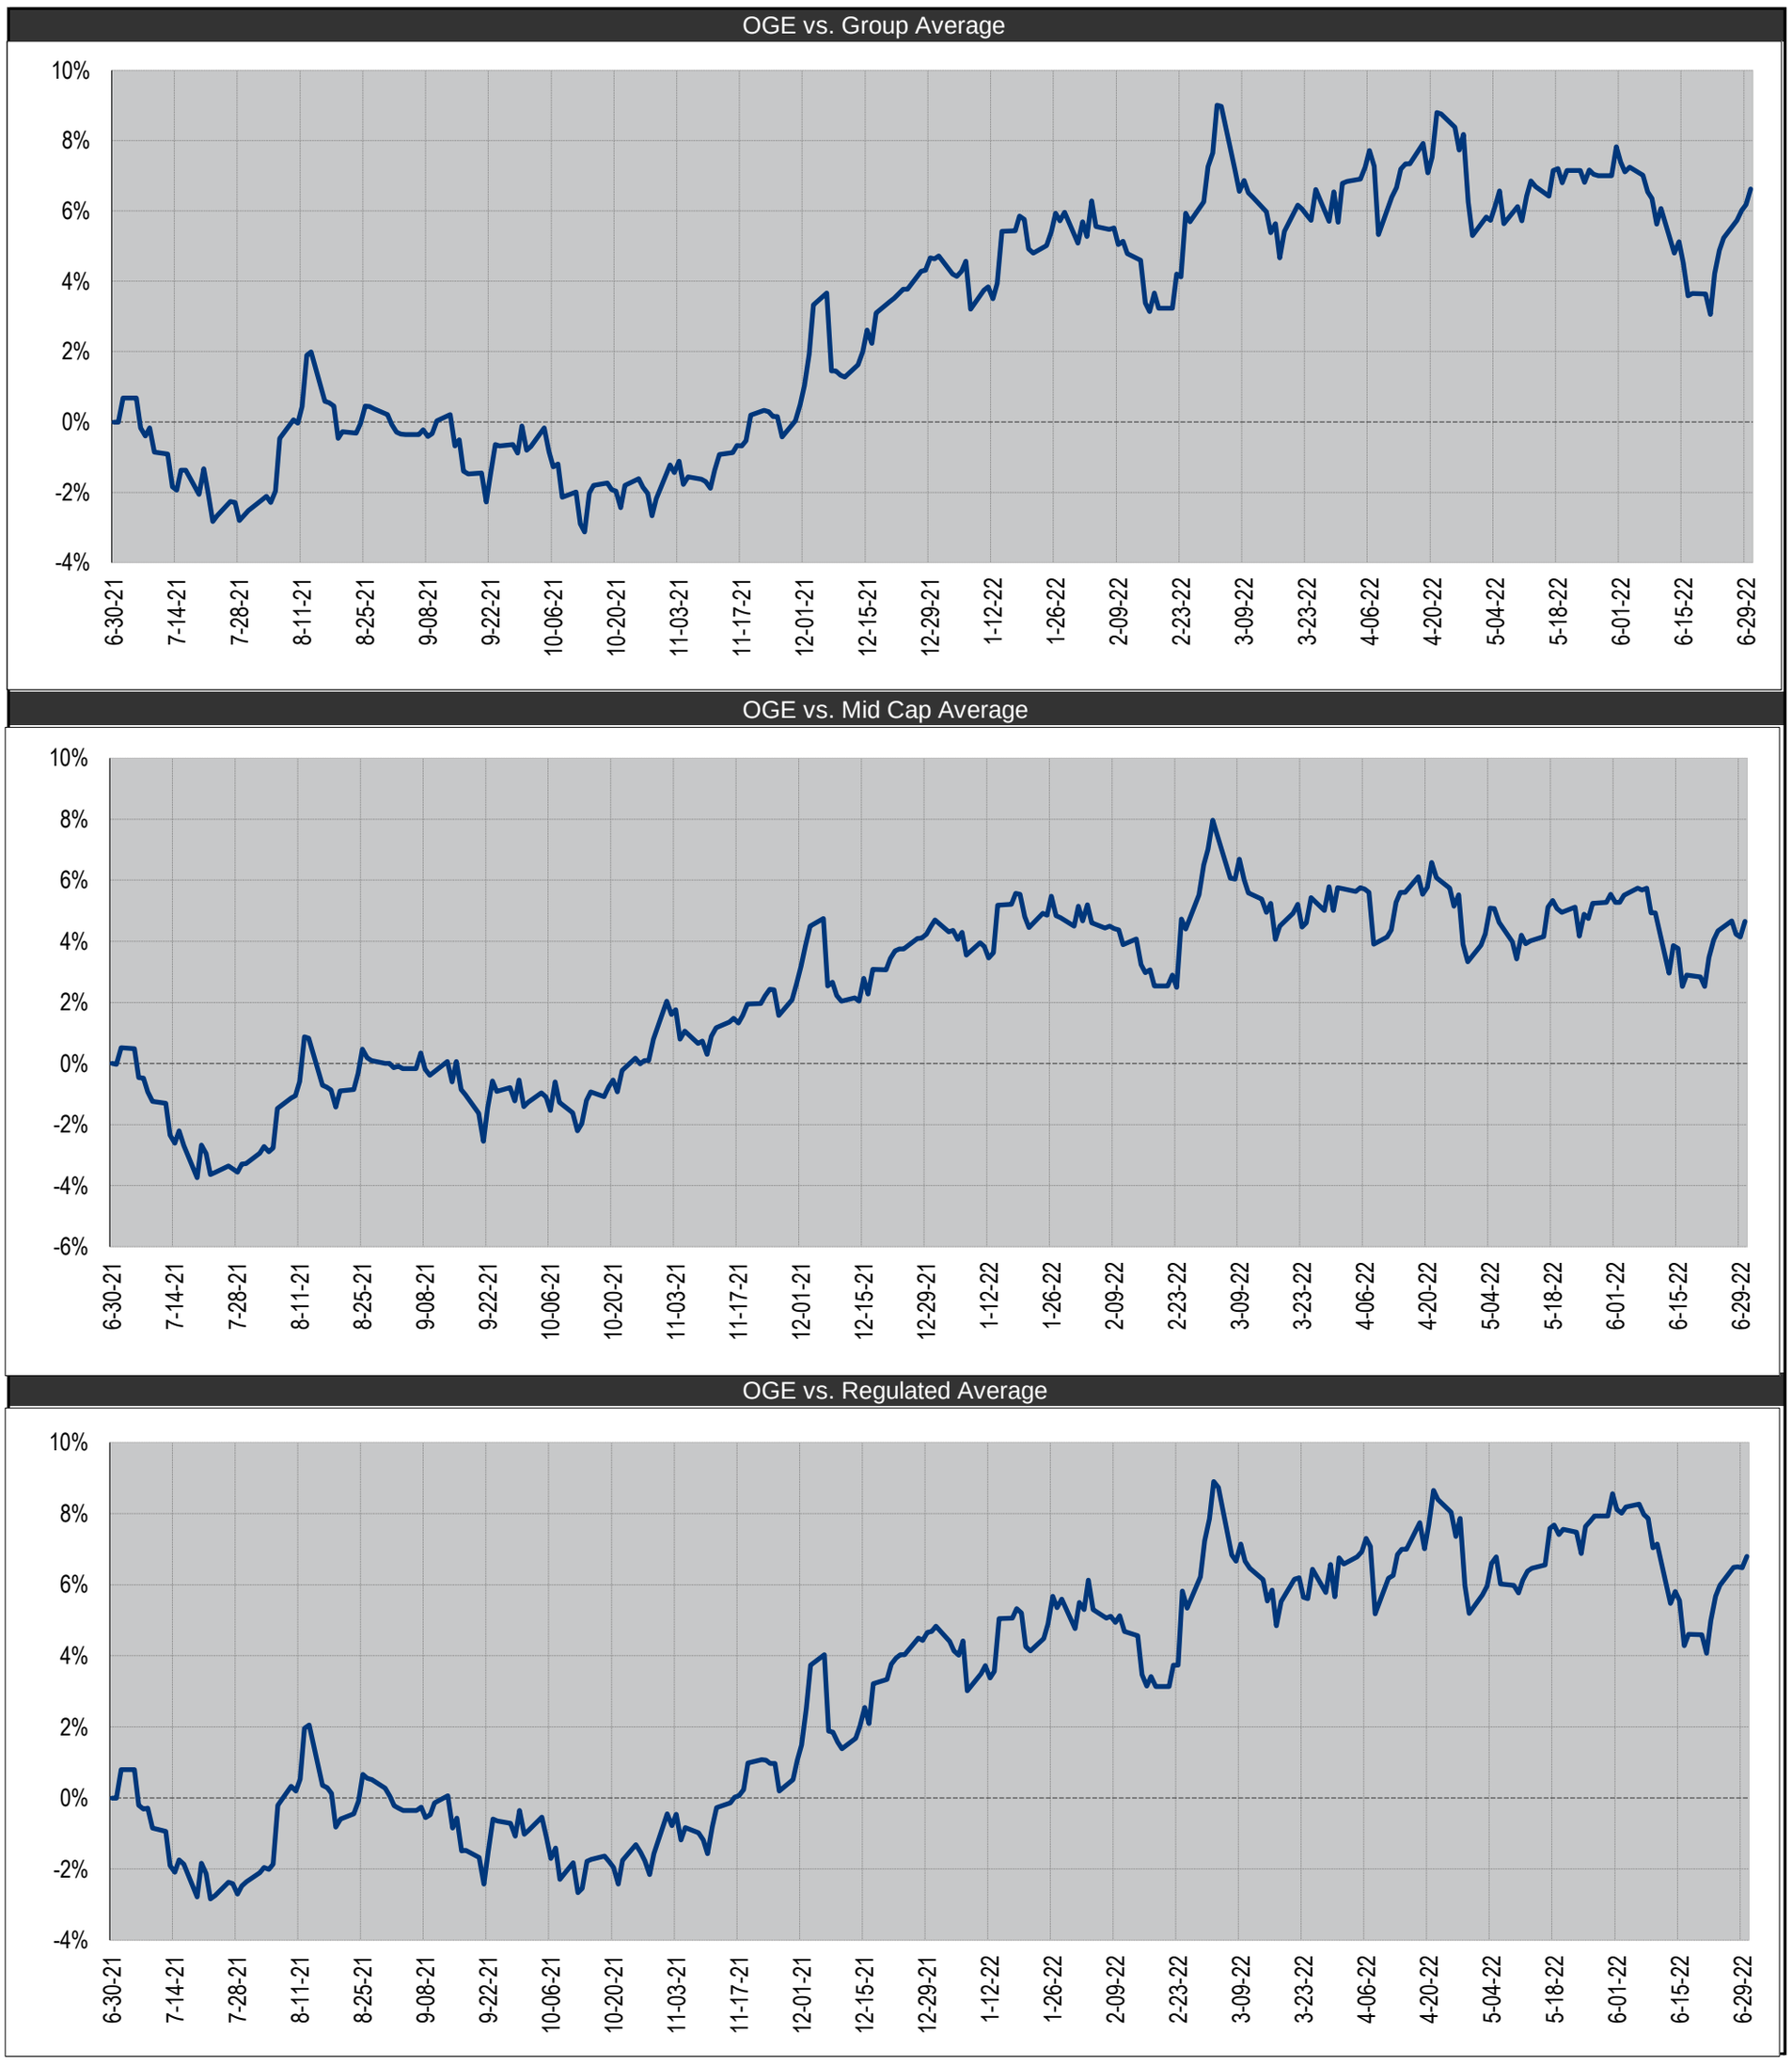


NRG Energy (NRG) $38.17, Peer Perform, $43 PT

NRG had a challenging June, giving back most of its gains from May when the stock broke out on a guidance reiteration and perhaps short covering. The stock has materially lagged peers VST and CEG year-to-date.

WOLFE RESEARCH

NorthWestern Corp (NWE) $58.93, NR

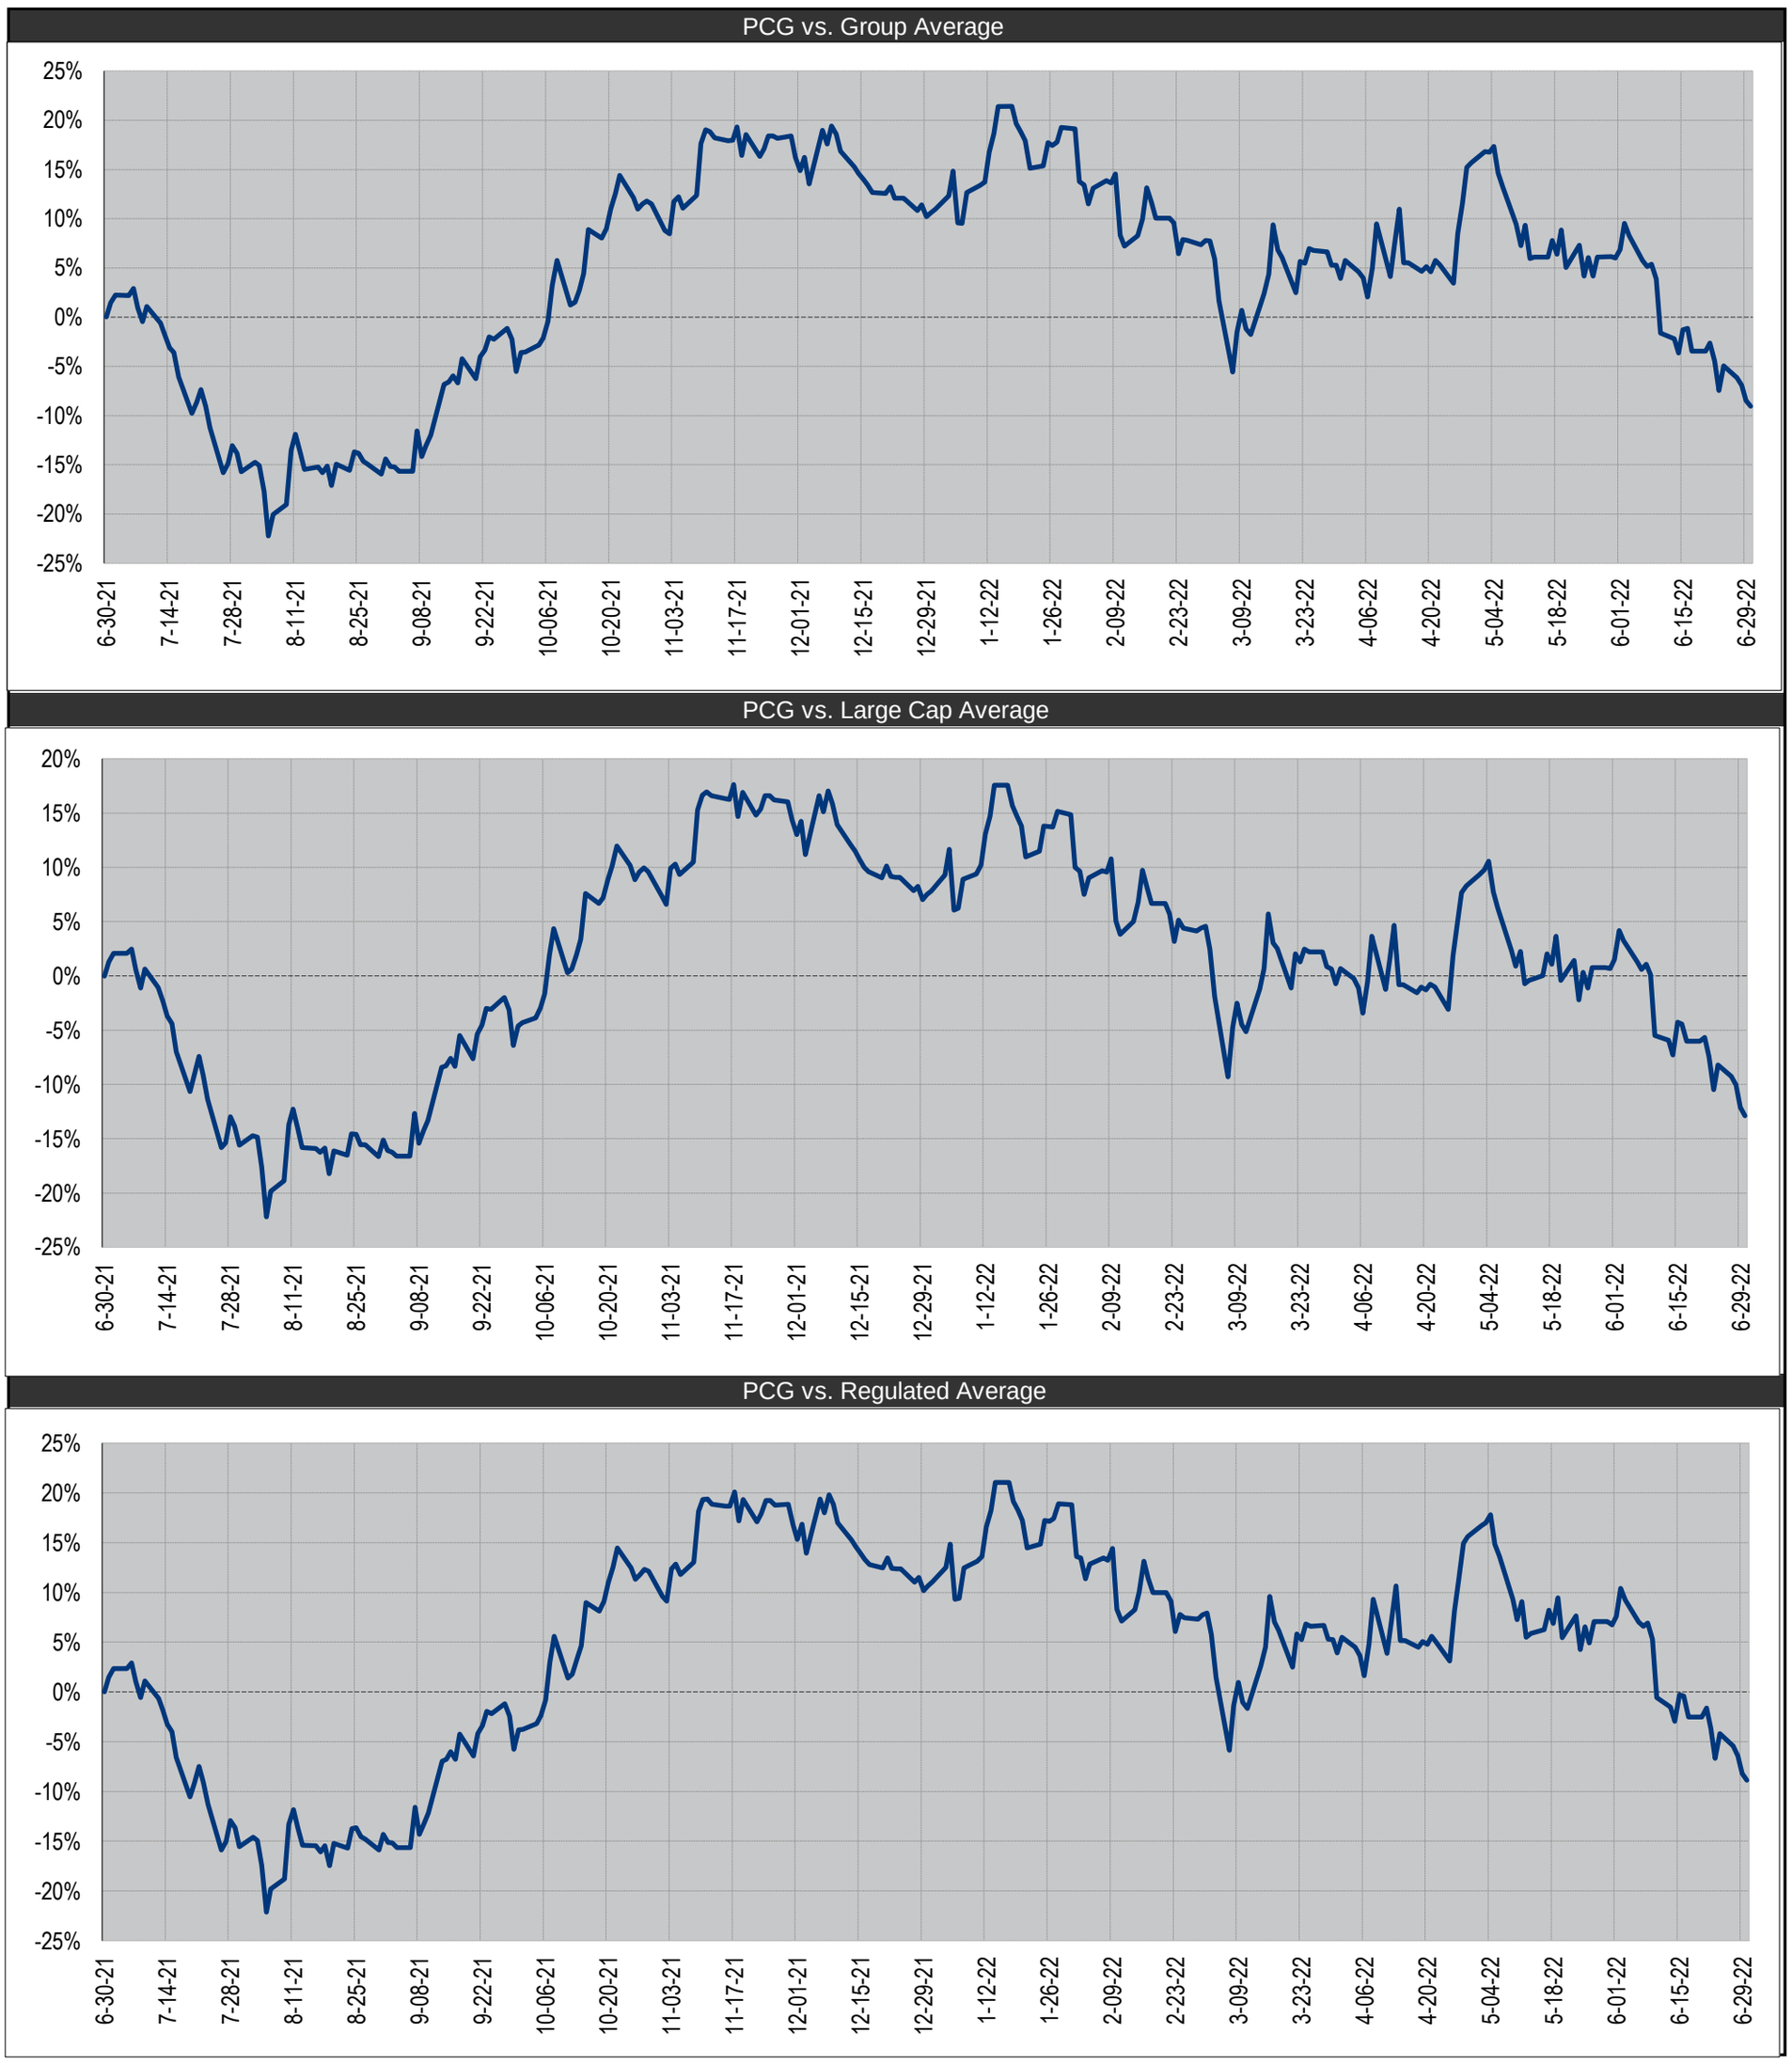


Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

OGE Energy (OGE) $38.56, Peer Perform, $42 PT

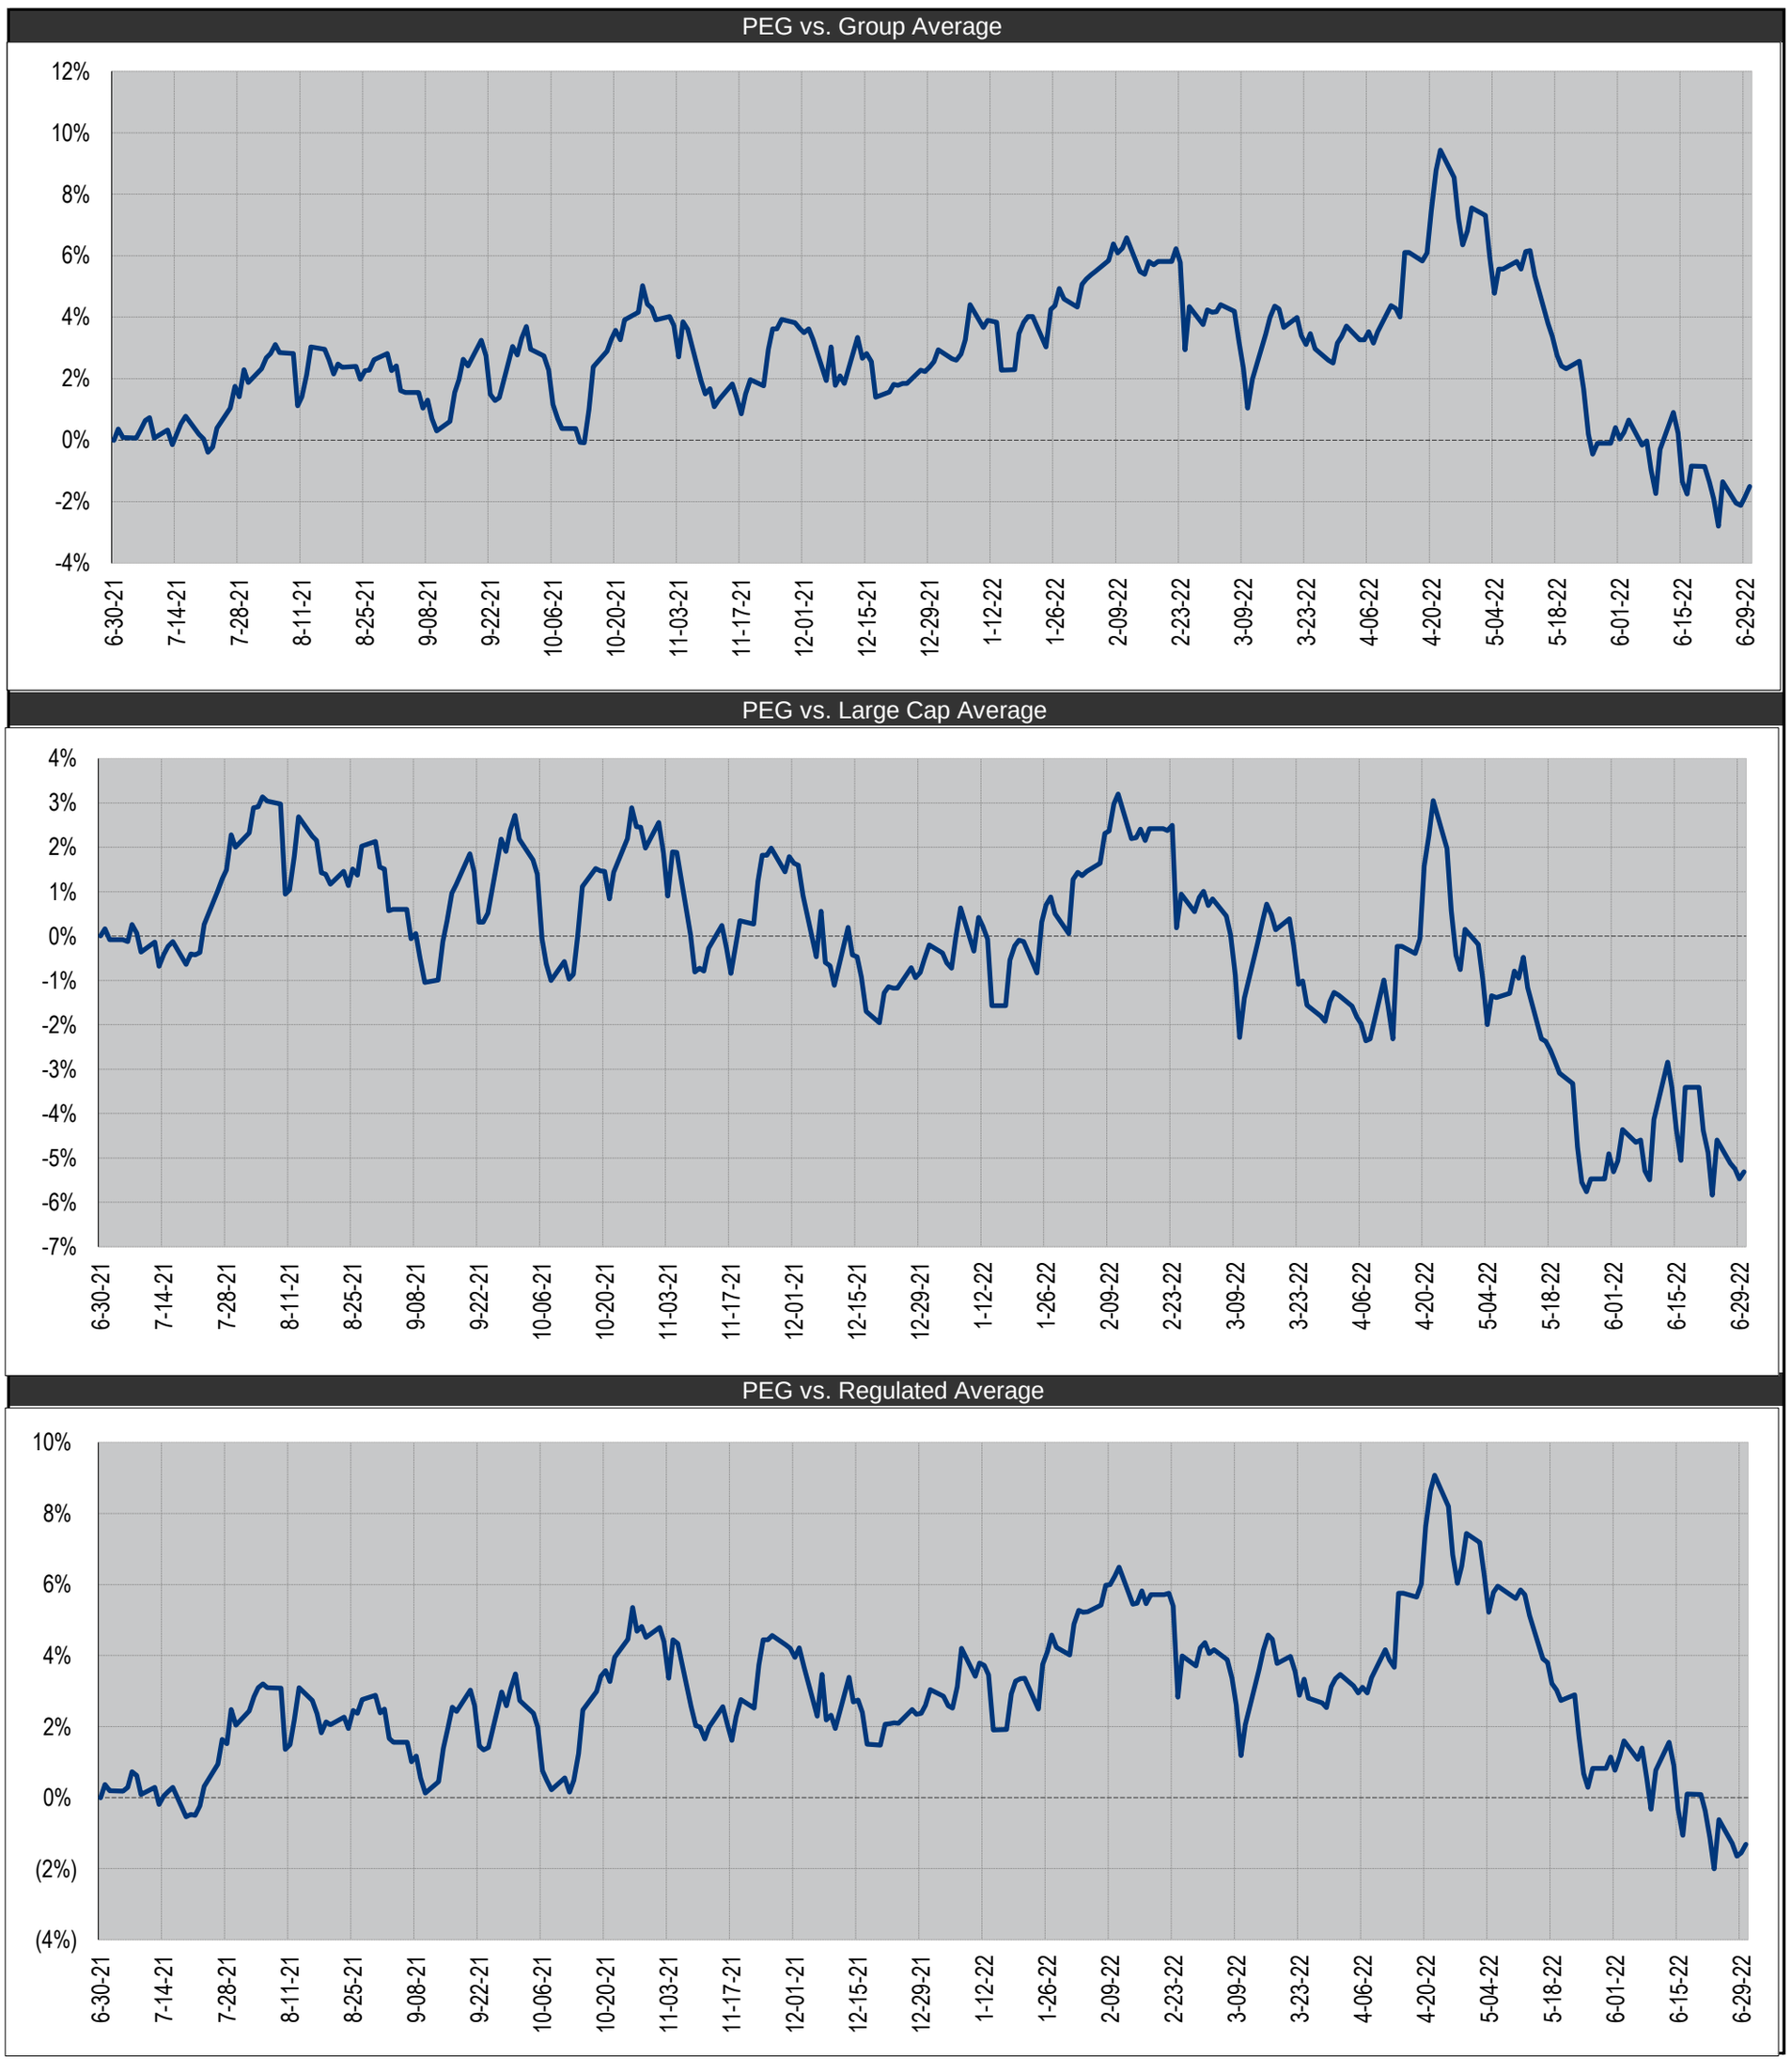
OGE modestly underperformed its mid cap and regulated utility peers in June likely due to complications in OG&E's pending OK rate case stemming from opposing intervenors filing a separate joint stipulation. However, at the month-end, all parties signed a constructive updated settlement agreement, which the ALJ recommended for approval. During the month, the ODFA also announced that it is issuing securitization bonds that would allow OG&E to recoup Winter Storm Uri costs.



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

PG&E Corporation (PCG) $9.98, Outperform, $17 PT

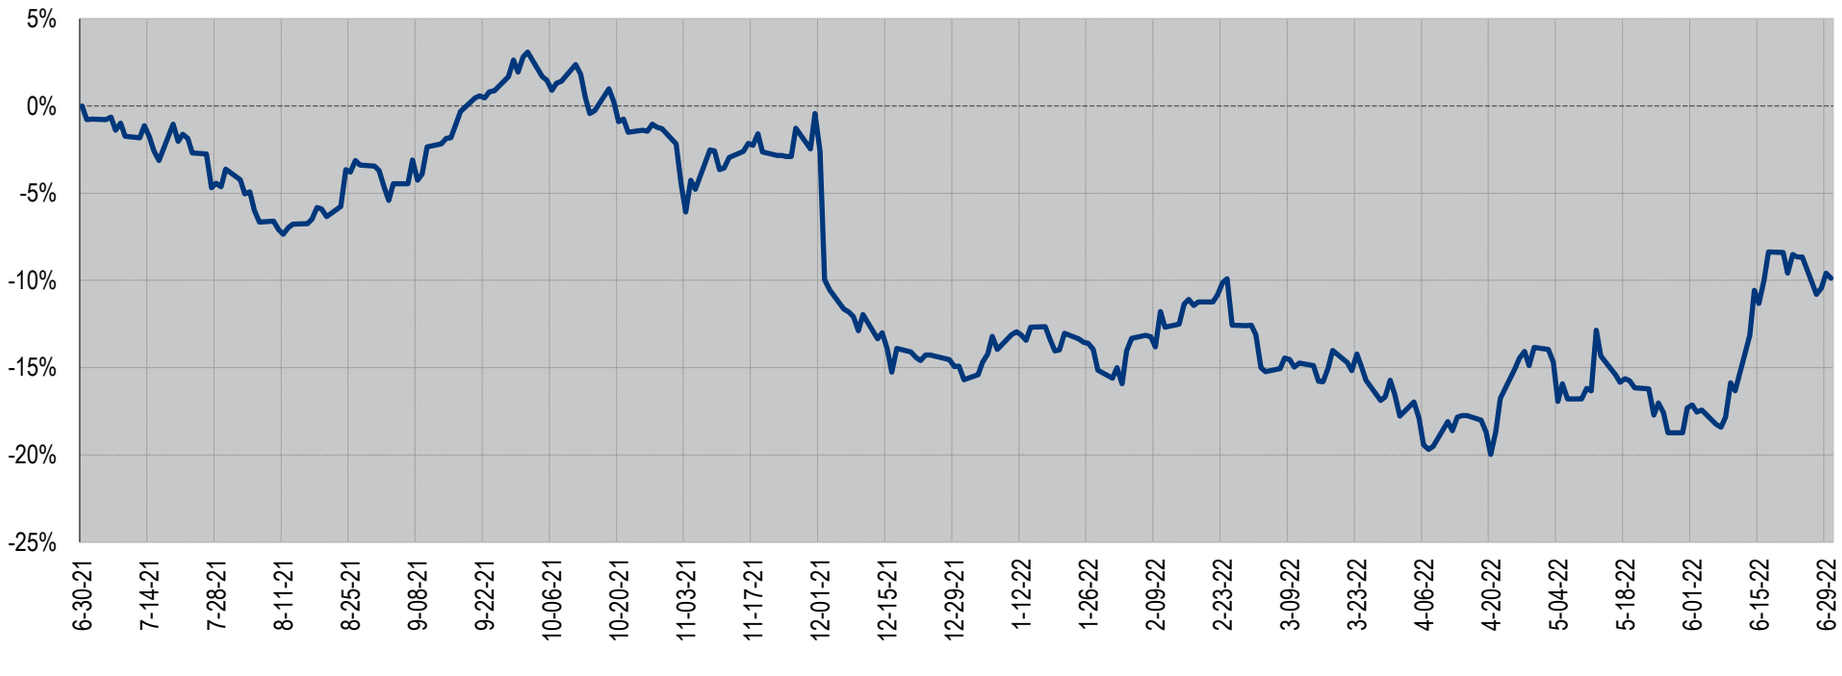


PCG sharply underperformed peers, possibly a number of issues including not being added to S&P 500 during rebalancing in early Jun, negative CAL Fire report on Dixie on the eve of PCG's Investor Day, a couple small fires that may have involved EPSS enabled lines, intervenor testimony in PCG's GRC, and FVT trustee resignation; PCG had good news on an amended undergrounding bill moving forward.

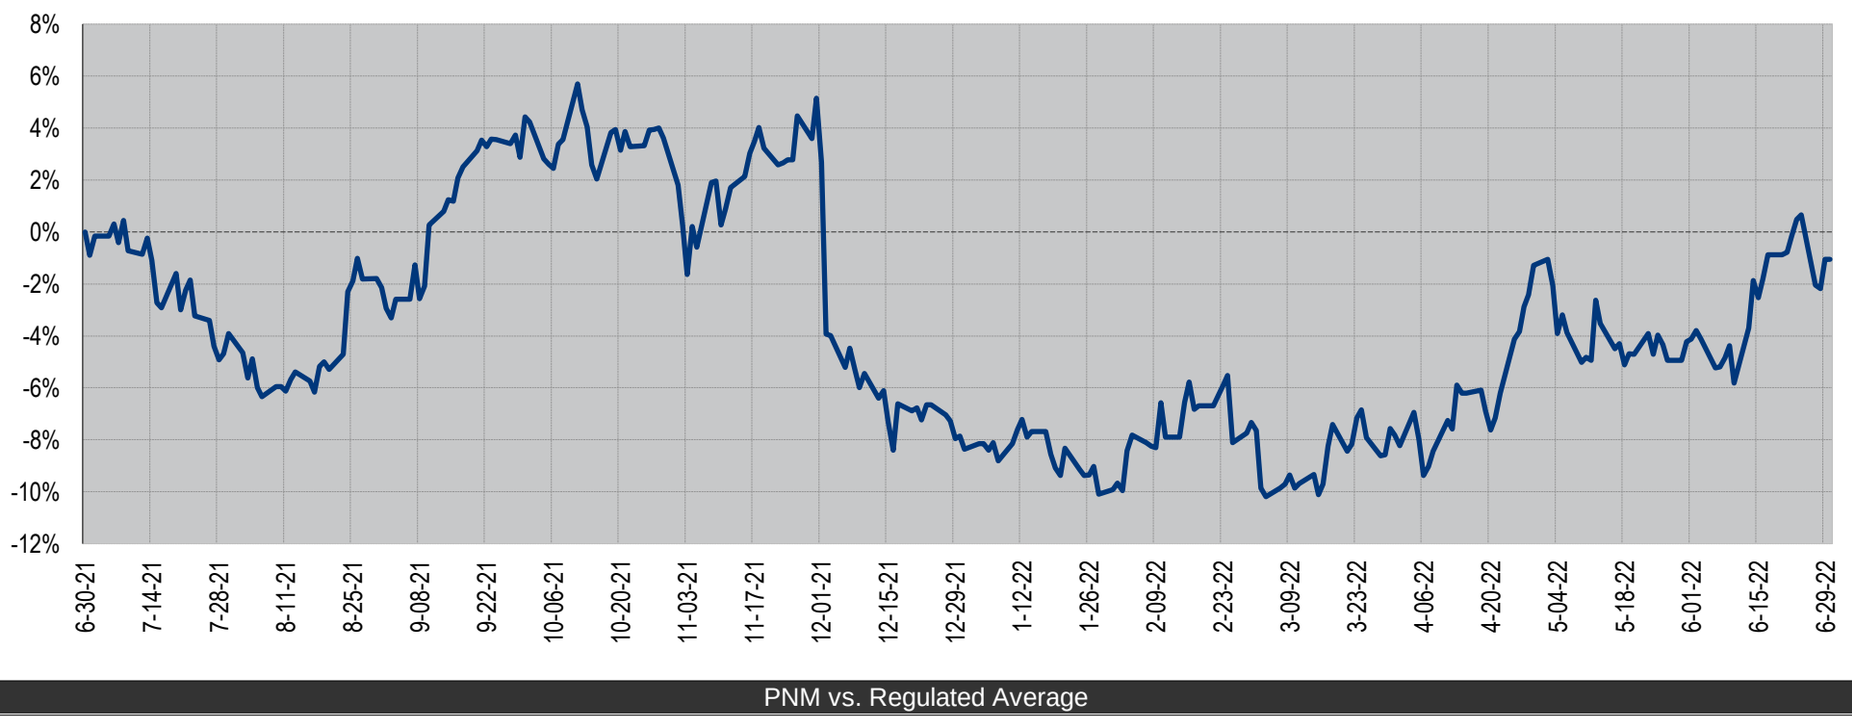
WOLFE RESEARCH

Public Service Enterprise Group (PEG) $63.28, Outperform, $73 PT

PEG underperformed in June, as attention remains entirely on its pension exposure, as PEG seems to have the most at risk in the sector after FE. PEG is underperforming on the year as well.

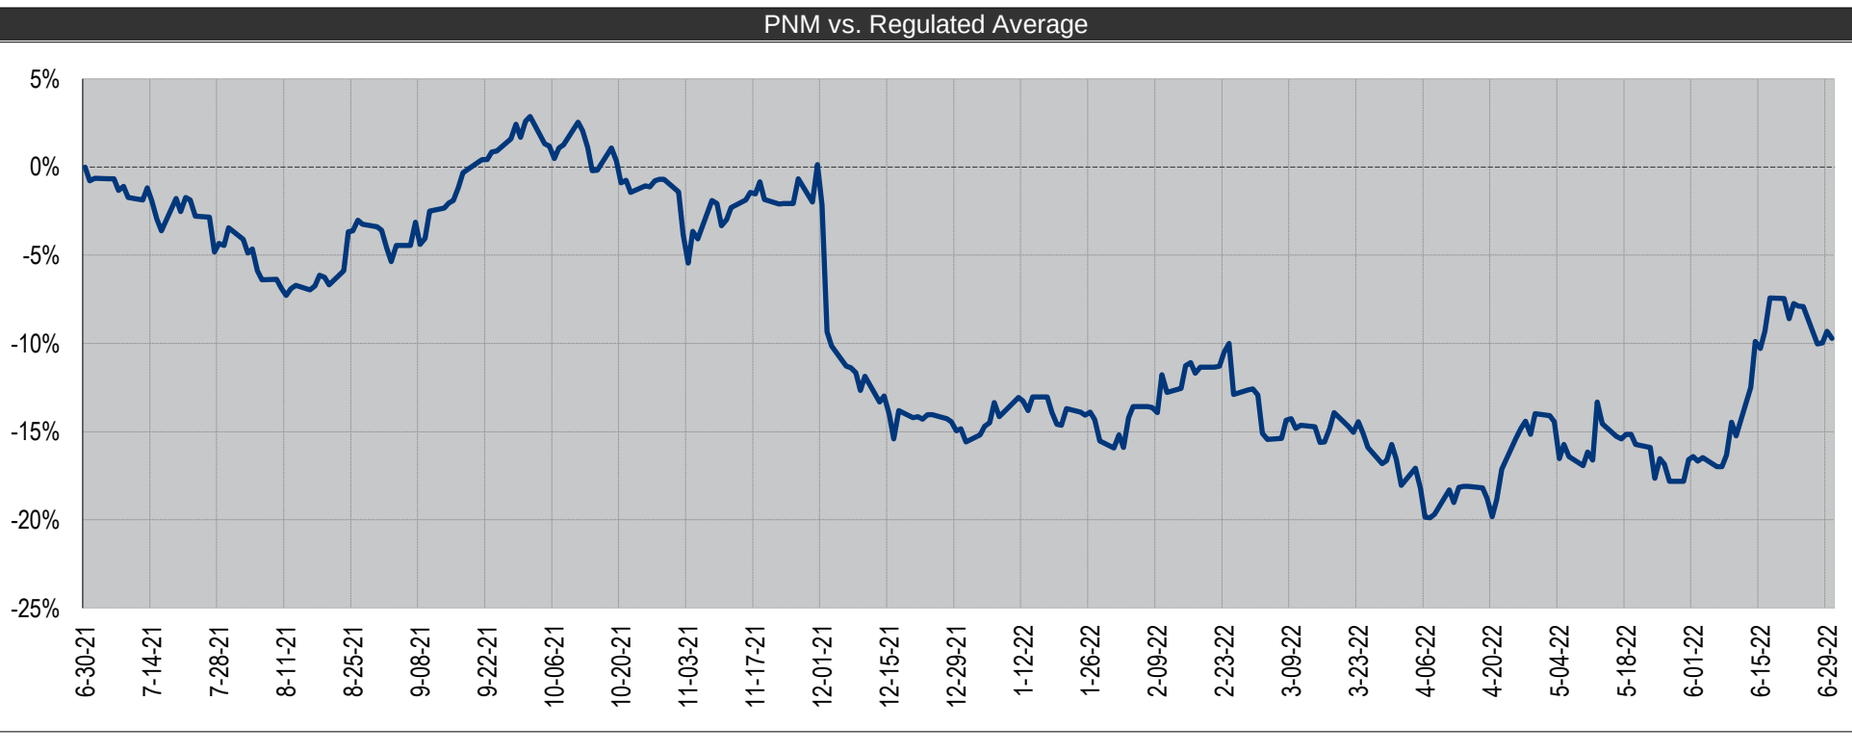


Please help us protect your advantage...
DO NOT FORWARD



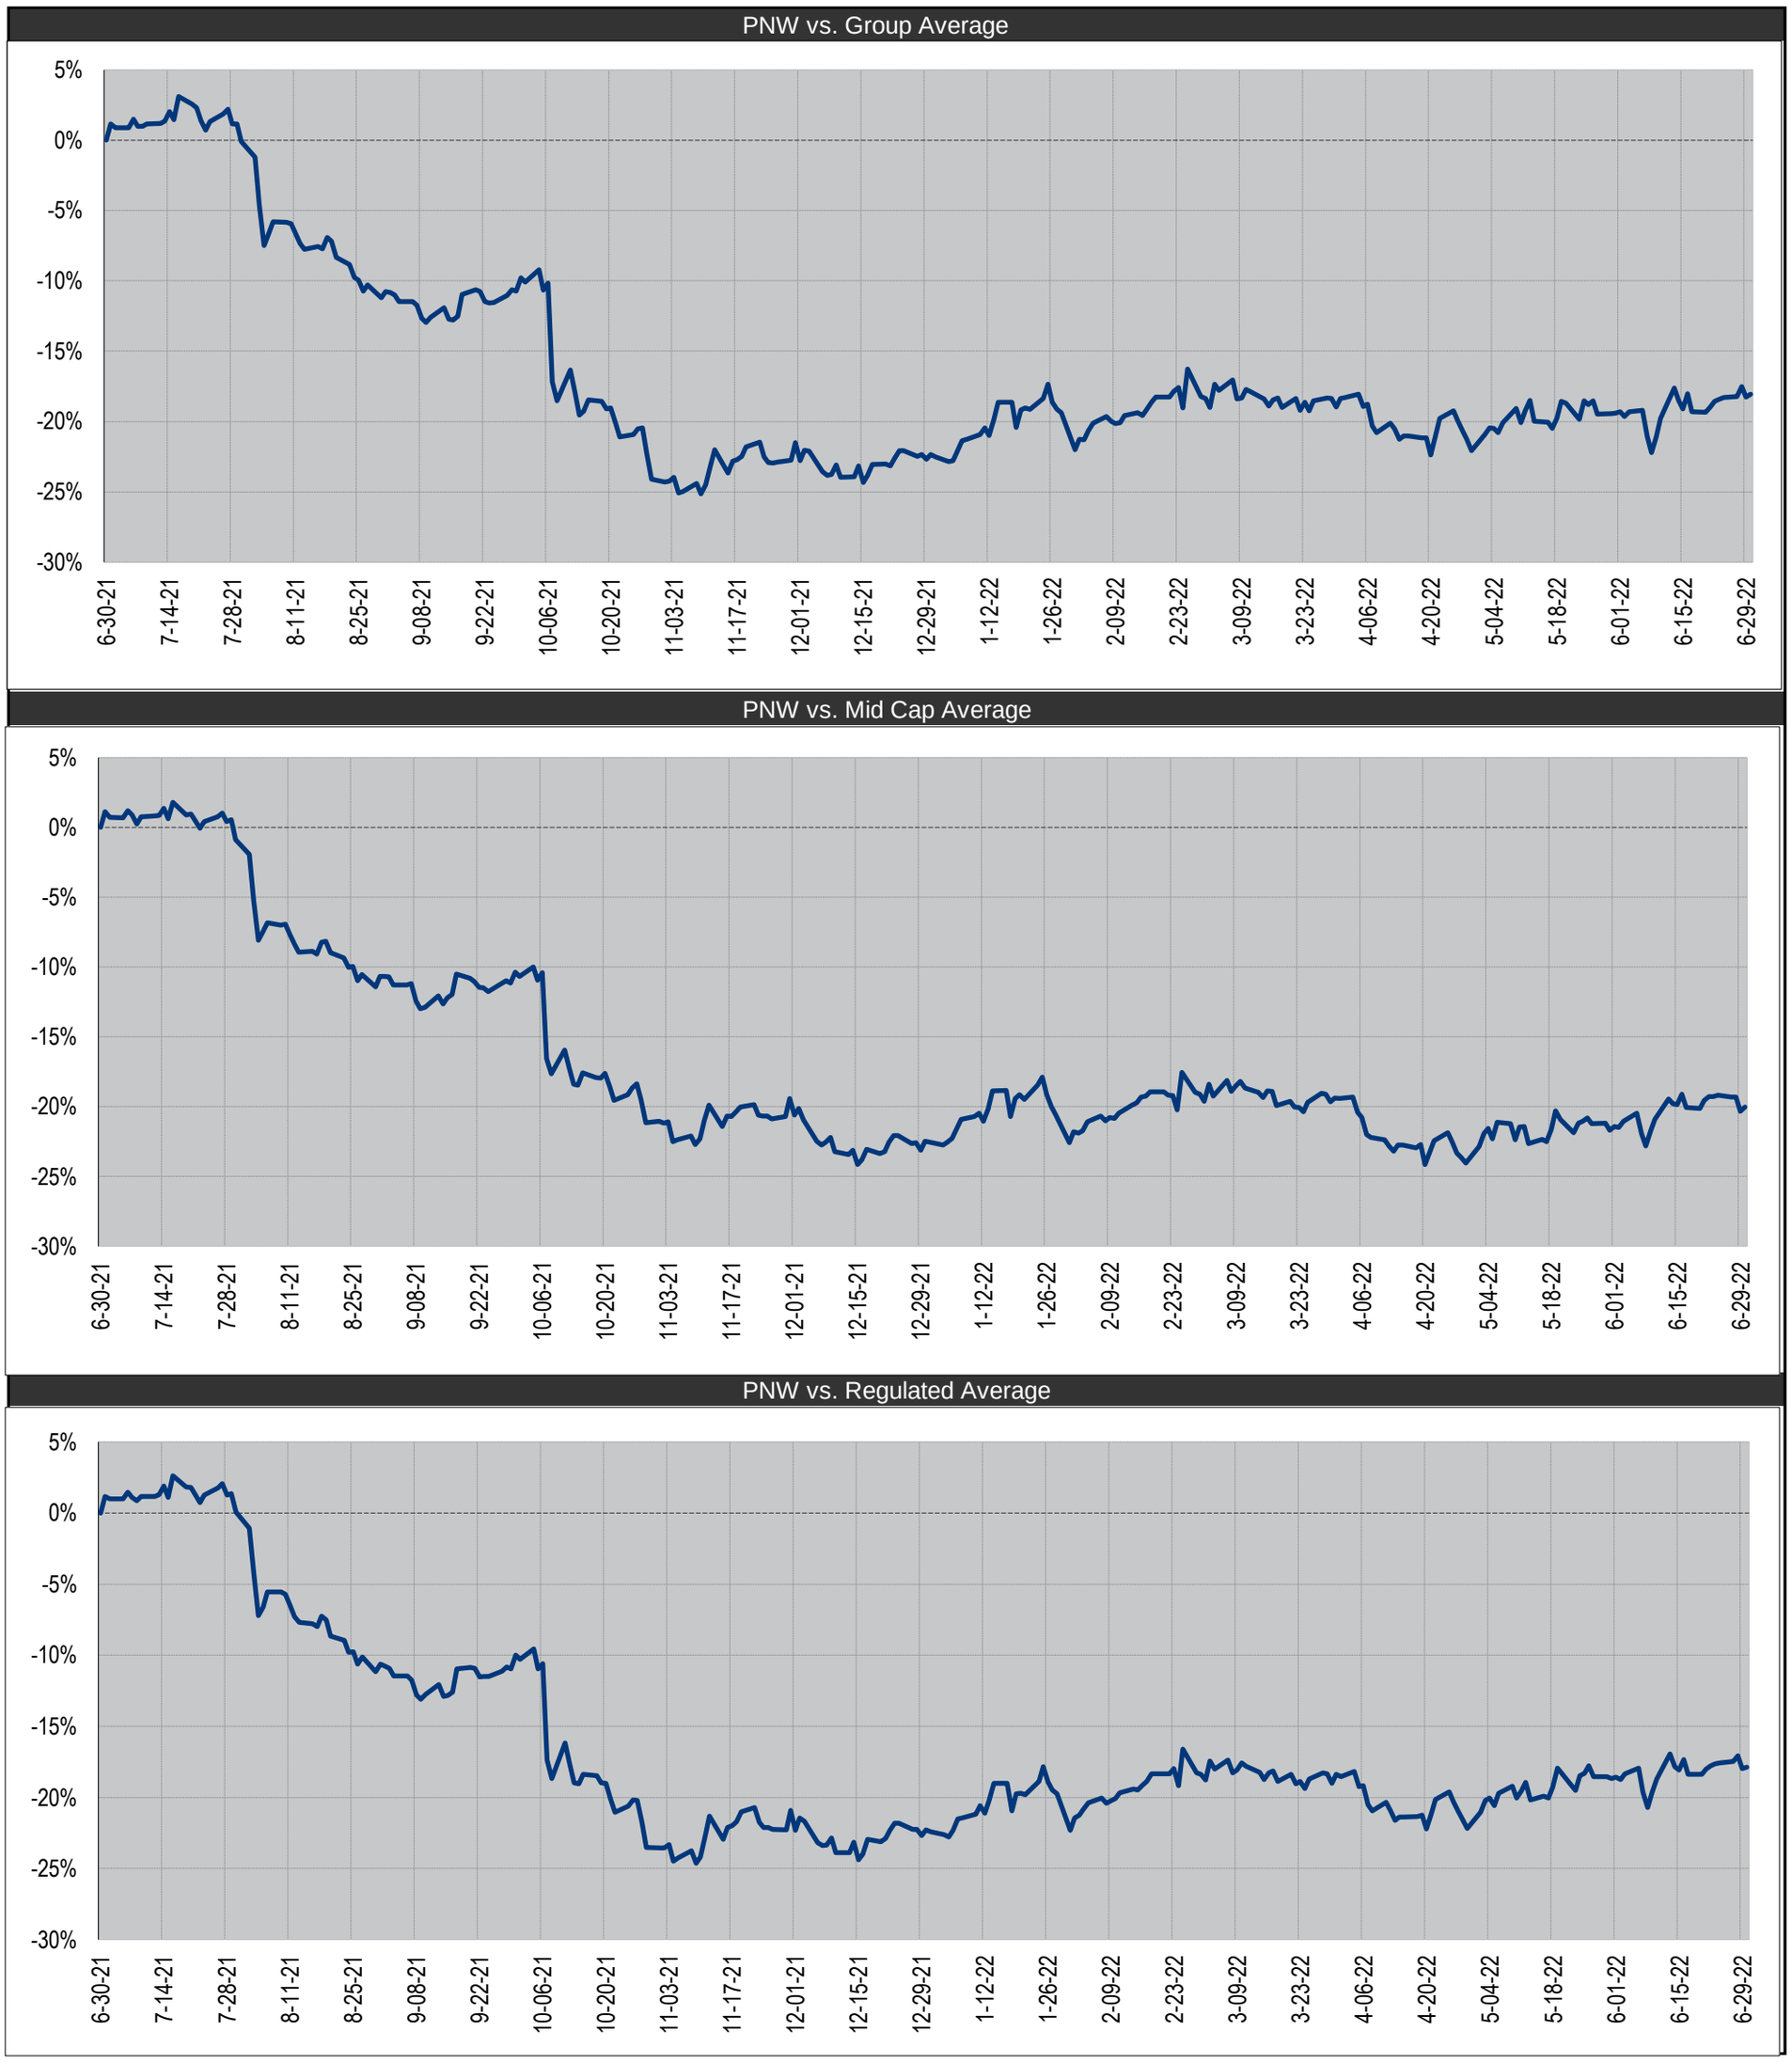
WOLFE RESEARCH

PNM Resources (PNM) $47.78, NR



PNM vs. Group Average

PNM vs. Small Cap Average

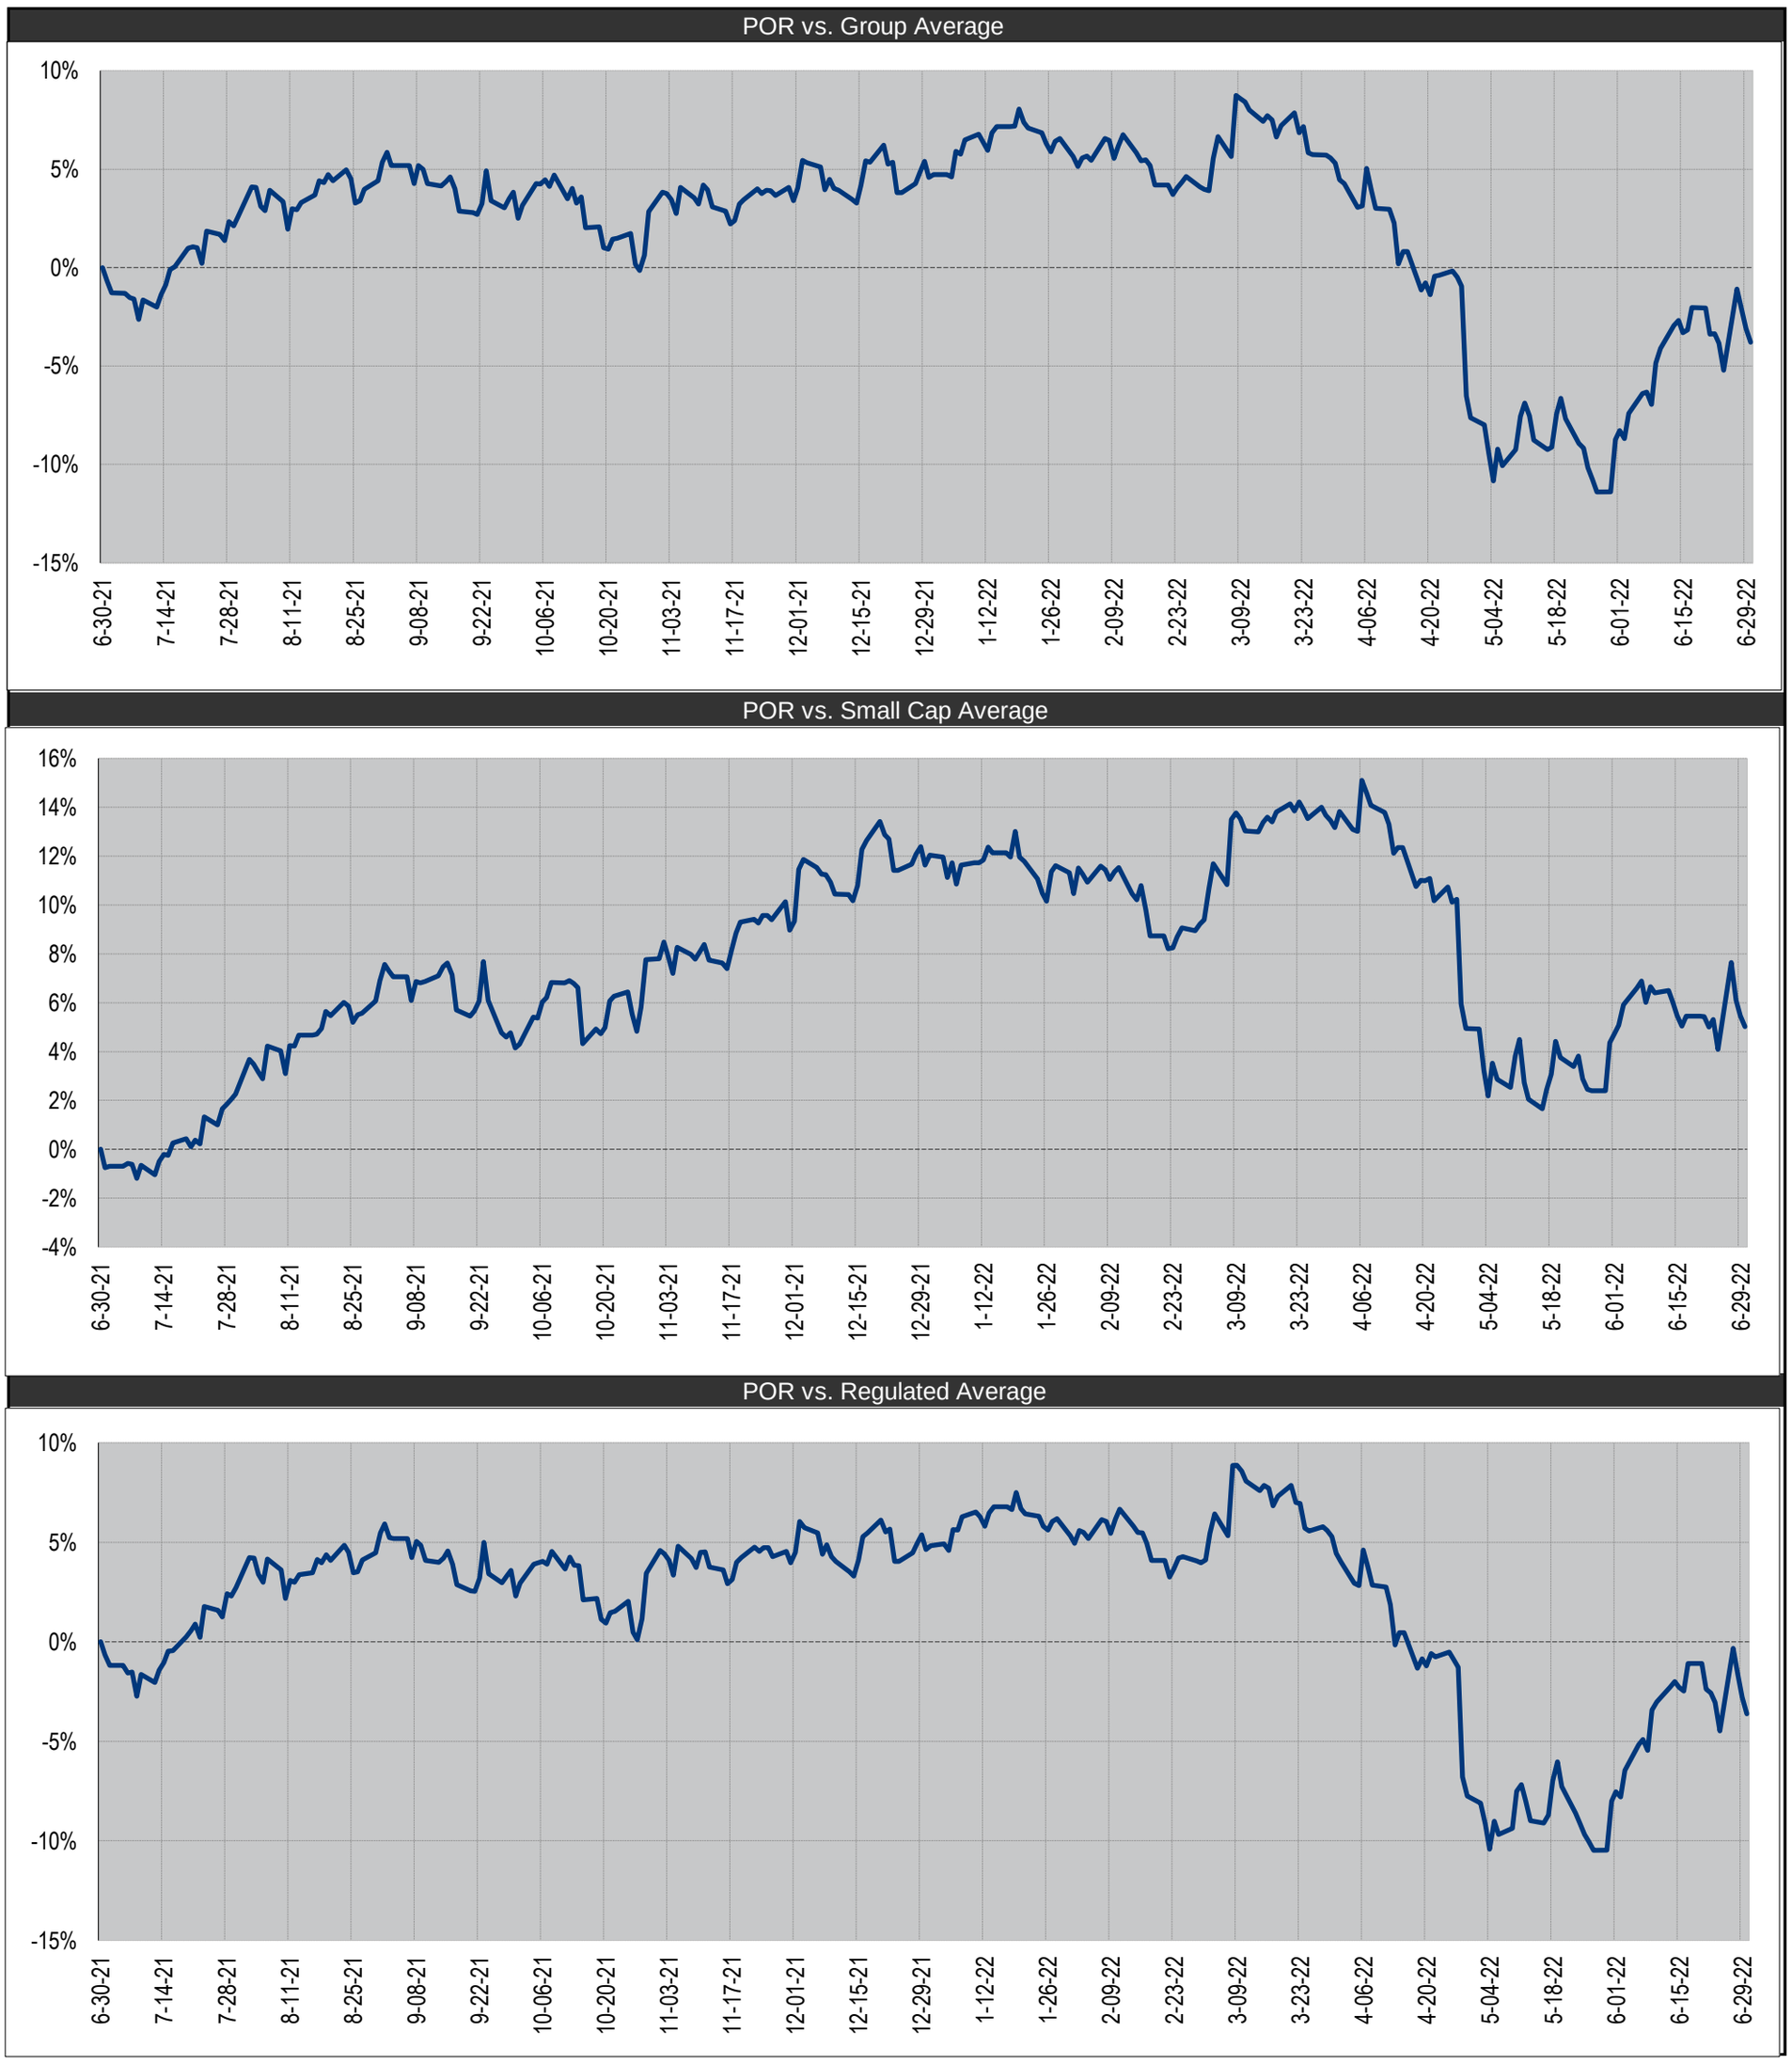


PNM vs. Regulated Average

WOLFE RESEARCH

Pinnacle West Capital (PNW) $73.12, Underperform, $73 PT

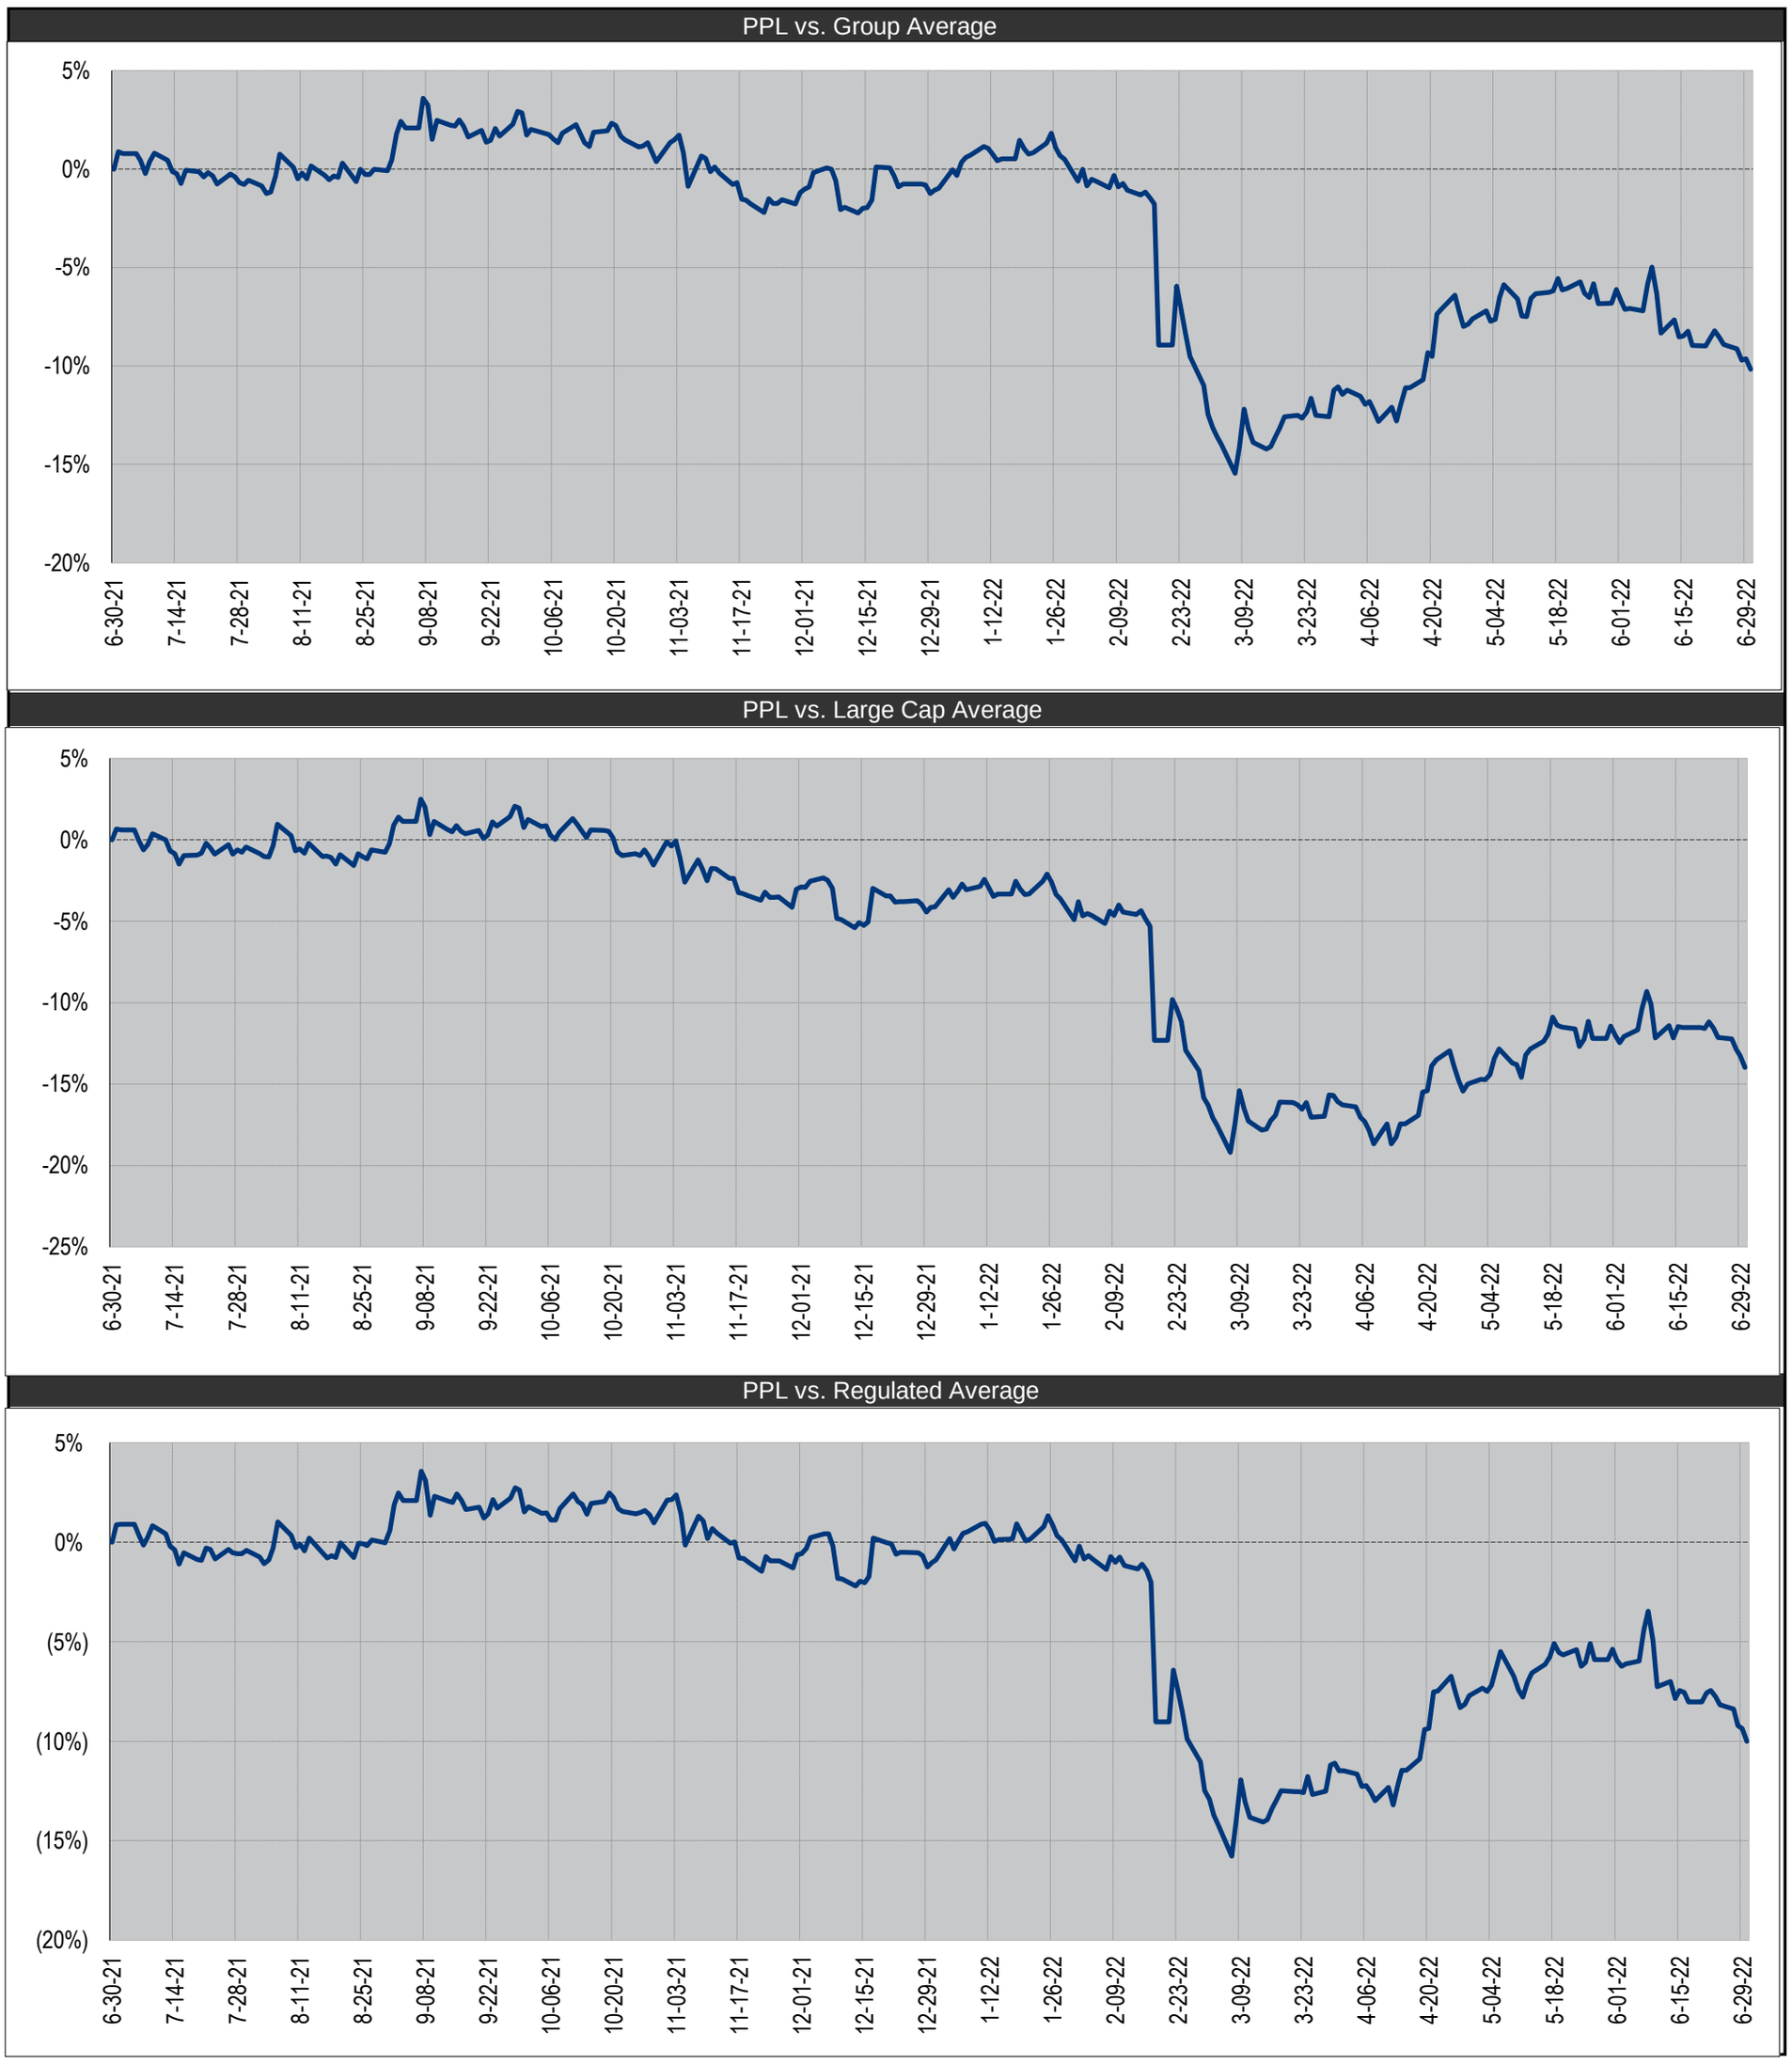
PNW modestly underperformed the sector average in June, though is still outperforming by ~550bps YTD. During June, PNW notified the ACC that it would delay the filing of its rate case until late-Oct in order to address several questions that were posed by the Chairwoman regarding cost of capital in its direct testimony. We think delaying the filing/test-year is actually beneficial for the company for a couple reasons – can now capture the 3 major projects that would've previously fallen out of the 12-mo post-test year plant window; can also better capture some of the more recent inflation and potential pension pressures.



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Portland General (POR) $48.33, Peer Perform, $52 PT

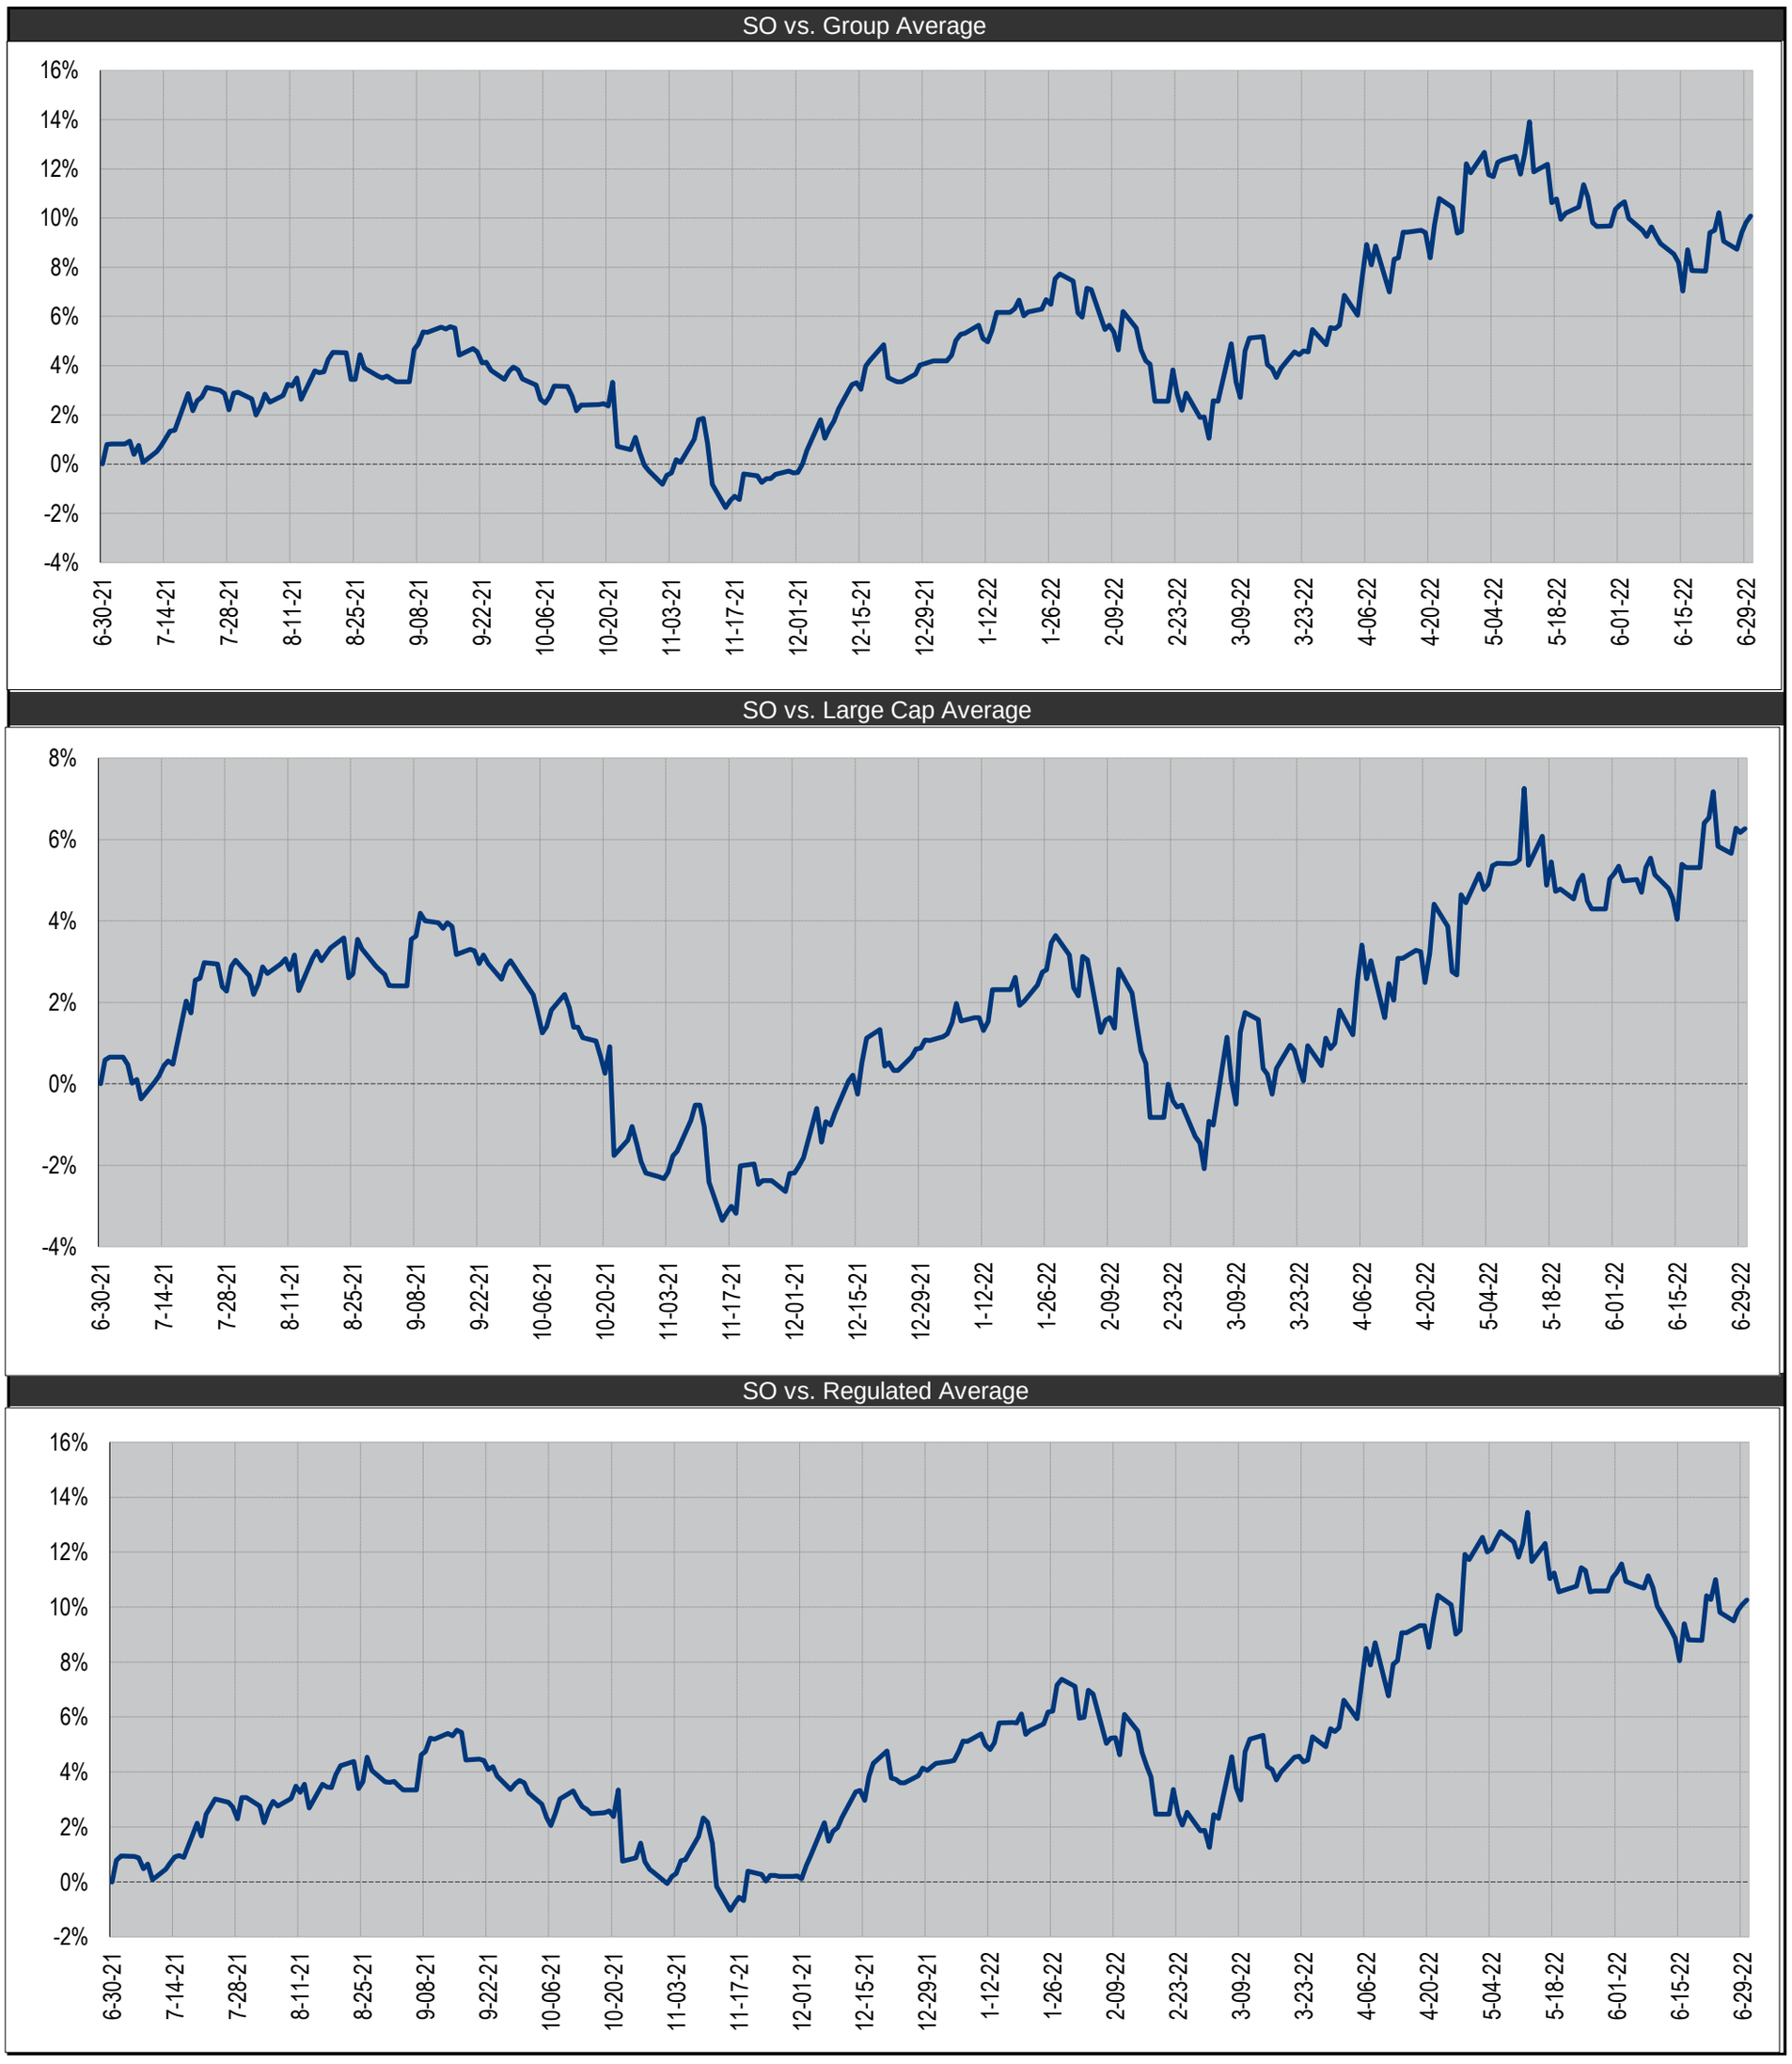


POR modestly outperformed its small cap peers in June as it was announced towards month-end that the company was set to join the S&P MidCap 400 Index.

WOLFE RESEARCH

PPL Corporation (PPL) $27.13, Outperform, $32 PT

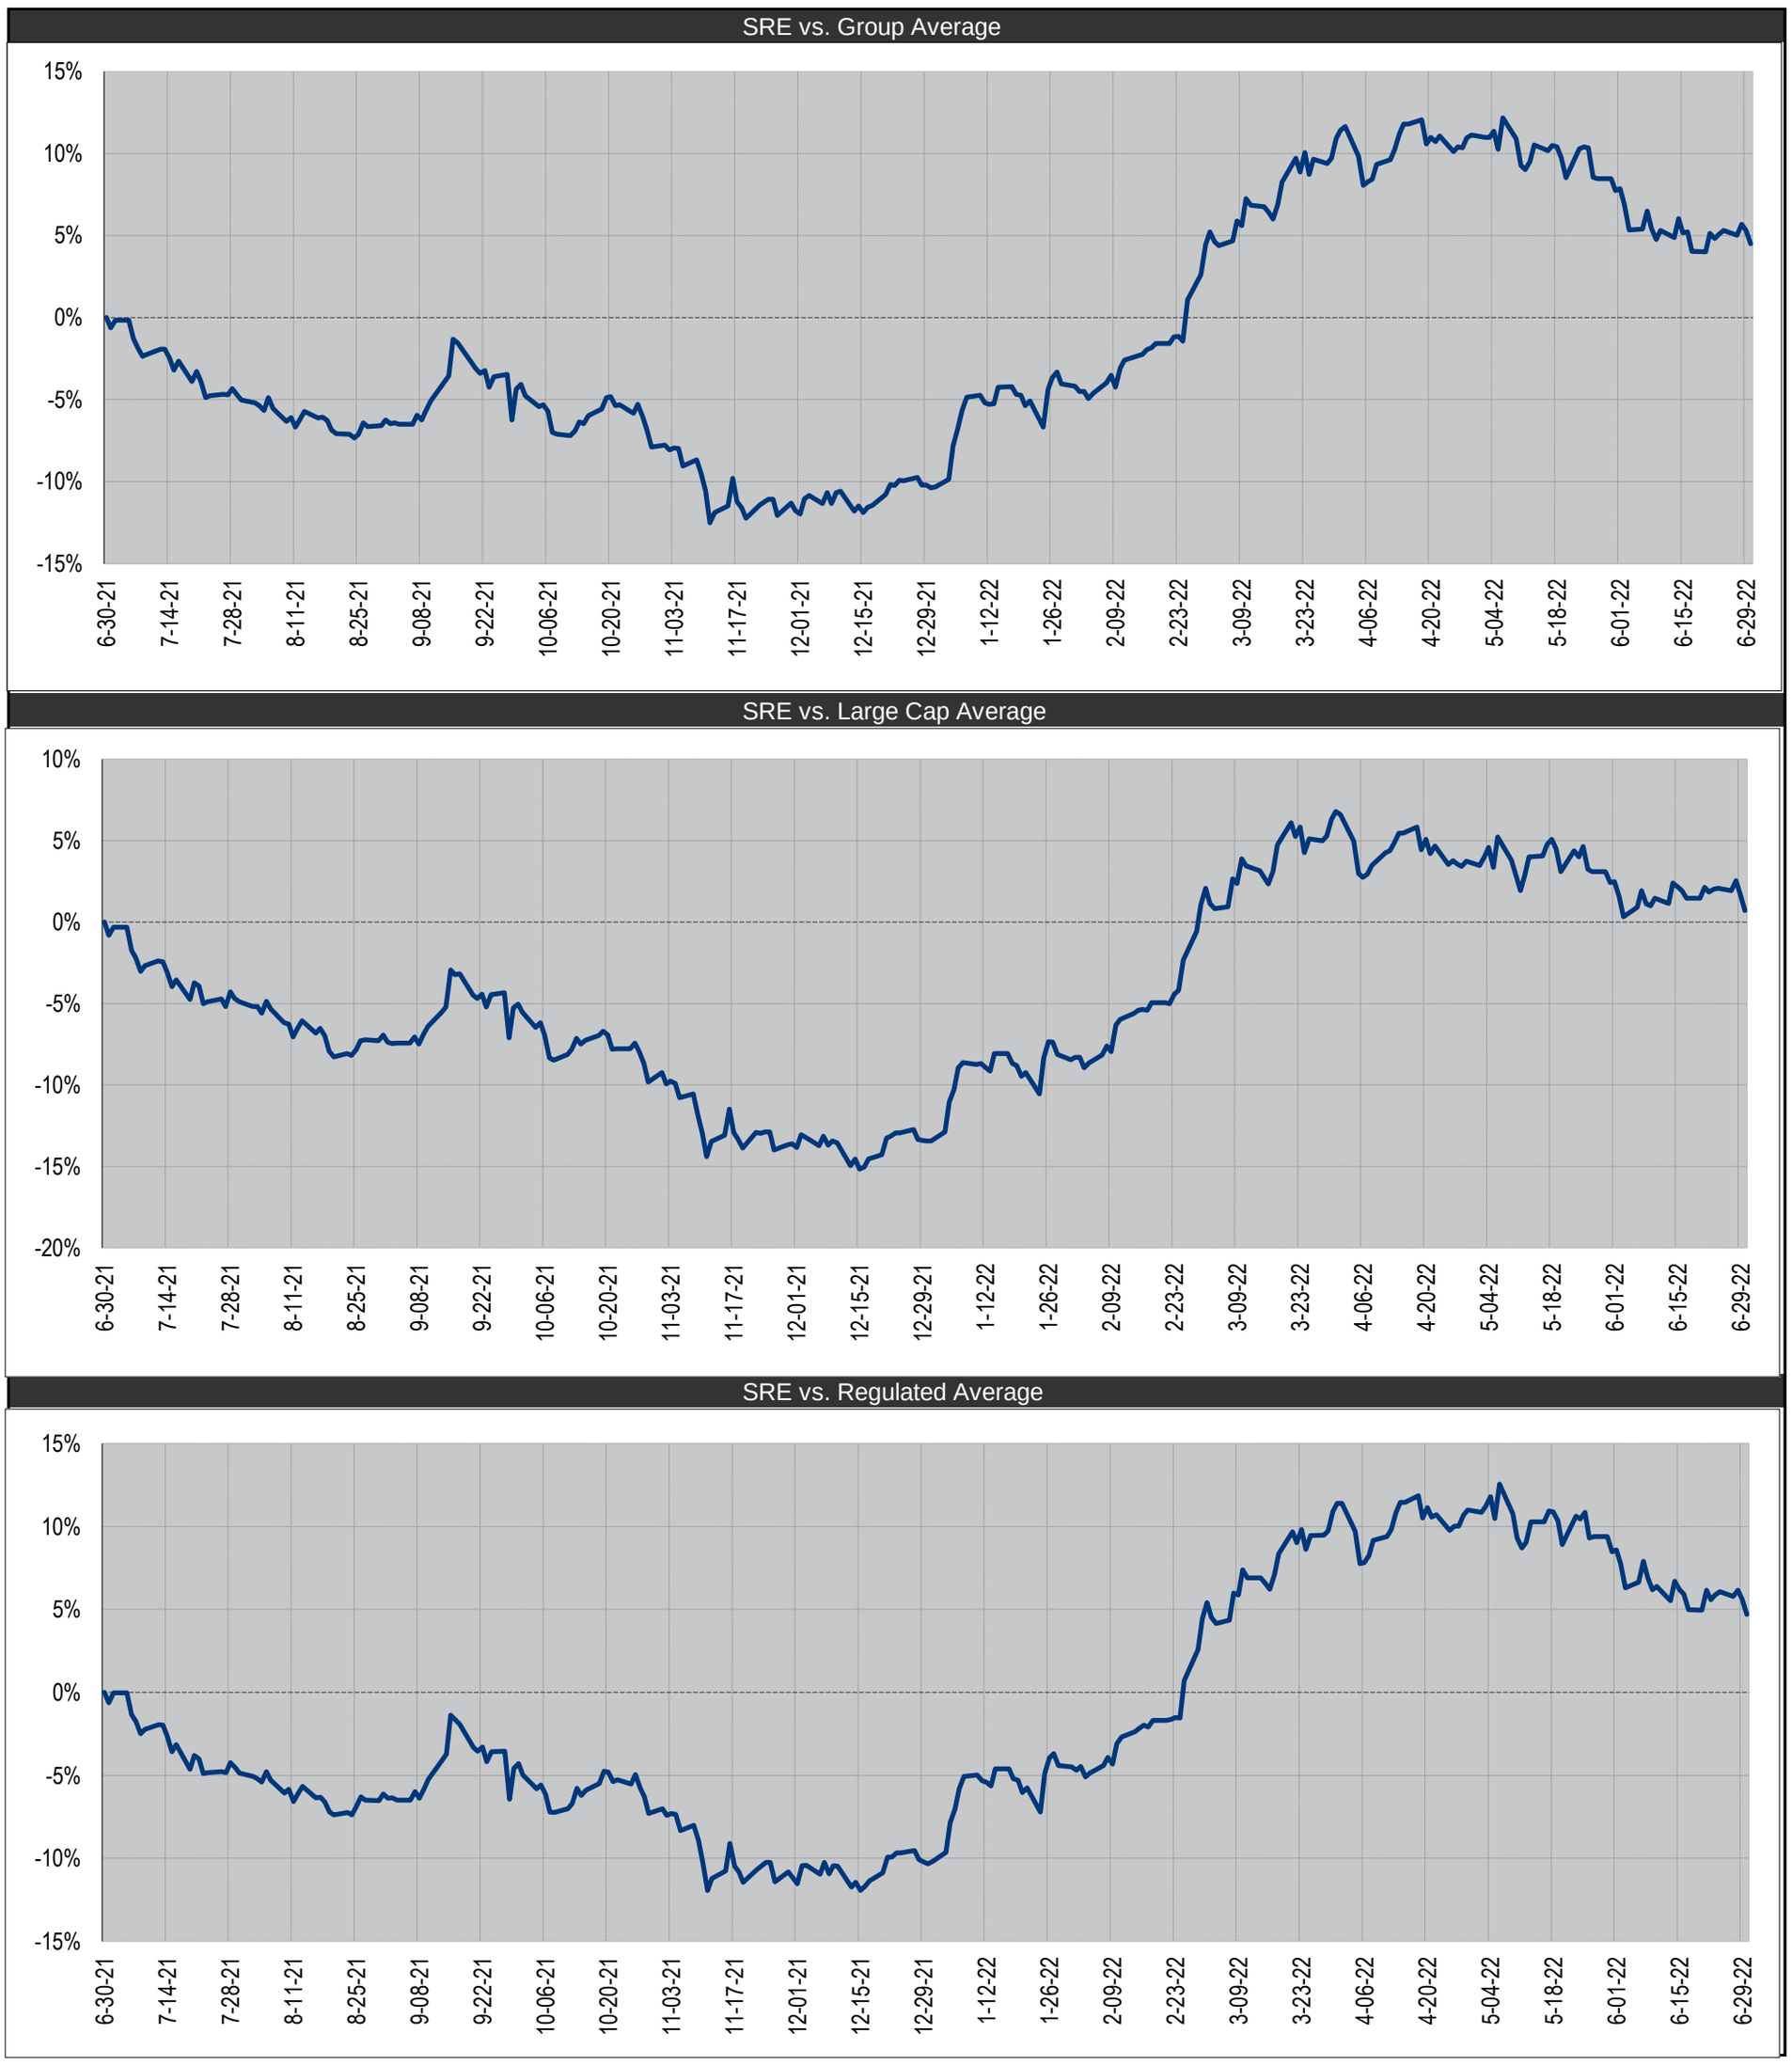
PPL had a decent pop relative to peers before its long-awaited investor day for 6/9 but underperformed thereafter, as investors appeared focused on the low rate base growth.



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Southern Company (SO) $71.31, Peer Perform, $75 PT

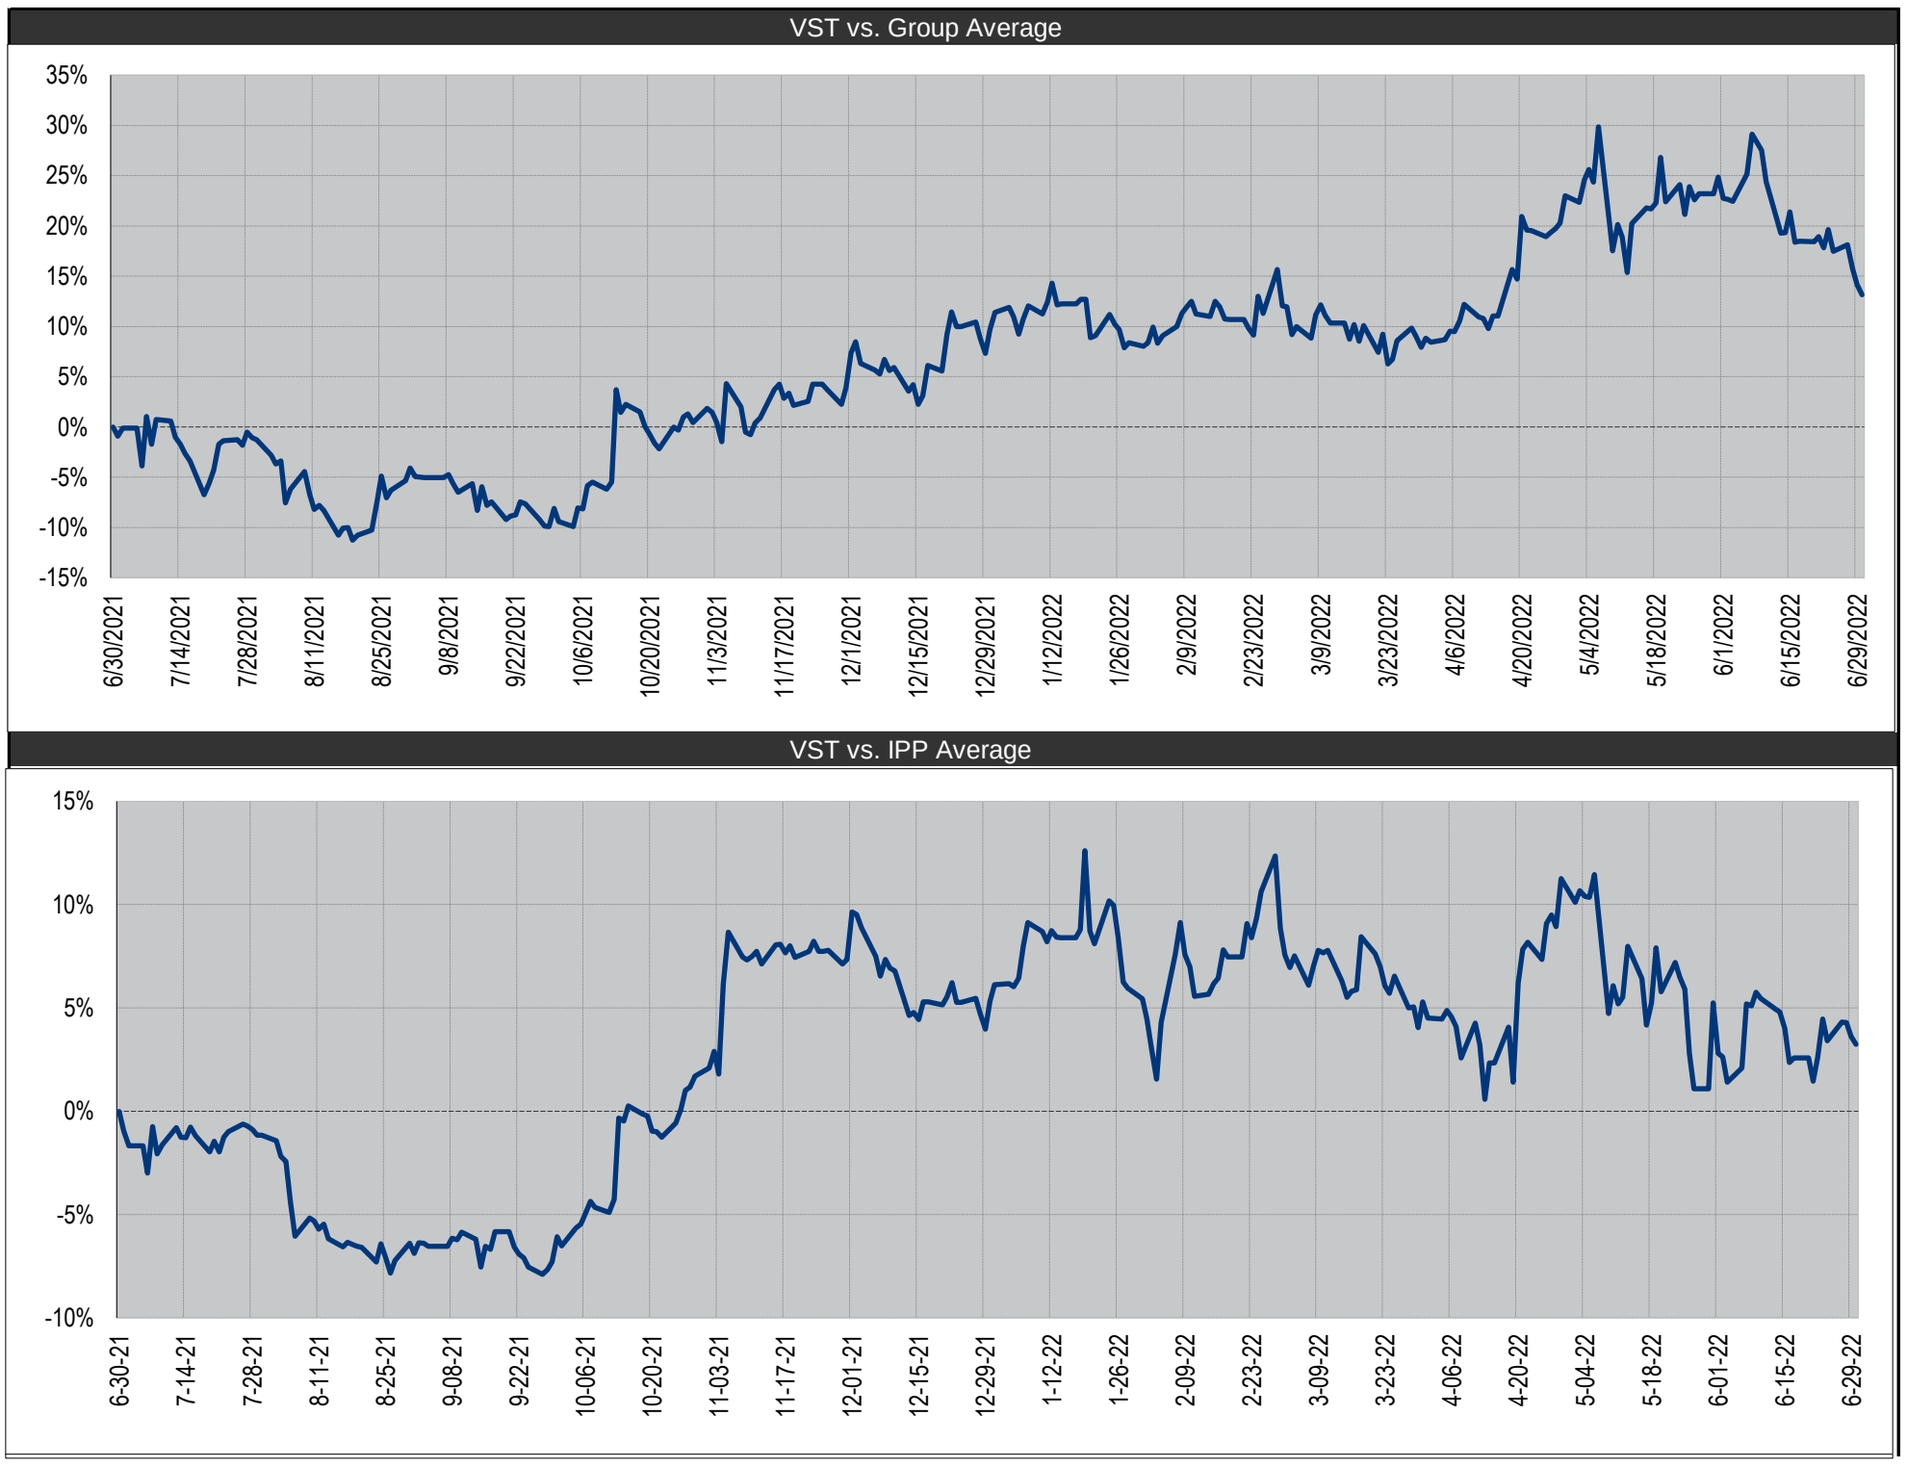


The stock outperformed in Jun, reaching its 52-week relative high to large cap peers from mid-May, as the GaPSC Staff testimony on Vogtle showed near alignment schedule.

WOLFE RESEARCH

Sempra Energy (SRE) $150.27, Outperform, $179 PT

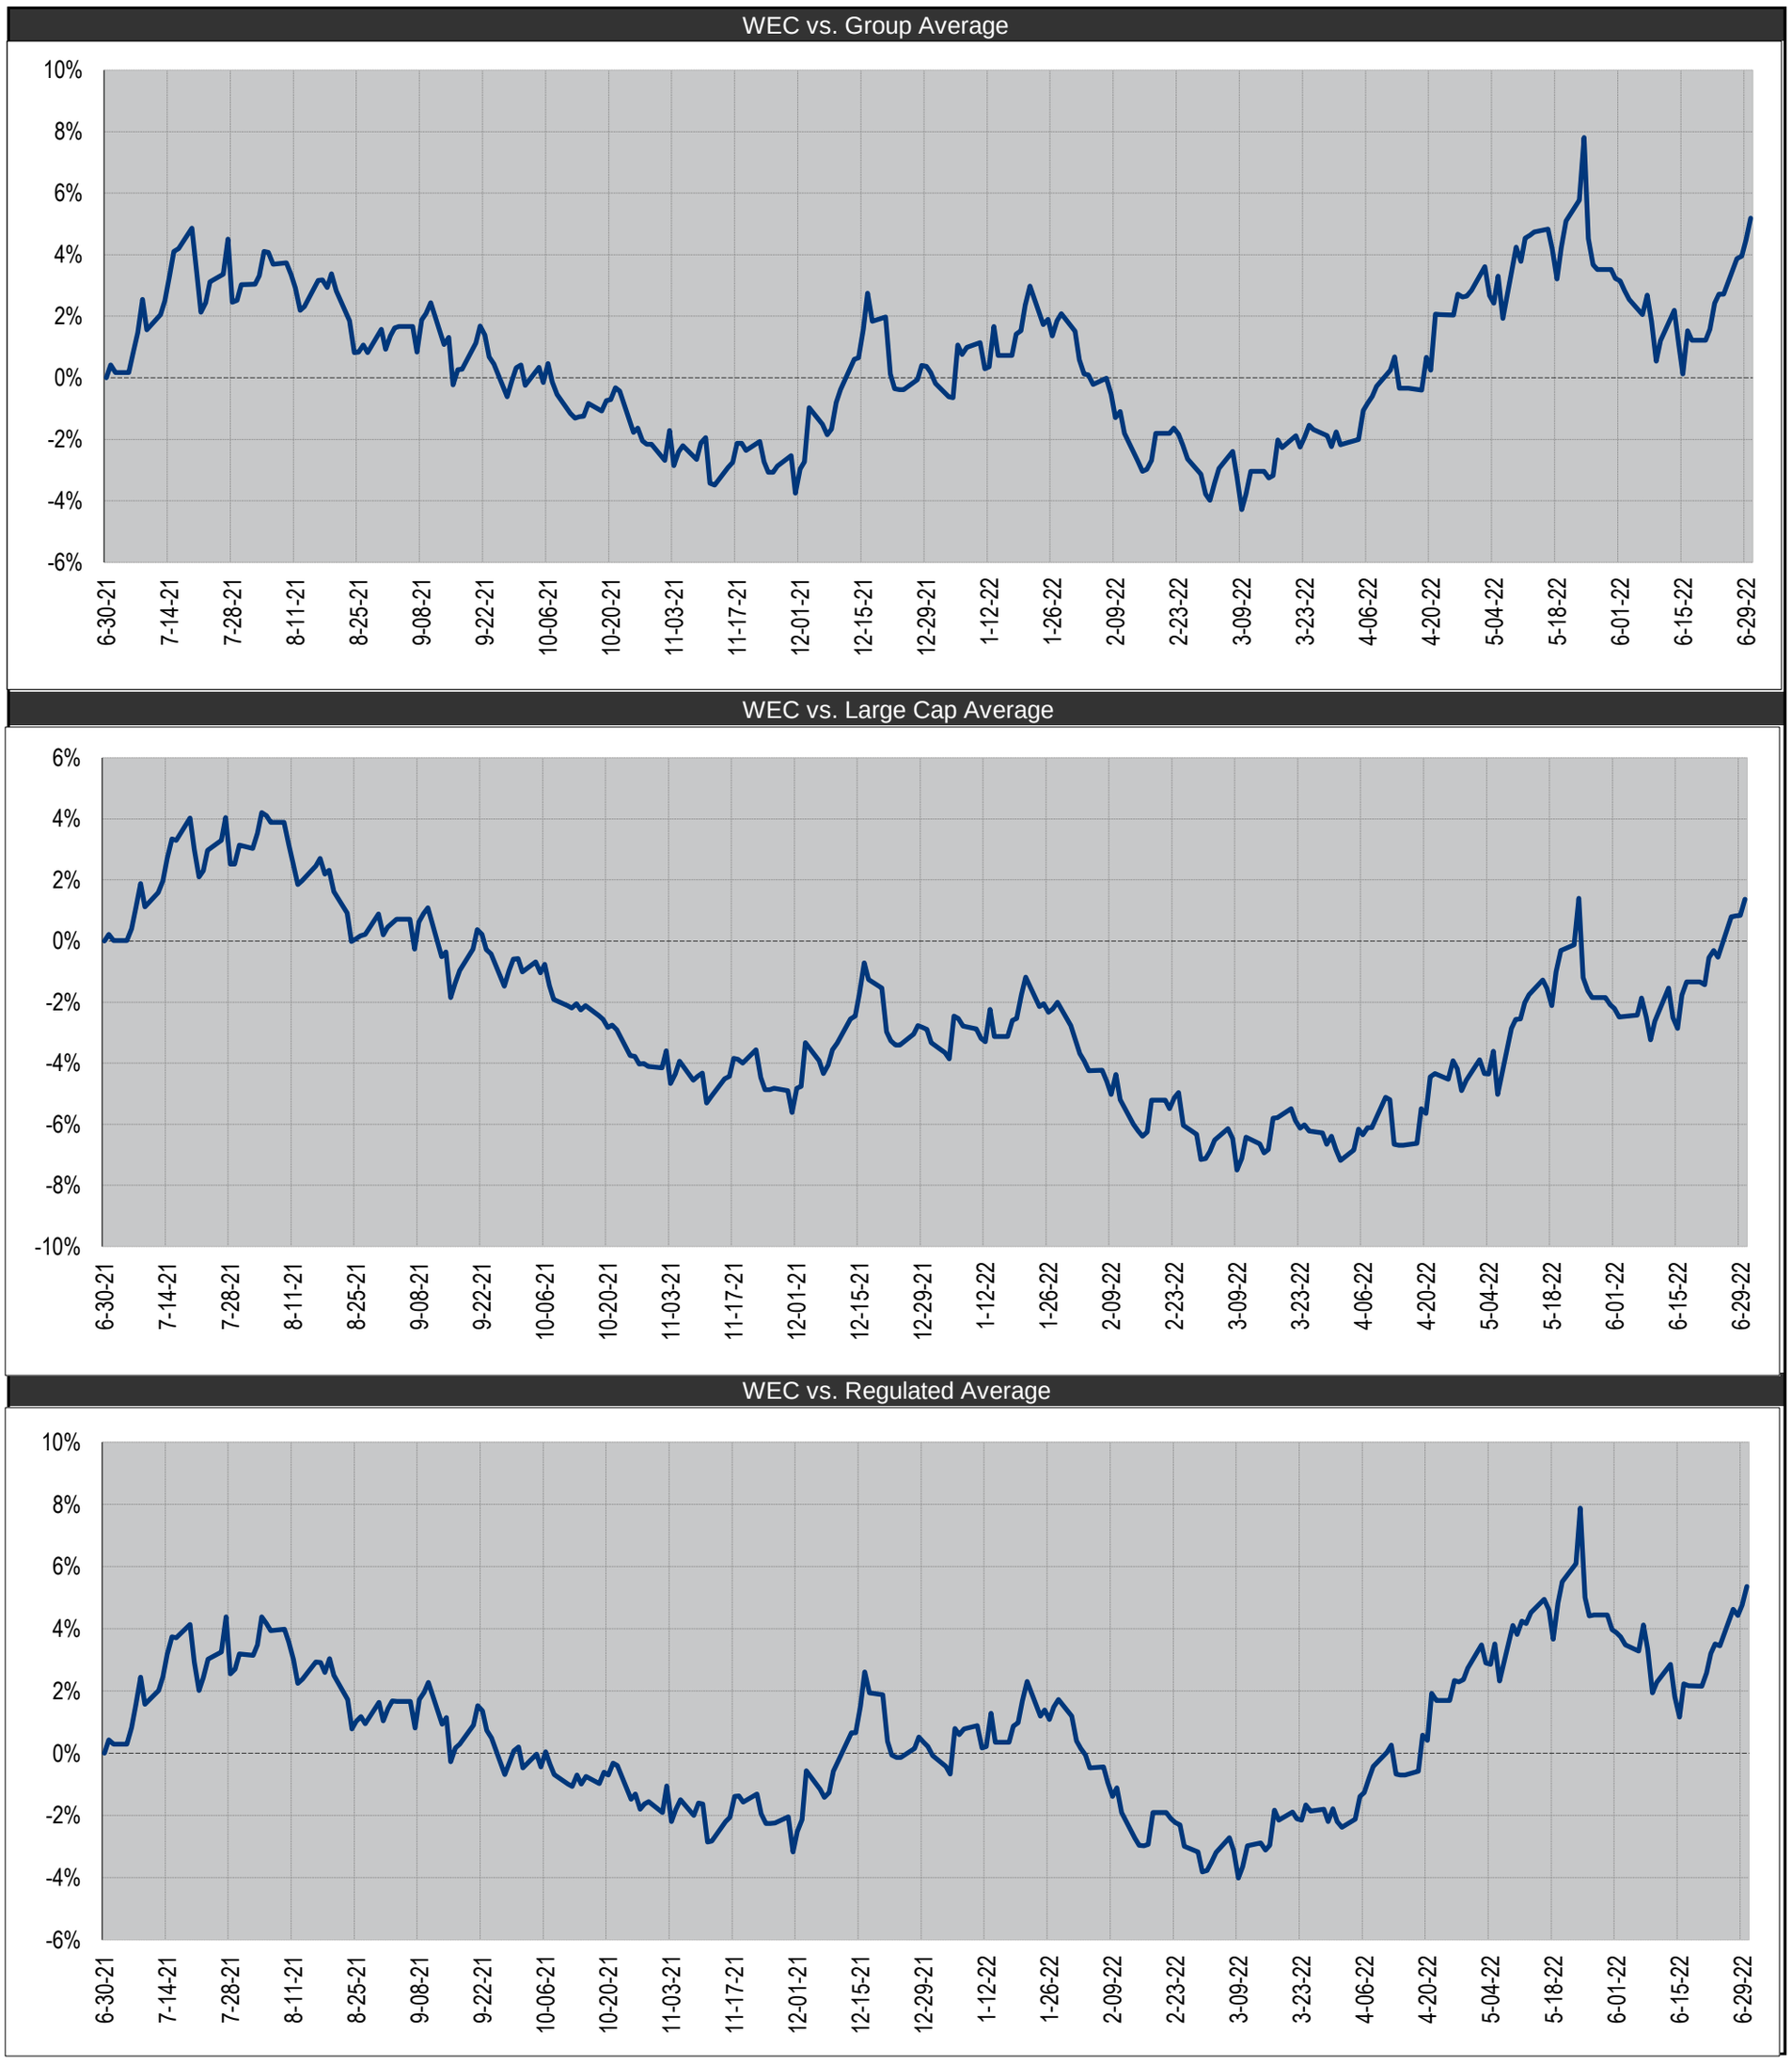
Shares of Sempra fell a little over 8% in June, underperforming the 5% decline of the utility group overall. The company had a few positive LNG datapoints in the month with heads of agreements announced with INEOS, but given the AMZ's 14% decline in the period SRE's midstream operations may have been more of a drag on the stock.



Please help us protect your advantage...
DO NOT FORWARD

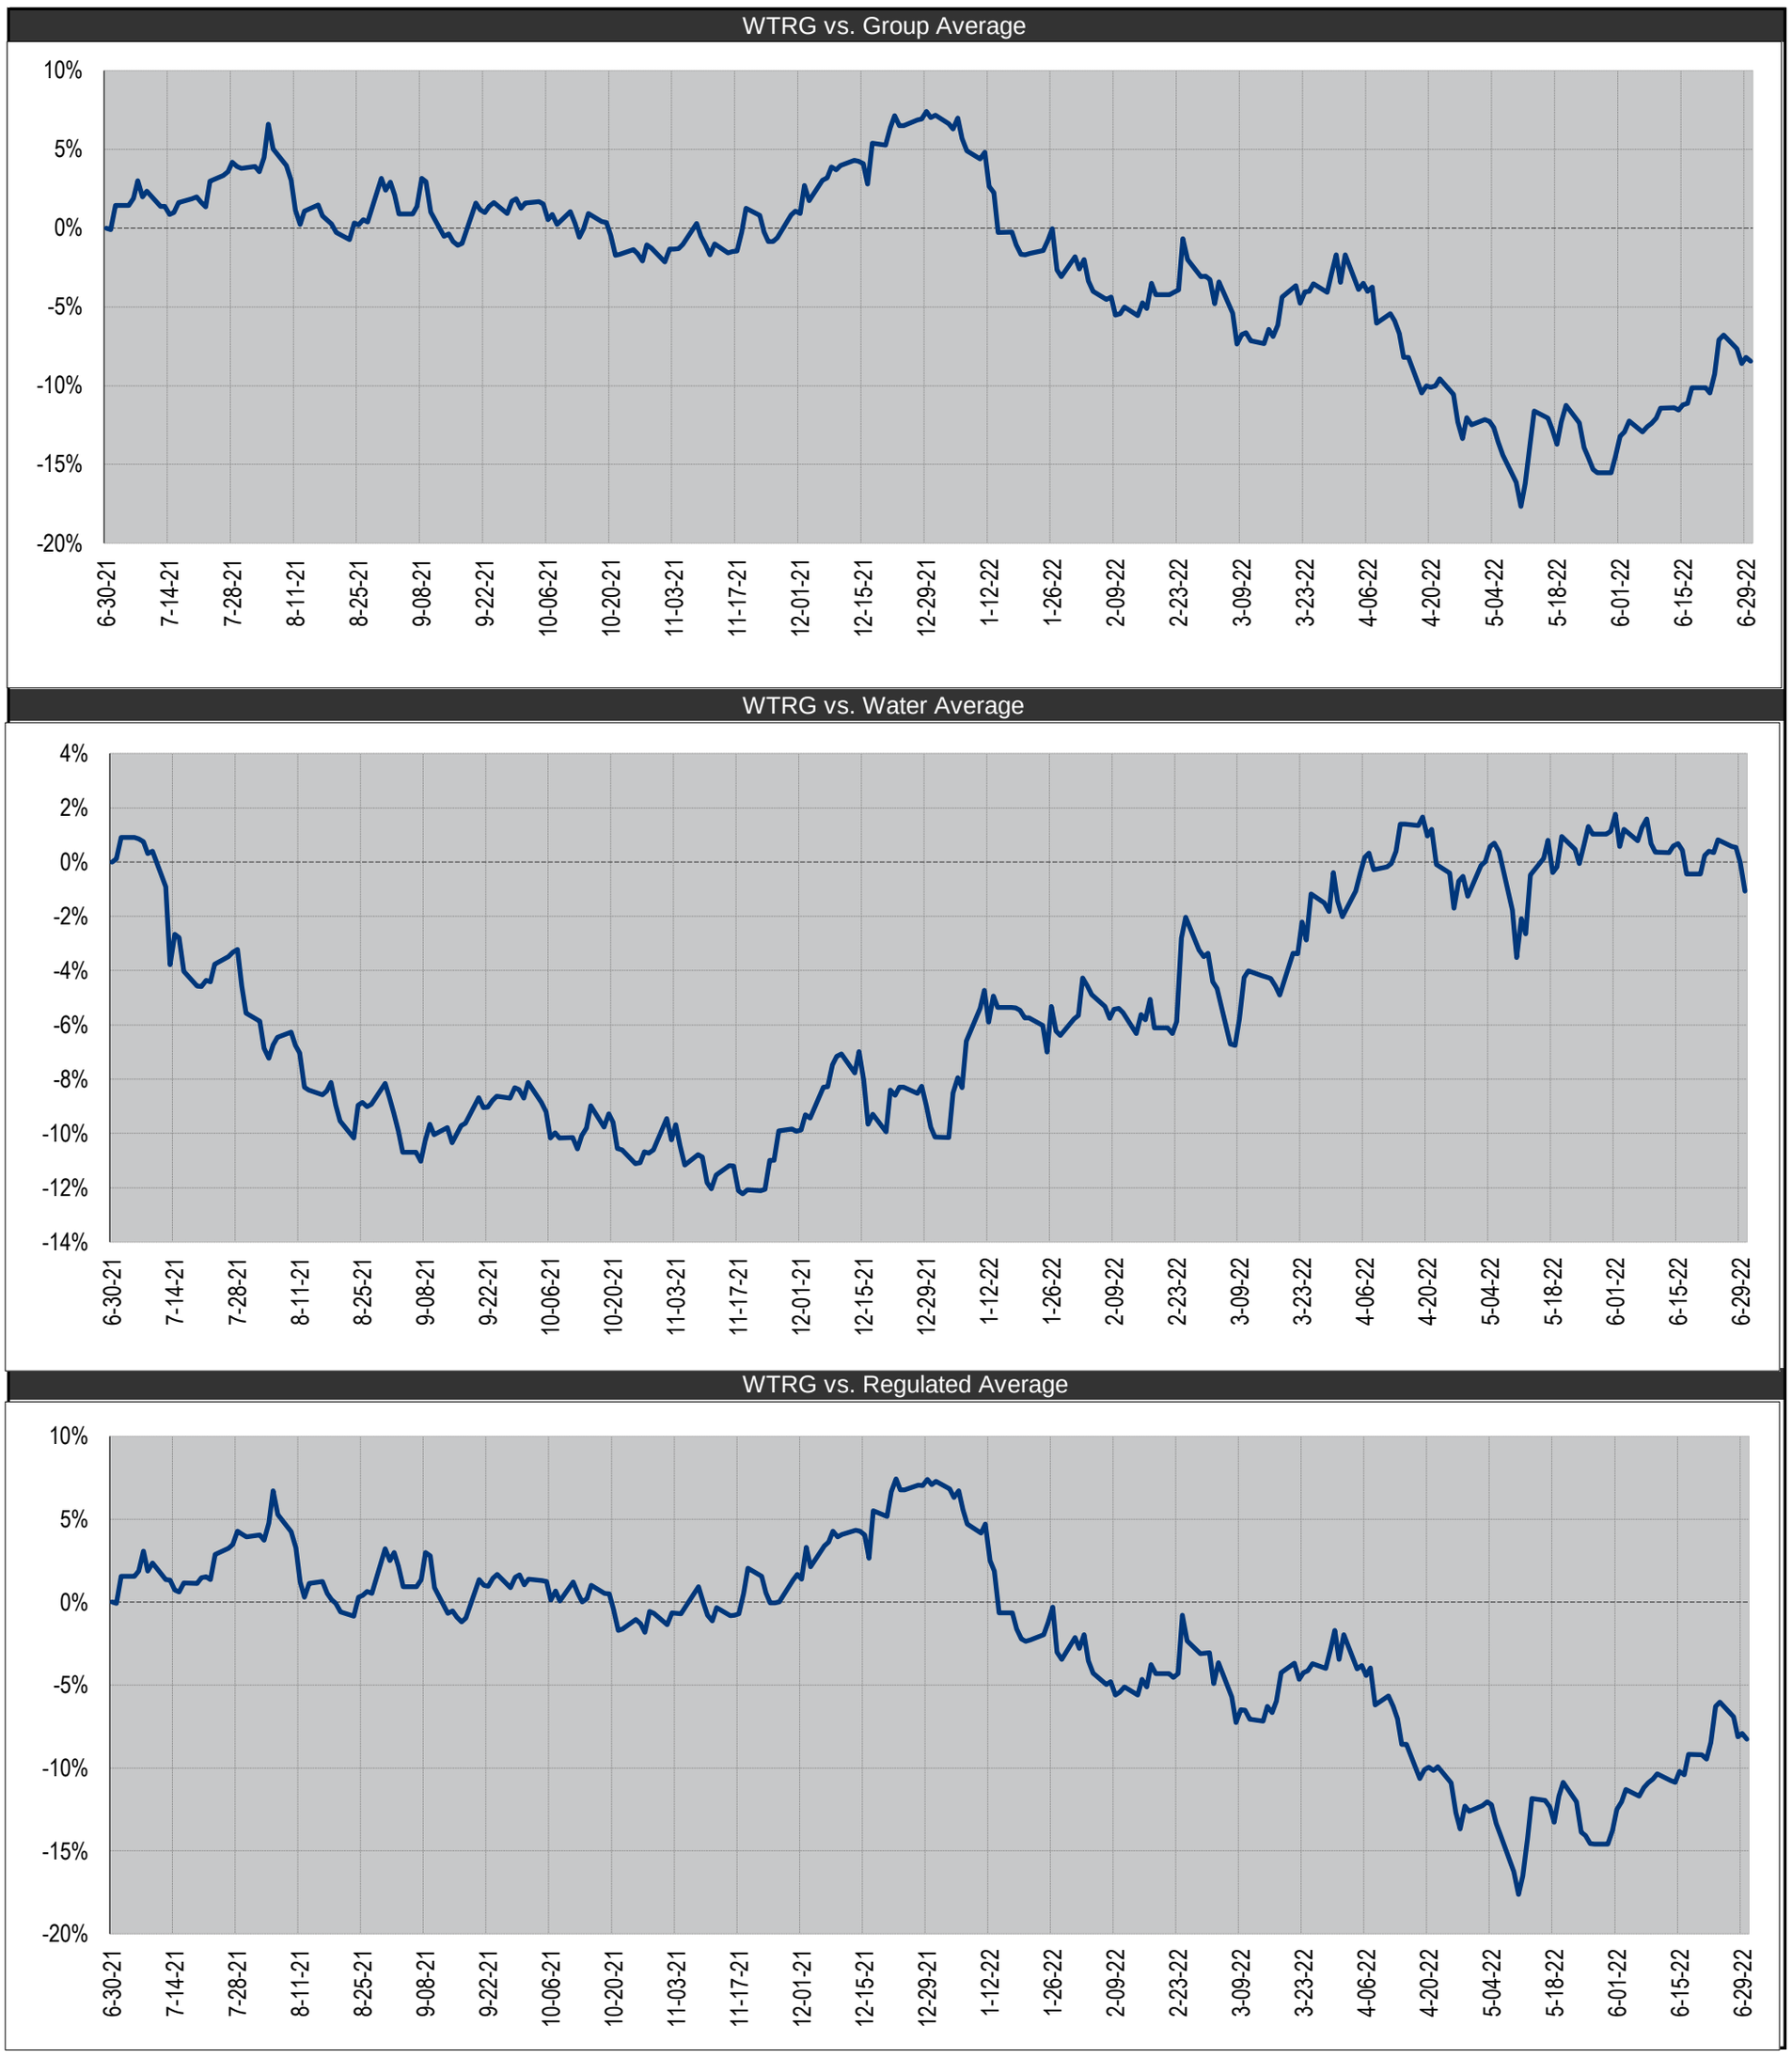
WOLFE RESEARCH

Vistra Corporation (VST) $22.85, Outperform, $34 PT



VST was one of the worst performers in the sector for June, falling alongside the broader energy sector. The commodities trade seemed to peter out some, as front-month natural gas declined from over $8 toward ~$6 after the Freeport LNG outage. That said, power forward remains elevated relative to when VST gave 2023-2025 guidance. VST also continues to see repeated insider share purchases from its executives and Board. VST is still outperforming utilities on the year, but only slightly.

WOLFE RESEARCH

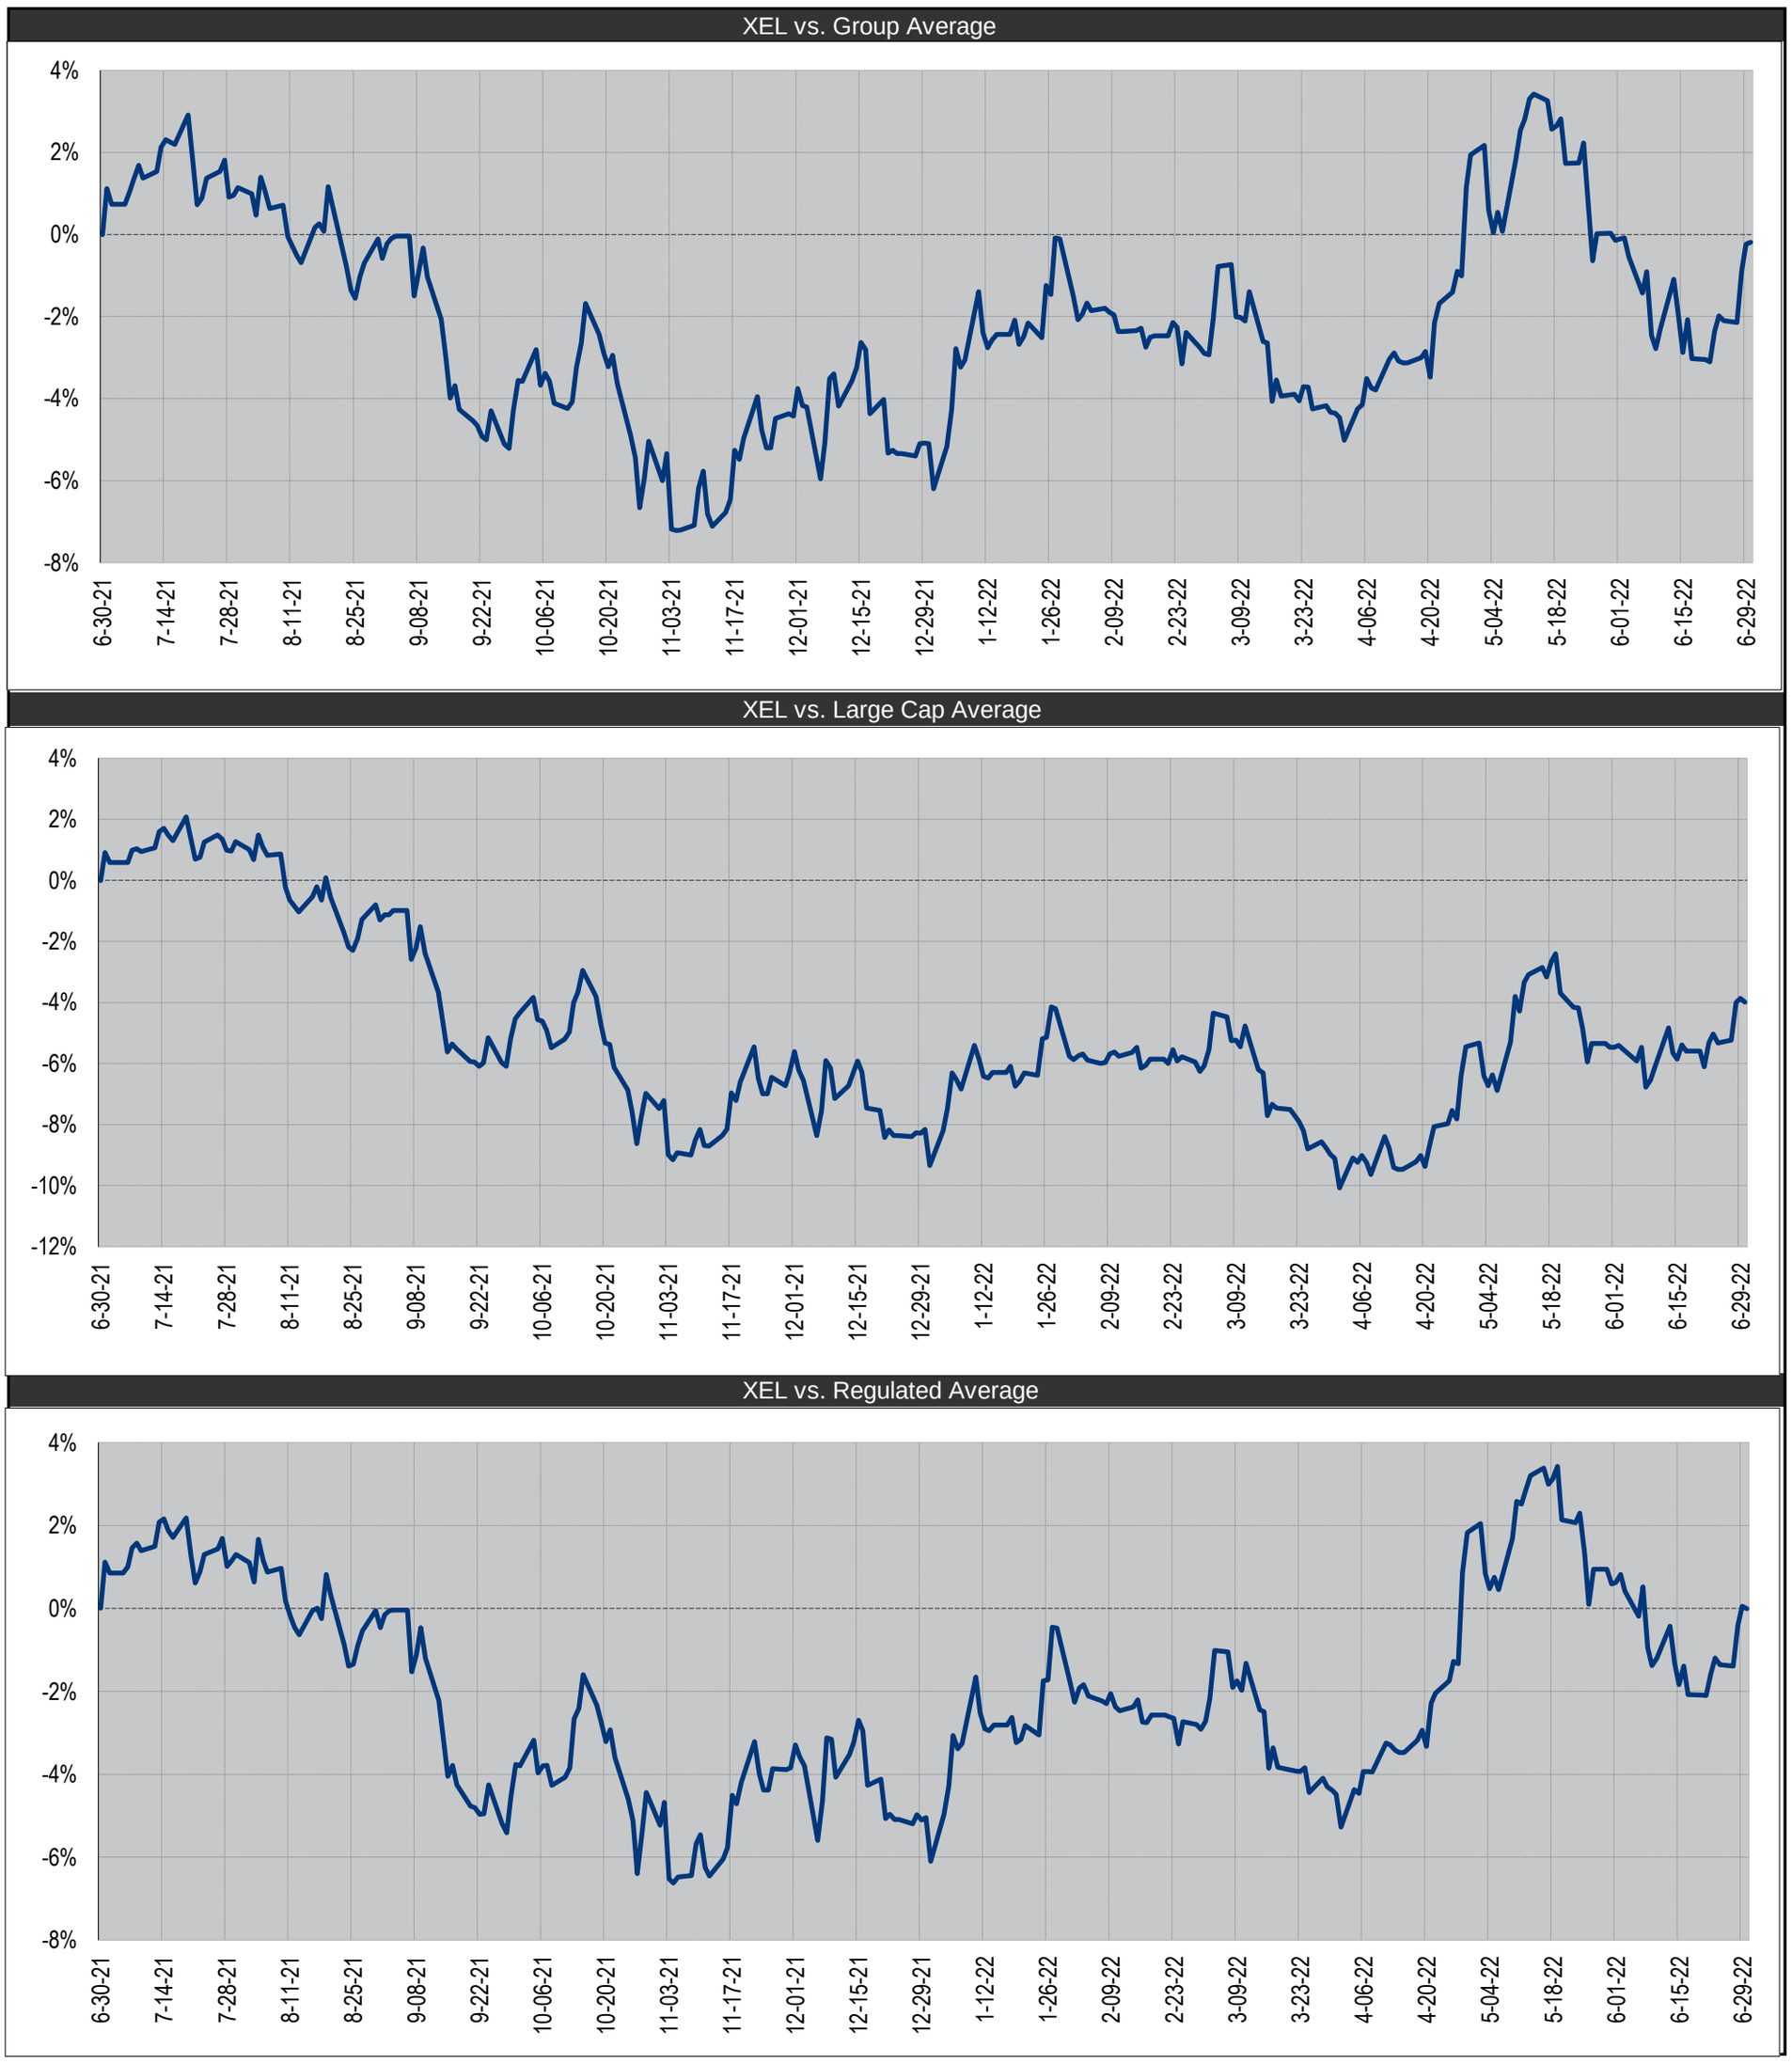


WEC Energy Group (WEC) $100.64, Peer Perform, $104 PT

WEC outperformed modestly in June and is also outperforming on the year. WEC quantified its MISO transmission opportunity as $800M and delayed 2 of its coal plant retirements.

WOLFE RESEARCH

Essential Utilities (WTRG) $45.85, NR



Please help us protect your advantage...
DO NOT FORWARD

WOLFE RESEARCH

Xcel Energy (XEL) $70.76, Peer Perform, $79 PT

XEL modestly underperformed the utilities index in June but is still 650bps ahead through the 1H of 2022. During June, the Colorado PUC approved XEL's IRP (add 4,000 MW of utility-scale renewables by 2030 and all coal gone by 2031) and also issued a final decision allowing near full recovery of XEL's incremental Winter Storm Uri costs ($500M vs the $508M request).

Please help us protect your advantage...

DISCLOSURE SECTION

Analyst Certification:

The various Wolfe Research, LLC analysts who are primarily responsible for this research report certify that (i) the recommendations and opinions expressed in this research report accurately reflect the research analysts' personal views about the subject securities or issuers and (ii) no part of the research analysts' compensation was, is or will be directly or indirectly related to the specific recommendations or views contained in this report.

Other Disclosures:

Wolfe Research, LLC Fundamental Stock Ratings Key:

Outperform (OP):	The security is projected to outperform analyst's industry coverage universe over the next 12 months.
Peer Perform (PP):	The security is projected to perform approximately in line with analyst's industry coverage universe over the next 12 months.
Underperform (UP):	The security is projected to underperform analyst's industry coverage universe over the next 12 months.

Wolfe Research, LLC uses a relative rating system using terms such as Outperform, Peer Perform and Underperform (see definitions above). Please carefully read the definitions of all ratings used in Wolfe Research, LLC research. In addition, since Wolfe Research, LLC research contains more complete information concerning the analyst's views, please carefully read Wolfe Research, LLC research in its entirety and not infer the contents from the ratings alone. In all cases, ratings (or research) should not be used or relied upon as investment advice and any investment decisions should be based upon individual circumstances and other considerations.

Wolfe Research, LLC Industry Weighting System:

Market Overweight (MO):	Expect the industry to outperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.
Market Weight (MW):	Expect the industry to perform approximately in line with the primary market index for the region (S&P 500 in the U.S.) over the next 12 months.
Market Underweight (MU):	Expect the industry to underperform the primary market index for the region (S&P 500 in the U.S.) by at least 10% over the next 12 months.

Wolfe Research, LLC Distribution of Fundamental Stock Ratings (As of July 4, 2022):

Outperform:	53%	10% Investment Banking Clients within the previous 12 months
Peer Perform:	38%	9% Investment Banking Clients within the previous 12 months
Underperform:	8%	2% Investment Banking Clients within the previous 12 months

Wolfe Research, LLC does not assign ratings of Buy, Hold or Sell to the stocks it covers. Outperform, Peer Perform and Underperform are not the respective equivalents of Buy, Hold and Sell but represent relative weightings as defined above. To satisfy regulatory requirements, Outperform has been designated to correspond with Buy, Peer Perform has been designated to correspond with Hold and Underperform has been designated to correspond with Sell.

Midstream: EPD, DTM, ETRN, MPLX, WMB
Clean Energy: SEDG, CWEN

Utilities

NI – Q2 in-line, 2022 guide reaffirmed; tariff pause adds more confidence on revised project timelines; Analyst Day in Nov. 'focused on extending growth plan'
ETR – 2Q22 beats, points to upper half of 2022 guidance but LT EPS growth affirmed; sales strong; positive
EXC – Q2 miss but 2022 guidance affirmed; $500M equity issuance now planned by YE22; net negative
PNW – Q2 beats; 2022 guidance and 5-7% EPS CAGR reaffirmed; pretty uneventful
PPL – Q2 in line, 2022 guidance and 6-8% EPS growth affirmed; in line
SWX – Decides not to pursue company sale in strategic review; negative datapoint for gas LDC M&A
PNW/FTS – ACC primary – Kevin Thompson and Nick Myers appear to be on the Republican ticket
NRG – Bloomberg reports 1,300 MW Joliet plant in PJM to shut
CNP – Making it look easy
WEC – Continuing the quick start
PEG – Plusses and minuses

Midstream

EPD – Big Q2 beat in commodity-sensitive businesses; Growth inflection continues with several incremental project announcements
DTM – Q2 tops consensus, running ahead of plan for 2022; announces 2nd LEAP expansion; positive
ETRN – Beat, raise, Manchin praise
MPLX – Sticking with the structure
WMB – Gas potential tops AMT worries

Clean Energy

SEDG – Q2 fell off the edge of glory; Euro troubles
CWEN – Accelerating growth, reducing risk

Utilities

NI – Q2 in-line, 2022 guide reaffirmed; tariff pause adds more confidence on revised project timelines; Analyst Day in Nov. 'focused on extending growth plan'

- **Q2 in-line.** NI reported EPS of $0.12 which matched consensus (WRe $0.11)
- **2022 guidance reaffirmed.** Guidance range of $1.42-1.48 vs us/cons at $1.45
- **EPS growth targets reaffirmed.** 5-7% annual EPS growth through 2023, 7-9% CAGR through 2024 both of which are anchored off 2021A
- **Solar tariff pause adds more confidence/clarity on revised project timelines.** No changes to 6–18-month delay expectation for projects, mitigation plan to maintain growth commitments underway
- **Investor Day in November – 'focused on extending NiSource's growth plan'.**
- **Regulatory update.** NIPSCO gas settlement just approved ($72M rate increase, 9.85% ROE and 49.47% equity ratio); settlement discussions in OH and PA gas cases are ongoing

We expect a lot of questions on the call to be on the pending strategic review and upcoming Investor Day in November. From the release, it appears that most of the company's focus is on extending the growth outlook, which will include the next leg of generation investments (+ likely O&M optimization); a key question will be whether strategic actions are still on table. Commentary on the solar projects suggests more confidence in achieving the 7-9% CAGR through 2024 but it is unclear to what extent that project timelines may have moved forward, if at all, with the tariff pause in place.

ETR – 2Q22 beats, points to upper half of 2022 guidance but LT EPS growth affirmed; sales strong; positive

- **2Q22 strongly beats:** $1.78 vs consensus $1.40, WRe $1.32. The beat is largely driven by higher retail sales, including weather; YTD weather has contributed $0.32.
- **Points to top half of 2022 guidance; 2023-24 outlooks reaffirmed, as is ETR's target of 6-8% EPS growth off 2021 original guidance midpoint of $5.95:** Guidance vs consensus and WRe:
  - 2022: Top half of $6.15-6.45 vs $6.34 cons; $6.31 WRe
  - 2023: $6.55-6.85 vs $6.76; $6.73
  - 2024: $6.95-7.25 vs $7.21; $7.21
- **Remaining equity needs to be sourced through 2024 decline to $320M from $570M:** ETR sees $320M of remaining equity to be sourced through 2024, as the company completed some issuances through its ATM last quarter. ETR continues to target hitting its target of over 14% FFO/Debt by 2023. ETR's YTD22 avg shares outstanding was 204M; 2022 guidance assumes 207M avg shares outstanding; about $680M in forward equity sales through ETR's ATM have not yet settled.
- **Storm cost securitization:** ETR-LA filed to issue securitization bonds for the remaining storm costs of $2.6B; but $1B of that has already been approved in escrow this past May; Intervenor testimony due 9/16; a LaPSC decision expected in 4Q22.
- **2Q22 weather-adj sales +4.2%, with industrial remaining strong; FY22 growth now expected to be +2.9% v +2.0%**: For 2Q22, +4.2% total sales growth (Resi +0.2%, Comm +4.7%, Ind +6.6%). For FY22, ETR now sees about +2.9% sales growth vs +2.0% in April and +1.8% in Feb.

We view the results as positive and indicative of strong industrial sales growth, which supports ETR's outlook at the June analyst day. On the call, we expect questions around customer bill pressures, resiliency filings, and confidence on sales outlook. We anticipate questions on the SERI proceedings at FERC, particularly after the other regulators (AR, LA and NOLA) declined to join MS in settling.

EXC – Q2 miss but 2022 guidance affirmed; $500M equity issuance now planned by YE22; net negative

- **2Q22 miss**. $0.44 vs $0.48 consensus, $0.46 WRe. Included a -$0.03 vs 2Q21 for higher contracting costs partially due to timing maintenance and higher interest expense, and another -$0.01 for timing of taxes.
- **2022 guidance reaffirmed; 6-8% EPS growth rate through 2025 was unchanged.** EXC reaffirmed 2022 guidance at $2.18-2.32 vs $2.26 consensus vs $2.27 WRe.

- **Equity of $500M in 2022.** EXC is establishing a $1B ATM with the expectation of issuing $500M this year and the rest over 2023-25 period; EXC's LT outlook included $1B of equity through 2025.
- **TTM ROE below target range of 9-10% but expects to be within it by YE22**. Earned ROE through 2Q22 was 8.8% vs 8.9% through 1Q22. EXC pointed to timing of equity infusions and expects to be in 9-10% range by YE22.
- **FFO/Debt target still expected to average 13-14% in 2022-24; downgrade threshold 12%.** EXC is rated BBB/Baa2.

The results were a little negative. The Q2 miss could be from timing of maintenance costs and taxes. Although guidance was affirmed, the higher 30Y UST yield implied EXC could be doing better as ComEd's earnings directly benefits. However, the rates on EXC's ST debt has gone up faster and quicker, mitigating the benefit from the higher 30Y. The equity issuance is a little annoying, given it's $500M over five months. We anticipate questions on the equity announcement, the IL electric distribution multiyear rate case filing in Jan 2023, and the Inflation Reduction Act, particularly the impact from the corporate minimum tax.

<u>PNW – Q2 beats; 2022 guidance and 5-7% EPS CAGR reaffirmed; pretty uneventful</u>

- **Q2 beat.** PNW reported Q2 EPS of $1.45 – a beat vs consensus at $1.31 (WRe $1.20)
- **2022 guidance, 5-7% EPS CAGR both reaffirmed.** PNW still expects 2022 EPS range of $3.90-4.10 – vs us/cons $4.01
    - Drivers for 2022 guidance are unchanged; still expects W/A sales growth of 1.5-2.5%
- **Capex, financing plans both unchanged.** 2022-23E capex of 1.53B/yr., 2024E is $1.65B; no equity until after next rate case
- **2Q22 W/A sales growth of +3.2%.** Retail up 0.6%, C&I up 5.6%; total customer growth was 2.0%

The Q2 beat appears to be driven by weather, continued strong sales growth and a tax benefit. But PNW said results were in-line with expectations and the 2022 guide was reaffirmed. There were a couple slides added that talk to pension, but no sensitivities were provided to assess potential impacts to 2023; we will be looking for more here on the call. Otherwise the update looked pretty uneventful.

PPL – Q2 in line, 2022 guidance and 6-8% EPS growth affirmed; in line

- **2Q22 EPS in line**: $0.30 vs $0.29 consensus, $0.30 WRe.
- **2022 guidance affirmed**: $1.30-1.45 vs $1.42 consensus, $1.37 WRe. On pro forma basis, 2022 guidance is $1.40-1.55.
- **LT EPS growth reaffirmed**: 6-8% through 2025 off 2022 pro forma implies $1.69 in 2024 vs $1.72 consensus and $1.72 WRe.
- **O&M savings**: PPL began program to reduce O&M by $50-60M by 2023, $120-130M by 2024 and $150M by 2025.
- **2Q22 weather-adj sales growth**: PA saw +1.5% and KY +1.6%.
- **Coal/fleet transition opportunity**: PPL KY issued a RFP to replace older, coal-fired units in 2028; proposals due mid-Aug. PPL KY will make filings in 4Q22 or 1Q23. PPL projects coal capacity to fall from 4.7 GW to 3.7 GW by 2028 (2.7 by 2035, zero by 2050).

The results were in line. Not much new since PPL's June Investor Day. A little more color on O&M savings and fleet transition. We anticipate questions on the LT fleet transition opportunities in KY and grid mod in PA/RI.

SWX – Decides not to pursue company sale in strategic review; negative datapoint for gas LDC M&A

- This morning, SWX announced that it had determined the best path to maximize stockholder value is to conclude its strategic review process for the company

    - It will still pursue the process to sell its Centuri (infra) and MountainWest (pipeline) nonregulated subsidiaries
- Recall that Icahn has been heavily involved here – pushing for tender offers, Board/mgmt. turnover, and an outright sale

On the surface, this is a negative datapoint for gas LDC M&A which until now has been robust the last 12-18 months. However, some of this may be SWX states like AZ and NV that have been tougher regulatory environments and warmer weather states. This is also another case where activist-driven review processes have not led to a company sale like EVRG. Among our coverage, NI is the main read-through given Elliott's activist involvement and the focus on potential gas LDC sales as part of CEO Lloyd Yates' strategic review (see NI update above). Icahn is also involved in FE where further asset sales remain a potential and some investors have hoped for an eventual full sale.

<u>PNW/FTS – ACC primary – Kevin Thompson and Nick Myers appear to be on the Republican ticket</u>

- As of 8am ET, ~80% of the estimated vote had been counted in the primary race for the Arizona Corporation Commission (ACC)
    - Recall this is only to decide who appears on the Republican ticket as only two Democrats are running and qualify by default
- Kevin Thompson (320K votes) is in the lead, followed by Nick Myers (276K votes) and Kim Owens (245K votes)
- Mr. Thompson is currently serving his final term on the City Council in Mesa, AZ and previously was an employee at Southwest Gas
- Mr. Myers is currently a policy advisor to Commissioner Justin Olson
- Ms. Owens currently serves on the AZ Power Authority and previously spent time as a ratepayer advocate on the Salt River Project Council

While the vote count has yet to be finalized, it appears that the joint ticket of Thompson and Myers will represent Republicans in the fall election. A quick search on their websites suggests shared values for eliminating mandates and subsidies, keeping utility rates

low/fair and limiting the role that the Commission plays with respect to state policy decisions (i.e., just focus on setting just and reasonable rates). We continue to view the outcome of the ACC election in the fall as the most important event this year for PNW.

NRG – Bloomberg reports 1,300 MW Joliet plant in PJM to shut

- Bloomberg reports that NRG will close the 1,300 MW gas-fired Joliet plant in Illinois by June 2023 and had filed a deactivation request

The planned retirement of Joliet is new and incremental to the other PJM plants that NRG recently shut. After Joliet is retired, NRG would be down to just the Powerton coal plant in Illinois and various smaller peakers in the market. NRG already zeros out its PJM generation contribution from forward looking financial materials.

CNP – Making it look easy

Click here to view our complete note

Q2 beats and 2022 guide raised; growth targets re-based higher (again). CNP reported Q2 EPS of $0.31 which beat us/cons at $0.27. The beat was driven by $0.04 of favorable weather as well as a $0.02 tax benefit from the VUHI restructuring. 2022 guidance was raised to $1.37-1.39 from $1.36-1.38 on the back of strong customer growth and favorable weather. Given the tailwinds, CNP plans to pull forward some O&M in the 2H of 2022 to de-risk future years. CNP's annual EPS growth targets (8% through 2024 and the mid-to-high end of 6-8% thereafter through 2030) were reaffirmed off the new 2022 base, implying stronger earnings going forward.

WEC – Continuing the quick start

Click here to view our complete note

Q2 EPS beat and 2022 guidance raise. WEC reported Q2 EPS of $0.91 – above consensus/us and $0.82-0.84 guidance. This was

up from $0.87 last year, with rate relief and energy infrastructure PTCs the primary drivers. Weather-normal electric sales growth is tracking close to plan, while gas sales have been impressive. After being the only company to raise guidance in Q1, WEC did it again and pointed to the top-end of $4.36-4.40 (from $4.34-4.38). WEC sees 6-7% EPS growth long-term.

PEG – Plusses and minuses

Click here to view our complete note

Pension has been a massive overhang. PEG has lagged by over 10% since the Q1 call, as investors turned their focus to next year's pension headwind as we previously discussed in detail (link). At this point, we believe the risk is well-reflected and the issue should ultimately be addressed by 2025 via next year's rate case filing. Mgmt talked at a high-level to potential offsets today, but has generally done itself little favors to allay fears. PEG reaffirmed the 5-7% EPS CAGR over 2022-2025, but will not commit to hitting that range in the interim.

Midstream

EPD – Big Q2 beat in commodity-sensitive businesses; Growth inflection continues with several incremental project announcements

- **Q2 beat by more than expected on big NGL processing and marketing results.** 2Q22 EBITDA of $2,418M came in 5% above our estimate and 7% above consensus.
    - The beat was driven by a blowout quarter in NGL processing (better than expected results at Navitas and underlying margins), and in NGL marketing which was up $49M QoQ in contrast to typical seasonality. NGL pipeline, export, and frac margins were below our forecasts despite strong volumes.
    - Petchem margin came in modestly better than our forecast. Octane had a blowout quarter on wide spreads, although propylene came in softer than we expected.
    - Crude margin was in line, and Gas segment margin was a little light
- **Two more processing plants and Shin Oak NGL expansion.** EPD announced they will add a 300 mmcf/d Mentone III plant by 1Q24, a 300 mmcf/d Midland 7 (Navitas) plant by 1Q24, and will expand the Shin Oak Permian NGL pipeline by 275 mbd with looping by 1H24

  - This is incremental to announcements at the spring Analyst Day of the Midland 6 and Mentone II plants which are both expected online in 2023, so EPD is effectively adding a plant each year in each of the Midland and Delaware basins.
- **Capex ticking up a little.** Growth capex was raised by $100M to $1.6B for this year. 2023 growth spend is now $1.9B for approved projects (up to $2.0B) vs. the $1.0B - $1.5B as of the April Analyst Day.

The big Q2 beat was driven by surprisingly high processing margins at Navitas and the legacy assets even with declining headline frac spreads, very high Q2 NGL marketing results, and a blowout in octane given high gasoline prices. This was partially offset by some softness in propylene and in frac margins. EPD is clearly back to growth mode with another 2 processing plants being added in the Permian in 2024 and a total of 4 processing plants now under construction at one time, while the Shin Oak NGL expansion will be used to move these expected incremental volumes. On the call, we'll be looking for more color on the growth outlook as well as whether management is now considering regular quarterly distribution increases instead of an annual approach.

DTM – Q2 tops consensus, running ahead of plan for 2022; announces 2nd LEAP expansion; positive

- **DTM reported Q2 EBITDA of $205M vs. $191M last year, beating our $196M estimate and consensus.** Growth was due to the Stonewall expansion, increased utilization on LEAP and Blue Union, and a supplier settlement
- **Running ahead of plan.** DTM reiterated 2022 guidance of $770-$810M but noted that YTD performance has been ahead of plan. 2023 early outlook of $810M-$850M was also reiterated
- **LEAP Phase 2 expansion.** DTM announced a 400 mmcf/d expansion of LEAP to go into service Q1-24, bringing total expansions of the pipeline to 700 mmcf/d and total capacity of LEAP to 1.7 Bcf/d
  - Expansion initial phase also added 500 mmcf/d of gathering
  - Phase 3 expansion negotiations are ongoing; potential LEAP incremental capacity could go to 3 Bcf/d with looping and additional compression

Overall this was a good update as volumes appear robust and there should be another step up in 2H as some expansions fully ramp. The second expansion of LEAP was good to see and the discussion of a third phase of expansion is encouraging. We continue to see DTM as very well positioned in the Haynesville, where the call on gas will be increasing as the next LNG wave builds out.

ETRN – Beat, raise, Manchin praise

Click here to view our complete note

Solid update. ETRN posted 2Q22 EBITDA that beat consensus by 5%, and raised its 2022 guidance in line with consensus. The stock spiked 13% on the day mostly in response to last night's news that Senator Manchin has secured a path forward for MVP as part of a broader deal on infrastructure permitting reform. MVP completion would provide a big boost to ETRN stock, but this is not a done deal. That said, we like the risk/reward skew for ETRN stock from here. Outperform.

MPLX – Sticking with the structure

Click here to view our complete note

Sold quarter with volume bounce back. 2Q22 EBITDA came in 2% ahead of consensus. Volumes were nicely ahead of our forecast at L&S, as MPC's refineries ran at full utilization, and at G&P with bounce backs in the Utica and Southwest. FCF after distributions of $614M in Q2 was very high on good results as well as working capital benefits and small asset sales.

WMB – Gas potential tops AMT worries

Click here to view our complete note

Gas position continues to benefit. Williams put up another strong quarter and a 2022 guidance boost, highlighting its leverage to the current gas-focused environment. Despite this the stock underperformed the sector by about 250 bp, which may have been due to comments on the potential minimum tax and not a lot of commitment to a buyback. We remain Peer Perform on WMB but we believe remains a high-quality gas play that has positioned itself well for the current environment.

Clean Energy

SEDG – Q2 fell off the edge of glory; Euro troubles

Click here to view our complete note

Euro pressures. SEDG posted Q2 sales and a Q3 guide about in line with consensus, and talked to very strong demand with growing governmental support for solar. But gross margins came in light on Euro and Shanghai headwinds as SEDG continues to have more difficulty navigating supply chain disruptions. The stock had done well into the call on the heels of ENPH's strong print and the proposed Inflation Reduction Act, but the update missed the mark. We view SEDG as well-positioned to capitalize on the structural shift higher in L-T solar demand, particularly in Europe, C&I, and storage, at a growing discount. Outperform.

CWEN – Accelerating growth, reducing risk

Click here to view our complete note

2022 tracking well. Q2 CAFD of $176M was in the upper half of the sensitivity range and EBITDA came in slightly above our forecast. Renewable resource was good again with both wind and solar at 103% of normal YTD and the key Alta Wind asset above plan, although there was an extended thermal plant outage. On the call, mgmt. indicated the fleet held up well in Texas during the July price spikes. Overall, CWEN reiterated 2022 guidance with the year well on track.

MISO Approves Tranche 1 of Transmission Spend

Equities

What happened?

On 7/25, the Midwest ISO Board of Directors voted to approve Tranche 1 of its Long Range Transmission Planning portfolio of projects. These investments support system reliability and represent $10.3 billion of capital expenditure. A regulated electric utility with a brownfield project in their territory likely will receive the project for development. Otherwise the projects are competitively bid. While approval today was largely expected, we see this as supportive of long term growth earnings for Ameren, Xcel, Nisource and WEC.

What's the impact by company?

We estimate potential brownfield investment for Ameren could be $1.5 billion to $2.0 billion, for Xcel Energy $1.2 billion, and for NI and WEC in the $500-$600 million range. The plan estimates project completion in the 2028-2030 timeframe. Companies would earn on the MISO ROE of 10.02%. For AEE this could imply $0.07/share per year for 5 years totaling $0.35/share. We expect this would help the company to extend and deliver in the upper half of the 6% to 8% EPS guidance growth rate through 2026.

What's next?

We expect company management teams to address the impact of today's announcement on their upcoming second quarter earnings conference calls. Xcel reports on 7/28, while Ameren reports on 8/5. In cases where projects are assigned to the companies, each company will engage in a certificate of need process in the relevant states the projects pass through. RFPs for competitively bid projects should be issued by the end of the third quarter.

This report has been prepared by UBS Securities LLC. **ANALYST CERTIFICATION AND REQUIRED DISCLOSURES, INCLUDING INFORMATION ON THE QUANTITATIVE RESEARCH REVIEW PUBLISHED BY UBS, BEGIN ON PAGE 4.** UBS does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that the firm may have a conflict of interest that could affect the objectivity of this report. Investors should consider this report as only a single factor in making their investment decision.

Figure 1: MISO Tranche 1 Project List

Project Number	Project Name	Geographic Location by Member System	In-Service Date	Project Gross Plant $000s
1	Jamestown - Ellendale	MDU, OTP, Local TO(s)	12/31/2028	$438,700,000
2	Big Stone South - Alexandria - Cassie's Crossing	Local TO(s)	6/1/2030	$573,500,000
3	Iron Range - Benton County - Cassie's Crossing	Local TO(s)	6/1/2030	$969,900,000
4	Wilmarth - North Rochester - Tremval	ATC, DPC, XEL, Local TO(s)	6/1/2028	$689,100,000
5	Tremval - Eau Clair - Jump River	ATC, XEL	6/1/2028	$504,500,000
6	Tremval - Rocky Run - Columbia	ATC, XEL	6/1/2029	$1,049,500,000
7	Webster - Franklin - Marshalltown - Morgan Valley	Local TO(s)	12/31/2028	$755,000,000
8	Beverly - Sub 92	Local TO(s)	12/31/2028	$231,000,000

Valuation Method and Risk Statement

Our valuation methodology for the North American Utilities group is price to earnings based. The adjustments applied fall into 7 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%; 4) ESG: A potential 5% premium for a risk adjusted clean energy transition growth opportunity; 5) Earnings Consistency Adjustment: For companies that fall in the top quartile of % Time Beat/Meet, we include +4%; 6) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% of unregulated earnings), we perform a sum-of-the-parts analysis applying business/region appropriate valuations to those diversified businesses; 7) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: large project construction risk, legal risk, and announced M&A completion risk. We identify the following risk factors: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events. We identify the following risk factors for the sector overall: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 25 July 2022 11:54 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	57%	32%
Neutral	FSR is between -6% and 6% of the MRA.	35%	26%
Sell	FSR is > 6% below the MRA.	9%	21%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2. **Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. Where an analyst of UBS Europe SE, Italy Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Italy Branch. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, France Branch. Where an analyst of UBS Europe SE, France Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, France Branch. **Spain:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Spain Branch. Where an analyst of UBS Europe SE, Spain Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Spain Branch. **Sweden:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Sweden Branch. Where an analyst of UBS Europe SE, Sweden Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Sweden Branch. **South Africa:** Distributed by UBS South Africa (Pty) Limited (Registration No. 1995/011140/07), an authorised user of the JSE and an authorised Financial Services Provider (FSP 7328). **Saudi Arabia:** This document has been issued by UBS AG (and/or any of its subsidiaries, branches or affiliates), a public company limited by shares, incorporated in Switzerland with its registered offices at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH-8001 Zurich. This publication has been approved by UBS Saudi Arabia (a subsidiary of UBS AG), a Saudi closed joint stock company incorporated in the Kingdom of Saudi Arabia under commercial register number 1010257812 having its registered office at Tatweer Towers, P.O. Box 75724, Riyadh 11588, Kingdom of Saudi Arabia. UBS Saudi Arabia is authorized and regulated by the Capital Market Authority to conduct securities business under license number 08113-37. **UAE / Dubai:** The information distributed by UBS AG Dubai Branch is only intended for Professional Clients and/or Market Counterparties, as classified under the DFSA rulebook. No other person should act upon this material/communication. The information is not for further distribution within the United Arab Emirates. UBS AG Dubai Branch is regulated by the DFSA in the DIFC. UBS is not licensed to provide banking services in the UAE by the Central Bank of the UAE, nor is it licensed by the UAE Securities and Commodities Authority. **Israel:** This Material is distributed by UBS AG, London Branch. UBS Securities Israel Ltd is a licensed Investment Marketer that is supervised by the Israel Securities Authority (ISA). UBS AG, London Branch and its affiliates incorporated outside Israel are not licensed under the Israeli Advisory Law. UBS may engage among others in issuance of Financial Assets or in distribution of Financial Assets of other issuers for fees or other benefits. UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.[1] (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client's profile). [1]UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document **Singapore:** Distributed by UBS Securities Pte. Ltd. [MCI (P) 026/08/2021 and Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Where this report has been prepared by UBS Securities Japan Co., Ltd., UBS Securities Japan Co., Ltd. is the author, publisher and distributor of the report. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of

UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution.**Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have

received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved or endorsed by or registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Poland**: UBS is a premier global financial services firm offering wealth management services to individual, corporate and institutional investors. UBS is established in Switzerland and operates under Swiss law and in over 50 countries and from all major financial centres. UBS Switzerland AG is not licensed as a bank or as an investment firm under Polish legislation and is not permitted to provide banking and financial services in Poland. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering

material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Spain**: This publication is not intended to constitute a public offer under Spanish law. It is distributed only for information purposes to clients of UBS Europe SE, Sucursal en España, with place of business at Calle María de Molina 4, C.P. 28006, Madrid. UBS Europe SE, Sucursal en España is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Spanish supervisory authority (Banco de España), to which this publication has not been submitted for approval. Additionally it is authorized to provide investment services on securities and financial instruments, regarding which it is supervised by the Comisión Nacional del Mercado de Valores as well. UBS Europe SE, Sucursal en España is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This communication and any offering material, term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication were done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Turkey**: The information in this document is not provided for the purpose of offering, marketing or sale of any capital market instrument or service in the Republic of Turkey. Therefore, this document may not be considered as an offer made, or to be made, to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instrument/service may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 residents of the Republic of Turkey are allowed to purchase or sell the financial instruments traded in financial markets outside of the Republic of Turkey. Further to this, pursuant to article 9 of the Communiqué on Principles Regarding Investment Services, Activities and Ancillary Services No. III-37.1, investment services provided abroad to residents of the Republic of Turkey based on their own initiative are not restricted. **United Arab Emirates (UAE)**: UBS is not a financial institution licensed in the United Arab Emirates (UAE) by the Central Bank of the UAE nor by the Emirates' Securities and Commodities Authority and does not undertake banking activities in the UAE. UBS AG Dubai Branch is licensed by the DFSA in the DIFC. This document is provided for your information only and does not constitute financial advice. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made, and will not make, any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Any offer of the mentioned products shall not constitute an investment advice, public offer, circulation, transfer, safekeeping, holding or custody of securities in the territory of Ukraine. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer, a public offer or invitation to offer or to a public offer, or solicitation of securities in the territory of Ukraine or investment advice under Ukrainian law. Electronic communication must not be considered as an offer to enter into an electronic agreement or other electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015. This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed.**USA**:Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliários Ltda., UBS Asesores México, S.A. de C.V., UBS SuMi TRUST Wealth Management Co., Ltd., UBS Wealth Management Israel Ltd. and UBS Menkul Degerler AS are affiliates of UBS AG. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

What happened?

NI filed rate settlements in the Columbia Gas of Pennsylvania rate case and expects a final order and implementation of the rates in mid-December. The settlement calls for a $44 million annualized increase versus the company's $82 million initial request that was predicated on an 11.2% ROE and 54.4% equity ratio. The revenue settlement was unanimous and the rate design settlement was non-unanimous but includes the Bureau of Investigation of the PA PUC and the Office of Consumer Advocate. The settlement's revenue did not come with a derivation. However, for purposes of calculating the DSIC mechanism the ROE to be used is from the PA PUC's quarterly gas utility allowed ROE disclosures which is 10.15%. Link

How will investors respond?

Positively. Reaching a settlement is positive and avoids litigation. The company has settled cases in Pennsylvania before. We rate Pennsylvania a top quartile jurisdiction. US Utilities "Pricing Power Analysis and Regulatory Rankings". The outcome is consistent with NI's 7% to 9% EPS growth guidance.

Calendar

We expect an update on the company's announced strategic review at the Edison Electric conference or sooner and a final decision in the case is expected by December 17.

Valuation:

We maintain our $33 price target and Neutral rating.

Company Description

NI is a fully regulated gas and electric utility serving customers in six states in the Midwest and Mid-Atlantic. NI is a gas distribution utility with 3.2 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NI is an integrated electric utility serving 0.5 million customers in Indiana. NI's mix of operating earnings is 60% gas and 40% electric.

Valuation Method and Risk Statement

Our valuation methodology for the group is price-to-earnings based. The adjustments applied fall into 7 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%; 4) Clean Energy Growth: A potential 5% premium for a risk adjusted clean energy transition growth opportunity; 5) Earnings Consistency Adjustment: For companies that fall in the top quartile of % Time Beat/Meet, we include +4%; 6) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% of unregulated earnings), we perform a sum-of the-parts analysis applying business/region appropriate valuations to those diversified businesses; 7) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: large project construction risk, legal risk, and announced M&A completion risk.

We identify the following risk factors: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events. We identify the following risk factors for the sector overall: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

Our $33 price target is a 12% premium to the Regulated Utility average P/E or 19.9x our $1.66 EPS estimate in 2024. The valuation includes +5% for overall group undervaluation, +5% for second quartile regulation, (2)% for third quartile EPS growth, and 4% for earnings reliability.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 09 September 2022 05:35 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	57%	32%
Neutral	FSR is between -6% and 6% of the MRA.	35%	26%
Sell	FSR is > 6% below the MRA.	9%	21%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Gregg Orrill, Ross Fowler, CFA.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2. **Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. Where an analyst of UBS Europe SE, Italy Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Italy Branch. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, France Branch. Where an analyst of UBS Europe SE, France Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, France Branch. **Spain:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Spain Branch. Where an analyst of UBS Europe SE, Spain Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Spain Branch. **Sweden:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Sweden Branch. Where an analyst of UBS Europe SE, Sweden Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Sweden Branch. **South Africa:** Distributed by UBS South Africa (Pty) Limited (Registration No. 1995/011140/07), an authorised user of the JSE and an authorised Financial Services Provider (FSP 7328). **Saudi Arabia:** This document has been issued by UBS AG (and/or any of its subsidiaries, branches or affiliates), a public company limited by shares, incorporated in Switzerland with its registered offices at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH-8001 Zurich. This publication has been approved by UBS Saudi Arabia (a subsidiary of UBS AG), a Saudi closed joint stock company incorporated in the Kingdom of Saudi Arabia under commercial register number 1010257812 having its registered office at Tatweer Towers, P.O. Box 75724, Riyadh 11588, Kingdom of Saudi Arabia. UBS Saudi Arabia is authorized and regulated by the Capital Market Authority to conduct securities business under license number 08113-37. **UAE / Dubai:** The information distributed by UBS AG Dubai Branch is only intended for Professional Clients and/or Market Counterparties, as classified under the DFSA rulebook. No other person should act upon this material/communication. The information is not for further distribution within the United Arab Emirates. UBS AG Dubai Branch is regulated by the DFSA in the DIFC. UBS is not licensed to provide banking services in the UAE by the Central Bank of the UAE, nor is it licensed by the UAE Securities and Commodities Authority. **Israel:** This Material is distributed by UBS AG, London Branch. UBS Securities Israel Ltd is a licensed Investment Marketer that is supervised by the Israel Securities Authority (ISA). UBS AG, London Branch and its affiliates incorporated outside Israel are not licensed under the Israeli Advisory Law. UBS may engage among others in issuance of Financial Assets or in distribution of Financial Assets of other issuers for fees or other benefits. UBS AG, London Branch and its affiliates may prefer various Financial Assets to which they have or may have an Affiliation (as such term is defined under the Israeli Advisory Law). Nothing in this Material should be considered as investment advice under the Israeli Advisory Law. This Material is being issued only to and/or is directed only at persons who are Eligible Clients within the meaning of the Israeli Advisory Law, and this Material must not be furnished to, relied on or acted upon by any other persons. **United States:** Distributed to US persons by either UBS Securities LLC or by UBS Financial Services Inc., subsidiaries of UBS AG; or by a group, subsidiary or affiliate of UBS AG that is not registered as a US broker-dealer (a **'non-US affiliate'**) to major US institutional investors only. UBS Securities LLC or UBS Financial Services Inc. accepts responsibility for the content of a report prepared by another non-US affiliate when distributed to US persons by UBS Securities LLC or UBS Financial Services Inc. All transactions by a US person in the securities mentioned in this report must be effected through UBS Securities LLC or UBS Financial Services Inc., and not through a non-US affiliate. UBS Securities LLC is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule"), and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule. **Canada:** Distributed by UBS Securities Canada Inc., a registered investment dealer in Canada and a Member-Canadian Investor Protection Fund, or by another affiliate of UBS AG that is registered to conduct business in Canada or is otherwise exempt from registration. **Brazil:** Except as otherwise specified herein, this Material is prepared by UBS Brasil Corretora de Câmbio, Títulos e Valores Mobiliários S.A.[1] (UBS Brasil CCTVM) to persons who are eligible investors residing in Brazil, which are considered to be Professional Investors (Investidores Profissionais), as designated by the applicable regulation, mainly the CVM Resolution No. 30 from the 11th of May 2021 (determines the duty to verify the suitability of products, services and transactions with regards to the client's profile). [1]UBS CCTVM is a subsidiary of UBS BB Servicos de Assessoria Financeira e Participacoes S.A. ("UBS BB"). UBS BB is an association between UBS AG and Banco do Brasil (through its subsidiary BB – Banco de Investimentos S.A.), of which UBS AG is the majority owner and which provides investment banking services and coverage in Brazil, Argentina, Paraguay, Peru and Uruguay. **Hong Kong:** Distributed by UBS Securities Asia Limited. Please contact local licensed persons of UBS Securities Asia Limited in respect of any matters arising from, or in connection with, the analysis or document **Singapore:** Distributed by UBS Securities Pte. Ltd. [MCI (P) 026/08/2021 and Co. Reg. No.: 198500648C] or UBS AG, Singapore Branch. Please contact UBS Securities Pte. Ltd., an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110); or UBS AG, Singapore Branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or document. The recipients of this document represent and warrant that they are accredited and institutional investors as defined in the Securities and Futures Act (Cap. 289). **Japan:** Distributed by UBS Securities Japan Co., Ltd. to professional investors (except as otherwise permitted). Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of

UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution.**Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have

received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved or endorsed by or registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Poland**: UBS is a premier global financial services firm offering wealth management services to individual, corporate and institutional investors. UBS is established in Switzerland and operates under Swiss law and in over 50 countries and from all major financial centres. UBS Switzerland AG is not licensed as a bank or as an investment firm under Polish legislation and is not permitted to provide banking and financial services in Poland. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering

material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Spain**: This publication is not intended to constitute a public offer under Spanish law. It is distributed only for information purposes to clients of UBS Europe SE, Sucursal en España, with place of business at Calle María de Molina 4, C.P. 28006, Madrid. UBS Europe SE, Sucursal en España is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Spanish supervisory authority (Banco de España), to which this publication has not been submitted for approval. Additionally it is authorized to provide investment services on securities and financial instruments, regarding which it is supervised by the Comisión Nacional del Mercado de Valores as well. UBS Europe SE, Sucursal en España is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This communication and any offering material, term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication were done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Turkey**: The information in this document is not provided for the purpose of offering, marketing or sale of any capital market instrument or service in the Republic of Turkey. Therefore, this document may not be considered as an offer made, or to be made, to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instrument/service may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 residents of the Republic of Turkey are allowed to purchase or sell the financial instruments traded in financial markets outside of the Republic of Turkey. Further to this, pursuant to article 9 of the Communiqué on Principles Regarding Investment Services, Activities and Ancillary Services No. III-37.1, investment services provided abroad to residents of the Republic of Turkey based on their own initiative are not restricted. **United Arab Emirates (UAE)**: UBS is not a financial institution licensed in the United Arab Emirates (UAE) by the Central Bank of the UAE nor by the Emirates' Securities and Commodities Authority and does not undertake banking activities in the UAE. UBS AG Dubai Branch is licensed by the DFSA in the DIFC. This document is provided for your information only and does not constitute financial advice. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made, and will not make, any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Any offer of the mentioned products shall not constitute an investment advice, public offer, circulation, transfer, safekeeping, holding or custody of securities in the territory of Ukraine. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer, a public offer or invitation to offer or to a public offer, or solicitation of securities in the territory of Ukraine or investment advice under Ukrainian law. Electronic communication must not be considered as an offer to enter into an electronic agreement or other electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015. This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed.**USA**:Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. What Happened?

On Monday, NI filed a general rate case for its electric utility business at NIPSCO. The company is seeking a 19.1% revenue increase, phased in over two stages in Sept. '23 and March '24. The bulk of the increase is driven by ~$2.0bn of rate base increases since the company last filed in late 2018. About 40% of rate base additions are comprised of four renewable energy facilities for which NIPSCO has already received a CPCN. The company is seeking a 10.4% ROE and ~50% equity on rate base of $5.9bn. The last authorized ROE and equity ratio were 9.75%/47.9%. The preliminary schedule calls for intervenor testimony 1/20/23, settlement filing window 2/27/23, hearings the week of 3/13/23 and a final order expected by 7/16/23.

Takeaways:

The revenue increase requested is substantial at over 19%. However, a large portion of the ask went through the CPCN process so stakeholders have previewed some of this request already. NI is also seeking a new rider for variable non-labor O&M associated with coal fired generation. This will allow the company to flow back O&M savings directly to customers as coal plants are retired over the balance of the decade. NIPSCO also seeks a approval of certain deferral mechanisms for pension and OPEM costs. This case is an important driver for NI's earnings growth over the next few years as NIPSCO's electric operations account for a third of the company's overall rate base.

Strategic Review Update Expected in Early November

Nisource will likely host an analyst day event in early November where they will update investors on the outcome of its strategic review. We believe a key focus will be improving visibility for earnings growth post 2024 and whether management sees inorganic opportunities longer term that are accretive to their base plan. As a reminder, 2024 does present a higher than normal yoy of growth given the renwables projects going into service. Nisource could look to provide near term earnings guidance for the next several years while also providing a longer term growth target, similar to what many peers in the industry do. Current guidance calls for 7-9% CAGR through 2024 off of 2021.

Valuation:

NI trades at a 3% discount to the group avg of 18.0x on '24E EPS. Our price target of $33 assumes NI can trade up to a 10% premium, which reflects +5% for the group being undervalued, +5% for top quartile regulatory jurisdictions, +4% for EPS guidance reliability and -4% for fourth quartile EPS growth.

Company Description

NI is a fully regulated gas and electric utility serving customers in six states in the Midwest and Mid-Atlantic. NI is a gas distribution utility with 3.2 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NI is an integrated electric utility serving 0.5 million customers in Indiana. NI's mix of operating earnings is 60% gas and 40% electric.

Valuation Method and Risk Statement

Our valuation methodology for the group inclulding NI is price-to-earnings based. The adjustments applied fall into 7 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%; 4) Clean Energy Growth: A potential 5% premium for a risk adjusted clean energy transition growth opportunity; 5) Earnings consistency Adjustment: For companies that fall in the top quartile of % Time Beat/Meet, we include +4%; 6) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% of unregulated earnings), we perform a sum-of the-parts analysis applying business/region appropriate valuations to those diversified businesses; 7) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: large project construction risk, legal risk, and announced M&A completion risk.

We identify the following risk factors: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events. We identify the following risk factors for the sector overall: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 21 September 2022 08:51 PM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	57%	32%
Neutral	FSR is between -6% and 6% of the MRA.	35%	26%
Sell	FSR is > 6% below the MRA.	9%	21%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. The name of each affiliate and analyst employed by that affiliate contributing to this report, if any, follows.

UBS Securities LLC: Ross Fowler, CFA.

The Disclaimer relevant to Global Wealth Management clients follows the Global Disclaimer.

Global Disclaimer

This document has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

This Document is provided solely to recipients who are expressly authorized by UBS to receive it. If you are not so authorized you must immediately destroy the Document.

Global Research is provided to our clients through UBS Neo, and in certain instances, UBS.com and any other system or distribution method specifically identified in one or more communications distributed through UBS Neo or UBS.com (each a system) as an approved means for distributing Global Research. It may also be made available through third party vendors and distributed by UBS and/or third parties via e-mail or alternative electronic means.

All Global Research is available on UBS Neo. Please contact your UBS sales representative if you wish to discuss your access to UBS Neo. Where Global Research refers to "UBS Evidence Lab Inside" or has made use of data provided by UBS Evidence Lab and you would like to access that data please contact your UBS sales representative. UBS Evidence Lab data is available on UBS Neo. The level and types of services provided by Global Research and UBS Evidence Lab to a client may vary depending upon various factors such as a client's individual preferences as to the frequency and manner of receiving communications, a client's risk profile and investment focus and perspective (e.g., market wide, sector specific, long-term, short-term, etc.), the size and scope of the overall client relationship with UBS and legal and regulatory constraints.

When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of

UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

If you require detailed information on disclosures of interest or conflict of interest as required by Market Abuse Regulation please contact the mailbox MAR_disclosures_twopager@ubs.com. Please note that e-mail communication is unsecured.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution.**Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. UBS Europe SE, Denmark Branch, filial af UBS Europe SE is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Danish Financial Supervisory Authority (Finanstilsynet), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Egypt**: Securities or other investment products are not being offered or sold by UBS to the public in Egypt and they have not been and will not be registered with the Egyptian Financial Regulatory Authority (FRA). **France**: This publication is not intended to constitute a public offer under French law, it does not constitute a personal recommendation as it is distributed only for information purposes to clients of UBS (France) S.A., French "société anonyme" with share capital of € 132.975.556, at 69 boulevard Haussmann F-75008 Paris, registered with the "Registre du Commerce et des Sociétés" of Paris under N° B 421 255 670. UBS (France) S.A. is a provider of investment services duly authorized according to the terms of the "Code monétaire et financier", regulated by French banking and financial authorities as the "Autorité de contrôle prudentiel et de résolution" and "Autorité des marchés financiers", to which this publication has not been submitted for approval. **Germany**: This publication is not intended to constitute a public offer under German law. It is distributed only for information purposes to clients of UBS Europe SE, Germany, with place of business at Bockenheimer Landstrasse 2-4, 60306 Frankfurt am Main. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the European Central Bank ("ECB"), and supervised by the ECB, the German Central Bank (Deutsche Bundesbank) and the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), to which this publication has not been submitted for approval. **Hong Kong SAR**: This publication is distributed to clients of UBS AG Hong Kong Branch by UBS AG Hong Kong Branch, a licensed bank under the Hong Kong Banking Ordinance and a registered institution under the Securities and Futures Ordinance. UBS AG Hong Kong Branch is incorporated in Switzerland with limited liability. **India**: Distributed by UBS Securities India Private Ltd. (Corporate Identity Number U67120MH1996PTC097299) 2/F, 2 North Avenue, Maker Maxity, Bandra Kurla Complex, Bandra (East), Mumbai (India) 400051. Phone: +912261556000. It provides brokerage services bearing SEBI Registration Number INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have

received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved or endorsed by or registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Poland**: UBS is a premier global financial services firm offering wealth management services to individual, corporate and institutional investors. UBS is established in Switzerland and operates under Swiss law and in over 50 countries and from all major financial centres. UBS Switzerland AG is not licensed as a bank or as an investment firm under Polish legislation and is not permitted to provide banking and financial services in Poland. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering

material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Spain**: This publication is not intended to constitute a public offer under Spanish law. It is distributed only for information purposes to clients of UBS Europe SE, Sucursal en España, with place of business at Calle María de Molina 4, C.P. 28006, Madrid. UBS Europe SE, Sucursal en España is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Spanish supervisory authority (Banco de España), to which this publication has not been submitted for approval. Additionally it is authorized to provide investment services on securities and financial instruments, regarding which it is supervised by the Comisión Nacional del Mercado de Valores as well. UBS Europe SE, Sucursal en España is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Sweden**: This publication is not intended to constitute a public offer under Swedish law. It is distributed only for information purposes to clients of UBS Europe SE, Sweden Bankfilial, with place of business at Regeringsgatan 38, 11153 Stockholm, Sweden, registered with the Swedish Companies Registration Office under Reg. No 516406-1011. UBS Europe SE, Sweden Bankfilial is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Swedish supervisory authority (Finansinspektionen), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Taiwan**: This material is provided by UBS AG, Taipei Branch in accordance with laws of Taiwan, in agreement with or at the request of clients/prospects. **Thailand**: This communication and any offering material, term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication were done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved, endorsed, registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or derivatives products). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or derivatives products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Turkey**: The information in this document is not provided for the purpose of offering, marketing or sale of any capital market instrument or service in the Republic of Turkey. Therefore, this document may not be considered as an offer made, or to be made, to residents of the Republic of Turkey in the Republic of Turkey. UBS Switzerland AG is not licensed by the Turkish Capital Market Board (the CMB) under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instrument/service may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the CMB. However, according to article 15 (d) (ii) of the Decree No. 32 residents of the Republic of Turkey are allowed to purchase or sell the financial instruments traded in financial markets outside of the Republic of Turkey. Further to this, pursuant to article 9 of the Communiqué on Principles Regarding Investment Services, Activities and Ancillary Services No. III-37.1, investment services provided abroad to residents of the Republic of Turkey based on their own initiative are not restricted. **United Arab Emirates (UAE)**: UBS is not a financial institution licensed in the United Arab Emirates (UAE) by the Central Bank of the UAE nor by the Emirates' Securities and Commodities Authority and does not undertake banking activities in the UAE. UBS AG Dubai Branch is licensed by the DFSA in the DIFC. This document is provided for your information only and does not constitute financial advice. **United Kingdom**: This document is issued by UBS Wealth Management, a division of UBS AG which is authorised and regulated by the Financial Market Supervisory Authority in Switzerland. In the United Kingdom, UBS AG is authorised by the Prudential Regulation Authority and is subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. Details about the extent of regulation by the Prudential Regulation Authority are available from us on request. A member of the London Stock Exchange. This publication is distributed to retail clients of UBS Wealth Management. **Ukraine**: UBS is not registered and licensed as a bank/financial institution under Ukrainian legislation and does not provide banking and other financial services in Ukraine. UBS has not made, and will not make, any offer of the mentioned products to the public in Ukraine. No action has been taken to authorize an offer of the mentioned products to the public in Ukraine and the distribution of this document shall not constitute financial services for the purposes of the Law of Ukraine "On Financial Services and State Regulation of Financial Services Markets" dated 12 July 2001. Any offer of the mentioned products shall not constitute an investment advice, public offer, circulation, transfer, safekeeping, holding or custody of securities in the territory of Ukraine. Accordingly, nothing in this document or any other document, information or communication related to the mentioned products shall be interpreted as containing an offer, a public offer or invitation to offer or to a public offer, or solicitation of securities in the territory of Ukraine or investment advice under Ukrainian law. Electronic communication must not be considered as an offer to enter into an electronic agreement or other electronic instrument within the meaning of the Law of Ukraine "On Electronic Commerce" dated 3 September 2015. This document is strictly for private use by its holder and may not be passed on to third parties or otherwise publicly distributed.**USA**:Distributed to US persons by UBS Financial Services Inc. or UBS Securities LLC, subsidiaries of UBS AG. UBS Switzerland AG, UBS Europe SE, UBS Bank, S.A., UBS Brasil Administradora de Valores Mobiliários Ltda., UBS Asesores México, S.A. de C.V., UBS SuMi TRUST Wealth Management Co., Ltd., UBS Wealth Management Israel Ltd. and UBS Menkul Degerler AS are affiliates of UBS AG. **UBS Financial Services Inc. accepts responsibility for the content of a report prepared by a non-US affiliate when it distributes reports to US persons. All transactions by a US person in the securities mentioned in this report should be effected through a US-registered broker dealer affiliated with UBS, and not through a non-US affiliate. The contents of this report have not been and will not be approved by any securities or investment authority in the United States or elsewhere. UBS Financial Services Inc. is not acting as a municipal advisor to any municipal entity or obligated person within the meaning of Section 15B of the Securities Exchange Act (the "Municipal Advisor Rule") and the opinions or views contained herein are not intended to be, and do not constitute, advice within the meaning of the Municipal Advisor Rule.**

NiSource Inc.

In-Line. 2Q'22 Adj. EPS $0.12 v. $0.12 Consensus

Q: How did the results compare vs expectations?

A: In-Line. 2Q'22 Adj. EPS of $0.12 v. $0.12 cons., $0.09 UBSe, and $0.13 in 2Q'21.

Q: What were the most noteworthy areas in the results?

A: Drivers of the results were higher customer revenues partially offset by higher costs of energy, O&M, and D&A, and higher share count.

Q: Has the company's outlook/guidance changed?

A: Reiterated guidance of $1.42 - $1.48 and 5%-7% eps growth in 2023 from 2022 and 7%-9% thru 2024 from a 2021 base year. Management also indicated a continued expectation of $2.4-$2.7Bln in 2022, and an expectation of $10Bln of capex and 10%-12% rate base growth from '21-24. Schahfer retirement is projected at the end of '25 with Michigan City between '26-'28. Scope 1 emissions reduction goal of 90% by '20 and 50% CH4 reduction by '25. Crossroads and Dunns Bridge Solar I are advancing to in-service in 1H'23. On rate cases, NIPSCO electric settlement has been approved, OH gas case hearings pushed to Oct to facilitate settlement discussions, PA gas engaging in settlement discussions, VA gas is progressing, and MD gas was filed on May 13.

Q: How would we expect investors to react?

A: Neutral on the In-Line. Waiting for the call for color on the Columbia Gas rate cases in MD, OH, PA, and VA, and the settlement in the NIPSCO natural gas case in IN. Investors will also be looking for an update and color on the Schahfer and Michigan City retirement timeline and solar projects and how that might impact capex timing and the electric rate case in IN. Further, investors will be looking for color on the progress and path of the ongoing strategic review, and any further color around an analyst day, now planned for November, and focused on extending the growth plan.

Company Description

NI is a fully regulated gas and electric utility serving customers in six states in the Midwest and Mid-Atlantic. NI is a gas distribution utility with 3.2 million customers in Indiana, Kentucky, Maryland, Ohio, Pennsylvania, and Virginia. NI is an integrated electric utility serving 0.5 million customers in Indiana. NI's mix of operating earnings is 60% gas and 40% electric.

Valuation Method and Risk Statement

Our valuation methodology for the group is price-to-earnings based. The adjustments applied fall into 7 categories. These are as follows: 1) Group Valuation Bias: Flowing from our valuation work comparing Baa corporate yields to group dividend yields and RU price to earnings ratios to those for the S&P 500, we incorporate a positive or negative adjustment to our group multiple representing the gap we calculate to the nearest 5%; 2) Growth Adjustment: We adjust our valuations based on the growth quartile each utility occupies. First quartile receives a 4% premium, second quartile a 2% premium, third quartile a 2% discount and fourth quartile a 4% discount; 3) Regulatory Adjustment: Our valuation adjustments for regulation are based on our proprietary Regulatory Rankings. First quartile jurisdictions receive 10%, second quartile 5%, third quartile -5% and fourth quartile -10%; 4) ESG: A potential 5% premium for a risk adjusted clean energy transition growth opportunity; 5) Earnings Consistency Adjustment: For companies that fall in the top quartile of % Time Beat/ Meet, we include +4%; 6) Multi Utility Diversified Valuation: For multi utilities (those with more than 15% of unregulated earnings), we perform a sum-of the-parts analysis applying business/region appropriate valuations to those diversified businesses; 7) One-off Adjustments: In special situations, we value risk on an issue-specific basis. Common areas where we apply such an adjustment include: large project construction risk, legal risk, and announced M&A completion risk.

We identify the following risk factors: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events. We identify the following risk factors for the sector overall: rising interest rates; regulatory and policy risks; operational risks; construction risks; cybersecurity risk to the transmission grid and/or customer data, and extreme weather events.

Our $31 price target is a 12% premium to the Regulated Utility average P/E of 17.3x our $1.66 EPS estimate in 2024. The valuation includes +5% for overall group undervaluation, +5% for second quartile regulation, (2)% for third quartile EPS growth, and 4% for earnings reliability.

Company-specific risks include gas prices, methane leaks, coal effluent rules.

Required Disclosures

This report has been prepared by UBS Securities LLC, an affiliate of UBS AG. UBS AG, its subsidiaries, branches and affiliates are referred to herein as UBS.

For information on the ways in which UBS manages conflicts and maintains independence of its research product; historical performance information; certain additional disclosures concerning UBS research recommendations; and terms and conditions for certain third party data used in research report, please visit https://www.ubs.com/disclosures. The figures contained in performance charts refer to the past; past performance is not a reliable indicator of future results. Additional information will be made available upon request. UBS Securities Co. Limited is licensed to conduct securities investment consultancy businesses by the China Securities Regulatory Commission. UBS acts or may act as principal in the debt securities (or in related derivatives) that may be the subject of this report. This recommendation was finalized on: 03 August 2022 11:24 AM GMT. UBS has designated certain Research department members as Derivatives Research Analysts where those department members publish research principally on the analysis of the price or market for a derivative, and provide information reasonably sufficient upon which to base a decision to enter into a derivatives transaction. Where Derivatives Research Analysts co-author research reports with Equity Research Analysts or Economists, the Derivatives Research Analyst is responsible for the derivatives investment views, forecasts, and/or recommendations. **Quantitative Research Review:** UBS publishes a quantitative assessment of its analysts' responses to certain questions about the likelihood of an occurrence of a number of short term factors in a product known as the 'Quantitative Research Review'. Views contained in this assessment on a particular stock reflect only the views on those short term factors which are a different timeframe to the 12-month timeframe reflected in any equity rating set out in this note. For the latest responses, please see the Quantitative Research Review Addendum at the back of this report, where applicable. For previous responses please make reference to (i) previous UBS research reports; and (ii) where no applicable research report was published that month, the Quantitative Research Review which can be found at https://neo.ubs.com/quantitative, or contact your UBS sales representative for access to the report or the Quantitative Research Team on qa@ubs.com. A consolidated report which contains all responses is also available and again you should contact your UBS sales representative for details and pricing or the Quantitative Research team on the email above.

Analyst Certification:
Each research analyst primarily responsible for the content of this research report, in whole or in part, certifies that with respect to each security or issuer that the analyst covered in this report: (1) all of the views expressed accurately reflect his or her personal views about those securities or issuers and were prepared in an independent manner, including with respect to UBS, and (2) no part of his or her compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in the research report.

UBS Investment Research: Global Equity Rating Definitions

12-Month Rating	Definition	Coverage[1]	IB Services[2]
Buy	FSR is > 6% above the MRA.	57%	32%
Neutral	FSR is between -6% and 6% of the MRA.	35%	26%
Sell	FSR is > 6% below the MRA.	9%	21%
Short-Term Rating	**Definition**	**Coverage[3]**	**IB Services[4]**
Buy	Stock price expected to rise within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%
Sell	Stock price expected to fall within three months from the time the rating was assigned because of a specific catalyst or event.	<1%	<1%

Source: UBS. Rating allocations are as of 30 June 2022.
1:Percentage of companies under coverage globally within the 12-month rating category.
2:Percentage of companies within the 12-month rating category for which investment banking (IB) services were provided within the past 12 months.
3:Percentage of companies under coverage globally within the Short-Term rating category.
4:Percentage of companies within the Short-Term rating category for which investment banking (IB) services were provided within the past 12 months.

KEY DEFINITIONS: Forecast Stock Return (FSR) is defined as expected percentage price appreciation plus gross dividend yield over the next 12 months. In some cases, this yield may be based on accrued dividends. **Market Return Assumption (MRA)** is defined as the one-year local market interest rate plus 5% (a proxy for, and not a forecast of, the equity risk premium). **Under Review (UR)** Stocks may be flagged as UR by the analyst, indicating that the stock's price target and/or rating are subject to possible change in the near term, usually in response to an event that may affect the investment case or valuation. **Short-Term Ratings** reflect the expected near-term (up to three months) performance of the stock and do not reflect any change in the fundamental view or investment case. **Equity Price Targets** have an investment horizon of 12 months.

EXCEPTIONS AND SPECIAL CASES: UK and European Investment Fund ratings and definitions are: Buy: Positive on factors such as structure, management, performance record, discount; **Neutral:** Neutral on factors such as structure, management, performance record, discount; **Sell:** Negative on factors such as structure, management, performance record, discount. **Core Banding Exceptions (CBE):** Exceptions to the standard +/-6% bands may be granted by the Investment Review Committee (IRC). Factors considered by the IRC include the stock's volatility and the credit spread of the respective company's debt. As a result, stocks deemed to be very high or low risk may be subject to higher or lower bands as they relate to the rating. When such exceptions apply, they will be identified in the Company Disclosures table in the relevant research piece.

Research analysts contributing to this report who are employed by any non-US affiliate of UBS Securities LLC are not registered/ qualified as research analysts with FINRA. Such analysts may not be associated persons of UBS Securities LLC and therefore are not subject to the FINRA restrictions on communications with a subject company, public appearances, and trading securities held by a research analyst account. When you receive Global Research through a system, your access and/or use of such Global Research is subject to this Global Research Disclaimer and to the UBS Neo Platform Use Agreement (the "Neo Terms") together with any other relevant terms of use governing the applicable System.

When you receive Global Research via a third party vendor, e-mail or other electronic means, you agree that use shall be subject to this Global Research Disclaimer, the Neo Terms and where applicable the UBS Investment Bank terms of business (https://www.ubs.com/global/en/investment-bank/regulatory.html) and to UBS's Terms of Use/Disclaimer (http://www.ubs.com/global/en/legalinfo2/disclaimer.html). In addition, you consent to UBS processing your personal data and using cookies in accordance with our Privacy Statement (http://www.ubs.com/global/en/legalinfo2/privacy.html) and cookie notice (http://www.ubs.com/global/en/homepage/cookies/cookie-management.html).

If you receive Global Research, whether through a System or by any other means, you agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research provided via Global Research or otherwise, and that you shall not extract data from any research or estimates provided to you via Global Research or otherwise, without the prior written consent of UBS.

In certain circumstances (including for example, if you are an academic or a member of the media) you may receive Global Research otherwise than in the capacity of a client of UBS and you understand and agree that (i) the Global Research is provided to you for information purposes only; (ii) for the purposes of receiving it you are not intended to be and will not be treated as a "client" of UBS for any legal or regulatory purpose; (iii) the Global Research must not be relied on or acted upon for any purpose; and (iv) such content is subject to the relevant disclaimers that follow.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is a general communication and is educational in nature; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. The recipient should carefully read this document in its entirety and not draw inferences or conclusions from the rating alone. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, structured derivative products and futures (including OTC derivatives) are not suitable for all investors. Trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "The Characteristics and Risks of Standardized Options." You may read the document at http://www.theocc.com/publications/risks/riskchap1.jsp or ask your salesperson for a copy. Various theoretical explanations of the risks associated with these instruments have been published. Supporting documentation for any claims, comparisons, recommendations, statistics or other technical data will be supplied upon request. Past performance is not necessarily indicative of future results. Transaction costs may be significant in option strategies calling for multiple purchases and sales of options, such as spreads and straddles. Because of the importance of tax considerations to many options transactions, the investor considering options should consult with his/her tax advisor as to how taxes affect the outcome of contemplated options transactions.

Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the Information.

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes:

(i) valuation or accounting purposes;

(ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or

(iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of UBS Research Management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. All material information in relation to published research reports, such as valuation methodology, risk statements, underlying assumptions (including sensitivity analysis of those assumptions), ratings history etc. as required by the Market Abuse Regulation, can be found on UBS Neo. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas

within UBS into other areas, units, groups or affiliates of UBS. The compensation of the analyst who prepared this document is determined exclusively by research management and senior management (not including investment banking). Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms under English law or, if not carried out by UBS in the UK the law of the relevant jurisdiction in which UBS determines it carries out the activity) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Within the past 12 months UBS AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

United Kingdom: This material is distributed by UBS AG, London Branch to persons who are eligible counterparties or professional clients. UBS AG, London Branch is authorised by the Prudential Regulation Authority and subject to regulation by the Financial Conduct Authority and limited regulation by the Prudential Regulation Authority. **Europe:** Except as otherwise specified herein, these materials are distributed by UBS Europe SE, a subsidiary of UBS AG, to persons who are eligible counterparties or professional clients (as detailed in the Bundesanstalt fur Finanzdienstleistungsaufsicht (BaFin) Rules and according to MIFID) and are only available to such persons. The information does not apply to, and should not be relied upon by, retail clients. UBS Europe SE is authorised by the European Central Bank (ECB) and regulated by the BaFin and the ECB. **Germany:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Luxembourg, the Netherlands, Belgium and Ireland:** Where an analyst of UBS Europe SE has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE. In all cases it is distributed by UBS Europe SE and UBS AG, London Branch. **Turkey:** Distributed by UBS AG, London Branch. No information in this document is provided for the purpose of offering, marketing and sale by any means of any capital market instruments and services in the Republic of Turkey. Therefore, this document may not be considered as an offer made or to be made to residents of the Republic of Turkey. UBS AG, London Branch is not licensed by the Turkish Capital Market Board under the provisions of the Capital Market Law (Law No. 6362). Accordingly, neither this document nor any other offering material related to the instruments/services may be utilized in connection with providing any capital market services to persons within the Republic of Turkey without the prior approval of the Capital Market Board. However, according to article 15 (d) (ii) of the Decree No. 32, there is no restriction on the purchase or sale of the securities abroad by residents of the Republic of Turkey. **Poland:** Distributed by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce regulated by the Polish Financial Supervision Authority. Where an analyst of UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE (spolka z ograniczona odpowiedzialnoscia) Oddzial w Polsce. **Russia:** Prepared and distributed by UBS Bank (OOO). Should not be construed as an individual Investment Recommendation for the purpose of the Russian Law - Federal Law #39-FZ ON THE SECURITIES MARKET Articles 6.1-6.2. **Switzerland:** Distributed by UBS AG to persons who are institutional investors only. UBS AG is regulated by the Swiss Financial Market Supervisory Authority (FINMA). **Italy:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, Italy Branch. Where an analyst of UBS Europe SE, Italy Branch has contributed to this document, the document is also deemed to have been prepared by UBS Europe SE, Italy Branch. **France:** Prepared by UBS Europe SE and distributed by UBS Europe SE and UBS Europe SE, France Branch. Global Wealth Management Disclaimer

You receive this document in your capacity as a client of UBS Global Wealth Management. This publication has been distributed to you by UBS Switzerland AG (regulated by FINMA in Switzerland) or its affiliates (**"UBS"**) with whom you have a banking relationship with. The full name of the distributing affiliate and its competent authority can be found in the country-specific disclaimer at the end of this document.

The date and time of the first dissemination of this publication is the same as the date and time of its publication.

Risk information:

You agree that you shall not copy, revise, amend, create a derivative work, provide to any third party, or in any way commercially exploit any UBS research, and that you shall not extract data from any research or estimates, without the prior written consent of UBS.

This document is for distribution only as may be permitted by law. It is not directed to, or intended for distribution to or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or other jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation or would subject UBS to any registration or licensing requirement within such jurisdiction.

This document is for your information only; it is not an advertisement nor is it a solicitation or an offer to buy or sell any financial instruments or to participate in any particular trading strategy. Nothing in this document constitutes a representation that any investment strategy or recommendation is suitable or appropriate to an investor's individual circumstances or otherwise constitutes a personal recommendation. By providing this document, none of UBS or its representatives has any responsibility or authority to provide or have provided investment advice in a fiduciary capacity or otherwise. Investments involve risks, and investors should exercise prudence and their own judgment in making their investment decisions. None of UBS or its representatives is suggesting that the recipient or any other person take a specific course of action or any action at all. By receiving this document, the recipient acknowledges and agrees with the intended purpose described above and further disclaims any expectation or belief that the information constitutes investment advice to the recipient or otherwise purports to meet the investment objectives of the recipient. The financial instruments described in the document may not be eligible for sale in all jurisdictions or to certain categories of investors.

Options, derivative products and futures are not suitable for all investors, and trading in these instruments is considered risky. Mortgage and asset-backed securities may involve a high degree of risk and may be highly volatile in response to fluctuations in interest rates or other market conditions. Foreign currency rates of exchange may adversely affect the value, price or income of any security or related instrument referred to in the document. For investment advice, trade execution or other enquiries, clients should contact their local sales representative.

The value of any investment or income may go down as well as up, and investors may not get back the full (or any) amount invested. Past performance is not necessarily a guide to future performance. Neither UBS nor any of its directors, employees or agents accepts any liability for any loss (including investment loss) or damage arising out of the use of all or any of the information (as defined below).

Prior to making any investment or financial decisions, any recipient of this document or the information should take steps to understand the risk and return of the investment and seek individualized advice from his or her personal financial, legal, tax and other professional advisors that takes into account all the particular facts and circumstances of his or her investment objectives.

Any prices stated in this document are for information purposes only and do not represent valuations for individual securities or other financial instruments. There is no representation that any transaction can or could have been effected at those prices, and any prices do not necessarily reflect UBS's internal books and records or theoretical model-based valuations and may be based on certain assumptions. Different assumptions by UBS or any other source may yield substantially different results.

No representation or warranty, either expressed or implied, is provided in relation to the accuracy, completeness or reliability of the information contained in any materials to which this document relates (the "Information"), except with respect to Information concerning UBS. The Information is not intended to be a complete statement or summary of the securities, markets or developments referred to in the document. UBS does not undertake to update or keep current the Information. Any opinions expressed in this document may change without notice and may differ or be contrary to opinions expressed by other business areas or groups, personnel or other representative of UBS. Any statements contained in this report attributed to a third party represent UBS's interpretation of the data, information and/or opinions provided by that third party either publicly or through a subscription service, and such use and interpretation have not been reviewed by the third party. In no circumstances may this document or any of the Information (including any forecast, value, index or other calculated amount ("Values")) be used for any of the following purposes: (i) valuation or accounting purposes; (ii) to determine the amounts due or payable, the price or the value of any financial instrument or financial contract; or (iii) to measure the performance of any financial instrument including, without limitation, for the purpose of tracking the return or performance of any Value or of defining the asset allocation of portfolio or of computing performance fees.

By receiving this document and the Information you will be deemed to represent and warrant to UBS that you will not use this document or any of the Information for any of the above purposes or otherwise rely upon this document or any of the Information.

UBS has policies and procedures, which include, without limitation, independence policies and permanent information barriers, that are intended, and upon which UBS relies, to manage potential conflicts of interest and control the flow of information within divisions of UBS (including between Global Wealth Management and UBS Global Research) and among its subsidiaries, branches and affiliates. For further information on the ways in which UBS manages conflicts and maintains independence of its research products, historical performance information and certain additional disclosures concerning UBS research recommendations, please visit https://www.ubs.com/disclosures.

Research will initiate, update and cease coverage solely at the discretion of research management, which will also have sole discretion on the timing and frequency of any published research product. The analysis contained in this document is based on numerous assumptions. Different assumptions could result in materially different results.

The analyst(s) responsible for the preparation of this document may interact with trading desk personnel, sales personnel and other parties for the purpose of gathering, applying and interpreting market information. UBS relies on information barriers to control the flow of information contained in one or more areas within UBS into other areas, units, groups or affiliates of UBS. Analyst compensation is not based on investment banking revenues; however, compensation may relate to the revenues of

UBS and/or its divisions as a whole, of which investment banking, sales and trading are a part, and UBS's subsidiaries, branches and affiliates as a whole.

For financial instruments admitted to trading on an EU regulated market: UBS AG, its affiliates or subsidiaries (excluding UBS Securities LLC) acts as a market maker or liquidity provider (in accordance with the interpretation of these terms in the UK) in the financial instruments of the issuer save that where the activity of liquidity provider is carried out in accordance with the definition given to it by the laws and regulations of any other EU jurisdictions, such information is separately disclosed in this document. For financial instruments admitted to trading on a non-EU regulated market: UBS may act as a market maker save that where this activity is carried out in the US in accordance with the definition given to it by the relevant laws and regulations, such activity will be specifically disclosed in this document. UBS may have issued a warrant the value of which is based on one or more of the financial instruments referred to in the document. UBS and its affiliates and employees may have long or short positions, trade as principal and buy and sell in instruments or derivatives identified herein; such transactions or positions may be inconsistent with the opinions expressed in this document.

Options and futures are not suitable for all investors, and trading in these instruments is considered risky and may be appropriate only for sophisticated investors. Prior to buying or selling an option, and for the complete risks relating to options, you must receive a copy of "Characteristics and Risks of Standardized Options". You may read the document at https://www.theocc.com/about/publications/character-risks.jsp or ask your financial advisor for a copy.

Investing in structured investments involves significant risks. For a detailed discussion of the risks involved in investing in any particular structured investment, you must read the relevant offering materials for that investment. Structured investments are unsecured obligations of a particular issuer with returns linked to the performance of an underlying asset. Depending on the terms of the investment, investors could lose all or a substantial portion of their investment based on the performance of the underlying asset. Investors could also lose their entire investment if the issuer becomes insolvent. UBS Financial Services Inc. does not guarantee in any way the obligations or the financial condition of any issuer or the accuracy of any financial information provided by any issuer. Structured investments are not traditional investments and investing in a structured investment is not equivalent to investing directly in the underlying asset. Structured investments may have limited or no liquidity, and investors should be prepared to hold their investment to maturity. The return of structured investments may be limited by a maximum gain, participation rate or other feature. Structured investments may include call features and, if a structured investment is called early, investors would not earn any further return and may not be able to reinvest in similar investments with similar terms. Structured investments include costs and fees which are generally embedded in the price of the investment. The tax treatment of a structured investment may be complex and may differ from a direct investment in the underlying asset. UBS Financial Services Inc. and its employees do not provide tax advice. Investors should consult their own tax advisor about their own tax situation before investing in any securities.

Important Information About Sustainable Investing Strategies: Sustainable investing strategies aim to consider and incorporate environmental, social and governance (ESG) factors into investment process and portfolio construction. Strategies across geographies and styles approach ESG analysis and incorporate the findings in a variety of ways. Incorporating ESG factors or Sustainable Investing considerations may inhibit the portfolio manager's ability to participate in certain investment opportunities that otherwise would be consistent with its investment objective and other principal investment strategies. The returns on a portfolio consisting primarily of sustainable investments may be lower or higher than portfolios where ESG factors, exclusions, or other sustainability issues are not considered by the portfolio manager, and the investment opportunities available to such portfolios may differ. Companies may not necessarily meet high performance standards on all aspects of ESG or sustainable investing issues; there is also no guarantee that any company will meet expectations in connection with corporate responsibility, sustainability, and/or impact performance.

Within the past 12 months UBS Switzerland AG, its affiliates or subsidiaries may have received or provided investment services and activities or ancillary services as per MiFID II which may have given rise to a payment or promise of a payment in relation to these services from or to this company.

External Asset Managers / External Financial Consultants: In case this research or publication is provided to an External Asset Manager or an External Financial Consultant, UBS expressly prohibits that it is redistributed by the External Asset Manager or the External Financial Consultant and is made available to their clients and/or third parties.

Austria: This publication is not intended to constitute a public offer under Austrian law. It is distributed only for information purposes to clients of UBS Europe SE, Niederlassung Österreich, with place of business at Wächtergasse 1, A-1010 Wien. UBS Europe SE, Niederlassung Österreich is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Austrian Financial Market Authority (Finanzmarktaufsicht, FMA), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Bahrain**: UBS is a Swiss bank not licensed, supervised or regulated in Bahrain by the Central Bank of Bahrain to undertake banking or investment business activities in Bahrain. Therefore, prospects/clients do not have any protection under local banking and investment services laws and regulations. **Brazil**: This report is only intended for Brazilian residents who are directly purchasing or selling securities in the Brazil capital market through a local authorized institution.**Canada**: The information contained herein is not, and under no circumstances is to be construed as, a prospectus, an advertisement, a public offering, an offer to sell securities described herein, solicitation of an offer to buy securities described herein, in Canada or any province or territory thereof. Any offer or sale of the securities described herein in Canada will be made only under an exemption from the requirements to file a prospectus with the relevant Canadian securities regulators and only by a dealer properly registered under applicable securities laws or, alternatively, pursuant to an exemption from the dealer registration requirement in the relevant province or territory of Canada in which such offer or sale is made. Under no circumstances is the information contained herein to be construed as investment advice in any province or territory of Canada and is not tailored to the needs of the recipient. To the extent that the information contained herein references securities of an issuer incorporated, formed or created under the laws of Canada or a province or territory of Canada, any trades in such securities must be conducted through a dealer registered in Canada or, alternatively, pursuant to a dealer registration exemption. No securities commission or similar regulatory authority in Canada has reviewed or in any way passed upon these materials, the information contained herein or the merits of the securities described herein and any representation to the contrary is an offence. In Canada, this publication is distributed by UBS Investment Management Canada Inc. **China**: This report is prepared by UBS Switzerland AG or its offshore subsidiary or affiliate (collectively as "UBS Offshore"). UBS Offshore is an entity incorporated out of China and is not licensed, supervised or regulated in China to carry out banking or securities business. The recipient should not contact the analysts or UBS Offshore which produced this report for advice as they are not licensed to provide securities investment advice in China. UBS Investment Bank (including Research) has its own wholly independent research and views which at times may vary from the views of UBS Global Wealth Management. The recipient should not use this document or otherwise rely on any of the information contained in this report in making investment decisions and UBS takes no responsibility in this regard. **Czech Republic**: UBS is not a licensed bank in the Czech Republic and thus is not allowed to provide regulated banking or investment services in the Czech Republic. This communication and/or material is distributed for marketing purposes and constitutes a "Commercial Message" under the laws of Czech Republic in relation to banking and/or investment services. Please notify UBS if you do not wish to receive any further correspondence. **Denmark**: This publication is not intended to constitute a public offer under Danish law. It is distributed only for information purposes to clients of UBS Europe SE, Denmark Branch, filial af UBS Europe SE, with place of business at Sankt Annae Plads 13, 1250 Copenhagen, Denmark, registered with the Danish Commerce and Companies Agency, under No. 38 17 24 33. It provides brokerage services bearing SEBI Registration Number INZ000259830; merchant banking services bearing SEBI Registration Number: INM000010809 and Research Analyst services bearing SEBI Registration Number: INH000001204. UBS AG, its affiliates or subsidiaries may have debt holdings or positions in the subject Indian company/companies. UBS AG, its affiliates or subsidiaries may have financial interests (e.g. like loan/derivative products, rights to or interests in investments, etc.) in the subject Indian company/companies from time to time. Within the past 12 months, UBS AG, its affiliates or subsidiaries may have received compensation for non-investment banking securities-related services and/or non-securities services from the subject Indian company/companies. The subject company/companies may have been a client/clients of UBS AG, its affiliates or subsidiaries during the 12 months preceding the date of distribution of the research report with respect to investment banking and/or non-investment banking securities-related services and/or non-securities services. With regard to information on associates, please refer to the Annual Report at: http://www.ubs.com/global/en/about_ubs/investor_relations/annualreporting.html. **Indonesia**: This communication and any offering material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have

received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed without the consent of UBS. None of the Material has been registered or filed under the prevailing laws and with any financial or regulatory authority in your jurisdiction. The Material may not have been approved, disapproved or endorsed by or registered or filed with any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including futures contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Israel**: UBS is a premier global financial firm offering wealth management, asset management and investment banking services from its headquarters in Switzerland and its operations in over 50 countries worldwide to individual, corporate and institutional investors. In Israel, UBS Switzerland AG is registered as Foreign Dealer in cooperation with UBS Wealth Management Israel Ltd., a wholly owned UBS subsidiary. UBS Wealth Management Israel Ltd. is a Portfolio Manager licensee which engages also in Investment Marketing and is regulated by the Israel Securities Authority. This publication is intended for information only and is not intended as an offer to buy or solicitation of an offer. Furthermore, this publication is not intended as an investment advice and/or investment marketing and is not replacing any investment advice and/or investment marketing provided by the relevant licensee which is adjusted to each person needs. No action has been, or will be, taken in Israel that would permit an offering of the product(s) mentioned in this document or a distribution of this document to the public in Israel. In particular, this document has not been reviewed or approved by the Israeli Securities Authority. The product(s) mentioned in this document is/are being offered to a limited number of sophisticated investors who qualify as one of the investors listed in the first supplement to the Israeli Securities Law, 5728-1968. This document may not be reproduced or used for any other purpose, nor be furnished to any other person other than those to whom copies have been sent. Anyone who purchases the product(s) mentioned herein shall do so for its own benefit and for its own account and not with the aim or intention of distributing or offering the product(s) to other parties. Anyone who purchases the product(s) shall do so in accordance with its own understanding and discretion and after it has received any relevant financial, legal, business, tax or other advice or opinion required by it in connection with such purchase(s). The word "advice" and/or any of its derivatives shall be read and construed in conjunction with the definition of the term "investment marketing" as defined under the Israeli Regulation of Investment Advice, Investment Marketing and Portfolio Management Law, 1995. The Swiss laws and regulations require a number of mandatory disclosures to be made in independent financial research reports or recommendations. Pursuant to the Swiss Financial Market Infrastructure Act and the Financial Market Infrastructure Ordinance-FINMA, banks must disclose the percentage of voting rights they hold in companies being researched, if these holdings are equal to or exceed the statutory thresholds. In addition, the Directives on the Independence of Financial Research, issued by the Swiss Bankers Association, mandate a number of disclosures, including the disclosure of potential conflicts of interest, the participation within previous 12 months in any securities issues on behalf of the company being researched, as well as the fact that remuneration paid to the financial analysts is based generally upon the performance of (i) the new issues department or investment banking; or (ii) securities trading performance (including proprietary trading) or sales.**Italy**: This publication is not intended to constitute a public offer under Italian law. It is distributed only for information purposes to clients of UBS Europe SE, Succursale Italia, with place of business at Via del Vecchio Politecnico, 3-20121 Milano. UBS Europe SE, Succursale Italia is subject to the joint supervision of the European Central Bank ("ECB"), the German Central Bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Bank of Italy (Banca d'Italia) and the Italian Financial Markets Supervisory Authority (CONSOB - Commissione Nazionale per le Società e la Borsa), to which this publication has not been submitted for approval. UBS Europe SE is a credit institution constituted under German law in the form of a Societas Europaea, duly authorized by the ECB. **Jersey**: UBS AG, Jersey Branch, is regulated and authorized by the Jersey Financial Services Commission for the conduct of banking, funds and investment business. Where services are provided from outside Jersey, they will not be covered by the Jersey regulatory regime. UBS AG, Jersey Branch is a branch of UBS AG a public company limited by shares, incorporated in Switzerland whose registered offices are at Aeschenvorstadt 1, CH-4051 Basel and Bahnhofstrasse 45, CH 8001 Zurich. UBS AG, Jersey Branch's principal place of business is 1, IFC Jersey, St Helier, Jersey, JE2 3BX. **Luxembourg**: This publication is not intended to constitute a public offer under Luxembourg law. It is distributed only for information purposes to clients of UBS Europe SE, Luxembourg Branch ("UBS LUX"), R.C.S. Luxembourg n° B209123, with registered office at 33A, Avenue J. F. Kennedy, L-1855 Luxembourg. UBS LUX is a branch of UBS Europe SE, a credit institution constituted under German law in the form of a Societas Europaea (HRB n° 107046), with registered office at Bockenheimer Landstrasse 2-4, D-60306 Frankfurt am Main, Germany, duly authorized by the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht – "BaFin") and subject to the joint prudential supervision of BaFin, the central bank of Germany (Deutsche Bundesbank) and the European Central Bank. UBS LUX is furthermore supervised by the Luxembourg prudential supervisory authority (Commission de Surveillance du Secteur Financier), in its role as host member state authority. This publication has not been submitted for approval to any public supervisory authority. **Malaysia**: This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Mexico**: This information is distributed by UBS Asesores México, S.A. de C.V. ("UBS Asesores"), an affiliate of UBS Switzerland AG, incorporated as a non-independent investment advisor under the Mexican regulation due to the relation with a Foreign Bank. UBS Asesores is registered under number 30060-001-(14115)-21/06/2016 and subject to the supervision of the Mexican Banking and Securities Commission ("CNBV") exclusively regarding the rendering of (i) portfolio management services, (ii) securities investment advisory services, analysis and issuance of individual investment recommendations, and (iii) anti-money laundering and terrorism financing matters. This UBS publication or any material related thereto is addressed only to Sophisticated or Institutional Investors located in Mexico. Research reports only reflect the views of the analysts responsible for the report. The compensation of the analyst(s) who prepared this report is determined exclusively by research management and senior management of any entity of UBS Group to which such analyst(s) render services. **Nigeria**: The investment products mentioned in this material are not being offered or sold by UBS to the public in Nigeria and they have not been submitted for approval nor registered with the Securities and Exchange Commission of Nigeria. If you are interested in products of this nature, please let us know. The investment products mentioned in this material are not being directed to, and are not being made available for subscription by any persons within Nigeria other than the selected investors to whom the offer materials have been addressed as a private sale or domestic concern within the exemption and meaning of Section 69(2) of the Investments and Securities Act, 2007 (ISA). This material has been provided to you at your specific unsolicited request and for your information only. **Philippines:** This material was provided to you as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the material erroneously, UBS asks that you kindly destroy/delete it and inform UBS immediately. Any and all advice provided and/or trades executed by UBS pursuant to the material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. The material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the material, and by receiving the material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. **Poland**: UBS is a premier global financial services firm offering wealth management services to individual, corporate and institutional investors. UBS is established in Switzerland and operates under Swiss law and in over 50 countries and from all major financial centres. UBS Switzerland AG is not licensed as a bank or as an investment firm under Polish legislation and is not permitted to provide banking and financial services in Poland. **Portugal**: UBS Switzerland AG is not licensed to conduct banking and financial activities in Portugal nor is UBS Switzerland AG supervised by the portuguese regulators (Bank of Portugal "Banco de Portugal" and Portuguese Securities Exchange Commission "Comissão do Mercado de Valores Mobiliários"). **Qatar**: UBS Qatar LLC is authorized by the Qatar Financial Centre Regulatory Authority, with QFC no. 01169, and has its registered office at 14th Floor, Burj Alfardan Tower, Building 157, Street No. 301, Area No. 69, Al Majdami, Lusail, Qatar. UBS Qatar LLC neither offers any brokerage services nor executes any order with, for or on behalf of its clients. A client order will have to be placed with, and executed by, UBS Switzerland AG in Switzerland or an affiliate of UBS Switzerland AG, that is domiciled outside Qatar. It is in the sole discretion of UBS Switzerland AG in Switzerland or its affiliate to accept or reject an order and UBS Qatar LLC does not have authority to provide a confirmation in this respect. UBS Qatar LLC may however communicate payment orders and investment instructions to UBS Switzerland AG in Switzerland for receipt, acceptance and execution. UBS Qatar LLC is not authorized to act for and on behalf of UBS Switzerland AG or an affiliate of UBS Switzerland AG. This document and any attachments hereto are intended for eligible counterparties and business customers only. **Russia**: This document or information contained therein is for information purposes only and constitutes neither a public nor a private offering, is not an invitation to make offers, to sell, exchange or otherwise transfer any financial instruments in the Russian Federation to or for the benefit of any Russian person or entity and does not constitute an advertisement or offering of securities in the Russian Federation within the meaning of Russian securities laws. The information contained herein is not an "individual investment recommendation" as defined in Federal Law of 22 April 1996 No 39-FZ "On Securities Market" (as amended) and the financial instruments and operations specified herein may not be suitable for your investment profile or your investment goals or expectations. The determination of whether or not such financial instruments and operations are in your interests or are suitable for your investment goals, investment horizon or the acceptable risk level is your responsibility. We assume no liability for any losses connected with making any such operations or investing into any such financial instruments and we do not recommend to use such information as the only source of information for making an investment decision. **Saudi Arabia**: UBS Saudi Arabia is authorised and regulated by the Capital Market Authority to conduct securities business under licence number 08113-37. **Singapore**: Clients of UBS AG Singapore branch are asked to please contact UBS AG Singapore branch, an exempt financial adviser under the Singapore Financial Advisers Act (Cap. 110) and a wholesale bank licensed under the Singapore Banking Act (Cap. 19) regulated by the Monetary Authority of Singapore, in respect of any matters arising from, or in connection with, the analysis or report. UBS AG is incorporated in Switzerland with limited liability. UBS AG has a branch registered in Singapore (UEN S98FC5560C). This communication and any offering

material term sheet, research report, other product or service documentation or any other information (the "Material") sent with this communication was done so as a result of a request received by UBS from you and/or persons entitled to make the request on your behalf. Should you have received the Material erroneously, UBS asks that you kindly delete the e-mail and inform UBS immediately. The Material, where provided, was provided for your information only and is not to be further distributed in whole or in part in or into your jurisdiction without the consent of UBS. The Material may not have been reviewed, approved, disapproved or endorsed by any financial or regulatory authority in your jurisdiction. UBS has not, by virtue of the Material, made available, issued any invitation to subscribe for or to purchase any investment (including securities or products or futures contracts). The Material is neither an offer nor a solicitation to enter into any transaction or contract (including future contracts) nor is it an offer to buy or to sell any securities or products. The relevant investments will be subject to restrictions and obligations on transfer as set forth in the Material, and by receiving the Material you undertake to comply fully with such restrictions and obligations. You should carefully study and ensure that you understand and exercise due care and discretion in considering your investment objective, risk appetite and personal circumstances against the risk of the investment. You are advised to seek independent professional advice in case of doubt. Any and all advice provided on and/or trades executed by UBS pursuant to the Material will only have been provided upon your specific request or executed upon your specific instructions, as the case may be, and may be deemed as such by UBS and you. **Spain**: This publication is not intended to constitute a public offer under Spanish law. It is distributed only for information purposes to clients of UBS Europe SE, Sucursal en España, with place of business at Calle María de Molina 4, C.P. 28006, Madrid. UBS Europe SE, Sucursal en España is subject to the joint supervision of the European Central Bank ("ECB"), the German Central bank (Deutsche Bundesbank), the German Federal Financial Services Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), as well as of the Spanish supervisory authority (Banco de España), to which this publication has not been submitted for approval. ARGUS

NYSE: NI

NISOURCE INC

NiSource Inc. is an energy holding company whose subsidiaries are fully regulated natural gas and electric utility companies serving approximately 3.2 million natural gas customers and 500,000 electric customers in six states. NiSource's principal subsidiaries include NiSource Gas Distribution Group Inc., a natural gas distribution holding company, and NIPSCO, a regulated gas and electric company. NiSource derives substantially all of its revenues and earnings from the operating results of these rate-regulated utilities. The company has approximately 7,500 employees. NI shares are a component of the S&P 500.

Analyst's Notes

Analysis by David Coleman, November 28, 2022

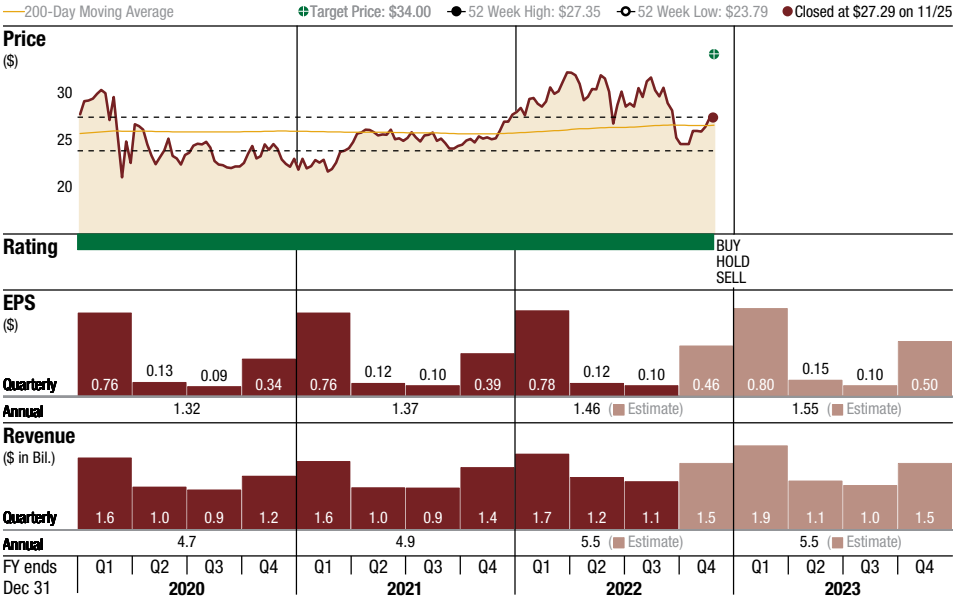
ARGUS RATING: BUY

- Maintaining BUY
- The company is pursuing the sale of a minority stake in its NIPSCO utility in order to strengthen the balance sheet.
- NI shares have underperformed over the past quarter, falling 10% while the S&P 500 has fallen 1%. They have outperformed the broad market and the Utility industry ETF, IDU, over the past year but have underperformed over the past five years.
- Management has narrowed its 2022 adjusted EPS guidance to $1.44-$1.46 from $1.42-$1.48.
- We are lowering our 2022 EPS estimate.

INVESTMENT THESIS

Our rating on NiSource Inc. (NYSE: NI) is BUY based on valuation and historical earnings performance. Focusing on its regulated electric and gas utilities, NiSource recently completed a corporate restructuring that resulted in the spinoff of its nonregulated pipeline group. The company keeps a tight rein on operating expenses as well as capital spending. The shares trade above their historical five-year average for P/E and price/book, though the price/cash flow multiple remains below the historical average. Our target price is $34.

We note that NiSource could become a buyout target, as larger utilities and private equity firms pursue smaller utilities because of their stable earnings growth and above-average dividend yields. The company has also allocated significant capital to green energy generation.



RECENT DEVELOPMENTS

NI shares have underperformed over the past quarter, falling 10% while the S&P 500 has fallen 1%. They have outperformed the broad market and the Utility industry ETF, IDU, over the past year but have underperformed over the past five years.

NiSource reported 3Q22 results on November 7. The company posted adjusted net

Argus Recommendations

Twelve Month Rating	SELL	HOLD	**BUY**
Five Year Rating	SELL	HOLD	**BUY**
Sector Rating	Under Weight	**Market Weight**	Over Weight

Argus assigns a 12-month BUY, HOLD, or SELL rating to each stock under coverage.

- BUY-rated stocks are expected to outperform the market (the benchmark S&P 500 Index) on a risk-adjusted basis over the next year.
- HOLD-rated stocks are expected to perform in line with the market.
- SELL-rated stocks are expected to underperform the market on a risk-adjusted basis.

The distribution of ratings across Argus' entire company universe is: 71% Buy, 29% Hold, 0% Sell.

Analyst's Notes...Continued

income of $44.6 million or $0.10 per share, compared to $47.1 million or $0.11 per share a year earlier. Revenue rose 24% year-over-year to $1.18 billion.

In 2021, the company reported adjusted net income of $571.2 million or $1.37 per share, compared to $507.5 million or $1.32 per share in 2020.

Along with the results, management narrowed its 2022 adjusted EPS guidance to $1.44-$1.46 from $1.42-$1.48. It also projected 2023 EPS of $1.50-$1.57. It continues to project capex of $2.4-$2.7 billion in 2022, $2.8-$3.1 billion in 2023, and a total of $15 billion in 2023-2027. The company expects to reduce greenhouse gas emissions by 90% by 2030 and to be coal-free by 2026-2028.

The company is pursuing the sale of a minority stake in its NIPSCO utility in order to strengthen the balance sheet.

EARNINGS & GROWTH ANALYSIS

NiSource has two segments: Gas Distribution Operations (51% of revenue) and Electric Operations (49%). In 3Q, Gas Distribution operating revenue rose 20.5% to $573.8 million, while Electric Operations revenue increased 9% to $507.9 million.

In the Electric Operations segment, on September 19, operating subsidiary Northern Indiana Public Service Co. (NIPSCO) filed it first electric case since 2018. The company is requesting $291.8 million to support renewable generation and associated transmission projects, grid modernization, and customer-centric improvements. The new rates would take effect in September 2023, with incremental new charges applied in 2024. The company has also begun construction on the Indiana Crossroads II Wind project, which is expected to enter service in 2023. The Indiana Crossroads Solar and Dunns Bridge Solar I projects are scheduled to enter service in the first half of 2023.

In Gas Distribution Operations, Columbia Gas of Ohio has obtained an annual revenue increase of $68.2 million, and NIPSCO has obtained a revenue increase of $71.8 million. Columbia Gas of Pennsylvania has filed a rate case for additional revenue of $82.2 million. Columbia Gas of Maryland has filed a rate case for $5.5 million on a $204.1 million rate base.

We are lowering our 2022 adjusted EPS estimate to $1.46 from $1.48. Our revised estimate is at the high end of management's guidance range and implies growth of 7%. We look for growth to continue in 2023 and are maintaining our adjusted EPS estimate of $1.55.

NiSource relies on its utility infrastructure programs for earnings and dividend growth. The company's regulated gas and electric segments are investing in pipelines and in electric transmission projects as well as in distribution modernization programs, and should continue to benefit from favorable regulation.

FINANCIAL STRENGTH & DIVIDENDS

NiSource has improved its balance sheet by selling noncore assets, recalibrating capital expenditures, and carefully managing

Analyst's Notes...Continued

operating expenses and working capital.

Our financial strength rating on NiSource is Medium. The company receives average scores on our main financial strength criteria of debt levels, fixed-cost coverage, profitability, earnings quality, and cash generation. The company has investment-grade ratings from Moody's Baa2/stable, and Standard & Poor's BBB+/stable, both with a stable outlook.

The company had cash of $35.8 million on hand at the end of 3Q22 and net available liquidity of $919 million. Debt totaled $10.8 billion and accounted for 59.1% of total capitalization.

The company expects to make capital investments of approximately $15 billion through 2027.

NiSource pays an annualized dividend of $0.94 per share, for a yield of about 3.4%. We think the dividend is safe and likely to grow modestly over time. Our dividend payout estimates are $0.94 for 2022 and $1.00 for 2023.

MANAGEMENT & RISKS

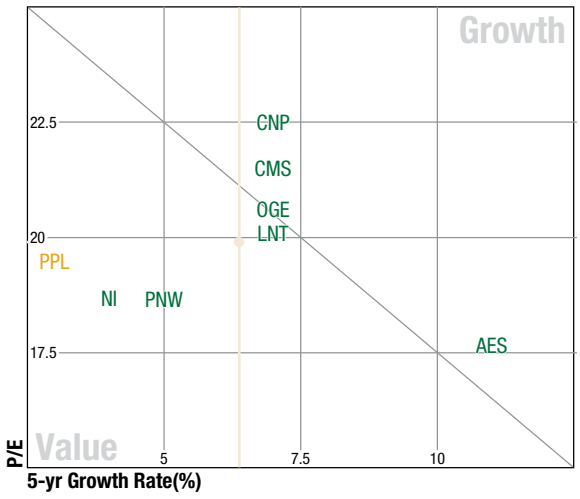
Lloyd Yates succeeded Joseph Hamrock as the company's president and CEO on February 14, 2022. Donald E. Brown is the CFO. The chairman is Kevin T. Kabat, the former CEO of Fifth Third Bancorp. The COO is Pablo Vegas.

Management is committed to electric and gas service expansion strategies in the company's regulated service territories, and to the expansion of its gas transmission and storage business. We think the company's platform for a return to growth is solid, and are confident in management's ability to provide shareholders with increased value over the long term.

Key risks for stocks in our electric utility universe include fluctuations in interest rates and commodity prices, the effect of adverse weather on revenue, regulatory issues (especially involving construction cost recovery), and potential environmental and safety liabilities. In addition, the capital-intensive nature of the utility industry creates ongoing liquidity risk that must be actively managed by each company.

COMPANY DESCRIPTION

NiSource Inc. is an energy holding company whose subsidiaries are fully regulated natural gas and electric utility companies serving approximately 3.2 million natural gas customers and 500,000 electric customers in six states. NiSource's principal subsidiaries include NiSource Gas Distribution Group Inc., a natural gas distribution holding company, and NIPSCO, a regulated gas and electric company. NiSource derives substantially all of its revenues and earnings from the operating results of these rate-regulated utilities. The company has approximately 7,500 employees. NI shares are a component of the S&P 500.



VALUATION

We think that NI shares are attractively valued at current prices near $27, below the midpoint of their 52-week range of $24-$33. On the fundamentals, the shares trade at 19-times our 2022 EPS estimate, above the average multiple of 18 for comparable electric

Peer & Industry Analysis

The graphics in this section are designed to allow investors to compare NI versus its industry peers, the broader sector, and the market as a whole, as defined by the Argus Universe of Coverage.

- **The scatterplot shows how NI stacks up versus its peers on two key characteristics: long-term growth and value. In general, companies in the lower left-hand corner are more value-oriented, while those in the upper right-hand corner are more growth-oriented.**
- **The table builds on the scatterplot by displaying more financial information.**
- **The bar charts on the right take the analysis two steps further, by broadening the comparison groups into the sector level and the market as a whole. This tool is designed to help investors understand how NI might fit into or modify a diversified portfolio.**

About Argus

Argus Research, founded by Economist Harold Dorsey in 1934, has built a top-down, fundamental system that is used by Argus analysts. This six-point system includes Industry Analysis, Growth Analysis, Financial Strength Analysis, Management Assessment, Risk Analysis and Valuation Analysis.

Utilizing forecasts from Argus' Economist, the Industry Analysis identifies industries expected to perform well over the next one-to-two years.

The Growth Analysis generates proprietary estimates for companies under coverage.

In the Financial Strength Analysis, analysts study ratios to understand profitability, liquidity and capital structure.

During the Management Assessment, analysts meet with and familiarize themselves with the processes of corporate management teams.

Quantitative trends and qualitative threats are assessed under the Risk Analysis.

And finally, Argus' Valuation Analysis model integrates a historical ratio matrix, discounted cash flow modeling, and peer comparison.

THE ARGUS RESEARCH RATING SYSTEM

Argus uses three ratings for stocks: BUY, HOLD, and SELL. Stocks are rated relative to a benchmark, the S&P 500.

- A BUY-rated stock is expected to outperform the S&P 500 on a risk-adjusted basis over a 12-month period. To make this determination, Argus Analysts set target prices, use beta as the measure of risk, and compare expected risk-adjusted stock returns to the S&P 500 forecasts set by the Argus Market Strategist.
- A HOLD-rated stock is expected to perform in line with the S&P 500.
- A SELL-rated stock is expected to underperform the S&P 500.

Power & Utilities

Hybrid Relative Value Refresh: Fall 2022

CORE

We refresh our best ideas in the Power & Utility hybrid universe, with a preference for hybrids of issuers with improving credit stories, or hybrids that have a greater likelihood of being called in a well-defined time frame.

Srinjoy Banerjee, CFA
+1 212 526 3521

Trade Ideas

- **Sell:** VST 7.000% Perps, D 4.650% Perps or 4.350% Perps, DUK 4.875% Perps or 3.250% 2082s.
- **Buy:** EMACN 6.750% 2076s, SO 4.000% 2051s, CNP 6.125% Perps, NI 5.650% Perps

Utility Hybrids

Utility hybrids have remained relatively resilient in recent performance versus the most recent sell-off in equities, including utility equities (Figure 1). At the same time, utility hybrids have outperformed the IG Utility Index and IG Corps (Figure 2), supported by a number of hybrid securities that are now floating, as well as the callable nature of the space, plus coupon resets to floating rates. As we discussed in Hybrid Relative Value Refresh, 12 August 2022, given persistent macro headwinds, and our strategy view of a deteriorating spread environment, we have a general preference for hybrids that we think have an improving credit story, or those we view as having a greater likelihood of being called at the first call date (or, otherwise, a well defined timeline). Figure 3 shows one way to visualize extension risk in the space, though we also take into account whether companies continue to require hybrid capital, as well as loss of equity credit. For the full relative value matrix, please see Figure 5.

- **We are more cautious on hybrids that either do not have a well-defined time line to be called, and/or are unattractive versus the rest of the debt stack:** We recommend **selling the VST 7.000% Perps** (likely to be called on first call date, in our view, but unattractive versus front-end callable unsecured bonds), the **D 4.650% Perps or D 4.350% Perps** (credit overhang with large-scale offshore wind project; low resets make calls less likely), and the **DUK 4.875% Perps/ 3.250% 2082s** (likely stable credit quality; low resets make calls less likely).
- **We like hybrids with improving credit stories and/or a greater probability of being called in a well-defined timeframe:** We recommend **buying the Emera 6.750% 2076s** (longstanding commitment to improving credit metrics; these lose equity credit on the first

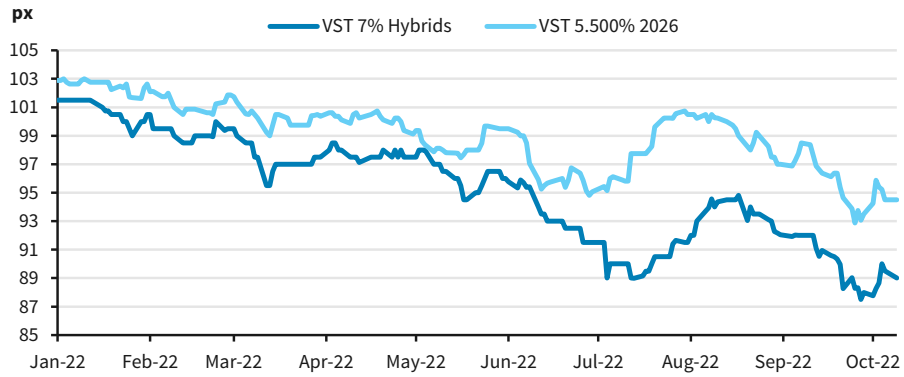
Best Ideas

Sell VST 7.0% PERP given less attractive valuations versus the VST unsecureds

- We view the VST Perps as less attractive than the VST unsecured bonds in the current environment; the VST 7.0% Perps offer ~10.5% yield to the December 2026 first call. However, the VST unsecureds offer attractive yields to early calls: for example, the VST 5.500% 2026s (the next unsecured maturity), quoted at $95, yields 11.6% to the September 2023 par call. The VST 5.625% 2027s quoted at $94.75, yields ~10% to the Feb 2024 par call.



Based on management's initial 2022-26 capital allocation plan, we expect VST to continue deleveraging after paying down $2.5bn of debt in 2022 (by at least $1.5bn - see NRG versus VST: FAQs approaching 3Q Results, 6 October 2022). The deleveraging plan increases the likelihood of the VST front-end unsecured bonds being called ahead of maturity (i.e., before 2026/2027). Given the relatively high reset spread (+574bp), we would expect the company to call on the first

call date (December 2026), but the yield is less attractive than VST's unsecured notes to early calls.

We acknowledge that VST Perps do offer better downside protection against any hypothetical re-leveraging change of control, notably via a 500bp step-up should the company not exercise its right to redeem after a change of control trigger. That said, in the near term with elevated capital market volatility, we expect a go-private transaction with re-leveraging potential is unlikely given financing constraints.

In the event that the market moves wider, we see scope for the VST perps to underperform the unsecureds given their subordination, and a declining probability of first call. For example, our credit strategists call for HY spreads at 850-900bp in the near term, which would make the reset spread of 574bp look less expensive (see Expecting Much Wider Spreads, 25 July 2022).

FIGURE 4. **VST 7% hybrids have underperformed VST 5.500% 2026s YTD, which we expect to continue**

Source: Barclays Research

Sell D 4.650% Perps / D 4.350% Perps

- We think it is unlikely that Dominion would call the 4.650% / 4.350% Perps on their respective first call dates given relatively low hybrid reset spreads (their reset/ 30y senior spread ratio at 1.2x is about the average for the utility sector). We expect that Dominion will continue to rely on hybrid credit, and the notes do not lose equity credit on the first call date. The yield to perp at ~7.3% is also modestly less attractive versus the ~7.6% average for utility hybrids. The current yield on the securities (5.3%) is also unattractive versus the rest of the Dominion structure, in our view. The D holdco 30y current yield is 5.8%, while regulated opco Virginia Electric & Power Company 30y is at 5.5%.

Given a substantial capex plan, and management continuing to target credit metrics at the lower end of requirements for current ratings, we expect Dominion to continue to need equity credit from hybrids through the medium term. For example, Dominion LTM FFO/debt is within ~70bp of the Moody's (14%) downgrade trigger, and helps improve FFO/debt by ~60bp. Dominion's capex plan includes its $10bn offshore wind project. While we expect Dominion to work towards adjustments in the performance guarantee to allow for factors outside of the company's control (e.g., weather conditions), we nonetheless view the regulatory environment as weakened. The D Perps currently have two IG ratings (S&P and Fitch), and given the elevated upcoming construction risk, and weak credit metric positioning, we see scope to the downside for the Perp IG rating. The construction period for the offshore wind project (2023 to late 2026) is close to the time of the first call dates.

Sell DUK 4.875% Perp/ 3.250% 2082s

- We think it is unlikely that Duke would call the 4.875% Perps or the DUK 3.250% 2082s on their respective first call dates given relatively lower resets (at 0.8x-1.2x, at or below the average for the utility space). The current yield on the securities (~4.5-5.5%) is also unattractive versus the rest of the Duke structure, in our view. The DUK 30y current yield is ~6%, intermediate holdco Progress Energy 2039s (~6.4%) and secured opco 30y at 5.0%.

We expect Duke Energy to maintain credit metric stability, with clear evidence from the strategic review of the 3.5GW commercial renewables business that management is looking to be prudent about capex financing. Duke's elevated capex plan is aimed at supporting the energy transition, with $52bn of the $63bn current five-year plan allocated to T&D modernization ($33bn), Zero-Carbon Generation ($15bn) and hydrogen enabled natural gas generation ($4bn). The company targets FFO/debt of 14%, which is 100-200bp higher than the downgrade thresholds for Moody's and S&P, but which implies sustained relevance for hybrids (contributes to a 30bp improvement to FFO/debt). As the Duke Perps do not lose equity credit, and the 2082s only lose equity credit in 2062, the decision to call on the first call date is purely an economic one.

Buy EMACN 6.750% 2076s

- The Emera junior subs offer a 8.7% yield to the Jun-2026 call. We think there is a high likelihood of a call, both because the Emera hybrids lose equity credit at the first call date (due to a 100bp cumulative coupon step up in 2046) as well as the high reset (544bp). The reset/30y senior spread ratio is one of the highest in the utility hybrid universe at 1.7x. The hybrids offer an attractive current yield (7.2%) at ~100bp higher than the EMACN unsecured 2046s. We expect Emera to rely on hybrid capital in the longer term, as indicated in the medium-term financing plan.

We view Emera as having gradually improving credit metrics, with clear objectives to maintain IG ratings and FFO/debt above the 12% threshold at Moody's. The company has taken a large number of measures, including asset sales, to attempt to defend credit metrics since the TECO acquisition, though metrics have persistently disappointed. Incremental cash flow from Nova Scotia Power, as well as distributions from the Labrador Island Link transmission projects are expected to support credit metrics. The hybrids offer meaningful credit metric support, and we expect Emera to either explore refinancing hybrids or look to issue equity or utilize asset sales to be able to maintain Baa3 ratings.

Buy SO 4.000% 2051s

- The SO 4.000% 2051s offer a 8.10% yield to the October 2025 call, and a 7.7% call to Jan-2031, which is when the junior subs would lose equity credit at S&P, which we believe provides an incentive for the company to call the bonds in 2031. For comparison, the recently issued SO 5.700% 2032s unsecured holdco trades at ~6.0% maturity. The SO 4.000% 2051s have a reset of 373bp, with a reset/30y senior spread ratio slightly higher than average (1.3x).

We view Southern as being on a credit improvement pathway as it completes Vogtle Unit 3 (expected by end 1Q 2023) and Unit 4 (expected by end 4Q 2023). Completion of both units by 2023, and recovery of $7.3bn of the construction costs, would imply $700mn of cash flow benefit for Southern (~200bp FFO/debt improvement). With reduced construction risk (beginning with the completion of Unit 3), we expect positive outlooks and scope for a one-notch upgrade. A number of rate cases (including Georgia Power 2022, with a decision expected by the end of this year) and the fuel cost recovery case expected in Georgia next year should also help to de-risk the credit profile.

The Southern hybrids offer meaningful support to the credit metrics, with an average ~125bp uplift to FFO/debt at Moody's and S&P. We expect the hybrids will remain part of the long-term financing strategy even with a 200bp FFO/debt improvement from Vogtle completion as Southern targets higher ratings and increased capex on energy transition.

Views on other hybrids

- **Buy CNP 6.125% PERP:** The CNP 6.125% Perps trade at ~15% yield to call (September 2023). The $800mn perps were originally issued in 2018 to help fund the Vectren acquisition. We view Centerpoint's credit quality as well on a path to improvement, with FFO/debt targeted at 14-15% well above the rating agency downgrade thresholds at S&P (12%) and Moody's (13%). We think the Perps offer a modest FFO/debt benefit (~50bp) in the context of CNP's improved financial situation, and in our view, the hybrids no longer affect Centerpoint's ability to maintain current ratings. CNP management has historically indicated that they view their LDC businesses as 'pre-paid credit cards' and accordingly would utilize asset sales to support electric utility capex. This again suggests to us less need for hybrids in the cap structure.

- **Buy NI 5.650% PERP:** The NiSource 5.650% Perps offer a 19% yield to first call (June 2023), and despite the low reset spread (1.0x reset/30 year), we think there is a good chance that NiSource could call given the loss of equity credit (there is a cumulative 100bp step up in 2043). At current rates, the assumed coupon (284.3bp spread) would be ~7%. We think this would be unattractive for the company versus its senior unsecured bonds (30y at 6% yield).

Utility Hybrids Pricing Matrix

FIGURE 5. **Utility Hybrids Pricing Mix**

We, Srinjoy Banerjee, CFA and Dylan Paup, CFA, hereby certify (1) that the views expressed in this research report accurately reflect our personal views about any or all of the subject securities or issuers referred to in this research report and (2) no part of our compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

Important Disclosures:
This document is intended for institutional investors and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors under U.S. FINRA Rule 2242. Barclays trades the securities covered in this report for its own account and on a discretionary basis on behalf of certain clients. Such trading interests may be contrary to the recommendations offered in this report.

Barclays Research is produced by the Investment Bank of Barclays Bank PLC and its affiliates (collectively and each individually, "Barclays").

All authors contributing to this research report are Research Analysts unless otherwise indicated. The publication date at the top of the report reflects the local time where the report was produced and may differ from the release date provided in GMT.

Availability of Disclosures:
For current important disclosures regarding any issuers which are the subject of this research report please refer to https://publicresearch.barclays.com or alternatively send a written request to: Barclays Research Compliance, 745 Seventh Avenue, 13th Floor, New York, NY 10019 or call +1-212-526-1072.

Barclays Capital Inc. and/or one of its affiliates does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that Barclays may have a conflict of interest that could affect the objectivity of this report. Barclays Capital Inc. and/or one of its affiliates regularly trades, generally deals as principal and generally provides liquidity (as market maker or otherwise) in the debt securities that are the subject of this research report (and related derivatives thereof). Barclays trading desks may have either a long and / or short position in such securities, other financial instruments and / or derivatives, which may pose a conflict with the interests of investing customers. Where permitted and subject to appropriate information barrier restrictions, Barclays fixed income research analysts regularly interact with its trading desk personnel regarding current market conditions and prices. Barclays fixed income research analysts receive compensation based on various factors including, but not limited to, the quality of their work, the overall performance of the firm (including the profitability of the Investment Banking Department), the profitability and revenues of the Markets business and the potential interest of the firm's investing clients in research with respect to the asset class covered by the analyst. To the extent that any historical pricing information was obtained from Barclays trading desks, the firm makes no representation that it is accurate or complete. All levels, prices and spreads are historical and do not necessarily represent current market levels, prices or spreads, some or all of which may have changed since the publication of this document. Barclays Research Department produces various types of research including, but not limited to, fundamental analysis, equity-linked analysis, quantitative analysis, and trade ideas. Recommendations and trade ideas contained in one type of Barclays Research may differ from those contained in other types of Barclays Research, whether as a result of differing time horizons, methodologies, or otherwise.

T: Barclays Bank PLC and/or an affiliate is providing equity advisory services to this issuer.

U: The equity securities of this Canadian issuer include subordinate voting restricted shares.

V: The equity securities of this Canadian issuer include non-voting restricted shares.

Explanation of the Barclays Research Corporate Credit Sector Rating System

Overweight (OW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to exceed the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to exceed the six-month total return of the relevant index.

Market Weight (MW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to be in line with the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to be in line with the six-month total return of the relevant index.

Underweight (UW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to be less than the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to be less than the six-month total return of the relevant index.

Sector definitions:
Sectors in U.S. High Grade Research are defined using the sector definitions of the Bloomberg U.S. Credit Index and are rated against the Bloomberg U.S. Credit Index.

Sectors in U.S. High Yield Research are defined using the sector definitions of the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index and are rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index.

Sectors in European High Grade Research are defined using the sector definitions of the Bloomberg Pan-European Credit Index and are rated against the Bloomberg Pan-European Credit Index.

Sectors in Industrials and Utilities in European High Yield Research are defined using the sector definitions of the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials and are rated against the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials.

Sectors in Financials in European High Yield Research are defined using the sector definitions of the Bloomberg Pan-European High Yield Finance Index and are rated against the Bloomberg Pan-European High Yield Finance Index.

Sectors in Asia High Grade Research are defined on Barclays Live and are rated against the Bloomberg EM Asia USD High Grade Credit Index.

Sectors in Asia High Yield Research are defined on Barclays Live and are rated against the Bloomberg EM Asia USD High Yield Corporate Credit Index.

Sectors in EEMEA and Latin America Research are defined on Barclays Live and are rated against the Bloomberg EM USD Corporate and Quasi Sovereign Index. These sectors may contain both High Grade and High Yield issuers.

To view sector definitions and monthly sector returns for Asia, EEMEA and Latin America Research, go to https://live.barcap.com/go/research/EMSectorReturns on Barclays Live.

Explanation of the Barclays Research Corporate Credit Rating System

For all High Grade issuers covered in the US, Europe or Asia, and for all issuers in Latin America and EEMEA, the credit rating system is based on the analyst's view of the expected excess return over a six-month period of the issuer's index-eligible corporate debt securities* relative to the expected excess return of the relevant sector, as specified on the report.

Overweight (OW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to exceed the six-month expected excess return of the relevant sector.

Market Weight (MW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to be in line with the six-month expected excess return of the relevant sector.

Underweight (UW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to be less than the six-month expected excess return of the relevant sector.

Rating Suspended (RS): The rating has been suspended temporarily due to market events that make coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Coverage Suspended (CS): Coverage of this issuer has been temporarily suspended.

Not Covered (NC): Barclays' fundamental credit research team does not provide formal, continuous coverage of this issuer and has not assigned a rating to the issuer or its debt securities. Any analysis, opinion or trade recommendation provided on a Not Covered issuer or its debt securities is valid only as of the publication date of this report and there should be no expectation that additional reports relating to the Not Covered issuer or its debt securities will be published thereafter.

For all High Yield issuers (excluding those covered in EEMEA or Latin America), the credit rating system is based on the analyst's view of the expected total returns over a six-month period of the rated debt security relative to the expected total return of the relevant sector, as specified on the report.

Overweight (OW): The analyst expects the six-month total return of the debt security subject to this rating to exceed the six-month expected total return of the relevant sector.

Market Weight (MW): The analyst expects the six-month total return of the debt security subject to this rating to be in line with the six-month expected total return of the relevant sector.

Underweight (UW): The analyst expects the six-month total return of the rated debt security subject to this rating to be less than the six-month expected total return of the relevant sector.

Rating Suspended (RS): The rating has been suspended temporarily due to market events that make coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Coverage Suspended (CS): Coverage of this issuer has been temporarily suspended.

Not Covered (NC): Barclays' fundamental credit research team does not provide formal, continuous coverage of this issuer and has not assigned a rating to the issuer or its debt securities. Any analysis, opinion or trade recommendation provided on a Not Covered issuer or its debt securities is valid only as of the publication date of this report and there should be no expectation that additional reports relating to the Not Covered issuer or its debt securities will be published thereafter.

Where a recommendation is made at the issuer level, it does not apply to any sanctioned securities, where trading in such securities would be prohibited under applicable law, including sanctions laws and regulations.

*In EEMEA and Latin America (and in certain other limited instances in other regions), analysts may occasionally rate issuers that are not part of the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or Bloomberg EM USD Corporate and Quasi Sovereign Index. In such cases the rating will reflect the analyst's view of the expected excess return over a six-month period of the issuer's corporate debt securities relative to the expected excess return of the relevant sector, as specified on the report.

Distribution of ratings assigned by Barclays Corporate Credit Research at the bond level:
35% have been assigned an Overweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Buy rating; 55% of bonds with this rating category are investment banking clients of the Firm; 74% of the issuers with this rating have received financial services from the Firm.

42% have been assigned Market Weight rating which, for purposes of mandatory regulatory disclosures, is classified as a Hold rating; 49% of bonds with this rating category are investment banking clients of the Firm; 71% of the issuers with this rating have received financial services from the Firm.

23% have been assigned an Underweight rating which, for purposes of mandatory regulatory disclosures, is classified as a Sell rating; 47% of bonds with this rating category are investment banking clients of the Firm; 74% of the issuers with this rating have received financial services from the Firm.

Types of investment recommendations produced by Barclays FICC Research:
In addition to any ratings assigned under Barclays' formal rating systems, this publication may contain investment recommendations in the form of trade ideas, thematic screens, scorecards or portfolio recommendations that have been produced by analysts in FICC Research. Any such investment recommendations produced by non-Credit Research teams shall remain open until they are subsequently amended, rebalanced or closed in a future research report. Any such investment recommendations produced by the Credit Research teams are valid at current market conditions and may not be otherwise relied upon.

Disclosure of other investment recommendations produced by Barclays FICC Research:
Barclays FICC Research may have published other investment recommendations in respect of the same securities/instruments recommended in this research report during the preceding 12 months. To view all investment recommendations published by Barclays FICC Research in the preceding 12 months please refer to https://live.barcap.com/go/research/Recommendations.

Barclays does not assign ratings to asset backed securities. Barclays Capital Inc. and/or one of its affiliates may have acted as an underwriter for public offerings of any asset backed securities that are otherwise recommended in trade ideas contained within its securitised research reports.

Disclaimer:
This publication has been produced by Barclays Research Department in the Investment Bank of Barclays Bank PLC and/or one or more of its affiliates (collectively and each individually, "Barclays").

It has been prepared for institutional investors and not for retail investors. It has been distributed by one or more Barclays affiliated legal entities listed below or by an independent and non-affiliated third-party entity (as may be communicated to you by such third-party entity in its communications with you). It is provided for information purposes only, and Barclays makes no express or implied warranties, and expressly disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to any data included in this publication. To the extent that this publication states on the front page that it is intended for institutional investors and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors under U.S. FINRA Rule 2242, it is an "institutional debt research report" and distribution to retail investors is strictly prohibited. Barclays also distributes such institutional debt research reports to various issuers, media, regulatory and academic organisations for their own internal informational news gathering, regulatory or academic purposes and not for the purpose of making investment decisions regarding any debt securities. Media organisations are prohibited from re-publishing any opinion or recommendation concerning a debt issuer or debt security contained in any Barclays institutional debt research report. Any such recipients that do not want to continue receiving Barclays institutional debt research reports should contact debtresearch@barclays.com. Clients that are subscribed to receive equity research reports, will not receive certain cross asset research reports co-authored by equity and FICC research analysts that are distributed as "institutional debt research reports" unless they have agreed to accept such reports. Eligible clients may get access to such cross asset reports by contacting debtresearch@barclays.com. Barclays will not treat unauthorized recipients of this report as its clients and accepts no liability for use by them of the contents which may not be suitable for their personal use. Prices shown are indicative and Barclays is not offering to buy or sell or soliciting offers to buy or sell any financial instrument.

Without limiting any of the foregoing and to the extent permitted by law, in no event shall Barclays, nor any affiliate, nor any of their respective officers, directors, partners, or employees have any liability for (a) any special, punitive, indirect, or consequential damages; or (b) any lost profits, lost revenue, loss of anticipated savings or loss of opportunity or other financial loss, even if notified of the possibility of such damages, arising from any use of this publication or its contents.

Other than disclosures relating to Barclays, the information contained in this publication has been obtained from sources that Barclays Research believes to be reliable, but Barclays does not represent or warrant that it is accurate or complete. Barclays is not responsible for, and makes no warranties whatsoever as to, the information or opinions contained in any written, electronic, audio or video presentations of third parties that are accessible via a direct hyperlink in this publication or via a hyperlink to a third-party web site ('Third-Party Content'). Any such Third-Party Content has not been adopted or endorsed by Barclays, does not represent the views or opinions of Barclays, and is not incorporated by reference into this publication. Third-Party Content is provided for information purposes only and Barclays has not independently verified its accuracy or completeness.

The views in this publication are solely and exclusively those of the authoring analyst(s) and are subject to change, and Barclays Research has no obligation to update its opinions or the information in this publication. Unless otherwise disclosed herein, the analysts who authored this report have not received any compensation from the subject companies in the past 12 months. If this publication contains recommendations, they are general recommendations that were prepared independently of any other interests, including those of Barclays and/or its affiliates, and/or the subject companies. This publication does not contain personal investment recommendations or investment advice or take into account the individual financial circumstances or investment objectives of the clients who receive it. Barclays is not a fiduciary to any recipient of this publication. The securities and other investments discussed herein may not be suitable for all investors and may not be available for purchase in all jurisdictions. The United States imposed sanctions on certain Chinese companies (https://home.treasury.gov/policy-issues/financial-sanctions/sanctions-programs-and-country-information/chinese-military-companies-sanctions), which may restrict U.S. persons from purchasing securities issued by those companies. Investors must independently evaluate the merits and risks of the investments discussed herein, including any sanctions restrictions that may apply, consult any independent advisors they believe necessary, and exercise independent judgment with regard to any investment decision. The value of and income from any investment may fluctuate from day to day as a result of changes in relevant economic markets (including changes in market liquidity). The information herein is not intended to predict actual results, which may differ substantially from those reflected. Past performance is not necessarily indicative of future results. The information provided does not constitute a financial benchmark and should not be used as a submission or contribution of input data for the purposes of determining a financial benchmark.

Third Party Distribution: Any views expressed in this communication are solely those of Barclays and have not been adopted or endorsed by any third party distributor.

United Kingdom: This document is being distributed (1) only by or with the approval of an authorised person (Barclays Bank PLC) or (2) to, and is directed at (a) persons in the United Kingdom having professional experience in matters relating to investments and who fall within the definition of "investment professionals" in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "Order"); or (b) high net worth companies, unincorporated associations and partnerships and trustees of high value trusts as described in Article 49(2) of the Order; or (c)

other persons to whom it may otherwise lawfully be communicated (all such persons being "Relevant Persons"). Any investment or investment activity to which this communication relates is only available to and will only be engaged in with Relevant Persons. Any other persons who receive this communication should not rely on or act upon it. Barclays Bank PLC is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority and is a member of the London Stock Exchange.

European Economic Area ("EEA"): This material is being distributed to any "Authorised User" located in a Restricted EEA Country by Barclays Bank Ireland PLC. The Restricted EEA Countries are Austria, Bulgaria, Estonia, Finland, Hungary, Iceland, Liechtenstein, Lithuania, Luxembourg, Malta, Portugal, Romania, Slovakia and Slovenia. For any other "Authorised User" located in a country of the European Economic Area, this material is being distributed by Barclays Bank PLC. Barclays Bank Ireland PLC is a bank authorised by the Central Bank of Ireland whose registered office is at 1 Molesworth Street, Dublin 2, Ireland. Barclays Bank PLC is not registered in France with the Autorité des marchés financiers or the Autorité de contrôle prudentiel. Authorised User means each individual associated with the Client who is notified by the Client to Barclays and authorised to use the Research Services. The Restricted EEA Countries will be amended if required.

Finland: Notwithstanding Finland's status as a Restricted EEA Country, Research Services may also be provided by Barclays Bank PLC where permitted by the terms of its cross-border license.

Americas: The Investment Bank of Barclays Bank PLC undertakes U.S. securities business in the name of its wholly owned subsidiary Barclays Capital Inc., a FINRA and SIPC member. Barclays Capital Inc., a U.S. registered broker/dealer, is distributing this material in the United States and, in connection therewith accepts responsibility for its contents. Any U.S. person wishing to effect a transaction in any security discussed herein should do so only by contacting a representative of Barclays Capital Inc. in the U.S. at 745 Seventh Avenue, New York, New York 10019.

Non-U.S. persons should contact and execute transactions through a Barclays Bank PLC branch or affiliate in their home jurisdiction unless local regulations permit otherwise.

This material is distributed in Canada by Barclays Capital Canada Inc., a registered investment dealer, a Dealer Member of IIROC (www.iiroc.ca), and a Member of the Canadian Investor Protection Fund (CIPF).

This material is distributed in Mexico by Barclays Bank Mexico, S.A. and/or Barclays Capital Casa de Bolsa, S.A. de C.V. This material is distributed in the Cayman Islands and in the Bahamas by Barclays Capital Inc., which it is not licensed or registered to conduct and does not conduct business in, from or within those jurisdictions and has not filed this material with any regulatory body in those jurisdictions.

Japan: This material is being distributed to institutional investors in Japan by Barclays Securities Japan Limited. Barclays Securities Japan Limited is a joint-stock company incorporated in Japan with registered office of 6-10-1 Roppongi, Minato-ku, Tokyo 106-6131, Japan. It is a subsidiary of Barclays Bank PLC and a registered financial instruments firm regulated by the Financial Services Agency of Japan. Registered Number: Kanto Zaimukyokucho (kinsho) No. 143.

Asia Pacific (excluding Japan): Barclays Bank PLC, Hong Kong Branch is distributing this material in Hong Kong as an authorised institution regulated by the Hong Kong Monetary Authority. Registered Office: 41/F, Cheung Kong Center, 2 Queen's Road Central, Hong Kong.

All Indian securities-related research and other equity research produced by Barclays' Investment Bank are distributed in India by Barclays Securities (India) Private Limited (BSIPL). BSIPL is a company incorporated under the Companies Act, 1956 having CIN U67120MH2006PTC161063. BSIPL is registered and regulated by the Securities and Exchange Board of India (SEBI) as a Research Analyst: INH000001519; Portfolio Manager INP000002585; Stock Broker INZ000269539 (member of NSE and BSE); Depository Participant with the National Securities & Depositories Limited (NSDL): DP ID: IN-DP-NSDL-299-2008; Investment Adviser: INA000000391. BSIPL is also registered as a Mutual Fund Advisor having AMFI ARN No. 53308.The registered office of BSIPL is at 208, Ceejay House, Shivsagar Estate, Dr. A. Besant Road, Worli, Mumbai – 400 018, India. Telephone No: +91 22 67196363. Fax number: +91 22 67196399. Any other reports produced by Barclays' Investment Bank are distributed in India by Barclays Bank PLC, India Branch, an associate of BSIPL in India that is registered with Reserve Bank of India (RBI) as a Banking Company under the provisions of The Banking Regulation Act, 1949 (Regn No BOM43) and registered with SEBI as Merchant Banker (Regn No INM000002129) and also as Banker to the Issue (Regn No INBI00000950). Barclays Investments and Loans (India) Limited, registered with RBI as Non Banking Financial Company (Regn No RBI CoR-07-00258), and Barclays Wealth Trustees (India) Private Limited, registered with Registrar of Companies (CIN U93000MH2008PTC188438), are associates of BSIPL in India that are not authorised to distribute any reports produced by Barclays' Investment Bank.

This material is distributed in Singapore by the Singapore Branch of Barclays Bank PLC, a bank licensed in Singapore by the Monetary Authority of Singapore. For matters in connection with this material, recipients in Singapore may contact the Singapore branch of Barclays Bank PLC, whose registered address is 10 Marina Boulevard, #23-01 Marina Bay Financial Centre Tower 2, Singapore 018983.

This material, where distributed to persons in Australia, is produced or provided by Barclays Bank PLC.

This communication is directed at persons who are a "Wholesale Client" as defined by the Australian Corporations Act 2001.

Please note that the Australian Securities and Investments Commission (ASIC) has provided certain exemptions to Barclays Bank PLC (BBPLC) under paragraph 911A(2)(l) of the Corporations Act 2001 from the requirement to hold an Australian financial services licence (AFSL) in respect of financial services provided to Australian Wholesale Clients, on the basis that BBPLC is authorised by the Prudential Regulation Authority of the United Kingdom (PRA) and regulated by the Financial Conduct Authority (FCA) of the United Kingdom and the PRA under United Kingdom laws. The United Kingdom has laws which differ from Australian laws. To the extent that this communication involves the provision of financial services by BBPLC to Australian Wholesale Clients, BBPLC relies on the relevant exemption from the requirement to hold an AFSL. Accordingly, BBPLC does not hold an AFSL.

This communication may be distributed to you by either: (i) Barclays Bank PLC directly or (ii) Barrenjoey Markets Pty Limited (ACN 636 976 059, "Barrenjoey"), the holder of Australian Financial Services Licence (AFSL) 521800, a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC.

This material, where distributed in New Zealand, is produced or provided by Barclays Bank PLC. Barclays Bank PLC is not registered, filed with or approved by any New Zealand regulatory authority. This material is not provided under or in accordance with the Financial Markets Conduct Act of 2013 ("FMCA"), and is not a disclosure document or "financial advice" under the FMCA. This material is distributed to you by either: (i) Barclays Bank PLC directly or (ii) Barrenjoey Markets Pty Limited ("Barrenjoey"), a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC. This material may only be distributed to "wholesale investors" that meet the "investment business", "investment activity", "large", or "government agency" criteria specified in Schedule 1 of the FMCA.

Middle East: Nothing herein should be considered investment advice as defined in the Israeli Regulation of Investment Advisory, Investment Marketing and Portfolio Management Law, 1995 ("Advisory Law"). This document is being made to eligible clients (as defined under the Advisory Law) only. Barclays Israeli branch previously held an investment marketing license with the Israel Securities Authority but it cancelled such license on 30/11/2014 as it solely provides its services to eligible clients pursuant to available exemptions under the Advisory Law, therefore a license with the Israel Securities Authority is not required. Accordingly, Barclays does not maintain an insurance coverage pursuant to the Advisory Law.

This material is distributed in the United Arab Emirates (including the Dubai International Financial Centre) and Qatar by Barclays Bank PLC. Barclays Bank PLC in the Dubai International Financial Centre (Registered No. 0060) is regulated by the Dubai Financial Services Authority (DFSA). Principal place of business in the Dubai International Financial Centre: The Gate Village, Building 4, Level 4, PO Box 506504, Dubai, United Arab Emirates. Barclays Bank PLC-DIFC Branch, may only undertake the financial services activities that fall within the scope of its existing DFSA licence. Related financial products or services are only available to Professional Clients, as defined by the Dubai Financial Services Authority. Barclays Bank PLC in the UAE is regulated by the Central Bank of the UAE and is licensed to conduct business activities as a branch of a commercial bank incorporated outside the UAE in Dubai (Licence No.: 13/1844/2008, Registered Office: Building No. 6, Burj Dubai Business Hub, Sheikh Zayed Road, Dubai City) and Abu Dhabi (Licence No.: 13/952/2008, Registered Office: Al Jazira Towers, Hamdan Street, PO Box 2734, Abu Dhabi). This material does not constitute or form part of any offer to issue or sell, or any solicitation of any offer to subscribe for or purchase, any securities or investment products in the UAE (including the Dubai International Financial Centre) and accordingly should not be construed as such. Furthermore, this information is being made available on the basis that the recipient acknowledges and understands that the entities and securities to which it may relate have not been approved, licensed by or registered with the UAE Central Bank, the Dubai Financial Services Authority or any other relevant licensing authority or governmental agency in the UAE. The content of this report has not been approved by or filed with the UAE Central Bank or Dubai Financial Services Authority. Barclays Bank PLC in the Qatar Financial Centre (Registered No. 00018) is authorised by the Qatar Financial Centre Regulatory Authority (QFCRA). Barclays Bank PLC-QFC Branch may only undertake the regulated activities that fall within the scope of its existing QFCRA licence. Principal place of business in Qatar: Qatar Financial Centre, Office 1002, 10th Floor, QFC Tower, Diplomatic Area, West Bay, PO Box 15891, Doha, Qatar. Related financial products or services are only available to Business Customers as defined by the Qatar Financial Centre Regulatory Authority.

Russia: This material is not intended for investors who are not Qualified Investors according to the laws of the Russian Federation as it might contain information about or description of the features of financial instruments not admitted for public offering and/or circulation in the Russian Federation and thus not eligible for non-Qualified Investors. If you are not a Qualified Investor according to the laws of the Russian Federation, please dispose of any copy of this material in your possession.

IRS Circular 230 Prepared Materials Disclaimer: Barclays does not provide tax advice and nothing contained herein should be construed to be tax advice. Please be advised that any discussion of U.S. tax matters contained herein (including any attachments) (i) is not intended or written to be used, and cannot be used, by you for the purpose of avoiding U.S. tax-related penalties; and (ii) was written to support the promotion or marketing of the transactions or other matters addressed herein. Accordingly, you should seek advice based on your particular circumstances from an independent tax advisor.

High Grade Utilities

NiSource (NI): Strategy Update Confirms Stable Credit Goals, Upgrade to Overweight

CORE

Srinjoy Banerjee, CFA
+1 212 526 3521
srinjoy.banerjee@barclays.com
BCI, US

Dylan Paup, CFA
+1 212 526 6961
dylan.paup@barclays.com
BCI, US

Key Points: 1) NI completed its strategic review, after considering a large number of options, by selecting a minority stake sale in NIPSCO, 2) Target FFO/debt was raised to 14-16%, from 14-15%, 3) Net-Zero (Scope 1 and 2) target by 2040.

Trade Ideas

- Buy NI 1.700% 2031s/ NI 4.800% 2044s/ NI 4.375% 2047s
- Buy NI 5.650% Perp

Investment Summary

We upgrade NiSource (NI) to Overweight following its investor day/strategy update, providing clarity on the credit trajectory. While management confirmed exploring a number of options, including a sale of the company, the ultimate option selected was a minority stake sale at NIPSCO. NiSource maintained its credit ratings goals, and, positively, increased its FFO/debt target to 14-16% from 14-15%. The sale of a minority interest in NIPSCO ($6.9bn rate base, of which $4.9bn Electric and $2.0bn Natural Gas) is expected to support financing for a $15bn capital investment plan through 2023-27.

With NiSource requiring 13% FFO/debt to maintain Baa2 ratings at Moody's (17% for an upgrade) and 13% at S&P (16% for an upgrade), we see the strategic update as credit supportive through maintaining a robust cushion versus downgrade thresholds. While the minority stake sale is at NIPSCO, an opco with a greater rate base in Electric operations versus natural gas, we do not think it materially weakens NiSource's risk profile.

NiSource has underperformed YTD, but has been outperforming the Utility index over the last three months. We think NiSource has scope to sustain outperformance versus the Utility index as the strategic update improves visibility into credit metric targets and confirms rating goals.

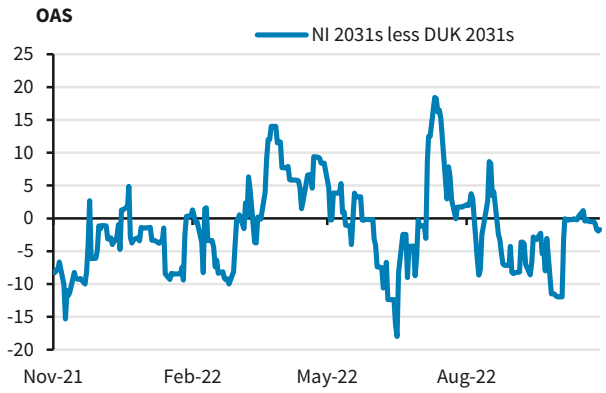
This document is intended for institutional investors and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors under U.S. FINRA Rule 2242. Barclays trades the securities covered in this report for its own account and on a discretionary basis on behalf of certain clients. Such trading interests may be contrary to the recommendations offered in this report.

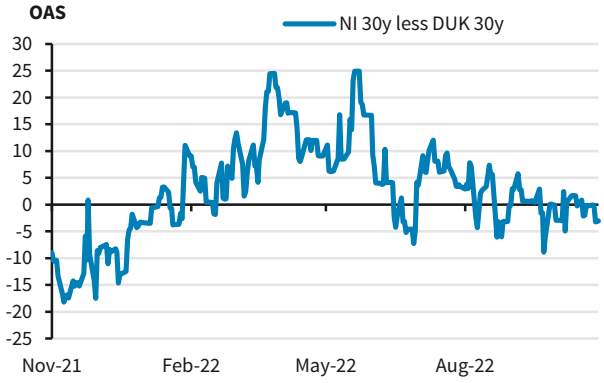
Please see analyst certifications and important disclosures beginning on page 4 .
Completed: 07-Nov-22, 21:19 GMT Released: 07-Nov-22, 21:23 GMT Restricted - External



Issuer	Ticker	Amt Out ($mn)	Moody's	S&P	OAS	OASD	Excess Return 1Month	Excess Return 3Months	Excess Return YTD
Utility Index		549,338	A2/A3	A-/BBB+	154	8.8	43	(48)	(287)
Holdco & Other Custom Index		208,502	Baa1/Baa2	BBB+	154	7.1	24	(44)	(277)
NiSource Inc	NI	8,947	Baa2	BBB+	166	8.4	56	4	(336)

Relative Value

- **Buy NI 1.700% 2031s/ NI 4.800% 2044s/ NI 4.375% 2047s:** At 168bp, NiSource 2031s are at the wider-end of the mid-BBB holdcos (about flat to DUK 2031s and 15bp wide of D 2031s). We would expect NI 2031s to trade mostly tighter (5-10bp) versus DUK holdco given a higher FFO/debt target at NI (14-16% versus 14%). We also note that NiSource has a relatively more flat capital structure versus regular-way utilities (e.g, DUK with substantial amounts of opco debt). NI 2044s and 2047s at 175-195bp is also consistent with DUK levels, and wide of D levels. We also see scope for NI to trade modestly righter (~5-10bp).



- **Buy NI 5.650% Perp:** Quoted at $93.25, the NI perps offer a 18% yield to the June 2023 call. The NI Perps lose equity credit at S&P on the June 2023 call date, given a 100bp coupon margin step up in 2043 (20 years after the call date).

FIGURE 3. **NI 30y less DUK 30y**

Source: Barclays Research

3Q 22 Highlights and Key Drivers

- **3Q 22 results:** We calculate 3Q EBITDA at $360mn, +7.4% y/y, with higher revenue (+13.6% y/y) more than offsetting changes in cost of fuel (+59% y/y). Cash from operations ($129mn, -$107mn y/y) was weaker in the quarter given working capital. Accordingly, FCF in the quarter was weaker y/y, at -$572mn, also reflective of higher capex (+$111mn). We calculate FFO/debt at 14.2%. The company introduced 2023 EPS guidance of $1.50-1.57 (consensus $1.55).

- **NIPSCO Minority interest sale (up to 19.9%):** NiSource remains committed to its NIPSCO business, but believes that a minority interest sale will be an attractive way to finance growth. The combined rate base of NIPSCO Electric ($4.9bn) and Gas ($2.0bn) was $6.9bn in 2021. The blended equity layer at NIPSCO is 52%.

- **Outright sale/sale of natural gas LDCs considered but did not progress:** Having spoken to a lot of different stakeholders, NiSource did not receive a compelling offer for the entire company. The company noted that it saw lower valuations for natural gas LDCs versus NIPSCO electric + natural gas.

- **Financing Plan (2023-27):** With $18bn ($15bn capex, $3bn of dividend) of capital needs over 2023-27, and with $10bn of cash flow, and $6bn of debt + equity issuance (of which $5bn is debt), the company expects the minority interest sale to contribute the balance ($2bn).
- **Credit Metric Targets:** NiSource expects FFO/debt at 14-16% through the plan, compared to 13-14% at end FY22.
- **Generation mix at NIPSCO:** NiSource expects to retire coal by 2026-28, which supports the previously announced target for 90% reduction in GHG by 2030. The generation mix is expected to include 51% renewables in 2030 and 35% natural gas.
- **Net-Zero Target:** NiSource announced a net zero goal (Scope 1 + 2) by 2040. As it does not include Scope 3, NiSource's goal excludes decarbonization of the natural gas fuel transported. That said, NiSource did discuss hydrogen pilots (Columbia Gas of Pennsylvania), as well as renewable natural gas production.
- **Moderating Rate-Base Growth:** NiSource's 2021-24 expected rate case growth was 10-12% previously; for 2021-27 the company is targeting 8-10%. The company mentioned that higher natural gas prices was an influence in how fast it aims to target rate-base growth. 2023 capex was reset lower to $2.8-3.1bn from $3.4-3.7bn previously. NiSource now provides capex guidance through 2027, with 2024 capex raised to $3.0-3.3bn from $1.9-2.2bn previously. The distribution charge in the customer bill is expected to increase by less than 5.0% per year through 2023-27.

Analyst(s) Certification(s):
We, Srinjoy Banerjee, CFA and Dylan Paup, CFA, hereby certify (1) that the views expressed in this research report accurately reflect our personal views about any or all of the subject securities or issuers referred to in this research report and (2) no part of our compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed in this research report.

Important Disclosures:
This document is intended for institutional investors and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors under U.S. FINRA Rule 2242. Barclays trades the securities covered in this report for its own account and on a discretionary basis on behalf of certain clients. Such trading interests may be contrary to the recommendations offered in this report.

Barclays Research is produced by the Investment Bank of Barclays Bank PLC and its affiliates (collectively and each individually, "Barclays").

All authors contributing to this research report are Research Analysts unless otherwise indicated. The publication date at the top of the report reflects the local time where the report was produced and may differ from the release date provided in GMT.

Availability of Disclosures:
For current important disclosures regarding any issuers which are the subject of this research report please refer to https://publicresearch.barclays.com or alternatively send a written request to: Barclays Research Compliance, 745 Seventh Avenue, 13th Floor, New York, NY 10019 or call +1-212-526-1072.

Barclays Capital Inc. and/or one of its affiliates does and seeks to do business with companies covered in its research reports. As a result, investors should be aware that Barclays may have a conflict of interest that could affect the objectivity of this report. Barclays Capital Inc. and/or one of its affiliates regularly trades, generally deals as principal and generally provides liquidity (as market maker or otherwise) in the debt securities that are the subject of this research report (and related derivatives thereof). Barclays trading desks may have either a long and / or short position in such securities, other financial instruments and / or derivatives, which may pose a conflict with the interests of investing customers. Where permitted and subject to appropriate information barrier restrictions, Barclays fixed income research analysts regularly interact with its trading desk personnel regarding current market conditions and prices. Barclays fixed income research analysts receive compensation based on various factors including, but not limited to, the quality of their work, the overall performance of the firm (including the profitability of the Investment Banking Department), the profitability and revenues of the Markets business and the potential interest of the firm's investing clients in research with respect to the asset class covered by the analyst. To the extent that any historical pricing information was obtained from Barclays trading desks, the firm makes no representation that it is accurate or complete. All levels, prices and spreads are historical and do not necessarily represent current market levels, prices or spreads, some or all of which may have changed since the publication of this document. Barclays Research Department produces various types of research including, but not limited to, fundamental analysis, equity-linked analysis, quantitative analysis, and trade ideas. Recommendations and trade ideas contained in one type of Barclays Research may differ from those contained in other types of Barclays Research, whether as a result of differing time horizons, methodologies, or otherwise.

Primary Issuers/Bonds
NISOURCE FINANCE CORP, Overweight, CD/D/E/J/K/L/M

Valuation Methodology: NiSource (NI) provided clarity on its credit trajectory. While management confirmed exploring a number of options, including a sale of the company, the ultimate option selected was a minority stake sale at NIPSCO. NiSource maintained its credit ratings goals, and, positively, increased its FFO/debt target to 14-16% from 14-15%. The sale of a minority interest in NIPSCO ($6.9bn rate base, of which $4.9bn electric and $2.0bn natural gas) is expected to support financing for a $15bn capital investment plan through 2023-27.

Risks that May Impede Achievement of the Rating: Risk to the downside include a strategic shift away from maintaining a sufficient credit metric versus requirements for its ratings

Representative Bond: NI 4.8 02/15/44 (USD 80.65, 03-Nov-2022)

Explanation of the Barclays Research Corporate Credit Sector Rating System

Overweight (OW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to exceed the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to exceed the six-month total return of the relevant index.

Market Weight (MW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to be in line with the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to be in line with the six-month total return of the relevant index.

Underweight (UW):
For sectors rated against the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or the Bloomberg EM USD Corporate and Quasi-Sovereign Index, the analyst expects the six-month excess return of the sector to be less than the six-month excess return of the relevant index.

For sectors rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index, the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials, the Bloomberg Pan-European High Yield Finance Index or the Bloomberg EM Asia USD High Yield Corporate Credit Index, the analyst expects the six-month total return of the sector to be less than the six-month total return of the relevant index.

Sector definitions:
Sectors in U.S. High Grade Research are defined using the sector definitions of the Bloomberg U.S. Credit Index and are rated against the Bloomberg U.S. Credit Index.

Sectors in U.S. High Yield Research are defined using the sector definitions of the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index and are rated against the Bloomberg U.S. High Yield 2% Issuer Capped Credit Index.

Sectors in European High Grade Research are defined using the sector definitions of the Bloomberg Pan-European Credit Index and are rated against the Bloomberg Pan-European Credit Index.

Sectors in Industrials and Utilities in European High Yield Research are defined using the sector definitions of the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials and are rated against the Bloomberg Pan-European High Yield 3% Issuer Capped Credit Index excluding Financials.

Sectors in Financials in European High Yield Research are defined using the sector definitions of the Bloomberg Pan-European High Yield Finance Index and are rated against the Bloomberg Pan-European High Yield Finance Index.

Sectors in Asia High Grade Research are defined on Barclays Live and are rated against the Bloomberg EM Asia USD High Grade Credit Index.

Sectors in Asia High Yield Research are defined on Barclays Live and are rated against the Bloomberg EM Asia USD High Yield Corporate Credit Index.

Sectors in EEMEA and Latin America Research are defined on Barclays Live and are rated against the Bloomberg EM USD Corporate and Quasi Sovereign Index. These sectors may contain both High Grade and High Yield issuers.

To view sector definitions and monthly sector returns for Asia, EEMEA and Latin America Research, go to https://live.barcap.com/go/research/EMSectorReturns on Barclays Live.

Explanation of the Barclays Research Corporate Credit Rating System

For all High Grade issuers covered in the US, Europe or Asia, and for all issuers in Latin America and EEMEA, the credit rating system is based on the analyst's view of the expected excess return over a six-month period of the issuer's index-eligible corporate debt securities* relative to the expected excess return of the relevant sector, as specified on the report.

Overweight (OW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to exceed the six-month expected excess return of the relevant sector.

Market Weight (MW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to be in line with the six-month expected excess return of the relevant sector.

Underweight (UW): The analyst expects the six-month excess return of the issuer's index-eligible corporate debt securities to be less than the six-month expected excess return of the relevant sector.

Rating Suspended (RS): The rating has been suspended temporarily due to market events that make coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Coverage Suspended (CS): Coverage of this issuer has been temporarily suspended.

Not Covered (NC): Barclays' fundamental credit research team does not provide formal, continuous coverage of this issuer and has not assigned a rating to the issuer or its debt securities. Any analysis, opinion or trade recommendation provided on a Not Covered issuer or its debt securities is valid only as of the publication date of this report and there should be no expectation that additional reports relating to the Not Covered issuer or its debt securities will be published thereafter.

For all High Yield issuers (excluding those covered in EEMEA or Latin America), the credit rating system is based on the analyst's view of the expected total returns over a six-month period of the rated debt security relative to the expected total return of the relevant sector, as specified on the report.

Overweight (OW): The analyst expects the six-month total return of the debt security subject to this rating to exceed the six-month expected total return of the relevant sector.

Market Weight (MW): The analyst expects the six-month total return of the debt security subject to this rating to be in line with the six-month expected total return of the relevant sector.

Underweight (UW): The analyst expects the six-month total return of the rated debt security subject to this rating to be less than the six-month expected total return of the relevant sector.

Rating Suspended (RS): The rating has been suspended temporarily due to market events that make coverage impracticable or to comply with applicable regulations and/or firm policies in certain circumstances including where the Investment Bank of Barclays Bank PLC is acting in an advisory capacity in a merger or strategic transaction involving the company.

Coverage Suspended (CS): Coverage of this issuer has been temporarily suspended.

Not Covered (NC): Barclays' fundamental credit research team does not provide formal, continuous coverage of this issuer and has not assigned a rating to the issuer or its debt securities. Any analysis, opinion or trade recommendation provided on a Not Covered issuer or its debt securities is valid only as of the publication date of this report and there should be no expectation that additional reports relating to the Not Covered issuer or its debt securities will be published thereafter.

Where a recommendation is made at the issuer level, it does not apply to any sanctioned securities, where trading in such securities would be prohibited under applicable law, including sanctions laws and regulations.

*In EEMEA and Latin America (and in certain other limited instances in other regions), analysts may occasionally rate issuers that are not part of the Bloomberg U.S. Credit Index, the Bloomberg Pan-European Credit Index, the Bloomberg EM Asia USD High Grade Credit Index or Bloomberg EM USD Corporate and Quasi Sovereign Index. In such cases the rating will reflect the analyst's view of the expected excess return over a six-month period of the issuer's corporate debt securities relative to the expected excess return of the relevant sector, as specified on the report.

Types of investment recommendations produced by Barclays FICC Research:
In addition to any ratings assigned under Barclays' formal rating systems, this publication may contain investment recommendations in the form of trade ideas, thematic screens, scorecards or portfolio recommendations that have been produced by analysts in FICC Research. Any such investment recommendations produced by non-Credit Research teams shall remain open until they are subsequently amended, rebalanced or closed in a future research report. Any such investment recommendations produced by the Credit Research teams are valid at current market conditions and may not be otherwise relied upon.

Disclosure of other investment recommendations produced by Barclays FICC Research:
Barclays FICC Research may have published other investment recommendations in respect of the same securities/instruments recommended in this research report during the preceding 12 months. To view all investment recommendations published by Barclays FICC Research in the preceding 12 months please refer to https://live.barcap.com/go/research/Recommendations.

Barclays does not assign ratings to asset backed securities. Barclays Capital Inc. and/or one of its affiliates may have acted as an underwriter for public offerings of any asset backed securities that are otherwise recommended in trade ideas contained within its securitised research reports.

Disclaimer:
This publication has been produced by Barclays Research Department in the Investment Bank of Barclays Bank PLC and/or one or more of its affiliates (collectively and each individually, "Barclays").

It has been prepared for institutional investors and not for retail investors. It has been distributed by one or more Barclays affiliated legal entities listed below or by an independent and non-affiliated third-party entity (as may be communicated to you by such third-party entity in its communications with you). It is provided for information purposes only, and Barclays makes no express or implied warranties, and expressly disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to any data included in this publication. To the extent that this publication states on the front page that it is intended for institutional investors and is not subject to all of the independence and disclosure standards applicable to debt research reports prepared for retail investors under U.S. FINRA Rule 2242, it is an "institutional debt research report" and distribution to retail investors is strictly prohibited. Barclays also distributes such institutional debt research reports to various issuers, media, regulatory and academic organisations for their own internal informational news gathering, regulatory or academic purposes and not for the purpose of making investment decisions regarding any debt securities. Media organisations are prohibited from re-publishing any opinion or recommendation concerning a debt issuer or debt security contained in any Barclays institutional debt research report. Any such recipients that do not want to continue receiving Barclays institutional debt research reports should contact debtresearch@barclays.com. Clients that are subscribed to receive equity research reports, will not receive certain cross asset research reports co-authored by equity and FICC research analysts that are distributed as "institutional debt research reports" unless they have agreed to accept such reports. Eligible clients may get access to such cross asset reports by contacting debtresearch@barclays.com. Barclays will not treat unauthorized recipients of this report as its clients and accepts no liability for use by them of the contents which may not be suitable for their personal use. Prices shown are indicative and Barclays is not offering to buy or sell or soliciting offers to buy or sell any financial instrument.

Without limiting any of the foregoing and to the extent permitted by law, in no event shall Barclays, nor any affiliate, nor any of their respective officers, directors, partners, or employees have any liability for (a) any special, punitive, indirect, or consequential damages; or (b) any lost profits, lost revenue, loss of anticipated savings or loss of opportunity or other financial loss, even if notified of the possibility of such damages, arising from any use of this publication or its contents.

Other than disclosures relating to Barclays, the information contained in this publication has been obtained from sources that Barclays Research believes to be reliable, but Barclays does not represent or warrant that it is accurate or complete. Barclays is not responsible for, and makes no warranties whatsoever as to, the information or opinions contained in any written, electronic, audio or video presentations of third parties that are accessible via a direct hyperlink in this publication or via a hyperlink to a third-party web site ('Third-Party Content'). Any such Third-Party Content has not been adopted or endorsed by Barclays, does not represent the views or opinions of Barclays, and is not incorporated by reference into this publication. Third-Party Content is provided for information purposes only and Barclays has not independently verified its accuracy or completeness.

The views in this publication are solely and exclusively those of the authoring analyst(s) and are subject to change, and Barclays Research has no obligation to update its opinions or the information in this publication. Unless otherwise disclosed herein, the analysts who authored this report have not received any compensation from the subject companies in the past 12 months. If this publication contains recommendations, they are general recommendations that were prepared independently of any other interests, including those of Barclays and/or its affiliates, and/or the subject companies. This publication does not contain personal investment recommendations or investment advice or take into account the individual financial circumstances or investment objectives of the clients who receive it. Barclays is not a fiduciary to any recipient of this publication. The securities and other investments discussed herein may not be suitable for all investors and may not be available for purchase in all jurisdictions. The United States imposed sanctions on certain Chinese companies (https://home.treasury.gov/policy-issues/financial-sanctions/sanctions-programs-and-country-information/chinese-military-companies-sanctions), which may restrict U.S. persons from purchasing securities issued by those companies. Investors must independently evaluate the merits and risks of the investments discussed herein, including any sanctions restrictions that may apply, consult any independent advisors they believe necessary, and exercise independent judgment with regard to any investment decision. The value of and income from any investment may fluctuate from day to day as a result of changes in relevant economic markets (including changes in market liquidity). The information herein is not intended to predict actual results, which may differ substantially from those reflected. Past performance is not necessarily indicative of future results. This material is distributed in Singapore by the Singapore Branch of Barclays Bank PLC, a bank licensed in Singapore by the Monetary Authority of Singapore. For matters in connection with this material, recipients in Singapore may contact the Singapore branch of Barclays Bank PLC, whose registered address is 10 Marina Boulevard, #23-01 Marina Bay Financial Centre Tower 2, Singapore 018983.

This material, where distributed to persons in Australia, is produced or provided by Barclays Bank PLC.

This communication is directed at persons who are a "Wholesale Client" as defined by the Australian Corporations Act 2001.

Please note that the Australian Securities and Investments Commission (ASIC) has provided certain exemptions to Barclays Bank PLC (BBPLC) under paragraph 911A(2)(l) of the Corporations Act 2001 from the requirement to hold an Australian financial services licence (AFSL) in respect of financial services provided to Australian Wholesale Clients, on the basis that BBPLC is authorised by the Prudential Regulation Authority of the United Kingdom (PRA) and regulated by the Financial Conduct Authority (FCA) of the United Kingdom and the PRA under United Kingdom laws. The United Kingdom has laws which differ from Australian laws. To the extent that this communication involves the provision of financial services by BBPLC to Australian Wholesale Clients, BBPLC relies on the relevant exemption from the requirement to hold an AFSL. Accordingly, BBPLC does not hold an AFSL.

This communication may be distributed to you by either: (i) Barclays Bank PLC directly or (ii) Barrenjoey Markets Pty Limited (ACN 636 976 059, "Barrenjoey"), the holder of Australian Financial Services Licence (AFSL) 521800, a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC.

This material, where distributed in New Zealand, is produced or provided by Barclays Bank PLC. Barclays Bank PLC is not registered, filed with or approved by any New Zealand regulatory authority. This material is not provided under or in accordance with the Financial Markets Conduct Act of 2013 ("FMCA"), and is not a disclosure document or "financial advice" under the FMCA. This material is distributed to you by either: (i) Barclays Bank PLC directly or (ii) Barrenjoey Markets Pty Limited ("Barrenjoey"), a non-affiliated third party distributor, where clearly identified to you by Barrenjoey. Barrenjoey is not an agent of Barclays Bank PLC. This material may only be distributed to "wholesale investors" that meet the "investment business", "investment activity", "large", or "government agency" criteria specified in Schedule 1 of the FMCA.

Middle East: Nothing herein should be considered investment advice as defined in the Israeli Regulation of Investment Advisory, Investment Marketing and Portfolio Management Law, 1995 ("Advisory Law"). This document is being made to eligible clients (as defined under the Advisory Law) only. Barclays Israeli branch previously held an investment marketing license with the Israel Securities Authority but it cancelled such license on 30/11/2014 as it solely provides its services to eligible clients pursuant to available exemptions under the Advisory Law, therefore a license with the Israel Securities Authority is not required. Accordingly, Barclays does not maintain an insurance coverage pursuant to the Advisory Law.

This material is distributed in the United Arab Emirates (including the Dubai International Financial Centre) and Qatar by Barclays Bank PLC. Barclays Bank PLC in the Dubai International Financial Centre (Registered No. 0060) is regulated by the Dubai Financial Services Authority (DFSA). Principal place of business in the Dubai International Financial Centre: The Gate Village, Building 4, Level 4, PO Box 506504, Dubai, United Arab Emirates. Barclays Bank PLC-DIFC Branch, may only undertake the financial services activities that fall within the scope of its existing DFSA licence. Related financial products or services are only available to Professional Clients, as defined by the Dubai Financial Services Authority. Barclays Bank PLC in the UAE is regulated by the Central Bank of the UAE and is licensed to conduct business activities as a branch of a commercial bank incorporated outside the UAE in Dubai (Licence No.: 13/1844/2008, Registered Office: Building No. 6, Burj Dubai Business Hub, Sheikh Zayed Road, Dubai City) and Abu Dhabi (Licence No.: 13/952/2008, Registered Office: Al Jazira Towers, Hamdan Street, PO Box 2734, Abu Dhabi). This material does not constitute or form part of any offer to issue or sell, or any solicitation of any offer to subscribe for or purchase, any securities or investment products in the UAE (including the Dubai International Financial Centre) and accordingly should not be construed as such. Furthermore, this information is being made available on the basis that the recipient acknowledges and understands that the entities and securities to which it may relate have not been approved, licensed by or registered with the UAE Central Bank, the Dubai Financial Services Authority or any other relevant licensing authority or governmental agency in the UAE. The content of this report has not been approved by or filed with the UAE Central Bank or Dubai Financial Services Authority. Barclays Bank PLC in the Qatar Financial Centre (Registered No. 00018) is authorised by the Qatar Financial Centre Regulatory Authority (QFCRA). Barclays Bank PLC-QFC Branch may only undertake the regulated activities that fall within the scope of its existing QFCRA licence. Principal place of business in Qatar: Qatar Financial Centre, Office 1002, 10th Floor, QFC Tower, Diplomatic Area, West Bay, PO Box 15891, Doha, Qatar. Related financial products or services are only available to Business Customers as defined by the Qatar Financial Centre Regulatory Authority.

Russia: This material is not intended for investors who are not Qualified Investors according to the laws of the Russian Federation as it might contain information about or description of the features of financial instruments not admitted for public offering and/or circulation in the Russian Federation and thus not eligible for non-Qualified Investors. If you are not a Qualified Investor according to the laws of the Russian Federation, please dispose of any copy of this material in your possession.

IRS Circular 230 Prepared Materials Disclaimer: Barclays does not provide tax advice and nothing contained herein should be construed to be tax advice. Please be advised that any discussion of U.S. tax matters contained herein (including any attachments) (i) is not intended or written to be used, and cannot be used, by you for the purpose of avoiding U.S. tax-related penalties; and (ii) was written to support the promotion or marketing of the transactions or other matters addressed herein. Process of Elimination — NI's AD to Focus on Organic Growth & Cost Efficiencies

Bottom Line:

At a ~6% discount to the group and the stock's almost 9% underperformance since its June relative peak, we believe expectations are sufficiently low and create a favorable risk/return in NI shares heading into the company's analyst day next week. We believe most investors do not expect any major announcement attached to the company's strategic review. **As we eliminate these announcements from the narrative, we are left with an analyst day and the primary driver of relative performance a function of the extension and executability of the company's growth outlook.**

Key Points

Management has been clear it remains confident in the company's standalone prospects and sees opportunities to enhance an already robust opportunity set. However, the company also has a duty to "benchmark" its organic plan against various strategic scenarios to maximize shareholder value. Given its organic double-digit rate base growth, favorable recovery mechanisms, and manageable equity needs, we believe it is very unlikely to see the initiation of a process that could lead to the sale of the company. We do however expect management to retain the option to sell one of its smaller gas LDCs given the continued private demand for infrastructure assets to more efficiently finance future equity needs.

Instead, we expect the focus to be on the extension/drivers behind its five-year growth outlook. We also expect management to outline how it will drive additional efficiencies out of its cost structure as well as provide an update on the timing/costs related to its 2018 IRP projects and an update on its 2021 IRP. **Given the company's low-double-digit organic rate base growth, modest rate lag, and continued financing needs beyond 2024, we expect management to lay out a 6-8% long-term growth rate (math inside).**

We expect management to initiate a 2023 outlook of $1.51-1.57 in line with management's 5-7% guidance off 2021 EPS. We have lowered our 2022 estimate to $1.44 to reflect the delay in the CEOH gas case. Our 2023 estimate remains $1.54 as higher preferred interest costs are offset by the full-year impact of the CEOH case. Finally, our 2024 moves to $1.69 due to higher preferred interest expenses and timing of the annualized impact of the company's NIPSCO rate case. **Our revised forecast suggests an EPS CAGR through 2024 of 7.4%, in line with the bottom end of the company's 7-9% current guidance.**

Key Changes

EBITDA	$1,789	$1,964	$2,137↓	$2,345

Consensus Estimates				
	2020A	2021A	2022E	2023E
EPS			$1.45	$1.54

Valuation				
	2020A	2021A	2022E	2023E
P/E	19.4x	18.8x	17.7x	16.7x
Div. Yield (%)	3.3%	3.4%	3.6%	3.9%

QTR. EPS	Q1	Q2	Q3	Q4
2020A	$0.76	$0.13	$0.09	$0.34
2021A	$0.73	$0.13	$0.11	$0.39
2022E	$0.75a	$0.12a	$0.09	$0.48
2023E	$0.93	$0.15	$0.11	$0.34

Our Thesis

We like several aspects of NI following the sale of Columbia Gas of Massachusetts and removal of the previously guided $500-700mm equity issuance overhang, which we believe meaningfully de-risked the story.

Scenarios

Valuation

Our target price is the product of a P/E-based sum of the parts. We utilize a regulated-group average multiple using 2024E EPS as base valuation and then make specific adjustments to reflect our current view of the fundamental outlook.

Upside Scenario $32.00

Our upside scenario reflects continued multiple expansion associated with the company's premium and above-average earnings and dividend growth profile.

Downside Scenario $21.00

Our downside scenario reflects a tightening monetary policy and a deceleration of the company's rate base growth.

Key Catalysts

Use of proceeds from CMA sale. Potential for further asset rotation.

Company Description

NiSource, Inc. is a regulated utility holding company, serving approximately 3.5 million natural gas customers and 500,000 electric customers across seven states. Through its Columbia Gas and NIPSCO brands, it provides natural gas, electricity, and other products and services. The company was founded in 1987 and is headquartered in Merrillville, Indiana.

Process of Elimination – We Expect NI's Analyst Day to Focus on Executing Its Organic Growth Opportunities & Cost Efficiencies

Bottom Line: At a ~6% discount to the group and with the stock's almost 9% underperformance since its June relative peak, we believe expectations are sufficiently low which creates a favorable risk/return in NI shares heading into the company's analyst day next week. Over the course of the last several months we believe investors' expectations have come in materially regarding any major announcement attached to the company's strategic review. While we continue to believe it is highly unlikely that the company will announce its intent to pursue a process that would lead to the sale of the company, we do see the potential for management to leave open the option to sell one of its smaller gas LDCs as a means of more efficiently financing any future equity needs. However, we believe there is little to no expectation for an announcement on either front. **We maintain our Outperform rating on NI shares and our $28/share target price which reflects the current MTM of our peer group utility multiples used in our SOTP valuation framework.**
